"SECTION 1. This act shall be known and cited as the Veterans Housing Act of 1947.

SEC. 2. The Legislature recognizes the necessity of providing housing accommodations for veterans in the State at the earliest possible moment, and that aid must be afforded persons who are willing to construct such housing accommodations, in order that they may proceed with the utmost dispatch. The hundreds of thousands of persons in the State who are unable to secure moderately priced living accommodations for themselves and families, and particularly the veterans, make it imperative that many new multiple family units be erected and rented at a rental within the means

of such persons To effectuate this purpose, it is necessary to offer to investors long-term, low interest rate money for financing the erection of such housing accommodations

SEC. 3. As used in this act:

"Housing unit" means a portion of a building equipped and suitable for one family for living quarters.

"Veteran" includes any person who has served in the military or naval forces of the United States and who has been discharged or released therefrom under conditions other than dishonorable. It also includes the widow of a veteran.

"Family" is limited to the spouse and legal dependents who are members of the household.

"Department" means the Department of Veterans' Affairs.

SEC. 4. Any person desiring to erect housing units pursuant to this act, shall apply to the department, setting forth the proposed location and the plans and specifications of the building or buildings desired to be erected. He shall supply the department with proof of his ability to pay 10 percent of the costs of acquiring the land and constructing the housing units

SEC. 5 If the location and the plans and specifications are satisfactory, the department shall enter into an agreement with the applicant to loan him 90 percent of the costs of acquisition of the land and construction of the housing units.

SEC 6. Any such contract shall provide that:

(a) The total building cost per housing unit shall not exceed five thousand dollars ($5,000).

(b) The loan shall be amortized over a period of not to exceed 40 years.

(c) The rate of interest upon deferred payments shall be 2 percent a year

(d) A veteran shall be given preference in the renting of all housing units, and that such units shall not be rented to persons other than veterans unless the department determines that there are insufficient veterans in the community desiring to rent such housing units

(e) Each housing unit shall be let to a single family

(f) The rent for each unit shall be upon a schedule approved by the department and shall not be more than fifty dollars ($50), nor less than twenty dollars ($20), a month.

(g) All housing units shall be maintained in a state of repair and suitable for renting purposes for the full period of the loan.

SEC 7. Any loan made pursuant to this act shall be secured by a deed of trust to the benefit of the State.

SEC. 8. The department shall make necessary rules to effectuate the purposes of this act, and to secure to the State the utmost protection on its investment. It shall provide for the foreclosure of all delinquent loans and for the operation of any units of which it may become the owner under such foreclosures or other repossession. It may resell any such housing units for the amount of the unpaid balance of the loan, upon the same terms and conditions as the loan was originally made, and, with the consent of the Department of Finance, may sell for less, or upon different terms

SEC 9 There is hereby created in the State Treasury, a revolving fund to be known as the Veterans' Housing Fund of 1947 All money deposited in such fund shall be subject to the provisions of this act. Money may be withdrawn from such fund in accordance with law upon requisition of the department All money received from payments of loans shall be deposited in this fund, and all money loaned pursuant to this act shall be paid from this fund

SEC. 10. Out of any money available in the Veterans' Housing Fund of 1947, the department may advance to any owner of housing units constructed pursuant to this act upon his application, and under such regulations as the department may, from time to time, prescribe, sums for the purpose of keeping in good order or repair, or for painting, redecorating or remodeling, such housing units. The money so advanced shall be added to the loan and amortized within the period of the original loan contract. The department shall be the sole judge of the need and desirability of making such advances.

SEC 11. Out of the proceeds of the sales and use taxes, the State Controller shall transfer to the Veterans' Housing Fund of 1947, a sum equal to 10 percent each month until the sum of one hundred million dollars ($100,000,000) has been transferred to said fund.

SEC 12. All sums repaid upon loans not required for the purposes of this act shall, at such times as the Department of Finance and the Department of Veterans' Affairs agree, be returned to the General Fund in the State Treasury

SEC 13. The expenses of administering this act shall be paid from the appropriation for the support of the Department of Veterans' Affairs

SEC. 14 This act is hereby declared to be an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Section 1 of Article IV of the Constitution and shall therefore go into immediate effect. A statement of the facts constituting such necessity is as follows:

Hundreds of thousands of veterans and other persons in this State are unable to secure moderately priced living accommodations for themselves and families. In order to provide such persons with suitable housing accommodations at the earliest possible moment, it is necessary that long-term, low interest rate money be loaned

to persons who are willing to construct multiple family buildings, in order to house such veterans and other persons. It is therefore necessary that this act take effect immediately."

Sec. 51a. Unincorporated territory contiguous to the district may be annexed to said district in the manner following

(1) A petition signed by not less than 15 percent of the qualified electors residing in the territory proposed to be annexed, describing said territory and asking that proceedings be taken for its annexation, may be addressed to the board of directors and filed with the secretary of the district. Thereupon the secretary shall compare the signatures of said petition with the affidavits of registration on file with the county clerk of the county or counties wherein said territory proposed to be annexed is situated, and if he finds that said petition has been signed by the required number of electors he shall attach his signature thereto and present said petition to the board of directors of the district

In the event that the territory is wholly uninhabited, a petition filed by not less than 15 percent of the owners of the territory proposed to be annexed describing said territory and asking that proceedings be taken for its annexation may be addressed to the board of directors and filed with the secretary of the district. The secretary shall thereupon determine if such petitioners are owners of such territory by the records of the county assessor of the county wherein said territory proposed to be annexed is situated and if he finds that said petition has been signed by the required number of owners, he shall attach his signature thereto and present said petition to the board of directors of the district.

(2) If the board of directors shall determine that the annexation of said territory will facilitate the acquisition, construction or completion or operation of any public utility, public utilities or public utility works of the district, or will be for the advantage of the said district, and that the territory proposed to be annexed will be benefited by such annexation, then said board shall determine the terms and conditions upon which said annexation should be made In the terms and conditions so determined provision may be made, among other things, for the payment of special taxes within the territory to be annexed in addition to the taxes elsewhere in this act provided for, the fixing of rates, rentals and charges differing from those fixed, or existing elsewhere, within the utility district, the incurring or assumption of indebtedness or the making of a payment or payments, or the transfer of property, real or personal, or other assets to said utility district by the territory proposed to be annexed, in such manner as the board of directors shall deem just for the purpose of equalizing the proportionate obligations, expenditures and costs of operation between the territory within the district and the territory proposed to be annexed Such terms and conditions shall become effective and be binding upon the utility district and upon the territory to be annexed when approved in the manner hereinafter set forth.

The boundaries of the territory proposed to be annexed need not be coterminous with any election precincts.

(3) The board of directors of said utility district shall by ordinance describing the territory proposed to be annexed, and setting forth such terms and conditions at length, declare its intention of approving such annexation and terms and conditions. Said ordinance, together with a notice fixing the time and place for hearing thereon, and notifying all persons interested in or that may be affected by the proposed annexation of said territory within the district to appear at such meeting and show cause in writing, if any they have, why said territory or any of it should not be annexed as proposed in said petition, shall be published in a newspaper of general circulation printed and published in said utility district, or if there be no such newspaper then in some newspaper of general circulation printed and published in the county where such district or some part thereof is situated. A copy of said ordinance and notice shall be filed with the secretary of said utility district The time fixed for such hearing shall be not less than 30 nor more than 60 days from the date of the first publication of said ordinance Said notice and ordinance shall be posted in three public places in the territory proposed to be annexed at least 30 days before the date set for said meeting.

At such hearing any person interested may file with the board of directors of the utility district written protest to the proposed annexation or to the approval of such terms and conditions. Upon such hearing the board of directors of the utility district shall hear and determine all protests so filed and all evidence relevant thereto, said board shall thereupon determine whether said territory shall be annexed and shall determine upon what terms and conditions, if any, said annexation shall be made

Failure of any person interested in said utility district or in the matter of the proposed annexation on the terms and conditions set forth in said ordinance to show cause by written protest as aforesaid, shall be deemed and taken as an assent on his part to a change in the boundaries in the utility district upon the terms and conditions, if any, set forth.

Any such hearing may be adjourned from time to time or from place to place by the board of directors without further notice other than an order to be entered upon the minutes of the meeting at the time of adjourning fixing the time and place that such meeting shall reconvene.

In the event that the board of directors after such hearing by resolution approves proposed annexation of the territory described in said petition with or without terms or conditions, and said annexation is also approved either by a written consent containing a description of the territory proposed to be annexed and setting forth the terms and conditions, if any, of such annexation signed by a majority of the electors who were registered in the territory to be annexed at the date of the presentation of the petition or petitions for annexation, which written consent is filed with the secretary of the board who shall thereupon verify the signatures thereon in the same manner as the signatures to the petitions for annexation are required to be verified by the provisions of subdivision (1) of this section, *or if said territory is uninhabited, by the owners of a majority of the assessed valuation of said territory* or by a majority vote in favor of annexation at an election called and held as hereinafter in this section provided within the territory proposed to be annexed; it shall make an order describing the boundaries of said territory proposed to be annexed and also describing the exterior boundaries of the district as they shall exist after said annexation For the purposes of said order the board may cause a survey to be made of said boundaries or such portions thereof as may be deemed necessary. Said order shall also set forth in detail the conditions and terms, if any, of the annexation Said order shall be set forth in full upon the minutes of the board.

(4) The board of directors, after its approval of said annexation by resolution as hereinbefore provided may call an election to determine whether said annexation is approved by the electors of said territory proposed to be annexed, but before calling such election it may require an undertaking with sufficient sureties from the petitioners for the annexation, conditioned that the petitioners or their sureties will pay all costs to the district of such election in case such annexation be disapproved by such election.

In calling such election the board shall fix the time at which such election shall be held and cause notice thereof to be given and published Such notice shall be given and published and such election shall be held and conducted and returns thereof shall be made and canvassed and the result of the election ascertained and declared, and all things pertaining thereto conducted in the manner prescribed by said act in case of a special election to determine whether bonds of a public utility district shall be issued. The ballots cast at such election shall contain the words "for change of boundary" or "against change of boundary," or words equivalent thereto. The notice of election shall describe the territory proposed to be annexed in such manner that it can be readily understood and shall set forth the terms and conditions, if any, of such annexation.

At such election only electors registered at the time of the presentation of the petition for annexation and who at the time of said election are still electors in said territory shall be qualified to vote. If at such election a majority of all the votes cast on the proposition shall be against such annexation the board shall order that

the petition be denied and shall proceed no further in that matter, but if a majority of such votes be in favor of such annexation the board shall thereupon in the manner provided in subdivision (3) of this section order that the annexation be made

(5) Upon the making of such order changing the boundaries of the district as aforesaid a copy of the order of the board of directors ordering such change certified by the president and secretary of the board shall be filed for record in the recorder's office in each county within which the district and any part thereof and within which the territory annexed or any part thereof is situated, and thereupon the district, including the territory annexed, shall be and remain a public utility district as fully and to every intent and purpose as if the lands which are included in the district by the change of the boundaries as aforesaid has been included therein at the original organization of the district, except that this provision shall not modify or impair the terms and conditions upon which said annexation shall be made.

(6) Upon the filing of the copies of the order, as in the last preceding section mentioned, the secretary shall record in the minutes of the board the petition aforesaid; and the said minutes, or a certified copy thereof, shall be admissible in evidence, with the same effect as the petition.

DICKEY, Chairman

STATEMENT ORDERED PRINTED IN JOURNAL

Pursuant to the request of Mr. Grunsky, and upon recommendation of the Committee on Rules, the following statement by Senator McBride was ordered printed in the Journal:

Statement by Senator McBride, Chairman of Joint Interim Committee on Insurance Regulation

Submitted by Assemblyman Donald Grunsky.

During the past two and one-half years the insurance business of the State and the Joint Interim Legislative Committee on Insurance Regulation have continually studied the problems created by the decision of the Supreme Court of the United States which held that insurance

was interstate commerce and subject to federal regulation. Congress by the passage of Public Law 15 permitted the states to solve their rating problems on a state basis if they so desired and so retain local control of the important business of insurance.

All groups affected by the proposed legislation fully realized the problem and agreed that state legislation was desirable, but due to honest differences of opinion as to the means and method of solution it appeared to be impossible to reconcile the differences between the various groups.

I have always refused to believe that it would be impossible for the great business of insurance and the agents, brokers and producing groups who are such an essential part of the business to agree on a bill which would be fair to all types of carriers, to the producing groups and which would protect the public interest. I am, therefore, grateful beyond expression to know that a bill has been agreed upon which the Insurance Commissioner believes adequately protects the public interest and which meets in a general way with the approval of the industry for use in California in the light of California conditions.

In thanking all groups and their representatives I want to emphasize that the result accomplished was obtained solely because of the willingness of all groups to put aside individual preferences and pride of authorship in the interest of the business as a whole and no one should assume that the decision to scrap all prior bills and write an entirely new bill represents a defeat for any particular group. The producing groups and the California group agreed to accept any workable bill that did not do violence to their philosophy of regulation. The bill as drawn is satisfactory to them and in appreciation of their cooperation it is only fair to acknowledge their willingness to work with the committee, the Insurance Department and those of the insurance business who did not see eye to eye with them in working out a common problem.

It would have been most unfortunate if after all the time and effort expended no legislation could be passed. It is good for all concerned to known that their efforts have brought accomplishment. We have a good and satisfactory bill which pleases our committee, but our great satisfaction is in knowing that here in California that competitive foes can sit down and work out their problems in the best American tradition.

FISH AND GAME COMMISSION

MINUTES OF MEETING OF MARCH 14 AND 15, 1947

Pursuant to the call of the President, the Fish and Game Commission met in Executive Session at the El Tejon Hotel, Bakersfield, on March 14. The meeting was called to order by President Payne at 4 p.m.

HARVEY E. HASTAIN, Commissioner
H. H. ARNOLD, Commissioner
W. J. SILVA, Commissioner
EMIL J. N. OTT, JR., Executive Secretary
RALPH W. SCOTT, Deputy Attorney General
RUTH SMITH, Reporting

Mr. Payne referred to letter from Robert Reedy, Administrative Aid, relative to a situation which had arisen wherein the Department of Finance refused to honor the signature of the Executive Secretary on documents such as service agreements, leases, easements, etc. Mr. Payne stated that at its meeting of January 28-30, 1946, the commission delegated certain administrative powers to the Executive Secretary, but that it was

his understanding that Commissioner Arnold wished to introduce an alternative set of resolutions to amend the resolution of January 28-30, 1946.

General Arnold requested a recess at 4.15 p.m.

Meeting reconvened at 4.55 p.m.

