CALIFORNIA LEGISLATURE

FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

FIRST LEGISLATIVE DAY

FIRST CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Monday, January 6, 1947

Pursuant to the requirements of the Constitution of the State of California and the law, at the hour of 12 o'clock meridian, the Assembly of the Fifty-seventh (General) Session of the Legislature of California was called to order by Arthur A. Ohnimus, Chief Clerk of the Fifty-sixth Session.

In conformity with the law, the following officers of the Fifty-sixth Session were also present: Geraldine B. Hadsell, Minute Clerk, and Wilkie Ogg, Sergeant-at-Arms.

PRAYER

Upon invitation of the Chief Clerk, the following prayer was offered by the Reverend Torrance Phelps, Chaplain of the Assembly for the Fifty-sixth (Regular) Session:

Eternal God:

May we rejoice today that we assemble in this free land, with its freedom of thought, of speech, and of assembly. Let us be grateful that we live in a Democracy, which has endured the greatest ordeal of history and has demonstrated that it is the most efficient form of government on earth.

Let us guard our American way which has provided the highest standard of living and of education and offers equal opportunity to all.

Let us cherish the part that we play, as agents of Democracy, responsible for the efficiency and sucess of the Government of California.

Let us strive to make this State a model commonwealth, free from sectionalism and corruption, and labor for the welfare of all classes of people.

Inspire us O God, in this grave Atomic Age, when the fate of civilization is at stake, to cherish those liberties which cost so much blood, and to foster the Divine Faith which is the main hope of the survival and peace of mankind.—AMEN.

CERTIFICATE FROM SECRETARY OF STATE

The Chief Clerk read the following certificate of duly elected Members of the Assembly of the Fifty-seventh Session of the Legislature of the State of California:

STATE OF CALIFORNIA
OFFICE OF SECRETARY OF STATE

I, FRANK M. JORDAN, Secretary of State of the State of California, do hereby certify that the following is a complete list of those duly elected at the general election held on the fifth day of November, A.D. 1946, to represent the people of the State of California as Members of the Assembly at the Fifty-seventh Session of the Legislature of said State, as appears from the statement of vote received from the county clerks

of the various counties and the registrars of voters of the County of Los Angeles and City and County of San Francisco, comprising the several Assembly districts of the State of California, said statement of vote being a record of and on file in my office, viz:

Kathryn T. Niehouse	Seventy-ninth	San Diego
Howard K. Cramer	Eightieth	San Diego

[SEAL]

WITNESS my hand and the Great Seal of the State of California, at office in Sacramento, this sixth day of January, A.D. 1947.

FRANK M. JORDAN, Secretary of State

ROLL CALL BY COUNTIES

The Chief Clerk directed that, as the roll of counties was called, the members-elect, representing such counties, should proceed to the Clerk's desk, and take and subscribe to the oath of office.

MEMBERS SWORN IN

As required by Section 9023 of the Government Code, the Chief Clerk called the roll of counties in alphabetical order, and the following members-elect appeared before the bar of the Assembly, presented their certificates of election, and duly qualified by taking and subscribing to the following oath administered by Hon. Frank M. Jordan, Secretary of State of the State of California:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Member of the Assembly for the Fifty-seventh Session of the Legislature of the State of California, according to the best of my ability.

Francis Dunn, Jr., Randal F. Dickey, Bernard A. Sheridan, Marvin Sherwin, Edward J. Carey, Thomas W. Caldecott, Allen G. Thurman, Bert W. Loomis, Lloyd W. Lowrey, George Miller, Jr., Michael J. Burns, James G. Crichton, S. L. Heisinger, George R. Butters, W. E. James, Harry J. Johnson, Ernest C. Crowley, Lester Thomas Davis, William H. Rosenthal, Julian Beck, Walter R. Hinton, C. Don Field, Thomas J. Doyle, Glenn M. Anderson, Albert I. Stewart, T. Fenton Knight, Ernest R. Geddes, Thomas M. Erwin, Elwyn S. Bennett, Jonathan J. Hollibaugh, Montivel A. Burke, John L. E. Collier, Vernon Kilpatrick, Ernest E. Debs, Charles J. Conrad, Laughlin E. Waters, Willard M. Huyck, M. Philip Davis, Lester A. McMillan, Augustus F. Hawkins, Don A. Allen, John C. Lyons, John W. Evans, Gordon R. Hahn, Clayton A. Dills, Vincent Thomas, Ralph C. Dills, William S. Grant, Carl Fletcher, George A. Clarke, Richard H. McCollister, James W. Silliman, Earl W. Stanley, Sam L. Collins, Philip L. Boyd, Chester F. Gannon, Dwight H. Stephenson, Donald L. Grunsky, R. Fred Price, L. Stewart Hinckley, Frank Luckel, Kathryn T. Niehouse, Howard K. Cramer, Bernard R. Brady, Thomas A. Maloney, Albert C. Wollenberg, George D. Collins, Jr., William Clifton Berry, Edward F. O'Day, Raymond W. Blosser, Edward

M. Gaffney, Charles M. Weber, James E. Thorp, Richard J. Dolwig, Alfred W. Robertson, Robert C. Kirkwood, John F. Thompson, Ralph M. Brown, and John B. Cooke.

ANNOUNCEMENT

The Chief Clerk announced that the next order of business was the nomination and election of officers for the Fifty-seventh (General) Session of the Assembly, and declared that nominations for the office of Speaker of the Assembly were now in order.

NOMINATIONS FOR SPEAKER

Mr. Ernest R. Geddes of Pomona placed in nomination for Speaker Mr. Sam L. Collins of Fullerton.

The nomination of Mr. Sam L. Collins was seconded by Mr. Richard H. McCollister of Mill Valley.

Mr. Marvin Sherwin of Piedmont placed in nomination for Speaker Mr. C. Don Field of Glendale.

The nomination of Mr. C. Don Field was seconded by Mr. Albert I. Stewart of Pasadena.

Nominations Closed

Mr. Vincent Thomas of San Pedro moved that the nominations for Speaker be now closed.

Mr. Thomas J. Doyle of Los Angeles seconded the motion.

Motion carried.

ELECTION OF SPEAKER

The roll was called with the following result:

FOR HON. SAM L. COLLINS—Allen, Anderson, Bennett, Berry, Blosser, Brady, Brown, Burns, Carey, Clarke, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Doyle, Dunn, Evans, Fletcher, Gaffney, Geddes, Hawkins, Heisinger, Hollibaugh, Huyck, Johnson, Kilpatrick, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Silliman, Stanley, Thomas, Thompson, Thorp, Thurman, Waters, and Weber—51.

FOR HON. C. DON FIELD—Boyd, Burke, Butters, Caldecott, Collier, Conrad, M. Philip Davis, Dolwig, Erwin, Field, Gannon, Grant, Grunsky, Hahn, Hinckley, Hinton, James, Kirkwood, Knight, Loomis, Sherwin, Stephenson, Stewart, and Wollenberg—24.

Whereupon the Chief Clerk announced the vote of the Assembly, and declared Hon. Sam L. Collins the choice of the Assembly for Speaker for the Fifty-seventh (General) Session of the Legislature.

APPOINTMENT OF COMMITTEE OF ESCORT

The Chief Clerk appointed Messrs. Geddes, McCollister, and Ralph C. Dills as a Select Committee to escort Speaker-elect Hon. Sam L. Collins to the chair.

OATH OF OFFICE ADMINISTERED

Upon arriving at the bar of the Assembly, Speaker-elect Hon. Sam L. Collins took and subscribed to the following oath, administered by Hon. Frank M. Jordan, Secretary of State:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Speaker of the Assembly, according to the best of my ability.

Speaker Presiding

At 12.35 p.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

REMARKS BY SPEAKER COLLINS

Speaker Collins then addressed the Assembly.

MOTION TO PRINT REMARKS BY SPEAKER COLLINS IN JOURNAL

Mr. Rosenthal moved that the following remarks, by Speaker Sam L. Collins, be ordered printed in the Journal:

Motion carried.

Remarks by Speaker Sam L. Collins

Members of the Assembly and Honored Guests: It goes without saying that the honor of being elected your Speaker for the coming session is one which I appreciate more than I can say.

While appreciating the personal honor, let me assure you that I recognize the responsibility as well.

I would not be honest with myself in accepting this position did I not, for the moment at least, allude to the contest which went on preceding my election. To my friends who supported me in the pre-election days, I offer my sincerest thanks.

To those who opposed me, let me say that is the way of our Democracy. It was your right and privilege, and I would be the last person to wish to change it. So far as I personally am concerned, the contest is all over and forgotten.

There is work to be done; there are loads to be lifted. Let us prepare to go forward together to a better California.

It is my hope, and I know it is the hope of all of you, old and new members alike, that this session be known as the session of progress and accomplishment. Certainly the people of California are looking to us for leadership and for legislation, which, harmoniously enacted, will help us to break all log jams and speed the days of full production.

The problems with which we are confronted are as well known to each and every one of you as they are to me.

In addition, there are those special situations which develop in any representative's district, and which may require state legislation.

If I were to make any broad generalization as to aims and objectives of this session, I would say that the people, by their votes, both nationally and in our own State, have expressed a desire for less regimentation, fewer controls and restrictions—an erasing, if you please, of all factors which retard.

Excessive taxes retard.

Nationally, we have the promise of lowered tax levies.

Here in California I believe we will want to take the lead and once again pass legislation which will continue our lowered sales and income taxes.

Legislation on veterans' affairs still loom large on the legislative calendar for California

Homes, jobs and education are questions which, if settled, wisely, will be a step toward paying our debt to our young men and women who have made the continuance of our way of life possible.

The people of the State have voted that we assist our veterans in getting started in business ventures. We must take this demand of the voters and write from it the finest, most workable legislation possible.

In this regard, many of the members will look to the ex-GI's in our midst for advice and counsel.

High on the list of things to be accomplished is highway construction, and equally important—highway safety!

In these, and all matters, let me urge the most thorough investigation in committees and in debate upon this floor.

California has been likened to a giant corporation of the people of California. As their Board of Directors, let us not be stampeded into hasty action on any legislation which may favor one group while penalizing another.

By your election to office, the people of your district have cloaked you with that responsibility.

As I look out and see the familiar faces of the re-elected members and read from the faces of the newly elected members, the *Honesty*, the *Ability*, the *Integrity* mirrored there, I can well understand the wisdom of the voters of your districts in sending you to Sacramento to represent them.

I have met you all, and I know you to be men of strong and fine characters.

Working together, while at the same time expressing our own individual opinions, out of our deliberations, I am certain we will establish a record of which we can all be proud

You, each and every one of you, recognize that this session, if ever there was one, is a crucial session.

The questions are so momentous that nothing but our very best efforts and our sincerest application will be sufficient, if we are to solve them in the best interests of all California.

Though we may disagree on the minor issues, on this great promise I am certain we are all—each and every one of us, unanimously in agreement.

I thank you.

REMARKS BY MR. FIELD

Mr. Field then offered congratulations to Mr. Sam L. Collins upon his election as Speaker of the Assembly, and pledged his full cooperation to him.

MOTION TO PRINT REMARKS BY MR. C. DON FIELD

Mr. Doyle moved that the remarks, previously offered by Mr. Field, be ordered printed in the Journal.

Motion carried.

COMMITTEE FROM THE SENATE

Senators Watson, Kraft, and Williams appeared before the bar of the Assembly, and announced that the Senate had organized, and was now ready to proceed with the regular business.

NOMINATIONS FOR SPEAKER PRO TEMPORE

The Speaker declared the election of Speaker pro Tempore of the Assembly next in order, and called for nominations.

Mr. Albert C. Wollenberg of San Francisco placed in nomination for Speaker pro Tempore Mr. Thomas A. Maloney of San Francisco.

The nomination of Mr. Thomas A. Maloney was seconded by Mr. Augustus F. Hawkins of Los Angeles.

Nominations Closed

Mr. Thomas J. Doyle of Los Angeles moved that nominations for Speaker pro Tempore be now closed.

Mr. Allen G. Thurman of Colfax seconded the motion.

Motion carried.

ELECTION OF SPEAKER PRO TEMPORE

The roll was called with the following result:

FOR HON. THOMAS A. MALONEY—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Sam L. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—78.

NOES—None.

Hon. Thomas A. Maloney being the choice of the Assembly for Speaker pro Tempore, the Speaker declared him duly elected.

APPOINTMENT OF COMMITTEE OF ESCORT

The Speaker appointed Messrs. Wollenberg, Hawkins, and Doyle as a Select Committee to escort Speaker pro Tempore-elect Hon. Thomas A. Maloney to the bar of the Assembly.

OATH OF OFFICE ADMINISTERED

Upon arriving at the bar of the Assembly, Speaker pro Tempore-elect Hon. Thomas A. Maloney took and subscribed to the following oath administered by Hon. Frank M. Jordan, Secretary of State:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Speaker pro Tempore of the Assembly, according to the best of my ability.

MOTION TO PRINT REMARKS BY THOMAS A. MALONEY

Mr. O'Day moved that the following remarks offered by Mr. Maloney, be ordered printed in the Journal:

Motion carried.

Remarks by Speaker Pro Tempore Maloney

Honorable Members of the Assembly

I wish to express to you my sincere thanks and appreciation for again electing me as Speaker pro Tempore of this Assembly. It is an honor which I cherish, and I am deeply appreciative of it.

I trust that, as we deliberate during the next few months, we will do so in the best interests of the people of California, and sincerely hope and trust that our actions will be in accord with the wishes of the people of the State of California

It is an honor to be your Speaker pro Tempore, and I am extremely grateful to you.

NOMINATIONS FOR CHIEF CLERK

The Speaker declared the nomination and election of Chief Clerk of the Assembly now in order.

Mr. Thomas A. Maloney of San Francisco placed in nomination for Chief Clerk Mr. Arthur A. Ohnimus of San Francisco.

The nomination of Mr. Arthur Ohnimus was seconded by Messrs. William Clifton Berry of San Francisco and Ralph C. Dills of Los Angeles.

Nominations Closed

Mr. Allen G. Thurman of Colfax moved that nominations for Chief Clerk be now closed.

Mr. William Clifton Berry of San Francisco seconded the motion.

Motion carried.

ELECTION OF CHIEF CLERK

The roll was called, with the following result:

FOR MR. ARTHUR A. OHNIMUS—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D Collins, Sam L Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—79.

NOES—None.

Mr. Arthur A. Ohnimus being the choice of the Assembly for Chief Clerk, the Speaker declared him duly elected.

OATH OF OFFICE ADMINISTERED

Mr. Arthur A. Ohnimus, Chief Clerk-elect, appeared before the bar of the Assembly, and took and subscribed to the following oath, administered by Hon. Frank M. Jordan, Secretary of State:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Chief Clerk of the Assembly, according to the best of my ability.

Chief Clerk Arthur A. Ohnimus at the Desk

NOMINATIONS FOR MINUTE CLERK

The Speaker declared the nomination and election of Minute Clerk of the Assembly now in order.

Mr. John C. Lyons of Los Angeles, placed in nomination for Minute Clerk Miss Geraldine B. Hadsell of Los Angeles.

The nomination of Miss Geraldine B. Hadsell was seconded by Mr. Don A. Allen of Los Angeles.

Nominations Closed

Mrs. Kathryn T. Niehouse of San Diego moved that nominations be now closed.

Mr. Richard H. McCollister of Mill Valley seconded the motion.

Motion carried.

ELECTION OF MINUTE CLERK

The roll was called, with the following result:

FOR MISS GERALDINE B. HADSELL—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Sam L. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—79.

NOES—None.

Miss Geraldine B. Hadsell being the choice of the Assembly for Minute Clerk, the Speaker declared her duly elected.

OATH OF OFFICE ADMINISTERED

Miss Geraldine B. Hadsell, Minute Clerk-elect, appeared before the bar of the Assembly, and took and subscribed to the following oath, administered by Hon. Frank M. Jordan, Secretary of State:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Minute Clerk of the Assembly, according to the best of my ability.

NOMINATIONS FOR SERGEANT-AT-ARMS

The Speaker declared the nomination and election of Sergeant-at-Arms of the Assembly now in order.

Mr. Chester F. Gannon of Sacramento placed in nomination for Sergeant-at-Arms Mr. Wilkie Ogg of Sacramento.

The nomination of Mr. Wilkie Ogg was seconded by Messrs. John W. Evans of Los Angeles and Ernest E. Debs of Los Angeles.

Nominations Closed

Mr. Don A. Allen of Los Angeles moved that nominations be now closed.

Mr. William H. Rosenthal of Los Angeles seconded the motion.

Motion carried.

ELECTION OF SERGEANT-AT-ARMS

The roll was called, with the following result:

FOR MR. WILKIE OGG—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Sam L. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—79.

NOES—None.

Mr. Wilkie Ogg being the choice of the Assembly for Sergeant-at-Arms, the Speaker declared him duly elected.

OATH OF OFFICE ADMINISTERED

Mr. Wilkie Ogg, Sergeant-at-Arms-elect, appeared before the bar of the Assembly, and took and subscribed to the following oath, administered by Hon. Frank M. Jordan, Secretary of State:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Sergeant-at-Arms of the Assembly, according to the best of my ability.

NOMINATIONS FOR CHAPLAIN

The Speaker declared the nomination and election of Chaplain of the Assembly now in order.

Mr. Dwight H. Stephenson of Sacramento placed in nomination for Chaplain Rev. Raymond Renwald of the Cathedral of the Blessed Sacrament in Sacramento.

The nomination of Rev. Raymond Renwald was seconded by Mr. William Clifton Berry of San Francisco.

Nominations Closed

Mr. William Clifton Berry of San Francisco moved that nominations be now closed.

Mr. Don A. Allen of Los Angeles seconded the motion.

Motion carried.

ELECTION OF CHAPLAIN

The roll was called, with the following result:

FOR REV. RAYMOND RENWALD—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Sam L. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—79.

NOES—None.

Rev. Raymond Renwald, being the choice of the Assembly for Chaplain, the Speaker declared him duly elected.

PLEDGE OF ALLEGIANCE TO THE FLAG

Upon request of the Speaker, the Assembly then gave the pledge of allegiance to the Flag.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following resolution was offered:

Assembly Concurrent Resolution No. 1: By Messrs. Hawkins, Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Sam L. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Harry J. Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, George Miller, Mrs. Niehouse, Messrs. O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Laughlin E. Waters, Weber, and Wollenberg; and sponsored by Messrs. Armstrong, Beal, Burkhalter, Call, Dekker, Denny, Emlay, Fourt, Haggerty, Gardiner Johnson, King, Kraft, Leonard, Lyon, Massion, Middough, Raup Miller, Sawallisch, Stream, Frank J. Waters, Watson, and Werdel—In tribute to John B. Pelletier.

Request for Unanimous Consent

Mr. Hawkins asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 1, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 1

Assembly Concurrent Resolution No. 1—In tribute to John B. Pelletier.

Resolution read.

Motion to Adjourn Out of Respect to the Memory of Mr. Pelletier

Mr. Hawkins moved that when the Assembly this day adjourns, it do so out of respect to the memory of the late John B. Pelletier, former Member of the Assembly from the Forty-fourth Assembly District.

Remarks by Mr. Weber

Mr. Weber expressed remarks relative to the passing of former Assemblyman John B. Pelletier.

Motion by Mr. Doyle

Mr. Doyle moved that all Members of the Assembly arise and quietly stand with bowed heads for a few seconds in respect to memory of the late John B. Pelletier, former Member of the Assembly from the Forty-fourth Assembly District.

Motion carried.

Names of Members of the Fifty-sixth Session Added as Sponsors of Assembly Concurrent Resolution No. 1

Mr. Dunn asked for, and was granted, unanimous consent, that the names of all of the Members of the Assembly who served with Mr. Pelletier during the Fifty-sixth Session be added as sponsors to Assembly Concurrent Resolution No. 1.

Resolution adopted by a rising vote of the members.

Resolution ordered transmitted to the Senate.

MOTION TO PRINT PRAYERS IN JOURNAL

Mr. Heisinger moved that the prayer offered this morning by the Rev. Torrance Phelps, and all future prayers offered in the Assembly, be ordered printed in the Journal.

Motion carried.

RESOLUTIONS

The following resolutions were offered:

By Mr. Maloney:

House Resolution No. 1

Resolved by the Assembly of the State of California, That the Speaker appoint a Select Committee of Three to inform the Senate that the Assembly is now duly organized, having elected the following statutory officers:

Speaker ---------- Sam L. Collins
Speaker pro Tempore ---------- Thomas A. Maloney
Chief Clerk ---------- Arthur A. Ohnimus
Minute Clerk ---------- Geraldine B. Hadsell
Sergeant-at-Arms ---------- Wilkie Ogg
Chaplain ---------- Raymond Renwald

Resolution read, and adopted.

Appointment of Select Committee

Pursuant to the provisions of House Resolution No. 1, the Speaker announced the appointment of Messrs. Maloney, Field, and Doyle as such Select Committee to wait upon the Senate.

By Mr. Evans:

House Resolution No. 2

Resolved by the Assembly of the State of California, That the Speaker appoint a Select Committee of Five to wait upon His Excellency, the Governor, and inform him that the Assembly is organized and awaits any communication he may have to make to it.

Resolution read, and adopted.

Appointment of Select Committee

Pursuant to the provisions of House Resolution No. 2, the Speaker announced the appointment of Messrs. Evans, Wollenberg, Waters, Crichton, and Gannon as such Select Committee to wait upon the Governor.

By Mr. McCollister:

House Resolution No. 3

Resolved by the Assembly of the State of California, That the Speaker appoint a Select Committee of Three to wait upon the Senate and invite that honorable body to meet with the Assembly in Joint Convention at 3 p.m., for the purpose of attending the inaugural ceremonies for Governor-elect Earl Warren and Lieutenant Governor-elect Goodwin J. Knight.

Resolution read, and adopted.

Appointment of Select Committee

Pursuant to the provisions of House Resolution No. 3, the Speaker announced the appointment of Messrs. McCollister, Clarke, and Dunn as such Select Committee to wait upon the Senate and invite that honorable body to meet with the Assembly in Joint Convention at 3 p.m.

By Mr. Weber:

House Resolution No. 4

Resolved by the Assembly of the State of California, That the Standing Rules of the Fifty-sixth (Regular) Session, as adopted January 11, 1945 (pages 147-168 of the Assembly Journal), and as amended on March 27th (page 1306 of the Assembly Journal), and April 16th (page 1892 of the Assembly Journal), be and the same are hereby adopted as the Temporary Rules of the Fifty-seventh (General) Session.

Resolution read, and action thereon deferred temporarily at the request of Mr. M. Philip Davis, pending the return to the Assembly Chamber of Mr. Wollenberg.

By Mr. Dickey:

House Resolution No. 5

Resolved by the Assembly of the State of California, That the State Controller be and he hereby is authorized and directed to draw his warrant on the Contingent Fund of the Assembly in favor of the Chief Clerk of the Assembly in the sum of twenty dollars ($20), to be used as the Post Office Revolving Fund, and the Treasurer is hereby directed to pay the same.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Dunn, Erwin, Evans, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Loomis, Lowrey, Luckel, Lyons, McMillan, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Weber, and Mr. Speaker—67.

NOES—None.

By Mr. Cooke:

House Resolution No. 6

Resolved by the Assembly of the State of California, That the Controller be and he hereby is authorized and directed to draw his warrants on the Contingent Fund of the Assembly in favor of Arthur A. Ohnimus, Chief Clerk of the Assembly, and the State Treasurer hereby is directed to pay the same, for the sum of two hundred dollars ($200), said amount being for the payment of postage, telegraphing, expressage, and incidental expenses of the Chief Clerk's Office.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Dunn, Erwin, Evans, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Loomis, Lowrey, Luckel, Lyons, McMillan, Niehouse, O'Day, Price, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Weber, and Mr. Speaker—66.

NOES—None.

By Mr. Burns:

House Resolution No. 7

Resolved by the Assembly of the State of California, That the Chief Clerk of the Assembly be and hereby is directed to procure from the State Purchasing Division on requisition, for the use of the Members of the Assembly, all necessary stationery and supplies.

Resolution read, and adopted.

By Mr. Thorp:

House Resolution No. 8

Resolved by the Assembly of the State of California, That the Sergeant-at-Arms or the Chief Clerk be and they hereby are authorized to receipt to the Controller for all warrants for the payment of members, officers, and attaches of the Assembly.

Resolution read, and adopted unanimously.

By Mr. Crowley:

House Resolution No. 9

Resolved by the Assembly of the State of California, That the State Controller be and he is hereby directed and ordered to draw his warrants on the proper fund in favor of the following members and officers of the Assembly for the amount set opposite

their respective names, and the State Treasurer is hereby directed and ordered to pay the same:

Resolution ordered printed in the Journal, and action deferred until the next legislative day.

By Mr. McCollister:

House Resolution No. 10

Resolved by the Assembly of the State of California, That the Chief Clerk be authorized to receive from the Members of the Assembly a mailing list of all bills, resolutions, and histories; to be directed to libraries, chambers of commerce, and other public centers, and to individuals, for general inspection. This list is to be limited to 10 names each, and shall be forwarded to the Legislative Bill Room for regular mailing. No member shall include on the list any state department or employee thereof. The Chief Clerk is further authorized to place accredited newspaper representatives on the regular mailing list as well as the Attorney General, Legislative Counsel Bureau, and the Governor's Office. That in addition to the above, the Chief Clerk shall forward to the Legislative Bill Room for regular mailing, five copies of said bills, resolutions and histories to be mailed to the State Commander of the American Legion, or to such parties as he shall name; and be it further

Resolved, That no additional mailing list shall be allowed or authorized, unless the sum of_____ ($__) each is paid therefor, to the State Printer and which sum shall be credited to legislative printing and accounted for to the Legislature; and be it further

Resolved, That the total number of bills to be printed in no event, unless otherwise authorized, shall be over two thousand five hundred (2,500).

Resolution read, and referred to the Committee on Rules.

By Mr. Field:

House Resolution No. 11

Resolved by the Assembly of the State of California, That the Controller be and he hereby is directed to draw his warrant upon the Contingent Fund of the Assembly in favor of the Chief Clerk of the Assembly, and the State Treasurer is hereby directed to pay the same, in the amount of one thousand nine hundred seventy-five dollars ($1,975), said amount being for the purchase of postage stamps to be used by Members of the Assembly for official mail; and be it further

Resolved, That the Chief Clerk be and he hereby is directed to purchase postage stamps in such amounts and denominations, not exceeding one thousand nine hundred

seventy-five dollars ($1,975) in the aggregate, as shall be necessary for the use of the Members of the Assembly for official mail; and be it further

Resolved, That the amount of stamps requisitioned by any one Member of the Assembly for official mail shall not exceed the sum of twenty-five dollars ($25).

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, and Wollenberg—73.

NOES—None.

REPORT OF SELECT COMMITTEE

The Select Committee appointed to wait upon the Governor reported that it had performed its duty.

MOTION TO PRINT REPORT IN JOURNAL

Mr. Weber moved that the following Proposed Permanent Standing Rules of the Assembly for the Fifty-seventh Session, as reported by Committee on Legislative Organization, be ordered printed in the Journal, and then referred to the Committee on Rules.

Motion carried.

PROPOSED PERMANENT STANDING RULES OF THE ASSEMBLY FOR THE FIFTY-SEVENTH SESSION, 1947-1948

As Submitted by the Permanent Committee on Legislative Organization, 1945

SECTION 1

LEGISLATIVE ORGANIZATION

Assignment of Desks to Members

1. Members shall be assigned to desks by the Chief of the Bureau of Buildings and Grounds, subject to change by the Committee on Rules, and, as far as possible, he shall conform to the requests of members, giving due consideration to their seniority in point of service in the Assembly.

Hours of Meeting

2. The session of Assembly, prior to the constitutional recess, shall be daily, beginning at 10 o'clock a.m. (Sundays excepted), unless otherwise ordered by a majority vote of the members present.

Following the constitutional recess, the Assembly shall meet promptly at 9.30 o'clock a.m., daily (Sundays excepted), unless otherwise ordered by a majority vote of the members present.

Rules

Adoption of Standing Rules

3. The adoption of the Standing Rules shall require an affirmative recorded vote of a majority of the entire elected membership. When once

adopted, such Standing Rules shall remain in effect, unless suspended or amended as provided in these Rules.

Suspension of Rules

4. Any standing rule of the Assembly may be suspended temporarily by a vote of two-thirds of the members present; provided, that such temporary suspension shall apply only to the matter under immediate consideration, and in no case shall it extend beyond an adjournment.

Amending Standing Rules

5. No standing rule of the Assembly shall be amended except by an affirmative recorded vote of a majority of the entire elected membership of the Assembly, and one day's notice must be given on the motion thereof.

Temporary Rules

6. The Committee on Rules may at any time report a temporary rule. Upon adoption by an affirmative recorded vote of two-thirds of the entire elected membership of the Assembly, such temporary rule shall have the effect, for the time being, of a standing rule. If such temporary rule shall be in conflict with a standing rule, it shall supersede such standing rule only for the time being.

Parliamentary Rules

7. In all cases not provided for by the Constitution, by the Assembly Rules, or by the Joint Rules of the Senate and Assembly, the authority shall be Mason's Manual of Legislative Procedure.

Standing Committees

8. For their convenient functioning and in furtherance of the thorough consideration of all bills on a given subject, the several standing committees of the Assembly are respectively grouped into the following categories:

A. LEGISLATURE:

Committee on Rules

There is a Committee on Rules No. 1, consisting of three committees to consider matters concerning legislative organization, functions and procedure; one on Legislative Organization (permanent); one on House Functions; and one on Legislative Procedure. The Chairman of the Committee on Rules shall serve as a member of each of these committees together with four other members of the Committee on Rules who shall serve on only one of these three committees.

The Committee on Rules shall for the purpose of Joint Rule 2 be deemed to be the Rules Committee of the Assembly.

Committee on Legislative Organization

The Committee on Legislative Organization shall have and exercise the following powers:

To aid the Speaker, at his request, in organizing the standing committees of the Assembly and in drawing up a schedule of committee meetings;

To determine what rules, organization, procedure, space and facilities are best suited to the needs of the Legislature and report its determination, together with such related matters and facts as it deems pertinent, to the Assembly;

To serve jointly with a Senate committee having similar duties and functions;

To act during the sessions of the Legislature, including any recess thereof, and after final adjournment but not beyond the convening of the next succeeding Legislature;

To have and exercise all of the powers imposed upon interim committees of the Legislature or of the Assembly by the Joint Rules or by the Standing Rules of the Assembly.

Committee on House Functions

The Committee on House Functions shall be the executive committee of House having the following powers:

To manage the operation of the House.

To aid in the assignment to members, desks in the House and office space.

To recommend the appointment of all attaches and employees of the Assembly not otherwise provided for by statute. It shall have authority to suspend, with or without pay, any such attache or employee for incompetency or dereliction of duty, pending final action by the Assembly.

To consider contested election, mileage, and all else concerning the proper functioning of the House.

Committee on Legislature Procedure

The Committee on Legislative Procedure shall have and exercise the following powers:

To be the Committee on Engrossment and Enrollment within the meaning of the Joint Rules. It shall be the duty of the Committee on Legislative Procedure to compare all bills, ordered or considered engrossed by the Assembly, with the engrossed copies thereof; and, before they pass out of the possession of the Assembly, see that the engrossed bill is a true copy of the original, with such amendments as may have been made thereto; and said committee shall see that all engrossed bills are reported back in the order in which they were ordered engrossed. The report of the Committee on Legislative Procedure shall be in order at any time.

To consider and report on bills introduced after the constitutional recess.

To assist the Speaker, upon his request, in recommending the reference of bills to the appropriate standing committees.

To assist the chairmen of the several committees in formulating consolidated bills as substitutes for several bills relating to the same subject, following the reference of bills to the appropriate standing committees.

To bring about greater efficiency in the consideration of bills and to form a liaison with the Legislative Counsel Bureau and receive the aid of the bureau in such matters.

B. GOVERNMENT:

Fifteen committees to consider legislative measures affecting government and governmental organization: Two on Conservation and Planning, Nos. 2 and 3; three on Fiscal Matters, Nos. 4, 5 and 6; one on Education, No. 7; four on Social Welfare, Nos. 8, 9, 10 and 11; one on Civil Service and State Personnel, No. 12; one on Military Police, No. 13; two on Political Subdivisions, Nos. 14 and 15; and two on Judiciary and Laws, Nos. 16 and 17.

C. INDUSTRY:

Six committees to consider legislative measures affecting Industry and the Means of Production of Wealth: Two on Agriculture, Nos. 18 and 19; two on Organization and Operation, Nos. 20 and 21; one on Industrial Relations, No. 22; one on Capital, No. 23; and one on the Means of Distribution of Wealth, No. 24.

It is the policy of the Assembly that the several committees in each of the groups indicated above shall cooperate to the fullest possible extent and upon every convenient occasion meet together upon bills of common interest to the committees in the group, no matter to which committee they have been assigned.

Twenty-five standing committees of the Assembly are hereby created, upon the several subjects, and numbered respectively, as follows:

1. Rules.
2. Conservation, Planning, and Public Works.
3. Fish and Game.
4. Governmental Efficiency.
5. Revenue and Taxation.
6. Ways and Means.
7. Education.
8. Crime and Correction.
9. Public Morals.
10. Public Health.
11. Social Welfare.
12. Civil Service and State Personnel.
13. Military Affairs.
14. Municipal and County Government.
15. Elections and Reapportionment.
16. Judiciary.
17. Constitutional Amendments.
18. Agriculture.

19. Livestock and Dairies.
20. Public Utilities and Corporations.
21. Manufacturing, Oil, and Mining Industry.
22. Industrial Relations.
23. Finance and Insurance.
24. Transportation and Commerce.

Prior to the assignment of members to serve on the several standing committees, the Speaker shall consider the preferences of the members with regard to committee assignments, while keeping in view the practical necessity of making assignments so that members will not serve on more than one committee which meets at the same time, and the Speaker thereafter shall determine the number and members to serve on each standing committee. Upon publication in the Journal of the number of members on each standing committee, no further change in the number of members of the committee shall be made otherwise than by a majority vote of the elected membership of the Assembly.

No Member of the Assembly shall be a member of more than three standing committees except that upon appointment by the Speaker or the approval of the House a member may serve on four committees.

There shall be published weekly in the Assembly Weekly History during each session of the Legislature a chart showing the Rational Organization of the Standing Committees of the Assembly and showing Chairman and Vice Chairman, Number of Members, Time of Meeting, Room Number, Total Number of Measures, "referred" and "action pending," and a meeting schedule for each day of the week.

Motions to Change Membership or Meetings of Standing Committees

9. A motion proposing to increase or diminish the membership of a standing committee or the number of standing committees, shall not be considered until the same shall have been referred to and approved by the Committee on Rules.

Meetings of Standing Committees

10. All standing committees shall meet at the hour and the place provided by schedule, unless otherwise ordered by the Assembly. No committee shall meet during any session of the Assembly without first obtaining permission from the Assembly.

Every scheduled committee meeting shall be open to the public, unless the committee, by a majority vote of its entire membership, shall order an executive session.

Committee Quorum

11. A majority of the membership of any standing committee shall constitute a quorum for the transaction of its business. At least a majority of all members constituting such committee shall be required to report a bill out of committee.

SECTION 2
HOUSE FUNCTIONS

Duties of Assembly Officers

Duties of the Speaker

12. The Speaker shall possess the powers and perform the duties prescribed:

(a) To preserve order and decorum; he may speak to points of order in preference to the other members, rising from his chair for that purpose.

(b) To decide all questions of order subject to appeal to the Assembly by any member. On every appeal, he shall have the right to assign his reason for his decision.

(c) To have general direction over the Assembly Chamber and rooms set aside for the use of the Assembly, including the rooms for use by members as private offices.

(d) To name any member to perform the duties of the Speaker, but such substitutions shall not extend beyond adjournment.

(e) To appoint the membership of all standing and special committees.

(f) To propose a schedule of meetings of standing committees.

(g) To have general control and direction over the Journals, papers, and bills of the Assembly.

(h) To act as Chairman of the Committee of the Whole.

(i) To order the lobby and gallery cleared whenever he shall deem it necessary.

(j) To assign desks to properly accredited newspaper representatives.

(k) To authenticate by his signature, when necessary, or when required by law, all bills, memorials, resolutions, orders, proceedings, writs, warrants, and subpenas issued by order of the Assembly.

(*l*) The Speaker shall be ex officio member of all Assembly, joint, and interim committees with all of the rights and privileges of such membership, except the right to vote. In counting a quorum of any such committees, the Speaker shall not be counted as a member.

Duties of the Speaker Pro Tempore

13. The Speaker pro Tempore shall have the powers and perform the duties of the Speaker during his absence.

Duties of the Chief Clerk

14. The duties of the Chief Clerk shall be as follows:

(a) To have charge of and supervise all clerical business and printing of the Assembly.

(b) To see that the Journals, other publications, and records of the Assembly are properly kept.

(c) To refuse to permit any records or papers to be taken from the desk or out of his custody, except upon duly signed receipts from persons authorized.

(d) To read or allow his assistants to read from the desk only such matter as the Speaker of the Assembly shall direct.

(e) To have general supervision over all clerks, attaches and employees, and to be responsible for their official acts and their performance of and regular attendance upon their duties.

(f) To suspend temporarily any clerk, attache, or employee for incompetency or dereliction of duty, pending action by the Committee on Rules and House Functions.

(g) To perform all other duties pertaining to his office as prescribed by law or Assembly rule.

(h) Before the commencement of any regular session of the Legislature the Chief Clerk of the Assembly may mail to each member a blank form on which the member may indicate his committee preferences. Accompanying such blank shall be mailed a stamped envelope addressed to the Chief Clerk of the Assembly for returning such form. After their receipt, all such communications shall be delivered to the Chairman of the Committee on Legislative Organization, who shall deliver them to the Speaker immediately upon the organization of the Assembly.

(i) To certify to the Controller, pay rolls of members and attaches.

(j) To certify all requisitions upon the Controller for the payment of bills incurred by the Assembly.

(k) To order and sign for all documents and printing, subject to approval by the Speaker or the Chairman of the Committee on Rules and House Functions.

Duties of the Sergeant-at-Arms

15. The duties of the Sergeant-at-Arms shall be as follows:

(a) To attend the Assembly during its session, preserve order, announce all official messengers, and serve all processes issued by authority of the Assembly and directed by the Speaker; he shall receive his actual expenses for himself or for an assistant when executing any such process.

(b) To see that no person is admitted to the Assembly Chamber except in accordance with the provisions of these Rules.

(c) To have general supervision over the Assistant Sergeants-at-Arms and be responsible for their official acts and their performance of and regular attendance upon their duties.

(d) To suspend temporarily any Assistant Sergeant-at-Arms for incompetency or dereliction of duty, pending action by the Committee on Rules and House Functions.

(e) To execute all commands of the Speaker.

(f) To perform all other duties pertaining to his office as prescribed by law or Assembly rule.

Committee Expenditures

16. No member or committee shall be permitted to incur any expense without first receiving the consent of the Assembly, except that the Chairman of the Committee on Ways and Means shall be allowed his actual expenses for the performance of any duties of his office during the constitutional recess.

Printing

Authority for Printing

17. The State Printer shall not charge any printing or other work to the Assembly other than provided by law or Assembly rule, except upon a written order signed by the Chief Clerk of the Assembly and countersigned by the Chairman of the Committee on Rules or by the Speaker, and delivered to him prior to beginning such printing or work. All invoices for printing furnished the Assembly shall be itemized and rendered by the State Printer within 30 days after completion of said printing. When necessary, the Chief Clerk may order certain printed matter completed in advance of its regular order by the issuance of a rush order.

Printing Style, Form and Amount to Be Printed

18. Unless otherwise restricted by law or by Assembly rule, the style and form of all printing, the quality of paper to be used, the number of copies to be printed of each order, and the number of copies to be delivered to each member shall be decided by the Chief Clerk and approved by the Speaker or the Chairman of the Committee on Rules. All requests by members for additional copies of bills, documents, or other printed matter shall be referred to the Committee on Rules.

Printing Assembly History

19. The Chief Clerk shall cause to be compiled and printed during the constitutional recess a Legislative Handbook and a Semi-Final Assembly History, together with an index, setting forth a complete History showing all actions on bills, constitutional amendments, concurrent, joint, and House resolutions prior to the constitutional recess.

During the remainder of the session, the Chief Clerk shall cause to be printed and placed upon each member's desk prior to convening on Monday of each week, a complete History showing all actions taken upon each measure up to and including the legislative day preceding its issuance. For each legislative day intervening between the issuance of such Weekly History, there shall be printed a Daily Supplemental History showing only actions taken upon any measure since the issuance of the preceding Weekly History.

Printing of Maps

20. Maps or charts accompanying documents other than bills shall not be printed without special authority from the Assembly by a majority vote of its entire elected membership.

Miscellaneous

Admission to Assembly Chamber

21. Persons admitted to the Assembly Chamber, other than members and attaches, shall not be permitted to stand in the lobby in the rear of the Assembly Chamber while the Assembly is in session, but shall be required to occupy the seats provided for them.

Use of Assembly Chamber

22. The Assembly Chamber shall not be used for any public or private business other than legislative matters during the sessions of the Legislature, except by consent of a majority of the entire elected membership of the Assembly.

Persons Admitted to Floor of the Assembly

23. No person other than members, officers, attaches, employees of the Legislature, former Members of the Legislature, and accredited members of the press shall be admitted to the floor of the Assembly during any session of the Assembly; provided, that a guest of any member shall be admitted upon presentation of a guest card of said member countersigned by the Speaker, such guest card being valid only on the legislative day for which it was issued.

All guests shall be seated only in the chairs in back of the rail in the rear of the Assembly Chamber and shall not be permitted to sit at the desks of the members while the Assembly is in session. No person other than an accredited newspaper representative shall be permitted to sit at the press desks. A special section in the balcony shall be reserved for those holding guest cards.

Lobbying in the Assembly Chamber

24. All persons appearing or being, or desiring to appear or be, at or in the Assembly Chamber, or at or in any committee room of the Assembly for the purpose of advocating the adoption or defeat of any bill, measure, or resolution introduced in, pending before, or being considered by the Assembly or by any committee thereof, or for the purpose of soliciting the vote of any Member of the Assembly upon any such bill, measure, or resolution, shall register with the Sergeant-at-Arms his name and address, together with a statement of the person or persons, corporation or corporations, or interest represented by or intended to be represented by him, and shall file with the Sergeant-at-Arms his written authority to represent such person, corporation, or interest; and thereupon the Sergeant-at-Arms shall issue to such person a certificate that he has so registered in conformity with this rule, which certificate shall be exhibited to the chairman of a committee upon request. A complete record of all persons so registered, together with their respective addresses and the persons, corporations, or interest represented by them, shall be kept and preserved by the Sergeant-at-Arms, and shall be open at all times to public inspection.

This rule shall not apply to members of either house of the Legislature, to elected state officers, or to citizens of the State of California appearing in their own interest or behalf who are not representing any group, organization, or corporation.

No person shall appear at or enter the Assembly Chamber, or any committee room of the Assembly, for the purpose of advocating the adoption or defeat of any bill, measure, or resolution, without first having registered and secured the certificate, as herein provided.

No person engaged in presenting to the Assembly or its committees any business, or claim, or legislation, shall be permitted to engage in such business in the Assembly Chamber, or be permitted on the floor of the Assembly at any time while the Assembly is in session; and any person transgressing this rule shall be removed from the floor of the Assembly and be debarred from the privilege of the floor during the remainder of the entire session. The Speaker is charged with the enforcement of this rule. This rule cannot be suspended except by a two-thirds vote of the entire elected membership of the Assembly.

Smoking in Assembly Chamber

25. Smoking may be prohibited temporarily during any session of Assembly by a majority vote of the members present.

Fees for Witnesses

26. Each witness summoned to appear before the Assembly or any of its committees shall receive the sum of ten dollars ($10) for each day such witness shall be required to appear, and the sum of five and one-half cents ($0.05½) for each mile he shall travel in coming to and going from the place of examination.

Press Privileges

27. Newspaper correspondents desiring Assembly press cards and privileges shall make written application to the Speaker. The Assembly by a majority vote of the members present may revoke any press card.

The Speaker shall assign the Assembly press desks to accredited newspaper representatives authenticated by the standing committee of the Capitol Correspondents' Association; also the necessary rooms for the exclusive use of such accredited press representatives.

No Dictation at Member's Desk

28. While the Assembly is in session, no member shall dictate any correspondence at his desk.

SECTION 3

LEGISLATIVE PROCEDURE

Speaker to Call Assembly to Order

29. The Speaker, or in his absence the Speaker pro Tempore, shall, at the hour appointed for meeting, call the Assembly to order. In the absence of both the Speaker and the Speaker pro Tempore, the Chief

Clerk, or his assistant, shall call the Assembly to order, whereupon a temporary chairman shall be elected from among the members to preside.

The functions of the temporary chairman shall terminate upon return of the Speaker or Speaker pro Tempore.

Roll Call and Quorum

30. Before proceeding with the business of the Assembly, the roll of the members shall be called, and the names of those present shall be entered in the Journal. A majority of all the members elected to the Assembly shall constitute a quorum.

Order of Business

31. The order of business of the Assembly shall be as follows:

1. Roll Call
2. Prayer by the Chaplain
3. Reading of the Previous Day's Journal
4. Presentation of Petitions
5. Introduction and Reference of Bills
6. Reports of Committees
7. Second Reading of Bills
8. Messages from the Governor
9. Messages from the Senate
10. Motions and Resolutions
11. Business on the Daily File
12. Announcements
13. Adjournment

32. On each Monday morning during the session, following the prayer by the Chaplain, the Members of the Assembly and its officers, attaches, and employees present in the Assembly Chamber shall pledge their allegiance to the Flag of the United States of America.

Reading, Correcting and Approving Journal

33. a. The reading of the Journal of the previous day may be dispensed with on motion by a majority of the members present.

b. All Journals of the Assembly shall be corrected by the Minute Clerk and delivered by him to the Chief Clerk within seven calendar days from the date of such Journal. Such corrected Journals may thereafter be approved by a majority vote of the members present.

c. A motion to correct any day's Journal shall be in order prior to the approval by the Assembly of such day's Journal. The approval of the Journal shall require a majority vote of the members present.

Presentation of Petitions

34. Whenever petitions, memorials, or other papers are presented by a member, a brief statement of the contents thereof may be made verbally by the introducer. Petitions are not debatable and shall be filed, or be referred to a committee as the Speaker shall determine. Mention of receipt of such presentation and its disposition shall be entered on the Journal.

Upon receipt of a petition for the impeachment of any person subject to impeachment by the Legislature, the Speaker shall, without comment or debate, forthwith refer such petition to committee.

Messages From the Governor

35. Messages from the Governor shall be delivered to the Chief Clerk or an assistant, and shall be read and ordered printed on the Journal unless otherwise ordered by the Speaker or by a majority vote of the members present.

Messages From the Senate

36. Messages from the Senate shall be delivered to the Chief Clerk or an assistant, and shall be read and ordered printed on the Journal. The Speaker shall forthwith refer to the proper committee all Senate bills accompanying such messages, which reference shall be entered in the Journal. Assembly bills which have been passed without amendment by the Senate shall be ordered to enrollment.

Assembly bills amended by the Senate shall be ordered placed upon the unfinished business file.

Bills—Introduction and Reference

Bills Defined

37. Whenever the word "bill" is used in these Rules, it shall include constitutional amendments, concurrent and joint resolutions, except as otherwise specifically provided.

Introduction and Reference of Bills

38. Each bill shall be signed by the member, or each of the members, who is an author of the bill before it is introduced. If any bill is introduced which does not contain the signature of such author or co-author, the same, on motion of the member whose name appears thereon without such signature, shall be stricken from the file by a recorded vote of a majority of the elected membership. In each legislative session, on the first day when bills are introduced under "Introduction and Reference of Bills," the roll shall be called from A to Z and then back from Z to A, and as each member's name is called, he may introduce one bill, constitutional amendment, concurrent or joint resolution.

After these two roll calls, any member desiring to introduce bills, constitutional amendments, concurrent and joint resolutions may at any time during a session send the same to the Clerk's desk.

All bills, constitutional amendments, concurrent and joint resolutions introduced before the standing committees of the Assembly are appointed, shall be referred to committees, references to take effect when the committees shall be appointed.

Reference of Bills to Committee

39. Immediately following its first reading, the Speaker shall refer each bill to a committee, unless upon a motion the Assembly, by a majority vote of its entire elected membership, shall refer it to some

other committee. Such motion to refer a bill shall not be debatable. Should several different committees be proposed, preference shall be given as follows:

1. Committee of the Whole.
2. Standing Committee.
3. Special Committee.

Examining of Bills by Legislative Counsel Bureau

40. After introduction, all bills shall be delivered to the Legislative Counsel for the purpose of determining if the bill is in the proper form as prescribed by law or Assembly rule.

If, in the opinion of the Legislative Counsel, any correction made by him under the authority of this rule should in any manner be construed to be a change in the bill other than a change in form, he shall obtain the consent of the author of the bill before making such change.

Immediately upon the completion of the check of the bills referred to the Legislative Counsel in accordance with the provisions of this rule, he shall deliver the bills to the State Printer. Under no circumstances shall the Legislative Counsel retain in his possession any bills referred to him under the provisions of this rule for any period longer than two legislative days.

Introduction of Bills After Constitutional Recess

41. Any member requesting permission to introduce a bill, except a resolution or constitutional amendment, after the constitutional recess shall send such request together with the bill to the Clerk's desk, and it shall be referred by the Speaker to the Committee on Legislative Procedure. The committee shall ascertain if the granting of such request will exceed the limitations as set forth in Section 2 of Article IV of the Constitution, and if it will not, shall report back on the same legislative day each bill so referred to it. The adoption of the report of the committee granting permission to introduce any bill shall require an affirmative recorded vote of three-fourths of all members elected to the Assembly.

Bills Reported Back to Assembly

42. All committees shall act upon bills referred to them as soon as practicable, and when acted upon each bill shall be reported back to the Assembly forthwith, and the chairman of each committee is charged with the observance of this rule.

Standing Committee Functions

Standing Committee Rules

43. The Rules of the Assembly shall govern the conduct of all committee meetings. Each committee may adopt, by a majority vote of its entire membership, such additional rules as it may deem necessary for the conduct of any business referred to such committee.

A majority of the committee members present may order a call of the committee.

Reports of Committees

44. Reports of standing and special committees shall be delivered to the Chief Clerk or an assistant, and shall be read and ordered printed in the Journal unless otherwise ordered by the Speaker or a majority vote of the members present.

Signing Bills Out of Committee

45. No bill shall be signed out of committee unless the committee has failed to hold a meeting on two consecutive scheduled dates, or having so met, has failed to have a quorum present for the transaction of business.

Committee on Ways and Means

46. The Committee on Ways and Means shall consider all bills to appropriate money, other than contingent expenses of the Assembly.

Committee of the Whole

47. The Assembly may resolve itself into a Committee of the Whole at any time by a majority vote of the members present. While sitting as such committee, persons other than members may address the committee. The Speaker of the Assembly, or any member named by the Speaker, shall preside as Chairman of the Committee of the Whole.

A motion that the Committee of the Whole "do now rise and report back to the Assembly," shall always be in order, and shall be decided without debate. All actions of the Committee of the Whole shall be reported to the Assembly by the chairman, but shall not be entered in the Journal except upon motion and a majority vote of the members present.

Reports of Interim Committees

48. All interim committees, unless otherwise authorized, shall report to the next succeeding Legislature on or before the fortieth day after the convening thereof.

Passage of Bills

Daily File

49. There shall be printed an Assembly Daily File for each legislative day following the constitutional recess, or at any time prior thereto when ordered by the Speaker. The Committee on Rules shall have charge of the Daily File of the Assembly. The following listing shall constitute the order of the Daily File:

1. Special Orders of the Day
2. Second Reading, Assembly Bills
3. Second Reading, Senate Bills
4. Unfinished Business
5. Third Reading, Assembly Bills
6. Third Reading, Senate Bills

All bills on the Daily File shall be called for consideration in the order of their listing, unless otherwise ordered by unanimous consent or an affirmative vote of two-thirds of the members present.

Record of Bills

50. The Chief Clerk shall cause to be kept a permanent record of every action taken by the Assembly on every bill, and the date of such action. Every such action and the date thereof shall also be indorsed upon such bill.

Second Reading of Bills

51. All bills shall be read the second time in the order of their appearance upon the second reading file. Upon second reading, Assembly bills reported without amendments shall be ordered engrossed, and Senate bills reported without amendments shall be ordered to third reading.

Committee Amendments

52. Committee amendments reported with bills shall be considered upon their second reading and such amendments may be adopted by a majority vote of the members present. Assembly bills so amended shall be ordered reprinted and engrossed, and Senate bills so amended shall be ordered reprinted and to third reading.

Amendments From the Floor

53. Any member may move to amend a bill during its second or third reading and such motion to amend may be adopted by a majority vote of the members present. Bills so amended on second reading shall be treated the same as committee amendments. Any bill so amended upon second or third reading shall be reprinted and re-engrossed. The Chief Clerk shall order printed not to exceed 1,000 copies of all amended bills.

Consideration of Constitutional Amendments, Concurrent and Joint Resolutions

54. Constitutional amendments, concurrent and joint resolutions may be amended by a majority of the members present and shall be treated the same as bills, except that they shall be read but once. The ayes and noes shall not be called upon the adoption of concurrent resolutions, except those presenting charter amendments or authorizing expenditures of money, unless regularly demanded or required by statute or by the Constitution.

Bills Transmitted to the Senate

55. Upon the final passage of any bill if no notice of motion to reconsider such bill be given, the Speaker shall order the bill transmitted to the Senate under signature of the Chief Clerk. Senate bills refused passage shall forthwith be returned to the Senate under similar signature.

Bills Considered During Last Seven Days

56. No Assembly bill shall be passed by the Assembly within seven calendar days previous to the time set for adjournment *sine die* of the Legislature, except upon recommendation of the Speaker and permission to consider and vote on such bill being granted by a recorded vote of three-fourths of the entire elected membership of the Assembly.

Substitute Committee Bills

57. A committee may amend into one bill related provisions germane to the subject and embraced within the title; and with the consent of the author the committee may constitute such bill a committee bill by striking out of the heading of the bill the line "Introduced by" and the name of the author and substituting therefor "Substitute committee bill of the Committee on" and the name of the committee.

Concurrence in Senate Amendments

58. It shall require the same affirmative recorded vote to concur in any Senate amendment to an Assembly bill as the vote required by the Constitution for the passage of such bill. It shall require an affirmative recorded vote of two-thirds of the entire elected membership of the Assembly to concur in any Senate amendment to an Assembly bill which contains an item or items of appropriation subject to reduction or elimination under the provisions of Section 34a of Article IV of the Constitution. The vote on concurrence shall be deemed the vote upon final passage of such bill. When Senate amendments to an Assembly bill are concurred in, the bill shall be forthwith ordered enrolled, and the Chief Clerk shall notify the Senate of such concurrence.

Nonconcurrence in Senate Amendments

59. If the Assembly refuse to concur in Senate amendments to an Assembly bill, and when notified that the Senate has refused to concur in Assembly amendments to a Senate bill, the Speaker shall appoint a Committee of three (3) on Conference, and the Chief Clerk shall immediately notify the Senate of the action taken by the Assembly and request the appointment of a like committee.

Committee on Conference

60. The Speaker, in appointing a Committee on Conference, shall select two members from those voting with the majority on the point about which the difference has arisen, and the other member from the minority, in the event there is a minority vote.

61. The Chairman of the Senate Committee on Conference for the same bill shall arrange the time and place of meeting of such committee. It shall require an affirmative vote of not less than four of the members constituting the Committee on Conference to agree upon a report, and the report shall be submitted to both the Senate and the Assembly. Such report is not subject to amendment, and if either house refuses to adopt such report, the conferees shall be discharged and other conferees appointed. No member who has served on a Committee on Conference

shall be appointed a member of another Committee on Conference on the same bill. The presentation and consideration of any report of a Committee on Conference shall always be in order, except during a roll call or when a member has the floor. It shall require the same affirmative recorded vote to adopt any conference report as required by the Constitution upon the final passage of the bill affected by such report. It shall require an affirmative recorded vote of two-thirds of the entire elected membership of the Assembly to adopt any conference report affecting any Assembly bill which contains an item or items of appropriation which are subject to reduction or elimination under the provisions of Section 34a of Article IV of the Constitution.

The vote on concurrence or upon the adoption of such conference report by the Assembly shall be deemed the vote upon final passage of such bill.

Engrossing and Enrolling Bills

62. The Engrossing and Enrolling Clerk shall engross and enroll all bills which shall come to his hands for such purposes, in compliance with the provisions of Section 9503 of the Government Code, and in the order of time in which the same shall be acted upon by the Assembly.

Enrollment

63. After final passage by both houses, any Assembly bill not amended by the Senate shall be forthwith ordered by the Speaker to be enrolled, as provided in Sections 9508 and 9509 of the Government Code. The Committee on Legislative Procedure shall report both the day and the hour each enrolled bill is presented to the Governor, which report shall be entered in the Journal.

SECTION 4

PARLIAMENTARY PROCEDURE

Motions and Questions

Precedence of Motions During Debate

64. When a question is under debate or before the Assembly, no motions shall be received but the following, which shall take precedence in the order named:

First—To adjourn;
Second—To recess to a time certain;
Third—To lay on the table;
Fourth—For the previous question;
Fifth—To set as a special order;
Sixth—To postpone indefinitely;
Seventh—To refer or re-refer;
Eighth—To amend.

Questions of Order Decided Without Debate

65. All incidental questions of order, arising after a motion is made for any of the questions named in Rule 38 and pending such motion, shall be decided by the Speaker without debate, whether on appeal or otherwise.

Appeal From Decision of the Speaker

66. Any member may appeal from a decision of the Speaker without waiting for recognition by the Speaker, even though another member has the floor. No appeal is in order when another is pending, or when other business has been transacted by the Assembly prior to the appeal being taken.

Upon the appeal being seconded, the Speaker may give his reasons for the decision, and shall forthwith put this question to the Assembly: "Shall the decision of the Speaker be sustained?"

An appeal can not be amended and yields only to a motion to recess or adjourn, to lay on the table, or a question of personal privilege. If an appeal be laid on the table, such action shall have no effect on the pending question.

An appeal can not be debated when relating to indecorum, transgression of Rules, or priority of business. A majority vote of the members present shall decide any appeal.

Speaker Explains Order of Business

67. The Speaker may, on his own motion or upon the motion of any member of the Assembly, explain the order of business when the motion pending before the Assembly is not debatable. Such explanation is not to consume more than two minutes.

To Adjourn

68. A motion to adjourn is not debatable and can not be amended, and is always in order, except (a) when another member has the floor; (b) when the Assembly is voting; (c) during a call of the Assembly. The name of any member moving an adjournment and also the hour at which the motion was made and adjournment taken shall be entered in the Journal. A motion to adjourn must be adopted by a majority vote of the members present.

When a motion to adjourn is made and seconded, it shall be in order for the Speaker, before putting the question, to permit any member to state to the Assembly any fact relating to the condition of the business of the Assembly which would seem to render it improper or inadvisable to adjourn. A statement shall not occupy more than two minutes and shall not be debatable.

To Recess to a Time Certain

69. A motion to recess to a time certain shall be treated the same as a motion to adjourn, except that such motion is debatable when no business is before the Assembly, and can be amended as to the time and duration of the recess. It yields only to a motion to adjourn.

To Lay on the Table

70. A motion to lay on the table is not debatable and can not be amended.

A motion to table a bill, constitutional amendment, concurrent or joint resolution requires a majority vote of the entire elected membership.

Any motion to lay on the table, if carried by a majority vote of the entire elected membership, carries with it the main question and everything that adheres to it; provided, however, that a motion to lay an amendment on the table, if adopted, does not carry with it a bill, constitutional amendment, concurrent, joint, or House resolution.

A motion to lay an amendment on the table may be adopted by a majority vote of the members present.

The Previous Question

71. The previous question shall be put only when demanded by five members, and in this form: "Shall the question be now put?" And its effect, when sustained by a majority of the members present, shall be to put an end to all debate and bring the House to a vote only on the question then pending; except that the proponent of the matter pending shall be allowed not to exceed five minutes to close the debate.

Motion to Set Special Order

72. A motion to set any matter before the Assembly as a special order of business must be adopted by a two-thirds vote of the members elected. It is debatable only as to the propriety of setting the main question as a special order of business, and may be amended only as to the time.

Motion to Postpone to a Time Certain

73. A motion to postpone to a time certain shall be deemed and treated as a motion to set as a special order.

Motion to Postpone Indefinitely

74. When a motion is made to postpone indefinitely any bill, motion, or amendment, it opens the main question to debate. Should the motion to postpone indefinitely prevail by a majority vote of the entire elected membership, the main question shall not be acted upon again during the session.

Motion to Amend

75. A motion to amend may itself be amended, but no "amendment to an amendment" can be amended. A motion to amend is debatable, except where the main question to be amended is not debatable. Any motion to amend may be adopted by a majority vote of the members present.

A motion to amend having been decided in the negative, shall not again be in order on the same day, or at the same stage of proceeding. A motion to amend by striking out certain words having been decided in the negative, shall not preclude a motion to amend by adding words, or a motion to amend by striking out and inserting words; but in no case shall a further amendment be substantially the same as the one rejected.

Subject to the above provisions of this rule, a motion to amend is in order during the second or third reading of any bill

A motion to lay an amendment on the table may be adopted by a majority vote of the members present, as provided in Rule 75.

Amendment to Be Germane

76. No amendment to any bill, whether reported by a committee or offered by a member, shall be in order when such amendment relates to a different subject, or is intended to accomplish a different purpose, or requires a title essentially different from the original title of any bill.

No amendment shall be in order which adds or deletes the name of a member as an author or co-author, or which changes the original number of any bill.

Substitute Motion

77. A motion to substitute shall be deemed and treated as a motion to amend.

Motions in Writing

78. Upon request of the Speaker all motions shall be reduced to writing and shall be read by the Speaker before the same are acted upon.

Constitution of Motions

79. No motion, whether oral or written, shall be adopted until the same shall be seconded and distinctly stated to the Assembly by the Speaker.

Division of Questions

80. Any member may call for a division of the question, and the Speaker shall order the question divided if it comprehend propositions in substance so distinct that, one being taken away, a substantive proposition shall remain for the decision of the Assembly.

Withdrawal of Motions

81. After a motion is stated by the Speaker, or a bill, resolution, or petition read by the Clerk, it shall be deemed to be in the possession of the Assembly.

Motion to Be Germane

82. No motion or proposition on a subject different from that under consideration shall be admitted as an amendment.

Motion to Withdraw and Recall Bills

83. A motion to withdraw a bill or resolution from committee, or to re-refer a bill or resolution from one committee to another committee may be made during the regular order of business. A motion to re-refer shall only be debatable as to the propriety of such reference, and shall require a recorded vote of a majority of the elected members.

No bill or resolution shall be withdrawn from committee and placed upon the file except upon two days' notice thereof and except by a recorded vote of a majority of the elected members.

Bills Stricken From File

84. A motion to strike from the file any bill or House resolution requires a majority vote of the entire elected membership. Such bill shall not be acted upon again during the session.

Motion to Rescind Action and Expunge Record

85. Previous to the approval of the Journal by the Assembly, any action may be rescinded and its record ordered expunged by an affirmative recorded vote sufficient to take such action originally; except that no action shall be rescinded and the record expunged by a vote less than a majority of the entire elected membership. No motion to rescind the action and expunge the record shall be made twice on the same proposition.

Reconsideration of Vote

86. Notice of a motion to reconsider on the next legislative day, the vote whereby any bill, constitutional amendment, concurrent or joint resolution was passed or refused passage, must be given on the same day such vote to be so reconsidered was taken.

A notice of motion to reconsider a vote must be given by a member voting on the bill, constitutional amendment, concurrent or joint resolution, and shall take precedence over all motions, except a motion to adjourn. Upon such notice of motion being given, the bill, constitutional amendment, concurrent or joint resolution shall forthwith be placed upon the unfinished business file, and no further action shall be taken prior to the next legislative day. When a notice of a motion to reconsider has once been made, the same shall be considered to be the property of the Assembly.

Any member voting on any motion, amendment, concurrence, Assembly resolution or proposition other than a bill, constitutional amendment, concurrent or joint resolution, may give notice of reconsideration of the vote whereby the same was passed or refused passage on the same day such vote to be reconsidered was taken, which notice shall suspend all further consideration until the next legislative day; provided, however, that a motion to reconsider on the same day the notice was given shall take precedence over and above such notice and upon demand of any member must be put to an immediate vote. A motion to reconsider any proposition other than a bill, constitutional amendment, concurrent or joint resolution shall require an affirmative recorded vote of a majority of the entire elected membership.

No notice of motion for reconsideration shall be in order on the day preceding the last day for consideration of Assembly or Senate bills in the Assembly. No motion to reconsider shall be adopted except upon an affirmative recorded vote of a majority of the entire elected membership, except that it shall require a two-thirds vote of the entire elected membership to reconsider the vote on any matter originally requiring a two-thirds vote for its passage or adoption.

When reconsideration is granted, the bill shall resume its exact position before the Assembly previous to its being voted upon.

Call of Assembly

87. After the roll has been called, and prior to the announcement of the vote, any member may move a call of the Assembly. A majority of the members present may order a call of the Assembly, and the Speaker shall immediately order the Sergeant-at-Arms to lock all doors and shall direct the Clerk to prepare a list of absentees as disclosed by the last roll call, which list of absentees shall be furnished to the Sergeant-at-Arms and printed in the Journal. Thereupon no members shall be permitted to leave the Assembly Chamber except by written permission of the Speaker, and no person shall be permitted to enter except such member as is taken into custody as herein provided, or Senators, officers, attaches, or employees of the Legislature in the official performance of their duties.

Those members who are found to be absent, and for whom no leaves of absence have been granted, shall be forthwith taken into custody wherever found by the Sergeant-at-Arms or his assistants and brought to the Assembly Chamber. No recess or adjournment shall be taken during a call of the Assembly. During such call, the Assembly may consider and transact any matter of business by unanimous consent. No call of the Assembly shall be ordered on any matter while the Assembly is already under call. A call of the Assembly may be dispensed with at any time upon a majority vote of the members present, at which time the completion of the roll call pending when the call of the Assembly was ordered shall become the immediate order of business before the Assembly.

Resolutions

88. The adoption of any resolution authorizing the expenditure of money shall require an affirmative recorded vote of a majority of all members elected to the Assembly. All House resolutions shall be numbered and shall be referred to the appropriate committee by the Speaker.

Motions and Resolutions

89. Any motion or resolution not otherwise provided for under the Rules shall be placed before the Assembly only under this order of business. Unless otherwise provided by law or Assembly rule, any motion or resolution may be adopted by a majority vote of the members present.

Adjournment

90. Adjournment for the constitutional recess or adjournment *sine die* shall be ordered by concurrent resolution. The resolution for adjournment *sine die* shall be adopted by the Assembly not less than seven days before the date set therein for such adjournment.

Members' Decorum and Privileges

Order in Speaking to Questions

91. When a member desires to address the Assembly, he shall rise from his seat and respectfully address himself to "Mr. Speaker." Upon being recognized, he may speak, confining himself to the question under consideration. When two or more members rise at the same time, the Speaker shall designate the member who is entitled to the floor.

No member shall speak more than once during the consideration of any one question on the same day and at the same stage of proceeding, except that the author of a bill or resolution or the mover of a question shall have the right to open and close the debate thereon. No member shall be allowed to speak more than 10 minutes to open and five minutes to close the debate thereon, and no member other than the author or the mover of the question shall be allowed to speak more than five minutes thereon. No member shall yield to any other member the time for which he is entitled to speak on any matter.

Leave of Absence

92. No member shall absent himself from attendance at any session of the Assembly without leave of the Assembly, and no member shall obtain such leave of absence or be excused for nonattendance, except by a two-thirds vote of all members elected to the Assembly, or by unanimous consent.

Personal Privilege

93. Any member may rise to explain a matter personal to himself and shall forthwith be recognized by the Speaker, but shall not discuss a question in such explanation. Such matters of personal privilege yield only to a motion to recess or adjournment.

Objection to Reading of Any Paper

94. Any member upon recognition by the Speaker may object to the reading of any paper before the Assembly. After such objection, the question of reading shall be determined without debate by a majority vote of the members present, upon a brief statement of its substance by the Speaker.

Members Called to Order for Transgressing Rules

95. a. If any member transgresses the Rules of the Assembly, the Speaker shall, or any member may, call the offending member to order. The member so called to order shall immediately take his seat, until the Speaker without debate, shall have determined whether he is in order or not. Such decision by the Speaker shall be subject to an appeal to the Assembly.

b. If any member be called to order for offensive words spoken in debate, the person calling him to order shall state to the Assembly the words to which exception is taken. No member shall be held to answer, or be subject to censure by the Assembly, for language used in debate, if other business shall have been transacted by the Assembly prior to exception being taken to the words spoken.

Members Voting

96. Every member in the Assembly Chamber when a roll call is required shall record his vote openly and without debate, unless the Assembly shall, by a majority vote of the members present, excuse him.

The name of any member who refuses to vote as required by this rule, after being requested by the Speaker to do so, shall be entered in the Journal of the Assembly, together with a statement that he was present and did so refuse to vote. Any member who refuses so to vote may, if he so desires, and immediately after the announcement of the vote, submit a written explanation of his failure to vote and have such explanation printed in the Journal, provided no such explanation shall exceed 50 words in length.

In addition to the entry of his name in the Journal, any member who refuses so to vote when required, and who has not been excused from doing so, may, immediately after the announcement of the vote, in the discretion of the Speaker or upon demand of any member, be summoned to appear before the bar of the Assembly for public censure by the Speaker or by any member designated by the Speaker. Censure of a member as provided by this rule shall not constitute a bar to proceedings for his expulsion from the Assembly pursuant to Section 9 of Article IV of the Constitution.

A member may submit a written explanation of his vote on any bill or House resolution, and have such explanation printed in the Journal immediately following such vote, provided no such explanation shall exceed 50 words in length.

Ayes and Noes

97. The ayes and noes shall be recorded by the electrical voting system on the final passage of all bills, or by viva voce when demanded by three members or when ordered by the Speaker, and on any other question when called for by three members or ordered by the Speaker, the names of which members shall be entered in the Journal.

Voting Not to Be Interrupted

98. When once begun, voting shall not be interrupted, except that before the vote is announced any member may have the total pending vote flashed on the visible vote recorder. Prior to the announcement of the vote the Speaker shall inquire if all members have voted. Any member may move a call of the Assembly after the completion of the roll and prior to the final recording, but no member shall be allowed to change his vote, or have his vote recorded after the vote is announced.

Members at Clerk's Desk

99. No member or other person shall be allowed at the Clerk's desk while the ayes and noes are being recorded or the votes counted.

Tie Vote

100. In case of an equal division, or tie vote, the question shall be lost.

"Two-thirds of the Entire Elected Membership" Defined

101. Wherever the words or figures, "two-thirds of the entire elected membership" appear in any rule, it shall mean 54 votes.

REPORT OF SELECT COMMITTEE

The Select Committee appointed to wait upon the Senate reported that the Senate was organized, and ready to proceed with the regular business.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Concurrent Resolution No. 2: By Messrs. Thurman and Sam L. Collins—Relative to accredited press representatives and the authentication thereof.

Request for Unanimous Consent

Mr. Thurman asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 2, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 2

Assembly Concurrent Resolution No. 2—Relative to accredited press representatives and the authentication thereof.

Resolution read, and adopted.

Resolution ordered printed, and transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Concurrent Resolution No. 3: By Mr. Thomas—Relative to the approval of the charter of the City of Torrance, a municipal corporation, in the County of Los Angeles, State of California, as voted

for and ratified by the electors of the City of Torrance, at an election held therein on the twentieth day of August, 1946.

Request for Unanimous Consent

Mr. Thomas asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 3, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 3

Assembly Concurrent Resolution No. 3—Relative to the approval of the charter of the City of Torrance, a municipal corporation, in the County of Los Angeles, State of California, as voted for and ratified by the electors of the City of Torrance, at an election held therein on the twentieth day of August, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—76.

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

Request for Unanimous Consent to Place Rush Order on Printing of Assembly Concurrent Resolution No. 3

Mr. Thomas asked for, and was granted, unanimous consent that a rush order be placed upon the printing of Assembly Concurrent Resolution No. 3.

COMMUNICATIONS

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

December 23, 1946

Arthur A. Ohnimus, Chief Clerk of the Assembly
State Capitol, Sacramento 14, California

DEAR MR. OHNIMUS: This is to inform you that I have appointed Assemblymen Crichton, Lyons, and Wollenberg as a select committee to meet with a like committee of the Senate to make arrangements for the Joint Inaugural Ceremonies to be held in the Assembly on January 6, 1947.

Sincerely yours,

CHARLES W LYON

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Concurrent Resolution No. 4: By Messrs. O'Day, Gaffney, George D. Collins, Wollenberg, Berry, Brady, Maloney, and Blosser—Relative to approving amendments to the charter of the City and County of San Francisco voted for and ratified by the electors of said City and County of San Francisco at a general election held therein on the fifth day of November, 1946.

Request for Unanimous Consent

Mr. O'Day asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 4, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 4

Assembly Concurrent Resolution No. 4—Relative to approving amendments to the charter of the City and County of San Francisco voted for and ratified by the electors of said City and County of San Francisco at a general election held therein on the fifth day of November, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton, A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—73.

NOES—None

Resolution ordered printed, and transmitted to the Senate.

Request for Unanimous Consent to Place Rush Order Upon the Printing of Assembly Concurrent Resolution No. 4

Mr. O'Day asked for, and was granted, unanimous consent that a rush order be placed upon the printing of Assembly Concurrent Resolution No. 4.

FURTHER CONSIDERATION OF HOUSE RESOLUTION NO. 4

House Resolution No. 4—Relative to the Temporary Rules of the Assembly.

Resolution read.

Mr. Wollenberg offered the following substitute resolution:

Substitute Resolution

Resolved by the Assembly of the State of California, That the Standing Rules of the Fifty-sixth (Regular) Session in effect on June 16, 1945, be, and the same are, hereby adopted as the temporary rules of the Assembly for the Fifty-seventh (General) Session, except as follows:

(1) Rule 19 shall read:

Duties of the Speaker

19. The Speaker shall possess the powers and perform the duties herein prescribed:

(a) To preserve order and decorum; he may speak to points of order in preference to the other members, rising from his chair for that purpose.

(b) To decide all questions of order subject to appeal to the Assembly by any member. On every appeal, he shall have the right to assign his reason for his decision.

(c) To have general direction over the Assembly Chamber and rooms set aside for the use of the Assembly, including the rooms for use by members as private offices.

(d) To name any member to perform the duties of the Speaker, but such substitutions shall not extend beyond adjournment.

(e) To appoint the membership of all special committees, and the respective chairmen thereof.

(f) To propose a schedule of meetings of standing committees.

(g) To have general control and direction over the Journals, papers, and bills of the Assembly.

(h) To act as Chairman of the Committee of the Whole.

(i) To order the lobby and gallery cleared whenever he shall deem it necessary.

(j) To assign desks to properly accredited newspaper representatives.

(k) To authenticate by his signature, when necessary, or when required by law, all bills, memorials, resolutions, orders, proceedings, writs, warrants, and subpenas issued by order of the Assembly.

(1) The Speaker shall be ex officio member of all Assembly, joint, and interim committees with all of the rights and privileges of such membership, except the right to vote. In counting a quorum of any such committees, the Speaker shall not be counted as a member.

(2) Rule 72 shall read:

Standing Committees

72. For their convenient functioning and in furtherance of the thorough consideration of all bills on a given subject, the several standing committees of the Assembly are respectively grouped into the following categories:

1. Rules.
2. Legislative Procedure.
3. Conservation and Planning.
4. Fish and Game.
5. Governmental Efficiency and Economy.
6. Revenue and Taxation.
7. Ways and Means.
8. Education.
9. Crime and Correction.
10. Public Morals.
11. Public Health.
12. Social Welfare.
13. Civil Service and State Personnel.
14. Military Affairs.
15. Municipal and County Government.
16. Elections and Reapportionment.
17. Judiciary.
18. Constitutional Amendments.
19. Agriculture.
20. Livestock and Dairies.

21. Public Utilities and Corporations.
22. Manufacturing, Oil, and Mining Industry.
23. Industrial Relations.
24. Finance and Insurance.
25. Transportation and Commerce.

Prior to the assignment of members to serve on the several standing committees, the Committee on Rules shall consider the preferences of the members with regard to committee assignments, while keeping in view the practical necessity of making assignments so that members will not serve on more than one committee which meets at the same time, and the Committee on Rules thereafter shall determine the number and members to serve on each standing committee. Upon publication in the Journal of the number of members on each standing committee, no further change in the number of members of the committee shall be made otherwise than by a majority vote of the elected membership of the Assembly.

No Member of the Assembly shall be a member of more than three standing committees except that by appointment of the Committee on Rules a member may serve on more committees.

(3) Rule 80 shall read:

Committee on Rules

80. There is a Committee on Rules consisting of nine members, to be elected by the Assembly, which shall, for the purpose of Joint Rule 2, be deemed the Rules Committee of the Assembly.

The Committee on Rules shall appoint all other standing committees of the Assembly unless otherwise directed by the Assembly and shall designate a chairman of each committee so appointed and a vice chairman of each such committee. The Committee on Rules shall select its own chairman and vice chairman.

Substitute resolution read.

Request for Unanimous Consent to Continue Consideration of Substitute Resolution

Mr. Beck asked for, and was granted, unanimous consent that consideration of Mr. Wollenberg's substitute resolution be continued until the next legislative day, but that it be ordered printed in the Journal.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 6, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 1

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following resolution was read:

Senate Concurrent Resolution No. 1—Relative to inaugural ceremonies.

Request for Unanimous Consent

Messrs. Wollenberg and Allen asked for, and were granted, unanimous consent to take up Senate Concurrent Resolution No. 1, at this time, without reference to committee, print, or file.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 1

Senate Concurrent Resolution No. 1—Relative to inaugural ceremonies.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—75.

NOES—None.

Resolution ordered transmitted to the Senate.

RECESS

At 1.43 p.m., on motion of Mr. Wollenberg, the Assembly recessed until 2.30 p.m.

REASSEMBLED

At 2.30 p.m., the Assembly reconvened.

Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

IN JOINT CONVENTION

ASSEMBLY CHAMBER, SACRAMENTO
Monday, January 6, 1947

At 3 p.m., the Senate and Assembly met in Joint Convention.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

INTRODUCTION OF PRESIDENT PRO TEMPORE OF THE SENATE

Hon. Sam L. Collins, Speaker of the Assembly, then presented President pro Tempore Harold J. Powers of the Senate to the Joint Convention.

SENATE ROLL CALL

Hon. Harold J. Powers, President pro Tempore of the Senate, directed the Secretary of the Senate to call the roll of Senators.

The roll was called, and the following answered to their names:

Senators Breed, Brown, Burns, Busch, Carter, Collier, Crittenden, Cunningham, DeLap, Desmond, Deuel, Dillinger, Dilworth, Donnelly, Gordon, Hatfield, Hulse, Jespersen, Judah, Keating, Kraft, Mayo, McBride, McCormack, O'Gara, Parkman, Powers, Quinn, Rich, Salsman, Slater, Sutton, Swing, Tenney, Ward, Watson, Weybret, and Williams—38.

The President pro Tempore declared a quorum of the Senate present.

ASSEMBLY ROLL CALL

Hon. Sam L. Collins, Speaker of the Assembly, directed the Chief Clerk to call the roll of Assemblymen.

The roll was called, and the following answered to their names:

Messrs. Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Mrs. Niehouse, Messrs. O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Sillman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—79.

The Speaker of the Assembly declared a quorum of the Assembly present.

INVOCATION

Upon invitation of the Speaker, Rev. Raymond Renwald, Chaplain of the Assembly, offered the invocation.

REGULAR ORDER OF BUSINESS

By direction of the President of the Senate, the Secretary of the Senate read sections of the Constitution of the State of California as follows:

Of the Constitution (Article V):

Sec. 4.5. The Legislature may regulate by law the manner of making returns of elections for Governor and Lieutenant Governor.

The legislation enacted at the Fifty-third Session of the Legislature regulating the manner of making returns of elections for Governor and Lieutenant Governor is hereby ratified and validated, and it shall have the same force and effect as if it had been passed after the adoption of this provision of the Constitution.

Sec. 15. A Lieutenant Governor shall be elected at the same time and place and in the same manner as the Governor, and his term of office and his qualifications shall be the same. He shall be President of the Senate, but shall only have a casting vote therein.

ANNOUNCEMENT

The Speaker of the Assembly announced that the certificate of election from the Secretary of State had been received relative to the election of Earl Warren as Governor and Goodwin J. Knight as Lieutenant Governor of the State of California.

APPOINTMENT OF JOINT COMMITTEE ON ESCORT

Hon. Harold J. Powers, President pro Tempore of the Senate, announced the appointment of Senators Brown, Collier, and De Lap as the Senate Committee to escort His Excellency, Hon. Earl Warren, Governor-elect of the State of California, to the bar of the Assembly.

Hon. Sam L. Collins, Speaker of the Assembly, announced the appointment of Messrs. Crichton, Lyons, and Wollenberg as the Assembly Committee to escort His Excellency, Hon. Earl Warren, Governor-elect of the State of California, to the bar of the Assembly.

REPORT OF JOINT COMMITTEE ON ESCORT

The Joint Committee on Escort, appointed to wait upon the Governor-elect, and escort him to the Joint Convention, appeared at the bar of

the Assembly, and announced the presence of His Excellency, Hon. Earl Warren, Governor-elect of the State of California.

APPOINTMENT OF JOINT COMMITTEE ON ESCORT

Hon. Harold J. Powers, President pro Tempore of the Senate, announced the appointment of Senators Brown, Collier, and De Lap as the Senate Committee to escort His Excellency, Hon. Goodwin J. Knight, Lieutenant Governor-elect of the State of California, to the bar of the Assembly.

Hon. Sam L. Collins, Speaker of the Assembly, announced the appointment of Messrs. Crichton, Lyons, and Wollenberg as the Assembly Committee to escort His Excellency, Hon. Goodwin J. Knight, Lieutenant Governor-elect of the State of California, to the bar of the Assembly.

REPORT OF JOINT COMMITTEE ON ESCORT

The Joint Committee on Escort, appointed to wait upon the Lieutenant Governor-elect, and escort him to the Joint Convention, appeared at the bar of the Assembly, and announced the presence of His Excellency, Hon Goodwin J Knight, Lieutenant Governor-elect of the State of California.

OATH OF OFFICE ADMINISTERED TO GOVERNOR

Upon arriving at the bar of the Assembly, Governor-elect Hon. Earl Warren took and subscribed to the following oath, administered by Hon. Phil S. Gibson, Chief Justice of the Supreme Court:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Governor of the State of California, according to the best of my ability, so help me God.

PRESENTATION OF THE GOVERNOR

Hon. Harold J. Powers, President pro Tempore of the Senate, then presented Governor Warren to the Joint Convention.

ADDRESS BY THE GOVERNOR

Governor Warren then proceeded to address the Joint Convention as follows:

Inaugural Message by Governor Earl Warren

Mr. Speaker, Mr. President, and Members of the Legislature:

In accordance with the Constitution, I desire to report to you on the condition of our State, and to recommend to you certain matters which, in my opinion, call for consideration by this Fifty-seventh Session of the California Legislature. It is a pleasure to welcome you to Sacramento—in this historic Capitol Building where throughout most of our history the laws of this State have been enacted.

This is an important session of the Legislature from many viewpoints. It is the first regular postwar session. It is the first of the annual sessions recently authorized by the people It is the first session for the Administration that will be serving as California completes 100 years of statehood This State Government for which you and I are temporarily the trustees is the one that will be expected to pave the way for a second century of progress It will be dealing with the problems of a state that has grown and changed more rapidly than any other in the Union.

The responsibility for solving these problems in the interests of a state of over nine million people is our joint responsibility. We can make a partnership of our task if we will—and it should not be difficult for us to do so. In such a partnership, we should be able to find areas of agreement that will make your deliberations fruitful for the entire State.

Such an approach requires a determination to draw a sharp dividing line between public and special interests. It means we must recognize that a thorough consideration of human problems transcends partisanship. It obligates us to cooperate for the common good without regard to party, faction, or personality. In such an atmosphere we should be able to agree speedily upon objectives, and to devote our energies to an honest search for methods of accomplishment. That kind of partnership will pay dividends as long as we keep in focus our vision of a greater and finer California where millions of people can live ordered and happy lives.

I am encouraged by what has taken place in this building during the past four years to propose that we enter upon this session in such a spirit. Those were war years. When I took office in 1943, I told the Legislature that our greatest need was for an era of good will in our State Government. We have had it to a marked degree. There has been little blind partisanship or personal controversy to hinder our attention to the job to be done. I hope that my own approach to our problems has been conducive to that result.

I want to foster the same spirit of cooperation and mutual respect during the next four years, both because it is more pleasant to live in such an atmosphere and because it will contribute to the progress and welfare of our State.

I know that the opportunity to serve at this period of our State's development must thrill you, as it does me. It is a wonderful privilege to be the heirs to California's traditions and the beneficiaries of the progress that has been made in the 100 years since the Bear Flag and the Stars and Stripes were first unfurled on our soil in 1846.

The second century, if started well by us, will be filled with even greater opportunities for the generations that will follow ours. While, therefore, we are celebrating in these next few years the fulfillment of that which was sturdily pioneered by early Californians, it should be our inspiration to recall that we ourselves are pioneering the California of the future.

The frontier has changed but there can be no retreat or rest from the fight to protect our people against corrosive and destructive forces of both man and nature—against crime; against jeopardy of life and limb on the highways, in industry and in the fields; against preventable illness and disease; against the severities of misfortune among the helpless and handicapped; against the plight of homelessness; against ignorance that results from inadequate facilities for the training of young people; against floods; against the wastage of a precious heritage of natural resources.

These problems should not be left for solution at the hands of an already overburdened National Government. They are essentially home problems. State Government must draw fully upon all its own resources in their solution. Only in this way can we avoid federal bureaucracy, which in the abstract we deplore, but which in everyday life we too often encourage. Only in this way can the tremendous values of a government that is close to the people be preserved.

I realize there are limitations upon state and local government in the solution of the problems of our people. Certainly they cannot be solved at one legislative session. Our people do not expect any such miracle. They do expect, however—and they are entitled to have—sound and steady progress.

We must adapt our framework of law and service to the welfare of 2,000,000 new residents that have been added to the seven millions who were here prior to 1940. We must also take into consideration the needs of the 10,000,000 more who, I firmly believe, will come here during the next few decades. Our task will not be easy, but it can be thrilling.

We have the satisfaction of knowing that even during the war years we were able to make some progress. We improved our humanitarian services, with respect to which delay would have been intolerable. We were able to reorganize the major departments of the State Government for better service under modern conditions. We inaugurated programs for the better conservation of our natural resources. We expanded our system of unemployment insurance for the protection of our working people and the stabilization of our economy. We encouraged business, industry, and agriculture to reestablish themselves on a peacetime basis. We reduced taxes.

All these things constitute a record of some progress made even during the war. Whether they are to be of the greatest value to our people, however, will depend on how we now build upon them. This is a time for introspection and resolution—not for self-satisfaction.

We can plan hopefully for the future. Our State has been able to change over rapidly from an economy geared to war production. At the present time, California is in a period of high employment. Six months after V-J Day it was necessary to pay unemployment insurance compensation to 227,000 persons, but this number has declined to 112,000 and the duration of payments is only 8.4 weeks on the average. We have 3,610,000 people gainfully employed in our State, compared with only 2,514,000 in April of 1940, a relatively prosperous peacetime year.

The manner in which our commercial life has adjusted itself to postwar conditions is a tribute to the resourcefulness of business and industry in our State and to the energy of their leaders.

As a result of this economic activity, our State Treasury will end the present fiscal year with a substantial surplus. The budget to be presented to you for the year ending June 30, 1948, will be a balanced budget, although it will of course reflect the

greater needs of our expanding population for state services as well as higher costs. Meanwhile, our estimates show that it will be possible during the coming year to continue the tax reductions made in 1943 and re-enacted in 1945. I believe it is in order to continue these reductions.

In my opinion, any surplus beyond current requirements should be conserved for two vital needs. One of these is to maintain adequate hospitals, educational and other institutional facilities. The other is to provide for the rainy day which sooner or later comes into the lives both of people and governments.

If business should drop off only 20 percent in California, it would adversely affect our revenues by as much as $100,000,000 a year. When I previously proposed to the Legislature that we should set something aside for unforeseen needs, some people said I was taking a defeatist attitude—that I should be thinking in terms of prosperity and not depression—but I am still of the opinion that it is no more defeatist for a state to provide for a possible rainy day than it is for an individual to do so. I am as optimistic as anyone about the economic future of our State, but I think it is elementary prudence to establish a rainy day fund.

During this session we shall have the further advantage of working under a new system whereby the Legislature can now budget for state services on a yearly basis. In order to derive the full benefits from this system, I believe that a thorough study of the tax situation in California, such as I have previously suggested to you, should now be undertaken. Inquiries have already been conducted by your interim committees which will provide a basis for an over-all and adequately financed investigation. Such an investigation should include an examination of the respective responsibilities of local and State Government, and the manner in which they share the tax dollar of our people.

Until this is done—until we have these facts—it will be true that any tinkering with present procedures or allocations merely results in robbing Peter to pay Paul.

On the organizational side of State Government, the time has come to abolish all remaining wartime agencies, and to give consideration to revamping such permanent departments as may require reorganization.

The State War Council has already been liquidated. The State Guard is being disbanded as rapidly as the National Guard can be re-activated. In keeping with our promise made when these agencies were created, I now ask for similar action with respect to the Reconstruction and Reemployment Commission and the Farm Production Council.

This decision is supported by the recent declaration of the President ending hostilities. A careful analysis of the effect this proclamation will have upon all our wartime legislation will shortly be available for your consideration.

The Farm Production Council performed an extremely valuable wartime service to agriculture and the public Its activities with respect to recruiting and housing farm labor were of inestimable value in producing the crops so essential for war purposes. Any of its duties that are still necessary can now be taken over by our permanent state agencies, and the council can be discharged with thanks.

The Reconstruction and Reemployment Commission, created during the war, has served its purpose and in my opinion served it well. It was able to mobilize leadership from every walk of life to prepare for the return of peacetime conditions. It has worked steadily and effectively with our cities and counties and citizen groups representing every phase of California life in developing their postwar plans.

The commission has made exhaustive studies of great value to our people on such subjects as retail trade outlets, new industries, self-employment opportunities, steel and steel uses, aviation, harbors, mineral resources, and our educational system. Many of its recommendations to the Legislature have been enacted into law.

When the Reconstruction and Reemployment Commission was created, you gave to it the responsibility for administering the Planning Act of 1935, and the State Planning Commission was abolished. Unless other provisions are now made for state planning, that important function of government will automatically lapse. To say the least, this would be illogical in an expanding state such as ours

Inasmuch as it was the Governor who formerly appointed the Planning Commission, and inasmuch as he is charged both with proposing and administering programs for the development of our State, I suggest that the responsibility for planning be transferred to his office and that a new Planning Act be enacted to accomplish this.

The Governor's Office should also have the responsibility of assembling the statistical information obtained by our various state departments and integrating it with the research that is essential in evaluating economic trends. Our cities and counties, and the public at large, are entitled to have this information made available to them as a composite economic picture of our State.

An example of the need for constant planning is illustrated by the work we have had to do in preparing a Master Airport Plan for the State. Lacking other means, we called upon the Reconstruction and Reemployment Commission, but a State Aviation Commission should now be created.

Within our borders are the plants at which were constructed 50 percent of all the airplanes used by our Nation's armed forces during the war, and we should be the peacetime capital of the aviation world. Surprisingly, however, we are one of only five states that have failed to establish an aviation authority. Until we do so, the State can

neither help our cities and counties in planning for the air age, nor in turn receive help from the Federal Government.

Of all the problems in our State, housing remains the most critical. Jurisdiction over building materials, priorities, and surplus housing has been in the hands of the Federal Government, but its programs so far have been marked by confusion and frustration.

Last year, you appropriated $12,000,000 for participation in several federal-state-local programs of utilizing surplus housing in California. Recently, the Federal Government summarily abandoned its emergency housing program for veterans—leaving between seven and eight thousand units in various stages of construction.

This clearly demonstrates that we cannot place ourselves wholly at the mercy of the federal bureaus in this matter, and I wish to present to you a proposal that has been studied by our Department of Finance, Department of Veterans' Affairs and the Reconstruction and Reemployment Commission. These state agencies have ascertained that large quantities of dwelling units and housing materials not heretofore declared surplus are now becoming available. The material is usable not only for temporary housing purposes, but also in the construction of good permanent housing.

It is the obligation of State Government to assist in every way to make this material easily and promptly available to veterans who desire to purchase it. In order to accomplish this, I suggest that you make available a revolving fund to be used by the Department of Finance for the purchase of this material and its resale to veterans.

An unprecedented volume of home construction could be under way at the present time if materials were available. The stumbling block is not a lack of money. Our financial institutions and the real estate and building industries of our State are fully prepared to go ahead with their part of the job. We have kept closely in touch with the building materials situation, and will continue to press the Federal Government for action.

In the meantime, we should be giving consideration to implementing the Urban Redevelopment Act which was passed by the Legislature in 1945, because the time will soon come when building conditions will make it possible to eliminate the blighted areas of our cities

We should also re-appraise our building codes and regulatory services to assure that they are not cumbersome and that they conform to present-day conditions.

The people, acting upon proposals of the Legislature, have approved bond issues aggregating $130,000,000 for the purpose of making loans to World War II veterans for home and farm purchases. Although this program also lags because of construction delays and inflated prices, our Department of Veterans Affairs has been able to make 5,269 loans for a total of $28,383,214. We are ready and able to do our part in placing California veterans in the kind of homes for which they longed while overseas and which they now desperately need.

Our educational program for war veterans is moving forward more rapidly than was anticipated, and I recommend an emergency appropriation to finance it from this date to the end of the fiscal year.

I also recommend a continuation of all our services that help us in our desire to assist our veterans in every possible way.

Comparable only to the distress resulting from the housing shortage is the tragic situation in which we find ourselves as the result of an outgrown highway system. Our streets and roads have become places of frightful danger, and our economic development is being retarded.

To enable the Legislature to give its undivided attention to this problem, and to hasten the effective date of the statutes enacted relating to it, I am calling you into special session next Monday. At that time I shall submit my views more fully for your consideration.

We must also work for the greater safety of life and limb in industry. Tremendous increase in the use of machinery makes it imperative that we keep industrial safety abreast of industrial methods.

We have put into effect badly needed safety regulations and have written new safety orders for various occupations. We will continue to try to protect life and limb in preference to compensating for the loss of them. Unfortunately, accidents cannot be eliminated entirely. We can, however, in accordance with our obligation under the Workmen's Compensation Act, make adequate provision for the victims of accidents.

Consequently, I recommend that the act be studied with a view to restoring California to its former enlightened place among the states in this program which so vitally affects our working people.

Our families must also be protected as far as possible against preventable illness and disease. The first line of defense on the public health front is in the local community. Every county should be in a position to provide communicable disease control, maternal and child health services, environmental sanitation and food inspection, public health laboratory facilities, adequate health records and community health education. These are the minimum essentials.

At the present time, 26 counties in California do not have a full-time health officer. Over half of the counties having full-time health officers are unable to provide even the basic health services. In nearly every county, there is need for improvement.

In order to step up our health services throughout the State, the State Government should offer not only consultation, but financial assistance to those counties that

have full-time health officers and comply with reasonable standards. These funds should be allocated so that the counties least able to finance health programs will be given a special opportunity to bring themselves at least up to minimum levels. The joint operation of health departments by two or more small counties should be encouraged where this will be more economical and still result in better service to the people. I recommend that an adequate appropriation be made for this purpose.

It has also become necessary for the State to lend a stronger helping hand to the counties in their fight against tuberculosis In 1945, tuberculosis was responsible for 3,840 deaths—40 percent of all deaths due to communicable disease in California. This disease can be eliminated as a major cause of death if all cases are found early and treated properly.

However, the cost of hospitalization has increased to such an extent that additional state aid to the counties is necessary. This assistance should be proportionately greater to the smaller counties, and especially designed to assist those that have no facilities or inadequate facilities for the care of tubercular patients. If this is done, uniform care may be made available and another step taken toward the ultimate eradication of this disease.

Our fight on the public health front is not limited to physical illness. California is now caring for 30,000 extreme cases of mental illness in its state hospitals, and thousands of others are in need of medical care. Through the acquisition of Hammond and DeWitt General Hospitals from the United States Army, we will be able to relieve the congestion of our mental hospitals to some extent, and through other provisions in the budget we propose to improve their services to our afflicted citizens. A great deal of this waste of human usefulness could be avoided, however, by early and intelligent preventive action.

We are operating out-patient clinics at San Francisco and Los Angeles, where people undergoing mental strain may obtain treatment in time to prevent a complete breakdown. I am convinced that these clinics can save thousands of people from a lifetime of suffering, and that they can actually save dollars for the State by decreasing the number of people that must be hospitalized at state expense. Therefore, I request you to give serious consideration to the establishment of additional clinics at San Diego, Fresno, and Sacramento, and a second clinic at Los Angeles. The staffs of these clinics will also be able to furnish mental hygiene service to the smaller communities on a mobile basis.

Higher standards of public health in California require more and better hospitals and laboratory facilities. Many of our people must travel long distances and beyond their county borders in order to reach an adequate hospital. This travel time can easily represent the difference between life and death. In an enlightened state like California, a hospital within an hour of every resident should be the ultimate goal. To achieve it, the assistance of the State is necessary.

In the opinion of public health authorities, there should be 4 5 hospital beds for every 1,000 people, which means in California that we should have not less than 41,000 beds. We actually have 34,000, of which 10,000 are in substandard hospitals. Consequently, California should have 17,000 new hospital beds to take care of the present-day normal requirements of its people, and even this does not take into consideration the fact that our population is increasing at a rate of 27,000 people each month.

We have been fortunate in recent years that no epidemic has descended upon us such as the influenza that swept our country following World War I. If this should occur, particularly in view of our swollen population, California would be confronted with a disastrous situation.

Recognizing the need for adequate hospital facilities, the Federal Government has initiated a national program for the construction of hospitals. Each dollar of federal money must be matched to the extent of $2 by the local communities. The government has allocated approximately $2,000,000 per year to California for the next five years. I recommend that the State participate in this program by assuming one-half of the required local contribution.

We have the machinery through which to work in carrying out such a program. I refer to the Hospital District Act, enacted by you in 1945, under which 15 community hospital districts have been formed, with many others in some stage of development at the present time. These 15 districts are distributed from Del Norte to Riverside, and from San Luis Obispo to Inyo Counties.

I believe this federal program will be expanded and that eventually every California community, with state and federal assistance, can have a hospital if it really wants one. When these funds have been exhausted, I believe our State should be willing to appropriate more money on the same basis until our objective of a good hospital within an hour of every resident is achieved.

It is not sufficient, however, to have medical services, hospitals, clinics and laboratories—no matter how expert or modern and no matter how conveniently located—unless the people have economic access to them, not as charity but as something for which they have willingly and individually paid.

The very fact that great strides have been made in medicine means that medical and hospital care are becoming increasingly expensive. The cost of hospitalization in California, according to a recent publication, is the highest in the Nation—$12.84 per day on the average. This is only part of the cost of a serious illness, but it is clearly beyond the ability of working people to pay.

When serious illness or injury strikes the home of the average Californian, the impact on the family finances results either in exhaustion of savings, heavy debt for the future, or a resort to public charity.

Through normal channels of business, we have applied the familiar principle of insurance to protect our homes and our property, but no adequate means exists for insuring the most precious thing in life—the health of our family. This principle of insurance must be applied to the health of our people, and because there is no reasonable prospect of such insurance becoming available in any other way, the State should provide a system for making it available by encompassing all the working people of California.

If everyone could now obtain adequate insurance at rates within his means to protect himself and his family against the heavy expense of illness or nonindustrial accident, just as he insures his home against fire or his automobile against theft, I would not make this proposal. Attempts, however, to apply the insurance principle to health have failed, and will fail, because plans to accomplish this do not operate within a sufficiently large field to really average the risk and spread the cost. Without some action on the part of State Government to broaden these plans by enlarging the field of contribution, no progress can be made commensurate with the urgency and scope of the problem.

I am not unmindful of the discussion this will again provoke, because the memory of the controversy engendered by my similar proposals two years ago is still fresh in my mind. But certain other things also remain in my mind—first, that there was no refutation of the need for spreading the cost of medical and hospital care through some prepayment plan, and, secondly, that there was no alternative program offered to accomplish the desired results. These facts alone justify resubmission of the question.

I have previously submitted two separate proposals, one for a comprehensive system of prepaid medical care, and the other for a more limited system of hospital and laboratory insurance. I have never claimed to have the precise answer to this question. I have always been ready, however, to discuss methods for accomplishing the desired result, because I believe that if all who recognize the need for improving the public health by reducing the cost of medical care will honestly search for the answer, a way will be found. I am sure it can be done without injuring anyone, and at the same time that it will relieve millions of our people from the spectre of bankruptcy and indigency which are the present-day results of the cost of illness.

Ranking in importance with the health and safety of our people is the education of our children. California should not be satisfied with any educational standards but the best. The best should be made available to every child whether he lives in the city or the country, and whether he lives in a rich or a poor school district. We still have 1,019 one-room schools and 440 two-room schools, most of them in poor districts and unable to furnish adequate standards of education.

By the equalization of school funds, the consolidation of districts, and state financial assistance in the construction of school buildings, these poorer districts can be placed on a firm foundation. I therefore renew my recommendation of last year that funds be made available to impoverished school districts for this purpose.

Among the 1,500,000 children of school age in our State, 32,000 stand in need of specialized attention in order to overcome mental backwardness. I have studied the report of your interim committee on this subject, and I favor its proposal that the State provide a substantial part of the cost of this special education.

To train these retarded children to be self supporting is not only an investment in citizenship. It will be an actual saving in dollars, because otherwise many of them eventually would be dependent upon the State for support.

Looking forward to the growth and development of California as a western empire with twice its present population, we must use our best foresight in making sure that the natural resources with which we have been so abundantly blessed are carefully conserved and intelligently used.

Until recent years we did little to conserve our timber supply beyond maintaining a fire suppression program. Fire, insects, blights, and bad cutting practices have denuded millions of acres, and our consumption of lumber exceeds replenishment by a half billion board feet yearly. If we take practical measures now, we can harvest timber from our 16,000,000 acres of forest lands much as we harvest agricultural crops, and thus maintain a permanent source of construction and packaging materials. California uses almost a billion board feet of lumber each year to package its agricultural products alone.

We should make provision for acquiring additional portions of idle cut-over lands that once were our most productive forests, and for stepping up our blister rust control program in order to protect the valuable remaining stands of sugar pine trees in our State.

A service to the 18,000 small owners of timber lands in our State comparable to the work of our farm advisers should also be provided. Such a service, performed by forestry advisers, would assist these small owners, whose timber lands often are adjacent to their farms, in substituting sustained-yield methods for wasteful practices.

It is also time that the State assumed its proper place of leadership in realizing maximum values from our opportunities for outdoor recreation. I renew my recom-

mendation for creating in the Department of Natural Resources a Division of Recreation to coordinate the activities of the various state agencies which have an interest in this field and to serve our cities and counties in developing a more effective use of our mountain parks and our beaches. It is my belief that our state parks are of no greater value than the use that is made of them. That greater use by our people should be encouraged and made possible. This is becoming increasingly important as our cities continue to grow and their congestion increases.

In terms of the essentials of life, the agricultural lands of California constitute our greatest natural resource. For the fourth successive year, we have surpassed every other state in dollar volume of crops.

The day has arrived, however, when California must make more effective use of research and its results in meeting the increasing competition of other regions. Our farmers are faced with higher costs than most in getting their crops to the consumer, because of our distance from the great markets of the eastern states.

This factor can be offset, not only by keeping abreast of every new production method, but also by constantly improving handling, processing and marketing techniques to bring about delivery to the ultimate consumer of the full nutritional and taste values of our agricultural products.

The report of the Agricultural Research Commission created by you a year ago confirms the need for an accelerated program, and I recommend an appropriation of $1,500,000 for this purpose during the coming year. As in the past, this research should be made by our university, and in order to assist the university, the Agricultural Research Commission should be made permanent and given the responsibility of keeping the university constantly informed of the practical, every-day research needs of California farmers.

The future of agriculture, and to a great extent the future of all California, depend upon the manner in which we conserve, distribute and use our supply of water. The ingenuity of our farmers and water conservationists has developed the vast amount of water now in use throughout the State. Most future water conservation projects, however, will be beyond the jurisdiction and resources of local regions. They are large public projects that call for federal, state and local cooperation.

Although a great deal of work has been done by our State Division of Water Resources and other public agencies, it is time that we bring our State Water Plan up to date, and determine what kind of management would best serve the orderly growth and development of our State

This matter has not heretofore been dealt with comprehensively. Public opinion has been divided, and in many instances conclusions have been based on emotion rather than on fact. To continue in this way would inevitably retard the development of California, because the federal appropriations that we obtain will depend largely upon a united front being presented by us in the Congress.

We must begin now to clarify our thinking on this subject and organize our efforts. For this purpose I recommend that the Water Resources Act of 1945 be amended to empower the State Water Resources Board, within its appropriations, to initiate water surveys upon its own motion, and to report to the Legislature and the Governor upon the comprehensive and orderly development of our water resources.

Every war has its aftermath of hatred, discrimination and persecution. World War II is no exception. Even now, as people of good will strive to prepare a world order based upon justice and fair dealing, we find race hatred disturbing world peace. Here in free America, fanatics are already at work to divide us by preaching that doctrine. I am sure cosmopolitan California does not condone such practices, and I also feel certain that in rejecting Proposition No. 11, at the recent election, our people intended only to withhold their approval from a measure they considered unworkable. I believe they would like to eliminate discrimination so far as is humanly possible

Two years ago, I recommended the establishment of a Commission on Political and Economic Equality. A bill for this purpose failed of passage because there were on the one hand, those who were unwilling to take any action, and on the other hand, those who insisted on doing more. The commission which I then proposed, and which I again recommend, would not be an administrative agency. It would make no regulations and enforce no laws. It would investigate, study, and report conditions as they find them to the Legislature and the Governor for action. This would be extremely helpful because at the present time, I have no means, and I am sure you have none, of obtaining objective information on this subject.

In its transition from wartime production to a peacetime economy, our Nation is passing through an inevitable period of inflation and similar economic difficulty, and this has tended to aggravate differences between management and labor and multiply the number of work stoppages.

Under the National Labor Relations Act and the decisions of the Supreme Court, the Federal Government has jurisdiction over most labor disputes, and it is my belief that the major effort of the State should be to promote free collective bargaining and the avoidance of a war of legislation between management and labor. Such a state policy paid dividends during the war, and I am of the opinion it will do so now.

We can contribute additionally to industrial peace in our State by making our services more readily available as mediator and conciliator in local labor disputes. Unfortunately, we are not able to do so under our present statutes

Section 65 of our Labor Code provides that the State can mediate only when all parties to a dispute so request. I know that many people have wondered why the State does not use its good offices in this regard, and I recommend that Section 65 be amended to permit us to do so upon the request of any party to the dispute

I trust that this Legislature will create a commission to coordinate on a statewide basis the celebrations that will be held in California during our next four centennial years. This will make our rich past live again, and it will accentuate the greatness of our hopes for the future

In a real sense, however, this session can do more than merely arrange the ceremonies with which we shall honor these anniversaries. In a spirit of humility and trust in Divine Providence it can prepare the solid groundwork of a more lasting monument, one that will be as great and as broad as California itself—an exemplification of what a people can do to create for themselves the social, economic and spiritual conditions that make for better living. I ask nothing more than to work with you in such a spirit and toward such a goal

OATH OF OFFICE ADMINISTERED TO LIEUTENANT GOVERNOR

Lieutenant Governor-elect Goodwin J. Knight then took and subscribed to the following oath administered by Hon. Phil S. Gibson, Chief Justice of the Supreme Court:

I do solemnly swear that I will support the Constitution of the United States and the Constitution of the State of California, and that I will faithfully discharge the duties of the office of Lieutenant Governor of the State of California, according to the best of my ability, so help me God.

INTRODUCTION OF LIEUTENANT GOVERNOR

Hon. Sam L. Collins, Speaker of the Assembly, then presented Lieutenant Governor Goodwin J. Knight to the Joint Convention.

ADDRESS BY LIEUTENANT GOVERNOR

Lieutenant Governor Knight then proceeded to address the Joint Convention as follows:

ADDRESS BY LIEUTENANT GOVERNOR GOODWIN J. KNIGHT
JANUARY 6, 1947

Four years ago when a new Governor and Lieutenant Governor were inaugurated in this room our Country had been engaged in the Second World War for a little more than a year. Our new leaders spoke of the task of conducting the State Government on a war basis.

That administration, led by Governor Earl Warren, has faced great problems and has given to our State fine leadership, and California's contribution to the victory of our armed forces was notable; all the more so because we here in this western area had not only all of the complexities and burdens of many of the other states in wartime, but in addition we were practically a vast supply depot for the whole Pacific Theater in the Japanese conflict, and at that time, though it seems remote today, we were exposed and close to the front of actual fighting.

Throughout the great war with its controls, disruptions and hardships free government of free men in California was maintained. Today we meet as citizens who are proud of the achievements of the Administration, the Legislature, the civil service departments and the Judiciary from 1942 to 1947

The Federal Union and all of the states, including our own, are striving today to return to orderly peacetime living. We are doing this, but with one new factor. During the war we funneled through our cities and towns to and from the battle fronts perhaps 8,000,000 men and women in uniform. They came to know, appreciate and love California. Many thousands have returned to make their permanent homes here —and the flood of new people has not receded This element in our lives must be a basic concept of all our work in government. It is not projected in the future. It is here now

As an administrative officer and a part of the Executive Department, I shall work with the Members of the State Senate—whose duty and right it shall be, along with the Members of the Assembly, to form and pass legislation. Theirs will be a serious responsibility, all the while being under the white hot light of public scrutiny, open debate and vigorous approval and equally, in some cases, determined opposition. The other constitutional duties of the Lieutenant Governor are well known. I approach this new work with a firm conviction in the eternal soundness and verity of a democratic republic.

Three hundred and twenty-six years ago a small group of people landed on the wintry shores of New England, bringing with them as their greatest power for a new

life a belief. That belief was a deep determination to exercise self government, guaranteeing certain personal freedoms. Many others came and added strength and numbers to this political philosophy; the dignity of human personality, the creation of a state for the benefit of the people and a denial of the practice of man living in fear of, and only for, the power and security of a king, a regent or a group of masters

These fundamentals were the cornerstones of the first civil government in California. They have remained so ever since. They are the whole structure we call constitutional government. They have been attacked, misrepresented, denounced and condemned. They will be again, but you and I and countless clear-headed Californians will defend them and keep them. The priceless treasure of a sovereign people stimulating in their daily lives the highest aspirations of freedom under law and good will toward all men.

BENEDICTION

Upon invitation of the Speaker, Rev. William C. Pearson, Chaplain of the Senate, pronounced the benediction.

INTRODUCTION OF GUESTS

The Speaker introduced to the Members of the Senate and the Assembly, and to visitors, the following distinguished guests:

Mrs. Earl Warren, wife of His Excellency, Governor Warren, and and their three daughters, Virginia, Dorothy, and Nina Elizabeth;

Mrs. Goodwin J. Knight, wife of Lieutenant Governor Knight;

Mrs. Harold J. Powers, wife of the President pro Tempore of the Senate, the Hon. Harold J. Powers;

The Hon. Frank M. Jordan, Secretary of State;

The Hon. Fred W. Howser, Attorney General;

The Hon. Jerrold Seawell, former President pro Tempore of the Senate and newly elected member of the State Board of Equalization;

The Hon. Thomas Kuchel, State Controller; and

Mrs. Sam L. Collins, wife of Speaker Collins.

ADJOURNMENT OF JOINT CONVENTION

At 4.20 p.m., there being no further business, the Speaker of the Assembly declared the Joint Convention adjourned sine die.

IN ASSEMBLY

At 4.35 p.m., the Assembly reconvened.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

COMMUNICATIONS

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

COUNTY SUPERVISORS ASSOCIATION OF CALIFORNIA
SACRAMENTO, CALIFORNIA, July 25, 1946

Mr. Arthur A. Ohnimus, Chief Clerk of the Assembly
State Capitol, Sacramento, California

DEAR MR. OHNIMUS: I am attaching a copy of Resolution No. 6 relating to compensation of legislators, which resolution was unanimously adopted by the annual convention of this association held in Eureka, California, on June 28, 1946.

A copy of the resolution has today been forwarded to each Member of the Assembly.

Sincerely yours,

FREDERIC L. ALEXANDER, General Manager

COUNTY SUPERVISORS ASSOCIATION OF CALIFORNIA

RESOLUTION NO. 6—PAY OF LEGISLATORS

WHEREAS, The compensation of Members of the Legislature as set by the Constitution of the State of California, by amendment adopted November 4, 1924, is $100 per month for each month of the term for which elected; and

WHEREAS, Such a salary involves too great a monetary sacrifice on the part of those capable of performing the duties of a legislator in that it actually requires an invasion of their own private funds to take care of the expenses of their public office, and there is serious need for an equitable adjustment of such salaries to meet corresponding adjustments made in salaries of members of other governmental bodies and in line with those paid in private industry; and

WHEREAS, Such an adjustment would serve to attract and hold in the Legislative Branch of our State Government those who are best qualified to serve in that capacity; now therefore, be it

Resolved, by the County Supervisors Association of California, That the Legislature be requested to consider and pass a constitutional amendment making an adequate adjustment through increased compensation for Members of the Legislature, for submission to a vote of the people at a general election, and that the County Supervisors Association of California go on record as favoring such constitutional amendment.

Adopted by Thirty-sixth Annual Convention of County Supervisors Association of California, Eureka, California, June 28, 1946.

(SEAL)

WM. R. MACDOUGALL
Associate Legal Counsel

By the Chief Clerk:

A communication from James G. Bryant, Chief of the Division of Public Employment Offices and Benefit Payments, relative to the claim of Ellis Whitlock for Servicemen's Readjustment Allowances, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

STATE OF OREGON
HALL OF REPRESENTATIVES
SALEM, July 31, 1946

Mr. Arthur A. Ohnimus,
Chief Clerk California Legislature,
Sacramento 14, California

DEAR MR. OHNIMUS: I gratefully acknowledge your letter of July 24th with enclosed copy of House Resolution No. 21. I certainly appreciate the splendid courtesies extended to me when I had the pleasure and privilege of sitting in on the reconvening of the California Legislature on July 22d.

Sincerely yours,

PAT LONERGAN

By the Chief Clerk:

A communication from Wm. J. Silva, State Fish and Game Commissioner, relative to fish and game wardens, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from William K. Smith, Executive Officer, State Personnel Board, relative to eligible lists and veterans' preferences in cases where the list is limited to a predetermined number of names, was received, to be referred to committee.

By the Chief Clerk:

A communication from Paul Scharrenberg, Director of Industrial Relations, relative to 40-hour basic week for employees of the Department of Industrial Relations, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Maynard Garrison, Insurance Commissioner, relative to 40-hour work week budget for the Insurance Department, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from H. F. Freeman, Comptroller, Department of Employment, relative to a 40-hour work week for employees of the department, and acknowledging receipt of Assembly Concurrent Resolution No. 11 of the Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Emory T. Nunneley, Jr., General Counsel, Civil Aeronautics Board, Washington, D. C., relative to future regulation of non-certified air carriers, was received, to be referred to committee.

By the Chief Clerk:

A communication from Chester T. Lane, Acting Foreign Liquidation Commissioner, Department of State. Washington, D. C., relative to use of office space in California by the various federal agencies, and acknowledging receipt of House Resolution No. 31, Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Albert Pierson, Acting Deputy Administrator, War Assets Administration, Washington, D. C., relative to use of office and storage space, and acknowledging receipt of House Resolution No. 31, Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from J. F. Jelley, Assistant Chief, Bureau of Yards and Docks, Navy Department, Washington, D. C., relative to release of office space in California, and acknowledging receipt of House Resolution No. 31, Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from William H. Woodfield, Jr., Imperial Council, Nobles of the Mystic Shrine, relative to Assembly resolution welcoming the Nobles of the Mystic Shrine to the State of California, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Frank C. Mortimer, Building and Loan Commissioner, relative to a 40-hour work week for the employees of the Division of Building and Loan, and acknowledging receipt of Assembly Concurrent Resolution No. 11, Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Robert P. Patterson, Secretary of War, relative to release of office space in California, and acknowledging receipt of House Resolution No. 31, Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Colonel P. A. Feringa, Corps of Engineers, War Department, Washington, D. C., relative to the inundation of Highways Nos. 77 and 192 in the Prado Reservoir, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from W. H. Hitchman, Secretary, Balboa Tournament of Lights Assn., expressing appreciation for House Resolution No. 20, Fifty-sixth (Second Extraordinary) Session, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from W. L. Clayton, Under Secretary for Economic Affairs, Department of State, Washington, D. C., relative to restrictions on the exports of almonds from the principal almond producing countries, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

October 18, 1946

Mr. Arthur A. Ohnimus, Chief Clerk
California Legislature, Sacramento 14, California

DEAR MR. OHNIMUS: I want you and the Members of the California Legislature to know how very much I appreciate Assembly Concurrent Resolution No. 1, adopted July 23, 1946, copy of which was sent to me while I was in the hospital. The many messages of sympathy and understanding I received provided encouragement which helped me to recover more quickly.

Thank you sincerely for your thoughtfulness and best wishes.

Very sincerely yours,

HOWARD HUGHES

By the Chief Clerk:

A communication from Eddie Mitchell, Represa, relative to amending Section 209 of the Penal Code, was received, to be referred to committee.

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal, the resolution transmitted therewith to be referred to committee:

THE CITY OF SAN DIEGO
SAN DIEGO 1, CALIFORNIA, November 18, 1946

Mr. Arthur A. Ohnimus, Chief Clerk
The State Assembly, Sacramento, California

DEAR SIR: A certified copy of City Council Resolution No. 84564 memoralizing and requesting the State Legislature during the Fifty-seventh Session to amend the Alcoholic Beverage Control Act so as to prohibit the issuance of liquor licenses within a radius of 600 feet of any school or church, is transmitted herewith.

Very truly yours,

FRED W. SICK, City Clerk

By the Chief Clerk:

A telegram from Mrs. C. K. Keller, Mrs. E. H. Perry, Mrs. J. R. Sharpsteen, and Mrs. B. Hunt, of Piedmont, relative to protection of citizens of Piedmont against lawlessness, was received, and ordered filed with the Secretary of State.

By the Chief Clerk:

A communication from Walter P. Warmbold, Managing General Partner, Walter P. Warmbold & Associates, relative to the State Board of Accountancy, and enclosing several letters, was received, to be referred to committee.

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

December 16, 1946

Mr. Arthur Ohnimus, Chief Clerk of the Assembly
State Capitol, Sacramento 14, California

DEAR MR. OHNIMUS: After learning of the death of our good friend and Member of the Assembly, John Pelletier, I appointed as a legislative committee and as pallbearers from the Members of the Assembly, Hon Thomas J. Doyle, Hon Frank J. Waters, Hon. John W. Evans, Hon. Vernon Kilpatrick, Hon. John C. Lyons, Hon. Dwight H. Stephenson, and former Member of the Assembly, and a very dear friend of John Pelletier, Frank Mouser. These men all attended the services and represented the Legislature, and acted as pallbearers in the rites for our dear and loved deceased member.

I ordered flowers from Dostal's on behalf of the membership of the Assembly in the form of a beautiful blanket of flowers, which was laid upon the casket. Pierce Brothers, undertakers, handled the details of the funeral and Rosary was said on Sunday evening at 8 p m., and the High Requiem Mass was held at the St. Vibianas Cathedral at Second and Main Streets, Los Angeles. The services were well attended and John was buried in Calvary Cemetery here in Los Angeles.

I know we will all miss John and everything was done to carry out his wishes as expressed to his close friends here.

With kindest personal regards, I am
Sincerely yours,

CHARLES W. LYON

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal, and the report transmitted therewith ordered filed with the Secretary of State:

CALIFORNIA STATE PERSONNEL BOARD
1015 L STREET, SACRAMENTO, CALIFORNIA, January 3, 1947

Mr. Arthur A. Ohnimus, Chief Clerk, California State Assembly
State Capitol, Sacramento, California

DEAR MR. OHNIMUS: In compliance with House Resolution No. 190 adopted on May 2, 1945, during the Fifty-sixth Regular Session of the Legislature, the State Personnel Board has prepared the enclosed report Geographic Pay Differentials. This copy is submitted for filing as required.

Copies of the report were made public at least six months prior to the convening of the Fifty-seventh Regular Session of the Legislature as further required by this resolution.

Very truly yours,

WILLIAM K. SMITH, Executive Officer

PETITIONS

By the Chief Clerk:

A petition from Lulu Mignon Murphy, relative to impeachment, was received, to be referred to committee.

COMMUNICATIONS

By the Chief Clerk:

The following communications were received, read, and ordered printed in the Journal:

CAPITOL CORRESPONDENTS ASSOCIATION
SACRAMENTO, CALIFORNIA, January 6, 1947

Mr. Arthur A. Ohnimus, Chief Clerk
Assembly Chamber, Sacramento, California

DEAR MR. OHNIMUS: In order to facilitate the seating of accredited newspaper correspondents in the Assembly Chamber during the coming session of the Legislature, it is recommended that the following assignment of press desks be made by the Assembly:

Seats to be assigned in the following named order:

South Side of Assembly Chamber: Los Angeles Times, Los Angeles Examiner, Los Angeles Daily News, Associated Press, Copley Newspapers, Western News Service.

Front of Assembly Chamber: Associated Press, and International News Service, Sacramento Bee, two seats; Sacramento Union.

North Side of Assembly Chamber: United Press, San Francisco Chronicle, San Francisco Examiner, Oakland Tribune, San Francisco Call Bulletin, San Francisco Daily News, San Jose Mercury Herald.

Very truly yours,

J. F. McLAUGHLIN, Secretary.

STATE OF CALIFORNIA, DEPARTMENT OF JUSTICE
STATE BUILDING, Los Angeles 12, December 30, 1946

Honorable Arthur A. Ohnimus,
Chief Clerk of the Assembly,
State Capitol, Sacramento 14, California

DEAR MR. OHNIMUS: In accordance with the request made by your body in Assembly Concurrent Resolution No. 5, Fifty-sixth (Second Extraordinary) Session, for reconsideration of our former Opinion No. 46-147, we have reviewed the questions involved therein. However, upon careful consideration of the statutes involved and of the arguments presented in the concurrent resolution we are unable to arrive at a different conclusion from that stated in our former opinion.

The problem presented relates to the application of veterans preference points in civil service where, as authorized by Section 18936 of the Civil Service Act, eligible lists are limited to a specific number of names. This section provides that "the board may limit to suit the needs of the service the number of candidates passing any examination and the number of names to be placed on the eligible list," and the specific question is whether the additional credits allowed to veterans under Section 18973 of the Civil Service Act should be added after the names to be placed on the eligible list have been determined or whether such credits may be added prior thereto so as to advance the names of veterans before the list has been cut.

Under Section 18973 of the Civil Service Act the addition of veterans' credits is made conditional upon the veteran having received a "passing mark" in the examination and under Section 18937 such credits may be applied only to the names of veterans who have been "successful in the examination." Thus, in order to determine the question here presented the fundamental point of inquiry must be as to the meaning of the phrases "passing mark" and "successful in the examination." For the reasons stated in detail in our former opinion we believe that applicants taking an examination resulting in a limited eligible list may not be considered as having successfully passed such examination within the meaning of the above sections unless they have received a sufficiently high rating to bring them among the top number of names to which the list is limited. In other words, if an eligible list is to be limited to say 25 names, only those of the applicants whose score is sufficiently high to bring their names within the first 25 names may be considered as having successfully passed such examination.

Under this construction of the meaning of Section 18936, which we believe to be the only proper one under the law as it now stands, it necessarily follows that veterans whose rating is not high enough to bring them among the top names to whom the list is limited have not received the required "passing mark," nor have they been "successful in the examination." Since the law does not permit the application of veterans' preferences to aid veterans in the *passing* of an examination and to convert a non-passing score into a passing one, such additional credits may therefore not be applied until after the names to be placed on the eligible list have been determined.

We might add that to our understanding the Personnel Board has not limited any of the eligible lists which have been established since the passage of Assembly

Concurrent Resolution No. 5, so that a change of law in that respect will not work any injustice as to veterans having taken examinations prior to such possible change.

Very truly yours,

ROBERT W. KENNY, Attorney General

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal, and the report transmitted therewith ordered filed with the Secretary of State:

PUBLIC UTILITIES COMMISSION
STATE OF CALIFORNIA, January 3, 1947

Mr. Arthur A. Ohnimus, Chief Clerk of Assembly,
State Capitol, Sacramento, California

DEAR MR. OHNIMUS: Transmitted herewith are 125 copies of this Commission's report on "Telephone Rates and Service in San Fernando Valley and Adjacent Areas" which was prepared pursuant to House Resolution No. 89, dated February 14, 1946.

Very truly yours,

R. J. PAJALICH, Secretary

By the Chief Clerk:

The following communications were received, read, and ordered printed in the Journal:

Sincerely,

EARL C. BEHRENS, President

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 6, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 2

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

SENATE CHAMBER, SACRAMENTO, CALIFORNIA, January 6, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate has elected the following statutory officers:

President pro Tempore—Harold J. Powers
Secretary of the Senate—Joseph A. Beek
Sergeant-at-Arms—Joseph F. Nolan
Minute Clerk—John F. Lea
Chaplain—Dean William C. Pearson

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS (RESUMED)

The following resolution was read:

Senate Concurrent Resolution No. 2—Relative to the Joint Rules of the Legislature.

By unanimous consent, the Speaker ordered Senate Concurrent Resolution No. 2 held at the desk until the next legislative day.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Thurman, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to James A. Bamford, his father-in-law, of Forest Grove, Oregon; former Senator and Mrs. Jerrold L. Seawell of Roseville; and Raymond Mayo, son of Senator Mayo.

On request of Mr. McCollister, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Martha L. Pfister of Santa Rosa.

ADJOURNMENT

At 4.37 p.m., on motion of Mr. Burns, the Speaker declared the Assembly adjourned until 11 a.m., Tuesday, January 7, 1947, out of respect to the memory of the late former Assemblyman, John B. Pelletier.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE

FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

SECOND LEGISLATIVE DAY

SECOND CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Tuesday, January 7, 1947

The Assembly met at 11 a.m.

Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—78.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

Stir up Thy power, O Lord, and come; and deliver us from the evil of our sins and from the dangers that surround. Through the help of Thy grace lead us to eternal salvation through Christ our Lord.—AMEN.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Loomis, further reading of the Journal of the previous legislative day was dispensed with.

LEAVES OF ABSENCE FOR THE DAY

The following member was granted leave of absence for the day because of illness:

Mr. Stewart, on motion of Mr. Erwin.

CONSIDERATION OF HOUSE RESOLUTION NO. 9

Mr. Crowley asked for, and was granted, unanimous consent to take up House Resolution No. 9, at this time.

House Resolution No. 9—Relative to mileage for the members and officers of the Assembly.

Resolution read.

Unanimous Consent Granted to Amend House Resolution No. 9

By unanimous consent, the following amendment to House Resolution No. 9 was adopted:

Amendment No. 1

On page 12 of the Assembly Daily Journal of January 6, 1947, in House Resolution No. 9, strike out all of the line commencing with "4", and insert:

"4. Bert W. Loomis_____Chico, Butte County_____86 22½ __ 108½ 217 10 85"; and in the line commencing "28", strike out "128 28 __ 156 312 15 60", and insert "128 12 __ 140 280 14 00".

Request for Unanimous Consent

Mr. Crowley asked for, and was granted, unanimous consent to take up House Resolution No. 9, as amended, at this time.

Consideration of House Resolution No. 9, as Amended

House Resolution No. 9

Resolved by the Assembly of the State of California, That the State Controller be and he is hereby directed and ordered to draw his warrants on the proper fund in favor of the following members and officers of the Assembly for the amount set opposite their respective names, and the State Treasurer is hereby directed and ordered to pay the same:

MESSAGES FROM THE GOVERNOR

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, January 7, 1947

To the Honorable Members of the Assembly, State of California
Sacramento, California

GENTLEMEN: Pursuant to the provisions of Section 1774 of the Government Code, which provides that within 10 days after the meeting of the Legislature the Governor must transmit to it a list of all appointments made by him in accordance with that section, I have the honor to transmit to you herewith a list of all appointments so made since the last session of the Legislature.

Respectfully,

EARL WARREN, Governor

List of Appointments by Governor

RICHARD E. MITTELSTAEDT, a resident of Sacramento; Superintendent of the Division of Water of the City of Sacramento for the past 14 years; was appointed December 30, 1946, as member of the Public Utilities Commission (formerly the Railroad Commission of the State of California), vice self, term expired.

TOLAND C. MCGETTIGAN, a resident of Santa Rosa; was appointed January 2, 1947, member of the California Unemployment Insurance Appeals Board, and member of the California Employment Stabilization Commission, vice self, term expired.

RESOLUTIONS

The following resolutions were offered:

By Messrs. Thurman, Gannon, and Stephenson:

House Resolution No. 12

Relating to the memory of Charles Joseph Lilley

WHEREAS, Charles Joseph Lilley was born in Cleveland, Ohio, in 1893 and was educated in the schools there and in Willoughby, Ohio. He began his newspaper career shortly after his graduation from Case University, Cleveland, Ohio. He came to Sacramento, California, in 1930 after serving in editorial capacities on a number of eastern, midwestern and western newspapers. In 1933 he became general manager of the Sacramento Union and served in that and his editorial capacity until his death on November 18, 1946. He was known best to readers of the Union as the writer of his daily column which he signed with his initials, by C.J.L.

WHEREAS, The Members of the Assembly wish to pay tribute to Charles Joseph Lilley, a fine American citizen, an accomplished newspaper manager, and a splendid editorial writer; now, therefore, be it

Resolved by the Assembly of the State of California, That when this Assembly adjourns this day it do so in honor of Charles Joseph Lilley, and be it further

Resolved, That the Chief Clerk of the Assembly is hereby directed to prepare and transmit suitably engrossed copies of this resolution to Mrs. Betty Holland Lilley, his widow, to Mrs. Carl Ruby, his daughter, and to Merrill Edward Lilley and Charles Joseph Lilley, his sons.

Request for Unanimous Consent

Mr. Thurman asked for, and was granted, unanimous consent to take up House Resolution No. 12, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

By Messrs. Thurman, Crowley, Burns, Maloney, Gannon, and Doyle:

House Resolution No. 13

Relating to Richard E. Collins

WHEREAS, Richard E. (Dick) Collins, with the ending of 1946, closed a 40-year career as a member of the State Board of Equalization; and

WHEREAS, At the time of his retirement, he was dean of the elective state officials; and

WHEREAS, When Richard E. Collins took office in 1906 the only employee of the State Board of Equalization was a secretary. In those days the board's only duties were to assess railroads and to work with county assessors on equalizing county assessments. He traveled his district, covering nearly all of Superior California, by train, stage, and horse and buggy; and

WHEREAS, Today, the State Board of Equalization has about 1,700 employees; and, in addition to its assessment duties, administers the liquor laws, the sales and use tax, the motor vehicle fuel license tax, the use fuel tax, the motor vehicle transportation license tax and the private car tax; and

WHEREAS, Richard E. Collins kept pace with the growth of the board and continuously rendered it loyal, efficient, and invaluable service; now, therefore be it

Resolved, by the Assembly of the State of California, That Richard E. Collins has the commendation of this Assembly for his services to the State of California and its sincere wishes for health and happiness during his retirement, and be it further

Resolved, That the Chief Clerk of the Assembly transmit a suitable copy of this resolution to Richard E. Collins.

Request for Unanimous Consent

Mr. Thurman asked for, and was granted, unanimous consent to take up House Resolution No. 13, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

By Mr. Rosenthal:

House Resolution No. 14

Relative to an Assembly Investigating Committee on Fire Hazards

WHEREAS, Fires in hotels, rooming houses and apartments have taken an appalling number of lives in recent months; and

WHEREAS, It is essential, to avoid the recurrence of such disasters, that a study be made and legislation be enacted to provide higher standards of safety and more adequate fire-fighting equipment in hotels, rooming houses, and apartments;

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Investigating Committee on Fire Hazards is hereby created and authorized and directed to ascertain, study and analyze all facts relating to the prevention and suppression of fires, in hotels, rooming houses, and apartments, and the establishment of adequate safety standards to prevent loss of lives in such fires, including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Assembly, including in the reports its recommendations for appropriate legislation.

2. The committee shall consist of five Members of the Assembly appointed by the Speaker. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5. The committee has the following additional powers and duties:

(b) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purposes for which it is created.

(c) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(d) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than the date of final adjournment.

(e) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of ten thousand dollars ($10,000) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the

expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and ordered held at desk pending the appointment of the standing committees.

RATIFICATION OF ACTION TAKEN BY THE CAPITOL CORRESPONDENTS ASSOCIATION BY UNANIMOUS CONSENT

By unanimous consent, the Assembly ratified the action taken by the Capitol Correspondents Association of California as set forth in a letter of transmittal addressed to the Chief Clerk on January 6, 1947, and printed on page 61 of the Assembly Daily Journal of that date.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following resolution was offered:

Assembly Concurrent Resolution No. 5: By Mr. Crichton—Relative to approving certain amendments to the charter of the City of Fresno, in the County of Fresno, State of California, voted for and ratified by the electors of the city at a special election held therein on the fifth day of November, 1946.

Request for Unanimous Consent

Mr. Crichton asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 5, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 5

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

Above resolutions ordered enrolled.

RESOLUTIONS

The following resolution was offered:

By Messrs. Sam L. Collins and Doyle:

House Resolution No. 15

Relative to Elmer E. Lyon

WHEREAS, The Members of the Assembly of the State of California have learned with regret that on December 27, 1946, death came to Elmer E. Lyon; and

WHEREAS, He was the son of a pioneer California family, a native of this State, respected and loved in his home community, and well known to many thousands of friends throughout the State; and

WHEREAS, Elmer E. Lyon was the husband of Carmilla Lyon and father of Laura Sue Lyon, and brother of Charles W. Lyon, for many years a Member of the Legislature of California and great wartime Speaker of the Assembly of California, for whom every Member of this Assembly has the most genuine affection and respect; now, therefore, be it

Resolved by the Assembly of the State of California, That by this resolution the Members of this Assembly extend to their friend and former colleague, Charles W Lyon, to Mrs. Carmilla Lyon, and to Laura Sue Lyon, their heartfelt sympathy and kind condolences in their bereavement; and be it further

Resolved, That the Chief Clerk of this Assembly is requested to transmit suitably prepared copies of this resolution to the family of Elmer E. Lyon, and be it further

Resolved, That when this Assembly this day adjourns it do so out of respect to the memory of Elmer E. Lyon.

Resolution read.

Request for Unanimous Consent

Mr. Doyle asked for, and was granted, unanimous consent to take up House Resolution No. 15, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT IN JOURNAL

Mr. Crowley asked for, and was granted, unanimous consent that the following Report of the Assembly Investigating Committee on Crime Prevention and Correction be ordered printed in the Journal:

SECRETARIES TO COMMITTEE

ROBERT H. MIDDOUGH
HUGH C. MACDONALD

LETTER OF TRANSMITTAL

A resolution was adopted by the Assembly, Fifty-sixth Session of the State Legislature, creating the Assembly Interim Investigating Committee on Crime Prevention and Correction, to ascertain, study and analyze all the facts relating to the problems of delinquency, crime prevention and control, rehabilitation, correction, supervision, custody and treatment of offenders, existing or proposed instrumentalities or facilities therefor and to report to the Fifty-seventh Session of the Legislature.

During the several public hearings particular emphasis was taken of the causes of delinquency both among minors and adults. Several hearings were conducted at the correctional schools and the California Prison for Women.

Having concluded an extensive study as directed the committee makes this report and submits the following recommendations.

(Signed) LORNE D. MIDDOUGH, *Chairman*
ERNEST C. CROWLEY, *Vice Chairman*
GLENN M. ANDERSON
MONTIVEL A. BURKE
AUGUSTUS F. HAWKINS
KATHRYN T. NIEHOUSE, replaced Assemblyman Carey

EDWARD J. CAREY, resigned
Members of the Committee

HOUSE RESOLUTION No. 132

Relating to creating an Assembly Interim Investigating Committee on Crime Prevention and Correction

WHEREAS, The Assembly Fact-Finding Committee on Correctional Problems and the Assembly Committee to Investigate Juvenile Delinquency, which were created at the last regular session have made extensive studies of the problems of juvenile delinquency, crime prevention and control and the correction, supervision, custody and treatment of offenders, and each of these committees has recommended to the Assembly that further studies and investigations be made to supplement and complete the work heretofore performed; now, therefore, be it

Resolved by the Assembly of the State of California,

1. The Assembly Committee on Crime Prevention and Correction is hereby created, appointed, authorized and directed to ascertain, study and analyze all facts relating to the problems of juvenile delinquency, crime prevention and control, the rehabilitation, correction, supervision, custody and treatment of offenders, existing or proposed instrumentalities or facilities therefor, and any and all matters directly or indirectly pertaining to or affected by these problems, and all matters incidental thereto, including but not limited to the operation, effect administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report its recommendations for appropriate legislation.

2. The committee shall consist of seven Members of the Assembly appointed by the Speaker thereof. The Speaker shall appoint the chairman. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3. The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular session, with authority to file its final report not later than the fifteenth legislative day of the next regular session.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon Investigating Committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members

5. The committee has the following additional powers and duties:

(a) To select a vice chairman from its membership.

(b) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(c) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than herein provided.

(d) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of five thousand dollars ($5,000) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund of the Assembly and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to Committee on Rules.

REPORT OF ASSEMBLY INVESTIGATING COMMITTEE ON CRIME PREVENTION AND CORRECTION

Just a general statement that crime shows a tremendous increase would hardly suffice even though every citizen is fully aware of that fact. Therefore, we will recite a few facts as they have been gathered by the committee through personal testimony by those appearing before the committee and through letters from prison and correctional executives and lay-workers. In this review are certain facts submitted upon request of the committee chairman by district attorneys and FBI agents. Crime trends were generally upward during 1945 with all crimes except robberies and larcenies showing big increases over 1944.

With the passing of each hour nearly 160 major crimes have been reported, equaling by the end of the year more than one and one-half millions. Rape alone accounted for 27 percent of this increase. Similarly aggravated assaults exceeded the 1944 average by 19.9 percent. Despite the decrease of automobiles the auto theft figures exceed 1944 by 15.7 percent.

Among the half million fingerprint arrest records received by the FBI, age 17 stood out as the predominating single age group, followed in this respect by ages 18, 19, 21 and 22.

A comparison of the 1945 data with figures for 1942, the first full war year, showed arrests of boys under age 18 up 18.8 percent and arrests of girls under age 21 up 134.1 percent, indicating an abnormally high level of juvenile delinquency.

ARRESTS

Age	*1944*	*1945*	*Age*	*1944*	*1945*
16	26,098	29,457	19	28,732	41,586
17	31,583	48,499	20	27,474	34,836
18	30,267	48,164			

Stories on crime and its causes have been collected by the committee in the hope that the reprinting of these stories in our report will more forcefully bring about proper legislation to better cope with the biggest problem facing California and the Nation. An attempt has been made to properly credit each periodical and individual writer, any omissions are unintentional.

Long Beach Independent—9-1-46

CRIME INCREASES IN NATION

First 6 months of:	*1945*	*1946*
Murder	1,608	2,066
Rape	3,786	3,845
Aggressive assault	19,248	21,176
Burglary	100,960	118,120
Auto theft	70,469	81,398
Larceny	247,745	272,126
Robbery	15,236	20,085
Manslaughter	1,251	1,491
Total major crimes	460,303	520,307

Figures based on reports to FBI for 1,997 cities, with total population of 66,000,000.

Juvenile delinquency, its prevention, control and correction, is a matter of serious national concern, as witness these figures comparing the first six months of 1945 and 1946. The Department of Justice emphasizes that prevention of crime must be undertaken at the family level. Latest figures show more youth of 17 were arrested than in other age groups; that 15 percent of all murders were under 21; that in this same age group were 51 percent of all burglars, 30 percent of all rapists. There was a 198 percent increase since 1939 in arrests of girls under 18. Among the causes, officials state, are the postwar "let-down," prevalence of souvenir war weapons, greater competition for jobs, influence of movies, radio and press, and lack of parental control.—*(International)*

The Sacramento Bee--1-31-46

PARENTS ARE BLAMED FOR RISE IN SOLANO JUVENILE CRIME

Fairfield (Solano Co.), January 31.—The report of Probation Officer John Paulson for 1945 shows a steady increase in juvenile delinquency in Solano County. There were 402 juvenile court hearings compared to 339 for 1944.

Paulson in his report states:

"We feel that in a great majority of the cases the parents fail to assume their legal and moral responsibility toward their children. The children are not taught to obey and respect their parents, teachers or their elders. Too many parents are most willing to delegate their responsibility for their childrens' behavior to the school authorities, welfare agencies, the juvenile court and probation officers.

"The responsibility for the training of children to become good citizens, I feel, should be placed first in the home, second in the school and third in the community.

"We trust the problem will abate some. However, we cannot hope for a large decrease in juvenile delinquency during the adjustment period, or until our population finds itself in a more settled state."

The report shows a total of 276 active cases on January 1, 1945, of which 199 were boys and 77 girls. Active cases January 1, 1946, totaled 307, of which 212 were boys and 95 were girls.

Sacramento Union—1946

1945 SACRAMENTO MAJOR CRIMES 4,058 AGAINST 3,531 IN 1944

Major crime in Sacramento jumped 15 percent last year.

Police Chief McAllister disclosed, in his report to City Manager Sherwin, that major offenses increased from 3,531 in 1944 to 4,058 last year, a gain of 527.

Biggest increases were in the robbery and burglary classifications. The report showed 108 robberies in 1944 and 227 in 1945. The number of burglaries jumped from 386 to 546 offenses.

Rape offenses were down. The report shows 19 in 1944 as compared with only seven in 1945. Also down were aggravated assaults, there being 81 in 1944 and 39 in 1945.

Larceny classification showed 2,627 in 1945 as compared with 2,450 in 1944. Criminal homicide classification jumped from eight in 1944 to 10 in 1945. There were two manslaughters by negligence in 1945 and none in 1944. Auto thefts were up from 479 in 1944 to 600 in 1945.

Total arrests for major crimes was 1,085 in 1945 and 906 in 1944.

Total traffic citations and arrests in 1945 was 33,273, compared with only 10,463 in 1944. Of this number 23,753 overtime parking citations were issued last year and 4,078 in 1944.

Juvenile arrests dropped last year, there being 769 in 1944 and only 704 in 1945.

McAllister in his report said that while the major offenses gained over the preceding year, it represents but a small gain over the yearly average of 3,884 for a seven-year period, 1938 to 1944, inclusive.

The number of persons arrested and cited by the department for all offenses during 1945 numbered 51,046, representing a substantial increase over the 23,595 total for 1944.

The 1945 total exceeds that of any previous year in the history of the department, McAllister said, the highest previous total having been recorded in 1941 when 37,355 persons were arrested and cited.

Vagrancy arrests jumped from 2197 in 1944 to 3,534 in 1945. Those arrested for drunkenness in 1945 totaled 10,232 compared with 8,123 in 1944.

Value of property stolen last year was $68,725, McAllister said. Value of property recovered was $43,987.

Press-Telegram Bureau—1946

JUVENILE GIRL BAR PATRONS PROBLEMS TOLD

Los Angeles, August 18.—Until California laws of education are amended, there is virtually nothing that can be done about the problem of married girls from 13 to 18 years of age who frequent bars while remaining away from classes in junior high school.

In a special opinion for Superior Judge Georgia Bullock, Deputy County Counsel Beach Vasey said the Education Code is worded awkwardly and the laws should be clarified.

Judge Bullock had asked what could be done "in regard to the very serious situation which exists in our city in regard to married girls."

At present, it was aid, the Attorney General holds that married girls under 18 are not subject to compulsory education.

> "Many of these girls are living here alone, their husbands having gone into the service, and are thus without supervision of any kind," it was revealed in a letter sent to Judge Bullock from a Los Angeles school vice principal.

Sacramento Union—1946

STATE WILL WAR ON PROSTITUTION

The State Department of Public Health disclosed yesterday organized prostitution is making a postwar comeback in several California cities.

Urging "responsible citizens to make a sincere and concerted effort to defend their communities against commercialized vice," Dr. W. L. Halverson, director of Public Health, reported in a departmental bulletin that prostitution increased 300 percent in California during 1945 and there was a 50 percent increase in known venereal disease infections.

> "The exploiters of prostitution have awaited the end of the war with the hope that opposition forces would relax and enable them to operate unhampered," Dr. Halverson said. "Former vice interests, counting on this relaxation and on a general let-down in community morale have opened their houses already in some places.
>
> "Organized vice is a big business and intends to remain so. The law should be enforced not only because venereal disease is spread by prostitution, but also because the practice tends to undermine the integrity of our social institutions."

International News Service—1946

STATE MOVES TO HALT SEX CRIME INCREASE

Sacramento, August 14 (INS)—An all-out campaign to stop the current increase in sex crimes, especially those with children as victims, was initiated in Sacramento today by Attorney General Robert W. Kenny.

Pointing out that the rate of such crimes is rising alarmingly in California as in the rest of the country, Kenny outlined in a letter to the State's district attorneys, sheriffs and police chiefs a program designed to stop the rise and improve prevention methods.

Kenny said sex crimes reported to the State Division of Criminal Identification and Investigation totaled 919 for the first six months of 1946, an increase of 177 over the same period last year.

He pointed out that the figures do not represent complete reporting throughout the State nor do they include misdemeanor charges.

> "Every police department has a relatively large volume of complaints involving underwear thieves, window peepers, exhibitionists and homosexuals. And each person so offending is a potential threat to the safety of children. Cases such as the foregoing are all too frequently regarded simply as nuisances to be disposed of as speedily as possible. This is a mistake."

Kenny suggested for the law officers a program of prevention featuring these points:

1. Report all sex offenses to the Division of Criminal Identification and Investigation, even when the offense charged is a misdemeanor. Send fingerprints of all known sex perverts to the division.

2. Establish a file in every department containing a record of known and suspected perverts in the community.

3. Improve methods of reporting such crimes so as to encourage victims and their parents to tell the police when such an offense occurs.

4. Interest at least one group of citizens in the community in helping to combat the rise in such crimes.

5. Seek an agreement among local law enforcement officers that guilty pleas to lesser offenses will not be bargained for or accepted.

"A firm stand should also be maintained and encouraged against the all too prevalent practice of imposing suspended sentence on condition the defendant leave town."

Los Angeles Times—1946

PENAL SYSTEM FAILURE, SAYS JUDGE McKAY

Superior Judge William R. McKay yesterday declared that the American penal system is a "complete failure" and "people come out of prison much worse citizens than when they went in."

Addressing the Lawyers' Club at the Rosslyn, the Presiding Judge of the Los Angeles Criminal Courts stated that "our whole system—police, judicial and penal—is a disgrace.

"The stupidity of the system is obvious when we consider that we establish a code which defines crime and then measures each violator by the same yardstick. This is plainly impossible and unjust."

Judge McKay described criminal conditions as "not a crime wave but a steady rising tide of crime that costs the Nation $14,000,000,000 annually. In local courts he said 377 cases were set for trial in criminal departments on August 13, compared with 209 cases a year ago.

"We will never win the battle against crime until we realize that judgment must be made of the crime and the criminal and punishment must be made to fit the mental, physical and social condition of each violator," Judge McKay said.

Sacramento Bee—1946

RECREATION IS BROACHED AS JUVENILE DELINQUENCY CURB

Washington, February 12.—(AP)—Attorney General Clark urged youth and welfare organizations sponsor winter and summer sports in the national parks to help curb juvenile delinquency.

Addressing the opening session of the National Volunteer Advisory Panel to Study 'Teen Age Crimes yesterday, Clark said:

"More recreation facilities are needed by the youth of the Nation, especially girls. I believe Secretary of the Interior Ickes would approve a program of organized recreation for youth in both winter and summer in the national parks."

The Attorney General cited these figures to emphasize what he called "the grave nature of the juvenile problem."

Twenty-one percent of all crimes are committed by persons under 21 years of age. More persons aged 17 commit crimes than any other age group. The arrests of girls under 18 increased 198 percent between 1939 and 1945.

During the same period arrests of boys under 18 jumped 101 percent for drunkenness, 72 percent for assault, 70 percent for rape, 55 percent for auto thefts and 39 percent for robbery.

Clark attributed the rise in juvenile crimes to broken homes, drunkenness in the home and lack of parental guidance "sometimes caused by both parents being employed."

The Reader's Digest, February, 1946—Condensed from Collier's

SEX IN THE CLASSROOM

DEAN JENNINGS

Six hundred boys and girls were jammed into the big lecture hall of the University of California campus at Berkeley. Their ages ran from 17 to 25. Notebooks rustled, pencils scratched. It was like any other college class.

"I am asked," the professor said casually, "whether homosexuality is curable. I have to answer 'yes' and 'no.' There is a type of invert whose sexual nature is so misdirected from childhood that medicine and psychology can't help much. There are other perfectly normal individuals who through force of circumstances fall into homosexual practices. They can be cured, if there's a will. If any of you are worried about this come to my office and we'll talk." No one tittered. No one was embarrassed.

The professor went on: "I have one more question left. Someone wants to know the difference between love and infatuation. I don't think these are two different things.

An infatuation can be as genuine as any other love. The real question is whether your love has in it the elements to make it grow stronger through the years."

The class and its question period over, Prof. Noel Keys went back to his office for private consultations and to plan another lecture. Called "Youth and Marriage Today," this remarkable and enlightened college course has been attended by 10,000 young men and women since its precarious launching six years ago. Dr. Keys has proved that young Americans want honest facts about life and love. As one student said: "We like that course because there is no beating about the bush. Our questions are answered, not side-stepped."

And Dr. Keys proudly reports that he has received hundreds of letters and visits from students who married after finishing his course—but that he has yet to hear of a couple whose marriage has failed after both had taken these lectures.

The reaction Dr. Keys cherishes most comes from students who have taken their new knowledge home to parents. Recently a senior stopped at his office.

"Dr. Keys," he said, "I've been telling my mother about the course and letting her read my notes. She said she wished she had known about these things years ago."

Another, an ex-student, writing from the South Pacific, said: "My parents never told me anything. The truth is they didn't know what to tell us. Such education as this would have prevented my parents' separation and my sister's divorce."

Incidentally, drawing on their own experiences, Dr. Keys' students have voted 99 to one that sex education—with no punches pulled—be given in our high schools for students 16 years or older.

The present course was conceived under somewhat tense circumstances. During the winter of 1938-39 there was growing agitation at the University of California for a practical course on sex and marriage. The student newspaper bristled with letters reflecting fear and distrust of marriage. One day the medical students' club announced a series of talks on Freudian sex theories. Hundreds of uninvited persons filled every seat and jammed the aisles. There was immediate public reaction, climaxed by a blistering protest which carried the signatures of 800 churchwomen in the San Francisco Bay region.

University authorities promptly tossed the hot potato to the students themselves, and the Associated Students called a special referendum on these questions: Should the university offer a practical sex and marriage course? Should such a course be coeducational and open to all students? Some 2,700 students gave an overwhelming affirmative vote on both questions.

A university committee selected Dr. Keys, a professor of educational psychology with degrees from Columbia, Chicago and Oxford, to chart such a course. No better choice could have been made Dr. Keys had nursed the idea for years, and was himself a walking testimonial for ideal marriage.

Dr. Keys and Dr. Chauncey Leake, then of the medical school, outlined a series of weekly lectures blanketing the whole field of sex, marriage and family relations. They included discussion of "heavy" petting, the psychology of attraction, trial marriages, continence, intercourse, the honeymoon, parenthood, marriage law and family finance.

In the first few lectures Dr. Keys deliberately made himself sound staid and stodgy to discourage the inevitable thrill seekers. As the course progressed he enlisted a distinguished cast of experts to conduct various sessions, among them Dr. Frederic M. Loomis, widely known gynecologist; Dr. Karl Bowman, President of the American Psychiatric Association; Dr. Richard A. Koch, Chief of the Venereal Disease Division of the San Francisco Health Department; Dr. Vere Loper, Pastor of Berkeley's First Congregational Church and lecturer on personal counseling; Dr. Paul Popenoe, famed Director of the American Institute of Family Relations.

