The assessment may refer to the county assessment roll for a description of the lots or parcels, in which case that roll shall govern for all details concerning the description of the lots or parcels

22573 The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements

22574 The diagram and assessment may classify various areas within an assessment district into different zones where, by reason of variations in the nature, location, and extent of the improvements, the various areas will receive differing degrees of benefit from the improvements A zone shall consist of all territory which will receive substantially the same degree of benefit from the improvements.

22594. over a period not to exceed five fiscal years. The resolution shall generally describe the proposed improvements, set forth the estimated cost thereof, specify the number of annual installments and the fiscal years during which they are to be collected, and fix or determine the amount of each annual installment

Amendment No. 3

On page 1, line 1, after the period, insert "Section 14000 of the Welfare and Institutions Code, as amended by Chapter 577 of the Statutes of 1971, is amended to read:

14000. The purpose of this chapter is to afford health care and related remedial or preventive services to recipients of public assistance and to medically indigent aged and other persons, including related social services which are necessary for those receiving health care under this chapter.

The intent of the Legislature is to provide, to the extent practicable, through the provisions of this chapter, for health care for those aged and other persons, including family persons who lack sufficient annual income to meet the costs of health care, and whose other assets are so limited that their application toward the costs of such care would jeopardize the person or family's future minimum self-maintenance and security. It is intended that whenever possible and feasible:

~~(a) Such care shall, to the extent feasible, be provided through a system of prepaid health plans through contracts with carriers.~~

(a) ~~(b)~~ The means employed shall be such as to allow, to the extent practicable, eligible persons to secure health care in the same manner employed by the public generally, and without discrimination or segregation based purely on their economic disability.

(b) ~~(c)~~ The benefits available under this chapter shall not duplicate those provided under other federal or state laws or under other contractual or legal entitlements of the person or persons receiving them

(c) ~~(d)~~ In the administration of this chapter and in establishing the means to be used, the department shall give due consideration both to the appropriate organization and to the ready accessibility and availability of the facilities and resources for health care to persons eligible under this chapter, and to new and innovative approaches to the delivery of health care services.

~~(e) In providing benefits under this chapter through prepaid health plans the department may contract with one or more carriers whereby the carrier provides a program underwriting the risk involved.~~

~~(f) In providing benefits under this chapter the department may contract with carriers or other organizations to establish pilot programs to provide health care services in the most efficient manner possible. Such programs shall demonstrate different methods of providing health care services and shall emphasize methods of utilization, review and preventive care, and shall provide incentives for using the most economical level of care. Such programs may provide benefits on the basis of class of recipient, class of benefit, geographical area, or any other reasonable classification. In entering into contracts under this subdivision the department may provide that the extent of benefit coverage may be limited to a fixed number of days, or amount, or duration of services. The contract may provide that the carrier or other organization shall continue to administer benefits provided beyond the applicable limitation. Any contracts entered into under Section 14101 shall not interfere or conflict with pilot programs established pursuant to this subdivision.~~

~~The director shall submit to the Legislature a written progress report regarding any action taken under the above provisions of this subdivision no later than the fifth legislative day of each general session.~~

~~In addition the director shall establish a pilot program to compare patient treatment profiles and prior authorization as controls of overutilization. It is the intent of the Legislature that the most cost effective system shall be established on a statewide basis. The director shall report to the Legislature the results of this project within six months of its initiation.~~

SEC 2. Section 14058 of the Welfare and Institutions Code, as amended by Chapter 577 of the Statutes of 1971, is repealed

~~14058. "Prepaid health plans" means any form of organization or any arrangement provided by a carrier for the purpose of providing, arranging, paying for, or reimbursing the cost of health care services as set forth in Article 4.1 (commencing with Section 14110) of this chapter.~~

SEC 3 Section 14104 of the Welfare and Institutions Code, as amended by Chapter 577 of the Statutes of 1971, is repealed

~~14104. The department shall, to the extent feasible, contract with one or more carriers to provide or arrange services through prepaid health plans. (a) Each prepaid health plan contract shall provide that the carrier:~~

~~1. Will insure that the health care services to be provided under the contract are readily available to beneficiaries electing to receive care under the prepaid health plan.~~

~~2. Will provide the contracted health care services on the basis of a monthly payment for each beneficiary who elects to receive care under the prepaid health plan. Such payment may be for all beneficiaries or may vary, based upon a reasonable classification of beneficiaries as determined by the director with the advice of the Health Care Commission.~~

~~3. Will, if the prepaid health plan limits the availability of any of its services to any geographical area, pay for emergency services received outside such area by a person covered by the contract whether or not the carrier's own facilities or services are available at the place where the illness or injury occurs.~~

~~4. Will furnish to the director such timely information and reports as he may find necessary in performing his functions under this chapter.~~

~~5. Will maintain such records and afford such access thereto as the director finds necessary to assure the correctness and verification of the information and reports which may be required under paragraph 4 of this subdivision.~~

~~6. Will, in determining the reasonable charge for a physician's service, take into consideration the customary charge for similar services generally made by the physician, as well as the prevailing charges in the locality for similar services.~~

~~(b) Each contract shall provide the extent to which the carrier will charge any person made eligible for health care services by this chapter.~~

~~(c) Each such contract shall provide that the carrier will agree to provide such services as defined by the department without reference to the race, religion, creed, color, national origin or ancestry of any person eligible under the provisions of this chapter.~~

~~(d) In the consideration of proposals for contracts with carriers under this chapter, the department shall, for comparative purposes, deduct from the total cost proposed by any carrier the amount of tax which that carrier would be required to pay under Part 7 (commencing with Section 12001) of Division 2 of the Revenue and Taxation Code computed on the basis of the net rate of tax, after deductions, which would have applied to such carrier for the preceding calendar year, had the amount of anticipated premium under the proposed contract been added to its taxable premiums for such year.~~

~~(e) In entering into contracts under this section the department may provide that the extent of benefit coverage by the carrier may be limited to exclude care of illness or injury resulting from or contrib-~~

~~ated to, by a major catastrophe or disaster, including but not limited to an act of war, declared or undeclared. The contract may provide that the carrier shall continue to administer the benefits provided beyond the applicable limitation.~~

~~The intent of the Legislature in enacting this subdivision is to authorize a limitation on the liability of a carrier in catastrophic situations.~~

~~(f) Consistent with the efficient and economical administration of this chapter, the department shall encourage the development of a variety of prepaid health plans within an area so that beneficiaries may have a wide choice of plans.~~

~~(g) The department shall not enter into contracts under this section unless it determines that the costs of such contracts are reasonably consistent with and potentially less than the costs of providing the same services to comparable beneficiaries within the area under the portion of the Medi-Cal program which is not covered by prepaid health plans.~~

SEC 4. Section 14105 of the Welfare and Institutions Code, as amended by Chapter 577 of the Statutes of 1971, is amended to read:

14105. The director shall prescribe the policies to be followed in the administration of this chapter, may limit the rates of payment for health care services, and shall adopt such rules and regulations as are necessary for carrying out, not inconsistent with, the provisions thereof.

Such policies and regulations shall include rates for payment for services not rendered under a contract pursuant to ~~Section 14104~~ *Chapter 8*. Standards for costs shall be based on payments of the reasonable cost for such services. Cost reports and other data submitted by providers to a state agency for the purpose of determining reasonable costs for services or establishing rates of payment shall be considered true and correct unless audited within eighteen (18) months after July 1, 1969, the close of the period covered by the report, or after the date of submission of the original or amended report by the provider, whichever is later.

Nothing in this section shall be construed to limit the correction of cost reports or rates of payment when inaccuracies are determined to be the result of intent to defraud, or when a delay in the completion of an audit is the result of willful acts by the provider or inability to reach agreement on the terms of final settlement.

Insofar as practical, consistent with the efficient and economical administration of this part, the department shall afford recipients of public assistance free choice of arrangements under which they shall receive health care benefits.

If, in the judgment of the director, the actions taken by the director under Section 14120(c) will not be sufficient to operate the Medi-Cal program within the limits of appropriated funds, he may limit the scope and kinds of health care services, except for minimum coverage as defined in Section 14056, available to persons who are not eligible under Sections 14005.1, 14005.2 and 14005.3. When and if necessary, such action shall be taken by the director with the advice of the Health Care Commission and in ways consistent with the requirements of the Federal Social Security Act. This paragraph shall not be operative until July 1, 1972.

SEC 5. Section 14106 of the Welfare and Institutions Code, as amended by Chapter 577 of the Statutes of 1971, is amended to read:

14106. The director shall, with respect to carriers and with the advice of the Health Care Commission, adopt all necessary rules and regulations to carry out the provisions of this chapter . ~~; including, but not limited to fixing reasonable minimum standards for prepaid health plans, regulations fixing the time, manner, methods and procedures for determining whether a contract with any plan shall be undertaken or withdrawn, and regulations pertaining to any other matters made necessary by the provisions of this chapter.~~

In adopting such rules and regulations, the director shall be guided by the needs of eligible persons as well as prevailing practices in the field of arrangements for health care.