Moved by General Arnold, seconded by Mr. Hastain, that that portion of the minutes of the Fish and Game Commission meeting held January 28-30, 1946, relating to the duties and responsibilities of the Executive Secretary is hereby rescinded in its entirety and the following is substituted in lieu thereof:

c. The Executive Director, Fish and Game Commission, shall be and act as the Administrative Agent of the Fish and Game Commission; provided, however, that this delegation of authority is subject to revocation by the commission at any time. In such capacity he shall perform and be charged with all administrative functions of the Division of Fish and Game and the Fish and Game Commission.

d. The Executive Director shall prescribe the duties of the Administrative Assistant or assistants.

e. The Executive Director shall execute on behalf of the Fish and Game Commission all instruments and agreements which the commission may be authorized by law to enter into. f. The Executive Director shall cause to be submitted to the commission at each regular meeting, a summary of the pertinent, major and/or unusual legal and fiscal documents processed or negotiated during the preceding month; provided, however, that this summary will only be submitted once for any one month. This summary, if time permits and contents warrant, may be mailed to members of the commission, prior to the meeting at which it is to be submitted.

g. The Executive Director shall be responsible for the prompt and efficient execution of all directives of the commission and in pursuance thereof, all business of the division shall be conducted through him or in his name as he may delegate authority. He shall make specific assignments to the various bureaus or branches in accordance with their functions.

h. The Executive Director shall supervise and coordinate the activities of the various bureaus and branches of the division, maintaining the personnel thereof at the minimum required for efficient operation.

i. The Executive Director shall cause to be submitted to the commission at each regular meeting, analysis with recommendations when applicable, of each subject on the agenda.

j. The Executive Director shall cause to be issued in conformance with the State Fish and Game Code, other state laws, and the policies of the commission, regulations for the guidance of the personnel of the division.

k. All liaison activities with the sportsmen's organizations, State Legislature, and other organizations whose activities are allied with those of the Division of Fish and Game, shall be conducted by the Executive Director or whomever he may designate.

l. The division under the Executive Director, shall be organized into bureaus or branches as follows:

Office of Administration

Fish Conservation
Licenses

m. The Administrative Office shall maintain files of minutes of the meetings of the commission and index thereto; all correspondence files of the division; all property, personnel, and fiscal records, files of agreements and contracts; education and publicity programs, maintain a library and stock of office supplies; furnish office service to the division as a whole; and perform such other duties as may be assigned by the director. All clerical and stenographic personnel shall be pooled in this branch, except as is essential for continuous employment under bureau chiefs for execution of their specific functions. Additional assistants to bureau chiefs will be supplied from this pool upon request as needed from time to time.

Passes unanimously.

Moved by Mr. Hastain, seconded by General Arnold, that all service agreements, leases, contracts, purchase estimates, personnel, and other documents, executed by or on behalf of the Executive Secretary during the period from December 15, 1944 to March 10, 1947, are hereby approved. Passed unanimously.

General Arnold brought up the subject of an expanded fish and game conservation-education program, and general discussion on the matter followed.

Moved by General Arnold, seconded by Mr. Silva, that the Executive Director, with the aid of all bureau chiefs and whomever else he may designate, shall formulate a conservation-education program and submit it to this commission for approval at the next regular meeting; that the Executive Director ascertain from the Department of Finance if it would be possible to divert 10 percent

of the 4th quarter, Ninety-eighth Fiscal Year Support Appropriation to effectuate the above conservation-education program. Passed unanimously.

The Executive Director brought to the attention of the commission that the Board of Control recently increased the "Repairs to Vehicles Limitations" from $50 to $100, and outlined a policy which he asked that the commission approve with reference to division-owned vehicles.

Moved by Mr. Hastain, seconded by Mr. Silva, that effective this date authority is granted to make normal repairs to division-owned vehicles as follows:

OPERATORS OF VEHICLES—Maximum of $15 on any one job; not to exceed $30 in any one quarter;

BUREAU HEADQUARTERS—Maximum of $50 on any one job; not to exceed $100 in any one quarter;

Passed unanimously.

In connection with the present agreement with Oregon concerning our cooperative interstate deer herd study, the Executive Director called to the attention of the commission the request of Messrs. McKean and Conn of the Oregon State Game Commission that our agreement be extended during the month of April. Extension of this agreement is recommended by our Bureau of Game Conservation.

Moved by Mr. Silva, seconded by General Arnold, that our present agreement with the Oregon State Game Commission regarding the interstate deer herd study be extended through the month of April. Passed unanimously.

Moved by General Arnold, seconded by Mr. Hastain, that the Executive Director be authorized to direct a request to the Governor for Messrs. Richard S. Croker, Leo Shapovalov, William Dill, H. C. Godsil and P. M. Roedel to attend meeting of the Pacific Fisheries Biologists at Harrison Hot Springs, British Columbia, April 10, 11, and 12, 1947. Passed unanimously.

Moved by Mr. Hastain, second by Mr. Silva, that the following policy on special salary adjustments for veterans be followed: If an employee received a promotion after his return he will be appointed at the usual entrance salary for the higher position. However, if his promotion is made by appointment from an eligible list from which he might have been appointed at an earlier date had he not been in the military service, the Division may recommend a special salary increase for him. Such a special recommendation is subject to individual review and approval by the Department of Finance. If granted, he can receive the salary he would be receiving had he been appointed at the earlier date. Passed unanimously.

Moved by Mr. Silva, seconded by Mr. Hastain, that the application of the Brown By-Products Company for shark reduction permits be approved. Passed unanimously.

The Executive Director brought up the matter of the motor vessel "N. B. Scofield" for discussion. To date the vessel has not been returned to us by the government nor has the cash settlement agreed upon been made. It was suggested by General Arnold that the best way to expedite this matter was for the commission to send a wire immediately to the Secretary of War, stating just what has been done to date in an endeavor to conclude this matter, and request information as to when we may expect action.

There being no further business, meeting adjourned at 5.35 p.m.

SEC. 4. Section 1086.1 is added to said code, to read:

RESOLUTIONS

The following resolution was offered:

By Messrs. Erwin, Hinton, Kilpatrick, Cooke, Boyd, Doyle, Bennett, Collier, Fletcher, Price, Hollibaugh, Lyons, Huyck, Stanley, Robertson, Waters, Grant, Thomas, Anderson, Cramer, Mrs. Niehouse, Messrs. Luckel, M. Philip Davis, Butters, Rosenthal, and Stewart:

House Resolution No. 193

Relative to planting of trout

WHEREAS, The Fish and Game Commission is authorized by the Fish and Game Code to stock the waters of this State with fish, without any restrictions as to size or age; and

WHEREAS, The commission in carrying out its duties must use its judgment as to the size of fish to be planted in the various sections of the State in order to conform to varying climatic conditions; and

WHEREAS, The commission is and has been planting catchable trout of a size of six or eight inches in length, particularly in the relatively warmer waters of the southern part of the State and in doing so has exercised commendable judgment and has acted not only within the language of the law but also within its spirit, which is to extend the benefits of recreation to all of the people of the State; and

WHEREAS, The planting of fish in the southern part of the State brings to the people of the State's most populous area a chance to fish without traveling great distances at an expense prohibitive to most citizens; and

WHEREAS, Such planting of fish encourages many of the people of the State to buy sporting fishing licenses who otherwise would not do so, and thereby supplies the funds to pay for such planting; and

WHEREAS, The sportsmen of the State have expended millions of dollars for the propagation of fish, and the erection and operation of hatcheries and breeding ponds, and it has never been intended that the activities of the commission should be restricted to stocking the remote mountain streams but rather that the commission should stock all of the waters of the State with such fish as were suitable to the particular waters and in such manner as to spread the benefits as widely as possible throughout the State; and

WHEREAS, The planting of sizeable fish is, by law, a matter which is within the discretion of the commission, and in planting such fish, particularly in the southern waters, it has conformed to the wishes of the sportsmen's associations of the areas involved and has done its best to perform its duties in conformity with the law, and should continue to plant fish of such size as it finds to be suitable to the waters in which planted and so as to stock the waters of all of the State with such fish as it determines to be appropriate in view of the climatic and other features involved; and

WHEREAS, The Senate of the State of California has adopted a resolution of a tenor quite contrary to this resolution, whereby it seeks to control the discretion conferred by law upon the commission in relation to stocking the waters of this State with fish; and

WHEREAS, Said Senate resolution does not express the views of this Assembly and is of no legal or operative effect and therefore should be disregarded; now, therefore, be it

Resolved by the Assembly of the State of California, That the Fish and Game Commission is commended for its activities in planting and propagating fish and is particularly commended for its activities in planting catchable trout in the southern waters of the State and thereby bringing an opportunity for healthful recreation to thousands of people to whom it would otherwise be denied; and be it further

Resolved, That the Fish and Game Commission is urged to continue to administer the provisions of law relating to the planting of fish in such manner as the commission in its own judgment determines to be appropriate, and it is particularly urged not to discontinue the planting of catchable fish in the southern waters of the State; and be it further

Resolved, That copies of this resolution be transmitted by the Chief Clerk to the Governor of California and to the members and executive officer of the Fish and Game Commission.

Resolution read, and referred to the Committee on Rules.

Sec. 27. (a) If, in the opinion of the commissioner, or the State Board of Equalization, as the case may be, there has been an overpayment of tax, penalty or interest by a taxpayer for any year for any reason, the amount of such overpayment shall be credited against any taxes then due from the taxpayer under this act, and the balance shall be refunded to the taxpayer or its successor through reorganization, merger, or consolidation, or to stockholders upon dissolution. No such credit or refund shall be allowed or made until approved by the State Board of Control. No such credit or refund shall be allowed or made after four years from the last day prescribed for filing the return or after one year from the date of the overpayment, whichever period expires the later, unless before the expiration of such period a claim therefor is filed by the taxpayer, or unless before the expiration of such period the commissioner has certified the overpayment to the State Board of Control for approval of the refunding or the crediting thereof. If (a), the taxpayer has, within the period prescribed in the preceding sentence, agreed in writing, under the provisions of Section 25, to extend the time within which the commissioner may propose an additional assessment, or (b) if the taxpayer has agreed with the United States Commissioner of Internal Revenue for an extension (or renewals thereof) of the period for proposing and assessing deficiencies in federal income tax for any year, the period within which a claim for credit or refund may be filed, or credit or refund allowed or made if no claim is filed, shall be the period within which the commissioner may make an assessment under such circumstances, except that the provisions of the preceding sentence shall apply to any claim filed, or credit or refund allowed or made, before the execution of such agreements. Insofar as the claim for credit or refund relates to an overpayment on account of the deductibility under Section 8 (e) of a debt as one which became worthless, or an erroneous inclusion of an amount attributable to the recovery of a bad debt, prior tax or delinquency amount under Section 6 (b) (4), due to an adjustment of a bad debt deduction under Section 8 (e), in lieu of the period of limitation prescribed in the second preceding sentence, the period shall be seven years from the date prescribed by law for filing the return for the year with respect to which the claim is made. A refund claim upon which action has become final shall not thereafter be considered a refund claim within the meaning of the foregoing provision except to the extent allowed. Every claim for refund must state the specific grounds upon which the claim is founded.

(b) If the commissioner disallows any claim for refund, he shall notify the taxpayer accordingly. At the expiration of 90 days from the mailing of such notice, the commissioner's action upon the claim shall be final unless within such 90-day period, the taxpayer appeals in writing from the action of the commissioner to the State Board of Equalization. If the commissioner fails to mail notice of action on any refund claim within six months after the claim was filed, the taxpayer may, prior to mailing of notice of action on the refund claim, consider the claim disallowed and appeal to said board. Appeals must be addressed and mailed to the State Board of Equalization at Sacramento, and a copy of the appeal addressed and mailed at the same time to the commissioner at Sacramento. Said board shall hear and determine the same and thereafter shall forthwith notify the taxpayer and the commissioner of its determination. Such determination shall be final upon the expiration of 30 days from the time of such determination unless within such 30-day period the taxpayer or the commissioner files a petition for rehearing with said board, in which event the board's determination shall not become final until the expiration of 30 days from the time the board issues its opinion on said petition.

(c) Interest shall be allowed and paid upon any overpayment of any tax, if the overpayment was [not] made because of an error or mistake on the part of the [taxpayer] *commissioner*, at the rate of 6 percentum per annum as follows:

(1) In the case of a credit, from the date of the overpayment to the date of the allowance of the credit. Any interest allowed on any credit shall first be credited on any taxes due from the taxpayer under this act.

(2) In the case of a refund, from the date of the overpayment to a date preceding the date of the refund warrant by not more than 30 days, such date to be determined by the commissioner.

(d) Any refund or any portion thereof which is erroneously made, and any credit or any portion thereof which is erroneously allowed, may be recovered, together with interest at the rate of 6 percentum per annum from the date the refund was made or the credit allowed, in an action brought by the commissioner in a court of competent jurisdiction in the County of Sacramento in the name of the people of the State of California, and such actions shall be tried in the County of Sacramento, unless the court, with the consent of the Attorney General or the counsel for the commissioner,

orders a change of place of trial. The Attorney General or the counsel for the commissioner must prosecute such action, and the provisions of the Code of Civil Procedure, relating to service of summons, pleadings, proofs, trials, and appeals are applicable to the proceedings herein provided for.

In the event that a tax has been illegally levied against a taxpayer, the commissioner shall set forth on his records the reasons therefor and thereafter shall authorize the cancellation of such tax.

(e) If, after filing a protest or an appeal to the State Board of Equalization, pursuant to Section 25, a taxpayer pays the tax protested, before the commissioner acts upon the protest or the board on the appeal, the commissioner or the board shall treat the protest or the appeal as a claim for refund or an appeal from the denial of a claim for refund filed under this section."

If (a) the taxpayer has, within the period prescribed in the preceding sentence, agreed in writing, under the provisions of Section 19, to extend the time within which the commissioner may propose an additional assessment, or (b) if the taxpayer has agreed with the United States Commissioner of Internal Revenue for an extension (or renewals thereof) of the period for proposing and assessing deficiencies in federal income tax for any year, the period within which a claim for credit or refund may be filed, or credit or refund allowed or made if no claim is filed, shall be the period within which the commissioner may make an assessment under such circumstances, except that the provisions of the preceding sentence shall apply to any claim filed, or credit or refund allowed or made, before the execution of such agreement. REPORT OF ASSEMBLY INTERIM COMMITTEE ON TRAFFIC AND PARKING CONDITIONS IN CITY OF LOS ANGELES

AS ESTABLISHED BY HOUSE RESOLUTION NO. 34, ADOPTED JANUARY 13, 1947

Members: ASSEMBLYMEN JOHN W. EVANS, Chairman; CHARLES J. CONRAD and WILLARD M. HUYCK.

This committee was authorized and directed to ascertain, study and analyze all facts relating to traffic and parking in the City of Los Angeles, the means of promoting safety with respect thereto, and additional parking places in the City of Los Angeles.

The City of Los Angeles, among the 14 cities of the United States with populations of half a million or more, has the highest death rate from traffic accidents. In the last 12 months the city's traffic killed 505 persons. This is 27.9 traffic deaths for each 100,000 population. In Boston, for instance, only 65 were killed, or 8.4 for each 100,000 of population Each large city has one or more serious traffic problems, but the City of Los Angeles has all of them.

The lack of uniform traffic codes may not be evident on the accident records of towns with fixed populations, but in the City of Los Angeles due to the recent influx of people from other states, it helps to create the terrific death toll which occurs annually. During the past year, out-of-state motor-vehicle registration for the Los Angeles area alone have been running 530 daily, probably representing the number of families who have come to stay. In the last 12 months 930,708 out-of-state cars carrying 2,576,028 passengers, have come into the State of California.