No aspect of sex life and marriage is ignored, from adolescence to menopause. Motion pictures, including a two-reel color film on childbirth, charts and stereopticon slides help strip the mystery from matters once discussed ignorantly and guiltily in dormitory bull sessions.

Dr. Keys at first invited questions from the floor, but drew a blank. Then he hit on the idea of passing a slotted box so that embarrassing questions need not be asked openly; and at once he was deluged with queries. He read each one aloud and answers it immediately. When the subject matter is too intimate even for this amazingly frank course, he discusses it in his private office.

The Student's Answer

From one student questionnaire come these results:

Subject	*(Figures are percentages)* *Desirable*	*Permissible*	*Wrong*
Kissing on dates	27	72	1
"Heavy" petting on dates	3	21	76
"Heavy" petting for engaged couples	13	61	26
Premarital sex experience for men	10	31	59
Premarital sex experience for women	2	19	79
Intercourse with a prostitute	0.3	9.5	90.2
Intercourse between engaged persons	3	27	70
Intercourse without expectation of marriage	2	16	82
Use of contraceptives	65	28	7

Samples picked at random from the thousands he has collected include: Do contraceptives ever cause cancer? Is the eating of eggs sexually stimulating? Do radar rays cause sterility in men? What are the chances of sucess in "shotgun" marriages?

Silly questions? On the contrary, Dr. Keys called them the echoes of gross ignorance and potential tragedy, evidence that we need better sex education in our schools. In every case some young man or woman was searching for the truth.

His students have a strongly optimistic view of marriage. Some 20 percent said that by the time they were 16 years of age they were living in homes broken by death or divorce. But when they put their own dreams on paper, 95 percent had marriage plans, and nearly all of them—97.5 percent—were sure their romances would last for life. They also thought each married couple should have four children.

In the spring of 1943, Dr. Keys was persuaded to conduct an evening course in Oakland, California, under the auspices of the local church federation. A year later the San Francisco YMCA-YWCA sponsored the same course. The University Extension in San Francisco now offers it as a fixture, with an average enrollment exceeding 300.

Today Dr. Keys is a somewhat harassed educator, conducting courses, holding private consultations seven days a week, and answering inquiries from colleges and others interested in duplicating the course. But his advice to his students remains levelheaded. "After all," he is fond of telling them, "there's nothing you can do outside marriage that you can't do in marriage—and do a lot better."

SOCIAL HYGIENE TEACHING FOR YOUTHS URGED

Sex education for children at an age earlier than ever before attempted was suggested yesterday by most of the speakers at the Social Hygiene Institute. The meeting was held at the Fairmont Hotel under the auspices of California Social Hygiene Association and bay cities health departments.

> "We are finding a greater and greater need for instructing young people in sex hygiene," said Dr. Noel Keys, professor of education at the University of California. "Formerly we thought that the need had its inception with college boys and girls. Now we are receiving requests from youngsters of high school age, and from their nature and sincerity we know that these requests must be met."

Dr. Frank Brewer, Chief of the Bureau of Social Disease for the State, told of the tremendous and increasing prevalence of sexual promiscuity as indicated by the increase in known cases of venereal disease.

> "Medical therapies," he said, "are being developed rapidly and with satisfying success. If we can develop our facilities for locating disease with parallel success, which we have not done to date, we shall really be able to deal with the problem."

Doctor Brewer stated that penicillin is about 85 percent successful in the treatment of the disease, but pointed out that responsible medical men do not usually rely upon this specific alone, always giving accompanying dosages of arsenic and bismuth.

Dr. J. C. Geiger, City Health Officer, who welcomed the social workers to the city in the opening address of the session, told them that social disease had doubled in San Francisco since 1940.

> "In spite of anything we can do," he said, "our number of diseases has increased, in the past five years, from 5,127 to 11,527."

Ray Lyman Wilbur, former Stanford University President and President of the American Social Hygiene Association, emphasized the need for a program of education, dwelling earnestly upon the need of providing young people with information and advice. He read his listeners a letter from President Truman in which the latter expressed his concern over the problem of increasing social disease.

Dr. Eugene Gillis, of the United States Public Health Service, stated that there were 220,000 1,500,000 new cases of gonnorhea in the United States annually. More than 3,000,000 Americans have active, virulent syphilis, he said.

A plea for the education of parents in the sexual instruction of their children was made by Frances Bruce Strain, author and new syphilis cases and more than lecturer. Mrs. Strain expressed her belief that the principal protection against social disease lay in teaching children about properly balanced sex life during the earlier period of their youth, when they most needed it.

PARENTS' WISE GUIDANCE WILL SAVE YOUTH OF LAND

—Says J. EDGAR HOOVER

[Extract of recent remarks by J. Edgar Hoover, Director, Federal Bureau of Investigation, before the annual board meeting, Catholic Youth Organization, New York City.]

I want to direct your thoughts to the serious consideration of the rapid rise in crime. Like a tidal wave, it is gathering momentum throughout the entire Nation.

Last evening, I had occasion to study detailed reports on the extent of crime in 11 of our most important and largest cities for the first 10 months of 1945. The reports were startling.

Six of the cities reported an increase in murders ranging as high as 115 percent.

Each of the 11 cities reported increases in robberies ranging as high as 161 percent; nine reported increases in assaults up to 94 percent; ten reported increases in burglaries ranging as high as 74 percent; all the cities reported increases in larceny and auto thefts ranging as high as 26 percent and 54 percent, respectively.

The postwar crime wave which we feared is upon us. It is mounting in intensity. It is growing in severity. It is not isolated. It is nation-wide. In fact, other countries report a similar experience.

In periods of great national stress, such as we have just experienced, human nature reacts to the tempo of the times.

There was the spirit of wartime abandon, for example, with its last fling philosophy, which provided justification to less resolute wills to violate the conventions of society.

Lessons in school became secondary. Girls sacrificed virtue on a false shrine of patriotism. Arrests for prostitution increased 375 percent, disorderly conduct 357 percent and drunkenness and driving while intoxicated 174 percent among girls under 18 in the wartime years.

To those who were not grounded in fundamentals, established values disappeared and an attitude of impermanence superseded individual responsibility.

Conflicts between liberty and license manifested themselves in wrongdoing. Personal responsibility in too many homes has become archaic and old-fashioned.

The Catholic Youth Organization is taking a step in the right direction by joining forces with such other thoroughly American organizations as the Boys' Clubs, Boy Scouts and other similar groups.

Here is a force worthy of the utmost in support and encouragement.

Through the ages, the greatest revolutionary force has been the youth of the land. Our enemies know this better than we.

In the span of 15 years the Hitler Youth Movement produced a new generation imbued with but a single purpose, the perpetuation of Naziism. It will go down in history as synonymous with terror, debauchery, corruption and barbarity.

In our own country and in our own time, we have seen another youth movement arise. It still flourishes. I refer to that high-sounding, idealistic title, "American Youth for Democracy," which conceals the evils and the corruption of American Communism.

This name is but a new one for the former Young Communist League. It reflects all the sinister purposes of the Communist Party of the United States.

It employs the same techniques and has the same objective—namely, the conversion of our haven of liberty and freedom to worship as we choose to a godless, totalitarian state where the adversaries of democracy can do as they please.

Meeting the crime problem and preserving the American way of life go hand in hand.

The Catholic Youth Organization has a tremendous responsibility and a great opportunity.

With a potential 5,000,000 young Americans in the age group of from 10 to 20, here can very well be the cornerstone in the solution of the rising threat of lawlessness and subversion, for the influence of the 5,000,000 multiplies itself many times.

The police and the FBI can apprehend the bank robbers, kidnappers, burglars and hardened criminals. Such relief is urgently needed but the treatment is only temporary in solving our crime problem. The body must be built up so that it can resist local infections.

That is why long ago I pinned my hope for the solution of the problem of lawlessness to the improvement of the home, the greater effectiveness of the school, and extending the sphere of influence of the church.

Lawlessness is not inherited; it is acquired—and so is character. Therefore, is it not much more important to build character?

In your youth activities you are doing it—but your activities need expansion. And you need help.

In this, your organization is no different from others such as the Boys' Clubs, Boy Scouts and others. Youth will find its way if given exemplary leadership.

There are thousands of fathers who are raising sons who would be happy to assist in furthering youth groups. But from what I have observed there has been little effort made to mobilize them.

Would it not be well to devise a plan of drafting lay leaders who can help out and then with cold calculation set out to train them and inspire them to qualify for this most important of all civic responsibilities?

The law enforcement officer should increasingly be given a place in youth organizations. He wants to see less lawlessness.

Any officer worthy of his trust is cognizant of the fact that his efforts in apprehending criminals are at best a temporary expedient.

In nearly every instance the youthful offender would have been a strong, upright citizen had he been given a chance.

If his pent-up energies and desires had been directed along wholesome channels; if his problems—the problems that made him a problem child—had been solved by patient and attentive parents, he would have proved to be an influence for good in this

U. S. TO WAR ON JUVENILE DELINQUENCY

Washington, February 9.—(AP)—Atty. Genl. Tom Clark today launched a war on juvenile delinquency by appointing a 28-member National Volunteer Advisory Panel to study the upsurge in 'teen-age crimes.

The panel will meet here with Clark Monday and Tuesday and thereafter will convene from time to time. Other members will be added later.

Working with Justice Department experts, the panel will make an intensive survey of juvenile delinquency. Then it will help the department to formulate plans. Its findings will be made available to welfare and law enforcement agencies.

Commenting on the appointment of the board, Clark said he hoped to enlist state, county and municipal governments and welfare agencies in a cooperative plan to curb juvenile crimes. He added in a statement:

> "I am gratified at the earnest response of the many public-spirited citizens and organizations who are joining with government officials in a united effort to combat this grave problem.
>
> "All law enforcement agencies united with religious, educational, welfare and social organizations, must be mobilized in an all-out attack on the juvenile crime wave that has placed a shameful blot on our country."

Named to advisory panel were:

Miss Martha Frances Allen, Executive Secretary, Camp Fire Girls, New York City; Walter T. Anderson, Chief of Police, of Charlotte, N. C., and President of the FBI National Academy Associates; David W. Armstrong, Executive Director, Boys' Clubs of America, Inc., New York City.

Mrs. Mary McLeod Bethune, President, National Council of Colored Women, Washington, D. C.; James B. Carey, Congress of Industrial Organizations, Washington, D. C.; Right Rev. Monsignor Howard J. Carroll, General Secretary, National Catholic Welfare Conference, Washington, D. C.

Dr. Samuel McCrea Cavert, General Secretary, Federal Council of the Churches of Christ in America, New York City; Joseph H. McCoy, General Secretary, Big Brother Movement, New York City; Mrs. Lafell Dickinson, President, General Federation of Women's Clubs, Washington, D. C.

Howard L. Doyle, President, United States Attorneys' Conference, Springfield, Ill.; Right Rev. Monsignor E. J. Flanagan of Father Flanagan's Boys' Town, Inc., Omaha, Neb.; Dr. H. W. Hurt, Boy Scouts of America, New York City; Mrs. William A. Hastings, President, National Congress of Parents and Teachers, Chicago, Ill.; Dr. William Healy of the Judge Baker Guidance for Childhood and Youth, Boston, Mass.

Mrs. William M. Henry, President, National Congress of Colored Parents and Teachers, Dover, Del.; *Karl Holton, Director, Youth Authority, State of California, Sacramento, Calif.:* Frank Sherman Land, Kansas City, Mo.; Dr. Frank A. May, Institute of Human Relations, Yale University, New Haven, Conn.

Henry Monsky, President, B'nai B'rith, Omaha, Neb.; Vincent J O'Shea, Director, Bureau of Special Service of the New Jersey Board of Education, Jersey City, N. J.; Mrs. Paul Rittenhouse, National Director, Girl Scouts, New York City; Fred Roff, President, International Association of Chiefs of Police, Morristown, N. J.; G. Howland Show, Washington, D. C.

Dr. Joseph R. Sizoo, Collegiate Church of St. Nicholas, New York City; Bruce Smith, Institute of Public Administration, New York City; John Stelle, National Commander, American Legion, Indianapolis, Ind.; Walter White, National Association for the Advancement of Colored People, Washington, D. C.; Matthew Woll, Second Vice President, American Federation of Labor, New York City.

Frank L. Weil, President of the National Jewish Welfare Board of New York City, and E. W. Aiton, of the Four-H Clubs, Washington, D. C.

Los Angeles Examiner

DELINQUENCY PROBLEM IS COMMUNITY RESPONSIBILITY

By JAMES LEE ELLENWOOD, Executive Secretary, New York State Y. M. C. A.

[Following is the last in a series of articles on juvenile delinquency by James Lee Ellenwood]

Delinquency is always the result when the forces of constructive agencies arrive too late with too little. And too often, in many sections of a city, the forces just do not arrive.

Previously I have listed the five factors to keep in mind when planning to serve youth The church, school, home, character building agencies and adequate municipal controls. If all the factors could operate at their best, there would be few delinquents.

But we must keep in mind two considerations They must reach all the young people and they must carry conviction when they meet them. It is right at this point that losses are experienced.

First of all, only one of these five factors, the school, comes even close to reaching all.

The other four touch only certain groups. The result is that there are areas in which no serious effort is being made to reach any considerable number.

In a typical city after you have added all the groups who are served by character building agencies, you still find that the majority is untouched. For that reason, I am in favor of a "board of planning" in every community.

Often such a board would uncover enough duplication in some areas to cover the neglected areas

But as serious as is this spotty distribution, I am more concerned with the quality of work being done.

Of course, there should be youth centers and parks and all kinds of facilities.

But in themselves these do not give the whole answer. Good leadership and program planning is essential.

Some folks seem to feel that if you keep a boy busy all the time he will stay out of trouble That's probably true But what a job that is! Constant supervision, steady chaperonage, perpetual suspicion!

If in keeping him busy for a time, you can use that time in teaching him something, you are really doing something. This is the whole idea of the better agencies that work with youth

All along the line youth agencies have failed to recognize that strengthening character is not a casual business

Cities have been too lenient in permitting adults to make money at the expense of youth.

The glamour of big and little Broadways is attractive and alluring. They seem to have no trouble with unbalanced budgets, such as keep the schools and the private agencies handicapped.

I was traveling in the South and I was shocked at reading in the morning paper that Brooklyn College basketball players had been reached by some sure thing gamblers.

The ingenuity of these people, and their zeal always amaze me. They are always on the job, and to combat their stuff calls for more aggressiveness than most communities seem to possess.

But now and then, there is a real effort being made.

Such an attempt I visited in Chattanooga, Tenn. Here a few years ago a Negro slum area was cleaned out. Here were put up homes for about 2,500 people. Here is a fine school. Here are good churches. Here is a community center with youth and adult programs.

Here, out of conditions that bred delinquency, has arisen a clear, well-managed community with attention paid to body, mind and spirit. Here are the forces of decency arriving in time and with what it takes.

I think we have got to quit kidding ourselves about delinquency. What we plan for, we get. Furthermore, we do not have to sit by and wait for Federal projects to accomplish it

It is clearly the nearby responsibility of local communities, and in the long run will be done best by private agencies and business.

JUDGES BLAME OBSCENE BOOKS FOR CRIME RISE

By LEON RACHT

New York, August 14.—The campaign to cleanse so-called "realistic" fiction of obscenity and smut gained momentum today with city officials and the judiciary promising strict enforcement of the law.

License Commissioner Benjamin Fielding threatened action in all cases where obscene or salacious literature is disposed of by licensees, and indicated that a city-wide investigation is already under way.

"We are investigating all complaints received," he said. "We are always on the alert in such cases."

The fact that some authors are wallowing in a morass of depravity has aroused members of the bench who denounced publishers who purvey such filth. Justice J. Walter McClancy of the Domestic Relations Court said:

"The flood of salacious literature—smut penned under the label of realism—that has come onto the market particularly since the war ended, is a threat to the family unit It is impossible to tell how many crimes are committed, how many families are broken up, because of the stimulation found in such books."

Justice McClancy said that four months ago three youths were brought into his court who had drenched another with alcohol and ignited it. The victim threw himself on the ground, screaming: "I am the human torch." Upon investigation it was found that the youths were reenacting a scene from a certain book.

Queens County Judge Thomas Downs said that some of the books being read today are "appalling," adding that the court calendars would be considerably lightened if they were not sold indiscriminately.

"These books that deal so candidly and even enthusiastically with the easy ways of sex and crime are bound to have a harmful effect on the fertile minds of youth," Judge Downs said "In the past few years there has been entirely too much liberalism and relaxation in the standards of literature put out by some publishers.

"It is particularly important now to stop the publication of obscene literature. Since the war's end there has been a breakdown in our abhorrence of immorality and indecency.

"Publishers find this breakdown a fertile soil to plan their suggestive smut."

The drive by church leaders, women's organizations and veterans against printed obscenity also continued to mount.

Nine of the 24 best sellers he has recently read were declared "unfit for the average home" by Rev. Harold C. Gardiner, literary critic of the Jesuit magazine "America."

Condemning the practice of presenting filth under the guise of realism, Father Gardiner said that some authors believe they are not performing an "artistic function" unless they write every detail of truth.

"This is wrong," he said. "There are some truths which should not and cannot be told for all audiences. Among the nine books I refer to are some which might be made available to emotionally stable people, but they should never be sold indiscriminately."

Father Gardiner said that all of the questionable books were badly written.

Rabbi Ahron Opher, assistant to the president, Synagogue Council of America, asserted that "just as he would not expose our youth to smallpox or polio, so must we guard them against polluted ideas and obscene literature."

"The distinction between liberty and license is the mark of genuine democracy and the cornerstone of the Judeo-Christian heritage," he said.

"It is the right and duty of God-fearing citizens to cleanse the education and entertainment media from obscenity and halt the spread of vice."

Bishop William T. Manning, Pastor of St. John the Divine and head of the Episcopal Church in New York, said he was in "complete sympathy" with the campaign against indecent literature, adding that he hoped it would have a salutary effect in cleaning up the literary market.

Los Angeles Examiner—8-15-46

YOUTH LEADERS DEMAND END OF LITERARY SMUT

Youth leaders, club presidents, church workers and the men and women concerned with the younger generation have long been distressed over the growing tendency toward salaciousness in current literature.

This was evident yesterday as more voices joined in the condemnation of such publications and the demand for concerted public action.

Some of these comments follow:

Mrs. Charles G. Hill, President Council of United Church Women of Los Angeles, representing 16 denominations: Most of us, who are older, can remember the books which helped shape our lives. I wonder what kind of lives are being shaped by the young people who read the sort of thing that is being so widely published and distributed. Our organization is deeply concerned over this matter, for we know only too well how an impressionable reader, especially a young person, may be influenced. Certainly, some kind of united action is needed.

Ruben Schmidt, Acting Presiding Judge, Los Angeles Juvenile Court: Times are turbulent enough for young people these days without deliberately stirring them up with obscene literature. Many of the juveniles who appear in this court blame their difficulties on the fact that they have been given indecent books to read. Any drive to eliminate this unnecessary and vicious menace should be encouraged 100 percent.

Mrs. Charles W. Partridge, President Ebell Club: If the trend in modern books is a sign of the times, the times are pretty bad. No one would insist that books should confine themselves to dull and dreary sermonizing, but there is an obvious difference between good entertainment and salaciousness; also there is a definite difference between a book with a serious purpose and one which has no other purpose than to appeal to the lower instincts. Another tragedy of the situation is that so many of these indecent books are being written by young authors who are even, in some cases, publicized as "speaking for youth." Sometimes I wonder what has become of the old ideals of decency that helped make this country great.

Mrs. Ralph E. Lewis, Director of Public Welfare, Tenth District, California Congress of Parents and Teachers: One of the things that must be realized in fighting the spread of salacious literature is that there is fundamentally no difference between the lurid sex magazine that is easily recognizable for what it is and the book which hides its salaciousness between respectable-looking covers. That sort of magazine and that sort of book have precisely the same object; to increase sales by appealing to prurient curiosity. Smut is the same thing, whether it sells for 10 cents or $3.

Long Beach Press-Telegram—9-6-46

STATE NEEDS SPECIFIC PLAN OF CHANGE IN CONTROL OF LIQUOR

By W. L. BLAIR

Whether California has the worst liquor laws in the country or not is a question of fact which would be rather hard to determine. Dr. James W. Fifield, Jr., Minister of the First Congregational Church of Los Angeles, said so in a recent address which has been much quoted.

One thing which all of us who have lived in California very long do know is that California's liquor law was written into the Constitution of the State as the result of a campaign of fraud and misrepresentation seldom equaled in this State or any other. It was a campaign to "keep saloons out of California." The people were fooled into approving this amendment immediately after the repeal of national prohibition; and they have ever since remained in such a dispirited and defeatist frame of mind that they have watched saloons come by the thousand without any serious attempt to modify the original, misleading plan.

It is also true that the people of California, in the matter of liquor control as in the matter of commercialized gambling, do not know what they want. Dr. Fifield himself says that he and other church leaders are not advocating a return of prohibition, but are banding together in concerted drive for temperance, abstinence and a change in licensing. As for temperance and abstinence, church leaders have always engaged in a concerted drive toward these ends. But, so far as the public knows, they are not yet fully concerted in their ideas as to specific changes in licensing.

The San Diego Union tries to help them out with the following suggestions:

> "A large part of the problem of liquor control lies in the fact that there are far too many on-sale and off-sale outlets. The ratio to population should be at least cut in half * * *. Combinations of dance halls and bars should not be permitted. Curb service, which makes it easy for juveniles to obtain alcoholic drinks, should be barred. Liquor stores scattered promiscuously along the highways, which contribute heavily to drunk driving, should be done away with. Sunday closing of both on-sale and off-sale outlets would help to reduce this menace of the highways. * * * The Chairman of the State Board of Equalization recently made the sensible suggestion that stools be removed from bars * * * and that food sales in drinking places be discontinued in order that minors would have no excuse for entering."

In the way of administrative reform, the San Diego paper says:

"Municipalities should demand substantial local license fees and insist on a far greater share of fees collected by the State. Inasmuch as they have to bear the brunt of police and court costs growing out of excessive drinking, it is only fair that they share adequately in the finances derived from the liquor trade. The cities also should have more authority in the matter of limiting the number of dispensaries and passing on the qualifications of licenses. The State should stop the tremendous racket in license transfers by automatically canceling licenses on the sale of bars."

Long Beach Press-Telegram—9-6-46

ANALYZE LAWS ON SALES TO MINORS

Although 48 states and the District of Columbia have laws prohibiting sales of alcoholic beverages to minors, an analysis by Allied Liquor Industries of "sales to minors" laws reveals that 40 states have a flat prohibition of sales of all alcoholic beverages to minors under 21 years of age. Three other states (Kansas, Mississippi and New York) set the minority age in such cases at 18 years.

"In Illinois and North Dakota, legislation defines minors as males under the age of 21 and females under the age of 18, and liquor sales are forbidden to minors under this interpretation. Three states and the district of Columbia have differentiated the restrictions on sales to minors as between beer and other liquors. In Ohio, Wisconsin, Idaho and the District of Columbia, alcoholic beverages other than beer cannot be sold to minors under the age of 21, but beer may be sold to persons over 18 years of age in Ohio, Wisconsin and the District of Columbia, while Idaho permits beer sales to persons over 20. In Maine, which has a 21-year-old minor law, sales of beer for off-premise consumption to persons over 18 are permitted.

"Some interesting qualifications of sales are made in two states. In Georgia, minors must have the written consent of their parents before sales of alcoholic beverages can be made to them, whereas in the State of Wisconsin, sales may not be made to a minor unless accompanied by a parent or guardian."

Industry self-regulation efforts with respect to sales to minors are thus able to operate within the framework laid down by these laws," the analysis states. "There has been some sentiment in recent years to have deterrent legislation passed against minors who falsify their ages in order to secure alcoholic beverages. Such laws do not intend to discharge the tavernkeeper or liquor store owner from responsibility for his own wrongful act. Because this is such a serious problem nation-wide, extreme care on the part of industry members is necessary, perhaps more so now than ever before. However, to the extent that legislators can put some of the burden of violation on the minor, where justified, then to that extent will the job of the tavern owner or liquor store operator in eliminating sales to minors be simplified," the analysis concludes.

The Sacramento Union carries the following in its "Safe Driving" campaign:

"WHEN I DRIVE, I WON'T IMBIBE"

Because—one and one-half ounces of alcohol results in the following:

1. His movements are livelier but less coordinated. 2. He makes more errors. 3. Causes a delay of 5 percent to 15 percent in physical and mental response to signals. 4. He possesses a false sense of efficiency. 5 He is 9.7 percent slower in reaction to danger. 6. Seventeen percent slower when danger is imminent. 7. Thirty-five percent more errors at intersections where traffic is heavy. 8. Fifty-nine percent more errors in eye and hand coordination. 9. Traffic rules have no meaning to the alcoholic. 10. Eighteen percent of all auto accidents caused by alcohol.—*Herbert E. Taylor, M.D., Sacramento.*

Arrests for drunkenness in San Francisco since 1940, according to police statistics, are as follows:

1940	41,905
1941	41,996
1942	41,146
1943	43,358
1944	38,104
1945—first six months	22,549

Los Angeles County	92,196
San Francisco County	46,098
State	192,392

Witness a recent Baltimore (Md.) Grand Jury statement relative to their city jail. "The chronic alcoholics * * * who serve short sentences only to be released for a few days and then be recommitted for another short sentence, present an enigma. It should be emphasized that the finest jail building obtainable, intelligent management, and an eminent staff of physicians and psychiatrists cannot do any permanent constructive work for alcoholics during their short sentences in jail."

The Los Angeles Daily Journal—2-12-45

INADEQUATE FACILITIES FOR L. A. JUVENILE DELINQUENTS CHARGED

Charges of official neglect by the county in the treatment and care of juvenile delinquency were made today in a report of the Los Angeles Bar Association's Juvenile Crime Prevention Committee.

The committee was appointed at the specific request of the 1943 Grand Jury, which, in a letter to then Bar President William C. Mathes, suggested the bar association make a study of the administration of the juvenile court here "with a view to its future greater efficiency."

Headed by Deputy City Attorney Paul Palmer, the committee held its first meeting in September, 1943.

The bar committee does not find that there has been any wilful neglect on the part of the board of supervisors, but says (in effect) rather that it has been listening too much to "pressure groups" who preach public economy, without regard to human needs.

Not since 1930, the report declares, had there been any move by the county to improve and expand juvenile care facilities and methods. On the other hand, it finds the board of supervisors cooperative and progressive (as evidenced from excerpts from conversations at a meeting between the bar committee and the board).

Further, the report points out that the supervisors moved immediately to improve conditions when the Bar committee called them to its attention. In the 1944-45 county budget the supervisors provided 27 additional probation officers, 20 of these for the juvenile division and seven for adults, and at the same time made immediately available $25,000 for alleviating conditions at Juvenile Hall.

"Appalling conditions" in the handling of juvenile delinquency in Los Angeles County are described in the Bar report, which declares that the probation department has lacked adequate personnel, that inadequate salaries were paid probation officers, and that facilities at Juvenile Hall have been totally inadequate.

Overcrowding of Juvenile Hall, nonsegregation of juvenile delinquents and nondelinquents, and the assumption by peace officers and civilians of semi-judicial powers in the handling of juveniles were among charges made in the bar report.

In releasing the report, Bar President Harry J. McClean also made public the following statement:

> "The Board of Trustees of the Los Angeles Bar Association has acquired the exhaustive report of its committee on Juvenile Crime Prevention, which was prepared by distinguished members of the bar after extended investigation and study.
>
> "The Board of Trustees has adopted unanimously the recommendations of the committee for better prevention of juvenile delinquency and treatment of juvenile offenders. Among these recommendations is one which advocates the elimination of certain quasi judicial activities by the Los Angeles Police Department, deputy sheriffs and civilian groups.
>
> "It is to be understood, of course, that the recommendation just mentioned and the action of the board in adopting it is not to be construed as a criticism of such officers and groups. On the contrary, they are to be commended. Their services were conscientiously rendered and made necessary because of the failure of the board of supervisors to discharge its responsibility for providing adequate facilities and sufficient competent personnel to handle properly the problem of juvenile delinquency in this county."

Climaxing a year's intensive investigation of the administration of the juvenile problem of Los Angeles County, the Los Angeles Bar Association's Committee on Juvenile Crime Prevention has submitted a factual report that shows some startling conditions, and makes some caustic criticisms.

It points to the failure of the proper administration of Juvenile justice.

It recommends, among other things, that the board of supervisors immediately increase the facilities of Juvenile Hall; that sufficient personnel in the probation department be provided, at salaries commensurate with the qualifications and responsibilities of probation officers.

It also recommends that the member of the board of supervisors assigned to juvenile matters assist in preparing the annual budget for the probation department,

Juvenile Hall and El Retiro, and that the bar association, with other interested agencies and individuals, use its efforts in a county-wide movement to effect radical changes.

Such agencies should, the report urges:

1. Stop immediately the practice of the police, sheriff and other administrative agencies, or citizens groups assuming or performing functions relative to juveniles;

2. Insure that the juvenile court assumes jurisdiction of all juvenile cases not legally within the jurisdiction of some other court, regardless of the approval of a probation officer;

3. Secure the treatment of adoption cases in other departments of the superior court than the juvenile court;

4. Obtain legislation to change the Juvenile Court Law for the treatment of minor traffic cases by municipal, justice and police courts, without making the juveniles involved wards of the juvenile courts; and to change the Juvenile Court Law to provide for the consideration of all serious offenses by juveniles by a preliminary hearing before municipal, justice or police judges, sitting as juvenile court commissioners, before submission to the juvenile court;

5. To insure and insist that all children involved in any proceedings in any court have legal counsel in every stage of such proceedings;

6. Change the law by legislation so that the approval of a probation officer shall in no case be a necessary condition to the filing of a petition in juvenile court; and,

7. Remove the responsibility of juvenile detention facilities from the probation committee and place it with the chief probation officer; provide for a new probation committee of seven members, one to be appointed by each member of the board of supervisors, one by the presiding judge of the juvenile court, and one by the chief probation officer; the function of the committee to be advisory only.

The present unfortunate condition in the county, the report says, developed, to a considerable extent, because existing facilities are inadequate. This inadequacy grows out of an insufficient number of judges assigned to juvenile courts; insufficient personnel properly to handle complaints following arrests of juvenile offenders; inadequate detention facilities; and an insufficient number of probation officers to properly supervise juveniles on probation.

The committee criticized the "screening" of cases by police and sheriff's departments, which, it says should be done by the judicial department. It believes that local service clubs and similar volunteer social agencies can accomplish much good by means of guided supervision of some minor offenders, after the need for such supervision has been determined by the court, but it opposes the practice of peace officers taking the responsibility of turning juvenile offenders over to such self-constituted organizations who act as court, jury, prosecutor and enforcers of their own decrees.

The report believes that amendments to the law are desirable so that no juvenile should be classed or branded as a criminal except in extreme cases, and no juvenile should be identified as a ward of the juvenile court if other treatment of his case will rehabilitate him; and that there is no good reason why juveniles who commit minor infractions should be brought before the juvenile court in the first instance. The report makes specific recommendations for amendments to the Welfare and Institutions Code to effect such reforms.

The present investigation by the Bar Association Committee was undertaken in September, 1943, as a result of a communication from the juvenile problems committee of the grand jury, which suggested that the bar association, "as a permanent legal body, familiar with the most efficient court procedure, make a study of the administration of the Juvenile Court of Los Angeles, with a view to its greater future efficiency."

A committee was immediately appointed by the then president of the bar association, consisting of: Judge Georgia P. Bullock; (resigned from committee and did not serve), Wixon Stevens, Deputy City Attorney; D. L. DiVecchio, Deputy District Attorney; Judge Arthur S. Guerin; H. A. Decker, Board Member; Harold H. Krowech; Judge Fred Miller, Walter Odemar, Courtney A. Teel, Clyde C. Shoemaker, N. E. Youngblood, Homer H. Bell, Deputy United States Attorney; John L. Bland, Deputy City Attorney; and Paul Palmer, Deputy City Attorney, as Chairman. Meetings were held with representatives of the juvenile bureau's Los Angeles Police Department and Sheriff's Office; of the Probation Department; California Youth Authority, the Probation Committee, Juvenile Hall authorities, superior court judges, members of the board of supervisors, and others.

The report recites that as early as April, 1944, the committee learned of the conditions existing in the probation department as to lack of adequate personnel, inadequate salaries paid the supervising deputy probation officers, and the inadequate facilities at Juvenile Hall.

Those conditions "were so appalling, and had existed for so long a time," continues the report, that the committee felt obliged, when they found that the tentative county budget for 1944-1945, made no provisions for additional personnel, adequate

salaries and adequate facilities at Juvenile Hall, to appear before the board of supervisors and lay the situation before them.

Following this, the board provided in the 1944-1945 budget for 27 additional probation officers, 20 of whom were for the juvenile division; promised sufficient funds to pay salaries commensurate with the qualifications and work required for the "best possible probation work," and voted $25,000 to be immediately available for use of the probation committee in alleviating "some of the unwholesome conditions now existing at Juvenile Hall." The committee says it is now "watching with interest the use made of the material given the probation department and the probation committee."

Supervising probation officers are carrying a case load double what should be reasonably expected, says the committee; that probation officers are improperly classified, both as to the character of work and salaries paid, the basic pay for such officers being $163 a month, which is not sufficient to attract persons such as are necessary to give satisfactory service. Their work is highly specialized and requires a college degree and one year's social work, or its equivalent. They are subject to duty and call throughout the 24 hours of every day, the report says. It recommends a starting salary of $175 a month for a six-month probationary period and thereafter with periodical increases until not less than $250 a month is reached.

Concerning the conditions at Juvenile Hall, the report says:

> "It is the opinion of your committee that for the past 10 years the board of supervisors of this county has made no individual or collective effort to determine the needs or the true conditions existing in Juvenile Hall, and that the subject of juvenile detention has been treated as a step-child by them to the general detriment of the welfare of the juveniles of this county."

The committee took the statements of witnesses, among them the Superintendent of Juvenile Hall. From him, the report continues, the following facts were elicited:

> "The maximum capacity of Juvenile Hall is 265; segregated as to sexes, there are accommodations for 154 boys and 111 girls. The figures presented here were determined by the Efficiency Division of the County of Los Angeles. The witness testified that you can crowd in 35 more. There have been a number of times when there have been as many as 315 children in Juvenile Hall who, as the witness stated, were all in bed.
>
> "The buildings are the same now as they were in 1930. The only increase in available sleeping accommodations for children in the institution since 1930 have been 25. On many occasions, during the period of time in which this witness has been superintendent, it has been necessary to notify the police that there was no more room in which to receive new juveniles who were being held by the police."

The result of this is that many juveniles who should be housed in the retaining facility have been released by the police or otherwise restrained by them illegally.

Los Angeles Daily News—10-1-46

YOUTH TELLS WHAT IT ASKS OF PARENTS

A group of 'teen-agers met yesterday at Immanuel Presbyterian Church to discuss what they, as citizens of tomorrow, owe the world and what the world owes them.

Occasion was one of a series of meetings held during the two-day Third Biennial Conference on Childhood and Youth. The conference, with headquarters at the Ambassador Hotel, concludes today.

The unrehearsed panel discussion brought out what the youngsters expect from their parents, schools and communities.

They felt youth had a right to expect from their parents, affection, adequate housing, clothing, security and an interest in their activities

Parents should set a good example said Darlyne Cosby, 18, Polytechnic High School. She felt that parents should not patronize black markets, should maintain a high moral standard for their children to follow.

Children should be trained from childhood to differentiate between right and wrong so that in adulthood they can make their own decisions, Miss Cosby added.

A spirited discussion arose on whether morals were the responsibility of parents or teachers. It was concluded that morals were the equal duty of parents and teachers. Sex education, it was agreed, should be started at an early age at home and continued in the classroom.

A burst of applause followed the statement by Lindbergh James, 18, student of Thomas Jefferson High School, that many parents need sex education themselves. He claimed that through limited knowledge, many parents give their children wrong ideas.

Students complained that too few elective subjects were permitted in schools and that the present curriculum is primarily planned for those students intending to go to college.

High school students intending to go to work after graduation were not given needed subjects, speakers maintained.

Betty Pilson stated that the present curriculum is inadequate but that the Board of Education is better qualified than the student government to make the necessary changes.

Wilton Robinson, 17, Jordan Senior High School, said more counseling service was needed in city schools. In reply to this charge, G. M. Montgomery, assistant superintendent of senior high schools, replied that if the public would "pay the freight," teachers would be willing to give the extra time needed for counseling.

Adequate police protection, attractive homes, adult participation in church activities and more recreational facilities were felt to be community needs.

The students recognized their responsibility to take an interest in community affairs, respect their homes, obey traffic and other laws, and use the training they have been given for the benefit of the community.

The meeting closed on the thought that for every increased privilege given youth, youth must assume an increased responsibility.

Long Beach Independent—9-5-46

GOOD SHIP MARRIAGE FOUNDERS ON ROCKS

Washington, September 15 (INS). The ship of marriage was reported today fast foundering on the rocks of troubled times.

The Federal Security Agency, which believes marriage and divorce rates bob up and down in response to waves of economic and social change, reported the 1945 divorce rate was the highest in history.

The ratio between marriages and divorces for that year stands at 31 divorces per 100 marriages.

This is in sharp contrast to the years 1937-39, the agency stated, when the annual ratio was 17.8 per 100.

San Francisco Examiner—1-15-46

S. F. DIVORCES HIT NEW HIGH

San Francisco set an all-time high for divorce and annulment actions during 1945, County Clerk Herman van der Zee reported yesterday.

The total actions filed were equivalent to 62 percent of the all-time high marriage license record of 13,241 for the year.

Divorce and annulment complaints filed totaled 8,232, as against the previous high of 6,960 in 1944, an increase of 18 per cent.

Interlocutory divorce and annulment decrees granted numbered 6,084, compared to a previous high of 5,377 in 1944, an increase of 13 percent.

The 13,241 marriage license total represented an increase of 14 percent over 1944.

Uniform Crime Reports (Federal Bureau of Investigation v. 16, no. 2, 1-46)

CRIME RECORD

The crime record for 1945 shows a 12.4 percent increase according to the reports of nearly 2,000 cities representing an urban population of over 65 million. Each offense class was on the rise with robberies up 23.6 percent; auto thefts, 18.7 percent; burglaries, 17 percent; negligent manslaughters, 16.2 percent; and murders, 10.1 percent. Aggravated assaults rose 8.7 percent and an 8.6 percent rise was recorded for larcenies. Offenses of rape continued up in 1945 with an increase of 5.7 percent.

A substantial portion of major crime is attributable to persons under voting age. An examination of the 543,852 fingerprint arrest records received at FBI during 1945 reflected that 30.1 percent of rapes were committed by persons under 21 years of age; as were 33.5 percent of the larcencies, 35.2 percent of the robberies, 49.8 percent of the burglaries, and 61.1 percent of the car thefts. Age 17 stood out as the predominating age among arrested persons and age 18 was second.

Arrests of males under 21 increased 10.1 percent in 1945 and although arrests of girls under 21 declined 10.6 percent in 1945, the figure was still 109.3 percent in excess of that for 1941, the last peacetime year.

San Francisco Chronicle—1946

GEIGER GIVES REPORT ON CITY'S VD

Venereal disease afflicted nine out of every 1,000 males and eight out of every 1,000 females in San Francisco during 1945, City Health Director Geiger reported yesterday.

Dr. Geiger said 11,057 venereal cases were reported, of which 65 percent were among civilians and 35 percent, military personnel. The total cases were distributed 56 percent male, 44 percent female.

Syphilis cases reported totaled 3,536, of which 89 percent were among civilians.

About 48 percent of the total cases ranged in age from 15 to 25 years, Dr. Geiger said, adding "it is assumed the earlier age groups are those weighted by inclusion of service personnel."

The same age group included about 57 percent of the acutely infectious types, he said.

Dr. Geiger emphasized that reporting physicians and agencies should include the time interval between the onset of symptoms and date of diagnosis. He said the value of disease information has been greatly impaired by the fact that in more than half the total cases, this detail has been omitted.

Long Beach Press-Telegram—10-18-46

PROTECTION FROM CRIME IS THIS CITY'S FIRST DUTY

Far from being peculiar, Long Beach's recent wave of crime and vandalism has been the typical experience of American cities since the end of the war. Newspapermen whose work makes them well informed regarding the current of events recorded by them day by day over a period of years do not recall a time when crimes, violence and wanton destructiveness were as prevalent as they have been in the last year. The average newspaper page of the United States these days bristles with headlines of burglary, thuggery, theft, arson, looting, assault and murder.

Something of the kind has happened after every great war, and, as stated, no city of any considerable size has been immune; but the municipal authorities and law-enforcement officers can break the crime wave by organized, concerted, determined action such as was promised yesterday in Long Beach by the responsible officials.

The wave of crime is national, even international, but the duty of coping with it is local; protection of each community is primarily the community's own task.

Employment of 30 additional police officers will strengthen law-enforcement here. The proposed surveillance of suspicious characters and checking of criminal records will be helpful, and the announced policy of holding certain offenders without bail and insisting on jail sentences for persons convicted of crimes of violence will be even more effective.

Protection of the lives, persons and property of its people is a city's first and foremost obligation.

Long Beach has no greater or more urgent duty than to make its residents and visitors safe in their homes and on the city streets, day and night.

The March-April, 1946, Prison World

CRIME TRENDS—1945

The crime record for 1945 shows a 12.4 percent increase, according to reports from nearly 2,000 cities with a total population of 65,000,000.

Robberies up 23.6 percent . . . Auto thefts 18.7 percent . . . Burglaries 17.0 percent . . . Negligent manslaughter 16.2 percent . . . Murders 10.1 percent . . . Aggravated assaults 8.7 percent . . .

Larcenies 8 6 percent.

Rape increased 5.7 percent over the year 1944.

Increases more pronounced and widespread throughout Nation than have been recorded in many years.

Value of Property Stolen—1944-45

The value of loot in average robbery rose 29 2 percent, from $113 in 1944 to $146 in 1945. Burglary loot value increased 15.7 percent, larceny 14.9 percent, auto theft 3.2 percent.

Estimated Number of Major Crimes—1945

Grand total of 1,565,541 major crimes registered.

Includes 11,234 felonious homicides, 11,537 rapes, 59,807 other aggravated assaults, 54,279 robberies, 241,491 auto thefts, 321,672 burglaries, 865,521 larcencies.

In other words, 6 8 offenses of aggravated assaults each hour; 1.3 rapes each hour; 1.6 murders each hour; 1.0 negligent manslaughters each hour; 98.8 larcenies each hour; 36.7 burglaries each hour; 26.7 auto thefts each hour; 6.2 robberies each hour.

An average of one major crime each 20.1 seconds.

Who Commits These Crimes?

A substantial portion of major crime is attributable to those not yet old enough to vote.

Age 17 stood out as the predominating age among arrested persons . . . and 543,852 fingerprint arrest records were received by the FBI in 1945.

Arrests of males under 21 increased 10.1 percent in 1945.

Over half—51.9 percent—of arrests represented persons who already had fingerprint arrest records in the FBI Identification Division.

Rise of Juvenile Crime

The New York *Times* on March 21, 1946, in an editorial commented as follows:

"Our great year of victory abroad, 1945, was a year of defeat on one of the most vital sectors of the home front. Figures compiled by J. Edgar Hoover, Director of the Federal Bureau of Investigation, reveal that crime in 2,000 American cities increased by 12.4 percent, an increase greater than any recorded in the past 15 years. The most shocking feature of the report is the fact that more than one in every five of those arrested were minors. Indeed, the 'predominant age' of the American criminal is now 17 years.

"It is in youth that the core of the whole crime problem lies. Statistics show that 70 percent of all adult criminals have been youthful delinquents. Therefore every increase in youthful crime means an extension of the criminal population through many years. President Truman has noted the serious aspects of the situation, pointing out that some categories of youthful crime have increased more than 350 percent since Pearl Harbor. Many people have complacently accepted the view that the rise in youthful crime is entirely due to war conditions and that the return of normal conditions will automatically effect a cure. Undoubtedly the break-up of homes, the relaxation of parental direction, industrial migration and prevailing unrest helped to force up the crime rate. But the roots of the evil go far deeper than that. It is a sickness that springs from many causes, some of them basic in our society.

"Children are freer from discipline today than they have ever been. Most authorities attribute this only partly to the development of gangs and the spread of evil influences from slum areas. They see a breakdown in supervision all along the line. They hold that the authority of the home, the church, the school and the law has relaxed with the consequence that the problem cannot be successfully attacked on any one front. It has become a national, State and local issue which can be met only through combined effort. Attorney General Clark's creation of an office within the Justice Department to deal exclusively with juvenile delinquency may form the nucleus for such a broad attack. But it will have to be integrated with hundreds of other agencies, official and unofficial, before it can prove effective. The driving force back of it must be a general recognition that juvenile delinquency is one of the most pressing problems of our time."

Los Angeles Equalizer—1946

RADIO CRIME PROGRAMS

Recently, Fred N. Howser attained national stature when newspapers throughout the country gave prominent play to his attack on radio crime programs. Editorially and in the news columns, the words of the Los Angeles County District Attorney were given wide notice and very serious consideration.

"In my opinion radio crime programs are contributing to juvenile delinquency rather than helping to prevent it and are a menace to youth," Howser declared.

The prosecuting attorney, himself a father, has touched off a nation-wide demand for a clean-up of the airways.

"Such programs as 'Crime Doctor' and 'Mr. District Attorney,' which I consider either stupid or degrading, or both, are implanting wrong ideas in the minds of the young.

"Like narcotics they are habit forming for many youths and adults. And, in my opinion, it is more than a coincidence that some of our boldest crimes follow the exact patterns of those that have been heard on the air.

"The sponsors of these programs apparently feel they are licensed to bring into our homes the most ghastly narratives of antisocial violence if only at the end of the program they make a perfunctory concession to the thought that crime does not pay.

"I do not agree. I think that crime programs are pernicious to youthful minds. Our record of juvenile delinquency shows that in many cases the urge for so-called adventure and glamour is greater than the fear of paying the penalty if caught.

"Further, I should like to ask parents a question. Would they wish their children to meet in person the kind of characters the children are permitted to meet in the current radio crime programs?

"I am sure the answer would be in the negative, yet these parents should remember that to a youthful imagination, as child psychologists know, make-believe people are often more real than real ones."

The response to the district attorney's statement was immediate and great.

Letters from parents, teachers and others alarmed at the mounting records of juvenile delinquency poured into Howser's office in vastly increased volume, since he began to put a finger on radio programs as a menace to youth.

Without a single exception they have supported his suggestion that it is time to make a national checkup on the effect of these lurid tales.

"With so many stories, that could serve as an inspiration to youth, which could be put on the air, radio writers should not plumb the depths of human society in order to shock youth and adults alike into attention," Howser said.

Western City—3-1946

SOCIAL PROTECTION IN WESTERN CITIES

By EDWIN JAMES COOLEY

Western Area Supervisor of Social Protection Division of the Federal Security Agency

It has been said that war, in addition to causing great and tragic human and social losses, often brings about some human progress. Certainly some of our social gains have occurred during such periods of crisis.

War and other crises tend to bring to light existing problems in our community living, as well as intensifying them. Due to our increased sensitivity during such periods, we seem to be made more aware of our enemies be they persons or undesirable social and economic conditions. World War II increased the number of problems facing communities. Over-burdened housing facilities, inadequate protective resources, and economic and social maladjustments were some of the perplexing problems confronting public officials. However, due to the war psychology and patriotic fervor communities and their citizens were far more willing to support drastic action against these evils, created, intensified, or illuminated by our national emergency. Our recent experiences demonstrate beyond doubt that, when an undesirable social or economic condition in a community is clearly recognized and its seriousness appreciated, official action against it will be taken and such effort will receive citizen support.

One of the community problems upon which our recent military focused public attention was social delinquency as manifested in prostitution, promiscuity, and venereal disease. The medical profession had long recognized that venereal disease was a serious threat to our national health and welfare. Social thinkers had long realized that condoned or legalized prostitution was a cancerous growth in our communities. Local, state, and national officials had for many years battled or weakly accepted organized prostitution and its attendant evils, corruption, adult crime, juvenile delinquency, and economic and social waste. Unfortunately, concerning both evils, the average citizen had no opinion or one founded on insufficient or erroneous information.

It required a national emergency to shake communities free of their lethargic attitudes toward venereal disease. In total war it received rightful recognition as a destroyer of manpower and a saboteur of the war effort. Military and Selective Service records were instrumental in focusing public attention on this evil. Of the first 2,000,000 men examined 95,000 were discovered to have syphilis and the estimated incidence of gonorrhea was much greater. During the period 1940-1942 venereal disease was responsible for some 300,000 servicemen being incapacitated for an estimated 4,000,000 days. It was recalled that during World War I venereal disease caused more casualties than enemy action. During the 26 months from Pearl Harbor to February 7, 1944, the Germans and the Japanese killed 36,000 Americans. Syphilis killed 33,000 Americans at home during the same period.

The spotlight of public attention also revealed that the prostitute constituted the major source of venereal disease. Houses of prostitution were named as the contact in 80-90 percent of all reported cases of venereal disease. These figures and other studies clearly demonstrated the inefficiency of "medical control" and the large infection potential of a segregated district.

The problem recognized and its seriousness demonstrated, action by the Federal Government followed. In order to strengthen local laws and action, and if necessary to serve in lieu of them, the May Act was passed by Congress in 1941. A program of cooperative action was formulated by the Army, Navy, United States Public Health Service and the Social Protection Division of the Federal Security Agency. The latter division was established to work with states and their political subdivisions to secure the repression of prostitution and promiscuity, the control of venereal disease, and the redirection of sex delinquents.

The Federal Government then called upon the states and their subdivisions to cooperate in this program; to examine conditions in their localities and to take action necessary.

The response to this request in the Western Region of the Social Protection Division (comprising the States of Arizona, California, Nevada, Oregon, Washington) has been particularly significant.

In this area prostitution was not only considered as an inevitable evil but it was also deemed to be a necessary part of community living and was rooted in the heritage of pioneer life and a single man's economy. The recognition and toleration of it represented a mass violation of state and local laws in all but one of five states. Although some groups and communities opposed prostitution it was advocated just as vigorously by others as a social institution, a method of protecting the good women of the community and controlling venereal disease. Of course, in some instances the reasons for its toleration were more basic and far less altruistic, since organized vice was well entrenched in many of the larger communities in the region.

In view of the heritage of the West, the expressed "public opinion" and the deep roots of the evil, the repression of prostitution in this region appeared at first glance to be an unobtainable goal. However, such pessimism failed to take two factors into account. The first, that many social evils exist because the majority of citizens of a community lack sufficient, accurate information on their causes, affects, and methods of cure. The second, that given such information communities will support aggressive, intelligent action by their officials in attacking such problems.

The story of the repression of prostitution in the western environment is one of the spread of current information on the etiology and treatment of venereal disease, and the causes, affects, and treatments of sexual delinquency (prostitution and promiscuity). First there was an emergency-induced attention to the problem, then action for its solution.

In terms of an over-all regional picture the progress has been impressive. Prostitution has been repressed in some 300 communities. More than 1,700 houses of prostitution have been closed. An incalculable number of systems of call-girls, taxicab, hotel, and tavern facilities have been smashed. Improved programs of health and law enforcement have been established in communities. Programs of redirection of delinquents have been instituted.

Official and unofficial agencies and individuals throughout the region played important roles. The governors of each of the five states called conferences of law enforcement and health agencies for the purpose of explaining the program and enunciating state policy and cooperation. Local officials not only carried out their responsibilities, but also, through increase in staff and facilities, and improved personnel, increased the ability of their offices to contribute to the program. Since the effort had to be a cooperative one and community-wide to be successful, programs and procedures of interagency cooperation have been developed.

Significant contributions were made by union and trade associations, and private organizations. Programs of self policing were established on a state and local basis by the liquor industry, hotel and tavern owners and operators associations. Labor unions adopted programs of group blood tests and bartenders cooperated in contact tracing. Although the leadership usually came from the officials of the community, private welfare and related agencies conducted experimental programs of the redirection of sex delinquents and contributed to interagency cooperation in the community.

These efforts were not only good in and of themselves, but they also had a cumulative affect. As steps were taken to repress prostitution, they revealed other inadequacies in the community. Unsatisfactory detention facilities, antiquated court procedures, the lack of protective services and social treatment facilities were brought to light. Due to focused public interest on the problem and the obvious good accruing from the initial steps toward its solution, the communities adopted additional and more constructive measures.

Of course, the road to repression of prostitution and promiscuity was not an easy one. It was temporarily blocked in many communities by outright official opposition or by lip service to the program accompanied by undercover opposition. In other areas due to inadequate personnel and facilities the establishment of the program was slow and sometimes the result not all that was desired. However, in none of the 300 some areas was prostitution so entrenched or protected that it did not fall before an enlightened citizenry under the leadership of aggressive officials. Experience demonstrated that given adequate leadership and information, the average citizen supports action against undesirable community conditions.

In view of the general acceptance of prostitution as a necessary community institution the progress made in all of the communities in the Western States is significant and outstanding. However, in some areas the conditions at the beginning of the program were so bad or the action taken so progressive that they deserve special mention. This specific citation is not only well deserved, but it is also hoped that the methods used will be of assistance to other communities with similar problems.

In 1941 prostitution was not illegal in the State of Nevada and it was honestly advocated by many citizens of this state as a method of preventing rape, controlling venereal disease, and as a necessary social institution. After an intensive educational program stemming from a conference called by the Governor, action was taken. With a slowly developing realization of the evils of prostitution and as a contribution to the

war effort the communities in Nevada passed local ordinances outlawing prostitution for the duration. It is interesting to note that the Cities of Reno and Las Vegas have taken action since the end of the war to continue its repression. The experience of four and one-half years demonstrated to these communities that repression did not increase sex crimes, that venereal disease did decrease, that prostitution was not necessary, and a better, more easily administered municipality resulted from its repression.

> Watson B. Miller, National Administrator of the Social Protection Division of the Federal Security Agency, last month reported that about 27 percent of the communities which closed houses of prostitution during the war have permitted them to reopen, and that venereal disease infections are again increasing. In a letter dated February 5th, to governors of western states, he asked them to "call upon the agencies of your administration and of the several communities within your state to redouble their cooperative efforts to control prostitution, promiscuity and venereal disease."

The social protection program of communities in Arizona has been particularly effective, especially in the larger areas of Phoenix, Tucson, and Cochise County. However, it required an aroused citizenry stimulated by education and "out-of-bounds" action by the nearby Army Air Field to institute the program in Phoenix. This civic action resulted in a change of administration. With the continued support of the community and state officials a particularly effective program is in force.

Prostitution was deeply imbedded in communities throughout the State of California. In addition many of the cities in this State were social and economic victims of the emergency through tremendous influxes of population, great numbers of military and naval centers, and mushrooming war industries. Wide-spread prostitution and promiscuity had to be battled with overburdened community facilities and resources. However, the response of the municipalities, particularly Los Angeles, San Diego, San Francisco, and Sacramento was immediate and enduring. Although to a greater or lesser extent all communities in the State repressed prostitution and instituted venereal disease control programs, the achievements of these cities are outstanding.

In addition to the initial necessary steps of repressing prostitution and promiscuity and building protective programs, steps were taken against the roots of sexual delinquency. Psychiatric clinics, systems of referral of delinquents for social redirection, treatment centers, improved court and probation procedures and special women's courts were established. Other crucial points in the social front were strengthened through public education, self-policing by bars, taverns and hotels, and strengthened and extended medical facilities.

The conditions in the States of Washington and Oregon were similiar to those in California in that there were the same problems of large military and production centers, overburdened community facilities and entrenched vice interests. Cities such as Tacoma and Seattle, Washington, have been outstanding in their efforts to establish effective social protection programs.

In addition to action taken by officials in many cities in Oregon such as Pendleton, Medford and Portland, private organizations have contributed much to the social protection program in this state. The Portland City Club, Civic Action Incorporated of Portland, and the Oregon Tuberculosis Association have carried on effective campaigns of state and community education organization.

Despite strong initial opposition, real progress has been made in the repression of prostitution and promiscuity, and in the establishment of rapid treatment centers, and redirectional services Here again communities have found that prostitution is unnecessary, and that social and economic conditions are improved by its removal Recently the members of the Chamber of Commerce of an Oregon city waited upon their mayor to tell him they did not want prostitution to return. With is removal delinquency and venereal disease had decreased, sex crimes had not increased, and there was just as much business in the stores and shops.

This social evolution in the western region has demonstrated that given the facts citizens will support and demand aggressive action by their officials in attacking a problem, even one of long standing. It also shows that there is no evil so deeply rooted that it cannot be eradicated from the community when attacked by such action.

The social protection story is not completed. Only the first chapter has been written. There is every indication that communities which have repressed prostitution and promiscuity during the war years are carrying on and will continue to do so. This is particularly true of municipalities in which a sincere, aggressive social protection program has been carried on. It is here that the gains from repression have been most obvious. Not only has a social evil been eliminated, but its attendent problems of corruption, crime, juvenile delinquency, and venereal disease have been reduced. The community officials have discovered that their duties are made easier by its elimination. The citizens have found that the anticipated increase in sex crimes did not occur and that prostitution is unnecessary. Save for selfish and vested interest there should be little pressure for its return. To date these interests have remained in the minority in this region.

However, experience during the last four and one-half years has substantiated belief that venereal disease, prostitution and promiscuity are the manifestations of a more deeply rooted ill. They are evils per se and must be attacked, but the effective

method is to get at their antecedent—sexual delinquency, be it called juvenile or adult. The causes not the end results must be eradicated.

In this task lies the challenge to communities now and in the future. The military emergency may have passed, but the social crisis still exists. The official agencies of the community must be so organized, staffed, and operated that the delinquent will be discovered, prior to a serious offense if possible, treated and redirected, and assisted to avoid further delinquency through personal adjustment and community improvements to decrease social hazards. Police departments must vigorously assume the responsibility for preventive police work. Courts through acceptance of responsibility, scientific systems of probation and pre-sentence investigations must dispose of cases so that the effect on the individual will be curative. The health facilities of the community must be expanded and contribute through referral systems to the social redirection as well as the medical cure of the infected person. Adequate, rehabilitative institutions and scientific systems of parole must be provided. Through cooperative action by all units within the community the pressures upon the individual toward delinquent behavior must be reduced.

SAN FRANCISCO PARENTAL SCHOOL

What parents attend?

1. Parents in municipal court, who have been arrested because of neglect of children or other illegal acts detrimental to the welfare of their children. The children may be in no way delinquent as yet. Parents are given the alternative of serving a heavier penalty or attending the full course of lectures and lessons in the Parental School.

2. Parents summoned to the juvenile court because of delinquency of children. They may attend the school or be held for contributing to the delinquency of the children.

3. Any other parents or citizens who are interested may attend and many actually do attend occasionally as a matter of interest.

Where are classes held?

1. The classes are held in the auditorium of the Health Building at 101 Grove St.

When are classes held?

1. The classes are held on Monday evenings from 8 to 9 o'clock. There are eight lectures in the course.

By whom are talks given?

1. The various talks are given by representatives of the Health Department, Eucation Department, District Attorney's Office, Recreation Department, Churches, U. S. Employment Service, and by psychiatrists and other specialists who have an effective message for such parents. A school principal presides

What are the topics of the talks?

Parents are informed as to their responsibilities for their children and as to the facilities and services which they can call upon in trying to meet the various problems that confront them.

The responsibilities emphasized relate to: Legal responsibilities, School attendance, recreation, Health, Preparation for a job, etc

How are these lessons received?

The whole tendency is for parents to express appreciation of the enlightenment they are receiving. Some parents come to the meetings even after they have been officially informed that their obligation has been met There have been no "repeaters" so far. A questionnaire is sent to all parents who have been required to attend the school, to get their reactions as to the value they have found in the talks. Typical responses are: (1) that they feel that the school meets a real need; (2) that the school should be a permanent institution; (3) thanks for the great kindness shown by those handling it.

Whenever parents request it they are given private conferences in regard to their special problems with their children.

Cost of the school?

To the present time the school has been conducted without cost to the city since those who are assisting are glad to make their contribution. The movement is under the auspices of the Coordinating Council.

Legal authorization?

Section 702 State Institutions and Welfare Code.

Proposed Courses for School of Parent Instruction

1. The legal responsibility of the parent.
   a. To the community
   b. For maintaining a home
   c. For supervision
   d. For adequate care

   Instruction furnished by District Attorney, Juvenile Court

2. The parent's responsibility for the child's health.
   a. What diet?
   b. How much rest, play, work?
   c. Dental hygiene
   d. Personal hygiene, communicable disease

   Instruction furnished by Department of Public Health

3. The parent's responsibility for maintaining an adequate recreational program
   a. What is good recreation?
   b. How can it be maintained?
   c. What are the harmful aspects of recreation?
   d. How can the parent participate in the child's recreational program?
   e. The parent's own recreation program

   Instruction furnished by Recreation Commission

4. What are the community facilities for?
   a. Maintaining health
   b. Providing recreation
   c. Enforcing the law
   d. Learning a trade
   e. Advising a parent
   f. Helping the child

   Instruction furnished by Council of Social Agencies of Community Chest

5. Your child's school career.
   a. The relationship of the school to the home.
   b. Opportunities for help and advice.
   c. His school habits.
   d. Training for his future.
   e. Formation of good habits for pre-school child.

   Instruction furnished by School Department

6. The relationship of the church to the home.
   a. The church and family life.
   b. Spiritual training and guidance.
   c. The facilities of the church for recreation.

   Instruction furnished by San Francisco Conference of Christians and Jews

7. The child's emotional life.
   a. Danger points.
   b. How to cope with emotional problems.
   c. How to understand your child.
   d. How to get help.

   Instruction furnished by Dr. Malcolm H. Finley

8. The importance of a job for your child.
   a. How to train him to hold a job.
   b. Community facilities for getting a job.
   c. What kind of a job should he have?
   d. What should be expected of him on the job.
   e. When should a child work?

   Instructor furnished by U. S. Employment Service

The Tax Digest—4-46

PLAYGROUNDS vs. CHILD DELINQUENCY

By WILL BAUGHMAN, California Taxpayers' Association

During the past quarter century the provision of recreational facilities has become a recognized function of local government. It has emerged from the "desirable but unnecessary" class into a standard and accepted function comparable to libraries and similar activities.

During this same period, recreation expenditures have increased at a rate greatly in excess of the increase in population or of assessed valuation. These increases are reflected in Table 1.

This trend in increased expenditures for playground and recreation is illustrated in the case of a large California city. That city was one of the first in the Nation to establish a recreation program, and is considered, nationally, as having one of the best recreation programs.

More than 20 years ago the citizens of that city voted $1,500,000 in bonds and, in addition, set aside a 4 cent levy on each $100 of assessed valuation for the installation and operation of playgrounds and recreation. Later, an additional $1,000,000 in bonds was authorized and the levy was raised to 6 cents per $100 of assessed valuation. In addition, a large amount of playground construction and improvement was accomplished through WPA projects.

Further expansion of the playground and recreation program is now being proposed. An additional bond issue of $2,500,000 and an increase in the tax levy from 6 cents to 8 cents or even 10 cents are being urgently advocated by various groups. Similar proposals for expansion can be anticipated in other jurisdictions.

As a rule of thumb, it may be stated that a playground costs about $100,000 to acquire and equip, and $10,000 per year to operate with but one man and one woman director, but not including replacement costs. Therefore, playground expansion should be carefully considered.

During its pioneer stage, much of the recreation program was advocated for its assumed value in combatting juvenile delinquency. Well meaning persons quoted unsupported opinions of others but made no attempt at critical evaluation of just how and to what extent juvenile delinquency was actually controlled by establishing playgrounds. What was merely an assumption has been widely accepted as a proven fact. It is with the problems connected with such an evaluation that this article is concerned.

Table 1

Expenditures for Growth of Recreation in California Cities

	1920	*1940*	*Percentage increase*
Number of cities	252	285	13
Population of cities	2,502,500	5,020,850	101
Assessed valuation of cities for local taxation	$2,679,362,498	$5,361,084,305	100
Operating expenses, playgrounds	579,356	3,758,763	549
General recreation	239,342	1,325,488	454
Parks and trees	1,622,995	4,525,274	179
Capital outlays	297,976	1,278,456	329

The citizens of California have not been parsimonious where expenditures for youth are concerned. If the further expansion of playgrounds is for the purpose of increasing the enjoyment and pleasure of our youth, then such proposals should be advocated on that basis rather than on some other.

For many years the more competent and able administrators of playgrounds have not used the "child delinquency" argument, but have discussed recreation on the same basis as parks, museums, and libraries. There is but one factor supporting the present use of this theory, which is: It is obvious that when a child is kept busy on a playground, he will have no time for mischief which may lead into delinquency.

Before proceeding further, the definition of terms is imperative. The present definition of "recreation" is limited to governmentally supported and operated facilities and programs. Commercial recreation is an important factor that should be given consideration; however, because of a lack of space, it will not be considered here.

The term "recreation" is so broad that even workers in the field use it in a confused manner. Recently a professional survey, limited to the subject of juvenile delinquency and the recreational facilities needed for its control, was made by a large governmental agency. In confusing all recreation with that portion that may or may not affect delinquency, the preparers of this report naively proposed a golf course as a deterrent of juvenile delinquency. A golf course may well be a part of the recreation program, but no serious claims for delinquency prevention can be made on its behalf. The same survey proposed establishment of a subsidized mountain camp for low-income families. This proposal ignored the fact that case histories and court records almost universally show that the major portion of delinquency in unbroken homes is connected

with the breakdown of the family and with a hating or hated parent. Such families could not easily be persuaded to participate in the semi-institutionalized program of a public camp.

Recreation has at least three major objectives: (1) enjoyment and rest, (2) personal development and enrichment of life, and (3) accomplishment of certain social aims. It is important to remember that any formal or informal recreation program can be applied only in the public's leisure hours.

Those publicly supported facilities that are used for enjoyment and rest include parks for scenery, beautiful surroundings, picnics, lawn bowling, golf, or tennis. Also of this type of recreation are beaches manned with lifeguards and maintained in a clean condition by public funds. In some cities, airports for private planes or ski runs in some mountain areas or regular community dances and concerts are in this category.

It will be readily noted that in all of these examples there is no master schedule of events. The citizens may use the facilities as much or as little as he desires. There are no organized classes and supervision is confined to the protection of public property, to enforcement of laws and ordinances, and to the prevention of accidents.

Insofar as juveniles are concerned, their participation, save for swimming and dancing, is minor. Usage is largely by adults who may come long distances to enjoy these publicly provided facilities. Museums, art galleries, and libraries, as well as concerts, festivals, and pageants, also belong in this category.

In the second class of facilities are those important in personal development and enrichment, such as photo or pigeon clubs, archery, and other handicrafts and instruction. Many of these activities, as far as juveniles are concerned, are part of regular junior high, senior high, or junior college programs. This category includes the organization of group activities in the form of clubs or teams. The clubs are usually patterned after the well known boys' clubs, Camp Fire Girls, or Boy Scouts. The teams may be in baseball, basketball, tumbling, or some other sport. Occasionally junior chess teams have been organized. Both qualitatively and quantitatively, the playground clubs are comparable to those organized and directed by high school teachers. Insofar as juveniles are concerned, the playgrounds frequently duplicate the special sports, clubs, and handicraft features that are both curricular and extra-curricular in the schools, or in Boy Scout, Junior Airmen, and other group programs.

The third phase of a recreation program is the attainment of certain social objectives. These include: (1) better physical development of youth, (2) lowering the traffic accident rate by providing space for off-street play, (3) developing a spirit of social cooperation through team play, (4) lowering the juvenile delinquency rate by keeping the potential delinquent busy.

Rather appalling statistics have been presented relative to the large number of youths who have been rejected by the draft board as being physically unfit. The establishment of more playgrounds is being advocated to correct this condition; however, a short examination of this matter discloses that, almost universally in California, the junior and senior high schools have physical education programs in which all students regularly participate. For this reason, any statistics as to the accomplishment of playgrounds in increasing the physical fitness of youth are open to serious doubt. The effect of the school program cannot be separated from the athletic and physical education program of the playground in sufficient degree to permit definite conclusions on the effectiveness of this phase of recreation programs. The effect of a better diet and of increasing health knowledge in the family may have a more important effect on health than all of the activities of any particular program.

A reduced traffic accident rate will be achieved if the playground adjoins the school. However, where main arteries must be crossed going from the school to the playground, a serious traffic hazard is created. A poorly placed but well attended playground may even increase the hazard and the traffic injury rate.

Juvenile traffic accidents in Los Angeles City indicate that about half the accidents to children involve juvenile bicycle riders. See Table 2.

An important consideration is that the principal use of the playground by juveniles is immediately after school. Yet this causes these children to be on their way home from the playground at the time when most traffic injury accidents occur. In at least one large city, that is from 4.00 p m. to 7.00 p.m.[1]

The facilities available at playgrounds for developing team work and a spirit of social cooperation are substantially the same as those that are available through the Camp Fire Girls, Girl Scouts, or similar programs for girls, and the boy's clubs, Boy Scouts, or similar organizations for boys. As a rule, very scanty attendance records are maintained at playgrounds. Various directors readily admit the need for better records, but they insist that they have too full an assignment to maintain proper records themselves. How they can program and operate special youth groups and clubs, which call for much original thinking and planning, without such information has not been made clear. Such programs are vital. The uniform experience of adult leaders of organized youth groups has been that if a program is not prepared and put into effect, a youth group will rapidly degenerate into a gang.

[1] The serious student of this phase of the problem is referred to the very complete traffic accident statistics given in the annual report of the Los Angeles Police Department

Table 2

Juvenile Traffic Injury Accidents to Children in Los Angeles

		Boys		Girls	
		5-9 yrs.	10-19 yrs.	5-9 yrs.	10-19 yrs.
Pedestrians	1944	266	183	126	139
	1943	279	210	127	162
	1942	189	178	99	98
Total pedestrians		734	571	352	399
Boys, girls		1305		751

	1943	22	203	5	27
	1942	26	293	3	35
Total bicyclists		92	698	17	94
Boys, girls		790		111	

It is in this field of continuous group work and in individual coaching that any important prevention of delinquency is to be expected. Only by such methods can the child be kept so busy that he has no time for delinquency.

One large probation department has organized about a score of such groups and has assigned probation officers to guide the programs and the activities for delinquent and predelinquent groups with the hope that weekly inspiration would carry over into the activities of the rest of the week.

There is an obvious weakness in the assumption that weekly attendance at guided social activities can offset the many other factors that contribute to delinquency.

It is interesting to note that participation in supervised playground activities is not large. This is the only type of playground activity for which any delinquency prevention value is claimed. In a Chicago study, described later, it was found that over a one-year period, the average participation in supervised activities was but one hour per participant per week. During a one-year period, from 43 to 87 percent, depending on location and season, of the 10- to 18-year old boys living in the area, participated in some form of supervised recreation. The percentage of girl participation was much lower. Spot checks of California recreation attendance and usage of facilities indicates that careful research will probably show that comparable situations are common in California.

Many exhaustive studies have been made of the background of delinquents and these studies agree on many points. Almost uniformly those youthful offenders who enter on a long career of crime have certain distinguishing characteristics. These include defective heredity, shattered or undesirable homes, bad companions, and an appalling lack of interest in normal youth activities. Almost without exception, they are extremely self-centered.[2]

The conclusion of most of the voluminous research in this field is that those juveniles whose criminal activities will probably extend into adult life require highly specialized treatment programs in which skilled psychiatric guidance is an important ingredient. This is obviously outside the field of a playground and recreational department.

The fallacy of most statements that playgrounds prevent delinquency is the usage of a single factor in a highly subjective manner so that proper consideration is not given to other important variables.

Few persons agree on the definition of juvenile delinquency; therefore, much confusion has arisen in discussion of the subject. Insofar as the present article is concerned, we refer to those cases that have become matters of official record either by filing in the juvenile court or by "unofficial" probation by police, sheriff, or probation department. "Unofficial" probation occurs in cases in which the agency makes a record but does not make a court filing.

As a matter of clarification, it should be remembered that nearly all juvenile court filings for delinquency are for such serious crimes and misdemeanors that had an adult committed them he would face a prison or jail sentence. Seldom, indeed, save in those counties where the court requires filing on all cases, is a youth brought before the court for a mere boyish prank. Nearly all probation departments have established adequate procedures to prevent filings on such cases.

This definition is further narrowed to youths under 18 years of age for the following reasons. Legally, the term "juvenile" applies to all minors under 21 years of age; however, the California law makes a definite distinction in the treatment of those over and those under 16, and it has another definite distinction relative to prosecution in the superior court for those over 18. Then, too, many jurisdictions report the number of juvenile cases under 18 separately from the older youths. As playgrounds, and particularly neighborhood playgrounds with supervised programs, are largely used by youths under 18, this definition is further narrowed to this age bracket.

[2] The reader is referred to "After-Conduct of Discharged Offenders" by S. and E. T. Glueck, and to "The Individual Delinquent" by Wm. Healy.

Even with this narrowed definition, great care must be taken in making comparisons between counties, since judicial policy or police arrest policies affect the statistics to such extent as to render them meaningless for comparison purposes.

One California county has for many years had a policy of exhausting all means before an official filing is made. In this county, the ratio of juvenile filings to adults is about one to four. In another county, the law enforcement policy is to file on all juvenile cases including all traffic citations, with the result that the statistics of this particular county show three times as many juvenile filings as adult filings.

Children who become lost, whose parents have been in an accident, whose home has been burned, are properly placed for temporary care in the detention home. The usual practice is merely to register them and almost never to make an official filing; yet in one county, by court order, an official filing with its permanent juvenile court record is made on each and every such unfortunate child who has not by the slightest stretch of the imagination committed an offense against society.

JUVENILE DELINQUENCY AND CRIME PREVENTION

Sponsored by Department and Committee Chairman of the General Federation of Women's Clubs

NOTE.—This program was compiled in Washington after an extended trip around the country, visiting various State federations and other groups.

The women were so perturbed over the increase in juvenile delinquency that an immediate program was deemed essential.

The procedure suggested should be started at once. If the club has disbanded for the summer, the president should call together the various chairmen of departments and committees corresponding to those listed below and permit the women to function as a committee.

SARA A. WHITEHURST, President

Facts

The fingerprint arrest records received at the FBI during the 1942 calendar year showed a 55.7 percent increase in arrests of girls under 21 years of age, from 9,675 in 1941 to 15,068 in 1942.

Arrests of girls under 21 last year for prostitution and commercialized vice showed a 64.8 percent increase; for other sex offenses 104.7 percent; for vagrancy 124.3 percent. Women arrested for prostitution are frequently charged with some other sex offense or vagrancy, and combining the arrests for prostitution with other sex offenses and vagrancy the overall percentage increase in the arrests of girls under 21 was 106.5.

According to the fingerprint records, arrests of girls under 21 for disorderly conduct showed a 69.6 percent increase, and for drunkenness 39.9 percent.

Although the total arrests of males under 21 last year showed a 3 6 percent decrease, arrests for some offense classes showed pronounced increases. For example, the arrests of boys under 21 years of age for assault increased 17.1 percent; for rape 10.6 percent; for carrying concealed weapons 15.5 percent; for gambling 14.6 percent; for disorderly conduct 26.2 percent; and for drunkenness 30.3 percent.

Male arrests for age 18 were higher than those for any other age. This differs from the record for 1939-41, which reflected most arrests for age 19. In 1942, the predominant age groups in respect to frequency of arrests were 18, 19, and 20, in the order named, but in 1939-41 the corresponding ages were 19, 18, and 21. For females, age 22 was the predominant age in frequency of arrests during 1942 as well as in 1939-41. But the shift to lower age levels among females arrested is seen in the fact that in 1942 the predominant age groups in respect to frequency of arrests were 22, 21, and 18, in the order named, whereas during 1939-41 the corresponding ages were 22, 23, and 24.

In a number of instances the arrests of males and females under 21 during 1942 showed opposite trends. For example, arrests of males under 21 for criminal homicide declined 1.3 percent, while girls under 21 arrested for these offenses showed a 29 6 percent increase. The number of young men less than voting age arrested for larceny decreased 11.5 percent, while girls under 21 arrested for such offenses increased 27.5 percent.

The decrease in male arrests for certain types of violations is undoubtedly partially attributable to the fact that several million males are in the armed services of the Nation. Judging by the substantial increase in female juveniles arrested and fingerprinted, there is a deplorable lack of parental guidance and discipline in many homes.

The records reveal that youths commit a large proportion of the total offenses against property. During the 1942 calendar year, there were 120,055 persons of all ages arrested and fingerprinted for robbery, burglary, larceny, auto theft, embezzlement, fraud forgery, counterfeiting, receiving stolen property, and arson; and 44,298 (36 9 percent) of those persons were less than 21 years old. Fifty percent of the burglaries and 58.4 percent of the auto thefts were committed by individuals under 21 years of age.

It is worth noting that these figures on the extent of youthful participation in crimes are extremely conservative for the reason that in some jurisdictions juveniles are not fingerprinted when arrested.

In some communities the over-all increase in crime by youths is in excess of 60 percent. Local law enforcement agencies are confronted with many additional duties in wartime, and often there are rather sudden increases in the population of individual communities without proportionate increases in police personnel. To make the problems of law enforcement agencies even more difficult, they have lost many of their most capable and experienced personnel to the armed services or to National defense industries

The FBI records indicate that half of the persons arrested and fingerprinted in 1942 already had criminal fingerprint cards on file. In other words, once a person starts down the path of crime there is at least an even chance that he will continue The delinquent of today is likely to become the habitual criminal of tomorrow, a human parasite.

Groups and individuals heretofore engaged in crime prevention work should not lessen their activities during wartime, but rather should redouble their efforts and thus contribute to keeping the Nation strong on the home front.

Objectives

1. To reduce delinquency and crime among youth.

2. To provide for cooperation between law enforcement agencies and all other groups whose activities are crime preventive in nature or purpose.

3. To provide for coordination of the efforts of existing agencies in order to eliminate duplication or overlapping of effort; to get maximum results with existing agencies.

4. To provide worthwhile sparetime activities for youth.

5. To make better citizens of youth.

6. To reduce the possibility of a post-war upsurge in crimes of violence similar to that experienced in the twenties.

Procedure

1. Study the local problem of delinquency and crime among youth. Define it as clearly and in as much detail as possible. The problem in any single community may be much more acute than in the Nation as a whole. Use:

a. Police records.

b. Juvenile court records.

c. Records maintained by any other official or private juvenile agency. These records should furnish the best factual data as to the extent of the problem locally. In the event adequate records are not maintained, arrangements should be made so that such records will be maintained and reports compiled showing the extent of the juvenile crime problem and increases or decreases in the future.

2. Coordinate the programs and activities of the several official and private agencies which seek to direct the energies of youth along constructive channels by setting up a coordinating council, consisting of representatives of each of the groups and organizations dealing with youth. Such a coordinating council would hold periodic meetings in order to work out the procedure for eliminating duplication of effort and for getting maximum results along crime prevention lines with existing agencies, as well as to consider specially the case of any juvenile brought up by a member of the council.

3. Determine whether there has been a substantial increase in the population as a result of wartime changes in the economic status of the community, and whether there has been a corresponding increase in the police personnel.

4. If the size of the city warrants, a crime prevention unit should be established in the local police department, whose function will be to eliminate those factors contributing to juvenile delinquency, discover delinquents and potential delinquents, and cooperate wholeheartedly with other public agencies and civic groups active in promoting the welfare of youth In smaller cities, where the establishment of a separate crime prevention unit in the police department is not warranted, cases involving youths should be assigned to the officers best qualified to handle them

5 Arrange to ascertain the sections of the community furnishing the largest proportion of delinquents. Also ascertain the existing recreational facilities in those sections of the city and whether they are adequate.

6. Work for strengthening, and if possible expansion, of programs of agencies which furnish wholesome sparetime activities for youth, such as, schools, recreation department of local government, churches, and other private agencies

7. Seek to reemphasize the character building functions of schools and churches.

8. Make a survey of part-time work performed by boys and girls of school age to see that the kind of work on which they are employed is suited to their age and capacity, and that the hours for which they are employed are not excessive. Encourage thrift.

9. Check on the problem of truancy. Present economic conditions cause migration of many families, and such disruptions may lead to truancy with the danger of development of delinquency and crime.

10. Encourage boys and girls over the age of compulsory school attendance laws to continue their education. The prospect of "easy money" resulting from boom conditions may cause some to decide to defer their education. The danger lies in the fact that most of them are unlikely to resume their education at a later date. Also "easy money" is likely to be spent unwisely.

11. Encourage church groups to intensify their efforts to increase the number of boys and girls brought into the Sunday school. Special emphasis should be placed on reaching those apparently most in need of the influence and training provided by the Sunday school. Similarly, churches should aim to reach more of our youth through the young peoples leagues of various types and through other group activities for youth sponsored by the churches.

12. Seek to impress on parents, through parent-teacher associations and other groups, the importance of home discipline, guidance, and control of youth, especially during wartime, when the force of circumstances seems to be in the direction of weakening the influence of the home and increasing the temptations in the path of youth. Parents, regardless of their natural confidence in their children, should analyze the problem as it pertains to their home; take an inventory of the amount of unsupervised time on the hands of their children, and make doubly sure this time is spent in wholesome activity.

13. Carry on a program designed generally for the purpose of maintaining high standards on the part of the local police, prosecutors, and courts.

14. Enlist the aid of local newspapers in all phases of the program. If the program is to receive the support which it deserves and which is essential to maximum results, it is necessary that the citizenry generally be thoroughly acquainted with the problem and be encouraged to make a constructive contribution to its solution.

15. All phases of the program should be carried on in a tactful and helpful manner so that the officials of the various agencies who are approached in connection with the program will be inclined to give their wholehearted cooperation and assistance

16. The project should be continuing in nature.

Miscellaneous

As far as possible the aim should be to provide youth with something to do of such a nature as to make them feel useful, particularly in reference to the National war effort.

There should be community provisions for recreation, job placement, and guidance.

Youth should be impressed with the importance of not having a criminal record. Lack of discretion in youth may result in lifelong handicap to the individual.

The cost of crime amounts to several billions of dollars annually. With a constantly rising National indebtedness, the people of the United States can ill afford the additional, hidden tax which results from crime and criminals Therefore, expenditure of money and of time on crime prevention activities is the best possible sort of investment. It should reduce the cost of crime and also prevent thoughtless youth from carelessly following the primrose path to degredation and ruin.

The American Magazine—3-46

THE RISING CRIME WAVE

By J. EDGAR HOOVER, Director, Federal Bureau of Investigation

Our war is not over. It merely has shifted from a fight against criminal armies on the foreign fronts of the world to a fight against an army of criminals on the front of law enforcement here at home. This is not an idle figure of speech. There in an army of at least 6,000,000 criminals in the United States today—one criminal for every 23 inhabitants of the Nation. Their fingerprints and the records of their arrests are in the files of the Federal Bureau of Investigation at Washington. It is an army larger even than that which did the actual fighting against the Germans and the Japanese.

The criminal ranks of America, already going into action against you and your children, are being reinforced by juvenile delinquents who are coming of age. They are the neglected sons and daughters, in many cases, of parents who worked for four years in war production plants in congested industrial centers. Some are the pampered and

irresponsible victims of too progressive educational systems. Many of them are now prepared through experience to engage in big time crime.

More 17-year-old boys and girls are being arrested than any other age group. The arrests of girls under 18 years have increased 198 percent since the last peacetime year of 1939, while arrests of boys under 18 have increased 48 percent for murder—70 percent for rape, and 39 percent for robbery. Many of these are the gangsters of tomorrow; their real menace will not be felt until they join the rank of organized crime.

Everybody knows that crime is on the increase. The latest monthly figures for the year just ended revealed an increase in serious crimes of 19 percent over the same month in 1944. There were 32 percent more murders and 38 percent more robberies. But this upward swing of lawlessness is a mere ripple as compared with the tidal wave of crime that will roll upon us very soon unless every law-abiding citizen exercises unceasing vigilance and reports every criminal manifestation, no matter how trivial, that comes to his attention.

During the period of the war emergency, to date, the FBI received more than 1,000,000 informations against potential enemy aliens and other subversive persons, and these proved of incalculable value in our prevention of sabotage and espionage. If, in this war against crime, every citizen is as cooperative with his own police department or county sheriff as he was with us, we will go a long way toward defeating the sinister forces here at home. It is true that a crime wave usually follows every war, but this one we face today may engulf us with unprecedented rapidity and magnitude because of some new factors in our social life.

Never have there been such revolutionary changes in our economic system or so many threats to its stability. Subversive forces are powerful and active. If further unrest is stirred, if strikes continue and unemployment becomes widespread, hundreds of thousands of persons who normally would not defy law and order may join the ranks of crime in disgust or to provide for their families

Never have our soldiers fought so long and hard in a war. If they should become embittered by economic adversity, some of them may become gangsters, preying upon those who did not serve.

The menace of the crime wave is intensified by the tragic fact that we are ill-prepared to cope with it. The jails and prisons of the Nation—the dikes against the criminal flood—are in many cases dilapidated, antiquated, and badly managed. Many a prison guard is of lower intelligence than the criminals he guards, and many a warden, appointed by venal politicians, has no more qualifications for rehabilitating and disciplining hardened criminals than the captain of a garbage scow. Such guards and administrators abuse and molycoddle criminals and make them more dangerous than they were when convicted. They and the broken-down prisons which they mismanage are responsible for the increasing number of escapes.

The record is unbelievable. One criminal escaped from a jail recently with a key fashioned from his toothbrush. Imagine a jail lock so open and frail as to yield to such an improvisation. Not long ago another criminal escaped from a jail by cutting through a steel wall with a wire saw. When he fled he had $300 in cash in his pocket; he had never been searched when he entered the jail. Still another convict recently cut through a steel bar with a kitchen knife, and escaped. Bars than can be cut with kitchen knives are butter, not steel. The man who built that jail was trying to save money, not human lives. One of our agents reported recently that he had met a warden who, when he went home, always hung the key to the jail on a nail outside the front door. Anybody could take it down and walk in.

These are trivial examples of a dangerous and widespread condition. But these are the jails that are to hold the desperadoes of tomorrow.

Quite as dangerous as wooden jails and loose stones in prison walls is bad management. In one large prison, we learned recently, nine convicts escaped in one week by the simple expedient of stealing their prison records out of the warden's files and replacing them with falsified records which showed their terms had expired. What kind of a warden is it who would give convicts access to his office and records?

In still another large prison, our agents reported not long ago, the warden was giving prisoners 10-day Christmas vacations. They departed in groups of 50, like soldiers on furlough, and, on their return, if they returned, another group of 50 departed. One of these vacationists was five times a murderer and had once been sentenced to the electric chair. This did not happen 50 years ago. It happened a few months ago.

These widespread conditions exist because of you and you. Build up the dikes against the coming flood, or you will pay the price. Don't let the budget officials slight expenditures for jails and prisons, any more than you would let them slight the police. We must be interested more in the safety of society than in the convenience of a criminal or of a budget maker. See to it that jailers, wardens, and guards are professionals in their field—remakers of men, but stern and skilled guardians of their prisoners. You can act only through your county, city, and State representatives. Write to them and warn them.

The police stations of the Nation are run down—sometimes filthy and dilapidated. They destroy the morale of the men who work in them. Women's clubs can do a lot to remedy this condition, if they start now to visit such places. Their presence—and I have seen it happen—usually shames police officers into cleaning up. One visit is not

enough. Go and go again until the job is done, and then help the police to secure the facilities they need.

But even a greater demoralizing influence upon the police of America—and remember they are your soldiers in this fight against crime—are the pitifully low salaries they are paid. In cities with populations of more than 500,000, the average pay of a police officer in 1945 was $2,164, in cities of 25,000, only $1,825. The annual salaries of government typists and stenographers range from $1,900 to $2,496, more than the police officers of America get. Even a messenger in a government building, carrying letters and memoranda from office to office, may receive as high as $1,900 a year.

In a number of towns around a large industrial center, we learned a few day ago, the average policeman received far less pay than the workers in the factories. Economically they were his superiors, even though he was their protector.

At such miserable salaries, do you think it is possible to employ spirited, loyal, honest and competent policemen? An underpaid police officer with a wife and family certainly has a motive to accept special considerations. He probably is a hesitant defender of your security, when he has no security. He is less apt to be competent than a more highly paid man or he would not remain in the service.

In the FBI courses for police officers, we have broken down their duties into 100 different types, their knowledge and skills to 158 kinds, and the subjects which they must know to 333. For example, they must know the elements of the law they are enforcing, first aid, the rudiments of ballistics, markmanship, fingerprinting, fist fighting, and so on ad infinitum. It's difficult to keep such men at $2,000 a year when their services could and do command more elsewhere.

There is still a greater menance to the successful law enforcement which this new emergency requires and that is the crooked politician or the politician who places the pork barrel above the welfare of society. These politicians either corrupt policemen or destroy their morale. I must say here and now that if we are to stem the rise of crime we must take police and sheriffs, the first line of defense against terrorism, out of the hands of venal politicians. The police department must be placed, like so many municipal fire departments and school systems, in the control of a nonpartisan commission. It may be a hard job, particularly when a powerful political machine exists in a city, but it can be done if every decent citizen puts pressure on his local lawmakers.

In the course of our criminal investigations, we are constantly finding evidences of venality and corruption in politicians behind the scenes of law enforcement. In one small city recently we were forced, since we had no jurisdiction in the matter, to see an able chief of police forced out of office by unscrupulous municipal officials because he had conducted a successful clean-up campaign. The city officials were in league with a group of bootleggers whose liquor stores had been hit by the chief's campaign Trivial? The worst killers the Nation has seen sprang from traffic in illicit booze.

A more adroit strategy was employed by another politician. When a policeman raided a cafe owned by one of the politician's friends, that dignitary simply ordered the Civil Service Commission to conduct an examination of all the force for the position of sergeant. The man who raided the cafe got a grade of only 41, while the top grade was 91. But the low man got the job. Why? Because it enabled the city official unobtrusively to take him off the beat on which the cafe sold its illicit liquor. Vitrue had its reward, but consider the demoralizing effect of the injustice upon the man who got a grade of 91.

In another town, our agents learned that a patrolman engaged in a vice clean-up had worked such long hours that he caught cold and was forced to bed. While he was sick, his pay was deducted as a reprimand for his zeal. We see it every day in many towns—the protection of houses of prostitution by corrupt police commissioners, the outright discharge, through frame-up, of decent policemen who dare tamper with pin ball racketeers, liquor runners, gamblers. It is all too prevalent.

Time and again we find qualified and ambitious men in antiquated police departments who want to attend the FBI National Academy which we conduct for the expert training of police officers in Washington. They tell us their stories The commissioner may say yes, the reactionary chief or the captain say no. The good man attends On his return, his immediate superiors try to ride him off the force. They won't let him instruct other officers in what he knows Too highfalutin', they say. What they mean is that knowledge is dangerous to the venal politician they represent. But many of these young men have won out against the politician and the reactionary. One came to us without salary and ate on 35 cents a day for 14 weeks while he took our training Then he went back and did a job for his community. Another suffered the indignity of being struck down by a reactionary police captain just after taking fingerprints of two prisoners, a job that nobody else in the department could do.

"That'll teach you," the captain said, "to mess around with the FBI"

"And that," said one of the prisoners, who, I believe, was a little better than the captain, "is the dirtiest trick I ever saw."

That young man got up and finished his job that night. But he won out. The commissioner stuck up for him. He taught the department how to detect crime. Every community should stick up for such young men if they mean to save us from terrorism. Our training school in Washington and our traveling schools, which are sent out through the country at the request of local and State departments, instructed 27,050 policemen last year. There are only 150,000 policemen in the United States, so you may

see that we are making a dent in the job of professionalizing law enforcement in the Nation. But it is a profession which requires rare courage—not the courage to look at the muzzle of a gun, but the courage to do the right thing day after day and not to permit politics or influence to interfere.

Another problem of effective law enforcement is the proper administration of parole systems. Parole has had two great stumbling blocks—maudlin sentiment and vicious influence. I believe in the parole system. It gives a man who has shown a capacity for reformation a chance to rejoin society on trial. But too many persons have forgotten that society is more important than the criminal. Softhearted parole boards too often are more lenient with criminals than they are solicitous for the welfare of your children, who may be kidnapped, or your sister or daughter, who may be raped.

Again, confirmed criminals are being unleashed upon society by starry-eyed uplifters or venal politicians. While I am a friend of parole and probation I do not believe in the imbecility of granting favors or taking chances with desperadoes. In too many cases parole administration is conducted by persons with no qualifications as criminologists, psychologists, sociologists or as anything else except as political hangers-on.

Latest figures show that in one year, of 85,767 prisoners released from prison, more than one-half were released prior to the expiration of their terms. Almost 33,000 were paroled. Fifty percent of the prisoners we record show previous arrest records.

This condition is stupid and criminal. A parole should be granted only in the most unusual cases. The candidate should be examined and reexamined by experts, not released simply because he looks like a nice boy and hasn't spat on a guard. Again and again I shudder at the latest record of some fiend who has been turned loose on society by the parole system. The same applies to ill-advised probation.

There is Tom McMonigle, who was sentenced to prison from one to fourteen years for rape. Then he was released. He was accused of rape again, but was not prosecuted because the victim's family wanted to avoid the publicity. Later he received a total of nine months on a battery charge. This was reduced to six months and he was placed on probation. He went free. That is why little Thora Chamberlain, 14 years old, is dead in California. Her body probably has been smashed in the sea at the bottom of a cliff near San Francisco. We ran Tom McMonigle down and then turned him over to the local authorities. He was promptly indicted for the foul crime of kidnaping, shooting her to death, and then throwing her body over the cliff into deep and dashing water.

If we are going to fight this crime wave, let us not be put to the task of fighting dangerous people already caught, convicted and confined. Let them stay in prison, so that their potential victims may live. Why should they be released by ill-advised parole boards and probation systems to join the fight against society?

There must be some reforms in the laws of the land, too, if we are to fight crime's army successfully. We must make it impossible for shyster lawyers, the mouthpieces of the underworld, to effect delays by quibbling over words and technicalities Our laws give criminals too many breaks. It's time law enforcement had a few breaks. A criminal lawyer may take depositions, in some jurisdictions, from witnesses for a defendant, but the prosecution, in a criminal case, is not permitted to take a deposition even from a dying witness. If we obtain a search warrant with which to raid even a hideout of criminals, we must enumerate everything we are looking for. We may be looking for a rifle with which a robbery was committed and find only the jewels from another robbery. But if the jewels are not listed in the warrant, we can not touch them. By the time we have obtained a new warrant, the jewels may have vanished A 10-year-old child could tell you that this is ridiculous Our laws are shot through and through with such absurdities. They can be eliminated if you get busy with your state and federal representatives.

You can take the handcuffs off law enforcement in your community if you will take this warning as seriously as you would take a declaration of war. And having streamlined it with efficiency, and endowed it with a decent wage, you must stick up for it against sobsisters who cry "For shame upon you," when a gangster is shot to death in a gunbattle, and against subversive agitators who cry "capitalist oppression" or "racial prejudices" when the violator of the law is of a minority group. The sobsister and the subversive agitator are menaces to decent law enforcement all over the land. We have been too soft to the extent of being mushy. There are too many on the sob squad and too few on the fighting squad.

It is paramount that law enforcement vigorously enforce all laws, but at the same time be as meticulous to protect the constitutional rights and civil liberties of all peoples of every race, color, and faith.

I do not favor a National Police System. Law enforcement in a Democracy should rest in the locality where it is administered. Law enforcement should never be permitted to lose its local setting and become a matter of force concentrated at some distant point. It must be close and sympathetic to the people. The local law-enforcement agencies are composed of local people who know and understand the people around them. And the people around them know and understand the law-enforcement officers. If they are not decent and efficient officers you will know it. Then get rid of them. If they are doing their job, support them. If you don't, I warn you we're in for a wave of crime that will stagger this Nation.

LETTERS AND RECOMMENDATIONS OF DEPARTMENT OF CORRECTIONS

STATE OF CALIFORNIA, DEPARTMENT OF CORRECTIONS
SACRAMENTO 14, September 11, 1946

Honorable Lorne D. Middough
Hotel Sacramento, Sacramento, California

DEAR SIR: This will acknowledge your letter of September 7th. Here are a number of recommendations which might be helpful if you feel that you and your committee members can support them:

1. It is recommended that the California Institution for Women be moved to the site of the old Narcotic Farm at Spadra and that the funds now available for completing and enlarging the California Institution for Women be used to enlarge and develop the Spadra property rather than the property at Tehachapi. It is further recommended that the State recover the use of this property as soon as the present lease of the Pomona Junior College District expires.

2. In view of the rapidly increasing number of commitments to state prisons and correctional schools for adults, it is recommended that the present site and properties of the California Institution for Women at Tehachapi be converted into a prison farm for young adults and that an enabling act be passed and an appropriation made available for converting this property at the coming session of the Legislature.

3. It is recommended that a Division of Jail Inspection be established by law in the State Department of Corrections.

4. It is recommended that idleness in the state prisons be vigorously combated and that the Department of Corrections' industrial program within the limitations of state use be placed upon a sound and lasting basis by the passage of a law similar to that governing the Federal Prison Industries. (Pub. No. 461—Seventy-third Congress—H. R 9494.)

5. In view of the already seriously overcrowded condition of San Quentin and Folsom, it is recommended that no delay in the construction of new facilities be permitted if it is within the power of the administration to prevent such delay.

6 It is recommended that continued support be given to the classification and rehabilitative facilities of the prison program.

7. In further support of Item No. 6 it is recommended that the plans for modernizing our old prisons and the construction of new ones eliminate the vicious practice of housing two men in a cell and that other provisions be made in the planning of new facilities for the segregation of the various classifications of prisoners in order to prevent the general dissemination of criminal knowledge and degenerate behavior within the prisons.

8. Since the California Vocational Institution may receive commitments from both the Youth Authority and the Adult Authority and since the Youth Authority commits those older cases who are unfit for classification at the Preston School of Industry to this institution, it is recommended that a law be passed making escape or attempted escape from this institution a felony.

The above are a few recommendations which you might wish to consider. I shall do my best to be present at the Public Works Board meeting. However, there is some possibility that I may have to go to Chino on that day. Therefore, I am mailing this letter to you at the Sacramento Hotel.

Kind regards.

Sincerely yours,

RICHARD A. McGEE, Director of Corrections

STATE OF CALIFORNIA, DEPARTMENT OF CORRECTIONS
SACRAMENTO 14, October 2, 1946

Hon. Lorne D. Middough
4230 Long Beach Boulevard, Long Beach, California

DEAR MR. MIDDOUGH: Your letter of September 30th to Director McGee arrived after he had departed for the annual meeting of the American Prison Association in Detroit, Michigan. Mr. McGee will be back around the middle of the month, and we shall bring your letter to his attention.

In the meantime, here is a summary of the program Mr. McGee has tentatively outlined to the Board of Corrections. No doubt there will be minor additions and possible changes in these proposals before next January, but perhaps this information will serve your immediate purposes.

With kindest personal regards, I am

Sincerely yours,

JOHN H. KLINGER, Deputy Director

Recommendations for Legislation Concerning the Department of Corrections for the 1947 Session of the California Legislature

1. Establishment of a second reformatory-type institution for the general age-group between 20 and 25.
2. Establishment of a farm colony for mentally defective prisoners.
3. Authorization to move the California Institution for Women to a site more appropriately located.
4. Establishment of a division or bureau of Jail Standards and Inspection under the Department of Corrections.
5. Establishment of a Commission on Correctional Industries advisory to the Director of Corrections in the determination of policy with respect to the productive work programs in the prisons and institutions, this commission to have representation from labor, industry, commerce, agriculture and the general public.
6. The establishment of a Division of Probation in the Department of Corrections for the purpose of setting standards and providing special consultation to local probation agencies. The general policy governing this division will be set by the Board of Corrections, administrative functions of this division probably to be contracted to the Youth Authority.
7. Passage of a law making presentence investigations and reports mandatory in all cases of convicted felons irrespective of whether or not they are eligible for or recommended for probation.
8. Amendment of legislation setting up restrictions upon the use of probation to give the judiciary greater discretion.
9. The reexamination of Section 1203-b of the Penal Code providing for summary probation.
10. Passage of a law prohibiting the practice known as issuing floaters.
11. Passage of a law specifically defining escape or attempted escape from the California Vocational Institution as a felony.
12. The amendment of the law setting a maximum of $25 upon the expenditure which the prisons may make for clothing for each discharge or paroled prisoner. In view of the increased cost of clothing since this limitation was set, the new limit should probably be somewhere near $50.
13. The amendment of those sections of the Penal Code providing for various kinds of credit against prisoner's sentences. The amendments should be aimed at simplification in order to make the credit system more understandable, both to the prisoners and to the public and to relieve the department of a cumbersome and expensive problem of record keeping.
14. The amendment of the sections of the Penal Code dealing with the smuggling of contraband into prisons. The list of contraband should be extended to include various sedative and hypnotic drugs, especially including benzadrine.
15. Passage of a law placing serious penalties on public officials who knowingly permit the operation of kangaroo courts in any kind of a city, county or state jail or prison.
16. The amendment of Section 2722 of the Penal Code to permit the Director of Corrections to fix the price of jute grain bags, manufactured at San Quentin, at or near the market price as is the practice in fixing prices of other prison-made goods.
17. The amendment of Section 2709 of the Penal Code to remove any doubt concerning the right of the department to sell by-products of prison industries under the provision of Section 2.5 of the Surplus Products Act.
18. The amendment of Section 5006 of the Penal Code to permit the establishment of inmate welfare funds in each of the institutions for use in discounting bills.

STATE OF CALIFORNIA, YOUTH AUTHORITY
May 14, 1945

Honorable Lorne D. Middough, Assemblyman, Seventieth District
State Capitol, Sacramento, California

Subject: Parole violators, Preston School

DEAR SIR: Your letter asks for information on the percentage of violators from the Preston School of Industry. I do not know where the Assemblyman got the figure of 60 percent. As a matter of fact, it is practically impossible to find out what the exact violation percentage is. The Taxpayers' Association has made a comprehensive study of the Preston School this past year. They made a sample check on the cases paroled from Preston in the 10-year period 1934-1944. They found that about 45 percent of their sampling had violated the law within the 10-year period. Mr. Close always estimated that about 35 percent of the boys in the school failed on parole. You will remember that the school came to the Youth Authority in August of 1944. We have not been responsible for its administration for a long enough period of time to determine the effectiveness of the program. I would say, however, that we have not yet made enough change in the Preston program to materially affect results. We have definitely strengthened the parole program but as now constituted, it has only been in operation about six months. As you know, we plan definite reorganization of the whole training program at Preston, in the hopes that we can secure better results.

The Ventura School has a 20 to 30 percent violation record. The only checks ever made on Nelles indicated about a 35 percent parole violation. Our new facilities have a very small violation record so far but have not been in operation long enough to get significant figures.

The Glueck estimates of parole violations from the correctional schools throughout the country, indicated approximately 50 percent violators in the first 10 years.

Sincerely yours,

KARL HOLTON, Director

REPORTS OF COUNTY OFFICIALS

Following are excerpts from letters and reports received by Chairman Middough from county officials in California. Original letters are in the committee's files.

Contra Costa County

DEAR SIR: Your letter of March 12, 1946, received. Our problems in Contra Costa County are the same as they have always been with regard to crime. With the increase of the population, crime has increased. The causes seem to be the three old ones that have been the cause of crime for 2,000 years—*sex*, the desire *for illegal gotten gain, and liquor*, either directly or indirectly.

To the same extent, these are the causes for crime among juveniles, who after all, are no more nor less than young adults. We believe that one of the contributing factors is the lack of discipline all around. Regard for the rights of property and for the rights of others is not drilled into the children at school and to the children at home. There is too little supervision in homes and schools with the consequence that young folks grow up uninhibited and undisciplined and consequently get into trouble.

San Bernardino County

DEAR SIR: I have just received your letter requesting our latest report on crime prevention and correction as these matters exist in this county.

Due to the fact that this office has never investigated these matters, or made any reports concerning them, I am unable to comply with your request. *Our hands are so full of work involving the prosecution of crime after it has been committed that we have neither the time, nor do we have the facilities*, to study means or to employ any measures for crime prevention or correction.

El Dorado County

DEAR SIR: This is to acknowledge receipt of your letter of the twelfth instant and contents noted.

I am now serving my twentieth year as district attorney of this county and I can truthfully say that there has been less crime since the outbreak of the war than at any time during my experience as district attorney. Recently we have had slightly more juvenile work but on the whole I would say that conditions are quite satisfactory.

One mistake I think that is being made is that misdemeanor cases are not treated as seriously as they should be because when a defendant notes that a misdemeanor case is passed over lightly it does not have a deterrent effect with the result that quite a few of the defendants who are first caught on misdemeanor violations do not realize the seriousness of the situation and continue their violations with the result that they are finally charged with a felony. Further to insure adequate law enforcement, there must be complete cooperation of all agents, federal, state and county.

Mariposa County

DEAR SIR: I am in receipt of your letter under date of March 13th, advising me that your committee desires a report from Mariposa County on crime prevention and correction.

I appreciate the fact that you have quite an undertaking in this difficult project and would be willing to offer any assistance possible. However, we have little or no crime in Mariposa County except misdemeanors and other ordinary crimes in the mountain areas. In view of the fact that we are a great distance from railroad centers we have few or no criminals entering Mariposa County and for this reason the crime problem is of no serious consequence.

Thank you for writing me relative to this matter and in the event I can be of any assistance to your committee, kindly advise me.

San Joaquin County

DEAR SIR: Pursuant to your request for data on criminal cases in this county for 1944, 1945 and 1946, it has taken some time to compile this information in the form desired as it necessitated a check of our 12 justice of the peace courts, as well as superior court cases. However, I am enclosing a tabulation herewith for your information, which I believe fairly presents the over-all picture broken down into various kinds of offenses.

This tabulation does not include misdemeanor cases, which under the Stockton city charter are handled exclusively by the city enforcement officers in the police court and which are not handled by the district attorney's office, but which would not greatly assist you, in my opinion, as the great majority are minor misdemeanor offenses, such as, drunk, vagrancy, gambling, etc., although there are also quite a number of traffic offenses, such as, drunk driving cases, the number being roughly equal to those handled in the balance of the county. We, of course, handle all felony cases throughout the county.

It must be noted that the tabulation shows a substantial and constant increase in most types of cases since 1943, although this is no doubt attributable to the fact that we have had perhaps a 50,000 population increase in the county due to war conditions, much of which is a more or less unstable element and which causes much of our increase in public offenses.

As to the means being used to prevent further increase in offenses, this county has the usual juvenile delinquency committees, safety council, etc., all of which are quite active, as well as a policy of vigorous law enforcement, in which respect, I believe, we have been, and are, as successful as anywhere.

Criminal Cases—San Joaquin County, Except Misdemeanors Inside City of Stockton, California

Misdemeanors

	1944	*1945*	*To July 1, 1946*	*Total*
Assault and battery	92	89	48	229

Shasta County

Dear Sir:

Pursuant to your recent request, we enclose herewith a report on arrests from Shasta County for 1944, 1945 and up to the date hereof in 1946. There is also indicated on the report the sentences imposed by the court in such cases.

FELONY ARRESTS, SHASTA COUNTY

1944 *Arrest and results*

Assault 9—San Quentin and probation
Burglary 4—San Quentin and probation.
Bad checks 20—County jail, probation and San Quentin.
Grand theft 14—Probation, Youth Authority and San Quentin.
Manslaughter 1—San Quentin.
Forgery 6—Four to San Quentin and two given probation.
Nonsupport 1—Two years' probation.
Lewd and lascivious 3—Institution, county jail and probation.
Hit and run 2—Probation.
Rape 3—San Quentin and probation.

1945

Assault 9—County sentences and probation.
Burglary 8—San Quentin.
Child neglect 2—Probation.
Drunk driving 3—County jail sentences.
Bad checks 26—San Quentin and county sentences.
Grand theft 11—San Quentin, county jail.
Murder 1—San Quentin.
Rape 4—State hospital and San Quentin.
Forgery 4—San Quentin and probation.
Lewd and lascivious 5—San Quentin; two years' probation.
Wilful burning 1—Committed to institution.
Crime against nature 1—San Quentin.

1946

Assault 2—San Quentin.
Burglary 2—Probation.
Bad checks 10—San Quentin and probation.
Grand theft 4—San Quentin
Murder 1—San Quentin.
Hit and run 1—Probation.
Lewd and lascivious 3—San Quentin.
Escape 1—San Quentin.
Rape 1—Three years' probation.

Los Angeles County

DEAR SIR: Your letter of the thirteenth instant to Mr. Howser has been referred to me for answer.

If you will let me know what specific information you desire an effort will be made to furnish the same. We keep a statistical record of the disposition of cases, a copy of which could be prepared for your use. For your general information, business in this office is increasing quite substantially. During the last fiscal year 4,230 felony convictions were obtained through prosecution from this office, which is the largest number in the history of the office. The record, beginning with the fiscal year 1938-1939 shows 3,965 convictions; 1939-1940, 3,798; 1940-1941, 3,627; 1941-1942, 3,573; 1942-1943, 3,253; and 1943-1944, 3,783.

DEAR SIR: In reply to your letter of the seventeenth instant asking for data for use of your Assembly Interim Committee on Crime Prevention and Correction, I am enclosing herewith copy of a report prepared by Mr. W. K. Smith, Chief Clerk of our Record Division, setting forth the various crimes and the numbers thereof prosecuted by this office during the years 1944, 1945, and the first three months of 1946. We have no records segregating men, women, boys, and girls, except that juveniles are handled by the juvenile court and unless certified to the criminal courts do not come within the jurisdiction of this office. If they are certified to the criminal courts these cases are handled in the same way as cases against adults.

This office is required by law to file a biennial report with the Attorney General, which shows disposition of felony cases in the superior court upon prosecutions by the District Attorney of Los Angeles County. A copy of this report may be obtained from the Attorney General. This report contains the results of prosecutions, showing generally that more than 80 percent of persons prosecuted for felonies by this office are convicted.

This office is of course primarily a prosecuting office and its function in the general field is to prevent crime by prosecution. Social agencies which are organized to prevent crime are not within the jurisdiction of the district attorney and no funds could be assigned to this office for this purpose, as, generally speaking, all funds must be used for the detection and prosecution of crime.

If we can be of any further use to you, please let us know.

Two acquittals by judge, one on contributing to delinquency of minor, the other a hit and run case.

Fifteen cases pending.

Sonoma County

DEAR SIR: I wish to acknowledge receipt of your letter of March 13th, 1946, in which you request me to furnish you with our latest report on the problems of crime prevention and correction in this county.

At the present time there appears to be a slight increase in the commission of crimes by adults and about 27 percent increase in the commission of crimes by juveniles.

Recently the Youth Authority of the State of California made a survey of the youth-serving agencies of this county and in its report made a great many recommendations to the legislative bodies of the county and cities of Sonoma County in connection with the furnishing of supervised recreational facilities and more personnel to work on the problem of juvenile delinquency.

Since January 1st, 1946, we have had 10 auto death cases in the county which shows an increase in traffic fatalities.

It is my earnest belief that all law enforcement agencies in this county are rather overburdened with work at the present time and doing all in their power to prevent the commission of crime and to correct any existing situation in this county.

I trust that this report is what you desire in connection with your inquiry.

Tulare County

DEAR SIR: I am making a belated acknowledgment to your letter of March 14th The reason for this is that I wanted to check around with the various justices of the peace in the county and see if they had any ideas that I should submit to you that has arisen out of their experiences in the last few months in their courts.

Of course, we have the existing juvenile problem on our hands. We have inadequate facilities to take care of this problem and our juvenile department is both undermanned and under-womaned, but I believe that the present grand jury and the board of supervisors working together, will be able to rectify this condition to considerable extent.

So far as the general crime situation is concerned, we do not have much more than the general violations of the law. A large proportion of our activities is taken up with the usual misdemeanor cases arising out of drunken driving and accidents that result mostly from drunken driving. We do not have more than the usual number of felony cases and a considerable number of these are crimes against property. The officers have the situation under control and I can not say that there is any crime wave in this county. I certainly hope the conditions will continue.

There is, of course, a certain class of returning veterans who are presuming on the fact that they are veterans and are inclined to go a little bit far on that fact, but this again is, as yet, not a serious condition, and for a most part they belong to a class that would get into trouble anyway.

If there is any more information I can give you at the present time, I should be very glad to do so.

San Francisco City and County

DEAR SIR: Replying to your letter of March 13, I wish to say that I am now compiling a report of this office for the two years, 1944-1945, and if we can find the necessary funds the report will be printed in the near future at which time I will be happy to send you a copy which will contain the information you request.

Santa Cruz County

DEAR SIR: I have before me your letter of March 13, 1946, requesting our latest report on crime prevention and correction in Santa Cruz County.

Ours is a small county and our staff is not large enough to compile reports. Under the circumstances, all we can say is that we have noted a marked increase in the incidence of crime in the last two or three years.

Calaveras County

DEAR SIR: I have your letter of March 12, 1946, and at this time it definitely occurs to me that something should done about the slot machine, lottery and gambling laws that will either stamp out these crimes altogether or will license and regulate the same in a manner that will return to the State and County governments in the way of taxes or license fees a substantial amount of the profits derived in some manner similar or comparable to the manner in which horse racing is now handled. This is a large problem but it is being universally expressed that there should be some form of law which would stamp this form of gambling out altogether or if it has to be recognized that it can not be stamped out that then it should be legalized and the State obtain the revenue or a large part of the revenue to be derived therefrom.

Most people who have expressed themselves to me seem to believe that it can not be effectively stamped out altogether and that some form of law should be passed in which it may be licensed and legal so as to divert the revenue involved or a large share of it into the State treasury for the use of the State and County Governments.

Santa Clara County

DEAR SIR: I have been asked to reply to your letter of March 13, 1946, stating that your committee would soon resume its work in studying crime prevention and correction and stating that it would materially assist you if we furnish you with our latest report on such problems in Santa Clara County.

I am enclosing a report of the District Attorney of Santa Clara County as to felonies and their disposition during the month of February, 1946.

EFFECT OF DIVORCE

STATE OF CALIFORNIA, DEPARTMENT OF CORRECTIONS

SACRAMENTO 14, November 9, 1945

Honorable Lorne D. Middough
322 American Avenue, Long Beach, California

DEAR MR. MIDDOUGH: At your request to make a study of the situation with respect to divorce in the families of inmates of our institutions, I asked Dr. Norman Fenton of the Guidance Center at San Quentin to make a brief study of 100 cases selected at random. He has submitted a report on this somewhat superficial study of the matter. It is a rather startling report. In order to draw any very general conclusions from it, however, a more thorough study should be made and the findings in this group should be compared with a group of men in the same age groups and from the same communities who would also be selected at random from among the general population. In order to do this, of course, would require a great deal of effort and some expense.

There is little doubt in any one's mind that family maladjustment during childhood contributes to delinquency and crime in later life. On the other hand it is a dangerous assumption to say that divorce, which is only one of the symptoms of family maladjustment, is in itself a direct cause of crime.

Hoping to see you again soon, I am

Very truly yours,

RICHARD A. McGEE, Director of Corrections

STATE OF CALIFORNIA

INTER-DEPARTMENTAL COMMUNICATION

COPY

October 29, 1945

To Mr. Richard A. McGee, Director of Corrections
State Office Building No. 1, Sacramento, California.

From: California State Prison at San Quentin

In accordance with your request for a study of home backgrounds of Guidance Center inmates, I made personally a spot survey of 100 cases. This represents a study of a random sampling of all men from numbers A330 to A474 who came into the Guidance Center. Data in seven cases within this consecutive numbering were incomplete; these consisted of the cases of one Mexican National, one Negro mental defective, one Negro migrant, one Japanese immigrant, one case of senility with defective memory, and two native whites. Seven additional cases were substituted for these to complete 100 cases for greater convenience in computation. Those added were the next cases in order following the original sampling.

Brief Resume of Findings

The number of cases in which the parents either separated (Not to reunite) or were divorced before the prisoner was 18, numbered 25 or 25 percent.

Homes broken by the death of one or more parents amounted to 30 or 30 percent.

Desertion by parents (who left the United States without their child) occurred in two cases (2 percent).

Three men were illegitimate (3 percent).

Seven men (7 percent) left home before they were 18. Of these one man left home at 11; two others at 15 years of age; and two at 16. One prisoner who left at seven, entered a reform school at 11; another bummed around the country in the summer during his adolescent years and was arrested three times for delinquency.

This leaves 33 percent of the men reported as having presumably spent their formative years in homes that remained at least outwardly intact. An analysis of these so-called *intact* homes revealed the following special conditions.

Migrant families from Oklahoma, Arkansas	6
Mexican Nationals, Filipinos	6
Enlistment in Navy (one at 16, one at 17)	2
Mexican parentage (one of these boys was in Preston at 16)	3
Father in prison part of the time	1
Went to work at 13	1
Father philanderer, illegitimate half-brother in home	1
Italian immigrant parentage plus *myasthenia gravis* after auto accident	1
Negro mental defective	1
Austrian immigrant (unverified data)	1
Subject reports own marital difficulty at age of 35 plus alcoholic dissipation as possible explanation for crime (checks). He had no previous record	1
Father 63 years of age when subject was born	1
Osteomyelitis in youth	1
Lived with his grandmother, although parental home was intact and entered the CCC at 16	1
Subject in Whittier at 16	1
Pathological liar (data about home unverified)	1
No special circumstances reported in by no means complete case histories	4
	33

Summary

The above data were taken from records prepared for practical rather than research purposes. The above analysis bears out more conclusively than one might have shown by a mere report on the percentage of divorces, the pathological circumstances in the environments of these men during childhood and youth. Very few indeed, if any of them, seem to have had their basic needs for wholesome personality development satisfied during their immature years. The most important requirement of children and youth for personal wholesomeness is the security of being loved and wanted and understood by their own parents.

NORMAN FENTON, Ph. D., Chief, Guidance Center

RESULT OF BROKEN HOMES

STATE OF CALIFORNIA, YOUTH AUTHORITY

November 30, 1945

Honorable Lorne Middough, Assemblyman
233 Roswell Avenue, Long Beach, California

DEAR SIR: In a recent letter you asked for some information on the number of Youth Authority cases where homes were broken by divorce; also the number of cases where liquor is the factor.

I had Paul McKusick run a study on 100 consecutive admissions at the Nelles School. His findings are attached.

Within about 60 days we can give you information on practically all Youth Authority cases if you want that extensive a study. At present our Statistical Division is transferring all records to Hollerith cards so that we can run studies of this type.

Sincerely yours,

KARL HOLTON, Director

Survey of Certain Factors in the Lives of 100 Consecutive Admissions to the Nelles School

(These boys were admitted starting 1-1-45)

Age groups on admission	*Home broken by death of one or both parents*	*Home broken by divorce*	*Home broken by other causes*	*Total broken homes all causes*	*Excessive use of alcohol by either parent*
Totals—100	19	20	21	60	13
15 years—33	5	9	7	21	7
14 years—32	8	6	6	20	3
13 years—22	6	1	4	11	3
12 years and under—13	--	4	4	8	--

This information was taken from the comments in the probation officers' reports, which accompany the boys who are brought here. It is recognized that the excessive use of liquor is a contributing factor toward broken homes, but the probation officers do not necessarily always list it in their written statements. It is significant to note, however, that there were 13 cases of the hundred where parents were definitely stated to have been alcoholics.

Many serious home maladjustments were evident in the backgrounds of these boys as evidenced by the following comments, which were taken verbatim from a few of the reports: Father uses narcotics parents have separated many times; parents quarrel over discipline; father in prison; home small, inadequate and very dirty; parents constantly fighting and brawling; friction in the home; father tubercular; child abandoned by mother at the time of birth; parents are frequently moving about; mother is feeble-minded; parents were never married; father is in service; mother sexually promiscuous.

Over and over again in these probation officers' reports, we find this statement: "Ineffectual and inadequate supervision in the home." The above is the sordid, sorry picture of the soil out of which so many American children have had to spring and grow. I think these comments are possibly even more significant than the above exact figures as shown on the chart. While 60 of the homes were actually broken by the permanent absence of one or both parents, probably many of the other 40 had a very negative influence and did not give the individual child the support, affection and guidance which he needed.

EFFECT OF HOUSING CONDITIONS

Following are excerpts from Fifth, Sixth and Seventh Consolidated reports, Los Angeles Housing Authority.

Comparison of Fire, Police and Health Service

Good housing areas		*Bad housing areas*
100 nurses	Tuberculosis	700 nurses
300	Police citations	1225
150	Fire alarms	270
2 home visits	Venereal diseases	13 home visits
15 home visits	Communicable disease	70 home visits
10	Juvenile delinquency citations	70

RECOMMENDATIONS OF THE CALIFORNIA FEDERATION OF WOMEN'S CLUBS

Reading of the Bible in Public Schools

WHEREAS, Juvenile delinquency is one of the major social problems of today, and an effective way of solving it is imperative; and

WHEREAS, Reverence and development of moral character must be inculcated through training started early in life, it becomes necessary to request that the Bible be read in the public schools in order to fulfill the needs of the total child; therefore, be it

Resolved, That the Executive Board of the California Federation of Women's Clubs urge that the California State Legislature enact a law which will require that the Bible shall be read daily without comment in the public schools of the State, and be it further

Resolved, That copies of this resolution be sent to the Governor, the Presiding Officer of the Senate and the Assembly, the Senators and Assemblymen and the State Superintendent of Public Instruction, and be it further

Resolved, That the Governor be requested to include this on the agenda for the special session of the Legislature.

MRS. BENJAMIN F. WARMER, President C. F. W. C.
MRS. ERNEST O. LEE, Corresponding Secretary

Resolution adopted December 6, 1945, at Riverside, California.

Resolution Re Elimination of Requirement of Food Being Sold in On-Liquor Establishments

WHEREAS, The present law requires the sale of food in all on-sale liquor establishments and that minors are permitted to enter same; and

WHEREAS, These places are not legitimate food establishments; therefore be it

Resolved, That the Executive Board of the California Federation of Women's Clubs in regular meeting in Riverside, December 6, 1945, heartily support any bill

introduced in our Legislature to eliminate the requirement of food being sold in on-sale liquor establishments; and further be it

Resolved, That copies of this resolution be sent the Senators and Assemblymen, the State Board of Equalization, the presidents of the League of Women Voters, and the Women's Christian Temperance Union.

MRS. BENJAMIN F. WARMER, President C. F. W. G
MRS. ERNEST O. LEE, Corresponding Secretary

Resolution Re Growing Tendency to Inject Use of Alcoholic Beverages Into Motion Pictures

WHEREAS, There is a growing tendency to inject the use of alcoholic beverages into motion pictures where it serves no purpose in developing the plot, and

WHEREAS, This encourages the use of such beverages particularly on the part of young people, therefore be it

Resolved, That the Executive Board of the California Federation of Women's Clubs regularly assembled in Riverside, December 6, 1945, urgently request the discontinuance of the practice, and that copies of this resolution be sent to Eric Johnson, President of the Motion Picture Producers and Distributors of America, Inc., and to Alice Evans Field, Director of Studio and Public Service of the Motion Picture Producers and Distributors of America, Inc.

MRS. BENJAMIN F. WARMER, President C. F. W. G.
MRS. ERNEST O. LEE, Corresponding Secretary

Resolution Re Section 62, Alcoholic Beverage Control Act

WHEREAS, Section 62 of the Alcoholic Beverage Control Act regarding the sale of liquor to obviously intoxicated persons in on-sale liquor establishments is being flagrantly violated; therefore be it

Provided, That the Executive Board of the California Federation of Women's Clubs regularly assembled in Riverside, December 6, 1945, urgently request that this section be diligently enforced, and that copies of this resolution be sent to all members of the State Board of Equalization, to the Judges and Constables Associations, the State Sheriff's Association and the League of Municipalities.

MRS. BENJAMIN F. WARMER, President C. F. W. G.
MRS. ERNEST O. LEE, Corresponding Secretary

Resolution Re Transferring of On-Sale Liquor Licenses

WHEREAS, More on-sale liquor establishments are existing in all sections of the State than are actually allowed by law according to population; and

WHEREAS, This condition is brought about through the transferring of on-sale liquor licenses at enormous sums; therefore be it

Resolved, That the Executive Board of the California Federation of Women's Clubs in meeting assembled in Riverside, December 6, 1945, protest the transferring of on-sale liquor licenses and urgently request that earnest consideration be given to amending Section 7.2 of the Alcoholic Beverage Control Act so that this practice would be definitely prohibited; and be it further

Resolved, That copies of this resolution be sent to all members of the State Board of Equalization, Governor Earl Warren, all members of the State Legislature prior to the opening of the Legislature, to the presidents of the California Congress of Parents and Teachers, the League of Women Voters and the Women's Christian Temperance Union.

MRS. BENJAMIN F. WARMER, President C. F. W. G.
MRS. ERNEST O. LEE, Corresponding Secretary

REPORT ON RESOLUTIONS

Policy Statement 4, Public Works

The failure on the part of State and National Governments to provide a Public Works Program is one of the major crimes in the Nation's recent history.

As early as February, 1944, the Baruch-Hancock report called for a shelf of Public Works to aid us in making the transition from war to peace. To date, almost nothing has been done. The fault lies directly at the door of the State and National Administrations and their business advisors who have constantly fought a Public Works Program. In recent days this fight has been open and unashamed. Business

proclaims that it does not want a Public Works Program to drain labor off the market. It prefers to take a gamble on a depression in order to keep a large pool of unemployed.

In order to take immediate action in the matter of Public Works, the Eighth convention of the California CIO Council makes the following proposals:

(1) That Congress reconstitute the National Resources Planning Board and proceed immediately to put into action already developed plans, such as the Missouri Valley Authority and plans for other similar Valley Authorities and regional developments throughout the Nation.

(2) That the State of California, immediately increase its aid to cities and counties and provide adequate monies for Public Works through a State Housing Administration and through the financial implementation of the present Community Redevelopment Bill.

Copies of this resolution are to be sent to California Representatives and Senators in the National Congress and to Assemblymen and Senators in the State Legislature.

The committee recommends concurrence.

Statement 43, Housing Crisis

California is suffering a critical housing shortage.

Practically every community is overcrowded. Thousands of families are "doubled up" living under over-crowded, and demoralizing conditions. Military demobilization is worsening this condition. A conservative estimate of the immediate needs is 300,000 additional dwelling units.

Real estate and home building interests are using the housing shortage to bleed the working people. These interests are attacking government agencies in a relentless drive to force a relaxation of rent control.

GOVERNMENT STALLS

The government has to date failed to develop a sound housing program. The Federal Public Housing Authority (FPHA) which was able to perform, to a large extent, the job of housing war workers is not granted the funds necessary to continue the job of housing people during this critical readjustment period.

Congress is still stalling. It is investigating instead of enacting legislation to alleviate this crisis

Within the State Governor Warren follows the same pattern. Conferences are called, political medicine is made, but the people remain unhoused.

The Eighth Annual Convention of the California CIO Council calls for an end to this stalling and demands swift, positive action to meet the housing situation which is causing a crisis for the American people, particularly veterans and their families.

EMERGENCY PROGRAM

The convention calls for the following emergency action:

That 90- odd thousand war dwellings, units constructed in California during the war period, must be completely utilized by being made available to all people with distressed families and veterans given priority.

Unused temporary housing from other sections of the country must be brought into critical areas.

Uncompleted temporary housing projects must be completed for occupancy.

Additional temporary housing units must be constructed in critical areas at once.

Stop evictions—OPA's six-month notice of eviction must be made mandatory in all of California.

Federal, state and local agencies must discontinue the practice of segregation and discrimination against minorities. Housing must be made available to all peoples regardless of race, creed, color or National origin.

Controls and rationing on building materials must be reestablished so that critical building materials will be channeled into low rent construction.

Building materials hoarded by the Army and Navy must be released for immediate use for this housing construction.

Price ceiling legislation on new home constructions must be enacted at once. Price ceilings on sale of existing homes must be set and thus curb wild real estate speculation.

OPA must be granted funds for enforcing rent controls.

We call on Governor Warren to include the provision of adequate housing facilities for California on the call for the special legislative session.

We call upon Congress and the government to investigate the threatened sit-down strike of the apartment house owners in Los Angeles, who are attempting to remove their property from the rental market in order to break price control.

The above is an emergency program to be viewed only as a stoppage to relieve the current crisis.

WAGNER-ELLENDER BILL

To more nearly meet the real housing need of the American people the California CIO calls upon Congress to enact the Wagner-Ellender Bill which provides for a comprehensive housing and community development program. The low-rent housing program must be expanded further than contemplated in this bill by the enactment of additional appropriation for subsidies and construction funds.

Government secured funds at a low rate of interest must be provided for the rehabilitation of existing housing.

The housing provision of the GI Bill of Rights must be amended to provide not only the initial assistance to veterans in establishing a home but also adequate loans to help veterans during temporary financial difficulties which might cause foreclosure. Speculation in veteran housing should be banned and deficiency judgments prohibited.

The CIO proposal advanced by H. J. Thomas, chairman of the National CIO Housing Committee, for a Federal Department of Housing and Community Development with its head a member of the President's cabinet is essential to the postwar economic and social health of our country. Congress must enact the necessary legislation called for in this proposal.

The National CIO proposal for a labor advisory committee to the National Housing Authority on a national and state level must be put into effect immediately.

When the current housing crisis has been met, temporary housing which can not be properly converted into safe, decent and adequate homes must be demolished to eliminate the creation of new slum areas.

Such war housing which can be properly converted should be made available for sale to tenant organizations, the mutual housing cooperatives, labor organizations, veterans and individual tenants. Public housing agencies should encourage the formation of such groups and should render to them all assistance in planning and financing at low interest rates to the purchase of such housing.

Community and recreational facilities on war housing projects should be disposed of only in the interest of the greatest public good.

SPECIAL SESSION ACTION

This convention calls upon Governor Warren and the Legislature at its special session to create a State Housing Authority with at least $100,000,000 appropriation for low rent housing construction.

The convention also calls upon them to create a State Home Owners Loan Corporation which shall be empowered to underwrite and refinance homes and make other proper provisions to prevent foreclosures or evictions.

This special session must also amend the Community Redevelopment Act to prohibit segregation and discrimination and also to provide financing to put the act into effect.

This statement covers material contained in resolutions from the following unions:

Mine, Mill and Smelter Workers, Local 700; Alameda County CIO Council; United Office and Professional Workers of America, Local 9; Los Angeles CIO Council; United Electrical, Radio and Machine Workers of America, Local 1421; San Francisco CIO Council; State, County and Municipal Workers of America, Local 578, and Steelworkers, Local 2018.

Policy Statement 38, Social Security Legislation

American workers are demanding security in a world that has been racked by wars and turmoil, in a society in which for a generation or more there has been profound and widespread economic insecurity.

People want security against external aggressions; and they want security in their domestic lives—security against the common risks that plague the individual and the family.

This demand for security must be recognized as a fundamental attribute of modern economy—especially in an essential society—because nearly all people live by work and the wages of work. A job and income from a job are first essentials. Protection against the major threats to economic security from causes other than unemployment, are second.

Our people can be relieved of fear and worry about the future only if they are certain of protection against the common social and economic risks with which they can not deal individually.

The principal common risks to security in our society are: lack of a job, inability to work because of sickness or accident, death of the breadwinner, retirement in old age, and the costs of medical services. Despite the accomplishments of the past—and especially in the last 10 years since the enactment of the Social Security Act—there are important deficiencies in the present security provisions against each of these risks.

PRESENT PROTECTION NOT ENOUGH

Some of the insurance in existing programs is inadequate for those whom it serves; and some does not extend effectively or at all to large portions of the population. Some of the insurance programs are little more than a promise of better things to come. Protection against such risks as sickness is wholly lacking. This is true for the Nation as a whole and is particularly true for individual states like California.

To remedy the deficiencies in our present social security system, the CIO is whole-heartedly and actively supporting the Wagner-Murray-Dingell Bill which, at the present time, is gathering dust in the Senate Finance Committee and the House Ways and Means Committee. This comprehensive social security measure is a must legislation.

UNIVERSAL SOCIAL SECURITY

In addition to the present provisions of the Wagner-Murray-Dingell Bill, the CIO calls for universal extension of social security benefits to every person in the United States. The American people will no longer tolerate the exclusion of millions of farmers, agricultural workers, small businessmen, professionals, seamen, government employees, and employees of religious and nonprofit organizations, from the provisions of comprehensive social security legislation

The Eighth Annual Convention of the California CIO Council calls upon Congress to enact the various social security measures now pending before it, and calls upon the State Administration to liberalize and amend the California social security legislation in line with the specific proposals acted on by the convention.

This resolution was submitted by the Executive Board of the California CIO Council.

The committee recommends concurrence.

COMMITTEE RECOMMENDATIONS

Expansion of prison industries.—Sale price should be controlled by Department of Corrections. Industries should be diversified to allow a broader opportunity for inmates to equip themselves for free labor when released. Purchase should be mandatory but confined to state, county, district and city use. Quality workmanship should be required. Inmates should be taught that their products must meet competition.

Prison industries are just as much a part of the rehabilitation program as are education, discipline and other phases of the program. They present a positive work schedule for workmen and as such should be directed by supervisory personnel backed by an active administration that will encourage and train men toward the proper goal of quality workmanship. This aim calls for the concerted efforts of all charged with the correction program.

It is readily agreed by most penal industry executives that any legislation, or policy creations, should be slanted towards a mere extensive use of production for state use, and for political subdivisions. Within this restricted market can be found a sufficient number of productible items in everyday use that can be ideally produced by penal labor without interfering with the free market, thus creating opportunities for an industrious use of otherwise idle inmates.

All penologists are agreed that no penal program for rehabilitation of inmates can be complete without a labor or training program, and the alert penal industry executives have so planned their programs that through a diversified plan of operation, the use of modern manufacturing methods, modern machinery, up-to-date factory methods, et cetera, prison labor can be most useful to the State, to the institutions and departments served, and to the inmates themselves

Day and night schools (24 hours). In 1929 the Legislature passed a bill allowing school districts to conduct 24 schools for predelinquents. None to date have been organized and are not likely to be unless the State makes an additional appropriation to the local school districts. To feed, sleep, teach and overcome habits that may lead to delinquency unless corrective measures are resorted to in the early stage of delinquency, costs more money than the A. D. A. allotment.

Some educators have estimated the additional cost, not taking into account the school facilities, would amount to $800 per pupil per year. Therefore, it seems only fair that the State should stand a big portion of this amount.

Under A.B. 1975 (1945) that died in the Assembly Finance Committee, the State would apportion an additional $500 per pupil year.

Let's stop spending so much money for correction and spend a little on prevention. Several school districts have signified their desire to try a 24-hour school.

Children in bars—Under Section 22 of Article 20 of the Constitution all "on-sale" liquor establishments are supposed to be restaurants. Some are really high grade cafes and others do not even make a pretense of being one. Upon investigation we have found that most bar or tavern owners do not want youths in their places of business but cannot help it. They do everything possible to keep minors out but youths enter under

the guise of wanting a coke or a sandwich and the first thing the owner knows some older person has slipped them a drink of liquor.

We feel this section of the Constitution should be amended eliminating the mandatory provision and make the serving of meals optional with the owner or licensee. If this action is taken the Legislature could then pass a bill barring minors from entering places where liquor is sold and consumed on the premise.

Many state-wide organizations have endorsed this movement.

Many clubs, such as Rotary, Kiwanis, Lions, Brotherhoods, and the Southern California Tavern Association are back of such a plan. Last December (1945) at Riverside, the California Federation of Women's Clubs passed a resolution endorsing the plan.

Recreation—On page 18 of the Final Report of the Committee on Juvenile Delinquency, Sections 13 and 14, we advocated state assistance to local subdivisions in promoting recreation functions and the establishing of a State Recreation Director. That bill did not pass even though it was recommended by Governor Warren. The stumbling block was: Some thought it should be in the Department of Education and others wanted it in the Department of Natural Resources.

We are not particular where such a plan is put. But certainly such a division should be established in either of the two mentioned departments.

Many small communities cannot afford a recreation director but under state leadership they could carry on some functions to keep youths off the streets or out of gangs after school and work hours.

In cities where strong, creative leadership along recreation lines, are maintained you find less delinquency among minors.

The committee therefore feels that school-sponsored and school-centered play programs would offer recreation on the most democratic basis and put the program within reach of every youth in California.

Juvenile bureaus in police departments—Since this committee was created a number of police departments have set up juvenile bureaus staffed by men and women who sympathize with and know how to lead youths.

Uniform curfew laws—In our report to the Legislature in January, 1945, we recommended a study be made by the Attorney General and the officials of the League of California Cities in an effort to draw up and adopt more uniform curfew laws. To a very small extent such an attempt has been made. For example we took the following from the Long Beach Press-Telegram of October 15th this year.

CURFEW WIDENED OVER JUVENILES

"Juveniles in the entire unincorporated area of Los Angeles County, including Lakewood, within the next few weeks will come within the terms of a new, uniform curfew ordinance which deals with loitering in public places from 10 p.m. until sunrise.

"The ordinance was ordered prepared by the board of supervisors this morning and its adoption is expected before Christmas holidays.

"Most cities of Los Angeles County are expected to follow suit in adopting the identical ordinance so that juveniles will be subject to the same regulations regardless of where they may be within the county."

This is an important factor in delinquency among minors and should be extended without delay.

Identification cards—During the 1945 Session of the Legislature a bill was introduced at our request that youth between the ages of 12 and 25 be compelled to carry identification cards. Cards to show name, address, age and picture. Also indicate name and address of parents or guardian. The bill failed to pass.

We urge again that such a law be enacted.

We have dozens of letters from youth leaders, police officials and citizens endorsing this movement.

This matter has been thoroughly discussed and we are of the opinion that now is the time to begin such a movement.

Probation officers' standards—Without even a thought of dictating to county officials as to their authority to employ probation officers or to influence them in any way, we again urge the adoption of uniform standards for such officers. A well trained and interested officer can very often prevent some young person from beginning a life of crime. These important officials in the administration of the juvenile laws should be "tops" in the program of prevention. They are just as important as teachers, for they do teach. Teach how young people should attempt to stay out of trouble.

On the basis of "dictation" to counties, such a bill should not be allowed to be sidetracked. It is important. Will do a splendid piece of work. It certainly should be enacted.

Relocation of Prison for Women—In 1933 a tract of 1,722 acres of land was bought for the women's prison. Very little of this acreage has been used. Besides the little that is used some 1,200 acres are rented netting an income of little more than $2,500 per year to the State.

The prison is located some 47 miles from Bakersfield and 135 miles from Los Angeles. There is no place for employees to live let alone employees' families. Therefore it is impossible for the administration to obtain and hold employees. The turnover is tremendous and presents a big problem.

Professional help is out of the question. Weeks go by and no doctor or nurse can be obtained. They ask "why should I drive such a distance to earn and collect a small fee when I have all I can do right in my home town?"

School and training facilities are entirely inadequate. They are only make-shifts, very often erected by the girl and women inmates themselves. If there is a forgotten institution, Tehachapi is it.

This institution should be relocated. The property should either be sold or converted into an institutional farm for older boys and younger men who have been convicted of some minor crime other than those against person or property.

Sectional pride should not prevail in this matter. In the last session of the Legislature 58 Assemblymen were authors of the bill only to see it defeated in the Senate by three votes.

We urge it most strongly.

Division of Jail Inspection—During recent months considerable has been said and written about city and county jails. A committee has made a thorough inspection and no doubt will have some recommendations to make. However, in as much as this committee has likewise made some inspections and investigations we, too, would like to recommend that a Division of Jail Inspection be set up in the Department of Corrections.

Smaller correctional schools—The committee feels that our correctional schools are considerably too large. There is a definite need for smaller institutions to permit supervisors to devote more individual attention to the students. Smaller institutions would also permit group segregation and variance of program to meet each class and type of boys and girls.

The committee also feels that the sights of the personnel, so essential to first class administration of this type of school should be raised. Standards of personnel and pay scale should have the study and attention of the Legislature. Raising of standards and providing better pay will eliminate personnel turnover which has been a distressing problem for many years. We will never be able to do even a reasonably good job until this problem has been taken care of.

Rush construction program—This committee recommends that in view of the overcrowded condition of San Quentin and Folsom prisons, that no delay in the construction of new facilities be permitted if it is within the power of the Legislature to prevent such delay. Money should be provided for material, labor and personnel.

Along with this recommendation we urge that continued support be given to the classification and rehabilitation facilities of the prisons.

One man to each prison cell—It is a vicious practice to house more than one prisoner in a cell. Therefore we recommend that provisions be made in all new prisons and rebuilt ones that complete segregation of the various classifications of prisoners be made in order to prevent the general dissemination of the criminal knowledge and degenerate behavior within the prisons.

Make escape or attempted escape a felony—Since the California Vocational Institution may receive commitments from both the Youth Authority and the Adult Authority and since the Youth Authority commits those older cases who are unfit for the Preston School of Industry to this institution, the committee recommends that a law be passed making escape and attempted escape from this institution a felony.

Crime closer to crib—With more than 21 percent of all arrests under age 21 we, at least, can begin to see the necessity for more prevention and the need for creative leadership in youth activities.

According to J. Edgar Hoover, 15 percent of all America's murders are committed by youths under age 21. Thirty-six percent of all robberies, 51 percent of all burglaries, 30 percent of all rapes are committed by boys and girls under age 21.

Among our high school youths are many, very many, fine young people, in fact nearly 98 percent of them are upright in every respect. It would seem that these worthy youths should have more opportunities

to discuss these matters at school and consider how they might use their influence to help check juvenile delinquency and crime among their contemporaries and teenagers of the future.

It must be apparent to those youths themselves that practically all delinquency of any sort indicates an absence of wholesome self-control and inhibition in the offender. Seeing this, they, naturally, might come to the conclusion that learning self-control and useful inhibitions presupposes adequate restraint of the child in his earlier years.

Recently, Attorney General Tom Clark said: "Today there are an estimated 6,000,000 law violators in the Nation, who have transgressed all types of law, both major and minor."

Arrayed against them are some 150,000 law enforcement officers and lay-leaders.

Clark goes on to say "many states and communities are ill-prepared to cope with wide-spread crime." He added "we need throughout the country reforms in criminal laws which will make it impossible for unscrupulous lawyers to effect delay by quibbling."

ACKNOWLEDGMENT

We acknowledge the able assistance and advice of the following citizens:

Richard A. McGee, Director, Department of Corrections.

John H. Klinger, Deputy Director, Department of Corrections.

Karl Holton, Director, California Youth Authority.

Heman Stark, Chief, Division of Field Services.

Harold A. Slane, former member, California Youth Authority.

Judge McKesson, member, California Youth Authority.

Sterling S. Winans, Chairman Adult Advisory Committee, Southern California Youth Centers.

George Clark, Subchairman Youth Affairs Committee, Los Angeles Junior Chamber of Commerce.

Phillip Freidman.

F. H. Butterfield, President, California Probation Association.

Mrs. Harvey Dye, Chairman Radio Section, California Congress P. T. A.

Dr. Weston A. Price, Redlands University.

Dr. Roswell H. Johnson, Director Department of Personal Service, American Institute of Family Relations.

Mr. Frank Kane, Mrs. Chattie Jacobson, American Legion Auxiliary.

John B. Long, Manager, California Newspaper Publishers' Association.

Paul J. McKussick, Superintendent, Fred C. Nelles School.

Mrs. Myrtle McClean, Founder, Global Thinkers.

Wixon Stevens, Los Angeles Bar Association.

David Andrews, Captain, Los Angeles Police Department.

Charles Johnson and Stuart Walsh, Attorney General's Office.

Howard W. Coy.

Otto Faulkner, Captain, Long Beach Police Department.

Mrs. Helen Chandler Ryan, representing Board of Education, Long Beach, and Rosenberg Foundation.

Joseph M. Kennick, Superintendent Juvenile Bureau, Long Beach.

J. Holly Ashcraft, Director School and Municipal Playgrounds, Long Beach.

Harmon F. Gum, Chairman American Legion Department of California, Child Welfare Committee.

W. H. Smith, Pinkerton Detective Agency.

Mrs. Burton W. Chace, representing Long Beach P. T. A.

Verne Morrell, President, Long Beach Church Brotherhood.

Mrs. Jessie Farrell, W. C. T. U., Long Beach.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 6, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 5

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following resolution was read:

Senate Concurrent Resolution No. 5—Relative to adjournment in respect to memory of Steve Sodel.

Request for Unanimous Consent

Mr. Geddes asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No. 5, at this time, without reference to committee or file.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 5

Senate Concurrent Resolution No. 5—Relative to adjournment in respect to memory of Steve Sodel.

Resolution read, and adopted unanimously.

Resolution ordered transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Concurrent Resolution No. 8: By Messrs. Thompson and Kirkwood—Relative to approving an amendment to the charter of the City of San Jose, a municipal corporation of the County of Santa Clara, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on November 5, 1946.

Request for Unanimous Consent

Mr. Thompson asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 8, at this time, without reference to committee, print or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 8

Assembly Concurrent Resolution No. 8—Relative to approving an amendment to the charter of the City of San Jose, a municipal corporation of the County of Santa Clara, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on November 5, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher,

Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—74

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

RESOLUTIONS

The following resolutions were offered:

By Messrs. Hinton, Beck, Sam L. Collins, Ralph C. Dills, and Rosenthal:

House Resolution No. 16

Relating to adjournment in respect to the memory of Elmer E. Lore

WHEREAS, Sorrow fills our hearts today as we record the passing of Elmer E. Lore who in December of 1946 gave himself unto his Maker; and

WHEREAS, His passing recalls to us some of the details of his active and useful life which began August 23, 1892, in the State of Nebraska. In 1918, as a young man, he moved to Los Angeles. In 1923 he chose North Hollywood as his permanent residence. For many years he served as a newspaperman in the Los Angeles area. From 1935 through 1940 he served with distinction as a member of our State Assembly, always warmly espousing the interests of labor; and

WHEREAS, We wish to give token of our appreciation and esteem of Elmer E. Lore as a devoted public official, loyal citizen, and kindly friend; now, therefore, be it

Resolved by the Assembly of the State of California, That when the Assembly adjourns this day it do so in respect to the memory of Elmer E. Lore; and be it further

Resolved, That the Chief Clerk of the Assembly is directed to convey to the bereaved family of Elmer E. Lore this expression of our tribute.

Request for Unanimous Consent

Mr. Hinton asked for, and was granted, unanimous consent to take up House Resolution No. 16, at this time, without reference to committee or file.

Resolution read, and adopted unanimously by a rising vote.

Speaker Presiding

At 11.50 a.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

By Messrs. Burke and Sam L. Collins:

House Resolution No. 17

Relative to Glenn D. Willaman

WHEREAS, In December of 1946, while this Legislature was in adjournment, Glenn D. Willaman, former editor and widely known Executive Secretary of the California Real Estate Association, passed suddenly from this life; and

WHEREAS, This loyal Californian, whose many years of service as Secretary of the California Real Estate Association brought him in contact with numerous Members of this Legislature, whose respect, admiration and friendship he had, and so richly deserved, contributed greatly to the advancement of the State and leaves therein the imprint of his high ideals and noble aspirations.

Glenn Willaman was also a successful newspaperman. He was managing editor of the Bakersfield Echo and subsequently became managing editor of the Fresno Republican. It was while associated with the latter, in 1921, that he became Executive Secretary of the Real Estate Board, a position he held until the time of his death.

He was a zealous, cheerful, untiring worker and was highly regarded in the association with which he was affiliated for so many years. He died as he had lived—doing the work he loved so well. Death came, as it must to all men, as he was addressing the local Realty Board at Twentynine Palms on December 3, 1946.

Glenn Willaman proclaimed far and wide the future role of our great State—that it would become the "Empire State" of the Nation. He will be remembered for the part he played in the achieving of that goal; therefore, be it

Resolved by the Assembly of the State of California, That when we adjourn today, we shall do so in respect to the memory of Glenn D Willaman; and be it further

Resolved, That the Chief Clerk is directed to send the bereaved widow an engrossed copy of this resolution.

Resolution read.

Request for Unanimous Consent

Mr. Burke asked for, and was granted, unanimous consent to take up House Resolution No. 17, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

FURTHER CONSIDERATION OF HOUSE RESOLUTION NO. 4

House Resolution No. 4—Relative to the Temporary Rules of the Assembly.

Further Consideration of Substitute Resolution by Mr. Wollenberg

Substitute Resolution

Resolved by the Assembly of the State of California, That the Standing Rules of the Fifty-sixth (Regular) Session in effect on June 16, 1945, be, and the same are, hereby adopted as the Temporary Rules of the Assembly for the Fifty-seventh (General) Session, except as follows:

(1) Rule 19 shall read:

Duties of the Speaker

19. The Speaker shall possess the powers and perform the duties herein prescribed:

(a) To preserve order and decorum; he may speak to points of order in preference to the other members, rising from his chair for that purpose.

(b) To decide all questions of order subject to appeal to the Assembly by any member. On every appeal, he shall have the right to assign his reason for his decision.

(c) To have general direction over the Assembly Chamber and rooms set aside for the use of the Assembly, including the rooms for use by members as private offices.

(d) To name any member to perform the duties of the Speaker, but such substitutions shall not extend beyond adjournment.

(e) To appoint the membership of all special committees, and the respective chairmen thereof.

(f) To propose a schedule of meetings of standing committees.

(g) To have general control and direction over the Journals, papers, and bills of the Assembly.

(h) To act as Chairman of the Committee of the Whole.

(i) To order the lobby and gallery cleared whenever he shall deem it necessary.

(j) To assign desks to properly accredited newspaper representatives

(k) To authenticate by his signature, when necessary, or when required by law, all bills, memorials, resolutions, orders, proceedings, writs, warrants, and subpenas issued by order of the Assembly.

(l) The Speaker shall be ex officio member of all Assembly, joint, and interim committees with all of the rights and privileges of such membership, except the right to vote. In counting a quorum of any such committees, the Speaker shall not be counted as a member.

(2) Rule 72 shall read:

Standing Committees

72. For their convenient functioning and in furtherance of the thorough consideration of all bills on a given subject, the several standing committees of the Assembly are respectively grouped into the following categories:

1. Rules
2. Legislative Procedure
3. Conservation and Planning.
4. Fish and Game.
5. Governmental Efficiency and Economy.
6. Revenue and Taxation.
7. Ways and Means.
8. Education.
9. Crime and Correction.
10. Public Morals.
11. Public Health.
12. Social Welfare.
13. Civil Service and State Personnel.
14. Military Affairs.
15. Municipal and County Government.
16. Elections and Reapportionment.

17. Judiciary.
18 Constitutional Amendments.
19. Agriculture
20. Livestock and Dairies.
21. Public Utilities and Corporations.
22 Manufacturing, Oil, and Mining Industry.
23. Industrial Relations.
24. Finance and Insurance.
25. Transportation and Commerce.

Prior to the assignment of members to serve on the several standing committees, the Committee on Rules shall consider the preferences of the members with regard to committee assignments, while keeping in view the practical necessity of making assignments so that members will not serve on more than one committee which meets at the same time, and the Committee on Rules thereafter shall determine the number and members to serve on each standing committee. Upon publication in the Journal of the number of members on each standing committee, no further change in the number of members of the committee shall be made otherwise than by a majority vote of the elected membership of the Assembly.

No Member of the Assembly shall be a member of more than three standing committees except that by appointment of the Committee on Rules a member may serve on more committees.

(3) Rule 80 shall read:

Committee on Rules

80 There is a Committee on Rules consisting of nine members, to be elected by the Assembly, which shall, for the purpose of Joint Rule 2, be deemed the Rules Committee of the Assembly.

The Committee on Rules shall appoint all other standing committees of the Assembly unless otherwise directed by the Assembly and shall designate a chairman of each committee so appointed and a vice chairman of each such committee. The Committee on Rules shall select its own chairman and vice chairman.

Substitute resolution read.

Motion to Amend

Mr. George D. Collins moved the adoption of the following amendment:

Amendment No. 1

Strike out the first paragraph of Rule 80, as printed on page 43 of the Assembly Daily Journal of January 6, 1947, and insert:

"Each political party shall be represented on the Committee on Rules in proportion to the number of members elected to the Assembly who are registered as affiliated therewith, as nearly as circumstances permit. In case such proportion for any committee cannot be exactly attained on a mathematical basis, any fractional representation for the majority party shall count as one.

Each party shall caucus as soon as convenient after the adoption of these rules and shall designate its candidates for representation on the Rules Committee."

Amendment read.