~~The director shall terminate contracts with any carrier if he finds that the standards prescribed therefor are not being complied with, that claims accrued or to accrue will not be paid, or for other good cause shown. The director shall give reasonable notice of his intention to terminate the contract to any carrier, to eligible persons and others who may be directly interested, including such other persons and organizations as the director may deem necessary and proper. The notice shall state the effective date of, and the reason for, the termination.~~

SEC. 6 Section 14106.5 of the Welfare and Institutions Code, as Amended by Chapter 577 of the Statutes of 1971, is repealed.

~~14106.5. The director shall adopt all necessary rules and regulations providing for the payment for services rendered under this program on the basis of a total monthly payment for each enrolled recipient. The director may provide for methods and periods of enrollment.~~

SEC 7. Section 14114, as amended by Chapter 577 of the Statutes of 1971, is repealed.

~~14114. The director may make available information, in such form as he may deem satisfactory, as will enable the eligible persons to exercise an informed choice among the prepaid health plans which have been contracted for under this chapter. Each eligible person enrolled in a prepaid health plan shall be issued an appropriate document setting forth or authorizing the services or benefits to which that person is entitled thereunder, the procedure for obtaining benefits, and the principal provisions of the plan affecting the eligible person.~~

~~The Health Care Commission shall provide for a continuing study of the quality of care and services resulting from the operation of this chapter and for surveys and reports on prepaid health plans. With respect to such plans contracted for under this chapter, the commission may contract with the State Department of Public Health for studies and reports of the experience of such plans as to the standards of care available to eligible persons, gross and net costs, administrative costs, benefits, utilization of benefits, the portion of actual personal expenditures of eligible persons for health care which are being met by prepaid benefits, and the methods of evaluating and improving the quality of, and controlling the costs of, health care provided under such contracts; provided, however, that this section shall not be construed to require any plan to provide accounting data or statistical data not required in the normal operation of the plan.~~

SECOND READING OF BILLS—AUTHOR'S AMENDMENTS

Assembly Bill No. 1279—An act to amend Sections 3208.1, 3208.2, and 5303 of the Labor Code, relating to workmen's compensation.

Bill read second time.

Consideration of Author's Amendments

The following amendments, pursuant to the Assembly Rules, were read, and adopted:

Amendment No. 1

In line 1 of the title of the printed bill, strike out "3208 2, and 5303", and insert "5411, 5412, and 5500 5".

Amendment No. 2

On page 2, line 1, after the period, insert "The date of a cumulative injury shall be the date determined under Section 5412."

Amendment No. 3

On page 2, strike out lines 2 to 26, inclusive, and insert

"SEC. 2 Section 5411 of the Labor Code is amended to read:

5411 The date of injury, except in cases of occupational disease *or cumulative injury*, is that date during the employment of which occurred the alleged incident or exposure, for the consequences of which compensation is claimed

SEC 3. Section 5412 of the Labor Code is amended to read:

5412. The date of injury in cases of occupational diseases *or cumulative injuries* is that date upon which the employee first suffered disability therefrom and either knew, or in the exercise of reasonable diligence should have known, that ~~said~~ *such* disability was caused by his present or prior employment.

SEC 4. Section 5500 5 of the Labor Code is amended to read:

5500 5 *(a) Liability for occupational disease or cumulative injury shall be limited to those employers who employed the employee during a period of five years immediately preceding either the date of injury, as determined pursuant to Section 5412, or the last date on which the employee was employed in an occupation exposing him to the hazards of such occupational disease or cumulative injury, whichever occurs first If the applicant presents prima facie evidence of the existence of and exposure to cumulative injury or occupational disease, such employments in which such exposure is shown to have occurred shall be conclusively presumed to have been the sole industrial cause of such injury or disease, without assessment of liability to previous years, except as provided in subdivision (d).*

(b) Where a claim for compensation benefits is made on account of an occupational disease *or cumulative injury* which may have arisen out of more than one employment, the application shall state the names and addresses of all employers *liable under subdivision (a)*, the places of employment, and the approximate periods of employment where the employee was exposed to the hazards of the occupational disease *or cumulative injury*. If the application is not so prepared or omits necessary and proper employers, any interested party, at or prior to the first hearing, may request the appeals board to join as defendant any necessary or proper party If such request is made prior to the first hearing on the application, the appeals board shall forthwith join the employer as a party defendant and cause a copy of the application together with a notice of the time and place of hearing to be served upon such omitted employer; provided, such notice can be given within the time specified in this division If such notice cannot be timely given or if the motion for joinder is made at the time of the first hearing, then the appeals board or referee before whom the hearing is held, if it is found that the omitted employer named is a necessary or proper party, may order a joinder of such party and continue the hearing so that proper notice may be given to the party or parties so joined Only one continuance shall be allowed for the purpose of joining additional parties Subsequent to the first hearing the appeals board shall join as a party defendant any additional employer when it appears that such employer is a proper party, but the liability of such employer shall not be determined until supplemental proceedings are instituted.

(c) In any case involving a claim of occupational disease ~~contracted~~ *or cumulative injury occurring* as a result of more than one employment *within the five-year period set forth in subdivision (a)*, the employee making the claim, or his dependents, may elect to proceed against any one or more of ~~the~~ *such* employers ~~named in the application~~. Where such an election is made, the employee must successfully prove his claim against any one of the employers named, and any award which the appeals board shall issue awarding compensation benefits shall be a joint and several award as against any two or more employers who may be held liable for compensation benefits. If, during the pendency of any claim wherein the employee or his dependents has made an election to proceed against one or more employers, it should appear that there is another proper party not yet joined, such additional party shall be joined as a defendant by the appeals board on the motion of any party in interest, but the liability of such employer shall not be determined until supplemental proceedings are instituted. Any employer joined as a defendant subsequent to the first hearing or subsequent to the election provided herein shall not be entitled to participate in any of the proceedings prior to the appeal board's final decision, nor to any continuance or further proceedings, but may be permitted to ascertain from the employee or his dependents such information as will enable the employer to determine the time, place, and duration of the alleged employment On supplemental proceedings, however, the right of the employer to full and complete examination or cross-examination shall not be restricted.

(d) If the employment exposing the employee to the hazards of the claimed occupational disease or cumulative injury was for more than five years with the same employer, or its predecessors in interest, the limitation of liability to the last five years of employment as set forth in subdivision (a) shall be inapplicable. Liability in such circumstances shall extend to all insurers who insured the workmen's compensation liability of such employer, during the entire period of the employee's exposure with such employer, or its predecessors in interest. The respective contributions of such insurers shall be in proportion to their respective periods of coverage As used in this subdivision, "insurer" includes an employer who during any period of the employee's exposure was self-insured or uninsured.

(e) At any time within one year after the appeals board has made an award for compensation benefits in connection with an occupational disease *or cumulative injury* ; any employer held liable under such award may institute proceedings before the appeals board for the purpose of determining an apportionment of liability or right of contribution. Such a proceeding shall not diminish, restrict, or alter in any way the recovery previously allowed the employee or his dependents, but shall be limited to a determination of the respective contribution rights, interests or liabilities of all the employers joined in the proceeding, either initially or supplementally; provided, however, if the appeals board finds on supplemental proceedings for the purpose of determining an apportionment of liability or of a right of contribution that an employer previously held liable in fact has no liability, it may dismiss such employer and amend its original award in such manner as may be required

(f) In any proceeding before the appeals board for the purpose of determining an apportionment of liability or of a right of contribution where any employee incurred a disability or death resulting from silicosis in underground metal mining operations, the determination of the respective rights and interests of all of the employers joined in the proceedings either initially or supplementally shall be as follows:

~~(a)~~ *(1)* All employers whose underground metal mining operations resulted in a silicotic exposure during the period of the employee's employment in such operations shall be jointly and severally liable for the payment of compensation and of medical, surgical, legal and hospital expense which may be awarded to the employee or his estate or dependents as the result of disability or death resulting from or aggravated by such exposure.

~~(b)~~ *(2)* In making its determination in the supplemental proceeding for the purpose of determining an apportionment of liability or of a right of contribution of percentage liabilities of the various employers engaged in underground metal mining operations the appeals board shall consider as a rebuttal presumption that employment in underground work in any mine for a continuous period of more than three calendar months will result in a silicotic exposure for the employee so employed during the period of employment if the underground metal mine was driven or sunk in rock having a composition which will result in dissemination of silica or silicotic dust particles when drilled, blasted or transported.

(g) Any employer shall be entitled to rebut such presumption by showing to the satisfaction of the appeals board, or its referee, that the mining methods used by the employer in the employee's place of employment did not result during his employment in the creation of silica dust in sufficient amount or concentration to constitute a silicotic hazard. Dust counts, competently made, at such intervals and in such locations as meet the requirements of the Division of Industrial Safety for safe working conditions may be received as evidence of the amount and concentration of silica dust in the workings where such counts have been made at the time when they were made The appeals board may from time to time, as its experience may indicate proper, promulgate orders as to the frequency with which such dust counts shall be taken in different types of workings in order to justify their acceptance as evidence of the existence or nonexistence of a silicotic hazard in the property where they have been taken.