The influence of parking on traffic accidents has not been sufficiently considered in studies on congestion and insufficient storage space and their relation to accident causes. Most motorists are daily confronted with the latter elements of the parking problem while parking accidents affect only those directly involved. Accidents and hazards related to parking, however, should be considered in all studies of parking. Data pertaining to them are valuable in determining correctives and can be a major factor in having changes adopted.

In both cities and states, collisions involving parked cars (including parking and unparking) constitute a substantial part of all accidents. The latest information compiled by the National Safety Council shows that 9.2 percent of all accidents in urban areas and 4.5 percent in rural areas involved parked cars. To these data can be added several others related to parked vehicles; 5 percent of the urban accidents involved cars leaving parked positions, 1.1 percent of the rural; 2.6 percent of the urban and 3.9 percent of the rural mishaps involved cars stopped in traffic. It is evident, then, that approximately 17 percent of city accidents and 10 percent of rural accidents involve vehicles which are parked, maneuvering into or from a parked position, or stopped in traffic. Only 1.3 percent of urban and 2.5 percent of rural fatal accidents involve parked cars.

Five percent of the pedestrians killed in cities and 6 percent of those killed in rural areas entered the roadway from behind parked cars. Nine percent of the pedestrians injured in each area came from behind parked vehicles.

Parking accidents in 10 large cities in 1940 ranged from 5 percent to 28 percent of all accidents reported.

The report of the Joint Fact-Finding Committee on Highways, Streets and Bridges has this to say about parking controls:

"The highway transportation system must provide not only for the safe efficient flow of traffic, but, to be completely effective, must include adequate terminal facilities for vehicles. Since curb parking obviously falls far short of meeting requirements and is a wasteful use of street space, off-street parking within convenient distance of the motorist's destination must be developed. This problem may be approached by considering the benefits that may be expected to accrue to those primarily concerned—the motorist, the merchant, the property owner, the city government and the State.

"It has been determined that the motorist is willing to pay a reasonable fee, if he can be assured of easily available parking facilities in desirable locations. The merchant is interested in making it convenient for customers to reach his store. The property owner is concerned with maintaining values of land and buildings, which may suffer if access is impaired. The city is responsible for maintaining the street system for the welfare of the community. The State has an over-all interest in the transportation system, must make sure that highways leading into and through cities operate at maximum efficiency by reason of adequate terminal facilities, and must protect its investment in streets of major importance by assuring that traffic is adequately handled.

"Each of these areas of interest holds a key to possible solutions of the off-street parking problem. Motorists, by reason of their willingness to pay reasonable parking fees, will support privately operated lots and garages if the service is adequate in relation to the cost. In some communities private capital has been able to operate parking lots and garages with sufficient capacity to meet the demand, and there is every reason to encourage and support such enterprises. Careful study of local conditions might readily disclose opportunities for profitable investment, especially if cooperation of merchants and civic organizations is forthcoming.

"There are many cases of parking facilities successfully operated by merchants or business groups, either free as a service to customers, or at a nominal fee, with deficits charged to the cost of doing business. The feasibility of this solution may depend largely upon availability of suitable space near the business that will benefit, and the ability of merchants to organize and manage such an activity.

"In many places, however, particularly in the large cities where property values are so high that lots and buildings cannot profitably be operated for parking, action must be taken on the basis of public responsibility."

In connection with its instructions, the Committee on Traffic and Parking in the City of Los Angeles held a hearing at the State Exposition Building, Los Angeles, February 27, 1947. The committee members present were: Chairman John W. Evans and Charles J. Conrad; also present was Assemblyman Don A. Allen.

Following is a summary and partial transcript of the testimony and proceedings at this hearing:

Committee: ASSEMBLYMEN JOHN W. EVANS, Chairman, and CHARLES J. CONRAD; also present ASSEMBLYMAN ALLEN

Mr. Evans introduced members of the committee and explained that it had been appointed by Speaker Sam Collins during the first session of the current meeting of the Legislature to study the traffic situation in Los Angeles. He further stated he thought traffic in Los Angeles was on a par with housing.

"If we are going to have 20,000 cars a month coming into the State, we should certainly provide for those automobiles and for parking. The committee was not appointed primarily to take up parking around the Coliseum or the park alone, but throughout the entire City of Los Angeles. We feel that if we could sit down and talk with the people interested throughout the community we might be able to work out a situation wherein all of the people in Los Angeles could adequately park their automobiles at the places of interest, and I don't mean just place of interest for athletic events, but certainly for the businessmen to be able to park their cars and to carry on their business and for the ladies to park their cars in the event they have to be in town to take care of their business.

"We have at the present time two bills before the California Legislature. One bill is authored by Mr. Huyck and provides for a political subdivision to purchase property or take property that is already owned by that subdivision, and rent it to private interests for the purposes of parking. There is another bill introduced by myself. This provides for putting auto parks under the Public Utilities Commission. That bill is based on the 1937 Warehousemen's Act wherein the State held that warehouses were a public necessity and subject to regulation by the Board of Public Utilities (Railroad Commission).

"I certainly believe that in cities of 100,000 or more, auto parks and traffic control are public necessities. It is just as important for us to have adequate parking facilities as it is to have gas and lights; and that is the purpose for which the committee was appointed by the Speaker."

Mr. Carl Bush, Assistant General Manager of the Downtown Businessmen's Association of Los Angeles, and director of their transportation department, took the stand.

"My department was organized for the particular purpose of planning and working with proper officials in the matter of parking, traffic movement, for both automobiles and public transportation. Due to many of these activities, I have been called on frequently by outside interests to aid in such problems. The Downtown Businessmen's Association as such, has no particular interest in this particular problem, but will be glad to give any assistance possible."

Mr. Bush stated:

"The Coliseum parking situation is at the very least a county-wide problem, since people come from all areas of the city. Lack of proper parking facilities can and usually does have a detrimental effect on the neighborhood or any place which tends to bring in large groups of people at one time, where the facility has no parking arrangements or inadequate facilities, or if it has been placed in a community after a large

amount of development has taken place. Then, inevitably, the concentration of such large numbers of cars works a hardship on businessmen and residents alike."

Q. "How do you feel with reference to a planned situation wherein the city, county and State combine under one central control, and do you feel this should or could thereby eliminate the problem?"

A. "I don't believe in city, county or State going into the parking business."

Q. "If we could secure vacant property around the Exposition Park wherein we could set the rates and allow favorable parking to the public —do you believe such a plan could be worked out?"

A. "To reply to your last question first, any move that materially restricts the freedom of operation of parking lot operators would automatically prevent your getting the parking you need. The only thing, from a private investment standpoint, that will provide parking for any institution or area is it shall be a profitable one, and any attempt to fix rates, etc., would automatically cut down the possibility of getting space. I think that is fundamental. Operating a parking lot is a risky business, so that you have to be extremely careful about throwing safeguards around such an arrangement. If the Coliseum or Sixth District or any other directorate involved could be certain that a reasonable amount of parking space could be provided under its own operation or under lease from them, they they could establish rates that were not exorbitant. That would have a considerable bearing, of course, on rates that could be charged elsewhere in the neighborhood. Rates are a very peculiar thing. The Coliseum can tell you that any number of people are willing to pay $2 parking fee for an event, particularly if it has cost them $10 or $20 or $30 for tickets. The amount of gouging done is comparatively small and would not occur if there were sufficient parking space at reasonable rates. It will continue until such space is provided. People would prefer to pay $2 next door to the Coliseum, rather than 50 cents a mile away."

MR. CONRAD: Would a one-way street have any effect on the traffic around the Coliseum, and would it be advisable?

MR. BUSH: That needs study. I am not in favor of, or unfavorable to, any point. It's just a question of mathematics. There is always trouble with a one-way street. The question in the operation of a one-way street is, is there a balancing road so that traffic can be spread both ways. The traffic jam around the Coliseum is of comparatively short duration, a few hours before and after.

DON ALLEN: Hasn't there been considerable buildings pulled down that are now being used for parking lots and the money lost to the taxpayers?

MR. BUSH: From a governmental standpoint, the return should be greater because it is being used for a more profitable purpose. Where the buildings have been torn down the income from the property is greater than when the building was on it. This is merely a presumption.

Deputy Chief B. R. Caldwell, of the Los Angeles City Police, Director of the Traffic Bureau, was next called to the stand.

Q. "What is the present method of operating private parking lots, and what prices do they charge?"

A. "The method is generally by police department permit after a license has been issued by the city clerk. Police department does not set rates, but grants a permit provided it meets the requirements and is in a proper zone."

Q. "Are there any operators without permits? How many?"

A. "Oh, yes, we have made no check."

Q. "Can they do this just because they own the property?"

A. "Legally, no, but the condition is tolerated. The matter has been checked by the chief investigator of the police commission, but neither we nor the Coliseum event managers have time to check the status of property operating as parking lots."

Q. "Do they carry insurance?"

A. "I doubt it. It is not required unless they are licensed. Licenses carry a $1,000 bond."

Q. "Are there many losses reported from these unlicensed lots?"

A. "There were 10 automobiles reported stolen from the auto parks in the vicinity of the Coliseum during all the events from July to December, 1946, from various locations."

Q. "When does the police department consider a car abandoned?"

A. "After it has been on the street for a long time and residents of the neighborhood protest. Technically, we begin to consider it abandoned after a lapse of five days and remove to a safe place. If a traffic hazard exists, we can effect an immediate removal from the street. If a car is damaged on private property the police department has no particular concern. One of the most serious problems is widening streets."

MR. EVANS: Wait a minute! You bring up condemnation procedures and people get mad.

MR. ALLEN: One of the first considerations should be to widen streets.

MR. EVANS: One group of people who own property have just as much right to park their cars in front of it.

CHIEF CALDWELL: The police department is in sympathy with the property owners.

Chief Caldwell was excused at this time.

Mr. Louis J. Canepa, president of the Coliseum Commission, was next called to the stand.

Mr. Canepa stated that Coliseum attendance for the year 1946 had been 1,720,627, for 60 events, making an average of 30,000 people per event. Ten to 15 per cent come by public transportation. The average per private car is 2.3. "We would like to see proper parking facilities, but we don't want to destroy the park or the neighborhood. The commission has taken no definite action, but the problem has been discussed. A maximum parking fee of 50 cents is what they would like to see."

"The plans shown in the newspapers two or three weeks ago was a pre-war one, worked out by a commission of 12 or 14 members, including the police department, city engineer, former Coliseum Manager, Ralph Chick, and others. The plan was dropped during the war, but has recently been taken up again. It is no hurried affair, but has had considerable study. It was planned to use the vacant property during time when there were no Coliseum events for soft ball and other playground uses. We do not contemplate any evictions at this time when homes are so greatly needed."

Mr. Canepa was then excused.

Mr. Paul T. Ferrar, vice president and assistant to the manager of the Wave Publications, was next called to the stand.

Q. "Does the present parking situation interfere with business in the neighborhood during Coliseum events?"

A. "During the ordinary course of business days there are two very definite problems—on Vermont and Santa Barbara. Parking is somewhat difficult in business districts generally, and particularly during events. Parking in the vicinity of these business districts is extremely limited on the streets. Parking lots are small or nonexistent, and the average customer does not mind going another block or so, but during events he cannot find room within a mile."

MR. EVANS: If we could arrange a plan to provide for central parking areas that would not in any way increase the housing shortage or jeopardize the property owner, wouldn't this reduce the number of cars that would be parked all the way south to Vernon?

A. "I would certainly hope so."

MR. EVANS: If we could get parking facilities north of Santa Barbara Avenue and use some of the vacant ground for parking purposes, I wonder if the answer to this isn't that we should take out all the green grass around here."

A general discussion of underground parking, particularly in San Francisco, was held at this time between members of the committee and the audience, particularly Mr. Busch. It was pointed out that the cost per car for San Francisco was far less than could be done now; also that it was not properly planned, and that the Los Angeles one would have sufficient provisions for ingress and egress, etc.

Mr. Ferrar was then questioned further as to his opinion of whether the neighborhood was deteriorating due to lack of parking facilities. His reply was

"Yes, generally. However, this should be qualified. On the west side of Exposition Park you have an old community of single residence dwellings. On the south side there are more multiple units and schools, as well as U. S. C. on the north, which have a tendency to influence values. Generally, the west side is suffering more than the others."

MR. CONRAD: We must consider the nature of the crowds as a whole—student body and kids are a small part of the capacity crowds. We must take cognizance of fact that community development as a whole is interested in bringing more events to the Coliseum. We certainly should endeavor to bring the 1952 Olympic Games to the Coliseum which will make a problem far greater than the 1932 Olympics.

DON ALLEN: Have you found that the people of this district really want to maintain the Coliseum and enter into an elaborate parking program?

MR. FERRAR: We have made no survey. Expressions of a community as a whole to a newspaper is generally received in two ways. Either personal contact or by letter writing. I have seen very little concrete evidence of either side of the question expressed in either of those ways. We have

had only three or four letters. One businessman of the district has been interested enough to come and ask for back issues which carried the story and go into the plan. Back copies are sold out now.

Mr. Ferrar was excused.

Mr. Ralph Dorsey, Traffic Engineer of the City of Los Angeles was called to the stand, and stated he believed a planned area providing for public parking around the Coliseum would in some way alleviate the situation. He also gave background information to the effect that he has the job of ordering up the "no parking" signs, and that all complaints that come to the city government finally end up on his desk; he therefore felt competent to talk intelligently on this subject because he had answered the complaints. He called to the committee's attention the "purpose of a street" and explained that they came by two means—deeds, and by contractual agreements for a specific purpose

"Every citizen of the State has an inalienable right to use the streets for his purposes. Parking of an automobile is an abatable nuisance. Remember, we have a further premise. Parking is not a right, it is a privilege. Businessmen and residents in this area suffer from Coliseum events at the present time. Section 370 and 373-a of the Penal Code are measures by which this nuisance can be abated. Remember distinctly that these people can enforce it on you in court. Automobiles must be parked off-street.

"To keep the record straight, I take full responsibility for conceiving this project. Back in 1939, because of the problem and the complaints of businessmen and resident property owners, I deemed it advisable to conduct a study to see if this problem could be sensibly approached. The outcome was the recommendation that the responsible agencies acquire and bring into being in a progressive order, three parking lots. (These agencies are the Coliseum Commission, city council, playground commission and board of supervisors.)

"I question seriously whether or not the building of parking lots as suggested will have any immediate effect on property prices. I am mindful of the courts' actions in all condemnations, and I feel that the courts will award a just price by due process of law.

"My original recommendation, in substance was, that the property on Vermont between Exposition and Santa Barbara be acquired as Unit No. 1. Second, I recommended the acquisition of the property north of Santa Barbara from Menlo to Figueroa; and third, the area on the east side of Figueroa which would be adjacent to the freeway. To understand the problem you must understand the habits of people: where they come from, what they are willing to pay, why only the number come who do. The man who attends a Coliseum event cannot afford to come and pay more for parking than he can for the event. Why not face the issue and then march forward. Let's approach this problem in a sensible way, based on facts and facts alone. If these lots are acquired and improved following the lines Mr. Bush said about Pershing Square, so that we can move this crowd under the streets and the upper deck used as advocated by

myself in this report for playgrounds when not used for parking and the lower deck carry under the streets, you can rest assured that it will save more than it will cost, not only to the surrounding property, but to the taxpayer at large.