Point of Order

Mr. Doyle arose to the following point of order: That Mr. Weber is not speaking to the question.

Ruling by Speaker

The Speaker ruled that, because the Permanent House Rules have not yet been adopted, Mr. Doyle's point of order is not well taken.

Question of Personal Privilege

Mr. Thomas arose to a question of personal privilege, stating: That he wished to correct an impression as expressed by Mr. Beck, and that the vote he mentioned in his arguments referred to the Permanent Rules and did not refer to the Committee on Rules.

The question being on the adoption of the amendment offered by Mr. George D. Collins to Rule 80.

Roll Call Demanded

Messrs. Beck, Heisinger, and Rosenthal demanded a roll call.

The roll was called, and the amendment offered by Mr. George D. Collins to Rule 80 refused adoption by the following vote:

AYES—Beck, Berry, Boyd, George D. Collins, Lester T. Davis, M. Philip Davis, Dunn, Gaffney, Grunsky, Heisinger, Kirkwood, Miller, O'Day, Robertson, Sherwin, Stephenson, and Wollenberg—17.

NOES—Allen, Blosser, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cramer, Crichton, Crowley, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Geddes, Grant, Hahn, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Silliman, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Mr. Speaker—52.

The question being on the adoption of the substitute resolution.

Substitute resolution to House Resolution No. 4 read.

Roll Call Demanded

Messrs. Wollenberg, Evans, and Beck demanded a roll call.

The roll was called, and the substitute resolution offered by Mr. Wollenberg refused adoption by the following vote:

AYES—Beck, Berry, Boyd, George D. Collins, Cooke, M. Philip Davis, Gaffney, Grunsky, Johnson, Kirkwood, Miller, O'Day, Sherwin, Stephenson, and Wollenberg—15.

NOES—Allen, Blosser, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cramer, Crichton, Crowley, Lester T. Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Geddes, Grant, Hahn, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Kilpatrick, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Silliman, Stanley, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Mr. Speaker—59.

The question being on the adoption of House Resolution No. 4.

House Resolution No. 4

Resolved by the Assembly of the State of California, That the Standing Rules of the Fifty-sixth (Regular) Session, as adopted January 11, 1945 (pages 147-168 of the Assembly Journal), and as amended on March 27th (page 1306 of the Assembly Journal), and April 16th (page 1892 of the Assembly Journal), be and the same are hereby adopted as the Temporary Rules of the Fifty-seventh (General) Session.

Resolution read, and adopted.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 2

Senate Concurrent Resolution No. 2—Relative to the Joint Rules of the Legislature.

Resolution read.

Request for Unanimous Consent to Set Special Order

Messrs. Wollenberg and Allen asked for unanimous consent that Senate Concurrent Resolution No. 2 be made a special order of business for Wednesday, January 8, 1947, at 11.10 a.m.

Mr. Lowrey withheld unanimous consent.

Rush Order Placed Upon Printing of Senate Concurrent Resolution No. 2 by Unanimous Consent

By unanimous consent, a rush order was placed upon the printing of Senate Concurrent Resolution No. 2; and the Sergeant-at-Arms instructed by the Speaker to have a copy on the desk of each Member of the Assembly on the next legislative day.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Crichton, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Lieutenant and Mrs. L. K. Bowen, Mr. and Mrs. Henry Hyde, and C. E. Peter of Fresno.

On request of Mr. Anderson, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Lionel De Silva, Director of Research of Inglewood City Schools; and Mr. and Mrs. Lynn of Inglewood.

On request of Mr. McMillan, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Miss Grace S. Stoermer and Mrs. Ida R. Koverman of Los Angeles.

On request of Mr. Burke, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Talmage Burke of Los Angeles.

On request of Mr. Anderson, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Forrest Murdock of Inglewood.

On request of Mr. Thomas, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Jean Haley, Roy Beaton, and Miss Lucille Jones of San Pedro.

On request of Messrs. Hinton, Field, and Sam L. Collins, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Lloyd P. Fuller of Encino.

On request of Mr. Gaffney and the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Charles M Wollenberg and Mrs. Albert C. Wollenberg of San Francisco.

On request of Mr. Hahn, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Hattie U. Hahn and Mrs. Gertrude Downs of Los Angeles.

On request of Mr. Stanley, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Lilea Eastman of Orange.

On request of Mr. Kirkwood, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Robert Kirkwood, Mrs. Robert C. Kirkwood, Anne and Robert Kirkwood of Saratoga.

On request of Mr. Cramer, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Chas. W. Stream of San Diego.

On request of Mr. Fletcher, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Lloyd Leedom, Mr. and Mrs. Russell Pavey, and Mr. and Mrs. Robert New of Long Beach.

On request of Mr. Dickey, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Randal F. Dickey, Randal F. Dickey, Jr., and Frederick M. Van Sicklen of Alameda.

On request of Mr. McCollister, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Clinton Duffy, Warden of San Quentin.

On request of the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to James Quigley and Dan Gallagher of San Francisco.

On request of Messrs. Thurman, Grunsky, and Beck, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Jacob Leonard of Hollister.

On request of Mr. Waters, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Frank J. Waters, Frank J. Waters, and Frank J. Waters III of Los Angeles.

On request of Mr. Debs, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Frank R. Greyon of Los Angeles.

ADJOURNMENT

At 1.23 p.m., on motion of Mr. McCollister, the Speaker declared the Assembly adjourned out of respect to the memory of the late Charles Joseph Lilley, Judge Andrew L. Pierovich, Steve Sodell, Elmer E. Lyon, Elmer E. Lore, and Glenn D. Willaman, until 11 a.m., Wednesday, January 8, 1947.

SAM L. COLLINS, Speaker

ASSEMBLY DAILY JOURNAL

THIRD LEGISLATIVE DAY
THIRD CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Wednesday, January 8, 1947

The Assembly met at 11 a.m.

Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—75.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

O Almighty and Eternal God.

Do Thou direct our actions according to Thy good pleasure, that we may deserve to abound in good works through the assistance of Our Lord Jesus Christ, who liveth and reigneth with Thee in unity of the Holy Ghost, world without end—AMEN.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Grant, further reading of the Journal of the previous legislative day was dispensed with.

LEAVES OF ABSENCE FOR THE DAY

The following member was granted leave of absence for the day, because of illness:

Mr. Ralph C. Dills, on motion of Mr. Anderson.

The following member was granted leave of absence for the day:

Mr. Huyck, on motion of Mr. Waters.

The following member was excused for the balance of the legislative day:

Mr. Gannon, on motion of Mr. Stephenson.

COMMUNICATIONS

By Speaker Collins:

A communication from Richard Weil of San Francisco, relative to impeachment, was received, and ordered referred to the Committee on Judiciary.

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

CAPITOL CORRESPONDENTS ASSOCIATION OF CALIFORNIA
STATE CAPITOL, SACRAMENTO, January 8, 1947

Honorable Arthur A. Ohnimus
Chief Clerk, Assembly, Sacramento, California

DEAR MR OHNIMUS: The Standing Committee of the Capitol Correspondents Association has investigated applications for authentication as accredited press representatives and recommend the following action:

Approved for press cards

Western News Service—Chris R Holmes, Roger Holmes Wood, Sergei Vronsky.

These are additions to the staff of the Western News Service previously approved.

Sincerely,

EARL C BEHRENS, President

By unanimous consent, the Members of the Assembly ratified the above approval for press cards, as given by the Capitol Correspondents Association of California

Hon. C. Don Field Presiding

At 11.09 a.m. Mr. C. Don Field, Member of the Assembly, from the Forty-third District, presiding.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

Pursuant to the provisions of Rule 13, the following bills were introduced:

Assembly Bill No. 1: By Messrs Stewart, Allen, Erwin, Geddes, Anderson, Bennett, Burke, Butters, Collier, Conrad, Cooke, Cramer, M. Philip Davis, Debs, Clayton A. Dills, Ralph C. Dills, Doyle, Evans, Fletcher, Grant, Hahn, Hawkins, Hinckley, Hinton, Hollibaugh, Huyck, Kilpatrick, Knight, Lyons, McMillan, Price, Robertson, Rosenthal, Stanley, Thomas, and Waters—An act amending Section 452 of, and adding Section 458 to, the Health and Safety Code, and adding Chapter 2 to Division 20 of the Health and Safety Code, relating to the control and suppression of air pollution.

Referred to Committee on Public Health.

Assembly Bill No. 2: By Messrs Anderson and Hawkins—An act to amend Sections 1500, 1501, and 1503 of the Welfare and Institutions Code, relating to needy children.

Referred to Committee on Social Welfare.

Assembly Concurrent Resolution No. 9: By Mr. Beck—Relative to a Fact-finding Committee on Legislative Organization and Procedure and Matters Relating Thereto.

Referred to Committee on Rules.

Assembly Bill No. 3: By Messrs. Berry, Burns, Lester T. Davis, and Doyle—An act to add Section 6903 5 to the Labor Code, relating to train crews on gas, gas-electric diesel, or diesel-electric cars and locomotives operated by railroad common carriers.

Referred to Committee on Industrial Relations.

Assembly Bill No. 4: By Mr. Crichton—An act to amend Section 737j of the Political Code, relating to the salaries of judges of the superior court.

Referred to Committee on Judiciary.

Assembly Concurrent Resolution No. 10: By Messrs. Debs, Crichton, Dunn, Brady, McMillan, and Waters—Relative to continuance of the Joint Interim Committee on Aviation created by Resolutions Chapter 62 of the 1946 (1st) Special Session.

Referred to Committee on Rules.

Assembly Bill No. 5: By Mr. Dickey—An act to provide for leasing adequate facilities and service for the establishing and operation of a telephone-typewriter system of communication between the State Department of Justice and the Alameda Police Department and to make an appropriation therefor.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 6: By Messrs. Doyle and Collier—An act to add Section 5662 to the Elections Code, relating to the rights of the occupant of a house which is situated on a precinct line.

Referred to Committee on Elections and Reapportionment.

Assembly Bill No. 7: By Messrs. Wollenberg, Maloney, Erwin, Sam L. Collins, and Field—An act to amend Section 12000 of the Government Code, relating to the salary of the Governor.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Joint Resolution No. 1: By Mr. Heisinger—Relative to memorializing the President and the Congress of the United States to remove from China all American troops now serving in China.

Referred to Committee on Rules.

Assembly Bill No. 8: By Messrs. Kilpatrick and Bennett—An act making an appropriation to the Department of Justice for investigation and prosecution of violations of law in respect to the placement of children for adoption and of the adoption laws.

Referred to Committee on Social Welfare.

Assembly Bill No. 9: By Mr. Luckel, Mrs. Niehouse, and Mr. Cramer—An act to add Section 672.5 and 683 to the Welfare and Institutions Code, relating to permitting or aiding the escape of an inmate of a juvenile hall or joint detention home.

Referred to Committee on Crime and Correction.

Assembly Bill No. 10: By Mr. Maloney—An act to amend Section 5437 of the Public Resources Code, relating to qualifications of voters of county recreation districts.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 11: By Mr. Rosenthal—An act to amend Section 19594 of the Business and Professions Code, relating to wagering on horse races by minors.

Referred to Committee on Public Morals.

Assembly Bill No. 12: By Mr. Stephenson—An act to amend Section 80 of, and to add Section 92.9 to, the Agricultural Code, relating to fairs, creating a new agricultural district and regulating the allocation of state funds appropriated for fair purposes.

Referred to Committee on Agriculture.

Assembly Bill No. 13: By Mr. Thomas—An act relating to the creation of a State Harbor Advisory Board, prescribing its powers and duties, and making an appropriation therefor.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 14: By Mr. Thomas—An act to amend Section 1 of an act entitled "An act to provide for changing the boundaries of cities and municipal corporations, and to exclude territory therefrom," approved March 20, 1889, relating to exclusion of territory from cities.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 15: By Mr. Rosenthal—An act to amend Sec-204e of, and to add Section 204g to, the Code of Civil Procedure, relating to jury commissioners and secretaries of the superior court.

Referred to Committee on Judiciary.

Assembly Bill No. 16: By Mr. Maloney—An act to amend Sections 11777, 11786 and 11793 of the Insurance Code, pertaining to the administration and organization of the State Compensation Insurance Fund.

Referred to Committee on Finance and Insurance.

Assembly Joint Resolution No. 2: By Mr. Luckel and Mrs. Niehouse—Relative to on-the-job training for veterans.

Referred to Committee on Military Affairs.

Assembly Bill No. 17: By Messrs. Kilpatrick and Cooke—An act to add Section 502.5 to the Vehicle Code, relating to driving while intoxicated.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 18: By Mr. Heisinger—An act to amend Section 1346 of the Fish and Game Code, relating to antelope.

Referred to Committee on Fish and Game.

Assembly Bill No. 19: By Mr. Dickey—An act to amend Sections 827 and 1946 of the Civil Code, relating to landlord and tenant and hiring of real property, respectively.

Referred to Committee on Judiciary.

Assembly Bill No. 20: By Mr. Debs—An act to add Section 247.5 to the Vehicle Code, relating to the wrecking or dismantling of vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 21: By Mr. M. Philip Davis—An act to amend Section 1054 of the Code of Civil Procedure, relating to extensions of time.

Referred to Committee on Judiciary.

Assembly Bill No. 22: By Mr. Brown—An act to add Section 223.5 to the Civil Code, relating to adoption of minors.

Referred to Committee on Judiciary.

Assembly Bill No. 23: By Messrs. Berry, Burns, Gaffney, Lester T. Davis, and Doyle—An act to amend Section 6904 of the Labor Code, relating to operation of railroad engines.

Referred to Committee on Industrial Relations.

Assembly Constitutional Amendment No. 1: By Mr. Beck—A resolution to propose to the people of the State of California an amendment to the Constitution of the State by amending Section 23 of Article IV, relating to the compensation of Members of the Legislature.

Referred to Committee on Constitutional Amendments.

Assembly Bill No. 24: By Mr. Bennett—An act adding Sections 11543 and 11544 to the Business and Professions Code, relating to sewers in real estate subdivisions.

Referred to Committee on Municipal and County Government.

Assembly Constitutional Amendment No. 2: By Messrs. Anderson and Hawkins—A resolution to propose to the people of the State of California an amendment to the Constitution of the State by adding Section 22aa to Article IV thereof, relating to aid to needy children.

Referred to Committee on Constitutional Amendments.

Assembly Bill No. 25: By Messrs. Allen, Doyle, and James—An act to add Chapter 5, comprising Sections 20000 to 20140, inclusive, to Division 8 of the Business and Professions Code, relating to the regulation and licensing of locksmiths.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 26: By Mr. McCollister—An act to provide for state operation and maintenance of the Golden Gate Bridge, defining the powers and duties of the California Toll Bridge Authority and the Department of Public Works in respect thereto, providing for the

redemption of bonds and the payment of interest, and making an appropriation.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 27: By Mr. McCollister—An act to provide for the maintenance of the Golden Gate Bridge by the Department of Public Works, through the collection of tolls thereon; defining the powers and duties of the California Toll Bridge Authority in respect to the Golden Gate Bridge and Highway District, providing for the redemption of bonds and the payment of interest, and making an appropriation.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 28: By Mr. McCollister—An act to define the powers and duties of the California Toll Bridge Authority in respect to the Golden Gate Bridge and Highway District, providing for the redemption of bonds and the payment of interest, and making an appropriation.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 29: By Mr. Thomas—An act to add Sections 10.2, 10.3, 10.4, and 10.5 to the Fish and Game Code, relating to commercial fishing, establishing a Commercial Fisheries Commission, and providing for the administration and enforcement of the laws relating to the taking and use of fish, mollusks and crustaceans for commercial purposes.

Referred to Committee on Fish and Game.

Assembly Bill No. 30: By Mr. Thomas—An act to repeal Section 842.5 of, and to add a new Section 842.5 to, the Fish and Game Code, relating to the use of nets and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Fish and Game.

Assembly Bill No. 31: By Mr. Anderson—An act to amend Section 53 of the Unemployment Insurance Act relating to maximum benefit awards.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 32: By Mr. Beck—An act to add Section 530 to the Streets and Highways Code, relating to state highway routes.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 33: By Mr. Beck—An act to add Section 10115 to the Insurance Code, relating to life insurance policies.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 34: By Mr. Heisinger—An act to add Sections 169 and 283 to the Fish and Game Code, relating to game refuges.

Referred to Committee on Fish and Game.

Assembly Bill No. 35: By Messrs. Allen and M. Philip Davis—An act to amend the title of Article 1 of Chapter 4, Part 1, Division 3, Title 2 of the Government Code, and to amend Sections 11380, 11381, 11382, 11383, 11384, 11385, and 11401 of said code and to add Section

11382.5 and Article 1, comprising Sections 11370 and 11371, Article 4, consisting of Sections 11420 to 11427, inclusive, and Article 5, consisting of Section 11440, to Chapter 4, Part 1, Division 3, Title 2 of said code, relating to rules and regulations of state agencies.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 36: By Messrs. Allen and M. Philip Davis—An act to add Chapter 8 comprising Sections 9800 to 9807, inclusive, to Part 1, Division 2, Title 2 of the Government Code, relating to the quasi-legislative functions of state administrative agencies, creating the Legislative Committee on Administrative Regulations and defining its powers and duties, prescribing duties of the Codification Board and the Legislative Counsel incident thereto, and making an appropriation for the support of the committee.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 37: By Mr. Rosenthal—An act to amend Section 647a of the Penal Code, relating to vagrancy.

Referred to Committee on Judiciary.

Assembly Bill No. 38: By Mr. Rosenthal—An act to amend Section 10 of the Political Code and Section 8151 of the Education Code, relating to holidays.

Referred to Committee on Education.

Assembly Bill No. 39: By Mr. Rosenthal—An act to amend Sections 765 and 863 of "An act to provide for the organization, incorporation, and government of municipal corporations," approved March 13, 1883, relating to the publication of city ordinances.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 40: By Messrs. Rosenthal and Brady—An act to amend Section 10 of the Political Code, to amend Section 18025 of, add Sections 1226 and 1227 to, and repeal Sections 11021, 18020, 18021, 18022, 18023, and 18024 of, the Government Code, relating to holidays and hours of employment in public service.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Concurrent Resolution No. 11: By Messrs. Dunn, Geddes, M. Philip Davis, and Debs—Relative to the continuance of the Joint Committee on Preschool and Primary Training created by Resolutions Chapter No. 60 of the 1946 (1st) Special session.

Referred to Committee on Education.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT

Mr. McCollister asked for, and was granted, unanimous consent that the following Final Report of the Assembly Interim Committee on Military Affairs be ordered printed in the Journal:

FINAL REPORT OF INTERIM COMMITTEE ON MILITARY AFFAIRS ASSEMBLY, CALIFORNIA STATE LEGISLATURE

SACRAMENTO, January 8, 1947

MR. SPEAKER: Pursuant to the requirements of House Resolution No. 151, and other resolutions of the Fifty-sixth Session of the Legislature, your Interim Committee

on Military Affairs submits herewith its final summary of operations and recommendations:

General

It must be said at the outset that matters affecting the veterans within the State of California have been so numerous and so popular as to cause your committee, and its investigator and staff, to be in almost continuous service throughout all parts of the State. There are currently well over one million returned veterans now in California, of which some 700,000 are qualified California veterans eligible for our state services. We have been called upon to hold many more meetings than had been expected. We have heard and settled the various complaints; inspected and surveyed our state institutions and facilities; published booklets on veteran services; attended many veteran meetings and functions; dealt with the various state departments and officials; and in general given service to our veteran population, all on behalf of the State Legislature.

Publications

Two booklets were published by your committee. The first, *Veteran Legislation*, ran 5,000 copies and was distributed among the Members of the Legislature only, in February, 1946. In May of the same year we published a second booklet, *Veteran Assistance in California*, running 20,000 copies. It was a plain language explanation of California's various veteran services, how to apply and obtain them, and set forth also the provisions of the services of the Federal Government. This publication was supplied to all Members of the Legislature, to officers and all posts of the veteran organizations, and finally, requests for copies were received from agencies of the Federal Government and from all parts of the United States until the supply was exhausted The demand for this type of literature seems obvious enough reason for your committee to recommend that the next Committee on Military Affairs republish such a booklet.

Definition of Veteran

It has been often suggested that with so many thousands of nonresident veterans within our state borders a clear-cut restrictive definition of what constitutes a "California Veteran" should be enacted. For home loans and education benefits, etc., our present statute requires the veteran to have been a "bona-fide" resident of California prior to military service Your committee finds this to be working more satisfactorily than the once contemplated strict one year prior residence requirement, and we therefore recommend that no changes, except for possible clarifications, be enacted. The 10-year requirement for entrance to the State Veterans' Home is not yet in question.

Veterans' Home

Your committee made a thorough review and inspection of conditions at the State Veterans' Home in Yountville, and reports with gratitude that the institution is under splendid management and is progressing as rapidly as possible on the large expansion program for which we have already provided. No additional appropriations seem necessary at this time Likewise, on this subject, the committee concludes that for the present there is no need nor necessity for the establishment of a similar home in Southern California.

Napa State Farm

To settle an old subject, your committee inspected this state farm, located but a few miles from the Veterans' Home, with a view to the economics of putting this property to some use. We recommend most thoroughly that this now dormant institution be added to the jurisdiction of the Commandant of the Veterans' Home; that the present farm manager be retained at his present salary in the new capacity of farm and rehabilitation instructor; and that the premises be used and worked by the members of the Veterans' Home.

Housing

Your committee recognizes that most of the veteran housing problems have been taken under the control of the Federal Government, yet we desired to determine whether or not our appropriations of state funds were serving their intended purpose. The results, in general, have not been encouraging There have been gratifying results around a few school campus developments but even these have been hampered by shortages. Inter-agency red tape has not helped the local authorities to participate in the aid provided by the State. New building materials should be approved where possible and our system of granting financial aid needs simplification. Your committee started on this subject in August, 1946, but delayed its actions partly because the only real remedy seemed to be to put the State into the actual construction business, and partly because the committee is not on the federal level of government.

Farm and Home Loans

Your committee takes pleasure in reporting again on the success of California's farm and home loan program and its management. It is undoubtedly of greatest assistance and the most outstanding plan in the nation. We recommend, however, that the top valuation on eligible home properties be raised to $15,000 and that farm

offerings be raised to $30,000, without, however, any increase in the present maximum loan limitations of $7,500 on homes and $13,500 on farms. The reason for this recommendation is, of course, that many veterans wishing to own or operate better class properties are currently precluded from this loan service.

Minors

Your committee recognizes that California is not in line with many other states which permit a veteran under 21 years of age to negotiate for veteran loans, both federal and state We, therefore, recommend that our banking statutes, and others as necessary, be amended to permit service to veterans beginning at age 18.

Re-employment

Your committee has devoted a most considerable amount of time to hearing veteran complaints, and to examination of circumstances preventing veterans from returning to their old jobs, and the like. Also, the subject of unemployment insurance, both federal and state, was considered. For the great majority of veterans, however, ample work and facilities exist. With the United States Employment Service now back in state control; with the splendid work being done by Veteran Centers in the larger communities; the present service officer systems; and the present civil service advantages; your committee finds no recommendation necessary. Those few individuals involved with the state civil service regulations are treated by remedial legislation listed elsewhere in this report.

On-the-Job Training

Earlier during our term of service your committee found that the program of apprenticeship training was popular with the veterans and well administered by the State There were few instances of inequalities. In recent months, however, due mostly to the enactment of Public Law 679, the provisions of the Federal Servicemen's Readjustment Act were amended to limit the earnings of on-the-job trainees. As a result, this service is not now being used as it should Your committee therefore recommends that the Federal Congress be memorialized to raise these limitations.

Education

Your committee has reviewed California's system of educational assistance to its veterans, wherein $1,000 may be spent on each eligible veteran wishing to continue his or her education. In sharp contrast with the services offered by the Federal Government, however, we pay subsistence to the veteran at the rate of only $40 per month. Your committee does not recommend that the capital sum of $1,000 be increased, since our state service is used principally for brush-up courses, or as a continuation of exhausted federal benefits, yet we do recommend that the monthly payment be raised to $100 as the veteran may elect.

Civil Service Credits

Your committee came upon a system of applying the statutory veterans' examination credits, initiated by the Personnel Board, which did not extend the credits to all veterans who obtained the minimum passing grade. See Assembly Concurrent Resolution No. 5, Extraordinary Session, July, 1946 Although we believe the situation has been corrected as a result of our committee activity, remedial legislation is recommended elsewhere in this report.

Cash Bonus

From time to time your committee has been bombarded with requests and demands for the payment of a cash bonus to all legitimate California veterans The State of Illinois, for one, has enacted such a plan. It is the opinion of this committee, however, that the payment of any substantial sum would be impossible, based upon our overwhelming number of veterans; but further, we consider the enlargement of our farm and home loan purchase plan, our educational benefits, and the like, to be a more proper function of government in restoring veterans to their true places. We feel that whatever bonus the State might afford to pay in cash would, in most instances, be dissipated without bestowing any real service upon the veteran Your committee therefore recommends that the Legislature decline to enact any bonus plan that may subsequently be proposed

Service Officers

Your committee thoroughly recommends that continued appropriations be approved in support of the veteran service officers financed by contract with the major veteran organizations. Upon first examination by the committee it was found that the former Veterans' Welfare Board had set up a system requiring the veteran organizations to match our state assistance on a 50-50 basis to which we objected as not being within the legislative intent The matter has now been changed to 70 percent State, 30 percent participation by the sponsoring organization, and the system is working very satisfactorily. In addition to these service officers, some counties have now taken advantage of our assistance to county government for the support of county service officers. Your committee recommends also that continued appropriations be made in support of these veteran counsellors.

State Departments

After a continuing contact with all of the various state departments and officials dealing in veteran assistance, such as the State Department of Veterans' Affairs and its Divisions, the State Personnel Board, the Department of Education, the Contractor's License Board, the Apprenticeship Council, and others, your committee wishes to commend all of the agencies in their genuine effort to render every possible service and concession our veterans may require On such matters as the restoration of licenses to do business, for example, where this committee has sought aid for the veteran, complete cooperation has been found at every hand. In order to strengthen the position of our State Government with regard to veteran assistance, your committee recommends that the requests for personnel, supplies, and appropriations for the performance of veteran aids on the part of our state departments be most favorably considered.

New Bills

Your committee expects that there will be a deluge of new legislation introduced by the membership of the next, Fifty-seventh, Legislature, making a variety of proposals on all phases of veteran aid. It is to be hoped that the contents of this report may be used as a guide and that new legislation, if introduced, will be held at a minimum As a result of the committee operations, and in keeping with the recommendations offered, the following subjects have been treated with the introduction of new and remedial legislation by your committee

1. Increasing the maximum value of property offered for farm and home loan purchases.
2. Requiring that any profit made on repossessed properties must be returned to the veteran-borrower under state loans.
3. Adding the Napa State Farm to the jurisdiction of the Yountville Veterans' Home.
4. Providing some improved conditions for members of the Veterans' Home who work part time.
5. Increasing the monthly educational payment to $100, as the veteran may elect.
6. Providing for the employment of certain eligibles for appointment to the Highway Patrol, whose appointment came up while in military service.
7. Reducing the negotiable age for veterans wishing federal or state veteran loans to 18 years of age.
8. Providing for consideration of veteran medical officers regarding their interneship.
9. Providing for application of veterans statutory credit in civil service examinations.
10. Providing for service officer appropriations, wherein such items are not in budget.
11. Creating position of sergeant in state police, with examination open to veteran employees only.
12. Memorializing Congress regarding on-the-job training limitations.
13. Extending the ten year residence requirement now applicable to Yountville to cover entrance to the Women's Relief Corps Home at Santa Clara.
14. Providing for the completion of civil service examinations, any portion of which was interrupted by military service.
15. Providing that time spent in military service shall be counted in computing employee seniority rights.
16. Prohibiting residence of non-veterans in any domicile financed by public funds as veteran housing.

Main Conclusion

Your committee reports, without hesitation, that it has been devoted to its task, and feels that its existence has been a distinct and worthwhile service to the public, and that the operations accrue to the credit of this Legislature. We have enjoyed at all times the complete cooperation of the major veteran organizations and their representatives. We desire to point again to the survey made by the officers of the Federal Selective Service System wherein they judged California to be the number one state in its treatment of veterans. After working so thoroughly with our state veteran services, the main guiding recommendation of this committee is therefore: THAT, EXCEPT FOR MINOR ADDITIONS, NO MAJOR CHANGE BE MADE IN THE CALIFORNIA VETERAN PROGRAM

Respectfully submitted,

RICHARD H. McCOLLISTER, Chairman

And reports that the same have been correctly enrolled, and presented to the Secretary of State on the seventh day of January, 1947, at 5 p.m.

ARTHUR A. OHNIMUS, Chief Clerk of the Assembly

MESSAGES FROM THE GOVERNOR

Acts of Executive Clemency of California Granted for Period 1945-1947 Concerning Pardons, Commutations and Reprieves

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, January 8, 1947

To the Honorable Members of the Assembly
State of California, Sacramento, California

GENTLEMEN:

In accordance with the provisions of Section 1 of Article VII of the Constitution of California, I hereby transmit to you a report of the cases of pardon, commutation of sentence, and reprieve issued by this office from January 8, 1945, to January 8, 1947.

Respectfully submitted.

EARL WARREN, Governor

Reprieves

THOMAS EARL BRIGANCE, San Quentin No. 71869, was convicted on June 22, 1944, in Alameda County, of murder first degree and robbery first degree, and scheduled to be executed on April 20, 1945. Reprieve granted by Acting Governor Frederick F. Houser pending his study of the case. Granted April 20, 1945, extending date of execution to May 18, 1945.

WILSON DE LA ROI, San Quentin Nos. 63949 and 63949a, was convicted on September 28, 1942, in Sacramento County, of assault by life convict, and scheduled to be executed February 2, 1945. Reprieve granted upon request of the Supreme Court of the State of California in order to allow referee to complete transcript in the application of Wilson De La Roi for a writ of habeas corpus. Granted January 26, 1945, extending date of execution to May 4, 1945.

WILSON DE LA ROI, San Quentin Nos. 63949 and 63949a, was convicted on September 28, 1942, in Sacramento County, of assault by life convict, and scheduled to be executed May 4, 1945 Reprieve granted upon request of the Supreme Court of the State of California. Granted April 28, 1945, extending date of execution to July 6, 1945.

WILSON DE LA ROI, San Quentin Nos. 63949 and 63949a, was convicted on September 28, 1942, in Sacramento County, of assault by life convict, and scheduled to be executed July 6, 1945. Reprieve granted upon request of the Supreme Court of the State of California in order to allow the Supreme Court sufficient time for the completion of the pending reference on the writ of habeas corpus Granted June 25, 1945, extending date of execution to October 5, 1945.

WILSON DE LA ROI, San Quentin Nos. 63949 and 63949a, was convicted on September 28, 1942, in Sacramento County, of assault by life convict, and scheduled to be executed October 5, 1945. Reprieve granted upon request of the Supreme Court of the State of California. Granted October 1, 1945, extending date of execution to January 4, 1946.

WILSON DE LA ROI, San Quentin Nos. 63949 and 63949a, was convicted on September 28, 1942, in Sacramento County, of assault by life convict, and scheduled to be executed January 4, 1946. Reprieve granted in order to allow John Quincy Brown, District Attorney of Sacramento County, sufficient time to investigate the purported confession of Edward Walker. Granted December 20, 1945, extending date of execution to March 8, 1946.

WILSON DE LA ROI, San Quentin Nos. 63949 and 63949a, was convicted on September 28, 1942, in Sacramento County, of assault by life convict, and scheduled to be executed March 8, 1946. Assembly Bill No. 54: By Mr. McCollister—An act to add Part 13 comprising Sections 25751 to 26155, inclusive, to Division 2 of the Revenue and Taxation Code, imposing a state tax on cigarettes, prescribing the method and manner of levying and collecting the tax, conferring powers and imposing duties on the State Board of Equalization, providing penalties for violations of this act, and allocating the revenue derived therefrom.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 55: By Mr. McCollister—An act to repeal Sections 14495 and 14495.1 of, and to add Section 14495 to, the Education Code, relating to contributions of members of the State Teachers' Retirement System who served in the military service, in an auxiliary thereof, or in the American Red Cross, and making an appropriation.

Referred to Committee on Education.

Assembly Bill No. 56: By Mr. McCollister—An act to add Article 19, comprising Section 1120, to Chapter 1, Part 2, Division 1 of the Insurance Code, relating to insurance.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 57: By Messrs. McCollister and Dolwig—An act to amend Sections 292, 307, and 502 of the Vehicle Code, relating to motor vehicle operators and chauffeurs.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 58: By Mr. McCollister—An act to authorize the appointment of eligible persons who served in the military services of the United States as state traffic officers in the California Highway Patrol, declaring the urgency thereof, to take effect immediately.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 59: By Mr. McCollister—An act to amend Section 301 of the Streets and Highways Code, relating to state highway routes.

Referred to Committee on Conservation and Planning.

RESOLUTIONS

The following resolution was offered:

By Mr. Hawkins:

House Resolution No. 18

Relative to the number of copies of legislative measures delivered to the Keeper of the Archives

WHEREAS, Section 13661 of the Government Code provides for the delivery to the Keeper of the Archives of only 25 copies of legislative measures; and

WHEREAS, This does not provide a sufficient number of such measures for a permanent record of the legislative action of this session; now, therefore, be it

Resolved by the Assembly of the State of California, That the State Printer is hereby directed to print and deliver to the Keeper of the Archives, in addition to the copies provided pursuant to Section 13661 of the Government Code, an additional 50 copies of each bill, resolution and constitutional amendment introduced this session of the Legislature; and be it further

Resolved, That the Chief Clerk is directed to transmit a copy of this resolution to the office of the State Printer.

Request for Unanimous Consent

Mr. Hawkins asked for, and was granted, unanimous consent to take up House Resolution No. 18, at this time, without reference to committee or file.

Resolution read, and adopted.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Concurrent Resolution No. 13: By Mr. McCollister—Relative to sergeants in the State Police.

Referred to Committee on Civil Service and State Personnel.

Assembly Concurrent Resolution No. 14: By Mr. McCollister—Relative to the establishment of a state park on Angel Island in San Francisco Bay.

Referred to Committee on Rules.

Assembly Joint Resolution No. 3: By Mr. McCollister—Relative to memorializing Congress to erect a Monument to the Unknown Sailor.

Referred to Committee on Rules.

Assembly Bill No. 60: By Mrs. Niehouse, Messrs. Cramer, and Luckel—An act to add Section 6365 to the Revenue and Taxation Code, relating to the sales and use taxes.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 61: By Mrs. Niehouse, Messrs. Cramer, and Luckel—An act to add Section 13007 to the Health and Safety Code, relating to fires and fire protection.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 62: By Messrs. Anderson, Clayton A. Dills, Thomas, and Hahn—An act to add Section 4041n to the Political Code, and Section 25660 to the Government Code, relating to the powers and duties of county boards of supervisors, declaring the urgency of this act and providing that it shall take effect immediately.

Motion to Place Rush Order Upon the Printing of Assembly Bill No. 62

Mr. Anderson moved that a rush order be placed upon the printing of Assembly Bill No. 62, and that the bill be held at the desk.

Motion carried.

Assembly Bill No. 63: By Messrs. Heisinger, Crichton, Johnson, Clarke, and James—An act making an appropriation to the Department of Agriculture for the purpose of establishing and equipping a livestock and poultry diagnostic and testing laboratory in Fresno County.

Referred to Committee on Livestock and Dairies.

Assembly Joint Resolution No. 4: By Messrs. Maloney, Dolwig, McCollister, M. Philip Davis, Anderson, Allen, Beck, Berry, Blosser, Brady, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Crowley, Debs, Clayton A. Dills, Doyle, Dunn, Erwin, Field, Gaffney, Grunsky, Hahn, Heisinger, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Loomis, Lowrey, Lyons, Mrs. Niehouse, Messrs. O'Day, Silliman, Stanley, Thurman, Waters, Weber, and Wollenberg—Relative to memorializing the President and the Congress of the United States in relation to providing funds to complete the Veterans Temporary Emergency Housing Program.

Resolution read.

Request for Unanimous Consent That All Members Be Co-Authors of Assembly Joint Resolution No. 4

Mr. Maloney asked for unanimous consent that all members be made co-authors of Assembly Joint Resolution No. 4.

Mr. Conrad withheld unanimous consent.

Mr. Conrad withdrew his objections.

By request of the Speaker, all members wishing to be co-authors of said resolution stepped to the desk.

Request for Unanimous Consent

Mr. Maloney asked for, and was granted, unanimous consent to take up Assembly Joint Resolution No. 4, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY JOINT RESOLUTION NO. 4

Assembly Joint Resolution No. 4—Relative to memorializing the President and the Congress of the United States in relation to providing funds to complete the Veterans Temporary Emergency Housing Program.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Dunn, Erwin, Field, Fletcher, Gaffney, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Mr. Speaker—68.

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 64: By Messrs. Dunn, Carey, Dickey, Caldecott, and Miller—An act to amend Section 32001 of the Health and Safety Code, relating to the establishment, organization, government and powers of hospital districts.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 65: By Messrs. Thompson and Dickey—An act to add Section 13521.5 to the Education Code, relating to dismissal of teachers.

Referred to Committee on Education.

Assembly Concurrent Resolution No. 15: By Messrs. Allen, McCollister, Crowley, Waters, Caldecott, Conrad, Cramer, M. Philip Davis, Dickey, Dolwig, Evans, Gaffney, Geddes, Grunsky, James, Luckel, Mrs. Niehouse, Messrs. Stanley, and Stewart—Relative to reports of the Annual Conventions of the American Legion.

Referred to Committee on Rules.

Assembly Concurrent Resolution No. 16: By Messrs. Allen, Crowley, McCollister, Waters, Caldecott, Conrad, Cramer, M. Philip Davis, Dickey, Dolwig, Erwin, Evans, Gaffney, Geddes, Grunsky, James, Luckel, Mrs. Niehouse, Messrs. Stanley, and Stewart—Relative to the reports of the sessions of the Department Encampment of the Grand Army of the Republic.

Referred to Committee on Rules.

Assembly Concurrent Resolution No. 17: By Messrs. Allen, Crowley, McCollister, Waters, Caldecott, Conrad, Cramer, M. Philip Davis, Dickey, Dolwig, Erwin, Evans, Gaffney, Geddes, Grunsky, James, Luckel, Mrs. Niehouse, Messrs. Stanley, and Stewart—Relative to reports of the annual conventions or encampments of the Veterans of Foreign Wars of the Department of California.

Referred to Committee on Rules.

Assembly Concurrent Resolution No. 18: By Messrs. Allen, Crowley, McCollister, Waters, Caldecott, Conrad, Cramer, M. Philip Davis, Dolwig, Erwin, Evans, Gaffney, Geddes, Grunsky, James, Luckel, Mrs. Niehouse, Messrs. Stanley, and Stewart—Relative to reports of the

Department Encampment and the Annual Convention of the United Spanish-American War Veterans.

Referred to Committee on Rules.

Assembly Concurrent Resolution No. 19: By Messrs. Allen, Crowley, McCollister, Waters, Caldecott, Conrad, Cramer, M. Philip Davis, Dickey, Dolwig, Erwin, Evans, Gaffney, Geddes, Grunsky, James, Luckel, Mrs. Niehouse, Messrs. Stanley, and Stewart—Relative to the reports of the annual conventions of the Disabled American Veterans of the World War of the Department of California.

Referred to Committee on Rules.

Assembly Bill No. 66: By Messrs. Debs and McMillan—An act to amend Section 19616 of the Education Code, relating to child care centers, continuing in effect the provisions relative thereto, making an appropriation for the support thereof, and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Education.

Assembly Bill No. 67: By Messrs. Anderson, Waters, Huyck, Hollibaugh, Allen, Sam L. Collins, Conrad, Cooke, Crichton, Evans, and Hinton—An act to add Section 18972.5 to the Government Code, relating to physical qualifications of veterans for state civil service.

Referred to Committee on Military Affairs.

REQUEST FOR UNANIMOUS CONSENT TO PRINT OPINION

Mr. Thomas asked for, and was granted, unanimous consent that the following opinion from the Office of the Legislative Counsel be ordered printed in the Journal:

OFFICE OF LEGISLATIVE COUNSEL
SACRAMENTO 2, CALIFORNIA, December 23, 1946

Honorable Vincent Thomas
722 20th Street, San Pedro, California

Assemblyman as Public Relations Counsel Appearing before Congressional Committees—No. 7870

DEAR MR. THOMAS:

You have asked us whether there is anything in state or federal law to prevent an Assemblyman from acting as a paid public relations counsel for a private party and appearing before congressional committees in that capacity.

We know of no state law bearing directly on this matter.

Article IV, Section 19 of the Constitution of California provides: "No Senator or Member of Assembly shall during the term for which he shall have been elected, hold or accept any office, trust or employment under this State; provided, that this provision shall not apply to any office filled by election by the people."

It will be noted that this provision applies to *public*, not private, employment of a legislator. One judicial interpretation is that the purpose of this constitutional provision was to preclude employment by the holding of which a legislator's independent action as a member might be influenced or affected (Satterwhite v. Garrison 34 Cal. App. 734, 737).

The Supreme Court said in Parker v. Riley 18 Cal. (2) 83, "the purpose . . . is to prevent the acceptance by a legislator of any position under the State, whether an office or merely employment, which creates the opportunity for private aggrandizement, pecuniary in nature or otherwise."

The attitude of Congress toward lobbyists was recently expressed by the enactment of the "Federal Registration of Lobbying Act," Public Law 601, Chap. 753 (U. S. Code Congressional Service, 1946 Advance Sheet, No. 6, Pages 804-807). It applies to "any person . . . who . . . in any manner whatsoever, directly or indirectly,

solicits, collects or receives money or any other thing of value to be used principally to aid, or the principal purpose of which person is to aid, in the accomplishment of any of the following purposes:

(a) the passage or defeat of any legislation by the Congress of the United States;

(b) to influence, directly or indirectly, the passage or defeat of any legislation by the Congress of the United States.

It requires such person to keep detailed accounts of contributions, give receipts for contributions, file statements of contributions or expenditures with the Clerk of the House of Representatives, to register with the Clerk of the House and with the Secretary of the Senate.

This act, does not, however, place any restrictions on other positions held by a person who comes under its provisions.

It is therefore concluded that an assemblyman may, as public relations counsel, appear before congressional committees.

Very truly yours,

FRED B. WOOD, Legislative Counsel
By GERALD WALLACE, Deputy

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 68: By Messrs. Anderson, Waters, Huyck, Hollibaugh, Allen, Sam L. Collins, Conrad, Cooke, Crichton, Evans, and Hinton—An act to add Section 19057.5 to the Government Code, relating to appointments in state civil service.

Referred to Committee on Military Affairs.

Assembly Bill No. 69: By Messrs. Anderson, Waters, Huyck, Hollibaugh, Allen, Conrad, Cooke, Crichton, Evans, Hinton, and Sam L. Collins—An act to amend Section 18973 of the Government Code, relating to veterans' preference in state civil service.

Referred to Committee on Military Affairs.

Assembly Joint Resolution No. 5: By Messrs. McCollister, Allen, Gaffney, Anderson, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, James, Luckel, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—Relative to on-the-job training for veterans.

Referred to Committee on Military Affairs.

Assembly Bill No. 70: By Messrs. McCollister, Allen, Anderson, Gaffney, Conrad, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Heisinger, Hinton, Hollibaugh, James, Luckel, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to amend Section 19391 of the Government Code, relating to reinstatement of state civil service employees who entered the military service.

Referred to Committee on Military Affairs.

Thurman, and Waters—An act to amend Section 981.2 of the Military and Veterans Code, relating to educational assistance to veterans.

Referred to Committee on Military Affairs.

Assembly Bill No. 72: By Messrs. McCollister, Allen, Gaffney, Anderson, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Heisinger, Hinton, Hollibaugh, James, Luckel, McMillan, Mrs. Niehouse, Messrs. Thurman, and Waters—An act to amend Sections 986.4 and 986.5 of the Military and Veterans Code, relating to the purchase of farms and homes by veterans.

Referred to Committee on Military Affairs.

Assembly Bill No. 73: By Messrs. McCollister, Allen, Gaffney, Anderson, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, James, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to amend Section 981.2 of the Military and Veterans Code, relating to educational assistance to veterans.

Referred to Committee on Military Affairs.

Assembly Bill No. 74: By Messrs. McCollister, Allen, Gaffney, Anderson, Conrad, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, James, Loomis, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to amend Section 37 of the Civil Code, relating to contracts by veterans and their spouses for servicemen's benefits.

Referred to Committee on Military Affairs.

Assembly Bill No. 75: By Messrs. McCollister, Allen, James, Gaffney, Anderson, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to add Section 1292 to the Military and Veterans Code, relating to accommodations for the United Spanish War Veterans, Department of California, and making an appropriation.

Referred to Committee on Military Affairs.

Assembly Bill No. 76: By Messrs. McCollister, Allen, Anderson, Gaffney, Conrad, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, James, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to amend Section 1083 of the Military and Veterans Code, relating to the Women's Relief Corps Home of California.

Referred to Committee on Military Affairs.

Assembly Bill No. 77: By Messrs. McCollister, Allen, Gaffney, Anderson, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, James, Luckel, McMillan, Mrs. Niehouse, Messrs. Thurman, and Waters—An act to repeal Article 5 of Chapter 2, Part 3, Division 3 of Title 2 of the Government Code and to add Sections 1048 to 1053, inclusive to the Military and Veterans Code, relating to Napa State Farm.

Referred to Committee on Military Affairs.

Assembly Bill No. 78: By Messrs. McCollister, Allen, Gaffney, James, Anderson, Conrad, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to amend Sections 827 and 987.7 of the

Military and Veterans Code, relating to farm and home purchases by veterans.

Referred to Committee on Military Affairs.

Assembly Bill No. 79: By Messrs. McCollister, Allen, Anderson, Crowley, Debs, Clayton A. Dills, Dolwig, Field, Grunsky, Hinton, Hollibaugh, James, McMillan, Mrs. Niehouse, Messrs. Stanley, Thurman, and Waters—An act to add Section 20363 to the Government Code, relating to the retirement of member help in the Veterans' Home of California.

Referred to Committee on Military Affairs.

Assembly Bill No. 80: By Mr. Cramer, Mrs. Niehouse, Messrs. Hollibaugh, Allen, Clarke, Geddes, Grant, Thorp, and Waters—An act to add Section 567 to the Vehicle Code, relating to soliciting rides from drivers of vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 81: By Mr. Cramer, Mrs. Niehouse, Messrs. Hollibaugh, Allen, Clarke, Geddes, Grant, Stanley, Thorp, and Waters—An act to add Section 566 to the Vehicle Code, relating to soliciting purchase of goods, merchandise, service, tickets and contributions on highways.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 82: By Mr. Cramer, Mrs. Niehouse, Messrs. Hollibaugh, Allen, Clarke, Geddes, Grant, Luckel, Stanley, Thorp, and Waters—An act to add Section 684 to the Vehicle Code, relating to motor vehicle equipment.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 83: By Messrs. Anderson, Waters, Huyck, Hollibaugh, Allen, Sam L. Collins, Conrad, Cooke, Crichton, Evans, and Hinton—An act to amend Section 19533 of the Government Code, relating to layoffs in the state civil service.

Referred to Committee on Military Affairs.

Assembly Bill No. 84: By Messrs. Anderson, Waters, Huyck, Hollibaugh, Allen, Sam L. Collins, Cooke, Crichton, Evans, and Hinton—An act to amend Section 18973 of the Government Code, relating to veterans' preference in state civil service.

Referred to Committee on Military Affairs.

Assembly Bill No. 85: By Messrs. Price, Allen, Hollibaugh, Anderson, Caldecott, Conrad, Cooke, Cramer, Crichton, Dickey, Gaffney, Hahn, Hinton, McCollister, Silliman, Stanley, and Thompson—An act making an appropriation for the construction of one or more armories for the California National Guard.

Referred to Committee on Military Affairs.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 8, 1947

MR SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 3
Senate Concurrent Resolution No. 4
Senate Concurrent Resolution No. 6
Senate Concurrent Resolution No 7
Senate Concurrent Resolution No. 12

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following resolutions were read:

Senate Concurrent Resolution No. 3—Approving an amendment to the charter of the City of Stockton, State of California, ratified by the qualified electors thereof, at a special municipal election held therein on Tuesday, November 5, 1946.

Resolution ordered held at desk.

Senate Concurrent Resolution No. 4—Relative to the continuance of the Joint Legislative Committee on Agriculture and Livestock Problems created by Resolutions Chapter No. 141 of the Fifty-sixth Regular Session.

Referred to Committee on Rules.

Senate Concurrent Resolution No. 6—Relative to the continuance of the Joint Fact-Finding Committee on Highways, Streets and Bridges created by Resolutions Chapter 133 of the 1945 Regular Session.

Referred to Committee on Rules.

Senate Concurrent Resolution No. 7—Relative to a study by the Judicial Council of the administration of justice in the inferior courts in California.

Referred to Committee on Judiciary.

Senate Concurrent Resolution No. 12—Relative to approving certain amendments to the charter of the County of Los Angeles, State of California, submitted to, voted for, and ratified by, the electors of said county at the general election held in said county on the fifth day of November, 1946.

Resolution ordered held at desk.

REQUEST FOR UNANIMOUS CONSENT TO PRINT LETTER IN JOURNAL

Mr. Allen asked for unanimous consent that a letter received by him from Mr. Robert E. Ryan, of Los Angeles, be ordered printed in the Journal.

Letter read.

Mr. Beck withheld unanimous consent, stating that it would set a precedent of procedure for other Members of the Assembly.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 86: By Mr. Anderson—An act to amend Sections 1500 and 1501 of the Welfare and Institutions Code, relating to children requiring public assistance.

Referred to Committee on Social Welfare.

Assembly Bill No. 87: By Messrs Fletcher and Grant—An act repealing Section 1428a and amending Section 1428b of the Penal Code, relating to keeping a minute book and to the destruction of old records, respectively, in municipal courts.

Referred to Committee on Judiciary.

Assembly Concurrent Resolution No. 20: By Mr. James—Relative to approving a certain amendment to the charter of the City of Bakersfield, County of Kern, State of California, voted for and ratified by the electors of said City of Bakersfield at a special election held therein on the fifth day of November, 1946.

Request for Unanimous Consent

Mr. James asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 20, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 20

Assembly Concurrent Resolution No. 20—Relative to approving a certain amendment to the charter of the City of Bakersfield, County of Kern, State of California, voted for and ratified by the electors of said City of Bakersfield at a special election held therein on the fifth day of November, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, Debs, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Gaffney, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, O'Day, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thurman, Waters, and Weber—63.

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

RESOLUTIONS

The following resolutions were offered:

By Messrs. Burns, O'Day, Maloney, Berry, Brady, Blosser, Crowley, Gaffney, George D. Collins, Wollenberg, and McCollister:

House Resolution No. 19

Relative to paying tribute to the memory of A. R. O'Brien

WHEREAS, A. R. O'Brien of Ukiah, California, long an outstanding figure in public affairs of this State, died in San Francisco on January 7, 1947; and

WHEREAS, A. R. O'Brien was a graduate of Santa Clara University, and as a young man followed the adventurous traits of the newspaper profession through Cuba, Panama, and Alaska, where he met and married Margaret Herburger; and

WHEREAS, In 1920 he became publisher of the Ukiah *Republican Press*, and thereafter devoted his tremendous energies to matters of public interest in California, and served in such important offices as President of the State Board of Prison Directors; and

WHEREAS, For 18 years A. R. O'Brien was a Director of the Golden Gate Bridge District, pushing to completion construction of the Golden Gate Bridge and a vast plan of highway approaches to the bridge and many years of operation of the great span; now, therefore, be it

Resolved by the Assembly of the State of California, That the Members of this Assembly by this resolution pay tribute to the public service which A. R. O'Brien performed for the people of California, and express profound regret in the great loss suffered by this State in his death; and be it further

Resolved, That the Chief Clerk of the Assembly transmit to Mrs. Margaret H. O'Brien, widow of A. R. O'Brien, a suitably prepared copy of this resolution as a token of their respect and an expression of their deep sympathy; and be it further

Resolved, That when this Assembly this day adjourns, it do so out of respect to the memory of A. R. O'Brien.

Request for Unanimous Consent

Mr. Burns asked for, and was granted, unanimous consent to take up House Resolution No. 19, at this time, without reference to committee or file.

Resolution read, and adopted.

By Mr. Dickey:

House Resolution No. 20

Creating the Assembly Legislative Process Committee and defining its powers and duties

WHEREAS, Many of the legislative proposals involve problems within the jurisdiction of more than one standing committee of the Assembly, and the adequate consideration of such measures requires the cooperation of such several committees in order to avoid duplicating the work of one such committee by another, and much delay in the legislative process could be avoided if it were possible to eliminate such duplication of effort and provide a means for expediting the consideration of such measures; and

WHEREAS, There is need of a committee equipped to ascertain facts and secure facts and information upon assigned topics from time to time during the session, a committee acting in aid of and in collaboration with the several standing committees of the Assembly; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1. A special committee designated the "Assembly Legislative Process Committee" is hereby created and authorized and directed to take such steps as may be necessary to coordinate the work of the various standing committees of this session in considering questions before such session in order that there be no duplication of work or effort, and to make such studies as may be necessary, ascertain such facts and information, and secure such statistics for the use of the members and committees of the Assembly as may be of aid to them in considering and acting upon legislative proposals at this session.

2. The committee shall consist of the chairman of the following Assembly committees: Rules, who shall be chairman of the committee; Ways and Means, Governmental Efficiency and Economy, Judiciary, Revenue and Taxation, Public Morals, Education, Transportation and Commerce, and five Members of the Assembly to be appointed by the Speaker thereof

Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3. The committee is authorized to meet during this session of the Legislature, including any recess, but not after final adjournment.

4 The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members except that the members of the committee shall serve without compensation and shall not be allowed mileage.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5 The committee has the following additional powers and duties:

(a) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purposes for which it is created.

(b) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(c) To report its findings and recommendations to the Assembly from time to time and at any time.

(d) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of fifty thousand dollars ($50,000), or so much thereof as may be necessary, is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 20, at this time, without reference to committee or file.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, O'Day, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—71.

NOES—None.

REQUEST FOR UNANIMOUS CONSENT

Mr. Weber asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No. 3, at this time, without reference to committee or file.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 3

Senate Concurrent Resolution No. 3—Approving an amendment to the charter of the City of Stockton, State of California, ratified by the qualified electors thereof, at a special municipal election held therein on Tuesday, November 5, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Gaffney, Geddes, Grant, Grunsky, Hahn,

Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, O'Day, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—70.

NOES—None.

Resolution ordered transmitted to the Senate.

REQUEST FOR UNANIMOUS CONSENT

Mr. Evans asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No 12, at this time, without reference to committee or file.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 12

Senate Concurrent Resolution No. 12—Relative to approving certain amendments to the charter of the County of Los Angeles, State of California, submitted to, voted for, and ratified by, the electors of said county at the general election held in said county on the fifth day of November, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T Davis, M Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Price, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, and Wollenberg—67.

NOES—None.

Resolution ordered transmitted to the Senate.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 2 BY UNANIMOUS CONSENT

Senate Concurrent Resolution No. 2—Relative to the Joint Rules of the Legislature.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

Resolution ordered transmitted to the Senate.

Speaker Presiding

At 1 p.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

ANNOUNCEMENT BY SPEAKER

The Speaker anonunced the appointment of the following members to the Committee on Rules:

Messrs. Dickey, Chairman; Doyle, Vice Chairman; Wollenberg, Field, Hollibaugh, Maloney, Thompson, Lyons, Burns, Crichton, Fletcher, Evans, and Dunn.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of the San Diego Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Lillian Johnson, Mrs. June Charrion, and Mrs. Edna von Gunden of San Diego.

On request of Mr. Miller, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Daniel C. Bettencourt of Richmond.

On request of Mr. Allen, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Cliff W. Brown of San Francisco.

On request of Mr. Gaffney and the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to: Former Assemblyman Gerald P. Haggerty, Patrick J. McMurray, Frank C. MacDonald, Mr. and Mrs. James G. Smyth, of San Francisco, and C. L. Gerling, of Washington, D. C.

On request of Mr. Gaffney and the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Bruno Merletti of San Francisco.

On request of the Alameda County Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to former Assemblyman Walter Feeley of Alameda.

On request of Mr. Burke, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Gilbert R. Lee of Alhambra.

On request of Mr. Waters, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Major William Barnes, United States Army.

On request of Mr. O'Day and the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to George Christopher and George C. Paterson of San Francisco.

On request of Messrs. Thomas, Hawkins, and Dunn, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Elmo K. Adams of San Pedro.

ADJOURNMENT

At 1.03 p.m., on motion of Mr. Dickey, the Speaker declared the Assembly adjourned until 11 a.m., Thursday, January 9, 1947, out of respect to the memory of the late A. R. O'Brien.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE

FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

FOURTH LEGISLATIVE DAY

FOURTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Thursday, January 9, 1947

The Assembly met at 11 a.m.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—76.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

Let us pray:

We beseech Thee, O Lord, incline Thine ear to our petitions and bring light to the darkness of our minds by the grace of Thy visitation that we may ever follow Thee with a pure intention and serve Thee with a clean heart, through Christ Our Lord.—AMEN

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Heisinger, further reading of the Journal of the previous legislative day, was dispensed with.

LEAVES OF ABSENCE FOR THE DAY

The following member was granted leave of absence for the day, because of legislative business elsewhere:

Mr. Caldecott, on motion of Mr. Grunsky.

The following members were granted leaves of absence for the day, and desired to waive their per diem:

Mr. Thurman, on motion of Mr. Grunsky.

Mr. Gannon, on motion of Mr. Stephenson.

COMMUNICATIONS

By the Speaker:

The following communication was received, read, and ordered printed in the Journal:

AUBURN, CALIFORNIA, January 7, 1947

Honorable Allen G. Thurman
Mrs Allen G. Thurman
Honorable Sam Collins, Speaker of the Assembly
Mrs. Sam Collins
Miss Geraldine Hadsell

DEAR FRIENDS: Once each year, every Business and Professional Women's Club, has a meeting dealing with government affairs.

In Auburn, it has been customary for our club to hold this meeting during the session of the California Assembly, so that an opportunity may be given for the presentation to our club of matters pertaining to State Government.

In the past, we have had the assistance of our member, Mrs. Allen G. Thurman, and her husband, Assemblyman Thurman, in bringing to us leaders from the Legislature.

In addition to this invitation to our club for Miss Hadsell, Mr. and Mrs. Collins, we will appreciate the personal extension of an invitation for our meeting of January 14th, to be given through the good offices of Mr. Thurman.

We assure you all, it would give our women of Auburn the greatest of pleasure in welcoming Mrs. Collins, the wife of our new Speaker of the Assembly, and Miss Hadsell as representative of the California women in public affairs, and to have the pleasure to extend the hospitality of our community to Mr Collins.

If this matter can be arranged, we would like to meet you all in Sacramento around 6 o'clock, January 14th, and then return you to your home if and when you are ready after the meeting.

We have a lovely city, and we believe a fine large group of women in the Auburn Business and Professional Women's Club group, and we hope you may like it here with us, as we would enjoy having you with us, and the opportunity of better acquaintance with all of you

Sincerely,

GOLDIE BREWER
Legislation Chairman
AUBURN BUSINESS AND PROFESSIONAL
WOMEN'S CLUB

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 88: By Messrs. Hollibaugh, Rosenthal, Thomas, Bennett, Ralph C. Dills, and Evans—An act to amend Section 19622 of the Business and Professions Code, relating to the disposition of state revenues derived from the regulation and licensing of horse racing, horse racing meetings, and wagering on the results thereof.

Referred to Committee on Public Morals.

Assembly Bill No. 89: By Messrs. Hawkins and Anderson—An act to amend Section 980 of, and to add Section 988.4 to, the Military and Veterans Code, relating to farm and home purchases for veterans' widows, and making an appropriation therefor.

Referred to Committee on Military Affairs.

Assembly Bill No. 90: By Messrs. Grant and Beck—An act to amend Section 18059 of the Education Code, relating to the letting of contracts, extending the period within which the section is to remain in effect, declaring the urgency hereof, to take effect immediately.

Referred to Committee on Education.

Assembly Bill No. 91: By Messrs Grant and Beck—An act to amend Section 18057 of the Education Code, relating to alterations or additions to school buildings.

Referred to Committee on Education.

Assembly Bill No. 92: By Messrs. Grant and Beck—An act to amend Section 4200 of the Government Code, relating to contractor's bonds on public works.

Referred to Committee on Judiciary.

REQUEST FOR UNANIMOUS CONSENT TO PRINT LETTER OF TRANSMITTAL RELATIVE TO REPORT

Mr. Clarke asked for, and was granted, unanimous consent that the following letter of transmittal, relative to the Report of the Joint Interim Agricultural Research Study Committee be read, and ordered printed in the Journal in 10-point type:

LETTER OF TRANSMITTAL

Report of Interim Committee Created by "An Act to Create an Agricultural Research Study Committee, Provide for Its Powers and Duties, and Making an Appropriation," Approved March 12, 1946 (Chapter 144, Fifty-sixth (First Extra) Session)

This interim committee was appointed to meet with and participate in the activities of the Agricultural Research Study Committee created by an act passed at the First Extraordinary Session in 1946 to study matters relating to research in agriculture and related industries.

The Agricultural Research Study Committee met a number of times and held hearings throughout the State. It received oral statements from 291 people representative of most of the 140,000 farms throughout the State. It received 179 written reports from industries, farm organizations, state and federal agencies, and individuals. Over 2,000 requests for research were recorded.

The Agricultural Research Study Committee has embodied the results of its studies and its recommendations in a Report on Agricultural Research in California to the Governor and the Legislature, and a supplemental report.

Your interim committee herewith presents said report and supplemental report and recommends that the same be printed as a public document.

Respectfully submitted.

SENATOR BEN HULSE
ASSEMBLYMAN GEORGE A. CLARKE
Interim Committee Members of the
Agricultural Research Study Committee

REQUEST FOR UNANIMOUS CONSENT THAT REPORT BE ORDERED PRINTED IN THE JOURNAL, AND THAT 5,000 ADDITIONAL COPIES BE ORDERED PRINTED

Mr. Clarke asked for, and was granted, unanimous consent that the following Report of the Agricultural Research Study Committee be ordered printed in the Journal in 10-point type, and that 5,000 additional copies be ordered printed:

AGRICULTURAL RESEARCH STUDY COMMITTEE

November 29, 1946

The Honorable Earl Warren, Governor of California,
Sacramento, California

DEAR SIR: On behalf of the Agricultural Research Study Committee, I have the pleasure of submitting to you and the Fifty-seventh Regular Session of the California Legislature this Report on Agricultural Research in California.

The report, as submitted, has the unanimous approval of this committee.

Sincerely,

ALBERT J. THILLE, Chairman

PART I

In carrying out the provisions provided for in Senate Bill No. 124, Chapter 144, Statutes of 1945, "An act to create an Agricultural Research Study Committee, provide for its powers and duties, and making an appropriation," the committee herewith renders its report to the Honorable Earl Warren, Governor of the State of California, and to the Members of the California State Legislature.

LAW AND SCOPE OF COMMITTEE ACTIVITIES

The major function of the committee is to obtain information from farmers, farmer associations, commodity groups and other reliable sources relative to the type of research and information needed to contribute to the continued progress of agriculture in the State.

The committee is charged with the duty of studying the scope and general progress of research and the availability of the results thereof to agriculture and related industries, and to "ascertain the necessity for the creation of a permanent agency or the possibility of the use of existing agencies to insure the widest possible dissemination of the benefits of such research."

The law provides for a committee of nine members, three to be representative of the "public at large," and the other six to have "practical knowledge and experience in the production or distribution of agricultural, horticultural, viticultural, livestock and dairy or poultry products." In addition there are four ex officio members serving on the committee as follows: The Director of Agriculture, the Dean of the College of Agriculture, a Member of the State Senate, and a Member of the State Assembly. The latter two are constituted as a Legislative Interim Committee.

The committee has met in session 17 times and has visited the University of California at Berkeley, the College of Agriculture at Davis, the Riverside Experiment Station at Riverside, the Meloland Experimental Station at El Centro, and the Western Regional Laboratory at Albany, and has conducted eight public hearings in the following cities: Redding, Eureka, Santa Rosa, Davis, Salinas, Fresno, Riverside, El Centro.

All members were present at one or more sessions, and 11 or more committee members attended each of the public hearings.

A total of 848 farm people attended these hearings, representing through their organizations most of the 140,000 farms throughout the State. Two hundred and ninety-one people presented oral statements, and 179 written reports were received from industries, from organized groups of farmers, from federal and state agencies, and from individuals. Over 2,000 research requests have been recorded.

The committee in submitting its report has divided the information into four sections as follows: (Parts I and II; and Appendices I and II)

Part I:	Findings, summary and recommendations.
Part II:	A listing of research projects.
Appendix I:	Copy of the law creating the committee.
Appendix II:	Partial transcripts of hearings and copies of written statements.

Part I is intended as a public document and the committee recommends that it, together with Part II, be printed and be made available to interested parties throughout the State. In Part II the committee has listed by commodity groups the research projects now under way and which are being conducted by the University of California, by the United States Department of Agriculture including the Western Regional Research Laboratory at Albany. Some of the projects are conducted jointly by the above mentioned research agencies. In some cases adequate work is being done, in other cases it is extremely desirable to accelerate the research.

In Part II the committee has also listed by commodity groups the research projects which have not yet been undertaken but which the various divisions of the Agricultural Experiment Station regard as vital in order to round out the research program so as to meet the most urgent research needs of California agriculture.

The committee has not included in Part II all suggestions of proposed projects submitted at the various hearings, nor attempted to determine the relative importance of the research projects or the desirability of undertaking some of them at all. This matter is left to administrative officers of the various research agencies working in cooperation with the respective industry groups.

Appendix II of the report contains partial transcripts of some of the hearings, where transcripts were made, and in addition the written statements in their original form. The committee deems it unnecessary to duplicate such transcripts and statements but recommends that they be referred to the College of Agriculture for study and analysis and for its use and guidance.

IMPORTANCE OF CALIFORNIA AGRICULTURE AND THE ROLE OF AGRICULTURAL RESEARCH

The committee recognizes the importance of a healthy agriculture to the continued growth and prosperity of the State. California farms, orchards, and ranches comprise a major segment of its economic life. In great sections food production, shipping and processing activities provide the economic foundation for the business life of the areas. For the four years 1943 to 1946 inclusive, the gross value of crop and livestock products sold by California farmers averaged about $1,750,000,000 per year. In addition to this direct contribution to the State's income and economic activity, its farms also provide the raw materials for the State's extensive food and fibre processing and distribution enterprises, and the turn-over of the income this wealth creates reaches into practically every phase of life and employment in the State.

As a source of employment, California farms and the related food and fiber processing and distributing industries occupy a place of first importance among the State's varied economic activities. In addition, the farms provide an extensive market for industrial products and services which are supplied by the industries of California and other areas.

The agriculture of California is noted for its high degree of diversification based upon a wide variety of soil and climatic conditions. It is also noted for its high degree of specialization on individual farms. This individual farm specialization is based in part upon adaptability of local climatic and soil conditions to the intensive production of certain crops and livestock. It is also predicated upon the application of scientific methods of crop and livestock production, a substantial degree of mechanization, the irrigation of large areas of former arid or semi-arid lands, and a high degree of productivity per acre.

The intensive character of most of California's agriculture, with a high level of expenditures for labor, machinery, water, feed and other materials, is one factor which makes it imperative for farmers to utilize the best known methods of production. It also emphasizes the need for an aggressive research program designed to develop more efficient methods. The great variety of crop and livestock production makes it necessary that this research cover a broad field extending not only to the production and marketing problems of specialty crop and livestock products which are grown primarily in California, but also to those of most of the standard commercial farm products which are widely produced in other parts of the country.

Much of the progress of California agriculture is closely related to similar progress in the food preservation, processing and distribution industries. In these activities also continued research is essential to progress.

As in other lines of endeavor, the maintenance of a successful agriculture requires a relentless search for new and better solutions of the problems encountered in the production, processing and marketing of farm products. This search ranges over the broad field of human knowledge, from the basic sciences of chemistry, botany and zoology to the practical search for new strains or varieties of crops and livestock, new methods of control for weeds, plant and animal diseases and insect pests, the development of new machinery, methods of reducing costs of distribution and the application of the results of such research to the needs of farmers operating under a wide variety of conditions.

The public has a vital interest in agricultural research. The results of such research and their application are reflected in a continued expansion in the production of food and other farm products to better meet the needs of an expanding population.

It is evident, therefore, that the maintenance of an efficient and economically healthy agriculture is of vital importance to the continued progress of the State and its rapidly increasing population. The prosperity of those who live and work on the farms and of those who live and work in the cities is closely interrelated. All have a vital interest in continued progress in the application of practical scientific methods in the production and processing of needed foods, fiber and forest products.

On this basis the committee concurs in a previous expression of the Legislature: "That the welfare of the people in this State is dependent

in large part upon the maintenance of the high productivity of the farms and ranges in California, the efficiency of the processing and packing industries handling farm products, and in the continued improvement of methods of production, distribution and utilization of agricultural products grown in the State."

We further concur in the basic principle that research with practical application determines the future advancement of any industry. We believe that expenditures of public moneys, properly directed and supervised in agricultural research, will benefit the entire economy of the State in the form of improved levels of living for farm families, more abundant supplies of nutritious foods for consumers, increased employment in agricultural processing and distributing industries, and increased activities for all segments of business.

We believe that public funds set aside for research can be self-liquidating in the form of additional tax dollars derived from the additional wealth and business enterprises which have thus been created. This committee wants to be helpful in providing for this advancement to the State.

The College of Agriculture of the University of California is now engaged in 36 fields of research endeavor constituting over 830 separate research studies.

The Agricultural Research Administration of the United States Department of Agriculture reports 90 research projects under way, all pertaining to the agricultural problems of California. These projects include active research by the bureaus of Agricultural and Industrial Chemistry, Animal Industry, Dairy Industry, Entomology and Plant Quarantine, Human Nutrition and Home Economics, and Plant Industry, Soils and Agricultural Engineering.

The Western Regional Research Laboratory of the United States Department of Agriculture is engaged in approximately 50 research projects relating to California consisting mainly of developing new methods by which industry can utilize California agriculture's by-products and wastes.

The Bureau of Agricultural Economics of the United States Department of Agriculture has submitted a report which in addition to its other work covers 10 major economic projects under way which directly relate to California agriculture.

The College of Agriculture in addition to research projects under way, has indicated that over 170 additional research studies need immediate attention.

EXAMPLES OF RESEARCH PROJECTS

The research projects now under way and planned are listed in Part II of this report by commodity groups. We describe here only a *very few examples.* These are typical of the many other listed and are given solely to illustrate how research helps develop a better agriculture.

I. Typical Projects Which Are Under Way Within the State

A. Soils and Plant Nutrition

The University of California reports that the effects of various phosphatic-nitrogen ratios on yields and fruit quality have shown that low phosporus-high nitrogen makes for spongy fruit which drops prematurely.

B. Beneficial Insect Investigations

The introduction of a certain parasite *(Metaphycus Helvolus)* from South Africa has brought pests such as black scale under almost complete control on citrus. On olives it has been beneficial but control is not complete.

C. Veterinary Science

Bovine mastitis, with respect to causes, methods of control and treatment has been investigated in commercial and institutional dairy herds. It has been demonstrated that chronic mastitis caused by streptococcus agalactia can be eradicated through segregation of infected cows and the application of specific intramammary therapy.

D. Grape Culture and Wine Production

A study of the influence of variety and environmental conditions on quality wines has indicated the usefulness and the proper region of production of over 100 of the wine-grape varieties. Improvements have been made in the methods of extraction and the color stability of wine. Rapid aging devices and practices are under investigation.

The University of California reports that research findings covering Ens-Microbiological investigations are pointing to a pattern of behavior and control of both the helpful and harmful organisms encountered in wine production. Bio-assays of the vitamins of grapes and wines are being continued along with research on the stability of the vitamin of wines and the effect of methods of vinification on stability.

II. Typical Projects Which Have Been Planned But Have Not Been Undertaken by the State

A. The Nature of Disease Resistance

The University of California reports that while much progress has been made in developing varieties of crops resistant to one or more diseases, almost nothing is known as to why certain varieties have a resistance while other varieties are susceptible to disease. Quoting from the report: "A knowledge of this fundamental subject would lead to improved methods for the study and development of resistant varieties of crops."

B. Forage Crops

Development of sod-forming grasses for irrigated pastures and new range grasses for beef cattle are urgently needed. Quoting from the report: "Such research needs to be instituted to determine proper procedure to follow to insure maximum feed production for our livestock."

C. Agricultural Economics

Another field of importance during the coming years is agricultural labor relations. Quoting from the report: "There is need for careful

objective study of possible ways to better balancing of agricultural labor demand and supply, stabilizing of work opportunity, improving employer-employee relationships, and lessening the costs arising from strikes and other employer-employee conflicts."

III. Typical New Projects Needed

Of the new projects needed are those relating to products that are grown or manufactured elsewhere but lend themselves to California cultivation and are needed in by-product form to sustain our economic balance in both agriculture and industry, such as:

1. Culture of oil crops, such as soy beans, peanuts, sunflowers, flax and others which provide protein by-products.
2. Herbicides in weed control.
3. Biologically active chemicals produced largely from both plant and animal by-products and residues.

IV. Examples of Coordinating and Cooperating Research With Governmental Agencies

A. Biological Control of Klamath Weed

The Agricultural Research Administration of the United States Department of Agriculture reports that this problem is now being studied in cooperation with the University of California, and the purpose is to effect control of the Klamath weed through introduction of natural enemies from Australia. Two of these have already been released in large numbers and field recoveries have been made. Quoting from the report: "It is estimated that this work may require from five to ten years to complete the importation and colonization program now under way."

B. Cereal Crops and Diseases

Several new rust and smut resistant varieties of wheat have been developed in cooperative work at Davis. Baart 38 and White Federation 38, two of these improved varieties, are now grown on most of the acreage sown to wheat in California. Improved barley and oat varieties developed at the station are also grown on commercial acreage in the State. Quoting from the report: "Work of this nature should be continued indefinitely in order to keep abreast of new races of the disease to which the older varieties may be susceptible. Otherwise, the advantages gained by breeding disease-resistant varieties may be lost."

C. Veterinary Science

Brucellosis in cattle and swine is being investigated at Berkeley and Davis and the results are tried out on numerous farms. The United States Bureau of Animal Industry has designated the Laboratory at Berkeley as a repository for the care and development of cultures of strain 19 from which vaccine is prepared by Experimental Stations and commercial manufacturers. Dairymen, beef cattlemen and swine producers have benefited by results of research to prevent the abortion and sterility that is caused by Brucella infection. Cooperative arrangements with the State Department of Agriculture and Public Health, as well as the United States Bureau of Animal Industry, promote the research with respect to the welfare of livestock and also to public health.

GENERAL FINDINGS AND OBSERVATIONS

During the committee's deliberations, more than 2,000 requests for research work have been received from farm people and their representatives. Although considerable duplication appeared in these requests, these frequent repetitions are of value in determining the research needs of California agriculture. The committee has made no attempt to establish priority of research needs, believing that function can best be performed by the administrative heads of the research agencies in cooperation with the respective industry representatives.

The great number of requests for research and extension work should be valuable to the executive and legislative branches of the State Government in determining a course of action with respect to appropriations.

The committee summarizes below its findings, based upon the evidence obtained at the public hearings and from other sources:

1. Farm people, more than others, are conscious and aware that California's agricultural research program has not kept pace with the problems developed in the fields of production, processing and utilization of the agricultural products of the state. There exists with our farm people a universal desire to have an expanded, aggressive program of agricultural research, and the application of such research to production, processing and marketing problems.

2. Water is an important limiting factor of California agriculture. Efficient use of irrigation water is one of the major factors in the maintenance and complete utilization of the agricultural potentialities of California. Data are needed, for each climatic condition in the state, regarding the efficiency of many different systems of irrigating; the net and consumptive use of water by crops; losses by percolation; drainage problems; conservation of underground water supply, and the amount of water wasted through the unnecessary growth of weeds.

3. Diseases and pests cause large preventable losses to farm crops, poultry and livestock each year. There is need of more information with respect to the breeding and selection of improved and disease-resistant strains of plants, trees, vines, and animals and with respect to methods of prevention, control and eradication of insect pests, diseases, and noxious weeds affecting the various classes of crops, poultry, and livestock.

4. The problems of crop rotation, fertilizer requirements, including soil improvement, and irrigation practices looking toward prevention of soil deficiencies which contribute to depletion of both livestock and crops are cited by most farmers as basic problems requiring additional information.

5. The effect of such factors as irrigation, fertilization, soil variations, production and harvesting practices on vitamin and mineral and other nutritional values of California crops should be determined.

6. California livestock industries require improved range grasses, more high-protein feeds and protein supplements. Livestock producers seek more information on the eradication of noxious weeds and shrubs on range and pasture lands.

7. Further mechanization adaptable to both large and small farm operations and the modernization of farm buildings and rural homes are

important to the future betterment of California agriculture. Such development is essential to increase the productivity of farm labor and improve farm living.

8. Many of our processing industries require additional scientific data made available through agricultural research in order to adjust their operations to meet present and future needs of agriculture and the consuming public.

9. The millions of tons of agricultural wastes that are discarded or destroyed each year may likely furnish feeds and the raw materials for new chemical, biological and other types of industries under proper research guidance.

10. California agriculture is interested in improved forestry practices looking toward a productive and sustained timber industry and toward future protection of watersheds and forest ranges in the Western area.

11. Farmers are in need of economic analyses of the factors affecting the production, marketing, consumption and prices of the various crop and livestock products. Such analyses are especially needed by farmers to aid them in meeting anticipated postwar readjustment problems. These analyses should include consideration of such matters as production costs, packaging, processing, refrigeration, transportation and other marketing costs and trends in consumer demand.

12. Recruitment, training, housing and reasonable stability of employment for farm labor, through crop diversification and other means, to the mutual satisfaction of employer and employee is a continuing problem requiring the attention of California agriculture.

13. Farm women request increased research and extension activities with respect to home management, including nutrition, clothing, child care and home beautification.

14. An increased number of field plots are desired in various counties and areas to test the value of the results of research work under actual growing conditions. Suggestions were made that such plots be established cooperatively between interested farmers and the College of Agriculture through its Agricultural Extension Service with the aid, where necessary, of the research workers of the Experiment Station.

15. The farmers request that agricultural research be conducted by the University of California through its College of Agriculture, including its various stations. Some requests were made for additional stations.

16. Farmers believe that commodity and advisory groups composed of farm people should confer with research workers of the university for the purpose of discussing and reviewing research work affecting their particular commodities.

17. The Agricultural Extension Service is regarded as the appropriate agency to carry to the farmers throughout the State the findings of research agencies. It is recognized that this requires the personnel of the Extension Service to be enlarged and its equipment adapted to meet current needs.

CONCLUSIONS AND RECOMMENDATIONS

The committee's conclusions and recommendations which follow are based upon a factual investigation of the problem. The committee, therefore, recommends to the Governor of California and to the members of the California State Legislature that:

1. An expanded and accelerated program of agricultural research be adopted and put into operation by the State of California as rapidly as competent research personnel can be obtained. The gradual development of such a program is necessary in order to avoid the employment of ineffective research workers.

2. The Agricultural Experiment Station of the College of Agriculture of the University of California be the recognized agency to plan, supervise and administer the State's agricultural research program.

3. The Agricultural Extension Service of the College of Agriculture be the recognized agency to carry the findings of all research agencies to farmers. The Extension Service and other phases of the College of Agriculture be provided with necessary equipment and additional personnel to perform two functions—(1) more complete contact with farmers for the purpose of disseminating research findings, and (2) increased activities in field plots and tests for both livestock and crops.

4. Field test plots, including those applicable to dairy, livestock and poultry problems, should be utilized in different areas and conducted in cooperation with interested farmers. Where necessary, present field stations should be expanded to meet the specialized needs of the State and the areas which they serve. It is necessary to keep in mind that effective research concerning most agricultural problems requires the coordinated efforts of a considerable number of scientists in different fields. This makes it necessary to concentrate basic agricultural research at a few research centers. The work of field test plots should be designed to test out under varying field conditions the research results developed at the primary research centers.

5. Increased facilities both in buildings and laboratory equipment be provided for the College of Agriculture of the University of California, its branches, and field stations to attract the highest type of research workers and to facilitate their work.

6. Attention of farmers and county governments is called to the need for proper facilities for the local headquarters of the Extension Service. Such headquarters should be located where they are readily accessible to farmers and where demonstration materials and apparatus can be shown. Furthermore, counties should be encouraged to purchase necessary equipment and labor for the conduct of field tests. An analysis of the essential needs of each county should be made in order to avoid any expansion which cannot be maintained during periods of normal economic conditions.

7. Since water is a basic resource permeating every phase of the State's development, the committee recommends continued coordinated studies by state agencies of all phases of the water problems of California, such as the development, protection, and optimum use of the State's watersheds; the avoidance of contamination of both underground and surface supplies; the equitable distribution of water between rural and urban users; the economic duty of water for agriculture; the protection

of land from excess water; and all other problems involving water in relation to the maximum development of the State. The committee recommends cooperation between rural and metropolitan groups.

8. Human nutrition should be given more emphasis in future research programs. Improvement in the nutrition of farm and city families means a broader market for the fruits, vegetables, meats, dairy, poultry and other products grown by California farmers. The scientific determination of the nutritive and dietetically protective values of these various products is highly desirable for the sound development of broader consumer markets. The results of such research should be made available to both farm and city families. In this connection, authorization should be given to the extension of educational activities in the field of nutrition to nonfarm families. The Agricultural Extension Service should be authorized to carry on such activities.

Research in home economics should also be expanded in order to provide the basis for better living in rural and urban homes.

9. California farmers should be supplied with information relative to the possibility of new crops which can be grown economically in California. This information should cover not only production and handling methods which have been tried experimentally, but should also include information with respect to production and handling costs and market prospects.

10. Sufficient supervision should be exercised over research workers to accelerate the progress of the research studies, to assure close collaboration among research workers in related fields, and to provide for the proper termination of research studies. Work done in the various divisions and departments should be effectively correlated and directed toward comprehensive solution of important California problems. This is not intended to limit the scope or methods of research workers to predetermined ideas of supervisors.

Research programs should be so organized as to permit diversion of funds and personnel to urgent emergency problems as they arise.

11. Authority be given the College of Agriculture to obtain information from other states and foreign countries through personal investigation on pests and diseases which affect California agriculture.

12. The findings of agricultural research be made promptly available to agriculture and its related industries in such form as to be readily usable. Negative findings are important and should be made available to agriculture in the same manner as positive findings. Research results should have rapid release and immediate publication in language readily understood by farmers. Where necessary the University of California should, through contract with commercial printers or otherwise, facilitate the expeditious publication of information bulletins. Research workers of the College of Agriculture should be given recognition not only for technical publications but for practical and group research as well.

13. The budget of the College of Agriculture for the Fiscal Year 1946-47 is approximately $6,240,000. Of that amount, $1,000,000 was appropriated at the special session of the Legislature in January, 1946.

The special appropriation of $1,000,000, together with an added increment of about $73.000 from federal funds, has been divided for the current fiscal year among the various centers of activity as follows:

State-wide (Extension Service and emergency)	$238,000
Berkeley	231,000
Davis (Including Melloland, $130,000)	496,000
Los Angeles	37,000
Riverside	71,000
Total	$1,073,000

The committee is not in a position to estimate any change in the general level of costs including salaries. It feels, however, that after adjusting for such general changes, there should be added to the College of Agriculture budget for the biennium beginning July 1, 1947 for agricultural research and extension, a minimum of $2,000,000 for the two-year period. The University of California should have some latitude regarding the proportion of the amount which should be made available for the first year of the biennium.

Attention of the State Legislature is directed to the provisions of Public Law No. 733, commonly known as the Flannagan-Hope Bill. In making appropriations of new state funds it may be possible to provide that such new funds can be effectively supplemented by federal funds appropriated pursuant to the provisions of Public Law No. 733.

Under a coordinated program of agricultural research by the Federal and State Governments having to do with California problems, there should be a minimum amount of overlapping in order to effect economies of both federal and state expenditures. The committee recognizes the inseparability of research, education and regulation and urges more effective cooperation between the various public employees working in agricultural pursuits. Such cooperation can and will effect a financial saving and a more adequate service to agriculture.

In making the above recommendations, the committee calls attention to the fact that progress in agricultural research and extension was necessarily retarded during the war years. Agriculture is now faced with some readjustments to peacetime conditions and markets. While the nature and extent of these readjustments cannot be anticipated with a high degree of accuracy, the committee believes that an expanded program of research and the wide dissemination of the results of such research will contribute most effectively to the solution of the postwar problems of California agriculture. The research projects should be carefully planned in the light of present and prospective needs. Economies should be made wherever possible without interfering with the attainment of effective results. The committee believes that these objectives can be achieved more readily with the aid of frequent consultation with groups of interested farmers and others who are familiar with the continuing and changing needs of the different branches of agriculture.

It is the judgment of the committee that appropriation of public moneys for agricultural research, when judiciously spent, and the translation of scientific findings into practical use, represent an investment in

the future of California and assure enhanced benefits, increased employment and improved living standards to the State's inhabitants.

Respectfully submitted.

APPENDIX I

SENATE BILL No. 124

Chapter 144

Fifty-sixth (First Extraordinary) Session

INTRODUCED BY SENATOR HATFIELD

February 15, 1946

(Approved by Governor March 12, 1946. Filed with Secretary of State March 12, 1946.)

An act to create an Agricultural Research Study Committee, provide for its powers and duties, and making an appropriation.

The people of the State of California do enact as follows:

SECTION 1. The Agricultural Research Study Committee, herein called the committee, is hereby created. It shall consist of nine members, to be appointed by and serve at the pleasure of the Governor. Three members shall be representative of the public at large; the other members shall have practical knowledge and experience in the production, processing or distribution of agricultural, horticultural, viticultural, livestock, and dairy or poultry products.

The Director of Agriculture and the Dean of the College of Agriculture of the University of California are ex officio members of the Committee. One member of the Senate appointed by the Senate Committee on Rules, and one member of the Assembly appointed by the Speaker, shall meet with and participate in the work of the Committee as ex officio to the extent that such participation is not incompatible with their respective positions as members of the Legislature. The members of the Legislature so appointed are hereby constituted a legislative interim committee on the subject of this act, with all the powers and duties imposed upon such committees by the Joint Rules of the Legislature.

SEC. 2. The members of the committee shall receive no compensation for their services under this act, but shall be reimbursed for their actual and necessary expenses incurred in connection with their duties hereunder.

SEC. 3. Within 30 days after this act becomes effective, the members of the committee shall meet at Sacramento and organize for the carrying on of its activity. The committee shall elect a chairman and vice chairman from its membership and shall select a secretary who may but need not be a member of the committee.

SEC. 4. The committee shall study and ascertain all pertinent facts and relevant matters, and shall, within 30 days prior to the next regular session of the Legislature, prepare and present a report to the Governor and the State Legislature on the scope and general progress of research and the extent of the practical application of the results thereof to problems affecting agriculture and related industries. The committee shall ascertain the necessity for the creation of a permanent agency or the possibility of the use of existing agencies to insure the widest possible dissemination of the benefits of such research. Such report shall also

include reference to, but not be limited to, long-standing or current problems requiring research with relation to the production, processing, and distribution of agricultural products, the need, if any, for applying research to new and improved methods of production, processing and distribution of such products, the experimentation necessary to be carried on in connection with new plants, herbs or other products of the soil, together with recommendations regarding the continuance or future expansion of a research program necessary or helpful to the solution of existing problems of agriculture and related industries to the end that the prosperity of this State shall remain unimpaired. The Committee is authorized to do any and all things necessary to carry out the provisions of this act.

SEC. 5. Out of any money in the State Treasury not otherwise appropriated, the sum of ten thousand dollars ($10,000) is appropriated to the committee for expenditure in carrying out the purposes of this act, without regard to fiscal years.

SEC. 6. The committee shall cease to have existence on and after the ninety-first day after final adjournment of the Fifty-seventh Regular Session of the Legislature.

PART II

INTRODUCTION

The purpose of this part of the committee's report is to indicate the general scope of the research studies under way in the Agricultural Experiment Station and also some of the urgent needs for the expansion of this research as reflected in proposals submitted at the request of the committee by the various divisions of the Agricultural Experiment Station.

A review of the research under way, as well as of the tentative proposals for expansion of existing projects and the inauguration of new projects in response to needs, has been most helpful to the committee in its consideration of the need for an expanded research program.

In addition the committee has received at its hearings and subsequently numerous excellent presentations concerning the need for additional research with respect to the problems of different farming industries and for more effective programs for getting the results of such research put to practical application by farmers.

These presentations by farmers, groups of farmers and representatives of related industries have materially aided the committee in arriving at its general conclusions as set forth in Part I of this report. All of these statements and recommendations have been incorporated in Appendix II of the committee's report which is too extensive to be reproduced in printed form. The committee requests the College of Agriculture to utilize these statements in planning future research studies, particularly as such studies relate to specific agriculture industries. The material will also be helpful in the formulation of programs for carrying the results of research to farmers and related industries.

CONDENSED STATEMENT OF RESEARCH BY COMMODITY GROUPS

APICULTURE (HONEY BEES) AND BEE PRODUCTS

Introduction

Apiculture in California is important, not only because of the honey crop that is produced by the bees, but even more because of the necessity of pollination of fruits in the orchards of the State. The increasing use of poisons in controlling insect pests, particularly arsenicals, has brought a threat to the honey bee industry; so also has the development of dusting and spraying by means of airplanes, which often cause a drift of poisons over a wide range. Studies to eliminate insect pests in a manner that will protect the honey bees, offer a challenge to the research worker in entomology. Below as Section I are listed the research studies now under way which are of interest to the bee industry. Section II lists projects in entomology which have been undertaken but which need expansion to meet the urgent needs of apiculture.

Section I

A. Honey Bee Breeding and Production

1. Genetics of the honey bee.
2. Artificial ensemination for bee breeding.
3. Investigations of bee breeding stock in California.
4. Use of sulfa drugs to eliminate foul brood.

B. Pollination of Fruit (As Related to Bees)

1. Pollination requirements of deciduous fruit trees.

C. Pest Control (Phases to Protect Beneficial Insects)

1. Greenhouse thrips. DDT versus pyrethrum.
2. Tomato insects.
3. Alfalfa insects. DDT and sulphur.
4. DDT investigations.

D. Marketing and Management

1. Methods of analyzing consumer preferences.
2. Economic situation confronting California farmers.
3. Proposals for improved farm management practices.
4. Developments in cooperative marketing.

E. Bee Culture

1. Insect pollination.
2. Pollen-gathering and nectar-gathering by bees.
3. The behavior of the honey bee towards DDT.
4. Apiary management.

Section II

A. Pollination

1. Taxinomic study of pollen grains gathered by the honey bee.

B. Pest Control (Protection of Beneficial Insects)

1. Pest control studies.
2. Expansion of analytical service.
3. Beekeeping. Reorganization of agricultural pest control programs.
4. New insecticides. Analyses of the residues on various crops from the health standpoint.

CITRUS

Introduction

While much of the basic research work relating to citrus is carried on at the Experiment Station in Riverside, a great deal of work is done at other campuses of the University of California. Additional studies are made by the United States Department of Agriculture, including the Research Laboratory at Albany.

Research work for the citrus industry has reached into all phases of its operations, including plant selection, cultural, handling of fruit, marketing and economics. The industry has requested new projects and a speeding-up of some work which is now under way. Growers are particularly concerned with improved methods of pest control, studies looking towards the arresting of quick-tree decline, better cultural practices which will result in improved quality and size, and operations which will reduce production and handling costs.

Field plots for the purpose of testing the results of research work in the various producing areas are encouraged as a means of broadening the use of material which becomes available at the various research stations.

Section I

A. Cultivation and Irrigation

1. Noncultivation in citrus orchards.

B. Diseases (Fruit)

1. Orange rind in relation to water-spot injury.
2. Water spot-fruit quality studies.
3. Water spot on navel oranges.
4. New fungicides used to control brown rot of citrus.
5. Decay of citrus fruits.
6. Better control of blast, black pit and Septoria spot.
7. Water rot of navels.
8. Granulation of valencia fruits.

C. Diseases (Tree)

1. Combatting lime-induced chlorosis.
2. Armillaria root rot of fruit trees.
3. Rosellinia root rot of woody plants.
4. Plant viruses.
5. Pathogenic fungi.
6. Damping off of seedlings.
7. The nature of fungicidal action.
8. Relative humidity at leaf surface (plant injury caused by fungus invasion).
9. Antibiotics in the control of plant disease.
10. Antagonism between micro-organisms in the control of plant disease.
11. Mutation in pathogenic bacteria.
12. Neat treatment of woody nursery stock eliminate root knot nematode.
13. Trunk and root diseases of some subtropical plants.
14. Field studies of new or unrecognized diseases.
15. Scaly bark of citrus.

16. Other diseases of citrus (virus).
17. Shell bark of lemons.
18. Blossom blight of lemons.
19. Armillaria root rot.
20. New fungicides investigated.
21. Mesophyll collapse of citrus leaves.

C. Drainage and Irrigation

1. Movement of soil moisture.
2. Water-holding capacities of soils.
3. Energy required to remove unit quantity of water from soil.
4. Penetration of water.
5. Soil permeability of water.
6. Evaporation.
7. Plant-soil-water relations.
8. Soil moistures.
9. Effect of irrigation practices on quality of fruit.
10. Irrigation requirements of California crops.
11. Root development of plants in relation to soil moisture.
12. Electrical properties of soils.
13. Hydraulics or sprinkler systems.
14. Heat conductivity of soils.
15. Pumping for irrigation.
16. Measuring irrigation water.
17. Efficiency of irrigation equipment and irrigation structures.
18. Flood control investigations.
19. Economic aspects of irrigation.
20. Water quality and reclamation in Coachella Valley.
21. Pre-development plans of the Yuma Mesa and Imperial East Mesa projects.
22. Studies on effect of fertilizers on water penetration.
23. Irrigation in regard to type of soil.
24. Irrigation equipment.
25. Water use by citrus trees.
26. Response of navel orange trees to soil moisture.
27. Salinity studies Coachella Valley.
28. Drainage investigations—Imperial Valley, Orange County.
29. Effect of chemical composition on water movement.
30. Amount of water in relation to rate of infiltration of water.
31. Effect of fertilization on water penetration.
32. Deterioration and recovery of water permeability.
33. Holding water in soil under static and dynamic conditions.
34. Leaching and nitrification of NH_3 (ammonia).

D. Fertilization

1. Nitrogen—losses of nitrogen in irrigation water (anhydrous ammonia).
2. Nitrogen—study of gaseous nitrogen losses from soil.
3. Nitrogen—conditions conducive to nitrite formation.
4. Nitrogen—seasonal usage of nitrogen by citrus trees.
5. Phosphorus—effect of phosphate-nitrogen ratios on yield and fruit quality.

6. Phosphorus—methods of determining phosphorus status of citrus trees.
7. Phosphorus—supplying citrus trees with phosphorus.
8. Phosphorus—leaf analysis relation to phosphorus.
9. Potassium—effect of potasssium deficiency and excess on appearance and fruit quality.
10. Potassium—leaf analysis method for determining potassium status of orange trees.
11. Minor elements—elements essential for citrus.
12. Minor elements—correcting iron chlorosis.
13. Minor elements—analyzing plant material (method of).
14. Alkali studies—trend of salinity in soils and underground waters.
15. Soil acidification.
16. Basic citrus nutritional studies.
    a. Mineral deficiencies and excesses on citrus.
    b. Studies on nutrient element in interrelations.
    c. Effect of various nutritional factors on citrus fruit.
17. Effect of composition of the soil on nutritive value of foods grown.
18. Effect of chemical composition on quality of oranges.
19. Citrus fertilization.
20. Minor elements for citrus.
21. Methods by which roots absorb nutrients.
22. Researchs of micro-elements.
23. Lime-induced chlorosis in plants.
24. Fixation of potassium and phosphate in soils.
25. Evaluating supply of mineral nutrients in soils.
26. Processes in soil by which nitrogen is lost.
27. Nitrate nitrogen source of oxygen for roots.
28. Artificial root aeration.
29. Boron deficiency.
30. Methods determining pH of leaves.
31. Sulphur-regulating soil acidity.
32. Potassium injury on citrus.
33. Chlorine accumulation in citrus.
34. Phosphorus—amounts determined.
35. Aluminum—effect on phosphorus efficiency.
36. Rootstocks—effect on absorption and accumulation of elements.
37. Organic fertilizers—effect on soil acidity.
38. Nitrogen studies—rate of absorption and effect on the trees.
39. Potassium studies—orchard soils and trees.
40. Phosphorus studies—requirements of fruit trees and soils.
41. Boron studies—excess boron.
42. Zinc studies—mottle-leaf on citrus.
43. Manganese studies—fruit tree nutrition.
44. Sodium studies—growth and nutrition of fruit trees.
45. Mechanism of fertilizer fixation.
46. Measuring soil reaction.
47. Chemical methods of soil analysis.
48. Zinc fixation.
49. How plants feed in soils.

50. Use of nitrate-resins for fertilizer purposes.
51. Decomposition of organic matter in soils.
52. Fertilizer needs of California soils.

E. Frost Protection

1. Orchard heater development.
2. Wind machines for frost protection.
3. Atmospheric turbulence in relation to frost.
4. Atmospheric turbulence in relation to frost problems.
5. Methods of predicting temperature distribution in frozen soils.
6. Temperatures necessary to injure citrus fruits and foliage.

F. Pruning

1. Response of subtropical fruit trees to pruning.
2. Pruning policy relating to operations of picking and spraying.

G. Quick Decline and Decline

1. Tree Decline (Quick Decline of oranges).
2. Quick Decline (transmission of).
3. Quick Decline of citrus in regard to characteristics of the soil.
4. Rootstocks for areas where Quick Decline is prevalent.
5. Quick Decline research.
6. Quick Decline—effect on juice of fruit from trees.

H. Rootstocks and Breeding Citrus

1. Vegetative propagation of subtropical fruit plants.
2. Rootstock—scion effects in subtropical fruit plants.
3. Rootstocks for citrus.
4. Rootstocks for areas where quick decline is prevalent.
5. Citrus varieties and species.
6. Selected clones or strains of lemon varieties.
7. Citrus breeding.
8. Study of Nucellar of "non-hybrid" seedlings.
9. Rootstocks of oranges and lemons.
10. Rootstocks—effect on absorption and accumulation of elements.
11. Seedbed preparation and cultivation.

I. Soils

1. Soil surveys.
2. Soil interpretations (counties using planning boards).
3. Soil ratings and soil classification.
4. Soil information—Central Valley Project, Imperial East Mesa and Coachella.
5. Key for classification of California soils.
6. Type location for major soil types of California.
7. Museum of California soil monoliths.
8. Participation in activities of State Soil Conservation Commission.
9. Changes in soil permeability.
10. Effect of soil texture on permeability.
11. Determining soil structure.
12. Structure of colloidal clays.

J. Sprays and Pest Control

1. Pruning policy relating to operations of picking and spraying.
2. Pest control equipment.
3. Black scale on citrus.
4. Red scale on citrus.
5. Method for confining crawling organisms such as insect larvae.
6. Mass production of various diaspine scale insects.
7. The longtailed mealybug (occasional pest of citrus).
8. New insecticides such as DDT.
9. Mealybug species.
10. Mass propagation of parasitic hymenoptera.
11. Specimens of California insects (museum collection).
12. Establishment of laboratory of insect pathology.
13. DDT residues in fruits.
14. DDT for control of thrips.
15. DDT for plant and orchard mites.
16. Agricultural practices in relation to insect elimination or control.
17. DDT investigations.
18. Insecticide residues on foods.
19. Plant nematodes.
20. California red scale, yellow scale and purple scale.
21. Citrus red mite (red spider).
22. Citrus bud mite.
23. Citrus thrips.
24. Citricola scale and black scale.
25. Greenhouse thrips.
26. Orange worms.
27. Aphids.
28. Acids in citrus.
29. Oil sprays decrease soluable solids in orange juice and usually in acid.
30. Rotenone in derris root.
31. Sulphur dust and sprays—injury to citrus tissues.
32. Absorption and accumulation of sulphur in lemons dusted.
33. 4D (a weed destroyer) effect on production and leaf drop.
34. Ridging in citrus fumigation.

K. Miscellaneous

1. Selling citrus fruits (auction as compared with private sale).
2. Forecasting orange production in California.
3. Determining rates of pay for lemon pickers (methods of).
4. Rates of pay for lemon pickers.
5. Operating efficiency in citrus.
6. Effect of growth fruiting and tree management operations.
7. Physiological studies of subtropical fruits (storage requirements).
8. Floral behavior and fruit morphology of subtropical fruits.
9. Prediction of final fruit size.
10. Prediction of total seasonal rainfall.
11. Rapid determination of dust deposits on trees.
12. Economic studies of pipe insulation.
13. Fruit composition of citrus.

14. Quick determination of surfaces and volumes, also height of citrus trees.
15. Stomata size determined for citrus leaves.
16. Oil gland size and density of citrus fruits.
17. Lignin studies—comparative amounts in trunk of citrus trees.
18. Studies in alternate bearing.
19. Morphological studies of fruits and fruit trees.
20. Harvesting, handling, precooling and cold storage.

DAIRY PRODUCTION AND PROCESSING

Introduction

Dairy production and the processing and distribution of dairy products is one of the most basic of the agricultural industries. The care and breeding of dairy animals and the sanitary and efficient handling of the products of the dairy are of great importance to all of the people making up our rapidly expanding population. This industry to serve the public adequately must have the best scientific data on the breeding, feeding, management and care of livestock and the handling and processing of dairy products to obtain the most nutritive food values. Below, under Section I, are listed research studies recently completed or now in progress by the established research agencies of the State. Reports made to the committee at hearings held in various sections of the State indicated the desire for further expansion of these studies and the need for others. Section II lists some of the new projects needed to meet the demands of this important industry.

Dairy production includes the products of both cattle and goats and processing includes all phases of packaging, process handling, and manufacturing of all forms of dairy products to meet the various market requirements.

Section I

A. Breeding

1. Hereditary defects in livestock.
2. Size factors in cattle.
3. Glutathione concentration and hereditary size.

B. Management

1. Proposals for Bodega Cooperative Creamery, Inc. and Point Reyes Dairymen's Association.
2. Proposals for Farm Credit Administration.
3. Tariff protection for farm products.
4. Responsibilities of government in land tenure improvement.
5. Situation and outlook studies for dairy products.
6. Economic situation confronting California farmers.
7. Analysis of specialized farm organization, practices—Sacramento, San Joaquin, Delta.
8. Pest control equipment.
9. Milk houses and milking barns. Uniformity of inspection standards.
10. Milking barns for goats.
11. Environmental influences affecting the growth, health and production of livestock.
12. Milk cooler capacities.

13. Post and Fencing.
14. Transport buck rake.
15. Bulk handling of milk.
16. Irrigated pasture mixture.
17. Fertilization of legumes.
18. Effect of incomplete milking on chronic Mastitis.
19. Feeding trials and palatability tests.
20. Methods of compounding rations.
21. Raising dairy calves.
22. Methods mechanical and chemical for weed control in drainage ditches, canals and ponds.
23. Growth-regulating substances as weed killer.
24. Toxicity of herbicides to animals.
25. Insects distinctive to the Klamath Weed.
26. Utilization and improvement of chaparral lands for grazing.
27. Seedbed preparation and cultivation.
28. Plant-soil-water relations.
29. Quality of alfalfa to irrigation treatment.
30. Methods of measuring irrigation water.
31. Farm irrigation systems.
32. Methods by which roots absorb nutrients.
33. Processes in soil by which nitrogen is lost.
34. Dallis grass ergot.

C. Nutrition

1. Digestion trial studies on new feeds.
2. Deficiencies in rations for calves.
3. Vitamin A deficiency in livestock.
4. Minimum requirements of Vitamin A for livestock.
5. Efficiency of food utilization.
6. Deficiency diseases.
7. Carotene content of alfalfa hay.
8. Roughage in the diet of ruminants.
9. Rumen synthesis of Vitamin B.

D. Physiology

1. Body size and metabolism.
2. Respiration trial apparatus.
3. Body size and energy metabolism.
4. Changes in the mucosa of the genital tract.
5. Influence of temperatures on respiration.
6. Reproductive therapy.
7. Bloat in cattle and sheep.
8. Metabolic research with Isotopes.

E. Technology

1. Fly sprays for dairy cows.
2. Whole milk powder and ice cream mix.
3. Antioxidants for use in milk products.
4. Methods of Lipase Enzyme control.
5. Evaporated milk—causes and prevention of greenish discoloration.
6. Evaporated milk—brown discoloration.

7. Vitamin A content of butter.
8. Method of preparation of butteroil.
9. Vitamin and mineral content of cottage cheese.
10. Bulk handling of milk.
11. Chemical composition of milk fat.
12. Best ways to use fruits and nuts in ice cream.
13. Method of preparing Romano cheese.
14. Quaternary ammonium compounds or germicides.
15. Market milk production.
16. Application of chemical sterilizers on dairy equipment.
17. Nutritional value of milk fat.
18. Animal parasites.
19. Spraying of dairy barns for fly control.
20. Use of fruits in ice cream and ices.
21. The role of enzymes in food processing.
22. Research on range grasses.
23. Determination of the mechanism and extent of change in the nutritive value of the proteins of milk.
24. Factors which will limit the control of bovine.
25. Brucellosis in cattle and swine.
26. Studies of bovine anaplasmosis.
27. Miscellaneous diseases. Suspected poisoning or deficiencies of trace elements in natural feed.
28. Bibliography of rodent control.
29. Reproductive rates and cycles in the pocket gopher.
30. Calculating poison bait mixtures.

Section II

A. Breeding

1. Cross breeding for hybrid rigor in dairy cattle.
2. Artificial insemination for development of improved dairy animals.

B. Management

1. Commodity and outlook studies.
2. Price analysis.
3. Marketing and distribution.
4. Farm organization and management.
5. Population in relation to marketing livestock products.
6. Study of milking barns and equipment to reduce investment and lessen hand labor.
7. Environmental influences affecting growth, health and production of livestock.
8. Irrigated pasture management.
9. Livestock management in Klamath Weed areas.
10. Effect of environment on livestock—particularly under high temperature conditions.

C. Nutrition

1. Nutritional value of alfalfa.

D. Physiology

E. Technology

1. Molybdenum poisoning of livestock.
2. Disease control in livestock.
3. Livestock pest control; development of materials and methods.
4. Metabolic research with Isotopes.
5. Causes and prevention of shrinkage in ice cream.
6. Studies to promote greater usage of non-fat dry milk solids.
7. Effect of dehydration on the nutritive value of milk proteins.
8. The effect of milk industry control programs on consumers.
9. Spectrophotometric methods to problems of carotene, vitamin activity of dairy products.
10. Acute bovine mastitis; prevention and cure.
11. Blood obtained from slaughtered animals, immunizing against infectious diseases.
12. Diseases of calves and foals.
13. Disease affecting reproduction in cattle and horses.
14. Diseases of cattle, sheep, bovine and horses.

DECIDUOUS FRUITS AND NUTS INCLUDING FIGS, BERRIES AND OLIVES

Introduction

The deciduous fruit and nut crops of California represent a large fraction of the State's agricultural income, and these products contribute directly to the agricultural processing industries as well. California fruits and berries are sold throughout the nation in fresh, canned, dried and frozen form, and our markets are maintained on a high quality basis at reasonable consumer prices. To maintain this position requires constant research on problems of production, management, processing, and marketing. While much has been accomplished through research, growers and processors believe research now under way should be accelerated and new projects should be undertaken. Nut growers and processors are concerned with new post war problems in production, particularly disease and pest control, production costs, and management and marketing problems. They too are independent upon research. The olive industry including processing is expanding rapidly and California olive products are now in strong demand. To hold and expand existing markets requires studies leading to greater production efficiencies and better processing methods. Olive growers feel their industry has not received the research attention it deserves. Berry production during the war was greatly curtailed and it requires research to establish varieties now in demand for the fresh and frozen markets.

Section I which follows lists research studies now under way or recently completed relating to Deciduous Fruits and Nuts and includes also research studies on Figs, Berries and Olives.

Section II is a condensed statement of additional needed research to promote these agricultural commodities.

Section I

A. Plant Breeding

1. Fig varieties, fruit quality and resistance to Nematodes.
2. Olive rootstocks and varieties.

3. Peach breeding.
4. Improvement of deciduous fruit and nut varieties.
5. Nut investigations. Varieties best adapted to different sections.
6. Small fruit studies. Yield, size, appearance and quality.
7. Olive investigations. Fruit-bred differentiation; mechanical harvesting of oil olives.

B. Plant Nutrition

1. Lysimeter study. Fixation of nitrogen.
2. Losses of nitrogen from Anhydrous Ammonia as a nitrogen fertilizer.
3. Study of gaseous nitrogen losses.
4. Study of conditions conducive to nitrate formation.
5. Effects of phosphate-nitrogen ratios on yield and fruit quality.
6. Effects of potassium deficiency and excess.
7. A study of correcting iron chlorosis.
8. A spectrographic method of analyzing plant material.
9. Trend of salinity in soils and underground waters.
10. Soil acidification.
11. Littleleaf studies on deciduous fruit plants.
12. Walnut fertilization.
13. Minor elements; studies with walnuts.
14. Researches on micro-elements.
15. Chemical mechanism by which plants synthesize sugar and starch.
16. Cumulative effects and biennial cropping on thirteen typical California soils.
17. Evaluating mineral nutrients in soils.
18. Boron deficiency. Symptoms for citrus, walnuts, avocado, dates, almonds and olives.
19. pH methods.
20. Sulphur for soil acidity.
21. Potassium injury on citrus and walnuts.
22. Phosphorus. Deficit, minimum, optimum, maximum and excess.
23. Aluminum beneficial effect on phosphorous efficiency.
24. Nitrogen studies.
25. Potassium studies.
26. Phosphorus studies.
27. Boron studies.
28. Zinc studies.
29. Manganese studies.
30. Sodium studies.
31. Split-pit and gumming.
32. Prune die-back.
33. Black-end of pears.
34. Studies in alternate bearing.
35. Morphological studies of fruits and fruit trees.

C. Plant Diseases

1. Almond brown rot blossom blight.
2. Peach shot hole.
3. Peach brown rot.
4. Apricot jacket rot.
5. Almond crown gall.

6. Armillaria root rot of fruit trees.
7. Rosellinia root rot of woody plants.
8. Pear fire blight.
9. Corky pit of pear.
10. Apple leaf spot and defoliation.
11. Cherry buckskin disease.
12. Almond bud failure disease.
13. Diamond canker of prune, stony pit of pear and other rough bark virus diseases.
14. Walnut blight.
15. Walnut leaf blotch.
16. Walnut limb wilt.
17. Walnut black line disease.
18. Fig spoilage.
19. Cycloconium leaf spot of olive.
20. Olive dieback.
21. Cane fruit diseases.
22. Plant viruses.
23. Pathogenic fungi.
24. The nature of fungicidal action.
25. Leaf surface.
26. Antibiotics.
27. Antagonism—between microorganisms.

D. Pest Control Including Materials and Application

1. Pest control equipment.
2. Biological control of black scale on citrus and olives.
3. Biological control of the codling moth on apples, pears and walnuts.
4. Mass production of the Oriental Fruit Moth Parasite, macrocentrus ancylivorus.
5. Method of separating lepidopterous hosts and their parasites.
6. Method for confining crawling organisms.
7. New insecticides.
8. Studies showing mealybug species are two different species; citrus and pear distinct from grapes.
9. Analytical service.
10. Herbicides.
11. Biologically active chemicals.
12. Deciduous fruit pests and virus diseases.
13. Codling moth control with DDT.
13. Oriental Fruit Moth.
14. Grapes. Pierce's Disease.
15. Thrips. DDT control.
16. Scale insects on olives, figs and walnuts.
17. Plant and orchard mites.
18. Redberry disease of blackberries.
19. DDT investigations.
20. Insecticide residues on foods.
21. Insects affecting stored food products.
22. Insect proof container project.
23. Insect borne plant virus diseases.

24. Plant nematodes.
25. Codling moth—walnuts.
26. Walnut husk fly.
27. Red spider.
28. Black scale.
29. Codling moth—apples and pears.
30. Spider mites.
31. Woolly apple aphid.
32. Oriental Fruit Moth—peaches.
33. Chemical studies of insecticides.
34. Olive "Peacock spot."

E. Product and By-Product Utilization

1. Best ways to use fruits and nuts in ice cream.
2. Analysis of California walnuts for thiamine riboflavin and niacin for storage.
3. Effect of pretreatments on quality and vitamin content of dehydrated cooked fruits and vegetables.
4. Biological value of carotene as source of Vitamin A.
5. Effect of composition of the soil on the nutritive value of foods.

F. Fruit Utilization Investigations

1. Freezing preservations:
   a. Fruit purees.
   b. Velva fruit.
   c. Pie fruits.
   d. New pil pack.
   e. Freezing technique for Italian prunes.
   f. A new antioxidant.
   g. Coliform organisms in orange juice.
   h. Blanching and cooling.
   i. Experimental centrifugal deaerator.
2. Dehydration:
   a. Spray drying.
   b. Drying rates of raspberries.
3. Pectin:
   a. Production of low-methoxyl pectin by a new method.
   b. Utilization of apple thinnings.
   c. Chemical and physical studies on pectin.
   d. Jellied fruit salad.
   e. Pectin fibres and films.
4. Protein and vitamin rich food or feed supplements:
   a. Torula yeast investigations.
5. Enzyme preparations:
   a. Pectic enzymes.
   b. Amylase and maltase in orange peel.
6. Isolation analysis and characterization of constituents:
   a. X-ray analysis of sodium pectate.
7. Ascorbic acid from walnut hulls.

G. Processing and Engineering

1. Precision planters.
2. Steam blanching of cut fruits.
3. Farm fruit dehydration.
4. Drying yard tray lifter.
5. Improved methods of dehydrating fruits.
6. Improvements in the processing for and the freezing of fruits and vegetable juices.
7. Improvements in Spanish green olive process.
8. Elucidation of darkening of dried fruits.
9. Fumigation—sterilization of dried fruits.
10. Dehydration of prunes.
11. Preparation and preservation of fruit juices.
12. Varietal adaptability.
13. Chemical, bacteriological and technological studies on ripe olive pickling.
14. Use of fruits in ice cream and ices.
15. Changes in vitamins.
16. The role of enzymes in food processing.
17. Utilization of California fruits in candy, beverages, jelly, juices, etc.
18. The role of pH value in food processing and preservation.
19. Other problems: pectin, pectic enzymes, wine yeasts, etc.
20. Harvesting, handling, precooling and cold storage.

H. Orchard Management

1. Proposals for improved farm management practices.
2. Analysis of specialized farm organization and practices.
3. Land settlement.
4. Orchard heater development.
5. Wind machines for frost protection.
6. Transport buck rake.
7. Fruit catching frames.
8. Tree shaker development.
9. Atmospheric turbulence (frost problems).
10. Injurious effect of sorghum on succeeding crops.
11. The role of enzymes in the soil.
12. Fixation of various forms of fertilizer in soil.
13. Methods, mechanical and chemical, for weed control.
14. Carbon Bisulphide as a soil sterilant.
15. Growth—regulating substances as weed killers.
16. Weed control machinery and equipment.
17. Use of 2, 4-D to control nut grass.
18. Organic compounds as herbicides.
19. Bil fractions as herbicides.
20. Controlling poison oak.
21. Anatomic study of plants treated with 2, 4-D (weed killer).
22. Rate of caprification of figs.
23. Pollination requirements of deciduous fruit trees.
24. Rootstocks for deciduous fruit trees.
25. Re-establishment of peach orchards in old peach soils.
26. Thinning of deciduous fruits.

27. Nut investigations.
28. Small fruit studies.
29. Olive investigations.
30. Bibliography of rodent control.
31. Reproductive rates and cycles in the pocket gopher.
32. Calculating poison bait mixtures.

I. Marketing

1. Statistics, 1946 demand for canned peaches.
2. Proposals for Farm Credit Administration.
3. Tariff protection for farm products.
4. Methods of analyzing consumer preferences.
5. Statistical relation of income to expenditure.
6. Index, level of living, farm population.
7. Bias in index of the cost of living.
8. Responsibilities of government in land tenure improvement.
9. Situation and outlook studies for California fruits.
10. Economic situation confronting California farmers.
11. Parity prices and parity income formulas.
12. Developments in cooperative marketing.
13. International trade and tariff policies.

J. Soils and Irrigation

1. Movement of soil moisture.
2. Water-holding capacities of soils.
3. Penetration of water.
4. Soil permeability of water.
5. Plant-soil-water relations.
6. Soil moisture.
7. Olive irrigation.
8. Quality of fruit.
9. Irrigation requirements.
10. Quality of prunes.
11. Root development.
12. Pumping for irrigation.
13. Methods of measuring irrigation water.
14. Farm irrigation systems.
15. Economic aspects of irrigation.
16. Studies on the effect of fertilizers on water penetration.
17. Irrigation experiments with fruit trees.
18. Ten year soil surveys in fifteen farming areas.
19. Areas surveyed for publication: Colusa, Merced, Madera, Arizona.
20. Key for classification of California soils.
21. Type location for major soil types.
22. Effect of chemical composition of soil on water movement.
23. Changes in soil permeability.
24. Effect of soil texture.
25. Influence of water on rate of infiltration.
26. Deterioration and recovery of water permeability.
27. Determining soil structure.
28. Fixation of ammonia and ammonium sulfate on California soils.

29. Laws of base exchange.
30. Measuring soil reaction.
31. Specific chemical methods for soil analysis.
32. Zinc fixation in soils.
33. Structure of colloidal clays in soils.
34. How plants feed in soils.
35. Use of nitrate-resins for fertilizers.
36. Decomposition of organic matter in soils.

K. Environment

1. Winter chilling requirements of deciduous fruit trees and vines.
2. Prediction of harvest date of apricots and prunes.
3. Prediction of final fruit size.
4. Prediction of total seasonal rainfall.
5. Biological phenomena.
6. Relation between size of peaches.
7. Relation between diameter and weight of green peaches.
8. Relation between diameter and weight of mature peaches.
9. Factors, res-period in deciduous fruit trees.
10. Relation of climate to deciduous fruit production.

Section II

A. Plant Breeding

1. Development of new varieties (trees).
2. Apple investigations. Leaf scorch, fertilizer, problems, pruning thinning, etc.
3. Small fruit investigations for canning, quick freezing and shipping.
4. Nut investigations. Walnut harvesting methods, mechanical tree shakers, oil deposits in kernels.
5. Fig investigations. Leaf scorch, caprification, rootstock, pruning, etc.

B. Plant Nutrition

1. Spectrographic methods. Analysis of field dusts, orchard-heater fuels, etc.
2. Tracer studies, artificial radioactive elements and stable isotopes.
3. Minor elements with walnuts.
4. Nutrition by mass spectrograph.
5. Manganese nutrition in plants.
6. Use of radio-active tracer elements.
7. Use of phosphate in synthesis of sugars and starch by plants.
8. Fertilizer experiments.
9. Bordeaux injury to trees.
10. Effects of dormant sprays.
11. Hormone sprays.
12. Russeting of fruit sprays.
13. Stimulation of fruit trees by foliage sprays.
14. Stimulation of fruit trees by dormant sprays.
15. Sprays to correct nutritional difficulties.
16. Apricot investigations.
17. Fertilization problems of fruit trees.
18. Cling peach studies.

19. Effect of crop on the chemical constituents of the tree.
20. Seasonal study of tree constituents, carbohydrates, nitrogen, mineral elements, etc.

C. Plant Diseases

1. Diseases of small fruits.
2. Fruit tree root rots and virus diseases.
3. Brown rot of peach and cherry fruits.
4. Bacterial gummosis and rust of stone fruit trees.
5. Walnut limb wilt, leaf scorch, crown rot and black line.
6. Olive knot.
7. Apple powdery mildew.

D. Pest Control

1. Pest control studies
2. Biological control of codling moth.
3. Codling moth. Apricots, peaches, plums and other plum fruits.
4. Insects attaching cut flowers and nursery stock.
5. Beekeeping. Reorganization of pest control programs.
6. New insecticides: DD, DDT, DDD, 666, 240, 1068, Sabadilla, Ethylene Dibromide, etc.
7. Insect baits and traps.
8. New insecticides, effect on fruit and foliage as well as insects.

E. Product and By-product Utilization

1. Effect of pretreatment on frozen fruits and vegetables.
2. Factors affecting foods grown, processed or stored.

F. Processing and Engineering

1. Engineering problems in processing California products.
2. Engineering efficiency studies of packing house operations.
3. Food acceptance studies.
4. Bacteriology of frozen foods.
5. New techniques of fruit juice preservation.
6. New techniques of concentration of fruit juices.
7. Bacterial spoilage of canned foods.

G. Orchard Management

1. Field experiments with citrus, effects of noncultivation, etc.
2. Machinery and equipment for tree workers.
3. Studies of reactions of driven wheels and tracks to soils.
4. Farm transportation problems.
5. Non-cultivation in citrus.
6. Effects of hormones.
7. Causes of low yields of olives.
8. 2, 4D and similar compounds.
9. Apple investigations.
10. Small fruit investigations. Quick freezing, canning and shipping small fruits.
11. Nut investigations.
12. Fig investigations.

H. Marketing

1. Commodity and outlook studies.
2. Price analysis.
3. Marketing and distribution.
4. Farm organization and management.
5. International trade.
6. Population changes.

I. Soils and Irrigation

1. Studies on root development.
2. Calibration tests on gate valves and other types of water control.
3. Sprinkler jet tests.
4. Oxygen-supplying power of soils.
5. Improve farm irrigation structures.
6. Land preparation for irrigation.
7. Economics of irrigation by sprinkling.
8. Cost of water and its application.
9. Irrigation investigations with deciduous fruit.

J. Environment

1. Investigation of surface climatology.

FIELD CROPS

Introduction

The field crops of California contribute much to the agricultural income of the State. These crops include cereals such as wheat, oats, barley, rice, corn and the sorghums. California also is a heavy producer of dry beans and peas, and oil crops such as flax, peanuts, cotton, sesame and sunflowers. Sugar beets is a field crop of importance. Our hay and forage crops are of first importance to our livestock development as is also our range and pasture grasses. California produces many seed crops which are grown for certified seed markets.

Hearings before the Agricultural Research Study Committee indicated a need for additional research for field crops. Listed below as Section I are research studies now in progress or recently completed by existing agencies which are of interest to growers. Section II lists some of the additional studies which are urgently needed to meet the demands of field crop farmers.

Section I

A. Plant Breeding

1. Disease and insect resistant strains of wheat.
2. Barley breeding, mildew and scale resistant variety of Atlas.
3. Bat varieties. Resistant to stem and crown rust.
4. Genetics of disease resistance. Resistance to Blunt, Hessian Fly, Mildew and Scald.
5. Double dwarf Milo 38 resistant to pythium root rot.
6. Corn breeding. To develop a strain which will set seed under conditions of high temperature.
7. Resistance of sweet corn to ear worm.
8. Corn hybrids of eastern origin tested under local conditions.
9. A yellow tamale variety has been bred.
10. Sudan 23, a high yielding selection, has been developed.

11. Alfalfa varieties and strain. Adaption, yield, disease resistance and longevity.
12. Improvement of native range grasses.
13. Black eye beans. Resistant to nematode and cowpie wilt.
14. Improved strains of red kidney bean.
15. Improved early strain of pink bean.
16. Nematode resistant of small limas.
17. Improvement of other bean varieties to develop strain resistant to diseases, higher yielding, better quality.
18. Flax breeding to develop strain resistant to the more serious diseases.
19. Research on range grasses. Crossing certain wild species and creating hybrids to make them fertile.
20. Research on commercial tobacco and its relatives. Breeding of disease resistant varieties.
21. Fundamental problems. "How and Why" of heredity and development of the individual plant or animal.
22. Tomato breeding for resistance to Fusarium Wilt, nematode, spotted wilt. Greater Vitamin C content.
23. Carrots being bred for resistance to leaf blights.
24. Peas being bred for resistance to blight and Fusarium Wilt.

B. Plant Nutrition and Fertilization

1. A lysimeter study to determine the net fixation of nitrogen from legumes and nonlegumes under irrigation agriculture.
2. Losses of nitrogen from the use of Anhydrous Ammonia as a nitrogen fertilizer in irrigation water.
3. Study of gaseous nitrogen losses from soil.
4. Study of conditions conducive to nitrate formation.
5. Basic studies to determine what additional soil elements are essential for citrus.
6 Study of correcting iron chlorosis.
7. Spectrographic method of quantitatively analyzing plant material.
8. Injurious effect of sorghum on succeeding crops.
9. Importance of legumes in dry land rotation.
10. The role of enzymes in the breakdown of organic matter on the soil.
11 The residual moisture left in non-irrigated soil by various crops.
12. Fertilization of legumes and the effect on succeeding grain crops.
13. Fixation of various forms of fertilizer in different soils, and their relation of their availability to crops.
14. Researches on micro-elements.
15. The chemical mechanism by which plants synthesize sugar and starch.
16. Soil conditions which produce lime-induced chlorosis in plants.
17. Cumulative effects and biennial cropping on thirteen typical California soils.
18. Fixation of potassium and phosphate in soils.
19. Evaluating supply of mineral nutrients in soils by analysis of the plants grown upon them.

20. Processes in soil by which nitrogen is lost through the action of micro-organisms.
21. Nitrate nitrogen may be a source of oxygen for roots growing in poorly aerated soils.
22. Sulphur for soil acidity.
23. Boron studies. Maximum safe applications.
24. Minor element deficiencies in California vegetables.

C. Crop Diseases

1. Alfalfa dwarf. Bacterial wilt and leaf spot.
2. Sugar beet phoma rot and bacterial blight.
3. Sugar beet target canker.
4. Sugar beet seedling diseases.
5. Ascochyta blight of peas.
6. Peas, lima beans, blackeye beans. Protection against seedling diseases by chemical seed treatment.
7. Bean root rot.
8. Bean blight and anthracnose.
9. Flax anthracnose, pasmo disease and browning.
10. Cotton verticillium wilt.
11. Foot rot of wheat and barley.
12. Barley stripe.
13. Dallis grass ergot.
14. Potato premature decline.
15. Plant viruses. Multiplication and inactivation of viruses.
16. Pathogenis fungi.
17. Damping off of seedlings.
18. The nature of fungicidal action.
19. Leaf surface. Analysis of plant injury caused by fungus invasion.
20. Antibiotics. In the control of plant disease.
21. Antagonism. Between microorganisms in the control of plant disease.
22. Mutation. In pathogenic bacteria.
23. Yeast spot of lima bean seed. Found to result from toxic feeding of lygus bugs.

D. Pest Control, Insects, Weeds

1. Application of selective herbicides to control weeds in fields of small cereals, flax, peas.
2. Use of dinitro compounds. Oils, aqueous emulsions, contact herbicides.
3. Contact herbicides. Elimination of weeds in first cutting of alfalfa.
4. Selective herbicides to eliminate weeds in young stands of alfalfa.
5. Methods, mechanical and chemical for control of weeds in drainage ditches, canals and ponds.
6. Soil sterilization methods for ditchbanks, roadsides, fence lines, etc.
7. Carbon bisulphide as a soil sterilant.
8. Growth-regulating substances as weed killers.
9. Control of weeds in small grain fields, corn and sorghum fields.
10. Weed control machinery and equipment.

11. Weed control. Sugar beets, control of water grass, chemical blocking.
12. Cyanamid dust to weeds to prevent seed production.
13. Use of 2, 4-D and its substitution products to control nut grass.
14. Development of an herbicide selective for weedy grasses in broad-leaved crops.
15. Use of 2, 4-D dust as a substitute for borax in control of Klamath Weed.
16. Tests of 40 different organic compounds as herbicides.
17. Investigation of oil fractions as herbicides.
18. Methods of controlling poison oak.
19. Insects destructive to Klamath Weed.
20. Species of insects destructive to pest cactus.
21. Chemical fire retardants for grasses.
22. Herbicides. The identification and synthesis of compounds for use as herbicides in weed control.
23. Thrips. New insecticides, including DDT.
24. Alfalfa insects. Control with DDT and sulfur.
25. Cotton insects.
26. Insects of field peas. Controlled by dusting.
27. Agricultural practices contributing insect elimination or control.
28. Insecticide residues on foods.
29. Insects affecting stored food products.
30. Insect borne plant virus diseases.
31. Plant nematodes.
32. Insects affecting lawn grasses.
33. Reproductive rates and cycles in the pocket gopher.
34. Rice damage by "Pond Shrimp."
35. Calculating poison bait mixtures in rodent control.

E. Products and By-product Utilization

1. Detoxification of linseed meal for poultry.
2. Sesame seed meal protein is deficient in lysine but contains a high level of methionine.
3. Sunflower seed meal is a complete amino acid source for the chick.
4. Feeding corn increases the adult hen mortality over that obtained when barley is fed.

F. Alfalfa Utilization Investigations

1. Dehydration:
   a. Alfalfa meal standards.
   b. Alfalfa dehydration plants.
2. Extraction, stabilization, analysis of chloroplast pigments and other constituents:
   a. Stabilization of carotine in oil solutions.
   b. Analysis for carotine isomers.

G. Wheat Utilization Investigations

1. Industrial non-food uses of gluten. A gluten-glycerol rubberlike product.
2. Chetamic acid.

3. Gluten sulfate:
   a. Improved production process.
   b. Chemical studies.
4. Ergot alkaloids from fungi grown on wheat.
5. Isolation, analysis and characterization of constituents.
   a. Gluten protein composition.

H. Processing and Engineering

1. Seed processing by processing machinery. Sugar beet seed, tomato seed, spinach seed.
2. Precision planters. Horizontal and vertical plate types for accurate planting of small seeds.
3. Sugar beet harvester.
4. Blocking machinery for raw crops. Mechanical, chemical and flame.
5. Flame cultivation for cotton. Mechanical cotton harvesters. Mechanization of cotton planting systems.
6. Pest control equipment.
7. Sack type dehydrators. Drying of rice, beans, sorghum.
8. Bean cleaning machine for removal of clods from beans.
9. Transport buck rake for labor saving.
10. Homemade bale loader for labor saving.
11. Sack loader for labor saving.
12. Portable chain drag elevator for labor saving.
13. Barn drying of hay.

I. Soils and Irrigation

1. The trend of salinity in soils and underground waters.
2. Soil acidification.
3. Movement of soil moisture.
4. Seedbed preparation and cultivation.
5. Water-holding capacities of soils.
6. Energy required to remove unit quantity of water from soil.
7. Penetration of water into soils.
8. Soil permeability of water.
9. Evaporation from water surfaces, soils and plants.
10. Plant-soil-water relations.
11. Soil moisture.
12. Sugar beet investigations.
13. Quality of alfalfa in relation to irrigation treatment.
14. Baby lima beans. Irrigation and moisture content of soils to avoid wilting.
15. Irrigation requirements to establish high efficiency of water.
16. Root development of plants in relation to soil moisture.
17. Pumping for irrigation. Various types of pumps to particular conditions.
18. Methods of measuring irrigation water.
19. Farm irrigation systems. Improved methods.
20. Economic aspects of irrigation.
21. Removal of brush by fire or mechanical means.
22. A study of water quality and reclamation in Coachella Valley.
23. Causes of poor water penetration in the potato fields of Kern County.

24. Studies on the effect of fertilizers on water penetration.
25. Cultivation pan shown densest on soils with a wide range of particle size.
26. Salinity studies. Means of lowering the ground-water and salt removal in Coachella Valley.
27. Means of combatting lime induced chlorosis.
28. Activities in soil survey and soil classification.
29. Soil surveys in Colusa, Merced, Madera and Cuyama.
30. Soil interpretations for county land use planning boards.
31. Soil ratings and soil classification for county assessors.
32. Key for the classification of California soils.
33. Selection of type location for the major soil types of California.
34. Drainage investigations in Imperial Valley, Palo Verde Valley, Orange County and Round Valley.
35. Burning of peat lands.
36. Effect of chemical composition of soil on water movement.
37. Changes in soil permeability with time.
38. Effect of soil texture on water permeability.
39. Influence of amount of water in soil on rate of infiltration of water.
40. Effect of fertilization and cropping on water penetration.
41. Deterioration and recovery of water permeability.
42. Methods of determining soil structure.
43. Forces with which water is held in the soil under static and dynamic conditions.
44. Fixation of ammonia and ammonium sulfate in various California soils.
45. Studies of laws of base exchange. Fixation in soils, reclamation of alkali soils, etc.
46. Improved technique of measuring soil reaction.
47. Specific chemical method for soil analysis.
48. Process of zinc fixation in soils.
49. Structure of colloidal clays in soils.
50. How plants feed in soils.
51. Use of nitrate-resins for fertilizer.
52. Rates of decomposition of organic matter in soils.
53. Pot technique for exploring fertilizer needs.

J. Production, Management and Marketing

1. Tariff protection for farm products. How much?
2. Responsibilities of government in land tenure improvement.
3. Administration coordination of conservation policy.
4. Economic situation confronting California farmers.
5. Modernization of the parity price and parity income formulas.
6. Proposals for improved farm management practices.
7. Analysis of specialized farm organization, practices in the Sacramento and San Joaquin Delta.
8. Recent developments in cooperative marketing in the western states.
9. Evolution of economic policies relating to the agriculture of the United States.
10. Vetch and bat mixture for hay.

11. Stage of cutting of alfalfa.
12. Alfalfa varieties and strain.
13. Annual legumes for forage and soil improvement.
14. Irrigated pasture mixture.
15. Range and pasture grasses introduced.
16. Range management practices.
17. Plant succession.
18. Adapted flax varieties introduced.
19. Utilization and improvement of chaparral lands for grazing.
20. Costs and returns from controlled burning of brush.
21. Biological phenomena.
22. Theory of sampling.
23. Methods of pooling experimental data.
24. Improved and faster methods of testing significant difference in field trials.

K. Food Evaluation of Product

1. Seasonal changes in the chemical composition of range forage.
2. Efficiency of food utilization.
3. Factors affecting carotene content of alfalfa hay.
4. Feeding trials and palatability tests.
5. Utilization of the range.
6. Range nutrition.
7. Effect of composition of the soil on the nutritive value of foods.

L. Plant Growth and Development

1. Reproduction in guayule. Inability of some types to form hybrids.
2. Anatomic study of plants treated with 2, 4-D (weed killer).
3. Effect of curly top and mosaic on the sugar beet.
4. Physical-chemical biology. The synthesis of plant and animal materials including the proteins.
5. Systematic botany. Genetics of species of native genera.

Section II

A. Plant Breeding

1. Cereals. Genetics of disease resistance.
2. Milo. Development of an early variety with high yield.
3. The nature of disease resistance.
4. Corn disease studies. Fusarium root rots.
5. Improvement of Birdsfoot Trefoil.
6. Development of sod-forming grasses for irrigated pasture.
7. Mosaic resistance.
8. Pod borer control.
9. Variety of large lima beans for quick freezing.
10. Improvement of oil crops.
11. Biochemical genetics of starch.
12. Alkaloid chemistry in tobacco in relation to breeding.

B. Plant Nutrition and Fertilization

1. Dry farming. Nitrogen gains and losses.
2. Crop rotation.
3. Fertilizer studies on row crops.
4. Vegetable rotation experiments.
5. Maintenance of organic matter for vegetables.

C. Crop Diseases

1. Cereal root rots.

D. Pest Control, Insects, Weeds

1. Wire worm control.
2. Biological control of weed pests.
3. Chemical fire retardants for grasses.
4. Herbicides for weed control.
5. Grasshopper control.
6. Seed crops. Control of injurious insects.
7. New insecticides including DD, DDT, DDD, 666, etc.
8. Insect baits and traps.

E. By-products and By-product Utilization

F. Processing and Engineering

1. Seed cleaning and processing.
2. Hay harvesting studies.
3. Studies of cotton production under full mechanization methods.
4. Pest control studies. Sprays and dust applied by air or ground equipment.
5. Engineering problems in processing California products.
6. Studies of reactions of driven wheels and tracks to soils

G. Production, Management and Marketing

1. Commodity and outlook studies. Analysis of trends.
2. Price analysis. Factors influencing supply, demand and prices.
3. Marketing and distribution.
4. Farm organization and management.
5. Land and water use.
6. Alfalfa seed production.
7. Nutritional value of alfalfa.
8. Perennial legume for irrigated pasture.
9. Irrigated pasture management.
10. Seed production of pasture and range grasses.
11. Snap bean seed production.
12. Culture of oil crops.

H. Food Evaluation of Product

1. Food acceptance studies.
2. Fixed oils and new oil crops.
3. Cereal products. Utilization of new varieties.

FORESTS AND FOREST PRODUCTS

Introduction

The Department of Forestry, on the Berkeley campus of the University of California, has made noteworthy contributions to the timber industry of this State. However, more research pointing toward the development of a permanent timber industry for the State is needed. Hearings developed the need of more comprehensive research on the utilization of timber products and care and utilization of range lands. Building plans of the university include a building for research and instructional work, and a forest products laboratory, which was included at the instance of the Legislature. The work of the department will be

greatly enlarged, and investigations into the utilization of forest products will be extended when these structures become available. Section I which follows lists projects now in progress or recently completed. Section II lists the needs for additional research.

Section I

A. Forest Management

1. Reproduction in guayule.
2. DDT investigations.
3. Reproduction of native timber trees.
4. Mountain climates of the Western United States.
5. Financial aspects of forest management in private lands.
6. Methods of measuring and improving restocking of timber trees on cutover forests.
7. Plant viruses.
8. Pathogenic fungi.
9. Damping of seedlings.
10. The nature of fungicial action.
11. New fungicides.
12. Activities in soil survey and soil classification.
13. Soil surveys in Colusa, Merced, Madera, Cuyama.
14. Key for classification of California soils.
15. Type location for major type soils.
16. Participation. State soil conservation commission.

B. Forest Economics and Policy

1. Resource conservation and economic stability.
2. Administration coordination of conservation policy.
3. International.
4. National credit needs in forestry.
5. Development and formulation of economic principles in resource conservation.
6. Forest taxation in relation to public finance.
7. Economic factors affecting timber production in California.
8. A sound forest policy for California.

C. Forest Utilization

1. Condition of cutover timberlands.
2. Forest utilization problems in the redwood region.
3. Technical properties in California woods.

D. Forest Influences

1. Water from mountain watersheds as influenced by forests.
2. Improvement of soil moisture.
3. Penetration of water.
4. Soil permeability of water.
5. Evaporation. Studied thermodynamically.
6. Plant-soil-water relations.
7. Flood control.
8. Removal of brush.
9. Study of water quality. Coachella Valley.
10. Methods of predicting temperature distribution in frozen soils.
11. Effect of chemical composition of soil on water movement.
12. Changes in soil permeability.

13. Effect of soil texture on water permeability.
14. Influence of water on rate of infiltration.
15. Forces with which water is held in the soil.

E. Range Management

1. Range and pasture grasses introduced.
2. Improvement of native range grasses.
3. Range management practices.
4. Plant succession.
5. Beef cattle with range land problems.
6. San Joaquin Experimental Range.
7. Utilization of the range.
8. Range nutrition.
9. Use of 2, 4-D dust as a substitute for borax in control of Klamath Weed.
10. Utilization and improvement of Chaparral lands for grazing.
11. Costs and returns from controlled burning of brush.
12. Research on range grasses.
13. Vitamin content of California deer and antelope meat.
14. Bibliography of rodent control.
15. Increasing valley quail in California.
16. Reproductive rates and cycles in the pocket gopher.
17. Calculating poison bait mixtures.

Section II

A. Forestry Management

1. California insect survey.
2. Insects and wild life.
3. New insecticides.
4. Renewing California forests by seeding and planting.
5. Rate of growth and yield of the commercial timber species.

B. Forest Economics and Policy

1. Land and water use.
2. Population. Population changes.

C. Forest Utilization

1. Investigations of new forms of building materials.
2. Insects destroying wooden building materials, structures and other items.
3. Improving containers for shipping California fruits and vegetables.
4. Improved techniques in the use of wood for structural purposes.
5. Prolonging the supply of timber from old-growth forests.
6. Best ways of utilizing second-growth timber.
7. Wood preservation.
8. Development of specialized industries.

D. Forest Influences

1. Investigations of surface climatology.
2. Silt transportation problems.

E. Range Management

1. Studies of environmental influences affecting growth, health and production of livestock.

2. Seed production of pasture and ranges.
3. Biological control of weed pests.
4. Chemical fire retardants for grasses.
5. Life history of browse plants affecting improved range management. Wood technology.

GRAPES AND GRAPE PRODUCTS

Introduction

Grapes are grown in nearly every county in California, whether for marketing fresh, processing into raisins by dehydrator or sun-drying, or for manufacture into wine. Grown on a wide range of soils, under greatly varying climatic conditions and under irrigated and non-irrigated conditions, grapes present a wide range of problems in production and processing. Much progress has been made through research in alleviating the troubles of the grape grower, but there remains a strong demand for more research aid to one of the oldest agricultural industries of the State. Growers and processors believe research has not kept pace with the expansion of the industry, particularly in matters relating to breeding resistant varieties, the control of vine diseases, grape pests; the processing of grapes into raisins, wines and other food products; and the utilization and disposal of grape by-products and wastes. Section I below is a listing of research studies now under way or recently completed relating to grapes and grape products. Section II is a listing of additional needed research.

Section I

A. Plant Breeding

1. Breeding and selecting grapes.
2. The importation of new varieties of grapes.
3. Selection within varieties.
4. Methods for storing grape pollen.
5. Grape rootstocks.

B. Plant Nutrition and Fertilization

1. Effects of phosphate-nitrogen ratios.
2. Basic studies to determine what elements are essential.
3. Spectrographic method of analyzing plant material.
4. Trend of salinity in soils and underground waters.
5. Effect of composition of the soil on the nutritive value of foods.
6. Movement of soil moisture.
7. Water-holding capacities of soils.
8. Penetration of water.
9. Soil permeability of water.
10. Plant-soil-water relations.
11. Soil moisture.
12. Quality of fruit.
13. Heat conductivity of soils.
14. Farm irrigation systems.
15. Salinity studies. Means of lowering ground water and in salt removal.
16. Researches in micro-elements.
17. Fixation of potassium and phosphate in soils.
18. Evaluating supply of mineral nutrients in soils.
19. Processes in soil by which nitrogen is lost.

20. Nitrogen studies.
21. Potassium studies.
22. Phosphorus studies.
23. Boron studies.
24. Zinc studies.
25. Manganese studies.
26. Sodium studies.
27. Effect of fertilization on water penetration.
28. Deterioration and recovery of water permeability.
29. Fixation of ammonia and ammonium sulfate in soils.
30. Zinc fixation in soils.
31. Decomposition of organic matter.
32. Carbohydrate nutrition of the vine.
33. Minor element deficiencies and excesses.

C. Vine Diseases

1. Anatomic studies of the grapevine (Pierce's Disease).
2. Insect borne plant virus disease.
3. Plant nematodes.
4. Pierce's Disease of grapes.
5. Grape measles and powdery mildew.
6. Grape mosaic.
7. Bacterial wilt and leaf spot.
8. Armillaria root rot.
9. Plant viruses.
10. Methods of applying zinc to correct little leaf.
11. Pierce's Disease. Oil weed control. Shoot and cane management.

D. Pest Control

1. Growth-regulating substances as weed killers.
2. Weed control machinery and equipment.
3. Cyanamid dust to weeds. Preventing seed production.
4. Use of 2, 4-D to control nut grass.
5. Oil fractions as herbicides.
6. New insecticides. DDT lethal to the insect enemies of pests.
7. A laboratory of insect pathology.
8. Chemical fire retardants for grasses.
9. Herbicides.
10. Insect borne virus diseases.
11. Thrips.
12. Plant and orchard mites.
13. Agricultural practices contributing insect elimination or control.
14. DDT investigations.
15. California red scale, yellow scale and purple scale.
16. Grape bud beetle. DDT effective.
17. Grape leaf hopper. DDT effective.
18. Grape bud mite. Lime sulfur effective.
19. Armillaria root rot.
20. Bibliography of rodent control.

E. Product and By-product Utilization

1. Improved methods of dehydrating fruits.
2. Fumigation—sterilization of dried fruits.

3. Preparation and preservation of fruit juices.
4. The role of enzymes in food processing.
5. Utilization of California fruits, candy, beverages, jelly, juices, fruit powders.
6. Sanitary studies in food processing plants.
7. Study of Spanish sherry process.
8. Manufacture of tartrates from winery wastes.
9. Study of wine spoilage organisms.
10. The role of pH value in food processing and preservation.
11. Other problems: pectin and pectic enzymes; wine years; wine analysis.
12. Vitamin enrichment of grape juices and wines.
13. Relation of maturity of grapes to quality in wine.
14. Maturity studies of raisin grapes.
15. Influence of variety and environmental conditions on quality wines.
16. Color stability in wines.
17. Methods of production of various wine types.
18. Rapid aging devices and practices.
19. Influence of variety, proof of distillation and methods of aging.
20. Eno-microbiological investigations. Bio-assays, stability of vitamins.
21. Agricultural utilization of winery wastes.

F. Processing and Engineering

1. Flame cultivation.
2. Pest control equipment, ground machines and airplanes.
3. Farm fruit dehydrators.
4. Post and fencing.
5. Drying yard tray lifter.

G. Crop Management and Marketing

1. Relation of income to expenditures.
2. Economic situation confronting California farmers.
3. Developments in cooperative marketing.
4. International trade and tariff policies.
5. Evolution of economic policies relating to agriculture.
6. Processing policy. Costs.
7. Relation of climate to deciduous fruit production.
8. Harvesting, handling, precooling and cold storage.
9. Influence of processing on vine behavior.
10. Harvesting and packing table grapes.
11. Sulfur dioxide to retard decay in grapes
12. Grape palatability tests.
13. Grape thinning methods.
14. Girdling investigations.
15. Vineyard soil fertility maintenance.
16. Effect of leaf removals on vine behavior.
17. Influence of climatic region on color development.

Section II

A. Plant Breeding

1. The nature of resistance to insects.
2. Breeding for improved resistant stocks

B. Plant Nutrition and Fertilization

1. Study effects of "noncultivation."
2. Quality of products from irrigation practices.
3. Studies on penetration of irrigation water.
4. Effect of spacing and density of crop on the quantity of water used.
5. Effect of soil-moisture conditions on the nitrification of soils.
6. Irrigation investigations. Splitting and sowing of the fruit.
7. Nutrition by the installation of a mass spectrograph.
8. Manganese nutrition in plants.
9. Use of radio-active tracer elements.
10. Fertilizer experiments with the aid of methods of foliar diagnosis.
11. Fertilization problems. Factors modifying the rooting habits.
12. Effect of a crop on the chemical constituents of the tree.
13. Seasonal study of certain tree constituents.

C. Vine Diseases

1. Fruit tree root rots and virus diseases.
2. Effect of fungicides on parasites and on the host plant.
3. Replacement of missing vines.

D. Pest Control

1. Pest control studies.
2. Chemical fire retardants for grasses.
3. Herbicides.
4. California insect survey.
5. New insecticides. DDT, DDD, 666, 240, 1068, Sabadilla, etc.
6. Insect baits and traps.
7. New insecticides, effect on fruit and foliage as well as on the insects.

E. Product and By-product Utilization

1. Food acceptance studies.
2. New techniques of fruit juice preservation.
3. New techniques of concentration of fruit juices.
4. Viticultural factors influencing the keeping and shipping quality of grapes.

F. Processing and Engineering

1. Engineering problems in processing California products.
2. Engineering efficiency studies of packing house operations.
3. Farm transportation problems.
4. Spectrographic methods. Analyses of field dusts, orchard heater fuels, etc.
5. Spectrophotometric methods to problems of carotine, pigment, determination, etc.
6. Factors involved in drying, sulfur dioxide retention, keeping quality, etc.
7. The chemistry of varietal differences.
8. The relation of still design or type to brandy quality.

G. Crop Management and Marketing

1. Commodity and outlook studies.
2. Price analysis.

3. Marketing and distribution.
4. Farm organization and management.
5. Land and water use.
6. International trade.
7. Agricultural policy.
8. Population—nature of population changes.
9. Expansion of analytical service.
10. Cost of water and its application.
11. Viticultural factors influencing the keeping and shipping quality of grapes.
12. The replacement of missing vines.

HOME ECONOMICS

Introduction

The work of the Department of Home Economics has been largely in the field of human nutrition. The work on textiles and home furnishing was interrupted when the United States Army Signal Corps took over the Davis campus during the war and little was possible of accomplishment during that time. In the Division of Floriculture at Los Angeles, there has been much work done in home and home ground beautification. Plans for the future include three major buildings for Home Economics; one each on the Berkeley, Davis and Los Angeles campuses. With adequate space available and the departments better staffed, programs of research covering all phases of home economics are planned. The hearings developed the apparent need for better programs of research in rural housing, child development, home furnishing and equipment, and textiles and fabrics. Section I which follows lists research studies now under way or recently completed which are of interest in the field of home economics. Section II lists the need for additional research in this field.

Section I

A. Foods and Nutrition

1. Nutrition including animal biochemistry.
2. Calcium and phosphorus balances.
3. Calcium and phosphorus intake.
4. Body size and metabolism.
5. Vitamin A deficiency.
6. Efficiency of food utilization.
7. Deficiency diseases.
8. Respiration trial apparatus.
9. Body size and energy metabolism.
10. Rumen-synthesis of Vitamin B.
11. Study of structure of celery and carrots.
12. Keeping qualities of dehydrated carrots.
13. Whole milk powder and ice cream mix.
14. Antioxidants for use in milk and milk products.
15. Evaporated milk—greenish discoloration.
16. Evaporated milk—brown discoloration.
17. Vitamin A content of butter.
18. Vitamin and mineral contents of cottage cheese.
19. Chemical composition of milk fat.
20. Nutritional value of milk fat.

21. Best ways to use fruits and nuts in ice cream.
22. Method of preparation of Romano cheese.
23. Insecticide residues on food.
24. Insects affecting stored food products.
25. Insect proof container project.
26. Vegetable dehydration investigations.
27. Improved methods of dehydrating fruits.
28. Improvements in the processing for and the freezing of fruits and vegetables.
29. Fumigation—sterilization of dried fruits.
30. Dehydration of prunes.
31. Preparation and preservation of fruit juices.
32. Use of fruits in ice cream and ices.
33. Changes in vitamins.
34. Utilization of California fruits: candy, beverages, jelly, juices fruit powders, etc.
35. Sanitary studies in food processing plants.
36. The role of pH value in food processing and preservation.
37. Analysis of California walnuts. Thiamine, riboflavin, niacin.
38. Effect of Tocopherol feeding upon the Vitamin E and rancidity of frozen turkey meat.
39. Vitamin B content of chicken and turkey meat.
40. Determination of the mechanism and extent of the change in nutritive value of proteins of milk.
41. Pretreatments on quality and vitamin content of freshly dehydrated cooked and stored fruits.
42. Biological value of carotene.
43. Course of pyridoxine (Vitamin B_2) deficiency.
44. Relation of riboflavin deficiency to carbohydrate metabolism.
45. Relation of pantothenic acid to niacin and riboflavin deficiencies.
46. Eggs as a source of cholesterol.
47. Loss of ascorbic acid in tomato purees and pastes.
48. Effect of composition of the soil on the nutritive value of foods.
49. Vitamin enrichment of grape juices and wines.
50. Vitamin content of California deer and antelope meat.
51. Rating of nutritional value of vegetable crops.
52. Chemical mechanism by which plants synthesize sugar and starch.
53. Acids in citrus.
54. Volatile citrus peel oil. More abundant in valencias than in navels.
55. Nitrogen in citrus juices.
56. Hydrocyanic acid as a fumigant does not alter quality of the juice.
57. Oil sprays, used, cause decrease in soluble solids and acids in orange juice.
58. Dates. Chemical composition of Deglet Noor.
59. Choline and methionine.
60. Chick requirement for magnesium.
61. Chemical methods for protein quality.
62. Hatchability. Folic needed for hatchability.
63. Pyridoxine deficiency, chicks, poults and rats.
64. Trytophane metabolism.
65. Soybean protein.
66. Blood proteins. Isoleucine.