(h) The amendments to this section adopted at the 1959 Regular Session of the Legislature shall operate retroactively, and shall apply retrospectively to any cases pending before the appeals board or courts From and after the date this section becomes effective no payment shall be made out of the fund used for payment of the additional compensation provided for in Section 4751 of this code, or out of any other state funds, in satisfaction of any liability heretofore incurred or hereafter incurred, except awards which have become final without regard to the continuing jurisdiction of the appeals board on said effective date, and the state and its funds shall be without liability therefor. This para-

graph shall not in any way effect a reduction in any benefit conferred or which may be conferred upon any injured employee or his dependents."

SECOND READING OF BILLS—AUTHOR'S AMENDMENTS

Assembly Bill No. 1442—An act to add Section 1905 to the Streets and Highways Code, relating to grade separation projects.

Amendment No. 2

In line 1 of the title, after the second "to", insert a comma.

On page 1, line 1, after "SECTION 1.", insert "Section 190 of the Streets and Highways Code is amended to read:

190. In each annual budget report prepared by the commission and the department under Section 143.1, commencing with the 1972–1973 fiscal year, the sum of ten million dollars ($10,000,000) shall be set aside for allocations to grade separation projects, including the elimination of existing or proposed grade crossings, the elimination of grade crossings by removal or relocation of streets or railroad tracks, and the alteration or reconstruction of existing grade separations, of separations of grade districts, cities, cities and counties, and counties on county roads or city streets as provided in Sections 189 to 191, inclusive An allocation shall be made of one-half of the estimated cost, after deducting therefrom any contribution to be made by the railroad corporations involved, towards any project which qualifies therefor under the provisions of those sections, except that in no event shall allocations be made to projects for the alteration or reconstruction of grade separations unless the affected railroad or railroads have agreed, or have been required by decision of the Public Utilities Commission, to contribute not less than 10 percent of the cost of such alteration or reconstruction project. In no event shall an allocation for a project effecting the elimination of grade crossings by removal or relocation of streets or railroad tracks be in excess of the estimated allocation that would otherwise be made for the construction of grade separation facilities on the existing alignment of the street and railroad tracks ~~and result in the removal or relocation of more than 6,000 feet of railroad tracks~~. An allocation shall be made only when the affected local agency or agencies furnish evidence to the department that all necessary orders of the Public Utilities Commission have been obtained, that all necessary agreements with affected railroad or railroads have been executed, that sufficient funds from the local agency or agencies are available and that all other matters prerequisite to awarding the construction contract within a period of six months have been or can be taken care of within that time. Funds of a local agency shall be deemed available for purposes of this section to the extent of the amount of any general obligation bonds authorized but unsold if all proceedings prior to the issuance and sale of the bonds have been validly taken and if the bonds may be validly issued and sold by the local agency at any time, even though at the time of allocation under this section the bonds have not been issued or sold Where such bond proceedings have been

taken, if the bonds are not issued and sold within six months after the time of such allocation, the commission may order the allocation canceled, and shall thereupon revert the amount thereof to the fund set aside by this section, for reallocation to another eligible project In any event, regardless of the method proposed by the local agency for the financing of its share of the project cost, if after an allocation has been made, the construction contract has not been awarded within one year, the commission may order the allocation canceled and the funds allocated shall revert to the fund set aside by this section. In financing its share of the project cost, the local agency may use any funds available to it. Notwithstanding any other provision of law, when the local agency uses funds derived from the TOPICS Program, pursuant to Chapter 6 (commencing with Section 2300) of Division 3 of the Streets and Highways Code in financing its share of the project cost, the allocation to be made pursuant to this section shall be computed as though such local agency contribution was derived from nonfederal sources and shall be computed as though the railroad had made its contribution pursuant to state law rather than pursuant to federal law.

The department and the commission may make allocations from a succeeding fiscal year's sum set aside for purposes of this section on and after January 1st preceding the beginning of such fiscal year. Engineering, right-of-way acquired for the project and utility relocation costs expended by a local agency or agencies prior to an allocation of funds for a project shall be included in the total cost thereof, even though expended prior to an allocation of state funds.

The first five million dollars ($5,000,000) of the fund set aside by this section each fiscal year shall be available for allocation and expenditure without regard to fiscal year

The department and the commission shall revert as of October 1st of each fiscal year any unallocated amount of the balance of the annual sum of ten million dollars ($10,000,000) set aside by this section for that fiscal year. Any other funds that may be set aside for the purposes of this section shall be allocated prior to the allocation of the above ten million dollars ($10,000,000) and shall be available for allocation and expenditure without regard to fiscal years

A local agency that furnishes evidence to the department that it has complied with all requirements for an allocation pursuant to this section may, if it has sufficient funds available for that purpose, proceed with the advertising for bids and the construction without prejudice to its right to receive an allocation if an allocation becomes available for that local agency before the termination of the priority list established for the year during which the construction commenced

Such project may be constructed by the local agency or agencies concerned, or, by agreement between the local agency or agencies and the department, the department may acquire the necessary rights-of-way in the name of the local agency or agencies, execute agreements with railroad corporations, present necessary applications to the Public Utilities Commission and perform all other acts to complete the project Construction work by the department shall be subject to the State Contract Act. Agreements between the department and local agencies are authorized relative to the handling and accounting of funds, including

the making of advancements thereof so as to permit prompt payment for the work accomplished, and relative to any other phase of the work.

In the event the actual cost is less than that estimated, the allocation shall be reduced accordingly If, after completion of the project, the actual cost exceeds that estimated, the allocation may be increased proportionately by the department and the commission If more projects comply with the requirements hereof than can be financed from the fund set aside by this section, allocations shall be made only to those highest on the priority list submitted by the Public Utilities Commission, except for those allocations made for projects which exceed the estimated costs. Allocations to specific projects by the department shall remain available until expended As used in this section, "local agency" includes a separation of grade district, as well as a city, city and county, or county.

(b) An amount sufficient, when added to the amount provided under subdivision (a) of this section, to provide, when applied according to tables adopted by the board, a monthly death allowance, equal to one-

half of his final compensation in the membership category applicable to him at the time of the injury or the onset of the disease causing death, payable to the surviving spouse to whom he was married prior to sustaining the injury or disease resulting in death, as long as such spouse lives or until her remarriage; or if there is no surviving spouse or if such spouse dies or remarries before all children of the deceased member attain age 18, to his children under 18 collectively until every child shall have died, married, or attained age 18; provided, that no child shall receive any part of the allowance after marrying or attaining age 18. During the lifetime of the surviving spouse or until such spouse remarries, an additional percentage of the death benefit allowed by this section, exclusive of the annuity under subdivision (c), shall be paid to such spouse of a member who is killed in the performance of his duty or who dies as a result of an accident or an injury caused by external violence or physical force, incurred in the performance of his duty, for each of his children during the lifetime of the child, or until the child marries or reaches the age of 18, as follows: for one child, twenty-five percent (25%); for two children, forty percent (40%); and for three or more children, fifty percent (50%); and

(c) An annuity which is the actuarial equivalent, assuming monthly payments for life to the surviving spouse, of the deceased's accumulated additional contributions at the date of his death, plus his accumulated contributions at that date based on compensation earned in any membership category other than the category applicable to him at the time of the injury or the onset of the disease causing death.

In the event the surviving spouse does not have custody of the member's children, the additional amount payable pursuant to this section shall be payable to the person having custody of the children for each child during the lifetime of the child, or until the child marries or reaches the age of 18.

The computation for time prior to entering the membership category applicable to the deceased at the time of the injury or the onset of the disease causing death shall be based on the compensation earnable by him in the position first held by him in that category.

"Spouse" for purposes of this section means a wife or ~~dependent~~ husband.

(d) On and after October 1, 1965, the provisions of this section shall apply to all contracting agencies and to the employees of all contracting agencies whether or not such agencies have previously elected to be subject to the provisions of this section.

Any child whose eligibility for an allowance pursuant to this section, commenced on or after October 1, 1965, shall lose that eligibility effective on the date of his adoption

SEC. 3 Section 21365 5 of the Government Code is amended to read:

21365.5 Upon the death of a member who has attained the minimum age for voluntary service retirement applicable to him in his last employment preceding death, and who is credited with five or more years of state service and in circumstances in which the basic death benefit is payable other than solely that of membership in a county retirement system, or a retirement system maintained by the university, a monthly

allowance equal to one-half of and derived from the same source as the unmodified retirement allowance which the member would have been entitled to receive if he had retired for service on the date of his death shall be payable.