"It will be the greatest calamity unless the Legislature brings into being during this session two things: (1) Acceptance of Senate Bill No. 5, modified to meet the needs, and (2) approach the off-street parking situation as it should be approached for all the citizens of this State, and particularly the Coliseum. I endorse the principles and the details as disclosed in the press. That is a preliminary plan and may have to be modified. This condition cannot continue.

"Publicity would have no immediate affect on the property values in this immediate vicinity. It is common knowledge that the State of California is to acquire the Harbor Freeway east of Figueroa, and this property to the east would be an integral part of that, and I don't believe it has disturbed values over there to any great extent. Fee ownership can be taken immediately and fair price set by the courts later.

"Heaviest traffic is from the west; smallest from the east. You can acquire ground cheaper than if you buy it and deck it in stories. Best solution is get a minimum amount of ground and deck it, even if it costs more.

"Bill Ackerman of U. C. L. A. and Arnold Eddy of U. S. C. did not see fit to accept my proposal 1941-1943 of a 5-cent rider on each ticket. The average man on the street hasn't had a break in these events. When he can come and park for a reasonable sum of 50 cents, then this Coliseum will give the State or the Coliseum Commission a greater rent. In asking for an increase of 5 cents per ticket, we took from the people $2,000 a game on the basis of 40,000 attendance and we saved them $3,000 a game on the garage charges.

"I would not recommend this parking lot unless I saw it through to a conclusion. Certain public street improvements would be beneficial and necessary. The problem around here is property. Take people on 43d and Vernon—with an 85,000 crowd those people can't even get to their own property. We must prohibit parking on the main arteries and force parking onto secondary streets. We must acquire property either by private capital or by government subsidy. I recommend that it be operated by private capital. People in this neighborhood are wondering whether or not the exits to the parking lots will create a hazard insofar as property is concerned. We should decide what the State should subsidize and then let the plan be subject to the approval of the constituted agencies. If you take these locations separately you will take the one adjacent to the freeway."

The meeting adjourned at 5.15 p.m.

The following communication was received by the committee and was ordered included in this report:

Hon. John W. Evans, Chairman,
Assembly Interim Committee on Traffic and Parking

DEAR SIR: When the Coliseum was erected in 1923 no one could foresee that 85 percent of the large audiences now attending at least 60

major events each year would arrive by their own automobiles. It is established practice now for adequate parking space to be included in plans for fairs, expositions, and sports and recreational facilities. This was not done in the case of the Coliseum or the other facilities in Exposition Park. The result has been a growing parking problem and congestion which interferes seriously with the use of all facilities in the park, deteriorates the use and value of property in the neighborhood, and threatens the very large investment of the State in Exposition Park. This problem has occupied the attention of this board for many years. They have expressed the opinion that it would be a prudent and necessary investment for the State to acquire additional land within the natural environs of the park to help solve the parking problem, to provide healthful and needed recreation facilities, to rescue the land from blight, and to create facilities for the future Olympic Games. We believe the board's decision is fully justified by the survey enclosed herewith.

Respectfully submitted.

LOUIS C. VENATOR, Secretary-Manager
Sixth District Agricultural Association

REPORT OF THE BOARD OF DIRECTORS OF THE SIXTH DISTRICT AGRICULTURAL ASSOCIATION

The need for some remedy to the existing parking and traffic problems has been recognized for some time past, and came to the front during the month as a result of a meeting with Members of the Legislature in January. Concrete action was taken on February 6th when the board instructed that a survey be made and recommendations presented. The detailed steps involved in this survey need not be recounted, but meetings have been held and opinions and advice obtained from many agencies, both official and otherwise, and from individuals having any connection with this problem. This includes some who might be unfavorably affected.

A number of meetings were held with members of the Coliseum Commission, representatives of the board of supervisors, city council, University of Southern California, city traffic engineer, traffic bureau of the police department. Downtown Businessmen's Association, Members of the Legislature, neighboring business and residential groups, and others. Studies were made of land values surrounding the park and the trend of these values, of the cost of diverting the various areas to automobile parking of various types, including underground, surface and overhead, of the probable financial return, and of similar factors.

Early in the survey, it was decided that this problem should be approached as a Sixth District and State Exposition Building matter, rather than as a Coliseum problem. There were several reasons for this. In the first place, it was soon apparent that it would be impossible to offer a complete solution to the Coliseum parking situation, which would involve parking space for a minimum of 18,000 cars and would cost upwards of $10,000,000. It was felt that legislative opinion and instructions as conveyed to representatives of the board during January did

not cover such an expenditure, or even the complete solution of the Coliseum's problems. It was also determined that a request for funds to round out the natural boundaries of the Sixth District's holdings in Exposition Park, and to provide some controlled parking area for various uses, would more nearly fulfill these instructions.

There are additional points in favor of such an approach, such as dealing with the lowest-priced ground in the neighborhood; setting up parking space sufficiently near that it will have constant capacity use and major financial return; and the probability of netting approximately 5 percent on the investment.

Our investigation favors the acquisition of three blocks between Menlo and Vermont, from Exposition Boulevard to Santa Barbara Avenue.

I. Specific reasons for selection of this area:

a. The cost of this area is considerably less than that of other adjacent sections, totaling $2,901,288 for purchase and conversion into parking areas, with a capacity of slightly over 5,000 cars. This breaks down to a cost of approximately $550 per car, whereas areas to the south and east of the park would cost $600 to $900 per car space because of the more valuable frontage and more expensive improvements.

b. This area is the closest available space to the Coliseum, to the Museum and the State Exposition Building. It is also nearest to the University of Southern California.

c. Acquiring this area rounds out the natural boundaries of the park, making it extend from one major traffic artery to another

d Acquisition of land, removal or demolition of present structures, conversion into parking space, and condemnation costs will be close to the $3,000,000 tentatively set as the amount obtainable.

e. The area is very largely unimproved or is used for inferior purposes and is generally deteriorating. Acquisition of this space would serve to check deterioration and to a considerable extent would improve the general level of the neighborhood.

f. Acquisition of the area at this time will be of considerable assistance in obtaining and accommodating the Olympic Games in 1952. Several of the larger apartment houses, for example, could be used for housing athletes at that time.

g. Acquisition of this specific area meets with less objection from businessmen and property owners than would be the case with any other available area. Some landscaping and possible part-time use as playgrounds would mean an improvement in the general appearance of the area and consequent improvement in surrounding private property values.

h. The area is adaptable to a wider use than other areas. Its proximity to the Museum and Exposition Building, and the U. S. C., means that considerable use could be made of portions of it for parking purposes even during the week. The remainder could be set up as playgrounds, of which there are insufficient in this area.

II. Description of the acreage involved:

As shown on Chart No. 2 attached, the area is devoted to approximately 35 percent residential and 25 percent business use. The remainder is vacant. Of the business buildings, at least half are badly deteriorated or are devoted to inferior uses. Nearly the same percentage holds true in the buildings devoted to residential use. The total area is 18 17 acres, with only a half-dozen structures of sufficient value to justify their continued use, even if they are owned and operated by the district. As soon as the housing shortage is over, a progressive plan for removing the other structures over a several years period can be instituted.

III. Operation:

a. Charts Nos. 4 and 5 show the ultimate operation. They also show the number of cars that can be handled and the estimated expense and income.

b. Capacity use: It is obvious that with any reasonable price range, this limited area will be filled to capacity for a minimum of 65 Coliseum events per year. With regard to the price range, witnesses at a recent legislative committee hearing stated as their opinion that $2 was not an excessive price. However, the district would obviously be criticized, as a public body, for charging this much. A maximum of $1 is recommended for big events, with 75 cents and even 50 cents for smaller events. No estimated profit is set up for weekday operation, as students will probably not be able to pay much more than operation costs, and it may be found advisable to give free parking to visitors to this building.

c. Financial data: The attached Chart No. 3 sets up the best available estimate covering acquisition costs (This is based on the city practice of multiplying assessed valuation by five for land and by seven for improvements.) Charts Nos. 4 and 5 show estimated operating costs and probable returns. It will be noted that the survey provides for one attendant for every 50 cars, whereas normal downtown procedure is one man for every 100 cars. This is done because of the pressure which results from heavy crowds coming and going in a limited time. The figures do not take into account the loss which will probably occur as a result of attendants withholding cash, but every other factor has been set up at a very unfavorable level. It will be further noted that even viewing the project in this light, the net for the 75-cent average parking fee for 65 events would be nearly, or possibly a little more than, $150,000, or approximately 5 percent.

d. Consolidation of existing independent parking lots under one management and the addition of more space does not change the existing traffic situation to any extent, and there will still be a serious problem involved in handling cars on the streets. However, officials of the police department believe that it will be possible to work out a plan whereby cars coming from and returning to certain sections of the city can be grouped in the same section of the

auto park, and that they can be handled as groups when leaving the auto park. This will be of some assistance in clearing the immediate vicinity.

IV. Alternative operating plans: There are three possible ways of handling this project:

a. District management and operation.

b. Full concession.

c. Operation on a percentage basis.

Private parking lot operators would be glad to bid on a concession, but we are informed that 50 percent of the net would be the average bid. This would reduce the income considerably, even despite handicaps and inefficiencies which are said to result from governmental operation. It might be possible to find an honest operator who would manage the project for a smaller percentage of the net, providing the district paid all operating expenses and took all other responsibility. It has not yet been possible to investigate this possibility.

Relative to the Codification of the Unemployment Insurance Act

WHEREAS, The Assembly Standing Committee on Finance and Insurance has before it for consideration Assembly Bills 2046 to 2050, inclusive, which bills were prepared by the California Code Commission to codify the Unemployment Insurance Act containing the laws relating to unemployment and disability compensation, and the State System of Public Employment Offices; and

WHEREAS, The general interest of all workers and employees throughout the State in such laws, and the recurrent need for changes in such laws during the formative period in this relatively new field of legislation renders it highly desirable that such laws be made available in code form at the earliest possible date; and

WHEREAS, It appears desirable to devote further study to this proposed codification to enable the Legislature to fully consider the proper allocation of this act and its component parts in the codes of this State, and to avoid any unintended substantive changes that such study may disclose; now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly Standing Committee on Finance and Insurance, acting as an interim committee pursuant to House Resolution 62 of the current General Session, the Code Commission and the Department of Employment are directed to continue with the work of codification on this subject, conferring in the process with all persons and groups who may be interested, and desirous of collaborating thereon, and to report to the Assembly at the beginning of, or prior to, the 1949 General Session.

CONSIDERATION OF HOUSE RESOLUTION NO. 193

House Resolution No. 193

Relative to planting of trout

WHEREAS, The Fish and Game Commission is authorized by the Fish and Game Code to stock the waters of this State with fish, without any restrictions as to size or age; and

WHEREAS, The commission in carrying out its duties must use its judgment as to the size of fish to be planted in the various sections of the State in order to conform to varying climatic conditions; and

WHEREAS, The commission is and has been planting catchable trout of a size of six or eight inches in length, particularly in the relatively warmer waters of the southern part of the State and in doing so has exercised commendable judgment and has acted not only within the language of the law but also within its spirit, which is to extend the benefits of recreation to all of the people of the State; and

WHEREAS, The planting of fish in the southern part of the State brings to the people of the State's most populous area a chance to fish without traveling great distances at an expense prohibitive to most citizens; and

WHEREAS, Such planting of fish encourages many of the people of the State to buy sporting fishing licenses who otherwise would not do so, and thereby supplies the funds to pay for such planting; and

WHEREAS, The sportsmen of the State have expended millions of dollars for the propagation of fish, and the erection and operation of hatcheries and breeding ponds, and it has never been intended that the activities of the commission should be restricted to stocking the remote mountain streams but rather that the commission should stock all of the waters of the State with such fish as were suitable to the particular waters and in such manner as to spread the benefits as widely as possible throughout the State; and

WHEREAS, The planting of sizeable fish is, by law, a matter which is within the discretion of the commission, and in planting such fish, particularly in the southern waters, it has conformed to the wishes of the sportsmen's associations of the areas involved and has done its best to perform its duties in conformity with the law, and should continue to plant fish of such size as it finds to be suitable to the waters in which planted and so as to stock the waters of all of the State with such fish as it determines to be appropriate in view of the climatic and other features involved; and

WHEREAS, The Senate of the State of California has adopted a resolution of a tenor quite contrary to this resolution, whereby it seeks to control the discretion conferred by law upon the commission in relation to stocking the waters of this State with fish; and

WHEREAS, Said Senate resolution does not express the views of this Assembly and is of no legal or operative effect and therefore should be disregarded; now, therefore, be it

Resolved by the Assembly of the State of California, That the Fish and Game Commission is commended for its activities in planting and propagating fish and is particularly commended for its activities in planting catchable trout in the southern waters of the State and thereby bringing an opportunity for healthful recreation to thousands of people to whom it would otherwise be denied; and be it further

Resolved, That the Fish and Game Commission is urged to continue to administer the provisions of law relating to the planting of fish in such manner as the commission in its own judgment determines to be appropriate, and it is particularly urged not to discontinue the planting of catchable fish in the southern waters of the State; and be it further

Resolved, That copies of this resolution be transmitted to the Chief Clerk, to the Governor of California and to the members and Executive Officer of the Fish and Game Commission.

Resolution read.

Demand for Previous Question

RESOLUTIONS

The following resolution was offered:

By Messrs. Cooke, Anderson, Elliott, Cramer, Robertson, Waters, Luckel, Hahn, Miller, Huyck, Mrs. Niehouse, Messrs. Ralph C. Dills, and Maloney:

House Resolution No. 196

Relative to adjournment in respect to the memory of Brigadier General Evans F. Carlson

WHEREAS, The entire Nation today mourns the death of Brigadier General Evans F. Carlson, in Portland, Oregon, May 27, 1947, bringing to a close the career of one of America's most noted soldier heroes and militant advocate of world peace; and

WHEREAS, Evans F. Carlson was born in Sidney, New York, on February 26, 1896, and at the age of 16 left school to enlist in the United States Army, beginning the military career to which he was to devote his life. He served in the Philippines and Hawaii, and was discharged with the rank of First Sergeant, only to reenlist the following year when the United States entered World War I.

In 1922 he enlisted in the Marine Corps and began the long and distinguished service which took him to Nicaragua in 1930 where his courage and skill against marauding bandits restored order and twice won for him the Navy Cross.

In 1937 he went to China as a military observer with the Chinese forces, and there became impressed with the danger of Japanese aggression. Resigning his commission as a Marine Captain, he wrote and lectured to make known the conditions in the Far East, returning to the service when the entry of the United States into World War II became inevitable.

It was in this service in the Pacific where the qualities of Evans F. Carlson became known to the world. The Marine's Marine, the fighting man, he put all his great heart into the struggle, and organized and led the raid on Makin Island in 1942 in which the Japanese installations and supplies were completely destroyed. The spectacular success of this raid made it the first of a long series of such raids in the Pacific in which his forces gained fame as Carlson's Raiders, their daring and devastating destruction of Japanese reserves contributing greatly to halting the Japanese advance and hastening the end of the war.