67. Sesame seed meal, deficient in lysine.
68. Sunflower seed meal.
69. Trytophane and methionine feedstuffs.
70. Genetic nature of resistance to riboflavin deficiency.
71. Hormones to fatten birds.
72. Radio-active phosphorus.
73. Package icing.
74. Curing and storage methods.
75. Transit condition of vegetables.
76. Peas. Resistance to blight.
77. Efficiency of California vegetables. Food value per acre per man hour.
78. Climatic response of broccoli. Adaptation to quick freezing.
79. Minimum grades of canning tomatoes.
80. Minor element deficiencies in vegetables.
81. Abscesses in beef livers.
82. Factors causing liver damage in man and animals.
83. A study of the influence of variety and environmental conditions.
84. Influence of climatic region on color development.
85. Color stability in wines.
86. Eno-microbiological investigations.

B. Housing Farm Families

1. Adobe block, farm labor houses and shelters.

C. Child Development

1. Development of a behavior rating scale for children.
2. Analysis of type and function of social contacts of young children.

D. Home Furnishings and Equipment

1. Farm freezers. Homemade types.
2. Farm fruit dehydration.
3. Farm home air cooling.

E. Textiles and Fabrics

1. Shrinkage and wool values.

F. Home and Home Grounds Beautification

1. Control of weeds in lawns.
2. Insects affecting lawn grasses.
3. Spider mites affecting ornamental shrubs and trees.
4. Platynota leaf-tier on carnations.
5. Flower thrips affecting ornamental plants.
6. DDT for control of pests of ornamentals.
7. Breeding and inheritance in flower crops.
8. New varieties of woody ornamentals.
9. Leaf spot of nasturtium.
10. Sweet pea mosaic.
11. Bacterial disease of larkspur and delphinium.
12. Surveys of cabbage and cauliflower seed fields.
13. Fusarium wilt of aster.
14. Alternaria disease of zinnia.
15. Petunia mosaic.
16. Powdery mildew of dephinium and zinnia.

17. Crown rot of larkspur.
18. Snapdragon rust.
19. Oak mildew.
20. Trunk and root diseases of ornamental trees and some subtropical fruits.

G. Family Income

1. Social Security program to farm people.
2. Methods of analyzing consumer preferences.
3. Relation of income to expenditure.
4. Construction of index to the level of living.
5. Bids in the index of the cost of living.

Section II

A. Foods and Nutrition

1. Engineering problems in processing California products.
2. Metabolic research with Isotopes.
3. Studies to promote usage of non-fat dry milk solids.
4. Food acceptance studies.
5. Bacteriology of frozen foods.
6. New techniques of fruit juice preservation.
7. New techniques of concentration of fruit juices.
8. Bacterial spoilage of canned foods.
9. Poultry products and by-products.
10. Cereal products.
11. Meat products. Frozen food locker plants.
12. Biochemistry of pigment and vitamins in tomatoes.
13. Biochemistry of rats in relation to breeding problems.
14. A study of the use of dry milk in bread.
15. Dehydration on the nutritive value of milk proteins.
16. Nutritional status surveys.
17. B vitamins and animo-acids of almonds.
18. Effect of variety environment and cultural methods in vitamin content of vegetables.
19. Factors affecting textile production and garment manufacture in California.
20. Effect of pretreatment of frozen fruits and vegetables, their nutritive values.
21. Factors affecting foods grown, processed, or stored under varying conditions.
22. Effect of milk industry control programs on consumers.
23. Analysis of field dusts, impurities in water, etc., by spectrographic methods.
24. Tracer studies with artificial radio-active elements and stable Isotopes.
25. Climatic effects on carbohydrate synthesis on fruit size.
26. Fertilizer experiments. Methods of foliar diagnosis.
27. Cling peach studies. Acid, sugar, color, volatile esters, etc.
28. Poultry management.
29. Spectrographic methods to determine egg quality.
30. Meat studies. Metabolism of specific nutrients.
31. Handling of produce.

32. Factors of dessert quality raisins. Drying, color, keeping quality, etc.
33. The chemistry of varietal differences of quality wines.

B. Housing Farm Families

1. New forms of building materials for adaptations to farm construction.

C. Child Development

1. Nutritional status surveys.

D. Home Furnishings and Equipment

1. Effect of dehydration on the nutritive value of milk proteins.
2. A study of family expenditures for clothing.

E. Home and Home Grounds Beautification

1. Insect baits and traps.
2. Research on insect and mite problems of floriculture and ornamental horticulture.
3. Ornamental horticulture and floriculture.
4. Diseases of herbaceous ornamentals grown from seed.
5. Disease of herbaceous ornamentals grown from bulbs.
6. Diseases of nursery crops.
7. Diseases of landscape materials.

F. Family Economy

1. Price analysis.
2. Marketing and distribution.
3. Population. Nature of population changes on the State's economic social and political institutions.
4. A study of standards for consumer's goods.
5. A history of the development of consumer cooperatives.

LIVESTOCK (LESS DAIRY ANIMALS)

Introduction

California's livestock industry, which is of vast importance to a full development of the State's agriculture, is handicapped by a shortage of range grasses and the production of high protein feeds and feed supplements. Likewise, it is concerned with the breeding of animals better suited to the State's climatic environments, and which may be more resistant to diseases and pests that cause heavy annual losses to breeders and feeders. The committee was impressed with the wide scope of research needed to promote the growth and development of this basic agricultural industry. Below as Section I are listed research studies now in progress or recently completed. The expansion of many of these studies is desirable. Section II lists additional research studies which could very well be considered to meet the needs of the State's livestock industry.

Livestock coming under this heading include beef cattle, sheep, swine, horses, and mules. Dairy animals (cattle and goats) are included under "Dairy Production and Processing," while poultry and rabbits are included under "Poultry and Poultry Products."

Section I

A. Breeding

1. Hereditary defects in livestock.
2. Crossbreeding in producing spring lambs.
3. Inbreeding Berkshire swine.
4. Nature of size factors in cattle.
5. Polydactyly in swine.
6. Glutathione concentration and hereditary size.
7. Hydrocephalus in swine.
8. Size inheritance in the rabbit.
9. Markings in Arabian horses.
10. Genetic resistance of swine to brucella infection.

B. Management

1. Proposals for Farm Credit Administration.
2. Tariff protection for farm products.
3. Responsibilities in land tenure improvement.
4. Economic situation confronting California farmers.
5. Pest control equipment.
6. Environmental influence affecting growth, health and production of livestock.
7. Post and fencing.
8. Transport buck rake.
9. Genetics of disease resistance.
10. Irrigated pasture mixture.
11. Range and pasture grasses introduced.
12. Fertilization of legumes.
13. Problems in calf and lamb crops.
14. Effect of milking on mastitis.
15. Circulars on sheep, wool, beef and hogs.
16. Feeding trials and palatability tests.
17. Methods of compounding rations.
18. Raising dairy calves.
19. Utilization of the range.
20. Range nutrition.
21. Electric pig brooders.
22. Efficiency of spayed, open and bred heifers.
23. Methods, mechanical and chemical, for weed control in drainage ditches, canals and ponds.
24. Growth-regulating substances as weed killers.
25. Toxicity of herbicides to animals.
26. Insects destructive to the Klamath Weed.
27. Insects destructive to pest cactus.
28. Utilization and improvement of Chaparral lands for grazing.
29. Costs and returns from controlled burning of brush.
30. Research on range grasses.
31. Small animal breeding project.
32. Vitamin content of California deer and antelope meat.
33. Seedbed preparation and cultivation.
34. Plant-soil-water relations.
35. Quality of alfalfa.
36. Methods of measuring irrigation water.

37. Farm irrigation systems.
38. Removal of brush.
39. Studies on the methods by which roots absorb nutrients.
40. Processes in soil by which nitrogen is lost.
41. Dallis grass ergot.

C. Nutrition

1. Factors affecting color of beef fat.
2. Digestion trial studies of new feeds.
3. Calcium and phosphorus balances in rats.
4. Chemical composition of range forage.
5. Vitamin A deficiency in livestock.
6. Minimum requirements of Vitamin A for livestock.
7. Efficiency of food utilization.
8. Deficiency diseases.
9. Carotene content of alfalfa hay.
10. Roughage in the diet of ruminants.
11. Vitamin B in the pig.
12. Rumen synthesis of Vitamin B factors.
13. Growth in beef cattle.
14. Nutrition and wool production.
15. Metabolic research with Isotopes.

D. Physiology

1. Calcium and phosphorus intake.
2. Calcium and phosphorus content of blood of pigs.
3. Body size and metabolism.
4. Respiration trial apparatus.
5. Body size and energy metabolism.
6. Sex hormones in the blood serum of mares.
7. Changes in mucosa of the genital tract.
8. Vaginal smear of the ewe.
9. Changes in ovary of mare.
10. Reproduction of sheep.
11. Diagnosis of pregnancy in the mare.
12. Artificial induction of ovulation.
13. Influence of temperature on respiration.
14. Reproductive therapy.
15. Concentration of gonadotrophin hormone
16. Bloat in cattle and sheep.

E. Technology

1. Medullated wool fiber.
2. Analysis of fleeces.
3. Moisture content of wool.
4. Shrinkage and wool values.
5. Shrinkage by sample scouring.
6. Effect of nutrition on wool.
7. Metabolism for horses.
8. Sheep branding fluids.
9. Fly sprays for dairy cows.
10. Combing tests with individual fleeces.
11. Relation of tip to top on wool fleeces.

12. Mechanized gas analysis apparatus.
13. Animal parasites.
14. Enzymes in food processing.
15. Brucellosis in cattle and swine.
16. Bovine mastitis.
17. Studies of bovine anaplasmosis.
18. Methods of vaccination against hog cholera.
19. Vesicular exanthema of swine.
20. Neoplastic diseases of animals.
21. Diseases of sheep.
22. Abscesses in beef livers.
23. Factors causing liver damage in man and animals.
24. Miscellaneous diseases.
25. Bibliography of rodent control.
26. Reproductive rates and cycles in the pocket gopher.
27. Calculating poison bait mixtures.

Section II

A. Breeding

1. Cross breeding for hybrid vigor.
2. Artificial ensemination for animal improvement.

B. Management

1. Commodity and outlook studies.
2. Price analysis.
3. Marketing and distribution.
4. Farm organization and management.
5. Population in relation to marketing livestock.
6. Studies of environmental influences affecting livestock.
7. Perennial legume for irrigated pasture.
8. Development of sod-forming grasses.
9. Irrigated pasture management.
10. Livestock management in Klamath Weed areas.
11. Effect of environment on livestock, especially high temperatures.
12. Range and wild life management.
13. Improve farm irrigation structures. Pipe systems.
14. Land preparation for irrigation.
15. Permanent pasture irrigation.

C. Nutrition

1. Nutritional value of alfalfa.

D. Technology

1. Molybdenum poisoning of livestock.
2. Disease control in livestock.
3. Livestock pest control; development of materials and methods.
4. Biological control of weed pests.
5. Metabolic research with Isotopes.
6. Insects and wild life.
7. New insecticides.
8. Meat products. Frozen food locker plants.
9. Biochemistry of rats in relation to breeding problems.
10. Acute bovine mastitis: prevention and cure.

11. Bacterial variation. New approaches to the prevention and cure of disease.
12. Livestock diseases that are especially associated with irrigation.
13. Diseases of calves and foals.
14. Diseases that affect reproduction in cattle and horses.
15. Diseases of cattle, sheep, swine and horses.

ORNAMENTAL PLANTS

Introduction

The peculiar climatic conditions of California have resulted in a widespread interest in ornamental plants. Development of this industry is largely predicated upon increased information, much of which requires original research. The creation of new varieties and propagation studies afford a basis for intensive study. In addition there must be much work done in the fields of pest and disease control, plant feeding and irrigation.

The University of California has recognized the importance of expanded research and has planned a great many studies. Rapid progress will depend upon cooperation between the producing factors in the industry and the University. The possibility of obtaining data from non-commercial producers in the field should not be overlooked.

Section 1

A. Cultivation and Irrigation

1. Expansion in irrigation studies.

B. Diseases

1. Insects in relation to virus diseases.
2. Diseases of ornamentals.
3. Bud-union disease of rose.
4. Water-mold rot of aloe and calla lily.
5. Rough bark disease of pittosporum.
6. Poinsettia virus disease.
7. Oak mildew.
8. Trunk and root diseases of ornamental trees.
9. Bleeding canker of oak.
10. Sycamore blight.

C. Fertilization

1. Nitrogen losses from anhydrous ammonia.
2. Correction of iron chlorosis.

D. Propagation and Breeding

1. Propagation studies.
2. Creation of new varieties.

E. Pruning

1. Pruning studies.

F. Soils

1. Trend of salinity in soils and waters.
2. Soil acidification.

G. Sprays and Pest Control

1. Pest and weed control equipment.
2. Weed control machinery.

3. DDT studies.
4. Sycamore scale.
5. Insects of lawns.
6. Spider mites.
7. Flower thrips.
8. DDT studies.
9. Root-knot nematode.

Section II

A. Diseases

1. Expansion in studies of nursery crop diseases.
2. Expansion in studies of diseases of landscape materials.

B. Soils

1. Expansion in soil studies.

C. Sprays and Pest Control

1. Better pest control equipment.
2. Nursery stock insects.
3. Insects of ornamental plants.

FLOWER CROPS

Introduction

The growing of flowers in this state until recently has received little attention. That industry now is not only recognized as being important by individuals for home beautification, but the production of flowers and flower seeds has become commercially important. Not only must there be basic research done by state agencies, but important information can be gained by studying the work done in other states and in foreign countries.

The local Extension Service should be in a position to expand their work, looking towards the testing of the results of research in the various climatic areas of the state.

Section I

A. Cultivation and Irrigation

1. Seedbed preparation and cultivation.

B. Diseases

1. Soil pasteurization equipment.
2. Insects in relation to virus diseases.
3. Easter lily diseases.
4. Nastursium leaf spot.
5. Sweet pea mosaic.
6. Bacterial disease of larkspur and delphinium.
7. Fusarium wilt of aster.
8. Alternaria disease of zinnia.
9. Petunia mosaic.
10. Powdery mildews on delphinium and zinnia.
11. Crown rot of larkspur and pansy.
12. Snapdragon rust.
13. Virus disease of orchids.
14. Bacterial fasciation of daisy.

C. Fertilization

1. Nitrogen losses from anhydrous ammonia.
2. Fixation of fertilizers in soils.

D. Propagation and Breeding

1. Breeding and inheritance.

E. Soils

1. Trend of salinity in soils and water.
2. Soil acidification.

F. Sprays and Pest Control

1. Pest and weed control equipment.
2. Weed control machinery.
3. Thrips control.
4. DDT studies.
5. Leaf tyer on carnations.
6. Flower thrips.
7. DDT studies.

G. Miscellaneous

1. Development of precision and seed planters.
2. Transport buck rake.

Section II

A. Diseases

1. Expansion in studies of easter lily diseases.
2. Expansion in studies of cut flower crops.
3. Expansion in studies of bulb crops.

B. Sprays and Pest Control

1. Better pest control equipment.
2. Insects of cut flowers.
3. Insect pests of flower crops.

POULTRY AND POULTRY PRODUCTS
(Including Rabbits)

Introduction

Poultry and poultry products represent one of the great food producing industries of California. Flocks range from a few birds kept in the backyard of the suburban dweller to those numbered in thousands on the many commercial poultry ranches of the State. The problems of management are many, and constant research is necessary to maintain an efficient industry. Feed and nutrition problems are of primary importance as are also those relating to diseases, sanitation and housing, pest control, and marketing. The poultry producers of California believe the importance of their industry justifies much more research than is now being carried out.

Rabbit producers claim their industry receives but little research attention even though the annual sale of rabbit products now runs into the millions of dollars. In this report rabbits are included with poultry but much of the livestock research is also applicable to rabbits.

Poultry production includes chickens, turkeys, geese and ducks grown for commercial or domestic use. Rabbits merit separate attention.

Section I which follows lists research studies now under way or recently completed of interest to growers of these animals. Section II lists additional needed research.

Section I

A. Breeding

1. Size inheritance in the rabbit.
2. Small animal breeding project.
3. Fundamental problems. "How and Why" of heredity in the individual animal.
4. Biological phenomena.
5. Culling systems. Effect on progeny testing.
6. Animal molt of pullets.
7. Bleaching changes in shanks for culling purposes.
8. Decline in annual egg production with age.
9. Inheritance of egg production.
10. Limitation of control of lymphomatosis.
11. Accuracy of superior families.
12. Nicking—not an important role in breeding.
13. Sexual maturity of male chickens and turkeys.
14. The breeding structure.
15. Merits of individual family selection.
16. Inheritance of winter pausing.
17. Heritability affecting egg production.
18. Inheritance and seasonal distribution of the tendency to produce blood spots.
19. Nature of shell quality deterioration.
20. Inheritance of crooked toes. Lethals.
21. Characters affecting meat quality.
22. Size inheritance.
23. Genetic nature of resistance to riboflavin deficiency.
24. Growth patterns of leghorns.
25. Hormones to fatten birds.
26. Radio-active phosphorous to the egg.
27. Egg quality surveyed on ranches.
28. Abnormal eggs.
29. Cooling rate of eggs.
30. Turkeys measured to differentiate between strains.
31. Inheritance of conformation of turkeys.
32. Maturity in turkeys.
33. Egg production in turkeys and chickens.
34. Genetically maturing turkeys.
35. Lethal or sublethal genes in turkeys.

B. Nutrition

1. Efficiency of food utilization.
2. Deficiency diseases.
3. Carotene content of alfalfa hay.
4. Pantothenic acid.
5. Biologically active chemicals.
6. Metabolic research with Isotopes.
7. Nutritional value of milk fat.
8. Amino acid requirements.
9. Amino acid deficiencies. Tongue deformity.

10. Choline and methionine.
11. Perosis results. Diets deficient in manganese.
12. Chick requirement for magnesium.
13. Gizzard erosion.
14. Chemical methods for protein quality.
15. Hatchability. Folic acid needed.
16. Pyridoxine deficiency.
17. Tryptophane metabolism.

C. Diseases

1. Animal parasites.
2. Turkey disease research.
3. Research on the diseases of chickens.
4. Neoplastic diseases of animals.
5. Diseases of rabbits.

D. Environments

1. Poultry housing.
2. Lighting for turkey production.
3. Poultry house cooling.
4. Energy consumption.

E. Poultry Products and By-products

1. Egg stabilization by electronic methods.
2. Processing and freezing preservation.
3. Sanitary studies in food processing plants.
4. Effect of tocopherol and rancidity of frozen stored turkey meat.
5. Vitamin B content of chicken and turkey meat.
6. Eggs as a source of cholesterol.
7. Hormones to fatten birds.
8. Radio-active phosphorus in the egg.
9. Egg quality was surveyed on ranches.
10. Abnormal eggs.
11. Cooling rate of eggs.

F. Poultry Utilization Investigations

1. Dehydrated egg studies:
   a. Effect of acidification.
   b. Components responsible for loss of palatability.
   c. Vapor pressure of egg powders.
   d. Color changes during storage.
   e. Antioxidants for egg oil.
   f. Salt soluble fluorescence test.
   g. Raw materials.
   h. Moisture content.
   i. Free fatty acid analysis.
2. Freezing preservation:
   a. Resazurin test.
3. Lysozyme from egg white:
   a. New isolation method.
   b. Crystallographic properties.
4. Fibers, plastics, and adhesives from egg and feather (keratin) proteins:
   a. Physical properties of dispersed feather keratin.
   b. Fiber stretching and curing.

5. Isolation, analysis and characterization of constituents:
   a. Effect of dry heat on proteins.
   b. Surface area of egg albumin.

G. Management

1. Land settlement.
2. Egg cooler.
3. De-beaker for poultry.
4. Electric brooder.
5. Poultry house cooling.
6. Energy consumption of electrically equipped poultry houses.
7. Post and fencing.
8. Portable chain drag elevator.

H. Marketing

1. Tariff protection for farm products.
2. Methods of analyzing consumer preferences.
3. Situation and outlook studies of poultry and eggs.
4. Economic situation confronting California farmers.
5. Parity price and parity income formulas.
6. Developments in cooperative marketing.
7. Evolution of economic policies relating to agriculture.

Section II

A. Breeding

1. Biochemistry of rats (blood and internal secretions) in relation to breeding problems.

B. Nutrition

1. Nutritional value of alfalfa.
2. Improvement of oil crops.
3. Culture of oil crops.
4. Biologically active chemicals.
5. Metabolic research with Isotopes.
6. Spectrophotometric methods.
7. Tracer studies with artificial radio-active elements and stable Isotopes.
8. Metabolism of specific nutrients.

C. Diseases

1. Blood obtained from slaughtered animals for immunization of diseases.
2. Diseases of chickens. Control of infectious coryza, pneumoencephalitis, lymphomatosis, etc.
3. Turkey diseases. Paratyphoid infections, coccidiosis, hexamitiasis, etc.
4. Diseases of rabbits.

D. Pest Control

1. Pest control studies.
2. New insecticides: Sabadilla, ethylene dibromide and many others.
3. Insect baits and traps.

E. Environments

1. Investigations of surface climatology.
2. Studies of environmental influences.
3. New forms of building materials for farm construction.

F. Poultry Products and By-products

1. Poultry products and by-products.
2. Frozen food locker plants.
3. Spectrophic methods to determine egg quality.
4. Methods of changing growth and fattening. Marketing procedures.

G. Management

1. Farm organization and management.
2. Poultry management.

H. Marketing

1. Commodity and outlook studies.
2. Price analysis.
3. Marketing and distribution.

SEMITROPICAL FRUITS

Introduction

California, together with some few small areas in other states, produces the total United States crop of semi-tropical fruits other than citrus. Avocados, dates and persimmons are the more important of these industries. Research at the university campuses at Westwood and Riverside has been very effective in the maintenance and development of these crops. An almost complete lack of interest elsewhere in the United States makes it necessary to carry on a complete program of work in this State.

In addition to research on the basic problems of production, it is necessary to conduct experiments relating to frost protection, propagation, adaptability of varieties and distribution. A few new projects are contemplated, however the bulk of research for the immediate future will be focused on studies already begun.

Section I

I. Avocado

A. Cultivation and Irrigation
   1. Effects of tillage on soil permeability.

B. Diseases
   1. Carbon bisulfide as a soil sterilant.
   2. Avocado tree decline.
   3. Avocado decline.
   4. Sunblotch disease.
   5. Susceptibility of avocado rootstocks to disease.
   6. Avocado sunblotch.
   7. Avocado tree decline.
   8. Other avocado diseases.

C. Fertilization
   1. Nitrogen losses from anhydrous ammonia.
   2. Correction of iron chlorosis.
   3. Sun-induced chlorosis.
   4. Phosphorous studies.

D. Frost Protection
   1. Orchard heater development.
   2. Wind machines for frost protection.
   3. Atmospheric turbulence in relation to frost protection.
E. Propagation and breeding
   1. Propagation studies.
   2. Rootstock studies.
   3. Creation of new varieties.
F. Pruning
   1. Responses to pruning.
G. Soils
   1. Trend of salinity in soils and waters.
   2. Soil acidification.
H. Sprays and Pest Control
   1. Pest and weed control equipment.
   2. Weed killers.
   3. Weed control machinery.
   4. Oil as a herbicide.
   5. Thrips control.
   6. Greenhouse thrips.
   7. Serica beetles.
   8. Miscellaneous insects.
I. Miscellaneous
   1. Tariff protection.
   2. Fruits in ice cream.
   3. Physiological studies (tree).
   4. Physiological studies (fruit).
   5. Fruit morphology.

II. Date Palm

A. Cultivation and Irrigation
   1. Water quality and reclamation in Coachella Valley.
B. Diseases
   1. Carbon bisulfide as a soil sterilant.
   2. Omphalia root rot.
   3. Spoilage diseases of the date fruit.
   4. Other palm diseases.
C. Fertilization
   1. Nitrogen losses from anhydrous ammonia.
   2. Date palm fertilization experiments.
   3. Composition of fruit in relation to fertilization.
   4. Boron deficiency and toxicity.
D. Soils
   1. Trend of salinity in soils and waters.
   2. Soil acidification.
E. Sprays and Pest Control
   1. Pest and weed control equipment.
   2. Weed killers.
   3. Weed control machinery.
   4. Oil as a herbicide.

5. Insects of stored food products.
6. Dried fruit beetle.
7. Stored products insects.

F. Miscellaneous
1. Tariff protection.

III. Oriental Persimmon

A. Cultivation and Irrigation
1. Effects of tillage on soil permeability.

B. Fertilization
1. Nitrogen losses from anhydrous ammonia.

C. Propagation and Breeding
1. Rootstock studies.

D. Pruning
1. Responses to pruning.

E. Soils
1. Trend of salinity in soils and waters.
2. Soil acidification.

F. Sprays and Pest Control
1. Weed control equipment.
2. Weed killers.
3. Weed control machinery.
4. Oil as a herbicide.
5. Biological control of Oriental fruit moth.
6. Oriental fruit moth.
7. Oriental fruit moth.

G. Miscellaneous
1. Fruits in ice cream.
2. Physiological studies.
3. Floral situation.

Section II

I. Avocado

A. Diseases
1. Expansion in avocado tree decline studies.

B. Fertilization
1. Nutriment requirements of the avocado.
2. Avocado orchard fertilization studies.
3. Minor element studies.

C. Frost Protection
1. Studies of surface climatology.

D. Propagation and Breeding
1. Expansion in breeding program.

E. Miscellaneous
1. Better equipment for tree workers.

III. Oriental Persimmon

A. Miscellaneous
1. Hormone studies in relation to fruit drop.

TRUCK CROPS

Introduction

The Agricultural Research Study Committee has had its attention repeatedly directed to the research needs of truck crop growers and processors. The research studies now in progress or recently completed by the State's established research agencies, relating to this commodity group, are listed below as Section I. This list indicates the scope of studies undertaken, but it does not show the rate of progress. Many growers and processors are interested in accelerating this research work to meet the urgent needs of California's rapidly developing truck crop industry. Section II lists additional studies which should be undertaken or enlarged to meet the most urgent research needs of the industry. These suggestions for the most part have come from established research agencies.

The crops coming under this commodity group include all leafy vegetables such as lettuce, cabbage, cauliflower, spinach and the like; root crops, such as potatoes, beets and turnips; sweet corn, tomatoes, peppers, melons, pumpkins, artichokes, asparagus, beans, cucumbers, herbs, and all other vegetables commercially marketed as fresh, canned, dried or frozen products.

Section I

A. Plant Breeding

1. Tomato research project. Color, quality, productivity, disease resistance and vitamin content.
2. Fundamental problems. The "How and Why" of heredity and development of individual plants.
3. Tomato breeding. New shipping and canning varieties.
4. Onions with thrips, mildew, and pink root resistance.
5. Cantaloupes with powdery mildew resistance.
6. Watermelons with resistance to Fusarium wilt.
7. Tomato breeding for resistance to Fusarium wilt, nematode, spotted wilt. Greater Vitamin C.
8. Carrots for resistance to leaf blights.
9. Spinach for resistance to mildew.
10. Peas for resistance to blight and Fusarium wilt.
11. Potatoes for scab resistance and high yielding ability.
12. Peppers for resistance to spotted wilt.
13. Lettuce for seasonal adaptation and disease resistance.
14. Effects of suckering sweet corn on yield determined and practice discouraged.
15. Male steriles discovered in onions and tomatoes for hybrid seed.
16. Cytogenetics studies on unfruitfulness of tomatoes.
17. Determination of sex in asparagus to increase yields.
18. Haploid asparagus plants for breeding.
19. Soluble solids of watermelons to determine relative sweetness.
20. Embryo culture of tomato species hybrids.
21. Selecting onions for dehydration.

B. Plant Nutrition

1. Lysimeter study to determine the net fixation of nitrogen from legumes under irrigation agriculture.
2. Losses of nitrogen from anhydrous ammonia in irrigation water.
3. Study of gaseous nitrogen losses from soil.

4. Study of conditions conducive to nitrate formation.
5. Spectrographic method of analyzing plant material for minor elements.
6. The role of enzymes in the soil.
7. Improved methods of testing differences in field trials.
8. Methods by which roots absorb nutrients.
9. Researches on micro-elements.
10. Chemical mechanism by which plants synthesize sugar.
11. Lime-induced chlorosis in plants.
12. Fixation of potassium and phosphate in soils.
13. Evaluating mineral nutrients in soils.
14. Processes in soil by which nitrogen is lost.
15. Fixation of ammonia in soils.
16. Laws of base exchange in soils.
17. Specific chemical methods for soil analysis.
18. Structure of colloidal clays in soils.
19. How plants feed in soils.
20. Use of nitrate-resins for fertilizer.
21. Decomposition of organic matter in soils.
22. Pot technique for fertilizer needs.
23. Fertilizer needs of vegetable crops.
24. Response of potatoes and onions to nitrogen.
25. Setting of tomato fruits by hormone spray.
26. Minor element deficiencies in vegetables.

C. Plant Diseases

1. Soil pasteurization equipment.
2. Insect borne plant virus diseases.
3. Ascochyta blight of peas.
4. Chemical seed treatment. Peas, lima beans, blackeye beans.
5. Bean root rot.
6. Bean blight and anthracnose.
7. Potato premature decline.
8. Potato ring rot.
9. Potato spindling sprout and net necrosis.
10. Potato leaf roll and other virus diseases.
11. Potato transit rot.
12. Head lettuce mosaic.
13. Head lettuce June Yellows.
14. Tomato Fusarium wilt.
15. Tomato spotted wilt.
16. Cantaloupe and cucumber powdery mildew.
17. Carrot root scab.
18. Cabbage ring spot.
19. Plant viruses.
20. Pathogenic fungi.
21. Damping off of seedlings.
22. Nature of fungicidal action.
23. Leaf surface.
24. Antibiotics. Control of plant diseases.
25. Antagonism. Microorganisms in the control of plant diseases.
26. Mutation. In pathogenic bacteria.

27. Yeast spot of lima bean seed.
28. Nature of resistance to Fusarium wilt of tomato.
29. Seed transmission of lettuce mosaic.
30. Damping off of pepper seedlings.
31. Vegetable disease research. Fungicidal method to control powdery mildew.
32. New fungicides.

D. Pest Control Including Materials, Application Methods, Etc.

1. Pest control equipment.
2. Atmospheric turbulence. Drift of chemical dusts (insecticides).
3. Application of selective herbicides.
4. Selective herbicides in vegetable crops.
5. Dinitro compounds in contact herbicides.
6. Use of oils as contact herbicides.
7. Methods, mechanical and chemical, for weed control.
8. Carbon bisulphide as a soil sterilant.
9. Growth-regulating substances as weed killers.
10. Use of 2, 4-D to control nut grass.
11. Selective herbicides for weedy grasses in broad-leaved crops.
12. Anatomic study of plants treated with 2, 4-D (weed killer).
13. Vegetable weevil parasites. Porizon SPP.
14. Copidosoma koehleri. The polyembryonic parasite of the potato tuber moth.
15. Herbicides in weed control.
16. Thrips. New insecticides.
17. Plant and orchard mites.
18. Truck crop insects.
19. Spinach insects.
20. Tomato insects.
21. Insects of field peas.
22. Agricultural practices contributing insect elimination or control.
23. Insecticide residues on foods.
24. Plant nematodes.
25. Calculating poison bait mixtures.
26. Bibliography of rodent control.

E. Vegetable Utilization Investigations

1. Dehydration:
   a. Storage studies.
   b. Leaching studies.
   c. Standard samples for ascorbic acid tests.
   d. Estimation of water-soluble "brown" color.
   e. Density and mushiness in white potatoes.
   f. Spray drying.
   g. Rotary peeler.
   h. Thermal properties of dehydrated vegetables
   i. Dielectric properties of dehydrated carrots.
   j. Vitamin A analysis.
2. Freezing preservation:
   a. Frozen corn.
   b. Frozen peas.
   c. Off flavors in frozen peas.

d. Frozen tomato juice.
e. Coliform bacteria in frozen vegetables.

3. Juice concentrates from vegetable wastes for use in the production of antibiotics and enzyme preparations:
   a. Serblilin.
   b. Gramicidin.
4. Isolation analysis and characterization of constituents:
   a. Spectrographic analysis.

F. Environmental Control

1. Wind machines for frost protection.

G. Processing and Engineering

1. Seed processing.
2. Precision planters.
3. Mechanical onion harvester.
4. Bean cleaning machine.
5. Asparagus seed thresher.
6. Weed control machinery and equipment.
7. Freezing preservation of fruits, vegetables, fruit juices and meats.
8. Changes in vitamins in freezing.
9. Enzymes in food processing.
10. Sanitary studies in food processing plants.
11. The role of pH value in food processing and preservation.
12. Other problems. Pectin and pectic enzymes, wine yeasts, etc.
13. Pretreatments on the quality, vitamin content of freshly dehydrated cooked and stored fruits.
14. Loss of ascorbic acid in tomato purees and pastes.
15. Irrigation equipment.
16. Separating seeds and skins of dishrag gourd.
17. Pithy core of carrots.

H. Soils and Irrigation

1. Trend of salinity in soils and underground waters.
2. Soil acidification.
3. Movement of soil moisture.
4. Seedbed preparation and cultivation.
5. Water-holding capacities of soils.
6. Energy required to remove unit quantity from soil.
7. Penetration of water.
8. Soil permeability of water.
9. Evaporation from water surfaces.
10. Plant-soil-water relations.
11. Soil moisture.
12. Baby lima beans. Relation of irrigation to high yields.
13. Irrigation requirements of California crops.
14. Root development.
15. Hydraulics of sprinkler systems.
16. Heat conductivity of soils.
17. Methods of measuring irrigation water.
18. Farm irrigation systems.
19. Economic aspects of irrigation.
20. A study of water quality. Coachella Valley.

21. Causes of poor water penetration in the potato fields of Kern County.
22. Studies on the effect of fertilizers on water penetration
23. Irrigation equipment and practices.
24. Salinity studies. Coachella Valley. Means of lowering ground water and in salt removal.
25. Combatting lime induced chlorosis.
26. Activities in soil survey and soil classification during last 10 years.
27. Areas being surveyed: Colusa, Merced, Madera, Cuyama.
28. Soil interpretations.
29. Key for the classification of California soils.
30. Type location for major soil types.
31. Drainage investigations in Imperial Valley, Palo Verde Valley, Orange County and Round Valley.
32. Burning of peat lands.
33. Effect of chemical composition of soil on water movement.
34. Changes in soil permeability.
35. Effect of soil texture on water permeability.
36. Influence of water on rate of infiltration.
37. Effect of fertilization on water penetration.
38. Deterioration and recovery of water permeability.
39. Determining soil structure.
40. Moisture requirements for germination of vegetable seeds.
41. Irrigation requirements of vegetables grown for seed.

I. Crop Management and Marketing

1. Tariff protection for farm products.
2. Methods of analyzing consumer preferences.
3. Relation of income to expenditure.
4. Situation and outlook studies.
5. Economic situation confronting California farms.
6. Parity price and parity income formulas.
7. Proposals for improved farm management practices.
8. Analysis of specialized farm organization.
9. Developments in cooperative marketing.
10. Evolution of economic policies to agriculture.
11. Potato precooling.
12. Value of sterilamps for killing bacteria.
13. Keeping qualities of dehydrated carrots.
14. Insect proof container projects.
15. Stem-end browning. Potatoes.
16. Packaging icing of sweet corn and broccoli.
17. Chilling injury of cold-sensitive vegetables.
18. Curing and storage methods of sweet potatoes.
19. Metabolic response of vegetables in storage.
20. Transit conditions of vegetables to arrival quality.
21. Protective pads under potato loads.
22. Bunching versus topping of root crops.
23. Proper lighting of tomato inspection tables.
24. Minimum grades of canning tomatoes.
25. Continuous cropping of lima beans.

26. Substitute bags for shipment of potatoes.
27. Gray-wall of shipping tomatoes.
28. Fumigation of tomatoes with methyl bromide.

J. Seed Certification

1. Snap bean seed production.
2. Foundation seed.
3. Surveys of cabbage and cauliflower seed fields.

K. Food Value

1. Biological value of carotene as a source of Vitamin A.
2. Effect of composition of the soil on the nutritive value of foods.
3. Rating of nutritional value of vegetable crops.
4. Efficiency of California vegetables. Food value per acre per man-hour.

L. Plant Growth and Development

1. Structure of celery and carrots.
2. Poor stands of summer planted potatoes.
3. Adaptation of sweet corn hybrids.
4. Suckering sweet corn. Yield to labor.
5. Time of planting cabbage. Yield and seed production.
6. Head removal versus splitting of heads on cabbage seed yield.
7. Loss of materials from onion tops and bulbs.
8. Depth of planting of potatoes.
9. Resistance to bolting of early cabbage.
10. Climatic response of broccoli. Adaptation to quick freezing.
11. Production of tomato plants by direct seeding.
12. Germination of dishrag gourd seed.
13. Dates of planting, cultural operations for condiment plants in California.
14. Morphological development of garlic.
15. Clonal lines of garlic.
16. Uneven germination and poor stands of carrots.

Section II

A. Plant Breeding

1. Corn disease studies.
2. Biochemical genetics of starch.
3. Biochemistry of pigment and vitamins in tomatoes.
4. First generation hybrid vigor.
5. Adaptation of new varieties.
6. Development of watermelons and cantaloupes resistant to mosaic.

B. Plant Nutrition

1. Fertilizer studies on row crops.
2. Manganese nutrition in plants.
3. Use of phosphate in synthesis of sugars and starch by plants.
4. Fertilizer experiments with methods of foliar diagnosis.
5. Maintenance of organic matter for vegetables.

C. Plant Diseases

1. Head lettuce selerotinia rot, June Yellows, big vein, mosaic and spotted wilt.
2. Potato diseases.

3. Carrot diseases.
4. Spinach diseases.
5. Garlic diseases.
6. Asparagus diseases.
7. Sweet potato diseases.

D. Pest Control Including Materials, Application Methods, Etc.

1. Herbicides in weed control.
2. Grasshoppers. History and habits.
3. Seed crops. Control of injurious insects.
4. New insecticides: DD, DDT, DDD, 666, 240, 1068, etc.
5. Insect baits and traps.
6. Studies on insects affecting vegetable crops.

E. Environmental Control

1. Investigations of surface climatology to plant and animal environments.

F. Processing and Engineering

1. Seed cleaning and processing.
2. Special harvesting equipment.
3. Pest control studies.
4. Engineering problems in processing California products.
5. Engineering efficiency studies of packing house operations.
6. Studies of reactions of driven wheels and tracks to soils.
7. Farm transportation problems.
8. Food acceptance studies.
9. Bacteriology of frozen foods.
10. Bacterial spoilage of canned foods.

G. Soils and Irrigation

1. Field and truck crops by expansion of field experiments.
2. Quality of products from irrigation practices.
3. Studies on root development. Field and truck crops.
4. Studies on penetration of irrigation water.
5. Effect of spacing and density of crop on quantity of water used.
6. Soil-moisture conditions on the nitrification of soils.
7. Studies on infiltration.
8. Expand sprinkler jet tests.
9. Oxygen-supplying power of soils in relation to soil moisture.
10. Land preparation for irrigation.
11. Economics of irrigation by sprinkling.
12. Cost of water and its application.
13. Drainage studies.

H. Crop Management and Marketing

1. Commodity and outlook studies.
2. Price analysis.
3. Marketing and distribution.
4. Farm organization and management.
5. Agricultural policy.
6. Incentive wages in truck crops.
7. Current planting information.
8. Comparative advantage with current outlook data.

9. Vegetable rotation experiments.
10. Handling of produce. Consumer packages.

I. Seed Certification

1. Snap-bean seed production.

J. Food Value

1. Spectrophotometric methods to carotene, pigments, vitamins, etc.

K. Plant Growth and Development

1. Physiological breakdown of vegetables.
2. Injury or stimulation of vegetable plants by insecticides on fungicides in pest control.

AGRICULTURAL RESEARCH OF THE UNITED STATES DEPARTMENT OF AGRICULTURE IN THE STATE OF CALIFORNIA

Introduction

This report lists the active research of the United States Department of Agriculture on the production, processing, and distribution of agricultural commodities being conducted in California.

The following listing incorporates the active research being done by the Bureaus of Agricultural and Industrial Chemistry, Animal Industry, Dairy Industry, Entomology and Plant Quarantine, Human Nutrition and Home Economics, and Plant Industry, Soils and Agricultural Engineering of the Agricultural Research Administration. In addition to the listings of all research by the Agricultural Research Administration in California, are included listings of research conducted by the Farm Credit Administration, the Office of Foreign Agricultural Relations, and the Soil Conservation Service.

Reports covering research by the Bureau of Agricultural Economics, the Production and Marketing Administration, and the Forest Service, because of its extensive volume and bulk, are not listed herewith but are submitted as separate volumes to Part II of this report.

A. Agricultural and Industrial Chemistry

1. Methods for the processing and preservation of packaged dates.
2. Processing of citrus juices and their preservation by quick freezing.
3. Processing of standardized single strength canned juices from California and Arizona grapefruit.
4. Isolation and identification of oils, fats, waxes and flavoring constituents from California and Arizona grapefruit.
5. Development of methods for the determination of glycosides in citrus juices.
6. Studies of respiration and respiratory enzymes.
7. Investigation of bitter principles in oranges.

B. Bureau of Animal Industry

1. Breeding improvement of sheep.
2. Proving of certain rams from the Dubois station flocks.
3. Improving hatchery supply flocks for egg production.
4. Growth and rate of feathering.
5. The control of pullorum disease.

C. Bureau of Entomology and Plant Quarantine

1. Control investigations:
   a. Tests to determine the effect of insecticidal materials.
   b. Testing of a wide range of new materials to determine their toxicity to insects.
   c. Metallic compounds of nicotine and of synergists to increase the effectiveness of nicotine.
2. Biological control of Klamath Weed:
   a. Introduction of its natural enemies from Australia.
3. Bee culture:
   a. Insect pollination, pollen-gathering and nectar-gathering by bees.
   b. Behavior of the Honey Bee toward DDT.
   c. Apiary management.
4. Fruit insect investigations:
   a. Investigations of relation of insects to transmissions of peach mosaic:
      (1) Insect vectors of peach mosaic, a virus disease of stone fruits particularly destructive to peach.
      (2) List of suspect insects which probably includes the insect or insects responsible for the transmission of this disease.
      (3) To determine just when and how transmission occurs in nature, and to develop effective control measures.
   b. Investigations of dried fruit insects:
      (1) Cold storage exposures on infestations in dried fruits.
      (2) Biology and control of a number of pests of dried fruits.
      (3) Field infestation of dates.
   c. Investigations of citrus and other subtropical fruit insects:
      (1) California red scale.
      (2) Blower equipment materials that are more or less gas-tight.
      (3) Equipment for exhausting the gas at the end of the exposure period.
5. Tomato insect investigations:
   a. Tomato pinworm, tomato fruitworm, and the tomato russet mite.
   b. Relative toxicity and control value of various insecticides against the tomato fruitworm and tomato pinworm.
   c. Avoidance of harmful or objectionable residues.
   d. Applications of insecticides necessary to obtain maximum control.
   e. Comparisons of diluents, strength, and dosages for insecticides.
   f. Value of picking practices which may aid in the control of the tomato fruitworm.
   g. Biology and habits of the insects.
6. Onion insects investigations:
   a. Insecticidal control measures for the onion thrips.
   b. Sweetening agents, and other conditioning agents.
   c. Timing of applications and the distribution of insecticides on onion plants.
   d. The influence of temperature, irrigation and weather on the seasonal abundance of the onion thrips.

7. Wireworms affecting vegetables:
   a. The effect on wireworm abundance of various cover crops.
   b. Effectiveness of various insecticides for wireworm control.
   c. Soil fumigants, soil insecticides, repellents, and various salts for use in soil and in irrigation water.
8. Incidental insect problems:
   a. Cabbage aphid.
   b. New insecticides such as hexaethyl tetraphosphate for the control of cabbage aphid.
   c. Pepper weevil: The control of the pepper weevil with DDT.
   d. Lygus bugs on lima beans: Control of Lygus bugs on lima beans by the use of DDT.
   e. Emergency survey of truck crop insects and control requirements: Extent and distribution of insect infestations on truck crops; availability of insecticides and equipment needed for the control of these insects.
   f. Chemical investigations of problems relating to the control of the California red scale.
   g. Chemical investigations on fumigants for control of insect pests.
9. Forest insect investigations:
   a. Biology and means of control of tree-killing barkbeetles, western pine beetle and the mountain pine beetle.
10. Hessian Fly as a pest of wheat and barley:
   a. Control by cultural measures and the development of resistant varieties of wheat and barley.
   b. Development of better varieties for commercial use in California. Two good fly-resistant wheats have been produced.
   c. Fly-resistance tests of new wheats and barleys.
   d. Varieties of wheat resistant to the strawworm and joint worm.
11. Grasshoppers:
   a. Habits, ecology, distribution and abundance of grasshoppers.
   b. Efficiency of different poison bait ingredients and insecticides, in relation to their control.
   c. Control operations and the testing against grasshoppers of new poisons and insecticides.
12. Pea aphid as a pest of alfalfa:
   a. Development of resistant varieties of alfalfa.
   b. Effectiveness of cultural measures of control.

D. Bureau of Human Nutrition and Home Economics

1. Research in housing, household equipment, family economics problems and other phases of home economics research.
2. Study of the use of kitchen utensils.
3. Methods of food preparation.
4. Menus in farm homes.

E. Bureau of Plant Industry, Soils and Agricultural Engineering

1. Cereal crops and diseases:
   a. Investigations on the production and breeding of rice at the Biggs Field Station, Biggs.

b. Investigations on the breeding, improvement, and disease control of wheat, oats, barley, and flax at University Farm, Davis, California.
c. Handling of water and fertilization of the crop now in use by the California rice growers.
d. New rust and smut resistant varieties of wheat have been developed.
e. Baart 38 and White Federation 38.
f. Improved barley and oat varieties.

2. Cotton research:
a. Researches and experiments designed to increase efficiency of production and to improve the quality of cotton.
b. Genetic researches and breeding varieties, new strains, hybrids and species of cotton.
c. High yielding strains with desirable plant characters (strong stalks, rapid fruiting, large bolls, storm resistant, easy picking), resistant to disease and insects and producing fiber and seed of improved quality.
d. Spinning tests.
e. Cultural, irrigation, rotation and fertilizer experiments.
f. Supplies of pure seed made available each year for increase and distribution.
g. Cotton diseases and cotton insect studies.
h. Rotation and fertilizer experiments.
i. Testing material designed to control nematode and other pests.
j. Genetic, cytogenetic and taxonomy.
k. Cotton breeding and improvement program.

3. Drug and related plants:
a. Red squill and cinchona.
b. Test plantings of a number of strains to determine survival.
c. Improved stock and tests for adaptation to the various soil types.
d. Poppies to improve varieties through breeding and to test their adaptation to the soil and climate.
e. Condiment plants in with coriander varieties.

4. Forage crops:
a. New diseases such as the alfalfa root rot caused by Rhizoctonia solani.
b. Selections for resistance to this and other diseases are being made. Two new varieties adapted to the Southwest. Indian and African alfalfas.
c. Stem nematode problem.
d. Breeding materials, including strains resistant to the bacterial wilt disease.
e. Other forage crops: Adaptation studies with new winter annual legumes, seed of grass species and strains for testing under California conditions, seed of Rose clover and Dixie Crimson clover for adaptation tests, and clones of Ladino clover as part of a broad cooperative improvement program.

5. Forest pathology:
a. Research work on diseases of forest and shade trees.

b. White pine blister rust, root diseases of conifers, heart rots, fire damage studies, cypress canker, and chestnut blight.

6. Fruit and vegetable crops:
   a. Breeding of peaches, apricots, plums, and pears.
   b. Development of improved stone fruits for fresh market, canning, drying and other use.
   c. Production and breeding of almonds, walnuts, and other nut crops.
   d. Breeding of almonds for improved market quality and disease and insect resistance.
   e. Walnut pollination and other phases of production of nut crops.
   f. Grape production, breeding and disease investigations.
   g. Root stocks for grapes, breeding of grapes for improved table use, raisin or wine making.
   h. Investigations on grape nutrition, deficiency diseases and other factors of grape production.
   i. Investigations on grape rootstocks.
   j. Handling, transportation, and storage of fruits and vegetables.
   k. Effect of temperature, type of package, methods of car loading, precooling, and other factors in handling and shipping on carrying quality of fruits and vegetables in the central California area.
   l. Storage, handling and transportation investigations with citrus fruits, dates, and other subtropical fruits.
   m. Harvesting, packing, storing, shipping of citrus fruits, maturity and processing studies on dates and related activities.
   n. Breeding of lettuce, melons, carrots. Breeding of melons of various types for disease resistance, breeding to secure better type and disease resistance lettuce, improved varieties of carrots for the Southwest.
   o. Virus diseases of peaches and other stone fruits in the Southwest.
   p. Cause, the vector, and practical control measures of peach mosaic and other virus of virus-like diseases of stone fruits.
   q. Date varieties and culture. Variety tests of dates, determination of climatic requirements of various varieties, pollination, pruning, fertilization, irrigation, and other factors influencing date production.
   r. Onion and potato breeding programs.
7. Functional and housing requirements of livestock:
   a. Functional and housing requirements of livestock in the warmer climates.
8. Plant introductions:
   a. Required procedure for the introduction of the stone fruits.
   b. Federal quarantine laws, quarantine laws of the State of California, procedure of introduction of new varieties from abroad into that State.
9. Rubber plant investigations:
   a. Breeding investigations on guayule. Wild strains of guayule and their study under cultivation.

b. New types of guayule with better growth characteristics and higher yield.
c. Investigation of rubber production from krim- and tau-saghyz.

10. Soils, fertilizers, and irrigation.

F. United States Regional Salinity Laboratory

1. Reclamation methods and crop production on saline and alkali soils. Cover crop production problems on alkali and saline soils in the entire western region.
2. Salinity conditions inhibiting or limiting to plant growth.
3. Salt tolerance of individual crop plants.
4. The conditions under which plants will grow in a saline environment.
5. Physical, chemical and biological properties of alkali and saline soils.
6. The relation of quality and concentration of saline salts to soil properties and plant responses.
7. Methods of reclamation and management of saline and alkali soils.

G. United States Rubidoux Laboratory

1. Investigations on the quality of irrigation and drainage waters.
2. Sampling irrigation and drainage waters.
3. Analyses of the water samples for total quantity of dissolved salts.
4. Relative proportion of the individual types of dissolved salts.
5. Boron studies and surveys.

H. United States Yuma Field Station

1. Improvement of crop production under irrigation in the Lower Colorado River Basin area.
2. Crop adaptation, crop rotations, fertilizer practices under irrigation, water use by crop plants and other studies which appertain to crop production problems of the area.

I. Studies on Proposed New Irrigation Projects

1. Soils and crop production problems which will be encountered by reclamation of lands in the Coachella Valley and Imperial East Mesa.

J. Analyses of Soils From the Sacramento Valley

1. Study of some soil areas in the northern part of the Sacramento Valley. Laboratory analyses of soils from the area. Soil types as an aid in estimating their potential productivity and suitability for future agricultural development.
2. Sugar beets:
   a. Breeding for resistance to curly top.
   b. Breeding for rust and downy mildew resistance and for non-bolting.
   c. Nature of curly top virus.
   d. Plant succession studies to reduce sugar beet curly top losses to prevent early, heavy beet leaf hopper influx.
   e. Improvement of cultural practices:
      (1) Evaluation tests of new curly top resistant introductions in western United States.

(2) Seed production in established sugar beet seed growing districts.
(3) Preventing of "harmful" nitrogen compounds in sugar beets to improve sugar recovery.

3. Cotton planting seed associations:
   a. Study to develop factual data to assist farmers, cooperatives, and others in determining the best methods of organizing, operating, and financing cooperative associations engaged in the production and distribution of cotton planting seed.
4. Coordination of cooperative purchasing in California:
   a. Cooperative purchasing activities of farmers' cooperatives in California. Suggestions for coordinating and developing.
5. Cooperative cottonseed oil mills:
   a. Organization, operation, and financial status of cooperative cottonseed oil mills in the United States.
   b. To make a comparative analysis of the operations of cooperative cottonseed oil mills.
   c. To study the methods of organization, operation, and financing now employed by cooperative cottonseed oil mills.
   d. Evaluating their effectiveness and determining how they can be improved upon.
   e. To determine the relative efficiency of cottonseed mills using hydraulic press, expeller, and solvent extraction equipment.
6. Methods of sale of the California Fruit Growers Exchange:
   a. Determine the practicability of making both auction and private sales in auction market areas.
   b. To determine the effect of such a dual sales program on prices, methods, marketing costs, and internal and external operation of the Exchange.

K. *Research of the Soil Conservation Service in the State of California*

1. To devise systems of land use and management under conditions of which California is representative which will provide permanent protection against soil and water losses and give regular economic returns with a minimum consumption of water and labor.
2. Studies of winter ground covers and associated mulches to control erosion.
3. Deep-rooted permanent ground covers capable of stabilizing soil and slope by root penetration.
4. Evaluation of woody hillculture crops and pertinent cropping methods on the soils of the interior section of Southern California.
5. Woody perennial plants on unirrigated or sparsely irrigated lands in coastal sections of Southern California.
6. Hill mechanics with special reference to specialized implements and the technique of their use.
7. Hill mechanics with special reference to specialized implements and the technique of their use.
8. Measurements of the effectiveness of cultural practices at the Somis Experimental Farm, Somis, California:

a. Effectiveness of cultural practices in controlling soil and water losses on dry-farm hill lands in the coastal section of Southern California.

9. Erosion-control investigations on grain land in California:
   a. Practicable methods for erosion control on grain lands in California, largely through the use of crop residues.
10. Studies of the mechanics of transportation of sediment by water:
   a. Experimental study of turbulence in an open channel and its effect on sediment suspension and transportation.
11. Studies of stratified flow in reservoirs in relation to the transportation of sediment by water:
   a. Fundamental mechanics underlying the hydraulic phenomena involved in soil erosion and soil erosion control.
12. Stability of natural sediments under locally concentrated attack of flowing water:
   a. Evaluate the resistance of natural sediments to scour hole formation.
13. Hydraulic design of baffle-type energy dissipators for outlets from sluice gates, pipes, or chutes:
   a. Improvement of the hydraulic performance of various baffle-type structures so as to decrease their cost and increase their dependability.
14. Efficiency of irrigation methods for different problem areas:
   a. Water application efficiencies and their relation to irrigation methods.
   b. Better and more economical methods of applying irrigation water.
15. Evaporation, transpiration, and seepage losses affecting irrigation practices:
   a. Planning reservoir storage for irrigation enterprises.
   b. Factors affecting evaporation from water surfaces.
   c. Ratios or correction coefficients for various types of evaporation pans now in use by different agencies.
   d. All reliable evaporation records with related data that are available in the southwestern United States.
16. Studies of irrigation practices as they affect water supplies:
   a. The influence of various irrigation practices on agriculture in the San Fernando Valley.
17. Formulation of irrigation water balance sheets for selected areas:
   a. Better methods of distribution and use.
   b. Utilizing selected surface areas for waterspreading.
   c. Devise ways and means by which water now wasted may be conserved for beneficial use.
18. Pumping for irrigation:
   a. Practical and economic phases of pumping for irrigation.
   b. Methods and cost of well drilling and operation.
   c. Relation of diameter of casing to yield, types of casings, etc.

19. Flow of water in ditches, pipes and other irrigation conduits:
    a. Carrying-capacity elements of water conduits.
20. Lining of irrigation canals and ditches:
    a. Lining as applied to irrigation canals and ditches.
    b. Cleaning and maintenance of canals and ditches.
    c. Methods of ridding canals and ditches of impediments to the carriage of water.
    d. Methods of remedying existing bad conditions on canal systems.
21. Snow surveys and irrigation water supply forecasts:
    a. Practical forecasting of seasonal water supplies for irrigation.
    b. Snow surveys and irrigation water supply forecasting in the arid portions.
22. Storage of water underground for irrigation:
    a. Rate of percolation of water through the various types of soils.
    b. Stimulation of percolation due to root action.
    c. Effect the fluctuating water-table has on the rate of percolation.
    d. Extent to which silty water affects percolation.
23. Studies of ground-water depletion:
    a. Characteristics of the ground-water basin.
    b. Policing or controlling withdrawal of ground water beyond specified limits.
24. Broad study of extent of drainage problems connected with irrigation practices:
    a. Need for drainage on irrigated areas, present engineering practices.
    b. Methods of operation and maintenance; costs of drainage; drainage for alkali removal and control; failure of irrigation enterprises.
25. Studies of needs, methods and practices for the rehabilitation of irrigation and drainage enterprises.
26. Studies of customs, regulations and laws affecting farm irrigation and drainage.
27. Adaptability of irrigation enterprise organization to future development.

SUPPLEMENT TO THE

REPORT ON AGRICULTURAL RESEARCH IN CALIFORNIA

Presented to the
GOVERNOR
and
THE FIFTY-SEVENTH REGULAR SESSION
of the
CALIFORNIA LEGISLATURE
by
THE AGRICULTURAL RESEARCH STUDY COMMITTEE

AGRICULTURAL RESEARCH OF THE UNITED STATES DEPARTMENT OF AGRICULTURE, AGRICULTURAL RESEARCH ADMINISTRATION

Bureau of Agricultural and Industrial Chemistry
Western Regional Research Laboratory, Albany, California

INTRODUCTION

The Western Regional Research Laboratory, operating under general supervision of the Department of Agriculture, was primarily established for the purpose of conducting research work on fruits and vegetables. While many of the efforts of the laboratory were directed towards specific wartime problems, during the last several years much work has been done which has generally benefited agricultural producers in California as well as in other states.

The laboratory is particularly well equipped to develop agricultural by-products. This type of work is most beneficial to many California industries which find their way into markets in processed or semi-processed form, usually resulting in by-products materials.

There is attached a list of the projects currently under way at the Regional Laboratory which relate directly to agricultural industries of this State. It is recommended that greater use be made of the laboratory and that its operations be closely coordinated with research work of the University of California.

A. Alfalfa Utilization Investigations

1. Dehydration:
   a. Alfalfa meal standards.
   b. Alfalfa dehydration plants.
2. Extraction, stabilization, analysis of chloroplast pigments and other constituents:
   a. Stabilization of carotene in oil solutions.
   b. Analysis for carotene isomers.

B. Fruit Utilization Investigations

1. Freezing preservation:
   a. Fruit purees.

b. Velva fruit.
c. Pie fruits.
d. New pie pack.
e. Freezing technique for Italian prunes.
f. A new antioxidant.
g. Coliform organisms in orange juice.
h. Blanching and cooling.
i. Experimental centrifugal deaerator.

2. Dehydration:
   a. Spray drying.
   b. Drying rates of raspberries.
3. Pectin:
   a. Production of low-methoxyl pectin by a new method.
   b. Utilization of apple thinnings.
   c. Chemical and physical studies on pectin.
   d. Jellied fruit salad.
   e. Pectin fibers and films.
4. Protein- and vitamin-rich food or feed supplements:
   a. Torula yeast investigations.
5. Enzyme preparations:
   a. Pectic enzymes.
   b. Amylase and maltase in orange peel.
6. Isolation, analysis, and characterization of constituents:
   a. X-ray analysis of sodium pectate.
7. Ascorbic acid from walnut hulls:
   a. Vacuum concentration of hull extracts.

C. Poultry Utilization Investigations

1. Dehydrated egg studies:
   a. Effect of acidification.
   b. Components responsible for loss of palatability.
   c. Vapor pressure of egg powders.
   d. Color changes during storage.
   e. Antioxidants for egg oil.
   f. Salt soluble fluorescence test.
   g. Raw materials.
   h. Moisture content.
   i. Free fatty acid analysis.
2. Freezing preservation:
   a. Resazurin test.
3. Lysozyme from egg white:
   a. New isolation method.
   b. Crystallographic properties.
4. Fibers, plastics, and adhesives from egg and feather (keratin) proteins:
   a. Physical properties of dispersed feather keratin.
   b. Fiber stretching and curing.
5. Isolation, analysis, and characterization of constituents:
   a. Effect of dry heat on proteins.
   b. Surface area of egg albumin.

D. Vegetable Utilization Investigations

1. Dehydration:
   a. Storage studies.
   b. Leaching losses.
   c. Standard samples for ascorbic acid tests.
   d. Estimation of water-soluble "brown" color.
   e. Density and mushiness in white potatoes.
   f. Spray drying.
   g. Rotary peeler.
   h. Thermal properties of dehydrated vegetables.
   i. Dielectric properties of dehydrated carrots.
   j. Vitamin A analysis.
2. Freezing preservation:
   a. Frozen corn.
   b. Frozen peas.
   c. Off flavors in frozen peas.
   d. Frozen tomato juice.
   e. Coliform bacteria in frozen vegetables.
3. Juice concentrates from vegetable wastes for use in the production of antibiotics and enzyme preparations:
   a. Subtilin.
   b. Gramicidin.
4. Isolation, analysis, and characterization of constituents:
   a. Spectrographic analysis.

E. Wheat Utilization Investigations

1. Industrial non-food uses of gluten:
   a. A gluten-glycerol rubberlike product.
2. Glutamic acid.
3. Gluten sulfate:
   a. Improved production process.
   b. Chemical studies.
4. Ergot alkaloids from fungi grown on wheat.
5. Isolation, analysis, and characterization of constituents:
   a. Gluten protein composition.

F. Western Hemlock Bark Utilization Investigations

MEMBERS EXCUSED TO ATTEND COMMITTEE MEETING

Mr. Dickey asked for, and was granted, unanimous consent that the members of the Committee on Rules be excused, at this time, 11.17 a.m., for a meeting in the post office.

REQUEST FOR UNANIMOUS CONSENT

Mr. Anderson asked for, and was granted, unanimous consent to take up Assembly Bill No. 62, at this time, without reference to committee or file.

CONSIDERATION OF ASSEMBLY BILL NO. 62

Assembly Bill No. 62—An act to add Section 4041n to the Political Code, and Section 25660 to the Government Code, relating to the powers and duties of county boards of supervisors, declaring the urgency of this act and providing that it shall take effect immediately.

Bill read second time, and ordered engrossed.

COMMUNICATIONS

By the Chief Clerk:

The following communications were received, read, and ordered printed in the Journal:

ASSEMBLY CHAMBER, SACRAMENTO, January 8, 1947

MR. SPEAKER: Pursuant to your instructions, the Chief Clerk has examined:

Assembly Concurrent Resolution No. 5—Relative to approving certain amendments to the charter of the City of Fresno, in the County of Fresno, State of California, voted for and ratified by the electors of the city at a special election held therein on the fifth day of November, 1946;

And reports that the same has been correctly enrolled, and presented to the Secretary of State on the eighth day of January, 1947, at 5 p m.

ARTHUR A. OHNIMUS, Chief Clerk of the Assembly

ASSEMBLY CHAMBER, SACRAMENTO, January 9, 1947

MR. SPEAKER: Pursuant to your instructions, the Chief Clerk has examined:

Assembly Bill No. 62

And reports the same correctly engrossed

ARTHUR A. OHNIMUS, Chief Clerk of the Assembly

Above reported bill ordered to third reading.

RESOLUTION TO SUSPEND CONSTITUTIONAL PROVISION

The following resolution was offered:

By Mr. Anderson:

Resolved, That Assembly Bill No. 62 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Brady, Burke, Burns, Butters, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, and Wollenberg—65.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 62—An act to add Section 4041n to the Political Code, and Section 25660 to the Government Code, relating to the powers and duties of county boards of supervisors, declaring the urgency of this act and providing that it shall take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Brady, Burke, Burns, Butters, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Price, Rosenthal, Sheridan, Thompson, Thorp, and Wollenberg—An act to add Chapter 1.5 to Division 3 of the Education Code providing for school district public works and making an appropriation therefor, declaring the urgency thereof, to take effect immediately.

Referred to Committee on Education.

RESOLUTIONS

The following resolution was offered:

By Mr. Geddes:

House Resolution No. 22

Relative to installing sand-filled urns in the halls of the Capitol

WHEREAS, The halls of our stately and beautiful Capitol are frequently rendered most unsightly due to an accumulation of discarded remnants of cigarettes and other waste material, especially during legislative sessions when the traffic flow is heavy; and

WHEREAS, We feel that this condition detracts greatly from the appearance of this building in which we take great pride; now, therefore, be it

Resolved by the Assembly of the State of California, That the Superintendent of Buildings and Grounds is hereby directed to install at intervals through the halls of the Capitol suitable sand-filled urns for use as receptacles to correct the situation mentioned herein.

Resolution read, and referred to Committee on Rules.

REQUEST FOR UNANIMOUS CONSENT TO PRINT EXCERPT FROM THE FRESNO BEE

Mr. Crichton asked for unanimous consent that an excerpt from the Fresno Bee be ordered printed in the Journal.

Mr. Dunn withheld unanimous consent.

Excerpt ordered referred to Committee on Rules.

RESOLUTIONS

The following resolutions were offered:

By Messrs. Ralph C. Dills, Crichton, McCollister, Thorp, and Thomas:

House Resolution No. 23

Relative to the creation of the Assembly Committee on Interstate Cooperation

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Interstate Cooperation is hereby created and authorized and directed to ascertain, study and analyze all facts relating to cooperation between this State and the other states and with the Federal Government and to make recommendations thereon for the appropriate legislation.

2. The committee shall consist of the same five Members of the Assembly who are members of the committee created by Section 8001 of the Government Code, as they are appointed from time to time, and shall have the same chairman

3. The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular general session, with authority to file its final report not later than the fifteenth legislative day of the next regular general session

4 The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5 The committee, and any subcommittee when so authorized by the committee, may meet and act without as well as within the State of California, and is authorized to leave the State in the performance of its duties

6. The sum of three thousand five hundred sixty-eight dollars and fifty-five cents ($3,568 55) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read.

Request for Unanimous Consent

Mr. Ralph C. Dills asked for unanimous consent to take up House Resolution No. 23, at this time, without reference to committee or file.

Mr. Field withheld unanimous consent.

Resolution ordered referred to Committee on Rules.

By Mr. Anderson:

House Resolution No. 24

Relative to distribution of California Blue Book

WHEREAS, The State Printer has compiled, published and distributed a State Blue Book; and

WHEREAS, It is fitting that the Members of the Assembly should receive copies of the State Blue Book in order that they and their constituents may be better acquainted with the information therein contained; and

WHEREAS, A number of members have been elected to the Fifty-seventh Legislature of California who were not Members of the Fifty-sixth Legislature, and who have not received copies of the State Blue Book, now, therefore, be it

Resolved by the Assembly of the State of California, That the Chief Clerk of the Assembly is authorized to deliver to the Members of the Fifty-seventh Legislature copies of the State Blue Book as follows: To each Member of the Assembly who was not a Member of the Fifty-sixth Legislature, 10 copies, and to each Member of this Assembly who was also a Member of the Fifty-sixth Legislature, upon his written request to the Chief Clerk, five copies

Request for Unanimous Consent

Mr. Anderson asked for, and was granted, unanimous consent to take up House Resolution No. 24, at this time, without reference to committee or file.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Stanley, Stewart, Thomas, Thompson, Thorp, Waters, and Wollenberg—70.

NOES—None.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 99: By Mr. Silliman—An act to amend Section 737nn of the Political Code, relating to the salaries of judges of the superior court.

Referred to Committee on Judiciary.

RESOLUTIONS

The following resolution was offered:

By Messrs. Hawkins, Maloney, Stephenson, and Gannon:

House Resolution No. 26

Relating to Condolences on Passing of Mrs. Harry O. Johnson

The Members of the Assembly of the State of California have learned with sorrow of the passing of Mrs. Harry O Johnson, beloved wife of Harry O Johnson who has served for many sessions as Assistant Sergeant-at-Arms of the Assembly

Mrs. Harry O. Johnson, born Mildred Beams, a charming and talented woman, a graduate of the Oberlin Conservatory of Music, was a devoted wife to Harry O. Johnson, member of a pioneer Sacramento family. The marital happiness of this couple was well known to their many friends; now, therefore, be it

Resolved by the Assembly of the State of California, That the Members of the Assembly by this resolution extend to Harry Johnson and other members of the bereaved family their deepest sympathy, and be it further

Resolved, That the Chief Clerk of the Assembly be directed to send suitably engrossed copies of this resolution to Harry O. Johnson and Frederick R. Beams of Sacramento, the husband and the brother of Mrs. Harry O Johnson

Request for Unanimous Consent

Mr. Hawkins asked for, and was granted, unanimous consent to take up House Resolution No 26, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

REQUEST FOR UNANIMOUS CONSENT TO PRINT RESOLUTION

Mr. Anderson asked for, and was granted, unanimous consent that the following resolution be ordered printed in the Journal:

Resolution

WHEREAS, The attached newspaper article dated at New York, September 13, 1946, regarding the Attack on Pollution of Water Courses in Various States, sets forth a sound legislative policy and a broadening trend in the various states toward legislative and administrative action to curb the pollution of rivers and other waters by sewage and industrial waste; and

WHEREAS, Such pollution has been prevalent in California, the most noteworthy example being the pollution of the ocean waters and bathing beaches in Los Angeles County by the sewer system of the City of Los Angeles and other cities in said county, which pollution resulted in the quarantine of about ten miles of our best beaches and ocean bathing waters, as well as certain court action to correct the same; and

WHEREAS, The said attached newspaper article sets forth a prevailing legislative trend to correct such pollution by the states and free our water courses and bathing facilities from such pollution in the future; now, therefore, be it

Resolved, That the Manhattan Beach Chamber of Commerce endorse and recommend action by the California Legislature in 1947, in accordance with ideas set forth in said newspaper article entitled, "Plan Attack on Pollution of Water Courses in Various States"; and be it further

Resolved, That this resolution and the said attached newspaper article be forwarded to our State Senator, Jack B Tenney, and our State Legislator, Glenn M. Anderson, for their considered and aggressive action and endorsement at the 1947 Session of our California Legislature; and that such publicity be given to this resolution as will effectively sponsor such legislative program to a successful conclusion.

The above and foregoing is a true and correct copy of a resolution adopted by the Manhattan Beach Chamber of Commerce at a regular meeting duly held at Manhattan Beach, California, on the tenth day of December, 1946.

(SEAL) ANNABELLA B. MORSE
Secretary-Manager

LOS ANGELES DAILY JOURNAL, Saturday, September 14, 1946

Plan Attack on Pollution of Water Courses in Various States

NEW YORK, Sept. 13 (CCNS)—There is a broadening trend in the states toward legislative and administration action to curb pollution of rivers and other waters by sewage and industrial wastes.

Extension of this trend, together with increasing voluntary action to solve the problem, will put anti-pollution projects high on the list of public and industrial construction. It has been estimated that an expenditure of about one billion dollars will be needed to process industrial waste entering streams, with slightly more than that amount required for proper sewage disposal Practical methods for the disposal of some industrial wastes have not yet been developed and when these are found, the total outlay needed for anti-pollution projects will be further increased

Washington Is Interested

Stimulating state action in this field is a growing threat that the Federal Government will take over unless speeded progress is made by the states.

Although no major anti-pollution measures were enacted by the recent Congress, the problem attracted unprecedented interest in Washington. One proposal would have given the Federal Government broad authority to compel industries and even local governments to abate pollution of navigable streams. The bill would have set up a new unit in the United States Public Health Service to cooperate with local governments and recommend methods of purifying streams contaminated by industrial wastes and sewage It would have provided annual appropriations up to $100,000,000 to help finance costly anti-pollution facilities

New Law in Virginia

Not relishing the idea of broadened federal authority, the states are increasing their efforts to solve the problem. Virginia's 1946 Legislature enacted a stringent Anti-pollution Law setting up a five-member State Water Control Board. This board is granted general supervision of the administration and enforcement of the new Anti-pollution law and is empowered to study and investigate pollution problems, to establish reasonable standards of quality for water, and to conduct scientific experiments and research toward preventing pollution It also has authority to issue certificates of stream utilization for industries which utilize rivers for the disposal of effluent, and to see that industries and municipalities work toward reducing their present pollution loads

Enacted by the 1946 Mississippi Legislature was a measure defining stream pollution and assessing industries for an inspection of their effluent Regulations set up under the new law establish the minimum oxygen content of stream water after plant effluent is dumped into it at 4.5 parts per million. Establishments showing they are not polluting streams will be given a certificate to that effect which will be prima facie evidence of compliance with the state's anti-pollution laws.

Other States May Act

Anti-pollution legislation is expected to be raised as an issue in many states next year, when the legislatures of 45 states convene in regular session An anti-pollution measure designed to tighten present laws is scheduled to be submitted to the Vermont Legislature by a state-wide committee which has been studying the problem Alabama's State Conservation Director Ben Morgan has expressed hope that the State Health Department will recommend anti-pollution legislation in that state next year. New

legislation is contemplated by anti-pollution plans of the Rhode Island State Health Department Among other states in which the issue is likely to be presented or revived next year is South Carolina, whose legislature this year extracted the teeth from a stringent control measure.

Meanwhile, administrative action and intensified programs to curb pollution under existing laws are being launched in many states, including Illinois, Indiana, Michigan, Oregon, West Virginia, Washington, Pennsylvania and California. Attempts to curb pollution from both municipal sewage and industrial wastes are being pressed in these and other states.

Cooperative Action

Increasing use of interstate cooperation in attacking the problem also is indicated. A fight to reduce Potomac River pollution through greater cooperation of state authorities has been mapped by the Interstate Commission on the Potomac River Basin. A comprehensive study of pollution in the waters of New York State has been launched by New York's Joint Legislative Committee on Interstate Cooperation. The study was directed by the 1946 New York Legislature in recognition of the need for extensive work in pollution abatement in interstate waters. Washington and Oregon are cooperating in a drive to reduce Columbia River pollution.

Ratification of a proposed Ohio River Anti-pollution Compact is scheduled for presentation to the 1948 Session of the Virginia Legislature unless action is taken in the interim to put the pact into effect without Virginia action The issue probably will be raised next year during the legislative sessions of some of the affected states. New York, Kentucky, Indiana, and Illinois have ratified the compact unconditionally, but West Virginia's participation thus far is contingent upon Virginia's and both Ohio and Pennsylvania's participation depends on West Virginia's

RESOLUTIONS

The following resolutions were offered:

By Mr. Dickey:

House Resolution No. 27

Relative to the creation of a Fact-Finding Committee on Problems of Water Pollution resulting from sewage and industrial waste disposal

WHEREAS, The problem of water pollution resulting from the disposal of industrial wastes and sewage is a subject of vital concern to the entire State of California; and

WHEREAS, It is a problem requiring exhaustive analysis, intelligent treatment and widespread education of all concerned; and

WHEREAS, A Preliminary Draft of Legislation to Control Pollution of Water Sources, has been prepared which document is considered to be too far-reaching in its effect and too narrow in its adjudication and administration to warrant the support which should be given to a fair and impartial effort to solve the problems of industrial wastes; and

WHEREAS, In the interests of the welfare of the public health, agriculture, industry and all others concerned, it is deemed advisable that further study be given to the subject of this resolution; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1. The Fact-Finding Committee on Water Pollution is hereby created and authorized and directed to ascertain, study and analyze all facts relating to procedures designed to prevent pollution of

1. The underground water flows, particularly in the semi-arid and arid sections of the State; and

2. The surface streams in the sections of the State where there is continual surface run-off from the water sheds; and

3 The lower reaches of the principal river systems, and the coastal bays and shores;

including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Legislature, including in the reports its recommendations for appropriate legislation

2. The committee shall consist of_____Members of the Assembly appointed by the Speaker thereof. Vacancies occurring or existing in the membership of the committee shall be filed by the appointing power.

3. The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular general session, with authority to file its final report not later than the tenth legislative day of the next regular general session.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5. The committee has the following additional powers and duties:

(a) To select a chairman and a vice chairman from its membership

(b) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purpose for which it is created.

(c) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee

(d) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than herein provided.

(e) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of _____ dollars ($_____) or so much thereof as may be necessary is hereby made available from the Contingent Funds of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution to be disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

By Mr. Gannon:

House Resolution No. 28

Relating to pay deductions of state employees

WHEREAS, The many pay deductions authorized by law are a cause of confusion to the state employees who are unable to account for the differences between their established rates of pay and the amounts shown upon their checks, drafts and warrants; now, therefore, be it

Resolved by the Assembly of the State of California, That this Assembly hereby requests the State Controller, or other disbursing officer, to indicate on each check, draft, or warrant drawn by him for the payment of salaries or wages of state employees the amount of each deduction and the purpose thereof.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 131: By Mr. Gannon—An act to add Section 18611.1 to the Education Code, relating to payment of commission to brokers on sale of real property.

Referred to Committee on Judiciary.

Assembly Bill No. 132: By Mr. Berry—An act to repeal Section 381 of the Vehicle Code and to amend Section 382 of the Vehicle Code, relating to fees for chauffeur's license.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 133: By Mr. Berry—An act to amend Section 18050 of the Government Code, relating to vacations of state officers and employees.

Referred to Committee on Civil Service and State Personnel.

Speaker Presiding

At 10.58 a.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Assembly Bill No. 134: By Messrs. Crowley, Gaffney, Ralph C. Dills, Heisinger, Berry, Brady, Brown, Burns, Cooke, Debs, Hahn, Kilpatrick, Lowrey, Luckel, Maloney, McCollister, Price, and Weber—An act to amend Sections 3025, 3084, and 3087 of the Welfare and Institutions Code, relating to aid to the needy blind, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Social Welfare.

Assembly Bill No. 135: By Messrs. Crowley, Gaffney, Ralph C. Dills, Brown, Berry, Brady, Burns, Debs, Hahn, Heisinger, Lowrey, Luckel, Maloney, McCollister, Price, Kilpatrick, and Cooke—An act to amend Sections 3420 and 3472 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Social Welfare.

RESOLUTIONS

The following resolution was offered:

By Mr. Brady:

House Resolution No. 29

Relative to the continuance of the Assembly Interim Committee on Tide and Submerged Lands created by House Resolution No 297 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on Tide and Submerged Lands created by House Resolution No. 297 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session and after final adjournment until the commencement of the next regular session, with authority to file its final report not later than the fifteenth legislative day of the next regular session.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly that are applicable to such a committee as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4 The sum of one thousand nine hundred ninety-five dollars ($1,995) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund of the Assembly and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

The money made available by this resolution is less than the unused part of the amount heretofore made available to the committee which will revert to the General Fund.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 136: By Mr. Hawkins—An act to amend Sections 10208 and 10210 of the Business and Professions Code, and to add Section 10153.5 thereto, relating to real estate brokers.

Referred to Committee on Judiciary.

Assembly Bill No. 137: By Messrs. Geddes and Doyle—An act to amend Section 22 of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to municipal courts.

Referred to Committee on Judiciary.

Assembly Bill No. 138: By Messrs. Ralph C. Dills, Fletcher, Brown, Anderson, Allen, Beck, Bennett, Berry, Brady, Burns, Carey, George D. Collins, Cooke, Crichton, Crowley, Lester T. Davis, Debs, Clayton A. Dills, Doyle, Dunn, Evans, Gaffney, Gannon, Geddes, Grant, Hahn, Hawkins, Heisinger, Hollibaugh, Kilpatrick, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Mrs. Niehouse, Messrs. O'Day, Rosenthal, Sheridan, and Thomas—An act to amend Sections 2020, 2186 and 2187 of the Welfare and Institutions Code, to repeal Sections 2021, 2021.01, 2025 and 2187.01 thereof, and to amend and renumber Section 2021.001 thereof, relating to aid to the aged, increasing the amount thereof, and making an appropriation

Referred to Committee on Social Welfare.

Assembly Bill No. 139: By Mr. Lester T. Davis—An act to amend Section 4260 of the Political Code and Section 28131 of the Government Code, relative to compensation for public services in counties of the thirty-first class.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 140: By Messrs. Rosenthal, Bennett, M. Philip Davis, and Waters—An act to amend Section 737s of the Political Code, relating to salaries of judges.

Referred to Committee on Judiciary.

Assembly Bill No. 141: By Messrs. Rosenthal, Bennett, M. Philip Davis, and Waters—An act to amend Section 736b of the Political Code, relating to salaries of judges.

Referred to Committee on Judiciary.

Assembly Bill No. 142: By Messrs. Rosenthal, Beck, Bennett, M. Philip Davis, and Waters—An act to amend Section 67a of the Code of Civil Procedure, relating to judges in the counties of the first class.

Referred to Committee on Judiciary.

Assembly Bill No. 143: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to add Sections 464, 468.1 and 759 to, and to amend Sections 468, 477 and 758 of, the Vehicle Code, relating to signs and traffic signaling devices.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 144: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Section 503 of the Vehicle Code, relating to theft and unlawful driving or taking of a vehicle.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 145: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 511.1, 512 and 515 of, to repeal Sections 511.2, 511.3 and 511.4 of, and to add Sections 511 2, 511.3 and 525.1 to, the Vehicle Code, and to amend Section 144 of the Streets and Highways Code, all relating to speed limits and the operation of vehicles upon the highway.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 146: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 480 and 501 of the Vehicle Code, relating to offenses involving injury to persons.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 147: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 453, 623.5, 640 and 650.6 of the Vehicle Code, relating to persons and equipment engaged in highway work, declaring the urgency thereof and providing that this act shall take effect immediately.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 148: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 379, 380, 382, 383, 383.1, and 776 of the Vehicle Code, Section 7 of an act entitled "An act to regulate the caravaning of vehicles upon the public highways of this State, defining the term 'caravaning' and providing for the licensing of vehicles in caravan for the privilege of using the public highways and for the cost of regulating persons engaged in caravaning and providing such fees shall be a lien and for the enforcement of such liens and the collection and disposition of such fees and imposing penalties for violation thereof, and to repeal an act entitled 'An act to regulate the caravaning of motor vehicles upon the public highways of this State, defining the term "caravaning" and providing for the licensing of motor vehicles in caravan and imposing penalties for violation thereof,' approved July 6, 1935, declaring the urgency thereof, and providing that it shall take effect immediately," approved July 1, 1937, being Chapter 788 of the Statutes of 1937, and Section 10901 of the Revenue and Taxation Code, relating to fees collected by the Department of Motor Vehicles and refunds made thereby.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 149: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to add Section 425.1 to the Vehicle Code, relating to liens upon vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 150: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to add Section 459.5 to, and to amend Sections 466, 575, 576, and 577 of, the Vehicle Code, relating to the operation of vehicles at or near railroad grade crossings.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 151: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to amend Sections 135.5, 604.10 and 750 of, and to add Sections 584 and 585.3 to, the Vehicle Code, relating to officers enforcing the provisions of the Vehicle Code.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 152: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to amend Sections 694 and 704 of, and to add Section 710.5 to, the Vehicle Code, relating to the size and weight of vehicles and the issuance of permits for operation of vehicles not complying with the provisions of the Vehicle Code.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 153: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to add Section 2983 to the Civil Code, relating to conditional sales of motor vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 154: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to amend Section 11501 of the Government Code, relating to the administrative procedure of enumerated state agencies, including the Department of Motor Vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 155: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to amend Sections 11619 and 11621 of the Health and Safety Code, relating to the use of vehicles in the transportation of narcotics.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 156: By Messrs. Burns, Berry, Gaffney, and Thomas—An act to amend Sections 11610, 11612, 11614, 11619, 11622 and to repeal Sections 11620 and 11621 of the Health and Safety Code, relating to the unlawful transportation, keeping, depositing, concealment and possession of narcotics in vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 157: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 164, 181, 222 of, to repeal Section 146.5 of, and to add Section 182.1 to, the Vehicle Code, relating to the registration and transfers of registration of vehicles, declaring the urgency thereof, and providing that this act shall take effect immediately.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 158: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Section 599 of, and to add Section 58 to, the Vehicle Code, relating to inflammable liquids and vehicles transporting the same.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 159: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 109, 111, 124, and 128, to repeal Sec-

tions 119, 120 and 121 of, and to add Section 134.5 to, the Vehicle Code, relating to the officers and functions of the Department of Motor Vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 160: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to add Sections 127, 737.5, 738.1 and 745 to, and to amend Section 740 of, the Vehicle Code, relating to arrest and prosecution of violations of said code.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 161: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to add Sections 34.5, 452.5, 452.10, 694.10 and 697.5 to the Vehicle Code, relating to trolley coaches.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 162: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 10753.5 and 10755 of the Revenue and Taxation Code, relating to the vehicle license fee, and vehicles subject thereto.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 163: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Section 1295 of the Penal Code, relating to bail.

Referred to Committee on Judiciary.

Assembly Bill No. 164: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 298, 307, 308, and 502 of the Vehicle Code, relating to the suspension and revocation of drivers' licenses.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 165: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 271, 278, 314, 314.5, 315, 316, and 332 of the Vehicle Code, and to add Sections 271.2 and 305.1 to the Vehicle Code, relating to drivers' licenses and to the issuance, suspension, or revocation thereof, and declaring the urgency of this act.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 166: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Section 257 of the Vehicle Code, relating to drivers licenses of minors.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 167: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 39.5, 132, 143, 150, 166, 168, 177, 195, 195.5, 221, 225, 234, 237, 239 and 246, to add Sections 140.1, 163, 180.7 and 232.1 to, and to repeal Section 160.1 of, the Vehicle Code, relating to the identification, registration and transfers of registration of vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 168: By Messrs. Burns, Berry, and Thomas—An act to amend Sections 459.1, 529, 533, 541, 544, 552, 560, 564, 582, 588, 589.5, 592.1, 596.4, 596.5, and 737 of, to add Sections 560.1, 564.1, 583, 589.6, 596.6 and 601.5 to, and to repeal Sections 583 and 584 of, the Vehicle Code, relating to the parking, standing and operation of vehicles and the rights and obligations of pedestrians.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 169: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Sections 626, 645, 646, 670, 670.4, 673, 674, 675, 675.5, 677 of, and to add Sections 57 and 641 to, the Vehicle Code, relating to equipment of vehicles and the testing and approval thereof by the Department of Motor Vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 170: By Messrs. Burns, Berry, Thomas, and Gaffney—An act to amend Section 44 of, and to add Section 671.1 to, the Vehicle Code, relating to authorized emergency vehicles and the illegal use of sirens.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 171: By Mr. Thomas—An act to add Section 1312 to the Labor Code, relating to contracts with minors.

Referred to Committee on Judiciary.

REQUEST FOR UNANIMOUS CONSENT

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 25, at this time.

FURTHER CONSIDERATION OF HOUSE RESOLUTION NO. 25

House Resolution No. 25

ASSEMBLY CHAMBER, SACRAMENTO, January, 10, 1947

MR. SPEAKER: Your Committee on Rules respectfully begs to report that it has carefully considered the application for the various positions and desires to submit the following resolution:

Commencing on Monday, January 6, 1947:	*Per day*
Chief Clerk, Arthur A. Ohnimus	$20 00
First Assistant Clerk, Harold Lewright	15 00
Minute Clerk, Geraldine B. Hadsell	15 00
Chaplain, Rev. Raymond Renwald	5 00
Sergeant-at-Arms, Wilkie Ogg	15 00
Assistant Clerk, Robert J. Finnie	12 00
Assistant Clerk, Carroll Parish	12 00
History Clerk, Ethel Brockelbank	12 00
File Clerk, Ruth Riley	12 00
Engrossment and Enrollment Clerk, Charles W. Robbins	14 00

And be it further

Resolved, That the compensation of the above named attaches shall be on a seven day week basis; and be it further

Resolved, That the following named persons are employed for the positions and at the per diem set opposite their respective names, said employment to commence

on Monday, January 6, 1947, and said persons to be stricken from the roll upon completion of their work on Tuesday, January 7, 1947:

	Per day
Assistant History Clerk, Virginia Hartong	$9 00
Assistant Engrossment and Enrollment Clerk, Marion Hendricks	10 00
Journal Clerk, Albert Day	9 00
Assistant Journal Clerk, Florence Harvey	8 00
Assistant Minute Clerk, Lillian Slater	10 00
Post Mistress, Lillian Larkin	8 00
Secretary to Speaker, Irene Anderson	12 00
Secretary to Chief Clerk, Dolly Smith	12 00
Assistant Engrossment and Enrollment Clerk, Lena Heisinger	9 00
Sound Operator, James Doyle	10 00
Assistant Sergeant-at-Arms, George Ash	9 00
Assistant Sergeant-at-Arms, Harry Blass	9 00
Assistant Sergeant-at-Arms, William Greene	9 00
Assistant Sergeant-at-Arms, Henry W. Ogg	9 00
Assistant Sergeant-at-Arms, Cecil DeMille	9 00
Assistant Sergeant-at-Arms, Robert Fleischer	9 00
Assistant Sergeant-at-Arms, Charles F Doyle	9 00
Assistant Sergeant-at-Arms, Edward Gehring	9 00
Assistant Sergeant-at-Arms, Peter Finnie	9 00
Assistant Sergeant-at-Arms, Mike Connolly	9 00
Assistant Sergeant-at-Arms, Phil Milspaugh	9 00
Assistant Sergeant-at-Arms, Raymond Kahl	9 00
Assistant Sergeant-at-Arms, Edward Edison	9 00
Assistant Sergeant-at-Arms, Morris L. Martin	9 00
Assistant Sergeant-at-Arms, Francis Crone	9 00
Assistant Sergeant-at-Arms, Ernest J. Brown	9 00
Assistant Sergeant-at-Arms, Claude Horton	9 00
Assistant Sergeant-at-Arms, Irdell Hollar	9 00
Assistant Sergeant-at-Arms, William Murphy	9 00
Assistant Sergeant-at-Arms, Walter W. Feeley	9 00
Assistant Sergeant-at-Arms, Georgia C. Harvell	9 00
Bookkeeper to Sergeant-at-Arms, Elizabeth Marty	9 00
Chief Page, Richard Coffman	4 00
Page, Michael Coughlan	3 50
Assistant Sergeant-at-Arms, Tom Lyons	9 00
Chief Stenographer, Juanita Dependener	14 00
Secretary to Rules, Grace Stall	12 00
Secretary to Ways and Means, Fern Sherick	12 00
Secretary to Governmental Efficiency and Economy, Joyce Lynn	12 00
Secretary to Military Affairs, Christine Harrison	10 00
Stenographers	
Marguerite Smith	9 00
Elise Long	9 00
Carol Baldwin	9 00
Maryalice Sims	9 00
Madeleine Greenleaf	9 00
Nan Cullinan	9 00
Frances Boone	9 00
Emma Jane White	9 00
Teddy Bing	9 00
Vera Verasoff	9 00

DICKEY, Chairman
Committee on Rules

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 25, at this time, without reference to committee or file.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—74.

NOES—None.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 172: By Mr. Evans—An act to add Section 122.5 to the Labor Code, relating to medical assistance of the Industrial Accident Commission under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 173: By Mr. Lyons—An act to amend Section 252 of the Unemployment Insurance Act, relating to claims for unemployment compensation disability benefits, declaring the urgency thereof to take effect immediately.

Referred to Committee on Military Affairs.

Assembly Constitutional Amendment No. 5: By Messrs. Gannon, Heisinger, Hahn, Loomis, Allen, Bennett, Berry, Blosser, Burke, Burns, Butters, Carey, Clarke, Cooke, Cramer, Crowley, M. Philip Davis, Dickey, Clayton A. Dills, Doyle, Evans, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Knight, Lowrey, Miller, Price, Silliman, Stephenson, Stewart, Thomas, Thorp, and Thurman—A resolution to propose to the people of the State of California an amendment to the Constitution of the State by amending Section 22 of Article XX, relating to alcoholic beverages.

Referred to Committee on Constitutional Amendments.

Assembly Bill No. 174: By Messrs Cramer, Lowrey, Butters, and Clarke—An act to amend Section 511.2 of the Vehicle Code, relating to authority to decrease 55 mile limit.

Referred to Committee on Transportation and Commerce.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 10, 1947

MR. SPEAKER: Your Committee on Rules, to which was referred:

House Resolution No 23

Has had the same under consideration, and reports the same back with amendments with the recommendation. Amend, and be adopted, as amended.

DICKEY, Chairman

REQUEST FOR UNANIMOUS CONSENT

Mr. Ralph C. Dills asked for, and was granted, unanimous consent to take up House Resolution No. 23, at this time.

CONSIDERATION OF HOUSE RESOLUTION NO. 23

House Resolution No. 23

Relative to the creation of the Assembly Committee on Interstate Cooperation

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Interstate Cooperation is hereby created and authorized and directed to ascertain, study and analyze all facts relating to cooperation between this State and the other states and with the Federal Government and to make recommendations thereon for the appropriate legislation.

2. The committee shall consist of the same five Members of the Assembly who are members of the committee as created by Section 8001 of the Government Code, appointed from time to time, and shall have the same chairman.

3 The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular general session, with authority to file its final report not later than the fifteenth legislative day of the next regular general session.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5. The committee, and any subcommittee when so authorized by the committee, may meet and act without as well as within the State of California, and is authorized to leave the State in the performance of its duties

6. The sum of three thousand five hundred sixty-eight dollars and fifty-five cents ($3,568.55) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read.

Consideration of Committee Amendments

The following amendment was proposed by the Committee on Rules:

Amendment No. 1

Strike out all of the paragraph numbered "2." of said resolution, and insert

"2. The committee shall consist of five Members of the Assembly as authorized by Section 8001 of the Government Code."

Amendment read, and adopted.

Request for Unanimous Consent

Mr. Ralph C. Dills asked for, and was granted, unanimous consent to take up House Resolution No. 23, as amended, at this time.

Consideration of House Resolution No. 23, as Amended

House Resolution No. 23

Relative to the creation of the Assembly Committee on Interstate Cooperation

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Interstate Cooperation is hereby created and authorized and directed to ascertain, study and analyze all facts relating to cooperation between this State and the other states and with the Federal Government and to make recommendations thereon for the appropriate legislation.

2 The committee shall consist of five Members of the Assembly as authorized by Section 8001 of the Government Code.

3 The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular general session, with authority to file its final report not later than the fifteenth legislative day of the next regular general session.

4 The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5 The committee, and any subcommittee when so authorized by the committee, may meet and act without as well as within the State of California, and is authorized to leave the State in the performance of its duties.

6 The sum of three thousand five hundred sixty-eight dollars and fifty-five cents ($3,568.55) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, as amended.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Blosser, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr Speaker—73

NOES—None.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 175: By Mr. Rosenthal—An act to amend Section 5800 of the Labor Code, relating to findings and award of the Industrial Accident Commission under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 176: By Mr. Cramer, Mrs. Niehouse, Messrs. Luckel, Geddes, Conrad, and Hollibaugh—An act to amend Section 673 of, and to add Sections 673.3 and 673.4 to, the Vehicle Code, relating to motor vehicle exhaust systems.

Referred to Committee on Transportation and Commerce.

EXCERPT ORDERED PRINTED ON RECOMMENDATION OF COMMITTEE ON RULES

The Committee on Rules recommended that the request made by Mr. Crichton on a previous legislative day be granted, and, there being no objections, the following excerpt from the Fresno Bee was ordered printed in the Journal:

Friday, January 3, 1947

The Fresno Bee

Traffic Deaths Are Due to Law Violations

To say the great majority of highway traffic deaths are due to law violations seemingly is to state the obvious.

Yet the remarkable thing is that thinking along lines of accident prevention more often than not turns to other means than the simple expedient of law enforcement.

A national safety organization study of 27,000 fatal highway accidents has revealed that 11,310, or 41.9 percent of them, were due to plain speeding.

And another 4,700, or 17.4 percent, resulted from the fact drivers were operating their cars on the wrong side of the highway.

Reckless driving accounted for 3,180 deaths, failure to yield the right of way 3,080 more.

Driving off the roadway, which might have been the result of mechanical failure, was listed as the cause in only 940 accidents, or 3.5 percent of the total.

Some other accident causes were failure to give signals or giving the wrong signal, cutting in, passing on curves or hills and passing standing streetcars. However, these added up to less than 10 percent of the fatalities.

Thus, two common law violations—speeding and driving on the wrong side of the highway—accounted for six out of every 10 traffic deaths.

If the laws had been enforced strictly, most of the 27,000 persons who became mere statistics in this study still would be living.

Of course, it is impossible to maintain a staff of officers of sufficient size to prevent all law infractions. That would not be possible in California even with a force of 10,000 patrolmen.

The problem then becomes one of law consciousness on the part of the drivers, as well as law enforcement.

Safety campaigns help, but they are not enough. During the current holiday season, Los Angeles went all out on a safety drive, and achieved the blackest traffic record in history.

The Los Angeles Times suggests the ultimate remedy may rest with the courts. This newspaper remarks:

The offenders who are caught should get the book. The outlaw knows his chance of being taken by the police is small. But the chance will seem much larger when he exaggerates it with the knowledge that if he is caught he certainly will be punished.

Indeed, it would be well if the courts regarded the speeder and other traffic violators for what the statistics prove them to be—potential killers.

APPOINTMENT OF ASSEMBLY COMMITTEE ON INTERSTATE COOPERATION

Pursuant to the provisions of Government Code Section 8001 and House Resolution No. 23, Speaker Collins announced the appointment of Messrs. McCollister, Chairman; Ralph C. Dills, Crichton, Thorp, and Thomas as members of the Assembly Committee on Interstate Cooperation.

The Speaker further announced the appointment of Mr. Thompson as an alternate for Mr. Thorp, at the next meeting of the committee.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 10, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Assembly Concurrent Resolution No. 12
Assembly Concurrent Resolution No. 20
Assembly Joint Resolution No. 4

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

Above resolutions ordered enrolled.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Hahn, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Albert Kloster of Los Angeles.

On request of the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Harvey M. Toy of San Francisco.

ADJOURNMENT

At 11.47 a.m., on motion of Mr. Dickey, the Speaker declared the Assembly adjourned until 11 a.m. Monday, January 13, 1947.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE
FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

SIXTH LEGISLATIVE DAY
EIGHTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Monday, January 13, 1947

The Assembly met at 11 a.m.

Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker —79.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

To Thee have I lifted up my soul; in Thee, O my God, I put my trust, let me not be ashamed; neither let my enemies laugh at me; for none of them that wait on Thee shall be confounded Glory be to the Father and to the Son, and to the Holy Ghost, as it was in the beginning, is now, and ever shall be, world without end.—AMEN.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Conrad, further reading of the Journal of the previous legislative day was dispensed with.

PLEDGE OF ALLEGIANCE TO THE FLAG

Upon request of the Speaker pro Tempore, the Assembly then gave the pledge of allegiance to the Flag.

COMMUNICATIONS

By the Chief Clerk:

A communication from Mr. James Patrick Allen of San Andreas, relative to hit and run drivers, was received, and ordered filed with the Secretary of State.

RESOLUTIONS

The following resolutions were offered:

By Mr. Dickey:

House Resolution No. 30

Referred to Committee on Municipal and County Government.

RESOLUTIONS

The following resolution was offered:

By Messrs. Kilpatrick, Rosenthal, Price, Bennett, and Hollibaugh:

House Resolution No. 33

Relative to the continuance of the Assembly Interim Committee on County and City Jails created by House Resolution No. 253 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on County and City Jails created by House Resolution No. 253 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature including any recess, but not after final adjournment.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

4. The sum of five hundred dollars ($500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolutions were read:

Assembly Bill No. 189: By Mr. Ralph C. Dills—An act to amend Section 4300h of the Political Code, relating to coroners' fees.

Referred to Committee on Municipal and County Government.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 10, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 10
Senate Joint Resolution No. 1

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following resolutions were read:

Senate Joint Resolution No. 1—Relative to memorializing the President and the Congress of the United States in relation to providing

funds to complete the Veterans Temporary Emergency Housing Program.

Referred to Committee on Rules.

Senate Concurrent Resolution No. 10—Relative to the continuance of the Joint Fact-Finding Committee on Un-American Activities created by Resolutions Chapter No. 143 of the Fifty-sixth Regular Session.

Referred to Committee on Rules.

Assembly Concurrent Resolution No. 12—Relative to the selection of the Legislative Counsel of California;

And reports that the same have been correctly enrolled, and presented to the Secretary of State on the thirteenth day of January, 1947, at 11 a.m.

ARTHUR A. OHNIMUS, Chief Clerk of the Assembly

WITHDRAWAL AND RE-REFERENCE OF ASSEMBLY BILL NO. 88

Mr. Hollibaugh moved that Assembly Bill No. 88 be withdrawn from the Committee on Public Morals, and re-referred to the Committee on Agriculture.

Motion carried.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 190: By Mr. Ralph C. Dills (By request)—An act to add Section 19432.5 to the Education Code, relating to civic centers.

Referred to Committee on Education.

Assembly Bill No. 191: By Messrs Hawkins, Anderson, Thomas, Hollibaugh, Allen, Bennett, George D. Collins, Cooke, Crowley, Debs, Clayton A. Dills, Ralph C. Dills, Doyle, Fletcher, Grant, Heisinger, Kil-

patrick, McMillan, Miller, Robertson, and Rosenthal—An act to amend Sections 19601 and 19617 and to repeal Section 19616 of the Education Code, relating to child care centers, and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Education.

Assembly Bill No. 192: By Messrs. Hawkins, Thomas, Anderson, Hollibaugh, Allen, Bennett, George D. Collins, Cooke, Crowley, Debs, Ralph C. Dills, Clayton A. Dills, Doyle, Fletcher, Grant, Heisinger, Kilpatrick, McMillan, Miller, Robertson, and Rosenthal—An act making an appropriation for the support of child care centers, and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Education.

Assembly Bill No. 193: By Mr. Thurman—An act to provide for leasing adequate facilities and service for the establishment and operation of a telephone-typewriter system of communication between the State Department of Justice and the sheriff's office of Nevada County in Nevada City, and to make an appropriation therefor.

Referred to Committee on Judiciary.

Assembly Bill No. 194: By Messrs. Allen and Evans—An act to amend Section 19622 of the Business and Professions Code, relating to appropriations from the Fair and Exposition Fund.

Referred to Committee on Agriculture.

RESOLUTIONS

The following resolution was offered:

By Messrs. Evans, Conrad, Huyck, and Clayton A. Dills:

House Resolution No. 34

Relating to the creation of a Committee to Investigate Traffic and Parking Conditions in the City of Los Angeles

WHEREAS, The extensive use of motor transportation in the City of Los Angeles has produced traffic and parking conditions of major importance to that part of the State; and

WHEREAS, The future development of the City of Los Angeles industrially, commercially, and residentially demands a solution of the traffic and parking problem; and

WHEREAS, The safety of thousands of persons is daily endangered by the density of the traffic in the City of Los Angeles and by the contribution thereto from lack of parking space; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1. The Los Angeles Traffic and Parking Committee is hereby created and authorized and directed to ascertain, study and analyze all facts relating to traffic and parking in the City of Los Angeles, the means of promoting safety with respect thereto, and additional streets and parking places in the City of Los Angeles, including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Assembly, including in the reports its recommendations for appropriate legislation.

2. The committee shall consist of _____ Members of the Assembly appointed by the Speaker thereof. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

5. The committee has the following additional powers and duties:

(a) To select a chairman and a vice chairman from its membership

(b) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purposes for which it is created.

(c) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution, and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(d) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than the tenth legislative day following the reassembling of the Legislature after the recess of this session required by Section 2 of Article IV of the Constitution.

(e) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of one thousand five hundred dollars ($1,500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 195: By Mr. Cooke—An act to amend Section 19533 of the Government Code, relating to lay-offs.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 196: By Mr. Cooke—An act to amend Section 18936 of the Government Code, relating to limitation of number of candidates.

Referred to Committee on Elections and Reapportionment.

Speaker Presiding

At 11.25 a.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Assembly Bill No. 197: By Mr. Cooke—An act to amend Section 18854 of the Government Code, relating to salary adjustment.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 198: By Mr. Cooke—An act to amend Section 19535 of the Government Code, relating to classifications.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 199: By Mr. Cooke—An act to amend Section 19534 of the Government Code, relating to lay-offs.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 200: By Mr. Cooke—An act to amend Section 18953 of the Government Code, relating to promotional examinations.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 201: By Mr. Cooke—An act to amend Section 19303 of the Government Code, relating to performance reports.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 202: By Mr. Cooke—An act to amend Section 18905 of the Government Code, relating to reemployment lists.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 203: By Mr. Cooke—An act to add Section 6527 to the Business and Professions Code, relating to the practice of barbering at state institutions.

Referred to Committee on Public Health.

Assembly Bill No. 204: By Mr. Maloney—An act to amend Section 4661 of the Labor Code, relating to compensation for permanent disability under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 205: By Mr. Maloney—An act to amend Section 4453 of the Labor Code, relating to average weekly earnings under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 206: By Mr. Maloney—An act to amend Section 4460 of the Labor Code, relating to permanent and temporary disability under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 207: By Messrs Price, Geddes, Bennett, Berry, Brady, Burke, Butters, Clarke, Cooke, Crichton, Crowley, Debs, Clayton A. Dills, Dunn, Evans, Kilpatrick, Knight, Maloney, Silliman, Stewart, Thorp, and Weber—An act providing the preparation, publication, and distribution of a book showing the trees and shrubs of California and making an appropriation.

Referred to Committee on Education.

Assembly Bill No. 208: By Messrs. Crowley and Allen—An act to add Section 158.51 to the Welfare and Institutions Code, relating to commissary stores at state institutions.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 209: By Messrs. Crowley and Allen—An act to appropriate the sum of $_____from the general funds of the State of California not otherwise appropriated to provide for payment to members of the post band at the State Veterans' Hospital.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 210: By Mr. Thurman—An act to add Section 156.2 to the Welfare and Institutions Code, relating to the expenditures of funds.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 211: By Mr. Hollibaugh—An act to add Section 17129.5 to the Revenue and Taxation Code, relating to gross income under the Income Tax Law.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 212: By Messrs. Burns, Berry, and Thomas—An act making an appropriation to the Division of Beaches and Parks, Department of Natural Resources, for the acquisition of land as part of the State Park System.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 213: By Messrs. Grant and Fletcher—An act to add Section 44.11 to the Vehicle Code, relating to authorized emergency vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 214: By Mr. Cramer—An act to repeal Section 634 of the Vehicle Code and to add Section 620.6 to said code, relating to fog lamps.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 215: By Mr. Cramer—An act to repeal Section 586 of, and to add a new Section 586 to, the Vehicle Code, relating to parking of vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 216: By Mr. Cramer—An act to amend Section 90 of the Vehicle Code, relating to residence districts.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 217: By Mr. Cramer—An act to amend Section 259 of, to add Section 259.2 to, and to repeal Section 258.1 of, the Vehicle Code, relating to the driving of vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 218: By Mr. Thomas—An act to amend Section 56 of the Unemployment Insurance Act, relating to disqualifications for benefits.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 219: By Mr. Dunn—An act to amend Section 77 and Section 78 of the Unemployment Insurance Act, relating to unemployment insurance.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 220: By Mr. Dunn—An act to amend Section 57 of the Unemployment Insurance Act, relating to ability to, and availability for, work.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 221: By Mr. Dunn—An act to amend Section 57 of the Unemployment Insurance Act, relating to ability to, and availability for, work.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 222: By Messrs. Rosenthal and Waters—An act to amend Section 274a of the Code of Civil Procedure, relating to phonographic reporters.

Referred to Committee on Judiciary.

Assembly Bill No. 223: By Messrs. Rosenthal and Waters—An act to add Section 269a to the Code of Civil Procedure, relating to phonographic reporters.

Referred to Committee on Judiciary.

Assembly Bill No. 224: By Mr. Rosenthal—An act to amend Section 1557 of the Penal Code, relating to fugitives from justice.

Referred to Committee on Judiciary.

Assembly Bill No. 225: By Mr. Rosenthal—An act to amend Sections 29851 and 29852 of the Government Code, relating to duplicate county warrants.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 226: By Mr. Ralph C. Dills—An act to amend Section 12 of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to residential qualifications of attaches of municipal courts.

Referred to Committee on Judiciary.

Assembly Bill No. 227: By Mr. Ralph C. Dills—An act to add Article 12, consisting of Sections 8000, 8001, 8002, 8003, 8004, 8005, and 8006, to Chapter 4, Part 2, Division 7, of the Health and Safety Code, relating to the abandonment of county-owned cemeteries, the disposition of the interred remains and the future use of the abandoned cemetery.

Referred to Committee on Municipal and County Government

Assembly Bill No. 228: By Mrs. Niehouse and Mr. Cramer—An act to amend Section 3 of an act entitled "An act creating an additional district court of appeal known as the District Court of Appeal for the Fourth Appellate District, redividing the State into appellate districts, providing for the maintenance and operation of said court, and making an appropriation therefor," approved June 5, 1929, relating to sessions.

Referred to Committee on Judiciary.

Assembly Bill No. 229: By Mrs. Niehouse and Mr. Cramer—An act to amend Section 16482 of the Education Code, relating to physical examinations of pupils in the Public School System.

Referred to Committee on Education.

Assembly Bill No. 230: By Mrs. Niehouse—An act to amend Section 9 of the Municipal Court Act of 1925, relating to the constitution of the court and to compensation of officials.

Referred to Committee on Judiciary.

Assembly Bill No. 231: By Mrs. Niehouse—An act to amend Section 5193 of the Public Resources Code, relating to parks.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 232: By Mr. Lowrey—An act to amend Section 6830 of the Harbors and Navigation Code, relating to port commissions.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 233: By Mr. Fletcher—An act to amend Section 4652 of the Labor Code, relating to waiting period under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 234: By Mr. Caldecott—An act to amend Section 1 of an act entitled "An act to suspend those provisions of Article XI, Section 5, of the Constitution relating to the compensation of county, township and municipal officers, declaring the urgency hereof, to take effect immediately," approved January 24, 1945, relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 235: By Messrs. Caldecott and Fletcher—An act to amend Section 103 of the Code of Civil Procedure, relating to justices' courts in townships and cities.

Referred to Committee on Judiciary.

Assembly Bill No. 236: By Messrs. Caldecott and Fletcher—An act to amend Section 103½ of the Code of Civil Procedure, relating to justice's clerks in cities and towns.

Referred to Committee on Judiciary.

Assembly Bill No. 237: By Mr. Hollibaugh—An act to add Section 6604.5 to the Business and Professions Code, relating to barbers and barber colleges.

Referred to Committee on Public Health.

Assembly Bill No. 238: By Mr. Hollibaugh—An act to amend Section 6509 of the Business and Professions Code, relating to the inspection of barber shops and barber colleges.

Referred to Committee on Public Health.

Assembly Bill No. 239: By Messrs. M. Philip Davis, Dickey, Gannon, Grunsky, McMillan, Robertson, and Rosenthal—An act to add Section 362e to the Civil Code and Chapter 4, comprising Sections 4400 to 4405, inclusive, to Part 8 of Division 1 of Title 1 of the Corporations Code, relating to corporations, and providing for the effectuation of plans of reorganization under the federal laws relating to bankruptcy.

Referred to Committee on Judiciary.

Assembly Bill No. 240: By Messrs. M. Philip Davis, Dickey, Gannon, Grunsky, McMillan, Robertson, and Rosenthal—An act to amend Section 1033.7 of the Code of Civil Procedure, relating to judgment creditors claiming costs or disbursements.

Referred to Committee on Judiciary.

Assembly Bill No. 241: By Mr James—An act to amend Section 9 of the County Civil Service Enabling Act and Section 31101 of the Government Code, relative to powers of the boards of supervisors of counties in establishing civil service systems.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 242: By Messrs. James and Silliman—An act to amend Section 4238 of the Political Code and Sections 28109 of the Government Code, relating to compensation for public services in counties of the ninth class.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 243: By Messrs M. Philip Davis and Caldecott —An act to amend Section 172.5 of the Penal Code, relating to the operation of certain clubs near certain institutions.

Referred to Committee on Public Morals.

Assembly Bill No. 244: By Mr McCollister—An act to add Section 330.1 to the Penal Code, relating to gaming, and to gambling places.

Referred to Committee on Public Morals.

Assembly Bill No. 245: By Messrs. Thompson and Kirkwood—An act making an appropriation for a state office building in the City of San Jose.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 246: By Messrs. Robertson, Cooke, and Silliman—An act making an appropriation for a state office building in the City of Santa Barbara.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 247: By Mr. Stephenson—An act to amend Section 2450 and Section 2452 of the Business and Professions Code, relating to chiropody.

Referred to Committee on Public Health.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 13, 1947

MR SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Assembly Concurrent Resolution No. 22

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

Above resolution ordered enrolled.

ANNOUNCEMENT

Mr. Hollibaugh announced that on Wednesday, January 15, 1947, at noon, a luncheon will be held in the Palm Court of the Hotel Senator for the members of the Los Angeles Delegation.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT

Mr. Burns asked for, and was granted, unanimous consent that the following Preliminary Report of the Joint Fact-Finding Committee on Highways, Streets, and Bridges be ordered printed in the Journal:

PRELIMINARY REPORT OF THE JOINT FACT-FINDING COMMITTEE ON HIGHWAYS, STREETS, AND BRIDGES TO THE FIFTY-SEVENTH (FIRST EXTRAORDINARY) SESSION OF THE CALIFORNIA LEGISLATURE

January 13, 1947

Appointed under Senate Concurrent Resolution No. 27 of the Fifty-sixth Session of the Legislature. Filed with Secretary of State June 16, 1945 (Res Chap. 133, Stats. of 1945, p. 3138)

Members of the Committee

RANDOLPH COLLIER, Chairman	CHARLES W. STREAM, Vice Chairman
GEORGE J. HATFIELD	MICHAEL J. BURNS
BEN HULSE	C. DON FIELD
JAMES J. McBRIDE	GERALD P. HAGGERTY
THOMAS McCORMACK	CHARLES W. LYON
JERROLD L. SEAWELL	BERNARD A. SHERIDAN
JACK B. TENNEY	FRANK J. WATERS

In accordance with provisions of Senate Concurrent Resolution No. 27, we submit herewith a Report of the Joint Fact-Finding Committee on Highways, Streets, and Bridges.

By Senate Concurrent Resolution No. 27 (Res. Chap. 133, Stats. of 1945), this committee was in effect instructed to advise the Legislature as to how the people of California should provide themselves with a highway system that will supply efficient and economical service during the next decade. Specifically, we were directed to determine what changes are required in present methods and concepts in order to guarantee that our roads and streets will be built to adequate engineering design standards, provided in the proper places at the right time, at costs which are as low as possible and fairly distributed among those who benefit from the services rendered.

From the outset of this investigation it has been apparent to your committee that the issues and problems involved are of bewildering proportions. And during the exploratory period of the study it became equally apparent that there existed no single repository of knowledge, fact or judgment from which ready solutions could be drawn. Those conditions have controlled the organization and conduct of our work. We have conducted extensive hearings and field studies. We have sought and obtained information from many state and local agencies. We have secured technical advice from competent specialists in the fields of engineering and finance. And, finally, your committee has participated in the work of other legislative committees, particularly in problems relating to safety and other matters affecting regulation of highway use.

PART I—ORGANIZATION OF WORK

Committee Hearings and Field Studies

In accordance with Senate Concurrent Resolution No. 27 of the Fifty-sixth Session, your Highway Committee met in the State Building

in San Francisco on September 11, 1945, to organize its staff and appoint members of its Advisory Council, consisting of representatives of statewide public and private agencies and other organizations interested in road problems. The members of the Advisory Council are:

P. Arnold Anderson, Private Truck Owners Bureau of California.
Lewis E. Arnold, League of California Cities.
Donald W. Cleary, Mayor's Office, San Francisco.
Stephen W. Cunningham, Los Angeles Traffic Association.
J. Allen Davis, Automobile Club of Southern California.
Peter H. Ducker, Motor Vehicle Advisory Committee.
Frank G. Forward, Highway Development Association of San Diego.
Don E. Gilman, Western Oil and Gas Association.
Leo C Hammett, County Supervisors Association of California.
George A. Herz, Jr., Associated General Contractors.
Dr. L. I. Hewes, Public Roads Administration.
William V. Hill, California Transit Association.
George Hoberg, Redwood Empire Association.
C O. Hoober, California Farm Bureau Federation.
[1]Edgar E. Lampton, Department of Motor Vehicles, State of California.
Samuel Leask, Jr , California Retailers Association.
[2]Clark Galloway, California State Chamber of Commerce.
Col. F. C. Lynch, Greater Los Angeles Safety Council.
George T. McCoy, Department of Public Works, State of California.
A. J. McFadden, Agricultural Council of California.
[3]Claude Minard, California Railroad Association.
Edwin S. Moore, California State Automobile Association.
Frew Morton, Outdoor Advertising Industry.
Dixwell L. Pierce, State Board of Equalization.
Charles W. Real, California State Federation of Labor.
[4]F. G. Pellett, Brotherhood of Railroad Trainmen.
David G. Shearer, The Trucking Industry, Inc.
J. P. Spaenhower, The Truck Owners Association of California.
Charles C. Stanley, Esq., The Texas Company

Since that time the committee has held 64 hearings throughout all parts of the State, for the purpose of having the boards of supervisors of every county and the officials of every city in the State present their road problems and recommend solutions. All interested parties were given an opportunity to present their views and persons of special competence from industry and certain national organizations were asked to give the committee the benefit of their knowledge and experience.

During its hearings in various parts of the State the members of the committee, together with state, county and city officials, were driven over many of the roads on which there are critical deficiencies and on which future construction projects are proposed in order to view at first hand the problems and proposed solutions. The members personally inspected many areas of acute congestion and points of frequent traffic accidents.

Members of the committee's staff were instructed to make all necessary field investigations and to interview officials in various parts of the State on special problems. The committee and staff have inspected in excess of 10,000 miles of roads in the State during the period of the study.

Engineering and Financial Studies

The committee sought the consultative services of leading specialists in the various fields, both in and out of California. Mr. Charles L. Dearing of the Brookings Institution, Washington, D. C., assisted the committee as adviser and consultant. Mr. Richard M. Zettel, formerly a highway economist on the staff of the Board of Investigation and Research, and

[1] Vice Gordon Garland, resigned.
[2] Vice John Luther, resigned.
[3] Vice Frank Karr, Esq., resigned.
[4] Vice Harry See, resigned.

former Director of Research, Washington State Tax Commission, was chosen to submit an historical and statistical analysis of taxes for highway purposes in California. Mr. G. Donald Kennedy, Vice President of the Automotive Safety Foundation, was loaned to the committee to direct the engineering studies. And Mr. Bertram H. Lindman, formerly an engineering economist with the Highway Cost Commission of the State of Washington, was engaged to make an economic and financial study of future highway revenues and expenditures.

Members of the research staff were instructed to report to the committee so the committee, in turn, could formulate its policies and make recommendations to the Legislature.

The results of these various studies are attached hereto as staff reports No. 1 (Engineering Report), No. 2 (Financial Report), and No. 3 (Tax Analysis). The committee desires to point out that the recommendations contained in the engineering report and in the financial report are the personal recommendations of the particular members of the research staff who prepared the reports. The committee has not approved these recommendations On the other hand, several members of the committee are in sharp disagreement with some of the recommendations.

The committee does believe that the factual information and much of the analysis contained in these reports are indispensable to a solution of the problems involved. Therefore, a careful study of these reports is urged upon the individual Members of the Legislature.

Information From State and Local Agencies

In addition to asking each county Board of Supervisors and the officials of each city to present information, the committee requested the State Highway Engineer, the Legislative Auditor, the Director of Motor Vehicles, the State Controller, the Board of Equalization, the County Supervisors Association of California, and the League of California Cities to submit all available data bearing on the subjects of the committee's inquiries. Members of the Advisory Council were also invited to provide information for the use of the committee.

At all of its hearings the committee has asked state, county, and city officials to explain in detail the various ramifications of road administration at all levels of government.

Cooperation With Other Legislative Committees

It became apparent to the committee early in its studies that the regulation of highway use, and more particularly law enforcement, would have to be considered along with engineering studies if safety on the highways were to be provided. The Senate Committee on Governmental Reorganization had made a study of Motor Vehicle Administration in California with special reference to the Division of Enforcement. It was decided that this Senate Committee, from its experience, would be better qualified to study and report on the general subject of enforcement, including driver licensing which is administered by a separate division of the Department of Motor Vehicles. Therefore, by arrangement with the chairman of the Senate committee, a Report on Traffic Law Enforcement was obtained from Lt. Col. Franklin M. Kreml of the International Association of Chiefs of Police and is on file with the Senate Committee on Governmental Reorganization.

The committee asked the Department of Motor Vehicles for certain statistical information essential to its studies, and learned that a large amount of work and a prohibitive expenditure of funds would be required to obtain from vehicle registration records in the department information as to weights of commercial vehicles and the place where all vehicles are garaged and used. Therefore, by arrangement with the Legislative Auditor, a study of vehicle registration and the mechanization of registration procedures was undertaken by the Joint Legislative Budget Committee in order to modernize both motor vehicle registration and the related financial and statistical procedures. A report has been filed with the Senate Committee on Governmental Reorganization. If the recommendations of the Legislative Auditor are adopted, valuable statistical information will become available. Such data would enable the Legislature to allocate highway-user revenues and other road funds more equitably in the future.

Matters of general taxation are being studied by the Senate and Assembly Committees on State and Local Taxation, but on certain matters of highway taxation which overlap their field these legislative committees have cooperated with our committee during the course of its investigations.

PART II—OUTLINE OF MAIN PROBLEMS AND SUMMARY OF CONCLUSIONS

The committee's activities have been focused on the four major problems of highway management:

1. Determination of the proper size, cost, and use classification of a modern highway system.
2. Fair distribution of these costs among various groups of highway users and general taxpayers.
3. The proper allocation of administrative authority and financial responsibility among the levels of government.
4. Regulation of highway use to obtain maximum service and to protect life and property.

From analysis and interpretation of the data bearing on each of these major problems your committee has reached four basic and controlling conclusions:

A. Important Segments of California's Road and Street System Are Critically Inadequate and Need Immediate Improvement

The present system does not have sufficient capacity to move existing volumes of traffic economically, safely, or conveniently. And it will become progressively more deficient in view of expected increases in motor vehicle use. It is obvious that key segments of the system must be rebuilt to modern standards of lane capacity, alignment and grade; and all tested devices for minimizing traffic hazards must be built into the system without delay.

An aggregate expenditure of at least $2,819,853,000 between July 1, 1945, and June 30, 1959, will be required in order to modernize the road and street plant, provide adequate maintenance, and assure efficient administration.

Work under way or projected for the period up to January 1, 1948, will reduce the amount of expenditure required for this minimum highway program from January 1, 1948, to June 30, 1959, to $2,434,730,000.

The committee is convinced that the best possible use of an inherently deficient plant will not produce the kind and quality of automotive service required for a balanced development of the social and economic life of California. When a physical plant becomes functionally or technically obsolete it must be rebuilt or expanded. Otherwise, stagnation sets in, inefficiencies multiply, and costs mount.

Your committee recognizes that sound management of highway, road, and street facilities requires as a primary objective the preservation of the substantial capital investment in the existing plant by making adequate provision for maintenance. Therefore, the Legislature should first make provision for such maintenance.

Ordinary business prudence dictates, however, that we should not attempt during the next decade to extract 45,000,000,000 miles of vehicle travel annually from a road and street system that is visibly inadequate to carry the present annual traffic load of 32,000,000,000 vehicle-miles. By that course of inaction the users would in reality pay as much for a thoroughly inefficient service as would be required to finance a modern road plant.

The basic choice is clear. The people should be in favor of investing capital in a long-term right-of-way acquisition program and the building of a permanent and productive road plant as against dissipating a greater amount in high operating costs, in highway maintenance and vehicle operation, repair and replacement of damaged vehicles, increased insurance outlays, and the mending of personal injuries, not to mention the terrible loss of life in traffic accidents.

The program of road and street modernization proposed in the Engineering Report is, in the judgment of the committee, conservative and a bare minimum of the needs of the State. In this regard the committee desires to call attention to the estimates of need as submitted by the counties, upon which the program of county road improvement proposed in the Engineering Report was based after making certain adjustments. The total amount of critical deficiencies and necessary improvements as reported by the counties was $322,635,560. However, in its hearings throughout the State the committee found that few of the counties had made an adequate determination of either their critical deficiencies or necessary improvements. This was due in part to the inability of the counties to secure sufficient trained engineering personnel due to wartime conditions. In part it was due to the lack of a centralized and efficient road administration. Obviously the figure above mentioned cannot be considered as an accurate estimate of county road needs. The committee believes the sum is entirely inadequate to put our county roads in proper condition.

It was also apparent to the committee during the course of its hearings that a number of cities did not have adequate plans and information upon which to base accurate estimates of their needed street improvements.

The committee recognizes the necessity for an investigation, study, and report upon the critical deficiencies and necessary improvements of

both the county road and major city streets systems. It recommends that the Legislature direct the California Highway Commission to make a complete survey thereof, in cooperation with the counties and cities, and report its findings to the Legislature.

In general, however, the program outlined in the Engineering Report is soundly conceived in its major outlines. The engineering standards applied in formulating the improvement program for the various road and street systems are those developed by the American Association of State Highway Officials. The recommended programming of improvements assigns priorities where they belong: On the roads and streets which are of primary interest to the motor vehicle users who will be expected to assume a major portion of the costs. The estimates of aggregate cost take account of probable changes in the price level, make allowance for adequate maintenance of the road and street plant, and provide for the necessary administrative overhead. In our opinion any lesser program will fail to provide acceptable standards of service.

The existing revenue system will produce approximately $1,862,-782,000, under present tax levies and rates, at expected levels of motor vehicle use and projected property valuation. The difference between estimated aggregate cost and revenue, amounting to at least $957,071,000, must be obtained either from other sources or by increasing the present rates of user charges (fuel taxes, license fees, etc.) and property taxes.

B. The Present System of Dividing Road and Street Costs Among Taxpayers Is Inequitable in Important Respects and Requires Adjustment

1. Division of Total Highway Costs Between General Taxpayers and Highway Users

A road and street system of the character and magnitude proposed in this report will require expenditures at a rate considerably in excess of the present level. The proper assignment of these costs among groups of taxpayers raises the most controversial issues involved in the problem. We have not in the course of our study been able to discover authoritative rules or principles by which anyone can devise precise taxing policies and schedules that will serve to divide total costs with exact fairness among those who are expected to benefit from road and street use. We believe, however, that there has been accumulated a sufficient body of data to afford substantial guidance in the formulation of a workable and fair system of highway management and financing.

The general method under which highway costs have been divided between general taxpayers and motor vehicle users does not provide a fair distribution of the burden. Motor vehicle users have been singled out as a special class of beneficiaries and, since 1920, have been assigned progressively larger portions of the highway bill. The road and street facilities which are of predominant interest to these special users remain critically deficient. Substantial amounts of state-collected user taxes have been expended on segments of California's road plant which carry small percentages of the total traffic. This dispersion of revenue has obviously retarded scientific programming of road improvement in accordance with transportation requirements.

Under these circumstances it would be inappropriate to fill the revenue gap by the simple device of a proportional increase in present tax rates. This would only perpetuate and intensify the existing inequities.

What is required is a basic reclassification of roads and streets in accordance with the predominant purposes served. This method affords the most orderly device for dividing financial responsibility for construction and replacement between motor vehicle users and other taxpayers, the costs to be assumed by motor vehicle users, as special taxpayers, should be limited to specifically designated systems composed exclusively of roads and streets which can be justified on the basis of transportation savings. The cost of other facilities which are maintained primarily to give access to land and dwellings must be borne by the present and prospective beneficaries of their use.

By making practical application of these principles to the program proposed in the Engineering Report, your committee finds that motor vehicle users as a class should be assigned primary financial responsibility for:

a. The improvement and maintenance of the State Highway System. It is not contemplated that primary responsibility for any portion of the State Highway System will be transferred to local jurisdiction.
b. The construction and replacement (capital outlays) of a system of primary county roads, which system will be fixed under standards adopted by the Legislature.
c. The construction and replacement (capital outlays) of a system of city streets of major importance, which system will be limited according to standards adopted by the Legislature.

2. Distribution of the Highway Users' Share of Costs

The portion of the total highway bill assignable to motor vehicle users, as such, is at present not equitably divided among the users of various classes of motor vehicles (passenger cars and light trucks, privately-operated commercial vehicles, and for-hire commercial vehicles).

The problem facing the Legislature is essentially one of finding a fair, just and reasonable price for a publicly-provided service. It is complicated by all of the inherent issues encountered by regulatory commissions in setting a fair rate for public utility services such as railroad transportation, power, heat, and light. For the State, in providing road and street facilities, is in effect managing and financing a full-scale transportation system. In establishing the prices to be paid by the users of this service the Legislature is therefore acting in the same general capacity as a regulatory commission in fixing reasonable rates for privately-owned utilities. These public regulatory commissions apply certain universally accepted standards. Thus, no private utility is permitted to charge a rate which would produce an exorbitant profit. All rates as applied to similarly situated individuals or communities must be nondiscriminatory. And, of equal importance, individual rates must bear some reasonable relationship to the cost of performing specific services.

There is no apparent reason why the same standards should not bind the State in establishing tax rates for the use of its highways. In short, by the application of these generalized standards at least the upper and lower limits of a reasonably fair system of user charges can be definitely established. The determination of the specific rate schedules within these limits is an appropriate function of the Legislature where highway charges are concerned, just as the exercise of discretion and

judgment is the function of regulatory commissions in other fields of utilities operation.

In the judgment of your committee, the evidence indicates that the existing system of user taxes is defective in at least two major respects: First, it discriminates against small vehicles because it relies primarily upon gasoline taxes; and gasoline consumption per mile does not increase proportionally to the gross weight of the vehicle. Second, while the present user tax system, with its 3 percent gross receipts tax on intercity for-hire operations does not discriminate against for-hire vehicles as a group, it does discriminate against certain for-hire vehicles whose annual mileage is no greater than that of certain private vehicles of a similar size but which are not subject to the gross receipts tax.

The fact that gasoline consumption does not adequately measure highway use makes it necessary to devise supplementary taxes which will make up the deficiency of the gasoline taxes. Based on analysis of several possible tax bases, we have concluded that a system of mileage taxes, supplemented by an annual registration fee at a nominal rate, affords the fairest and most workable method of developing a balanced system of user charges.

Mileage taxes, applicable only to vehicles over a given gross weight, would supplement the registration fee and the motor fuels taxes in an equitable manner because they would directly measure highway use and, hence, benefits derived from highways. The mileage tax schedule should be graduated with the gross weight of the vehicle to compensate for the gasoline tax deficiency, in order to require payments on each vehicle commensurate with size as well as mileage traveled.

The upper limit for mileage taxes may be established by the ton-mile method, that is, the tax schedule should require tax contributions from vehicles proportional to their relative ton-miles of operation. Gross ton-miles may be considered an appropriate measure of highway use and hence of benefits derived. Adoption of a mileage tax of this nature will shift part of the relative tax burden from light vehicles to heavier vehicles.

The lower limit for mileage taxes may be established by adjustments designed so that the total relative contribution by commercial operators will not be less than that which exists under the present system of user taxes. These mileage tax rates may be considered the minimum. For it would be inequitable to reduce the relative contributions of commercial operators in the face of evidence that the existing system already discriminates against private passenger cars, particularly in view of the fact that the improved road plant will benefit commercial users as well as passenger cars and that many of the critical deficiencies in the existing system are directly traceable to the heavy vehicles of commercial users. A mileage tax system predicated upon the lower limit would not change the distribution among major vehicle classes, and hence would not remove discrimination against passenger cars. It would, however, improve the internal distribution of the burden among heavy commercial vehicles and eliminate discrimination against certain for-hire and low-mileage vehicles.

An additional adjustment is required in the user tax system because diesel fuel consumption per mile is substantially less than gasoline consumption per mile for vehicles of the same size.

C. Revisions of a Fundamental Nature Are Required in the Methods Now Employed to Divide Authority and Responsibility Among Levels of Government

Under existing arrangements the State recognizes that it has certain responsibilties for the support of roads and streets lying outside the designated State Highway System. At present, an attempt is made to satisfy this responsibility through a complicated and irrational set of allocation formulae. There are several fundamental defects in this procedure which need remedying.

The present formula method of allocating state aid is arbitrary, both as to total amount of funds allocated and as to distribution among individual counties and cities. For instance, in the distribution of gasoline tax moneys to counties in the Fiscal Year 1946, at one extreme a county with 518 miles of maintained county roads received $1,133,672, or $2,187 per mile, while at the other extreme a county with 953 miles of maintained county roads received $48,260, or $51 per mile. Obviously, the amounts made available to local units bear no necessary relationship either to the true road and street needs or to the real and variable costs of satisfying those needs.

Several counties now violate the most elementary standards of efficient road management. They divide available funds arbitrarily among supervisorial districts. By failing to center policy-making in the governing body of the county, and administrative responsibility in a single agency or individual, they confuse overhead control with execution of a program and get poor results on both scores.

These defects can be remedied by the following measures:

1. Revising methods of distributing highway-user funds to local units and limiting the application of construction funds to a system of primary county roads and a system of major city streets strictly defined under standards adopted by the Legislature.
2. Withholding state financial aid from any county or city that has not established centralized and efficient road or street administration and made provision for adequate reporting of road and street expenditures to the State Controller.[1]

It is contemplated that the Legislature should adopt standards defining the county roads and city streets eligible for inclusion in the primary county road and major city street systems. The county board of supervisors or the city council, as the case may be, should, after local public hearing properly advertised, select the roads or streets to be included in such systems. At the state level the approving authority should not disapprove the inclusion of any road or street designated by the local authority until and unless the state authority holds a local public hearing, properly advertised, in the particular county or city affected.

The State, as a representative of the people as a whole, cannot be indifferent to the inefficient use of tax resources. Much less can it overlook the wasting of state-collected revenues. Consequently, where the proceeds of state-imposed tax levies are involved, it is imperative that the State limit the application of those funds to the purposes for which they were collected and guarantee their effective use. In practical application this

[1] The County Supervisors Association of California, in a resolution adopted November 14, 1946, recognized the desirability of consolidation of county road administration.

means that user charges, collected as the price for a specific highway service, must be applied only to those roads and streets which have been provided to meet the needs of motor vehicle users.

The purpose of the controls outlined above is not to deprive local units of the initiative and independent action necessary to the exercise of local self-determination in the administration of roads and streets. Rather, the purpose is to strengthen local highway management and, at the same time, to protect the State's interest in the use of funds dedicated primarily to the needs of motor vehicle users.

The State could, of course, choose to discharge its responsibility in this matter by centralizing control over all roads and streets which possess any state-wide importance. Thus, it could absorb into the State System all roads and streets which are to receive support from user revenues. This line of action would leave many local units, especially counties, unable to carry on the residual road function. And it would inevitably lead to complete centralization of all road and street work in the state agency, an alternative that has been adopted in several states (North Carolina, West Virginia, Virginia, and Delaware) but which this committee feels would be a step in the wrong direction.

The general plan of administration recommended in this report is designed to strengthen local road administration and at the same time to discharge more effectively the inherent responsibility which resides in the State Government. It is contemplated that counties and cities will program, budget for, construct, and maintain the projects on their primary county road systems and their major city street systems. The plan will require that the projects initiated by the counties and cities be approved at the state level, primarily to insure integration of the road and street systems. There is now no method by which the local levels of government can effectively coordinate their proposed improvement programs.

Successful management of any undertaking of the size and complexity contemplated in a future highway program costing at least 2.8 billion dollars obviously requires a nicely balanced system of cooperation among the various levels of government under the most efficient administrative organization that can be devised.

Under the general plan of administration recommended in this report, it is not intended that the California Highway Commission shall take over the letting of contracts, actual construction, and other functions now in charge of county and city authorities. The committee believes it desirable to maintain a maximum of local responsibility and authority. But it also believes that the Legislature in appropriating state funds is charged with the duty of providing state supervision over the expenditure of these funds. Therefore, it is contemplated that the California Highway Commission be given a role of general supervision and responsibility for successfully carrying out the highway improvement program. Under these circumstances it is imperative that certain organizational defects in the existing system be corrected.

Fundamental authority and responsibility for highway work is now confused organizationally with unrelated lines of government action. The highly specialized and technical nature of the highway program and the need for continuity of policy in a long-range plan of capital investment require the establishment of organizational arrangements adapted to these specialized problems and unencumbered by unrelated activities.

Clarification is needed in the lines of authority and responsibility connecting the legislative department, the executive department, and the highway commission. Specifically, it is recommended that the continuing function of policy-making with respect to highway administration be centered in a highway commission, composed of not more than seven members serving overlapping terms and appointed by the Governor subject to Senate confirmation and removal by a two-thirds vote of both the Senate and Assembly. All highway programs proposed by the commission should be carried out under the immediate supervision of a chief highway engineer operating under published rules and regulations adopted by the commission under standards enacted by the Legislature. Any such program requires an efficient system for distributing such regulations to all persons who would be affected thereby. The best means of accomplishing this would be to include the commission's rules and regulations in the California Administrative Code and make the code easily available to all interested persons.

The budget for administration of the Division of Highways should be included in the State Budget Bill. The commission should also be required to report to the Legislature each year its proposed budget for maintenance and construction, together with a report to the Legislature on the fulfillment or the reasons for any changes in the budget of the previous year.

D. Current Regulation of Highway Use Does Not Produce Maximum Service Nor Does It Afford Adequate Protection for Life and Property

No amount of capital investment in a road and street plant can produce optimum service in the absence of effective regulation of highway use. In the management of a public monopoly, such as highways, regulatory responsibility devolves on public agencies. Satisfactory results in this field cannot be left to the forces of competition as in the case of general business activity. There can be no escape from the conclusion that the current standards and methods of highway regulation in California are failing to produce the best possible use of our road and street plant.

Capital investment is being destroyed by unrestricted operation of heavy vehicles on roads and bridges originally designed to carry light loads only. Especially serious problems arise because of the inability of counties and cities under present laws to restrict the use of their roads, streets, and bridges to the types of operation for which those facilities were designed.

This situation should be corrected by vesting in the counties and cities full legal authority to control the conditions and standards of use on all county roads and city streets except those in the state highway, primary county, and major city street systems. The conditions and standards of road use on the county primary and major city street systems should be proposed by the appropriate local officials subject to general approval by the California Highway Commission to insure uniformity.

The Highway Commission should be given adequate authority to restrict the use of all state highways when the commission finds that the state's investment in its road plant will be substantially jeopardized or destroyed by unrestricted use of the state highways by heavy vehicles.

The disproportionate rate of motor vehicle accidents on California's roads and streets affords inescapable evidence of defects in the enforcement system.

It is true that traffic density is greater on California's highways than in any other state and that our state now stands first in motor vehicle registrations and motor vehicle miles traveled. However, your committee has been unable to discover any rational explanation for the fact that California has more fatal accidents than the combined total for the two most populous states in the Nation: New York and Pennsylvania. We have, on the contrary, found convincing evidence that this unparalleled accident rate can be reduced quickly and substantially by well-tested methods of law enforcement.

Certainly, we can make more humane use of our existing road and street plant. Law enforcement administered in accordance with tested concepts and administrative techniques, adequately financed, can reduce quickly the senseless slaughter and injury that is rapidly transforming a potentially useful transportation medium into an instrument of economic and human waste.

If there are those who must be convinced that money dividends will be earned by public funds spent to reduce highway deaths, that, too, can be demonstrated. For our failure to enforce reasonable standards of safety and responsibility in the use of our roads is reflected clearly in property losses, personal injuries, and loss of personal income amounting to more than $200,000,000 annually. A substantial portion of this amount is sheer and preventable waste.

PART III—GENERAL CONCLUSIONS AND SUMMARY OF RECOMMENDATIONS

Manifestly, translation of these findings and conclusions into legislative policy and administrative action will require revisions and adjustments in our accustomed concepts and methods. But, in the judgment of your committee there can be no responsible difference of opinion regarding the long-range objective of this program. The State of California has grown to economic maturity in the midst of revolutionary changes in the methods of moving goods and people—those brought about by automotive transportation.

Our agricultural, industrial, and social structure bears the indelible imprint of the motor vehicle. The efficiency of modern life, whether in business or recreation, is measured in terms of how long it takes to move from place to place; how much it costs in dollars and cents; and how much it costs in life, limb, and personal exasperation. We could not alter these facts in the foreseeable future even if we wished to do so. But we can face up to the fact that, tested by any reasonable standards of efficiency, convenience, and safety, our present highway plant is grossly deficient. It produces congestion, waste, and annoyance where an efficient system would supply freedom of movement, economy, and personal convenience. It kills and maims people at seemingly insatiable rates in the face of a demonstrated fact that engineering and enforcement can rid highway use of its major hazards.

There is, of course, room for reasonable differences of informed opinion regarding several aspects of the program recommended in the Engineering Report. In devising any plan to be carried out over a period

of more than a decade, long-range projections must be made. Thus, it was necessary to make estimates regarding population and motor vehicle ownership and use, as well as to estimate the costs of material and labor which would go into the construction program. Predictions of this type are hazardous at best. But in our judgment the most reliable data obtainable were utilized in formulating the projections which underlie the recommended program. And, where speculation was involved, doubt was resolved on the side of conservatism.

We feel strongly that differences of opinion regarding these necessarily estimated factors should not be permitted to obscure the controlling fact that an early start should be made in modernizing California's road and street system. We believe that the recommended program affords a sound bench-mark for that beginning. Any subsequent adjustments that might be required in the program because of changed conditions can be made without altering the long-range objective.

Important aspects of the highway problem have been controversial for many years and will so remain until wide gaps in present information and knowledge are filled. Other equally important issues can never be resolved by measurement and analysis. In these areas sensible choices can be made only through the legislative process and on the basis of considerations which overlap other fields of government responsibility and action.

We have sought to determine the financial responsibility of various groups of taxpayers and to provide the Legislature with the facts necessary to assess the burden properly once the Members of the Legislature decide the size of the future program.

However, the following recommendations would apply to any future program which may be adopted:

1. That a vastly more expanded and accelerated right-of-way acquisition and highway construction program be undertaken immediately.

2. That all funds available at present or to become available before July 1, 1948, be concentrated on the most critically deficient parts of the highway system.

3. That the Legislature provide additional financing to carry out the program recommended in this report in accordance with the principles set forth herein.

4. That a sinking fund sufficient to retire all state highway bonds be established by an appropriation out of the general funds of the State.

5. That the necessary steps be taken to assure funds for adequate maintenance of the existing highway, road, and street plant.

6. That the "in lieu" tax be returned to the counties and cities, after deducting the costs of administration, to be used for the maintenance of roads and streets.

7. That county roads be legally classified by providing a system of primary county roads, to be fixed under standards adopted by the Legislature.

8. That the existing legal classification of major city streets remain unchanged but be limited according to standards adopted by the Legislature.

9. That the California Highway Commission be reorganized in accordance with the principles set forth herein.

10. That the California Highway Commission also be organized and provided with effective cooperative machinery so as to assume a role of general supervision and authority with regard to the county primary system and the major city street system; and that all projects on these systems which are proposed and budgeted for by the county boards of supervisors and the city councils, to be paid for in whole or in part from state-collected user revenues, be approved by the commission before bids are advertised or work is begun on the projects.

11. That before July 1, 1948, each county be required to consolidate its county road administration in a central county road department adequately staffed with competent personnel.

12. That the California Highway Commission be given the authority to restrict and otherwise regulate the use of all state highways, and approve restrictions of use of primary county roads and major city streets proposed by local officials; and that the county boards of supervisors and the city councils be given the authority to restrict and regulate the use of other roads and streets.

13. That the Legislature provide for more efficient traffic law enforcement.

14. That the Legislature enact legislation without delay, as the problem is one of greatest urgency. Where it is recommended that certain provisions become effective at a later date, the legislation itself should be enacted immediately so that the various public officers will be authorized to take the necessary administrative action.

The foregoing report is approved by the undersigned members.

Respectfully submitted.

MINORITY REPORT

We the undersigned members of the committee, while agreeing in the main with the foregoing report, are not prepared to accept without qualification the cost estimates contained in the staff's engineering report or the revenue estimates contained in the staff's financial report. These estimates cover a 14-year period beginning on July 1, 1945, and ending June 30, 1959. It is impossible to judge economic trends that far in advance with any degree of accuracy and estimates must of necessity be guesses.

Concerning the cost estimates, we observe that they are not based on precise engineering detail, or are they related to specific projects. Moreover, the staff has estimated that unit costs in the 10-year period beginning in 1949 will approximate those of 1946. Yet the engineering report indicates graphically that following World War I, costs advanced but two years and then there was a long period of declining costs. It can also be pointed out that engineering techniques will doubtless continue to advance in the future as in the past. Unit costs, therefore, should decline as more labor saving machinery is used and as more advanced methods are employed. A 25 percent error in cost estimates would place revenue needs in an entirely different light.

Concerning revenue estimates, there is room for much doubt. The California Major Highway Development Committee, which embraces persons highly qualified to judge highway finance trends, estimates that revenues from existing sources will be considerably higher than does the technical staff. On the basis of the revenue estimates of this citizens group, taking into account an independent computation of the probable amount of property tax money available for highway purposes, there will be enough revenue available from carry-over balances and current revenue sources to take care of the expenditures recommended in the staff report for the next four years. Speed in providing additional revenues, therefore, is not an answer to California's present highway problem, although the program should be undertaken at once.

It thus appears to the undersigned that the over-all program can be carried forward in this transitional period without the need of increase in any taxes; and such increases can be imposed when and as the actual facts, both with respect to the cost of the program and the yield from the present revenue system, become clear.

(Signed) JACK B. TENNEY
FRANK J. WATERS

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Doyle, the privilege of the Assembly Chamber for this day was unanimously extended to Lt. Col. Lloyd Warfel of Chicago.

On request of Mr. Conrad, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Frank D. Scriven, State Commander American Veterans World War II.

On request of Messrs. Conrad and Huyck, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Agnes Richmond of Beverly Hills and Mrs. Genevieve Daugherty of Los Angeles.

On request of Mr. Fletcher, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Miss Carol King and Miss Patsy Athey of Roseville.

On request of Mr. Doyle, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to former Assemblyman Gardiner Johnson of Oakland.

ADJOURNMENT

At 12.30 p.m., on motion of Mr. Dickey, the Speaker declared the Assembly adjourned until 10 a.m., Tuesday, January 13, 1947.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE
FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

SEVENTH LEGISLATIVE DAY
NINTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Tuesday, January 14, 1947

The Assembly met at 10 a.m.

Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Colbert, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robeterson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—78.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

Almighty and Everlasting God; who dost preside over all things in heaven and on earth, come and preside over these deliberations too, that those who frame its decisions may ever be guided by Thy wisdom, who livest and reignest, God forever and ever—AMEN.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Hinckley, further reading of the Journal of the previous legislative day was dispensed with.

Speaker Presiding

At 10.03 a.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

ANNOUNCEMENT BY SPEAKER

By unanimous consent, the following assignments of office rooms for members, made by the Speaker, were ordered printed in the Journal:

Office room number	
1.	Niehouse, Kathryn T. Luckel, Frank Cramer, Howard K.
2.	Dills, Ralph C. Dills, Clayton A.
3.	Anderson, Glenn M. Hawkins, Augustus F.
4.	Robertson, Alfred W. Doyle, Thomas J.
5.	Maloney, Thomas A. Brady, Bernard R. Gaffney, Edward M.
6.	Sheridan, Bernard A. Weber, Charles M. Carey, Edward J. Brown, Ralph M.
7.	Berry, William C. Thurman, Allen G. Dunn, Francis, Jr.
8.	Lyons, John C. Hollibaugh, Jonathan J.
9.	Burke, Montivel A. Price, Fred R.
10.	Thomas, Vincent Grant, William S.
11.	Fletcher, Carl Cooke, John B.
12.	Boyd, Philip L. Butters, George R.
13.	McMillan, Lester A. Debs, Ernest E.
14.	Crowley, Ernest C.
15.	O'Day, Edward F. Collins, George D., Jr.
16.	Gannon, Chester F. Allen, Don A.
17.	Loomis, Bert W. Davis, Lester T.
18.	Knight, T. Fenton Stewart, Albert I.
19.	Burns, Michael J. McCollister, Richard H. Thorp, James E.
20.	Caldecott, Thomas W. Silliman, James
21.	Evans, John W. Beck, Julian Kilpatrick, Vernon
24.	Dickey, Randal F. Sherwin, Marvin
25.	Heisinger, S. L. Crichton, J. G.
26.	Erwin, Thomas M. Field, C. Don
27.	Wollenberg, Albert C.
28.	Thompson, John F. Kirkwood, Robert C.
29.	Bennett, Elwyn S. Rosenthal, William H.
30.	Stephenson, Dwight F. Lowrey, Lloyd W.
31.	Waters, Laughlin E. Geddes, Ernest R. Stanley, Earl W.
32.	James, W. E. Miller, George, Jr.
33.	Dolwig, Richard J. Grunsky, Donald L.
34.	Blosser, Raymond Johnson, Harry J.
35.	Huyck, Willard M. Conrad, Charles J.
36.	Clarke, George A. Davis, M. Philip
37.	Collier, John L. E. Hinckley, L. Stewart
38.	Hahn, Gordon R. Hinton, Walter R.

APPOINTMENT OF MEMBERS TO STATE ALLOCATION BOARD

Pursuant to the provisions of Chapter 103, Statutes of the First Extraordinary Session of 1946, the Speaker announced the appointment of Messrs. Field and Wollenberg as members of the State Allocation Board.

Speaker Pro Tempore Presiding

At 10.05 a.m., Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 14, 1947

MR. SPEAKER: Your Committee on Rules, to which was referred:

House Resolution No. 30

Has had the same under consideration, and reports the same back with the recommendation: Be adopted.

DICKEY, Chairman

Above reported resolution ordered on file for adoption.

REQUEST FOR UNANIMOUS CONSENT

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 30, at this time, without reference to file.

CONSIDERATION OF HOUSE RESOLUTION NO. 30

House Resolution No. 30

Resolved, That the Controller be and he hereby is authorized to draw his warrants on the Contingent Fund of the Assembly in favor of the persons or firms listed below and for the amounts of money set opposite their respective names, and as itemized below, and the State Treasurer is hereby authorized and directed to pay the same:

Carithers Sign Company (name cards)	$32 20
Carnie-Goodwin-Pendleton Co. (floor runners)	230 63
Folsom State Prison (refinishing and reconditioning chairs)	1,480 00
Bekins (moving chairs from State Capitol to Folsom Prison)	51 00
Bekins (moving chairs from Folsom Prison to State Capitol)	48 00
Department of Finance (refinishing Assembly desks)	607 83
H. S. Crocker Co. Inc. (supplies)	4 06

Resolution read:

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Erwin, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sillman, Stanley, Stewart, Thomas, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—64

NOES—None.

RESOLUTIONS

The following resolution was offered:

House Resolution No. 34-A

By Mr. Dickey:

WHEREAS, The work in the Legislative Bill Room will be greatly facilitated and expedited by the addition of addressograph equipment; and

WHEREAS, Cost of this equipment will be more than saved in the speed with which legislative printed matter is handled for distribution for the Legislature and a great saving in time thereby accomplished; and

WHEREAS, Half the cost of this equipment will be met by the Senate; now, therefore, be it

Resolved by the Assembly of the State of California, That the Controller be and he is hereby authorized and directed to draw his warrant upon the Contingent Fund of the Assembly in the sum of one thousand twenty dollars and seventy-five cents ($1,020.75) in favor of the State Printer for the purchase of addressograph equipment for the Legislative Bill Room and the Treasurer is hereby directed to pay the same.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 248: By Mr. Debs—An act to amend Section 4455 of the Labor Code, relating to average weekly earnings of employees under 21 under the Workmen's Compensation Act.

Referred to Committee on Industrial Relations.

Assembly Bill No. 249: By Messrs. Gaffney, George D. Collins, Berry, Rosenthal, and Waters—An act to add Section 3831 to the Elec-

tions Code, relating to numerical and alphabetical designation of measures submitted to voters.

Referred to Committee on Elections and Reapportionment.

Assembly Bill No. 250: By Messrs. Gaffney, George D. Collins, and Berry—An act to add Section 18.5 to the Labor Code, relating to state employees.

Referred to Committee on Industrial Relations.

Assembly Bill No. 251: By Messrs. Gaffney, George D. Collins, Berry, Lyons, and Rosenthal—An act to amend Section 6.5 of the Unemployment Insurance Act, relating to unemployment insurance.

Referred to Committee on Industrial Relations.

Hon. Richard H. McCollister Presiding

At 10.09 a.m., Hon. Richard H. McCollister, Member of the Assembly from the Seventh District, presiding.

Assembly Bill No. 252: By Messrs. Anderson and Hawkins—An act to add Chapter 7 to Division 4 of the Military and Veterans Code, relating to loans to veterans to assist them in pursuing a gainful occupation.

Referred to Committee on Military Affairs.

Assembly Bill No. 253: By Mr. Clayton A. Dills—An act to amend Sections 26840, 27322 and 27376 of the Government Code, relating to marriage licenses and certificates of marriage.

Referred to Committee on Judiciary.

Assembly Bill No. 254: By Mr. Miller—An act to add Section 1354.5 to the Labor Code, relating to maximum hours of female employees in certain employments.

Referred to Committee on Industrial Relations.