(a) To the surviving wife of a male member as long as she lives or until her remarriage; or

(b) To a ~~dependent~~ surviving husband of a female member as long as he lives or until remarriage; or

(c) To the children under age 18 collectively if there is no surviving spouse or if the surviving spouse dies or remarries before all children of the deceased member attain age 18, until every child dies or attains age 18; provided, that no child shall receive any allowance after marrying or attaining the age of 18

Where a member does not have a surviving spouse nor any children under the age of 18 years at the time of death, no allowance shall be payable under this section.

No allowance shall be payable under this section if a special death benefit or a benefit under Section 21337 is payable.

The allowance provided by this section shall be paid in lieu of the basic death benefit but a person, or such person's guardian, qualifying for the allowance may elect before the first payment on account of it to receive such basic death benefit in lieu of the allowance.

Any person who is receiving the allowance under this section on October 1, 1959, shall have the right to elect, not later than ninety (90) days after the date upon which notice of such right is mailed to him by this system, to receive in lieu of further payments of the allowance, a sum equal to the excess of the basic death benefit which was otherwise payable on account of the member's death over the sum of the monthly payments made prior to such election.

If the total of the payments made hereunder is less than the basic death benefit which was otherwise payable on account of the member's death, the amount of the basic death benefit less any payments made pursuant to this section shall be paid in a lump sum as follows:

(a) If the person last entitled to the allowance is the remarried spouse of such member, to such spouse;

(b) Otherwise, to the surviving children of the member, share and share alike, or if there are no such children, to the estate of the person last entitled to the allowance.

As used in this section, "a surviving wife" means a wife that was married to the member for at least one year prior to his death, a "~~dependent~~ surviving husband" means a ~~dependent~~ husband that was married to the member for at least one year prior to the member's death, and "child" includes a posthumously born child of the member.

REQUEST FOR UNANIMOUS CONSENT TO PRINT IN JOURNAL

Mr Karabian was granted unanimous consent that the following communications be printed in the Journal:

May 9, 1972

Honorable Bob Moretti
Speaker of the Assembly
Room 3164, State Capitol

Dear Mr. Speaker: I want to publicly disclose by this letter, which I will insert in the Assembly Journal, the fact that a group of Los Angeles attorneys, businessmen and I have purchased the Metropolitan News, a legal daily newspaper.

Attached is an extensive and thorough opinion from the Legislative Counsel, as well as an Attorney General's opinion incorporated by reference, which clearly indicates that there is no conflict of interest in the situation of a legislator who owns an interest in a legal newspaper.

Sincerely,

WALTER KARABIAN
Assemblyman

Opinion of Legislative Counsel

Sacramento, April 28, 1972

Honorable Walter Karabian
Assembly Chamber

Conflict of Interest—#9516

Dear Mr Karabian:

Facts

A legislator together with four associates in Los Angeles purchased a legal newspaper, the primary function of which is to publish legal notices as required by law. The legislator is a member of the Assembly Judiciary Committee, which considers many bills relative to legal notices While the notices presently being published by the newspaper are for the most part initiated by private attorneys, there is also a possibility that the City of Los Angeles and the state will publish legal notices in this newspaper.

Question

You have asked us to discuss the possible conflict of interest situations which could arise under the facts set forth above.

Opinion and Analysis

The Code of Ethics, beginning with subdivision (a), Section 8920, Government Code,* prohibits Members of the Legislature, among others, from engaging in any business, transaction or professional activity, or incurring any obligation, in substantial conflict with the proper discharge of their duties in the public interest or in conflict with their responsibilities as prescribed by state law.

Although the courts have not interpreted subdivision (a) of Section 8920, which we shall refer to as the "substantial conflict" prohibition,

* All references unless otherwise noted will be to the Government Code.

it is our opinion that there would be at least one possible situation in which a conflict could arise, that is, if receipt of income from a legal newspaper or from an advertising contract calls for taking a position with respect to legislation other than the stance expected of legislators—i.e., impartial consideration from the point of view of the public welfare—it could well involve the legislator in a violation of subdivision (b)(1) of Section 8920, which reads:

"8920. (b) No member of the Legislature shall, during the term for which he was elected:

"(1) Accept other employment which he has reason to believe will either impair his independence of judgment as to his official duties or require him, or induce him, to disclose confidential information acquired by him in the course of and by reason of his official duties."

In addition, under subdivision (b)(5) of Section 8920, set forth below, a legislator would also be prohibited from participation by voting or taking any other action (presumably including authoring legislation) towards the enactment or defeat of legislation in committee or elsewhere in which he has a "personal interest" unless on the vote for final passage he causes to be entered in the journal a statement that he has a personal interest in the legislation under consideration but he is able to cast a fair and objective vote without violation of any provision of the Code of Ethics

Subdivision (b)(5) of Section 8920 provides as follows:

"No Member of the Legislature shall, during the term for which he was elected:

* * *

"(5) Participate, by voting or any other action, on the floor of either house, or in committee or elsewhere, in the enactment or defeat of legislation in which he has a personal interest, except as follows:

"(i) If, on the vote for final passage by the house of which he is a member, of the legislation in which he has a personal interest, he first files a statement (which shall be entered verbatum on the journal) stating in substance that he has a personal interest in the legislation to be voted on and notwithstanding such interest, he is able to cast a fair and objective vote on such legislation, he may cast his vote without violating any provision of this article;

"(ii) If the member believes that, because of his personal interest, he should abstain from participating in the vote on the legislation, he shall so advise the presiding officer prior to the commencement of the vote and shall be excused from voting on the legislation without any entry on the journal of the fact of his personal interest In the event a rule of the house, requiring that each member who is present vote aye or nay is invoked, the presiding officer shall order the member excused from compliance and shall order entered on the journal a simple statement that the member was excused from voting on the legislation pursuant to law."

Thus, these provisions of subdivision (b) (5) of Section 8920 dictate what a legislator may or may not do as to a particular measure in the light of his personal interest.

Section 8921 states that a person subject to the provisions of this article has a personal interest, if he has reason to believe or expect that he will derive a direct monetary gain or suffer a direct monetary loss by reason of his official activity. *It also provides that a person does not have such an interest if any benefit or detriment accrues to him as a member of a business, profession, occupation or group to no greater extent than any other member of such business, profession, occupation or group*

The provisions of the Code of Ethics, cited above, are also contained verbatim in Joint Rule 44 of the Senate and Assembly. Thus, the rules governing the conduct of legislators in this situation are the same under both the Joint Rules and the Code of Ethics

Since the legislator in question is a member of the Assembly Judiciary Committee and has occasion to vote upon bills requiring notice to be published it is conceivable that, under some circumstances, he could be in a position to gain financially from his official action and thus have a personal interest in legislation of this type.

However, as indicated above, Section 8921 (and subdivision (c) of Joint Rule 44) provide that such interest is not a disqualifying "personal interest" if the circumstances are such that a legislator, as a member of a class, would not derive a greater benefit or detriment than others in his class.

With respect to the legislator's vote on such legislation, we think the class exception applies and that any special benefit or detriment derived from such legislation is too speculative and remote upon which to base a conflict of interest. Thus, in the absence of any special circumstance with respect to that particular legislator, it is our opinion that he need not disqualify himself from voting upon such legislation.

If the legislator in question feels that nevertheless he *does* have a personal interest in pending legislation he should abstain from voting; and in the case where a vote is required the presiding officer shall order the member excused from compliance and shall order a statement entered in the journal that the member was excused from voting on the legislation pursuant to law (see subd. (b)(5) of Section 8920, supra).

While the provisions of the Code of Ethics discussed above should be borne in mind with respect to the situation under discussion, in the absence of special circumstances such as those discussed above we find no provisions of the Code of Ethics which would prohibit the arrangement in question.

Another provision of the Government Code which might be mentioned in this context, with respect to any contracts for legal advertising entered into with the state, is Section 1090.

Government Code Section 1090 provides as follows:

> "Members of the Legislature, state, county, special district, judicial district, and city officers or employees shall not be financially interested in any contract made by them in their official

capacity, or by any body or board of which they are members. Nor shall state, county, special districts, judicial district, and city officers or employees be purchasers at any sale or vendors at any purchase made by them in their official capacity."

This basic prohibition against contracting would not, in our opinion, apply to a contract between a company in which a legislator may be "interested" and an agency in another branch of state government, since a Member of the Legislature merely by virtue of his status as such, has no official connection with any other state agency, and therefore is not in the position of dealing with himself in the dual capacity of private citizen and state official. The Attorney General has reached a similar conclusion. (See 14 Ops Cal. Atty. Gen 78.)

In conclusion, we find no violation of the Code of Ethics or of Section 1090 of the Government Code in the situation you describe.

Very truly yours,

GEORGE H. MURPHY
Legislative Counsel

Deputy Legislative Counsel

An individual shall be deemed to seek nomination or election if he has either taken the action necessary under the laws of this state to qualify himself for nomination or election to such office, or has received contributions or made expenditures, or has given his consent for any other person to receive contributions or make expenditures, with a view to bringing about his nomination or election to such office.