Retired as a Brigadier General in 1946 for physical disabilities resulting from this great service, Evans F. Carlson held 21 military decorations, including the Purple Heart with Oak Leaf Cluster, his name ringing round the world with those of Guadalcanal, Tarawa, and Saipan; and

WHEREAS, In retirement, General Carlson turned all his energies and magnificent spirit to the fight for world peace, pleading for international understanding and amity as the only means to insure peace; now, therefore, be it

Resolved by the Assembly of the State of California, That when this Assembly this day adjourns it do so out of respect to the memory of Brigadier General Evans F. Carlson of the United States Marines; and be it further

Resolved, That the Chief Clerk of the Assembly transmit suitably prepared copies of this resolution to the widow of General Carlson, Mrs. Peggy Tatum Whyte Carlson, and to his sons, Evan Charles and Tony Carlson, as a token of the esteem and respect of this Assembly for a great Soldier and Marine, and an expression of sympathy in the loss of a beloved husband and father.

Resolution read, and adopted unanimously by a rising vote.

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, May 29, 1947

To the Assembly of the State of California
Sacramento, California

GENTLEMEN: I am transmitting to you herewith a copy of a message with reference to Assembly Bill No. 1418, entitled, "An act to amend Section 1126 of the Probate Code, relating to the administration of trusts."

This bill, with my message relative thereto, I (through my Legislative Secretary) delivered to Arthur A. Ohnimus, Chief Clerk of the Assembly, at 4 30 o'clock p m. on the twenty-eighth day of May, 1947, at which time your honorable body had adjourned for the day but not for the session.

EARL WARREN, Governor

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, May 29, 1947

To the Assembly of the State of California
Sacramento, California

GENTLEMEN: I am transmitting to you herewith a copy of a message with reference to Assembly Bill No. 6, entitled, "An act to add Section 5662 to the Elections Code, relating to the rights of the occupant of a house which is situated on a precinct line."

This bill, with my message relative thereto, I (through my Legislative Secretary) delivered to Honorable Gordon R. Hahn, Member of the Assembly, at 9 30 o'clock p.m. on the twenty-eighth day of May, 1947, at which time your honorable body had adjourned for the day but not for the session.

Respectfully submitted.

EARL WARREN, Governor

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, May 27, 1947

To the Honorable Members of the Assembly
State of California, Sacramento, California

GREETINGS: I am returning herewith, without my signature,

Assembly Bill No. 1418, entitled: "An act to amend Section 1126 of the Probate Code, relating to the administration of trusts."

My objections to this bill are as follows:

I am informed that it was the intention of this bill to broaden the powers of the court to designate a successor trustee by including contingencies causing a vacancy not now covered by our laws. Inadvertently, by referring to the "designated" trustee, the effect has been to limit rather than broaden the powers of the court, and to remove from the court all authority to fill a second vacancy which might occur by reason of the death or resignation of a trustee appointed by the court after the death or resignation of the trustee designated in the trust instrument. Because of this inadvertent limiting of the powers of the court, both the sponsor and the author of the bill have asked that I withhold my approval.

Accordingly, I am returning the bill without my signature.

Respectfully submitted.

EARL WARREN, Governor

Assembly Bill No. 1418 ordered to unfinished business file.

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, May 28, 1947

To the Honorable Members of the Assembly
State of California, Sacramento, California

GREETINGS: I am returning herewith, without my signature,

Assembly Bill No. 6, entitled: "An act to add Section 5662 to the Elections Code, relating to the rights of the occupant of a house which is situated on a precinct line."

My objections to this bill are as follows:

This measure is opposed by the County Clerks' Association, which advises me that there is no general need for it and that its enactment would lead to confusion in the offices of the county clerks and the registrars of voters of our State.

This view is concurred in by the Registrar of Voters of Los Angeles who states that this measure would cause confusion in his office. It seeks to permit an elector residing in a house situated on a precinct line to elect in which precinct he desires

to cast his vote. No time limit is expressed and presumably the choice could be made after the affidavits had been arranged in precinct groups and indices printed for any election.

I do not believe that there is sufficient advantage which might arise from this bill to justify a step which would cause this confusion in connection with the administration of our election machinery.

Respectfully submitted.

EARL WARREN, Governor

Assembly Bill No. 6 ordered to unfinished business file.

PROCEEDINGS DURING RECESS

Mr. Allen presided, and requested Mr. Hinton to offer the invocation. His invocation was as follows:

Invocation Offered by Mr. Hinton

Almighty God, giver of all victories, we come before Thee in the shadow of Memorial Day, thankful for the peace that abides in our land; for Thy guidance in the hour of peril and Thy tender love in times of need. Help us to remember with reverence the valor and devotion of the men and women of our Nation who served our Country's flag and gave their lives that America may be free. Not only those whose bodies consecrate our Country's soil but also those who sleep beyond the seas and those others whose resting places shall not be known until the last day when the deep shall have given up its dead. Oh, Father, teach us to honor them by ever cherishing the ideals for which they fought. In love, loyalty and devotion may we continue worthy of their sacred memory; in Thy name we pray—AMEN.

Then presiding Chairman Allen called upon Mr. Huyck to read the following Memorial Day order, issued by Major General John A. Logan, U. S. Army.

Logan's Memorial Day Order as Read by Mr. Huyck

HEADQUARTERS, GRAND ARMY OF THE REPUBLIC
WASHINGTON, D. C., MAY 5, 1868

I. The thirtieth day of May, 1868, is designated for the purpose of strewing with flowers or otherwise decorating the graves of the comrades who died in defense of the Country during the late Rebellion and those bodies now lie in almost every city and village, and hamlet courtyard in the land. In this observance no form or ceremony is prescribed, but post and comrades will in their own way arrange such fitting services and testimonials of respect as circumstances may permit.

We are organized, comrades, as our regulations tell us for the purpose, among other things, "Of preserving and strengthening those kind fraternal feelings which have bound together the Soldiers, Sailors, and Marines, who united to suppress the late Rebellion." What can aid

more to assure this result than by cherishing tenderly the memories of our heroic dead, who made their breasts a barricade between our Country and its foes? Their Soldier lives were the reveille of freedom to a race in chains and their death a tatoo of rebellious tyranny in arms. We should guard their graves with sacred vigilance. All that the consecrated, wealth and taste of the Nation can add to their adornment and security is but a fitting tribute to the memory of her slain defenders. Let no wanton foot tread rudely on such hallowed ground. Let pleasant paths invite the coming and going of reverent visitors and fond mourners. Let no vandalism or avarice or neglect, no ravages of time, testify to the present or to the coming generations that we have forgotten as a people the cost of a free and undivided republic.

If other eyes grow dull and other hands slack, and other hearts cold in the solemn trust, ours shall keep it well as long as the light and warmth of life remains to us. Let us then, at the time appointed, gather around their sacred remains and garland the passionless mounds above them with the choicest flowers of springtime: Let us raise above them the dear old Flag they saved from dishonor: Let us in the solemn presence renew our pledges to aid and assist those whom they have left among us a sacred charge upon the Nation's gratitude—the Soldier's and Sailor's widow and orphan.

II. It is the purpose of the Commander in Chief to inaugurate this observance with the hope that it will be kept up from year to year, while a survivor of the war remains to honor the memory of his departed comrades. He earnestly desires that the public press to call attention to this order, and lend its friendly aid in bringing it to the notice of comrades in all parts of the Country in time for simultaneous compliance therewith.

III. Department commanders will use every effort to make this order effective.

By Commander

JOHN A. LOGAN, Commander in Chief

Mr. Allen then asked Speaker pro Tempore Maloney, on behalf of all mothers and fathers whose sons and daughters served in all wars, to deliver the principal address. It follows:

Address by Speaker Pro Tempore Maloney

Memorial Day

"Gather the garlands rare today,
Snow-white roses and red roses;
Gather the fairest flowers of May,
Heap them up on the graves of clay,
Gladden the graves of the noble dead.
This day the friends of the Soldiers keep,
And they will keep it through all the years,
To the silent city where Soldiers sleep
Will come with flowers, to watch and weep
And water the garlands with their tears."

We set aside these minutes and hours of the American Memorial Day observance, originally, as an occasion for the decoration of the Soldiers killed in the armed conflict between the states, because it has developed a broader purpose in the course of the years, and is now observed as a general day of remembrance.

This is a beautiful custom, always characterized by the reverend participation of the American people, and always, the source of great solace and comfort to those who have suffered bereavement, either recently, or in a receding time to which only memory remains as a bond.

We commemorate this Memorial Day without a parallel in our history. The most costly and bloody phase of this gigantic World War has ended, and a gratified Nation pauses to honor the countless martyrs of freedom.

It is appropriate to voice our gratitude, with the Soldiers whose fighting is ended, with the families whose anxiety is over, with the prisoners who are liberated, and with the lands now freed from the Nazi cruelty, and tyranny.

Tomorrow we strew our flowers as in the yester years, over the grassy mounds of the veterans, who fought to preserve the Union, and the gallant company, who fought to rid this continent of Spanish despotism. We pay our tribute, to that greater company of our heroes who died upon the first foreign battlefields in World War I, to make the world safe for democracy. We look away to Europe, and see with the eyes of the imagination, those vast cemeteries of crosses, where repose the hallowed dead.

Tomorrow, we celebrate another heroic throng, who crossed the distant oceans to protect our institutions, to destroy the despotism that threatened the very survival of civilization. Wherever their bodies shall lie, there shall be a part of America, forever sacred to our memory.

"On Fame's Eternal Camping Ground,
Their silent tents are spread,
And glory guards with solemn tread
The bivouac of the dead."

In this hour, we honor the services of the Infantry who bore the brunt of battle and had to fight the last bloody conflict. Think how they came fresh from school, or field, with never a thought of having to fight a war, and see how they became the effective soldiers, of the world.

We could better understand the debt we owe them, if we could see them tramping, often weary and footsore, creeping through jungle forests, or climbing steep hills, and facing without fear the shrieking shell and roar of battle.

It is fitting to remember the heroes of the Air who were the first to assail the fortress of Europe. They, too, came from the field and the city, and with a daring that astonished the world, climbed up on their winged horsemen to fight the fanatic foe in the clouds.

We aim today our rifles in reverent salute up to the skies for all that unknown host, who passed forever out of sight by the way of the burning planes.

In this hour we pay our tribute to the heroes of the Sea, whose marvelous service in transporting and protecting the millions of service

men, was the wonder of the world. They, too, came from the green fields, having never seen the ocean, but in Arctic and Tropic seas, they became the conquering host of Liberty. But the tears come to our eyes and our hearts tremble when we think of the daring Marines, who made Tarawa famous and who lie in many unknown watery graves.

We pause in reverence and in prayer, for the gallant sons and daughters of our great Navy, who made the supreme sacrifice, so that you and I may live. Is it any wonder, that this great Nation pauses to honor its hero dead?

Memorial Day is a sacred national holiday, filled with loving memories.

The Flag is half-mast.

The loom is hushed and the wheels of industry stand still.

America, with loving hands, decorates the graves of our martyred dead.

Their sacrifice was glorious, tender, and blessed.

They died for freedom, fought for faith and fireside, for honor and justice.

However, there seems to be wondrous powers in remembrance, even miraculous powers. They are not always sensed immediately, while the pain of separation is sharp, and only the place made vacant seems real, but after a while the healing power of memory begins its lovely service.

There comes stealing back into the anguished mind, a recollection of pleasant incidents and of many happy associations, which bring release from the feeling of finality in death's grim intrusion.

Somehow there is a special grace in the manner of this release. It makes only those things live again in memory, which are good to remember, which bridge the years back to a long cherished happiness, bringing comfort and peace.

It is a tender and intimate experience.

It is gentle and kind. Words spoken with affection are heard again.

Beautiful days, happy years, lives spent together with understanding and appreciation, successes shared with pride and satisfaction, failures shared with patience and courage, virtues honored and faults forgiven. These are the things which come alive again under the marvelous spell of remembrance.

Never were lines more truly written than these:

> "They are not dead who live in lives they leave behind;
> In those whom they have blessed, they live a life again."

So, my colleagues and friends, it is not the flowers we place upon the graves in which our loved ones rest, it's not the tears we shed for them, not the poignant sadness of bereavement or the dull pain of separation, but the power and grace of the miracle of remembrance that reflect the spirit of "Memorial Day."

Surely Memorial Day is a sacred day, and the observance of it is a sacred duty.

Let us all pray that everlasting peace may permeate forevermore. Let us pray that we have seen the last of deadly conflicts and war. Let us pray that America, after hard fought victories continues to maintain her place among the nations of the world.

Let America give thanks to Almighty God for the victories He has granted us.

Let us give reverent honor to the American Soldier, who gave his life for God and Country.

May their souls and all of the souls of the faithful departed through the mercy of God, rest in peace.

Mr. Allen closed the service with the following remarks and benediction:

Remarks by Mr. Don Allen

I believe there is no more fitting benediction than the one given at the memorial services held at the cemetery, when the fighting at Iwo Jima ended, by Navy Lieutenant Roland B. Gittelsohn, a Jewish chaplain, who uttered these solemn words, and I quote:

"This is perhaps the grimmest, and surely the holiest task we have faced since D-day. Here, before us lie the bodies of comrades and friends. Men who until yesterday or last week laughed with us, joked with us, trained with us. Men who were on the same ships with us, and went over the sides with us as we prepared to hit the beaches of this island Men who fought with us and feared with us. Somewhere in this plot of ground there may lie the man who could have discovered the cure for cancer. Under one of these Christian crosses, or beneath a Jewish Star of David, there may rest now a man who was destined to be a great prophet—to find the way, perhaps, for all to live in plenty, with poverty and hardship for none. Now they lie here silently in this sacred soil, and we gather to consecrate this earth in their memory.

"It is not easy to do so. Some of us have buried our closest friends here. We saw these men killed before our very eyes. Any one of us might have died in their places. Indeed, some of us are alive and breathing at this very moment only because men who lie here beneath us had the courage and strength to give their lives for ours. To speak in memory of such men as these is not easy. Of them too can it be said with utter truth: 'The world will little note nor long remember what we say here. It can never forget what they did here.'

"No, our poor power of speech can add nothing to what these men and other dead who are not here have already done. All that we even hope to do is follow their example. To show the same selfless courage in peace that they did in war. To swear that by the grace of God and the stubborn strength and power of human will, their sons and ours shall never suffer these pains again. These men have done their job well. They have paid the ghastly price of freedom. If that freedom be once again lost, as it was after the last war, the unforgivable blame will be ours, not theirs. So, it is we the living who are here to be dedicated and consecrated.

"Too much blood has gone into this soil for us to let it lie barren. Too much pain and heartache have fertilized the earth on which we stand. We here solemnly swear: This shall not be in vain! Out of this, and from the suffering and sorrow of those who mourn this, will come —we promise—the birth of a new freedom for the sons of men everywhere—AMEN."

In memory of the men of all faiths, Jews, Gentiles, Catholics, and Protestants who have served with me during the privations and dangers of war, and symbolic of the differences of faith of the Members of this Legislature who have served with me, I present this flag base to proudly hold the Flag of our Nation.