Assembly Bill No. 255: By Mr. Miller—An act to amend Section 222 of the Labor Code and to add Section 222.1 to the Labor Code, relating to withholding of wages under collective bargaining agreements.

Referred to Committee on Industrial Relations.

Assembly Bill No. 256: By Mr. Miller—An act to add Section 4606 to the Labor Code, relating to contract medical or hospital care under the Workmen's Compensation Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 257: By Mr. Beck—An act to add Section 4041.21b to the Political Code and Section 26026 to the Government Code, relating to aid to the United States of America in the acquisition or improvement of government-owned airports and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Municipal and County Government.

Motion to Place Rush Order on Printing of Assembly Bill No. 257

Mr. Beck moved that a rush order be placed upon the printing of Assembly Bill No. 257.

Motion carried.

Assembly Bill No. 258: By Messrs. Geddes, Evans, Dunn, and Price—An act to amend Sections 7643, 7646, 7660, 7662, 7663, 7668, 7669, 7680, 7687, 7729 and the title of Article 5 of the Business and Professions Code and to repeal Sections 7665, 7666, 7667, 7681, 7682, and 7683 of the Business and Professions Code and to add Sections 7665, 7666, 7667, 7670, and 7671 to the Business and Professions Code, relating to embalmers, apprentice embalmers, regulation of licenses and apprenticeship.

Referred to Committee on Public Health.

Assembly Bill No. 259: By Messrs. Hawkins and Anderson—An act to add Section 1197.5 to the Labor Code, relating to wages for women.

Referred to Committee on Industrial Relations.

Assembly Bill No. 260: By Mr. Hawkins—An act to add Section 19701 to the Health and Safety Code, relating to the construction of doors in buildings or structures.

Referred to Committee on Public Health.

Assembly Bill No. 261: By Mr. Dickey—An act to amend Sections 1191 and 1449 of the Penal Code, relating to extension of time for pronouncement of judgment.

Referred to Committee on Judiciary.

Assembly Bill No. 262: By Messrs. Huyck and Waters—An act to add Chapter 4, comprising Sections 2125 to 2133, inclusive, to Division 3 of the Streets and Highways Code, relating to city, city and county, and county contracts for street and highway work.

Referred to Committee on Municipal and County Government.

RESOLUTIONS

The following resolution was offered:

By Messrs. Wollenberg, George D. Collins, O'Day, Gaffney, Berry, Blosser, and Brady:

House Resolution No. 35

WHEREAS, On September 12, 1946, there was called from this earthly sphere of activity the Honorable Peter R. Maloney, brother of Thomas A. Maloney, Speaker pro Tempore of the Assembly of the State of California; and

WHEREAS, The loss of Peter R. Maloney was not only a shock to the members of his immediate family, but a shock to the people of the entire State of California; and

WHEREAS, During his life Peter R. Maloney was loved and respected by all who had the opportunity of knowing him for his many humane, kind and charitable acts, which were part of his daily routine; and

WHEREAS, His outstanding contribution to the mothers of this Nation on Mothers Day in San Francisco, as founder of the South of Market Street Boys Association, will ever live in the memory of those who had the privilege of being in attendance at a Mothers Day breakfast over which he presided, for at this breakfast he would assume the responsibility of taking from the home of the aged each year, 25 or 30 old folks ranging from the age of 65 to 100 years, his yearly visit to the orphan asylum, regardless of race or religion, bringing to each child toys, candy and happiness, his contribution to the shut-ins by supplying radios, and other forms of entertainment, his purchasing of

artificial limbs, wheel chairs, etc. for those incapacitated, his saving of so many deceased, poverty stricken individuals from pauper graves, his desire to always be of help to the down and outer and so many other good deeds initiated and performed by Peter R. Maloney, too numerous to mention, will never be forgotten by those who knew of his contributions to his fellowmen; and

WHEREAS, His love for his city, State and Country made him a truly great American; and

WHEREAS, When death came to this grand man, he left behind his good wife, Mrs. Peter R. Maloney, and five lovely children, namely Ralph Maloney, Helene Lobherr, Patricia Maloney, Roy Maloney and Warren Maloney; now, therefore, be it

Resolved by the Assembly of the State of California, That when we adjourn today, we do so out of respect to the memory of Peter R. Maloney; and be it further

Resolved, That a suitable engrossed copy of this resolution be forwarded to the family of Peter R. Maloney.

Request for Unanimous Consent

Mr. Wollenberg asked for, and was granted, unanimous consent to take up House Resolution No. 35, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Concurrent Resolution No. 23: By Mr. Stanley—Relative to expenditures for capital outlay, State Division of Beaches and Parks.

Referred to Committee on Rules.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 13, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day passed:

Senate Bill No. 30

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following bill was read the first time:

Senate Bill No. 30—An act making an appropriation for the purchase of land for Stockton State Hospital, repealing Chapter 1460 of the Statutes of 1945, and declaring the urgency thereof, to take effect immediately.

Request for Unanimous Consent

Mr. Weber asked for unanimous consent to take up Senate Bill No. 30, at this time, without reference to committee or file.

Mr. Dickey withheld unanimous consent because no message from the Governor has yet been received relative to Senate Bill No. 30.

Bill ordered held at desk pending arrival of letter.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT

Mr. Beck asked for, and was granted, unanimous consent that the following Report of the Assembly Interim Committee on Soil Conservation be printed in the Journal:

REPORT OF ASSEMBLY INTERIM COMMITTEE ON SOIL CONSERVATION

Pursuant to House Resolution No. 51, California Legislature, Fifty-sixth Session

MEMBERS OF COMMITTEE

HON. JOHN F. THOMPSON, *Chairman*
HON. JULIAN BECK, *Vice Chairman*
HON. RALPH M. BROWN
HON. RICHARD H. MCCOLLISTER
HON. CHARLES W. STREAM

SECRETARY OF COMMITTEE
PEARL R. POWER

ASSEMBLY CHAMBER
SACRAMENTO, CALIFORNIA

Mr. Speaker and Members of the Assembly:

Pursuant to House Resolution No. 51, adopted by the California State Legislature on January 23, 1945, your Interim Committee on Soil Conservation submits herewith its report.

Respectfully submitted.

JOHN F. THOMPSON, Chairman
JULIAN BECK
RALPH M. BROWN
RICHARD H. MCCOLLISTER
CHARLES W. STREAM

PERSONS PRESENT AND TESTIFYING BEFORE COMMITTEE MEETINGS

Allemand, Albert A., Loma Prieta Soil Conservation District.
Anderson, Sven G., Field Representative, State Soil Conservation Commission, Berkeley.
Austin, Wayne W., Soil Conservation Service, Berkeley.
Barnard, F. G., Jr., President, Board of Directors Middle San Luis Rey Soil Conservation District.
Barnes, John S., State Conservationist, Federal Soil Conservation Service.
Baum, Herman, Evergreen Soil Conservation District.
Bisher, A. C., Chairman, Organizing Committee, Proposed Ramona Soil Conservation District.
Blohm, Mr., Pajaro Soil Conservation District.
Castle, C. V., Los Angeles County Farm Advisor.
Chamness, Albert N., President, Board of Directors, San Marcos-Richland-Twinoaks Soil Conservation District.
Contival, A. E., San Felipe Soil Conservation District
Cummings, O. A , Director, Julian Soil Conservation District.
Davenport, Lester, Julian Soil Conservation District.
DeBard, A. S., Chairman, Organizing Committee, Proposed Vista Soil Conservation District.
Dixon, James B., President, Board of Directors, Escondido Soil Conservation District.
Elliott, Mr., Escondido Soil Conservation District.
Fairchild, V. D., President, Board of Directors, Antelope Valley Soil Conservation District.
Farmer, Fred, President, Board of Directors, Julian Soil Conservation District.
Foerster, Wm. K., City of Escondido.
Frame, Harry, President, Board of Directors, Pomerado Soil Conservation District.
Francisco, John, Auditor, Santa Clara County, San Jose
Freeman, Sherman H., Member Organizing Committee, Proposed Vista Soil Conservation District.
Gain, John J., Escondido Soil Conservation District.
Galloway, Clark, California State Chamber of Commerce, Los Angeles.
Garrod, R. V., Chairman, California Farmers, Inc., Saratoga.
Garrod, Vince S., President, California Association of Soil Conservation District, Saratoga.
Grant, Mr., San Mateo County Soil Conservation District.
Groseline, Elmer, President, Board of Directors, Portal Ridge Soil Conservation District.
Hadley, L. E., President, Board of Directors, San Fernando Valley Soil Conservation District.
Hale, H. H., President, Board of Directors, Contra Costa Soil Conservation District.
Hanson, Harvey, Santa Clara County Farm Production Counsel.
Haymaker, R. F., Member Organizing Committee, Proposed Vista Soil Conservation District.

Henning, Frank R., Member Organizing Committee, Proposed Vista Soil Conservation District.
Higgins, Ray T., President, Board of Directors, San Mateo Soil Conservation District.
Holland, H. H., Quail Lake Soil Conservation District.
Hollister, J. J., Jr., President Board of Directors, Lompoc Soil Conservation District.
Humble, Judge C. W., Soil Conservation Service, Washington, D. C.
Hunt, Lee, Julian Soil Conservation District.
Kunkler, Will S., Ramona Soil Conservation District.
McAleese, Dan, Director, San Marcos-Richland-Twinoaks Soil Conservation District.
McClain, Wm., President, Board of Directors, El Cajon-Lakeside Soil Conservation District.
McLellan, Roderick I., San Mateo County Soil Conservation District.
Nelson, Thos., Director, Moreno-Campo Potrero Soil Conservation District.
Perry, R. D., District Supervisor, United States Soil Conservation Division of Los Angeles County.
Pittman, Hayden, County Assessor for Santa Clara County.
Rutherford, Nelson, District Supervisor, United States Soil Conservation Division of Santa Barbara.
Schomacher, Mr., Escondido Soil Conservation District.
Scott, Mel, Santa Clara County Planning Commission.
Scott, W. G., District Conservationist, Work Group 17, San Jose.
Sikes, Clarence C., Soil Conservation Service, Escondido.
Smith, J. Frost, San Marcos-Richland-Twinoaks Soil Conservation District.
Sobel, Harold, Proposed Vista Soil Conservation District.
Stalling, John, Loma Preita Soil Conservation District.
Strathearn, David L., President, Board of Directors, Simi Soil Conservation District.
Weese, R. A., City of Oceanside.
Weir, W. W., Secretary of the State Soil Conservation Commission.
Weld, E. H., Evergreen Soil Conservation District.
Whittaker, Fred, San Fernando Valley Soil Conservation District.
Wight, W. F., President, Board of Directors, Upper San Luis Rey Soil Conservation District.
Wilson, I. M., President, Board of Directors, Lompoc Soil Conservation District.
Witherspoon, J., Registrar of Voters, Santa Clara County.
Vanasek, Tomas S., Contra Costa Soil Conservation District.

ACKNOWLEDGMENT

The committee gratefully acknowledges the able assistance and advice of:

Sven G. Anderson, Field Representative, State Soil Conservation Commission.
Wayne W. Austin, Soil Conservation Service.
John S. Barnes, State Conservationist, Federal Soil Conservation Service.
Judge C. W. Humble, Soil Conservation Service.

INTRODUCTION

The people of the State of California have recognized the need for conserving their soil and water resources.

The State Soil Conservation Act was passed by the California State Legislature in 1937 to conform with the Federal Conservation Act, which requires the states to have their own Soil Conservation Act before they can participate in or receive the benefits of Federal appropriations. The Federal Act was first passed during President Hoover's administration.

In 1940 the California State Legislature passed the California Soil Conservation *Districts* law (Assembly Bill No. 60, Chapter 21 of California Laws for 1940). This law made it possible for farmers and ranchers to organize Soil Conservation Districts throughout the State. Under this law the farmers and ranchers may cooperate with and request assistance from the federal, state and county governments; public districts; other soil conservation districts; associations; corporations and individual persons in matters relating to the conservation of soil and water.

The California State Soil Conservation Act as first passed created a State Soil Conservation Commission comprised of the State Engineer, the Dean of the College of Agriculture of the University of California, and one member to be appointed by the Governor, to serve at the pleasure of the Governor without compensation. In 1943 the act was amended to increase the number of members to the present five by adding two farmer members, to be appointed by the Governor, who shall be directors of soil conservation districts at the time of their appointment.

It is the duty of the State Soil Conservation Commission to promote the formation of soil conservation districts under the provisions of the act, to investigate proposed soil conservation districts, and to advise organized soil conservation districts with reference to their plans and proposals relating to soil conservation activities. It is also the duty of the commission to cooperate with the Federal Government, any soil conservation district, any county or public district, any individual or corporation, in the furtherance of the purposes of the Soil Conservation Act.

There are 47 soil conservation districts already organized and successfully carrying out a sound soil and water conservation program in cooperation with individual farmers and ranchers in their respective districts. They have requested and are receiving assistance from various state and federal agencies. The Soil Conservation Service (a federal agency) is providing technical aid and a limited amount of material assistance to each of these districts. It will be the Department of Agriculture's policy to continue to provide assistance within the limits of the resources made available to it by Congress.

The following House Resolution was passed by the Legislature on January 23, 1945:

HOUSE RESOLUTION NO. 51

Relative to the creation of an Assembly Interim Committee on Soil Conservation, defining its powers and duties and making an appropriation for its expenses

WHEREAS, It is the declared policy of the Legislature that the conservation of soil is of great importance to the prosperity and welfare of the people of this State; and

WHEREAS, Many of the provisions of the Public Resources Code relating to soil conservation are conflicting and other provisions although not conflicting are in need of clarification; and

WHEREAS, Many problems have arisen relative to formation of soil conservation districts and election of officers thereof, consolidation of such districts which require legislative action; and

WHEREAS, The people of the State look to the Legislature for leadership in the matter and the Legislature requires information based upon an impartial study and investigation of all of the factors involved in order that it may proceed intelligently toward a solution of these problems; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Soil Conservation is hereby created and appointed and authorized and directed to ascertain, study and analyze all facts relating to soil and water conservation throughout the State, and the formation and government of soil conservation districts including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Assembly, including in the reports its recommendations for appropriate legislation.

2. The committee shall consist of five Members of the Assembly appointed by the Speaker thereof. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3. The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular session, with authority to file its final report not later than the fifteenth legislative day of the next regular session.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon Investigating Committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

5. The committee has the following additional powers and duties:

(a) To select a chairman and a vice chairman from its membership.

(b) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(c) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than herein provided.

(d) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of three thousand dollars ($3,000) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

APPOINTMENT OF THE COMMITTEE

The Speaker announced the appointment of:

HON. JOHN F. THOMPSON, Chairman, San Jose.
HON. JULIAN BECK, San Fernando.
HON. RALPH M. BROWN, Modesto.
HON. RICHARD H. McCOLLISTER, Mill Valley.
HON. CHARLES W. STREAM, Chula Vista.

as members of the Assembly Interim Committee on Soil Conservation.

COMMITTEE MEETINGS

The committee held the following meetings:

February 15, 1945, at Lancaster.
February 28, 1945, at San Jose.
August 18, 1945, at Escondido.
August 2, 1946, at San Jose.
December 9, 1946, at El Cajon.

REPORT OF ASSEMBLY INTERIM COMMITTEE ON SOIL CONSERVATION

It has been recognized that the preservation of our soil is the most important problem over the world today and soil erosion is the number one agricultural problem in many parts of California.

This brief statement of the erosion damage in the United States, and particularly in California, will serve as a preface to the report of the meetings of the committee.

Soil erosion is costing the United States $3,844,000,000 annually and already has damaged one-half of the agricultural land of this Nation. H. H. Bennett, Chief of the Soil Conservation Service, states: *"One-fifth of the original area of tillable land in the United States is now ruined for further practical cultivation!"*

National surveys of erosion losses show that about one-third of the present tillable land already is badly damaged by wind and water erosion. That means that out of less than two billion acres of land we have already ruined over 280 million acres of agricultural land for any kind of immediate productive use. This area, more than twice the size of California, was once covered, for the most part, with a fairly deep layer of fertile soil. This land is gone so far as intensive farming is concerned. The survey also revealed that 775 million more acres of land in the United States is seriously affected by erosion. Some of it, although badly damaged, is not beyond redemption.

CALIFORNIA'S LANDS

California's lands, fortunately, are more fertile and productive than those in many other parts of the country, because they have been farmed a shorter time and consequently have suffered less under man's misuse. But the soil auger shows there is ample cause for concern.

California's lands have suffered considerable loss of top soil. These losses have occurred not only on the farm land in the State but serious losses have taken place on range and forest land. Over-grazing and fire have left large areas of range and forest land unprotected and subject to erosion.

EROSION DAMAGE IN CALIFORNIA

The last soil conservation reconnaissance survey revealed that over 3,000,000 acres had lost over three-fourths of its top soil through erosion. On some 38,000,000 acres between one-fourth and three-fourths of the top soil has been lost, impairing its economic use for crop production or grazing. In addition, wind erosion is occurring over 2,000,000 acres and severe gully erosion has damaged approximately 7,000,000 acres of the land. Moderate gully erosion is gradually taking its toll on 15,000,000 acres. This is out of the State's total land area of 100,353,920 acres and of 3,003,376 acres in farm land consisting of 132,658 farms.

Causes of Erosion

Under virgin conditions, the surface soil has protected and held in place by grasses, trees and other vegetation. The top soil was filled with absorptive organic matter so most of the rain was able to enter the soil. When this protective cover was removed through cultivation or destroyed by over-grazing or fire, less of the rainfall was absorbed by the soil. The increased volume of water flowing over the unprotected surface resulted in heavy soil losses.

When man was selecting land for the production of cultivated crops, pasture or trees, very little consideration was given to the capabilities of the land. Many acres that should have remained under permanent cover of grass or forest were plowed and cultivated.

Tillage and cultural practices improperly used also have accelerated erosion. Fields were left bare, without protection against dashing rains, crop residues; stalk and stubble were burned when they should have been left on the land. Repeated burning of brush land, clear cutting, over-cutting and burning of woodlands also resulted in erosion damage.

Erosion can be controlled by practicing soil conservation farming. It involves: (1) Sound land use; (2) the right combination of conservation practices including drainage and irrigation where necessary and practicable; (3) maintenance and improvement of soil productivity; and (4) economically sound farming designed to fit the land.

Conservation farming means then that farmers and ranchers must make sufficient use of each acre of land. To do this, he needs an inventory of his soil and water resources After the capability of the land has been determined, conservation practices which preserve, improve and make good use of the soil must be carried out.

If California's agriculture is to be permanent and profitable, its lands must be farmed according to their capabilities.

SOIL CONSERVATION

The conservation job in California is a big one. Some idea of its size can be seen by listing a few of the more important soil and water con-

servation practices which are needed on the agricultural lands in the State in order to achieve complete soil and water control:

Conservation practices	*Amount of land requiring treatments*	
Contour tillage	92,550	acres
Contour planting	2,039,252	acres
Cover crops	1,666,112	acres
Strip cropping	2,039,252	acres
Crop residue management	11,189,584	acres
Approved crop rotations	9,389,573	acres
Green manure crops	5,563,423	acres
Seedling grasses and legumes	856,250	acres
Range properly stocked	9,033,500	acres
Seeding range and pasture	2,152,364	acres
Farm and ranch ponds	8,504	number
Rotation and deferred grazing	5,221,673	acres
Woodland improvement	236,384	acres
Shelterbelts and windbreaks	75,484	acres
Outlets and farm water courses	14,640,140	lineal feet
Terraces	22,792	miles
Diversions	10,691,400	lineal feet
Individual farm drains	1,920,788	acres
Farm irrigation land preparation	2,500,560	acres
Irrigation systems installed or improved	3,418,445	acres
Improved methods of irrigation	3,813,038	acres
Dune and beach control	59,500	acres
Field and gully plantings	207,180	acres
Livestock exclusion for erosion control	535,378	acres
Cleaning and grubbing	1,305,825	acres
Wildlife control	46,006	acres
Water spreading	81,925	acres
Channel bottom stabilization	962,820	lineal feet
Channel alignment	2,510,800	lineal feet
Channel cleaning	51,088,834	lineal feet
Dikes and levees	1,604,170	lineal feet
Management of spoil banks	48,322,000	cubic yards
Roadside erosion control	3,007,484	lineal feet
Soil saving dams	23,078	number
Fire protection	29,933,412	acres

The planning, application and maintenance of these conservation practices on California agricultural land according to its needs and capabilities are basic requirements which should be accomplished as rapidly as possible. The job is big and in some cases complex and will require the best efforts of everybody concerned with agriculture working together, if it is to be accomplished before it is too late.

What Has Been Accomplished to Date?

Farmers and ranchers already have made a good start in applying sound soil and water conservation practices needed on their agricultural land. State, federal and even commercial interests are assisting farmers and ranchers in every way possible in the application of the soil and water conservation practices so vitally needed on their land.

The following is only a sample of what is being accomplished by farmers and ranchers throughout the State in the application of sound soil and water conservation practices. Soil and water conservation practices were planned and applied on 4,467 farms cooperating with soil

conservation districts in California covering 657,757 acres as of June 30, 1946:

Practices	*Planned*	*Applied*
Cross slope planting	12,904 acres	8,875 acres
Contour planting	46,313 acres	30,000 acres
Cover crops	86,569 acres	56,839 acres
Strip cropping	32,235 acres	24,006 acres
Crop residue management	187,826 acres	111,167 acres
Approved crop rotations	109,537 acres	76,268 acres
Green manure crops	8,691 acres	7,301 acres
Seeding grasses and legumes	29,840 acres	8,980 acres
Range properly stocked	287,102 acres	174,394 acres
Seeding range and pasture	33,237 acres	9,855 acres
Farm and ranch ponds	285 no.	143 no.
Rotation and deferred grazing	147,265 acres	86,218 acres
Woodland improvement	10,724 acres	4,166 acres
Shelterbelts and windbreaks	3,707 acres	2,245 acres
Outlets and farm water courses	540,701 lin. ft.	143,508 lin. ft.
Terraces	110 mi.	47 mi.
Diversions	1,658,444 lin. ft.	658,692 lin. ft.
Individual farm drains	7,461 acres	3,611 acres
Farm irrigation land preparation	19,522 acres	7,934 acres
Irrigation systems installed or improved	19,095 acres	7,356 acres
Improved methods of irrigation	32,266 acres	14,845 acres
Field and gully plantings	3,659 acres	1,294 acres

Other conservation practices and measures which have been applied on an extensive scale include soil saving dams, channel stabilization, roadside erosion control, seeded waterways, etc.

Soil conservation practices carried out on farms and ranches have resulted not only in saving the soil but have increased yields of crops and farm incomes throughout the nation. California farmers and ranchers cooperating with organized soil conservation districts have indicated they have also obtained increased crop yields as a result of the application of sound soil and water conservation farming methods.

What More Needs to Be Done

Although the war pressure on agricultural land has been great and damage resulting from it is considerable, it will not compare with the continuous, year after year, drain that will result from feeding, clothing and housing the estimated one hundred and seventy million people that population experts say we will have to take care of in 1970.

There are many things we can do as individual owners and operators of land; as professional men, as educators and teachers, and as owners or employees of businesses and industries.

1. If you own land which is located within a soil conservation district, you can work with your soil conservation board of directors in planning and applying the proper soil and water conservation practices on your own land. You can also encourage other farmers and ranchers whom you know to apply the needed soil and water conservation practices to their land, and to organize soil conservation districts where such have not been formed and to discuss soil conservation with their district directors, county farm advisor, vocational agricultural teachers, Soil Conservation Service technicians and others active in this program.

2. If you are in commercial work you can include soil conservation topics in the program of your professional, or trade associations, service clubs, banker's associations, garden clubs, rural organizations such as

farm bureaus, Granges, and others, are all including soil conservation as an important part of their planned programs.

3. The committee believes that an educational program on soil conservation would be very beneficial to the State An instructional unit on soil conservation could be incorporated in the course of study in our schools throughout the State, as is now done in the States of New York, South Carolina, etc. Organizations such as the 4-H Clubs, Boy Scouts, Girl Scouts, etc., should be informed of the availability of, and encouraged in the use of, United States Department of Agriculture literature and Soil Conservation Service motion picture films, lantern slides, film strips, and photographs on soil conservation.

TESTIMONY BEFORE THE COMMITTEE

1. Soil Conservation

Assemblyman Stream: "Mr. McClain what is your idea for conserving soil, etc., that is going to waste?"

Mr. McClain: "I think that methods of conservation are pretty well worked out but the great question is getting them applied."

Assemblyman Stream: "At the Escondido meeting, were you one that favored planting of shrubbery and trees on the side hills to prevent waste or were you urging for water conservation?"

Mr. McClain: "It should be but one problem—if you can conserve the water, you can conserve the soil in this district."

Assemblyman Stream: "Mr. Nelson, in your section you have made ditches in the hills. What is that for?"

Mr. Nelson: "I believe they are supposed to be diversion ditches or terraces. That is in the new addition to El Cajon."

Mr. McClain: "Those that are properly established are working fine."

Mr. Dixon: "They take the water into the natural channel without taking the soil with it."

Mr. Farmer: "I have some ditches at my place where we have 30" to 40" of rainfall. When we get 15 inches of rain, the diversion ditches will fill the water tanks we have and then we have a natural subirrigation for the orchard from the tanks. We are planning to terrace all the hills around."

Mr. Sikes was called upon to explain conservation practices and measures used in the districts of the county. He responded as follows:

"Soil conservation districts in the coastal belts; namely, Escondido, El Cajon-Lakeside, San Marcos-Richland-Twin Oaks, and Middle San Luis Rey are primarily citrus-avocado growing areas; therefore some of the most important conservation practices pertain to orchard management. Orchardists are given technical assistance in selecting the sites for planting. Citrus and avocados do not do well on claypan soils. Soils should have a good natural drainage. Soil conservation service technicians, under direction of district boards, provide engineering advice and on site assistance to orchardists in laying out new orchards on the contour, designing and installing irrigation systems and methods. Many orchardists have changed from furrow to sprinkler method. The sprinkler method saves water and gives more uniform coverage to the root area. Avocado and citrus decline in most cases can be traced to excess water at the tree roots. Correct irrigation methods, with the proper amount of

water per irrigation at required intervals, will improve tree conditions in a short time, providing soils are of a type that permit natural drainage. Unfortunately some orchards are planted on claypan soils having poor drainage. In these cases tile drains are necessary. It is important that drains be properly located as to depth and spread in relation to impervious clay layers. Detail soil investigation is made with augers to locate clay strata and determine the best position for laying tile. Drainage is a problem even on hillside orchards. We have found clay basins impeding the downward movement of water, causing die back and loss of trees. It is necessary to locate the rim of the pocket and intercept it with drain tile. Although water costs are high, we have found that in general orchardists are over-irrigating. Excess water is not only costly, but damaging to trees, reducing yields and lowering vitality. The district program has resulted in better irrigation practices with less water used and increased production of better quality fruit.

"The principal erosion control measure is cover crops with proper tillage practices. Legumes such as vetch, burclover, and bitter clover are now extensively used with cereal grains such as barley and oats for cover cropping in citrus. Legumes help supply nitrogen which is heavily used by citrus. Districts have demonstrated the advantage of shallow and limited tillage. We now disc down cover crops, leaving the residue on the surface for erosion control. Shallow tillage with discs having depth control rollers reduces the damage to the roots of the trees and saves cultivation costs. Cultivation is necessary only to check summer growth of vegetation; dust mulch is undesirable.

"The district's program in interior valleys of the county are mainly directed toward conservation practices on grain lands, although the practices mentioned heretofore for citrus are applied where this land use is found.

"Grain is usually grown on sloping lands highly susceptable to erosion. More stringent erosion control measures are required. Diversion ditches are established at the base of the brush area to intercept runoff and prevent gullying of cultivated land below. Crop rotation is practiced for erosion control and soil improvement. Rather than plant grain year after year, we now rotate with one or two years pasture and one legume crop for soil building.

"An outstanding development is the proper use of crop residues. Through modification of tillage methods crop residues are now retained on the surface for erosion control. This protects the land during the fall rains before the planted crop provides ground cover. Improved tillage methods are just now gaining recognition in this county, but have been in use in other parts of the Country for many years. Contour and cross-slope planting of grain helps to prevent erosion.

"Water conservation is of high importance in San Diego County. Many earth-filled dams have been constructed throughout the Country in all soil conservation districts. More dams are under construction at the present time. The records show that San Diego County leads the states in the number of dams built. District technicians furnish cooperating farmers with specifications and instructions for building dams and supervise the construction.

"The pasture program was important during the war. Over 125 acres of new pastures were planted in Escondido Valley last season. District technicians furnish farmers with grade stakes for leveling for proper irrigation; design and assist in laying out irrigation systems; specify the seed mixture for each soil condition in accordance with the available water supply; show the farmers the correct method of seed bed, and explain new techniques of seeding. Carrying capacity of irrigated pastures under approved management methods have been increased several fold. Actual production records show this increase.

"In the back country, range management practices are outstanding. Range properly managed will consistently out-produce over-grazed, abused range. District technicians help ranchers establish a pattern of grazing for the best over-all rise of range without deterioration. They point out to the rancher the season of use and estimate the carrying capacity. Stock water is developed, salting areas spotted and cross-fencing used to provide proper distribution of stock, and uniform utilization of forage. The cardinal principle is to leave forage residue sufficient for erosion control and plant reproduction. Grazing capacity is a relative term, and in Southern California will vary each year, due to annual forage species affected by weather conditions.

"Floods and silt deposits often originate from range areas in upper watersheds. Proper use of range land will do much toward alleviating flood and silt hazard on valley lands.

"Mention has been made of only a few conservation measures recommended by soil conservation districts in the county. Many more are in use. Progress reports of each district list the practices in use and the quantity applied on the land."

At the conclusion of the talk Mr. Sikes made the suggestion that each district supply the committee with a copy of their annual report.

Assemblyman Stream asked Mr. Sikes if the Soil Conservation Service furnishes trees and seeds to districts. Mr. Sikes replied that they do and there is no charge for the planting material. Seed furnished to districts are of species not in common use. The purpose of furnishing seed is to introduce new species for conservation work. The service, in cooperation with districts, also encourages cooperating farmers to produce seed and will supply seed stock for this purpose. Reforestation work is limited, due to shortage of labor. Trees supplied by districts to cooperating farmers are planted and cared for by the farmer. As labor becomes available undoubtedly there will be greater demand for trees for erosion control.

Mr. Chamness requested Mr. Sikes to explain soil surveys.

Mr. Sikes reviewed, step by step, the procedure followed in making conservation surveys. Aerial maps are used as a base on which are placed, in symbol form, data pertaining to soils, slope, erosion. Physical features of the site are evaluated in terms of conservation measures required for safe and continued use of the land. The intensity of conservation measures increases as susceptibility to erosion or deterioration becomes greater. Land use capabilities are as the name implies—capability of the land for use without deterioration.

Classes of land represent groupings of site conditions in respect to safe degrees of use with conservation measures.

Class I. Land is suitable for cultivation and requires no special practices.

Class II. Land requires simple conservation practices.
Class III Land requires more complex or intensive practices.
Class IV Land is suitable for occasional or limited cultivation.
Class VI, VII, VIII Lands are not suitable for cultivation.

Class VI, VII Lands are suitable for permanent vegetation with grazing or woodland use. Class VII would require more careful use than Class VI. Class VIII is largely brushland, watershed area, and not suited to grazing use.

A soil survey is made for each district. It is one of the first jobs to be done. Soil Conservation Service representatives base their technical recommendations on conservation survey data.

2. Equipment

Mr. Chamness: "Our biggest problem is equipment and operators. Getting heavy equipment to do large conservation jobs. Getting and holding qualified operators to operate and care for equipment."

Other responses from the group highlighted the need for heavy construction equipment not ordinarily owned by farmers.

Assemblyman Beck asked if it was a problem of materials, equipment and operators. "Do soil conservation districts pay operators?"

In answer to the first question the opinion seemed to hinge on availability of equipment and operators. Payment of operators may be made in two ways, (1) directly by cooperating farmers, or (2) by the districts, to be reimbursed by farmers in ratio to work done on their lands. In both cases farmers are expected to pay their proportionate share of the costs.

Assemblyman Beck: "There is a bill in Congress to make surplus equipment available to federal agencies and to districts. This bill, introduced by Pogue, provides that certain equipment be given to the United States Department of Agriculture agencies, to be allocated to districts."

Mr. De Bard made a motion asking the Legislature to request the State to support the Pogue Bill.

Mr. Cummings seconded. Motion carried.

Assemblyman Thompson: "Do you think a reasonable amount of time has elapsed so that, if the veterans wanted this equipment they would have taken it?"

Mr. Austin: "I thing if they wanted it they should have secured it by this time and that some of it should be available for our purchase. Mr. Sheppard, Member of Congress, has been working on it and I feel we should contact our Congressmen and let them know we can use it if it can be released."

Mr. Dixon explained the procedure to be followed by districts in requesting equipment from the Surplus Property Board. Application forms will be mailed to each district. It is important that the applications be filed with the board immediately so that the district will be on the mailing list as surplus equipment becomes available. Surplus equipment will be sold at appraised value, which is understood to be reasonably low.

Surplus items will first be made available to federal agencies for a period of 18 days following notice of availability. State or local governments, which include Soil Conservation Districts, shall, for a period of 12 days from the date of expiration of the period of priority of federal agencies, have a priority to acquire surplus property for their use. In the event of duplicate requisitions for equipment by parties in a given

priority those showing the greatest need will receive the highest consideration.

Mr. Dixon urged the districts to file "Statements of Needs" with the Surplus Property Board for conservation materials and equipment for their use. Also be thinking of heavy equipment which might be purchased with pooled funds of Soil Conservation Districts of the county.

Mr. De Bard asked if districts in process of organizing would be eligible to purchase surplus items.

The opinion was expressed that only formally organized districts are eligible.

Mr. Sikes: "I believe it is the desire of districts to acquire and operate their own equipment; Soil Conservation Service is a technical agency and should not be looked upon as a source of equipment."

Mr. Dixon: "The bill never passed Congress so we never received our equipment."

Assemblyman Beck: "The bill was before Congress on equipment and the State had money on hand, but no district presented an estimate so we knew nothing about how much they needed."

Assemblyman Thompson: "Perhaps we can hear from Mr. Austin."

Mr. Austin: "The State was allocated $100,000 for equipment. This amount was set aside and tagged for war equipment only for soil conservation but since it was tied up, we still have it and would like to use it for the soil conservation if we can."

Assemblyman Stream: "Mr. Austin, what is the federal plan?"

Mr. Austin: "It has set up funds to provide districts with personnel to conserve soil resources in that district and to help farmers but we do not provide all the special equipment, nor do we do the work, but we assist the board of supervisors and see that contractors do the work in the proper areas. We supervise and see that it is done properly. It is impossible for the Federal Government to do the work alone and we feel local contractors should be given the work and the local engineering help should be used. We are willing to plan a job but would like to see the work completed."

Mr. Dixon: "I think the 10 districts in the county may not be of one mind on this matter, that is, the question of providing work which calls for special equipment. We have found that we much prefer to do all the preliminary work, planning, etc., down to the point of contract and then do the work through the farmer helpers or through the contractors, and in that way, in our district, we got a lot of work done."

Mr. Dixon reported on the sale of old equipment, which was granted to the district by the Soil Conservation Service. $3,100 was realized from the sale. This amount was deposited with the county treasurer and set aside for the purchase of heavy equipment by the soil conservation districts in San Diego County.

3. Financing and Assessments

Mr. Dixon: "We have a very definite plan that we propose to follow."

Assemblyman Stream: "Would you figure $15,000, over a period of five years, ample to take care of your needs?"

Mr. Dixon: "I think the assessed value of the various districts should be determined and some consideration should be given to it."

Assemblyman Stream: "Mr. Dixon, I am referring to you now as President of the Escondido Soil Conservation District. Have you any estimate of how much money would be required to do the work you would want to do now in the district?"

Mr. Dixon: "Yes, we have a working log, but I cannot give that to you at this moment. We have a very definite program worked out."

Assemblyman Stream: "Can you make an estimate and mark it as an estimate of what you think will be required? We want to know what this work will cost and whether this district would be willing to go into the matter if the Federal Government and the State will help on it."

Mr. Dixon: "In our district our own people have done their work with cash contributions. We establish a program, construction bids are taken, contracts let, and today we only have about $21.75 out of an $8,000 or $9,000 worth of work as a delinquency."

Assemblyman Beck: "If a farmer refuses to pay, who pays?"

Mr. Dixon: "The district would pay but we have had no such occasion arise in our district yet. We only have this one delinquency out of several hundred owners but it could be a major problem if there were more. If we could have co-ordination between the state and federal agencies it would be ideal."

Assemblyman Thompson: "You mentioned 18,000 acres. Is that an annexation to your district?"

Mr. Dixon: "That was added, yes. Soil conservation is worth while and I think you should be willing to lower the percentage."

Assemblyman Stream: "What is the attitude of the county assessor on the soil conservation taxes?"

Mr. Dixon: "I can only speak for our district, of course, but our assessor has been very cooperative."

Assemblyman Stream: "What is the tax valuation?"

Mr. Dixon: "It is only 2 percent but I do not believe it has been budgeted."

Mr. Elliott: "It has not yet been budgeted."

Assemblyman Stream: "Quoting from last meeting at Escondido, the question was asked by Assemblyman Beck, of the Julian District: 'How much would 2 percent amount to?'; can you tell us that?"

Mr. Dixon: "No one knows the exact figures since no tax has been levied."

Asemblyman Stream: "I did not know whether or not that 2 percent was already in the budget or set up for them."

Mr. Fred H. Farmer: "When you see how much money we need in our district. We need somewhere between five and 50 billions of dollars to do what should be done. We are doing a lot of good work and such a small percentage of what we should do with 20 or 30 dams, but they have done a lot for our orchards. Personally I think we should have a lot of dams in this country to assist our soil conservation. Everybody is for it but who does anything about it?"

Assemblyman Beck brought up the question of amendments to the Soil Conservation Act.

The following questions were asked: "Does any amendment give legal status to an organization (association) of soil conservation districts? Does an association of soil conservation districts have authority to handle district moneys?"

Assemblyman Beck: "The association is not a legal entity of the State and therefore cannot handle district money."

Mr. Harry Frame: "We have been organized two years now and have had very few problems to date. One recommendation I would make on new districts being formed is that some organization allot a newly organized district some money to get by on. If some money would be made available to a new district, it would be better. It takes a long time to get started and we have found that it takes a lot of selling to get 100 percent cooperation."

Assemblyman Beck: "Did you get any help from your board of supervisors?"

Mr. Frame: "We got no help but would say that $50 would help a lot to get started."

Mr. David L. Strathern suggested an amendment to the act whereby funds would be available for maintenance of the soil; that there should be a special assessment district within the district for maintenance, which district should be formed by 75 percent of the voting strength and also of the property. He stated that the Soil Conservation Act should also include water conservation.

Mr. Groseline suggested an amendment to the act allowing money to be expended by soil conservation districts to conserve or add to underground water supplies.

Assemblyman Beck: "How much would a 2 cent tax amount to?"

Mr. Dixon: "No one knows the exact figure since no tax has been levied." It would have to be determined through the county records.

Mr. Cummings: "The assessed valuation of property in Julian Soil Conservation District is estimated at $375,000."

Mr. Wight: "Using that figure, the Julian District could collect $75. Why bother?"

Assemblyman Beck: "Under the new state law soil conservation districts can demand of the county board of supervisors the amount equal to that which could be raised by the 2 cents tax on every $100 assessed land valuation if the need is shown. The county pays out of the general fund."

Mr. DeBard: "I believe the districts should take advantage of that money and show the need for it. Otherwise the privilege might be taken away from us."

Mr. Chamness stated that soil conservation districts have been more or less self-supporting and have not requested outside financial aid.

Assemblyman Stream: "Will soil conservation districts ask for 2 cents on $100 tax?"

Mr. Dixon: "Each district wants to reserve the right to ask for funds." At this point Mr. Dixon called on representatives from each district for an expression:

Mr. Wight: "Upper San Luis Rey District is opposed to taxation for support of that district. I believe agriculture should be self-supporting. Each farmer should be able to pay for his own expenses."

Mr. Barnard: "We wrote a letter to the county auditor to inform him that our district would not request money during the present year."

Mr. Cummings: "No taxes levied, no request for funds."

Mr. Nelson: "No taxes levied; no request for funds."

Mr. Chamness: "We do not intend to levy any taxes. The districts should not hesitate to ask for county money."

Mr. Dixon: "We can use county support. Where county construction is involved we should have county help."

Mr. W. W. Weir stated that the commission has never turned down any district in a request; that is the reason the districts in some cases did not receive enough assistance after they were formed was that there was no money; that the University of California was bearing the entire expense of the commission. If special assessments are levied, the collection should be a matter for the district, and not the county. Feels it would be a good idea for the board of supervisors to provide money for the districts. Is in favor of 75 percent or 80 percent of the landowners approving assessments.

Mr. J. J. Hollister, Jr., stated that his district was only about two months old and had not met with most of the problems of the other districts, but feels that the special assessment is not a good idea and would probably fail unless more than 75 percent—and close to 100 percent—approved the assessment. Feels that the property holders would be paying and should have the "say." Feels that the board of supervisors should levy the assessment. In seeking financial aid from the board of supervisors the district should not be restricted to 2 cent tax limit, if good cause therefor could be shown.

Mr. H. H. Holland stated he felt that it would be all right to levy special assessments; feels they should be levied and collected by the county, not the districts.

Mr. I. M. Wilson does not feel that levying the 2 cent tax is necessary because the board of supervisors would provide an amount of money equal to what could be raised. He is in favor of having special assessment districts within districts. Feels that any assessments should be on 75 percent of the land and that there should be a provision allowing the percentage to be raised if necessary.

Mr. L. E. Hadley discussed the assessment of taxpayers for soil conservation and states he believed it would be more satisfactory to get the money in a grant from the board of supervisors rather than through special assessment. Stated that the board of supervisors had cooperated very well in contributing money to the district in San Fernando Valley. Considers special assessment districts within districts a good idea where no benefit would accrue to outside territories. Believes if an assessment is used, 75 percent of the landowners and 75 percent of the land should approve. Was in favor of water conservation by dams, etc.

Mr. Robert Perry: With regard to special assessments, feels that Assembly Bill 278 outlined the handling of that matter very well.

Mr. C. V. Castle, Los Angeles County Farm Advisor, stated he felt there was some merit in providing for special assessment districts within districts. Feels the assessments should concern landowners only. He feels the districts need more money to spend.

Mr. Fred Whittaker stated that he felt special assessments would not be satisfactory in his district.

A short discussion was held about the raising of funds to take care of the various districts.

Mr. Thompson said: "As to the money for this soil conservation, isn't it a fact that if we make the formation of districts too difficult, California would not get its share of the money it is entitled to?" Judge Humble answered in the affirmative.

Assemblyman McCollister asked: "Can a soil conservation district issue bonds the same as a water district?"

Assemblyman Thompson answered: "No."

There was a further discussion in which it was brought out that only two states, California and Colorado, have assessment features.

4. Cooperation Between Federal, State, County and Local Organizations

Mr. Thompson asked Judge Humble to explain the department's attitude regarding the State's obligations.

Judge Humble explained as follows: "There is a definite responsibility by state, county and local government. The question is how to get it done; what sort or organization can be used. It is recognized that we have a lot of organizations but none of them specifically designed to do this work. The main idea was that the local people have the say—a democratic process—in setting it up. The only way to get that is in the type of organization where the farms have the say in the organization. It varies in different states, but actually in practice it all boils down to what the local people want to do and to see that they do it. The department insisted on that type of set-up because they felt that the only way to get the job done was through the farmers.

Mr. Dixon: "If soil conservation is as important as we think it is, should not the approach be that all agricultural land be in some conservation district? If soil is worth saving, it should be taken into consideration from all angles. You have your forest service, flood control, etc., and it is not a small matter to get all of these working toward one goal. That is what we are going to be up against. As I see it now, one of the biggest problems is that the farmer gets too much help from all angles so that he hardly knows what to do. There are so many agencies trying to help him they get in each others way and do not reach the ultimate goal which is to help the farmer. That, in my estimation, is what should be ironed out. We realize there is certain amount of conflict in defining boundaries, and I think that should all be handled under one agency. As it is now, the federal bureau says the soil conservation districts should be formed on drainage only and the State says on soil conservation. We took our advice from the federal agency and drew our district boundary lines on drainage but the State took the attitude that we should formulate our boundaries on soil conservation only. Later on, we found that both were right and we had 1,800 acres in our district to worry about. It is very difficult, at times, to get cooperation of the state and county and we have found it more particularly in road construction where they have improperly installed roads over culverts, etc. The highways over culverts are installed too high, too small, etc. Although the State has been more cooperative than the county in this, it would help us a lot in our soil conservation if we could get cooperation and coordination between the agencies that are affected. Any legislation that you can slant that way will be a big help to all the districts."

Assemblyman Thompson: "Is there any way it can be made easier from the state angle?"

Mr. Dixon: "I believe the flood control is the important thing to conserve water but where is your line between flood control and soil conservation? There should be some way of determining where the two converge or break, and then get cooperation from all angles. If some legislation can be passed so that the federal, state and county agencies work together and cooperate along the same lines, then it will be worth while."

Assemblyman Beck: "I would like to know your thoughts on your requirements so that in future legislation we would know how to act in your interests."

Mr. Dixon: "Mostly we need engineering personnel. It will take close cooperation on the part of all federal, state and county agencies."

Mr. Beck: "Can Federal Government furnish the needed engineers?"

Mr. Sikes: "A number of postwar projects may fall in the category of flood control, which may involve United States Army engineers, also state and county agencies. Our assistance through soil conservation districts is mainly directed toward erosion control on farms and ranches in subwatersheds."

Assemblyman Stream: "If you go before the State for soil conservation they want to know what you want. Is it your idea to try and get a state appropriation for soil conservation?"

Assemblyman Beck: "I think someone on the State Soil Conservation Commission should be appointed to cooperate with other agencies on flood control."

Assemblyman Stream: "The different organizations should open up a channel so that we can reach the proper person with a proposition. I would like to know your thoughts and your requirements so that, if brought before the Legislature, we would know how to act in your interests."

Assemblyman Brown asked about farmer cooperation.

Mr. Chamness signified full cooperation from farmers. This same expression was received from other members of the group.

Mr. Dixon added that "splendid cooperation from county officials had been the experience of their district."

Mr. Dixon asked if financial aid from the State could be expected on large projects.

Assemblyman Beck: "The State may aid flood control projects, but as far as this aid, it is not available to water conservation districts or soil conservation districts. The best opportunity for state aid would be to inform the State of major public projects."

Mr. Weese: "What is the State's attitude toward flood control on a large scale?"

Assemblyman Beck: "The county will take over major part of flood control projects."

Mr. Weese: "We don't want any county agency to come in conflict with the San Luis Rey Water Authority, which is already in existence."

Assemblyman Beck: "Any conflict yet?"

Mr. Weese: "No, not yet."

Assemblyman Beck inquired as to number and size of major projects proposed in the districts.

Mr. Chamness gave as an example the proposal for a flood drain channel in the San Marcos Valley, estimated at $18,000. Soil conservation districts and farmers cannot pay all of the cost. Outside funds are required for large community projects.

Mr. DeBard: "In the proposed Vista District there are three major streams and two minor streams requiring attention. Also erosion and drainage problems. State and county assistance will be required in addition to assistance of the Soil Conservation Service. If the county will help, I believe we should use that help. We will need lots of technical assistance."

Assemblyman Beck: "What would be the cost of all such projects in the county?"

The figure given was 30 projects costing an average of $15,000 each.

Mr. Sikes suggested that soil conservation districts place on record conservation projects of a community nature, indicating the cost of the projects, material, labor, and equipment required, number of farmers and agencies involved, and the benefits expected.

Assemblyman Beck asked if the State should assist financially where the county would help too.

Mr. Chamness replied that the soil conservation districts in San Diego County have never asked for outside financial aid. They may require aid now to construct larger jobs.

Assemblyman Stream: "What federal aid is given districts now?"

Mr. Sikes: "Assistance from the Soil Conservation Service is mainly technical; seed and trees are also furnished for erosion control. Certain items of equipment are loaned without charge to districts for conservation work. The service may furnish office quarters for resident technicians and these quarters are available for use of districts."

Assemblyman Beck: "Will Soil Conservation Service be responsible for all engineering assistance when returning personnel become available?"

Mr. Sikes: "Soil Conservation Service assumes the responsibility for conservation measures in districts with which the service is cooperating. At the present time our technical assistance to districts is limited due to shortage of engineers and other technicians. With the ending of the war, many of our men in the armed forces will be returning. Provision is made for these men. With a larger staff available inroads can be made on the backlog of postwar projects of community type jobs."

Mr. Dixon: "We need better understanding with the State Highway Division."

Mr. Cummings gave an example of La Posta Creek Dam near the highway. After the State Highway Department made their recommendations changing the design presented by the district engineer, they wanted property owners to assume responsibility for any damage to state property in case of flood. The property owners of the district could not assume this responsibility so the project was abandoned.

Assemblyman Beck: "Organize as a legal entity to get cooperation. There is more strength in unity."

Mr. Dixon: "The county and state are not very well versed in agricultural benefits of the work of the districts. Drainage and channel work

in districts in many cases is contingent upon county and state road crossings and culverts. Districts have received excellent cooperation from the San Diego County Road Department."

Assemblyman Stream: "If I understand right, the State Highway Engineer is interested in district work, but has not fully cooperated."

Mr. Sikes: "Perhaps the State Highway Division is not fully acquainted with the activities of the soil conservation districts. Soil conservation districts are relatively new organizations in California, and time is required to make the work known."

Assemblyman Beck: "State offices in general are not acquainted with soil conservation district programs. Individuals to be appointed to State Soil Conservation Commission will help the situation."

A resolution was passed requesting members of the interim committee to urge the State Highway Department to cooperate more fully with soil conservation districts when locating new highways, culverts, bridges, etc.

5. Changes in the Law

Chairman Thompson announced that Judge C. W. Humble, of the Federal Soil Conservation Service, was here from Washington, D. C., that Judge Humble is familiar with the soil conservation laws of all the different states and would go over suggested changes in the law with the committee.

Judge Humble explained that his discussion would be only in the way of suggestions. He then explained suggested amendments to Division IX, Soil Conservation Public Resources Code, as follows:

Suggested Amendments to Division IX, Soil Conservation, Public Resources Code

ALTERNATE No. 1

Re: Petition for Formation of District

Chapter 3, Article 2. Petition

9070. A petition for the organization of a district shall be presented to the board of supervisors of the county in which is situated all or the greatest portion of the land in the proposed district.

9071. The petition shall describe the boundaries of the proposed district; specify the number of directors it is desired to elect to govern the district, which shall be either three or five; and shall propose a name for the district.

Mr. McCollister moved that it be the consensus of the committee that this suggestion be accepted. Motion passed.

Judge Humble explained suggested changes in Chapter 3, Article 7, Section 9168, as follows:

9168. The directors shall select a *date, time,* and *place* at which regular monthly meetings of the directors shall be held. ~~Regular meetings shall be held on the first Tuesday of each month.~~

There was a general discussion of this suggestion by the committee and the suggestion was accepted.

Judge Humble explained Chapter 3, Article 8, as follows:

Chapter 3, Article 8, 9201. Not less than 30 days prior to the election, any five or more electors in the district may file with the

board of supervisors of the county in which is situated all of or the greatest portion of the land in the district a petition requesting that the names of certain persons specified in the petition be placed upon the ballot as candidates for the office of director. Each person nominated shall be an owner of land within the district *and shall be a qualified elector within the district.*

A general discussion followed.

Mr. McCollister moved that the proposed new language in Section 9201 be accepted and that in addition the words "or an operator of land" be inserted after the phrase "owner of land." The motion was carried.

Judge Humble explained Chapter 3, Article 2, Sections 9072 to 9083 (Alternate No. 1) as follows:

9072. The petition shall be signed by either of the following:

~~(a) Owners of land within the proposed district who are equal in number to at least twenty-five percent of all owners of land within the district and who own at least twenty-five percent of the total acreage within the proposed district.~~

(a) At least 25 owners of land within the proposed district.

~~(b) Not less than five hundred landowners who own an aggregate of at least ten per cent of the total acreage within the proposed district.~~

(b) Owners of land who are equal in number to at least 10 per cent of all owners of land within the proposed district. ~~In computing the percentage of acreage, land of the United States, this State, any public district, or any city or county shall be excluded.~~

~~9073. The petition shall state the approximate number of acres calculated to be in the proposed district and the approximate number of acres for which each signer signs as owner.~~

~~9074. The petition may be comprised of sections which shall be identical except as to signatures and acreages. Each paper in the petition which bears signatures shall have attached thereto an affidavit of a qualified elector that he saw written the signatures thereon and each was written by the person whose signature it purports to be.~~

~~9075. The proxies shall accompany the petition or appropriate section thereof.~~

~~9076. If a signer is other than the person to whom the land for which he purports to sign is assessed according to the assessment records of the county in which the land is situated, the petition or appropriate section shall be accompanied by a statement of the signer as to the source of his title.~~

9077. The petition shall be presented to the clerk of the board of supervisors of the principal county.

9078. The clerk shall submit the petition and any accompanying papers to the assessor for examination. If the proposed district lies in more than one county the clerk shall submit appropriate sections to the assessors of the several counties, or submit the entire petition to the several assessors successively.

9079. Upon receipt of the petition and any accompanying papers each assessor shall compare the names signed thereto with the names of landowners in the district according to the assessment records and evidence of title available to him.

9080. The assessor shall certify to the clerk of the principal county all of the following:

~~(a). The total acreage of the proposed district situated in his county.~~

(b) The total number of persons who are owners of lands in the proposed district and in his county according to the assessment records and to evidence of title available to him.

~~(c) The total number of acres in the proposed district in his county owned by the United States, this State, any public district, or any city or county.~~

(d) The number of persons the names of whom are signed to the petition who are owners of land in the district and in his county.

~~(e) The total acreage assessed to or owned by the persons whose names are signed to the petition.~~

9081. Upon completion of certification by the assessor or assessors the clerk shall present the petition to the board of supervisors of the principal county at its next regular meeting or at any special meeting called prior thereto.

9082. The board shall consider and pass upon the sufficiency of the petition. If the board finds that the petition is insufficient it may allow a reasonable time for amending or supplementing it or may dismiss it without prejudice.

9083. If the board finds that the petition is sufficient it shall make an order to that effect. The order shall include a finding of the fact of certification by the assessor or assessors and a finding that the petition is signed by the required number of landowners ~~who are owners of the required acreage.~~

A general discussion by all present followed and the suggestions were accepted.

Judge Humble explained Chapter 4, Article 1 (Alternate No. 1) as follows:

Re: Appropriation of Money from County General Fund

CHAPTER 4. DISTRICT FINANCE

Article 1. Regular Assessments

~~9350. The directors, on or before the fifteenth day of August of each year, shall furnish the auditor and the board of supervisors an estimate in writing of the amount of money to be raised by assessment which is needed for the purposes of the district for the next ensuing fiscal year.~~

~~9351. If the district lies in more than one county the directors shall divide the amount of the estimate in the proposition to the value of the land in the district lying in each county. The value shall be determined from the last assessment rolls of the counties. The directors shall furnish the auditors and boards of supervisors of each of the respective counties a statement of the part of the estimate apportioned to the county.~~

~~9352. The total amount of the estimate shall be sufficient to raise the amount of money necessary during the ensuing year to pay the incidental expenses of the district, the costs of the work which~~

~~the directors may deem advisable to be done during the ensuing year, the estimated costs of repairs to and maintenance of the property and works of the district, and the estimated expenses of any action or proceeding to which the district is or may be a party, including the cost of employing engineers and attorneys.~~

~~9353. Assessments levied pursuant to this article shall be known as regular assessments.~~

~~9354. The regular assessment in any one year shall not exceed two cents ($0.02) on each one hundred dollars ($100) of assessed valuation of the land, exclusive of improvement and mineral rights, within the district. The valuation shall be determined according to the last assessment roll, reduced proportionately when mineral rights are involved.~~

~~9355. The board of supervisors of each county in which there lies any portion of the district shall, annually, at the time of levying county taxes, levy an assessment on the land exclusive of improvements, within the county and within the district to be known as the "_____ (name of district) soil conservation district assessments," sufficient to raise the amount reported to them in the estimate of the directors.~~

~~9356. The board shall determine the rate of assessment by deducting fifteen per cent for anticipated delinquencies from the total assessed value of the land in the district and in the county and then dividing the sum required to be raised by the remainder of the total assessed value. If a fraction of cent occurs in a valuation of one hundred dollars it shall be taken as a full cent.~~

~~9357. If the board fails to levy the assessment the auditor of the county shall do so.~~

~~9358. The assessment shall be computed and entered on the assessment roll by the auditor.~~

~~9359. The provisions of law relating to the levy and collection of county taxes and the duties of county officers with respect thereto in so far as they are applicable and not in conflict with this chapter, are hereby adopted and made part of this chapter. Said officers are liable on their several official bonds for the faithful discharge of their duties under this chapter.~~

~~9360. The treasurers of each of the counties, other than the principal county, shall, not less than twice a year or upon order of the directors, settle with the director and pay to the treasurer of the principal county all money belonging to the district and in their possession.~~

~~9361. If during the current fiscal year the directors are not, by reason of the fact that no assessment has been levied, collecting a regular assessment levied during the year immediately preceding, then notwithstanding other provisions of this code,~~ the board of supervisors in each county in which a soil conservation district, or a portion thereof is located ~~shall~~ *may* upon a showing by the directors that funds are needed for the purposes of the district ~~for the current year,~~ appropriate money from the general fund of the county for the use of said district ~~in an amount equal, during any one year, to the amount which said district could have raised by assessment, as limited by this code, in said current year, or so much thereof as may~~

~~be required. This provision shall not be deemed to prohibit the board of supervisors from appropriating to such district sums in excess of these amounts.~~

Suggestions accepted:

Judge Humble explained Chapter 3, Article 2, Alternate No. 2, as follows:

ALTERNATE No. 2

Re: Petition for Formation of District

CHAPTER 3, ARTICLE 2. PETITION

9070. A petition for the organization of a district shall be presented to the board of supervisors of the county in which is situated all or the greatest portion of the land in the proposed district.

9071. The petition shall describe the boundaries of the proposed district; specify the number of directors it is desired to elect to govern the district, which shall be either three or five; and shall propose a name for the district.

~~9072. The petition shall be signed by either of the following:~~

~~(a) Owners of land within the proposed district who are equal in number to at least twenty-five percent of all owners of land within the district and who own at least twenty-five percent of the total acreage within the proposed district.~~

~~(b) Not less than five hundred landowners who own an aggregate of at least ten percent of the total acreage within the proposed district.~~

~~In computing the percentage of acreage, land of the United States, this State, any public district, or any city or county shall be excluded.~~

9072. The petition shall be signed by the owners of land within the proposed district who are equal in number to at least 10 percent of all owners of land within the proposed district and who own at least 20 percent of the total acreage within the proposed district. In computing the percentage of acreage, land of the United States, this State, and any public district, or any city or county shall be excluded.

9073. The petition shall state the approximate number of acres calculated to be in the proposed district and the approximate number of acres for which each signer signs as owner.

9074. The petition may be comprised of sections which shall be identical except as to signatures and acreages. Each paper in the petition which bears signatures shall have attached thereto an affidavit of a qualified elector that he saw written the signatures thereon and each was written by the person whose signature it purports to be.

9075. The proxies shall accompany the petition or appropriate section thereof.

9076. If a signer is other than the person to whom the land for which he purports to sign is assessed according to the assess-

ment records of the county in which the land is situated, the petition or appropriate section shall be accompanied by a statement of the signer as to the source of his title.

9077. The petition shall be presented to the clerk of the board of supervisors of the principal county.

9078. The clerk shall submit the petition and any accompanying papers to the assessor for examination. If the proposed district lies in more than one county the clerk shall submit appropriate sections to the assessors of the several counties, or submit the entire petition to the several assessors successively.

9079. Upon receipt of the petition and any accompanying papers each assessor shall compare the names signed thereto with the names of landowners in the district according to the assessment records and evidence of title available to him.

9080. The assessor shall certify to the clerk of the principal county all of the following:

(a) The total acreage of the proposed district situated in his county.

(b) The total number of persons who are owners of lands in the proposed district and in his county according to the assessment records and to evidence of title available to him.

(c) The total number of acres in the proposed district in his county owned by the United States, this State, any public district, or any city or county.

(d) The number of persons the names of whom are signed to the petition who are owners of land in the district and in his county.

(e) The total acreage assessed to or owned by the persons whose names are signed to the petition.

9081. Upon the completion of certification by the assessor or assessors the clerk shall present the petition to the board of supervisors of the principal county at its next regular meeting or at any special meeting called prior thereto.

9082. The board shall consider and pass upon the sufficiency of the petition. If the board finds that the petition is insufficient it may allow a reasonable time for amending or supplementing it or may dismiss it without prejudice.

9083. If the board finds that the petition is sufficient it shall make an order to that effect. The order shall include a finding of the fact of certification by the assessor or assessors and a finding that the petition is signed by the required number of landowners, who are owners of the required acreage.

There followed a general discussion and Mr. McCollister suggested that the committee go back to Alternate No. 1.

Further discussion of Chapter 3, Article 1, Alternate No. 1.

Mr. McCollister suggested that the word "shall" (stricken out in Alternate No. 1) be retained and that the word "satisfactory" be inserted before the word "showing".

It was the consensus of the committee that the word "satisfactory" should not be used and Mr. Thompson suggested that the proposed changes in Chapter 3, Article 1, Alternate No 1, be submitted to the Legislative Counsel.

It was decided to delay action on Alternates 1 and 2 until further study could be made and that they be brought before subsequent meetings at a later date.

Regarding the organization of districts and the election of officers of districts, Judge Humble explained that the states now appropriate money for the use of the commission in organization and some states appropriate money for the use of districts and set up a standard for the division of the money to the districts.

Judge Humble suggested that perhaps the committee would want to consider a provision for changing the name of a district.

Mr. Brown suggested that the committee recommend that proper legislation be drawn to provide for change of names of districts either by annexation or for any other reason.

As to boundaries for new districts, Mr. Austin explained that usually the land problem involved is considered—a district is formed around a group of common problems to a common area, flood control area, etc.

Mr. Witherspoon, Registrar of Voters of Santa Clara County, was introduced by Mr. Thompson to discuss election of officers in soil conservation districts.

Mr. Witherspoon suggested that the election be held on the second Tuesday of February instead of the first Tuesday in February in order to give the county registrar sufficient time to conclude work created by the general election in November during the preceding election year.

He also suggested that the election be conducted by the district and not by the board of supervisors and that the county defray the costs of the election from its special election fund; the regular election precincts should not be used, the district should set up its own precincts as necessary within the district or proposed district and if the districts should overlap into other counties each county should defray its share of the election expense.

Recommended Amendments to the Soil Conservation District Act by the State Soil Conservation Commission

Chapter 3, Article 4, Section 9112.5, second paragraph.

Amend to provide for county board of supervisors to resume the hearing in the event the State Soil Conservation Commission fails to submit a report on the practicability and feasibility on basis of revised boundary, within the prescribed period of time.

> "The board shall adjourn the hearing on the petition for a period not to exceed three months, and the commission shall within said time make such further investigation and file its recommendations with the board. The board shall not determine the boundaries of the proposed district and grant the petition on file unless the commission reports favorably *within the prescribed time* to the organization of the proposed district with the land so found by the board not to be benefited, excluded therefrom. *In the event that the commission fails to report within the prescribed time, the board shall resume the hearing and proceed with the establishment of the boundaries and grant or deny the petition according to its best judgment on the basis of evidence and testimony presented to it.*"

Chapter 3, Article 7, Section 9168

Amend to permit the district directors to select the date and time at which their regular meetings will be held, in addition to the selection of place as now provided for.

"The directors shall select a *date, time, and* place at which regular *monthly* meetings of the directors shall be held. ~~Regular meetings shall be held on the first Tuesday of each month.~~"

Chapter 3, Article 8, Section 9201

Add the specification that the qualifications for District Director shall be a qualified elector within the district to conform with the General Election Law.

"Not less than 30 days prior to the election any five or more electors in the district may file with the board of supervisors of the county in which is situated all or the greatest portion of the land in the district a petition requesting that the names of certain persons specified in the petition be placed upon the ballot as candidates for the office of director. Each person nominated shall be an owner of land within the district *and shall be a qualified elector in the district.*"

Chapter 4, Article 1, Section 9361

Amend to permit county board of supervisors to appropriate money from general fund in lieu of levying and collecting tax assessment.

"~~If during the current fiscal year the directors are not, by reason of the fact that no assessment has been levied, collecting a regular assessment levied during the year immediately preceding, then notwithstanding other provisions of this code,~~ ~~t~~*T*he board of supervisors in each county in which a soil conservation district, or a portion thereof is located ~~shall~~ *may* , upon a showing by the directors that funds are needed for the purposes of the district ~~for the current year~~ , appropriate money from the general fund of the county for the use of said district in an amount equal, during any one year, to the amount which said district could have raised by assessment, as limited by this code, in said current year, or so much thereof as may be required. This provision shall not be deemed to prohibit the board of supervisors from appropriating to such district sums in excess of these amounts."

Chapter 3, Article 11

Clarify the exclusion of public land in consideration of acreage computation on inclusions of land.

"9290.1. In computing the percentage of acreage, land of the United States, this State, any public district, or any city or county shall be excluded."

Chapter 3, Article 11

Add a section to provide for the addition of public land alone.

9290.2. A public agency in charge of any public land may petition or request the directors to include a tract of public land alone to a district. The public agency concerned will determine the extent

of authority for requesting such inclusion, within its own organization."

Re: Change Name of Districts

Add a chapter describing the procedure for changing the name of a district when deemed necessary through subsequent addition to districts or otherwise.

"Chapter 7, Change Name of District

Article 1

"9600. A district may change its name by action of the board of supervisors of the principal county as provided by this article.

9601. Whenever in the judgment of the board of directors it is for the best interest of a district that its name be changed to a stated name, it may pass a resolution reciting such fact. Whenever a petition for changing the name of the district to a stated name is filed with the board of directors signed by the same number of petitioners as would be required for signature on the petition of organization of the district, the board of directors shall adopt a resolution reciting the filing of said petition and indicating its approval or disapproval thereof.

9602. A copy of the resolution shall be forwarded to the board of supervisors of the principal county with the request that the name of the district be changed to the stated name.

9603. The board of supervisors of the principal county shall consider this request at their next regular meeting and may grant or deny the request. Their action shall be officially recorded in their minutes.

9604. If the action of the board of supervisors on this request is negative, they shall forward a copy of the resolution to the board of directors initiating the request.

9605. If the action of the board of supervisors on this request is favorable, they shall cause certified copies of the resolution to be forwarded to the board of directors initiating the request, the boards of supervisors of all the other counties in which any portion of the district lies, the State Soil Conservation Commission, and the Secretary of State.

"9606. On acknowledgment of the change of name by the Secretary of State, the name of the district shall be considered changed."

Mr. Thos. Nelson: "I came here to bring up the matter of addition to our district. We have been working on one for two years and have not completed it yet. We would like the signature requirements to be 25 percent of the property owners and 50 percent of the land because it is not hard to get 50 percent of the land, but we have so many small cabin sites that we cannot leave out and it is hard to get signatures and our trouble would be that we would get some signatures and before we were through, the cabins would change ownership and we would have to go through all that trouble again."

Mr. Sven G. Anderson: "I am the field representative. On the matter of additions to districts and the number of signatures required on a petition, it is a thought to reduce it from the present 50 percent. If you reduce it to less than that it would require an election to give each person an opportunity to express himself. Mr. Dixon mentioned lack of cooperation between federal and state in establishing boundaries. The State has no provision as to what constitutes the boundary of a district. There is no particular conflict between the state or federal but the county wants to simplify it for the assessor and registrar. As far as the soil conservation boundary going as far as it should go, there is no restriction."

Mr. Anderson handed each member present a copy of his recommended amendments to the Soil Conservation Act and left them open for discussion.

Assemblyman Stream, as chairman of the meeting, read from a letter from the Attorney General's Office, as follows:

"Under these provisions, it is our view that the districts could initiate proceedings for the inclusion of public lands in an existing district upon being authorized so to do by the federal or state conservation agency concerned. This could be done either by obtaining the signatures of the proper officers or by being designated as an agent for that purpose or the administrating agency concerned as contemplated by Section 9263. Public lands which presumably would be a statement in the nature of a petition such as is referred to in Section 9290 and 9291 of the code, the subsequent procedure outlined in Sec. 9292, et seq. of the code should be followed. While we feel that the provisions to which we have above referred contain sufficient authority by implication to accomplish the desired result, we might suggest that the statute be amended at the next session of the Legislature to expressly provide for the procedure whereby public lands can be included in any existing soil conservation district, thereby obviating whatever doubt, if any, may exist."

Mr. Wm. McClain, President, Board of Directors, El Cajon-Lakeside Soil Conservation District: "We have just gone through the process of taking in an addition to our district and we have found that the law, as it now stands, makes it almost impossible to complete it. The present law requires signatures of 50 percent of the landowners Where, in our district, there are so many nonresident owners that we propose a change in the law to read 35 percent instead of 50 percent signatures and keep the land as it is without any injustice to anyone.

"Another problem is our election in February. We can't get voters out in a majority, therefore only a small group will run the whole thing and that is very unsatisfactory."

Assemblyman Thompson: "Would you be in favor of having five alternates as well as five directors so that you would always have a quorum at your meetings and also there would be 10 men tied up in the organization instead of five?"

Mr. McClain: "That is a fine idea."

Assemblyman Thompson: "What percentage of the landowners do you think should be required to sign the petitions if you have the approval of the state organization and the board of directors?"

Mr. McClain: "We had a big problem when we formed the addition and I feel that it should be less than 50 percent and more than 10 percent."

Mr. Farmer: "I am very much in favor of having alternate directors. Then you have five to back up the five you already have on all questions."

Assemblyman Thompson: "How about an advisory committee—could you do as well?"

Mr. Farmer: "Call them one or the other, they will advise as well regardless of what they are called."

Assemblyman Thompson: "How about combining soil conservation and farm bureau?"

Mr. Farmer: "We have never had a farm bureau so I wouldn't know about that."

Assemblyman Stream: "What percentage of the people in your district understand the soil conservation organization, plans, etc.—people who are not members?"

Mr. Farmer: "It's like all public functions; there are a lot who do not understand it. In our district we have a lot of people who do not like it because they do not understand it. That is why I feel if we have five alternate members, they would be better educated along those lines."

Mr. Elmer Grosline, Chairman of the Portal Ridge District, stated that the previous election had worked out very well for his district, and that they had a larger representative vote than a special election could have provided. He stated he believed there should be at least four farmer members on the state commission.

Assemblyman Thompson: "Do you believe, Mr. Dixon, that any director of the soil conservation district should be a resident of the district as well as a landowners?"

Mr. Dixon: "Not necessarily so. He should be a landowner, but not necessarily have to live there."

Mr. Dixon explained the procedure of nominating and voting for two directors whoses names will be submitted to the Governor for consideration in appointing a member to the State Soil Conservation Commission.

Mr. Dixon briefly reviewed the proceedings of the meeting of directors and others held August 4, 1945, at San Fernando. At this meeting a resolution was passed favoring the formation of a State Association of Soil Conservation Districts A temporary Southern California organization, with temporary officers, was formed, pending a meeting with directors of Northern California and formation of a state association. A committee was to be appointed to draft a temporary set of articles of association. Recent legislation provides for the appointment by the Governor of two district directors to serve as members of the State Soil Conservation Commission, along with the present three members. One from Southern California and one from Northern California. Each district is asked to nominate one or more members, and furnish a biography for each candidate nominated. Nominations are to be submitted to Secretary Hollister by August 25th. Ballots listing all nominees will be sent to each soil conservation district in Southern California. Each district will be allowed one vote each for its first and second choice. The names of the

two men receiving the highest number of votes will be presented to the Governor for his consideration for appointment to the commission.

Mr. W. W. Weir: Thinks one amendment to the law should be to make nominations well in advance of elections. States the commission would probably not object to increase in size. He questioned the statement that directors should be residents of the county. Stated that some districts had two or more counties. Was in favor of a landowner in the district being eligible to be elected a director. However, favored county residence. Stated the commission felt the election law should be put back where it was originally, for a number of reasons. One was that districts were not static; another was that district lines do not coincide with precinct lines; thirdly, that it would put very little expense and work upon the directors. Does not believe the commission should be increased in size. Thinks the law should be amended to provide for consolidation of districts as provisions are now in the law relative to dissolving the districts.

Mr. H. H. Holland stated he believed the commission should have a large membership of directors, one from each soil conservation district. He feels the commission would then belong to the people themselves. Is in favor of an advisory committee, meeting frequently, with one man from each district being a member. Does not believe it would be practical to attempt certifying names of voters eligible to vote in elections. Some directors, he said, should be on the state commission to represent the farmers and landowners. Suggested that four members, two from the North and two from the South, would be a good idea. Does not believe that the present commission of three members can serve the State properly.

Mr. I. M. Wilson: Stated that one problem in the elections that had not been mentioned was the residence of the directors—whether a director could be a landholder but not a resident of a district and hold the office. He feels that the director should be a landholder of the district and a resident of the county. Thinks the elections of the directors should be held with the regular elections because of the cost of special elections.

Mr. R. D Perry: Discussed the method used in the elections to restrict the voting to only those entitled; the county clerk prepared lists of the voters and they were checked off by name.

Mr. Nelson Rutherford: Stated that he felt it might be a good idea to divide districts for election purposes to obtain a distribution of directors throughout the district.

Mr. V. D. Fairchild: Stated he had thought it might be a good idea to divide the districts and select directors for each section. Thinks the act should specify *water* conservation as well as *soil* conservation, or the improvement of soil. Feels the bill should be clarified with regard to control of runoff and water conservation.

Don Jaqua and Emil Ritter also commented in favor of the proposed amendments.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 13, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 11

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS (RESUMED)

The following resolution was read:

Senate Concurrent Resolution No. 11—Relative to the continuance of the Joint Committee on Insurance created by Resolutions Chapter 140 of the Fifty-sixth Regular Session.

Referred to Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 263: By Mr. Wollenberg—An act to appropriate the sum of $_____from the general funds of the State of California not otherwise appropriated for the purpose of carrying on medical research into the causes and cure of industrial accidents and diseases.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 264: By Messrs. Evans, Allen, Conrad, Hahn, Debs, Geddes, Hinton, Lyons, McMillan, and Rosenthal—An act to add Section 6361 to the Revenue and Taxation Code, relating to retail sales and use taxes.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 265: By Messrs. Price and Clayton A. Dills—An act to add Section 207a to the Civil Code, relating to liability of parents for torts of minors.

Referred to Committee on Judiciary.

Assembly Concurrent Resolution No. 24: By Messrs. Field and Wollenberg—Relative to adjournment in respect to the memory of Dana Reid Weller.

Request for Unanimous Consent

Mr. Field asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 24, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 24

Assembly Concurrent Resolution No. 24—Relative to adjournment in respect to the memory of Dana Reid Weller.

Resolution read, and adopted unanimously.

Resolution ordered printed, and transmitted to the Senate.

Speaker Pro Tempore Presiding

At 10.28 a.m., Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 266: By Messrs. Burns, Berry, and Thomas—An act to amend Sections 251, 253, 254, 265, 304, 305, 310, 311, 414, and 417.1, and to add Sections 254.1 and 303.1 to the Vehicle Code, relating to operators and chauffeurs licenses.

Referred to Committee on Transportation and Commerce.

WITHDRAWAL AND RE-REFERENCE OF ASSEMBLY BILLS NOS. 250 AND 251

By order of the Speaker, Assembly Bill No. 250 was withdrawn from the Committee on Civil Service and State Personnel, and re-referred to the Committee on Industrial Relations.

By order of the Speaker, Assembly Bill No. 251 was withdrawn from the Committee on Finance and Insurance, and re-referred to the Committee on Industrial Relations.

MOTION TO EXCUSE COMMITTEE MEMBERS FOR TODAY AND SUBSEQUENT DAYS

Mr. Dickey moved that the following members of the Assembly Committee on Interstate Cooperation, now away from the Assembly attending to business of the committee, be excused for this legislative day, and all subsequent days, until the completion of present committee business; each member waiving his per diem: Messrs. McCollister, Thomas, Ralph C. Dills, and Crichton, and Mr. Thompson, who is substituting for Mr. Thorp.

Motion carried.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 267: By Mr. Thomas (By request)—An act to amend Section 1068 of the Fish and Game Code, relating to fish reduction permits.

Referred to Committee on Fish and Game.

Assembly Bill No. 268: By Mr. Thomas (By request)—An act to amend Section 1010 of the Fish and Game Code, relating to fish packing and reduction licenses.

Referred to Committee on Fish and Game.

Assembly Bill No. 269: By Mr. Crowley—An act to amend Sections 3077 and 3081 of the Welfare and Institutions Code, relating to needy blind persons.

Referred to Committee on Social Welfare.

Assembly Bill No. 270: By Mr. Crowley—An act to amend Section 3470 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents.

Referred to Committee on Social Welfare.

Assembly Bill No. 271: By Mr. Crowley—An act to amend Sections 3051 and 3083 of the Welfare and Institutions Code, relating to aid to needy blind persons.

Referred to Committee on Social Welfare.

Assembly Bill No. 272: By Mr. Crowley—An act to amend Section 3471 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents.

Referred to Committee on Social Welfare.

Assembly Bill No. 273: By Mr. Crowley—An act to amend Section 3087 of the Welfare and Institutions Code, relating to aid to the needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 274: By Mr. McMillan—An act to amend Section 5410 of the Labor Code, relating to workmen's compensation.

Referred to Committee on Finance and Insurance.

Hon. Albert C. Wollenberg Presiding

At 10.35 a.m., Hon. Albert C. Wollenberg, Member of the Assembly from the Twenty-first District, presiding.

MESSAGES FROM THE GOVERNOR

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, January 13, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Senate Bill No. 30—"An act making an appropriation for the purchase of land for Stockton State Hospital, repealing Chapter 1460 of the Statutes of 1945, and declaring the urgency thereof, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Senate Bill No. 30 as necessary for the immediate preservation of the public peace, health, or safety and as an emergency measure.

Respectfully submitted.

EARL WARREN, Governor

REQUEST FOR UNANIMOUS CONSENT

Mr. Weber asked for, and was granted, unanimous consent to take up Senate Bill No. 30, at this time.

CONSIDERATION OF SENATE BILL NO. 30

Senate Bill No. 30—An act making an appropriation for the purchase of land for Stockton State Hospital, repealing Chapter 1460 of the Statutes of 1945, and declaring the urgency thereof, to take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Weber:

Resolved, That Senate Bill No. 30 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with,

and it is ordered that said bill be read the second and third times, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brady, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stewart, Thomas, Thorp, Thurman, Waters, Weber, and Wollenberg—64.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Senate Bill No. 30—An act making an appropriation for the purchase of land for Stockton State Hospital, repealing Chapter 1460 of the Statutes of 1945, and declaring the urgency thereof, to take effect immediately.

Bill read second time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brady, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stewart, Thomas, Thorp, Thurman, Waters, Weber, and Wollenberg—64.

NOES—None.

Senate Bill No. 30—An act making an appropriation for the purchase of land for Stockton State Hospital, repealing Chapter 1460 of the Statutes of 1945, and declaring the urgency thereof, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brady, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stewart, Thomas, Thorp, Thurman, Waters, Weber, and Wollenberg—64.

NOES—None.

Bill ordered transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Concurrent Resolution No. 25: By Mr. Sherwin—Relative to approving an amendment to the charter of the City of Piedmont, a municipal corporation of the County of Alameda, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on April 9, 1946.

Request for Unanimous Consent

Mr. Sherwin asked for, and was granted, unanimous consent to take up Assembly Concurrent Resolution No. 25, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 25

Assembly Concurrent Resolution No. 25—Relative to approving an amendment to the charter of the City of Piedmont, a municipal corporation of the County of Alameda, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on April 9, 1946.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stewart, Thomas, Thorp, Thurman, Waters, Weber, and Wollenberg—67.

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

COMMUNICATIONS

By Mr. Maloney:

The following communication was received, read, and ordered printed in the Journal:

BOARD OF STATE HARBOR COMMISSIONERS
SAN FRANCISCO 6, January 13, 1947

Mr. Arthur A. Ohnimus, Chief Clerk of the Assembly
State Capitol, Sacramento, California

Re: Report on Assembly Concurrent Resolution No. 22
World Trade Center at San Francisco

DEAR SIR: We hand you herewith duplicate original and 80 copies of our report to the Legislature, pursuant to Assembly Concurrent Resolution No. 22.

Additional copies are available if desired by Members of the Assembly.

Duplicate original and sufficient copies for each Member of the Senate are being filed today with Mr. Joseph A. Beek, Secretary of the Senate.

Very truly yours,

BOARD OF STATE HARBOR COMMISSIONERS
THOMAS COAKLEY, President
W. G. WELT, Commissioner
N. LOYALL MCLAREN, Commissioner

REQUEST FOR UNANIMOUS CONSENT TO NOTE THAT REPORT HAS BEEN RECEIVED

Mr. Maloney asked for, and was granted, unanimous consent that it be noted in the Journal that the above mentioned Report on the World Trade Center in San Francisco as reported by the Board of State Harbor Commissioners to the Legislature, pursuant to the provisions of Assembly Concurrent Resolution No. 22 of the Fifty-sixth (First Extraordinary) Session, has been received by Members of the Assembly; and that the report be ordered filed with the Secretary of State.

COMMUNICATIONS

By Mr. Lowrey:

The following telegram was received, read, ordered printed in the Journal, and referred to the Committee on Rules:

TUCSON, ARIZONA, January 13, 1947

Assemblyman Lloyd W. Lowrey
State Capitol, Sacramento, California

Attended conference here yesterday with Arizona sanitary officials and cattlemen of Arizona, Sonora and Lower California to consider foot-and-mouth disease problem Have reported details to Doctor Carr of California Division Animal Industry. Please contact him In interests of uniform action by various American states to insure adequate measures for prevention of foot-and-mouth disease in this Country we respectfully urge emergency appropriation by California Legislature of at least $25,000 for possible use of California authorities in locating and observing cattle of Mexican origin moved into California since October 17th and for travel, etc., required to cooperate with other states and Mexico. Also for immediate use in case of outbreak in California. We further recommend immediate legislative concurrent resolution by California Legislature asking Congress for immediate appropriation adequate funds for United States Bureau of Animal Industry and requesting extension of United States assistance to Mexico in the form of personnel and supplemental funds to full extent permitted and required by that country. Also urging creation joint United States-Mexico commission under such authority as Doctor Wardlaw to handle problem. Further requesting immediate closing of border to all importations and traffic which might carry infection. Conference with both Mexican and American cattlemen yesterday convinces me that seriousness of situation demands every possible effort to prevent spread of disease to United States.

DAN C. McKINNEY,
California Cattlemen's Association

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 275: By Messrs. Rosenthal, Bennett, Hahn, M. Philip Davis, Evans, and Waters—An act to amend Section 7 of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to judges and attaches in municipal courts of cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 276: By Messrs. Rosenthal, Bennett, Beck, Hahn, and Waters—An act to amend Section 7a of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to attaches in municipal courts in cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 277: By Messrs. Rosenthal, Bennett, Beck, Hahn, and Waters—An act to amend Section 7b of an act entitled "An act authorizing establishment of municipal courts, prescribing their con-

stitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to attaches in municipal courts in cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 278: By Messrs. Rosenthal, Hahn, Bennett, and Waters—An act to amend Section 7c of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to commissioners in municipal courts in cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 279: By Messrs. Rosenthal, Bennett, and Waters—An act to amend Section 7e to an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to the office of secretary and jury commissioner in municipal courts in cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 280: By Messrs. Bennett and Rosenthal—An act to amend Section 28a of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to acceptance of bail and duties of commissioners in municipal courts in cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 281: By Messrs. Bennett and Rosenthal—An act to amend Section 117 of the Code of Civil Procedure, relating to small claims courts.

Referred to Committee on Judiciary.

Assembly Bill No. 282: By Messrs. Rosenthal and Waters—An act to amend Section 822 of the Penal Code, relating to admission to bail.

Referred to Committee on Judiciary.

Assembly Bill No. 283: By Messrs. Rosenthal and Waters—An act to amend Section 823 of the Penal Code, relating to admission to bail.

Referred to Committee on Judiciary.

Assembly Bill No. 284: By Mr. Rosenthal—An act to add Section 204h to the Code of Civil Procedure, relating to the performance of commissioner's duties by judges' secretary, assistant secretary and clerks.

Referred to Committee on Judiciary.

Assembly Bill No. 285: By Messrs. Rosenthal, M. Philip Davis, and Waters—An act to amend Section 261a of the Code of Civil Procedure, relating to superior court employees in counties, or cities and counties, of 900,000 population or more.

Referred to Committee on Judiciary.

Assembly Bill No. 286: By Messrs. Rosenthal, M. Philip Davis, and Waters—An act to add Section 261c to the Code of Civil Procedure, relating to superior court employees in counties, or cities and counties, of 2,000,000 population or more.

Referred to Committee on Judiciary.

Assembly Bill No. 287: By Messrs. Rosenthal and M. Philip Davis —An act to amend Section 1744 of the Code of Civil Procedure, relating to attaches of the conciliation court in counties of 900,000 population or more.

Referred to Committee on Judiciary.

Assembly Bill No. 288: By Messrs. Beck, Rosenthal, and M. Philip Davis—An act to amend Section 261 of the Code of Civil Procedure, relating to court commissioners in counties, or cities and counties, having a population of 2,000,000 or over.

Referred to Committee on Judiciary.

Assembly Bill No. 289: By Messrs. Rosenthal and M. Philip Davis —An act to amend Section 261 of the Code of Civil Procedure, relating to court commissioners in counties, or cities and counties, having a population of 900,000 or over.

ANNOUNCEMENT OF INVITATION

Mr. Grunsky announced that all Republican Members of the Assembly were invited to attend a dinner on Tuesday evening, January 21, 1947, at the Sacramento Hotel, as guests of Mr. Arthur Carlson, Chairman of the Republican State Central Committee.

ANNOUNCEMENT

Mr. Gannon announced that, as a Sacramento resident, he would be happy to advise those wishing to take short trips to interesting and historical places near the Capitol on where to go and to assist with arrangements; also—that anyone desiring to make a trip to view San Quentin should see him relative to arrangements.

PETITIONS

By Messrs. Allen, Stewart, and Evans:

A petition from Alvin Hosler of Hoopa, California, relative to "Indians of California, Incorporated," was received, and ordered filed with the Secretary of State.

RESOLUTIONS

The following resolution was offered:

By Messrs. Allen, Stewart, and Evans:

House Resolution No. 36

Relating to the investigation of certain Indian organizations within the State

WHEREAS, The Indians of California, numbering about twenty-four thousand persons, descendants of all the aboriginal tribes in this State, having claims against the United States Government were, during the years 1928 to 1944, represented in such proceedings *ex officio as the Attorney General of the State of California by the Honorable* U. S. Webb, the Honorable Earl Warren and the Honorable Robert W. Kenny pursuant to special state and federal statutes; and

WHEREAS, The Indians of California may now bring a new proceeding for the settlement of their claims by virtue of a new federal act which creates an Indian Claims Commission for such purpose; and

WHEREAS, Many Indian leaders throughout the State are complaining (1) that a certain group among them with Indian auxiliaries (local Indian groups), known as the Indians of California Inc., is attempting unfairly and unjustly to rule their destiny by methods and by practices and modes of procedure which do not comport with equity and justice; (2) that this group combined with another group in Southern California known as the Mission Indian Federation, are reportedly attempting to have attorneys appointed to represent all the Indians of California, many of whom do not belong to either of these organizations; (3) that at a convention held in Berkeley, California, in September of 1945 certain delegates, all of whom belonged to the one organization, The Indians of California Inc., were appointed to go to Washington, D. C., and while there are believed to have executed a contract for the employment of attorneys without being authorized to do so by the majority of the adult Indians of the State of California as required by law; and (4) that the two above-named groups have refused to permit the Indians of California to see this contract, although repeatedly requested so to do; and

WHEREAS, The records of the Federal Government show that thousands of dollars have been heretofore collected from the Indians of California on the pretext of

employing attorneys to represent them as "friends of the court" in suits filed in the court of claims; and

WHEREAS, Collections of money are now being made from the Indians of California and from interested white people by the two organizations above named to further their own plans; and

WHEREAS, The protection of the welfare of the Indians of California is a matter of vital state concern; now, therefore, be it

Resolved by the Assembly of the State of California, That the Attorney General is requested to investigate the activities of the organization known as the Indians of California, Inc. and of its predecessor, the Indian Board of Cooperation, both organized and existing under the laws of the State of California, and the organization known as the Mission Indian Federation, an unincorporated body, and the activities of their directors, officers, employees, and particularly those of their executive representatives, to determine whether or not such organizations or any of them or their auxiliaries (local Indian groups) are living up to the letter and spirit of the laws of the State of California; and be it further

Resolved, That the Chief Clerk of the Assembly is directed to transmit a copy of this resolution to the Attorney General of California.

Request for Unanimous Consent

Mr. Allen asked for, and was granted, unanimous consent to take up House Resolution No. 36, at this time, without reference to committee or file.

Resolution read, and adopted.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 302: By Mr. Debs—An act to amend Section 5003 of the Public Resources Code, relating to the powers and duties of the State Park Commission.

Referred to Committee on Conservation and Planning.

ASSEMBLY BILL NO. 94 WITHDRAWN FROM COMMITTEE

Mr. Beck moved that Assembly Bill No. 94 be withdrawn from the Committee on Agriculture, for purpose of amendment, to be re-referred to the Committee on Agriculture.

Motion carried unanimously.

CONSIDERATION OF ASSEMBLY BILL NO. 94

Assembly Bill No. 94—An act to amend Section 92.1 of the Agricultural Code, relating to the allocation of state money to county and district fairs, declaring the urgency of this act, to take effect immediately.

Bill read second time.

Motion to Amend

Mr. Beck moved the adoption of the following amendments:

Amendment No. 1

On page 2, line 1, of the printed bill, strike out "years 1943, 1944, 1945, and," and insert: "year."

Amendment No. 2

On page 2, line 31, of the printed bill, after "92," insert: "on the same apportionment basis as allotted to counties and district agricultural associations as provided in paragraph (a) in this section, provided that such apportionment shall be payable from any moneys in the Fair and Exposition Fund available for permanent

improvements on property of the State, citrus, county, or district agricultural association for fair purposes, allotted by section 19626 of the Business and Professions Code."

Amendments read, and adopted.

Bill ordered reprinted, and engrossed.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 303: By Mr. Debs—An act to amend Section 5006 and to add Sections 5006.1, 5006.2, 5006.3, and 5017 to the Public Resources Code, relating to the powers and duties of the State Park Commission.

Referred to Committee on Conservation and Planning.

COMMUNICATIONS

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

ASSEMBLY CHAMBER, SACRAMENTO, January 14, 1947

MR. SPEAKER: Pursuant to your instructions, the Chief Clerk has examined:

Assembly Concurrent Resolution No. 22—Relative to approving certain amendments to the Charter of the City of Glendale, a municipal corporation of the County of Los Angeles, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on November 5, 1946; And reports that the same has been correctly enrolled, and presented to the Secretary of State on the fourteenth day of January, 1947, at 12 m.

ARTHUR A. OHNIMUS, Chief Clerk of the Assembly

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Hinton, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Ruth N. Parker of Richmond and Mrs. Bernice Harris of North Hollywood.

On request of Mr. Lyons, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Charles Son of Los Angeles.

ADJOURNMENT

At 11.07 a.m., on motion of Mr. Dickey, the Speaker declared the Assembly adjourned until 10 a.m., Wednesday, January 15, 1947, out of respect to the memory of the late Peter R. Maloney, and Dana Reid Weller.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE
FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

EIGHTH LEGISLATIVE DAY
TENTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Wednesday, January 15, 1947

The Assembly met at 10 a.m.

Mr. Huyck, on motion of Mr. Waters.

COMMUNICATIONS

By Speaker Collins:

The following communication was received, read, and ordered printed in the Journal, and the report transmitted therewith ordered filed with the Secretary of State:

DEPARTMENT OF EDUCATION
SACRAMENTO 14, December 1, 1946

To the Senate and Assembly of the State of California

GENTLEMEN: By the provisions of Chapter 117, Statutes of 1945, the Department of Education was directed to investigate the problems of the blind residents of this State, and the Departments of Social Welfare, Institutions, Public Health and any other department of this State having functions pertaining to the welfare of the blind were to cooperate in making the investigation.

We, the Directors of the State Departments of Education, Mental Hygiene (formerly Institutions), Public Health and Social Welfare, respectfully submit the Report of the Interdepartment Committee on Study of Problems of and Services for the Blind.

We trust that this report will be of assistance to the Legislature in its deliberations as to the welfare of the blind citizens of California.

Respectfully,

ROY E. SIMPSON
Director Department of Education
DORA SHAW HEFFNER
Director Department Mental Hygiene
WILTON L. HALVERSON
Director Department Public Health
C. M. WOLLENBERG
Director Department Social Welfare

Speaker Pro Tempore Presiding

At 10.06 a.m., Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 304: By Mr. Johnson—An act to amend Sections 3490, 3492, 3493, 3494, 3495, and 3511.4 of the Revenue and Taxation Code, relating to property taxation.

Referred to Committee on Finance and Insurance.

Assembly Joint Resolution No. 8: By Mr. Luckel, Mrs. Niehouse, and Mr. Cramer—Relative to statehood for Hawaii.

Referred to Committee on Rules.

RESOLUTIONS

The following resolutions were offered:

By Mr. Hollibaugh:

House Resolution No. 37

Relative to the continuance of the Assembly Interim Committee on State and Local Taxation created by House Resolution No. 154 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on State and Local Taxation created by House Resolution No. 154 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature, including any recess, and after final adjournment until the commencement of the next regular general session, with authority to file its final report not later than the fifteenth legislative day of the next regular general session.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The committee, and any subcommittee thereof when so authorized by the committee, may meet and act without as well as within the State of California, and is hereby authorized to leave the State in the performance of its duties.

5. The sum of seven thousand two hundred dollars ($7,200) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

By Messrs. Thompson and Beck:

House Resolution No. 38

Relative to the continuance of the Assembly Committee on Soil Conservation created by House Resolution No. 51 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Soil Conservation created by House Resolution No. 51 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature, including any recess, but not after March 15, 1947.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The sum of seven hundred fifty dollars ($750) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

Hon. Michael J. Burns Presiding

At 10.14 a.m., Hon. Michael J. Burns, Member of the Assembly from the First District, presiding.

Senate Concurrent Resolution No. 7
Senate Joint Resolution No. 1

Has had the same under consideration, and reports the same back with the recommendation: Be adopted.

DICKEY, Chairman

Above resolutions ordered on file for adoption.

REQUEST FOR UNANIMOUS CONSENT

Mr. Geddes asked for, and was granted, unanimous consent to take up House Resolution No. 22, at this time.

CONSIDERATION OF HOUSE RESOLUTION NO. 22

House Resolution No. 22

Relative to installing sand-filled urns in the halls of the Capitol

WHEREAS, The halls of our stately and beautiful Capitol are frequently rendered most unsightly due to an accumulation of discarded remnants of cigarettes and other waste material, especially during legislative session when the traffic flow is heavy; and

WHEREAS, We feel that this condition detracts greatly from the appearance of this building in which we take great pride; now, therefore, be it

Resolved by the Assembly of the State of California, That the Superintendent of Buildings and Grounds is hereby directed to install at intervals through the halls of the Capitol suitable sand-filled urns for use as receptacles to correct the situation mentioned herein.

Resolution read, and adopted.

REQUEST FOR UNANIMOUS CONSENT

Mr. Doyle asked for, and was granted, unanimous consent to take up House Resolution No. 21, at this time.

CONSIDERATION OF HOUSE RESOLUTION NO. 21

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 351: By Messrs. Lowrey and Geddes—An act to amend Sections 7351 and 8353 of, to add Section 8352.6 to, and to repeal Section 8353.5 of, the Revenue and Taxation Code, and to amend Section 194 of the Streets and Highways Code, relating to the motor vehicle fuel license tax, and the disposition of the revenues thereof.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 352: By Messrs. Lowrey and Geddes—An act to amend Sections 7401, 8101, 8102, and 8103 of, and to add Section 8103.5 to, the Revenue and Taxation Code, relating to motor vehicle fuel license taxes.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 353: By Messrs. Lowrey and Geddes—An act to amend Section 374 of, and to repeal Sections 162 and 374.5 of, and to add Section 374.5 to, the Vehicle Code, relating to exemptions of and liability for fees of publicly owned vehicles.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 354: By Messrs. Lowrey and Geddes—An act to amend Sections 276, 277, and 381, and to repeal Section 276.5, of the Vehicle Code, relating to operator's and chauffeur's licenses.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 355: By Messrs. Lowrey and Geddes—An act to amend Section 370 of the Vehicle Code, relating to vehicle registration fees.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 356: By Mr. Lowrey—An act to repeal Part 4, comprising Sections 9601 to 10501, inclusive, of Division 2 of the Revenue and Taxation Code, imposing a tax upon persons engaged in the transportation of persons or property for hire or compensation by motor vehicle, to add Part 4, comprising Sections 9601 to 10501, inclusive, to Division 2 of the Revenue and Taxation Code, and to amend Section 372 of the Vehicle Code, relating to the imposition of taxes and fees to be paid by persons operating commercial vehicles, and providing that this act shall take effect immediately.

Referred to Committee on Transportation and Commerce.

EXPLANATION

January 15, 1947

In order to assure a consideration of the Governor's highway plan in the Fifty-seventh Regular Session, if final action is not taken on these problems in the Fifty-seventh (Extraordinary) Session, we are introducing a duplicate series of the bills introduced in the extraordinary session.

LLOYD W. LOWREY
ERNEST R. GEDDES

RESOLUTIONS

The following resolution was offered:

By Mr. Silliman:

House Resolution No. 39

Relative to memorializing Congress to enact legislation to establish a permanent naval postgraduate school at Monterey, California

WHEREAS, The present training facilities of the United States Navy are inadequate to meet the requirements of the postgraduate training program for officers of the naval service which is designed to preserve and enhance the estimable position of our Navy as the finest and most efficient navy in the world; and

WHEREAS, Additional naval training facilities for officers must be acquired to provide competent, qualified and proficient officers in sufficient numbers for the increased strength and size of our postwar Navy; and

WHEREAS, This Assembly in its Fifty-sixth Session fully endorsed and went on record in favor of the establishment of a permanent naval academy on the Pacific Coast; and

WHEREAS, Members of congressional committees which inspected proposed sites for the location of a postgraduate school for the training of naval officers have favored the selection of the Del Monte site, located at Monterey, California, which the Navy Department considers best located, suitable, and adaptable to the needs and requirements of the postwar training program, now, therefore, be it

Resolved by the Assembly of the State of California, That the President of the United States and the Senate and House of Representatives of the United States be memorialized to enact, at this session, legislation to establish a permanent postgraduate naval officers' training school on the Monterey Peninsula, at Monterey, State of California; and be it further

Resolved, That the Chief Clerk of the Assembly is directed to transmit copies of this resolution to the President of the United States, to the Secretary of the Navy, to the President pro Tempore of the Senate of the United States, to the Speaker of the House of Representatives, and to the Senators and Representatives from California.

Request for Unanimous Consent

Mr. Silliman asked for, and was granted, unanimous consent to take up House Resolution No. 39, at this time, without reference to committee or file.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Butters, Caldecott, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Doyle, Dunn, Erwin, Evans, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kilpatrick, Kirkwood, Loomis, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Sherwin, Silliman, Stanley, Stephenson, Thorp, Thurman, Waters, Weber, and Mr. Speaker—59.

NOES—None.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 357: By Messrs. Hinton, Field, Ralph C. Dills, Boyd, Beck, Cramer, Debs, Doyle, Gannon, Grunsky, Hahn, Kirkwood, Lowrey, McCollister, and Price—An act to amend Section 2421 of the Education Code, relating to school districts.

Referred to Committee on Education.

MOTION TO APPROVE JOURNALS

Upon motion of Mr. Dickey, the Journals for Monday, January 6, 1947; Tuesday, January 7, 1947; Wednesday, January 8, 1947; Thursday, January 9, 1947; and Friday, January 10, 1947, were approved as corrected by the Minute Clerk.

MOTION TO PRINT ALL COMMITTEE REPORTS AT END OF JOURNAL

Mr. Dickey moved that in the future all interim and special committee reports ordered printed in the Journal be placed at the end of each day's Journal immediately preceding the motion for adjournment.

Mr. Geddes seconded the motion.

Motion carried.

REQUEST FOR UNANIMOUS CONSENT TO PRINT STATEMENT OF POLICY

Mr. Dickey asked for and was granted, unanimous consent that the following statement of policy of the Committee on Rules be ordered printed in the Journal:

Statement of Policy, Committee on Rules, January 14, 1947

On Tuesday, January 14, 1947, in a meeting held by the Committee on Rules, permission to have printed in the Journal editorials and news items from San Francisco and Los Angeles newspapers was requested by Mr. Wollenberg, Mr. Maloney and Mr. Rosenthal.

The committee refused to grant the request, and adopted the policy that in the future no editorials or items previously published in newspapers, magazines, et cetera will be reprinted in the Journal.

REQUEST FOR UNANIMOUS CONSENT TO PRINT OPINION

Mr. Dunn asked for, and was granted, unanimous consent that the following opinion of the Legislative Counsel be ordered printed in the Journal:

Opinion of Legislative Counsel

OFFICE OF LEGISLATIVE COUNSEL
SACRAMENTO 2, CALIFORNIA, January 14, 1947

Honorable Francis Dunn, Jr.
Assembly Chamber, State Capitol
Sacramento, California

"Double-jointed" bills No. 800

DEAR MR. DUNN: You have asked us for an explanation of the reason for so-called "double-jointed" bills—that is, a bill which amends or repeals one or more sections of existing law, or adds a new section thereto, and which also contains the same amendments directed to a nonexistent portion of a code, or to a code that has not yet been enacted As an example, we call attention to Assembly Bill No. 139, which would amend Section 4260 of the Political Code and Section 28131 of the Government Code, relating to compensation for public services in counties of the thirty-first class.

The reason for the use of such bills is to avoid conflict with bills to codify portions of the existing law which will be introduced at this session of the Legislature.

When a new code, or portion of a code, prepared by the California Code Commission is to be introduced at a session of the Legislature, bills to amend, repeal, or add sections to the existing law proposed to be codified are prepared so as to make the desired change both in the existing law and in the corresponding sections of the proposed codification.

This is done so that the bill, if enacted, will accomplish its purpose, whether or not the proposed code is enacted.

If the bill is passed but for any reason the proposed code is not passed, the purpose of the bill is fully accomplished by the changes it makes in the existing law.

If both the bill and the proposed code are passed, the purpose of the bill is fully accomplished by the changes it makes in the proposed code.

It is therefore necessary, in order to give full effect to the purpose of a bill making a change in an existing law which is to be codified in a proposed code, that the bill also make a corresponding change in the corresponding sections of the proposed code

When amendments are prepared to such a bill (i.e. to a bill which would change the existing law and also make corresponding changes in a proposed code), it is necessary that the amendment be directed to both the portion of the bill changing the existing

law and the portion changing the proposed code, in order that the purpose of the amendments will be fully accomplished, whether or not the proposed code is enacted.

Very truly yours,

FRED B. WOOD, Legislative Counsel
By HARRIET R. BUHLER, Deputy

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Joint Resolution No. 9: By Messrs. Lester T. Davis, Lowrey, and Stewart—Relative to memorializing Congress concerning appropriations for forest conservation.

Request for Unanimous Consent

Mr. Lester T. Davis asked for, and was granted, unanimous consent to take up Assembly Joint Resolution No. 9, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY JOINT RESOLUTION NO. 9

Assembly Joint Resolution No. 9—Relative to memorializing Congress concerning appropriations for forest conservation.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, James, Johnson, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, and Weber—64.

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 358: By Messrs. Butters, Clarke, Erwin, Stewart, and Thorp—An act to amend Section 380.55 of the Agricultural Code, relating to inspection of horses for marks and brands.

Referred to Committee on Livestock and Dairies.

Assembly Bill No. 359: By Mr. Stephenson—An act to amend Section 3209.3 of the Labor Code, relating to medical services in workmen's compensation and disability insurance cases.

Referred to Committee on Finance and Insurance.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 15, 1947

MR. SPEAKER: Your Committee on Rules, to which was referred:

Senate Concurrent Resolution No. 6

Has had the same under consideration, and reports the same back with amendments with the recommendation: Amend, and be adopted, as amended.

DICKEY, Chairman

Above reported bill ordered to second reading.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 6 (BY UNANIMOUS CONSENT)

Senate Concurrent Resolution No. 6—Relative to the continuance of the Joint Fact-Finding Committee on Highways, Streets and Bridges created by Resolutions Chapter 133 of the 1945 Regular Session.

Resolution read.

Consideration of Committee Amendments

The following amendment was proposed by the Committee on Rules:

Amendment No. 1

On page 1, line 8, of the printed measure, strike out "Vacan-"; and strike out lines 9 and 10.

Amendment read, and adopted.

Request for Unanimous Consent

Mr. Burns asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No. 6, as amended, at this time, without reference to reprint or file.

Consideration of Senate Concurrent Resolution No. 6, as Amended

Senate Concurrent Resolution No. 6—Relative to the continuance of the Joint Fact-Finding Committee on Highways, Streets and Bridges created by Resolutions Chapter 133 of the 1945 Regular Session.

Resolution read.

Resolution ordered reprinted, and on file.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 360: By Messrs. M. Philip Davis, Debs, Dunn, Geddes, Anderson, Burke, George D. Collins, Conrad, Cramer, Dickey, Clayton A. Dills, Doyle, Erwin, Gannon, Grant, Hahn, Heisinger, Hinton, Hollibaugh, Luckel, Maloney, McMillan, Miller, Mrs. Niehouse, and Mr. Rosenthal—An act making an appropriation for the support of child care centers, and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Education.

Assembly Bill No. 361: By Mr. Crowley—An act to amend Section 14451 of, and to add Section 14453 to, the Education Code, relating to the California State Teachers' Retirement System.

Referred to Committee on Education.

Assembly Bill No. 362: By Mr. Lyons—An act to amend Section 1395 of the Labor Code, relating to the employment of minors.

Referred to Committee on Industrial Relations.

Assembly Bill No. 363: By Mr. Lyons—An act to amend Section 1393 of the Labor Code, relating to the employment of minors.

Referred to Committee on Industrial Relations.

Assembly Bill No. 364: By Mr. Lyons—An act to amend Section 209 of the Labor Code, relating to the payment of wages to striking employees.

Referred to Committee on Industrial Relations.

Assembly Bill No. 365: By Mr. Lyons—An act to amend Section 1582 of the Labor Code, relating to private employment agencies.

Referred to Committee on Industrial Relations.

REQUEST FOR UNANIMOUS CONSENT TO PRINT TWO REPORTS

Mr. Field asked for, and was granted, unanimous consent that the following Reports of the Subcommittee of the Assembly Committee on Governmental Efficiency and Economy be ordered printed in the Journal in 10-point type:

(1) Investigation of Conditions of Indian Affairs in California.

(2) Investigation of Conditions at Preston School of Industry at Ione, California.

Pursuant to the motion made by Mr. Dickey, the above reports were ordered printed at the end of this day's Journal, immediately preceding the motion for adjournment.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Messrs. Stewart and Knight, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs John Peter Buwalda.

On request of Mr. Beck, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Judge and Mrs. William D. Keller of Lancaster.

On request of Mr. Evans, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mrs. Marguerite Moore, Mrs. Rivers, and Miss Rivers of Los Angeles.

On request of the San Diego Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Don Keller, David L. Bird, Dan Rossi, Merle Stevenson, and Duane Carnes, all of San Diego.

On request of Mr. Burke, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to James L. Beebe and Mr. Pierce of San Marino.

REPORT OF THE ASSEMBLY INTERIM COMMITTEE ON TRANSPORTATION AND COMMERCE

To the Speaker and Members of the Assembly
California State Legislature
Sacramento, California

GENTLEMEN: Your Committee on Transportation and Commerce, appointed pursuant to House Resolution No. 274, adopted by the Assembly of the California Legislature during its Fifty-sixth Regular Session, respectfully submits the following report:

Pursuant to said resolution, your committee held a series of meetings as hereinafter set forth relative to the matters referred to in said resolution, also appointed a Subcommittee on Commerce and Navigation. Your committee called into consultation and at all times has had the assistance and cooperation of the Advisory Committee on Motor Vehicle Legislation, which includes representatives of the State Department of Motor Vehicles and its several divisions, the State Department of Public Works, representatives of other governmental agencies, and representatives of numerous civic and business groups, such as chambers of commerce, motor car dealers, automobile finance companies, automobile insurance interests, motor clubs, farm and labor organizations interested in motor vehicle legislation.

Your committee met in the City of Sacramento on January 5, 1946, Chairman Michael J. Burns presiding, and Assemblymen Fred Emlay and William C. Berry being present, said meeting being held for the purpose of considering the increase in traffic accidents and various remedial measures then proposed, and further, for the purpose of considering the financial problems of the Department of Motor Vehicles.

Your chairman requested the Advisory Committee on Motor Vehicle Legislation, the members of which were present at said meeting, to engage in a study of numerous specific subjects such as speed regulation, the administration by the Division of Drivers Licenses of the driver's license laws, and any needed revision of the Vehicle Code relating to the licensing of operators and chauffeurs.

Also, your committee devoted attention to and requested the advisory committee to consider the activities of the California Highway Patrol as to the number of officers available and the budget restrictions on operating expenses. The advisory committee was also requested to consider the subject of permanent license plates, compulsory inspection of motor vehicles, and the adequacy of laws relating to driving under the influence of intoxicating liquor.

During a special meeting of the Assembly Committee on Transportation and Commerce in the City of Sacramento on January 9, 1946, your committee received a special report and reviewed recommendations in reference to activities and finances of the Department of Motor Vehicles. Pursuant thereto, your committee recommended, and the Legislature, during the special session in January and February, 1946, approved, additional financing for the Department of Motor Vehicles.

Subsequently, during the year 1946, your committee held meetings as follows: in Los Angeles, June 20th; in Sacramento on September 12th, October 24th, and December 5th and 6th, Assemblymen Berry, Emlay and Thomas being present at all said meetings.

Said meetings were held concurrently with meetings of the Advisory Committee on Motor Vehicle Legislation. During said meetings a very substantial number of proposed amendments and additions to the California Vehicle Code were considered relating to the powers and duties of the Department of Motor Vehicles, the registration of motor vehicles, registation and other taxes applicable to motor vehicles, the traffic laws governing the operation of motor vehicles, the size, weight and equipment of motor vehicles, and the procedure prescribed in the Vehicle Code relating to enforcement of the vehicle laws.

The members of your committee participated in the consideration and discussion of all said proposals. A majority of the proposals originated with the State Department of Motor Vehicles and other members of the advisory committee, although said advisory committee and your Interim Committee on Transportation and Commerce received and considered proposals submitted by other organizations and numerous citizens interested in traffic matters. All said meetings were open public meetings and were attended by large numbers of people in addition to the members of the advisory committee.

Pursuant to the request of the Chairman of your Interim Committee on Transportation and Commerce, the Advisory Committee on Motor Vehicle Legislation submitted its report and recommendations to the legislative interim committee at a meeting of said committee held in San Francisco on December 16, 1946, at which all members of your interim committee were present. Said report consisted of the drafts of numerous proposed amendments and additions to the California Vehicle Code and other laws relating to the ownership and operation of motor vehicles.

Your committee reviewed the text of all said proposals and received explanations in reference thereto and considered the relative importance of said proposals. Your committee concluded that a substantial number of said proposals are desirable and of importance in the following particulars:

A number of the proposed measures relating to the administration of the registration laws will decrease the administrative detail now imposed on the Department of Motor Vehicles in regard to the registration of vehicles, with resulting decrease in cost of operation. Other amendments are desirable as clarifying the administrative procedure in the Division of Registration of the Department of Motor Vehicles.

Your committee recommends the enactment of a limited number of the amendments relating to registration as urgency measures, including the proposed addition of Section 182.1 to the Vehicle Code to permit transfers of registration during renewal period when the registration card is in the possession of the department, such transfers to be permitted upon production of certificates of registration, together with temporary receipts upon forms prescribed by the department, issued upon application for renewal and payment of proper fees.

Your committee recommends the enactment of other proposed amendments relating to the establishment of speed zones on streets and highways; other amendments to render appropriate rules of the road applicable to trolley busses, a new type of conveyance to be operated in several of the cities in California.

Your committee is of the opinion that the proposed amendments as submitted in the report of the advisory committee are not subject to objection, although many of them are of a minor technical nature. It is the opinion of your committee that the California Vehicle Code, in the main, now embraces a body of laws adequate to provide for the regulation of vehicular traffic and the administration and enforcement thereof, and that the adding of more laws will not greatly increase traffic safety. Rather, your committee believes that increase in traffic safety can be brought about only by better methods of enforcement, improvement in highway facilities, and educational procedures.

Thus, your committee views proposed amendments to the Vehicle Code as falling within two categories. First, important measures relating to administration and taxation, strengthening of various provisions of the driver's license laws, clarification of rules of the road; and secondly, minor technical amendments which may be desirable, but which are not vital in reference to traffic safety.

Because of the volume of the amendments submitted, your committee does not at this time submit a detailed analysis of each and every amendment proposed.

Respectfully submitted.

MICHAEL J. BURNS, Chairman
FRED EMLAY
W. C. BERRY
JACOB LEONARD
VINCENT THOMAS

REPORT OF THE SUBCOMMITTEE OF THE COMMITTEE ON TRANSPORTATION AND COMMERCE ON FOREIGN TRADE ZONES

Subcommittee
VINCENT THOMAS
WILLIAM CLIFTON BERRY
FRED EMLAY

Although foreign trade zones, or free ports, have been in operation for more than a thousand years, the principles of trade involved and the mechanics of their operation are not popularly or widely understood. Because of this limited popular understanding the members of your subcommittee thinks that it is essential that the subject of foreign trade zones be discussed more fully than it is possible to do in the usual committee report.

I. DEFINITION AND HISTORY

A foreign trade zone, or what is often called a free port, is a segregated, fenced area within a port where ships from foreign countries may dock and discharge cargoes free from customs, regulations and supervision. In this zone the products of foreign countries may be warehoused and processed without custom bonds or the payment of duty. Here cargoes may be broken up, sorted, graded, cleaned, mixed, assembled, refined, repacked, labelled, displayed and reshipped to other countries without the payment of tariffs and free of tariff and quota regulations. In effect, cargoes may undergo any handling except manufacturing.

The legal status of the cargo while in the foreign trade zone is identical with that of cargo on the high seas. These cargoes may therefore be shipped into the zone and then trans-shipped to foreign ports free of all traffic restrictions and customs delays. Duties are paid only upon the shipment of goods out of the zone into the domestic channels of trade within the United States.

The history of foreign trade zones begins during the Middle Ages. It was during this era that steps were first taken to attract and stimulate foreign trade. Many of the commercial cities of that time engaged in world traffic in goods endeavored to increase their volume of foreign trade by granting special privileges and greater freedom of operation to importers and exporters. However, with the discovery of the New World and the establishment of new world trade routes, the mercantile system began to grow rapidly and certain restrictive trade regulations were found necessary.

With the inauguration of trade restrictions the idea of the free port was born. In its original form, the plan provided for the designation of certain important commercial cities as free ports where worldwide trade might be carried on free of the usual restrictive regulations. The port of Leghorn, Italy, was the first commercial city to be designated a free port. Following its designation as a free port in 1547, Leghorn became an important shipping center Following the demonstrated success of the plan at Leghorn other Italian ports were granted similar freedom from export and import regulations.

In the northern part of Europe, the Hanse towns, including Hamburg, Bremen, and Lubeck, developed a system of free ports similar to the free ports of Genoa and Venice in the Mediterranean. The system flourished and an increasing volume of shipping flowed through these northern ports where freedom from restrictive shipping regulations attracted cargoes from major world ports.

Prior to World War I, the principal free ports in Europe were Hamburg, Danzig, and Copenhagen. Germany, in particular, with her limited natural resources in comparison with other European countries, profited heavily from and built her national economy through the operation of foreign trade zones.

Hamburg

Within the port of Hamburg, the foreign trade zone area was located on both sides of the Elbe and the main rivers. The free port had a water frontage of five miles and the free area embraced 1300 acres of land where large warehouses and manufacturing plants were built, including shipyards and steel foundries.

Here in the foreign trade zone of the port of Hamburg, inexpensive spirits from Russia and the Baltic nations were processed into liqueurs and colognes and then exported to other foreign nations without customs regulation or tariff. Except for the operation of this free trade zone the processing of these spirits within the port of Hamburg would not have been possible for Germany exacted on exceedingly heavy import duty on cheap spirits.

Among the many foreign products processed in the Hamburg foreign trade zone were British razors which were first expertly honed and then reshipped to the United States free of all German tariff regulations.

Copenhagen

During the year 1894, a foreign trade zone was created in the great Harbor of Copenhagen With its modern machinery and new port facilities it was claimed that this Danish port provided the cheapest and fastest port of entry in Northern Europe, in addition to its fame as the most convenient trade center serving all Baltic trade channels.

Differing from the usual practice the operation of the free trade zone was placed in the hands of a privately-owned operating firm which made all arrangements for the handling of cargoes including cleaning, packaging and reshipping to other ports. Although the manufacturing of products was permitted within the zone, this operation could be conducted only under the strict supervision of the Public Works Minister. Under the plan of operation importers and exporters were also allowed to rent warehouse space.

Danzig

As a step in meeting the competition of other major European ports operating foreign trade zones, the commercial city of Danzig established a free port facility during the year 1898 Outstanding features of the Danzig operation were unlimited storage periods on goods stored within the zone and the general processing of cargoes except manufacturing.

Foreign Trade Zones in Other Major World Ports

Germany

Germany was particularly active in the establishment of foreign trade zones within her major seaports, recognizing early their value in building trade volume and port income. In addition to Hamburg and Bremen, zones were set up in Emden, Brake, Bremerhaven, Cuxhaven, Geestermunde, and Steltin.

Sweden

Following World War I zones were created in Stockholm (1919), Gothenburg (1922) and in Malino during 1922.

Finland

During 1927 construction was begun on a foreign trade zone within the port of Hango.

Great Britain

To better serve the needs of her far flung empire and in order to better carry out the shipment and speedy trans-shipment of both British and foreign goods, Great Britain established zones within the ports of Singapore, Hong Kong, and Penang.

Portugal

Off the coast of China, tiny Portugal built a free zone at Macao.

Balkan States

During the period 1719 to 1891 a free port area was successfully operated in the port of Trieste and continued in operation following the transfer of the port to Italy following World War I.

II. FOREIGN TRADE ZONE ACT OF THE UNITED STATES

(Authored by Rep. Emanuel Cellar of New York)

The act was passed by Congress, June 18, 1934 (48 Stat. 998, 1001). It created a Foreign Trade Zone Board, consisting of the Secretary of Commerce, who is the chairman and executive officer, the Secretary of Treasury, and the Secretary of War.

The board has the authority to grant to public and private corporations the privilege of establishing, operating and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States; to prescribe rules and regulations; approve rates and charges; impose fines not to exceed $1,000 per day for violations of the act.

Where harbor facilities of any port of entry in the state are owned and controlled by the state, and where harbor facilities of any other port of entry in the state are owned and controlled by a municipality, grants to public corporations will not be approved by the board unless such applications have been authorized by an act of the State Legislature.

Before a grant is made, an economic survey must demonstrate to the satisfaction of the board that the anticipated commerce, benefits, and returns, both direct and indirect, will justify its construction to expedite and encourage foreign commerce.

Financial ability must also be shown to the board's satisfaction.

The physical facilities in the operation of the zone are as follows:

A. Where Zone Be Adjacent to Water

1. Adequate slips to accommodate vessels engaged in foreign trade.

2. Wharves and docks suitably constructed for the needs of the specific commodities to be handled over them.

3. Mooring facilities for the protection of vessels while loading, unloading, or awaiting berth.

4. Transit sheds on the wharves for the protection of goods accumulated for shipment or unloaded and awaiting disposition.

5. Warehouses so constructed and located as to meet the requirements of goods to be stored and the special regulations of the Treasury Department to safeguard the revenue.

6. Transportation connections with systems serving surrounding territory and other parts of the United States, so arranged as to permit of proper guarding and inspection for the protection of the revenue.

7. Fuel facilities for servicing vessels with coal or other fuel, with adequate reserve storage spaces.

8. Light and power facilities throughout the zone, on the wharves and docks, and to meet any special requirements of the Treasury Department in safeguarding revenue.

9. Water and sewer mains constructed to meet approved plans for service and health protection.

10. Fire protection suitable for proper protection of zone and goods in storage.

11. Administrative and living quarters and facilities for the officers and employees of the United States, State, and municipality, whose duties may require their presence with the zone.

12. Adequate enclosures to segregate the zone from customs territory for the protection of the revenue, together with suitable provisions for ingress and egress of persons, conveyances, vessels, and merchandise.

13. Sanitary facilities and appliances to conform to federal and local requirements.

14. Adequate facilities for the disinfection and fumigation of merchandise as required.

15. Such other facilities as may be required by the board.

B. Where Zone Will Not Be Adjacent to Water

1. Warehouses so constructed and located as to meet the requirements of goods to be stored and the special regulations of the Treasury Department to safeguard the revenue.

2. Transportation connections with systems serving surrounding territory and other parts of the United States, so arranged as to permit of proper guarding and inspection for the protection of the revenue.

3. Light and power facilities throughout the zone, and to meet any special requirements of the Treasury Department in safeguarding the revenue.

4. Water and sewer mains constructed to meet approved plans for service and health protection.

5. Fire protection suitable for proper protection of zone and goods in storage.

6. Administrative and living quarters and facilities for the officers and employees of the United States, State, and municipality, whose duties may require their presence within the zone.

7. Adequate enclosures to segregate the zone from customs territory for the protection of the revenue, together with suitable provisions for ingress and egress of persons, conveyances, and merchandise.

8. Sanitary facilities and appliances to conform to federal and local requirements.

9. Adequate facilities for the disinfection and fumigation of merchandise as required.

10. Such other facilities as may be required by the board.

III. FIRST FOREIGN TRADE ZONE IN THE UNITED STATES CREATED IN NEW YORK

The establishment of a foreign trade zone in New York is not a new idea. Importers and brokers mentioned it in 1888. Those interested in securing some legislation on the subject met strong opposition from westerners, midwesterners, and bonded warehousemen. The arguments presented by those opposing congressional action thought that the creation of a foreign trade zone would destroy or break down out tariff barriers.

In 1935, New York City's Mayor Fiorello LaGuardia, filed application for a permit to set up a city-owned zone.

The foreign trade zone in New York was constructed on Staten Island, and started to operate as a going concern in 1937. The first ship to enter the zone arrived from Mexico containing a cargo of chick peas. American employees immediately cleaned, sorted, sacked, and reshipped the peas to Central and South America and throughout the United States.

In 1938, New York was the forty-fourth foreign trade zone to be established in the world. The same year the City of New York contracted with and employed the New York Foreign Trade Zone Operators, Inc., to administer all the functions of the zone's operations.

During 1943, more than 5,000,000 pounds of cotton thread, valued at $6,000,000 were shipped from the United Kingdom to the New York zone and then redistributed to 26 foreign countries, including all of Latin America, Russia, and British West Africa.

In 1941, the City of New York received income of over $400,000 from the zone's operations. Customs receipts paid to the United States Treasury amounted to $2,888,000, income from cargo that might not have entered the port of New York were it not for the zone.

Tobacco interests of the Netherlands Indies built a large warehouse within the zone at a cost of $400,000 It is in this warehouse that the tobacco is inspected, cleaned and reshipped The foreign trade zone in New York has now replaced the tobacco center of Holland. Tobacco growers of Java and Sumatra find it more convenient to ship their cargo to Staten Island.

The net operating profit to the City of New York for 1943 amounted to $128,049.31.

In 1943, 194 different products from 51 foreign nations entered New York's zone. During this same year, distribution of products from the zone to 67 countries amounted to 39,234 tons valued at $35,000,000.

The New York Foreign Trade Zone Is Big Business

The following is a list of commodities handled at the zone in 1943, in order of importance:

Cotton thread	$4,533,731	Cotton piece goods	1,766,069
Watches	3,959,666	Sugar bags	943,500
Distilled spirits	3,480,844	Tobacco	729,543
Watch movements	2,855,223	Canned goods	519,346

Most of the foreign incoming trade came from Switzerland, United Kingdom, Mexico, Cuba, Egypt, Virgin Islands, British India, and Netherlands Indies.

The majority of products leaving the zone were shipped to Cuba, Colombia, Chile, Belgian Congo, Venezuela, British West Africa, and Canada.

Other Activities of Zone

Brazil nuts are ripened, ventilated, sorted, cleaned, bagged, weighed and repacked.

Cotton and woolen pieces from the United Kingdom are examined, cut, sampled, and made ready either for shipment to the United States or re-export.

Diamonds from South America are examined, graded, and repackaged for industrial purposes.

Drugs, grains, and seeds are cleaned and graded.

Tobaccos from Netherlands Indies are matured, reconditioned, sampled, weighed, repacked, and auctioned according to the age-long custom of the Dutch.

Critical ores, including tungsten and antimony from China and South America, are classified, sampled, refined, mixed and repacked in drums of domestic manufacture. Prior to World War II we depended on Germany for refining and processing these vital ores.

By mixing and manipulating certain products special privileges may be gained. For example, Peruvian and Chilean peas may be split at the zone, which is an advantage, because duty on split peas is less than on whole peas.

The New York zone is prepared for future development. At present the Staten Island site contains 92 acres of land and water space. For future business, there are 25 acres held in reserve.

The only other zone in the United States was recently constructed in New Orleans. This port received its permit several months ago, therefore, we cannot expect visible success until it is given at least a year to operate.

Other ports have shown a keen interest in foreign trade zones. San Francisco has made application and will soon comply with all conditions of the act. Los Angeles City Council recently appropriated sufficient funds for an economic survey. Seattle and Galveston ports are looking forward toward developing foreign trade and eventually will make application to construct zone facilities.

IV. SAN PEDRO HEARING

Your subcommittee held a public hearing in San Pedro on December 3 and 4, 1945.

Representatives from San Diego, Orange County, Long Beach, San Pedro, Ventura and Santa Barbara appeared and gave testimony on the subject of foreign trade zones.

Mr. James MacDonald and Edwin Sandison appeared before your subcommittee representing the Los Angeles Harbor Development Committee and introduced as evidence a document directed to the Board of Harbor Commissioners of the Port of Los Angeles, submitted by the Foreign Trade Zone Committee, Foreign Trade Association of Southern California.

Your subcommittee feels that a reprint of this evidence will be of great value to the Members of the State Legislature.

To the Honorable Board of Harbor Commissioners of the Port of Los Angeles:

The undersigned desire to present to you for your consideration the following facts and matters, and respectfully request that you make application now to the Foreign Trade Zones Board for the establishing, operating and maintaining a foreign trade zone in the Los Angeles Harbor area under the jurisdiction of the United States:

In submitting this request, the undersigned realize that under present wartime conditions, it is difficult, if not impossible, to comply with the application requirements of the Foreign Trade Zones Board. However, the filing of an application now will give positive indications of the intentions of Los Angeles Harbor with respect to a foreign trade zone. We realize that actually establishing a foreign trade zone may be temporarily delayed because of military expediency but we feel much knowledge will be gained for future use through taking the initial step of filing an application. While all requirements for the operation of a zone cannot be met today, it is most timely that we lay the foundation by filing now. We wish to point out that very little expense will be incurred in the filing of an application at the present time, and as undoubtedly the permit would not be granted except for establishing after the war, no further expense would be incurred until then. With these thoughts in mind, and with a keen desire to cooperate and to assist in preparing the application, we present our ideas as follows:

Location

There are many locations in this area from which the commissioners and port authorities will be able to select a site, such as:

The present location of the Consolidated Shipbuilding Corporation in the West Basin at Wilmington; or the present location of the California Shipbuilding Company on Terminal Island; or the present location of docks of the United States Navy in the West Channel of the Outer Harbor Area in San Pedro.

Qualifications

At each of the locations suggested above the following conditions exist:

1. Deep water of sufficient draft to accommodate ordinary ocean vessels.
2. Excellent protection for vessels against storms and tides.

3. Sufficient space for berths for at least four ocean vessels at one time.
4. Accessibility to the Harbor Belt Line for railroad service with very little new track requirements. Also adaptable for trucking facilities.
5. Easily isolated by fencing on three sides, thereby segregating from customs area.
6. Ample space for berths for vessels and sheds for cargo alongside deep water.
7. Ample space for construction of buildings for living quarters, offices, warehouses, processing plants, etc.
8. Adequate space on the shore side for expansion of the zone area.

Facilities and Appurtenances

At two of the locations suggested above, concrete berths already exist; sheds of various sorts are on the properties which could be converted at nominal cost to suitable merchandise warehouses. The administration buildings could at small expense be converted into living quarters for government employees and for office facilities. Power and lighting facilities already exist; water mains and sewers are already installed.

Survey

In our opinion it is very unlikely that the uses of the zone will be brought out completely or satisfactorily through circularizing questionnaires by mail to hundreds of manufacturers in Southern California, because of the fact that comparatively few individuals are fully conversant with the privileges enjoyed in and the benefits derived from a foreign trade zone. However, it is possible some information along this line will be submitted to you, if desired, at a later date.

Management

We wish to point out that if Los Angeles Harbor is granted the right to establish a foreign trade zone, there are excellent possibilities of interesting a thoroughly responsible private corporation in accepting the responsibility of operating the zone at their risk. If this were accomplished the Port of Los Angeles could expect to benefit from the revenue of lease or rental of the zone area and from dockage fees of vessels and wharfage from cargo, promptly following completion of the zone facilities.

It is emphasized that the proposed locations are more than favorable in respect to economic administration and operation which, from a long range consideration, is of paramount importance. The opportunity for arrangement and construction to provide low cost accommodation of a wide range of commodities is exceptionally favorable, and it is beyond argument that if all classes of cargo are afforded service within the limits of the Foreign Trade Zone Act, with assurance of dispatch at competitive cost, the zone will receive the unanimous support of all interests concerned.

In General

A foreign trade zone, where foreign and domestic merchandise may be landed without application to customs laws, should be established in this area, because it would promote, attract and increase the flow of world commerce through the Los Angeles-Long Beach Harbor.

It seems certain that an area set apart with appropriate storage facilities into which cargoes may be brought, preserved, protected, cleaned, refined, mixed, graded, products matured and reconditioned, processed, repacked, labeled, placed on display in sample rooms for examination and inspection by customers, and where buyers may freely examine and sample the merchandise and from where it may be reexported or placed in the flow of domestic commerce without the payment of duties until domestic entry is made could not fail to attract much cargo in such a zone.

Of Proven Merit

The history of the successive creation of over forty free ports in Europe, where custom barriers obtained as here, argues convincingly for the benefits accruing therefrom.

Considerable pioneering has been done and it is reasonable to expect that the foreign shippers who have benefited by the European free ports and the New York foreign trade zone will utilize the facilities of such a zone once it is established here and properly publicized.

The success of Hamburg's free harbor prompted other European cities to establish like facilities. Such was necessary in order that they maintain their desired share of commerce and transshipment. So, too, must this area act if it is to compete with or progress in like proportion to the region which now enjoys a foreign trade zone successfully and profitably operating in this country and other areas which bid fair to create like zones when the demands of the war relinquish appropriate space and the shipping situation will again permit the normal flow of commerce.

The vision, effort and fortitude of the passing generation gave to this area its harbor. May we not be expected to make a sufficient effort to the end that its facilities be expanded to stimulate and justify an increase of commerce entering its portals, commensurate with the growth of this community and its increasing influence upon merchandising and industry throughout Southern California and, indeed, the western states

Who Will Use the Zone

The following will undoubtedly be among the first to use the zone:

Importers

Foodstuffs, including spices, canned meats, fruits and vegetables, dried fruits, peas and beans, dairy products, etc., etc., when a condition exists due to which entry into the United States would not be permitted, could be reconditioned, purified, recleaned or segregated so that the quality was passable; or if unlabeled or improperly labeled, the containers could be placed in an acceptable state.

Drugs and pharmaceutical products, when contaminated or impure, etc., could be purified to pass federal requirements.

Beverage importers could rectify whiskey, bottle, filter, blend, recork all sorts of alcoholic beverages.

Ferrous and nonferrous ores could be purified, concentrated, leached, etc., to escape paying duty on impurities for which the duty is not intended.

Lumber could be graded with undesirable portions reexported or destroyed.

Seeds of all sorts, could be recleaned to remove noxious weed seeds so as to comply with stringent state and government requirements.

Imported watch mechanisms could be fitted into United States manufactured cases and reexported.

Edible nuts, such as brazils, could be warehoused until the normally heavy shrinkage in weight had taken place, then entered for consumption in the United States on payment of duty only on the approximate marketable weight.

Vegetable oil could be blended and then entered at more desirable rates of duty.

Oilseeds which are sometimes condemned for filth could be recleaned and then entered.

Wearing apparel could be labeled and sorted for entry and reexport.

Tobacco could be auctioned for subsequent entry into the United States or for transshipment to other markets.

Local Exporters

Parcels of merchandise from various sections of the world could be consolidated or combined for shipment in a full cargo to other foreign ports. Foreign goods could be repacked or regrouped with domestic goods for reexport to other foreign markets.

Some of the reasons for and benefits which will accrue from its creation are:

The Reasons For and Benefits Accruing From Its Creation

(a) It would encourage large consignments of goods to enter our port for storage and distribution without custom supervision and the delays and expense attendant thereon, and without limitation as to the time during which it may there rest without the payment of duty or the furnishing of a customs bond. Without such a zone foreign merchandise may be held for but a year without a bond in twice the amount of the duty being posted or the payment of the duty (subject, of course, to drawback).

(b) Nonmerchantable goods may be reconditioned before customs appraisal and goods which cannot be brought up to the standards of our Pure Food Laws or those of other governmental inspection agencies may be destroyed or reexported.

(c) Foreign goods may be held on consignment for spot delivery without being subject to customs regulations and domestic products may be assembled, repackaged or combined with foreign products for export.

(d) Imports arriving improperly marked may be remarked to meet the customs requirements and thus avoid the imposition of penalties which would otherwise obtain.

(e) Imports under quota restrictions may be received in quantities exceeding the quota and held until the next quota period.

(f) Goods imported in bulk may be refined, cleaned, reconditioned, packaged, bottled and labeled prior to customs entry.

(g) Buyers from adjacent areas and states may examine the foreign merchandise here and may thus save transportation expenses to inland points on defective merchandise which would otherwise be returned to the seller.

(h) Because of the opportunity for examination, it would eliminate the payment of duties on substandard merchandise.

(i) It would provide an opportunity for importers to have their own showrooms and other required facilities established within the zone.

(j) There would be a saving of time and expense which would redound to the benefit of the importer, and eventually to the benefit of the consuming public by the elimination of delays due to the boarding of vessels by customs officers, interruptions in the docking and discharge of cargo, the cost of customs bonds and the fee of customs brokers, and the delay in waiting for customs papers and the usual delay in customs inspections of bonded goods before their loading or unloading. Goods are not required to be entered within 48 hours and nondutiable goods also may be taken into the zone, thus expediting the unloading.

(k) Goods in a foreign trade zone retain their import status, thereby protecting the import railroad freight rates. This is of especial value on nondutiable goods which would otherwise lose their foreign identity if warehoused at any location outside of a zone. The importer would be further benefited in that he would have the opportunity to segregate damaged cargo, to accumulate goods and make up carload overland shipments which take a like freight rate and which may have originated in various ports and to correct mismarked cargo.

(*l*) Transshipping would be stimulated. When the First World War ended the United States had the largest Merchant Marine in its history, and foreign merchants who had previously traded in European markets, shipped their goods to American ports for transshipment and reexport to other world areas. For several years the volume of this reconsignment trade taxed the facilities of our ports to handle it. However, as no plans had been made or adequate facilities provided to handle and service this windfall of commerce, the traffic returned to its former channels as soon as they were reestablished.

As most of the postwar ships will use oil for fuel, Los Angeles will develop into an even greater oil bunkering port, attracting ships from all world areas. A properly organized and operated foreign trade zone would provide a place where these ships may discharge and pick up cargo with minimum customs formalities to ship and merchandise, when calling for bunkers. In 1940, 500 ships in foreign trade called at Los Angeles solely for bunkers. Other than the possible limitation of supply, this might be readily increased to 2,500 ships in the trading era to come. Should each of such vessels carry a minimum of 100 tons for the foreign trade zone, it would mean an increase of 500,000 tons of cargo handled annually in the Los Angeles Harbor.

Here, again, the New York experience should be repeated on the West Coast. Reexport business at the New York foreign trade zone grew from 742 tons of reexported foreign merchandise in 1937 to 70,000 tons in 1940. There was a decline in 1941 and 1942, due to the war, and the tonnage was 24,194 and 31,237 tons, respectively.

(m) When markets are uncertain or when surpluses accrue, foreign shippers could consign merchandise to the zone for subsequent transshipment or for sale to the United States market.

(n) It would encourage foreign shippers to consign their goods to this area without a connecting vessel in mind, feeling safe because the

zone would be available for storage if a freight opportunity did not materialize immediately.

(o) It would also tend to a two-way cargo because of the fact that larger consignments would be brought into the port and those which were not consumed domestically would be accumulated and reexported in larger quantities, and would open new markets and sources of supply. There should be no reason why a foreign trade zone here would not enjoy a development similar to that experienced by a like zone in New York. There, in its first year of operation, only 21 countries sent 61 kinds of merchandise into the zone. By 1939 both the countries of origin and types of merchandise had more than doubled. In 1941, 70 countries sent 232 varieties of products into the zone. In 1942, despite withdrawal of a substantial part of the zone from commercial use, 174 different commodities from 51 foreign countries were received in the zone.

Perhaps the best example of a new development resulting from the establishment of a foreign trade zone was the transfer of the Amsterdam tobacco auction to the New York zone after the invasion of the Netherlands. In a letter to the Secretary of Commerce, the President of the Netherlands Indies Produce Corporation wrote: "If there had not been available in the United States a foreign trade zone where our tobacco could be stored and manipulated prior to actual importation, it would not have been possible to transfer the world tobacco market from Amsterdam to the United States. Without the storage facilities offered by the zone, the import duty of $1.50 a pound would have made the storage of such a large quantity of tobacco an impossibility."

(p) In addition, it would admit of the holding of foreign merchandise the character of which must be ascertained before it is determined whether or not it is dutiable. With respect to foreign merchandise that is dutiable, desired for domestic consumption, after processing, refining or cleaning, the duty is fixed at the time they leave the zone, which would be much less in some instances because of the shrinkage which would occur subsequent to their entry into the zone.

(q) It would also permit the accumulation of goods designed for reexport to be held for favorable markets.

(r) If appropriate facilities were provided in the foreign trade zone, it would eliminate the necessity of some of the additional freight terminals, the construction of which is now being contemplated.

(s) A substantial portion of the imports entering Los Angeles Harbor originates in the Philippine Islands. Because of their promised independence immediately after American reoccupation it is practically certain that customs duties will be in force in line with "most favored nation" precedent, or trade treaty based on that policy.

Close consideration by experienced importers of the major Philippine commodities exported to this Country forcibly suggests the material increasing advantage of a foreign trade zone.

(t) The publicity which would flow from the creation of a free port here would bring anew the name of Los Angeles to the world's remotest shipping office.

Only an area which had smoothly functioning up-to-date port facilities can enjoy a flourishing foreign commerce and draw to its portals world-wide products and shipping services. Furthermore, such facilities

must be continuously improved and extended, since a port's importance is definitely reflected in its accessibility and methods of cargo handling.

Surely Southern California, situated so advantageously and directly tributary to one-half of the world's population, should take immediate steps to enhance the value of its great harbor by applying now for the establishment of a foreign trade zone.

Men of vision and courage built the harbor, a project that had been instrumental in great measure in the growth, development and prosperity of this area. Should not the traders of today be assisted by every available means to keep this harbor in the spotlight of great world ports by the establishment of such a necessary facility? Those who use the harbor most feel this should and must be done.

Respectfully submitted.

FOREIGN TRADE ZONE COMMITTEE
FOREIGN TRADE ASSOCIATION OF
SOUTHERN CALIFORNIA
By W. D. FRASER, Chairman

V. SAN FRANCISCO HEARING

Your committee held a public hearing in San Francisco on March 25 and 26, 1946.

Neil Laidlow, San Francisco Port Manager, presented to your committee a clear and decisive case as to the plans of the Board of State Harbor Commissioners to establish a foreign trade zone at Islais Creek as soon as the conditions of the Foreign Trade Zone Act were met. He recommended that the act should be amended to permit manufacturing in the zone.

Among those who appeared at the hearing to make statements in support of the State Harbor Board's amendment to its application were: Vining Fisher, Manager, Down Town Association; A. E. Eichholz, Manager, World Trade Department, San Francisco Chamber of Commerce; Wm. E. Montgomery, Executive Director, China-American Council of Commerce and Industry; Don Fazackerley, Chairman, the 12-County Bay Area Maritime Committee; Gustave Gumbrecht, Chairman, Foreign Trade Zones Committee, San Francisco Chamber of Commerce; M. A. Cremer, Manager, Marine Exchange.

It was pointed out that business to be conducted at San Francisco's World Trade Center would be aided considerably by a foreign trade zone.

Early in 1944, the San Francisco Chamber of Commerce restated its long standing approval of the foreign trade zone principle and urged the local harbor commission to proceed with the establishment of the zone in San Francisco.

VI. RECOMMENDATIONS

The following recommendations are made by your committee, that:

1. A foreign trade zone be established in the ports of San Francisco and Los Angeles (San Pedro Harbor),

2. Appropriations be made by the State (on a matching basis) aiding the financing of such foreign trade zones,

3. An interim committee be created for the purpose of securing further information on the subject and report its finding of facts to the Legislature, and assist the ports in California interested in creating foreign trade zones.

Respectfully submitted,

VINCENT THOMAS
WILLIAM CLIFTON BERRY
FRED EMLAY

REPORT OF ASSEMBLY INTERIM COMMITTEE ON PUBLIC EDUCATION LETTER OF TRANSMITTAL

Your Assembly Interim Committee on Public Education appointed pursuant to the terms of House Resolution No. 212 of the Fifty-sixth Session of the California Legislature, submits herewith the following report covering its investigation of:

1. School housing problems in California.
2. State audit of school funds.

The committee wishes to thank the many individuals who submitted testimony, and desires to give special credit to Doctor Rolland Upton for arranging the committee hearings, and for the preparation of the report on the above-mentioned topics.

Respectfully submitted.

RECOMMENDATIONS

Your committee recommends:

A. Relative to School Housing

The committee recommends that state funds should be appropriated for the purpose of assisting needy districts in meeting their demands for school housing. Although the committee does not wish at this time to define "needy districts," it was thought that any definition would imply that a district had exhausted (or practically so) its effort to meet the need by both taxing and bonding itself to the legal limits.

The committee feels that the best possible source for these funds would be the general fund of the State Treasury. Should funds not be obtainable from this source, some of the committee members proposed two alternate methods of raising the money:

1. To terminate the money granted to cities and counties under the $90,000,000 bill (Chap. 20, First Extraordinary Session, Fifty-sixth Legislature—Postwar Unemployment and Construction Fund) as of a certain date—such as January 1, 1948—all money remaining in the fund to be set aside for school housing purposes. The investigation by the committee determined that very little of this money was assigned to school districts by cities and counties despite the severe handicap that some of these districts were operating under insofar as housing was concerned.

2. To apportion a certain sum—for example, $10 per unit of A.D.A. —from the $30 per unit of A.D.A. which Legislature is given authority to use for equalization purposes under Proposition No. 3 which was approved on the November ballot. Funds from this source for a few years would probably overcome the deficiency in housing in needy districts.

The committee felt that a formula for the issuance of funds to needy districts should be determined by the legislature rather than leaving the matter to an administrative board. The committee further suggests the formation of a commission to administer the funds, consisting of the State Superintendent of Public Instruction, the Director of Finance, the Director of Public Works, a Member of the Assembly, a Member of the Senate. It was also suggested that this committee be given adequate funds with which to carry on their functions:

B. Relative to State Audits

1. The committee determined that there was no need for an audit of average daily attendance, feeling that adequate safeguards now exist. The committee did ascertain that there were some spots where checking might be effectively done, such as in evening school enrollments, but felt that a general audit of A.D.A. would be too costly for any general good that might be accomplished by the audit.

2. The committee recommended that school districts be divided into two groups for the purpose of a financial audit. The first group to include all districts that spend annually $100,000 or less, that the audit in these districts be conducted by the county auditor or local auditing firms employed by the district. If the county auditor is the agency which the Legislature decides to do the actual auditing, it is the committee's recommendation that the cost of such audits be charged against the several school districts on a basis proportional to the amount of funds audited.

In districts spending in excess of $100,000 annually the committtee recommends that school districts be given the choice of employing (a) a local independent auditing firm, or (b) to enter into a contract with the county auditor. In the latter case the audit would not be mandatory upon the county auditor but would arise solely by a contract entered into by the district and the county.

The auditing of the county superintendent's office is now conducted by the county auditor and it is your committee's recommendation that that office should continue this practice.

The committee recommends that in all finance audits that it include all school funds—federal, state, local, escrow, cafeteria, student body and other miscellaneous funds—that may exist. It is further recommended that the audit should check all financial transactions, including verification of transactions, an examination of supplies and equipment inventories, and suggestions for the improvement of accounting procedure and examination for possible fraud. The committee believes that the definition of the type of audit to be conducted should be set up by statute.

The committee recommended that a copy of the audit report be filed with the county superintendent and the State Superintendent of Public Instruction.

The inquiries made by the Assembly Interim Committee of the California State Legislature in 1946, had a twofold purpose. The first was to study the adequacy of the present system of auditing school attendance records and funds. The second was to inquire into the status of public school housing in California and to secure as representative a sampling of school building needs and problems as it was possible to do in a brief period.

Because the committee wished the studies to reflect the situation in all parts of the State, hearings were conducted between the dates of October 7th and October 22d in eight different cities. Seventeen counties were represented at these hearings. A great amount of verbal testimony was heard and hundreds of pages of supporting data were received by the committee. The following is a list of the hearings held with places of meeting, chairmen, and counties represented:

Meetings of the Assembly Interim Committee During October, 1946

I. Bakersfield—October 7, 1946, 2.30 p.m.
Place of meeting: Desert Room, Hotel El Tejon.
Chairman: Dr. Leo B. Hart, Superintendent of Schools, Kern County.
County represented: Kern.

II. Fresno—October 8, 1946, 2.30 p.m.
Place of meeting: Fresno City Schools Administration Bldg.
Chairman: Mr. Walter G. Martin, Superintendent of Schools, Fresno County.
Counties represented: Fresno, Tulare, Madera, Kings.

III. Modesto—October 9, 1946, 2.30 p.m.
Place of meeting: Conference Room, Public Library.
Chairman: Mrs. Margaret L Annear, Superintendent of Schools, Stanislaus County.
Counties represented: Stanislaus, Merced, San Joaquin.

IV. A. Ventura—October 14, 1946, 10 a.m.
Place of meeting: Ventura Junior College.
Chairman: Dean Triggs, Superintendent Ventura County (Ventura County only).

IV. B. Santa Barbara—October 14, 1946, 2.30 p.m.
Place of meeting: Board of Supervisors' Room, Courthouse.
Chairman: Mr. Caywood, Superintendent of Schools, Santa Barbara County.
Counties represented: Santa Barbara (San Luis Obispo County also invited).

V. Salinas—October 15, 1946, 2.30 p.m.
Place of meeting: Board of Supervisors' Room, Monterey County Courthouse.
Chairman: Miss Gladys Stone, Superintendent of Schools, Monterey County.
Counties represented: Monterey, San Benito.

VI. San Jose—October 16, 1946, 2.30 p.m.
Place of meeting: Room B, San Jose Civic Auditorium.
Chairman: Dr. O. B Hubbard, Superintendent of Schools, Santa Clara County.
Counties represented: Santa Clara, Santa Cruz.

VII. San Diego—October 21, 1946, 2.30 p.m.
Place of meeting: County Service Building, 1255 University Avenue, San Diego.
Chairman: Dr. John Carrol, Superintendent of Schools, San Diego County.
County represented: San Diego.

VIII. Santa Ana—October 22, 1946, 2.30 p m.
Place of meeting: Board of Education Room, Santa Ana City Schools, 1415 French St., Santa Ana.
Chairman: Linton T. Simmons, Superintendent of Schools, Orange County.
County represented: Orange.

This digest of the hearings is divided into three sections. The first deals with the inquiries of the committee into the subject of school audits, the second contains the summary of testimony and discussions on school housing, the third is a report of the hearings by counties.

STATE AUDIT OF SCHOOL FUNDS

In its investigation of the audit of school funds the Assembly Committee on Public Education concerned itself primarily with two aspects of the problem. These were, (1) the methods by which school districts compile and report the attendance of pupils for state apportionment purpose and (2) the methods by which public school funds are audited and expenditures accounted for.

I. Audit of Attendance Records

At the hearings conducted by the committee, exhibits of forms used in reporting attendance were studied. These included forms adopted by the State Department of Education as well as forms adopted locally to

facilitate the reporting of attendance. Presentations were made by school administrators, teachers, and school employees describing the manner in which these forms were used and the safeguards taken to insure the accuracy of the attendance data reported.

State forms. The basic record of school attendance for elementary schools is California State Department of Education Form No. J-32, known as the State School Register. This is a 28-page book providing space for recording attendance of pupils for 12 school months. The instructions which are a part of the register provide for the reporting of attendance in units as small as 5 percent of a school day. Absence is reported in two classifications, (1) absence due to illness and (2) absence for other reasons.

In addition to the attendance data the teacher keeping the record is required to record the number of days in each month on which school was actually open, the grade of the pupil, and the date of his birth, the name of the parents or guardians, home address, and the teacher's recommendation as to promotion or retention of the pupil at the end of the term.

There are two pages of instructions to the teacher as to the details of keeping the attendance record and five pages which quote the Education Code of California and the Rules and Regulations of the State Board of Education, not only on matters pertaining to the keeping of attendance records, but on the subject of the rights and duties of teacher and pupils as well.

The final page of the form provides for the compilation of the year's attendance record by the teacher. In submitting the final report the teacher is required to take the following oath.

> "I solemnly swear (or affirm) that this state school register has been kept as required by law and by the instructions of the Superintendent of Public Instruction, and that in my annual report to the principal or superintendent of schools I have given an exact transcription of the annual report which appears on this page and of the supplemental register sheets attached hereto and made a part hereof."
>
> Signed_____
> Teacher

The oath may be taken before a notary or an authorized school official.

The annual report referred to in the foregoing oath is California State Department of Education Form No. J-16. It is largely a reproduction of the final page of the school register. This form also requires an affirmation on the part of the teacher as to the accuracy of the records kept and the additional statement that no unlawful attendance has been included.

Elementary school principals compile the reports of each teacher in the building on California State Department of Education Form No. J-18 and take a similar affirmation as to the accuracy of the data and the fact that no unlawful attendance has been recorded.

City and district superintendents use California State Department of Education Form No. J-24 to report the compiled attendance figures from the various elementary schools of their districts. Again an oath is

taken attesting to the accuracy of the data and the absence of unlawful attendance. County superintendents use the same form in reporting the district totals to the State.

California State Department of Education Form No. J-13 is used to report absence due to illness on a monthly basis for each school district in a county. It provides a code for reporting major causes of illness and is attested to by both the local health officer and the county superintendent of schools. This form provides the basis for any requests which may come from districts within the county for an adjustment in the A.D.A. figures for the previous year due to epidemic illness.

There is no state prescribed form to be used by classroom teachers in high schools for the recording of pupil attendance. Teachers are permitted to use record forms adopted in their own districts which are in line with local schedules and usages. The form, of course, must be adequate to furnish all the data required.

In reporting attendance of districts to the State Form No. J-20, which is similar to the elementary form No J-18 is used. Another form, No. J-29 approved Aug. 1, 1928, by the State Department of Education is used by some districts. Annual report forms for high schools are similar to those used by the elementary schools.

Local forms. Almost all county school superintendents require a monthly report of attendance from both elementary and high school districts. These vary somewhat in each county but all perform the functions of securing month by month data as to pupil enrollment and attendance in the county and providing for a check against which the attendance reported on state forms at the end of the year can be made.