10503. "Political committee" means any committee, association, or organization which accepts contributions or makes expenditures on a political campaign of a candidate for state office during a calendar year in an aggregate amount exceeding one thousand dollars ($1,000). It also includes any committee, association, or representative of a corporation doing business within the state, or any labor union organization, which contributes money or in-kind services, to a candidate for state office.

10553. At the beginning of each calendar year, the limitations imposed pursuant to Section 10550 shall be revised according to the per centum difference between the price index of the previous 12 months and the current price index, as supplied by the Bureau of Labor Statistics of the Department of Labor under the Federal Election Campaign Act of 1972. The amount so revised shall be in effect for the calendar year.

10554. The district had originally authorized bonds for the construction of a waste water treatment plant for the benefit of an improvement district, but subsequently it became highly advantageous for the district to join with the City of Oceanside in the construction of a trunk sewer to dispose of the improvement district's waste water through the City of Oceanside's treatment plant rather than construct a separate waste water treatment plant. It is necessary that the district have its funds available as soon as possible to pay its share of the cost of the interceptor sewer if the district is not to lose additional funds available for the project from other sources during the 1971–1972 fiscal year. If it is necessary to secure the approval of the voters of the improvement district before the bond funds may be used for the construction of the interceptor sewer, rather than the waste water treatment plant, these additional funds will be lost and

the construction of urgently needed facilities for the protection of the public health of residents of the improvement district will be greatly delayed. This problem is not common to all districts formed under the Municipal Water District Law of 1911. It is therefore hereby declared that a general law cannot be made applicable and that the enactment of Section 71975 of the Water Code as a special law is necessary for the solution of problems existing in the Rainbow Municipal Water District.

Cities, counties, and districts shall comply with the request of the commission for such information and the commission shall make its studies available to cities, counties, and districts. In making these studies, the commission may cooperate with the county planning commissions.

The commission shall periodically review and update the spheres of influence developed and determined by them.

The spheres of influence, *after adoption,* shall be used by the commission as a *factor in making* ~~basis for~~ regular decisions on proposals over which it has jurisdiction. The commission may recommend governmental reorganizations to particular agencies in the county, using the spheres of influence as the basis for such recommendations. Such recommendations shall be made available, upon request, to other governmental agencies or to the public.

The commission, or the board of supervisors on behalf of the commission, is authorized to apply for or accept, or both, any financial assistance and grants-in-aid from public or private agencies or from the state or federal government or from a local government.

SEC. 2. Section 54790 of the Government Code is amended to read:

The purpose of this act is to provide a method whereby cities may contract with the owners of lands designated by a city as an industrial reserve to carry out long-range economic plans for the orderly development of the city and the conservation of open-space land as defined in the Williamson Act, and whereby the use of open-space land may be regulated in such a manner as to be deemed subject to an enforceable restriction within the meaning of Article XXVIII of the State Constitution.

In order to achieve the purpose of this act it is the intent of the Legislature to authorize cities that have an adopted general plan containing an industrial element to enter into a contract with the owners of land within an industrial reserve, when the land is of such size and character and is so situated as to lend itself to long-range economic development Such contract shall:

(a) Provide for the long-range economic development of the community by reserving areas designated on the general plan of the city as an industrial reserve.

(b) Provide for the restriction of land to its existing or desired open-space use on a long-term or permanent basis or until such time as it is needed for the economic development of the community.

(c) Provide for full participation by the city in development and planning decisions as to the timing of development, the location, type, and design of buildings and other structures and facilities necessary for the industrial development of the area.

(d) Provide that land restricted to open-space uses shall be deemed subject to an enforceable restriction within the meaning of Article XXVIII of the State Constitution.

(e) Provide for the fulfillment and termination of the contract by the owner for the industrial development or subdivision of his property if the development plans are in conformance with the policies of the city.

51076. The Legislature finds that the absence of methods whereby cities and the owners of land may carry out comprehensive long-range economic plans for the orderly development of land and the preservation of open space results in irrational development of land and the premature or unnecessary loss of open-space land needed for the production of food or fiber for recreation, for the enjoyment of scenic beauty, and for the use of natural resources.

51076.5. The Legislature further finds that the inability of local governments and landowners to carry out long-range comprehensive economic plans are in large part due to the following circumstances:

(a) Although cities may adopt economic plans for industrial use of land within their jurisdictions and may adopt ordinances regulating the use of such land, members of local governing bodies find it difficult, if not impossible, to bind themselves or future members to a continuation of land use policies, plans or regulations except through contracts authorized by state law.

(b) Because property owners or prospective buyers are reluctant to, or find it economically difficult to, hold land for the long-range economic benefit of the community.

(c) Because of confidence that they will be successful in having the long-range economic plans changed, prospective buyers have generally ignored existing plans, ordinances and regulations in determining prices offered for land for future development.

(d) County assessors and the State Board of Equalization have felt compelled under these circumstances and under provisions of the State Constitution to ignore present use and zoning restrictions in valuing land set aside for industrial development for assessment purposes where the present use and uses permitted by zoning ordinance do not reflect the market value of the property.

Article 2. Definitions

51077. As used in this chapter, unless otherwise apparent from the context:

(a) An "adopted general plan" is a general plan adopted by a city pursuant to Chapter 3 (commencing with Section 65100) of Title 7 which contains an industrial element.

(b) "Council" means the city council of a city which enters into an industrial development contract pursuant to this proposed legislation.

(c) "Industrial reserve" means an area containing lands set aside by a city under an adopted general plan capable of being enforceably restricted under provision of the Williamson Act.

(d) "Industrial development contract" means the written document entered into by and between the city and the landowner. A contract entered into pursuant to this article shall be an enforceable restriction within the meaning and the purposes of Article XXVIII of the State Constitution and shall be enforced by the city in such a manner as to accomplish the purpose of Article XXVIII

Article 3. Industrial Development Contracts

51078. Subject to the provisions of this chapter, any city may enter into an industrial development contract with the owner or owners of land situated within the industrial reserve of the city as designated by the adopted general plan of the city provided that·

(a) The adopted general plan contains an industrial element that clearly designates those lands that are to be considered as an industrial reserve; and

(b) The adopted general plan contains a statement or statements of the goals and policies of the city that will be followed in developing the industrial reserves of the city, and

(c) An industrial zoning ordinance is adopted that clearly limits the use of land zoned industrial to industrial use and those uses supportive of industrial development.

51079 No city may enter into an industrial development contract unless:

(a) The land is within the city; and

(b) The land is of such character, size, shape and location that it lends itself to the long-range economic planning of the city; and

(c) The land is within the industrial reserves of the city as designated by the adopted general plan of the city; and

(d) The land is subject to an enforceable restriction within the meaning of Article XXVIII of the State Constitution.

51080. The owner or owners of land designated by a city as an industrial reserve that would be subject to an enforceable restriction within the meaning of Article XXVIII of the State Constitution may petition to enter into an industrial development contract Such a petition shall be presented in writing to the city council and shall include for each parcel of land:

(a) The legal description and assessor's parcel number;

(b) The number of acres in the parcel;

(c) The names of all owners, including security holders; and

(d) Any other information required by the city

51080 5 The council shall, within 15 days after the filing of the application, at a regular meeting, either accept or reject the application If the application is rejected, the reason or reasons for such rejection shall be stated If the application is accepted, the council shall set a date for the purpose of hearing any objections to its entering into a contract with the owner or owners of the undeveloped open-space land The date set for the hearing shall be not less than 30, nor more than 45 days, from the date of the consideration of the applica-

tion. On the date set for the hearing, the council shall describe the form of the contract it is willing to enter into with the owner or owners, and shall hear any objections to its entering into the contract. The hearing may be continued or postponed until all pertinent testimony has been presented. The council shall, after hearing all testimony, make its finding as to whether or not the contract should be entered into. If the finding is to enter into the contract, the council shall authorize the execution of the contract.

A contract shall not be effective until it has been executed by all of the parties and has been recorded in the office of the county recorder of the county in which the land is situated.

51081. An industrial development contract shall:

(a) Be limited to those properties designated by the city as an industrial reserve on its adopted general plan that would qualify for an enforceable restriction within the meaning of Article XXVIII of the State Constitution; and

(b) Be for an initial period of not less than five years; and

(c) Provide for an enforceable restriction of subject property within the meaning of Article XXVIII of the State Constitution and Article 1.5 (commencing with Section 421) of Chapter 3, Part 2, Division 1 of the Revenue and Taxation Code; and

(d) Provide that on each anniversary of the effective date, a year shall be automatically added to the initial term unless notice as hereinafter provided; and

(e) Set forth the specific conditions which must be met before the contract shall be deemed fulfilled as to the whole or any part of the land described therein. Such conditions shall include: (1) the filing for and approval of an application for a building permit when such permit is for any building or structure that must be in conformance with the industrial zoning ordinance and the policies of the adopted general plan of the city; and (2) the filing for and approval of a subdivision map which is intended to provide for the industrial development of industrial property in conformance with the industrial zoning ordinance and the policies of the adopted general plan of the city; and

(f) Be binding upon, and inure to the benefit of, all successors in interest of the owner or the city.