As you will notice it is symbolic of our American way of life. Intermingled with the Star of David is the Cross of the Christian Faith. May the same unity prevail in our every day life that was so magnificently displayed during our years of peril in our last war.

I now give into the keeping of the Speaker pro Tempore of the Assembly this parting gift so that it may be a memorial each day in the future years ahead.

REQUEST FOR UNANIMOUS CONSENT TO PRINT STATEMENT

Mr. Kilpatrick asked for, and was granted, unanimous consent that he be permitted to print the following statement in the Journal:

STATEMENT RELATIVE TO THE DEPARTMENT OF SOCIAL WELFARE—THAT IT IS FAIRLY AND EFFICIENTLY ADMINISTERED

The June issue of the National Pension Advocate in front page headlines states, "Kilpatrick scores Wollenberg; charges State Director unfit."

My answer is that the statement goes altogether too far. While certifying that I have scored the Department of Social Welfare for actively opposing legislation intended to better conditions for those coming under its program, I have repeatedly,

in committee, and out, declared that the department is better administered than ever before—that clients are given their lawful rights.

Any statement that I have referred to Charles M. Wollenberg as unfit, is the opposite of the truth.

"SEC. 2. Section 1268 of said code is amended to read:

1268. The Attorney General shall, from time to time, commence actions on behalf of the State for the purpose of having it adjudged that title to real or personal property to which the State has become entitled by escheat, has vested in the State, and for the purpose of having it adjudged that property has been actually abandoned or that the owner thereof has died and there is no person entitled thereto and the same has escheated and vested in the State; provided, however, that any action for the escheat of real or personal property under the provisions of the Alien Land Law, as amended, may be instituted and prosecuted by the Attorney General or by the district attorney of the county in which such real or personal property is situated. Such actions shall be brought in the Superior Court for the County of Sacramento; except that if any real property covered by the petition is not situated in the County of Sacramento, an action respecting the real property shall be commenced in the superior court for the county in which such real property, or any part thereof, is situated; provided further, that any action for the escheat of real or personal property under the provisions of the Alien Land Law, as amended, shall be commenced and prosecuted in the superior court for the county in which such real or personal property is situated.

Such action shall be commenced by filing a petition. The provisions of Section 1269 of this code, relating to the facts to be set forth in the petition, joinder of parties and causes of action, and the provisions of Section 1271 of this code, relating to appearances and pleadings, shall be applicable to any proceeding had under this section; provided, however, that in any action for the escheat of real or personal property under the provisions of the Alien Land Law, as amended, all of the provisions of the Alien Land Law, as amended, relating to the commencement and prosecution of such actions shall have the same effect as though incorporated in the provisions of this section, and the provisions of Section 1269 of this code, relating to the facts to be set forth in the petition, joinder of parties and causes of action, and the provisions of Section 1271 of this code relating to appearances and pleadings, shall, insofar as they are applicable, cover such actions.

Upon the filing of the petition, the court shall make an order requiring all persons interested in the property or estate to appear on a day not more than 90 days or less than 60 days from the date of the order and show cause, if any they have, why title to the property should not vest in the State of California.

Service of process in such actions shall be made by delivery of a copy of the order, together with a copy of the petition, to each person who claims title to any

property covered by the petition and who is known to the Attorney General or the State Controller or who has theretofore filed in the office of the State Controller a written request for such service of process, stating his name and address, including street number, or post-office box number, if any, and by publishing the order at least once a week for four successive weeks in a newspaper published in the county in which the action is filed, the last publication to be at least 10 days prior to the date set for the hearing.

Upon completion of the service of process as provided in this section, the court shall have full and complete jurisdiction over the estate, the property, and the person of everyone having or claiming any interest in the property, and shall have full and complete jurisdiction to hear and determine the issues therein, and to render an appropriate judgment.

In addition to the foregoing publication of the order, a notice shall be given by publication, at least once a week for four successive weeks in a newspaper published in the county from which the property was forwarded to the State Treasury or is situated, of each estate and item of property from such county or situated in such county in excess of one thousand dollars ($1,000). Such notice shall state that a petition has been filed and an order made as hereinbefore provided and shall list each estate and item in excess of one thousand dollars ($1,000) and show the amount of the property if money, or a description thereof if other than money, and the name of the owner or claimant and his last known address, if known. Any omission or defect in the giving of such additional notice shall not affect the jurisdiction of the court.

If it appears from the facts found or admitted that the State is entitled to the property or any part thereof mentioned in the petition, judgment shall be rendered that title to such property or part thereof, as the case may be, has vested in the State by escheat.

Within five years after judgment of escheat to the State in any proceeding had under this title, except judgment in proceedings for the escheat of real or personal property under the provisions of the Alien Land Law, as amended, any person not a party or privy to such proceeding may file a petition in the Superior Court of the County of Sacramento, showing his claim or right to the property, or the proceeds thereof. A judgment of escheat to the State rendered pursuant to the provisions of the Alien Land Law, as amended, shall vest both legal and equitable title to the escheated property absolutely in the State, any other provisions of this title notwithstanding.

No costs of suit shall be allowed against any party in any action or proceeding had under this section."

DICKEY, Chairman

CONSIDERATION OF HOUSE RESOLUTION NO. 162 BY UNANIMOUS CONSENT

House Resolution No. 162

Relative to the maintenance of satisfactory flows in the Klamath River for the preservation and maintenance of steelhead and salmon

WHEREAS, The people of the State of California by initiative act in 1924 set aside that portion of the Klamath River and the waters thereof, following its meanderings from the confluence of the Klamath River and the Shasta River in the County of Siskiyou to the mouth of the Klamath River in Del Norte County as a district in which the construction and maintenance of dams or other artificial obstructions was prohibited; and

WHEREAS, This prohibition was made in order to provide for the movement of steelhead and salmon from the ocean to their spawning grounds and for the movement of young steelhead and salmon from the spawning grounds to the ocean; and

WHEREAS, This objective is in large part nullified by the operation of the hydroelectric plant of the California-Oregon Power Company, known as the Copco Plant, located approximately 18 miles upstream from the mouth of the Shasta River, and arises from the intermittent operation of said plant which permits a satisfactory flow of water in the Klamath River only at certain times of each day when said plant is operated for the production of electric power This causes daily fluctuations in the flow of the river which vary from less than 100 cubic feet of water per second to over 2,000 cubic feet of water per second, and which thus causes the loss of thousands of fish by stranding; and

WHEREAS, It appears that the operations of the Copco Plant might be modified so as to reduce said fluctuations to a satisfactory degree, or a regulating dam might be constructed on the Klamath River between the Copco Plant and the mouth of the Shasta River; now, therefore, be it

Resolved by the Assembly of the State of California, That a request be directed to the Public Utilities Commission of California, asking it to prepare and supply a report as to whether it would be more practical and economically feasible to require the California-Oregon Power Company to modify their operations or to construct a regulating dam to reduce the present average daily range of artificial fluctuations of the flow of the Klamath River by not less than 50 percent, and that the Public Utilities Commission be requested to submit a report in response to the above request to the Assembly Interim Committee on Fish and Game not later than January 1, 1948; and be it further

Resolved, That the Chief Clerk of the Assembly be directed to transmit a copy of this resolution to the Public Utilities Commission of California.

Resolution read, and adopted.

Assembly Constitutional Amendment No. 18

A resolution to propose to the people of the State of California an amendment to the Constitution of said State by amending Section 8 of Article XI thereof, relating to the adoption of charters by cities, and cities and counties.

Resolved by the Assembly, the Senate concurring, That the Legislature of the State of California at its Fifty-seventh Regular Session commencing on the sixth day of January, 1947, two-thirds of the members elected to each of the two houses of said Legislature voting therefor, hereby proposes to the people of the State of California that the Constitution of said State be amended by amending Section 8 of Article XI thereof, to read as follows:

SEC. 8. (a) Any city or city and county containing a population of more than 3,500 inhabitants, as ascertained by the last preceding census taken under the authority of the Congress of the United States or of the Legislature of California, may frame a charter for its own government, consistent with and subject to this Constitution; and any city or city and county having adopted a charter may adopt a new one. Any such charter may be framed by a board of 15 freeholders chosen by the electors of such city or city and county, at any general or special election, but no person shall be eligible as a candidate for such board unless he shall have been, for the five years next preceding, an elector of said city or city and county. An election for choosing freeholders may be called by a two-thirds vote of the legislative body of such city or city and county, and on presentation of a petition signed by not less than 15 percent of the registered electors of such city or city and county, the legislative body shall call such election at any time not less than 30 nor more than 60 days from date of the filing of the petition. Any such petition shall be verified by the authority having charge of the registration records of such city or city and county and the expenses of such verification shall be provided by the legislative body of such city or city and county.

(b) Candidates for the office of freeholders shall be nominated either in such manner as may be provided for the nomination of officers of the municipal or city and county government or by petition, substantially in the same manner as may be provided by general laws for the nomination by petition of electors of candidates for public offices to be voted for at general elections.

(c) At such election the electors shall vote first on the question "shall a board of freeholders be elected to frame a proposed new charter?" and secondly for the candidates of the office of freeholder. If the first question receives a majority of votes of the qualified voters voting thereon at such election, the 15 candidates for the office of freeholder receiving the highest number of votes shall forthwith organize as a board of freeholders, but if the first question receives less than a majority of the votes of the qualified voters voting thereon at such election no board of freeholders shall be deemed to have been elected.

(d) The board of freeholders shall, within one year after the result of the election is declared, prepare and propose a charter for the government of such city or city and county. The charter so prepared shall be signed by a majority of the board of freeholders and filed in the office of the clerk of the legislative body of said city or city and county. The legislative body of said city or city and county shall, within 15 days after such filing, cause such charter to be published once in the official newspaper of said city or city and county and each edition thereof, during the day of publication (or in case there be no such official newspaper, in a newspaper of general circulation within such city or city and county and all the editions thereof issued during the day of publication) and in any city or city and county with over 50,000 population shall cause copies of such charter to be printed in convenient pamphlet form and in type of not

less than 10 point and shall cause copies thereof to be mailed to each of the qualified electors of such city or city and county, and shall, until the day fixed for the election upon such charter, advertise in one or more newspapers of general circulation in said city or city and county a notice that copies thereof may be had upon application therefor.

(e) Such charter shall be submitted to the electors of such city or city and county at a date to be fixed by the board of freeholders, before such filing and designated on such charter, either at a special election held not less than 60 days from the completion of the publication of such charter as above provided, or at the general or municipal election next following the expiration of said 60 days.

(f) As an alternative, the legislative body of any such city or city and county, on its own motion may frame or cause to be framed, a proposed charter and submit the proposal for the adoption thereof to the electors at either a special election called for that purpose or at any general or special election. Any charter so submitted shall be advertised in the same manner as herein provided for the advertisement of a charter proposed by a board of freeholders, and the election thereon held at a date to be fixed by the legislative body of such city or city and county, not less than 40 nor more than 60 days after the completion of the advertising in the official paper, or at the general or municipal election next following the expiration of said 60 days.

(g) If a majority of the qualified voters voting thereon at such general or special election shall vote in favor of such proposed charter, it shall be deemed to be ratified, and shall be submitted to the Legislature, if then in session, or at the next regular or special session of the Legislature. The Legislature shall by concurrent resolution approve or reject such charter as a whole, without power of alteration or amendment; and if approved by a majority of the members elected to each house it shall become the organic law of such city or city and county and supersede any existing charter and all laws inconsistent therewith. One copy of the charter so ratified and approved shall be filed with the Secretary of State, one with the recorder in the county in which such city is located, and one in the archives of the city, and in the case of a city and county one copy shall be filed with the recorder thereof, and one in the archives of such city and county; and thereafter the courts shall take judicial notice of the provisions of such charter.

(h) The charter of any city or city and county may be amended by proposals therefor submitted by the legislative body thereof on its own motion or on petition signed by 15 percent of the registered electors, or both. Such proposals shall be submitted to the electors at either a special election called for that purpose or at any general or special election. Petitions for the submission of any amendment shall be filed with the clerk of the legislative body of the city or city and county. The signatures on such petitions shall be verified by the authority having charge of the registration records of such city or city and county, and the expenses of such verification shall be provided by the legislative body of such city or city and county. If such petitions have a sufficient number of signatures the legislative body of the city or city and county shall so submit the amendment or amendments so proposed to the electors at the time of the holding of the next general or municipal election held not less than 90 days from the date of the filing of such petition. Amendments proposed by the legislative body and amendments proposed by petition of the electors may be submitted at the same election. The amendments so submitted shall be advertised in the same manner as herein provided for the advertisement of a proposed charter, and the election thereon, held at a date to be fixed by the legislative body of such city or city and county, not less than 40, and not more than 60, days after the completion of the advertising in the official paper, or at the general or municipal election next following the expiration of said 60 days.

(i) If a majority of the qualified voters voting on any such amendment vote in favor thereof, it shall be deemed ratified, and shall be submitted to the Legislature if then in session, or at the regular or special session next following such election; and approved or rejected without power of alteration in the same manner as herein provided for the approval or rejection of a charter.

(j) In submitting any such charter or amendment separate propositions, whether alternative, or conflicting, or one included within the other, may be submitted at the same time to be voted on by the electors separately, and, as between those so related, if more than one receive a majority of the votes, the proposition receiving the largest number of votes shall control as to all matters in conflict. It shall be competent in any charter framed under the authority of this section to provide that the municipality governed thereunder may make and enforce all laws and regulations in respect to municipal affairs, subject only to the restrictions and limitations provided in their several charters and in respect to other matters they shall be subject to general laws. It shall be competent in any charter, or amendment thereof, to provide for the creation of boroughs in all or any part of the territory of the city or city and county governed thereby, and to provide that each such borough may exercise such general or special municipal powers, and to be administered in such manner, as may be prescribed for each such borough in such charter; provided, however, that after the creation of any

such borough, the powers thereof shall not be modified, amended or abridged in any manner without the consent of a majority of the qualified electors of such borough voting at an election.

(k) The percentages of the registered electors herein required for the election of freeholders or the submission of amendments to charters shall be calculated upon the total vote cast in the city or city and county at the last preceding general state election; and the qualified electors shall be those whose names appear upon the current registration records. The election laws of such city, or city and county shall, so far as applicable, govern all elections held under the authority of this section.

REQUEST FOR UNANIMOUS CONSENT THAT COMMUNICATION BE PRINTED IN THE JOURNAL

Mr. Beck asked for, and was granted, unanimous consent, that the following communication be ordered printed in the Journal, in 10-point type:

STATE OF CALIFORNIA, DEPARTMENT OF PUBLIC WORKS
SACRAMENTO, June 4, 1947

Hon. Julian Beck, Member of the State Assembly
Forty-first District, State Capitol
Sacramento, California

DEAR MR. BECK: In accordance with your verbal request you are advised that pursuant to House Resolution No. 101 of the Assembly of the California State Legislature, of February 16, 1946, I have forwarded to the Assembly a report on water supply of Antelope Valley in Los Angeles and Kern Counties. Our conclusions and recommendations are:

Conclusions

(1) Antelope Valley is a structural basin. Its present water supply is limited to precipitation on the valley, runoff from immediately adjacent tributary areas, and waste from Los Angeles Aqueduct. Precipitation on the valley is so small that little of it reaches the ground water so its use is limited to consumption by dry farmed crops. Of stream flow from adjacent mountains and hills, an estimated 5 percent wastes, leaving 63,000 acre-feet per annum for direct diversion and for percolation to the ground water. The maximum which can be supplied from Los Angeles Aqueduct in a wet year with present spreading facilities is about 10,000 acre-feet and the estimated average with present Los Angeles demand, is from 5,000 to 7,000 acre-feet per year. The demands of the city are increasing rapidly so this is not a dependable or permanent source of supply.