Many of these forms also father attendance data, useful locally but not required by the State. Fresno County, for instance, asks for enrollment by race. Some counties also ask for the number of cases of tardiness even when the extent of tardiness is less than 5 percent of the day and does not therefore affect the average daily attendance.

A large number of districts require the teacher to make a daily report of absence which is independent of that kept on the state school register. Some of these were submitted to the committee. These daily reports are used by the attendance department of the district in checking absences. They also provide a means of checking the accuracy of the registers.

Local systems of checking attendance. A number of local instruction sheets were submitted to the committee which had been prepared in order to assist teachers in making accurate attendance reports. These showed a high degree of care on the part of administrators in making sure that teachers kept accurate records of attendance. The instruction sheet used in the Monterey Adult School, for instance, gives minute directions for the recording of fractional days attendance, the reporting of veterans attendance, and the collection of data that might pertain to eligibility such as the age of the student.

Verbal testimony was also received as to methods followed in checking attendance registers. In most cases those giving testimony cited standard practices which were intended to eliminate or hold to a minimum any error in reporting. An example of such a method is that in checking state school registers. The principal checking the teacher's record at the

end of each month can quickly add the total of all four attendance columns, and divide this figure by the number of days school was actually taught during the month. The result should equal the number of names on the roll for that month. If it does not, the teacher knows that there is a mathematical error in the report and can proceed to find it.

Another method frequently used is to check the absence reports submitted to the attendance department against the absences reported on the register.

Apportionment of state funds. The reports of attendance from each district are submitted to the State Department of Education through the county superintendents of schools and are there compiled on a state-wide basis. The amount required to be set aside for state subventions as determined by the Constitution and subsequent legislative action is then computed and the apportionment for each district determined. The apportionment is delivered to each school district in 10 equal installments corresponding roughly to the 10 school months most of the schools of the state are in operation.

Audit of attendance reports. At each hearing of the committee testimony was heard on the subject of the possible necessity for a state-wide audit of attendance reports. A number of arguments were advanced both in favor of and against such a requirement. These are classified as follows.

Arguments in favor of a state-wide audit of school attendance figures.

1. Since state subventions to districts are on the basis of average daily attendance reported, the figures reported are, in effect, actual claims against the tax funds of the State. It might be argued that such claims should be audited.

2. From time to time, isolated instances of fraud have been discovered in the reporting of attendance figures.

3. There are some circumstances in which the personal advantage of a school employee may create a temptation to report such records incorrectly. Example of such instances are: (a) A small rural district where the attendance has dropped to a point where the law requires it to lapse. (b) An adult education class in which attendance has dropped below the figure set by district policy as sufficient for continuation of the course.

4. While each county grand jury has the authority to investigate attendance records, many of them do not, or if they do it is only to investigate a complaint. A state system of such audits would insure regularity in the investigation of the accuracy of attendance reports.

Arguments against a state-wide audit of school attendance figures.

1 The adequate system of reporting attendance, the evident care used by the average school official in compiling reports, and the system of checks which are already a part of the attendance reporting system indicate relatively little need for an audit of this type.

2. The cost of such an audit would be very great in relation to the number of instances of error or fraud likely to be discovered.

3. The system of records in use provide for an accurate reporting system once the original record of each child's attendance has been entered. There is a possibility of error at this point but the only "audit" which could actually verify the accuracy of the teacher's original entry would be the presence of an auditor in the room at the time the entry is made. This is obviously too costly except in occasional instances of spot checking.

4. The temptation to falsify attendance records is slight as no school employee can profit directly from the falsification of such reports. Indirect profit to the individual in most cases is extremely remote and the few instances where the indirect profit might be a temptation (such as a district about to lapse or an adult class about to be discontinued) are of such a nature as to be readily recognized.

Typical comments by school officials testifying before the committee follow:

(a) "So far as auditing the records on average daily attendance, they are being checked by the county office now each month, but the grand jury could have the average daily attendance records audited if they felt that there was illegal recording going on, or they could check for irregularities as they saw fit.

"Personally I do not feel that there would be a great deal to be gained by trying to falsify average daily attendance records, and a continuous check as is now being done certainly should show any great deviation from a normal increase and anyone could certainly check any illegal practices without much trouble."

Superintendent M S Gauer, Anaheim School District.

(b) "If an audit of these (average daily attendance) records is done, it is my opinion that . . . the districts should be divided into larger and smaller, the dividing line being 850 A.D A. as now is the case in tenure. The smaller districts could be audited by the county superintendent of schools, and the larger districts by special auditors from the State Department of Education."

Mr. Harold Yost, Business Manager, Santa Ana City Schools.

(c) "The teachers in the Monterey public schools are constantly impressed with the importance of keeping attendance records that are accurate and in strict accordance with the California Education Code. Each classroom teacher keeps a state school register, the register is checked at the end of each month by the principal, and attendance records are recorded monthly at the central administrative office. Annual reports prepared by the teacher are checked by the principal and the principal's reports are checked by the staff of the central office The attendance figures for the entire year are calculated in two distinct methods, which serves to prove that the figures are correct."

G. T. Goodwell, Superintendent of Schools, Monterey.

(d) After a detailed account of a careful precedure for checking attendance records submitted by teachers, a report from Stockton City schools adds the following:

"Once each month a spot check of teachers' registers is taken by the head of the attendance office, and any inaccuracies discovered are not only discussed with the building principal, but also with all principals at the monthly principals meeting that follows."

Mr. Hill the superintendent, then offered the following comments as an expression of his own opinion:

"Aside from minor arithmetical errors in the computation of A.D.A. figures, I have never come in contact with any attempt in any city I have been connected with, i.e., Santa Maria, Palo Alto,

San Jose, and Stockton, to falsify A.D.A. figures. In these situations, excepting for certain night school classes, there is no pressure on the teacher.

"I do not believe the State could afford to pay for a yearly A.D.A. audit. The best we could hope for would be spot checks.

"If such an audit is to be made, our school board hopes the responsibility will be placed in the State Department of Education."

Andrew P. Hill, Superintendent of Schools, Stockton.

(e) "Our attendance records are kept by classroom teachers in the school registers. Each register is audited by another teacher and checked by the principal."

Raymond J. Fisher, District Superintendent, Los Gatos.

(f) "I believe the reports from my school are accurate. At the first day of school each teacher is given a breakdown of her day. The day is broken into 20 periods, and the percentage for each period given her. Each teacher is instructed to keep accurate record of her attendance. At the end of the month her register is totaled and sent to the office with a completed mimeographed form prepared by the office. The monthly teacher's reports are compiled into one comprehensive monthly report which is proved and filed in the office."

Mr. O. Del Reschke, Principal Franklin School District, San Jose.

(g) "The matter of auditing attendance records would be difficult because of lack of uniformity of keeping such records in the various high school districts. However, I am sure that each person responsible for the keeping of such records is conscientious and honest and certifies only to correct figures as far as average daily attendance is concerned."

Harry E. Tylor, District Superinendent, Santa Maria Union High School District.

(h) "It seems to be the opinion of the superintendents and principals present at our meeting that the auditing of school attendance would be very costly. They seem to think that the cost would be more than any gain the State would make by uncovering errors in the computation of such attendance."

Gladys Stone, County Superintendent, Monterey County, in a letter of summary of the Monterey County hearing addressed to Mr. Beck.

Summary of testimony on audit of A.D A. From the exhibits and testimony presented it was clear that adequate forms and procedures exist for the accurate reporting of school attendance figures to State Department of Education.

While opinion was not unanimous as to the need or advisability of a state audit of attendance reports the great majority of school people questioned felt that the cost would be out of line with beneficial results to be gained.

II. State Audit of Public School Funds

There are many types of school districts in California varying in scope from small rural elementary districts to city school districts. Even the latter group differ in the complexity of their organization.

The range of annual expenditures of these districts goes all the way from two thousand dollars to eighty million dollars. One factor however, is common to all. Each school district in California receives money from the State Treasury.

This fact raises a question as to the responsibility of the State to make sure that the funds it pays out through subventions are honestly spent for the purpose for which they were appropriated. With this in mind the Assembly Interim Committee on Education in its hearings throughout the State, sought the opinions of educators and noneducators as to the adequacy of present auditing practice and the possible need for audits conducted by some agency of the State Government.

Facts which bear on state audit of school funds. Out of the testimony and discussions which took place at the hearings and from documents* submitted to the committee, a background of facts and generally accepted viewpoints which pertain to this problem have been assembled. These are as follows:

1. Accounting and auditing are different and should not be confused. The basis for accounting is reporting while auditing merely verifies the adequacy and truthfulness of accounting.

2. There is a distinct difference between internal and external auditing and one cannot be substituted for the other.

3. Auditing for fraud is only one purpose of an audit.

4. Auditing alone may discourage but does not necessarily eliminate fraud.

5. Auditing is expensive and it is probable that the cost of a state audit of school funds would greatly exceed any savings to the State which might accrue therefrom.

6. A complete system of auditing public school funds must include not only state funds but local funds, cafeteria funds, student body funds, and such trust funds as those necessitated by student bond purchases. A state-administered system of auditing may not have legal authority to audit all types of local funds and would not therefore be a complete auditing system.

7. There is no central or state-wide interpretation of school fiscal law since such interpretation is placed in the hands of district attorneys and county counsels. This variance in opinion would make it difficult for a state auditor to compare the practice of one district with that of another.

8. While there are more than 3,000 school districts in California less than 5 percent of these districts spend approximately 95 percent of the school revenue. In any consideration of state auditing of school funds it would therefore be logical to consider large and small districts as separate problems.

9. Audit of school funds is taking place throughout the State at the present time with varying degrees of thoroughness. Agencies performing this function to a greater or lesser degree are:

(a) County superintendents of schools.
(b) County auditors.
(c) County grand juries.
(d) Outside auditors and C.P.A.'s employed by districts.

* One document which should be specifically acknowledged in this connection is the report of the committee on audits of the Association of Public School Business officials of California.

Advantages of a state audit. A number of opinions were expressed at the hearings which set forth the advantages of a state audit of school funds. Foremost among these was the obvious one that the State would thus be performing the function expected by the taxpayers of safeguarding public funds. While it must be admitted that such a practice if applied annually to all districts would be extremely expensive it is nevertheless true that it would assure an audit of all state school funds in all areas including many where auditing practice could unquestionably be improved. Spot audits were frequently suggested as a compromise which might not be too costly while still recognizing the State's obligation. Another advantage to be derived from a state audit is the encouragement it would lend to good practice throughout the State. The state auditors would not only encourage good accounting practice by the very fact of their existance but they would doubtless be able to suggest and promote improvements in accounting procedures at the time of their visit. A third and perhaps the most valuable advantage of state audits would be the tendency to create and maintain uniform accounting practice throughout the State. This could not be accomplished by the audit alone but the audits would lend encouragement to uniformity.

Difficulties of a state audit. Many of the difficulties of a state audit have already been touched upon. The following list summarizes briefly those already mentioned.

1. A state-wide audit would be costly.
2. There is probably no legal basis for a complete auditing system by the State.
3. There is no central interpretation of school fiscal law.
4. Machinery for auditing school funds is already set up through the functions of the county school superintendent, county auditor, and grand juries, with the possibility of a district employing an outside auditor.

Another difficulty pointed out was that it was questionable whether either of the three officers of State Government to which the task of auditing school accounts might be assigned could expand his staff rapidly enough to do a thorough job. The three possible officers mentioned were (1) Superintendent of Public Instruction, (2) State Controller, and (3) Director of Finance. It was pointed out in this connection that there is an undersupply of competent auditors.

Points advanced against advisability of state audits. It was pointed out that except in extreme and unusual circumstances all state school funds are earmarked for salaries of certificated personnel. Prior to the passing of Proposition No. 3 at the November election, state laws required that approximately 80 percent of all state funds be spent for this purpose. As a matter of actual practice almost every district has spent the entire state apportionment, plus additional local funds, for salaries of certificated personnel. This can be readily seen from the fact that while state funds prior to 1947 comprised about half the financial support of the average district, few school districts spend less than two-thirds of their budgets for salaries of certificated employees. Often the proportion is as high as 75 percent.

From the above facts it was argued that auditing of school accounts is a local function rather than one of the State. Once the requirement

governing the expenditure of state funds for certificated salaries has been enforced, the State's interest in school expenditures is relatively much less than that of the district.

A second argument against the necessity of state audits is that adequate machinery already exists for this function without intervention of the State. Those who advanced this argument pointed out that the county school superintendents and county auditors pass on all school district expenditures. The county grand jury has the authority to audit the books of any district as well as those of the county offices which pass upon their warrants. While it is true that many county grand juries are anything but aggressive in exercising this function the same thing might well be true of a state office charged with the responsibility. This would be especially likely if limited funds were appropriated to carry out the assignment.

Still a third argument was suggested by the practice of many city school districts in employing outside auditing firms to examine their accounts. Such firms have the advantage of state auditors in their freedom to audit student body funds, cafeteria funds and other district accounts. Moreover it was argued that the validity of an audit is increased if the practice of changing auditing firms at specified intervals is followed. This can be done when outside auditing firms are employed, an advantage which would be lost should a state department take over the assignment as a permanent responsibility.

Suggested auditing practices. In addition to the auditing practices discussed two alternate suggestions came out of the hearings. These are herewith presented.

1. Setting up auditors in county superintendents' offices

Testimony at the hearing held in San Diego October 21, 1946, revealed the high regard in which the auditing service furnished by the county superintendents to smaller districts, is held. Under this plan a field business service is supplied the cost of which is paid by county general taxes. A description of the service as taken from the report of the National City schools follows:

> "Field Business Services provided by the business office of the County Superintendent of Schools of San Diego County.
>
> A. Assisting in the selection of new bookkeepers for school districts.
>
> B. Installing uniform accounting systems relating to school districts, cafeteria, and student body activities. Uniform accounting installations have been made in 56 of the 73 school districts of San Diego County. This represents 77 percent of all the school districts. The other school districts have accounting systems which were set up prior to our initiation of the uniform accounting system. We believe that over a period of time we will be asked to install our uniform accounting system as set up in accordance with the recommendations made by the Accounting Committee of the California Association of Public School Business Officials.
>
> C. Auditing books and records relating to school districts, cafeteria, student body, pupil accounting, pupil personnel and attendance activities.

D. Conferences with local auditors for the purpose of acquainting them with the pertinent sections of the Education Code, Political Code, Revenue and Taxation Code, and Government Code which have a bearing on auditing procedures to be followed in school districts. Before this field service was given, many audits were made by independent local auditors and procedures approved that did not conform to the provisions of the above indicated codes.

E. Conferences with new clerks of boards of trustees in small districts who maintain the accounting records of the school districts.

F. Assistance is offered in preparing applications for federal or state financial aid for maintenance and operation, school building planning, and school lunch financial aid purposes.

G. Conferences relating to the administration of the school budget for the current year as well as the preparation of the school budget for the next succeeding school year.

H. Preparing statistical and financial data requested by the governing boards of the 73 school districts in San Diego County. These data are used in launching new programs such as issuing school districts bonds or increasing the statutory tax rate.

I. Assisting with special accounting problems resulting when one school district educates all of the children residing in another school district.

J. Assisting governing boards of school districts in planning a complete insurance program."

2. Dividing districts into size groups

One group of school business officials brought out the recommendation that districts be divided into two groups (1) those who spend annually $100,000 or less and (2) those that spend in excess of $100,000. The books of all districts in the first group would, under this plan, be kept by the county superintendent of schools and audited annually by a local independent auditing firm. The auditing firm would also be empowered to audit student body and cafeteria books of these districts. The costs of this audit would be charged against the several school districts on a basis proportional to the amount of funds audited.

In the second group of districts the recommendation calls for audits by local independent auditing firms, the cost of the audits to be paid from the funds of the district audited.

All financial audits, in the opinion of those making this recommendation, should include all funds—federal, state, local, escrow, cafeteria, student body, and miscellaneous.

Cost of auditing. Opinion varied somewhat as to the source of funds from which auditors would be paid for their services. In the case of a state-wide audit it might be assumed that sufficient money would be appropriated to finance the audit through the state agency doing the work. If the audit is to be made by an extension of the services of the county superintendent as in the case of San Diego County some question might be raised as to whether the service should be paid from county funds or whether a pro-rate assessment should be charged the districts which benefit from the service. In the case of audits made by outside

firms the general feeling was that this should be charged to the district ordering the audit. In this connection there is need for legislation which would clarify the district's right to contract for such service. The situation should not be allowed to arise where a district would incur such an obligation on the strength of a county counsel's opinion that it had a right to do so and later find the warrant for payment of the service held up by some other department of county government because of a question as to a district's legal right to incur the obligation.

Status of public school fund auditing in California. The Association of Public School Business Officials of California has recently compiled the results of a questionnaire addressed to county superintendents, and district superintendents on both the high school and elementary level. This questionnaire inquired into auditing practices of county school offices, cafeteria funds, high school general funds and high school student body funds. The results bear on the question under discussion.

Of 48 county school superintendents reporting 45 stated that their records were audited, three reporting that they were not audited. Of the 45 reporting audits 38 were annual, three were biennial, two were annual or oftener, two were irregular. County school superintendents reporting on 28 cities reported that the records of 13 were audited and 15 were not. Reporting on 47 rural districts only two had had their records audited while 45 had not.

High school district superintendents were asked whether or not their records had been audited. Of 65 who replied to the questionnaire, 24 reported that their records had been audited while 41 reported that they had not. Of the 41 who reported no audit, five stated that an audit was planned, 34 stated that no audit was planned while two did not reply The persons or firms named as conducting the audits are worthy of comment. Independent accountants were in the majority, 12 districts reporting the use of this service Five high school districts reported the audit as having been made by a member of the district staff. Two districts reported that the auditor had been appointed by the grand jury. Other audits were reported as being conducted by a trustee, the county auditor and by a firm named by the board of supervisors. Fees paid for auditing ranged from $10 paid to a staff member to $400 paid an independent firm to audit the books of a district where the annual expenditures were $63,900.

In auditing the cafeteria accounts the use of independent public accountants was much more prevalent, 60 high school districts and 63 elementary districts reporting as follows:

Type of auditor employed	*High school districts*	*Elementary districts*
Independent account	41	28
Member of district office staff	13	18
County office	3	6
Banker	1	0
Federal Auditor	2	7
State Auditor	0	2
County Treasurer	0	1
County Auditor	0	1
	60	63

Opinion Expressed at the Assembly Interim Committee Hearing in Los Angeles, November 25, 1946

The committee met to further discuss the matter of school audits on November 25th. Two presentations were made to the committee at this time which are herewith quoted in full:

AUDITING OF SCHOOL FUNDS

By D. Lloyd Nelson
Assistant Superintendent in Charge of Finance
c/o Superintendent's Office, Los Angeles

Resume of Points to be presented at Assembly Interim Committee on Public Education Hearing, State Building, Los Angeles, Monday, November 25, 1946.

As the representative of Dr. C. C. Trillingham, County Superintendent of Schools, Los Angeles County, California, I am pleased to appear at this important hearing. The following points are presented by our office trusting that the factual data will be of some assistance to the interim committee. We are pleased to make the following comments:

1. School people do not oppose impartial or unbiased school audits. In fact we welcome proper audits as a means of verifying the integrity of school board members and administrators.

2. School people do oppose audits which might be made by individuals or groups who would:

a. Desire to use this power to discredit public schools.
b. Gain external control of public education by wielding the tremendous power that may accompany auditing.
c. Use auditing as a technique to criticise curricular offerings and educational policies rather than the accounting procedures.

3. In this county the grand jury has delegated the auditing of city districts to the county auditor. Copies of the grand jury audits are given to our office, and we are pleased to make the following comments regarding these audits:

a. They have been impartial, honest, and fair.
b. They have stayed in the realm of financial matters, and have not digressed into curricular and educational policies which are not their immediate concern.
c. These audits, which are under the able direction of County Auditor Joe Lowery, have greatly improved accounting procedures in the school districts of this county.
d. The fact that the grand jury audits school districts leads to publicity in local newspapers which some times greatly mislead the general public. When the local newspaper headline reads: "Grand Jury to Audit Pasadena City Schools," the general public invariably gets the idea that something must be wrong in the schools rather than realizing that a routine check according to law is being made. This is most unfortunate.

4. Regardless of who may audit school districts, fraud will not be found except in minor and rare instances. We believe it is safe to say if fraud is found, the total amount involved will be far less than the actual

cost of the audits. However, there are other advantages in having audits other than discovering fraud. The verification of facts, improving confidence in the records, improving procedures, and giving a "clean bill of health" are definite outcomes of good auditing. The total cost of complete annual audits of districts would be prohibitive.

5. The committee should keep in mind that on each warrant drawn by a school district in Los Angeles County the signature of the county superintendent of schools as well as that of the county auditor must be affixed. This means that each of these two officers must carefully check attached itemized bills, ascertain if all legal requirements have been met, if necessary advertising for bids has been done, ascertain if materialmen and labormen's bond have been secured when required, if current funds are available, if budget control limitations have been satisfied, if all employees have been properly employed, and further check numerous minor technical items as required by law. Thus fraud is now kept to an absolute minimum.

6. If additional auditing is to be instigated in California, we feel that "spot" auditing of many districts would be superior to a complete careful audit in only a few. By "spot" auditing we mean the auditing of only a part of the districts each year rather than of all. The point is that fraud is most likely to occur in accounting for receipts, in handling cafeteria funds, in accounting for student body funds, and in one or two other categories. If a "test" audit is made regarding these items along with the usual check made by the county superintendent of schools and the county auditor, we firmly believe that 99 percent plus of all cases of fraud will be uncovered without doing three months' audit in each district.

7. It should be borne in mind by the committee that the Education Code now requires all school officials who handle funds to be bonded. This gives an excellent safeguard to each district. A 10-year study recently completed by the California Association of Public School Business Officials proves that fraud in public schools has been very rare.

8. Though we find no evidence of fraud in A.D A. reports made by the districts to the State, we would recommend that the State Department of Education be given several auditors who would devote their time to performing "spot" and "test" audits over the entire State so that:

a. Increased confidence would be gained in A.D.A. reports.
b. Some one would be available to readily audit "hearsay" evidence regarding cases where illegal attendance is supposedly claimed.

9. However, if there is to be additional auditing of school funds, we would like to call attention to the fact that the funds used by school districts are not just "state funds," but a large share of these funds are "local funds" raised by local taxation. Hence, it does not follow that any state agency should audit these "local funds" on the theory that they are "state funds."

10. We would like for your committee to seriously consider, if any additional auditing is to be done, that the following points should be kept in mind:

a. "Spot" audits will suffice in place of auditing all districts.
b. "Test" audits will suffice in those districts which are "spot" checked in place of complete audits

c. On the theory that we are not auditing primarily to reveal fraud but to improve procedures, we believe that any additional auditing of school funds should be performed either by the State Department of Education as an educational function of that office, or by each county auditor with stipulations that the county superintendent of schools shall be consulted and work with him regarding findings which have educational implications.

d. A third possibility would be to have commercial audits. Professional audits by competent certified public accountants would have some advantages which should not be overlooked, however, since the cost of such audits would no doubt be "thrown back" on the individual districts and the money involved would be considerable, we would regret having school funds expended in this manner when the above mentioned plans could well be used.

Past experience has demonstrated when auditing of governmental agencies is "put out on bid" that the most competent public accountants frequently will not bid They feel they cannot compete against those who will give very low bids but fail to render a high type of service.

11. Legislation on a permissive basis empowering the county superintendent of schools to keep the financial records for districts, which are not large enough to employ a district superintendent, might be advisable as a means of improving accounting procedures.

SUMMARY

In summary, if the purpose of auditing is to discover fraud, we believe the cost of any additional audits will greatly exceed the small amount of fraud which will be found in public school systems of California.

If the purpose of any additional auditing is to improve accounting procedures and for the betterment of public education, then either the State Department of Education as an educational agency or the county auditor, in consultation with the county superintendent of schools, should make such audits rather than the State Department of Finance or some other state agency which has no genuine concern with these "local funds."

Unfavorable publicity attached to grand jury audits should be eliminated in some manner, but such audits have been highly satisfactory in Los Angeles County.

We believe that commercial audits will not satisfactorily meet the problems regarding auditing of public school districts.

We believe the emphasis placed upon the need for additional auditing has been greatly exaggerated and that "status quo" is quite satisfactory when we consider the legally required checks made by the County Superintendent of Schools and the county auditor. However, school people do not oppose impartial audits and will gladly welcome the same as a means of showing the public "a clean bill of health" and inspiring public confidence in the way school funds are handled.

We believe it might be advisable to add a very small number of "A.D.A." auditors to the State Department of Education.

We believe it might be advisable to enact permissive legislation allowing county superintendents of schools to keep financial records for districts not large enough to employ a district superintendent.

We genuinely appreciate the sincere interest this committee is showing regarding our educational problems.

AUDITING OF SCHOOL DISTRICT FUNDS

By Harry Howell—Director of Budget
Los Angeles City School District

Those who are charged with the responsibility for the expenditure of public school funds are entitled to the protection of an external audit. While the regular rendering of accurate and understandable statements of the receipts and disbursements of tax monies tends to establish a confidence on the part of the public, it does not protect to the fullest extent those who are responsible for the administration of the funds. It is for this reason that I believe most school administrators feel that auditing is a desirable and necessary business procedure.

School districts in California have two main sources of income for current expenditures and capital outlays—state subventions and taxes on local property. There are also miscellaneous amounts received from the Federal Vocational Education Fund, child care center apportionments, veterans' fees, in lieu taxes from housing authorities, trust funds, cafeteria sales, and other smaller items. A system of audits should, of course, include all funds received and disbursed by the various school districts.

It is a fact that in practically every school district in California all of the state subventions, and more, are expended for teachers' salaries, and with local district taxpayers furnishing more than 50 percent of the total cost of the educational program, there is a dual interest to be satisfied—the State and the local school district.

An important factor controlling the amount of school subventions is the average daily attendance in the school districts. Pupil accounting as distinguished from fund accounting should therefore not be overlooked in any system of audits to be established.

The question naturally arises, what agency should do the auditing? On this point there is considerable difference of opinion. In a number of states the state department of education is authorized to audit and inspect the accounts of all public school boards. Likewise in many states, school accounts are audited by the regular auditing agencies of the state. Since it is required that these agencies make annual audits of other subdivisions of government, the same personnel is used for school auditing. The possible conflict between the regular state auditing agencies and the educational department of the state with respect to the limitations of the audit is one of great concern. If auditing is to be performed by a state-wide agency not under control of the State Department of Education, safeguards should be established so that the auditing agency does not develop policies or procedures inimical to good educational administration.

The Los Angeles City Board of Education has for a number of years distributed widely various financial and statistical statements giving accurate and understandable information about the Los Angeles City school system, such as:

1. Monthly and annual reports of receipts and expenditures of all funds.

2. Tentative and final school budgets.
3. Financial data booklets.
4. Monthly and annual pupil statistical reports.
5. Various reports on class size, teacher load, revenue comparisons, etc.

The Los Angeles City schools have had outside audits from time to time and have always welcomed them. There is a precedent for extending auditing to cover all school district funds in that the law already requires in Education Code Section 14741 that local retirement system accounts must be audited at least once every 12 months by the county auditor.

Finally, I should like to emphasize that it is my belief that school administrators as a group feel that a proper system of external auditing for funds and pupil accounting is a desirable and necessary business procedure that protects those who are charged with the responsibility for the expenditure of school funds

A letter from Rolland A Vandegrift, Legislative Auditor, was also presented to the committee. This expresses quite a different point of view and is herewith quoted in full:

I appreciate your writing me concerning the matter of the audit of educational expenditures in relation to the appropriation of State funds.

I am sorry that it is impossible for me to get to Los Angeles to attend your meeting. I have tried to arrange my program every way, but it happens that a meeting of the Budget Committee is set for November 25th and 26th. Of course, I must be there. In addition, the budget hearings are now on in which we participate actively and, we believe, with considerable results in forwarding the views of the Legislature and in securing information to report back to the Legislature when the budget is being considered by the various committees and in the two houses.

I am so pressed for time that I am not able to give you a well worked out statement supporting the proposition that there should be a complete audit by the State of expenditures for education which involve the largest state appropriations.

As you know, the Legislative Budget Committee had a bill in for this purpose at the last regular session of the Legislature. It passed through committees of both houses and was approved by the Senate and was on the floor of the Assembly but failed to get the necessary two-thirds vote. I am more than ever convinced that there should never be an expenditure made of public moneys which is not audited by an independent agency not controlled by or beholden to the expending agency. I have hundreds of examples of where money has been spent contrary to the appropriation, contrary to the intention of the Legislature, for other than state purposes, and spent in an irregular way in many forms. In fact, I have a case now where if it is pressed two supposedly respectable citizens of Sacramento might easily become free boarders at State expense in one of our penal institutions. The conversion of state money to their own use never would have occurred had there been a proper independent audit.

Due to the approval of Initiative Constitutional Amendment No. 3 on the November ballot, the State will now appropriate approximately $60,000,000 this first year more for educational support than it would have under the previous provisions. The amount to be appropriated will now be on the basis of average daily attendance in the several divisions

of our public schools, and, in addition, we now include the kindergartens. The basis of this appropriation, total amount of average daily attendance, in itself should be carefully audited by other than the receiving agencies, the schools or the Department of Education. I am quite sure that no one would pay a bill based on the number of units of something delivered, say, for example, 1,000 board feet of lumber, heads of cattle, or pounds of grain, without checking up to see if actually the quantities claimed to be paid for existed.

For this reason alone the average daily attendance reported should be audited, and it should be audited by the fiscal agencies of the State but not by the Department of Education whose normal tendency would be favorable to having as much money spent as possible. In fact, the Department of Education is the same department that in the past has on their own suggestion undoubtedly caused the average daily attendance figure to go over the basic unit in many instances, thereby adding additional teacher units for a major fraction thereof. This is just human nature, and the government must protect itself from the frailties of human nature. That is one reason why we have checks and balances and audits. Every other appropriation of the State based on units of measurement are audited by the Department of Finance and frequently again audited by the Controller.

In fact, if I were Controller of the State of California under the present law and duties of the Controller, which are general and not expressed in either the Constitution or the statutes, I would not insist upon making an audit of the average daily attendance before I would authorize any transfer of funds.

The appropriation for education which is fixed is even more complicated than merely an allocation on average daily attendance, for we now have in this provision for equalization of the funds which will appear in the next legislative enactment under the new fixed appropriation. This problem will be complicated as has been true in the past and money will be allocated to the various school districts and divisions of the public schools on the provisions of law.

Perhaps the Department of Education will apply them, but who knows if the Department of Education has done the job properly and fairly and equitably as between different school districts? Who knows that this has been honestly done, and that some influence has not come to bear on some one employee that has resulted in irregularities? The only way this can be answered is to have some independent auditing agency review the situation and either find the irregularities and have them corrected or give a clean bill of health. If the money has been honestly appropriated and honestly allocated, it seems to me no one should object to such auditing but should welcome it as a protection not only to themselves but to the integrity of the appropriation.

In addition to these very fundamental governmental procedures, the State will now have an even greater interest in how the appropriations, the money which it collects from all the taxpayers in the State, are being spent. The State will certainly be very much concerned to know if the provision of the law has been carried out which requires a certain set percentage of time be devoted to certain subjects. Has the Constitution been taught as required by law? Have the minimum number of hours of instruction been given in each and every school as the law requires in order to

properly earn the average daily attendance? In the equalization have all the facts as reported as the basis for securing additional funds been verified? Any irregularities in one district which gives them more money than they are entitled to takes money away from other districts, and if there are irregularities affecting the total, then more money goes out of the State Treasury than the law intended.

It seems to me that the Legislature has a duty to determine whether expenditures for education are securing as nearly a 100 percent return on the dollar as expenditures for fish and game, for our poor unfortunates in the institutions, for our courts, for our Public Utility Commission, and for every other state agency. Possibly the Legislature, with the facts before them, may wish to redefine average daily attendance. None of these things can be acted upon intelligently unless we have an independent audit which will show the true facts not colored by those who spend the money and not colored by those who are party to it, but by some fiscal agency that will seek out these facts without prejudice or favor.

I have been an educator and still claim to be. I am a product of the public schools of California, and I hold that we have one of the best educational systems in the Union. We spend more money for it than any other state, but we have many things that can be materially improved and should be improved. A conscientious educator will agree with me. I do not believe any educator in the public school system would condone or tolerate dishonesty. Therefore, it seems unreasonable to me that any considerable number of them should oppose the proposition of having an independent fiscal agency audit their expenditures to see what the conditions are and to act as a check preventing and/or correcting any irregularities or dishonesties that might possibly occur.

I have not taken time to tell you the amounts of money involved other than to say that this is the largest single appropriation that the State makes for any purpose. May I point out that it is now so large and of such a nature it comes out of the Treasury first before any money is available for any other purpose with the exception of bond interest and redemption, and it has no constitutional limitations on it, and requires no action of the Legislature to appropriate it, that as soon as financial conditions change for the worse the amount of taxes available for state purposes will be insufficient to meet the State Budget, and that other state expenditures will be in competition, one with the other. Should the pressure become great enough, there may be a reflex on the fixed appropriation for the public schools, particularly if such expenditures are not even subject to audit.

May I point out to you an auxiliary matter which may directly affect money available for education. At the present time some 22 cities are levying sales taxes, some as high as 1 percent. Should the combined rate of the State and cities exceed 3 percent materially, let us say, go to 4 or 4½ percent, a resentment may be built up so that this tax would be repealed as it has been in other jurisdictions. The labor groups are not favorably disposed to it. Since it is our largest revenue producer, a substitute would have to be found, or there would not be enough money even to meet the constitutional requirements for the public schools.

The competition for funds will immediately bring to the front the question as to why full provision for standard education should be a fixed charge by constitutional provision passed by the public when this is not

true for other requirements that are possibly just as important, for example, relief and destitution, by which I mean the feeding of people who are hungry or the satisfaction of the primary wants of man. Certainly then there will be such an overwhelming demand to know what is happening to the state money appropriated for education that not only audits but investigations on the critical plane will be the program of the day. It seems to me that it would be wisdom on the part of the educators to support an independent audit of state expenditures for education in all its forms and thereby be possessed of a clean bill of health.

Many public organizations of the State have supported the principle that there should be an independent audit by the fiscal agencies of the State of state appropriations for public schools. The Attorney General has said it is the duty of the Department of Finance to audit the University of California, the state colleges, the administrative part of the Department of Education, and the special schools, and all other state institutions, audits of appropriations made for county and district fairs and even the money turned over to cooperative agencies.

The Department of Finance supported this bill before and the chief of their Auditing Division will communicate with you on it.

The State Chamber of Commerce has endorsed it, the California Taxpayers' Association, Contra Costa County Taxpayers' Association, Los Angeles Chamber of Commerce, and many others, all of which has been done without any active soliciting of endorsement.

Kindest personal regards.

Sincerely yours,

ROLLAND A VANDEGRIFT,
Legislative Auditor

School Housing Problems in California

A number of factors, growing for the most part out of the war, have been bearing on the problem of public school housing in California for the past several years. The accumulative effect of these factors has reached the point where it must be regarded as a crisis by all who accept the principle that school children in California have a right to attend school in safe, healthful, adequate buildings.

The Assembly Interim Committee on Public Education has attempted in its recent hearings to study the elements of this crisis and discover if possible a remedy for the situation.

Elements of the housing crisis. While each district presents a unique problem, some or all of the following factors are present in each critical school housing situation in the state:

1. *Increases in school population*

This is due not only to migration into the State which was accelerated by the war and which greatly expanded the basic population from which school enrollments are drawn, but to significant changes in the character of that population itself. On the primary level a sharp increase in the birth rate which began in the early 1940's is now being felt in primary enrollments and will continue to be felt for some years to come. This

trend in births which completely reversed that of the 1930's was so revolutionary in nature that first grade enrollments are frequently double those of the eighth grade in the same school. As these heavy enrollments progress year by year through the school system more plant capacity will have to be added. Another enrollment factor which will be effective for the next few years is that enrollments in the secondary schools and in the junior colleges are expanded because of the large number of young men whose education was delayed by the war.

2. *Deferred building programs*

In the early 1930's the depression discouraged much schoolhouse building and while a federal program of public works tended to offset this before the end of the decade the period of actual building in the Thirties was scarcely sufficient to catch up on the needs of that 10-year period alone. The onset of the war brought to a stop all school building except of the most critical necessity. The schools of the State are therefore at the end of a 16-year period in which there was only one brief interlude when conditions for plant expansion and replacement were favorable or were possible.

3. Condemnation of existing buildings

The earthquake in Southern California in 1933 focused attention on safety in school building and resulted in many buildings being condemned. Some school districts have not yet fully replaced the plant capacity lost in this manner.

4. Present construction costs

Many school districts which had earmarked funds for school building construction but were forced to defer building until after the war find that the money set aside will now purchase only one-half as much building as in 1940. This was graphically illustrated in Alhambra recently when bids were opened on an elementary building. The low bidder in 1946 named a figure which came to almost exactly $12 per square foot. The identical plans had drawn a low bid of $6 per square foot just before materials were frozen at the outset of the war.

5. Inability of some districts to finance building programs

The centers of large school population are not necessarily the centers of large assessed valuations. When these factors are greatly out of proportion in the direction of large enrollments, the local district finds itself unable to finance an adequate building program within the legal limits imposed. Many school districts have been starved for adequate buildings for years due to this factor and some of these districts are now in a desperate situation with vastly increased enrollments.

Limitations on financing school building programs. Present California laws are based on the assumption that school districts can and should finance their own building programs. Except for advisory service through the State Department of Education and a grant for planning purposes, little of which was ever made available to school districts, there has been no state aid for public school building. While federal aid has

been available at times it has been based not so much on local needs as on the ups and downs of the economic cycle.

The State has, however, specified as to the quality and nature of construction and has placed limitations on the indebtedness a district may incur. Each type of district may bond itself not to exceed 5 percent of its assessed valuation (excluding growing crops) for capital outlay purposes. Thus an elementary district, a high school district, or a junior college district may bond up to 5 percent while a unified or city district with both elementary and high schools may bond up to 10 percent.

The range in ability of districts to finance building programs is extremely great. Buena Vista Elementary District in Kern County, for instance has $780,031 of assessed valuation for each unit of A.D.A. In other words the legal limitation on bonding in this district is $39,000 for each pupil—enough to build two or three classrooms for each child!

Indian Wells District in the same county has $665 of assessed valuation for each unit of A.D A. The legal bonding limit here is $33.25 per pupil. Allowing 35 children per classroom the district can borrow up to $1,064.75 for each classroom it needs and this figure does not allow anything for washrooms, cafeterias, auditoriums or land. Indian Wells, greatly expanded in enrollment because of naval installation, is using temporary naval buildings and needs an eight-room building. The public is being asked to approve a $40,000 bond issue—the legal limit. The county is expected to give $20,000 and the balance must come from other sources.

Aside from money derived from bonds the only other source of funds for building purposes is the sum which can be diverted from the regular school levy. Here again there are legal limits. The schedule of tax limits per $100 assessed valuation for each type of district is as follows:

Elementary district without kindergarten	$0 80
Elementary district with kindergarten	90
High school district	75
Junior college districts	35
Unified district with kindergarten, elementary, high school, and junior college	1 85

In the case of Indian Wells, cited above the tax limit is 80 cents per $100 of assessed valuation since this is an elementary district without a kindergarten. The legal tax limit will produce $5.32 per pupil per year. Even if none of this were needed to add to the state apportionment for regular school maintenance it would not add greatly to the funds available for building.

Illustrations of distressed districts. To illustrate further the plight of many school districts in California, two typical illustrations are herewith given in some detail. One is Riverbank, a small elementary district in Stanislaus County, the other Stockton, a city district in San Joaquin County.

In a letter to Assemblyman Ralph M. Brown, N. E. Daniels of Riverbank reported as follows:

> "There (is) a considerable section of town where the people bought lots for nothing down and a small payment a month and put up tents. I would say there are easily 50 in town and that they go from tents to one-room shacks with (the hope of) eventually building

up many satisfactory workers homes. These . . . represent practically nothing in assessable tax value."

Mr. Daniels goes on to say that the workers are largely employed in a neighboring city where the wealth to which their labor contributes and the trade their wages creates adds nothing to the local tax situation. Attempts at consolidation with more wealthy areas have failed due to reluctance on the part of the more favorably financed districts to carry the burden of the poorer district.

Riverbank has 911 children in 23 classes operating in 17 classrooms. The district has been on a double session basis for several years and each year it becomes necessary to add more classes to this schedule. The assessed valuation of the district is $2,862,330 which means that the 5 percent bonding limit is $143,116. Outstanding bonds amount to $33,000 leaving $110,000 which might be voted in new bonds if the taxpayers of the district are willing to encumber themselves up to the legal limit.

The $110,000 at present building costs will probably not finance the building necessary at this time and even if this sum could be stretched to accomplish this purpose the district would then be left without reserves against future growth, a possibility which seems quite likely.

Two hundred fifty of Riverbank's 911 children live in federal housing units. While the Federal Government pays $1,200 yearly as a contribution to the local educational program (less than $5 per pupil housed in the project) the federally owned housing units add nothing to the assessed valuation which forms the basis for bonded indebtedness.

Superintendent Andrew P. Hill of the Stockton city schools in a carefully prepared 14-page report submitted to Vice Chairman Julian Beck of the Interim Committee has presented the school building problems of that city.

Summarized briefly the picture there is as follows:

Enrollment of the Stockton city schools grew more than 33 percent between 1941 and 1946 as shown by the following table:

	Elem A.D A.	*High school A.D.A.*	*Jr. Col. A.D.A.*
1941	6,732	3,556	1,239
1942	7,145	2,591	1,104
1943	7,858	3,437	724
1944	8,720	3,903	584
1945	9,723	3,865	858
1946	10,307	3,787	1,245
1947 (est)	10,800	4,023	1,750

It will be noted that while high school and junior colleges grew little between the beginning and end of hostilities and even dropped sharply during the war estimates are for heavy enrollments in 1947. Elementary schools grew over 53 percent during the period and a further increase is expected in 1947.

At the present time, Superintendent Hill reports that 40 half day sessions are being held in the Stockton schools. Admission has been denied several hundred kindergarten pupils and the district was forced to deny admission to some 700 junior college pupils. Stockton, he reports, has classes in "hallways, shacks, basement rooms, assembly halls and other undesirable places."

Of the classrooms now in use in this city 6 percent were built during the Civil War Era. Four percent of them are temporary structures. Seventy-five percent of the elementary classrooms and 62 percent of the high school classrooms were constructed prior to 1920. Only 8 percent of all the classrooms in the city are earthquake resistant.

The city has three residential areas in dire need of school buildings. Apart from earthquake safety Stockton needs 190 classrooms and their accompanying facilities to get all her pupils into standard housing.

Stockton still has $3,150,000 of bonding capacity, a fairly wide margin as far as the legal limit is concerned but Superintendent Hill points out that the practical limit is well below the legal figure. In addition to the 15 percent of the total assessed valuation which the school district with its elementary, high, and junior college systems may bond its property the city and the county each have the right to bond the same property up to 5 percent of its assessed valuation. This makes it legally possible to bond up to 25 percent.

The combined bonds outstanding against this property are now 12½ percent of its assessed valuation. Superintendent Hill expresses the opinion that "Stockton would have great difficulty in raising any more money by bonding, until some of this debt is retired."

Additional instances of distressed districts. Space does not permit a detailed description of each distressed district reporting problems to the committee but a few additional illustrations will serve to show that the problem is by no means peculiar to any single section of the State or to any particular size of district. The following are cited:

1. Ceres elementary district in Stanislaus County has 1,400 pupils enrolled in facilities planned to house 850. A.D.A. jumped from 674 in 1943-44 to 744 in 1944-45, then to 987 in 1945-1946 and has been 1,316 so far this year. Total bonding capacity is $170,000 under the 5 percent limitation and this is partially encumbered. The district needs 12 additional classrooms and will need five more each year as long as this rate of growth is maintained. Without outside help there is no way for the district to finance such a building program.

2. San Diego has grown from a town of 70,000 population in 1920 to a city of 365,000 at the close of World War II. New school buildings have been needed almost every year for the past twenty-five. From 1920 to 1930 five bond issues were passed. During the 1930's from $300,000 to $500,000 was taken from the current funds of each budget for the construction of new buildings.

The war years brought as many new residents to San Diego as had come during the previous 20 years. The city schools now need $10,752,700 to meet their immediate school housing needs.

The bonding capacity of the district is legally sufficient for this expenditure but like Stockton the total bonded debt of city, county and schools combined was such as to make it inadvisable to ask for the entire sum.

In the November elections a bond issue of $6,865,000 was voted by the electorate. An accumulative building fund will finance a small part of the added $3,887,700 which the district needs and the balance has yet to be financed. In addition to the immediate needs represented by the $10,752,700 San Diego must try to keep up with new building needs as they develop from this date.

4. Live Oak Elementary School, Santa Cruz County. The present school was designed for 200 students, enrollment is 333 and growing. A community clubhouse is being used for the kindergarten and one class. The district is out of debt and has a bonding capacity of $79,739. They have preliminary plans for new buildings that will cost, at present estimated $199,000. Additional land needed by the district is valued at from $12,000 to $14,000. The district cannot adequately finance this program.

5. Scotts Valley School, Santa Cruz County. The school accommodates 100 pupils. Peak enrollment is 150. Two additional classrooms are needed but the bonding capacity is $17,400 and there are $16,000 bonds outstanding.

6. Soquel Elementary School, Santa Cruz County. The building here accommodates 250 pupils and the enrollment as of October 14, 1946 was 479. This is an increase of 104 over last year. The growth has been going on for some time. At present the first three grades are on a double session basis with 40 pupils per class. A petition is on file with the necessary signatures calling for a kindergarten but there is no place for it.

Bonding capacity of the district is $120,000. An issue of $70,000 was voted last year but this will only begin to meet the needs of the district. Superintendent Paul E. Walters reported "Even if we bond to the limit we cannot do the minimum necessary building."

7. Prunedale Elementary School, Monterey County. This school district is already bonded to its capacity of $19,000 but increased enrollment has made it necessary for the first grade to occupy rented quarters in the community church. The main building designed for four classrooms of 35 pupils each is used by five teachers. A plywood partition makes two classrooms out of space designed for one.

Without outside aid this district cannot finance an improved school plant.

8. Mavina School District, Monterey County. This district has an outmoded wooden building and a detached classroom. While the community wants a modern plant they cannot vote bonds for it as much of the district's assessed valuation was lost by the sale of property to the Federal Government at Fort Ord.

9. Fairfax School District, Kern County. The enrollment of this district has increased from 320 in 1940 to 468 at present. The district is bonded to capacity and has $50,000 in unspent bond money. Five classrooms, sanitary facilities, an administrative unit, health room and a cafeteria-auditorium combination are needed. The 1944 estimated cost of this unit was $100,000 but the probable cost now will be nearly twice that according to the superintendent

The $50,000 in unspent bond money is the extent of the district's resources.

10. Westminister District, Orange County. This district voted $80,000 in bonds in 1946 thereby exhausting its bonding capacity. Nine additional classrooms are needed, five to replace makeshift rooms using space not designed for classroom purposes and four to provide for increased enrollment.

The improvement will cost at least $11,000 per classroom and $10,000 for land. The district has no other resources and cannot finance the project without outside help.

Other instances of distressed districts are referred to briefly in this digest under the county headings. The foregoing examples are typical and will serve to illustrate the nature of the problem.

The effect of substandard housing on the school program. One of the primary considerations of any school program is the health and safety of the pupils. Classrooms should be large enough (about 1,000 square feet is the suggested minimum for elementary school rooms) to provide plenty of healthful air space for each child as well as ample room for normal schoolroom activities. Lighting should be ample and free from glare and there should be sufficient artificial lighting when necessary to provide at least 20 foot candles of light at work levels in all parts of the room. The room should be adequately and safely heated. The entire building should be built in such a way as to provide maximum safety in case of earthquake or fire. A number of auxiliary rooms have come to be accepted as standard units of any school plant. Washrooms should be provided with facilities in proper ratio to the school enrollment. Cafeterias provide a warm meal at lunch time and the school that does not have them cannot profit by the federal school lunch program. Assembly rooms, music rooms, nurses quarters, visual education facilities, and administrative offices are necessary in any modern program.

The textbooks and teaching aids presuppose an adequate school plant, the training of the teacher assumes it, the program is incomplete without it.

It is obvious that adequate school plants are necessary if a full return is to be derived from the public's year by year investment in the operation of schools.

There is a strong note of inconsistency in an educational program which provides a guaranteed annual support of $120 per pupil and yet does not provide a safe, healthful, adequate place for that program to go forward.

Implied obligation of the State to underwrite building programs. The State, in limiting the funds available to a school district for building purposes while at the same time setting up standards of acceptability for school buildings has confronted many school districts with a problem for which there is no solution without outside help. In the opinion of many who gave testimony at the hearings, the State has an obligation to underwrite building needs of districts caught between these conflicting limitations.

There was no disposition to dispute the wisdom of either the 5 percent bond limitation on the one hand or the standards of safe construction on the other. The expressed feeling, however, was that the distressed school districts should not be left in the impossible positions in which they find themselves. Two possible solutions were suggested. One was county support for capital outlay expenditures of school districts. The other was state aid.

County support for school buildings. A comparison of the relative elementary school population and assessed valuation of the several counties of the State shows that they are by no means equal in their ability to support a school building program. Alpine County with its sparse population has $68,930 of assessable wealth for each elementary child in average daily attendance. Imperial County has $5,305.

The variation in comparative population and wealth is not confined to rural counties alone. San Diego and San Francisco Counties have almost exactly the same elementary pupil A.D.A. yet their assessable wealth per elementary child is $7,607 and $21,885 respectively.

Average daily attendance and assessable wealth comparisons for counties of the State are shown on the following table. Figures are from the official report of state apportionments for the support of public schools of California for the year ending June 30, 1946.

ELEMENTARY A.D.A. AND ASSESSABLE WEALTH FOR CALIFORNIA COUNTIES

	County	*Elementary A.D.A.*	*Assessed Valuation*	*Assessed Valuation per unit of Elementary A.D.A.*
1	Alameda	54,267	$505,608,720	$9,316
2	Alpine	21	1,447,433	68,930
3	Amador	755	16,861,295	22,330
4	Butte	5,235	48,201,110	9,207
5	Calaveras	822	12,141,675	14,771
6	Colusa	1,015	23,522,730	23,175
7	Contra Costa	29,704	183,181,960	6,166
8	Del Norte	419	4,933,329	11,779
9	El Dorado	1,315	16,030,292	12,115
10	Fresno	25,683	345,040,661	13,433
11	Glenn	1,515	23,049,895	15,214
12	Humboldt	5,314	46,329,665	8,718
13	Imperial	7,565	40,133,926	5,305
14	Inyo	873	17,242,467	19,750
15	Kern	22,031	338,136,450	15,349
16	Kings	5,067	84,288,685	16,753
17	Lake	920	10,443,705	11,351
18	Lassen	2,178	17,099,065	7,850
19	Los Angeles	287,475	2,908,602,995	10,118
20	Madera	4,136	32,316,143	7,813
21	Marin	5,494	54,636,165	9,944

ELEMENTARY A.D.A. AND ASSESSABLE WEALTH FOR CALIFORNIA COUNTIES—Continued

County	Elementary A.D.A.	Assessed Valuation	Assessed Valuation per unit of Elementary A.D.A.
52 Tehama	1,716	21,722,349	12,659
53 Trinity	250	3,506,855	14,027
54 Tulare	17,788	106,144,045	5,967
55 Tuolumne	1,064	15,176,065	14,263
56 Ventura	9,721	123,886,745	13,761
57 Yolo	3,195	39,472,884	12,360
58 Yuba	2,236	20,415,075	9,136
Totals	747,346	$8,263,028,059	10,494

When the above ratios of assessed valuation per elementary unit of A.D.A. are compared with the state average of $10,494 it will be seen that the variation from this figure is too great to permit the assumption that all counties can carry the load of equalizing school building expense with equal facility.

The impact of rapidly increasing population has not been as great in some counties as others and this factor may also be considered as an argument against a county basis of equalization.

An illustration of what might happen in a county of low assessed valuation might be cited in the case of Stanislaus County. Assessed valuation of the entire county is $83,462,805. An over-all tax as large as $1 per hundred dollars of assessed valuation levied by the board of supervisors will produce less than $1,000,000—$834,628 before allowance for tax delinquency. The Modesto city district alone which maintains 62 double sessions and rents an outside building at the present time would require this entire amount to meet its own needs. There are four other districts in the county so overcrowded that they operate double sessions. These are Ceres, Keyes, Riverbank, and Empire union. In addition to districts maintaining double sessions several others are now meeting problems of increased enrollment by overcrowding classes. These need new classrooms. Oakdale elementary needs three classrooms now and should add two more if present rate of growth is maintained. Washington school needs one additional classroom. Oakdale high school needs five additional classrooms to house new enrollment. Turlock requires five classrooms in order to hold class size down to 40. The preschool population there is such that four additional classrooms will be needed each year for some years to come. Salida requires three new classrooms now with increased primary enrollments demanding an additional room per year. Turlock High School will require six classrooms within the next three years.

More than 60 classroom units plus auxiliary facilities are needed outside of Modesto. At $12,000 per unit, a conservative figure at today's building costs, the expense would be $720,000.

The above needs are compiled from those districts that reported to the committee. Many districts were not represented and there are doubtless others with acute building needs.

While it is true that not all of the districts named in the foregoing paragraphs are financially unable to meet their building requirements, those that did finance their building by bonding could scarcely carry the

burden of retiring their own bonds while paying a heavy over-all tax to the county as well.

State funds for school building. The problems of financing public school building which were presented to the interim committee might be classified in the order of urgency as follows:

1. The problem of housing increased enrollment without sufficient bonding capacity or reserve funds to meet minimum requirements.

2. The problem of housing increased enrollment without sufficient reserve funds and a bonding capacity already at practical limits but not at legal limits.

3. The problem of sudden increases in enrollment which require a school district to spend money not normally scheduled for this purpose or to increase bonded indebtedness or taxes beyond normal expectations.

To the above might also be added the temporary problem of securing materials and labor.

In considering the advisability of state aid for school housing the point at which favorable opinion is most nearly unanimous is, of course, giving aid to the district facing the first named problem. The district facing the second mentioned type of problem is most certainly entitled to consideration but the fact that a legal alternative exists to state financial aid might lead some to oppose giving it here where they would favor state assistance in the first instance. Still more would hesitate to advocate state aid to the district in the third mentioned classification.

The problem is too complicated to be solved without careful study. Serious consideration, however, should be given to a formula that will at least provide whatever additional funds are needed when a district has exhausted every financial resource and still cannot provide adequate safe school housing for its pupils.

COUNTY SUMMARIES

The data presented to the committee in the various counties did not always follow the same outline. In some instances the county superintendent made the presentation for the entire county. In others individual district and city superintendents represented their own districts.

Each of the following county-by-county summaries reflects this situation. Wherever possible the county presentation is followed by a table showing individual housing problems of the districts in the county. Information is presented as to enrollment increase, double sessions, rented quarters, substandard classrooms, building needs, bonding capacity and tax rates.

FRESNO COUNTY

The committee met with school officials in Fresno County at the Fresno City Schools Administration Building on October 8, 1946. Only two districts, Fresno City and the Reedley High School District, operating Reedley Junior College, made individual reports. County Superintendent Walter G. Martin presented a compiled report for all other districts in the county.

He reported that a survey of building outside Fresno City, made in December, 1945, showed the following:

Elementary Schools

Total number of teaching classrooms in use	629
Total number of rooms fit for classroom use	425
Total number of rooms unfit for classroom use	204
Total enrollment using these rooms	22,962

High Schools

Total number of high school classrooms in use	369
Number of rooms fit for classroom use	357
Number of rooms unfit for classroom use	12
Total enrollment using these rooms	6,182

As in other counties it will be seen that the most acute school housing problem is in the elementary grades. This is even more apparent when it is realized that the heavy, future enrollment due to the rising birth rate will affect these schools first. The ratio of elementary pupils enrolled to classrooms of all kinds, fit and unfit is 36.2. This is a county-wide ratio and undoubtedly the crowding is much more severe in some districts than others. Even if it were confined to one district it is too high. When the average classroom load is 36 2 the range is likely to be from 26 2 to 46.2.

With reference to the ability of the elementary districts to build new classrooms Mr. Martin said:

> "It should be noted in the reports concerning many districts in Fresno County that there are many old buildings built prior to 1910 which are considered obsolete by standards set up by the State Department of Schoolhouse Planning. Some districts using such buildings are not planning immediately to replace these old buildings. They are financially able to construct modern school plants. There are other cases where buildings are badly needed to take care of the increasing school population but the district is not financially able to bond a sufficient amount to meet the needs."

Summary of Testimony Presented From Fresno County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Fresno City	15 percent over 1945 and		Extensive repairs and alterations needed	
Reedly High School District and Junior College	Estimate 100 percent increase in 10 years		Rebuilding new buildings	

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Fresno City	1,000,000 repairs new elementary buildings at new sites additional of classrooms to old sites	$7,000,000	No
Reedly High School District and Junior College	250,000 1,040,000 1,290,000		$167,241

KERN COUNTY

Kern County was the first to meet with the interim committee. This hearing was held in Bakersfield on October 7. Dr. Leo B. Hart, County Superintendent, served as chairman and made the introductions.

Nine school superintendents made presentations of their housing needs followed by summary of the county situation by Deputy County Superintendent John G. Ross.

Kern County includes some of the wealthiest as well as some of the poorest school districts in the State. Building problems here as elsewhere are an accumulation of the years where building was not possible aggravated by sharply increased enrollments and advancing building costs. In general, the most acute problems are in the elementary schools where heavy primary enrollments on top of migration has overcrowded buildings. Some of these problems are especially difficult due to inability of the district to finance them (See Indian Wells in main section of digest).

The county as a whole needs 100 elementary classrooms to do away with overcrowding and double sessions. Deputy Superintendent Ross estimates that a satisfactory classroom can be built for $10,000 when conditions stabilize. Present bids, however, are from $14,000 up. The 100 classrooms and the above estimates do not include toilets, auditoriums, home economics, shop and other facilities. Nor does it include the cost of replacing buildings which do not meet State Division of Architecture standards. There are 45 such buildings housing 3,700 pupils.

High school building needs are real but the pressure is not so heavy at the moment and the possibility for long term building programs exists. The single exception to this is Tehachapi High School where the building burned down.

The problem of poor districts was discussed at length. Ten or twelve districts in the county are unable to meet building needs even if bonded to maximum capacity and levying a tax well above the statutory maximum. The following recommendation came out of the meeting.

> "Any state aid to school districts for building purposes should be given only to those districts which put forth some agreed amount of local tax effort and are still unable to provide acceptable or average facilities for their pupils. Some standard as to what constitutes acceptable or average facilities should be developed. Some program of county aid to guarantee adequate school buildings would work

well in Kern County where there is adequate wealth in the county as a whole.

Summary of Testimony Presented From Kern County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Arvin	35%	10	none	none
Bakersfield	40%	60	none	none
Delano Elementary	25%	18	none	none
Fairfax Elementary	30%	none	none	2
Indian Wells	1600%	none	none	8
Kern County Union High	50% since 1936	none	Using temporary buildings from Gardner Field.	
Mountain View Elementary	100%	Have 19 classrooms for 850 pupils.		
Tehachapi Valley Union High	Expect increase	Building burned down last year.		

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Arvin	$322,000	$140,500*	Yes
Bakersfield	$2,000,000	$2,975,000	Yes
Delano Elementary	$1,100,000	$687,788†	
Fairfax Elementary	$200,000	$50,000	Yes
Indian Wells	$125,000 plus Auditorium	$45,000*	
Kern County Union High	$4,500,000	$11,744,081	No
Mountain View Elementary	$450,000	$165,000	Yes
Tehachapi Valley Union High	$250,000	$230,000	Yes

* Arvin has an allocation of $36,000 from the state Indian Wells $20,000 County share under $90,000,000 Act.
† Delano has $80,000 in reserve funds

KINGS COUNTY

The county superintendent, Mr. Jacobus and the superintendents of two elementary districts, Armona and Stratford represented Kings County at the hearing in Fresno on October 8th.

This county has an average assessed valuation of $16,753 per elementary pupil which is well above the state average of $10,494. Local problems of finance are therefore not usually as difficult as elsewhere. All three of the county's high schools and six of the 22 elementary districts have accumulative building funds. Only three elementary districts and one high school district have any bonds outstanding.

Armona, with an assessed valuation of $5,560, has had a large increase in enrollment and is using the auditorium and a made over shed for classrooms. The present building was designed to accommodate 250. Enrollment is now 400 and growing.

Stratford's problem is similar. Details are in the following summary. The substandard classrooms are a wooden frame building and three unfinished portable buildings.

Summary of Testimony Presented From Kings County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Armona	10 % since 1945	none	none	2
Stratford	not given	none	none	6

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Armona	4 classrooms plus facilities	119,847	Yes
Stratford	$146,000	108,000	Yes

MERCED COUNTY

Five school districts were represented from Merced County at the hearing in Modesto October 9, 1946. A report was presented by Superintendent George L. Roehr of LeGrand Union High School. This district is not in a particularly difficult financial position, having $5,050,000 in assessed valuation with an enrollment of 251. They have, however, the problem of putting up a new building of 12 classrooms since they had to vacate their old building due to defects. Whether the $253,000 represented by the present bonding capacity will build an adequate plant depends on building costs in the near future.

Delhi elementary district also presented an acute problem. The assessed valuation of the district is only $2,663 per pupil. The bonding capacity is $47,023 and the school needs three new classrooms, washroom and toilet space. The problem is complicated by the fact that every indication points to continued growth.

Other reports were presented from Merced Union District, Livingston, and Washington school.

Summary of Testimony Presented From Merced County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Delhi Elementary	Large increase	None	None	3
LeGrand Union High	Not given		Would rent if available	12
Livingston	90%	None	None	None
Merced Union	Not given	Size of classes too large	Size of classes too large	Size of classes too large
Washington	180%	None	None	None

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Delhi Elementary	3 plus washrooms more yearly	$47,023	Yes
LeGrand Union High	12 classrooms	$253,000	Yes
Livingston	4 classrooms must be built; a complete new building is badly needed	$121,848	Yes
Merced Union	9	$500,000	
Washington	One room	$40,371	No

MONTEREY COUNTY

Testimony from school officials in Monterey County was heard at Salinas on October 15, 1946. A large representation of the districts in the entire county was present.

While this county itself is in a relatively fortunate position as far as wealth per pupil is concerned (slightly above the state average) a number of individual districts were in difficulties as to school housing. In almost all cases of this nature increased enrollment had brought on the problem. Some of the districts were low in assessable wealth and will always need outside help. One district would normally have been able to finance building needs but purchases of land by the Federal Government had removed most of its wealth from the tax rolls. Some districts had money enough but could not get materials. The summary following this report will give details on these problems.

Double sessions were the usual answers to enrollment problems but the fact that much of the county is rural and the dependence on bus transportation makes this impossible in some cases. Overcrowding of classrooms and the renting of outside space had to be resorted to in many cases.

Miss Gladys Stone, County Superintendent of Schools suggested that Section 18059 of the Education Code be amended so that the permission to liberalize bidding procedures would include districts of less than 850 A.D.A. as well as those above that figure.

Summary of Testimony Presented From Monterey County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Salinas	10% to 25%	12	No	None
Monterey Union High School	Survey shows need for replacement of buildings			
Monterey Elementary	28%	1		½ present classrooms
King City Elementary	15% of 1 yr. ago	No	2	4
Marina	Not given	No	No	1
Greenfield	Not given	No	No	All
Hall		2	Have money for 8 classrooms, priorities to build four	
Alisal Elementary	220%	22		
Prunedale Elementary	25%	No	1	

District	Number of new classrooms or cost if available	Bonding capacity available	Maximum tax for maintenance
Salinas	Not given	$3,200,00	Yes
Monterey Union High School	$1,000,000	$977,500	
Monterey Elementary	3 new buildings	$752,100	Yes
King City Elementary	Not given	$273,000	Yes
Marina	3 classrooms	$15,061	Yes
Greenfield		Have sufficient money; can't get materials	
Hall	Need 2 new classrooms	$10,828	
Alisal Elementary			Yes
Prunedale Elementary	Need 1 classroom	None	Yes

The following districts did not submit building problems but presented testimony on pupil accounting practices:

Gonzales Union High School.
King City Union High School.

ORANGE COUNTY

Orange County was the only county represented at the meeting held in Santa Ana on October 22, 1946. This county with an assessed valuation of $12,180 per elementary pupil has on the whole more per capita wealth than the average throughout the State. However, there are school districts in the county not so favorably situated. Westminster, for instance, has $3,730 per pupil. Four districts of this type, Buena Park, Costa Mesa, Garden Grove, and Westminster presented acute building problems to the committee. Not one of these districts is at present able to meet its school housing problem and all are at or near their bonding capacity.

This county was seriously affected by the 1933 earthquake and two of the districts are using buildings which will not meet the building standards established since that time.

Summary of Testimony Presented From Orange County

District	Percent of enrollment increase since 1940	Number of double sessions	Rental quarters	Sub-standard classrooms reported
Buena Park	27% since 1943		1	12
Costa Mesa	50% since 1943	8		2
Garden Grove	45% since 1943	2	All special classes eliminated	All special classes eliminated
Westminster	25% since 1943	None	none	5

District	Number of new classrooms or cost if available	Bonding capacity available	Maximum tax for maintenance
Buena Park	$361,000	$150,000*	
Costa Mesa	23 Classrooms	60,000†	
Garden Grove	400,000	230,000*	
Westminster	109,000	12,778‡	

Fullerton, Anaheim elementary, and Santa Ana presented reports on pupil accounting and auditing.

* Already voted.
† Costa Mesa has $160,000 in voted but unspent bonds
‡ Westminster has $70,000 left from a previous bond issue.

SAN BENITO COUNTY

Only one school district from San Benito County presented data at the hearing in Salinas October 15, 1946. This was Hollister. The district has grown in enrollment having had 535 in 1944-45, 577 in 1945-46 and enrollment of 700 as of October, 1946.

The district has been attempting to meet its school housing needs by accumulating a special building fund but increases in operating costs forced this to be discontinued. The 1945-46 tax was 90¢, of which 49¢ went into the regular budget and 41¢ into a special building fund. The tax of 90¢ this year is for operating expenses.

There are no bonds against the district and the bonding capacity is $227,795. The special building fund was $17,884 when discontinued. In addition to this the San Benito County Board of Supervisors have allocated $14,633 and an additional $13,158 was allocated by the State Department of Finance.

These emergency funds have provided for a pre-built three classroom unit, which will do away with the necessity of double sessions now scheduled in four primary grades.

Future building in Hollister will probably be financed from the sale of bonds.

SAN DIEGO COUNTY

San Diego County is one of the relatively poor counties of the State with reference to assessable wealth per pupil. There is $7,607 of taxable funds for each elementary pupil. The range of this wealth by districts goes all the way from South Bay Union with $2,655 to Alta with $42,311.

The county is more or less dominated by San Diego City which contains about 66 percent of its school population and over 70 percent of its wealth.

The entire county but especially the city has experienced a growth rarely paralleled and this fact has made the school housing problem very acute. In the city a number of buildings have been constructed by the Federal Government and leased to the city schools. The final ownership of these plants has yet to be determined.

Since the close of the war there has been little evidence of a drop in population and it is now evident that plans must be made to accommodate a permanent population much greater than that of prewar days.

The hearing for this county was held on October 21, 1946. Much of the data was presented in compiled form by the county superintendent's office and the usual summary in tabular form is not therefore included in this report.

The county superintendent reported that 70 percent of the counties of the district were levying the maximum tax for maintenance of schools, 13 percent were within .05 of the maximum and 8 percent were within .10 of the maximum.

A complete report by districts as to assessed valuation, debt limit, outstanding bonds, and legal debt margin was presented. Forty-five districts, mostly small elementary schools, have no bonds outstanding. Only nine have exhausted more than half of their bonding capacity but these nine include most of the large districts of the county outside San Diego itself. It is here that the greatest likelihood of distress in school housing is likely to come.

The building problems of San Diego City has also been discussed in the main body of this digest.

SAN JOAQUIN COUNTY

Reports and data from two San Joaquin County districts, Lodi and Stockton, were submitted to the committee at the hearing conducted at Modesto on October 9, 1946. The excellent detailed report from Stockton has been commented upon at length in the main body of this digest. Lodi does not report any acute building need at present. Double sessions are confined only to the kindergarten where half-day sessions are the regular thing.

Summary of Testimony Presented From San Joaquin County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Lodi	not given	2	none	
Stockton	40%		many	

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Lodi	none	$2,352,252	No
Stockton	190 class-rooms	$3,150,000	No

SANTA BARBARA COUNTY

Santa Barbara with $16,825 in assessed valuation per elementary pupil has relatively few districts unable to meet school housing problems. Two, Guadalupe and Cuyama reported to the committee at the hearing conducted in Santa Barbara, October 14, 1946. These are summarized at the end of this report.

Mr. Caywood, Superintendent of Schools of Santa Barbara County, presented data from the county at large.

With the exceptions cited, none of the districts in Santa Barbara County are bonded to the limit. Money can probably be made available through regular channels for adequate construction.

Summary of Testimony Presented From Santa Barbara County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Cuyama Union	newly created district needs four-room school			
Guadalupe	estimate 30% growth by 1950			4

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Cuyama Union		$22,900*	Yes
Guadalupe	need school for 850 pupils	$155,000	Yes

* Bonds voted in this amount.

SANTA CLARA COUNTY

Testimony from Santa Clara County presented at the meeting held at San Jose on October 16, 1946, showed the effects of rapid enrollment growth on a county where conditions had been relatively static for some time. Most of the real distress at present from the school housing standpoint, in the elementary schools, some instances of this not fully indicated on the summary shown on the page following are:

1. Franklin School which had to discontinue shop classes in 1943 to use the room for regular school work. In 1946 this district had to give up orchestra and auditorium programs since two classrooms had to be housed in the auditorium. The cafeteria had to be dispensed with also as the room was needed for classroom purposes.

2. Lexington School which is now holding shop classes in an old Southern Pacific depot.

3. Los Gatos, where a church basement, the town boy scout building and an unused high school classroom are being used.

The birth rate in Santa Clara County rose from 14.2 in 1930 to 26.3 in 1946. Since the birth rate for the entire Nation at present is only 21.6 this county can expect school housing problems for some time to come.

In larger cities, San Jose, Palo Alto, and Sunnyvale, a commendable practice of attempting to "pay as you go" by submitting special taxes to the voters is being followed. However, rising building costs are upsetting calculations here.

Summary of Testimony Presented From Santa Clara County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Alum Rock Union Elementary	90%	4		5
Cambrian Elementary	80%	none		1
Campbell Union Elementary	100%	1		9
Campbell Union High	Enrollment will nearly double in 8 years when elementary growth is felt. District must build in near future.			
Cupertino Union Elementary	20% since 1945	none	none	1
Jefferson Union Elementary	80%	none	none	9
Franklin Elementary	20% since 1945	none		7
Gilroy	20% since 1945	Obsolete buildings need replacement		10
Live Oak Union High	100% since 1930	Obsolete wooden buildings built in 1905		
Lexington Elementary	200%	none	1	4
Los Gatos Elementary	33%		2	1
Mountain View Elementary	25% since 1945	3		9
Palo Alto Unified	7%			
San Jose Unified District		Enrollment increases forcing new building in near future

Palo Alto Unified	$760,000	$2,400,000‡	Yes
San Jose Unified District	$3,225,000	‡	Yes
Saratoga Union	Need five classrooms	$140,360	No
Sunnyvale Elementary	$70,000 land, 120,000 sq. ft. bldg.	‡	
Sunol	New building for 300 pupils	$48,400	Yes
Whitsman Elementary	6	$12,878	Yes

* Voted but not spent
† Live Oak has voted a $175 for three years to raise the needed money without bonding
‡ In lieu of bonds the voters have authorized a tax above the legal limit.

SANTA CRUZ COUNTY

Data from 12 Santa Cruz County school districts was submitted to the committee at the hearing in San Jose on October 16, 1946.

Many rural schools in this county have experienced rapid growth in enrollment, a typical instance being a school planned for 200 pupils with 333 at present. These small schools find no flexibility in their plant and the only course available to them is to use cafeterias and auditoriums and to overcrowd classes. Bonding capacity is not sufficient to meet district needs in four of these elementary rural districts.

The city systems of Santa Cruz and Watsonville each have long-term building plans that will tax their capacity to finance. In theory both of these cities can finance these improvements but there may be practical bonding limits which are lower than the legal limits as other governmental units may bond the same property.

Summary of Testimony Presented From Santa Cruz County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Aptos	No data submitted			
Ben Lomond	No data submitted			
Boulder Creek	No data submitted			
Corralitos	Not given	None	1	None
Freedom	30% since 1945	None		4
Salsipudes	Union school being formed; 237 pupils			2 plus
Santa Cruz City	Greatly increased	Elementary schools now use stage and cafeterias for classrooms		
Scotts Valley	50%			2 classrooms, 1 cafeteria
Soquel	20% over 1945	6		2
Live Oak	66% over capacity			2
Watsonville High School		None	None	
Watsonville Elementary	5% over 1945	None	None	4

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Aptos		$68,000	Yes
Ben Lomond		48,000	Yes
Boulder Creek		49,000	Yes
Corralitos	Need new classroom, toilets, bus, garage, $5,000	25,000	No
Freedom	Need complete building for 600 pupils	100,000	No
Salsipudes	New building for 300 pupils	100,000	Yes (within .01)
Santa Cruz City	New shops, gymnasium, 1 new elementary building, extensive remodeling	1,500,000	
Scotts Valley	$17,400	1,400	Yes
Soquel	3 classrooms, cafeteria	50,000 *	Yes (within .02)
Live Oak	211,000	79,739	Yes
Watsonville High School	1,524,200	1,063,000†	
Watsonville Elementary	44 new classrooms (10-year plan)	394,000	

* Soquel Union has $70,000 in unspent bonds.
† Watsonville High has $40,000 in salable property for building purposes.

STANISLAUS COUNTY

School officials from this county were given an opportunity to present their problems to the committee at the meeting held at Modesto on October 9, 1946.

In general the high schools in Stanislaus County are in a relatively better position than the elementary schools. This is especially true in the near view although high enrollment now in the elementary grades will reach the secondary schools within five years. In the meantime they are experiencing increased enrollment due to the end of the war. Most high schools, however, have sufficient bonding capacity to take care of immediate needs. Oakdale High School, in need of a new plant, feels that this is not true in their case.

Elementary schools in Stanislaus County, however, are swamped with heavy enrollments and many of them are unable to meet the emergency. Turlock elementary, for example, has $255,000 in unspent bond money but they must spend this much for classrooms alone if they are to reduce class load to normal proportions and provide for the large primary enrollments ahead. In addition to this they need cafeterias, assembly rooms, music rooms, science rooms and the usual auxiliary rooms to serve the classrooms.

Most elementary districts in the county are already at the legal tax limit for maintenance of schools although the recent passage of Proposition No. 3 on the November ballot may offer relief on this point. Bonding capacity in many districts is not sufficient to finance building needed as shown in the following summary and also in the main body of this digest. (See Ceres, Riverbank.)

Summary of Testimony Presented From Stanislaus County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Modesto Elementary Schools	Heavy growth	62	1	
Modesto High School and Junior College	Heavy growth expected	none	none	none
Oakdale Union High	20 percent	none	none	none
Riverdale Elementary	Heavy growth	6	none	none
Turlock Union High School	No report	none	none	none
Turlock Elementary	Heavy growth	No double sessions but class size large		
Washington Elementary	Not given	none	none	none
Salida	No report	none	none	none
Ceres	100 percent since 1944	17	1	1

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Modesto Elementary Schools	At least 30 with 12 additional yearly	$37,569	Yes
Modesto High School and Junior College		1,076,000*	Yes
Oakdale Union High	3 classrooms now plus 2 per year	95,000†	No
Riverdale Elementary	6 classrooms more yearly	110,000	Yes
Turlock Union High School	10 classrooms	615,000	Yes
Turlock Elementary	5 now 4 yearly	30,000‡	Yes
Washington Elementary	1 classroom	4,307,100	No
Salida	3 rooms	85,427	Yes
Ceres	12 classrooms	150,000	Yes

* Modesto High School has $750,000 in bonds voted but not spent
† Oakdale High has $600,000 in bonds voted but not spent.
‡ Turlock Elementary has $255,000 in bonds voted but unspent.

TULARE COUNTY

Tulare County school officials were invited to present data to the interim committee at the October 8th meeting in Fresno. This county has about as low a ratio of assessed valuation per pupil as exists in the State, there being only $5,967 per elementary child. No district in the county levies less than the maximum tax for maintenance of schools. Ratios of taxable wealth range from $1,671 at Farmersville to $16,891 at Richgrove. The latter figure is less than that of many counties.

Mr. Theo R. Nickel, County Superintendent, presented photographs of some of the school housing conditions in the county. These show pupils using packing boxes for desks, a class conducted in a garage with light from uncovered household light globes, small heads bent almost to the books on the desk in poorly lighted rooms, makeshift handmade tables.

There were no detailed reports from school districts of this county.

VENTURA COUNTY

School officials from Ventura County were present at the hearing held in Ventura October 14, 1946. Acute building problems from six elementary districts were presented and discussed. There are the five included in the following summary and Oxnard from which no written data was submitted.

The latter city has experienced a rapid growth and now has an elementary enrollment of 2,480 as against an A.D.A. of 1,111 in 1943. The primary grades contain 46 pupils on an average. This district needs new buildings. It has a bonding capacity of $437,515 with $59,000 outstanding leaving $367,515 as a possible maximum.

Ventura County as a whole is slightly under the state average in assessed valuation per pupil and the great variation in wealth between individual districts makes the problem very difficult for some.

Summary of Testimony Presented From Ventura County

District	*Percent of enrollment increase since 1940*	*Number of double sessions*	*Rental quarters*	*Sub-standard classrooms reported*
Hueneme	100%	None*	1	2
Moorpark				
Nordhoff Elementary	65% since 1942	8	None	None
Rio Elementary	Increase expected	None	None	4
Santa Paula Elementary	3% since 1945	15	3	None

District	*Number of new classrooms or cost if available*	*Bonding capacity available*	*Maximum tax for maintenance*
Hueneme	2 classrooms auditorium cafeterias	$45,000	Yes
Moorpark	4 classrooms	4,707 †	Yes
Nordhoff Elementary	375,181	118,544	Yes
Rio Elementary	6 classroom building	110,585	Yes
Santa Paula Elementary	17 classrooms 3 auditoriums 3 cafeterias	191,072	Yes

Nordhoff High School while not submitting building problems asked for legislation to make possible the payment of state subventions directly to the high school when the seventh and eighth grades are included. The principal also suggested that state audits if conducted, be made through the State Department of Education. In his opinion the Ventura County system of checking warrants by the county school superintendent and auditor with further audits by the grand jury accountant was adequate.

* Hueneme does away with double sessions by discontinuing cooking, sewing, and shop and using the space for classrooms.

† Moorpark has $67 of unspent bond funds.

RECOMMENDATIONS

Your committee recommends:

A. Relative to School Housing

The committee recommends that state funds should be appropriated for the purpose of assisting needy districts in meeting their demands for school housing. Although the committee does not wish at this time to define "needy districts," it was thought that any definition would imply that a district had exhausted (or practically so) its effort to meet the need by both taxing and bonding itself to the legal limits.

The committee feels that the best possible source for these funds be the General Fund of the State Treasury. Should funds not be obtainable from this source, some of the committee members proposed two alternate methods of raising the money:

1. To terminate the money granted to cities and counties under the ninety million dollar bill (Chap 20, First Extraordinary Session, Fifty-sixth Legislature-Postwar Unemployment and Construction Fund) as of a certain date—such as January 1, 1948—all money remaining in the fund to be set aside for school housing purposes. The investigation by the committee determined that very little of this money was assigned to school districts by cities and counties despite the severe handicap that some of these districts were operating under insofar as housing was concerned.

2. To apportion a certain sum—for example, $10 per unit of A.D.A.—from the $30 per unit of A.D.A. which Legislature is given authority to use for equalization purposes under Proposition No. 3 which was approved on the November ballot. Funds from this source for a few years would probably overcome the deficiency in housing in needy districts.

The committee felt that a formula for the issuance of funds to needy districts should be determined by the Legislature rather than leaving the matter to an administrative board. The committee further suggests the formation of a commission to administer the funds, consisting of the State Superintendent of Public Instruction, the Director of Finance, the Director of Public Works, a member of the Assembly, and a member of the Senate. It was also suggested that this committee be given adequate funds with which to carry on their functions.

B. Relative to State Audits

1. The committee determined that there was no need for an audit of average daily attendance, feeling that adequate safeguards now exist. The committee did ascertain that there were some spots where checking might be effectively done, such as in evening school enrollments, but felt that a general audit of A.D.A. would be too costly for any general good that might be accomplished by the audit.

2. The committee recommended that school districts be divided into two groups for the purpose of a financial audit. The first group to include all districts that spend annually $100,000 or less, that the audit in these districts be conducted by the county auditor or local auditing firms employed by the district. If the county auditor is the agency which the legislature decides to do the actual auditing, it is the committee's recommendation that the cost of such audits be charged against the several school districts on a basis proportional to the amount of funds audited.

In districts spending in excess of $100.000 annually the committee recommends that school districts be given the choice of employing (a) a local independent auditing firm, or (b) to enter into a contract with the county auditor. In the latter case the audit would not be mandatory upon the county auditor but would arise solely by a contract entered into by the district and the county.

The auditing of the county superintendent's office is now conducted by the county auditor and it is your committee's recommendation that that office should continue this practice.

The committee recommends that in all finance audits that it include all school funds—federal, state, local, escrow, cafeteria, student body and other miscellaneous funds—that may exist. It is further recommended that the audit should check all financial transactions, including verification of transactions, an examination of supplies and equipment inventories and suggestions for the improvement of accounting procedure and examination for possible fraud. The committee believes that the definition of the type of audit to be conducted should be set up by statute.

The committee recommended that a copy of the audit report be filed with the county superintendent and the State Superintendent of Public Instruction.

REPORT OF SUBCOMMITTEE OF ASSEMBLY COMMITTEE ON GOVERNMENTAL EFFICIENCY AND ECONOMY OF INVESTIGATING CONDITIONS OF INDIAN AFFAIRS IN THE STATE OF CALIFORNIA

To the Honorable Speaker and Members of the Assembly

Your subcommittee, duly appointed by Chairman Field to investigate and determine the desires of the California Indians relative to future funds to be allotted to the Attorney General's Office for further prosecution of their claims against the Federal Government, desires to make the following report:

HISTORICAL INTRODUCTION

During the course of this subcommittee's investigation it became apparent to the membership that the significance of today's testimony had its origin in the happenings of yesterday—a true evidence of the doctrine of cause and effect. To facilitate one's understanding of the testimony presented to this committee, one must familiarize himself with the historical background of our California Indians. Briefly, let us enumerate the events and factors that have created a need for a legislative committee investigation.

The conclusion of the war between the United States and Mexico resulted in the Treaty of Guadalupe Hidalgo, consummated in the year 1848. Under this treaty, California and other territories became an acquisition of the United States—their inhabitants included. Thus, the California Indian became part and parcel of the United States. The President of the United States, with the object in view of creating a just and equitable settlement with the Indians of California, appointed, in accordance with the provisions of the act of September 30, 1850, three commissioners for the purpose of conducting negotiations as representatives of the United States with the tribes and bands of the Indians of California. Eighteen treaties were executed and agreed upon in a supplemental agreement between the years 1851 and 1852. Direct and personal negotiations were entered into with the Indians from the Mexican border to the Oregon boundary.

Lacking the intimate knowledge of business contracts, the Indians of this State consented to a blanket cession, quit-claim and relinquished three-fourths of the entire acreage of California in return for promises of various goods, lands and services. Such services were to include agents, teachers, farmers, carpenters and other workmen, together with buildings for their accommodations. Generally speaking, the commissioners and the Indians inaugurated a plan whereby the Indians would be cared for, educated and ultimately promoted to full citizenship rights in exchange for land rights. During the preceding years as far back as the first treaty with the Delawares in 1778, treaties of this nature had been made and ratified. Based upon the customary tradition of some 370 treaties which served as a precedence, the Indians of California demonstrated their evidence of good faith by yielding their ancient habitations and consenting to move to the various reservations set aside for their future occupancy. The onrush of the gold seekers to California played an important role in the tragedy that was to befall the California Indians.

Two hundred thousand miners and fortune-seekers appeared in California in the closing days of 1852—200,000 men and women displaying utter indifference toward the rights granted to the Indians through the supplemental treaty agreement.

The California Legislature met early in the year 1852 and among the various subjects brought forcefully to the attention of its members was the Indian reservation question. Quotations from the official records indicate that the majority of its members, because of the rich lands the reservations were situated upon, felt that a renunciation of the proposed treaties with the Indians should be transmitted to the Congress of the United States. Accordingly, resolutions were adopted by the California Legislature by a vote of thirty-five to six, and forwarded to Washington. On June 1, 1852, President Fillmore submitted the 18 treaties to the United States Senate for ratification and on July 8, 1852, they were separately rejected—the resolutions from the California Legislature had met with success. The results of the rejection of the treaties left the Indians of California exposed, helpless and largely unprotected, to ruthless eviction, unprovoked aggression, bitter persecution, conscienceless exploitation, dispossessed and despoiled of their property without recourse, to become homeless wanderers in the lands of their fathers. Thus, due to unchristian acts of the California Legislature, the California Indians, numbering an estimated 110,000 became homeless vagrants and were quickly reduced in number to a mere 17,000.

In January, 1905, clerical workers in the secret archives of the United States Senate came upon the dust-gathering treaties. The Senate of the Sixty-sixth Session quickly removed the veil of secrecy surrounding the treaties, and public sympathy was making itself heard shortly thereafter. Prominent among these groups has been the Commonwealth Club of California. This group and other worthy organizations have been active in bringing to the attention of the general public the unfortunate situation being endured throughout the long years by our Indians. In 1924 a special section on Indian Affairs was formed to investigate and to report on the conditions of the Indians. They, too, came to the conclusion that the lot of the Indian was indeed a sorry one. Through the years since 1920, bills have been introduced in Congress on behalf of the Indians. Some of these have been through unselfish, kindly and Christian organizations who were horrified by the early treatment of the Indians. Other bills, which we seasoned legislators know and recognize as "cinch-bills," have been introduced by other factors who have not had the welfare of the Indians foremost above their own interest. Testimony to this effect will be brought out later in this report.

It is recommended that each member of the committee familiarize himself with a document known as the "History and Proposed Settlement of Claims of the State of California," from which much of the foregoing history was taken.

PRELIMINARY RESEARCH AND HEARINGS CONDUCTED

Your subcommittee, having neither the time nor money to visit each and every community inhabited by our California Indians, held preliminary correspondence and individual contact during the first week with prominent Indians. This research work has not been charged to the committee's fund. On Sunday, August 18th, your chairman and Mr. Ray A.

Alsweet, retained by the committee as investigator and reporter, left for the northern part of California. Traveling via the northeast routes, many Indian communities and many Indians were visited. During all of this week, a survey was made of the various places of abode of the Indians between Los Angeles and the Oregon border and from the Pacific Ocean to the Nevada boundary. The southern territory, both south and east of Los Angeles, was covered by Assemblyman John W. Evans, who made numerous trips to the centers of Indian populations. Upon concluding the preliminary research survey, it was decided to return to the northern part of the State, operating out of Lake County. Lake County was selected by your committee because of the numerous Indians in Mendocino and Humboldt Counties nearby. Upon the request of your subcommittee chairman, the Honorable Albert I. Stewart joined the committee in Eureka and gave valuable assistance on various assignments.

Our schedule of hearings were held according to prior arrangements with our first hearing held in Sacramento, California; our second hearing in Ukiah, California; and our final hearing being held in Eureka, California. Each hearing was conducted openly with an invitation to all who desired to participate extended. Our meetings were attended by approximately 200 Indians, in which any and all testimony was accepted. In addition, many other citizens attended, and in some instances, gave testimony before your committee.

THE PROBLEM OF THE ROLL CALL

The testimony of competent witnesses indicated that the Indians of California are not satisfied with the present method prescribed by law for the just and equitable payment of compensation due them. One of the most important factors that the Indians of California disapprove of is that concerning Section 7 of the 1928 Jurisdictional Act. (The 1928 Jurisdictional Act was introduced by Representative Lea of California and became law. This law provides the sole measure of relief available to the Indians of California.)

The seventh section of the 1928 act referred to above, provides for a roll call of California Indians to be taken and at the expiration of five years such rolls shall be permanently closed. In accordance with the 1928 act, a roll call was duly taken and completed, being approved May 17, 1933. This has been an alphabetical roll giving the name, relationship in family, ages, dates of birth, degree of Indian blood, tribe, where enrolled and allotted, post office and amount and kind of property owned of each Indian. As of May 17, 1933, the roll was permanently closed and no further roll is being contemplated. The closing of the roll call would have been obviously just, providing the claims of the California Indians against the Federal Government had been concluded shortly thereafter; however, because of the long interval of time between the closing of the rolls and the still uncompleted settlement, it is equally obvious that population conditions have greatly changed. The roll call taken in 1933 is admittedly incomplete because of the many Indians who were absent from the State or unable to register in the census. The California Indians are in unanimous agreement that the roll call should be reopened and that a supplemental roll be taken to provide for the new addition to families, absentees, and the many other changes that have occurred.

THE PROBLEM OF PER CAPITA PAYMENT

Under the provisions of the 1928 Jurisdictional Act, per capita payment of moneys provided for the settlement of the California Indians claim is not provided. The Indians feel that this is an injustice and are desirous of having that section of the law amended so that per capita payments can then be made. Under the terms of the original 18 treaties, and in accordance with the 1928 Jurisdictional Act, the amount that could be legally recovered by the Indians of California was based upon the figure of $1.25 per acre with a total acreage of 75,000,000 acres. To this was attached a provision for "offsets" which had almost disastrous effects on the Indians' claims, and which will be discussed in the following section. Every witness proclaimed his desire for per capita payment in preference to any other method.

THE PROBLEM OF OFFSETS

The present settlement of $5,165,863.46, recently won from the Federal Government by the Attorney General of the State of California, is considered by the California Indians to be completely inadequate. These Indians feel that this five million odd dollars represents only a token payment of an approximate $100,000,000 that they should receive. Briefly, and not with the intent of going into great lengths concerning the history of the trial, it may be stated that the primary objection of the recent $5,000,000 settlement lies in the offsets that were deducted from the original amount sought in the suit. A further complication arose concerning the distribution of the liability of the offsets. Originally the treaties with the Indians in 1852 represented only 18 tribes, which constituted between one-third and one-half of the Indians of California. However, at the present time, the Indian claim is for all the Indians of California. The situation is this: *All* the Indians of California are suing on promises made to from one-third to one-half of the Indians of California, while the offsets representing expenditures for *all* the Indians of California are to be pleaded and deducted from a recovery based upon promises made only to the treaty Indians. Under the 1928 act, all of the California Indians were to have as a gross recovery, the benefits which were to have been paid to one-third to one-half of them. By this proposed settlement this figure was established at $17,816,624 48.

From the above figure, the 1928 act specifies the deduction of offsets for the benefit of all Indians, which amounts to approximately twelve and one-half million dollars. Roughly speaking, the total Indian settlement upon the deduction of the offsets amounted to five and one-half million dollars. The offsets included moneys spent by the Federal Government for the benefit of all the Indians of California relative to the "support, education, health and civilization of the Indians * * * including the purchases of lands."

A large percentage of the Indians of the various counties represented at our meetings made series of severe protests against what they considered, with apparent justification, race discrimination. Perhaps one of the best methods of presenting their views would be to quote from the official records a portion of the testimony given by one Mr. Everett Wilder of Eureka, California.

> Mr. Wilder: "I would like to mention the offsets which took place. We Indians all agree that the offsets used to arrive at the

$5,000,000 figure was very unjust. Originally we had $17,000,000 from which they deducted $12,000,000 in offsets. These offsets were for education and other unjust charges for items which we had already paid for. In effect we paid for nearly everything twice. Some of the items never should have been charged to us once. No one else in the United States, regardless of nationality is charged for the privilege of going to school. Even the cost of the administration of the Indian Bureau is charged to us. Another item is the medical care which we are supposed to receive * * *. Universities should be opened so that Indians would be free to attend. Laws should be rewritten so that each Indian desiring to own land and who can afford to pay taxes be permitted to do so."

Mr. Wilder's testimony on this point expresses adequately the feelings of all the Indians who appeared before our hearings.

THE PROBLEM OF SELECTING A LEGAL REPRESENTATIVE

The problem of unity among our California Indians and cooperation among themselves in the matter of filing their claims against the Federal Government has long been an obstacle to the successful conclusion of their efforts. A subproblem of the above seems to exist in a selection of a legal representative to handle their claims. Your committee, from the first, was cognizant of the dissension in ranks concerning representation and an effort was made to interrogate the various witnesses that appeared before our committee regarding their preference for a legal representative. Startling evidence was brought forth from the first day of testimony through to the last session relative to the type of individuals that have been and still are operating as the "good white father" to our California Indians. Ninety-five percent of the witnesses that appeared at our various hearings were wholeheartedly in favor of retaining the Attorney General of the State of California as the legal representative of the Indians. They expressed complete confidence as to his capabilities, his judgment in the original trial, his honesty and motivations, and his support that they feel will be forthcoming from the California Legislature.

Our first witness that appeared at the hearing in Sacramento, California, gave us the first glimpse of the other "legal" representatives at large in the field. This witness was Mrs. Mildred Leonard of 2002 11th Street, Sacramento, California.

Mrs. Leonard: "* * * and another thing, we Indians are tired of being milked for funds to support certain individuals."

Assemblyman Allen: "You have been solicited for funds—by whom, and for what purpose?"

Mrs. Leonard: "Yes. Mr. Frederick G. Collett asked for funds. He promised us $100,000,000 would be forthcoming from the Federal Government."

Assemblyman Allen: "How much money did he request?"

Mrs. Leonard: "We were supposed to give him $36. We put in $6 each for three times."

Assemblyman Allen: "How many people did Mr. Collett collect from?"

Mrs. Leonard: "I don't know for sure, but I would guess all the Indians in California. I personally know of several hundreds who gave different amounts."

Assemblyman Allen: "In your opinion, Mrs. Leonard, whom do you feel should handle the claims of the Indians of California?"

Mrs. Leonard: "I feel it would be better if the Attorney General would handle it."

Later testimony charged that Mr. Collett has organized an organization known as the California Indians Incorporated. This organization's primary purpose appeared to be to have the Indians of California join the group for the purpose of obtaining approximately $100,000,000 from the Federal Government. Membership dues amounted to a total of $36 for each Indian. Dues were payable at the rate of $6 per year, and at the end of a six-year period no more dues were to be collected. Thirty-six dollars entitled one to a life-time membership. Inasmuch as the Indian family ran generally large, with from four to eight children being average, a sizeable amount was collected over a period of time from each of these Indians. Mrs. Leonard's testimony was our first introduction to Mr. Frederick G. Collett; however, destined to be only the first in quite a lengthy series throughout our investigations. Many of the Indians gave repetitious testimony and therefore your committee will endeavor to only present the essential points of each witness that is quoted.

Mr. Grover C. Sanderson, of Humboldt County, appeared as our second witness in Sacramento, California, and apart from other relevant testimony, had this to say concerning Mr. Collett:

Mr. Sanderson: "I have known him, I mean Mr. Collett, for the past 30 years. I have always regarded him as a faker. He collected money from the Indians to help the Indians. Although I personally have not, and would not, contribute one dime to him, my aunt contributed 60 or 70 dollars in her lifetime that I know of, and perhaps much more that I do not know of. I think it would be more like $100 dollars. She sold Indians things to raise the money. In some of his years I believe that Collett easily collected from $60,000 to $120,000. The last figures that I had, he was getting about $1,300 per month. I do know that he has taken money from the Indians, but has never done anything for them. I am in favor of an advisory board being set up composed of Indians, so that they may represent us and can advise with the Attorney General, who I think should handle our case for us."

Further testimony taken during the hearings disclosed evidence that Mr. Collett had first appeared among the Indians as a minister of the Congregational Church in the early 1900's. Advised by the Indians of their disappointment regarding the treaties of 1852, Mr. Collett wrote Washington, D. C., and gained copies of these treaties. Other organizations had in the meanwhile been investigating the matter and Mr. Collett appears to have used their work as a background for his own ideas. It appears that this was Mr. Collett's first entry into the Indian claims matter. Shortly thereafter, he organized the Indians of California, Inc. To meet "necessary" expenditures, a standard of dues was set up as

previously explained. However, the dues collected were only a small portion of the amount of money collected by this man for the purpose of aiding the Indians of California. Donations were forthcoming from the Indians, and it appears that they were victimized almost to the extent that the treaty of 1852 had been able to accomplish. Witnesses have testified that over the past 30 years, that close to $1,000,000 have exchanged hands from the Indians of California to Mr. Collett or his representatives. Congressional Records state that during the years 1921 and 1923, Mr. Collett collected in the form of dues alone, over $180,000.

Mr. William Fuller, of Tuolumne, California, testified at our hearing in Sacramento, California, and he had this to say concerning the activities of Mr. Frederick G. Collett:

> Mr. Fuller: "I have known Mr. Collett for a good many years. I was a delegate of his that went back to Washington. There were several others along with me. The Indians paid their own expenses, but they were to get it back out of the fund collected by Collett. At the time when the convention was over, we were to depart for California, but some of the Indians had no money for the return trip. Mr. Collett proposed that some of us Indians with a little money should help the other Indians pay their way home."
>
> Assemblyman Evans: "Mr. Fuller, how much money did you ultimately receive for the trip to Washington and back home again?"
>
> Mr. Fuller: "I'm ashamed to say. One day Mr. Collett said, 'I know the expenses were heavy, and that you are able to take care of yourself, but here's $10 for you!' "

It is alleged by Mr. Stephen Knight, of Upper Lake, California, who appeared at our Ukiah hearing, that Mr. Frederick G. Collett was defrocked by the Congregational Church because of certain activities among the California Indians. Mr. Knight, appearing as a witness, gave the committee a valuable insight into the activities of this man. Mr. Knight at first worked with Mr. Collett and helped him to set up his organization. He claimed in his testimony that Mr. Collett had cheated and lied to the Indians in every way possible. An excerpt from Mr. Knight's testimony might aid the reader in understanding the type of individual that our California Indian has been forced to turn to in lieu of proper legislation to adequately provide him with counsel.

> Assemblyman Allen: "Did Mr. Collett have anything to do with the setting up of the Jurisdictional Act of 1928?"
>
> Mr. Knight: "Well, he likes to make the Indians think so. I, of course, know that he did not, as he was a fugitive from justice, (Mr. Collett was brought up on a charge of selling $700,000 worth of valueless stock in a company) and was in Canada at the time the bill was signed. He likes to pretend that he was there."
>
> Assemblyman Allen: "Were you ever at any meetings where Mr. Collett collected moneys for the purpose of helping Indians?"
>
> Mr. Knight: "Yes, I was. This Collett is a cheap crook. He not only cheats the Indians and milked them on memberships, but he also collected from the whites too. Once when I was at a church affair, Mr. Collett made a collection. I watched very closely, as did my friend who was with me. As they put the money on a table, both my friend and myself estimated that at least $500 had been collected.

We decided to ask Collett how much he took in, just to see what he would say. I knew that he would lie about it. I went to Mr. Collett and asked him how much he had collected, and he told me about $75. We should find some way of stopping Collett from obtaining any of our $5,000,000. Mr. Collett and Mr. Willis divided the State up, and took the Indians."

Assemblyman Evans: "Who is Mr. Willis, and when you say 'took the Indians,' do you mean that they took money from the Indians—is that correct?"

Mr. Knight: "Mr. Willis is Mr. Perl Willis, of San Diego, California. Willis took the southern part of the State and Collett the northern part of the State. They took the Indians for their money, all right."

Further in Mr. Knight's testimony he bore witness to the fact that on numerous occasions the Indians took Mr. Collett into their homes to live, feeding and clothing him. It seems to your committee that Jimmie Durante's famous crack that "everyone is trying to get into the act" is quite appropriate in this instance. The "act" appeared to be overcrowded indeed, but in light of Mr. Everett Wilder's testimony on this phase, the "actors" seem almost too numerous to mention.

Mr. Wilder: "* * * these are the most important things which I think should be brought outlined. The most important matter being Mr. Collett, Mr. Willis, Mr. Thomas and Senator Wheeler and Grorude. First of all, I should like to deal with Mr. Collett. I attended meetings and donated time and money. Collett worked through all of these men. I did my best to expose him. He sent letters out to tell what a bad Indian I was and not to have anything to do with me. Collett borrowed money from the Indians, and these sums were never repaid. He also collected donations, held dances, beauty contests, etc., for which he never gave receipts. I feel that the State of California realizes the injustice that has been done to us and desires to help us I can't see any necessity for paying out moneys of the $5,000,000 that we presently have in the United States Treasury for attorney fees when we have a perfectly reliable Attorney General's office. He has done an excellent job for us so far, and we feel that he will continue to do so. Mr. Collett maintains that private attorneys would have done better and received a more just claim. I disagree with him. The Attorney General did the wise thing by making an out of court settlement. This way we receive $5,000,000 and can still file further claims. Under the Stegler Bill, we are allowed five years to file further claims. These claims must be completely settled within 10 years. Yes, I feel that an appropriation from the State of California for the Attorney General, so that he can adequately represent us in Washington would be an ideal method. It is foolish to think that private attorneys can represent us. For over 90 years we have endeavored to get together among ourselves but with no success."

Mr. Wilder has expressed the feelings of nearly all of the Indians at our hearings when he brought forth his views concerning the representation of the Indians by the Attorney General.

One of the reasons that these Indians prefer the Attorney General, rather than the employing of private attorneys, was brought out through the testimony of Mrs. Bertha Stewart, of Smith River, California, who testified at both our Sacramento and Eureka hearings.

> Mrs. Stewart: "Once when Mr. Collett came to an Indian sector and claimed that he could aid them in getting approximately $100,000,000 if they would but aid him in obtaining funds for the purpose of going to Washington to put bills through, Indians came to this sector from all over the country to donate money. They piled up the money on the top of a large table, and the table was so covered with bills that it overflowed upon the floor. Mr. Collett never gave a receipt for this money, but merely gathered it up and took a train for Washington. He wired the Indians at a later date and said he had achieved initial success in introducing certain bills but would need more money. He came back to this town for more money. Apparently the Indians misunderstood Mr. Collett, as they met the train with all sorts of pots, pans, sacks, baskets, etc., in order to carry away their portion of the $100,000,000 which they thought that he was bringing along for them. Such stories as this are very common among the Indians as far as Mr. Collett is concerned."

Mrs. Stewart mentioned in her testimony certain bills that Mr. Collett was endeavoring to put through Several times during the course of the investigation, mention was made of these bills, and the general reaction towards them was very negative. Among these bills was Mr. Collett's bill S. 2504, calling for the payment of services rendered the California Indians. These services would presumably pay for the expenses for attorneys and other fees relating to the act of May 18, 1928, and for all other purposes. Another bill which Mr. Collett is given credit for by the Indians of California was Bill 6416. Mr. Collett, in many instances it was alleged, seemed to be persistently at work on bills that would provide for the necessary fees of attorneys.

Mr. Alvin Hostler, of Humboldt County, adequately expressed the general feelings of the Indians in attendance at our hearing in Eureka. Mr. Hostler may be quoted as saying "I wish to state that I am not in favor of Bill 6416. This bill was drawn up in 1946 by Mr. Collett and his men. At the last session of the State Assembly, a committee was appointed to investigate this affair. Mr. Collett knew of this. Yet he deliberately got up petitions to get delegates sent back to Washington to draw up Bill 6416. I think that if he and his men were sincere they would not have spent $25,000 to chase back to Washington to put through such a bill when they knew your committee was coming into the field." (Bill 6416 provided for a delegation of Indians to meet and to select the Indian's representative in order to act in their legal affairs. It appears to your committee members that this bill merely represents a duplication of the work that we are endeavoring to accomplish. The significant factor appears also to be that this bill is an effort to take the task of aiding the Indians away from the California legislative committee and give it to private individuals who may in turn use it for private gains and purposes.)

Turning aside from Mr. Collett and his questionable activities among our Indians, we encountered another representative in the crowded field of Indian affairs. Mr. Ethan Anderson, of Upper Lake, California, brought us the first glimpse of Mr. Herman S. Nielsen, of Monterey, California.

Mr. Anderson: "I have known Mr. Collett for a long time. For awhile I believed in him. He deceived us, and I lost faith in him. I see no reason why he or anyone else should get a portion of the $5,000,000 due us Indians."

Assemblyman Evans: "In your statement just made you said 'Mr. Collett or anyone else.' Are there others in this too?"

Mr. Anderson: "Oh, yes. I have here a letter which I want to submit to the committee. It is from Mr. H. S. Nielsen."

(Because this letter so completely illustrates the web of entanglement that has surrounded the Indians of California, and the individuals who are endeavoring to obtain a portion of whatever the Federal Government feels is a just and equitable settlement, we are quoting Mr. Nielsen's letter completely, as written.)

The letter appears with a centered letterhead containing the information listed herein: "Herman S. Nielsen, Plumbing - Heating - Sheet Metal - Floor Furnaces - Water Heaters - Duro Pumps; Phone 3797; P. O. Box 25, Monterey, California." The letter is addressed from "Seaside, California," and is dated "July 13, 1946." The letter addressed to Mr. Anderson states:

"In reference to your letter of June 27, 1946, you stated that your representation had ceased, as I am associated with Mr. Collett. (If I am.) Our contract does not prohibit me from association with any special individual. For your information, you entirely misunderstand law and order and limitations. You must know that Mr. Collett has been working for the Indians for approximately 30 years All this is known to the Committee on Indian Affairs, and the Indian Bureau, and regardless of all money that you Indians have given or loaned to him, was given to him in trust. for the purpose of helping to gain your constitutional rights. After about 30 years of service, it is impossible for you Indians or anyone else to discharge this man without final compensation by cash settlement, and the same applies to Mr. Fred Niebling and myself. Both of us having spent considerable time and money to bring your case to a final conclusion. and if you and your associates feel that we should get out of the picture, you can be assured that before there are any cancellations of contracts or agreements, we shall be paid for money spent and services rendered. Our contract is registered in the Department of Indian Affairs in Washington, and the Senate and House are well aware of the circumstances, due to the various meetings and discussions of all affairs involved.

"Regarding the Indians, if you people will use your heads and cooperate with the people who have gone to the bat for you, the situation can be settled and paid off, I would say, in less than one year. Don't forget that the Committee on Indian Affairs also insist that Mr. Collett must pay back to the Indians any moneys borrowed on

notes, etc., when deal is consummated. And if the cooperation of you people fails to come to the front, I don't believe that people of 50 years of age today will live to collect compensation due them.

"I understand that the Attorney General of the State of California cannot go back and handle this case for you, and if you don't believe it, you may take this letter to him. Yes, it is a fact that we had you write a letter of cancellation to the people who were previously helping you, which was necessary, as you can only have one group of persons legally representing you.

Respectfully yours,

HERMAN S. NIELSEN

MLS:HSN (written in ink) By, M.L.S., Secty."

The committee feels that this letter indicates the type of persons who have been representing the Indians of California as their friends and "great white fathers."

THE PROBLEM OF THE INDIAN BUREAU

Another interesting point that was brought forth by our investigation was the part that the Indian Bureau plays in the everyday lives of the Indians of California. Nearly every witness that appeared at our various hearings mentioned the Indian Bureau and in every case there was resentment, disappointment and hostility towards such a bureau. This hostility however did not extend to some of the agents. The Honorable E. M. Bogges, of Eureka, California, was of great assistance to this committee. Mrs. Bertha Stewart, whom we have mentioned previously in this report, had this to say:

"I represent the Smith River Indians, which number approximately 600 to 700 Indians. We held a meeting last Monday night and I wish to submit to this committee our recommendations. I desire to give testimony against the Indian Bureau. Lands are divided into reservations which are situated upon very poor land. Many times the land cannot be cultivated. Many of us live on rancheroes and the housing is especially poor. Many have no plumbing and we have to carry our water for over a mile. These are carried as offsets, yet the title to them remains with the Indian Bureau. I feel that the Indian Bureau does more harm than good. It has been estimated that out of every dollar, approximately 86 cents is utilized in the administrative capacity of the Indian Bureau, and only 14 cents of that dollar which was supposedly alloted to the Indians, ever reaches us. After much discussion on the various advantages and disadvantages of the California Indians under the supervision of the Indian Bureau and its agencies, it was decided by unanimous vote that the Del Norte County Indians would be better off if severed from the Indian Bureau. Following are some of the reasons given in this decision: (1) Veterans on Rancheroes are unable to get loans for the building of homes, (2) repeated appeals to the local Indian Agency in Eureka for a water system on the Elk Valley Rancheria have brought no beneficial results, (3) non-Indians are permitted to encroach on Indian lands in spite of urgent requests by Indians to local agency officials to prohibit such action, and (4) inadequate medical services where funds are appropriated for such services."

Mr. Ethan Anderson, who has been quoted as a witness in prior testimony, also gave us this graphic description of his attitude towards the Indian Bureau.

> "I believe that the Indians should be emancipated from the rule of the Indian Bureau. They treat us like children. They still feel that we are not capable of holding land, buying and selling, but still we are able to fight for our country when the United States is at war. We, as a nation, have progressed, while the bureau has stood still. It should not be that the Indian of today should have to pay for his education, when all other nationalities in the United States are given free public education."

Further testimony was given by Mr. Lawrence McCarthy, of Eureka, California; Mr. Smith E. Brenard, of Eureka, California; and Mr. Alvin Hostler, of Humboldt County, California, who all expressed their opinions that the Indians have outgrown the Indian Bureau in its present form. While it is not the custom of the committee to engage in political philosophy, this committee in its entirety, would like to point out the degrading results brought about by the Indian Bureau over the past 90 years. If ever the negligible results could be first hand observed, your committee certainly was exposed to a great lesson in ideology of collectivism. Here is collectivism and communal living at its highest, which certainly reflects the ancient idea that the boss can do no wrong; that the ordinary people are just too dumb to know what it is all about; and that they must have someone to push them around. There are notions of security without sweat, wealth without work and that the world owes everyone a living, and that the government can bring these things about without a price. The Indians certainly taught the members of this committee one great lesson in liberty. The committee will agree that it is possible to have food, clothing and shelter as well as protection from the government in meager quantities and to live in these hovels known as rancheros, but the price is freedom. Our American Indians, as slaves and convicts do, have all these things but they have lost all else. The decay of moral fiber is dangerously certain once men and women succumb to the propaganda of professional hand-holders and become convinced that the world owes them a living. It is on this basis that the American Indian desires the Legislature of California to petition each member of the House of Representatives and the Senate that the Indian Bureau be abolished from the State of California.

THE PROBLEM OF LIQUOR SERVING

One of the problems of minimum importance to the committee, but of major essence to the Indians was the problem concerning liquor. The Indians believe that the present laws are discriminative against them and an affront to them as a race. While in each instance the affiant with great deliberate care pointed out that he was an abstinent individual, the point was brought forth that the prohibitive sale of liquor to Indians goes back to the days when, as a protective measure against renegades, it was a necessity. The Indians feel that their young men served their country in time of war, and that they should now have the full rights of citizenship. It is further felt that liquor used in a sensible fashion should be permissible.

RECOMMENDATIONS

In light of the early action taken by the California Legislature in their opposition to the ratification of the Indian Treaties of 1852, and the benefits that would ultimately be derived from such a complete settlement as herein set forth in the above report, your committee can only arrive unanimously at the following conclusions and recommendations:

1. That an urgency measure be passed which will empower the Attorney General of the State of California to act as counsel without cost to the California Indians in assisting them to properly prepare their case in accordance with the treaty agreements of 1852 and the present Jurisdictional Act, with a sufficient appropriation to carry out the provisions of the measure.

2. That Congress be memorialized to begin an orderly liquidation of the Indian Bureau and to grant full and complete citizenship rights to the Indians of California.

3. That such lands, rancheros, institutions, and other physical properties and real estate be declared surplus property and that the Indians of California have first claim to bid on such surplus.

4. That proper and suitable legislation be introduced to protect the California Indians and other citizens against unscrupulous persons soliciting and demanding contributions, donations or any other thing of value for alleged causes or services.

Dated: Sacramento, California, January 15, 1947.

Respectfully submitted,

DON A. ALLEN
Chairman Subcommittee

C. DON FIELD, *Chairman*
Governmental Efficiency and Economy Interim Committee

REPORT OF SUBCOMMITTEE OF ASSEMBLY COMMITTEE ON GOVERNMENTAL EFFICIENCY AND ECONOMY OF INVESTIGATING CONDITIONS AT PRESTON SCHOOL OF INDUSTRY AT IONE, CALIFORNIA

To the Honorable Speaker and Members of the Assembly:

Pursuant to request contained in Assembly Resolution No. 51, the Assembly Committee on Governmental Efficiency and Economy appointed a special committee for the purpose of investigating conditions at the Preston School of Industry at Ione, California, with particular reference to the underlying causes for the numerous escapes which had occurred at that institution.

Your subcommittee herewith submits its report of its investigation, together with its findings and conclusions.

The subcommittee made and conducted hearings at the Preston School of Industry at Ione, California, and at the State Capitol at Sacramento from August 5 to August 9, 1946, inclusive, and later on January 3, 1947, at Sacramento. At these hearings the subcommittee heard the testimony of 33 witnesses, including the members of the California Youth Authority and Robert V. Chandler, the Superintendent of the Preston School of Industry, as well as employees and inmates of the school. During the course of the hearings at Ione, the subcommittee also made an inspection of the School grounds and buildings, and other facilities.

OCCASION FOR THE INVESTIGATION

During the month of July, 1946, it came to the attention of the Legislature that numerous escapes had occurred at the Preston School of Industry; that residents in the vicinity of the institution had been terrorized by the escaping inmates; that there were reports of a condition of unrest at that institution and dissention among its employees; that a petition had been circulated and signed by citizens of Ione and surrounding communities calling attention to alleged conditions at the school and requesting corrective action by the proper authorities. Thereupon the Assembly adopted House Resolution No. 51 requesting the appointment of a subcommittee of the Assembly Committee on Governmental Efficiency and Economy to make an investigation of the situation at that institution and to report its findings to the Governor, the California Youth Authority and the Speaker of the Assembly for appropriate action.

The Preston School of Industry is located at Ione, California, and is one of the penal institutions under the jurisdiction of the California Youth Authority. Boys of the age of 15 and over who have been convicted of offenses are confined there under the California Youth Authority Program which has for its object the rehabilitation and reformation of youthful offenders. From 1920 to 1941 O. H. Close was superintendent of the school. In 1941 he was appointed a member of the California Youth Authority but still retained his position as superintendent until September, 1945, when he resigned that position and the present superintendent, Robert V. Chandler, was appointed to that position. Under

Mr. Chandler are the assistant superintendent, James Eva, in charge of the Training and Treatment Division, and Edward Morrin, in charge of the Division of Domiciliary Care and Welfare. Under Mr. Morrin there are one head boys' group supervisor, five assistant head boys' group supervisors, and 88 supervisors. The supervisors are the men charged with the custody of the boys and are commonly known as "guards." A number of other employees make up the personnel of the school and its various departments. At the time of the hearings, the inmates totalled approximately 600, with a total of approximately 235 employees.

ESCAPES

Evidence at the hearings indicated that from September 5, 1945, the date on which Mr. Chandler assumed his duties as superintendent, to August 1, 1946, there was a total of approximately 200 escapes from the school, or an average of approximately 20 per month. Some of these boys had a record of from one to five previous escapes from Preston, in addition to previous escapes from other institutions. At least 75 of the boys who had escaped once from Preston had made previous escapes from other institutions ranging in number from 1 to 16. It was testified that for a period of 18 years up to September, 1945, escapes from the school had averaged only about five a month; that the largest number in any one year during that period was 75, and the smallest 50.

During the early part of 1946 a wire fence was built on the school grounds at a cost of $37,000. This fence was designed to aid in preventing escapes, but, according to the testimony escapes became more numerous subsequently to its erection. In the course of some of the escapes in July, 1946, some of the supervisors were attacked. Subsequently to the last mentioned escapes wire entanglements were constructed along the top of the fence as an additional preventive measure.

L. P. Gebhardt, a justice of the peace of Amador County testified that the inhabitants of Ione and the surrounding communities were in fear of the inmates who escaped from Preston; that he had heard complaints of the theft of cars, jewelry, and other personal property by these escapees, and also an assault by them upon the persons of some of those inhabitants. Judge Gebhardt also testified that there were four complaints on file then in his court charging offenses against escapees, but that no action had been taken with reference to them, although they had been filed many months prior to the time he testified.

The evidence also disclosed that the inmates at Preston had been wearing uniforms purchased from the United States Government and previously used by members of the armed forces, and in many instances bearing the insignia of one of its branches; that escaping inmates wearing these uniforms had been mistaken for service men and had been picked up as passengers by drivers on the highway upon the assumption that these inmates were members of the armed forces.

As to the reason for these escapes, some of the witnesses testified that while a certain number of inmates are bound to make escapes in any institution similar to that at Preston, yet, there were particular reasons for the escapes at that school. Gordon Riley, the clinical psychologist at the school, testified that in his opinion the emotional factors behind the escapes were: (1) Fear of other boys, and (2) An expression of rebellion. The fear was of racial groups or dominant groups in the

school, or, in some instances, of being forced into homosexuality. However, his opinion was that the expression of rebellion was a hopeful sign, and indicated a tightening up of discipline which would eventually bring about a better and more orderly condition.

Other underlying causes of escapes were listed as follows:

(1) The school has been receiving an increasingly larger percentage of incorrigibles who are impossible to handle in a minimum security institution such as Preston, and the institution at Lancaster, which was intended to take care of boys too old or too incorrigible for Preston but too young to be sent to the penitentiary, has not yet been completed; also because of the crowded conditions at Preston it was necessary to send the better boys to the forestry camps.

(2) The boys are confined for long periods of time in the county jails before being transferred to Preston; there friendships are established and escapes planned in advance.

(3) Pressure brought upon the boys by other inmates.

(4) Erection of the fence has been a challenge to some of the boys and has lessened the degree of supervision upon the part of some employees.

(5) Rewards in form of credits have been given boys for apprehending escapees. Inmates have induced newcomers to escape, then assisted in their capture and thus obtained credits.

(6) Strict enforcement of rules by some of the new supervisors after boys had taken advantages of the laxity upon the part of some of the older employees.

(7) Delay of Parole Board in deciding boys' application for parole.

However, witnesses who testified on the subject were almost unanimous in their opinion that the escapes stemmed from the lowered morale of the employees and the inmates of the school, which was in turn the result of the conditions of unrest and dissension among the employees. The blame for this situation was laid at the door of superiors by the employees, and the superiors charged that it was the fault of the employees.

An analysis of the testimony of the various witnesses who testified before the subcommittee reveals a large number of varying causes behind the serious condition of unrest and confusion at the school; that this condition existed was conceded by all witnesses; as to the causes underlying the situation, witnesses differed in their opinions, but many were in accord as to the main sources of the difficulty. From its review of the testimony, your subcommittee finds the following to be the major causes of the unsettled conditions at Preston which brought about the lowering of the morale of both employees and inmates.

NEPOTISM

It was testified that there were at least 22 instances of husbands and wives both employed at the same time at the institution, in addition to 14 or 15 other sets of close relatives also employed there. It was found that this situation was not conducive to proper cooperation upon the part of those particular employees. They have a feeling of antagonism toward any change in administration, and if it were necessary to discipline one, then the other becomes resentful. However, it was found that because

of conditions during the war it was difficult to find suitable employees, and those who were competent would take the position only if they could bring their family with them.

MANPOWER

During the war it was necessary to choose the supervisors upon a duration basis; 34 out of 80 had been thus employed. There were not enough living quarters for employees at the school, salaries were low, and with no chance of advancement, and living conditions poor; the qualifications for the jobs were necessarily low because the school is isolated. Because of the shortage of help it was necessary to put men to work before they were properly trained. All of these factors tended to the inefficiency. It was testified that the school lost 88 percent of the old group supervisors during the war and the temporary men had more difficulty in enforcing discipline. Most of the witnesses seemed to feel that the inefficiency of the employees was caused by their being put to work before they were properly trained. While there is an inservice training program in effect now because of the immediate need for men, it has become necessary for the employees to get their training while they are actually working.

LACK OF SEGREGATION

It was testified that at the time of the hearing there were about 600 inmates at the school—40 to 45 percent are Mexican and colored. These racial groups have had feuds before coming to Preston and their antagonisms are continued at the school. There are only 14 different places at the school where boys can be separated, and it is impossible to completely separate these rival gangs and their leaders.

The school does not have the facilities for segregating the psychopathic delinquents or the boys convicted of sexual crimes, and of necessity these boys are mixing and associating with the other inmates. In this connection it was testified by one of the witnesses, a Christian Science welfare worker at the school, that sodomy was practiced at the institution and that boys were compelled to indulge in homosexual practices by force and other forms of pressure, such as refusing to give the victim his meals in the dining room. This same witness testified that one boy was compelled to engage in a "marriage ceremony" with another boy. This was part of a ritual indulged in by the homosexuals and it consists of inflicting a cut on the arm of each boy, crossing their respective arms, and thus mixing the blood of each. One is then designated as "Mrs."

It was the opinion of the superintendent that the homosexuals should be segregated and each have individual, locked rooms.

It was testified that an appropriation had been made by the Legislature for a separate institution for the psychopathic delinquents, but because of postwar building difficulties construction had not yet begun.

ELIMINATION OF CADET OFFICER DISCIPLINE

Boys who are known as "cadet officers" are chosen from among the inmates to lead and have charge of the other boys under the supervision of the supervisor. These cadet officers are themselves inmates, and in the past have been chosen because of their strength and physical ability to administer punishment. Although there is a rule prohibiting disciplinary

action by these cadet officers and their use of force upon the other boys, a custom had arisen by which these cadet officers were permitted to discipline boys in the ranks, either on their own initiative or at the behest of the supervisor. Under the new regime of the California Youth Authority efforts have been made to eliminate this practice and also to choose these cadet officers upon the basis of leadership ability rather than brute strength alone. As a result, some of the supervisors became dissatisfied and felt that they had lost what to them was an effective method of discipline. They are now compelled to use their own initiative in devising other proper methods of control.

SICK-LEAVE

It appears from the testimony that employees are allowed 12 days sick-leave a year with pay; that this time can be accumulated up to a total of 100 days and taken prior to severance, but that number can be increased in the discretion of the Personnel Board. The superintendent testified that in one instance one employee was given sick-leave of two years and three months, and another nine months, each with full pay. The evidence disclosed that from January 1, 1945, to June 15, 1946, the total sick-leave for an average of 218 employees at the school was 1,494 days at a cost of $15,445. It was testified that it was difficult to determine the validity of the applications for sick-leave, but that in many instances where an employee who has a certain day off in the week requests permission to take the following day off and it is refused, he takes the day off anyway and reports that he is sick. When an employee is away from his work it throws an additional burden on the man who follows him on the next shift. In the custodial department alone, the evidence revealed that 735 days sick-leave were taken between September 1, 1945, and June 1, 1946, and that that was an increase of 158 percent over the period from January 1, 1945, to September 1, 1945. In the opinion of the assistant superintendent in charge of the custodial department, all of the sick-leaves claimed were not bona fide, and, in his judgment, his department would have functioned properly if the sick-leave privileges had not been abused. He stated that because of so many sick-leaves being taken, other employees had to be called back to work time and again, and were compelled to work overtime, with a resultant lowering of morale and inefficiency in the functioning of the department. Most of the witnesses who testified on the subject were of the opinion that the abuse of the sick-leave privilege was one of the main contributing causes of the unrest and confusion at the institution.

Under date of August 6, 1946 the Personnel Board was requested by the subcommittee to make an investigation and report concerning the sick-leave privileges at the school. When the subcommittee reconvened at Sacramento on January 3, 1947 no report had yet been made. John F. Fisher, Assistant Executive Officer of the Board, testified before the subcommittee on January 3, 1947, and stated that he had just completed the report of the Personnel Board's investigation of that subject but that the report had not yet been approved by the board. He added that it could not now be approved until the board met on January 17th next. Your subcommittee is at a loss to understand why the investigation requested in a matter so vital to the public interest should have been delayed for a period of five months. Because of the fact that the report

of the investigation has not been approved by the Personnel Board it is impossible for us to incorporate it, or any part thereof, in the subcommittee's report.

SMOKING, AND DRINKING OF INTOXICATING LIQUOR BY INMATES

The rules of the school prohibit smoking by the boys. However, despite the rule and despite the state law prohibiting the selling or giving away of cigarettes to minors, it appears, according to the testimony adduced before the subcommittee, that cigarettes are not only smuggled into the school for use by the boys, but the boys are able to buy them through the supervisors. The superintendent himself testified that 50 percent of the disciplinary problems were caused by the no-smoking rule; that the rule encouraged the boys to cheat, lie and steal in order to get a smoke. Both he and Mr. Eva, the Assistant Superintendent stated that in his opinion it was not humanly possible to enforce the law. Mr. Chandler testified that he had asked the California Youth Authority to change the rule but they stated they could not do so. He said that 85 percent to 95 percent of the boys were smoking before they came to Preston, and that the rule had always been violated and he did not oppose smoking by the boys as long as it did not cause danger to life or property.

It appears from the evidence that cigarettes were smuggled into the school by visitors, that the boys were able to purchase them from supervisors and that they were used as gifts to the boys from supervisors in return for the boys "putting in a good word" for the supervisor with his superior officer. Opinions differed among the employees as to whether the rules should be changed and smoking by the boys permitted. Mr. Chandler and Mr. Eva are in favor of permitting smoking, while some of the supervisors believe there should be no smoking at all.

The evidence disclosed also that the boys were able to, and did, obtain intoxicating liquor at the school and on occasions became drunk from its use; that some of the boys made their own beverage out of meat, fruit, sugar, and water. This concoction was known as the "Preston cocktail." Other witnesses testified that the liquor could be purchased from the supervisors. Two inmates, Joe Lucetti and Thomas Souza testified that they had obtained liquor and cigarettes from the supervisors. Joe Lucetti had a record of two escapes from Preston and he said that he was drunk on the occasion of the first escape. He said he had obtained liquor many times. Both of these boys gave to the subcommittee a list of the names of supervisors who, they claimed, had either given or sold liquor and cigarettes to the boys. Included in this list were two supervisors, one of whom has an interest in a saloon in Ione, and the other works in the saloon as a bartender when he is off duty from the school.

These boys further testified that the inmates gambled, played poker and shot craps and that this went on with the knowledge of the supervisors. In this connection it may be noted that another one of the inmates, a 15-year old boy, testified that he had drunk intoxicating liquor and had gambled before coming to Preston and that at Preston he and other boys had played poker and blackjack for money. We should add here that the witnesses Lucetti and Souza at the time they testified and gave the names of the supervisors who, they claimed, sold liquor and cigarettes to the boys, had each made his application for parole.

At its hearing on August 9th last, the subcommittee adopted a resolution requesting the California Youth Authority, the Attorney General and the Personnel Board to make a full investigation of the flagrant abuse and violation of the rules and regulations by civil service employees of the school in the giving, selling and supplying of liquor and cigarettes to the inmates of the school and that such investigation set forth the actual conditions as found with a determination of who is responsible for the existence of such conditions and requesting that steps be taken to remedy this situation and take the necessary action by the Personnel Board to secure the dismissal of such employees.

The subcommittee also requested that a report of the findings of these agencies be made available to the chairman of this subcommittee so that the same could be included in the subcommittee's report. Copies of these resolutions were transmitted to the California Youth Authority, the Attorney General and the Personnel Board under date of August 9, 1946. Five months have elapsed and up to the time of its hearing in Sacramento on January 3, 1947, your subcommittee has had no report on this subject from any of those three agencies. A transcript of the testimony taken at the hearings of the subcommittee on August 5th to 9th, inclusive, was available to the California Youth Authority and to the Personnel Board and that transcript contained full details of the alleged supplying of liquor and cigarettes to the boys by the supervisors, including the names of the supervisors alleged to have been involved in those transactions. It is your subcommittee's opinion that matters of this nature, involving as they do the morale of the school and the welfare of its inmates for whom the State is responsible, should have had more prompt attention by the agencies whose assistance and cooperation were requested.

DIFFERENCES BETWEEN EMPLOYEES AND SUPERIOR OFFICERS

The evidence discloses that there has been a lack of cooperation between the employees themselves and between the employees and their superiors. Many factors were found to be the basis of this situation, of which the following are the most important:

1. Resentment upon the part of employees, particularly those who had been employed for many years, against change in administration and change in methods of handling inmates. Judge McKesson testified that under the system in effect prior to the California Youth Authority the employees did not have to think, and under the present system they must have ability to maintain discipline on their own initiative, and this ability is lacking in some of the older employees.

2. Mr. Chandler, the Superintendent, is resented by some of the employees who preferred the former regime under Mr. Close. Some employees who had been at Preston a long time felt that the school belonged to them; they resented being placed under the jurisdiction of the California Youth Authority, and to them Mr. Chandler represented that body. As one of the witnesses put it, the antipathy toward the California Youth Authority created two factions, one the Preston Group, and the other the California Youth Authority Group, so that it became a case of "*Preston* v *C.Y.A.*" Because of these antagonisms, these employees could not focus their attention on their work.

3. The supervisors were not given adequate support by the heads of their departments in the handling of the boys. It appears that on

occasions the decision of the supervisor in the disciplining of the boy was either changed or completely overridden by the supervisor's superior officers.

4. Changes in the program were made too rapidly. When Mr. Chandler took over his duties as superintendent, he inaugurated certain changes which he deemed of benefit to the institution. There was a tightening up of discipline and an effort to eliminate certain of the laxities which had been permitted under the old administration; this necessitated changes in the program and a shifting of personnel. Too many of these changes were made at the same time, with the result that the employees found it difficult to put the changes into effect in an efficient and orderly manner.

5. A new diagnostic and classification clinic was established. Here the boys are classified as to their mental and physical abilities. Some of the employees objected to this innovation; they felt the boys were being treated too leniently. This attitude caused dissension between these employees and the men who were operating the clinic. With the establishment of the clinic, it was possible to release the house mothers for work in other departments. These employees had been making the boys' beds and cleaning the dormitories. They objected to the change.

6. There has been difficulty in getting employees to carry out orders regarding boys' bathing every night and putting on clean clothes. It appears that unless the boys are properly supervised and watched, they will trade their clothes with other boys; and the enforcement of this rule places more individual responsibility upon the supervisors.

7. In assigning boys to jobs on the detail ground, the boys were formerly checked in groups; under the new system they are checked individually. Certain employees objected to this change and became lax in their handling of the boys under the new method.

DISSENSION BETWEEN STAFF MEMBERS

The evidence disclosed that there was much dissension between members of the staff. Mr. Morrin was opposed to, and made critical observations to other employees concerning, the manner in which Mr. Chandler's program was being carried out He was also in disagreement with Mr. Eva, the other assistant superintendent, in respect of policy procedures Both Mr. Chandler and Mr. Eva felt that Mr. Morrin's attitude was having a deleterious effect upon the rest of the employees and also upon the inmates. Mr. Chandler and Mr. Morrin disagreed upon the enforcement of disciplinary measures, and Mr. Morrin felt that Mr. Chandler's remarks anent the alleged sabotaging of his, Mr. Chandler's, efforts, were without foundation and were the cause of the employees' resentment.

According to the testimony, Mrs. Morrin, the wife of the assistant superintendent, and who has been with the institution since 1929 in the position of teacher-clerk, was also antagonistic toward Mr. Chandler personally and toward his program. It was testified that she had deliberately attempted to cause dissension, and there was testimony from witnesses to whom she had criticised the administration as well as Mr. Chandler and Mr. Eva personally. Dr. Childress, the physician at the institution, was also named as a disturber and fomenter of discord between employees.

Both Mr. and Mrs. Morrin testified before the subcommittee. They denied the charges that they were responsible for the dissension, and they each listed a number of situations which they contended were the causes of the difficulties at the institution. They appeared to be convinced that their criticism of policy procedures was well founded and was for the best interests of the school.

Regardless of the correctness of the positions of the respective parties, the fact remains that the bickering and disagreement between the heads of the various departments did lower the morale of the rest of the employees, with a resultant lack of cooperation between them in the carrying out of their duties Mr. Holton was of the opinion that unless there was a change of attitudes, there would have to be "a change of personalities."

PAROLE AND CREDIT SYSTEMS

Under the system in vogue at the time of the hearings, a boy could apply for parole when he had earned 4,500 credits. These credits could be earned in various ways; a certain number were given on different jobs according to the attitude and conduct of the boy; credits were given to a boy who had been compelled to remain in the county jail while awaiting transfer to Preston; credits were also given for aiding in the capture of escapees from the institution and for returning lost or stolen property; and 50 credits per month were given each boy if there had been no escape from his company during the month. If, because of loss of credits because of infraction of the rules, a boy became a disciplinary problem and it appeared that he would be unable to earn his 4,500 credits, then he could be assigned to a certain project, so-called, where he could earn credits and in a shorter time. Because of the apparent defects in this system, a new grade system is being installed in its place, according to the testimony of Mr. Chandler.

HEARING AT SACRAMENTO ON JANUARY 3, 1947

After the hearings, which concluded on August 9, 1946, the subcommittee recessed and reconvened at Sacramento on January 3, 1947. At the hearing held on that date the committee heard the testimony of four witnesses, John F. Fisher, Assistant Personnel Officer of the Personnel Board, R. P. Everett, Assistant Personnel Technician of the Personnel Board, Frank M. Gay, Boys' Supervisor at the school and Mr. Chandler.

As hereinabove indicated in our discussion of the sick-leave problem at the school, Mr. Fisher testified that the report on that subject made by the Personnel Board, at the request of the subcommittee, had just been completed but had not yet been approved by the board and the subcommittee is without the benefit of its use for the preparation of this report.

Mr. Everett testified that he had made a survey of the job classifications at the school and had found that out of 220 positions only 12 were out of classification and that in those cases the proper adjustments had been made. There was also received in evidence a copy of the report of the Department of Justice of its investigation at the school. This report was dated December 17, 1946, and touched upon the conditions of unrest and dissension at the school. It added nothing to what had

already been disclosed by the testimony taken at the previous hearings of the subcommittee.

It was developed in the testimony of Mr. Fisher and Mr. Everett that because of the investigation of the conditions at Preston made by the subcommittee, and particularly with reference to the subject of sick-leave, the findings of the Personnel Board on this subject could be the basis for a state-wide investigation by the board of all of the state employees in the various departments and agencies of the State for the purpose of ascertaining whether or not sick-leave privileges have been abused; and it was testified also that up to the time that this subcommittee made its request for an investigation of sick-leaves at Preston no other request for such an investigation had come from any other source. Mr. Gay was employed as a supervisor at the school subsequently to the hearings on August 5th to 9th, inclusive. Both he and Mr. Chandler testified that conditions at the school had improved greatly since this investigation started; that the morale of both the boys and the employees had improved and both witnesses were of the opinion that the investigation had had a very salutary effect. Mr. Chandler testified that a number of the trouble-makers at Preston had been transferred to Lancaster; that Mrs. Morrin had been assigned to a position as teacher and was no longer in charge of the records; he produced a graph showing the sharp decline of the escapes since the hearings of the subcommittee in August. The suggestion of the subcommittee that the service men's uniforms used by the inmates be dyed a different color so that the boys would not be mistaken for service men has been carried out.

Mr. Chandler also testified as to many other changes and improvements which had been made as a result of the subcommittee's investigation of the conditions existing at the school as revealed by the testimony adduced.

CONCLUSIONS AND RECOMMENDATIONS

From its investigation, the subcommittee concludes that there has existed at the Preston School of Industry a very serious condition of unrest, confusion and lack of cooperation among and dissension between the employees at that institution; that bickering and disagreements between members of the staff and heads of departments having the actual custody and education of the boys, has caused a lowering of the morale of the employees and has resulted in inefficiency in the carrying out of their duties; that the dissension among the employees has been reflected in the attitude and conduct of the inmates who have taken advantage of the laxity of their supervisors; and that the numerous escapes which brought about this investigation, were attributable mainly to the aforementioned conditions.

In the light of the foregoing, we make the following recommendations:

1. That the inefficient and noncooperative employees at the school be removed as quickly as is possible consistent with the proper functioning of the institution.

2. That, if the removal of such inefficient and noncooperative employees can not be accomplished because of the difficulties involved in civil service procedure, then the Legislative Auditor be directed to study

that procedure and to confer with the Civil Service Commission, the personnel and administrative officers of the various state departments and agencies, and the Attorney General, with a view to formulating some method for the speedy removal of such employees.

3. That the California Youth Authority ascertain what employees have been responsible for the supplying of liquor and cigarettes to the inmates of the school and that that body take such action as may be deemed necessary to secure the dismissal of such employees, or such other action as may be required to correct this situation.

4. That no employee at the Preston School of Industry or at any other state corrective institution shall be associated with or employed in the operation of a saloon or barroom. If it be found that the present compensation paid such employee be not adequate for his support, the problem of juvenile correction is, in our opinion, sufficiently important to warrant the payment of a salary commensurate with the duties and responsibilities incident to a position involving the welfare of youth.

5. That the Legislature give consideration to the enactment of a law making it a felony for any person over the age of 18 years to wilfully assist any inmate in escaping from the Preston School of Industry.

6. That the California Youth Authority make a thorough study of the rules and regulations applicable to the Preston School of Industry and take such steps as are necessary to see that they are enforced. If such study should indicate a necessity for changes in the rules and regulations then such required amendments may be made but the authority should see that the rules as laid down are enforced.

7. That immediate steps be taken by the proper authorities to eliminate nepotism at the school; and that a study of the manpower situation be made for the purpose of ascertaining whether or not additional and more competent employees can be obtained, and also, if an increase in the salaries of employees and an improvement in working conditions is necessary.

8. That no inmate of the school shall be permitted to wear the uniform of any of the Armed Forces of the United States while an inmate of the institution.

9. That immediate steps be taken for the complete segregation of sex offenders and psychopathic delinquents at the school.

10. That the California Youth Authority request the proper authorities to facilitate the completion of the institution at Lancaster so that those inmates of Preston who should be in a maximum security institution may be transferred to Lancaster as quickly as possible.

11. That the California Youth Authority urge the proper authorities to authorize the construction of a separate mental hospital for the psychopathic delinquents.

12. That the credit system at the school be revised, or a different system be substituted therefor, with a view to eliminating the weaknesses present in the system now in force.

13. That a more thorough study of escapes be made by the officials in charge of the institution, and that a full and detailed report of an escape be kept in and made a part of the record of the inmate involved.

14. That the California Youth Authority study the question of sick-leave privileges at the Preston School of Industry, and suggest such changes as it may deem necessary, to the Personnel Board, in order that

the abuse of those privileges as disclosed by the testimony at the hearings, may be corrected.

Dated: Sacramento, California, January 15, 1947

Respectfully sumbitted.

C. DON FIELD, Chairman
THOMAS M. ERWIN, Member
A. I. STEWART, Member
DON A. ALLEN, Member
JOHN W. EVANS, Member
GEO. R. BUTTERS, Member

NOTE: Since the foregoing report was prepared the Personnel Board has filed with the subcommittee its official report of its investigation of sick-leaves at the Preston School of Industry. However, because of the delay in its filing, the subcommittee has not had an opportunity to study the Personnel Board's report, nor has it had the benefit of the board's conclusions and recommendations for inclusion in the subcommittee's report.

Since the above report was prepared, your chairman has received communication from Mr. Karl Holton, Director of the California Youth Authority, stating that he did not receive a copy of the resolution. He did, however, admit he had a copy of the transcript, and the resolution was in the transcript. Mr. Holton expressed his desire to cooperate in every way possible with members of the committee and the Legislature in an endeavor to correct the conditions at the Preston School of Industry.

ADJOURNMENT

At 11.11 a.m., on motion of Mr. Dickey, the Speaker declared the Assembly adjourned until 10 a.m., Thursday, January 16, 1947.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE

FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

NINTH LEGISLATIVE DAY

ELEVENTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO

Thursday, January 16, 1947

The Assembly met at 10 a.m.

Hon. Thomas A. Maloney, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—74.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

O God, who dost realize how difficult it is for us to stand up against dangers too great for our weak nature, graciously grant us health of mind and body, that by the assistance of Thy grace we may be victorious over the sufferings caused by our sins, through Christ Our Lord—Amen.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Loomis, further reading of the Journal of the previous legislative day was dispensed with.

COMMUNICATIONS REFERRED TO COMMITTEES

By the Chief Clerk:

A communication from William K. Smith, Executive Officer, State Personnel Board, received January 6, 1947, was ordered referred to the Committee on Civil Service and State Personnel.

A communication from Emory T. Nunneley, Jr., General Counsel Civil Aeronautics Board, Washington, D. C., received January 6, 1947, was ordered referred to the Committee on Judiciary.

A communication from Eddie Mitchell, Represa, received January 6, 1947, was ordered referred to the Committee on Judiciary.

A resolution, attached to a letter of transmittal from Fred W. Sick, City Clerk of San Diego, received January 6, 1947, was ordered referred to the Committee on Public Morals.

A communication from Walter P. Warmbold, received January 6, 1947, was ordered referred to the Committee on Governmental Efficiency and Economy.

PETITION REFERRED TO COMMITTEE

A petition from Lulu Mignon Murphy, relative to impeachment, received January 6, 1947, was ordered referred to the Committee on Judiciary.

Speaker Presiding

At 10.05 a.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

PETITIONS

By Speaker Collins:

A petition from Birdice H. Phillips, Principal, Shurtleff School District, of Napa, relative to the continuance of Child Care Centers and a sponsoring petition with hundreds of signatures were received, and referred to the Committee on Education.

COMMUNICATIONS

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

CAPITOL CORRESPONDENTS ASSOCIATION
STATE CAPITOL, SACRAMENTO, January 16, 1947

Honorable Arthur A. Ohnimus,
Chief Clerk, Assembly,
Sacramento, California

DEAR MR. OHNIMUS:

The Standing Committee of the Capitol Correspondents Association has investigated applications for authentication as accredited press representatives and recommend the following action:

Approved press cards:

Doug Ward, *People's World*, San Francisco.
Henry A. MacArthur, *Western News Service*.

MacArthur replaces Roger Holmes Wood of the *Western News Service*, whose name may be removed from the list of accredited press representatives.

Sincerely,

EARL C. BEHRENS, President

By unanimous consent, the Assembly ratified the above action taken by the Capitol Correspondents Association of California.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 15, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day passed:

Senate Bill No. 4
Senate Bill No. 34
Senate Bill No. 33

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following bills were read the first time:

Senate Bill No. 4—An act making an appropriation to the Department of Veterans Affairs for the purpose of providing educational assistance for veterans, declaring the urgency hereof, to take effect immediately.

Referred to Committee on Military Affairs.

Senate Bill No. 34—An act to amend Section 1 of an act entitled "An act to suspend those provisions of Article XI, Section 5, of the Constitution, relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately," approved January 24, 1945, relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately.

Referred to Committee on Rules.

Senate Bill No. 33—An act authorizing the sale of certain Folsom State Prison property to the City of Folsom, and declaring the urgency thereof, to take effect immediately.

Referred to Committee on Municipal and County Government.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 14, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Joint Resolution No. 2

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS (RESUMED)

The following resolution was read:

Senate Joint Resolution No. 2—Relative to memorializing and petitioning the Congress of the United States to pass appropriate legislation to control and eradicate and prevent from entrance into this Country of the disease of animals known as foot-and-mouth disease (apthous fever) now present among animals of several states of the Republic of Mexico.

Request for Unanimous Consent

Mr. Clarke asked for, and was granted, unanimous consent to take up Senate Joint Resolution No. 2, at this time, without reference to committee or file.

CONSIDERATION OF SENATE JOINT RESOLUTION NO. 2

Senate Joint Resolution No. 2—Relative to memorializing and petitioning the Congress of the United States to pass appropriate legislation to control and eradicate and prevent from entrance into this Country of the disease of animals known as foot-and-mouth disease (apthous fever) now present among animals of several states of the Republic of Mexico.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brown, Burke, Burns, Butters, Caldecott, Clarke, Collier, Conrad, Cooke, Cramer, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Sherwin, Silliman, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—63.

NOES—None

Resolution ordered transmitted to the Senate.

COMMUNICATIONS

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal:

ASSEMBLY CHAMBER, SACRAMENTO, January 15, 1947

MR. SPEAKER: Pursuant to your instructions, the Chief Clerk has examined:

Assembly Bill No. 94

And reports the same correctly engrossed.

ARTHUR A. OHNIMUS, Chief Clerk of the Assembly

Above reported bill ordered to third reading.

RE-REFERENCE OF BILLS

By order of the Speaker, the following bill was withdrawn from the file, and re-referred as follows:

Assembly Bill No. 94 re-referred to Committee on Agriculture.

WITHDRAWAL AND RE-REFERENCE OF ASSEMBLY CONCURRENT RESOLUTION NO. 11

Mr. Dunn moved that Assembly Concurrent Resolution No. 11 be withdrawn from the Committee on Education, and re-referred to the Committee on Rules.

Motion carried.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 15, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate amended, and on this day passed, as amended:

Assembly Bill No. 62

And respectfully request your honorable body to concur in said amendments.

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

CONSIDERATION OF SENATE AMENDMENTS

Assembly Bill No. 62—An act to add Section 4041n to the Political Code, and Section 25660 to the Government Code, relating to the powers and duties of county boards of supervisors, declaring the urgency of this act and providing that it shall take effect immediately.

The question being: Shall the Assembly concur in the following Senate amendments to Assembly Bill No. 62?

Amendment No. 1

In line 1 of the title of the printed bill, as amended, strike out "4041n", and insert "4041p".

Amendment No. 2

On page 1, line 1, of said bill, strike out "4041n", and insert "4041p".

Amendment No. 3

On page 1, line 3, of said bill, strike out "4041n", and insert "4041p".

Amendment No. 4

On page 2, line 5, of said bill, strike out "4041n", and insert "4041p".

The roll was called, and the Assembly concurred in Senate amendments to Assembly Bill No. 62 by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Clarke, Collier, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Field, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Sillman, Stanley, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—64.

NOES—None.

Assembly Bill No. 62 ordered enrolled.

CONSIDERATION OF HOUSE RESOLUTION NO. 10 (BY UNANIMOUS CONSENT)

House Resolution No. 10

Resolved by the Assembly of the State of California, That the Chief Clerk be authorized to receive from the Members of the Assembly a mailing list of all bills, resolutions, and Histories; to be directed to libraries, chambers of commerce, and other public centers, and to individuals, for general inspection. This list is to be limited to 10 names each, and shall be forwarded to the Legislative Bill Room for regular mailing. No member shall include on the list any state department or employee thereof. The Chief Clerk is further authorized to place accredited newspaper representatives on the regular mailing list as well as the Attorney General, Legislative Counsel Bureau, and the Governor's Office. That in addition to the above, the Chief Clerk shall forward to the Legislative Bill Room for regular mailing, five copies of said bills, resolutions and Histories to be mailed to the State Commander of the American Legion, or to such parties as he shall name; and be it further

Resolved, That no additional mailing list shall be allowed or authorized, unless the sum of_____ ($__) each is paid therefor, to the State Printer and which sum shall be credited to legislative printing and accounted for to the Legislature; and be it further

Resolved, That the total number of bills to be printed in no event, unless otherwise authorized, shall be over two thousand five hundred (2,500).

Resolution read.

Motion to Amend

Mr. M. Philip Davis moved the adoption of the following amendments:

Amendment No. 1

In paragraph 1, line 7, of the typed resolution after "thereof", insert "except state colleges and universities."

Amendment No. 2

In paragraph 2, line 2, of the typed resolution strike out "_____ ($__)", and insert "fifty-five dollars ($55)".

Amendments read, and adopted.

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 10, as amended, at this time.

Consideration of House Resolution No. 10, as Amended

House Resolution No. 10

Resolved by the Assembly of the State of California, That the Chief Clerk be authorized to receive from the Members of the Assembly a mailing list of all bills, resolutions, and Histories; to be directed to libraries, chambers of commerce, and other

public centers, and to individuals, for general inspection. This list is to be limited to 10 names each, and shall be forwarded to the Legislative Bill Room for regular mailing. No member shall include on the list any state department or employee thereof except state colleges and universities. The Chief Clerk is further authorized to place accredited newspaper representatives on the regular mailing list as well as the Attorney General, Legislative Counsel Bureau, and the Governor's Office. That in addition to the above, the Chief Clerk shall forward to the Legislative Bill Room for regular mailing, five copies of said bills, resolutions and Histories to be mailed to the State Commander of the American Legion, or to such parties as he shall name; and be it further

Resolved, That no additional mailing list shall be allowed or authorized, unless the sum of fifty-five dollars ($55) each is paid therefor, to the State Printer and which sum shall be credited to legislative printing and accounted for to the Legislature; and be it further

Resolved, That the total number of bills to be printed in no event, unless otherwise authorized, shall be over two thousand five hundred (2,500).

Resolution read, as amended.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Erwin, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—64.

NOES—None.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 366: By Messrs. Hollibaugh and Fletcher—An act to amend Sections 112 and 113 of the Labor Code, relating to the salaries of members of the Industrial Accident Commission.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 367: By Mr. Wollenberg—An act to amend Section 1183.5 of the Civil Code, relating to the proof or acknowledgment of instruments, declaring the urgency hereof, to take effect immediately.

Without reference to committee.

Assembly Bill No. 368: By Messrs. Price, Heisinger, Butters, Clarke, Kilpatrick, Knight, Lowrey, and Thorp—An act to add Sections 272.5 and 281.6 to the Agricultural Code, relating to bees.

Referred to Committee on Agriculture.

Assembly Bill No. 369: By Messrs. Price, Heisinger, Berry, Butters, Clarke, Kilpatrick, Knight, Lowrey, and Thorp—An act to amend Sections 272, 274, 275, 283, 284, and 285.3 of the Agricultural Code, relating to bee diseases, and apiary equipment brands.

Referred to Committee on Agriculture.

Assembly Bill No. 370: By Messrs. Waters and Huyck—An act to add Section 2021.5 to the Code of Civil Procedure, relating to taking depositions at request of witness.

Referred to Committee on Judiciary.

Assembly Bill No. 371: By Messrs. Price, Kilpatrick, Allen, Bennett, Clayton A. Dills, Fletcher, Hollibaugh, McMillan, and Silliman—An act to amend Section 2709 of the Penal Code, relating to products of the employment of prisoners, and authorizing sale for private use of by-products of agricultural enterprises, under rules prescribed by the Director of Finance.

Referred to Committee on Judiciary.

Assembly Bill No. 372: By Messrs. Allen, Stewart, Evans, Field, Butters, and Erwin—An act authorizing the Attorney General to represent the Indians of this State before the Indian Claims Commission, declaring the urgency thereof, to take effect immediately.

Referred to Committee on Governmental Efficiency and Economy.

Referred to Committee on Elections and Reapportionment.

Assembly Bill No. 398: By Messrs. Dunn, Lyons, Cooke, and Hollibaugh—An act to amend Section 690 of the Elections Code, relating to election officers.

Referred to Committee on Elections and Reapportionment.

RESOLUTIONS

The following resolution was offered:

By Messrs. Evans, Debs, and Doyle:

House Resolution No. 40

Relative to more stringent enforcement by the California Highway Patrol of Sections 621 and 621.5 of the Vehicle Code, relating to rear lamps and reflectors required of motor vehicles engaged in highway travel

WHEREAS, There has been a serious increase in the number of automobile accidents during the past 12 months in this State, with resultant mounting toll of death, injury and property damage; and

WHEREAS, A contributing factor to this heavy accident toll has been the failure of drivers of motor vehicles to maintain in working order adequate rear lamps and reflectors as provided in Sections 621 and 621.5 of the Vehicle Code, which factor is aggravated during the months when visibility is greatly reduced due to fog, rain and other atmospheric conditions; and

WHEREAS, It is imperative that action be taken immediately to alleviate the deplorable accident situation which exists in this State; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

That the California Highway Patrol is directed to strictly enforce the Sections 621 and 621.5 of the Vehicle Code, relating to the display of rear lamps and reflectors of motor vehicles on the highways; and be it further

Resolved, That the Chief Clerk of the Assembly is authorized and directed to transmit copies of this resolution to the Director of Motor Vehicles and to the Chief of the California Highway Patrol.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 399: By Mr. Robertson—An act to add Section 14053.5 to the Health and Safety Code, relating to members of the board of fire commissioners of fire protection districts in unincorporated areas.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 400: By Mr. Silliman—An act to add Section 4573.5 to the Penal Code, relating to importation of drugs into prisons, institutions, camps, farms, and other places under the jurisdiction of the Department of Corrections.