A written notice of nonrenewal may be given, at any time not less than 60 days prior to the anniversary of the effective date of the contract, by either party.

51082 At such time as the industrial element of the general plan of the city is amended to reflect existing and anticipated future industrial and economic conditions, contracts for those properties that would no longer be in the industrial reserve are canceled without penalty provided that.

(a) The amendment of the general plan is adopted by the city pursuant to Chapter 3 (commencing with Section 65350) of Title 7; and

(b) The amendment is not the result of a particular development proposal, but rather the result of a broad based consideration of the long-range industrial and economic needs of the city.

51083. The industrial development contract may be terminated with respect to all or any portion of the land by mutual agreement of all the parties at such time that they find that there is no public interest to be served by continuing the contract in effect. Except as provided in this section, the procedure to be followed in terminating an industrial development contract prior to the end of the term of such contract shall be the same as provided for adopting an industrial development contract.

51084. No industrial development contract shall be terminated prior to the expiration of the term of the contract with respect to any land which in any of the preceding five years, including the year during which the contract is terminated, was subject to an open-space ordinance and valued for assessment as open-space land pursuant to Article 1.5 (commencing with Section 421) of Chapter 3 of Part 2 of Division 1 of the Revenue and Taxation Code, until the payment of a termination fee. Such termination fee shall be determined as follows:

(a) Prior to any action by the council giving tentative approval to the termination of an industrial development contract, the assessor of the county in which the land is located, for each parcel of land which in any of the past five tax years, including the tax year during which termination is to be granted, has been subject to an open-space ordinance and has been valued for assessment pursuant to Article 1.5 (commencing with Section 421) of Chapter 3 of Part 2 of Division 1 of the Revenue and Taxation Code, shall determine the market value of the land as it existed on the date the petition for termination was filed and as if the land were free of the restriction imposed by the open-space ordinance and the contract. The assessor shall multiply such value by the most recent county ratio announced pursuant to Section 401 of the Revenue and Taxation Code, and shall certify the product to the council as the termination valuation of the land for the purpose of determining the termination fee

(b) Prior to giving tentative approval to the termination of any contract, the council shall determine and certify to the county auditor the amount of any termination fee which any landowner must pay the county treasurer as deferred taxes upon termination That fee shall be an amount equal to 12½ percent of the termination valuation of the land.

(c) If the council finds that it is in the public interest to do so, it may waive all or any part of such payment, or may provide that such payments be deferred

(d) When the deferred taxes required by this section are collected, the county treasurer shall distribute such taxes to each taxing agency existing in the year of collection in each of the tax rate areas in which the parcels of land are located. After determining the amount of deferred taxes on all parcels in each tax rate area, the taxes for each tax rate area shall be distributed in the same proportion that each taxing agency's tax rate in the fiscal year of collection bears to the total tax rate of the tax rate area in the fiscal year of collection

(e) Upon tentative approval of the termination of an industrial development contract, the council shall record, in the office of the county recorder of the county in which the land is located as to which

the contract is to be terminated, a certificate which shall set forth the name of the owner of such land at the time the contract is terminated with the amount of the termination fee certified by the council as being due pursuant to this section, the contingency of any waiver or deferment of payments, and a legal description of the property. From the date of recording such certificate, the contract shall be finally terminated and, to the extent the termination fee has not yet been paid, a lien shall be created and attached against the real property described therein and any other real property located within the county owned by the person named therein as the owner Such lien shall have the force, effect and priority of a judgment lien Nothing in this section shall preclude the council from requiring payment in full of the termination fee prior to the termination becoming effective.

(f) In no case shall the termination of a contract be final until a notice of termination is actually recorded as provided in this section. Notwithstanding any other provisions of the Revenue and Taxation Code, any payments required by this section shall not create nor impose a lien or charge on the land as to which a contract is terminated except as provided in this section.

(g) Upon the payment of the termination fee or any portion thereof, the council shall record with the county recorder a written certificate of the release in whole or in part of the lien."

SEC. 23. Section 30462 of the Revenue and Taxation Code, as amended by Chapter 1400 of the Statutes of the 1971 Regular Session of the Legislature, is amended to read:

30462 All money deposited in the Cigarette Tax Fund under this part is hereby appropriated, subject to the provisions of any budget bill heretofore or hereafter enacted and Section 11006 of the Government Code, and shall, upon order of the State Controller, be drawn therefrom and allocated for the following purposes:

(a) To pay the refunds authorized by this part.

(b) To the Controller an amount not to exceed one hundred fifty thousand dollars ($150,000) in each fiscal year.

(c) For transfer to the credit of a special account in the General Fund, an amount equal to ~~30~~ *20* percent of the money in the fund which is derived from taxes imposed on and after ~~October 1, 1967~~ *January 1, 1973*, less ~~30~~ *20* percent of the cost of administering this part, such money to be disbursed by the Controller ~~on or before December 15, 1967, and~~ on the 15th day of each month ~~thereafter~~ to each city and county in this state in the following manner:

(1) The money to be allocated pursuant to this subdivision shall first be divided into two separate accounts, one for the cities and counties and counties of this state and one for the cities of this state. In order to determine the amount of money in each account, the Controller shall first determine the amount due each county, city and county and city in this state in the proportion that sales tax revenues transmitted pursuant to Part 1 5 (commencing with Section 7200) of

this division to each such city, city and county and in the unincorporated territory of a county bear to the total of such revenue in the state. In making such determinations, the Controller shall not consider any revenues derived from that portion of the taxes imposed by the county at a rate in excess of 1 percent pursuant to Part 1.5 (commencing with Section 7200) of this division. The amount due each county and city and county shall be allocated in accordance with this formula and the amount due each city shall be allocated pursuant to paragraph (2) or paragraph (3) of this subdivision.

(2) Upon the application of any city for an allocation pursuant to this paragraph, the Controller shall determine the amount of revenue derived from the city's selective local tax on, or with respect to, the sale, distribution, use, consumption, or holding of cigarettes or any other tobacco product during the 1966–1967 fiscal year, or which would have been derived from such tax if the rate in effect on August 1, 1967, had been in effect throughout such fiscal year This amount shall be adjusted, beginning on July 1, 1969, by the percentage by which the cigarette tax revenues have increased or decreased. For the 1969–1970 fiscal year the percentage shall be derived by comparing the revenues deposited in the Cigarette Tax Fund during the period January 1 through June 30, 1969, with those deposited during the period January 1 through June 30, 1968. For the 1970–1971 fiscal year and each fiscal year thereafter, the percentage shall be derived by comparing revenues deposited in the Cigarette Tax Fund during the preceding fiscal year with those deposited during the entire 1968–1969 fiscal year. The amount computed after applying the percentage factor shall then be reduced by deducting the cost to the city of administering and collecting any such tax for the 1966–1967 fiscal year If such amount, when divided by 12, is more than the amount which would be disbursed to the city at the time of the next allocation pursuant to paragraph (3) of this subdivision, an amount equal to the amount which such city would have netted from its own tax shall be allocated to such city each month pursuant to this paragraph from the account established for cities in paragraph (1), and no allocation shall be made to such city pursuant to paragraph (3) until such time as the city rescinds its right to receive an allocation under this paragraph A city which has rescinded such right may not, thereafter, file another application for an allocation pursuant to this paragraph. No city shall be eligible for a subvention pursuant to this paragraph unless, on August 1, 1967, it in fact imposed a selective local tax on, or with respect to, the sale, distribution, use, consumption or holding of cigarettes or any other tobacco product.

(3) (A) After making any allocations required by paragraph (2) of this subdivision, 50 percent of the revenue remaining in the account for the cities of this state shall be allocated to the remaining cities in the proportion that sales tax revenues transmitted pursuant to Part 1 5 (commencing with Section 7200) of this division to each remaining city bears to the total of such revenue transmitted to all remaining cities.

(B) Fifty percent thereof shall be paid to the cities receiving an allocation under this paragraph in the proportion that the population of each such city bears to the total population of all cities in this state receiving an allocation under this paragraph, as determined by the Controller For the purpose of this subdivision the population of each city is that determined by the Controller in the manner specified in Section 11005 of this code.

(d) The balance remaining in the fund shall be transferred to the General Fund of this state.

The allocation provided for in subdivision (c) shall not be made to any county, or city which, after October 1, 1967, imposes a selective local tax on, or with respect to, the sale, distribution, use, consumption, or holding of cigarettes or any other tobacco product.

Moneys disbursed pursuant to subdivision (c) of this section may be used for county, city and county, or city purposes, and may, but need not necessarily, be used for purposes of general interest and benefit to the state.

SEC 24. Section 30463 of the Revenue and Taxation Code is repealed.