(2) An estimated 52,000 acres of land will be irrigated in 1947, a large part of it devoted to alfalfa which is a high consumer of water. In addition, an estimated 180,000 acres of good land are available for irrigation.

(3) Extractions in 1947 will exceed the mean annual recharge to the ground water by more than 50,000 acre-feet and consumptive use is now increasing at a rate of 8,000 acre-feet or more per year.

(4) No new source of outside water which might become available to Antelope Valley in the foreseeable future has been found.

(5) Salvageable waste is small and justifiable costs for that purpose are therefore limited. If spreading of Big or Little Rock Creek water is resorted to it should be at or near the upper margin of Lancaster Basin, in order to assure percolation to the ground water and at the same time avoid possible subsurface waste to the east from Rock Creek and Buttes Basins.

(6) The only way to eliminate the overdraft in the foreseeable future is to drastically reduce the amount of water consumed. This can be accomplished (1) by substituting a type of culture which consumes less water and (2) by reducing the area of land using water.

(7) That improved irrigation practice on present crops will greatly affect the overdraft is doubtful. Improved irrigation efficiency will, however, extend the time during which profitable operation can continue because, with less water applied, unit pumping costs can be greater.

Recommendations

(1) Every effort should be made to reduce consumptive use in the valley through the substitution of higher duty crops. Studies with this end in view now being carried out by the Soil Conservation Service, county farm advisors and others and the efforts of influential local organizations should be continued.

(2) Studies by the Soil Conservation Service and the University of California relative to improved irrigation practices and possible salvage of waste should be encouraged. The fact that this waste may be small does not justify neglecting it if it can be salvaged at a cost commensurate with the benefits derived.

(3) Measurements of depth to ground water made by the United States Geological Survey and Los Angeles County Flood Control District, and analyses by the Division of Water Resources based on these measurements should be continued, to augment crop data presented annually by the county agricultural commissioner in a periodic appraisal of the situation.

(4) As lands go out of production because of economic pressure or from other causes, they should be acquired and held by a properly constituted public agency. Lands sold to the State for taxes should not again be put on the open market. If publicly owned, these lands could still be used under lease or permit, but with cropping and water use restricted.

Very truly yours,

EDWARD HYATT, State Engineer

MESSAGES FROM THE GOVERNOR

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, June 5, 1947

To the Honorable Members of the Assembly
State of California, Sacramento, California

GREETINGS: I am returning herewith without my signature

Assembly Bill No. 1991, entitled: "An act to amend Section 694 of, and to add Section 40.5 to the Vehicle Code, relating to size and width of vehicles."

My objections are as follows:

This bill would amend a section of the Vehicle Code relating to the width of vehicles to exempt gantry trucks from the normal width limit of vehicle or load of 96 inches and would permit such trucks a total outside width of not to exceed 106 inches. I am informed by the Director of Public Works that modern pavements are now being designed with 11 or 12-foot width of pavement lanes. There are still many highways with pavement lanes eight or nine feet in width. In fact most of the pavements of the State are of such narrower width and the same is true of city streets and county roads. On a nine-foot pavement lane there would be a clearance of exactly 1 inch on each side of the vehicle if a gantry truck of the width permitted by this bill were placed in the center of the lane. In view of the alarming accident rate on our highways, roads, and streets I cannot approve a bill which would so materially increase traffic hazards. For these reasons I am returning the bill without my approval.

Respectfully submitted.

EARL WARREN, Governor

Assembly Bill No. 1991 ordered to unfinished business file.

STATE OF CALIFORNIA
GOVERNOR'S OFFICE, SACRAMENTO, June 4, 1947

To the Honorable Members of the Assembly
State of California, Sacramento, California

GREETINGS: I am returning herewith, without my signature,

Assembly Bill No. 1126, entitled: "An act to amend Section 3511.4 of and to suspend and postpone the operation of Sections 3511.3, 3511.5, 3571, 3571.3, 3571.5, 3572, 3573, 3574, 3575, 3576, 3577, and 3578 of the Revenue and Taxation Code, relating to the termination of the right of redemption and declaring the urgency thereof, to take effect immediately."

My objections to this bill are as follows:

This measure is unnecessary and would accomplish nothing in view of my approval of Assembly Bill 1125, by the same author. This bill merely provides for the suspension of the right to terminate the right of redemption, provided by certain sections of the Revenue and Taxation Code. Assembly Bill No. 1125 provides for a repeal of the same provision.

I am advised by the Attorney General, the Secretary of the State Board of Equalization and the State Controller that approval of Assembly Bill No. 1125 would make this bill ineffective for any purpose.

Respectfully submitted.

EARL WARREN, Governor

CONSIDERATION OF GOVERNOR'S VETO (BY UNANIMOUS CONSENT)

Assembly Bill No. 1126—An act to amend Section 3511.4 of, and to suspend and postpone the operation of Sections 3511.3, 3511.5, 3571, 3571.3, 3571.5, 3572, 3573, 3574, 3575, 3576, 3577, and 3578 of, the Revenue and Taxation Code, relating to the termination of the right of redemption, and declaring the urgency thereof, to take effect immediately.

Governor's message stating his objections read previously.

MESSAGES FROM THE GOVERNOR

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, June 5, 1947

To the Honorable Members of the Assembly
State of California, Sacramento, California

GREETINGS: I am returning herewith without my signature

Assembly Bill No. 335, entitled: "An act amending Section 3 of an act entitled, 'An act providing for the creation of revolving funds in counties and townships of the State,' approved May 9, 1923, and amending Section 29327 of the Government Code, relating to county revolving funds."

My objections are as follows:

This bill amends the act permitting the establishment of revolving funds for county and township officers. It would waive the necessity for obtaining receipts for expenditures from such revolving funds made in the detection or prosecution of crime. I do not believe that it is necessary to the enforcement of our laws to relax present safeguards in this manner. The use of public funds should be circumscribed

with as great protection as the circumstances will permit. I am not willing to see the requirement for receipts for expenditures from such funds done away with. For that reason I am returning the bill without my approval.

Respectfully submitted.

EARL WARREN, Governor

Assembly Bill No. 335 ordered to unfinished business file.

Request for Unanimous Consent That Name Be Deleted From the Roll Call on Senate Bill No. 39

Mr. Loomis asked for, and was granted, unanimous consent that his name be deleted from the roll call on Senate Bill No. 39, and that he be recorded as not voting.

Explanation of Vote by Mr. Loomis on Senate Bill No. 39

Mr. Speaker and Members of the Assembly

I have been asked by all the representatives and the members of the rod and gun clubs in the State, numbering several thousand, to oppose this bill; and in order to put the bill in its proper perspective, it is necessary to consider the background.

The game management program was conceived as a means of encouraging game bird planting, to the end that more birds would be planted than are harvested. The surplus, in theory, would remain in the field to propagate and augment by migration the number of birds in the surrounding territory.

This theory has not worked out in actual practice. Not only has this theory broken down, but operation of game management areas has had effects exactly the reverse of those anticipated when the program was instituted.

It has been the practice to permit game management areas a season of approximately two or two and a half months During this time, hunters on the area are permitted to take 80 percent of the birds planted each year by the area licensee.

The first and most obvious objection to game management is the fact that shooters are permitted to kill both hens and roosters. If they wished to do it, they could take the entire quota in hens. It is obvious that this is detrimental to natural propagation.

The second objection can be demonstrated by a little simple arithmetic Let us say, for example, that a game management licensee plants 100 birds This would entitle hunters on his area to kill 80 birds.

Although the problem is very complex and there is no exact method of arriving at a positive figure, a survey conducted in the State of Wisconsin indicates that the survival rate of pheasants planted one month before the season is 24 percent. In other words, of every 100 pheasants planted, only 24 are still alive when the season opens.

Consider this against the rules laid down for game management areas. Only 24 planted birds would be available of the 100 originally planted. And that is assuming they were planted only a month before the season. Frequently they are planted much earlier, reducing the possibilities of their surviving the hazards of illegal hunting and other elements.

In 1946 there were 11 of these game management areas in the State and the birds taken that were banded were 405 and the birds taken that were unbanded were 1,586 which proves that the biggest percentage taken are birds that fly in the area from outside. Since 1940 there has been a total of 4,398 banded birds taken and unbanded birds taken were 14,679.

It thus seems apparent that instead of building and replenishing the game bird supply of surrounding territory, game management shooting actually is draining those reserves to the detriment of the hunter, who cannot afford to shoot on a management area and pay $3.50 for each bird he kills On an average, there are about 1,500 hunters that take advantage of hunting in these game areas and out of this number there are always a number of repeat hunters

In addition to these considerations, it is the consensus of opinion that the game management program has encouraged violations of the fish and game laws.

The Fish and Game Commission revoked the license of one game management operator because he failed to maintain proper records, and for refusing to permit the public to shoot on this reserves The law anticipated that any hunter, legally licensed and able to pay the fee, should have access to a game management area as long as any of the season's quota of birds remained.

Enforcement officers of the fish and game patrol also will tell you that the long season for game management areas has encouraged resentment among other hunters, inciting them to violations.

This situation is particularly acute in Southern California. Men have been arrested for shooting out of season When they are taken into court, they want to know why they are restricted to a 10-day shooting season while a man across a fence can shoot for two months and a half.

In many cases acquittals have resulted and the incentive is strong for the violator to repeat his offense.

I am firmly convinced that the present game management law is a bad law. The increasing demands on our fish and wildlife resources demand that we remove bad laws from the statute books Just a few years ago when we had the pheasant tag system in effect, more than 100,000 tags were sold and most of the purchasers were in the field on opening day.

The bill is opposed by all of the rod and gun club members comprising several thousand members and I have telegrams and letters from these clubs to this effect.

I believe this evidence justifies a No vote for Senate Bill No. 39.

I would like to explain to the Members of the Assembly my bill, Assembly Bill No. 702 that was discussed in committee This was a bill to limit the few hunters that use these game management areas to the same season that the hunters have on the outside of the areas and my argument is that I believe it is unjust and unfair, that it is class legislation to give one group two and one-half months and another only 10 days to hunt and I therefore ask for a No vote on Senate Bill No 39

RESOLUTIONS

The following resolutions were offered:

By Messrs. Dickey, Waters, and Caldecott:

House Resolution No. 207

Relative to adjournment in commemoration of the third anniversary of D-Day

Three years ago today a vast air fleet roared up from England's Isle and poured its precious freight of men and arms into Norman fields, while from the sea unnumbered ships brought up an army to attack the beaches, and millions of Americans listened all night to radios telling the story of D-Day

Today, grass grown airfields of Britain are grazing grounds for gentle herds; the ships at anchor bear their silent guns; the skies are given back to birds; and on the bloody Utah and Omaha Beaches, and in the Norman fields, where Victory was bought with lives so young and dear, with so much valor and such pain, there rests a holy calm; now, therefore, be it

Resolved by the Assembly of the State of California, That we here now offer up our silent gratitude for Victory and for peace so hardly won, and that when this Assembly this day adjourns it do so in respect to the memory of our gallant men who fell that day, and in commemoration of those valiant deeds that won to Victory, and which must make every American heart proud though humble in its acknowledgment and commemoration of June 6, 1944, to us forever D-Day.

REQUEST FOR UNANIMOUS CONSENT THAT FINAL REPORT OF THE COMMITTEE ON ANGEL ISLAND BE PRINTED IN THE JOURNAL

Mr. McCollister asked for, and was granted, unanimous consent that the following Final Report of the Committee on Angel Island be ordered printed in the Journal in 10-point type:

FINAL REPORT OF COMMITTEE ON ANGEL ISLAND

SACRAMENTO, June 5, 1947

Mr. Speaker—Pursuant to Assembly Joint Resolution No. 14, Assembly Joint Resolution No. 40, and Assembly Concurrent Resolution No. 48, your committee appointed to investigate the possibilities of the acquisition of Angel Island by the State of California submits herewith its concluding report as follows:

Reference is made to our previous report, dated March 11, 1947, which appeared in the Journal of the Assembly under date of March 17, 1947, which report carefully described the physical properties of this island, its advantages, activities, probable value, legal status with the Federal Government, and made suggestions for its possible use by the State of California. This report contained photographs which were also reproduced in the Assembly Journal in conjunction with the committee report.

In keeping with our first findings, the committee undertook to invite the heads of all departments of the State of California, including the Governor and the Lieutenant Governor, to make an inspection trip of

Angel Island on April 5th. All material was furnished to each department and the trip was undertaken in accordance with the directives contained in Assembly Concurrent Resolution No. 48.

Reports setting forth the desires of each department making the trip were received from the following:

Director of the Department of Corrections (Prisons)
Director of the Department of Natural Resources (Parks and Recreation)
The Director of the Department of Mental Hygiene (Hospitals, etc.)
The Director of the Department of Public Works (Engineering)
The Director of the Department of Finance (Maintenance)
The Real Estate Commissioner (Values)
The Adjutant General (Military)
Officials of the War Assets Administration
Officials of the Civil Aeronautics Authority
Members of the Citizens' Committee
Others interested, including the California State Marine Parks Association

It was anticipated that only the Department of Natural Resources would report favorably upon the feasibility of using Angel Island for state purposes This department has expressed interest in the use of the island as a state park, as follows:

REPORT ON THE RECREATIONAL POSSIBILITIES AND VALUES OF ANGEL ISLAND, SAN FRANCISCO BAY

By Frederick Law Olmsted, Consultant

April 10, 1947

This report is based on careful study of the report of March 11, 1947 by the legislative committee appointed to consider state use of Angel Island; on information obtained personally at the island during the inspection trip and conference of April 5th; and on further information obtained subsequently from the San Francisco District Office of the Corps of Engineers, and from other sources.

Angel Island's physical characteristics and its location, while making it definitely unsuitable for some important types of public recreation, at the same time make it peculiarly suitable and valuable for certain other types of public recreation which are of great potential importance, especially to the huge and indefinitely increasing urban population of the Bay Region. The latter types of public recreation, for which the island offers definite advantages, have certain characteristics in common. Whatever specialized activities are involved in any of them, their peculiar attractiveness and value, for that substantial proportion of city people who eagerly appreciate these types of recreation and resort to them frequently if available, is that they enable people, for hours at a time, to feel that they have gotten completely away from conditions characteristic of modern city life and into surroundings as refreshingly different therefrom as if far distant from any city—different especially in giving the impression of open-country spaciousness and quiet, of the predominance of natural over artificial elements in the landscape, and of adventurous remoteness, quite disproportionate to the time and cost of travel

required. These particular desiderata are available at Angel Island in exceptionally high degree, and to exceptionally large numbers of people per acre, because it *is* an island, and because it is so situated and of such topographic form that practically every square foot of its 640 acres, from sea-level to summit and on every side, commands views of inspiring beauty and limitless spaciousness over great expanses of the bay and its enframing hills. Moreover, the natural and introduced vegetation and the land forms of the island are varied, interesting, and picturesque, and lend themselves readily to the development of innumerable trails and distributed small trail-side features for rest and for specialized recreational activities, pleasantly separated from each other but all commanding these inspiring spacious views.