Referred to Committee on Judiciary.

Assembly Bill No. 401: By Mr. Field—An act to add Section 120.7 of the Welfare and Institutions Code, relating to the Department of Social Welfare.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 402: By Messrs. Field and Wollenberg—An act to make an appropriation for the cost of auditing and collecting unemployment relief restitutions, to take effect immediately.

Referred to Committee on Ways and Means.

Assembly Bill No. 403: By Mr. Wollenberg—An act making an appropriation in augmentation of the appropriation in Item 249 of the Budget Act of 1945, for compensation benefits to state officers and employees, to take effect immediately.

Referred to Committee on Ways and Means.

Assembly Bill No. 404: By Mr. Wollenberg—An act making an appropriation in augmentation of the appropriation in Item 79.5 of the Budget Act of 1945, for publishing, purchasing, and shipping free textbooks, Department of Education, to take effect immediately.

Referred to Committee on Ways and Means.

Assembly Bill No. 405: By Mr. Wollenberg—An act making an appropriation in augmentation of the appropriation in Item 39 of the Budget Act of 1945, for support of the Department of Agriculture, to take effect immediately.

Referred to Committee on Ways and Means.

Assembly Bill No. 406: By Messrs. Conrad, Price, Bennett, Hollibaugh, Grant, and Stanley—An act to amend Sections 1731.5 and 1732 of the Welfare and Institutions Code, relating to commitments to the Youth Authority.

Referred to Committee on Crime and Correction.

Assembly Bill No. 407: By Mr. Crowley—An act to amend Section 16091 of the Education Code, relating to assistance to blind.

Referred to Committee on Ways and Means.

Assembly Bill No. 408: By Messrs. M. Philip Davis, McMillan, Anderson, Erwin, Grant, and Stewart—An act to add Chapter 14 to Part 2 of Division 2 of Title 3 of the Government Code, relating to the powers and duties of counties and the boards of supervisors thereof, and authorizing the acquisition, construction, maintenance and development of public improvements and the issuance and sale of revenue bonds to finance the same and providing for the use and expenditure of the proceeds of such bonds and the use and disposition of revenue arising from public improvements so financed.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 409: By Messrs. M. Philip Davis, Allen, and Geddes—An act to add Sections 465.8 and 465.9 to the Vehicle Code, relating to street and highway signs.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 410: By Messrs. Cooke, Bennett, Lester T. Davis, Clayton A. Dills, and Price—An act to add Section 1767.2 to the Welfare and Institutions Code, relating to persons paroled by the Youth Authority, and providing for the exercise of the powers of the Youth Authority in relation thereto.

Referred to Committee on Crime and Correction.

House Resolution No. 29
House Resolution No. 33
Senate Concurrent Resolution No. 9
Senate Concurrent Resolution No. 13

Has had the same under consideration, and reports the same back with amendments with the recommendation: Amend, and be adopted, as amended.

DICKEY, Chairman

Above reported resolutions ordered on file for adoption.

CONSIDERATION OF HOUSE RESOLUTION NO. 33 (BY UNANIMOUS CONSENT)

House Resolution No. 33

Relative to the continuance of the Assembly Interim Committee on County and City Jails created by House Resolution No. 253 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1 The Assembly Interim Committee on County and City Jails created by House Resolution No 253 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature including any recess, but not after final adjournment.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members

4 The sum of five hundred dollars ($500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read.

Consideration of Committee Amendments

The following amendment was proposed by the Committee on Rules:

Amendment No. 1

Strike out all of the paragraph numbered 2, and insert

"2. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment, with authority to file its final report not later than the fifteenth day of March, 1947."

Amendment read, and adopted.

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 33, as amended, at this time.

Consideration of House Resolution No. 33, as Amended

House Resolution No. 33

Relative to the continuance of the Assembly Interim Committee on County and City Jails created by House Resolution No. 253 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on County and City Jails created by House Resolution No. 253 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature including any recess, but not after final adjournment, with authority to file its final report not later than the fifteenth day of March, 1947.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

Until the adoption of Joint Rules at this session, the Joint Rules of the last preceding regular session are incorporated herein and made applicable to this committee and its members.

4. The sum of five hundred dollars ($500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, as amended.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—67.

NOES—None.

CONSIDERATION OF HOUSE RESOLUTION NO. 29 (BY UNANIMOUS CONSENT)

House Resolution No. 29

Relative to the continuance of the Assembly Interim Committee on Tide and Submerged Lands created by House Resolution No. 297 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on Tide and Submerged Lands created by House Resolution No. 297 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session and after final adjournment until the commencement of the next regular session, with authority to file its final report not later than the fifteenth legislative day of the next regular session.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly that are applicable to such a committee as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The sum of one thousand nine hundred ninety-five dollars ($1,995) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund of the Assembly and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

The money made available by this resolution is less than the unused part of the amount heretofore made available to the committee which will revert to the General Fund.

Resolution read.

Consideration of Committee Amendments

The following amendment was proposed by the Committee on Rules:

Referred to Committee on Industrial Relations.

Assembly Bill No. 416: By Mr. Dunn—An act to add Section 2163.3 to the Welfare and Institutions Code, relating to aid to the aged in respect to personal property qualifications of applicants and recipients.

Referred to Committee on Social Welfare.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REMARKS

Mr. Dickey asked for, and was granted, unanimous consent that the following remarks by Speaker Collins be ordered printed in the Journal prior to the announcement of the standing committee appointments:

Remarks by Speaker Sam L. Collins

This morning it is my privilege and honor to announce the standing committees of the Assembly for this the Fifty-seventh (General) Session of the Legislature.

Before making that announcement I would like to repeat a statement I made here on this rostrum when you honored me with the election as your Speaker.

I said then that I would carry over into the conduct of the office none of the memories of the contest which preceded my election—that I bore no ill will against those who opposed me.

My appointments as of today, I believe you will agree, bear out that statement.

I have named to chairmanships certain of those Republicans who opposed me. Also, I have named Democrats to chairmanships. Those Democrats who have been so honored have, by their past records of accomplishment, qualified themselves for their positions.

As to membership on the committees I have set the ratio in the same proportion as the Republican majority in the House bears to the representation of the Democratic minority—approximately five to three.

Likewise, I have named as members of the committees those members whose interests are most concerned and whose districts are most affected by the activities of that particular committee.

Membership of the Agriculture Committee, for example, is composed largely of men who represent rural areas Likewise, the Judiciary Committee's membership is composed, for the most part, of attorneys

I have done this feeling that the interests of the people most concerned with these various legislative matters to be introduced at this session will be best served and that the legislation will be first acted upon by men who, as nearly as possible, are experienced and qualified.

It is my belief that this policy will have laid the groundwork for harmony and good will not only among the members but in the minds of the many men and women who will come from all parts of the State during our current session to appear before the various committees.

Not only do I hope that these appointments will expedite the business of the Legislature, but it is also my hope that they will reflect to the credit and the esteem of the *entire Legislature!*

Keeping in mind that the Republican Party is the minority party in the State of California, it is my hope that the business of the Assembly will be so conducted as to win the confidence and the respect of all the people of our great State.

If this is done—if we give to the people of our State constructive legislation which will expedite progress in this important postwar period, I feel certain we will inspire that confidence so necessary to again make us the majority party in the State.

If, judged by our actions—our devotion to duty, our painstaking application to each and every problem of legislation as it presents itself before this body, we can be as successful as our great and beloved Republican Governor Earl Warren has been, I know we will soon be in the majority.

APPOINTMENT OF STANDING COMMITTEES

Speaker Collins announced the appointment of the following Standing Committees of the Assembly for the Fifty-seventh (General) Session:

AGRICULTURE, Committee on—Clarke (Chairman); Silliman (Vice Chairman); Beck, Boyd, Brown, Butters, Cooke, Cramer, Lester T. Davis, Ralph C. Dills, Erwin, Hinckley, Hinton, Johnson, Kirkwood, Knight, Loomis, Lowrey, Miller, Price, Stephenson, Thompson, and Thorp—23 members.

CIVIL SERVICE AND STATE PERSONNEL, Committee on—Gannon (Chairman); Stephenson (Vice Chairman); Caldecott, George D. Collins, Cramer, Johnson, Loomis, Miller, and Stewart—9 members.

CONSERVATION AND PLANNING, Committee on—McMillan (Chairman); Cramer (Vice Chairman); Berry, Clarke, Crowley, Lester T. Davis, Dickey, Hinton, Lowrey, Luckel, O'Day, Sheridan, Stanley, Thurman, and Weber—15 members.

MUNICIPAL AND COUNTY GOVERNMENT, Committee on—Thurman (Chairman); Stanley (Vice Chairman); Bennett, Boyd, Debs, Clayton A. Dills, Grant, Hollibaugh, Stephenson, and Stewart—10 members.

PUBLIC HEALTH, Committee on—Debs (Chairman); Evans (Vice Chairman); Blosser, Clayton A. Dills, Field, Geddes, Grant, Hinton, McCollister, Rosenthal, and Thompson—11 members.

PUBLIC MORALS, Committee on—Thompson (Chairman); Crichton (Vice Chairman); Dickey, Fletcher, Maloney, McMillan, and Thorp—7 members.

PUBLIC UTILITIES AND CORPORATIONS, Committee on—Allen (Chairman); Knight (Vice Chairman); Burke, Cramer, Evans, Grant, and O'Day—7 members.

REVENUE AND TAXATION, Committee on—Hollibaugh (Chairman); Clayton A. Dills (Vice Chairman); Anderson, Boyd, Brown, Conrad, Evans, Geddes, Hawkins, Kirkwood, James, Knight, Robertson, Sherwin, Thomas, Waters, and Wollenberg—17 members.

RULES, Committee on—Dickey (Chairman); Doyle (Vice Chairman); Burns, Crichton, Dunn, Evans, Field, Fletcher, Hollibaugh, Lyons, Maloney, Thompson, and Wollenberg—13 members.

SOCIAL WELFARE, Committee on—Nichouse (Chairman); Kilpatrick (Vice Chairman); Blosser, Brown, Caldecott, Conrad, Hahn, Hawkins, Heisinger, Hinckley, and Hinton—11 members.

TRANSPORTATION AND COMMERCE, Committee on—Burns (Chairman); Luckel (Vice Chairman); Berry, Brady, Burke, Carey, Debs, Gaffney, Grant, Huyck, Lyons, Maloney, Rosenthal, Silliman, Stephenson, and Thomas—16 members.

WAYS AND MEANS, Committee on—Wollenberg (Chairman); Lowrey (Vice Chairman); Allen, Anderson, Bennett, Boyd, Butters, Clarke, Collier, George

D. Collins, Crowley, M. Philip Davis, Erwin, Field, Gaffney, Gannon, Hahn, Hawkins, Johnson, Kilpatrick, Silliman, Sherwin, Thurman, and Weber—24 members.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 16, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Assembly Concurrent Resolution No. 24
Assembly Concurrent Resolution No. 25

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

Above resolutions ordered enrolled.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 417: By Messrs. Loomis and Clarke—An act to add Chapter 2A to Part 7, Division 11 of the Water Code, relating to improvement districts of irrigation districts.

Referred to Committee on Agriculture.

Assembly Bill No. 418: By Mr. Loomis—An act to add Sections 22252.1 and 22252.2 to the Water Code, relating to irrigation districts and the distribution of water in irrigation districts, declaring the urgency of this act, to take effect immediately.

Referred to Committee on Agriculture.

Assembly Bill No. 419: By Messrs. Loomis and Clarke—An act to add Sections 29a and 29b to the California Water District Act, relating to California water districts and the distribution of water in such districts, declaring the urgency of this act, to take effect immediately.

Referred to Committee on Agriculture.

Assembly Bill No. 420: By Messrs. Loomis and Clarke—An act to amend Sections 20517 and 20569 of the Water Code, relating to irrigation districts.

Referred to Committee on Agriculture.

Assembly Bill No. 421: By Messrs. Loomis and Clarke—An act to add Sections 23650 and 23651 to the Water Code, relating to improvement districts in irrigation districts.

Referred to Committee on Agriculture.

REQUEST FOR UNANIMOUS CONSENT TO SPEAK UPON THE CONDITION OF THE FILE

Mr. Evans, by unanimous consent, spoke upon the condition of the file, and stated that the Report of the Committee on Governmental Efficiency and Economy, now on file, had entailed much work; and that the escape, yesterday, of nine inmates of the Preston School of Industry indicated that recommendations of this committee had not been followed. Then he recommended that state departments be forced to conform to legislative action, previously taken, relative to the Preston School of Industry.

REQUEST FOR UNANIMOUS CONSENT TO SPEAK UPON THE CONDITION OF THE FILE

Mr. Field, by unanimous consent, spoke upon the condition of the file, and said that, in his opinion, the Superintendent of the Preston School of Industry is doing a good job but is handicapped by the jealousies of employees who seem to prefer to run things under the old regime, instead of under the Youth Authority, as is the present system; and that, until such time as personnel connected with the school cooperates with both the present administration, and the Youth Authority, there will be problems in connection with the Preston School.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 11 (BY UNANIMOUS CONSENT)

Senate Concurrent Resolution No. 11—Relative to the continuance of the Joint Committee on Insurance created by Resolutions Chapter 140 of the Fifty-sixth Regular Session.

Resolution read, and ordered held at desk.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 6 (BY UNANIMOUS CONSENT)

Senate Concurrent Resolution No. 6—Relative to the continuance of the Joint Fact-Finding Committee on Highways, Streets and Bridges created by Resolutions Chapter 133 of the 1945 Regular Session.

Resolution read.

Motion to Amend

Mr. George D. Collins moved the adoption of the following amendment:

Amendment No. 1

On page 1, line 29, of the printed measure, after the period, insert "None of the money made available shall be expended on expenses for trips outside this State by any member of the committee."

Amendment read, and adopted.

Resolution ordered reprinted, and on file for adoption.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 422: By Mr. Stanley—An act to add Section 7202.1 to the Education Code, relating to the apportionment of the State Junior College Fund.

Referred to Committee on Education.

Assembly Joint Resolution No. 10: By Messrs. Dunn, Caldecott, Carey, Sheridan, Debs, and Dickey—Relative to an airport for the City of Hayward.

Request for Unanimous Consent

Mr. Dunn asked for, and was granted, unanimous consent to take up Assembly Joint Resolution No. 10, at this time, without reference to committee, print, or file, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY JOINT RESOLUTION NO. 10

Assembly Joint Resolution No. 10—Relative to an airport for the City of Hayward.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Bennett, Berry, Blosser, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Dunn, Erwin, Field, Fletcher, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Sheridan, Silliman, Stanley, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—62.

NOES—None.

Resolution ordered printed, and transmitted to the Senate.

Motion to Place Rush Order on Printing of Assembly Joint Resolution No. 10

Mr. Dunn moved that a rush order be placed upon the printing of Assembly Joint Resolution No. 10.

Motion carried.

REQUEST FOR UNANIMOUS CONSENT TO PRINT RESOLUTION

Mr. McMillan asked for, and was granted, unanimous consent that the following resolution be ordered printed in the Journal:

RESOLUTION NO. 1

WHEREAS, We consider that Child Care Centers and Nursery Schools are a necessary part of our educational system, and

WHEREAS, We feel that there is a tremendous need for continuing these Child Care Centers because:

The returning veteran, whose wife is forced to work, cannot pursue his educational ambitions unless he is able to keep his children in a Child Care Center or Nursery School; the standard of living of a group of our G. I.'s is extremely low unless the wife and mother can work in order to maintain a better standard of living; in cases of a widowed mother and sole support of her children, it is imperative that she have her child or children in a Child Care Center; when the family is large, circumstances necessitate that the mother work to keep the family in food and clothing; due to the shortage of nurses and teachers, some mothers have gone back to work in order to relieve the shortage and a larger majority of the returning veterans have chosen Hawthorne as a place to live in preference to Beverly Hills or Santa Barbara because it is a working class district and one which will fit their meager budget, and at present there is a long waiting list for both the day care centers and the nursery schools due to the lack of facilities, therefore

We resolve, That it is the sense of this meeting of Hawthorne Progressive Voters that the need for these centers has not ended, that the Legislature must continue and adequately finance their operation and we urgently request that you take immediate action to keep these facilities in operation.

ANNOUNCEMENT OF COMMITTEE MEETINGS

It was announced that the following committees would hold meetings today:

At 2 p.m.—
Education.

At 3 p.m.—
Social Welfare.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Kirkwood, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Emil Bushsen, principal; Mrs. Julia Tremaine, trustee; Mrs. Mildred McKee, Miss Ruth Lawler, Mrs. Emil Buchsen, and Phillip Dougherty, instructors; and the following pupils of the Santa Clara High School: Mercedes Vasquez, Betty J. Vierra, Ruth Weast, Cora Zambetti, Helen Zarate, Deloris Anderson, Nancy Bjorhe, Daisy Borghi, Enid Cardena, Nancy Carmody, Beatrice Cotaleno, Joan Dahl, Lorraine Derouze, Joy Eaton, Eldine Enos, Renee Faulkner, Delphine Fernandes, Joyce Fernandez, Jean Garcia, Jean Giannini, Mono Bell Hook, Peggy Karnes, Camilla Key, Ruth Kiesal, Ruth Laine, Carmen Lemele, Pat Loughran, Ramona McDonald, Isabel Navarro, Carmen Ojeda, Marie Paz, Barbara Pimentel, Betty Santos, Nony Thomas, and Blanche Vail.

On request of Mr. Heisinger, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to C. Todd Clark of Fresno.

On request of Mr. Kirkwood, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to L. Louis Gairaud of San Jose.

On request of Mr. Lester T. Davis, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to A. L. Davis of Storm Lake, Iowa.

On request of Mr. O'Day, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Pete Hindley and Osborn Pearson of San Francisco.

On request of Mr. Carey and the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Alfred T. Lundberg and J. Croter of Alameda.

On request of Mr. Loomis, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to J. E. Frazier, of Gridley.

FIRST REPORT OF STATE PUBLIC WORKS BOARD

MEMBERS, STATE PUBLIC WORKS BOARD

JAMES S. DEAN, Director of Finance
C. H. PURCELL, Director of Public Works
HUBERT B. SCUDDER, Real Estate Commissioner
SENATOR JESSE M. MAYO — ASSEMBLYMAN T. FENTON KNIGHT
SENATOR CHARLES H. DEUEL — ASSEMBLYMAN _____ (vacant)

STATE OF CALIFORNIA, DEPARTMENT OF FINANCE
SACRAMENTO, January 16, 1947

Honorable Goodwin J. Knight, President of the Senate
Honorable Sam L. Collins, Speaker of the Assembly

Respectfully submitted herewith is the First Report to the Legislature of the State Public Works Board on the status of the building program of state agencies being carried out under authority of Chapter 145, Statutes of 1946 (First Extraordinary Session). Section 12 of the act stipulates that such a report be presented within 10 days after the opening of each regular legislative session.

This act, by which the board was created and by which funds are provided for a unified program of construction, improvements and equipment for state agencies, was passed at the Special Legislative Session of January, 1946, was approved by the Governor on March 13, 1946, and became law on May 21, 1946. Since this latter date and covering the period through December 31, 1946, the board has taken certain actions designed to carry out the postwar construction program of the several state agencies. These actions taken to date are consistent with the provisions of the act. Yet, at the same time, they have been circumscribed by the difficulties, uncertainties and high costs inherent in any building program undertaken at this time. Projects approved by the board thus far and the progress being made in implementing them are recapitulated in the four schedules attached hereto and designated as follows:

SCHEDULE A summarizes the allocations of funds recommended by the State Public Works Board during the period May 21, 1946, through December 31, 1946. They are segregated into the four classifications of "Plans and Specifications," "Equipment," "Construction" and "Miscellaneous Repairs and Improvements" for each of the agencies participating in the program. This schedule reveals that the board has recommended to the Director of Finance the allocation of $11,044,988 as follows:

For plans and specifications	$1,182,488
For equipment purchases	2,902,000
For construction projects	4,960,500
For miscellaneous repairs and improvements	2,000,000
Total	$11,044,988

SCHEDULE B details the projects of each agency for which allocations have been made pursuant to board recommendation and shows the specific amount allotted for each project, the amount encumbered to date and the balance still unencumbered. As revealed in this schedule, the total amount of executive orders issued through December 31, 1946, is $10,944,093. The difference between this figure and the total of Schedule "A" represents board recommendations which have not yet been implemented through issuance of executive orders. A recapitulation of Schedule "B" follows:

Executive orders issued	*Amount allocated*	*Amount encumbered*	*Unencumbered balance*
For plans and specifications	$1,182,488	$774,491	$407,997
For equipment purchases	2,812,930	575,781	2,237,149
For construction projects	4,960,500	2,198,758	2,761,742
For miscellaneous repairs and improvements	1.988,175	666,662	1,321,513
Totals	$10,944,093	$4,215,692	$6,728,401

SCHEDULE C relates the construction projects approved by the board to the priority listing of projects in the "Statement of Capital Expenditures Required by State Agencies," submitted by the Director of Finance at the time of the January, 1946, Special Legislative Session. Each

agency's projects are listed in priority sequence. The January, 1946, estimated costs are shown in comparison with the actual amounts approved by the board for allocation.

SCHEDULE D shows the status as of December 31, 1946, of the $154,000,000 appropriation of Chapter 145. The summary of this schedule is:

Original appropriation		$154,000,000
Approved for allocation		
Executive orders issued	$10,994,093	
Executive orders not yet issued	100,895	11,094,988
Balance of original appropriation still available		$142,905,012

Not included in any of the foregoing schedules is reference to the serious responsibility placed on the board under Section 12 of the State Public Works Act, to report upon "the anticipated needs for expenditure during the next biennium." The period thus to be considered normally would be the two years starting July 1, 1947, and ending June 30, 1949. However, since recent passage of the constitutional amendment providing for annual legislative sessions, it has been assumed that the wording of this section should be construed to call for an estimate of construction expenditures for a one year period only, namely the fiscal year starting July 1, 1947, and ending June 30, 1948. The estimate made later in this report reflects this assumption.

The act creating the board under Section 3 says:

"The *board* shall determine when and if any construction * * * shall be undertaken and shall give *due consideration* to:

1. The *immediate needs* of state agencies for construction and improvements;
2. Obtaining construction * * * at the most *reasonable price consistent* with such needs;
3. The needs of construction * * * at *state agencies* in relation to the needs for *private construction* * * *.
4. Providing of public works *to relieve unemployment.*"

Section 3 further calls attention to the "intolerably overcrowded and distressed living conditions at our hospitals and other institutions for the care of the mentally ill and other wards of the State," and specifically directs the State Public Works Board, in the exercise of its powers and the discharge of its responsibilities "to give prime consideration to the needs of these institutions, * * * to do everything within its powers to assure prompt rectification of such conditions and to allow or suffer the undertaking of no other project * * * that will or may impair or retard the expeditious or complete attainment of these objectives for the wards of the State."

In preparing its estimate of anticipated expenditures during the coming fiscal year, the board has weighed carefully all of the foregoing factors, each in its relation to the others. The conclusion reached is that the "immediate needs" of state agencies and the specific legislative directive to give the earliest possible relief to overcrowded, obsolescent and inadequate facilities at state institutions and schools are factors of paramount importance and as such must be given the greater emphasis. It

becomes mandatory, therefore, that the State during the coming fiscal year embark upon a minimum construction program even though it be one of considerable magnitude. The estimate of the board is based upon an undisputable need. Its cost is justified on the basis of such need. It has been tempered to the extent that with prudent timing it will not retard to any considerable degree the flow of materials and manpower into private construction channels.

In the opinion of the State Public Works Board the anticipated needs for expenditure by state agencies participating in the unified construction program will be as follows for the coming fiscal year:

University of California	$12,000,000
Department of Education	10,000,000
Department of Mental Hygiene	14,000,000
Department of Corrections	6,000,000
California Youth Authority	3,500,000
Veterans' Home	1,750,000
State Capitol and Offices	5,000,000
Department of Natural Resources	1,000,000
Department of Motor Vehicles	1,250,000
Department of Agriculture	350,000
State Agricultural Society and Exposition Park	(program undetermined)
Miscellaneous Repairs and Improvements	2,000,000
Total	$56,850,000

It may be noted here that the above estimate has been computed on the basis of current construction costs which the State Architect and the University of California estimate are at index 500 (Base 1913 = 100). Projects contemplated under this program are exclusively those itemized in the printed listing of proposed capital expenditures submitted to the Legislature in January, 1946. The program as financed at that time was estimated at a 333 index.

Special attention should also be called to the above proposed expenditures for projects of the Department of Mental Hygiene. This agency, which has by far the most extensive overall postwar program, has received recently a considerable measure of temporary relief through acquisition of two surplus Federal hospitals located near Auburn and Modesto. The hospitals are now being used, will be in full operation shortly, and will then provide accommodations for approximately 5,000 institution patients. However, when these two are completely filled, there will still be greater than 1,300 patients over capacity in the other institutions of this department at a time when the ratio of patients to population is below normal.

With respect to the anticipated expenditure of $2,000,000 for projects in the miscellaneous repair and improvement category, particular reference is made to the fact that this will exhaust the funds available for these purposes. The expanded needs of all agencies for deferred maintenance and minor construction, occasioned through inability to date to commence or complete major construction and replacement projects, have created demands for these funds far in excess of earlier estimates. This aggravated condition may be expected to continue until the overall building program is substantially completed.

In its report to the Legislature the State Public Works Board is also required to advise as to such additional amounts which should be

appropriated to meet the costs of carrying out the approved building program of Chapter 145. In recommending on this subject the Board has confined its analysis to the basic program as approved in January, 1946, and as contemplated under the $154,000,000 appropriation made at that time. Recommendations dealing with expansions of the scope of certain approved projects, with requests for financing of new projects and for augmentation of various direct appropriation acts, are being prepared by the Department of Finance, the State Architect and the several agencies involved for inclusion in the fiscal year budget to be submitted by the Governor.

Referring specifically to the program of expenditures approved and financed under Chapter 145, the board finds that increases in costs of construction, which have occurred during the last 12 months, have rendered this program insolvent to the extent of $77,000,000. In effect, the $154,000,000 program of new construction passed last January is as of this date only two-thirds financed. This means that at the present building cost index only two-thirds of the approved construction needs of the various state agencies can be provided with funds now available. Furthermore, it is estimated by the State Architect, the University of California, and other competent authorities that no immediate reduction in building costs can reasonably be anticipated.

The circumstances which have combined to produce today's costs of construction are common knowledge and have been covered thoroughly in the press and elsewhere. However, the dates of the basic changes in the cost indices are pertinent.

The construction cost index of 100 was created in 1913. The deferred building program of California state agencies was inaugurated in 1941 upon cost index 250. In January of 1946 the index had risen to 333. This was the basis for the unified construction program financed as of that date. As of December, 1946, further rises have lifted the index to 500. Relating this to the $154,000,000 appropriation of last January, additional funds in the amount of $77,000,000 are needed to provide for completion of the program at this current cost index factor.

It is the recommendation of the board that such additional funds, if approved, be apportioned among the various agencies as follows:

University of California	$15,000,000
Department of Education	6,750,000
Department of Mental Hygiene	28,750,000
Department of Corrections	6,100,000
California Youth Authority	3,500,000
Veterans' Home	1,200,000
Department of Finance for State Capitol, office and other buildings	7,900,000
Department of Natural Resources	1,650,000
Department of Motor Vehicles	1,703,750
Department of Agriculture	225,000
State Agricultural Society and Exposition Park—Sixth District Agricultural Association	1,750,000
Miscellaneous Repairs and Improvements of which not more than five hundred thousand dollars ($500,000) shall be available to the University of California	2,471,250
Total	$77,000,000

Respectfully submitted.

JAMES S. DEAN
Chairman, State Public Works Board

SUMMARY OF ACTION TAKEN BY STATE PUBLIC WORKS BOARD THROUGH DECEMBER 31, 1946, UNDER AUTHORITY OF CHAPTER 145, STATUTES OF 1946 (FIRST EXTRAORDINARY SESSION)

RECOMMENDED ALLOCATIONS

Agency	*For plans**	*For equipment*	*For construction*	*Total*
University of California	$335,640	$500,000	$3,199,000†	$4,034,640
Education	116,583	500,000	--------	616,583
Mental Hygiene	405,700	500,000	262,500	1,168,200
Corrections	172,000	500,000	620,000	1,292,000
Youth Authority	--------	100,000	40,000	140,000
Veterans' Home	55,800	100,000	464,000	619,800
Finance	--------	500,000	200,000	700,000
Natural Resources	90,000	170,000	175,000	435,000
Motor Vehicles	--------	--------	--------	--------
Agriculture	6,765	32,000	--------	38,765
State Fair	--------	--------	--------	--------
Total	$1,182,488	$2,902,000	$4,960,500	$9,044,988

To University of California for miscellaneous repairs and improvements	1,000,000
To all other agencies for miscellaneous repairs and improvements	1,000,000
Total	$11,044,988

* During the period May-December, 1946, the Board of Control, on recommendation of the State Public Works Board, approved the allocation to the Division of Architecture of $942,952 from funds available under Chapter 20, Statutes of 1944 (Fourth Extraordinary Session) for plan preparation. Amounts by agencies are: (a) Education, $21,000, (b) Mental Hygiene, $399,300, (c) Corrections, $332,000, (d) Natural Resources, $10,685; (e) Youth Authority, $167,967; (f) Agriculture, $12,000.

† Effective with the creation of the board in May, the University of California has adopted the policy of also presenting for board approval those projects financed either by direct appropriation or from the Fair and Exposition Fund. Projects in this category, which have been approved to date, total $3,267,000.

DETAILED SCHEDULE OF PROJECTS BY AGENCIES FOR WHICH ALLOCATIONS HAVE BEEN MADE FROM CHAPTER 145, STATUTES OF 1946 (FIRST EXTRAORDINARY SESSION), SHOWING STATUS OF ALLOCATIONS THROUGH DECEMBER 31, 1946

University of California	*Amount allocated*	*Amount encumbered*	*Unencumbered balance*
1. Plans and specifications	$335,640	--------	$335,640
2. Federal surplus equipment	500,000	--------	500,000
3. Chemistry building—Berkeley	1,114,000	$784,732	329,268
4. Utilities expansion—Berkeley	135,000	--------	135,000
5. Fire protection—Mt. Hamilton	100,000	10,950	89,050
6. Pier repairs—La Jolla	67,000	15,000	52,000
7. Utilities expansion—La Jolla	34,000	--------	34,000

ADJOURNMENT

At 11.23 a.m., on motion of Mr. Dickey, the Speaker declared the Assembly adjourned until 10 a.m., Friday, January 17, 1947.

SAM L. COLLINS, Speaker

GERALDINE B. HADSELL, Minute Clerk

CALIFORNIA LEGISLATURE
FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

TENTH LEGISLATIVE DAY
TWELFTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO
Friday, January 17, 1947

The Assembly met at 10 a.m.

Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Huckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—72

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

Cleanse our hearts, O God, with the fire of the Holy Spirit, that we may ever serve Thee with chaste body and please Thee with a clean heart. May this Advocate who proceeds from You, O God, also enlighten our minds and lead us unto all truth as Thy Son has promised—AMEN.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Loomis, further reading of the Journal of the previous legislative day was dispensed with.

LEAVES OF ABSENCE FOR THE DAY

The following member was granted leave of absence for the day, because of legislative business elsewhere:

Mr. Weber, on motion of Mr. Dickey.

The following member was granted leave of absence for the day, and desired to waive his per diem:

Mr. Lyons, on motion of Mr. Hollibaugh.

Speaker Presiding

At 10.05 a.m., Hon Sam L. Collins, Speaker of the Assembly, presiding.

COMMUNICATIONS

By Speaker Collins:

The following communication was received, read, and ordered printed in the Journal:

SACRAMENTO, CALIFORNIA, January 17, 1947

Honorable Members of the Assembly

On behalf of myself and the members of the family of my late brother, Peter R. Maloney, may I thank you from a grateful heart for your kind expressions, and the resolution unanimously passed in respect to the memory of Peter who was so dear not only to his family but to so many people in California

Very truly yours,

THOMAS A. MALONEY

MEMBERS EXCUSED TO HOLD COMMITTEE MEETING

At 10.05 a.m., Mr. Clarke asked for, and was granted, unanimous consent that the members of the Committtee on Agriculture be excused, at this time, for the purpose of holding a meeting of the committee in the post office.

Speaker Pro Tempore Presiding

At 10.06 a.m., Hon. Thomas A. Maloney, Speaker pro Tempore of the Assembly, presiding.

REPORTS OF STANDING COMMITTEES

Committee on Legislative Procedure

ASSEMBLY CHAMBER, SACRAMENTO, January 17, 1947

MR. SPEAKER: Your Committee on Legislative Procedure has examined Assembly Concurrent Resolution No. 10

And reports the same correctly engrossed.

WEBER, Chairman

Above reported resolution ordered on file for adoption.

ASSEMBLY CHAMBER, SACRAMENTO, January 16, 1947

MR. SPEAKER: Your Committee on Legislative Procedure has examined: Assembly Concurrent Resolution No 23

And reports the same correctly engrossed.

WEBER, Chairman

Above reported resolution ordered on file for adoption.

Committee on Social Welfare

ASSEMBLY CHAMBER, SACRAMENTO, January 17, 1947

MR. SPEAKER: Your Committee on Social Welfare, to which was referred. Assembly Bill No 135

Has had the same under consideration, and reports the same back with the recommendation: Do pass, and be re-referred to Committee on Ways and Means.

NIEHOUSE, Chairman

Above reported bill re-referred to Committee on Ways and Means.

Speaker Presiding

At 10.08 a.m., Hon. Sam L. Collins, Speaker of the Assembly, presiding.

CHANGE IN STANDING COMMITTEE MEMBERSHIP

Speaker Collins announced the appointment of Mr Field as a member of the Committee on Transportation and Commerce, vice Mr. Maloney, resigned.

REPORTS OF STANDING COMMITTEES

Committee on Education

ASSEMBLY CHAMBER, SACRAMENTO, January 16, 1947

MR. SPEAKER: Your Committee on Education, to which was referred:

Assembly Bill No. 90

Has had the same under consideration, and reports the same back with the recommendation. Do pass.

DUNN, Chairman

Above reported bill ordered to second reading.

SECOND READING OF ASSEMBLY BILLS (BY UNANIMOUS CONSENT)

Assembly Bill No. 90—An act to amend Section 18059 of the Education Code, relating to the letting of contracts, extending the period within which the section is to remain in effect, declaring the urgency hereof, to take effect immediately.

Bill read second time, and ordered engrossed.

REPORTS OF STANDING COMMITTEES

Committee on Social Welfare

ASSEMBLY CHAMBER, SACRAMENTO, January 17, 1947

MR. SPEAKER: Your Committee on Social Welfare, to which was referred:

Assembly Bill No 134

Has had the same under consideration, and reports the same back with amendments with the recommendation. Amend, do pass, as amended, and re-refer to Committee on Ways and Means.

NIEHOUSE, Chairman

Above reported bill ordered to second reading.

SECOND READING OF ASSEMBLY BILLS (BY UNANIMOUS CONSENT)

Assembly Bill No. 134—An act to amend Sections 3025, 3084, and 3087 of the Welfare and Institutions Code, relating to aid to the needy blind, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Bill read second time.

Consideration of Committee Amendments

The following amendments were proposed by the Committee on Social Welfare:

Amendment No. 1

On page 1, line 7, of the printed measure, strike out "and not an inmate of any institution supported"; strike out line 8; and in line 9, strike out "divisions,".

Amendment No. 2

On page 2, line 40, of said measure, strike out "shall be not less than one-half of the amount so"; in line 41, strike out "granted or made available.", and insert "for each county shall bear the same proportion to the total amount made available to this State for such administrative costs that the administrative costs of that county bear to the total administrative costs of all the counties and of the State."

Amendments read, and adopted.

Bill ordered reprinted and engrossed.

COMMUNICATIONS

By Speaker Collins:

A communication from Rollin L. McNitt, attorney of Los Angeles, relative to the lease of the Black Building in Los Angeles by the State, was received, and ordered referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 423: By Mrs. Niehouse—An act to amend Section 78 of the Streets and Highways Code, relating to public highways.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 424: By Mrs. Niehouse—An act to amend Section 2160.5 of the Welfare and Institutions Code, relating to aid to the aged.

Referred to Committee on Social Welfare.

Assembly Bill No. 425: By Mr. Debs—An act to amend Sections 3025, 3084, and 3087 of the Welfare and Institutions Code, relating to aid to the needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 426: By Mr. Debs—An act to amend Section 2163 of the Welfare and Institutions Code, relating to personal property qualifications for aid to the aged.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW SENATE BILL NO. 4 FROM COMMITTEE

Mr. Wollenberg asked for, and was granted, unanimous consent that Senate Bill No. 4 be withdrawn from the Committee on Military Affairs for consideration, at this time.

CONSIDERATION OF SENATE BILL NO. 4 (BY UNANIMOUS CONSENT)

Senate Bill No. 4—An act making an appropriation to the Department of Veterans Affairs for the purpose of providing educational assistance for veterans, declaring the urgency hereof, to take effect immediately.

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Senate Bill No. 4:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, January 8, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Senate Bill No. 4—"An act making an appropriation to the Department of Veterans Affairs for the purpose of providing educational assistance for veterans, declaring the urgency hereof, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Senate Bill No. 4 as necessary for the immediate preservation of the public peace, health, or safety and as an emergency measure.

Respectfully submitted.

EARL WARREN, Governor

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Wollenberg:

Resolved, That Senate Bill No. 4 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the second and third times, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Debs, Clayton A. Dills, Dolwig, Dunn, Field, Fletcher, Gaffney, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—59.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Senate Bill No. 4—An act making an appropriation to the Department of Veterans Affairs for the purpose of providing educational assistance for veterans, declaring the urgency hereof, to take effect immediately.

Bill read second time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Debs, Clayton A. Dills, Dolwig, Dunn, Field, Fletcher, Gaffney, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—59.

NOES—None.

Senate Bill No. 4—An act making an appropriation to the Department of Veterans Affairs for the purpose of providing educational assistance for veterans, declaring the urgency hereof, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

Referred to Committee on Social Welfare.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 17, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 15

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following resolution was read:

Senate Concurrent Resolution No. 15—Relative to approving certain amendments to the charter of the City of Oakland, a municipal cor-

poration in the County of Alameda, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on the fifth day of November, 1946.

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No. 15, at this time, without reference to committee or file.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 15

Senate Concurrent Resolution No. 15—Relative to approving certain amendments to the charter of the City of Oakland, a municipal corporation in the County of Alameda, State of California, voted for and ratified by the qualified electors of said city at a special municipal election held therein on the fifth day of November, 1946

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Caldecott, Carey, Clarke, Collier, George D Collins, Conrad, Cramer, Crowley, Lester T. Davis, Debs, Dickey, Clayton A Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, Price, Robertson, Rosenthal, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—66

NOES—None.

Resolution ordered transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 455: By Mr. Debs—An act to amend Section 2727.5 of the Business and Professions Code, relating to the qualification of nurses, declaring the urgency thereof, to take effect immediately.

Referred to Committee on Public Health.

Motion to Place Rush Order on Printing of Assembly Bill No. 455

Mr. Debs moved that a rush order be placed upon the printing of Assembly Bill No. 455.

Motion carried.

Assembly Bill No. 456: By Mrs. Niehouse, Messrs. Luckel, and Cramer—An act to amend Section 19700 of the Health and Safety Code, relating to signs in hotels

Referred to Committee on Judiciary.

Assembly Bill No. 457: By Mr. Dickey—An act to amend Sections 1, 2, 3, 5, and 6 of the Judges' Retirement Act, to amend and renumber Section 1.5 thereof to be Section 1.2, to add Sections 1.1, 1.3, 1.4, and 1.5 thereto, and to repeal and add Section 4 thereof, and to add Section 1.5 to the Judges' Retirement Fund Act, and amend Sections 2, 3, 4, and 4.5 thereof, relating to retirement, with retirement allowances, of judges and

justices, and to contributions to the Judges' Retirement Fund to provide such retirement allowances.

Referred to Committee on Judiciary

Assembly Constitutional Amendment No. 10: By Messrs. Field, Stewart, Allen, Butters, Erwin, Evans, and Sherwin—A resolution to propose to the people of the State of California an amendment to the Constitution of the State, by amending Section 23 of Article VI thereof, relating to the qualifications of justices and judges.

Referred to Committee on Constitutional Amendments.

QUESTION OF PERSONAL PRIVILEGE

Mr. Geddes arose to the following question of personal privilege: That the press had misquoted him in stating that he is opposed to health insurance and said that he had introduced legislation relative to the improvement of health conditions, particularly as affecting women in industries. He said health insurance, insofar as it insures those costs which are insurable, is certainly desirable, but, that there has been a difference of opinion as to how such insurance is to be made available; whether it shall be provided by private enterprise or whether it must be "compulsory," and administered by the State.

REQUEST FOR UNANIMOUS CONSENT TO SPEAK UPON THE CONDITION OF THE FILE

Mr. Heisinger asked for, and was granted, unanimous consent to speak upon the condition of the file.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 458: By Messrs. Allen, Stewart, Evans, Field, Butters, Erwin, and Sherwin—An act to amend Section 1505 of the Military and Veterans Code, relating to preparedness against and the handling of disasters.

Referred to Committee on Military Affairs.

Assembly Bill No. 459: By Messrs. Field, Allen, Butters, Evans, Erwin, and Stewart—An act to amend Sections 1050 and 1433 of the Penal Code, relating to criminal procedure.

Referred to Committee on Judiciary.

Assembly Bill No. 460: By Messrs. Field, Butters, Evans, Allen, Erwin, Sherwin, and Stewart—An act to add Section 817a to the Penal Code, relating to peace officers.

Referred to Committee on Judiciary.

Assembly Bill No. 461: By Messrs. Field, Evans, Allen, Stewart, Butters, Erwin, and Sherwin—An act to amend Sections 1425 and 1462 of the Penal Code, relating to criminal jurisdiction of justices' and municipal courts.

Referred to Committee on Judiciary.

Assembly Bill No. 462: By Messrs. Stewart, Allen, Evans, Butters, Erwin, Field, and Sherwin—An act to add Section 1276 to the Penal Code, relating to release of a defendant in a criminal case on his own recognizance.

Referred to Committee on Judiciary.

Assembly Bill No. 463: By Messrs. Evans, Allen, Field, Butters, Erwin, Sherwin, and Stewart—An act to amend Section 701, 703, 705, and 706 of, and to add Section 701.1 to the Penal Code, relating to threatened violations of law and security to keep the peace.

Referred to Committee on Judiciary.

Assembly Bill No. 464: By Messrs. Evans, Allen, Butters, Erwin, Field, Sherwin, and Stewart—An act to amend the Penal Code by adding Section 421, relating to crimes against public peace.

Referred to Committee on Judiciary.

Assembly Bill No. 465: By Messrs. Stewart, Allen, Evans, Butters, Erwin, Field, and Sherwin—An act to add Section 527.1 to the Code of Civil Procedure, relating to preliminary injunctions and temporary restraining orders.

Referred to Committee on Judiciary.

Assembly Bill No. 466: By Messrs. Erwin, Evans, Field, Allen, Butters, Sherwin, and Stewart—An act to add Section 527.5 to the Code of Civil Procedure, relating to temporary restraining orders.

Referred to Committee on Judiciary.

Assembly Bill No. 467: By Messrs Field, Allen, Evans, Butters, Erwin, Sherwin, and Stewart—An act to amend Sections 1429 and 1430 of the Penal Code, relating to criminal procedure.

Referred to Committee on Judiciary.

Assembly Bill No. 468: By Messrs. Sherwin and Sheridan—An act to amend Section 149 of the Civil Code, relating to the jurisdiction of courts over property.

Referred to Committee on Judiciary.

Assembly Bill No. 469: By Mr. Sherwin—An act to add Article 6 to Chapter 5 and Article 7.5 to Chapter 10 of Part 8, and Article 2.5 to Chapter 8 and Article 1.5 to Chapter 13 of Part 10, of Division 2 of the Revenue and Taxation Code, relating to the exemption of persons dying in the military service from taxes and providing for the refund of taxes so paid.

Referred to Committee on Judiciary.

Assembly Bill No. 470: By Mr. McMillan—An act in relation to the regulation, control, and stabilization of rents for, and the eviction of tenants of, residential housing accommodations during an emergency, declaring the urgency thereof, to take effect immediately.

Referred to Committee on Judiciary.

Assembly Bill No. 471: By Mr. McMillan—An act to establish in the Division of Real Estate of the Department of Investment a Rent Administrator and prescribing his powers and duties; to provide for appointment of rental arbitration boards and prescribing their powers and duties; to provide for the regulation, control and stabilization of rents and rental agreements upon their release from control by the Federal Government, and for the regulation of proceedings for the recovery of possessions of rental properties, and certain other incidents of the landlord-tenant relationship within defense-rental areas, and to provide a method for the orderly readjustment of rents during the period of transition from present controls by the Federal Government until a normal relationship between supply of various classes of rental properties and demand therefor make unnecessary the administration of further control.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 472: By Mr McMillan—An act making an appropriation for the support of the Rent Administrator and the administration of the Emergency Fair Rent Act.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 473: By Messrs Bennett, Kilpatrick, Berry, and Price—An act to add Section 1759.5 to the Welfare and Institutions Code, relating to the placement power of the Youth Authority.

Referred to Committee on Judiciary.

Assembly Bill No. 474: By Mr. Maloney—An act to amend Section 4 of "An act defining credit unions, providing for their incorporation, powers, management and supervision," approved March 31, 1927, relating to fines and obligations of officers.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 475: By Mr. Maloney—An act to amend Section 17 of "An act defining credit unions, providing for their incorporation, powers, management and supervision," approved March 31, 1927, relating to duties of directors.

Referred to Committee on Finance and Insurance.

Assembly Concurrent Resolution No. 28: By Messrs. Hahn, Hinton, Anderson, Clayton A. Dills, Allen, Beck, Bennett, Boyd, Collier, Conrad, Crowley, Doyle, Erwin, Field, Fletcher, Geddes, Grant, Hinckley, Hollibaugh, Huyck, Kilpatrick, Knight, Maloney, Rosenthal, Stewart, Waters, and Wollenberg—Relative to Pepperdine College.

Referred to Committee on Rules.

REPORTS OF STANDING COMMITTEES

Committee on Education

ASSEMBLY CHAMBER, SACRAMENTO, January 17, 1947

MR. SPEAKER: Your Committee on Education, to which was referred.

Assembly Bill No. 360

Has had the same under consideration, and reports the same back with the recommendation: Do pass, and be re-referred to Committee on Ways and Means.

DUNN, Chairman

Above reported bill ordered re-referred to Committee on Ways and Means.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW ASSEMBLY BILL NO. 360 FROM COMMITTEE

Mr. M. Philip Davis asked for, and was granted, unanimous consent that Assembly Bill No. 360 be withdrawn from the Committee on Ways and Means for consideration, at this time.

CONSIDERATION OF ASSEMBLY BILL NO. 360

Assembly Bill No. 360—An act making an appropriation for the support of child care centers, and declaring the urgency thereof, to take effect immediately.

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Assembly Bill No. 360:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
Sacramento, January 17, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Assembly Bill No. 360—"An act making an appropriation for the support of child care centers, and declaring the urgency thereof, to take effect immediately."

In my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill

I therefore recommend consideration of Assembly Bill No. 360 as necessary for the immediate preservation of the public peace, health or safety and as an emergency measure

Respectfully submitted.

EARL WARREN, Governor

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. M. Philip Davis:

Resolved, That Assembly Bill No. 360 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the second and third times, considered engrossed, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brown, Burke, Butters, Caldecott, Carey, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, M. Philip Davis, Debs, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Hurck, James, Johnson, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—63

NOES—Burns—1

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 360—An act making an appropriation for the support of child care centers, and declaring the urgency thereof, to take effect immediately.

Bill read second time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brown, Burke, Butters, Caldecott, Carey, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, M. Philip Davis, Debs, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—63.

NOES—Burns—1.

Assembly Bill No. 360—An act making an appropriation for the support of child care centers, and declaring the urgency thereof, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Blosser, Brown, Burke, Butters, Caldecott, Carey, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kirkwood, Knight, Luckel, Maloney, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stewart, Thurman, Waters, and Wollenberg—57.

NOES—Burns, Clarke, Loomis, Lowrey, and Thorp—5.

Bill ordered transmitted to the Senate.

Explanation of Vote

It was necessary for me to be out of the Assembly Chamber attending a conference with the State Fire Marshal, when Assembly Bill No. 360 was voted upon. If I had been present I would have voted for the bill.

DWIGHT H. STEPHENSON

REQUEST FOR UNANIMOUS CONSENT

Mr. Maloney asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No. 13, at this time, without reference to committee or file.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 13

Senate Concurrent Resolution No. 13—Relative to the creation of a Committee to Investigate and Report Upon the Housing Problem in California with particular reference to veterans' housing.

Resolution read.

Motion to Re-refer Senate Concurrent Resolution No. 13

Mr. Doyle moved that Senate Concurrent Resolution No. 13 be re-referred to the Committee on Rules.

Motion lost.

The question being on the adoption of Senate Concurrent Resolution No. 13.

Motion to Amend

Mr. Conrad moved the adoption of the following amendment:

Amendment No. 1

On page 1 of the printed measure, strike out lines 19 to 20, inclusive, and insert "and".

Amendment read, and adopted.

Question of Personal Privilege

Mr. Gannon arose to the following question of personal privilege: That, in discussing Senate Concurrent Resolution No. 13, he would like to correct Mr. Maloney's statement that he had entirely blamed labor for the housing shortage. He further stated that, in his opinion, the responsibilty for building homes rested in three places—labor, business, and materials.

Request for Unanimous Consent

Mr. Maloney asked for, and was granted, unanimous consent to take up Senate Concurrent Resolution No. 13, as amended, at this time, without reference to reprint or file.

Consideration of Senate Concurrent Resolution No. 13, as Amended

Senate Concurrent Resolution No. 13—Relative to the creation of a Committee to Investigate and Report Upon the Housing Problem in California with particular reference to veterans' housing.

Resolution read, as amended.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Rosenthal, Sheridan, Silliman, Stanley, Stephenson, Stewart, Thurman, Waters, and Wollenberg—64

NOES—Boyd, Hinckley, Robertson, Sherwin, and Thorp—5

Resolution ordered printed, and transmitted to the Senate.

REPORT

By Speaker Collins:

The following Report of the California Commission on Uniform State Laws was received, read, and ordered printed in the Journal in 10-point type:

REPORT OF THE CALIFORNIA COMMISSION ON UNIFORM STATE LAWS—1945-1946

LETTER OF TRANSMITTAL

CALIFORNIA COMMISSION ON UNIFORM STATE LAWS

SACRAMENTO 2, January 14, 1947

Honorable Sam L. Collins
Speaker of the Assembly of California
State Capitol, Sacramento, California

MR. SPEAKER:

On behalf of the chairman and members of the commission, I transmit to you herewith the 1945-46 Biennial Report of the California Commission on Uniform State Laws.

The report has been executed in triplicate, and is being presented also to the Senate, and to the Governor.

Very truly yours,

FRED B. WOOD, Member of Commission

REPORT OF THE CALIFORNIA COMMISSION ON UNIFORM STATE LAWS—1945-1946

To the Honorable, the Governor, and the Members of the California State Legislature

The California Commission on Uniform Laws begs to present the following report for the biennium 1945-1946.

There were two changes in the personnel of the commission. Mr Martin J. Dinkelspiel of San Francisco was appointed a member in 1944 in the place of Mr. Maurice Saeta. Mr. Jefferson Davis of Los Angeles was appointed a member in 1945 in the place of Mr. Richard Olson of Los Angeles. Mr. Max Radin of Berkeley, California, was reappointed a member in 1945. Mr. Fred Wood, Legislative Counsel, is by statute the fourth member of the board.

At a meeting held in San Francisco Mr. Radin was elected chairman, and Mr. Martin J. Dinkelspiel was elected secretary of the commission.

It will clarify an understanding of the work of the commission if something is said about its general function.

One of the earliest of the purposes of the American Bar Association, when it was established in 1878, was that of securing a larger measure of uniformity in those statutes of the various states which are likely to affect the citizens of other states. Commercial law was the obvious field in which this was the case, and certain branches of commercial law were those first considered. In all the stages of this movement toward uniformity, both when it was carried on through a committee of the Bar Association and after it was managed by a group of independent commissioners meeting at a conference—always held so far as possible in close association with the meeting of the American Bar Association—members of the California Bar took an active part.

The function of the Conference of Commissioners on Uniform Laws has broadened considerably. Many other fields besides those of commercial law have been considered and uniform laws on property, public law, social welfare, civil procedure, torts and criminal law and divorce have been approved and adopted in a number of states. But, true to its original function, the commissioners neither purpose nor desire any unification of the laws of the United States which will disregard completely the special circumstances and needs of individual states. With that in mind, a distinction has recently been made between uniform acts proper and "model acts." The latter are meant to indicate the general contents of legislation but not to require precise uniformity in all details or in wording.

Since the inception of the movement for uniform laws, and up to July 1, 1945, more than 50 uniform and model acts have been submitted to the states. Some have received so little acceptance that they have since been withdrawn. The great majority have been accepted in a substantial number of the 53 law making jurisdictions of the United States.

California has a high place among the states that have fostered and encouraged the need for uniformity of certain types of legislation. This State has passed 21 of the uniform acts including all the commercially important ones, i.e., the Negotiable Instruments Act, the Sales Act, the Partnership Act, the Fraudulent Conveyances Act, the Bills of Lading

and the Warehouse Receipts Act. It is especially to be noted that California has passed most of the uniform laws adopted by the states of largest population and of greatest economic importance.

Section 18, b, of the constitution of the conference, makes it the duty of the commissioners

> "To procure the enactment by the Legislature of the State of such acts recommended by the National Conference as are deemed by the commissioners suitable and practicable for enactment therein."

It may be said that no uniform act is hastily recommended by the conference. Every proposal must be approved by the executive committee and referred to the appropriate committee to be drafted. This is generally done by a subcommittee of the larger committee. When the drafting committee is ready to report, the draft is considered paragraph by paragraph, and even word by word, by the entire conference sitting as a committee of the whole. These discussions in almost every instance result in substantial and sometimes far-reaching changes and amendments. The draft is then reconsidered by the subcommittee and presented in a revised form at the meeting of the conference in the next year. It is again discussed and often referred back to the drafting committee for further revision In no case is a proposed act recommended for submission to the state legislatures unless it has been approved in at least two successive annual meetings of the conference.

Even then, as the section quoted indicates, it rests with the state commissioners to determine whether it is "suitable and practicable for enactment" in any state.

The California Commission has taken this proviso seriously. It has made it a matter of policy at no time to recommend more than a few acts to the Legislature. And it has felt that it would most successfully perform its duty if it consulted in advance with the various organizations and agencies of the State which may be said to have a special concern either with the general problem or with the special field covered by any act.

To that end, members of the California Commission have by invitation attended meetings of the Commission on Interstate Cooperation. At the last meeting of that commission on November 20, 1946, at the Clift Hotel in San Francisco, Commissioners Radin, Dinkelspiel and Wood attended and discussed the general work of the commission and the program for uniform legislation to be submitted to the next session of the Legislature.

Similarly the commission acts in close cooperation with the State Bar The commission has invited representatives of the State Bar committees, interested in the subject matter of any proposed uniform act, to meet with the commission and discuss the act with them. The commission will, of course, take careful note of any comment or criticism by members of the bar, so that whatever is proposed may have the support of the profession.

In the case of such matters as veterans' guardianship, the advice and approval of the United States Veterans' Administration was sought and obtained.

In the 1945 Session of the Legislature, the commission proposed the Revised Veterans' Guardianship Act. A special report on the changes this

would entail was prepared by Commissioner Dinkelspiel and submitted to the legislative committees and the Governor. Commissioner Dinkelspiel personally appeared before the committees of the Legislature to explain whatever questions remained. The bill, Assembly Bill 1524, was introduced and supported by Assemblymen Wollenberg, Call and George D. Collins, Jr. It was passed by both houses and signed by the Governor on July 16, 1945.

Another act presented to the Legislature was the Uniform Simultaneous Death Statute. Commissioner Radin prepared the statement for the Legislature and the Governor of the reasons for seeking to amend the existing California law on the subject. The bill (Assembly Bill 866) was introduced by Assemblymen Wollenberg and George D. Collins, Jr. It was duly passed and signed by the Governor on June 23, 1945.

The commission wishes to take this opportunity to thank Assemblymen Wollenberg, George D. Collins, Jr., and Call for their able and sympathetic aid to the work of the commission. Assemblyman Wollenberg met with the commission on several occasions to discuss the proposed bills.

Because travel conditions had improved all the commissioners attended the conference of commissioners held at Philadelphia, October 21-26, and took an active part in the discussion of the drafts presented to the conference The entire commission had a special meeting at Philadelphia on October 24, 1946, and it was unanimously decided to present to the Legislative Session of 1947, the following three acts, which have been duly approved for this purpose by the conference:

1. Uniform Unauthorized Insurers Act.
2. Uniform Vendor and Purchaser Risk Act
3. Uniform Contribution Among Tort Feasors Act.

This program was presented to the Commission on Interstate Cooperation at its meeting on November 20th, already referred to.

Secretary Dinkelspiel was instructed to communicate in regard to all these acts with the State Bar. He did so in a letter to the Secretary of the State Bar, dated November 27, 1946, in which he invited the chairman of the respective committees of the State Bar to meet with the commission at their convenience to discuss the proposed legislation.

Similarly Secretary Dinkelspiel addressed a similar invitation to Insurance Commissioner Maynard Garrison and others to discuss with the commission both the Uniform Unauthorized Insurers Act and the Uniform Contribution Among Tort Feasors Act.

Representatives of the San Francisco Real Estate Board have been invited to discuss the Uniform Vendor and Purchaser Risk Act and the Title Insurance Companies Association was likewise informed of the contents of this act.

In all cases, copies of the proposed uniform acts were sent to the gentlemen named.

We hope in this way to obtain the best expert advice on how these acts would affect business and the law in this State and to obtain from

those best fitted to give it, such a presentation of the need for this legislation which will most effectively secure its adoption.

Respectfully submitted.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT IN JOURNAL

Mr. Thorp asked for, and was granted, unanimous consent that the following Report of the Interim Committee on Livestock and Dairies be ordered printed in the Journal in 10-point type:

REPORT OF INTERIM COMMITTEE ON LIVESTOCK AND DAIRIES

Assembly House Resolution No. 291, 1945

Your committee created by House Resolution No. 291 and granted $1,500 to carry out its activities begs to report as follows:

The dairy industry during 1945-1946 was in creditable condition—with milk in goodly supply.

Butter and cheese definitely short but nothing the committee could do about it.

Nineteen forty-seven starts out with plenty of milk, increased supplies of butter and cheese, and with the death of O.P.A. the meat situation has improved.

Pork is short and will continue short for some time.

In view of the above your committee held no meetings and as a consequence returned $1,500 to the General Fund.

No meetings—No strikes—No errors.

Respectfully submitted.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT IN JOURNAL

Mr. Dunn asked for, and was granted, unanimous consent that the following Report of the Joint Legislative Committee on Pre-School Training be ordered printed in the Journal in 10-point type:

REPORT OF THE JOINT LEGISLATIVE COMMITTEE ON PRE-SCHOOL TRAINING

Mr. President, Mr. Speaker, and Members of the Legislature:

Your Committee on Pre-School and Primary Training herewith files its preliminary report in conformity with the provisions set forth in Assembly Concurrent Resolution No. 3 (First Extraordinary Session) 1946, by which the committee was created.

This committee has had four public hearings at Los Angeles, Berkeley, San Diego, and San Francisco, and received the testimony of educators, school administrators, and other persons interested in the subject of free schools and primary training The proceedings of such hearings have been transcribed

This committee has also engaged the services of a director of research, secretary and counsel. Data has been assembled by the director of research.

This data has been completed and is now in process of being prepared for presentation to the Legislature, and this information is referred to in this report.

The committee will report its conclusions and recommendations at a later date.

Respectfully submitted.

CALIFORNIA LEGISLATURE

FIFTY-SEVENTH (GENERAL) SESSION

ASSEMBLY DAILY JOURNAL

ELEVENTH LEGISLATIVE DAY

FIFTEENTH CALENDAR DAY

IN ASSEMBLY

ASSEMBLY CHAMBER, SACRAMENTO

Monday, January 20, 1947

The Assembly met at 11 a.m.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

ROLL CALL

The roll was called, and the following answered to their names:

Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—73.

Quorum present.

PRAYER

The following prayer was offered by the Chaplain, Rev. Raymond Renwald:

O Almighty and Eternal God, look forgivingly upon our weakness and stretch forth the right hand of Thy Majesty to protect us. Forgive the sins of Thy people and guard them from all dangers from within and without through the help of Our Lord Jesus Christ, who liveth and reigneth with Thee in unity of the Holy Ghost, God, forever and ever—AMEN.

PLEDGE OF ALLEGIANCE TO THE FLAG

Upon request of the Speaker, the Assembly gave the pledge of allegiance to the Flag.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Caldecott, further reading of the Journal of the previous legislative day was dispensed with.

LEAVES OF ABSENCE FOR THE DAY

The following member was granted leave of absence for the day, because of illness:

Mr Blosser, on motion of Mr. O'Day.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 476: By Mr. Geddes (By request)—An act to amend Sections 13115 and 13116 of the Health and Safety Code, relating to fireproofing of tents and awnings used to temporarily house public gatherings.

Referred to Committee on Public Health.

Assembly Bill No. 477: By Mr. Evans—An act to add Section 2020.5, to amend Section 2186, and to repeal Sections 2021 and 2021.01 of the Welfare and Institutions Code, relating to aid for the aged and increasing the amount thereof, and making an appropriation therefor.

Referred to Committee on Social Welfare.

Assembly Bill No. 478: By Mr. Evans—An act to repeal Sections 2182 and 2224 of the Welfare and Institutions Code, relating to investigations of applications, and to relative's responsibility to contribute to the support of recipients of aid to the aged.

Referred to Committee on Social Welfare.

Assembly Bill No. 479: By Mr. Evans—An act to add Section 2001.1 to the Welfare and Institutions Code, relating to construction of words "in need" and "need."

Referred to Committee on Social Welfare.

Assembly Bill No. 480: By Mr. Evans—An act to amend Section 2 of the Alcoholic Beverage Control Act, relating to alcoholic beverages.

Referred to Committee on Public Morals.

Assembly Bill No. 481: By Mr. Evans—An act to amend Section 6 of the Alcoholic Beverage Control Act, relating to alcoholic beverages.

Referred to Committee on Public Morals.

Assembly Bill No. 482: By Messrs. Gaffney and George D. Collins—An act to add Section 6321 to the Labor Code, relating to publications of the Division of Industrial Safety.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 483: By Mr. Doyle—An act to add Section 432.7 of the Fish and Game Code, relating to licenses for hunting and fishing guides.

Referred to Committee on Fish and Game.

Assembly Bill No. 484: By Mr. McMillan—An act to amend Section 4 of an act entitled "An act to provide additional public recreation facilities, authorizing the making of a supplemental survey to determine what lands are suitable for inclusion in the State System of Parks and Beaches pursuant to this act, and making an appropriation for the acquisition of public recreation facilities," approved July 17, 1945, relating to the acquisition of public recreational facilities.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 485: By Messrs. Luckel, Cramer, and Mrs. Niehouse—An act to ratify Ordinance No 155 of the City of San Diego, dated February 29, 1892, relating to certain pueblo lands.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 486: By Mr. George D. Collins—An act appropriating money to pay the claim of C. D. Plum against the State of California.

Referred to Committee on Ways and Means.

Assembly Bill No. 487: By Messrs M. Philip Davis, Geddes, and Butters—An act to add Article 6 to Chapter 1, Division 2 of the Business and Professions Code, relating to rebates, refunds and unearned discounts.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 488: By Messrs. M. Philip Davis and Erwin—An act to amend Section 105 of the Revenue and Taxation Code, and to add Section 105.1 to said code, relating to property taxes and declaring the urgency thereof to take effect immediately.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 489: By Messrs. Butters, Clarke, Erwin, Boyd, M. Philip Davis, Erwin, Knight, Loomis, Price, and Thorp—An act to amend Section 142 of the Vehicle Code, relating to vehicles exempted from registration.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 490: By Messrs Lester T. Davis, Lowrey, Miller, and Doyle—An act to add Section 3702 1 to the Health and Safety Code, relating to water containers.

Referred to Committee on Public Health.

Assembly Bill No. 491: By Mr. Gannon—An act to amend Section 16486 of the Education Code, relating to average daily attendance.

Referred to Committee on Education.

Assembly Bill No. 492: By Mr. Sherwin—An act to amend Section 320b of the Civil Code and Section 2218 of the Corporations Code, relating to representing shares of stock in corporations, and specifying the rights of nominees of fiduciaries to represent such shares.

Referred to Committee on Judiciary.

REQUESTS FOR UNANIMOUS CONSENT THAT MEMBERS BE EXCUSED TO HOLD MEETING

At 11.10 a m., Mr. Hollibaugh asked for, and was granted, unanimous consent that the members of the Committee on Revenue and Taxation be excused, at this time, for the purpose of holding a committee meeting in the post office.

At 11.11 a.m., Mr. Burns asked for, and was granted, unanimous consent that the members of the Committee on Transportation and Commerce be excused, as soon as the members attending the meeting of the Committee on Revenue and Taxation return to the Assembly Chamber, for the purpose of holding a committee meeting in the post office.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 493: By Mr. Sherwin—An act to amend Section 105 of the Bank Act, relating to trust companies' investments: Deposit in banks: Stock or other securities, and the registration of stock or other securities in the name of trust company nominees: Liability of corporations, their registrars and transfer agents with respect to stock registered in the name of trust company nominees.

Referred to Committee on Judiciary.

Assembly Bill No. 494: By Messrs. Hawkins and Anderson—An act to amend Sections 6051 and 6201 of the Revenue and Taxation Code, relating to state taxation, and providing that this act shall take effect immediately.

Referred to Committee on Revenue and Taxation.

RESOLUTIONS

The following resolution was offered:

By Mr. Stephenson:

House Resolution No. 41

Relative to inclusion in the Budget Bill of an item providing funds for automobiles for the California Highway Patrol

WHEREAS, The enormous increase of traffic on the highways of the State during the last few years has rendered the enforcement of the traffic laws more difficult; and

WHEREAS, The hazards in connection with the use of motorcycles by members of the California Highway Patrol have increased, and use of motorcycles for such purposes, except in certain specific locations, such as vehicular crossings, is unnecessary and extremely dangerous; and

WHEREAS, Sufficient funds should be provided the California Highway Patrol for the purchase and equipping of automobiles for patrol of the highways to replace motorcycles; now, therefore, be it

Resolved by the Assembly of the State of California, That the Governor is requested to include in the Budget Bill an item providing sufficient funds for the purchase and equipping of additional automobiles for the use of the California Highway Patrol in traffic law enforcement to replace motorcycles not needed in special locations, and be it further

Resolved, That the Chief Clerk of the Assembly transmit a copy of this resolution to the Governor, to the Director of Motor Vehicles and to the Chief of the California Highway Patrol.

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 495: By Mr. Anderson—An act to add Section 69.5 to the Civil Code, relating to applications for marriage licenses.

Referred to Committee on Judiciary.

ANNOUNCEMENT OF COMMITTEE MEETING

Mr. Burns announced that, immediately upon recess, the Committee on Transportation and Commerce will meet at his desk.

RECESS

At 11.15 a.m., on motion of Mr. Dickey, the Assembly recessed until 11.30 a.m.

REASSEMBLED

At 11.30 a.m., the Assembly reconvened.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

REASSEMBLED

At 11.50 a m., the Assembly reconvened.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

SECOND READING OF ASSEMBLY BILLS (BY UNANIMOUS CONSENT)

Assembly Bill No. 367—An act to amend Section 1183.5 of the Civil Code, relating to the proof of acknowledgement of instruments, declaring the urgency hereof, to take effect immediately.

Bill read second time, and ordered engrossed.

REPORTS OF STANDING COMMITTEES

Committee on Legislative Procedure

ASSEMBLY CHAMBER, SACRAMENTO, January 20, 1947

MR. SPEAKER: Your Committee on Legislative Procedure has examined:

Assembly Bill No. 367

And reports the same correctly engrossed.

WEBER, Chairman

Above reported bill ordered to third reading.

REQUEST FOR UNANIMOUS CONSENT

Mr. Wollenberg asked for, and was granted, unanimous consent to take up Assembly Bill No. 367, at this time, without reference to file.

CONSIDERATION OF ASSEMBLY BILL NO. 367

Assembly Bill No. 367—An act to amend Section 1183.5 of the Civil Code, relating to the proof of acknowledgment of instruments, declaring the urgency thereof, to take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Wollenberg:

Resolved, That Assembly Bill No. 367 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 367—An act to amend Section 1183.5 of the Civil Code, relating to the proof of acknowledgement of instruments, declaring the urgency hereof, to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71

NOES—None.

The roll was called, and the bill passed by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

Bill ordered printed, and transmitted to the Senate.

Referred to Committee on Rules.

Assembly Joint Resolution No. 11: By Messrs. Hollibaugh and Doyle—Relative to memorializing Congress to enact legislation allowing the award of interest at the legal rate to successful employee claimants in claims adjusted under the Railway Labor Act.

Referred to Committee on Rules.

RESOLUTIONS

The following resolution was offered:

By Mr. Knight:

House Resolution No. 42

Relating to the continuance of the Assembly Interim Committee on Postwar Rehabilitation

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on Postwar Rehabilitation, created by House Resolution No. 190 of the Fifty-fifth Regular Session, and continued by House

Resolution No. 160 of the Fifty-sixth Regular Session, is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature including any recess, but not after the effective date of any amendment to Section 2 of the Property Acquisition Act which deletes any reference to this committee from that section.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The committee created by this resolution is authorized to complete the final report of the committee created by House Resolution No. 160 of the Fifty-sixth Regular Session and to file that report on or before March 15, 1947.

5. The sum of one thousand five hundred dollars ($1,500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

FURTHER CONSIDERATION OF ASSEMBLY BILL NO. 257 (BY UNANIMOUS CONSENT)

Assembly Bill No. 257—An act to add Section 4041,21b to the Political Code and Section 26026 to the Government Code, relating to aid to the United States of America in the acquisition or improvement of government-owned airports and declaring the urgency thereof, take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Beck:

Resolved, That Assembly Bill No. 257 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 257—An act to add Section 4041,21b to the Political Code and Section 26026 to the Government Code, relating to aid to the United States of America in the acquisition or improvement of government-owned airports and declaring the urgency thereof, take effect immediately.

Bill read third time.

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

Bill ordered transmitted to the Senate.

FURTHER CONSIDERATION OF SENATE BILL NO. 33 (BY UNANIMOUS CONSENT)

Senate Bill No. 33—An act authorizing the sale of certain Folsom State Prison property to the City of Folsom, and declaring the urgency thereof, to take effect immediately.

Bill read second time.

Motion to Amend

Mr. Thurman moved the adoption of the following amendment:

Amendment No. 1

On page 1 of the printed bill, strike out lines 8 to 17, inclusive, and insert

"Beginning at the northeast corner of Stafford Street and Mormon Island Road, town of Folsom, thence N. 53 degrees 12 minutes E. 737.1 feet; thence N. 57 degrees 05½ minutes E., 30.0 feet; thence N. 59 degrees 56 minutes E., 190 feet; thence N. 35 degrees 0 minutes W., 470.8 feet; thence S. 53 degrees 12 minutes W., 260.0 feet; thence N. 36 degrees 48 minutes W., 1130.0 feet; thence S. 55 degrees 25 minutes W., 344.5 feet; thence S. 62 degrees 32½ minutes W., 371.2 feet; thence S. 36 degrees 48 minutes E., 1649.6 feet to point of beginning."

Amendment read, and adopted.

Bill ordered reprinted, and on file for third reading.

Referred to Committee on Education.

Assembly Bill No. 587: By Mr. Maloney—An act to amend Section 5 of an act entitled "An act to provide for the acquisition of temporary and emergency housing facilities for veterans and families of servicemen by joint action of the state and local agencies, providing for the operation of such facilities, making an appropriation, and declaring the urgency thereof, to take effect immediately," approved February 15, 1946, relating to housing for veterans.

Referred to Committee on Military Affairs.

Assembly Concurrent Resolution No. 29: By Messrs. Sam L. Collins and Stanley—Relative to approving certain amendments to the charter of the City of Huntington Beach, in the County of Orange, State of California, voted for and ratified by the electors of the city at the general municipal election held therein on the ninth day of April, 1946.

Referred to Committee on Rules.

RESOLUTIONS

The following resolution was offered:

By Messrs. Maloney, Dolwig and Field:

House Resolution No. 43

Relative to the March of Dimes campaign for relief of infantile paralysis

WHEREAS, The terrible scourge called infantile paralysis continues its merciless killing and maiming of children all over the world, there having been several unusually severe epidemics in the United States during the last year; and

WHEREAS, This dread assailant so frequently bringing death, sometimes brings to its victim even worse than death, condemning a young child to live a life of despair in helpless misery and pain; and

WHEREAS, Through the work that is being done by doctors, nursing staffs, and medical research made possible by funds contributed to the National Foundation for Infantile Paralysis, relief is being brought to these small sufferers; now, therefore, be it

Resolved by the Assembly of the State of California, That the people of this State are hereby urged to take advantage of the opportunity given them in the present March of Dimes campaign to contribute to this great work of relieving the pain and suffering of thousands of little children, and to give generously to the fund knowing that every amount given will help some child walk again, will keep hope and faith alive in the hearts of stricken children, will bring us nearer the day when all children will be free from the terror of this disease

Request for Unanimous Consent

Mr. Dolwig asked for, and was granted, unanimous consent to take up House Resolution No. 43, at this time, without reference to committee or file.

Resolution read, and adopted.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW ASSEMBLY BILL NO. 94 FROM COMMITTEE

Mr. Beck asked for, and was granted, unanimous consent that Assembly Bill No. 94 be withdrawn from the Committee on Ways and Means for consideration, at this time.

CONSIDERATION OF ASSEMBLY BILL NO. 94 (BY UNANIMOUS CONSENT)

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Assembly Bill No. 94:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, January 16, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Assembly Bill No. 94—"An act to amend Section 92.1 of the Agricultural Code, relating to the allocation of state money to county and district fairs, declaring the urgency of this act, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Assembly Bill No 94 as necessary for the immediate preservation of the public peace, health or safety and as an emergency measure

Respectfully submitted

EARL WARREN, Governor

Assembly Bill No. 94—An act to amend Section 92.1 of the Agricultural Code, relating to the allocation of state money to county and district fairs, declaring the urgency of this act, to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. NOES—None

Bill ordered transmitted to the Senate

RESOLUTIONS

The following resolution was offered:

By Mr. Field:

House Resolution No. 44

Relative to the continuance of the Assembly Committee on Governmental Efficiency and Economy created by House Resolution No. 225 of the Fifty-sixth Regular Session.

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Governmental Efficiency and Economy created by House Resolution No 225 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power

2 The committee is authorized to act during this session of the Legislature including any recess, with authority to file a report on March 15, 1947

3 The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The sum of four thousand dollars ($4,000) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, and referred to the Committee on Rules.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 21, 1947

MR. SPEAKER: Your Committee on Rules, to which was referred:

Senate Bill No. 34

Has had the same under consideration, and reports the same back with the recommendation. Do pass.

DICKEY, Chairman

Above reported bill ordered to second reading.

SECOND READING OF SENATE BILLS (BY UNANIMOUS CONSENT)

Senate Bill No. 34—An act to amend Section 1 of an act entitled "An act to suspend those provisions of Article XI, Section 5, of the Constitution relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately," approved January 24, 1945, relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately.

Bill read second time.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Wollenberg:

Resolved, That Senate Bill No. 34 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—69.
NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

CONSIDERATION OF SENATE BILL NO. 34

Senate Bill No. 34—An act to amend Section 1 of an act entitled "An act to suspend those provisions of Article XI, Section 5, of the Constitution, relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately," approved January 24, 1945, relating to the compensation of county, township, and municipal officers, declaring the urgency hereof, to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—69.
NOES—None.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Stanley, Stephenson, Stewart, Thorp, Thurman, Waters, Wollenberg, and Mr. Speaker—69.
NOES—None.

Bill ordered transmitted to the Senate.

ANNOUNCEMENT

Mr. Gannon announced that in the Office of the Secretary of State were scrolls bearing the State Flower, and Seal, to be given by Members of the Assembly, as a complimentary gesture, to visiting constituents.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW ASSEMBLY BILL NO. 91 FROM COMMITTEE

Mr. Beck asked for, and was granted, unanimous consent that Assembly Bill No. 91 be withdrawn from the Committee on Education, for the purpose of amendment, and re-referred to the Committee on Education.

SECOND READING OF ASSEMBLY BILLS (BY UNANIMOUS CONSENT)

Assembly Bill No. 91—An act to amend Section 18057 of the Education Code, relating to alterations or additions to school buildings.

Bill read second time.

Motion to Amend

Mr. Beck moved the adoption of the following amendments:

Amendment No. 1

In line 2 of the title of the printed bill, strike out the period, and insert ", and declaring the urgency thereof, to take effect immediately."

Amendment No. 2

On page 1 of said bill, after line 8, insert

"SEC 2. This act is hereby declared to be an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Section 1 of Article IV of the Constitution and shall therefore go into immediate effect. A statement of the facts constituting such necessity is as follows:

Under present building conditions it is impossible to get bids on small construction jobs The prompt performance of the work authorized by this act is necessary to render school buildings adequate, safe, and suitable for the reception of the children who are to occupy them It is therefore necessary that this act take effect immediately "

Amendments read, and adopted.

Bill ordered reprinted, and engrossed.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 21, 1947

MR. SPEAKER. Your Committee on Rules, to which were referred:

Assembly Concurrent Resolution No. 11
House Resolution No. 42
Senate Concurrent Resolution No 10

Has had the same under consideration, and reports the same back with amendments with the recommendation: Amend, and be adopted, as amended.

DICKEY, Chairman

Above reported resolutions ordered on file for adoption

REQUEST FOR UNANIMOUS CONSENT

Mr. Knight asked for, and was granted, unanimous consent to take up House Resolution No. 42, at this time, for purpose of amendment.

CONSIDERATION OF HOUSE RESOLUTION NO. 42 (BY UNANIMOUS CONSENT)

House Resolution No. 42

Relating to the continuance of the Assembly Interim Committee on Postwar Rehabilitation

Resolved by the Assembly of the State of California, As follows:

1 The Assembly Interim Committee on Postwar Rehabilitation, created by House Resolution No. 190 of the Fifty-fifth Regular Session, and continued by House Resolution No 160 of the Fifty-sixth Regular Session, is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power

2. The committee is authorized to act during this session of the Legislature including any recess, but not after the effective date of any amendment to Section 2 of the Property Acquisition Act which deletes any reference to this committee from that section.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The committee created by this resolution is authorized to complete the final report of the committee created by House Resolution No. 160 of the Fifty-sixth Regular Session and to file that report on or before March 15, 1947.

5. The sum of one thousand five hundred dollars ($1,500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read.

Motion to Amend

Mr. Knight moved the adoption of the following amendment:

Amendment No. 1

In paragraph 5 of the resolution, strike out "one thousand five hundred dollars ($1,500)", and insert "two thousand five hundred dollars ($2,500)".

Amendment read, and adopted.

Request for Unanimous Consent

Mr. Knight asked for, and was granted, unanimous consent to take up House Resolution No. 42, as amended, at this time.

Consideration of House Resolution No. 42, as Amended

House Resolution No. 42

Relating to the continuance of the Assembly Interim Committee on Postwar Rehabilitation

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Interim Committee on Postwar Rehabilitation, created by House Resolution No. 190 of the Fifty-fifth Regular Session, and continued by House Resolution No. 160 of the Fifty-sixth Regular Session, is continued as an Assembly Committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature including any recess, but not after the effective date of any amendment to Section 2 of the Property Acquisition Act which deletes any reference to this committee from that section.

3. The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4. The committee created by this resolution is authorized to complete the final report of the committee created by House Resolution No. 160 of the Fifty-sixth Regular Session and to file that report on or before March 15, 1947.

5. The sum of two thousand five hundred dollars ($2,500), or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, as amended.

The roll was called, and the resolution adopted by the following vote:

AYES—Anderson, Beck, Bennett, Berry, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Collier, George D. Collins, Conrad, Cooke, Cramer, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Waters, Wollenberg, and Mr. Speaker—65.

NOES—None.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 11 (BY UNANIMOUS CONSENT)

Assembly Concurrent Resolution No. 11—Relative to the continuance of the Joint Committee on Preschool and Primary Training created by Resolutions Chapter No 60 of the 1946 (First) Special Session.

Resolution read.

Consideration of Committee Amendments

The following amendments were proposed by the Committee on Rules.

Amendment No. 1

On page 1 of the printed measure, strike out all of the paragraph numbered 2, and insert

"2. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment, with authority to file its final report not later than the fifteenth day of March, 1947."

Amendment No. 2

On page 1, in paragraph 4, line 21, of the printed measure, insert "$10,000" in the parenthesis, and insert, after the words "the sum of", "ten thousand dollars".

Amendments read, and adopted.

Resolution ordered reprinted and engrossed.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 10 (BY UNANIMOUS CONSENT)

Senate Concurrent Resolution No. 10—Relative to the continuance of the Joint Fact-Finding Committee on Un-American Activities created by Resolutions Chapter No. 143 of the Fifty-sixth Regular Session.

Resolution read.

Consideration of Committee Amendments

The following amendment was proposed by the Committee on Rules:

Amendment No. 1

On page 1 of the printed measure, strike out all of the paragraph numbered 2, and insert

"2. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment, with authority to file its final report not later than the fifteenth day of April, 1947".

Amendment read, and adopted.

Resolution ordered reprinted, and on file for adoption.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 588: By Mr. Silliman—An act to amend Section 44 of the State Water Resources Act of 1945, relating to water and flood control.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 589: By Mr. Bennett—An act to add Sections 64, 64.4 and to repeal Section 63 of the Civil Code, relating to validity of marriage.

Referred to Committee on Judiciary.

Assembly Bill No. 590: By Messrs. Dickey, Caldecott, Sherwin, Carey, and Sheridan—An act to add Section 66f to the Code of Civil Procedure, relating to the number of judges of the Superior Court in the County of Alameda and providing for the appointment of additional judges and for their compensation.

Referred to Committee on Judiciary.

Assembly Bill No. 591: By Messrs. Dickey, Caldecott, Dunn, Carey, Sheridan, and Sherwin—An act to add Section 1441 to the Municipal Utility District Act, relating to municipal utility districts.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 592: By Mr. Silliman—An act to create a flood control district to be called Monterey County Flood Control and Water Conservation District; to provide for the control and conservation of flood and storm waters and the protection of watercourses, watersheds, public highways, life and property from damage or destruction from such

waters; to provide for the retention and reclaiming of drainage, storm, flood, and other waters and to save and conserve such waters for beneficial use in said district; to authorize the incurring of indebtedness, the issuance and sale of bonds, and the levying and collection of taxes and assessments on property within said district and in the respective zones thereof; to define the powers of said district; to provide for the government, management, and operation of said district and for the acquisition and construction of property and works to carry out the purposes of the district.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 593: By Messrs. Brown, Sheridan, and Caldecott—An act to amend Section 542 of the Code of Civil Procedure, relating to the attachment of real and personal property.

Referred to Committee on Judiciary.

Assembly Bill No. 594: By Messrs. Stephenson and Gannon—An act to amend Section 18102 of the Government Code, relating to use of accumulated vacation by state employees.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 595: By Messrs. Stephenson and Gannon—An act to amend Section 19055 of the Government Code, relating to certification from eligible lists in the state civil service.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 596: By Messrs. Stephenson and Gannon—An act to amend Section 19056 of the Government Code, relating to certification from eligible lists in the state civil service.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 597: By Messrs. Stephenson and Gannon—An act to amend Section 19501 of the Government Code, relating to disciplinary proceedings in the state civil service.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 598: By Messrs. Stephenson and Gannon—An act to amend Section 19538 of the Government Code, relating to payment of salary upon recertification to a position in the state civil service.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 599: By Messrs. Stephenson and Gannon—An act to amend Section 19141 of the Government Code, relating to reinstatement of employees in the state civil service.

Referred to Committee on Civil Service and State Personnel.

Assembly Bill No. 600: By Messrs. Hawkins and Anderson—An act to amend Section 17951 of the Revenue and Taxation Code, relating to personal income tax exemptions.

Referred to Committee on Revenue and Taxation.

Assembly Bill No. 601: By Messrs. Kilpatrick, Price, Bennett, Hollibaugh, and Rosenthal—An act to add Sections 7 5, 6030, 6031, 6032, and 6033 to, and to add Chapter 9, comprising Sections 6130 to 6144, inclusive, to Title 7, Part 3 of, the Penal Code, relating to prisons, jails, and other places of detention, and prisoners confined therein, and making an appropriation.

Referred to Committee on Judiciary.

Assembly Joint Resolution No. 12: By Messrs. Stephenson and Waters—Relative to memorializing Congress to enact legislation to control the manufacture and sale of inflammable materials.

Referred to Committee on Rules.

Assembly Bill No. 602: By Mrs. Niehouse—An act relating to institutions under the jurisdiction of the Department of Corrections, authorizing the Director of Corrections to transfer the California Institution for Women from its present location near Tehachapi to certain state-owned property in Los Angeles County, and authorizing the use of the Tehachapi property as an adjunct of the California Vocational Institution.

Referred to Committee on Governmental Efficiency and Economy.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT

Mr. Kilpatrick asked for, and was granted, unanimous consent that the following Report of the Assembly Interim Committee on County and City Jails be ordered printed in the Journal in 10-point type:

REPORT OF ASSEMBLY INTERIM COMMITTEE ON COUNTY AND CITY JAILS

Created by House Resolution No. 253 Fifty-sixth Legislative Session—1945

MEMBERS

HON. VERNON KILPATRICK, *Chairman* HON. R. FRED PRICE, *Vice Chairman*

HON. JONATHAN J. HOLLIBAUGH HON. WILLIAM H. ROSENTHAL

HON. ELWYN S. BENNETT, *Secretary*

INTRODUCTION

Mr. Speaker and Members of the Assembly

Your Committee on County and City Jails submits the following report:

This committee was set up by the Fifty-sixth Session of the Legislature under House Resolution No. 253 with an appropriation of $1,500. An additional $5,000 was appropriated at the Fifty-sixth Extraordinary Session, January, 1946.

The committee was empowered to investigate county and city jails throughout the State. It has done so, with the view first of uncovering conditions objectively and in an unsensational manner. Its aim was to scrutinize carefully and then to proceed through the advice of the most expert authorities it could find, to evaluate its findings.

It was no surprise to your committee that its investigations uncovered conditions that can only be described as shocking. It was more than shocking, however, to discover how widespread and deep rooted the unsavory conditions and practices were—and still are in most of the State. Through the taking of testimony and investigations of local jails, situations were uncovered that could not become public without being termed sensational.

It is our belief that the focusing of public attention on the shortcomings of our jails, through magazines and the newspapers, in itself served a purpose valuable enough to justify the creation and the work of the committee.

However, the uncovering of conditions does not necessarily cure them. The committee moved as promptly as possible from the investigative phase of its work toward the constructive phase—evaluating the weaknesses of the local jails of the State and attempting to work out sensible plans for improvement. Because the latter phase of the committee's work was deemed far more important than the mere uncovering of unsatisfactory conditions almost everyone is more or less conscious of, the major part of this report deals with evaluation of possible reform plans. Description of existing conditions obviously calling for remedial action of some sort are placed in a secondary position in this report—those who want to know just what California's local jails look like and smell like will find descriptions toward the rear of this report under the heading, "Conditions in California Jails."

Far more important, we believe, are the following recommendations, which represent the essence, the end result, of all of the committee's work. We urge your careful study of these recommendations, which, if carried, we believe would result in transforming local jails from "relics of the age of barbarism"—and in the end save the State and its subdivisions millions of dollars.

After reading the recommendations, we urgently suggest that you acquaint yourself with the material that follows; the testimony, the evidence and the advice of the foremost authorities in the field of penology, as well as of a great many state and local officials qualified to speak about jails. It is this body of substantiating material which led the committee to arrive at these recommendations.

THE COMMITTEE'S RECOMMENDATIONS FOR THE REFORM AND IMPROVEMENT OF COUNTY AND CITY JAILS IN CALIFORNIA

1. Creation of a division of jail inspection, to function under the State Department of Corrections.

2. Establishment of minimum standards for county and city jails by the Department of Corrections, covering both facilities and personnel.

3. Obligatory approval by the Department of Corrections of all custodial building or remodeling plans where the expenditure involved is $1,500 or more; and similar approval for projected custodial programs where the amount of money involved is $1,500 or more. To insure enforcement, the committee probably will recommend that all contracts within the scope of this provision will otherwise be null and void.

4. Delegation to the State Health Department of specific authority to enter any jail at any time for inspections and enforcement, plus explicit delegation of responsibility to the Health Department for sanitation and health in jails.

5. Establishment of uniform and detailed accounting systems for county and city jails, probably set up by the Department of Finance, and submission of annual financial reports to the State Director of Finance.

6. Prohibition of the fee system of feeding prisoners. The committee will also go on record favoring abolition of kangaroo court. This will probably be taken care of with the establishment of minimum standards (point 2 above).

7. Creation at the University of California of clinical facilities for scientific study of causes and treatment of alcoholism.

8. Establishment in the State Department of Mental Hygiene of a specific program covering research in alcoholism and outpatient treatment therefor.

9. Delegation of authority to the Department of Mental Hygiene to contract with other divisions of State Government for the establishment of work programs for patients committed as alcoholics or dipsomaniacs.

10. Establishment of two inebriate colonies, one in the northern and the other in the southern part of the State. This, like the three preceding recommendations, is in line with the committee's belief that alcoholism must be recognized as a medical rather than a criminal problem, and that handling of such cases must be adjusted accordingly.

11. Separation, as far as possible, of persons charged but not convicted of crimes from those convicted, and specific custodial training, at least in larger population areas, for those charged with custodial duties. The committee strongly feels that there should be more recognition of the need of distinguishing between apprehension and custody.

Before considering the methods of operation of the committee and its hearings and investigations, your committee would like to offer reassurance that extreme caution was exercised in working out its recommendations.

The committee was well aware that local communities fear state initiative or control of problems in their midst. Study of the following pages will, we believe, convince anyone that the committee kept this problem carefully in mind, and that its proposals are in no sense a program for "the State to take over the jails."

Likewise, the committee kept carefully in mind the danger that expansion of outdoor work camps could lead to a program built on "cheap labor." That is not the case, as the testimony—particularly that of labor and farm leaders found hereafter—will demonstrate.

The Committee's Approach to the Problem

The committee submitted to the 1945 Extraordinary Session of the Legislature a progress report, which summarized its work up to that time It was a resume of formal committee hearings, individual investigations by members of the committee, and investigations by the State Department of Public Health cooperatively executed by the department at the request of the committee.

The same plan was followed during the rest of the committee's existence. However, the highlight of its existence undoubtedly were the extensive hearings held in the State Building in Los Angeles the second week in May. The Los Angeles hearings brought together a highly imposing collection of authorities from various parts of the State and Nation. The Los Angeles sessions were supplemented by an additional hearing on September 10th in Sacramento.

The following list of witnesses is only a partial one, but it gives some indication of the caliber of the persons who were either subpenaed or invited to appear, state their views and subject themselves to interrogation:

Eight sheriffs from counties scattered through the State; Roy Casey, Federal Inspector of Jails; Richard A. McGee, Director, Department of Corrections; Clinton T. Duffy, Warden, San Quentin Prison; Helen Legg, Board of Trustees, California Institution for Women (Tehachapi); Dr. Norman Fenton, State Department of Corrections Guidance Center; Kenyon J. Scudder, Superintendent, Chino Institution for Men; Walter A. Gordon, Chairman, California Adult Authority; Major Louis D. Cohen, Adjutant General's Office, War Department, Washington, D. C.; Karl Holton, Director, California Youth Authority; Dr. Karl M. Bowman, Professor of Psychiatry, University of California; Dr. Lawrence Kolb, Department of Mental Hygiene of California; Dr. Wilton L. Halverson, Director, State Department of Public Health; and J. H. Sullivan, Psychopathic Probation Officer, Los Angeles County.

In addition, Governor Earl Warren and Attorney General Robert W. Kenny both offered valuable testimony, as did Calvin Meador, Los Angeles Chief Probation Officer and a number of representatives of social service agencies, labor unions, farm organizations, and temperance groups.

STATEMENTS BY LEADING WITNESSES

(Los Angeles Hearings)

GOVERNOR EARL WARREN

It was particularly encouraging to hear the enlightened views of Governor Warren, himself a former Attorney General, and therefore of professional status in problems of penology.

Governor Warren condemned local jails for anything other than temporary detention and urged rehabilitation through road camps, honor farms and other rehabilitation programs.

"I am of the opinion," he said, "that the county jail as an institution is a relic of another age.

"I think that in order for anyone, good or bad, to improve himself he must have some useful work to do in order to occupy his mind and his body through most of the days of every week. * * * The majority of our jails as constructed are not fit for human habitation at the present time. Many of them are old and most of them have not been constructed with the idea in mind of providing for the rehabilitation of the prisoners. * * * I am of the opinion that we are at a crossroads. We are about to enter into a postwar construction program where either we will be building bigger jails or we will be setting up some other kind of institution to take care of misdemeanants. Now, I hope that doesn't mean we are going to leave the prisoners of a state of 9,000,000 persons in county jails that were designed for prisoners of a state of not more than 4,000,000."

Governor Warren also called for the revamping of the present probation system for misdemeanants, whereunder probation is granted by a board of local law enforcement officers without any followup or supervision whatever after release. He likewise endorsed more intensive crime prevention, declaring: "We will spend a hundred dollars for the suppression of crime where we will refuse to spend a dollar for the prevention of crime."

He continued: "I have seen the county jail system work in this State and I know how it works in other states, and there are comparatively few counties where men can have the opportunity for wholesome work that will have any tendency whatsoever to rehabilitate them. In counties such as Los Angeles, here, and a few others, we do have some very good road camps, but by and large we do not have nearly enough. Of course there are some counties that are too small to have any such kind of program. But the county jail as an institution, it seems to me, ought to be pretty much on its way out, and that its main use in the future should be as a place of temporary detention.

"When a man is sentenced to a county jail for six months or a year or even 30 days, it is destructive of what is left in him, no matter how large or small that may be, to keep him confined in a dingy county jail cell. I am satisfied that in the vast number of cases that it is not essential to keep him in custody, and I don't believe that the punishment that

comes from keeping a man in a cell in a county jail does him any good or the public any good either.

"I say this without any criticism of the people who operate the jails. The sheriffs have absolutely nothing to do with that * * * it is entirely beyond their control; and many of them are not given even the help to keep the jails in the condition they should be kept in."

Governor Warren also urged regional jail farms and camps for counties and cities too small to operate their own singly—"just as we now permit them to get together and have a regional hospital for tuberculosis."

He declared his belief that the State has a responsibility on the local level for programs of crime prevention and correction, urging the Youth Authority's program of making local surveys of juvenile crime, and, where requested, counseling the local community in solving its juvenile problems.

ATTORNEY GENERAL ROBERT W. KENNY

Attorney General Kenny, the State's chief law enforcement officer, strongly endorsed minimum standards for jail operation, state legislation with teeth in it so it could be enforced. This, he said, would materially strengthen the hand of local sheriffs and would be welcomed by them. Moving into the realm of practical politics, Kenny pointed out that sheriffs are faced by a peculiar problem; boards of supervisors have limited funds and they are inclined to vote funds first for roads, courthouses and other projects that help their constituents directly—and last for jails, whose inmates are unimportant politically.

The Attorney General stressed, however, the importance of originating jail reform at the county and city rather than the state level as far as possible. "If the State attempts to assume too many functions," he said, "then what happens in the localities is that they sit back and do nothing. I think the State should furnish the guidance, it should furnish centralized facilities for improving local operations. It should be a service agency, helping to awaken communities to the need of new jail programs and helping guide them in carrying the programs out. And, very largely, I say that is a matter of more training of local officers and servicing local communities."

Recalling that the State pays subventions to superior court judges on the theory that it is important to the State that judging standards be maintained, the Attorney General said he thought it might be feasible for the State to contribute to the "miserable" salaries received by sheriffs in most parts of the State.

He recommended more training for custodial officers and of a separate kind from that suitable for enforcement officers. Regarding the common practice of judges in some counties of pronouncing "floaters"—"180 days unless you get out of the county"—Kenny said:

"I don't know how we are going to train judges. We have training programs for every other official except judges and they stand in need of it more than anybody else. We have a million and a half new people in this State who are going to be shoved around by provincially minded judges."

He said he thought regional, outdoor jail camps, sponsored by the State or by large counties or groups of counties "might solve some of the problem" of crowded and expensive urban jails.

But he warned that "the more responsibility the State assumes, the less effort you will find in your community. And over the long pull it is the community cooperation that is going to do the job. I think what we have got to do is use the State and state standards and state service officers to educate the community to meet its responsibilities"

ROY CASEY, FEDERAL INSPECTOR OF JAILS

Mr. Casey, who recently surveyed many of the jails throughout the country for the Federal Government, discussed minimum standards for jails without reference to California's, which he has not inspected, and the necessity for state-wide standards and a state inspection service.

Pointing out that the field of penology and that of law enforcement are distinctly different, he urged special custodial training for persons engaged in jail work and noted the most common faults of jails as he has observed them.

He explained that the National Jail Association is devoting its attention to the establishment of regional jails or regional work farms. "The National Jail Association feels it is a feasible program for these regional jails to be established where a group of counties can have the facilities of the best possible jail arrangements for its misdemeanor prisoners who are serving sentences.

"Minneapolis, Minnesota, for instance, has a city work farm that takes all city prisoners who are under sentence. It also takes misdemeanor prisoners who are serving sentences from adjoining counties, or any county near enough to justify the sheriff of that county to take a man who is under a 30- to 90-day jail sentence. In that way small counties have the opportunity of keeping their prisoners in much better institutions than if they kept them in a jail of their own. And it is probably feasible for any state to put in a system like that—say three or four or half a dozen regional jails—whatever would be required. With this day and age of rapid transportation it would not be very difficult to take a prisoner 40 or 50 miles. Here in Los Angeles, I believe, you take prisoners 40 miles to your work farm. I believe you could take them 100 miles as well.

"With the regional farms established over the State, a few of them could take care of all misdemeanor prisoners, and there would be resources to provide all the facilities needed in an institution of that kind. It wouldn't put the burden on the small counties to try to live up to a high standard of jail requirements they can't afford."

Casey expressed the opinion that after establishment of some regional farms, some of the counties would improve their own standards on their own initiative. He stressed the importance of putting teeth in the law if a law exists giving some state agency the responsibility of enforcing jail standards.

In response to questioning, he explained that failure to separate the field of penology from law enforcement "has come down to us through two or three hundred years," and that putting the running of jails in the hands of persons trained in rehabilitation, penology and custodial problems would "greatly improve our jails."

Commenting on the practice of "kangaroo courts"—wherein prisoners virtually operate the jails, Casey commented: "It too frequently happens that persons hired to run the jails become lazy—they get in

a rut and it is an easy matter to turn the running of the jail over to the inmates under the excuse that the prisoners should set their standard of cleanliness and enforce it." He condemned such practices unconditionally.

He likewise took to task the "fee" system of feeding, under which prisoners are fed on a fee provided the sheriff, with the sheriff retaining what isn't spent on food. He said: "The sheriff should be paid sufficient salary so he doesn't have to make money from running a boarding house."

He also commented on the danger of failing to segregate juveniles properly, pointing out that "I have run into so many cases in the last two or three years where tragedies have happened in jails that have probably ruined the lives of boys forever. I was called in on an incident in the Seattle, Washington, jail a year ago when a juvenile was literally tortured to death in the county jail. That was avoidable. The county had neglected to provide adequate facilities for segregating juveniles. They had neglected to provide proper supervisors or attendants to take care of those juveniles. In other words, the public accepts a definite responsibility when it deprives a man or boy of his liberty and takes him into custody. The public has a heavy moral responsibility as to the prisoner's welfare while he is in custody. Very few prisoners die in custody. Most of them eventually come out, and if our jails are run in such a way that those persons come out more embittered against society and the laws of society than when they went in, we are running institutions of crime promotion rather than crime reduction. We may not always rehabilitate the prisoner, but it is possible to run the institution so the prisoners are not worse when they come out than when they went in."

Regarding construction of jails, Inspector Casey said in many instances not enough attention was given to proper design, and approved the measure adopted by the California Legislature requiring all jail construction or remodeling costing more than $1,500 to be submitted to the Director of the State Department of Corrections for approval.

"The courthouse architect may be a good one, but too often doesn't know jail design. Often prison supply companies will oversell the county on foolproof steel and cell blocks, and a small place in the building will be cut up into small sections that neither light nor ventilation can penetrate and within six months or a year you have a dungeon that the inmates don't keep clean and the jailers don't keep clean."

He said he approved adequate foolproof cells for the more hardened prisoners, but that their percentage is not high—that it isn't necessary to spend hundreds of thousands of dollars for such cell blocks when dormitory space or other facilities would suffice. He added that open, light buildings are much more suitable and cheaper for housing alcoholics. Concerning expense, he said the United States Bureau of Prisons had made an effort to learn the actual per capita cost of maintaining jails but that costs of jails were too frequently unsegregated from other police department costs and sheriff's costs to permit any reliable conclusions. He concluded his testimony by saying sheriffs were not, as sheriffs, disqualified from running their jails—but that, because they are law enforcement officers, does not make them penologists. On a nationwide basis, he said, 2,500 of the 3,100 county jails in the county are on his department's disapproved list.

RICHARD A. McGEE, DIRECTOR, DEPARTMENT OF CORRECTIONS

"The jail is probably the most important penal institution in existence and still the one that is given the least attention, probably because the jails are small and scattered. Yet they are important because so many people pass through them. We are interested, as administrators of state institutions, in these jails because all the people that we get into our state institutions pass through these jails. Very often the damaging effect that takes place upon them in the jails is one that is very difficult for us to overcome for a long period of time after we receive them."

Mr. McGee explained that about two years ago, at the request of the Sheriff's Association, his department agreed to make at least one inspection of all the county jails each year. No effort was made to inspect city jails. He said the Board of Corrections had no specific authority for such investigations, but "some general authority," and added that specific authority would be helpful because without it there was some question about authority to spend money and employ the several inspectors needed. Furthermore, specific authority would "give us a better status in the local communities. We wouldn't be coming in merely as an invited expert but as a person with some legislative backing."

Returning to the relationship of prisons and jails, he said:

"To operate good state prisons without the operation of good jails, to operate good jails without good law enforcement or to do any of those things without a good community program of crime prevention is to miss the boat, so to speak. It is like a baseball team, if you leave one of the bases uncovered the other players can be ever so good and still lose the game. The problem of dealing with the violators of the law or the potential violators is all one problem and there must be coordination between all the agencies."

Concerning jail standards and their enforcement, he said he thought specific standards should be delegated to some board for enforcement and should not be rigid because standards vary among facilities—it would be ridiculous to try and set up the same standards in Plumas County that might be required in Los Angeles County. He pointed out that on vote of the Board of Corrections a committee on jails had devised a set of standards. The committee was composed of Mr. McGee, Mr. Holton of the Youth Authority, Mrs. Legg of the Women's Board and Mr. Lester of the Adult Authority.

The recommendations of the committee include the following legislative proposals:

1. Creation of a Division of Jail Inspection under the State Department of Corrections and the establishment by law of minimum standards and uniform policies to be administered by the State Board of Corrections.
2. Establishment of state regional jails and rehabilitation centers, and policies governing classes of prisoners to be housed therein.
3. Establishment of institutions and other facilities for the care and treatment of chronic alcoholics.
4. Creation of a single agency in densely populated centers for the purpose of consolidating jail and parole functions of overlapping city and county jurisdictions.
5. Strengthening of the jail parole systems.

Mr. McGee said he believed that by all means the State Health Department should handle health inspections, under the border inspection service to be handled by the Department of Corrections.

BERT O. WEBB, WARDEN, MEDIUM SECURITY PRISON

Mr. Webb, who conducted the inspection of county jails under the direction of Mr. McGee beginning in March, 1945, and extending over three months, reported as follows:

"I found that some of our jail buildings were pretty old, in fact one of them is 98 years old and is still in use. Of all the jails inspected, 14 built prior to 1900 are still in use; 20 built prior to 1924, which makes them more than 25 years old, are still in use; 16 built between 1925 and 1934; 10 were built between 1935 and 1945. That includes the one new jail in Contra Costa County which has been completed since the inspection. I have reinspected that jail since that report and it wasn't all in operation at that time. But I think Contra Costa County will now have a very well operated jail and adequate, if the population of the county goes down as they expect it to.

"The total populations in the jails were 52,226. That was taking the population on the date that the inspection was made. And it applies only to county jails. It includes those county farm facilities under the direct supervision of sheriffs. It does not include those under the jurisdiction of county boards of supervisors.

"There was a notable lack of segregation facilities. Fifteen jails were badly overcrowded, 26 lacked segregation facilities required by law. By that I mean that the law requires segregation of misdemeanants from felons, juveniles from adults, females from males. Thirty-four of the jails were considered unsafe from a custodial point of view, due mainly to lack of trained personnel and 24-hour supervision. I found that in most of what I would term the medium populated counties, the sheriffs and their deputies either take turns guarding the jail or there is no one actually on duty.

"Evidence of kangeroo court was found in 15 jails. In seven of the 15 the practice was condoned. In the other eight I based my conclusions that there was kangaroo court existing on things I saw in the jail. Twenty-seven counties were found to have some kind of a work program for sentenced prisoners. In most cases this was a small program such as keeping up the courthouse grounds, working on county bridges or roads. Several of the counties had real farm programs, among them Ventura County. That brings out another point I would like to make: regardless how new or old the jail might be is second in importance to the way it is administered. San Diego is an example of this—it is old and badly overcrowded but it is clean. Twenty-eight of the jails visited had a very distinctive jail odor. I think that is just a nice way of saying that the the places stink. This, of course, is due to lack of ventilation and proper toilet facilities, and the same lack of bathing facilities that the committee has found.

"I rated the jails as follows: seven, that is as far as sanitation is concerned, excellent; 17, good; 12, fair or indifferent; 11, bad; 10, very bad. I might add that in the case of those listed as bad or very bad, I leaned over backwards in their favor.

"I found that jail clothing was furnished in only 10 counties. I think the committee knows what might happen if prisoners are kept in their own clothing and not allowed to bathe or given baths and cleaned up before they are incarcerated. You are bound to have bedbugs, cockroaches, and many types of vermin.

"As for methods of feeding, in four counties prisoners are fed in a dining room. In one county they are taken to a local restaurant, the jail having no feeding facilities at all. Except on farms, where farm programs are in operation, two meals a day are fed almost without exception. The cost of meals ranges from 7 cents to 62½ cents. To clarify: the 7-cent figure applies to an institution aided by produce raised on the jail farm. People are taken out to a restaurant at a cost of 62½ cents.

"In 16 counties, where a fee is paid to the sheriff for feeding prisoners, the cost to the counties for feeding exceeds that of other counties.

"Medical examinations and venereal tests for newly-admitted prisoners were given in only 10 counties. Mental cases are confined in the jail in 15 counties. Medical attention was considered adequate in only nine counties."

Summing up recreational facilities he said: "In practically every jail prisoners were allowed the use of day rooms or corridors during the day. Cards seemed to be the chief means of recreation. Library facilities were furnished in 21 counties. A number of jails allowed no reading matter whatever, even prohibiting daily papers. Religious services were held on a voluntary basis in 38 counties.

"Management of parole varied greatly," he reported. "In nearly every county the parole board was, according to law, the sheriff, district attorney and the next law enforcement officer, in most cases, the chief of police. I found few, if any, supervised parole cases after they were released.

"The 35 jails lacked personnel sufficient to maintain 24-hour supervision. Salaries range from $125 to $260 a month. In the larger bracket of medium populated jails—those with 25 to 200 inmates—the average was $175."

He also pointed out that 16 of the counties were planning new jails as post-war projects and 13 additional counties were planning or remodeling or adding to their present jails.

CLINTON T. DUFFY, WARDEN, SAN QUENTIN PRISON

Mr. Duffy, speaking from long and successful experience as a prison administrator, brought to the committee's attention the fact that the life and behavior of a man in a State prison is conditioned by his community life and his experiences in municipal and county jails.

"A haphazard program for crime prevention, or none at all in the community, is reflected in our jails and what happens in jail is reflected in the prisoner's attitude toward confinement in prison," Duffy pointed out. He appealed for cooperation with prisons on the part of those responsible for county jails.

"The men who come to prison come from our county jails where all types of treatment and conditions prevail," he said. "Those who come from jails where conditions are somewhat favorable, and where a program of training, work and discipline is in force, are adaptable to prison routine without too much trouble. But those who come from jails

where conditions are filthy and the individual hasn't been given any jail program present a serious problem to the institution."

Duffy told the committee that confinement was only one phase of the problem concerning prisoners. He stressed the importance of rehabilitation of the individual. "We well know," he said, "that we must strive to send the man back to society rehabilitated to the extent that he won't get into jail again and into prison.

"A program must be planned. The jails could clean themselves up and lend a hand toward the training and treatment of the man who is to enter prison."

Duffy urged that the process of reclaiming a felon start in the jails and that complete information concerning the work accomplished be communicated to prison authorities.

"When a man comes to prison from a jail where he has lived in filth, where no one cared about the food served him and where his clothing is poor, our task is made that much more severe.

"We receive men at prison occasionally barefoot, their clothing tattered and torn because they have been allowed by the jails to sell their clothes or to gamble them away.

"We receive men who are lousy; who have bedbugs; who have social diseases, and who have received no attention in the jails. Treatment and correction of these individuals might just as well have started in jail. Such treatment would have given them a better start in prison.

"Men sometimes stay in jail for long periods of time awaiting trial, appeal, or because of other delays. These men should be provided with a definite program. Men sitting around idle deteriorate whether in prison, in jail, or in civilian life.

"In the institutions we have a sound program of training the men through education, work, discipline, and morale. But this treatment should start in the jails to a wider extent. If this were done it would be a great help to wardens. We would like to be advised of the reactions of a man from the moment he is arrested to the moment he is delivered to the prison. Some jails are reporting favorably and some are not.

"It is a continuous problem for the jail administrator to see that proper food is served. Unless you constantly supervise its preparation it will fall below standard.

"I have seen men enter prison with a feeling of relief, saying they were glad to get out of jail because now they at least have gotten something to eat. In the immediate past two men—men who had not talked to each other—each sentenced to death—declared they were glad to get to San Quentin in condemned row because they were able to get something to eat. Well, conditions must have been pretty bad in those jails or those men would not have reacted that way.

"We showed an interest in the affairs of Nuernberg and yet have conditions in California where prisoners are being fed slightly more than half of the minimum standard prescribed by the Health Department.

"I asked the Department of Health to come into San Quentin and am helped by their findings and advice. It would be a help to jails if they would extend an invitation to the department to inspect their facilities. Understandably the department is reluctant to come unless asked. I have never heard of a jail that had requested such inspection."

He urged that a system of uniform custodial care for prisoners in jails be worked out, and suggested that the Department of Corrections might set up minimum standards. He stressed the need for a work, educational and recreational program in each county.

"I don't care if a man is going to be in jail one week, or one year, he should be doing something while in jail. When we take a man in custody we assume a certain responsibility. He is in jail because he has failed to meet certain qualifications and standards in the way of life. It is our responsibility to try to train him toward the proper way of life. If the jails had a definite program for the man from the time he enters jail until he leaves, we wouldn't have so many repeaters.

Duffy favored the suggested plan that the State or counties operate and supervise regional farms throughout the State to take the place of the very bad little city and county jails in the smaller areas. He felt they should be state-operated to insure uniformity, and expressed the thought that it would cost less to keep men on farms than it would in the county jail.

He suggested an educational program in individual jails without delay:

"Even if your men are to be confined for only a short period of time they can start an educational program. If you don't, at the moment, have the money you can get outside people interested in coming in to give you a little help. At San Quentin we started in a small way A personal friend spent four nights a week in an effort to set up an educational program through free personnel. From that one man who volunteered his services we have today 35 paid outside instructors through the State Department of Education.

"A jail without a library can seek the aid of the county librarian or city librarian. These people will help select the proper books for the man. We do that in our institutions. The County of San Francisco, the University of California, are very cooperative in sitting with us during the selection of books for our libraries.

"The Department of Corrections and the Youth Administration could work out an effective program of recreation along crime prevention lines in the local communities Within the two years that the Department of Corrections has been established it has been proven that they can definitely work out a program. There has been much benefit from the work of Mr. Webb in the jails and Mr. McGee making contacts in the communities.

"A good many boys could be adjusted on the local level. With a proper training program we could avoid sending a lot of youngsters to San Quentin."

Duffy further suggested that incarcerated veterans take advantage of educational rights due them. "We have an educational program for all men, both academic and vocational, and we are increasing that program. However the veteran is entitled to, among other things, correspondence courses from accredited universities thoughout the United States which will be paid for by the government. We also intend to give those men who have been in the service a chance to just sit down and discuss their own problems. Approximately 21 percent of the inmates of San Quentin are veterans of World War II."

He urged state funds to aid an adequate crime-prevention program to be set up in the local communities and suggested that the Department of Corrections be tied into the program.

Duffy pointed to a growing public interest in the jail problem and commended the Department of Corrections for encouraging visits to jails which he believes will lead to a favorable public reaction toward a better community program.

"The problem throughout the years has been to create that local interest and to be able to set up funds through the board of supervisors to accomplish those things which should be done in jails The public must be convinced that it is just as important to do something about jail conditions as it is to take action concerning a new city hall, a new highway or a new public building."

He suggested a planned program to interest citizens in the problems of our jails and institutions of correction. A positive program to drive home the facts and the need.

HELEN LEGG, MEMBER OF BOARD OF TRUSTEES, CALIFORNIA INSTITUTION FOR WOMEN

Mrs Legg, who not only has the opportunity to observe women entering institutions but, as a member of the Board of Trustees, California Institution for Women, assists in setting the terms and granting of paroles and also supervises the women on parole, spoke with respect to the handling of women in these institutions from the viewpoint of women's prisons.

Mrs. Legg pointed out the attitudes and reactions of women entering the institutions from county jails and city jails; and stressed the resentment they felt after being confined in community jails.

"They are full of resentment and it is hard for them to make the adjustment to a women's institution like ours. They have been just sitting, most of them, in idleness awaiting their trial.

"We notice the amazing increase in youngsters who are sent to the state institutions for women. When we get them from the jails there is a hopeless feeling on their part and resentment over the way they have been treated. The youth of these women is one of the big things that should be considered in this jail problem.

"A work program could do much toward preventing the resentment so prevalent among the women coming into the institutions."

In response to questioning Mrs. Legg said that there are a great many problems that are entirely different in the care of women prisoners from men inmates. However, she pointed out, "the one common need of both was a definite work program carried out, partially at least, in the open. Outdoor work is especially necessary for women who come from county jails where they have been confined very closely with no outside activity at all."

She spoke of the great number of repeaters in the institutions and agreed that a prevention program carried on beneficially on the local levels would not only reduce the number of repeaters but would prevent a lot of women from having to be sent to the state institutions.

"By the time we get them there is not always too much that can be done toward changing the pattern of their lives. If something could be

done at the first instance that they are picked up for any offense, no matter how small, they probably would never reach the institutions.

"In looking over case histories one is struck by the repetition of the pattern: Police, 10 days, 14 days, 30 days, floater out of town. Repeated time after time until finally they reach the state prison. Very definitely a preventive program is needed. The local community could greatly aid in crime prevention with a predelinquent program."

She deplored all the good programs which had been proposed or started, then dropped far short of completion. It was her hope that all communities could work to give the younger people a chance at recreation which they haven't had, especially in crowded communities, and suggested that people take an interest in youth with an eye to keeping them out of jail instead of putting them in.

Mrs. Legg expressed the belief that the length of sentence was rather immaterial as far as her institutions were concerned. "Because the rehabilitation of a person is an individual problem. Where one person can become adjusted and readjusted in one year, another will require two or three years or longer.

"Under the Adult Authority our board follows that policy. We don't sentence a person say for 10 years but set their time ahead Then if progress warrants we let them out for a parole earlier. If we feel they haven't made progress and need longer than the usual period we do not release them at the time specified."

She stated that in her opinion the parole boards had all the authority necessary to carry out any program in mind for them at the present time.

Sewing and cooking projects, together with some outside work, according to Mrs. Legg, should be provided for women in county and city jails. The program should be set up to take care of misdemeanants as well as those waiting transfer to prisons. Those with skills should be encouraged to develop their talents. She stressed the responsibility of the State for the health of the individual and the adequacy of the food and sanitation of the jails where they are living.

In closing Mrs. Legg deplored the practice of floating misdemeanants, agreeing that an exchange of violators doesn't help.

DR. NORMAN FENTON, STATE DEPARTMENT OF CORRECTIONS, CHIEF GUIDANCE CENTER

Dr. Fenton, Chief of the Diagnostic Clinic which is operated at San Quentin and at Lancaster to study each man received for the purpose of determining the program he should follow during his period in the institution and make recommendations to the paroling authority, discussed the manner in which men should be selected for minimum and medium security facilities.

"If we consider very briefly the development of detention facilities for children we may have a basis to predict, even though the changes may be longer in coming, the future of the jail treatment of adults," Dr. Fenton said.

"The sentimentality of the American people in regard to children, in contrast to their sternness toward and fear of adult offenders, has made it much easier to advance the penal treatment of children who break laws than of adults. Thus the present-day jail which is a much better place than the jail of former times, nevertheless is, in many cases, much worse than

the facilities provided for the detention of children. Many cities have gone from juvenile tanks and lockups, handled by more or less well-meaning people without training for handling children, to child welfare centers supervised by a staff of trained correctional officers, psychiatrists and psychologists and other specialists. The reason for the change is not only a feeling of sympathy for children but also involves far more practical considerations. We have begun to see the close relationship between juvenile delinquency and adult criminality.

"The detention homes are becoming child welfare centers. The child is carefully studied and treated while in the new-type detention homes and juvenile halls. Many things are done to try to prevent these children from going to correctional schools and then on to the penitentiary.

"In other words, with child offenders against the law, society has begun to employ methods of prevention in addition to mere institutional lock-ups. With adults, in most places, we are still in the lock-up stage.

"We have done very little to try to prevent further jail sentences or prison commitments for those who are sent to jail for any length of time. Even some of the short-term guests of the town jail may seem to be in for minor offenses, yet may have personal problems of such seriousness as to warrant some study and treatment. If not treated in some effective way, many of these may return to jail later for more serious offenses. The practical policy should be based on the idea that anyone who violates the law and is put in jail may be likely to return to jail or go to prison.

"If we view every jail inmate (except some obvious accidental or minor offenders) as potentially capable of committing later an offense meriting sentence to prison—unless something is done for them—then a program of individual study and classification will not seem so far-fetched and expensive.

"We talk glibly about an ounce of prevention being worth a pound of cure—but we do very little with the adult criminal in the jail to indicate that this idea of prevention has influenced us very seriously as regards its practical application. And may I add that it seems likely that the beginning adult offender may prove to be as good a subject for preventive treatment to avoid return to jail or prison as the juvenile delinquent whom we wish to keep out of juvenile court or the correctional school. Two-thirds of the men we receive at San Quentin have never been in prison before. California has a big stake in any efforts to keep them out of jail and out of prison in the future.

"The men who get into jail range from innocent persons to confirmed, habitual criminals. Some are very healthy—others are suffering from serious contagious illnesses. Morons and imbeciles in the jails are joined there by men of average or superior intelligence. The entire range of occupations from day laborer to the professions is represented in the jail. Putting all humane considerations aside, it is the part of practical wisdom to give men in jail study and treatment in accordance with their needs."

Dr. Fenton explained the function of a series of questionnaires for use by police personnel from the arresting officer to the person who delivered the man to prison. The questionnaires he pointed out aid prison authorities in processing the newcomer. It was also cited as an example of cooperation between various enforcement and rehabilitation groups.

He went on to explain how through physical, mental, psychological and psychiatric examinations the Guidance Center determined an index to an inmate's personality and his vocational capacities.

"It is information we obtain from these studies of every aspect of the man's personality which aids us in directing his rehabilitation and also the protection of society. These studies are compiled into a summary report and the man is then referred for transfer to one of the prisons. The custody is suggested and a program of treatment, educational, religious, psychiatric, medical, vocational, whatever is involved is recommended."

Dr. Fenton suggested that all jails could profit from a diagnostic study and planned treatment for prisoners. "The great value of adequate study of the adult offenders who get into jail will be the possibility through scientific efforts of preventing the return of these men to jail. Sorting and treatment of county jail prisoners is one strategic way to stop the big parade of men to the prisons."

He pointed to the advisability of especially trained custodial personnel.

"Medical and mental examinations and treatment in the county jails should be maintained," Dr. Fenton urged. "It may be expensive in the initial outlay but not in the long run. It is estimated that 80 percent of the cases committed to a county jail need some kind of physical treatment in addition to the probable need of mental treatment. Proper attention would be a constructive step toward preventing repeated offenses."

KENYON J. SCUDDER, SUPERINTENDENT, CHINO INSTITUTION FOR MEN

Possible replacement of the type of jail which serves as little more than a place of confinement, by modern facilities providing work, recreation, education, medical, and psychiatric treatment, etc., which are in part self-supporting, and where the problem of rehabilitation is paramount, has been frequently discussed.

The California Institution for Men at Chino, of which Mr. Scudder is Superintendent, is an outstanding example of this type of facility.

Mr. Scudder expressed a belief but the methods employed at Chino could be adopted with profit by the counties and discussed the Institution and its operation. Highlights of his discussion follow:

"The men go out from Chino with an entirely different attitude than when they enter prison. Because of this, and the activities there, I feel that there is much of the Chino program that could help and benefit a city and county jail program if facilities were available. I observed this work from the county standpoint through the forestry camp which was established in 1931 in Los Angeles and which is still a great success in connection with the juvenile court. Boys are returned to the community without reoccurrence of their offense as against the necessity of sending them to a state institution for a period of 18 months or two years. The same thing can be done in connection with the jails.

"We find that men do not look upon Chino as a prison. That doesn't mean that it is a soft place. It means that there they are given an opportunity to develop as a person. A man doesn't have any shame at all about bringing his family back to visit. It is where they got their start and they want their families to know that Chino is not a prison. It is

a California Institution for Men. To them that means a great deal. The same atmosphere can be carried over to the city and county jail.

"If we continue to herd men into jail and take them back time after time we will not get very far with the problem of trying to adjust people so that they can go out and reenter the community.

"We have to face the fact, whether city jail, county jail or a state prison, about 98 percent of those who go in are going to come out. We want to know whether they are coming out sour and embittered or coming back with a decent attitude, trying to make an adjustment so that they don't come back.

"After screening the men who come to Chino we make an effort to treat them as individuals—as people."

As an example, Scudder described how men were transported from San Quentin in ordinary busses without locks, without billy clubs or guns—simply as ordinary people More than 3,000 men have been carried to Chino in this manner without a single instance of disorder or even discourtesy.

On arrival, the men are impressed by the absence of armed guards. The empty towers help to impress them from the start that each individual must carry some of this load—he is given a sense of responsibility.

Speaking of adapting the new men, Scudder said: "We believe that there can't be rehabilitation except through reform, and reform must come from within the individual rather than from coercion. Chino is hard because the man faces temptations. He must stand on his own feet and show that he has something in him that can be depended upon. Perhaps for the first time in his life he is going to learn to work. We teach men to work and to get over the fear of work. In many the fear of work is predominant.

"A new man is placed in a medium security unit and given the opportunity to get used to this new freedom and see that others enjoy more privileges. He sees that he cannot have those privileges until he has established himself as an individual, proved that he is dependable.

"Every man is tied to some definite vocational activity. Each newcomer has a complete file from the guidance clinic and he is studied for two weeks before classification. He has an opportunity to express his preference in work. Soon we see a change. The man's head comes up. He has self-assurance. He takes pride in his job, in the horses he handles, his welding or machine He talks of his job. In Chino there is an absence of usual jail talk of women and crime.

"On Sunday, visiting day, the man is made to feel important. He is the host to his guests. He greets them on arrival, shows his family around. He may share a picnic lunch in the park area. He may visit under normal, healthy, quiet conditions, with no one listening, and no embarrassment to the people who come.

"Every man, no matter his color or his religious belief, is treated alike. If he cannot accept that situation we don't want him and he does not stay. We have had no serious difficulty from the standpoint of men living together as Americans, regardless of color.

"On the rare occasion when a man gets a little heady, usually members of his own group take him aside and say, 'Now listen, this is the situation here. It is up to us.' The situation is straightened out by the men themselves."

Scudder told of the ranch activity. Now 1,500 head of cattle make up the beef herd. Meat is furnished five or six state institutions. The men slaughter and prepare and process the meat as well as farm and dairy products. These are in demand with packing houses when they are released. The same applies to men working at other trades.

There are also camps out of Chino where men work in the open and have done excellent work in helping the United States Forestry Service and the Army. Their record is superior to civilians in similar jobs. Yet the men are in no way in competition with labor.

Speaking of other activities Scudder told the committee: "We raise almost everything and we are growing closer and closer to being self-supporting. However, the prime objective is to adjust the men and teach them habits of work, to revitalize them and to send them out with new hope and courage.

"During the war Chino turned out 600 welders, 450 of whom went to work in the shipyards."

Scudder recommended a crime-prevention program which would go into neighborhoods "where kids are getting into trouble." Every community, including those within cities, should participate. He felt the program should be coordinated between State, county, and community. He also agreed that the State has a vital stake in community conditions which might lead to crime.

WALTER A. GORDON, CHAIRMAN, CALIFORNIA ADULT AUTHORITY

Mr. Gordon, Chairman of the Adult Authority, has been a successful lawyer, a student of criminology under August Vollmer and a member of the paroling authority, first of the Board of Prison Terms and Paroles and later of the Adult Authority.

Gordon explained the State Parole System; discussed the question of release procedures on the county and city level. He stressed the need to carry a supervisory program through into effectual community adjustment and strongly recommended strengthening the parole structure on the local level and providing means for supervising these people upon release.

He pointed out the necessity for highly-trained personnel within the parole supervising agency, "because they must interpret scientific information gathered by various professional men.

"The date of a man's release from prison to society is determined from the changed attitude of the individual while in custody. We must determine at what time he is capable of making the adjustment to life in a community. The parole officer is aided in his decision by information gathered by the guidance center, the institutional people who carry on the treatment program correlated with his work on the outside.

"A parole officer must be sympathetic and understanding of the problems of maladjustment in certain individuals. They have to recognize that crime itself may be symbolic of a behavior problem and be equipped to gain the individual's confidence and aid in resolving his perplexing problems.

"I don't see why any release procedure should be any different in the county jails than in the prison system."

Toward strengthening the county parole systems, Gordon suggested: "Men should be sent to a county jail on an indefinite sentence with a

maximum set. There should be clinical services because a misdemeanant is a potential felon."

He suggested a full-time parole board. Added to the present board, consisting, usually, of the district attorney, sheriff, and chief of police, should be at least two persons disinterested from the viewpoint of prosecution.

He also recommended:

Paroles should be granted under supervision.

A presentence investigation which, in many instances, would replace "the floater" with probation.

State control through state standards of the whole criminal situation from the time of predelinquency through to what the State now accepts as the responsibility after a felon has been committed and sent to prison.

A predelinquency program that should start in the school system.

MAJOR LOUIS D. COHEN, WAR DEPARTMENT, FORMERLY INDIANA STATE PENAL FARM

Major Cohen spoke of his experiences with state farm operations in the State of Indiana. He pointed out the comparative low cost of operation and discussed the advantages and difficulties of this type of institution as a substitute for county jails.

The farm system, according to Major Cohen, represents a great economy to the public. "The per capita cost of the Indiana farm averages about $200 a year. This figure does not take into consideration the vegetables grown or merchandise produced. The capital investment is infinitely less than for jails."

Concerning the farm's function and operation Major Cohen said: "All the counties send all men who are to serve more than 30 days to the state farm. Commitment covers male misdemeanants above the age of 16, both white and colored. The actual number of days covered by the commitment must be served, with provision for good time allowance.

"Men are temporarily classified and assigned to a work and training program within four days of admission."

He described an educational program in force which included literacy training; a program of agriculture training, with courses in dairying and poultry husbandry, by a project method with on the job training; automobile mechanic training; on the job type of courses in a variety of trades. "We developed an extensive library and a program of group therapy."

Because of a limited staff, Major Cohen said, it was necessary to call on the local community for cooperation. As an example, he cited the help of nearby universities in conducting courses.

In connection with the work program, Major Cohen favored a payment to the inmate worker. "An opportunity to earn gives a man a feeling of responsibility to his family. That is, a more direct relationship than the indirect relationship implied in relief."

He felt that the problem of rehabilitation could be more efficiently dealt with under a system of indeterminate sentences.

"When a man is sentenced to 5 to 30 days for drinking, people are punishing the offense not the offender. Instead of giving a man a sentence

which seems to punish him, we would rather give him a sentence that would rehabilitate him."

Major Cohen recommended consideration of a special institution for the handling and treatment of alcoholics. He pointed out that 1,495 of 3,700 inmates were sentenced for drinking and that probably drinking contributed indirectly to the sentencing of many more. "These alcoholics just keep going around the revolving door arrangement.

"It is an interesting thing that alcoholics make excellent inmates. Knowing that, we kept certain jobs open for certain alcoholics who would be sure to return within a week or 10 days."

He recommended group therapy and the cooperation of Alcoholics Anonymous to aid in the treatment of drinkers.

"Individual psychotherapy is terribly expensive. The physical aspects of treatment are well covered by the institutional program, the outdoor life, regular work, good food, plenty of sunlight, and exercise."

Commenting on the difficulty of getting an economical program, such as the institutional farm, started, Major Cohen stated: "Perhaps governing bodies are unaware of the over-all cost of maintaining the present type of jails. If a county would take a very careful cost accounting of the alcoholic, say, tally the cost of the court clerk, stenographer, judge, bailiff, police force, jail staff, and so on, multiply that by the number of times he comes through a year.

"Contrast these figures with the cost of sending him to a place where he can be treated. Then they would be less reluctant to appropriate sums for the original outlay."

KARL HOLTON, DIRECTOR OF YOUTH AUTHORITY

Mr. Holton explained that the Youth Authority's interest in jails dealt primarily with the detention of juveniles.

"In this problem there is the mutual interest of the city, county, and State." He said, "You can't divide it. The attitude of young people coming to the state correctional school reflects the jail from which he came. Poor jails, where juveniles are detained for long periods, are not well treated, not properly segregated and not well fed, send us children who present a difficult custodial problem."

He stressed the need for more correctional school facilities so that young people could be delivered upon commitment. "There never has been a time when we could move boys and girls out of detention homes and jails into state schools within even a month," he said.

He told the committee that the authority and money in the Postwar Building Program seemed adequate but the problem of securing materials was bad.

Holton recommended more detention homes, pointing out that in Los Angeles County and City the courts are forced to detain youngsters as young as 13 years old in the city jail.

He recommended regional or state-operated detention homes modeled on the lines of the Preston School.

He called attention to a legislative bill allowing the State to subsidize up to one-half the operating cost to counties who would operate 24-hour schools or forestry camps providing that they met the standard which the Youth Authority set. He said 13 such schools were in operation

and the State enjoyed splendid relations with the counties in their connection.

Holton stressed the importance of trained personnel in handling juvenile offenders. He mentioned the excellent job the Army was doing with the proper personnel in the federal camp at Turlock where facilities were limited to tar paper shacks that were previously used to house Japanese citizens.

DR. KARL M. BOWMAN, PROFESSOR OF PSYCHIATRY, UNIVERSITY OF CALIFORNIA

Dr. Bowman, advising the committee on the problem of what may be done with alcoholics, opened his discussion with a statistical report of the problem.

"According to the best estimates there are about 50,000,000 persons in the United States who use alcoholic beverages, and approximately 3,000,000 of these use alcohol to excess at times. About 750,000 of these become chronic alcoholics. The National Safety Council states that in 1944, in one out of every four fatal accidents, either the driver or a pedestrian involved had been drinking. The cost for caring for alcoholics in our mental hospitals is about $13,000,000 a year. The general figure of the cost to society of excessive alcoholism is about $750,000,000.

"By and large we can say that every man who uses alcohol to excess is to be looked upon as a sick man, and to be treated by a psychiatrist," he said.

"Connecticut has adopted a law to make a beginning of studying and treating alcoholics. This law sets up a board of five members, at least two of whom shall be licensed to practice medicine. The board is empowered to study this whole problem and is authorized to purchase land and buildings and equipment to set up facilities for research and study of the problem and for the treatment of alcoholics.

"It is also provided that 9 percent of all funds received by the Liquor Control Commission for permits, under the Liquor Control Act, shall be set aside to carry out the provisions of the act.

"I feel that California should do something of this same sort. I would recommend that California set up a law whereby 10 percent of all the money received from the liquor industry by state taxes shall be set aside for a study of this problem and for the care and treatment of alcoholics and for research work to be carried out.

"This country is taking in approximately $2,713,000,000 a year in taxes from the liquor industry and it can well afford to take 10 percent of that money as a way of dealing with the whole problem."

Concerning treatment Dr. Bowman said: "In the beginning the alcoholic should be in a hospital and for a period should have intensive psychiatric care. Following that the man can either be sent to one of the types of institutions which you can set up in the country, the farm colony type of place, where two hours a week can be spent with the psychiatrist. Others should be allowed back in the community.

"You are not going to get very far with the alcoholic unless he wants to get well," Dr. Bowman stressed. "If you force him into an institution by sentencing him to prison he may be antagonistic."

In response to questioning Dr. Bowman said that a carefully picked group should show 50 to 60 percent of recoveries under the discussed

methods "If you treat everybody regardless you are very likely to have it go down to 10 to 20 percent."

Dr. Bowman, who watched the start of Alcoholics Anonymous while head of Bellevue Hospital, thought that organization could play a really important and valuable part.

Advising the committee on procedure he stated: "I believe that this committee could initiate recommendations, first the passage of a law following the general pattern of the Connecticut law which I think has been very carefully drawn. Secondly that law allocates 9 percent of the revenue be made available. If all publicity possible would be given to the fact that an attempt is being made for a constructive attack on the problem of alcoholism I believe that the public could be marshalled back of it."

DR. GARRETT, CAMARILLO STATE HOSPITAL

Dr. Garrett read a report prepared by Dr. Haggarty of Camarillo and submitted the manuscript to the committee for the record.

In response to questions Dr. Garrett said that at Camarillo an alcoholic ward with from 40 to 60 patients, referred to the hospital by the judge, was continuously in use. He said the average age of the patients was "around 30 or 40."

DR. LAWRENCE KOLB, DEPARTMENT OF MENTAL HYGIENE

Dr. Kolb recommended hospitals for intensive treatment of the alcoholic together with a farm program for his rehabilitation. He also stressed the necessity for an educational program on mental health in connection with health clinics that will treat with emotional maladjustments, including hysteria, borderline cases of insanity, and chronic alcoholism.

He advocated treatment for potential alcoholics when they first start to drink. "If they could receive treatment instead of being put into jail we would save many. New York handles this problem well. They send alcoholics to hospitals or homes rather than to jail where they will become more alcoholic."

Speaking of failure of alcoholic farms recorded in other states Dr Kolb said: "These places were allowed to degenerate into a prison They would send an alcoholic there, and if he relapsed once, he was regarded as a criminal and received no more treatment."

He pointed out that in treating alcoholism patience was necessary. These people must be brought back again and again. With about 20 percent of cures in a group the figure is increased greatly with the recovery of repeaters.

"The type of hospital I advocate would take both volunteers and people by commitment. It would be a complete hospital with facilities to treat all physical ailments as well as psychiatric ills. It might be supplemented by an alcoholic colony." (See also page 627.)

REVEREND DALLAS GLADSON, CHINO

Reverend Gladson, whose work in connection with the Welfare Department at the California Institution for Men has brought him widespread recognition, presented an unusually pertinent discussion of alcoholism and crime; and linked alcoholism with juvenile delinquency.

Rev. Gladson quoted figures showing that 25 percent of Chicago cases and 45 percent of Boston cases of delinquent children came from homes with parents given to excessive drinking. Twenty-five percent of those committed to Sing Sing were there because excessive drinking was closely related to the commission of the crime.

After presenting further evidence coupling crime and alcohol Rev. Gladson advanced suggestions for the prevention of alcoholism which included:

A mandatory educational program as to the effect of alcohol and legislation that will carry throughout the Public School System.

Proper counseling facilities in public schools to deal with the emotional problems and insecurities that eventually lead to alcoholism.

Meeting the whole juvenile delinquency problem through recreation, community agencies, the church, dealing constructively with the young offender rather than considering him as a criminal.

Rev. Gladson criticised liquor advertising on the grounds that drinking is made so attractive that it offsets preventive educational measures.

In the treatment of alcoholism he said the fact that alcoholics are sick people and should be treated as such and not criminals needs to be emphasized again and again. "They must not come into our prisons and be treated as any other offenders may be."

He urged that a general understanding of the nature of the problem be made common knowledge among people. "They have to understand that alcoholism is compulsive drinking, that it is an obsession of the mind, that perhaps these unmet emotional needs are responsible in part for the whole conduct of alcoholism.

"The harmless alcoholic should be kept out of jails as much as possible with some kind of required treatment in established hospitals, or at least clinics."

In the field of institutional treatment Gladson recommended Alcoholics Anonymous. "We see its valid work being done outside, and I can speak for them. The program has been established three years at Chino and I have seen what it can do and has done for men admitted alcoholics.

"Of course they are especially chosen cases—self chosen. They have admitted that they are alcoholics and want to do something about it. The very vitality of the program is to see these men, themselves former alcoholics, who were in a much worse position and now, many of them, are prominent businessmen and leaders in communities.

"This plan would work into the farm program when we have it. If you can get just one man to admit that he is an alcoholic and wants to do something about it, then you can have groups of men from the community come in and begin with that one man.

"For further treatment of the institutional man, I think the farm program idea excellent, with the correct diet, sunshine etc., needed in rebuilding the man's body, correct psychiatric treatment to meet the deep emotional problems that will be there in many cases. Released, clinical treatment should follow logically. The man who goes out has an obligation to continue treatment that can maintain him as an acceptable citizen."

Gladson concluded by recommending a slum clearance program. "We know so well of various specified areas in the matter of juvenile

delinquency. We should see to it that people are enabled to live under decent conditions and the youngsters who are coming along are given a chance."

J. H. SULLIVAN, PSYCHOPATHIC PROBATION OFFICER, COUNTY OF LOS ANGELES

Mr. Sullivan handles all alcoholic cases through the psychopathic ward under the direction of the psychopathic court. He endorses the proposed farm and clinical program.

He said that a farm for alcoholics would practically absorb the 4,000 regular visitors to Lincoln Heights Jail. He also expressed approval of the clinic where the true alcoholic would be given such care as Dr. Bowman outlined in his program.

Sullivan considered the farm program as a state program. "Our county just doesn't seem adequate enough," he said, "to cope with the final disposition of the alcoholic, nor has it facilities enough to do so." He felt that the Legislature was in a position to help with the problem. "The counties would welcome state aid, if the State would set some sort of standards, foot a percentage of the bill, and leave the administration to the counties. Almost every county is almost desperate with the alcoholic problem."

DR. WILTON L. HALVERSON, DIRECTOR, STATE DEPARTMENT OF PUBLIC HEALTH

Dr. Halverson recommended that several conditions prevailing in the jails should be governed by minimum standards. Among the more important he listed, "The whole field of sanitation, the overcrowding, and with it its problem of ventilation, lighting, etc., adequate food, cleanliness of mattresses, etc." He felt that quite a number of things found wrong could be cured with very little expense, such as cleanliness of the walls.

He recommended that some state agency should be responsible for the sanitation of jails and be subject to the investigation of that department. He suggested the possibility of a working agreement between the Health Department and the Department of Corrections.

"The Department of Corrections has the day to day problem of contact liaison between police officers and jails over the State. A sanitarium or several sanitariums might be assigned to the Department of Corrections and we would be glad to consult with and give services on demand.

"In the field of public health we feel that a more effective job could be done if it continues to be the responsibility of the local government; and we feel that standards must be set by the State Government."

CALVIN H. MEADOR, LOS ANGELES CHIEF FEDERAL PROBATION OFFICER

"There are two ways of looking at jails," Mr. Meador told the committee. "One is under the old Mosaic law of revenge, and the other is as a place for the rehabilitation of human beings.

"A place of temporary incarceration should not impose living standards far below the ordinary standards of the community.

"I am concerned chiefly with the problem of rehabilitation, the reconditioning of persons whose machinery has broken down in some way

or another. Jails come under one of three heads: Probation, prison and parole. We can't single out any one.

"There is a definite state interest in the problem. A jail where suspects are kept two or three weeks in overcrowded and unsanitary conditions is one of the finest incubators of crime that could be found."

Meador stressed the importance of treating a prisoner as an individual. "When you take away an individual's innate dignity you have destroyed the greater part of his value to society. Such a man is in a much worse condition when he comes out than when he entered the institution."

Meador regarded the alcoholic as a distinct problem. Alcoholism is as definitely a disease as tuberculosis. Therefore it must be a hospital problem. It is not a custodial problem except for purposes of effecting a cure or a relief to the victim, he said.

LABOR

Phillip Connelly, Secretary-Treasurer of the Los Angeles CIO Council, appeared before the committee. During the war, the CIO has cooperated very closely with the California Institution for Men in placing inmates from the institution in various types of jobs. He said:

"Since that time the union authorities have been rather pleased and satisfied with the fact that they have been able to place a number of persons on jobs where they have been able to acquire trades and earn a livelihood and complete their rehabilitation. We in the CIO don't particularly subscribe to the old idea that to allow a man who is incarcerated to do a useful piece of work, is treading on the toes of free working people But, certainly the unions would want to scrutinize any proposed legislation to determine the effect that any industrial programs within the institutions might have. We think that employment is an important part of rehabilitation, and it certainly should not be hampered."

B. A. Mitchell, Delegate of the Central Labor Council of the AFL, also appeared before the committee and made this statement:

"I am speaking in behalf of Mr. Bassett. I want to offer full cooperation. Although we have made no study on this situation, we would like very well to be on record in favor of anything to promote the rehabilitation of the criminal, the prisoner, rather, and the cleaning up of our jails. We would gladly be a part of any committee that is formed, in that regard."

C. J. Haggerty, Secretary, American Federation of Labor, State of California, said:

"The American Federation of Labor has never opposed the use of prisoners in useful work which does not displace free employees. It would be better to keep the men busy than to have them idle. I subscribe to the idea expressed at this hearing that more is to be gained by allowing a petty offender to resume his occupation under probation or parole supervision so that he can provide for his family.

"I think prison labor could take care of all needs and food of, say, the hospitals and public institutions. Also in the case mentioned when it is a matter of saving farmers' crops I believe the important thing is to save that crop and get it into the hands of our people for consumption."

FARM GROUPS

Ray B. Wiser, President, California Farm Bureau Federation, said:

"We are using a large quantity of these so-called habitual drunkards in agriculture," he said. "But there has been no method of maintaining those people on farms so that it is usually an employment of three or five days. There might be a very material aid to employment if some type of statutory probation was made which would require supervision so that you could keep them on farms for a period of time."

Concerning disposition of products raised on institutional farms, Wiser said: "I don't think farmers would be adverse to this if the products met the same quality standards as provided by state law for the products going into the institution; and provided price level of buying within the institution is on the basis of the day's market."

D. I. Walker, President, Los Angeles Farm Bureau Federation, said he was in full accord with the proposed rehabilitation plan for work and farm programs. He expressed an enthusiastic desire to aid in the development of contemplated useful work programs and favored legislation along those lines.

He saw no reason to believe that the amount of produce produced by men employed in this type of work would interfere with agriculture. "I think it would be a comparatively small amount," he said, "and the good that would develop in helping to rehabilitate men would be far greater than any possible detriment it might be to agricultural production.

"We have had excellent service by having prisoners of war help in harvesting our crops. We got along fine with them and certainly they would be harder to handle than these men would be.

"The more we keep these people employed the better off they will be. If they are supporting themselves, then we do not have to pay taxes to support them. The fact that these men can have the opportunity to get on their feet and become reestablished as useful citizens outweighs any minor objections to the plan."

In conclusion Walker pointed to the fine work done at honor camps in this area. He praised the road building and fire prevention work done in connection with protecting forests.

George Sehlmeyer, Master of the State Grange, reported that his organization would probably support a program of rehabilitation if they thought it would bring about the ends which the legislative committee is working toward.

RELIGIOUS AND TEMPERANCE GROUPS

Religious, welfare and temperance groups in Los Angeles displayed a vital interest not only in the condition of the jails but in the possibility of constructive legislation which would lead to programs which would provide a chance for rehabilitation of persons confined in city, county, and state institutions. These groups are anxious to lend a hand toward a crime prevention program and feel that the State shares the responsibility for such a program.

Among those who appeared before the committee to offer recommendations, suggestions, comment and offers of cooperation were:

Monsignor Thomas J. O'Dwyer, who discussed principles for jail administration. His conclusions, briefly, were:

1: The operation of a jail is incompatible with the other functions of a police department.

2. Everything possible should be done to reduce the number of persons held in jail pending trial.

3. Whenever socially constructive to do so, fining and probation should be used rather than imprisonment.

4. A jail should be designed and administered to create socially acceptable behavior. To this end there should be adequate classification and segregation of prisoners and a work program for all prisoners.

5. An adequate program of rehabilitation including provisions for community adjustment, probably through a full time parole board with professional staff and separated from law-enforcement agencies.

He further recommended local operation and administration of the jails under state supervision and direction. The Department of Corrections, he said, should set minimum standards.

Mrs. Ivy Grace, Volunteers of America, declared that "We feel that the jail situation is extremely poor because of the effect it has on men while incarcerated and the result and effect after release." Mrs. Grace stated that her organization felt it was essential that something be done to maintain the morale of an incarcerated person and enable him to return to the community and family as a normal individual with normal relationships. She added that the State shared the responsibility for this problem.

Major P. B. Smith, Salvation Army, told the committee that legislation with teeth in it is a necessity if minimum standards of cleanliness and sanitation were to be maintained in jails or if a workable rehabilitation program is to be instituted.

"Time and time again the grand juries in our counties have inspected our jails, called attention to conditions and recommended reforms. In most instances, those recommendations have not been carried out. There must be a way of enforcing minimum standards."

Mrs. Eva Wheeler, Southern California Council of Protestant Churches, said that the Council of Protestant Churches, endorsed the plan for farms and useful work in place of confinement for prisoners. However she was of the opinion that the most important phase of the crime problem lay in the field of crime prevention and curbing juvenile delinquency. Se felt the churches were doing a job along these lines and would continue. State aid could go far in furthering the work. Mrs. Wheeler criticised the "liquor traffic." She said that 53 percent of all police work in Los Angeles had to do with alcoholism and expressed the belief "that the liquor industry should pay some of that bill directly to law enforcement in the cities."

Floyd C. Carrier, California Temperance Federation educational director, recommended alcoholic clinics as a means of reducing the burden on the jails from heavy drinkers.

Dr. Titus Frayze, California Temperance Federation, was of the opinion that public education must accompany legislation. He said the public must be made to see its responsibility toward youth and do its part in providing recreation facilities as a means of crime prevention.

Jennie Thompson, Corresponding Secretary, Women's Christian Temperance Union, expressed the gratitude of the WCTU for the committee's work and expressed the belief that the work "would help make our State a better place for boys and girls to grow up in."

CONDITIONS IN CALIFORNIA JAILS

As has been stated, investigations conducted by this committee continuously throughout its existence have revealed shocking conditions and wanton waste of public funds in jail design. Many of the deplorable conditions could easily have been remedied by a little soap and water, paint and ingenuity. Among all the many evils discovered in the various jails inspected, every evil had been minimized or completely banished by the authorities in one place or another.

This is not meant as a condemnation of the sheriffs throughout the State, many of whom are unable to obtain even the paltriest sums from their boards of supervisors to improve their jail conditions. It may respectfully be suggested, however, that realization of the need for improvement and strenuous efforts to bring about such improvement are hardly uppermost in the minds of many of the jail authorities.

Here are a few samples of conditions as the committee found them in the course of its investigations and investigations made at its request by the extremely cooperative State Health Department.

The Oxnard jail was found to be a filthy place, the walls not having been cleaned for years. The bedding was filthy, the solitary confinement tank was almost without ventilation and the odor in it made it almost impossible for a free man to stay in it any length of time. The jailer said it was not used, but nevertheless it was ready for use. Plumbing facilities were inadequate and overcrowding was almost constant. On a second visitation under the direction of a new chief, conditions were greatly improved.

At Modesto mattresses and bedding were filthy, with blankets piled up in the daytime like hay or old rags. Any vermin or disease existing would infect them all. Quarters for 60 were holding 74, and there was a pool of water in the middle of the floor covering one-third of the tank which was deep enough to cover the soles of one's shoes. Kangaroo court and the fee system of feeding were both operating.

The Sacramento County jail was in the same category, with youngsters sleeping on the floor with only a dirty blanket under them. The jail was built some 40 years ago to hold about 135 persons, and had approximately 230 in custody. Facilities for segregation were slight and many awaiting trial were confined in tanks with convicted prisoners. Floors and walls, washbowls and toilets were dirty.

Rather similar conditions were found in the Butte County jail at Oroville, with the addition of the kangaroo court and the fee system of feeding. Because of the latter, the food consisted of little more than beans flavored with broth from pork rinds.

The San Joaquin County jail and the Santa Clara County jail exhibited the same monotonous list of uncivilized and unnecessary shortcomings. And so on down the line of county after county.

Inspections of such jails and consequent publicity has in many cases resulted in at least minimum improvements such as painting and cleaning and more adequate diets. The committee hopes, however, that such publicity will have a further long-run effect, i.e., prompt local boards of supervisors to appropriate funds to bring about more intensive improvements.

A refreshing example of what can be done by an enterprising local officer is the case of A. E. Simmen, chief of police at Elsinore, who with a

$400 appropriation converted the jail there from a highly unsatisfactory one to a place of custody that at least is sanitary and respectable. Other examples of satisfactory conditions even where funds are lacking and no great public interests or awareness of the jail problem exists are not lacking.

At Santa Rosa the Sonoma County jail proved to be most commendable. Ample security, wholesome food, reasonable segregation, and cleanliness were noted.

The El Dorado County jail at Placerville is in great contrast to the majority of local lockups as far as sanitation and supervision are concerned. Generally speaking, of course, the best conditions exist in the more populous and well to do areas, which brings additional credit to officials such as Ex-Sheriff Lowell O. West of Placerville.

Of course the picture is not entirely black. The Ventura County jail, in the city of Ventura, was found to be in great contrast to that of Oxnard city jail and in excellent shape, although containing an excess of expensive steel construction. There is a jail farm in connection with the jail, not located behind a steel fence but with three strands of barbed wire around it! The Santa Barbara County jail was likewise high on the list. Here is an example of the sensible plan of taking prisoners out into the open air where they can do constructive work instead of deteriorating in idleness in the midst of filth, vermin and other depressing, not to mention dangerous, surroundings; and prisoners are paid up to $2 per day. The San Diego County jail has a most serious problem of overcrowding, but here, too, the sheriff has made a strenuous effort to overcome the many bad housing facilities and as a consequence the situation in its entirety is far above the average.

The antiquated concept that good jail management and operation is somehow related to the tens of tons of excess steel employed seems a difficult one to eradicate. Likewise, the failure of authorities to realize how important proper jail planning and architecture are. At Salinas, for instance, a rather new and expensive structure has women's quarters located on the third floor and there are no elevators. Transporting recalcitrant female prisoners up two flights of narrow stairs is indeed a sad commentary on the architecture of this expensive bastion. A campaign is now under way to abandon this edifice to poor planning and locate another jail farther from the center of the city. Likewise, a program is now being considered in San Luis Obispo County for a new jail in order to provide for proper segregation and other deficiencies of an expensive structure built with federal assistance in 1940.