~~30463. There is hereby appropriated from the Cigarette Tax Fund an amount equal to seventy percent (70%) of the money in the fund which is derived from the tax imposed pursuant to Article 2 (commencing with Section 30121) of Chapter 2 of this part, such money to be allocated by the Controller on or before December 15, 1967, to each city, city and county, and county in this state in the proportion that sales tax revenue transmitted pursuant to Part 1.5 (commencing with Section 7200) of this division to each such city, city and county and in the unincorporated territory of a county bears to the total of such revenue in the state.~~

~~The appropriation and allocations specified by the section are in addition to the allocations specified in subdivision (c) of Section 30462. The money allocated pursuant to this section shall be used for the purposes set forth in Section 151 of Chapter 963 of the Statutes of the 1967 Regular Session of the Legislature.~~

SEC 25 Section 30463 is added to the Revenue and Taxation Code, to read:

30463. Notwithstanding the provisions of Section 30462, none of the revenue derived pursuant to Article 2 (commencing with Section 30121) of Chapter 2 of this part shall be used for subventions to counties, cities and counties, and cities and the amount so derived shall not be used for purposes of computing such subventions. All revenues derived under such article shall be transferred to the State General Fund.

SEC. 26 Section 32201 of the Revenue and Taxation Code is amended to read:

32201 (a) An excise tax is imposed upon all distilled spirits sold in this state or pursuant to Section 23384 of the Business and Professions Code by manufacturers, distilled spirits manufacturer's agents, brandy manufacturers, rectifiers, or wholesalers, or sellers of distilled spirits selling distilled spirits with respect to which no tax has been paid within areas over which the federal government exercises jurisdiction, at the following rates:

All distilled spirits in excess of proof strength shall be taxed at double the above rate. The tax imposed by this subdivision shall also be paid by any person who possesses such distilled spirits for sale pursuant to Sections 23100 to 23105, inclusive, of the Business and Professions Code. On or before ~~October 30, 1967~~ *March 15, 1973*, each licensee or person subject to the tax imposed by this subdivision shall prepare and file with the board on forms prescribed by the board a return showing the amount of distilled spirits owned or possessed by him at 12:01 o'clock a.m. on ~~August 16, 1967~~ *January 1, 1973*, that is subject to the tax imposed by this subdivision, and such other information as the board deems necessary for the proper administration of this part. DIVISION 30. CHILD CARE AND PRESCHOOL DEVELOPMENTAL SERVICES

CHAPTER 1 INTENT

50000. The Legislature finds that many children fail to realize their full potential because of a lack of adequate and timely child care, educational and health care services during early childhood years.

The Legislature further finds that it is in the public interest to promote family stability and reduce dependency by making child care, preschool educational, and health services available to the children of parents who must be employed to achieve economic self-sufficiency

It is the intent of the Legislature to provide every child the opportunity to realize his full potential by establishing a system of comprehensive child care and preschool developmental services for children and families in need of such services.

It is intended that this system emphasize preschool education and developmental services for children to aid them in developing the abilities and skills which will make school achievement more possible.

It is further intended that these services involve the direct participation of parents whose children are served by these programs, and the participation of organizations and individuals interested in child care and preschool developmental programs; and that these services provide a framework for coordinated expansion of such programs in the future so that all parents and children having need of such services may obtain them.

RESOLUTIONS

The following resolution was offered:

By Assemblyman Knox:

House Resolution No. 52

Relative to the San Francisco Bay Area Rapid Transit District

WHEREAS, In 1972, the San Francisco Bay Area Rapid Transit District is expected to commence partial operation of its 75-mile rail system being constructed at the cost of $1 3 billion; and

WHEREAS, With a nationwide trend in decreased usage of public transportation systems and an increase in cost of operating such systems, it is apparent that BART, in the long run, will be unable to generate sufficient revenues from fares to pay for its operating expenses, let alone pay for the cost of constructing the 75-mile rail system; and

WHEREAS, The expected cost of operating BART during the 1975–1976 fiscal year is estimated to be $35 million, which is approximately 2 7 percent of the cost of constructing the 75-mile rail system, and

WHEREAS, The costs of operating BART are largely fixed, meaning that a decrease in service will not bring a comparable reduction in the operating cost; and

WHEREAS, The required revenue to operate BART can be secured by continuing the ½-percent retail transactions and use tax and from funds made available under Chapter 1400 of the Statutes of 1971, and

WHEREAS, In such a case, BART could be operated on a no-fare basis, thus making transportation available to the economically deprived individuals, while also providing an economic incentive to those who commute in their automobiles to discontinue such commuting; now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is hereby requested to assign to an appropriate committee for study the subject of operating the San Francisco Bay Area Rapid Transit District on a no-fare basis; and be it further

Resolved, That such committee report its finding and recommendations to the Assembly on the date specified by the Rules Committee upon assignment of this resolution.

Resolution read, and referred by the Acting Speaker to the Committee on Rules

Father, Your creation is characterized by a uniqueness which we often overlook. Each individual's talents are often unique and his contribution to society often indispensable, which we sometimes fail to see. Open our eyes to the goodness in others. Never let us, in our own desire to excel, stifle the initiative of others or close doors on their special contribution to a better world and a happier man.

Let us be more concerned about "what gets done," rather than "who does it."—AMEN.

2750. As used in this chapter:

(a) "Active fault trace" means the surface location of an earth fracture plane, along which there has been tectonic displacement of the two sides relative to one another and parallel to the fracture, and along which there is a reasonable likelihood that displacement of the ground surface could recur within 200 years, in the judgment of the State Geologist with concurrence of the State Mining and Geology Board.

(b) "Active fault zone" means the linear area enclosed within the outermost of a group of clearly related faults that mark a zone of crustal weakness. Such a zone generally is one-quarter mile or less in width encompassing one or more active fault traces. All such comments shall be returned within 90 days to the State Mining and Geology Board for its consideration. The official maps, based on criteria approved by the State Mining and Geology Board shall be disseminated by the division to each city and county having jurisdiction over lands lying within any such zone within 90 days after review by the affected cities and counties.

2753. The division shall periodically review new geologic and seismic data and shall prepare and transmit as provided in Section 2752 revisions to the official maps of active fault traces and active fault zones every two years after September 1, 1974."

(e) (1) In carrying out its duties under subdivisions (c) and (d), the association may request that there be imposed policy liens, contract liens, moratoriums on payments, or other similar means, and such liens, moratoriums, or similar means may be imposed if the commissioner does both of the following

(A) Finds that the amounts which can be assessed under this article are less than the amounts needed to assure full and prompt performance of the impaired insurer's contractual obligations, or that the economic or financial conditions as they affect member insurers are sufficiently adverse to render the imposition of policy or contract liens, moratoriums, or similar means to be in the public interest

(i) (1) Any person receiving benefits under this article shall be deemed to have assigned his rights under the covered policy to the association to the extent of the benefits received because of this article, whether the benefits are payments of contractual obligations or continuation of coverage. The association may require an assignment to it of such rights by any payee, policy or contract owner, beneficiary, insured, or annuitant as a condition precedent to the receipt of any rights or benefits conferred by this article upon such person. The association shall be subrogated to these rights against the assets of any impaired insurer.

(2) The subrogation rights of the association under this subsection shall have the same priority against the assets of the impaired insurer as that possessed by the person entitled to receive benefits under this article.

(j) The contractual obligations of the impaired insurer for which the association becomes or may become liable shall be as great as but no greater than the contractual obligations of the impaired insurer would have been in the absence of an impairment unless such obligations are reduced as permitted by subdivision (e), but the association shall have no liability with respect to any portion of a covered policy to the extent that the death benefit coverage on any one life exceeds an aggregate of three hundred thousand dollars ($300,000).

(k) The association may do any of the following

(1) Enter into such contracts as are necessary or proper to carry out the provisions and purposes of this article.

1064 8 (a) For the purpose of providing the funds necessary to carry out the powers and duties of the association, the board of directors shall assess the member insurers, separately for each account, at such times and for such amounts as the board finds necessary The board shall collect the assessments after 30 days written notice to the member insurers before payment is due

(3) "Class C" assessments shall be made to the extent necessary to carry out the powers and duties of the association under Section 1064 7 with regard to an impaired foreign or alien insurer

(c) (1) The amount of any Class A assessment for each account shall be determined by the board The amount of any Class B or C assessment shall be divided among the accounts in the proportion that the premiums received by the impaired insurer on the policies covered by each account bears to the premiums received by such insurer on all covered policies

(2) Class A and Class C assessments against member insurers for each account shall be in the proportion that the premiums received on business in this state by each assessed member insurer on policies covered by each account bears to such premiums received on business in this state by all assessed member insurers

ments under subdivision (b), and computation of assessments under this subdivision, shall be made with a reasonable degree of accuracy, recognizing that exact determinations may not always be possible.