With the development of such trails, the opportunities for enjoyable hiking and for nature study would be remarkably great in proportion to the acreage of the island. The place supports an amazing variety of plant and animal life; it has been reliably reported, for example, that 80 species of birds alone occur there. As for picnicking and similar informal activities, the possibilities would be almost unlimited.

Hospital Cove offers, as pointed out by the legislative committee, an ideal nonurban objective for a short cruise by motor craft or sail craft from anywhere in the bay—something for which there is much demand—and also good opportunities for boating by other park visitors to the island, with the desirable shore facilities of such a harbor practically all in existence.

It must be recognized that, although the beaches of Angel Island are attractive features scenically and as places at which to loiter and play, beach-bathing and swimming are not among the important natural park assets of the island (nor of most localities on the bay), because of conditions of temperature and pollution; although the situation as to pollution is being gradually improved. There are no serious physical difficulties in the way of providing good outdoor swimming pools and wading pools artificially; and artificial facilities for those pleasant outdoor activities may be desirable on the island insofar, but *only* insofar as they are handled so as to contribute to, instead of competing with, that pervasive feeling of *isolation from city conditions* which is the peculiar recreational value of the island. The same may be said of facilities for other specialized recreational activities appropriate for a nonurban park, many of which can readily be provided on the island (excepting those which require a large extent of flat fields).

In many respects, conditions appear to be favorable for the State of California to provide at Angel Island, for the great urban population of the bay metropolitan area, something comparable in kind (though not in magnitude) to what the States of New York and New Jersey jointly have long been providing for the great population of the interstate metropolitan area around the Port of New York, at the Palisades Interstate Park. It would take too much space here to enumerate the many features of that immensely popular and beneficial park which could effectively be paralleled, though on a smaller scale, at Angel Island. But it should be pointed out that in addition to accommodating several million daytime visitors annually, that park provides what few parks so near great city populations attempt to offer, namely, vacation outings of several days to a fortnight, both for families and individuals

and, much more extensively, for groups of boys and of girls, gathered and supervised by responsible organizations of many kinds and drawn democratically from underprivileged and from more fortunate social groups. Lodging (in camp-cabins, dormitories, and other suitable buildings), and good food, are provided at low prices, just about sufficient to make the operation self-sustaining, and in many cases these prices are paid in whole or in part by the sponsoring organization. These long outings in the park, under skillful supervision, mean a great deal to normally healthy city youngsters, but are of even greater importance for those who are undernourished or physically handicapped in other ways. An endless succession of such groups has kept the gradually expanding accommodations almost constantly full except during the cold months of the eastern winter. It is highly significant in relation to the existing buildings on Angel Island that the proved value of this service of vacation-lodgings in the Palisades Interstate Park has led to its gradual expansion to a capacity, as much as 20 years ago, 50 percent greater than that of all the now-existing buildings on Angel Island.

The operation of this service at the Palisades Park is entirely under the direction of the Park Commission, and is unquestionably justified by its recreational value alone; but its incidental educational and public health values make it somewhat akin to the functions of such other public institutions as camps and rural colonies for convalescents and for other types of specially handicapped persons, (but *not* for those unfit for association with normal people, such as through criminality or extreme mental derangement).

If the now-vacant lands of Angel Island and the land and buildings at Hospital Cove were to be used by the State for park purposes as suggested by the legislative committee, (for which purpose they are eminently suitable as confirmed by the present investigation), it is highly probable, from the experience of the States of New York and New Jersey at the Palisades Interstate Park, that it would be found desirable before many years to occupy in addition, for the housing of transient recreationists remaining in the park for one or more complete days, a substantial part if not the entire capacity of the remainder of the existing permanent buildings on the island not required for other park purposes. How far this kind of park use of the buildings can wisely be developed is determinable only by cautious experiment over a number of years. But it seems clear now that the most advantageous use of such buildings on the island as are not clearly more valuable for park purposes at the outset, would be to assign them only to institutions having kindred purposes and requirements, the occupants of which would, on the one hand, substantially benefit from immediate proximity to the kind of park described and from direct recreational use of it, and, on the other hand, would *not* by their proximity, or actual presence in the park, detract from its value for other park visitors.

Numerous possible uses for the existing buildings on Angel Island have been suggested. Some of these uses would seriously impair the recreational values of the adjacent lands. Among these are prisons and all types of institutions for criminals, whether penal or correctional; and also asylums or hospitals for the insane. The mere presence of such an institution on the island would, for purely psychological reasons,

detract from the enjoyment of park visitors on the rest of the island, and would deter some people from coming at all.

Going still further, we come to the suggested use of the island as an airport. The report of the legislative committee recommends consideration of a combination of institution, park, and airport development. Such a course would completely destroy the most significant and peculiar recreational potentialities of the island, both by actual physical alteration of its terrain and by other changes which an airport would inevitably introduce. The Hospital Cove area, if it escaped ruination by airport grading operations, would still provide a good yacht harbor; but little more can be said for the recreational possibilities of the island under such a proposal. The dimensions of the island are such that the construction of two 7,000-foot runways would *not* come neatly within the confines of the present slopes, as is incorrectly shown in the artist's sketch included with the committee's report, but would require seawalls and high fills extending considerably beyond the island's present shoreline. Under such conditions it is very doubtful if Hospital Cove, any more than the remainder of the island's attractive coast, would remain available and attractive for recreation.

Grading an airfield as proposed, by scraping off the entire top of the island to an elevation 500 feet or more below its present summit and spilling the excavated material down over the tree-clad slopes below, might, perhaps, be done in such a way that only a minor fraction of the existing buildings would be physically obliterated; and several pieces of the natural shores and the slopes just above them would probably remain unburied by the fills. But these remnants of what now exists on the island, clinging precariously below the brink of the airport flat, with planes roaring back and forth close above them, intersected by new roads carrying busy vehicular traffic up to and down from the airport, and looking out upon restless foregrounds of roads, causeways, bridges, wharves, and commercial traffic where now is the open bay, would be greatly reduced in practical value for any institutional purposes (unless the airport could use them for service buildings), and would be substantially worthless as a park. Indeed, the net effect would be a widespread loss of scenic values which the prominent peak of Angel Island, largely clothed with trees, now contributes to innumerable public and private properties commanding views of it across the waters of the bay The Army Engineers report that merely scarring one limited place on the island's peak by road construction some time ago brought forth bitter protests from civic organizations and property owners over a large area, especially in San Francisco. The airport proposal would blast the whole peak out of existence and replace it by a low, flat, bare, artificial mesa.

In short, the idea of using the island for an airport and at the same time getting any important park values from it as a by-product, with or without use of the existing buildings in whole or in part for other institutions, seems a wholly impracticable combination. But assuming that the airport problem can be satisfactorily solved elsewhere, without sacrificing Angel Island to it, then very large park values could unquestionably be derived from the island *in combination* with effective use of existing buildings for institutions of several kinds that would benefit largely from association with such a park.

In regard to the problem of water supply for the island, what was said in the preliminary report of the legislative committee can be supplemented, and in part corrected, by information since obtained from the United States Engineers' District Office in charge of the island and of harbor operations. (1) Figures on the quantity of water per annum required to supplement the existing water supply on the island when the buildings were fully occupied, and on the cost of barging water from San Francisco, definitely confirm the committee's impression that intensive use of the island by the State for park and institutional purposes will require and justify a costly water main from the Marin Water District (unless some more economical and equally certain method can be found). (2) On the other hand, the Chief of Operations stated that the channel-bottom in that part of Raccoon Strait where the power cable crosses from Tiburon to the island is definitely sandy; making it seem much more probable that a submarine water main could be laid without serious difficulty, than the committee was led to fear by the report (about other parts of the channel) of "hard rock surface subjected to swift currents".

Concerning the problem of transportation to and from the island: The legislative committee, on first consideration of the patronage that the island might receive under public use, did not look with favor upon continuing ferry service to and from the mainland, and was inclined toward serious consideration of the alternative suggestion of building a high-level suspension bridge from Tiburon to the island and even an additional bridge to Treasure Island. The information now available seems to your investigator to point in the opposite direction.*

If commitment to the construction of such long and costly bridges were an unavoidable consequence of acquiring Angel Island from the Federal Government, common prudence would require the State to figure carefully in advance whether the many millions of dollars of capital investment in bridge construction would be economically justified for the sake of giving vehicular access to 640 acres of real estate available for park and institutional use. It would take a long time to make reliable estimates of the annual cost for interest, amortization, and maintenance of such bridges and approaches; and, in the meantime, the opportunity to acquire the island and its buildings for public use at a nominal first cost might be lost forever.

It is of critical importance therefore to make clear that, so far as concerns park values anyhow, and values for some kinds of institutions, it is not merely *unnecessary* to make the enormous initial capital investment involved in the suggested great bridge construction, but it is positively *undesirable* to substitute such bridges for approach to the island by boat, regardless of money cost. It has already been emphasized here that the greatest and most unique recreational values of Angel Island depend on the fact that it is effectively insulated both physically and psychologically from the city conditions whence people can escape to it by so brief a trip. To most of the city people who so urgently need those particular kinds of recreational values, but especially to youngsters and to people dependent on mass transportation, the change from street car or bus or other tiresomely familiar form of work-day transportation to an unusual and interesting form of locomotion associated with holidays, particularly one that can be made to seem like going yachting, adds very

positively to the value of the excursion and to the desired feeling of having escaped completely from ordinary city conditions and city traffic. The boat trip up the Hudson River to the Palisades Interstate Park from the wharves of crowded Manhattan is much longer than that to Angel Island from San Francisco or even from the East Bay cities, and there are competing services by bus, automobile, and rail direct to the park by routes almost as short in miles as by water; yet hundreds of thousands of people each year take the boats by preference.

For similar reasons, those concerned with keeping the island free of city conditions and vehicular crowds, and because for motorists the whole circuit of the island would offer only a few minutes of driving pleasure, it is recommended that no auto ferries be operated. Passenger boats, supplemented by a sight-seeing bus service circling the island on the present road, and by numerous trails already discussed, would provide entirely adequate transportation thoroughly in keeping with the highest uses of the island.

SUMMARY

The availability of Angel Island offers the State an amazingly fortunate opportunity for fulfillment at low cost of one of the great recreational needs of a metropolitan area, for which suitable sites are extremely rare. But in order that this fulfillment may be complete, the following conditions concerning the island must be met:

(1) It must remain an island, and not be joined to the mainland by bridge or other physical connection.

(2) It must not be defaced or mutilated, as by partial or complete leveling for an airport.

(3) It must not be stigmatized by the establishment there of a prison, insane asylum, or other incongruous institution; although it could perfectly well include some other types of institutions.

S/ FREDERICK LAW OLMSTED
Consultant, State Park System

Relating specifically to the matter of transportation to and from the island, the committee is in receipt of a bona fide offer from the Harbor Tug and Barge Company, Pier 16, San Francisco, who desire to operate a fleet of water taxis as a concession. This company has had the experience of many years in the transportation of passengers and materials, and are known to be in excellent position to offer this service.

The Report of the Department of Natural Resources has been augmented by a number of favorable communications from the California State Marine Parks Association who are desirious of using Hospital Cove and other assets of this island for their recreational purposes.

In addition, we are in receipt of the following resolution adopted by the Board of Supervisors of the City and County of San Francisco:

WHEREAS, The United States of America has decided to dispose of Angel Island; and

WHEREAS, Angel Island, consisting of more than 640 acres, located in San Francisco Bay provides the possibility of a recreational area comparable to the finest in the Belvedere-Tiburon-Paradise Cove section of the bay; and

WHEREAS, The increased population of the Bay area will, in the future, place recreational areas close at hand at a tremendous premium; and

WHEREAS, Angel Island could be utilized to the fullest as a recreational area; the Marin side of the island, made up of beaches and coves, could be used for sun bathing and swimming; the beaches facing Raccoon Straits would provide excellent surf fishing facilities; day camps could be provided for the children and the north side of the island provides exceptional opportunities for promotion of general recreation areas; now, therefore, be it

Resolved, That this board of supervisors does hereby memorialize the State Park Commission to acquire Angel Island from the United States of America and to dedicate it for state park purposes; and, be it further

Resolved, That a copy of this resolution be forwarded to his Honor the Mayor with the request that he instruct the Legislative Representative of the City and County of San Francisco to contact the San Francisco Delegation in the State Legislature to the end that legislation may be introduced looking toward the acquisition of Angel Island from the United States of America; and, be it further

Resolved, That a copy of this resolution be forwarded to the San Francisco Delegation in the State Legislature.

I hereby certify that the foregoing resolution was adopted by the Board of Supervisors of the City and County of San Francisco.

JOHN R. MCGRATH, Clerk

Approved, San Francisco, April 29, 1947.

RECOMMENDATION

Accordingly, your committee wishes to recommend that the State of California undertake the operation of Angel Island in San Francisco Bay as a state park.

METHOD OF ACQUISITION

We have been prepared with the necessary bills making appropriations for the acquisition of this property, which bills have been held in abeyance pending receipt of the official appraisal from the War Assets Administration, requested through Assembly Concurrent Resolution No. 40. We are now in receipt of an official advice from the War Assets Administration reading as follows:

"During a meeting between the War Assets Administration and the Army Engineers, held on May 23, 1947, the date of June 20th was tentatively established as the time War Assets Administration would assume custody of Angel Island. Also at that time the pertinent data necessary for the completion of an appraisal report will be furnished this office. The Appraisal Division estimates that their report will be completed approximately one month after receipt of the necessary information.

When the report is completed it will be immediately sent to Washington for their review and determination of fair value. Upon receipt of advice from Washington we will communicate with you immediately.

Very truly yours,

S/J. WAYNE HARROP
Acting Deputy Regional Director"

It will be immediately apparent that this Legislature will have adjourned prior to the completion of this appraisal, and that we, therefore, will be unable to act upon our pending legislation. Your committee had expected to present a very favorable situation in anticipation of an 85 percent to 95 percent discount which may be granted by the Federal Government, should the State of California purchase the property for park and recreational purposes. Since this is impossible of accomplishment during this session of the Legislature, your committee wishes to explore the feasibility of obtaining a congressional grant to Angel Island from the Federal Congress. We are advised that this is a normal and usual procedure, and that if our case is properly presented, we may obtain this valuable and unique property for the use of our citizens without cost to the State of California.

Our committee therefore repeats its recommendations that Angel Island be acquired by the State of California for state park and recreational purposes, and hereby petitions the Members of the Legislature for favorable action upon the accompanying resolution directing this committee to present our request for a deed to the island before the Federal Congress in Washington, D. C.

Respectfully submitted.