It is to be hoped that if and when they are constructed, their architecture and planning will be guided by experts who have experience within this field.

Among the more populous areas, the Los Angeles County jail system has been discussed extensively in another section. The city jail at Lincoln Heights seemed generally as satisfactory as could be expected with the exception of the drunk tank, which the committee visited Easter morning before dawn and found to be deplorable beyond description, with prisoners so crowded together they literally were lying one on another. Sanitary facilities were likewise inadequate and poorly maintained here. It is noteworthy that Mayor Fletcher Bowron, in his annual address on the state of city affairs January 2, 1947, listed a jail farm for alcoholics

high on his list of capital improvements demanding top priority during the next fiscal year. It is also noteworthy that during a meeting of city department heads the following day, Acting Police Chief Joseph Reed declared that the city's jail system was so clogged by the alcoholic problem that no drunk could expect to receive a sentence unless he had been arrested at least seven times. The city authorities might well give intensive consideration to moderately light and less expensive facilities in outlying areas more closely approximating the farm idea.

At San Francisco the committee found that the combination of city and county jails exemplified a modern method of segregating the convicted from those awaiting trial, and providing work for those convicted. All persons awaiting trial were kept in the city and county jails in San Francisco. Most of the sentenced prisoners were sent to the San Bruno jail in San Mateo County, away from the congested area, where there is a healthier atmosphere, ground to be cultivated and other work. This jail was discovered by the committee to be equipped and kept in excellent manner. Cleaning and painting by inmate labor were noteworthy, and although the committee believes that all that has been done here is commendable, it thinks that cheaper construction of buildings, a more intensified work program and further segregation of prisoners is advisable and possible. Because of the modern trends apparent there the committee believes more extensive exploration of the San Francisco system is advisable.

The Alameda County jail could well be a source of inspiration to anyone believing that jails must by very nature of the population and circumstances be dirty and have a bad odor, filthy beds and unwholesome food.

Great credit must go to Sheriff Gleason and the Alameda County Board of Supervisors for setting an example for doubting Thomases to follow. This jail has immaculate kitchens, spotless and shining walls, and beds as neatly made as in any hotel. Much of the work of maintaining this marvel institution is done by prisoners. Pillow cases and bed sheets, both top and bottom, are snow white from the County Hospital laundry where a prison laundry project supplies hospital as well as jail and jail farm laundry. Also there is an excellent small laundry and a barber shop in the jail.

It must not be regarded by this description that the sheriff is easy or soft. Prisoners who can take the program and live up to the high social standards set for them while under the sheriff's custody find many opportunities to better their lot, but the prisoner who would transform their spotless jail into a slum finds tough going.

Overhauling of the probation system has already been discussed and the necessity of raising probation officer standards testified to by numerous authorities.

In summary, the need for reform here was stated admirably to the committee by Don R. Sanson, chief, adult division, Los Angeles County Probation Office.

He pointed out that the probation officer has the duty of investigating facts recommending to the court the disposition to be made of persons convicted of criminal offenses. The father of children, he said, often finds it not difficult to determine what wrong his children have done, but generally finds it very difficult to determine wisely what he should do

about their misdeeds. Thus, the function of probation departments is the function of the courts requiring most knowledge and skill.

"Sensible action should be taken in regard to persons convicted of crime. If it were sensible, which it is not, they could not all be placed in prison. The probation officer of Los Angeles County supervises more than 8,000 such persons. There are not and cannot be built enough penal institutions to house them all."

The probation needs a method of appointment and tenure in office which will enable probation officers to act free from political pressure and on a professional level, he concluded, and for this reason the State should impose minimum standards for probation officers and lend leadership to see that uniformly high standards be adopted in every county of the State.

In connection with its investigation, the committee conducted a public opinion poll on alcoholism, crime and delinquency, largely among church leaders and a few liquor dealers in the Los Angeles area.

In the matter of jails and custodial programs, the returns were overwhelmingly in agreement that alcoholism should be treated as a medical rather than a criminal problem; that the State should establish medical and work programs for rehabilitation; that the liquor industry should be taxed to help support such program and that jails and county hospitals should be subject to inspection by the State Health Department.

The poll revealed the same overwhelming opinion that parents should be made equally responsible for crime and delinquent acts on the part of their minor children; that school system recreational facilities should be expanded to help combat delinquency; that church and religious bodies should take a more active part in meeting these problems and that poolhalls, motion picture theatres, dance halls and bowling alleys are delinquency factors.

There was like agreement that playground and recreation centers could check the delinquency tide; that such organizations as the Boy and Girl Scouts should be encouraged; that state subsidy for publicly operated or private clubs for juveniles might be advisable and that more public money should be spent on prevention of juvenile delinquency.

Following are statistics compiled from the survey:

PUBLIC OPINION SURVEY ON ALCOHOLISM, CRIME AND DELINQUENCY

Questionnaires Returned—445

	Churches		*Liquor dealers*	
	Yes	*No*	*Yes*	*No*
Jails and Custodial Programs				
Do you agree with the testimony of the medical profession that drunkenness should be treated as a disease rather than on a criminal basis?	343	35	47	2
Do you believe the State should establish medical and work programs on rehabilitation for habitual drunkards?	372	13	47	2
What type of work do you consider most suitable for such rehabilitation programs?				
Forestry	196		9	
Farming	256		31	
Road camps	44		5	
* Should the liquor industry be taxed to aid in the support of such programs?	361	23	3	50
Should jails and county hospitals be subject to inspection by the State Board of Health?	384	3	47	2
Juvenile Delinquency and Crime Control				
Should parents be made equally responsible for crimes and delinquency acts on the part of their minor children?	349	30	47	2
Should recreational facilities of our school system be expanded as a responsibility in preventing juvenile delinquency and crime?	355	28	48	1
Do you believe that churches and religious bodies should take a more effective part in meeting these problems?	376	8	41	6
Do you believe juvenile attendance at the following places of entertainment and amusement to be delinquency factors?				
Motion pictures	250	100	9	40
Dance halls	325	34	19	29
Bowling alleys	225	108	8	37
Pool halls	347	17	42	2
Are you in favor of a legal curfew for minors?	334	29	40	8
Prevention Factors				
Do you believe that more playgrounds and recreations centers would eliminate the rise in juvenile delinquency and crime?	335	36	47	1
Do you believe that children should be encouraged to affiliate with such groups as the Boy Scouts, Camp Fire Girls?	385	5	50	0
Are you in favor of a state subsidy for municipally- or privately-operated and supervised clubs and clubhouses for juveniles?	272	82	46	1
Do you believe that more public moneys should be spent for the prevention of juvenile delinquency?	351	23	48	1

* FOOTNOTE: Inquiry into the various taxes paid by the liquor industry in California revealed that the state and local governments received something like $30,000,000 annually from this source. The greater part of this goes to the state while the cities and counties have the custodial expense problem, thus creating an obviously out-of-balance burden to our cities and counties.

SUMMARY OF HEARINGS

Discussion of the work of the committee, aside from inspections and other tasks executed by individual members, naturally falls into three divisions—the Progress Report (submitted to the Assembly at the Fifty-sixth (First Extraordinary) Session, and published in the Assembly Journal of February 4, 1946) which dealt with the first phase of the committee's work; the Los Angeles hearings, which have already been treated rather exhaustively; and the Sacramento hearing of September 10th.

In the following pages, the Progress Report will be summarized, further testimony at the Los Angeles hearings will be dealt with and the Sacramento hearing will be explained.

1. THE PROGRESS REPORT

History of Jail Reform

In recent years the county and city jails of the country and the system of handling misdemeanants has been the subject of study and criticism by leading penologists and public officials. There has been a growing recognition of the evils of our jail system as well as of the inhuman conditions in which offenders are detained. The utter lack of any intelligent treatment during their confinement has been condemned time and time again. Various welfare and social organizations have made investigations and reports which reveal that the typical county jail in America today is a relic of the age of barbarism long since past, that it is utterly useless in any useful function other than detaining a mixed group under conditions that are an insult to our social instinct and the county and city jails today are a blight upon our Twentieth Century civilization.

A crusade has been waged by the National Jail Association since 1937 when it was organized. It is associated with the American Prison Association and each year since has called attention to our antiquated and senseless method of handling misdemeanors. At the meeting of the American Prison Association in 1939, Mr. Harry Elmer Barnes read a paper on county jails entitled, "The Kindergarten of Crime". In it he said, "The jail experience is the initial step to the crime career. The jails are feeders for the higher learning in the crime field and so long as we allow the jails to go on demoralizing our youth, demoralizing all those who are subjected to their scrutiny and handed over to their control, we are going to increase and make more difficult the problems of the prison wardens and the superintendents of reformatories and reform schools that deal with these types after they pass beyond the jail period. The jail is important because it is the parent of all our other and later penal institutions. All types of institutions which deal with criminals have been derived from the county jail. While we have made marked progress in our state penal institutions our county and city jails remain very much as they were a hundred years ago.

California is a progressive state and has been the leader in many movements for the welfare of its citizens and has been copied by other states. What about the county jails in California? Can we take any pride in any progress we have made in our handling this large group of people

who pass through our county jails? A sheriff should know what his county jail is like. The following is a description of the San Diego County jail by the sheriff of that county:

"Throughout the years people have cried aloud against a jail system wished on this Country by the first English settlers of the Country. This system was based on nothing more of a philosophy than to cage together suspects and offenders alike in idleness for indefinite periods of time at community expense, only to release them better fitted to resume careers of crime because of their experience. Such a method is clearly unintelligent, uneconomical and entirely devoid of any justification.

"It is an undebatable fact that something should be done to achieve more adequately the purpose for which the jail as an institution exists. The jail is designed as an instrument of justice, and as such is entitled to serious consideration. A jail should not be merely a short sentence institution or a repeater's rest and refuge. No intelligent person can believe that anti-social behavior can be mysteriously cured by merely placing those who indulge in such behavior in close association with several hundred persons of the same type. Can any mature community afford a county jail as we inherited it during our infancy?

"Year in and year out close to one person of every 1,000 who come to live in this community are sent to the county jail. Many of these people have been in and out of penal institutions all their lives. They may be thieves or vagrants or drug addicts, the flotsam and jetsam of humanity. But some of them are first offenders, and a great many, in fact almost half of them, are in jail because they cannot pay a fine Think of what that fact means. The well-to-do can pay a fine, but ones not so well off, committing the same offense, go to jail. In clumsily seeking to punish the individual, society merely punishes itself. The individual's family, deprived of his earnings, may have to apply for relief. There are also many who come to Southern California to get away from the winters in other parts of the country. Most of them are fairly healthy and able bodied. A jail means nothing to them except a place to spend a comfortable winter with plenty to eat. In the spring they are ready again to pursue their nomadic existence. These are society's misfits and failures. They are sent to the county jail because this is the easiest way to dispose of them. Youths, misfits, failures, perverts, addicts, and hardened criminals are all housed together because this is the easiest way out. The practice of sending a man to the county jail for a year or less can not be justified in most cases unless some other purpose is served. The basis principal behind jail sentences must be correctional, not punishment alone. We punish a child, not to hurt him, but to teach him: If we can not improve a prisoner's health, his outlook, or help his family, we have accomplished nothing. Jails, after all, are like hospitals, specialized agencies to meet a situation where others have failed. If society feels that the unfortunates behind bars can best be forgotten about until that day of their eventual release, without planning for and aiding the inmates to a better consciousness of their rightful place among their fellows, then it does not behoove society to throw up its hands in horror if the human whom they are unwilling to aid once again slips into channels we call criminal. We must recognize certain facts if we are to set up a program worthy of the name, and worthy of recommendation to the people of the community."

"These conditions are typical of the county jails of the State. Investigations reveal that Californians should be deeply ashamed at the public indifference and political system that has allowed such shabby treatment to a large number of citizens to exist. The public should demand that some action be taken at once to remove this barbarism of a by-gone age."

In support of these contentions we quote from *News of The Field* by John F. Landis, from October-December 1945 issue of *Federal Probation*, a quarterly journal of correctional philosophy and practice.

"Although Dr. Garrett Heyns, Director of the Michigan Department of Corrections, is not of the opinion, as are many law-enforcement agencies and penologists, that postwar conditions will give rise to an increase in crime, he thinks that, 'If we do have a crime wave after World War II, the answer will not be to put men behind prison walls in great numbers. The answer is to take outside of prison walls those who do not need walls—to put them into farm and forestry activities.' "

Added emphasis is given to the work of this committee by a statement in a recent interview with J. Edgar Hoover of the F.B.I. He is reported to have very bluntly warned the Nation's police chiefs that the Nation is heading for a major crime wave with juveniles taking the lead in an era of "bloody" postwar lawlessness. "The lawlessness has already taken on such proportions that it startles the imagination. The crimes reported by the press are not crimes which might happen but crimes which are committed day after day."

At the conclusion of the interview Mr. Hoover made this statement, "The inefficiency and careless manner in which convicted criminals are guarded in our jails and penal institutions is shocking and in many cases represents malfeasance upon the part of those charged with the proper safe keeping of these enemies of society."

In commenting on the crime figures presented by Mr. Hoover, Mr. Richard McGee, Director of the State Department of Corrections, has said that F.B.I. crime figures for the first six months of 1945 placed California in the lead in robbery and auto thefts and well to the top in larceny. State statistics back up the federal estimates by showing a 30 percent increase in all crime during the first nine months of 1945 over the same period of 1944. With these figures in mind this committee submits its report of the investigation of the city and county jails and existing conditions impartially and impersonally. It is only fair to say that in its investigations the committee has had excellent cooperation from city and county officials state-wide and wishes to express its appreciation for the courtesy shown them.

In almost every jail the committee visited the jailer and undersheriffs complained of their difficulties in improving conditions. They often plainly made the statement that nothing could be done to improve the jail. However, the committee found that at one place or another, some one of these difficulties had been overcome and as a matter of fact all of them had been eliminated in different jails.

The first real approach to a constructive program of rehabilitation was found by the committee at Castaic where the Sheriff of Los Angeles County, Eugene Biscailuz, is operating an honor farm for prisoners from the Los Angeles County Jail. At the present time there are about three hundred prisoners at the honor farm but there have been as many as seven hundred.

They are raising vegetables, hogs and some cattle, with the idea of eventually having 1,000 men on the farm and making it self-supporting.

When this committee visited the farm, there was little consciousness that the men working there were prisoners. They live a normal, natural life, working as any self-respecting individual would do who was anxious to support himself. They were doing constructive work; building themselves up physically, mentally and morally instead of undergoing the deteriorating effects of confinement in idleness. They are preparing themselves for decent citizenship.

The committee learned that most of these men were alcoholics. The response to the treatment they were receiving, and to their method of living was remarkably good as proven by the fact that there are relatively few repeaters.

At the present time, in addition to the honor farm, there are now five honor camps. Before Pearl Harbor there were nine, and it is expected that the number will be increased to nine in a very short time. In addition to the work at the honor farm, the men in the honor camps have built roads through the recreational areas that have added to the California Highway System. These roads would not have been justified had they been paid for in the usual way.

Sheriff Biscailuz testified that, previous to Pearl Harbor, the Los Angeles County Jail had 3,200 prisoners in custody of the sheriff. There were 2,200 in the Los Angeles County Jail on the top floor of the Hall of Justice, and another thousand in the nine honor camps. This is a first class example of what can be accomplished in relieving the over-crowded conditions in the county jail, and at the same time inaugurating a program that is definitely beneficial to the prisoners and society. Of course, the men who are sent to honor camps have been carefully screened. Not more than 1½ percent of them escape.

Several groups in Los Angeles were interested in improvement of Lincoln Heights Jail and in the adoption of some plan that would take the sentenced prisoners out of the jail. Some of these groups favored the adoption of some such plan as that proposed by former Police Commissioner Van M. Griffith. They felt that Mr. Griffith's plan for a farm is the best solution of the problem for the present and the one best suited to meet the increasing population of the jail in the future.

Among the groups favoring Griffith's plan was the County Welfare Council of Metropolitan Los Angeles.

Miss Helen Crockett, Director of the Division of Family and Adult Service, spoke for the Welfare Council. Miss Crockett explained that the Welfare Council was an association of 161 health and welfare agencies in the City of Los Angeles and nearby communities concerned with planning—community planning for the social needs of this community. The committee on adult delinquency, she said, was concerned with delinquencies being treated during incarceration and in rehabilitation in the community afterwards. This committee is made up of various agencies and departments particularly active in this field. Among them are: The State Board of Prison Directors, the State Parole Officers, the State Institution for Men, the State Institution for Women at Tehachapi, the United States Probation Office, the United States Employment Service, the Los Angeles County Probation Department, the county jail, the city jail, Volunteers of America, Salvation Army, Jewish Committee for Per-

sonal Service, Catholic Welfare Bureau, the League of Women Voters, and a small group of lay individuals who are interested in the problem for various reasons.

The above committee decided several years ago to study Lincoln Heights Jail. This decision was made because of reports concerning the lack of segregation at Lincoln Heights; and the fact that many of the younger prisoners were thrown together with mature law-breakers.

As a result of this survey and study by the committee on the social treatment of the adult delinquent, certain conclusions, recommendations and resolutions were made:

It is the primary responsibility of the police department to prevent crime, give protection to life and property, to apprehend criminals, and to maintain the peace. Its interests are directed to making arrests and securing convictions. It is also its province to detain those awaiting trial and prevent their escape. But there is no reason to believe that it is the proper function of the police department to care for sentenced prisoners. The interest of the police department is in detecting crime, rather than the rehabilitation of the prisoners, as is indicated by the lack of a separate census and cost accounting for the jails in recent annual reports. Since custodial care of prisoners is not their primary responsibility, it is inevitable that that phase of their work would be treated as a side issue. There is reason to believe that the police department should be left free to devote all its efforts to the apprehension of criminals.

The County Welfare Council outlined six principles for the improvement of jail administration:

1. The operation of a jail is incompatible with the other functions of the police department. Its responsibility should end at the point where the defendant pleads guilty or is brought to trial.

2. Everything possible should be done to reduce the number of persons held in jail pending trial.

3. Whenever it is socially constructive to do so, fines and probations should be used, rather than imprisonment in jail.

4. A jail should be designed and administered to create socially acceptable behavior. To this end, there should be adequate classification and segregation of prisoners, and a work program for all sentenced prisoners.

5. An adequate program of rehabilitation should include provisions for community adjustment, probably through a full-time parole board with professional staff—and separated from law enforcement agencies.

6. All jails, work houses, and prisons should be operated and administered by the State, through the State Department of Corrections in one integrated program.

To point No. 6, the Welfare Council Committee added the statement that the question of expenses usually arises. The spokesman for the committee explained that they do not imply a separate institution in each county but one institution in an area where the needs seem to be greatest. They ask that whatever legislation is necessary for accomplishing this improvement be granted.

The County Welfare Council concluded that a farm plan would be the best possible solution for dealing with misdemeanants in the Lincoln Heights Jail since it would offer an opportunity for individual study of each inmate and his classification by a system similar to the Diagnostic

Clinic in use in San Quentin. This individual study would aid greatly in devising some form of treatment that would help to overcome the difficulties of the misdemeanant; and reestablish him in the community. Wherever the farm plan has been tried, it has proved beyond a doubt that it is far superior to confinement in a jail for the length of sentence.

The committee spent two days at the Army Rehabilitation Center, 9th Service Command, Turlock, California, where Colonel J. J. France, Commanding Officer, explained in detail the program and its effect there

In his statement to the committee, Colonel France said:

"To get down to our case at Turlock, the Army was faced with the problem of guardhouses overflowing with prisoners, the same as you are in many of our jails. There was nowhere to put them. It was also admitted that men around a guardhouse often had not much to do, and they came out, if anything, worse soldiers than when they went in. So they put into effect this rehabilitation system. They built several of these centers in the United States, of which Turlock was the first established. It is now, I believe, about third place in the Country.

"It is our purpose to try to make good soldiers out of those who have not been so good before. These men are sentenced anywhere from, I believe, nine months to life. After looking a man over carefully, and it takes 30 to 60 days, if we decide that there is a chance that he can be rehabilitated into a fairly satisfactory soldier, he is put through a training program lasting about eight months. So, if he is restored, the length of sentence has very little to do with it.

"Now we do not restore every one back to the army, but our record so far is well over half of them. Of those who go back as soldiers, by far the largest majority of them do make good soldiers The ones that we consider are not restorable are usually transferred to a United States disciplinary barracks. Occasionally we transfer to the Federal Penitentiary or federal reformatories."

The committee members found a philosophy prevailing at Turlock that emphasized human feelings rather than iron bars and steel cages. They discovered that every effort to reestablish the self-respect of these men and restore them to usefulness and their former place in the Army or civilian life was being made They believe that the program at Turlock should be taken into consideration in mapping any plan for the rehabilitation of the men in our city and county jails.

On their visit to Juvenile Hall in Los Angeles the committee members found a well-balanced program of recreation, education, and guidance. They consider it one of the best juvenile detention homes in the State.

Juvenile delinquency has increased so rapidly since and during the war that the existing facilities are inadequate to deal with it. There are some delinquents left in nearly all the county jails simply because there has been no other place they could be kept. Every effort is being made to get them out as rapidly as possible since everybody agrees that they have no business there.

Many of the youths detained in county jails were awaiting disposition by the Youth Authority. In Los Angeles the committee found a score or more in over-crowded cells and several sleeping on the floor.

In Oroville two youths, 14 and 16 years of age, had been held over two weeks in a building without heating facilities.

It was hoped that with the opening of Lancaster all of the boys could be moved out of county jails. The Youth Authority has opened new forestry camps as rapidly as possible and is making every effort to remedy this unfortunate situation.

The committee feels that it should compliment the State of California in being first to create a Youth Authority, thus supplying modern methods and skills to the problems of juvenile delinquency. That in itself is an important step forward; and what has been done in juvenile delinquency can also be accomplished in adult delinquency. For it follows that what will help the juvenile also will help the adult.

Mr. C. H. Meador, Chief Federal Probation Officer for Southern District of California told the committee:

"The Federal Government is only interested in the county jails in the Country because in many cases they are compelled to confine in these county jails men and women convicted of misdemeanors in the federal courts. In order to be used by the Federal Government the county jail must meet standards set up by the Federal Bureau of Prisons through its Department of Jail Inspections."

Mr. Meador expressed dissatisfaction with the condition of many of the county jails in California inspected by the Bureau of Prisons.

"To say I am disappointed with the treatment given to prisoners suspected of an offense against the law but not convicted of the offense, by the incarceration in certain types of city and county jails throughout California, is putting it very mildly.

"These conditions are due to the lack of physical facilities to keep a normal human being normal under an abnormal mental strain, the strain of arrest and suspicion of a crime. In more cases than not, a person suspected of a crime is incarcerated in the same cell block, and in many cases in the same cell, with persons who have served one or as many as 50 sentences for commission of crimes. The jailers and sheriffs are not to blame for that. They haven't a place to put these people.

"One thing I would like to say is that it seems a shame that the greatest state of the Union, California, is treating a certain group of its citizens as it is, persons accused of crime but not convicted of crime. I live in hopes that some day California will provide a state department to build, maintain and operate all places of incarceration or temporary custody of its erring citizens."

Mr. Meador did add that he had no fault to find with the Los Angeles County Jail.

His statements are important because they disclose the attitude of Federal Government towards the evils of the jail system.

Since the largest percentage of city jail inmates, especially in the larger communities, consists of alcoholics, any plan for reorganization of a jail system and the establishment of a program for rehabilitation must give special consideration to this group. Since it is the largest, from it must come the greatest percentage of salvage. The excessive use of alcohol has increased tremendously in the war and postwar period. Unfortunately those who are in a position to form a correct opinion, state positively that this increase will continue. This means that still larger numbers of "drunks" will become jail inmates, aggravating the already serious overcrowding and other evils, as well as mounting costs for their arrest, trial and confinement. Therefore it is evident that the

problem of chronic alcoholism is closely connected with the city jail problem and one that cannot be considered apart from the other.

It is necessary to recognize this fact and face it frankly in the beginning if we are going successfully to solve the problem of the city jails and secure the results we hope for. Otherwise, we are only changing the locale of the problem.

The question then is, in substituting a modern scientific method of handling the group of misdemeanants as a whole, can anything be done to solve the problem of alcoholic addiction on the part of a large percentage of these misdemeanants? Your committee believes the answer is "Yes"—if the community is willing to provide the necessary facilities and equipment. The excessive use of alcohol has come to be recognized as one of our gravest and most serious social problems. All the resources of modern science are being used in its exploration and study with the result that we know a great deal more than ever before about why men drink to excess, the contributing factors in excessive drinking, as well as about the possibility that men can be cured of alcoholic addiction.

The findings of the section on alcoholic studies of the Laboratory of Applied Physiology, Yale University, under the direction of the National Committee on Alcoholic Hygiene, Inc., and many others have given a new understanding of this human weakness. Because of this understanding, new methods of treatment are being developed, and new therapeutic measures employed in the treatment of alcoholism.

The first step in the treatment of the alcoholic misdemeanant is to take him out of the jail and put him to work outside. He needs fresh air and sunshine and hard work so that he can sleep at night; and good food, rich in vitamins and minerals, to supply the deficiency caused by reliance on alcohol for energy. In short he needs to be built up physically, but this is only preliminary.

If he is to be permanently cured of his addiction, there must be an adequate diagnosis of the type of alcoholic to which he belongs. He must have a complete physical and neuropsychiatric examination and a diagnosis made. With some, alcoholism is a disease and they must be classed and treated as definitely sick. With a great many, excessive drinking is a symptom of some disorder, often deep seated, and this must be discovered before successful treatment can follow. Some drink because of social maladjustment, family conflicts, and marital discord. A trained social worker or a psychiatric social worker can help to restore human relationships to normal. Others drink because of a feeling of inadequacy and frustration due to anxiety or other neuroses. A psychiatrist can bring these into the open and, once recognized, they can be treated and the individual will no longer seek escape from reality in alcohol.

Other alcoholics drink to excess because of a sense of guilt, either real or imaginary. A priest or minister can be of use in relieving this sense of guilt and, through religious influence, often help the individual to overcome his habit. Excessive drinking may be due to a psychological problem. In this case a psychiatrist, by use of certain tests—particularly the Rorschach—can discover the personality defects in the individual, and plan a course of treatment that will remedy them and, perhaps, enable the alcoholic to live without the aid of alcohol.

There are many other contributing factors to excessive drinking that, once discovered, can be overcome. A very important procedure in the

rehabilitation of the alcoholic is to give him support in his struggle to live without alcohol—especially in the first few months after his return to society. Friendly supervision and follow-up work by trained parole officers can furnish this support and make available to the individual the community resources that are available to help him in his readjustment to society. This is by no means a visionary scheme, for there are clinics in different parts of the country, some connected with medical schools and hospitals, others operating on a nonprofit basis, where such a method of treatment is now being employed with varying degrees of success.

A modern jail farm or inebriate colony should be established where the facilities for carrying out a program of this kind could be provided. It is obvious that the present method of resentencing habitual drunkards month after month and year after year to the city jails is futile, and the immense amount of money spent each year for this work is wasted. The typical city jail was never intended to be a place where these men could be handled other than they are at the present time. It is useless to expect the jail to return alcoholics to self-respect or useful lives in the community. If this is to be done, some other means must be found.

Your committee believes that the question of alcoholism in connection with our city jails is of great importance to the future welfare of the State, and that it offers a still further argument for the organization of our jail system along modern scientific lines.

The first step should be to clean up our jails and to compel them to be put in a healthy sanitary condition. This does not necessarily mean new buildings but a complete renovation of the old ones, with ventilation, lighting, absence of vermin, clean bedding and beds, good plumbing, and toilet and bathing facilities.

The committee was anxious to learn what was being done along this line in other parts of the Country and found that they are moving forward in many sections of the Country.

The groundwork for a better jail system has been laid in the State of Virginia where several lock-ups have been closed by the State Department of Corrections.

A bill has been drafted by the State of Maryland which provides that it shall be the duty of the Board of Corrections to cause regular inspections to be made of the county jails, lock-ups, etc., used for the detention of offenders awaiting trial, for the purpose of assuring reasonable, adequate, healthful, humane, and equitable treatment of all persons confined therein.

We have learned also that some cities and counties have solved their own local jail problems, and have eliminated the evils of the present system by removing sentenced prisoners from the custody of the police department and placing them under the control either of a city department of corrections or a city welfare department. This agency of the city government determines under what conditions they shall serve their sentence and prepares the program of treatment during that time.

The outstanding example of this, perhaps, is the penitentiary of the City of New York on Rikers Island, New York. Immediately after sentence, the misdemeanants from all courts in the city pass from the jurisdiction of the police to the Department of Corrections of the City of New York and serve their sentence on Rikers Island. This is a modern institu-

tion with various types of work and a program of rehabilitation in keeping with modern scientific principles.

In Kansas City, Missouri, there is no city jail in which sentenced prisoners are confined. Instead all misdemeanants convicted in municipal courts in Kansas City are sentenced to the municipal farm. There are separate farms for men and women.

The products from the farms are used in other institutions in Kansas City, particularly the general hospital. On the municipal farm there are all the advantages of outside work, recreation, and opportunities for consultation with social workers and various agencies in the city as well as adequate medical and dental care.

Shelby County, Tennessee, attacked its jail problem by the establishment of the Shelby County Penal Farm. The main prison unit was built in 1928 when the county sold a million dollar bond issue and purchased 2,400 acres of land. Today the farm has an acreage of 5,017. Crops are raised on 3,000 acres of that land and in addition some of the nation's finest cattle, hogs, sheep and horses are produced. The farm has evidently accomplished a great deal and ranks as one of the best in the country.

Indiana attacked its jail problem on a state-wide basis. It has a correctional institution of approximately 3,000 acres of land and several industrial plants in addition to the farm. The institution is highly regarded by penologists throughout the country.

2. THE LOS ANGELES HEARINGS

Considerable detailed testimony regarding the Los Angeles hearings has already been given. From that testimony the committee largely drew its recommendations and conclusions. However, much more interesting testimony dealing with other aspects of the jail problem was given, primarily the reports of sheriffs and supervisors and a discussion of the problems they face.

There was a wide divergence of opinion between representatives of the more populous counties of metropolitan character and those which are essentially rural and thinly populated but nevertheless of commanding importance.

This does not in any sense mean that all rural counties were found to be backward in their attitude toward their jails.

The following two examples of testimony illustrate the extremes to which attitude and practice toward jail administration can vary between two counties.

The sheriff of a thinly-populated county in Northern California explained his situation as folows:

Four tanks, including one for juveniles and one for women, plus an insane ward and a padded cell. No appreciable juvenile problem. Those convicted segregated from those not convicted. The prisoners do their own cooking (a dubious practice in the eyes of leading authorities), and the food is purchased by the sheriff on a fee basis (a practice universally condemned).

All women were given venereal disease examinations, the sheriff testified, but men were not because, "It doesn't take very long to find out if a man has got a dose." The diet lists recited by the sheriff were improperly balanced, and no recreation or work program was in force.

("There should be a recreation room and that has been recommended by the inspectors and grand juries but the installation will cost money and the supervisors haven't seen fit to do that work.")

Concerning rehabilitation, the sheriff testified: "We have tried that out. We have worked men out on the highways. Of course, you can't just turn those fellows loose, you know. You have to have a man in charge of them and that man has to be paid. One day you have 10 men, the next day you have five, and maybe the next day you don't have any. There are not enough men to justify a program of that kind."

The sheriff was likewise dubious about a regional rehabilitation program, whereby a number of small counties might establish a joint program, for the same reason—there wouldn't be enough prisoners to justify it.

And like some other small-county sheriffs he was opposed to state control and uncertain about the degree to which the State should go toward promoting minimum jail standards of sanitation and operation. (" * * * I think that insofar as the State is concerned, they have about all the responsibility that they can take care of and I don't believe in central government.")

In sharp contrast, a paper by Sheriff Bert Strand of populous San Diego County was read by Capt. W. L. Harvey of his office which urged complete state control as the best solution.

Strand's arguments were that state control would: (1) provide uniformity, both in standards and operation, (2) promote in-service training of personnel and reduce the interference caused by politics, (3) solve the problem of insufficient local funds, (4) make easier the installation of rehabilitation programs.

"Why not smaller penitentiaries and larger jails—jails that might serve several communities?" this sheriff asked. He urged regional programs to serve the smaller counties, called for diagnostic clinics to serve county, and city as well as state prisoners, suggested that farm and road camps should be established in connection with regional maximum security institutions. As possible work projects he suggested the usual farm, dairy, and stock programs, the produce to be sold to public institutions, plus fruit and vegetable canneries, a garage for repair of county and state road equipment, a laundry serving the same public institutions. He stressed the importance of paying the inmates ("Too many people are released from jail broke, without a job; therefore with little alternative but to steal. Many persons in jail for some minor offense leave families without support who immediately go to the public relief agencies for assistance.")

Fear of state administration, despite this sheriff's testimony, was general, and it could be seen that any proposal for full-fledged state management of local jail programs would encounter widespread opposition among sheriffs. The rural sheriff mentioned above, while against state administration, declared with emphasis that if standards were set on a state-wide basis, inspecting officers should have positive power to enforce the regulations.

Sheriff Eugene W. Biscailuz, whose Los Angeles County Jail houses approximately 2,200 inmates on the top five floors of the Hall of Justice, expressed himself as favoring minimum standards set up by the State and favored legislation with teeth in it to enforce those standards "as

long as they will keep within the scope of their powers rather than to try to take over."

Sheriff Biscailuz hoped that under "post war plans" the jail could be taken out of the city and located in conjunction with the jail farms, except for prisoners awaiting trial.

He lamented the fact that at present it was necessary to keep the women inmates confined to the jail affording them no opportunity to get out into the sunshine. The 140 women, on an average, are given darning, washing, and ironing to do, and the sheriff would prefer a more constructive program. "It is hard to make programs for the few rather than for a large number," he said.

Juveniles are segregated, a section of the jail being devoted to their custody. "We know this is not ideal," Biscailuz said, "but we are in the position of doing the best we can with the tools we have to work with." He looks forward to a proposed facility for juveniles where a five acre site will be converted to the use of youngsters 16 or 17 years of age. The intent is to substitute work, recreation, study, and sunshine for idleness.

The sheriff read a paper describing the working of the county's rehabilitation program consisting of a farm project where 300 men raise vegetables, hogs, and cattle, and five honor camps, by means of which 370 men build roads through recreational areas.

The committee had previously referred to the Los Angeles honor farm for prisoners as "the first real approach to constructive program of rehabilitation." At that time it occurred to the committee that a maximum security institution could be built at the farm site, where the men would have the advantage of fresh air and outside work. The committee called attention to the fact that farm and camp prisoners earn 50 cents a work day which is paid to each at the time of his release.

Of particular interest was the testimony of Sheriff John E. Loustalot of Kern County. His jail system is unique in that it maintains a majority of the prisoners in adult and juvenile camps with a lesser number confined to the jail itself.

While fully in accord with a recreational program as a preventive for juvenile crime, he put his finger on one chink in the plans that was overlooked by experts and amateurs alike who appeared before the committee:

Among delinquents and prospective delinquents is a certain percentage who do not want supervised play and who will not participate in sports programs with youngsters in their own age group, the sheriff pointed out. This anti-social youngster seemingly cannot take part. He will stand around on the fringe of things, drawn into himself, and no force or mode of encouragement so far employed will draw him into the activity. He seems unwanted and, after watching the others a bit, will go off by himself and frequently get into mischief. This boy is dangerous and something must be done for him. "Supervised play will take care of a certain percentage of delinquents; something else will take care of another percentage; the church will take care of a percentage; the schools will take care of a percentage; but there is still this small anti-social percentage remaining."

While he is but a small percentage of the whole of youth, he makes up a large percentage of the delinquent. "Perhaps hunting and fishing can do more for that type of boy than can calisthenics and swimming."

In reference to alcoholics, the sheriff expressed opposition to throwing a group into a "drunk tank" where fights might start. In his jail he makes a practice of assigning a drunkard who is sober to care for the drunks as they are brought into the jail. "A habitual drunkard is a sick man and he needs hospitalization. I know for sure that six months or a year or five months of incarceration doesn't take the drunkenness out of a man."

He suggested jail doctors. "We must make arrangements," he said, "so that in every jail when a man is brought there he immediately can be looked at by some person with authority, who can determine right then and there whether a man should go to a hospital or should stay in jail." Suggesting group therapy for incarcerated alcoholics, he said, "In our camp we have a group of Alcoholics Anonymous and I will say this for them, they are a grand bunch of people and they are doing a grand job for those who want to fall in with the program. But the drunkard who refuses to face his problem can't benefit by their help."

Sheriff Howard P. Gleason of Alameda County advocated the abolition of the cell block type of jail. "I believe that both from the moral standpoint, mental and physical standpoint, it is far better to have the farm type of jail than any other type that I know," he said. He advocated setting up uniform requirements and minimum standards for jails.

J. R. Devitt, Sheriff of Santa Cruz County, urged that any proposed rehabilitation program start with children, especially under-privileged children and advocated slum clearance as a means of crime prevention. He said that his county could not afford a farm because his jail had a population of only 40 or 50.

Some of the problems faced by the county supervisor in raising funds for institutional improvements and overcoming the apathy of the taxpayer toward the need of a rehabilitation program were explained by William A. Smith, Chairman, Board of Supervisors, Los Angeles County. Supervisor Smith also discussed the farm-program type of jail as operated in his section.

The supervisor praised the road camp, not for its obvious physical advantages for the inmate, but for its psychological uplift. "When you send a prisoner to a road camp," he said, "you are beginning to put him pretty much in the status of an employee. He gets paid a small amount. Part of it goes to his own credit, part of it to the credit of his family. That man is working for his own benefit. The road camps have served a real purpose. They have rehabilitated many men. They have allowed us to build a great many roads through the mountainous area of the county, highways, fire protection roads, and roads which give access to recreational areas." He expressed the hope that the figures listing 2,300 men confined to the jail and 700 working on the farm and on the road camps could be reversed in the future.

The supervisor felt that the State should participate in a crime-prevention program on the county level, but was dubious as to the source and use of the funds. He expressed a fear that the small counties would move in on a state appropriation to the extent that they would allocate an excessive share to rural areas whose problem is comparatively minor in proportion to the urban districts. He also touched on the opposition encountered from "taxpayer" groups who oppose expenditures of public funds for recreation areas.

He felt that prison populations, whether in county or state institutions, were partially a state problem and that the small counties, especially, were in dire need of state aid for their prison programs.

A minimum standard should be set by the State, the supervisor agreed, and he insisted that the law carry teeth.

"A lot of small counties will not comply at all unless you establish these standards and furnish inspection." He also urged state aid in the matter of juvenile delinquency prevention. He insisted widespread cooperation was necessary to combat this evil. "We all must help, from the State to the individual family."

Getting back to the county jail problem, Supervisor Smith stated that he saw no need for a county jail in the lesser populated counties. "The counties have a responsibility not only to prisoners, but they have a responsibility to many other people. Citing an instance of county cooperation he pointed to the counties that have banded together to build sanitariums for tuberculosis patients. "I see no reason why the same procedure could not be followed in building a jail for counties who cannot afford to build and operate them successfully.

Opinions of supervisors were divergent on the question of how jail reform should be brought about. One supervisor from a small county, whose jail was built 50 years ago to house 95 prisoners and where 250 are confined, was unequivocally opposed to any regulation, or even suggestion from the State. He felt the jail program should be strictly a county program. He opposed moving prisoners to the country because of the transportation problem, but expressed approval of the system employed in one county where prisoners work on privately-owned farms at the prevailing rate, thus being almost self-supporting. This supervisor announced preliminary approval for a new courthouse in his county, which would be 12 stories high with the top three floors devoted to the jail.

He opposed machinery set up by which his county could become familiar with policies in other parts of the State if it meant "any state control."

3. SACRAMENTO HEARING, SEPTEMBER 10, 1946

In the course of the committee's investigation, it was found that more than 50 percent of the problem in the city and county jails is due to alcohol and drunkeness, and, therefore, it was felt that, inasmuch as a large part of those incarcerated in city and county jails have committed no offense against the public, other than just plain drunkenness, they should be considered separately from other types of misdemeanants.

It was felt that a program might be necessary for these offenders Something might be done to lessen the burden of heavy custodial problems. Police departments are over-worked and if some of these fellows could be taken out of circulation and better treated it might be beneficial to the taxpayer as well as to the man himself.

It was felt, too, that some authority should be outlined for handling the problem of the alcoholic. In proposing the authority, the Department of Mental Hygiene was considered, and the matter discussed with the director.

The committee felt that the alcoholic should be treated from a medical standpoint rather than merely punished. But persons directed

to whatever authority might be set up could not be sent there to sit on benches. Some work program would have to be devised, and the problem arose: What kind of work should they do? The state farms were considered; obviously a farm will not employ many persons. Members of the Division of Forestry were interviewed, and it was learned that they have endless work to do. But, also, they have limitations on what can be accomplished due to a lack of materials and manpower to construct necessary buildings.

The committee did not want to propose more complications for any division or department of the State Government. So an effort was made to find out whether any of our present authorities might undertake additional responsibilities.

Don Sanson, Chief of the Adult Division of the Los Angeles County Probation Department and a member of the Welfare Council of Metropolitan Los Angeles Committee on Alcohol said, "We in Los Angeles have been concerned about this problem for a long time. The police department estimated some time ago that one-third of all its time was used in arresting, transporting and caring for drunks.

"They report that more persons die annually of alcoholism than of any communicable disease.

"The police of the City of Los Angeles alone arrest more than fifty thousand, and have arrested as many as seventy thousand persons in one year for drunkenness. A problem so great as that certainly requires some kind of intelligent approach.

"We have explored the problem for almost 10 years through the Welfare Council. We have come to some conclusions which I would like to present to you. We think the problem should be broken up into three phases. One, of course, is the need for research. There has been less done in this particular field than any other field of major difficulty. Recently there was an Institute on Alcoholism at the University of California at Los Angeles, addressed by many able persons from various fields. Without exception every speaker pointed out the need for additional research. We, therefore, believe that the University of California's School of Medicine in San Francisco should undertake research, and that a new medical school should be established in Los Angeles.

"Second, we think that research should be carried on as a part of the policy of the Department of Mental Hygiene in the Langley Porter Clinic, San Francisco, and a counterpart to be established in Los Angeles.

"Next, we think the problem of prevention should be given definite consideration by the Department of Mental Hygiene not only in hospitals but in its out-patient clinics as well.

"Third, there should be and must be a treatment program on the state level."

Mr. Sanson thinks the present method of treating the chronic alcoholic unsuccessful because alcoholics are not properly treated in hospitals for the insane.

During the war, alcoholics provided a very considerable part of the labor performed in state hospitals, since as soon as they were sober they were capable of performing a great many services. The Department of Mental Hygiene has said that it would have been difficult for them to have operated without the help of the alcoholics during that

period. The alcoholics resented being made involuntary slaves, however, especially since there was no treatment for them.

Mr. Sanson definitely favored voluntary commitments as an alternative means for every person who is sick. He considers the alcoholic as a sick person. He maintains that if out-patient clinics are actually established and working, a great many patients will seek treatment and not need to be in custody at all. They could stay at home, come in for treatments, and benefit from that method.

"The out-patient clinic program actually will reach far more patients than our custodial units if we once get them in operation. While we favor inebriate colonies, we would be very unhappy if every person who was an alcoholic, and wished and needed treatment, necessarily had to be placed in the colony. We do think, however, that inebriate colonies are absolutely necessary, but that other methods should be tried before the alcoholic is commited to the colony."

Mr. Sanson does not consider the honor farms adequate inebriate colonies. "We feel that we have uniformly failed to deal with alcoholics successfully through our honor farm. We have no idea that our program there has cured any alcoholics. It is not set up for that purpose. It is not under any medical direction. It is set up as a program providing a minimum security—treatment for persons committed to jail, whether for alcoholism or petty theft, as a condition of probation in felony cases. Remember, we have every type of person on the honor farm. It has done some excellent work that we are proud of. But it is not what we think of as an inebriate colony. It has no pretense of treatment.

"Alcoholism is an illness and something that needs medical treatment." He maintained that alcoholism has been treated successfully in many, many cases; that the Yale Institute shows successful treatment in 80 percent of its cases—not cures, but, mind you, successful treatment in 80 percent of its cases.

Mr. Sanson pointed out that drunk farms have been tried for many, many years, with various methods, including chain gangs. All of them have failed because they have undertaken to scare the drunk into staying sober or to make him have "better sense" than to get drunk.

He strongly advocated inebriate colonies along with out-patient clinics, with the direction of the Department of Mental Hygiene. He favored strongly the forestry camps as an instrument for vocational rehabilitation.

But he said that he was opposed to the establishment of forestry camps as a place to which persons are committed as alcoholics. "We feel that would simply be another means of having chain gangs or road gangs, and would not provide medical treatment which is curative. But, if in the Department of Mental Hygiene has this plus a farming program, plus other work programs which would help in rehabilitation, that is fine and we would heartily endorse it." The forestry program, he pointed out, originated in Los Angeles County, and differs from other institutions in that the emphasis is upon personnel, activities, and a counselling program, rather than upon buildings and a physical setup.

"If you set up a program of forestry camps," he said, "that will be fine, if it is an adjunct to an inebriate colony."

Dr. Lawrence Kolb, Medical Deputy Director of the Department of Mental Hygiene, stated that his department felt it should operate an inebriate hospital or two, and has favored that idea for several years.

He would like to see the hospital built in an area of three or four hundred acres of ground to be used for agricultural purposes. He wants a real hospital that will not deteriorate into a jail—a hospital with a sufficient number of doctors, principally psychiatrists, who could carry on intensive treatment psychiatrically, and attend to whatever physical treatment was necessary, as well as conduct a research project on different types of treatment that have been used or may be used for the treatment of the chronic alcoholic.

Dr. Kolb thought the camp idea might be worked out in conjunction with the main hospital. After study and treatment in the central unit, a percentage of the alcoholics could be sent out to forestry camps, wherever it was felt the patient could be benefitted by the work and a longer stay under supervision.

He thought the camps might be modeled after the Youth Authority camps near Los Angeles. There should be a certain amount of self-government and the patients could supplement whatever maintenance work there was with a farm program. The patients should be properly fed and visited occasionally by a physician, but Dr. Kolb did not feel that it would be possible to have resident doctors in the outlying camps and pointed out that the psychiatric treatment would be done before patients were sent to the camps.

Dr. Kolb warned that no sweeping results should be expected from the central institute and camp program for treatment of alcoholics. He doubted that even 25 percent of the patients sent from the main hospitals to the camps could be cured. He based this warning upon past experience in treatment of alcoholics. He was of the opinion that if the alcoholic could be reached during the earlier stages of the disease the figure might be much higher. He said there have been cases, however, where alcoholics have been cured after as high as 60 arrests.

"Alcoholics Anonymous" has been doing more for the alcoholic, in Dr. Kolb's opinion, than any other group has been able to do. "It's a very important organization," he said, "and if we had an inebriate colony, we would surely encourage them to come in and get acquainted with our patients and set up what they thought was fit for them under our supervision and to follow them as they left."

Dr. Kolb felt that handling alcoholics in mental hospitals was unsatisfactory; that they must be handled as a separate problem. Most sanatoriums as well as county hospitals were not properly equipped to care for the alcoholic. But until there are separate units specializing in the care of the chronic alcoholic, he maintained, both city and county hospitals should be required to take these people and keep them until they have sobered up, rather than let them be thrown into jail where they may—and do—die.

When asked what sort of structure would be needed for the central building in an alcoholic project, Dr. Kolb thought it should be a substantial fireproof structure, with adequate offices for psychologists and doctors and warm, comfortable places in which the patients could sleep. He wanted to get away from the "temporary building" idea if possible but was not necessarily opposed to wooden, or one story buildings.

If camps were established they could be of a more temporary nature and set up at less expense, he suggested.

Dr. Kolb stressed the necessity of intensive treatment for the chronic alcoholic. "About 10 psychiatrists would be needed to treat 200 to 250 people." With this intensive treatment and research patients would not have to be kept long in the main structure, two to three months perhaps. When it was felt the patient was not ready to go home he could be sent to one of the camps to round out his treatment. The camps should prove a cheaper way of caring for a greater number of alcoholics and prove more beneficial to them than lying in county jails. A central institution, consisting of several low buildings, as a way of getting away from jail appearance, was suggested; most of the patients to be housed in wards with some private rooms available.

The approximate cost for maintaining a chronic alcoholic in the main section was estimated at about $2.50 a day per patient. If some of the patients could be farmed out to the Division of Forestry there would be some return for that; and some from the proposed farm. Dr. Kolb said he was aware that the thing should be done as cheaply as possible, but that was not the chief consideration. More important was: "What can we do to cure these fellows? What will do them the most good? I feel that we should have a more intensive treatment than we have had in the mental hospitals."

He warned that, on the basis of past experience, even where alcoholics are treated intensively many of them relapse. "We also know that it's a mistake when you once treat a man and he relapses to tell him, 'You're no good now. There's nothing but jail for you.' That isn't true. It's human nature. It's the psychological make-up of these patients that even when they want to be cured, that they do go by some irresistible impulse back to liquor again. We should not give up on one trial.

"So, any system of treatment that is set up, we should set up with the understanding that we don't expect a marvelous return. But it is a desirable program. I feel that our department should pay attention to the alcoholics."

He said Los Angeles has, conservatively, 50,000 arrests a year due to alcoholism. Dr. Kolb feared an overload of patients at the start of a new program unless his department was given some control over who would be sent to their authority. At the outset it would be necessary that the patients sent them be acceptable, as there would be some alcoholics they could not do much for.

Pursuant with the committee's thought that forestry camps might be adapted to the care and treatment of alcholics, Mr. Karl Holton, Director of the Youth Authority, testified concerning the youth camps in the forests. He gave an over-all picture of the present camp program, its appropriations, the job assigned the department, what he had hoped to do, how far he had gotten, and the obstacles in the way of more speedy operation.

Mr. Holton explained that the Youth Authority had no money at the present time for operation of camps. An appropriation—$300,000—allocated in 1945 was withdrawn because of the war and turned over to the Division of Forestry with the understanding that, following the end of the war, the Forestry Division would plan the camps where work was

to be done, and that boys would be transfered from other sites to the camps.

Transfers were slowed up due to the absence of any permanent camps, except the pre-war 50 boy camp at the Calaveras Big Tree Park. Forestry opened other camps for small groups for the purpose of blister rust control, pine beetle control, and fire fighting. At present, about 240 boys are in such camps all over California housed in groups of 20 to 40.

"Forestry is anxious to go ahead with the camp program and an arrangement which we expect to present to the Legislature asks for five permanent camps. Each of the camps will house 60 boys." He went on to say that spike camps—tent or cabin arrangements—would supplement the permanent camp sites with not more than one spike camp to each larger camp. Each spike camp would accommodate 20 boys.

Under the plan, he said, the budget would all be in the Youth Authority and the Forestry Department would be expected to pay 50 cents a day for the work done by the boys.

Holton referred to the problem of procurement as driving his department "to complete frustration." He said: "In the past three or four months I have never in my life felt so completely frustrated. We haven't been able to get anything in the way of clothing; in the way of materials of any kind."

Personnel, too, presented a problem. "In one school we have hired 97 men to fill 17 positions We get fine young men, veterans with marvelous records, and get them up to these places and away from their homes and wives; put them there with no place to live and in three to six weeks we lose them. For the most part they want the job, are interested in it, but there is just no place for them and their wives to live."

The housing problem extends to the boys, Holton declared. He doubted that many of the boys could be put under adequate housing for the winter. The only material he has been able to procure has been salvage from his own facilities.

The Youth Authority has been given priority and funds and promised more on completion of the first units but has been unable to build due to shortages. "We haven't got pipe; we haven't electricity; we haven't lumber, we haven't anything at all. We can't even get anyone to bid." He added that discarded Marine uniforms was all the clothing he had been able to purchase for Preston.

Holton felt that the Forestry Program was a logical outlet for the activities and energies of the young men if and when the difficulties in securing materials and personnel can be ironed out.

Another drawback, Holton pointed out, was the inaccessibility of camp locations. Usually the Forestry Division wants work done in remote sections and by small parties. The transportation cost appears excessive Another cost is the item of transporting an injured boy from camp site to town for emergency medical treatment.

He was of the opinion that these cost figures should be considered in any plan for inebriate camps in these areas.

Discussing supervisory problems, Holton said that the camps operate with 1 man for every 10 boys which included 24-hour service. In addition, teachers from the county school district where the camp was located were contracted. He pointed out that boys 16 and 17 years old were entitled to education, religious training, recreation, and medical care.

He expressed doubt as to the possibility of securing psychiatrists and others to come to the camps in the event a program for alcoholics was installed. "We haven't been able to get a psychiatrist in the last three years to go to Preston." He stated very bluntly that he did not think a good psychiatrist would work for what the State pays.

Of 2,600 juveniles committed to the Youth Authority, about 10 percent are in camps, Holton said. The other 90 percent are put through a school training program. There is no other program for them. He explained that only the more serious cases came to them, and that the work outlook for the idle 90 percent was not very hopeful. "The bigger part of our most hopeful cases are put back with the counties and we are emphasizing the need to take care of these kids in the counties. (The State pays half the cost.) We are encouraging the counties to build their own camps—24-hour schools and their own work projects—and that means, inevitably, that only the least amenable to correction come to us."

About 15 institutions are being operated by the counties. Holton favored these camps and transferring boys back to them with the State paying a share of the cost and setting standards for care.

The Youth Authority is asking for five camps, he said. At present, the Forestry Department pays the actual costs of operating existing camps, and the Youth Authority assumes the entire responsibility for the custody of the boys. Forestry provides housing and supervises work projects.

Holton thought that a better way would be for the Youth Authority "to take the entire responsibility for operating the camp, and have all the money come out of our budget with Forestry paying for the work done. At the present, Forestry is bearing costs that aren't Forestry costs at all," he said. "It would make for simpler operation and the costs would be reflected where they belong."

About 1,000 boys are in county camps over which Holton's department exercises some authority under the law. "We have the right to set the standards for personnel, education, recreation, and camp management and the power to decide whether buildings meet our requirements. "If the county camps meet those standards we pay 50 percent of the operating costs. We send our inspectors in regularly and have worked out standards in cooperation with the counties. Also the camps must meet the requirements of the Labor Code, The Health Code, the Building and Safety Code and the requirements of the Fire Marshal.

"During the war years the camps were unable to meet those standards. And they are not able to meet them yet.

"We can't either. We have boys housed in buildings that the fire department would much prefer they weren't in."

Regarding juvenile halls, he said that the Youth Authority could make recommendations but that they were not mandatory.

He stressed the importance of personnel in the running of a juvenile hall. "Buildings and clubs can be worthless as far as delinquency is concerned, if not run properly. He encouraged recreational programs, being of the opinion that the State is not spending in proportion for prevention what it spends for correctional work. He recommended boy's clubs as a part of any proposed recreational program.

Holton spoke of the tremendous good done by communities with recreation programs adequately and properly staffed. He pointed to the fact that Martinez and Pomona, Los Angeles' East Side, where the delinquency rate had been reduced. He felt that the emphasis of prevention should be made on the local level with the State bearing a part of the cost.

Getting back to the camps and the establishment of more and better programs for boys, Holton reminded the committee of the difficulty of starting new projects of any kind under the present State budgetary setup. "We are in the horse and buggy stage as far as the State Budget goes," he said. "The whole thing should be overhauled. In the normal operation of a department you can go back and check for 15 or 20 years and spot trends and make requests accordingly. Where there is no precedent it is another matter."

He pointed to the biennial appropriations. If given the money, the difficulties arise in procurement, it is then necessary to turn back the money needed for the hard-to-get materials. He also questioned the ability to look two years ahead for the needs for a program partly experimental and wholly new. Added to other factors is the rapid growth of the State and the two-year wait before even a request for help can be made.

Due to the fact that his institution is always full, Holton told the committee it is necessary to refuse to accept certain boys. He insisted that in all cases he would rather have them at Preston or Whittier, but that boys are turned away not on the basis of the seriousness of the crime but also age is a factor considered. A boy of 16 or 17 is usually taken when the alternative is a boy of 19, especially if the 19-year-old has committed a serious offense. Another weakness in the system, Holton said, is the necessity of holding youths in city and county jails for long periods of time before space allows their acceptance by the State. These boys are then released before the State has had sufficient time to put the boy through the correctional program.

Speaking of alcoholics, Holton said that he was of the opinion that they should be handled by a separate department. "They are not primarily a criminal problem; they are a medical or psychiatric problem."

DeWitt Nelson, State Forester, appeared before the committee and outlined how the Forestry Division had operated camps in cooperation with various groups including the Youth Authority. He told the committee the difficulty of starting a new project; of the overwhelming odds presented by scarcity of materials, difficulties in buying, transportation, and the red tape in general which hampers operations. He discussed the probable use of forestry camps in connection with the treatment of alcoholics.

Nelson's background of experience in the work lent weight to his testimony. He has been with the State Division of Forestry three years. Prior to that he was with the United States Forestry Service 19 years, progressing to the stage where he was supervisor of four different forests He was, for a time, Liaison Officer on the Adjutant General's Staff of the Ninth Corps Area at the Presidio at San Francisco, representing all of the work agencies to the Army throughout the area during the CCC program. (The program operated 400 camps throughout the eleven West-

ern States.) He had more than eight years' experience operating the CCC Program.

Nelson said that if work projects were needed to supplement treatment given alcoholics, the Forestry Division could supply the want. "We have an unlimited reservoir of work and potential work in the 35 counties in which the division operates directly."

However, he stated, there were many difficulties to be overcome between the inception of any new project and the operation of the project. He went into some detail in describing the difficulties of procurement of material and personnel, of operating under a biennial budget and of red tape which extended to even such minor details as the repairing of an automobile tire and the purchase of hand tools.

Nelson made it clear that he did not object to the system of checks and controls on buying nor had he any criticism of the Finance Department but he felt that it would expedite his work if he could be given a little more latitude in the matter of small purchases.

As an example he mentioned an order for 18 hammers that had been on order for six months and not received. The hammers were needed at the time of order, he pointed out, and said that, added to the actual cost, would have to be added many man days of work because of the resulting slowdown. "If we could buy a needed item when we find it, it would help greatly." He pointed out that in the case of the hammers, they could have been bought at one of many stores close by.

Citing another instance of delay: "Right now we have had on order, for six or eight months, tools to outfit our traveling mechanics to keep our equipment in proper shape. We are just beginning now to get that stuff dribbling in, but we could go out and shop around the State and buy practically everything we need in this line."

In response to a question on the methods of purchasing in the Federal Forestry Service, Nelson told the committee: "Local administrative officers can handle their own bidding and open and accept those bids. Within a limitation of $50 or $100 they can buy without bid. That way they can pick up the bulk of small items needed."

Pointing out that the matter of purchasing was particularly difficult during these times of shortages, Nelson said: "At the present time we are having a great deal of difficulty in purchasing materials and supplies of all kinds. They must be bought through the Bureau of Purchases. And if they are in a considerable amount they must be purchased through competitive bid. They only way to find what we need these days is to go out and locate it. Then we have to come back through our office and the Bureau of Purchases and get all the paper work wound up. By the time we go back for the supplies, more often than not the vendor has disposed of the material to a ready buyer." He felt that such delays added to the expense of operating the Forestry Division.

Nelson sketched the background of the Forestry work with the Youth Authority. "From our standpoint it seemed an excellent chance to get help to carry out our function during an acute manpower shortage. We realized, too, the acute need of contributing in the rehabilitation of delinquent youths. We asked for six seasonal camps to help combat the fire problem. The estimated cost exceeded $400,000. At the budget hearing we learned that the Youth Authority had already asked for $300,000 for the same purpose. The $300,000 was transferred to the Division of

Forestry. We wound up with all the money and the Youth Authority with none. The program on the whole has proven to be most satisfactory. We have had a hundred percent cooperation from the Youth Authority."

"We had trouble securing, first, campsites and, second, the building materials with which to build the camps. Building materials especially proved extremely hard to get, and their costs seemed to have mounted beyond reason. At the outset, we thought we had sufficient funds in our biennial budget for building and operating the camp, but we had to appeal to the special session of the Legislature for a supplemental budget and I'm afraid that that is going to fall short of meeting the problem."

Concerning alcoholics, Nelson was of the opinion that a minimum period of two months' stay in the camp would be necessary. "It would take time to condition him and teach him to use the tools with which he would work before he would perform constructive labor which would be a part of his rehabilitation."

Forestry, he said, has a rather large variety of work which would be suitable for the alcoholic—providing it had project funds, equipment, material and supplies. This includes a large projected road-construction program, lookouts, ranger stations, crew barracks, warehouses and garages, telephone and powerline construction to a number of mountain peaks for the purpose of establishing radio relay stations. "We contemplate forest nursery development and if you screen the men carefully they would be adaptable to that type of work."

In handling the alcoholics, Nelson said, the problems of operating and managing camps would be many and varied. "But it is a critical social problem and if we can do anything to help solve that problem we will certainly do our best. It is difficult to predict the efficiency with which such a program can be carried out. It depends largely upon the type of leadership and direction. Among the alcoholics will be many who have skills and trades and when sober will probably be highly efficient. Others will have done practically no work, will not know what a hard day's work is, will not know how to use the tools and equipment."

Nelson said, "Reports from county farms indicate that the alcoholic is a pretty good worker." He added that his own experience with them was confined to those who turned up in forestry labor camps and crews. Nelson approved a possible project of establishing two farms, one in the north and one in the south, serving as major reservoirs for labor to man spike camps and smaller units.

He raised the dual problem of custody and work responsibility. He was of two minds about the custodial problem and indicated that, while the Division of Forestry would readily assume the work project responsibility, custodial supervisors, if needed, must come from another source. "We are not police officers or trained in psychiatry nor qualified to administer medical treatment. I assume the problem would be one of minimum security but even though guards were unnecessary there is still custodial responsibility involved in any rehabilitation program. I don't know what these would embrace for the alcoholic. The boys in our camp under Youth Authority have been given their rightful education, recreation, religion, etc., and while in these youth camps, Forestry has assumed work responsibility, these other necessary factors have been

supervised by the Youth Authority, which is geared and equipped to handle those problems. There must be a clean line of demarcation of responsibility and authority between the two responsible agencies."

Nelson was well aware of the complications involved in any program aimed toward the rehabilitation of alcoholics. He was aware of the type of man who serves sentences of varying length, only to turn up in custody again a few days later, "the type who is doing life on the installment plan." He agreed that some provision might be made for these men to make a farm or camp a permanent home. "Forestry has worked a lot of men who fall into that category in the old labor camp days and in many of our fire suppression crews during the last few years. They are not the most desirable type of employees. Their production is poor, their ability is poor, and the problems they create are constant. It's this type of man who needs custodial supervision."

He agreed that the men who presented an acute custodial problem were comparatively rare, and that the over-all question of security would not present a serious problem. He considered 98 percent of the men would be minimum risks as far as custodial care was concerned—that is, running away or causing serious difficulties. He felt that the custodial problem might be solved through some such arrangement as notifying the responsible authorities when a man refused to conform or could not conform, and that man would be picked up and returned to a place of greater security.

POSSIBILITIES IN SURPLUS PROPERTIES

In further pursuit of possible overall accommodations and rehabilitation programs, your committee investigated at some length but one large vacant Army camp, that being Camp Cooke near Lompoc. This project consists of over 100,000 acres, much of which is enclosed by a light detention wire fence, and contains hundreds of barracks and numerous other buildings including kitchens, mess halls, churches, social centers, theaters, stadiums and warehouses, all said to be completely outfitted. Many of these are to be declared surplus and therefore likely to be reduced to panels at an early date unless some good public purpose is soon proposed for their use.

From an interview with the commanding officer in charge and from War Department correspondence made available to the committee, it appears that any request of the State of California for use of these properties would receive very friendly consideration and probable approval.

These properties are yet in good repair and suitable accommodations for hundreds of men needing treatment and rehabilitation.

At least for a temporary period of construction delays necessitated by scarcity of materials and manpower, a new worthwhile project could be initiated which would relieve overcrowding in many local jails throughout the State.

In the course of this inquiry we learned of employment possibilities in non-competitive programs and for such numbers as might be advisable for the State to assume custody for. Without attempting to assume responsibility for the soundness of any proposal, we have strongly in mind the experimental program now in operation by the Drug and Oil

Plant Project under the California Polytechnic School at San Luis Obispo some 30 miles distant.

The War Department has built a maximum security prison on a 3,000-acre plot reserved from the larger camp area for the confinement of up to 1,600 prisoners. Here they will set up industrial and agricultural rehabilitation programs.

The nature of the federal interest at this camp probably is accountable for the receptive mood to a like program by the State.

COMMENT AND CONCLUSIONS

An encouraging note is the general awareness of people in public life to the problems of the jails. There is general agreement that the present jails and penal institutions on the county and city level are, in the main, spawning pools of crime, and that monumental edifices of steel and stone in congested districts serve no practical purpose other than housing men awaiting trial and convicted persons awaiting transportation to assigned institutions.

An awareness exists that a physical cleaning of jails is not an ultimate answer to the problem, that jails must be moved to country districts where land is available for a supplementary program of work, recreation, and education. Opposing these conclusions were but a very few public officials, mainly from the least populous areas.

Labor was in accord, with the majority agreeing enthusiastically that work was not only desirable for institutional inmates but highly necessary, labor's only reservation being that convict labor not be thrown into the market to compete with free men.

Agriculturists endorsed an institutional farm program, pointing out that an infinitesimal loss of produce market was far offset by men rehabilitated.

Only a few farmers and one farm group opposed the proposed program. These few contended that produce from institutions might diminish that one and one-third thousandths of the agricultural market represented by the institutions and public hospitals.

Of all individuals and groups heard by the committee, only a handful, notably "champions of a cause", refused to admit the over-all problem, clinging with determination to a pet theory designed to eradicate all social evils. Even these agreed that a program of rehabilitation must replace confinement in the treatment of misdemeanants and felons.

The logic that police and custodial functions should be separated met opposition only from a few of those at present performing these dual duties or from persons directly connected in an official capacity with a political subdivision where they are performed.

The proposition that the State has an interest, partially, in crime—misdemeanants as well as felons—on a county and city level met general agreement.

It was also agreed that the problem of crime prevention should receive more official attention from the State. Authorities heard by the committee were in accord on slum clearance, and agreed that recreation facilities, parks, playgrounds, supervised sports and activities were a necessity. On this score Sheriff Loustalot of Kern County, put his finger on a lack in the proposals put before the committee. Loustalot singled

out the small percentage of anti-social youngsters who will not, or cannot, participate. He stressed the necessity of some activity for this group. He admitted that these made up but a small fraction of a given community but pointed out they were a large part of the delinquents. He thought individualized attention in the form of fishing and hunting might be a step in the right direction in handling this specialized problem.

From the evidence and testimony it appears that jail reform is impossible until some solution is found for the care and maintenance of the alcoholics who crowd the jails to overflowing. Jail personnel does not have the experience to deal with or time to spare on rehabilitation problems while tending the steady stream of drunks, many of whom are repeaters.

During discussions of projected programs for the care and rehabilitation of alcoholics the committee was impressed with the many formidable obstacles faced in the launching of any new project by a political agency or subdivision. Repeatedly the testimony brought out instances of red tape; the difficulties of procurement of personnel and materials; transportation costs; and remoteness of proposed work projects.

Concerning the alcoholic, opinion was unanimous that he was a medical and psychiatric problem, and not a criminal.

Tentative plans for a period of hospitalization, with intensive treatment, possibly under the Department of Mental Hygiene, followed by indeterminate periods of outdoor work was discussed. While definite conclusions were not offered as to methods, it was recommended that the Division of Forestry or other state agency might supply work projects.

Inasmuch as such plans would be cooperative, with the county and city sharing the cost, it seems reasonable to assume that similar projects might be available from city and county foresters or from the United States Forestry Service and county and state flood control districts.

These later possibilities were suggested because of the remoteness of many of the state camps and the excessive transportation costs involved; also, because the lack of housing for supervisory personnel thus might be overcome.

In connection with treatment of alcoholics, the possibility of establishing Yale-type clinics came in for serious discussion. It was clear that these clinics could operate in connection with the hospitals and work projects.

It might be in order, here, to quote from a paper, "*A Public Clinic Approach to Alcoholism,*" prepared by Raymond G. McCarthy, Executive Director, Yale Plan Clinics. This quotation is especially apt because of the fact that McCarthy has long looked to legislative action by the states as the way toward alleviating what he has called "a public health problem of considerable magnitude."

"A legislative act which recognizes alcoholics as sick people implies that they can be rehabilitated, and submits that it is within the proper sphere of public interest for the State to initiate and operate treatment facilities, is exceptional. It is logical to assume that other civic groups will follow with interest the development of the project."

Establishing the necessity of public clinics, he points out the limitations of existing methods of treating alcoholism. "Facilities for treating inebriates have been operated on a basis of selection. The private sanatarium, because of the expense, is available to a limited number of individ-

uals. The private psychiatrist similarly does not treat any considerable number because of the time required and the cost of his services; also, there have been relatively few psychiatrists. General practitioners, as a rule, limit their services to relieving the acute stage of intoxication. Alcoholics Anonymous groups accept all candidates for membership provided that the individual comes voluntarily and sincerely to discuss his problem. Yet even in this organization some element of selection is operative. The shy, introverted alcoholic who is a "prominent" business man, or the product of a socially minded family, excludes himself from membership because he is unable or unwilling to admit publicly that he is an alcoholic and participate openly with the local group.

"It is suggested that any rehabilitation program for dealing with large numbers of unselected excessive drinkers will center around a public clinic. It is obvious that a municipal or state plan must function with a minimum of expense to the taxpayer and to the patient, with maximum utilization of skilled personnel and treatment facilities, and on a basis of negligible disruption of the normal family relation and occupational situation. The experience at two Yale Plan Clinics in Connecticut since March, 1944, indicates that such a plan is practical and can safeguard the interests of the community and the welfare of the alcoholic.

"The need for special clinics for alcoholics is justified because of the inadequacy of present facilities. In theory, psychiatric clinics can deal adequately with the excessive drinker. In practice, however, they do not have the opportunity to reach a broad range of cases because the alcoholic either will not present himself as a patient, is uncooperative if he accepts an appointment under pressure of one kind or another, or he gets drunk early in the course of treatment and the contact is broken.

"The alcoholic resents being classified as a mental case, and to a considerable extent the families of inebriates have a similar bias founded on misinformation concerning psychiatric services. The existence of a clinic set up primarily to assist alcoholics lends importance to the problem in the mind of the alcoholic, and in his egocentrism he may consider presenting himself for treatment.

"The public clinic, by coordinating the activities of the psychiatrist, the internist, the psychologist and the psychiatrically trained worker, and by employing the services of hospital and laboratory facilities and consultants in other fields, can approach the problem with a range of diagnostic and remedial skills capable of dealing with the considerable spread of individual differences which exist among inebriates."

The attitude of alcoholics entering the Yale Clinic is described by McCarthy in his paper: "About half of all the patients came to the clinics either on their own initiative or as a result of the influence of family or friends. The remaining half were referred by social agencies, private physicians, court and correctional officials, religious leaders, or other community agencies. Among the court referrals, some came on a recommendation of the judge, and a few on order of the court. There are instances where the condition of probation was attendance at the clinic. A number of patients were interviewed and studied while they were serving sentences in the county jail.

"It is significant that irrespective of the source of referral or the conditions under which referral was made, a large majority of the alcoholics, exclusive of psychotics, psychopaths, and certain undersocialized

DESCRIPTION AND CHART OF YALE PLAN

(As Interpreted by the Committee)

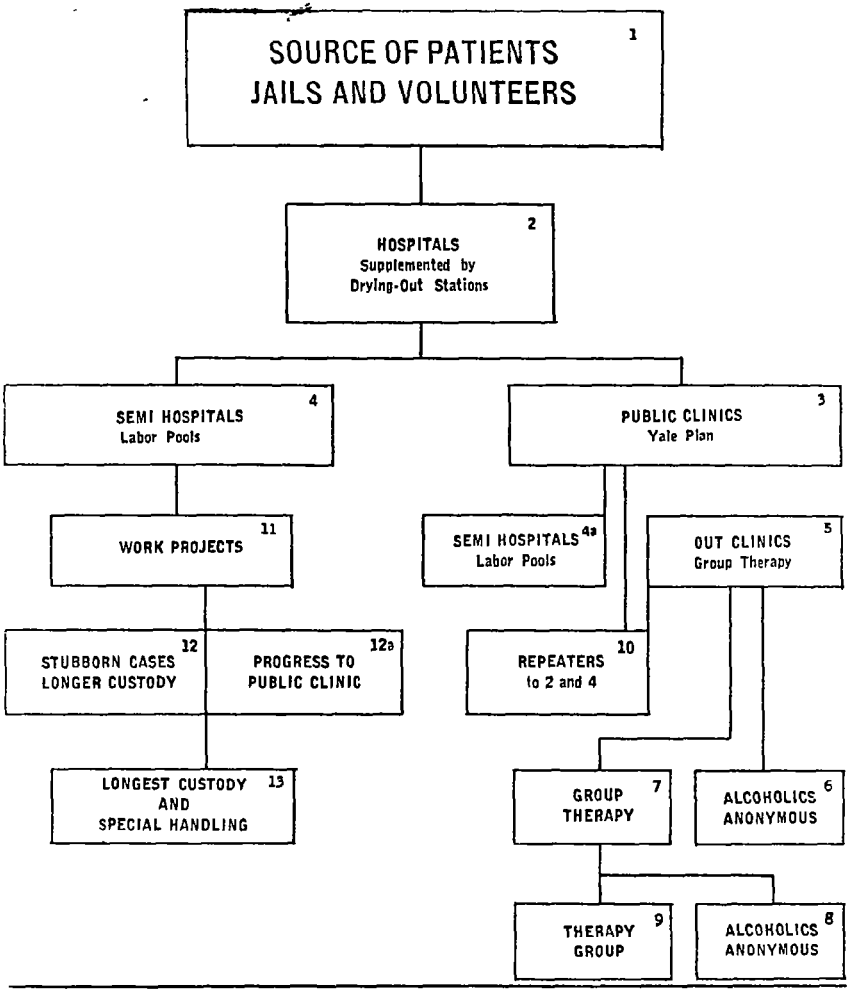
1. Patients would be drawn from two general sources: jails and volunteers.
2. The patient would be hospitalized. These hospitals might be under the direction of the universities, schools of medicine or under the Department of Mental Hygiene. A cooperative arrangement between the two seems indicated. Main hospitals might be supplemented by small units which would serve as drying-out stations where the patient would be sobered and receive medical attention. More serious cases could be retained in the hospitals for longer periods. The first screening process would take place in the hospital and patients sent to:
3. Public clinics modeled on the Yale Plan. Patients sent to these clinics would be mainly those for whom no custodial care is indicated—or to

Patients in the public clinics (3) would screen themselves into two groups: A. Those who do not readily respond to the treatment would be transferred to (4), the semi-hospital and labor pool; the others could advance to out clinics (5).

4. Central semi-hospitals where the patient would be restored to employable physical condition. These centers would serve as labor pools for proposed camps and farm projects. Patients for whom custodial care is indicated would be sent here.
5. Out clinics where, after medical treatment and personal mental therapy, they would be divided into sections to continue treatment under group therapy method. This group would subdivide into those who would from choice join:
6. Alcoholics Anonymous groups and continue on their own—and

7. These group meetings could be conducted by lay therapists under the supervision of the public clinic personnel. (Statistics from Yale show that this section would split into (8) and (9.)

7. Those who would prefer to continue treatment with the out clinic.
8. Patients eventually joining AA (6).
9. Those who would continue the clinical group treatment (7).
10. Patients who continue excessive drinking would be returned to hospitals (2) and thence to semi-hospitals or labor pools (4).
11. Work projects, farms, forestry camps, etc. Patients would be drawn from (4) semi-hospital labor pool. In addition to the therapy of work, sunshine and food, they would be given medical care and psychiatric treatment under the group therapy method. From this group patients would advance to the public clinics (3) or remain for longer periods in the camp (12).



12. These would be the more stubborn camp patients whose condition or attitude necessitated longer custodial care. Some would eventually be sent to the public clinics (3) and others would form Group 13.

13. Most stubborn cases, and would include the skidroad derelicts, many of whom would come to look upon the camp as a permanent home Special methods might be employed in handling this type. He should be assigned to a work detail and could earn a good conduct card which would entitle him to a certain amount of freedom off the reservation so long as his conduct warranted it. This type might also earn "furloughs" which might contribute to his rehabilitation to the extent that he might be assigned to a public clinic.

cases, presented remarkably similar attitudes. In general they were friendly, cooperative people who recognized logically that they should not drink, but admitted their inability to refrain from the use of alcohol. Many, of course, presented the initial impression of rationalizing or attempting to justify their drinking in a defensive way. This attitude soon changed when they understood that the clinic was not interested in judging their conduct but was concerned solely in cooperating with them so that they might voluntarily manage their lives without recourse to alcohol.

It was a new experience for many of these people to be accepted on an adult level, to find themselves able to discuss frankly the problem of their inability to cope with alcohol, and to do this without facing the threat of recrimination. Most of the patients who came to the clinic had as many good reasons for not drinking as the staff could possibly present to them. They did not understand, however, why their resolves not to drink were ineffectual and why, in spite of promises to themselves and others, they found themselves sooner or later on another spree. The opportunity to discuss this freely, to find ready understanding and acceptance of their fundamental sincerity in trying not to drink in spite of failure, was reassuring to them."

In connection with alcoholism, the interest of the State University in the problem must be taken into consideration.

The recent Institute on Alcoholic Studies held on the Los Angeles Campus of the University of California focused nation-wide attention on the university—it was reported that more newspaper and magazine lineage was devoted to the institute than to any academic-social effort of the schools to date. This fact probably brought home to the regents the advisability of an effort toward combatting the wide-spread and acute problem of alcoholism.

It is understood that representatives of the Los Angeles Campus of the university plan to appear before the coming session of the Legislature with a request for funds to establish an Alcoholic Research Department and/or a Yale-type clinic.

Representatives of the university have said that the existing facilities at the Medical School in San Francisco and the coming medical school on the southern campus will lend themselves to alcoholic work and be benefited thereby.

The question of alcoholic outclinics in connection with these schools has also been raised. It was pointed out that a medical school would draw the greatest possible pool of professional help. Not only faculty members, internists, and graduate students are available, but it is common practice for outstanding men in the field of medicine and psychiatry to give time to a university hospital and clinic.

The work of Alcoholics Anonymous came in for praise repeatedly throughout the hearings. Their program was lauded by the Governor, doctors, psychiatrists, social workers, prison officials, chaplains, and sheriffs.

Much more use of the AA methods might be made in any proposed project for the rehabilitation of the alcoholic than has been indicated in the testimony before the committee.

Taking a composite picture of the various suggestions for, and methods and agencies available to the care and treatment of alcoholics available, as brought out in testimony before the committee, a chart of a possible working plan can be drawn.

SPECIAL MENTION

In closing this report, the committee wishes to give its thanks to the many persons and organizations that offered such splendid assistance to the committee throughout its existence. Outstanding among these were the State Department of Public Health, the Department of Corrections and the Department of Mental Hygiene. Especial thanks should also go to the sheriffs and supervisors who so candidly stated their views to the committee at its public hearings, and to the specialists in the field the committee surveyed who offered expert opinion without which the committee would have been unable to arrive at objective conclusions.

Your committee feels indebted to:

GOVERNOR EARL WARREN
ATTORNEY GENERAL ROBERT W. KENNY
JAMES V. BENNETT,
Director, Federal Bureau of Prisons
ROY CASEY,
Federal Jail Inspector
MAJOR LOUIS D. COHEN,
War Department
ROBERT C. BROWNELL,
By-line News Writer
(Mr. Brownell's part consisted of studying and appraising the hundreds of pages of testimony and inquiry into the Yale Clinic methods and treatment quarters. The drawing of graphs and preparation of copy for this report.—Committee Chairman).

The committee likewise expresses appreciation to the press and other information-dispersing agencies which cooperated so wholeheartedly.

The newspaper coverage of the hearings and investigations was almost uniformly of high calibre, objective and helpful. Among magazines, extensive articles on the aims and objectives of the hearings appeared in fall issues of both "State Government," published in Chicago and widely circulated among state officials in the western part of the United States, and in "City Government," published by the League of California Cities and widely read by city officials throughout the State.

The Los Angeles hearings held in May also were outstanding for radio participation. A panel discussion "roundup" of some of the committee's star witnesses was broadcast over a major Los Angeles station. It is believed this is the first time a legislative interim committee has been "on the air."

STATEMENTS OF COMMITTEE MEMBERS

"Notwithstanding the nature of the problem, your Committtee on County and City Jails has had all-out cooperation on the part of sheriffs, police chiefs, jailors, county supervisors, prosecutors, state departments, and the public at large in this initial legislative effort in exploring jail conditions in California.

"As chairman, I especially wish to thank the vice chairman and secretary and committee members for their helpful efforts in bringing our hearings to seemingly successful ending. Without evasion or favor, we have attempted to perform our duty.

"Mr. Speaker and members, your assignment has been a great pleasure and opportunity, and I trust of lasting value to our California."

VERNON KILPATRICK

"As a vice chairman of the Assembly Committee on County and City Jails I am glad to have an opportunity to make a statement regarding the thorough and harmonious work of the Assembly Committee on Jails.

"The major part of the work and the arrangements of hearings were handled by the chairman. The best authorities on custodial care of prisoners were secured for the hearings, with the result that every phase of the problems was gone into by competent authorities.

"As I review the work of the committee I feel quite confident that this committee is in a position to make reliable recommendations to the Legislature as to the most improved methods for handling the difficult job of caring for prisoners, particularly the habitual alcoholic, which is the major problem in prisoner care.

"If the Legislature adopts the recommendations of the Jails Committee, I am sure we will have gone a long way in meeting one of the most difficult problems facing the people of the State of California."

R. FRED PRICE

"As secretary of the Assembly Interim Committee on County and City Jails, I hereby certify that, under our chairman, we have made a comprehensive study of city and county jails, both from a standpoint of theory and actual practice. Our committee hearings have drawn expert testimony, not only from our own elected state officials, the Department of Corrections, County Sheriffs and citizens groups in the State, but also from our national capitol and leading progressive states in the Union.

"From the well-planned program of personal inspections combined with testimony of leading experts, the arrangement for which our chairman deserves much credit, we are able to competently and confidently recommend in this report a program for much needed legislation. Through the series of hearings held in different parts of the State and extensive investigations, this committee is qualified to now recommend certain corrective measures to bring our State in conformity with widely recognized principles governing modern jail construction and management.

"I especially wish to emphasize that which I strongly believe to be the most important single fact which should be considered in connection with these problems; that is the finding that from 55 to 95 percent of the population in most of our city and county jails are alcoholics or those incarcerated for some offense involving the use of alcoholic beverages. The extremely high number of times most of the prisoners have been committed for this offense makes the fact even more important. It seems that we should give much consideration to proposed changes which would better meet the problem of dealing with the alcoholic in the interests of both helping the alcoholic and the general public."

ELWYN S. BENNETT

"It has been my privilege and pleasure to act as a member of the Assembly Interim Committee on County and City Jails for the past two years, and I am highly gratified with the results obtained thus far.

This committee has helped clean up many of our rat-infested dungeons which have been going under the name of civilized places of detention, and I sincerely believe that the legislation to be presented as a result of our investigation will go far in redeeming persons heretofore sentenced to jail.

"I heartily support this legislation and urge that the committee be continued in this humane endeavor."

WILLIAM H. ROSENTHAL

"It has been a pleasure to serve on the Assembly Interim Committee on County and City Jails during the past two years and I wish to compliment the chairman and the committee members upon their diligence in getting things done.

"There have been many evils in our jail systems brought to light, but the problem is so great and complex that it appears to me that this committee should continue its work in the future if it expects to make any important headway in correcting the intolerable conditions that exist.

"From my observations, I am of the opinion that most public officials having to do with law enforcement and management of jails are trying to do a good job, but because of the lack of interest shown by the general public, they are severely handicapped. This committee can be of great assistance to these men in the future, and I would recommend that the Fifty-seventh Session of the Legislature continue this committee."

JONATHAN J. HOLLIBAUGH

ANNOUNCEMENT OF COMMITTEE MEETINGS

It was announced that the following committees would hold meetings:

At 10.30 a.m., Wednesday, January 22d—
Rules.

At 3 p.m., Tuesday, January 28th—
Agriculture.

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Butters, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Robert Ware and Quentin A. Grassit of El Centro.

Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Holhbaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—77.

Quorum present.

PRAYER

The following prayer was offered by the Rev Richard Dwyer:

Send forth Thy Grace, Almighty God, that the proceedings of this Assembly may be guided by Thy inspiration and carried on by Thy gracious assistance, that every prayer and work of ours may begin from Thee and by Thee happily ended. —AMEN.

READING OF THE JOURNAL DISPENSED WITH

On motion of Mr. Grunsky, further reading of the Journal of the previous legislative day was dispensed with.

LEAVES OF ABSENCE FOR THE DAY

The following member was granted leave of absence for the day, and desired to waive his per diem:

Mr. Sherwin, on motion of Mr. Carey.

COMMUNICATIONS

By the Chief Clerk:

The following communication was received, read, and ordered printed in the Journal.

STATE OF CALIFORNIA, DEPARTMENT OF PUBLIC WORKS
SACRAMENTO, January 10, 1947
Carquinez Bridge
X-Sol-7-F

Arthur A. Ohnimus, Chief Clerk, Assembly
State Capitol, Sacramento, California

DEAR SIR: Pursuant to the provisions of House Resolution No. 314, adopted June 16, 1945, which requested the California Toll Bridge Authority to make a study of the desirability and cost of erecting over Carquinez Straits a new state-owned, toll-free bridge, and pursuant to a resolution of the California Toll Bridge Authority, adopted June 13, 1946, requesting the Department of Public Works to make the said study and report thereon to the Assembly, I have the honor of transmitting to you the results of such study in the accompanying report, entitled "Report of Division of Highways to the Legislature of the State of California on Proposed Expansion of Bridge Facilities at Carquinez Strait," dated January 6, 1947.

Respectfully submitted.

C. H. PURCELL, Director of Public Works

Above transmitted report ordered filed with the Secretary of State.

By Speaker Collins:

A communication from Oswald C. Ludwig, formerly Enrolling Clerk of the Assembly, relative to the meaning of Section 4661 of the Labor Code, was received, and referred to the Committee on Industrial Relations.

By Mr. Anderson:

A resolution from the Harbor District Chambers of Commerce, relative to urging placement of a portion of the Imperial Highway in the State Highway System, was received, and referred to the Committee on Conservation and Planning.

REPORTS OF STANDING COMMITTEES

Committee on Legislative Procedure

ASSEMBLY CHAMBER, SACRAMENTO, January 22, 1947

MR SPEAKER: Your Committee on Legislative Procedure has examined:

Assembly Bill No. 91
Assembly Concurrent Resolution No. 11

And reports the same correctly engrossed.

WEBER, Chairman

Above reported bill ordered to third reading.

Above reported resolution ordered on file for adoption.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No. 607: By Messrs. Sheridan and Burns—An act to amend Section 360 of the Code of Civil Procedure, relating to the statute of limitations on promissory notes.

Assembly Bill No. 634: By Mr. Dickey—An act to amend Section 370, 371, 372, and 375 of the Elections Code, relating to the index to affidavits of registration.

Referred to Committee on Elections and Reapportionment.

Assembly Bill No. 635: By Mr. Dickey—An act to repeal Section 572 of the Elections Code, relating to establishment of new precincts.

Referred to Committee on Elections and Reapportionment.

RESOLUTIONS

The following resolution was offered:

By Mr. Heisinger:

House Resolution No. 46

Relative to the creation of the Assembly Committee on Migratory Wild Fowl

WHEREAS, The migration of wild ducks and geese in the Pacific flyway is being reduced at an alarming rate; and

WHEREAS, This reduced flight has been caused to a material extent by drainage of swamp and overflow land; and

WHEREAS, The present drainage of Tulare Lake in Kings County and Summit Lake in Kern County and the erecting of Pineflat Dam in Kings River for agricultural purposes will create a serious problem in the preservation of migratory wild fowl; and

WHEREAS, It is essential that migratory wild game should have sufficient watering and resting places in the area now being drained in the southern San Joaquin Valley south of the San Joaquin River, before making their flight across the mountains into Southern California to their winter resting grounds; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1 The Assembly Committee on Migratory Water Fowl is hereby created and authorized and directed to ascertain, study and analyze facts relating to the drainage of Tulare Lake in Kings County and Summit Lake in Kern County, and the erection of the Pineflat Dam in Kings River as they affect migratory wild fowl, and what steps, if any, should be taken to maintain watering and resting places within the southern San Joaquin Valley south of the San Joaquin River for the preservation of migratory wild fowl including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Assembly, including in the reports its recommendations for appropriate legislation

2. The committee shall consist of three Members of the Assembly appointed by the Speaker thereof. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3 The committee is authorized to act during this session of the Legislature, including any recess, with authority to file its final report not later than the tenth legislative day after the end of the constitutional recess.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members

5 The committee has the following additional powers and duties:

(a) To select a chairman and a vice chairman from its membership.

(b) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purposes for which it is created

(c) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(d) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than herein provided

(e) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6 The sum of one thousand dollars ($1,000) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims

it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer

Resolution read, and referred to the Committee on Fish and Game.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 636: By Mr. Maloney—An act to amend Section 11871 of the Insurance Code, relating to the powers of the State Compensation Insurance Fund.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 637: By Mr. Maloney—An act to amend Sections 3501, 3502, and 3503 of, and to add Sections 4703.1 to 4703.6 inclusive to the Labor Code, relating to death benefits in workmen's compensation cases.

Referred to Committee on Industrial Relations.

REQUEST FOR UNANIMOUS CONSENT THAT TELEGRAM BE PRINTED

Mr. Robertson asked for, and was granted, unanimous consent that the following telegram be ordered printed in the Journal:

Telegram

Referred to Committee on Judiciary.

Assembly Bill No. 669: By Messrs. Rosenthal, George D. Collins, Brady, Bennett, Anderson, and Waters—An act amending Section 413 of the Code of Civil Procedure, relating to the service of summons and complaints out of the State of California.

Referred to Committee on Judiciary.

Assembly Bill No. 670: By Mr. Rosenthal—An act to amend Section 981a of the Code of Civil Procedure, respecting dismissal of appeals from justice court.

Referred to Committee on Judiciary.

Assembly Bill No. 671: By Mr. Rosenthal—An act to add Section 413.5 to the Code of Civil Procedure, relating to service of summons out of the State.

Referred to Committee on Judiciary.

Assembly Bill No. 672: By Mr. Rosenthal—An act to repeal Section 725 of the Fish and Game Code, relating to taking of sturgeon.

Referred to Committee on Fish and Game.

Assembly Bill No. 673: By Messrs. Ralph C. Dills, Fletcher, and Grant—An act to amend Section 80 of the Agricultural Code, relating to agricultural districts.

Referred to Committee on Agriculture.

Assembly Joint Resolution No. 13: By Messrs. Clarke, Crichton, Heisinger, James, Johnson, Silliman, and Thompson—Relative to memorializing the President and Congress to have the Mammoth Pass Road constructed.

Referred to Committee on Rules.

Assembly Bill No. 674: By Mr. Butters—An act to amend Sections 11401, 11405, and 11500 of, and to add Sections 11401.1 and 11401.2 to the Water Code, relating to the Central Valley Project, the membership of the Water Project Authority of the State of California, the qualifications, compensation, and term of office of the members of said authority, and the powers of said authority.

Referred to Committee on Governmental Efficiency and Economy.

Assembly Bill No. 675: By Mr. Butters—An act to add Section 23197.1 to the Water Code, relating to cooperation and contracts between irrigation districts and the United States, the provisions that may be included in such contracts, and the distribution and apportionment of water.

Referred to Committee on Agriculture.

Assembly Bill No. 676: By Mr. Butters—An act to amend Sections 23197 and 23200 of the Water Code, relating to cooperation and contracts between irrigation districts and the United States, the provisions that may be included in such contracts, and to the distribution and apportionment of water the right to the use of which is acquired under such contracts.

Referred to Committee on Agriculture.

Assembly Bill No. 677: By Mr. Maloney—An act to amend Section 1170 of the Harbor and Navigation Code, relating to pilotage rates.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 678: By Mr. Maloney—An act to amend Section 1170 of the Harbors and Navigation Code, relating to pilotage rates.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 679: By Mr. Dolwig—An act to amend Section 12421 of the Government Code, relating to the official seal of the State Controller.

Referred to Committee on Judiciary.

Assembly Bill No. 680: By Mrs. Niehouse, Messrs. Luckel, and Cramer—An act making an appropriation to be expended pursuant to the Property Acquisition Act for the acquisition of real property for use

as a site for a state office building in the City of San Diego and in furtherance of the postwar building program.

Referred to Committee on Governmental Efficiency and Economy.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 22, 1947

MR. SPEAKER: Your Committee on Rules, to which was referred:

Assembly Bill No. 550

Has had the same under consideration, and reports the same back with the recommendation: Do pass.

DICKEY, Chairman

REQUEST FOR UNANIMOUS CONSENT

Mr. Wollenberg asked for, and was granted, unanimous consent to take up Assembly Bill No. 550, at this time, without reference to file.

CONSIDERATION OF ASSEMBLY BILL NO. 550

Assembly Bill No. 550—An act to amend Section 3411 of the Public Resources Code, relating to estimates for support of the Division of Oil and Gas, Department of Natural Resources, from the Petroleum and Gas Fund, declaring the urgency thereof to take effect immediately.

Bill read second time.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Wollenberg:

Resolved, That Assembly Bill No. 550 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, considered engrossed, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, M. Philip Davis, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—73.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 550—An act to amend Section 3411 of the Public Resources Code, relating to estimates for support of the Division of Oil and Gas, Department of Natural Resources, from the Petroleum and Gas Fund, declaring the urgency thereof to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, M. Philip Davis, Dickey, Clayton A. Dills, Dolwig,

Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—73.

NOES—None.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, M. Philip Davis, Dickey, Clayton A. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—73.

NOES—None.

Bill ordered transmitted to the Senate.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 681: By Messrs. Geddes and Dunn—An act to add Section 6018 to the Revenue and Taxation Code, relating to the sales and use taxes.

Referred to Committee on Revenue and Taxation.

Referred to Committee on Education.

RESOLUTIONS

The following resolution was offered:

By Messrs. Price and Hinckley:

House Resolution No. 47

Relative to Leroy A. Weller

WHEREAS, The Members of this Assembly have learned with great regret of the death of Leroy A. Weller in Upland, California, on January 19, 1947; and

WHEREAS, Leroy A. Weller had long held a place of leadership in his community, holding office in numerous enterprises, including the office of Vice President and Pacific Coast Manager of Garrett & Co., President of the Italian Vineyard Co., Director of the California Wine Institute, and others; and

WHEREAS, He was well known throughout the State of California, and his death will be felt as a great loss by all his friends and associates and the people of his community; now, therefore, be it

Resolved by the Assembly of the State of California, That when this Assembly this day adjourns it do so out of respect to the memory of Leroy A. Weller; and be it further

Resolved, That the Chief Clerk of the Assembly is requested to transmit suitably prepared copies of this resolution, as an expression of the sympathy of the members of this Assembly, to the family of Leroy A. Weller; to his widow, Mrs. Emily Weller, and to his son, Leroy A. Weller, Jr.

Request for Unanimous Consent

Mr. Price asked for, and was granted, unanimous consent to take up House Resolution No. 47, at this time, without reference to committee or file.

Resolution read, and adopted.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bill was introduced, and read the first time:

Assembly Bill No. 686: By Messrs. Butters, Clarke, Erwin, Heisinger, Hinton, Loomis, Lowrey, Stewart, and Thorp—An act to add Section 21189 to the Water Code, relating to irrigation districts, declaring the urgency of this act, to take effect immediately.

Without reference to committee.

Motion to Place Rush Order on Printing of Assembly Bill No. 686

Mr. Butters moved that a rush order be placed upon the printing of Assembly Bill No. 686.

Motion carried.

Assembly Bill No. 687: By Messrs. Wollenberg, Maloney, Geddes, Hollibaugh, Knight, and Stewart—An act to amend Section 10302 of the Education Code, relating to courses of study in the elementary schools.

Referred to Committee on Education.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 22, 1947

MR. SPEAKER: Your Committee on Rules, to which were referred:

Assembly Concurrent Resolution No. 28
House Resolution No. 41
Senate Concurrent Resolution No. 8
Senate Concurrent Resolution No. 14

Has had the same under consideration, and reports the same back with the recommendation: Be adopted.

DICKEY, Chairman

Above reported resolutions ordered on file for adoption.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 22, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day adopted:

Senate Concurrent Resolution No. 16

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following resolution was read:

Senate Concurrent Resolution No. 16—Relative to making additional funds available to the Legislative Budget Committee, established by Senate Concurrent Resolution No. 3 (Res. Ch. 20, 1945).

Referred to Committee on Rules.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW ASSEMBLY BILLS NOS. 134 AND 135 FROM COMMITTEE

Mr. Crowley asked for, and was granted, unanimous consent that Assembly Bills Nos. 134 and 135 be withdrawn from the Committee on Ways and Means, and placed upon the file for consideration, at this time.

RECOMMENDATION OF THE GOVERNOR

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Assembly Bill No. 134:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, January 21, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN

Assembly Bill No. 134—"An act to amend Sections 3025, 3084, and 3087 of the Welfare and Institutions Code, relating to aid to the needy blind, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Assembly Bill No. 134 as necessary for the immediate preservation of the public peace, health or safety and as an emergency measure

Respectfully submitted

EARL WARREN, Governor

REQUEST FOR UNANIMOUS CONSENT

Mr. Crowley asked for, and was granted, unanimous consent to take up Assembly Bill No. 134. at this time, without reference to file.

CONSIDERATION OF ASSEMBLY BILL NO. 134

Assembly Bill No. 134—An act to amend Sections 3025, 3084, and 3087 of the Welfare and Institutions Code, relating to aid to the needy blind, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr Speaker—76

NOES—None.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M Philip Davis, Debs, Dickey, Clayton A Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr Speaker—76

NOES—None.

Bill ordered transmitted to the Senate.

RECOMMENDATION OF THE GOVERNOR

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Assembly Bill No. 135:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, January 21, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Assembly Bill No. 135—"An act to amend Sections 3420 and 3472 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Assembly Bill No. 135 as necessary for the immediate preservation of the public peace, health or safety and as an emergency measure.

Respectfully submitted.

EARL WARREN, Governor

REQUEST FOR UNANIMOUS CONSENT

Mr. Crowley asked for, and was granted, unanimous consent to take up Assembly Bill No. 135, at this time, without reference to file.

CONSIDERATION OF ASSEMBLY BILL NO. 135

Assembly Bill No. 135—An act to amend Sections 3420 and 3472 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Crowley:

Resolved, That Assembly Bill No. 135 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the second and third times, considered engrossed, and placed upon its passage

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—76.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 135—An act to amend Sections 3420 and 3472 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Bill read second time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—76.

NOES—None.

Assembly Bill No. 135—An act to amend Sections 3420 and 3472 of the Welfare and Institutions Code, relating to aid to partially self-supporting blind residents, increasing the amount thereof, and making an appropriation; and declaring the urgency thereof, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, M Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Holhbaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Rosenthal, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Thurman, Waters, Weber, Wollenberg, and Mr. Speaker—76.

NOES—None.

Bill ordered transmitted to the Senate.

RECESS

At 12 m., on motion of Mr. Dickey, the Assembly recessed until 12.40 p.m.

REASSEMBLED

At 12.40 p.m., the Assembly reconvened.

Hon. Sam L. Collins, Speaker of the Assembly, presiding.

Chief Clerk Arthur A. Ohnimus at the desk.

MOTION TO APPROVE JOURNALS

Upon motion of Mr. Dickey, the Journals for Monday, January 13, 1947; Tuesday, January 14, 1947; Wednesday, January 15, 1947; Thursday, January 16, 1947; and Friday, January 17, 1947, were approved as corrected by the Minute Clerk.

WITHDRAWAL AND RE-REFERENCE OF ASSEMBLY BILL NO. 603 BY UNANIMOUS CONSENT

Mr. Waters asked for, and was granted, unanimous consent that Assembly Bill No. 603 be withdrawn from the Committee on Rules, and re-referred to the Committee on Public Health.

MOTION TO INSTRUCT CHIEF CLERK TO SEE THAT NEEDED CARPENTER WORK BE DONE

Mr. Dickey moved that the Chief Clerk be instructed to see that needed carpenter work is done in the stenographic room.

Motion carried.

ANNOUNCEMENTS

Speaker Collins announced that all members desiring new automobile license plates should see the Sergeant-at-Arms today; and that he will secure said license plates upon the receipt of pink slips and license fees.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

Mr. Knight, on motion of Mr. Stewart.

The following member was granted leave of absence for the day, and desired to waive his per diem:

Mr. Thurman, on motion of Mr. Grunsky.

RESOLUTIONS

The following resolutions were offered:

By Mr. Sam L. Collins:

House Resolution No. 48

Relative to appropriations for the United States Forest Service

WHEREAS, Reports are now current that the present Congress of the United States intends to reduce greatly the amount of appropriations to be made for the United States Forest Service; and

WHEREAS, Such a reduction of appropriation would seriously impair the work of the United States Forest Service in its work of fire suppression, camp ground maintenance, and trail and road maintenance throughout the mountain areas of California; and

WHEREAS, Such impairment of services would result in an increase of fire hazards which might bring about destruction of vast areas of forests by fire, and certainly will greatly reduce the enjoyments to be had from vacation and pleasure trips through these mountains; and

WHEREAS, Such destruction of forest lands and impairment of camping and travel facilities will not only greatly diminish the pleasure and enjoyment which the people of the State of California derive from visiting these mountains, but will result in great economic loss to the State in devastation of rich forest areas and a discouragement of tourist travel in this State; now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly of California hereby memorializes the President and Congress of the United States to continue to provide adequate appropriations for the United States Forest Service to enable that agency to carry on with the greatest effectiveness its work of forest fire prevention and suppression, and the proper maintenance of camp and road facilities throughout the mountain areas of California; and be it further

Resolved, That the Chief Clerk of the Assembly be hereby directed to transmit copies of this resolution to the President of the United States, to the President pro Tempore of the Senate, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States

Resolution read, and referred to the Committee on Rules.

By Mr. Clarke:

House Resolution No. 49

Relating to the San Joaquin Experimental Range

WHEREAS, The San Joaquin Experimental Range of the United States Forest Service, Department of Agriculture, was established in 1935 in the County of Madera, State of California, for the major purposes of: (a) making studies of the proper utilization of natural range through conservation, reseeding, introduction of new species, fertilization, cultivation and management, and (b) making studies of the proper management of livestock on the range; and

WHEREAS, The studies carried on at this station have proved to be and will continue to be of marked benefit to the livestock industry; and

WHEREAS, The studies can be most effectively and efficiently carried out and will best serve the livestock industry by planning full five year programs; now, therefore, be it

Resolved by the Assembly of the State of California, That the President of the United States, the Congress of the United States and the Secretary of Agriculture be memorialized to appropriate additional and adequate funds each five years which funds shall be sufficient for the maintenance of the studies for five year periods; and, be it further

Resolved, That the Chief Clerk of the Assembly is directed to transmit copies of this resolution to the President of the United States, to the President pro Tempore of the Senate of the United States, the Speaker of the House of Representatives, the Secretary of Agriculture and to each Senator and Representative from California in the Congress of the United States.

Resolution read, and referred to the Committee on Rules.

REPORTS OF STANDING COMMITTEES

Committee on Finance and Insurance

ASSEMBLY CHAMBER, SACRAMENTO, January 23, 1947

MR. SPEAKER: Your Committee on Finance and Insurance, to which was referred:

Assembly Bill No. 611

Has had the same under consideration, and reports the same back with the recommendation: Do pass.

GEDDES, Chairman

Above reported bill ordered to second reading.

SECOND READING OF ASSEMBLY BILLS (BY UNANIMOUS CONSENT)

Assembly Bill No. 611—An act to add Article 4 to Chapter 1, Part 3, Division 2, of the Insurance Code, relating to insurance, declaring the urgency thereof, to take effect immediately.

Bill read second time.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS

The following bills were introduced, and read the first time:

Assembly Bill No 703: By Mr. Price—An act to repeal Chapter 5.5 of Division 2 of the Business and Professions Code, relating to dispensing opticians.

Referred to Committee on Public Health.

Dills—An act to amend the title and Sections 1 and 3 of the Judges' Retirement Act, and to amend Sections 2, 4, and 4.5 of the Judges' Retirement Fund Act, relating to the State System for the Retirement of Judges and Justices, and providing for the inclusion of justices of justices' courts of Class A within that system.

Referred to Committee on Judiciary.

Assembly Bill No. 705: By Mr. Ralph C. Dills—An act to amend Section 73b of the Code of Civil Procedure, relating to holding sessions of the superior court in places other than the county seat.

Referred to Committee on Judiciary.

Assembly Bill No. 706: By Mr. Lowrey—An act to provide for the establishment, organization, unification, government and powers of unified community districts, authorizing such districts to levy taxes, and to incur bonded indebtedness for improvements.

Referred to Committee on Municipal and County Government.

Assembly Bill No. 707: By Mr. Burns—An act making an appropriation for the support to the Vocational Education Fund.

Referred to Committee on Education.

Assembly Bill No. 708: By Mr. Burns—An act making an appropriation to the Vocational Education Fund for an apprenticeship training program, to take effect immediately.

Referred to Committee on Education.

Assembly Bill No. 709: By Mr. Burns—An act to amend Section 9162 of the Education Code, relating to vocational education.

Referred to Committee on Education.

Assembly Bill No. 710: By Mr. Erwin—An act to amend Section 19143 of the Education Code, relating to the qualifications of librarians employed by county superintendent of schools.

Referred to Committee on Education.

Assembly Bill No. 711: By Messrs. Thorp, Burns, and Clarke—An act to amend Section 643.2 of the Agricultural Code, relating to milk rooms.

Referred to Committee on Livestock and Dairies.

Assembly Bill No. 712: By Mr. Crowley—An act to amend Section 3082 of the Welfare and Institutions Code, relating to aid to the needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 713: By Mr. Crowley—An act to amend Section 3047 and to add Section 3047.05 to the Welfare and Institutions Code, relating to aid to needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 714: By Messrs. Maloney and Wollenberg—An act to authorize the Department of Finance to acquire surplus housing facilities from the United States of America or any of its agencies for resale to veterans, making an appropriation, and declaring that this act shall take effect immediately.

Referred to Committee on Military Affairs.

Assembly Bill No. 715: By Mr Kilpatrick—An act to add Section 7102.5 to the Welfare and Institutions Code, relating to state inebriate colonies, making an appropriation for the establishment of such colonies, and authorizing the Department of Mental Hygiene to require work of the inmates thereof, and to pay inmates for such work.

Referred to Committee on Public Health.

Assembly Bill No. 716: By Mr. Kilpatrick, Mrs. Niehouse, Messrs. Fletcher, and Bennett—An act to add Part 2, comprising Chapter 1, Sections 4000 to 4225, inclusive, to Division 5 of the Welfare and Institutions Code, relating to aid for needy disabled persons, and making an appropriation therefor.

Referred to Committee on Social Welfare.

Assembly Bill No. 717: By Mr. Kilpatrick—An act to amend Section 2135, and to add Sections 2115.5, 2137.5, 2142.3, 2294, and Article 6.5 to Chapter 5, Division 2 of the Business and Professions Code, relating to the licensing and practice of naturopathic physicians.

Referred to Committee on Public Health.

Assembly Bill No. 718: By Messrs. Crowley, Kilpatrick, and Mrs. Niehouse—An act to add Section 3088.1 to the Welfare and Institutions Code, relating to aid to the needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 719: By Messrs. Crowley, Kilpatrick, and Mrs. Niehouse—An act to add Section 3474.1 to the Welfare and Institutions Code, relating to aid to the partially self-supporting blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 720: By Mr. Kilpatrick and Mrs. Niehouse—An act to add Section 3084.1 to the Welfare and Institutions Code, relating to aid to the needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 721: By Mr. Kilpatrick and Mrs. Niehouse—An act to amend Section 3051 of, and to add Section 3052 to, the Welfare and Institutions Code, relating to the prevention and cure of blindness, and to the powers and duties of the Department of Social Welfare in connection therewith.

Referred to Committee on Social Welfare.

Assembly Bill No. 722: By Mr. Kilpatrick and Mrs. Niehouse—An act to amend Section 3083 of the Welfare and Institutions Code, relating to aid to the needy blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 723: By Mr. Kilpatrick and Mrs. Niehouse—An act to amend Section 3471 of the Welfare and Institutions Code, relating to aid to the partially self-supporting blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 724: By Mr. Kilpatrick—An act to amend Sections 3077, 3080, and 3081 of the Welfare and Institutions Code, relating to applications for aid to the blind, changing the contents thereof, and simplifying the procedures for supplying and filing such applications.

Referred to Committee on Social Welfare.

Assembly Bill No. 725: By Mr. Kilpatrick—An act to add Sections 3078.3 and 3475 to the Welfare and Institutions Code, relating to restoration of aid to the blind after discontinuance thereof.

Referred to Committee on Social Welfare.

Assembly Bill No. 726: By Mr. Kilpatrick—An act to amend Section 3075 of the Welfare and Institutions Code, relating to the rules and regulations of the State Department of Social Welfare pertaining to aid to the blind.

Referred to Committee on Social Welfare.

Assembly Bill No. 727: By Mr. Kilpatrick—An act to add Section 3082.1 to the Welfare and Institutions Code, relating to aid to the blind.

Referred to Committee on Social Welfare.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 742: By Mr. Dickey—An act making an appropriation, relating to the salaries of judges of the Superior Court of Alameda County.

Referred to Committee on Judiciary.

RESOLUTIONS

The following resolution was offered:

By Mr. Dickey:

House Resolution No. 50

Resolved by the Assembly of the State of California, That the Controller be and he hereby is directed to draw his warrant upon the Contingent Fund of the Assembly in favor of the Chief Clerk of the Assembly, and the State Treasurer hereby is directed to pay the same, in the amount of one thousand nine hundred seventy-five dollars ($1,975), said amount being for the purchase of postage stamps to be used by Members of the Assembly for official mail; and be it further

Resolved, That the Chief Clerk be and he hereby is directed to purchase postage stamps in such amounts and denominations, not exceeding one thousand nine hundred seventy-five dollars ($1,975), in the aggregate, as shall be necessary for the use of the Members of the Assembly for official mail; and be it further

Resolved, That the amount of stamps requisitioned by any one Member of the Assembly for official mail shall not exceed the sum of twenty-five dollars ($25).

Resolution read, and referred to the Committee on Rules.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolutions were offered:

Assembly Concurrent Resolution No. 30: By Mr. Debs—Relative to the purchase of aircraft for the Department of Education.

Referred to Committee on Rules.

Assembly Constitutional Amendment No. 11: By Messrs. Kilpatrick, Fletcher, Mrs. Niehouse, Messrs. Bennett, and Hawkins—A resolution to propose to the people of the State of California an amendment to the Constitution of the State by adding Section 38 to Article IV thereof, relating to aid to physically disabled persons.

Referred to Committee on Constitutional Amendments.

RESOLUTIONS

The following resolution was offered:

By Messrs. Allen, Evans, Huyck, Waters, Bennett, Burke, Rosenthal, Thomas, Conrad, Field, Beck, and Hahn:

House Resolution No. 51

Relative to the death of Mrs. Elizabeth Patterson Sawyers von KleinSmid

WHEREAS, The Assembly has felt deep grief upon being informed of the passing of Mrs. Elizabeth Patterson Sawyers von KleinSmid, the wife of Rufus B. von KleinSmid, Chancellor of the University of Southern California, and

WHEREAS, Mrs. von KleinSmid has been an artist, a scholar and a leader in educational activities and has been a source of inspiration to the members of the University of Southern California and to the citizens of this State for more than 20 years; and

WHEREAS, Her passing leaves a place which cannot be filled in the hearts of her family, the members and friends of the University of Southern California, and all who knew her throughout the State; now, therefore, be it

Resolved by the Assembly of the State of California, That it deeply regrets the loss of this inspiring figure from the ranks of our State, and wishes by this resolution to express its profound grief and its sincere sympathy to Dr. von KleinSmid, and to the bereaved family and their many friends; be it further

Resolved, That the adjournment of the Assembly this day be in respect to the memory of Mrs. von KleinSmid, be it further

Resolved, That the Chief Clerk of the Assembly is hereby directed to prepare suitably and to forward copies of this resolution to the members of the bereaved family and to the University of Southern California.

Request for Unanimous Consent

Mr Allen asked for, and was granted, unanimous consent to take up House Resolution No. 51, at this time, without reference to committee or file.

Resolution read, and adopted unanimously.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 743: By Messrs. Price, Clarke, Fletcher, Heisinger, Hollibaugh, Kilpatrick, Lyons, Thomas, Thompson, and Weber—An act to amend Sections 2410, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, and 2425 of, and to add Sections 2412.5, 2413.5, 2413.6, 2417.5, 2417.6, 2417.7, 2419.5, and 2419.6 to, the Labor Code, relating to camps.

Referred to Committee on Judiciary.

Assembly Bill No. 744: By Messrs. Thompson, Crichton, Mrs. Niehouse, Messrs. Burns, Cramer, Kirkwood, and Luckel—An act to amend Section 20452 of the Education Code, relating to the state colleges.

Referred to Committee on Education.

RECOMMENDATION OF THE GOVERNOR

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Assembly Bill No. 403:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, January 22, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Assembly Bill No. 403—"An act making an appropriation in augmentation of the appropriation in Item 249 of the Budget Act of 1945, for compensation benefits to state officers and employees, to take effect immediately."

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Assembly Bill No. 403 as necessary for the immediate preservation of the public peace, health or safety and as an emergency measure.

Respectfully submitted.

EARL WARREN, Governor

CONSIDERATION OF DAILY FILE

THIRD READING OF ASSEMBLY BILLS (BY UNANIMOUS CONSENT)

Assembly Bill No. 403—An act making an appropriation in augmentation of the appropriation in Item 249 of the Budget Act of 1945, for compensation benefits to state officers and employees, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—73.

NOES—None.

Bill ordered transmitted to the Senate.

CONSIDERATION OF ASSEMBLY CONCURRENT RESOLUTION NO. 11

Assembly Concurrent Resolution No. 11—Relative to the continuance of the Joint Committee on Preschool and Primary Training created by Resolutions Chapter No. 60 of the 1946 (1st) Special Session.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—72.

NOES—None.

Resolution ordered transmitted to the Senate.

RE-REFERENCE OF BILLS

By order of the Speaker, the following bill was withdrawn from the file, and re-referred as follows:

Assembly Bill No. 91 re-referred to Committee on Education.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following resolution was offered:

Assembly Joint Resolution No. 15: By Messrs. Kilpatrick, Bennett, Hawkins, McMillan, and Mrs. Niehouse—Relative to memorializing the President and the Congress of the United States to make grants to this State for old age assistance to persons 60 years of age or older.

Referred to Committee on Rules.

REQUEST FOR UNANIMOUS CONSENT

Mr. McCollister asked for, and was granted, unanimous consent to take up Assembly Bill No. 611, at this time, and that the same be considered engrossed.

CONSIDERATION OF ASSEMBLY BILL NO. 611

Assembly Bill No. 611—An act to add Article 4 to Chapter 1, Part 3, Division 2, of the Insurance Code, relating to insurance, declaring the urgency thereof, to take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. McCollister:

Resolved, That Assembly Bill No. 611 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, considered engrossed, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Lowrey, Luckel, Maloney, McCollister, McMillan, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, and Mr. Speaker—67

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 611—An act to add Article 4 to Chapter 1, Part 3, Division 2, of the Insurance Code, relating to insurance, declaring the urgency thereof, to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Boyd, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, Conrad, Cooke, Cramer, Crichton, Lester T. Davis, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Evans, Field, Fletcher, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Huyck, James, Johnson, Kilpatrick, Kirkwood, Lowrey, Luckel, Maloney, McCollister, McMillan, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, and Mr. Speaker—67.

NOES—None.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Bennett, Berry, Blosser, Brown, Burke, Butters, Carey, Clarke, Conrad, Cooke, Cramer, Crichton, Dickey, Clayton A. Dills, Ralph C Dills, Dolwig, Doyle, Dunn, Erwin, Field, Fletcher, Gaffney, Gannon, Geddes, Grunsky, Hahn, Hawkins, Heisinger, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Maloney, McCollister, Niehouse, O'Day, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Thomas, Thompson, Thorp, Waters, Weber, and Wollenberg—56

NOES—Boyd, Collier, Lester T. Davis, M. Philip Davis, Debs, Evans, Hinckley, Lowrey, Luckel, and Stewart—10.

Bill ordered transmitted to the Senate.

MEMBERS EXCUSED TO HOLD MEETING

At 11.45 a.m., Mr. Field asked for, and was granted, unanimous consent that the members of the Committee on Governmental Efficiency and Economy be excused, at this time, for the purpose of holding a meeting to be held in the post office.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 745: By Messrs. Cooke, Thomas, and Hawkins —An act to amend Sections 420 and 421 of the Fish and Game Code, relating to fishing and the issuance of licenses therefor.

Referred to Committee on Fish and Game.

Assembly Bill No. 746: By Mr. Waters—An act to amend Section 5093 of the Business and Professions Code, relating to certified public accountants.

Referred to Committee on Judiciary.

Assembly Bill No. 747: By Messrs. Price, Kilpatrick, Rosenthal, Bennett, Cooke, Hahn, Hinton, Hollibaugh, McMillan, and Mrs. Niehouse —An act to add Section 2042 to the Penal Code, relating to escapes from the California Vocational Institution, and declaring the urgency thereof, to take effect immediately.

Without reference to committee.

Assembly Bill No. 748: By Mr. Hollibaugh—An act to amend Section 3352 and Section 4250 of the Labor Code, relating to agricultural labor under the Workmen's Compensation Insurance Act.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 749: By Messrs. Gannon and Stephenson—An act to amend Section 11b of the Municipal Court Act of 1925, relating to municipal courts in cities of the second and three-eighths class.

Referred to Committee on Judiciary.

Assembly Bill No. 750: By Mr. Ralph C. Dills—An act to amend Section 7d of an act entitled "An act authorizing the establishment of municipal courts, prescribing their constitution, regulation, government, procedure, and jurisdiction, and providing for the election and appointment of the judges, clerks and other attaches of such courts, their terms of office, qualification and compensation and for the selection of jurors therein," approved May 23, 1925, relating to compensation of court reporters in municipal courts in cities of the first and one-half class.

Referred to Committee on Judiciary.

Assembly Bill No. 751: By Mrs. Niehouse, Messrs. Brown, Sheridan, Rosenthal, Allen, Anderson, Bennett, Berry, Brady, Burns, Carey, George D. Collins, Cooke, Cramer, Crichton, Crowley, Lester T. Davis, Debs, Clayton A. Dills, Ralph C. Dills, Doyle, Dunn, Evans, Fletcher, Gaffney, Geddes, Grant, Hahn, Hawkins, Heisinger, Hollibaugh, Johnson, Kilpatrick, Luckel, Lyons, McCollister, McMillan, Miller, O'Day, Robertson, Thomas, and Weber—An act to amend Sections 2000, 2020,

2186, and 2187 of the Welfare and Institutions Code, to amend the chapter heading of Chapter 1 of Division 3 thereof, to amend and renumber Section 2021.001 thereof to be Section 2021, to add Sections 2000.1, 2000.2, 2019, 2020.1, and 2020.2 thereto, and to repeal Sections 2021, 2021.01, 2025, and 2187.01 thereof, relating to aid to the aged, designating such aid as senior citizens grants, increasing the amount thereof and providing for funeral benefits and health services for recipients thereof, modifying property and income qualifications therefor, and making an appropriation.

Referred to Committee on Social Welfare.

Assembly Bill No. 752: By Mr. Crowley—An act to add Chapter 13, comprising Sections 7750 to 7901, inclusive, to Division 3 of the Business and Professions Code relating to the licensing and regulation of dance instructors, creating a State Dance Instructors Board and prescribing its powers and duties and providing penalties for violation of this act.

Referred to Committee on Governmental Efficiency and Economy.

WITHDRAWAL AND RE-REFERENCE OF ASSEMBLY BILLS NOS. 3 AND 23

Mr. Berry moved that Assembly Bills Nos. 3 and 23 be withdrawn from the Committee on Industrial Relations, and re-referred to the Committee on Public Utilities.

Motion carried.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW ASSEMBLY BILL NO. 374 FROM COMMITTEE

Mr. Allen asked for, and was granted, unanimous consent that Assembly Bill No. 374 be withdrawn from the Committee on Ways and Means, for consideration, at this time.

RECOMMENDATION OF THE GOVERNOR

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the passage of Assembly Bill No. 374:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO 14, January 21, 1947

To the Honorable Members of the Assembly
Sacramento, California

GENTLEMEN:

Assembly Bill No. 374—"An act making appropriation to the Attorney General for appearing as counsel for the Indians of the State of California before the Indian Claims Commission, declaring the urgency thereof, to take effect immediately."

in my opinion constitutes an emergency bill within the meaning of that term as used in Sections 1 and 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

I therefore recommend consideration of Assembly Bill No. 374 as necessary for the immediate preservation of the public peace, health or safety and as an emergency measure.

Respectfully submitted.

EARL WARREN, Governor

REQUEST FOR UNANIMOUS CONSENT

Mr. Allen asked for, and was granted, unanimous consent to take up Assembly Bill No. 374, at this time.

CONSIDERATION OF ASSEMBLY BILL NO. 374

Assembly Bill No. 374—An act making appropriation to the Attorney General for appearing as counsel for the Indians of the State of California before the Indian Claims Commission, declaring the urgency thereof, to take effect immediately

Bill read second time.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Allen:

Resolved, That Assembly Bill No. 374 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the third time, considered engrossed, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Assembly Bill No. 374—An act making appropriation to the Attorney General for appearing as counsel for the Indians of the State of California before the Indian Claims Commission, declaring the urgency thereof, to take effect immediately.

Bill read third time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Caldecott, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, Crowley, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Doyle, Dunn, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Knight, Loomis, Lowrey, Luckel, Lyons, Maloney, McMillan, Miller, Niehouse, O'Day, Price, Robertson, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—71.

NOES—None.

The roll was called, and the bill passed by the following vote:

Dills, Doyle, Dunn, Fletcher, Hawkins, Kilpatrick, Lowrey, Lyons, McMillan, Miller, O'Day, Robertson, Rosenthal, and Thomas—An act to amend Section 2160 of the Welfare and Institutions Code, relating to aid to the aged.

Referred to Committee on Social Welfare.

Assembly Bill No. 758: By Mr. Miller—An act to amend Section 2.6 of the Planning Act, relating to members of the commission, and their compensation.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 759: By Mr. Miller—An act to amend Section 259 of, and to add Sections 259.1 and 259.2 to, the Probate Code, relating to inheritance rights of aliens.

Referred to Committee on Judiciary.

Assembly Bill No. 760: By Messrs. Thompson and Kirkwood—An act to provide for the relocation of a portion of State Highway Route 5 in Santa Clara County, and making an appropriation therefor.

Referred to Committee on Conservation and Planning.

Assembly Bill No. 761: By Mr. Maloney—An act to repeal the War Production Act, relating to employment and working conditions of female employees and to all permits issued thereunder.

Referred to Committee on Industrial Relations.

Assembly Bill No. 762: By Messrs. Lowrey, Lester T. Davis, Heisinger, Clarke, Cooke, Hinckley, Hinton, and Silliman—An act to

amend Section 9084 and to repeal Section 9087 of the Insurance Code, relating to fraternal fire insurance.

Referred to Committee on Finance and Insurance.

Assembly Bill No. 763: By Mr. M. Philip Davis—An act to amend Sections 11 and 11d of the Municipal Court Act of 1925, relating to municipal courts and the attaches of said courts.

Referred to Committee on Judiciary.

Assembly Bill No. 764: By Messrs. Stanley, Grant, and Robertson —An act to add Chapter 16.7 to Division 3 of the Business and Professions Code, relating to motor boat safety, the inspection of motor boats by marine surveyors licensed by the Yacht and Ship Brokers Commissioner, providing for proof of ability to respond in damages for injury or death resulting from motor boats, providing for permits for motor boats, and making an appropriation.

Referred to Committee on Transportation and Commerce.

Assembly Bill No. 765: By Messrs. Stanley and Grant—An act making an appropriation for the purpose of enforcing the Motor Boat Safety Act.

Referred to Committee on Transportation and Commerce.

Assembly Concurrent Resolution No. 31: By Mr. Stewart—Relative to the continuance of the Joint Committee on the Housing Emergency.

Referred to Committee on Rules.

RESOLUTIONS

The following resolutions were offered:

By Mr. Doyle:

House Resolution No. 52

Relative to installing a fluorescent lighting system

WHEREAS, The present lighting system in the Assembly Chamber produces glare and is productive of considerable heat, now, therefore, be it

Resolved by the Assembly of the State of California, That the Superintendent of Buildings and Grounds is hereby directed during the recess of the present general session, pursuant to Section 2 of Article IV of the Constitution, to replace the present lighting system in the Assembly Chamber with a modern fluorescent lighting system; and be it further

Resolved, That the Controller be, and he is hereby, authorized to draw his warrant in the sum of _____ dollars ($_____), or so much thereof as may be necessary, from the Contingent Fund of the Assembly, for the expenses of the Superintendent of Buildings and Grounds in carrying out the provisions of this resolution

Resolution read, and referred to the Committee on Rules.

By Mr. Anderson:

House Resolution No. 53

Relative to need for adequate legislative offices in the State Capitol

WHEREAS, The State Capitol was planned to furnish suitable chambers for the holding of the sessions of the Senate and Assembly, adequate meeting places for their committees, and suitable offices, conveniently situate, for the use of their members, officers and legislative aids; and

WHEREAS, Over the years the space requirements for these several purposes have greatly expanded with no corresponding expansion in the size, arrangement location or suitability of allotment of space, especially in respect to offices for members and officers, particularly including the Speaker and Chief Clerk of the Assembly and

the President, President pro Tempore and Secretary of the Senate, and for the safekeeping of the official records of the houses, and suitable working quarters, appropriately located, for the several legislative aids, including the Legislative Counsel, the Legislative Auditor and the Legislative Bill Room; and

WHEREAS, It would appear that this situation is susceptible to substantial improvement by removal of various units of the executive branch of the State Government that do not need to be in the State Capitol for their proper and adequate functioning, and reallotment, for legislative use, of the space that would thus be made available, without waiting for the completion of plans and the awarding of contracts for, and the construction of an annex to the State Capitol; and

WHEREAS, The need for immediate action is pressing and urgent if the Legislature is to discharge in full its responsibilities toward the people of the State; now, therefore, be it

Resolved, by the Assembly of the State of California, As follows:

1. The Assembly Committee on Legislative Offices in the State Capitol is hereby created, authorized and directed to ascertain, study and analyze all facts bearing upon any of the subjects mentioned in the recitals of this resolution, and to do all things necessary to effect an immediate improvement in the allocation and arrangement of legislative quarters, bringing these needs forthwith to the attention of the State Director of Finance and collaborating with him and with any similar committee of the Senate in carrying out the objects and purposes of this resolution.

2. The committee consists of the Speaker, the Chairman of the Committee on Rules, and three Members of the Assembly appointed by the Speaker.

3. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

5. The committee shall report to the Assembly from time to time during this session of the Legislature, including in the reports its recommendations as to needed legislation on this subject.

Resolution read, and referred to the Committee on Rules.

MESSAGES FROM THE SENATE

SENATE CHAMBER, SACRAMENTO, January 23, 1947

MR. SPEAKER: I am directed to inform your honorable body that the Senate on this day passed:

Senate Bill No. 154
Senate Bill No. 155

J. A. BEEK, Secretary of the Senate
By C. V. TAYLOR, Assistant Secretary

FIRST READING AND REFERENCE OF SENATE BILLS

The following bill was read the first time:

Senate Bill No. 154—An act making an appropriation for the contingent expenses of the Senate, without regard to fiscal years, including committee expenses, to take effect immediately.

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up Senate Bill No. 154, at this time, without reference to committee or file.

CONSIDERATION OF SENATE BILL NO. 154

Senate Bill No. 154—An act making an appropriation for the contingent expenses of the Senate, without regard to fiscal years, including committee expenses, to take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Dickey:

Resolved, That Senate Bill No. 154 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the second and third times, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—69

NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Senate Bill No. 154—An act making an appropriation for the contingent expenses of the Senate, without regard to fiscal years, including committee expenses, to take effect immediately.

Bill read second time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—69.

NOES—None.

Senate Bill No. 154—An act making an appropriation for the contingent expenses of the Senate, without regard to fiscal years, including committee expenses, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—69.

NOES—None.

Bill ordered transmitted to the Senate.

FIRST READING AND REFERENCE OF SENATE BILLS (RESUMED)

The following bill was read the first time:

Senate Bill No. 155—An act making an appropriation for mileage of the members and officers of the Senate, without regard to fiscal years, to take effect immediately.

Resolution to Suspend Constitutional Provision

The following resolution was offered:

By Mr. Dickey:

Resolved, That Senate Bill No. 155 presents a case of urgency, as that term is used in Article IV, Section 15, of the Constitution, and the provision of that section requiring that the bill be read on three several days in each house is hereby dispensed with, and it is ordered that said bill be read the second and third times, and placed upon its passage.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—69.
NOES—None.

Article IV, Section 15, of the Constitution was declared suspended.

Senate Bill No. 155—An act making an appropriation for mileage of the members and officers of the Senate, without regard to fiscal years, to take effect immediately.

Bill read second time.

Urgency Clause

Urgency clause read, and adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—69.
NOES—None

Senate Bill No. 155—An act making an appropriation for mileage of the members and officers of the Senate, without regard to fiscal years, to take effect immediately.

Bill read third time.

The roll was called, and the bill passed by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Boyd, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Ralph C. Dills, Dolwig, Doyle, Erwin, Evans, Field, Fletcher, Gaffney, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Lyons, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Stewart, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—69.
NOES—None.

Bill ordered transmitted to the Senate.

REQUEST FOR UNANIMOUS CONSENT TO WITHDRAW ASSEMBLY BILL NO. 21 FROM COMMITTEE

Mr. M. Philip Davis asked for, and was granted, unanimous consent that Assembly Bill No. 21 be withdrawn from the Committee on Judiciary for purpose of amendment, at this time.

CONSIDERATION OF ASSEMBLY BILL NO. 21 (BY UNANIMOUS CONSENT)

Assembly Bill No. 21—An act to amend Section 1054 of the Code of Civil Procedure, relating to extensions of time.

Bill read second time.

Motion to Amend

Mr. M. Philip Davis moved the adoption of the following amendment:

Amendment No. 1

On page 2 of the printed bill, after line 32, insert

"SEC. 3. This act is hereby declared to be an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Section 1 of Article IV of the Constitution and shall therefore go into immediate effect. A statement of the facts constituting such necessity is as follows:

The demands of the Legislature upon the time of its members in this critical period when many important measures require full and careful consideration render it impossible for lawyer members to protect fully the interests of their clients. In order that these clients be fully protected in their legal rights until the members can return to their practices and safeguard the rights of clients, it is necessary that this act take effect immediately."

Amendment read, and adopted.

Bill ordered reprinted, and engrossed.

Motion to Place Rush Order on Printing of Assembly Bill No. 21

Mr. M. Philip Davis moved that a rush order be placed upon the printing of Assembly Bill No. 21.

Motion carried.

INTRODUCTION, FIRST READING, AND REFERENCE OF ASSEMBLY BILLS (RESUMED)

The following bills were introduced, and read the first time:

Assembly Bill No. 766: By Mr. Geddes—An act to add Section 6703 to the Education Code, relating to the establishment of a policy respecting the reorganization of school districts.

Referred to Committee on Education.

Assembly Bill No. 767: By Mr. Geddes—An act to amend Sections 4901, 4902, 4913, 4914, 4915, and 4953 of the Education Code, and to add Section 4912.1 to said code, all relating to the reorganization of school districts.

Referred to Committee on Education.

Assembly Bill No. 768: By Mr. Geddes—An act to amend Section 4919 of the Education Code, relating to elections for the reorganization of school districts.

Referred to Committee on Education.

Assembly Bill No. 769: By Mr. Geddes—An act to amend Section 6357 of the Education Code, relating to rates of school district tax.

Referred to Committee on Revenue and Taxation.

Assembly Joint Resolution No. 16: By Messrs. Allen, McCollister, Dolwig, James, Conrad, Cooke, Cramer, Dickey, Doyle, Grunsky, Hahn, Hinton, Hollibaugh, Huyck, Luckel, McMillan, and Waters—Relative

to the procurement of Federal surplus property for the Veterans' Home of California.

Referred to Committee on Rules.

REPORTS OF STANDING COMMITTEES

Committee on Rules

ASSEMBLY CHAMBER, SACRAMENTO, January 23, 1947

MR. SPEAKER: Your Committee on Rules, to which were referred:

Assembly Joint Resolution No. 12
House Resolution No. 34-A
House Resolution No. 45
Senate Concurrent Resolution No. 16

Has had the same under consideration, and reports the same back with the recommendation: Be adopted.

DICKEY, Chairman

Assembly Joint Resolution No. 12 ordered engrossed.

House Resolutions Nos. 34-A and 45 and Senate Concurrent Resolution No. 16 ordered on file for adoption.

REQUEST FOR UNANIMOUS CONSENT

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 45, at this time, without reference to file, for purpose of amendment.

CONSIDERATION OF HOUSE RESOLUTION NO. 45

House Resolution No. 45

Resolved, That a Committee of Five be appointed by the Chairman of the Committee on Rules, to investigate the cost of brief cases and the possibility of securing the same, for the Members of the Assembly.

Resolution read.

Motion to Amend

Mr. Dickey moved the adoption of the following amendment:

Amendment No. 1

At the end of the resolution insert

"*Resolved*, That the Select Committee of the Rules Committee, appointed to investigate the cost of brief cases to be used by the Members of the Assembly, be and it is hereby authorized and directed to purchase such number of brief cases as may be necessary to supply one case to each Member of the Assembly requesting the same."

Amendment read, and adopted.

Request for Unanimous Consent

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 45, as amended, at this time.

Consideration of House Resolution No. 45, as Amended

House Resolution No. 45

Resolved, That a Committee of Five be appointed by the Chairman of the Committee on Rules, to investigate the cost of brief cases and the possibility of securing the same, for the Members of the Assembly.

Resolved, That the Select Committee of the Rules Committee, appointed to investigate the cost of brief cases to be used by the Members of the Assembly, be and it is hereby authorized and directed to purchase such number of brief cases as may be necessary to supply one case to each Member of the Assembly requesting the same.

Resolution read, as amended, and adopted.

REQUEST FOR UNANIMOUS CONSENT

Mr. Dickey asked for, and was granted, unanimous consent to take up House Resolution No. 34-A, at this time, without reference to file.

CONSIDERATION OF HOUSE RESOLUTION NO. 34-A

House Resolution No. 34-A

WHEREAS, The work in the Legislative Bill Room will be greatly facilitated and expedited by the addition of addressograph equipment; and

WHEREAS, Cost of this equipment will be more than saved in the speed with which legislative printed matter is handled for distribution for the Legislature and a great saving in time thereby accomplished; and

WHEREAS, Half the cost of this equipment will be met by the Senate; now, therefore, be it

Resolved by the Assembly of the State of California, That the Controller be and he is hereby authorized and directed to draw his warrant upon the Contingent Fund of the Assembly in the sum of one thousand twenty dollars and seventy-five cents ($1,020.75) in favor of the State Printer for the purchase of addressograph equipment for the Legislative Bill Room and the Treasurer is hereby directed to pay the same.

Resolution read.

The roll was called, and the resolution adopted by the following vote:

AYES—Allen, Anderson, Beck, Bennett, Berry, Blosser, Brady, Brown, Burke, Burns, Butters, Carey, Clarke, Collier, George D. Collins, Conrad, Cooke, Cramer, Crichton, M. Philip Davis, Debs, Dickey, Clayton A. Dills, Ralph C. Dills, Dolwig, Erwin, Evans, Field, Gaffney, Gannon, Geddes, Grant, Grunsky, Hahn, Hawkins, Heisinger, Hinckley, Hinton, Hollibaugh, Huyck, James, Johnson, Kilpatrick, Kirkwood, Loomis, Lowrey, Luckel, Maloney, McCollister, McMillan, Niehouse, Price, Robertson, Rosenthal, Sheridan, Sherwin, Silliman, Stanley, Stephenson, Thomas, Thompson, Thorp, Waters, Weber, Wollenberg, and Mr. Speaker—66.

NOES—None

REQUEST FOR UNANIMOUS CONSENT

Mr. Evans asked for, and was granted, unanimous consent to take up House Resolution No 34, at this time, without reference to file, for purpose of amendment.

CONSIDERATION OF HOUSE RESOLUTION NO. 34

House Resolution No. 34

Relating to the creation of a Committee to Investigate Traffic and Parking Conditions in the City of Los Angeles

WHEREAS, The extensive use of motor transportation in the City of Los Angeles has produced traffic and parking conditions of major importance to that part of the State; and

WHEREAS, The future development of the City of Los Angeles industrially, commercially, and residentially demands a solution of the traffic and parking problem; and

WHEREAS, The safety of thousands of persons is daily endangered by the density of the traffic in the City of Los Angeles and by the contribution thereto from lack of parking space; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1. The Los Angeles Traffic and Parking Committee is hereby created and authorized and directed to ascertain, study and analyze all facts relating to traffic and parking in the City of Los Angeles, the means of promoting safety with respect thereto, and additional streets and parking places in the City of Los Angeles, including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Assembly, including in the reports its recommendations for appropriate legislation.

2. The committee shall consist of _____ Members of the Assembly appointed by the Speaker thereof. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

3. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment.

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

5. The committee has the following additional powers and duties:

(a) To select a chairman and a vice chairman from its membership.

(b) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purposes for which it is created.

(c) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(d) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than the tenth legislative day

following the reassembling of the Legislature after the recess of this session required by Section 2 of Article IV of the Constitution.

(e) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6 The sum of one thousand five hundred dollars ($1,500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said contingent fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read.

Motion to Amend

Mr. Evans moved the adoption of the following amendment:

Amendment No. 1

In line 1 of paragraph "2", of the resolution, strike out the blank, and insert "three".

Amendment read, and adopted.

Request for Unanimous Consent

Mr. Evans asked for, and was granted, unanimous consent to take up House Resolution No. 34, as amended, at this time.

Consideration of House Resolution No. 34, as Amended

House Resolution No. 34

Relating to the creation of a Committee to Investigate Traffic and Parking Conditions in the City of Los Angeles

WHEREAS, The extensive use of motor transportation in the City of Los Angeles has produced traffic and parking conditions of major importance to that part of the State; and

WHEREAS, The future development of the City of Los Angeles industrially, commercially, and residentially demands a solution of the traffic and parking problem; and

WHEREAS, The safety of thousands of persons is daily endangered by the density of the traffic in the City of Los Angeles and by the contribution thereto from lack of parking space; now, therefore, be it

Resolved by the Assembly of the State of California, As follows:

1 The Los Angeles Traffic and Parking Committee is hereby created and authorized and directed to ascertain, study and analyze all facts relating to traffic and parking in the City of Los Angeles, the means of promoting safety with respect thereto, and additional streets and parking places in the City of Los Angeles, including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution, and to report thereon to the Assembly, including in the reports its recommendations for appropriate legislation

2. The committee shall consist of three Members of the Assembly appointed by the Speaker thereof. Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power

3. The committee is authorized to act during this session of the Legislature, including any recess, but not after final adjournment

4. The committee and its members shall have and exercise all of the rights, duties and powers conferred upon investigating committees and their members by the provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly as they are adopted and amended from time to time, which provisions are incorporated herein and made applicable to this committee and its members.

5 The committee has the following additional powers and duties:

(a) To select a chairman and a vice chairman from its membership

(b) To contract with such other agencies, public or private, as it deems necessary for the rendition and affording of such services, facilities, studies and reports to the committee as will best assist it to carry out the purposes for which it is created

(c) To cooperate with and secure the cooperation of county, city, city and county, and other local law enforcement agencies in investigating any matter within the scope of this resolution and to direct the sheriff of any county to serve subpenas, orders and other process issued by the committee.

(d) To report its findings and recommendations to the Legislature and to the people from time to time and at any time, not later than the tenth legislative day following the reassembling of the Legislature after the recess of this session required by Section 2 of Article IV of the Constitution

(e) To do any and all other things necessary or convenient to enable it fully and adequately to exercise its powers, perform its duties, and accomplish the objects and purposes of this resolution.

6. The sum of one thousand five hundred dollars ($1,500) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer.

Resolution read, as amended.

CONSIDERATION OF DAILY FILE

CONSIDERATION OF HOUSE RESOLUTION NO. 38

House Resolution No. 38

Relative to the continuance of the Assembly Committee on Soil Conservation created by House Resolution No. 51 of the Fifty-sixth Regular Session

Resolved by the Assembly of the State of California, As follows:

1. The Assembly Committee on Soil Conservation created by House Resolution No. 51 of the Fifty-sixth Regular Session is continued as an Assembly committee at this general session, with the membership and with all the rights, powers and duties possessed by the committee and its members immediately prior to the commencement of this session Vacancies occurring or existing in the membership of the committee shall be filled by the appointing power.

2. The committee is authorized to act during this session of the Legislature including any recess, but not after March 15, 1947.

3 The provisions of the Joint Rules of the Senate and Assembly and of the Standing Rules of the Assembly, as soon as such rules are adopted at this session or amended from time to time, become applicable to this committee and its members.

4 The sum of seven hundred fifty dollars ($750) or so much thereof as may be necessary is hereby made available from the Contingent Fund of the Assembly for the expenses of the committee and its members and for any charges, expenses or claims it may incur under this resolution, to be paid from the said Contingent Fund and disbursed, after certification by the chairman of the committee, upon warrants drawn by the State Controller upon the State Treasurer

Resolution read.

The roll was called, and the resolution adopted by the following vote:

NOES—None

CONSIDERATION OF HOUSE RESOLUTION NO. 41

House Resolution No. 41

Relative to inclusion in the Budget Bill of an item providing funds for automobiles for the California Highway Patrol

WHEREAS, The enormous increase of traffic on the highways of the State during the last few years has rendered the enforcement of the traffic laws more difficult; and

WHEREAS, The hazards in connection with the use of motorcycles by members of the California Highway Patrol have increased, and use of motorcycles for such purposes, except in certain specific locations, such as vehicular crossings, is unnecessary and extremely dangerous; and

WHEREAS, Sufficient funds should be provided the California Highway Patrol for the purchase and equipping of automobiles for patrol of the highways to replace motorcycles; now, therefore, be it

Resolved by the Assembly of the State of California, That the Governor is requested to include in the Budget Bill an item providing sufficient funds for the purchase and equipping of additional automobiles for the use of the California Highway Patrol in traffic law enforcement to replace motorcycles not needed in special locations; and be it further

Resolved, That the Chief Clerk of the Assembly transmit a copy of this resolution to the Governor, to the Director of Motor Vehicles and to the Chief of the California Highway Patrol.

Resolution read, and adopted.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 10

Senate Concurrent Resolution No. 10—Relative to the continuance of the Joint Fact-Finding Committee on Un-American Activities created by Resolutions Chapter No. 143 of the Fifty-sixth Regular Session.

Resolution read.

Consideration of Senate Concurrent Resolution No. 10 passed temporarily.

CONSIDERATION OF SENATE CONCURRENT RESOLUTION NO. 8

Speaker Collins announced the appointment of Mr. Stewart as a member of the Committee of Revenue and Taxation, vice Mr. Boyd.

ANNOUNCEMENTS

Mr. Cooke announced that a dinner will be held tonight for all Democratic Members of the Assembly, at 6 p.m., in Room 221, of the Hotel Senator, and urged attendance.

Mr. Dickey announced that a dinner will be held for all Republican Members of the Assembly on next Tuesday evening, January 28, 1947. The time and place will be announced later.

ANNOUNCEMENT OF COMMITTEE MEETINGS

It was announced that the following committees would hold committee meetings:

At 8 p.m., tonight:

Revenue and Taxation

At 9 30 a.m , tomorrow, Friday, January 24:

Rules

GUESTS EXTENDED PRIVILEGE OF ASSEMBLY FLOOR

On request of Mr. Stephenson, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to T. V. Anderson, teacher of the Sacramento Seventh Day Adventist's School and the following pupils: Gerald D. Pierce, Glenn Scott, Benjamin Hale, Hale Kuhlman, Bill Uyeyama, Gene Wilson, Clarence Perkins, Jack Uyeyama, Evelyn Fees, Dale Marshall, Doris Aldred, Ida Grace Aldred, Carlene Rae Detsch, and June Lammerding.

On request of the San Francisco Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Dr. J. Paul Leonard of San Francisco.

On request of Messrs. Price, Gannon, and Stephenson, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Squire Howell of Ontario.

On request of Messrs. Huyck and Wollenberg, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Mr. and Mrs. Jerry Horwin of Beverly Hills and Adolph Judell of San Francisco.

On request of Mr. Brown, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Harvey Hastain, former Assemblyman, of El Centro, and William Silva of Modesto.

On request of Mr. Carey and the Alameda Delegation, the privilege of the floor of the Assembly Chamber for this day was unanimously extended to Albert Morris of Oakland and Eddie Burns of San Francisco.

REQUEST FOR UNANIMOUS CONSENT TO PRINT REPORT

Mr. Debs asked for, and was granted, unanimous consent that the following Report of the Joint Interim Committee on Aviation be ordered printed in the Journal:

REPORT OF JOINT INTERIM COMMITTEE ON AVIATION

LETTER OF TRANSMITTAL

CALIFORNIA LEGISLATURE, STATE CAPITOL
SACRAMENTO, CALIFORNIA, January 24, 1947

Honorable Goodwin J. Knight
President of the Senate of California
State Capitol, Sacramento, California

Honorable Sam L. Collins
Speaker of the Assembly of California
State Capitol, Sacramento, California

The Joint Interim Committee on Aviation, created by Resolution Chapter 62 of the Statutes of the First Extraordinary Session of the Fifty-sixth Legislature (1946), submits herewith its preliminary report. Membership of the committee consisted of Senators Charles Brown, R. R. Cunningham, Jesse M. Mayo, James J. McBride, Harold J. Powers, Byrl R. Salsman, and Ralph E. Swing, Members of the Senate; and Messrs. Everett G. Burkhalter, Sam L. Collins, James G. Crichton, Ernest E. Debs, Lester A. McMillan, Harold F. Sawallisch, and Frank J. Waters, Members of the Assembly.

The chapter creating the committee directed it to ascertain, study and analyze all facts relating to the regulation and taxation of air carriers and the financing of airports in California, and matters incidental thereto, including all facts relating to the aviation industry from the standpoint of operation, and including the needs of the people of the State for the location, establishment, construction and improvement of airports and other landing facilities, including but not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or relating to the subject of the resolution creating the committee and to report thereon to the Legislature, including in the report its recommendation for appropriate legislation.

The committee in the time and with the resources available to it visited 43 communities in this State to study at first hand the aviation

and airport problems thereof and to discuss future plans with the individual citizens in the community. In addition, the committee held public hearings in Sacramento, San Francisco, Los Angeles, and San Diego for the purpose of obtaining information and recommendations from all interested persons, including airline representatives, public and private airport representatives, and public officials concerned with the planning and taxation aspects of aviation.

The committee desires to record its appreciation to all of the individuals who appeared before it and cooperated with it.

Respectfully submitted,

ERNEST E. DEBS, *Chairman*
LESTER A. MCMILLAN
SAM L. COLLINS
J. G. CRICHTON
HAROLD J. POWERS
R. R. CUNNINGHAM
JESSE M. MAYO
HUGH M. BURNS
BYRL R SALSMAN
JAMES J. MCBRIDE
CHARLES BROWN

RECOMMENDATIONS

Pursuant to the mandate contained in the resolution creating it, and on the basis of the study made by it, the Joint Interim Committee on Aviation recommends that the following legislation be enacted at the Fifty-seventh General Session of the Legislature:

(a) Legislation creating a state aviation agency headed by a commission, and director serving thereunder, and having general supervision over aeronautics in California, empowered to encourage, foster, and assist the development of aeronautics in California and to encourage the establishment of airports. The agency should be authorized to cooperate with and assist the Federal Government, the municipalities of this State, and other persons in the development of aeronautics and to seek to coordinate the aeronautical activities of these bodies and persons. Authority should be given to municipalities to cooperate with the commission in the development of aeronautics and aeronautics facilities in this State. The legislation prepared by the committee is based upon the State Aeronautics Commission or Department Act sponsored by the National Association of Aviation Officials, but modified to suit conditions found to exist in California.

(b) Legislation providing for the support of the state aviation agency out of an appropriation from the State General Fund.

(c) Legislation providing for state channeling of federal airport funds through the state aviation agency based on an act prepared by the Council of State Governments and the National Association of State Aviation Officials.

(d) Legislation requiring carriers of intrastate air commerce to obtain certificates of public convenience and necessity from the Public Utilities Commission but requiring the issuance of such certificates automatically to existing carriers and also legislation expressly making intrastate air tariffs subject to regulation by the commission.

(e) Legislation respecting airspace surrounding airports, based on a model act prepared by the Civil Aeronautics Administration of the Department of Commerce and the National Institute of Municipal Law Officers. Because of the constitutional problem involved, discussed in the memorandum of Mr. Harold W. Kennedy, County Counsel of the County of Los Angeles, entitled "Local Control of Airports and Aviation," a copy of which is appended to this report, the legislation proposed in this regard is tentative only, the committee desiring to give this problem further consideration and if possible, to formulate a more comprehensive plan in the light of such consideration.

(f) Legislation authorizing the State, counties, cities, and other political subdivisions to establish, acquire, develop, and operate airports and other air navigation facilities, to obtain the full benefit of financial assistance made available by the Federal Government under the Federal Airport Act as well as assistance from other sources. The legislation prepared by the committee is based upon the Revised Uniform Airports Act adopted and recommended to the state legislatures by the National Association of State Aviation Officials.

CHAPTER 1. INTRODUCTION

The tremendous growth of aviation, the physical evidences of which are apparent to all, has produced in no state a greater total effect than in California. Consider these figures of the Civil Aeronautics Board as presented to your committee: As to originating revenue, California is first among the states, having 20.74 percent, New York being second with 11.96 percent. In revenue ton miles, California is first with 8.99 percent, and Texas is second with 8.19 percent. On originating-terminating tonnage New York is first with 13.19 percent and California second with 10.66 percent. With respect to arrivals and departures, Texas is first with 9.79 percent, and California is second with 8.57 percent. On ground pay rolls, New York is substantially ahead due to the large administrative offices in that state, having 20.84 percent and California is second with 10.29 percent.

In 1944, according to a Civil Aeronautics survey there were 18,000 private aircraft in use in the United States, 1,700 of which were in California. On October 15, 1946, there were 71,986 private aircraft in the United States, 7,200 of which were in California—an increase of 400 percent in two years.

By 1950 it is estimated that there will be 187,000 privately owned airplanes in the United States and that since California has always had at least 10 percent of such planes, there will be 19,100 privately owned airplanes in California at that time.

The Civil Aeronautics Administration has estimated that by 1955 there will be 400,000 privately owned planes in the United States, 10 percent of which would place 40,000 in California. If California continues to grow in population at its present rate, the foregoing estimate would be augmented further so that in 1955 there may be between 40,000 and 50,000 privately owned airplanes in California.

In 1939 there were 21,787 private pilots in the United States and in 1944, five years later, 107,327 private pilots, not reflecting the returning war trainees. As of December 31, 1946, there were 400,000 private and

commercial pilots and in 1955 there will be 1,000,000 licensed pilots in the Country.

Again, with respect to aircraft operation in 1929 there were 110,000,000 miles flown in private aircraft and in 1944 there were 300,000,000 miles flown in private aircraft.

Referring to domestic air carriers, they flew 25,000,000 miles in 1929, 91,000,000 miles in 1939, and 150,000,000 miles in 1944. It is a conservative estimate that the number of miles that will be flown by established air carriers in 1950 will be 500,000,000 miles and in 1955, 1,000,000,000 miles. Revenue from commercial carriers has increased to the same extent and for the past three years the revenue from the transportation of air mail has been sufficient to wipe out all deficits and to create a profit to the government.

The impact of the war upon the carriers, by reason of the taking of the equipment of the airlines and not permitting them to expand has had the effect of pushing the industry ahead much more rapidly than if this had not occurred.