(d) The association may abate or defer, in whole or in part, the assessment of a member insurer if, in the opinion of the board, payment of the assessment would endanger the ability of the member insurer to fulfill its contractual obligations The total of all assessments upon a member insurer for each account shall not in any one calendar year exceed 2 percent of such insurer's premiums in this state on the policies covered by the account.

(e) In the event an assessment against a member insurer is abated or deferred, in whole or in part, because of the limitations set forth in subdivision (d), the amount by which such assessment is abated or deferred, shall be assessed against the other member insurers in a manner consistent with the basis for assessments set forth in this section. If the maximum assessment, together with the other assets of the association in either account, does not provide in any one year in either account an amount sufficient to carry out the responsibilities of the association, the necessary additional funds shall be assessed as soon thereafter as permitted by this article.

(f) The board may, by an equitable method as established in the plan of operation, refund to member insurers, in proportion to the contribution of each insurer to that account, the amount by which the assets of the account exceed the amount the board finds is necessary to carry out during the coming year the obligations of the association with regard to that amount, including assets accruing from net realized gains and income from investments. A reasonable amount may be retained in any account to provide funds for the continuing expenses of the association and for future losses if refunds are impractical

(g) It shall be proper for any member insurer, in determining its premium rates and policyowner dividends as to any kind of insurance within the scope of this act, to consider the amount reasonably necessary to meet its assessment obligations under this article.

(h) The association shall issue to each insurer paying an assessment under this article a certificate of contribution, in a form prescribed by the commissioner, for the amount so paid All outstanding certificates shall be of equal dignity and priority without reference to amounts or dates of issue. A certificate of contribution may be shown by the insurer in its financial statement as an asset in such form and for such amount, if any, and period of time as the commissioner may approve

1064 9. (a) (1) The association shall submit to the commissioner a plan of operation and any amendments thereto necessary or suitable to assure the fair, reasonable, and equitable administration of the association. The plan of operation and any amendments thereto shall become effective upon approval in writing by the commissioner

(2) If the association fails to submit a suitable plan of operation within 180 days following the effective date of this article, or if at any time thereafter the association fails to submit suitable amendments to the plan, the commissioner shall, after notice and hearing, adopt and promulgate such reasonable rules as are necessary or advisable

to effectuate the provisions of this article. Such rules shall continue in force until modified by the commissioner or superseded by a plan submitted by the association and approved by the commissioner.

Such a corporation, association, or organization shall be reimbursed for any payments made on behalf of the association, and shall be paid for its performance of any function of the association. A delegation under this subdivision shall take effect only with the approval of both the board of directors and the commissioner, and may be made only to a corporation, association, or organization which extends protection not substantially less favorable and effective than that provided by this article.

1064 10. In addition to the duties and powers enumerated elsewhere in this article·

(d) The liquidator, rehabilitator, or conservator of any impaired insurer may notify all interested persons of the effect of this article

1064 11 To aid in the detection and prevention of insurer impairments:

(a) The board of directors shall, upon majority vote, notify the commissioner of any information indicating any member insurer may be unable or potentially unable to fulfill its contractual obligations.

(b) The board of directors may, upon majority vote, request that the commissioner order an examination of any member insurer which the board in good faith believes may be unable or potentially unable to fulfill its contractual obligations. The commissioner may conduct such examination. The examination may be conducted as a National Association of Insurance Commissioners examination or may be conducted by such persons as the commissioner designates The cost of such examination shall be paid by the association, and the examination report shall be treated as are other examination reports In no event shall such examination report be released to the board of directors of the association prior to its release to the public, but this shall not excuse the commissioner from his obligation to comply with subsection (c). The commissioner shall notify the board of directors when the examination is completed The request for an examination shall be kept on file by the commissioner, but it shall not be open to public inspection prior to the release of the examination report to the public, and shall be released at that time only if the examination discloses that the examined insurer is unable or potentially unable to meet its contractual obligations

The notice shall be personally served or shall be sent by certified mail, return receipt requested, directed to the address of the persons shown on the contract, unless such persons have notified the holder in writing of a different address. The notice shall set forth that there is a right to redeem the motor vehicle and the total amount required as of the date of the notice to redeem; may inform such persons of their privilege of reinstatement of the contract, if the holder extends such privilege, shall give notice of the holder's intent to resell the motor vehicle at the expiration of 10 days from the date of giving or mailing the notice, or if given by mail and either the place of deposit in the mail or the place of address is outside of this state, the period of notice shall be 20 days instead of 10 days; shall disclose the place at which the motor vehicle will be returned to the buyer upon redemption or reinstatement; and shall designate the name and address of the person to whom payment shall be made. During the period provided under said notice, the person or persons liable on the contract may pay in full the indebtedness evi-

denced by the contract Such persons shall be liable for any deficiency after the sale of the repossessed motor vehicle if it is a new motor vehicle and if the notice prescribed by this section is given within 60 days of repossession and includes the following:

1 A notice, in at least eight-point bold type if the notice is printed, reading as follows. "Notice You are subject to suit and liability if the amount obtained upon sale of the vehicle is insufficient to pay the contract balance and any other amounts due "

2 An itemization of the contract balance and of any delinquency, collection or repossession costs and fees In addition, the notice shall either set forth the computation or estimate of the amount of any credit for unearned finance charges or canceled insurance as of the date of the notice or shall state that such a credit may be available against the amount due

For purposes of this section, there is hereby established a presumption affecting the burden of proof that the value of the repossessed motor vehicle was the wholesale price which existed on the first day a repossessor could resell such vehicle under this section, as set forth in established used car price guides customarily used by California automobile dealers This presumption may be rebutted only by clear and convincing proof that the vehicle, while in the buyer's possession, had received use which prevents resale of the vehicle at the wholesale price.

The presumption established by this section shall not apply if the vehicle was resold at a price higher than the wholesale price, in which case the resale price shall be the value of the vehicle for the purposes of this section "

SECOND READING OF BILLS—AUTHOR'S AMENDMENTS

Assembly Bill No. 1157—An act to add Part 9 (commencing with Section 7950) to Division 5 of the Labor Code, relating to tunnel safety.

Bill read second time.

Consideration of Author's Amendments

The following amendments, pursuant to the Assembly Rules were read, and adopted:

Amendment No. 1

In the heading of the printed bill, strike out "Assemblyman Keysor", and insert "Subcommittee on the Sylmar Tunnel Disaster (Assemblymen Keysor, Fenton, and Russell)".

Amendment No. 2

On page 1, strike out lines 4 to 7, inclusive, and insert

"PART 9. TUNNEL AND MINE SAFETY

CHAPTER 1. TUNNELS AND MINES

7950. This part shall be known and may be cited as "The Tunnel and Mine Safety Act of 1972."

7951. As used in this part:

(a) Tunnel shall include excavation, construction, alteration, repairing, renovating, demolishing, or operation of any tunnel except tunnel work covered under the compressed air safety orders adopted by the Industrial Safety Board.

(b) "Tunnel" means an underground passageway, excavated by men and equipment working below the earth's surface, that provides a subterranean route along which men, equipment, or substances can move

(c) "Mine" means any excavation or opening above or below ground used for removal of ore, minerals, gravel, sand, rock, or other materials intended for manufacturing, sale or other purposes. It shall include quarries and open pit operations

(d) "Access shaft" means a vertical shaft used as a regular means of worker access to underground mines and tunnels under construction, renovation, or demolition.

(e) "Lower explosive limit" means the lowest concentration at which a gas or vapor can be ignited or will explode

(f) "Face" means the head of the tunnel where soil is being removed, or that area in a mine where digging is underway

(g) "Muck" means excavated dirt, rock, or other material

(h) "Permissible equipment" means equipment tested and approved by the U.S. Bureau of Mines and the division which is safe for use in gassy or extrahazardous tunnels or underground mines

7952. There shall be within the division a separate unit of safety engineers trained to inspect all tunnel construction and mine operations.

7953. Sufficient manpower shall be maintained to provide for two inspections of underground mines annually, one inspection of surface mines or quarries annually, and six inspections of tunnels under construction annually.

7954. To assist the unit of safety engineers in determining the safety of tunnel construction and mine operation, the division shall make available at least one industrial hygiene engineer and one chemist. A laboratory for analysis of dust, gas, vapors, soil, or other materials shall be available to members of this unit.

7955. Before any actual construction may be started on a tunnel or mine, a prejob safety conference shall be held with an authorized representative of the division.

The division shall classify all tunnels or mines as one of the following classifications:

(a) Nongassy, which classification shall be applied to tunnels or mines where there is little likelihood of encountering gas during the construction of the tunnel. Such tunnels shall be constructed under regulations, rules, and orders developed by the division and board and approved by the board. This subdivision shall not prohibit the division chief or his representatives from establishing any special orders that they feel are necessary for safety

(b) Gassy, which classification shall be applied to tunnels or mines where there is a possibility gas will be encountered Special safety measures, including those set forth in Sections 7965 to 7976, inclusive, those established by the division and board and adopted by the board, or special orders written by the chief or his representatives shall be observed in construction of gassy tunnels in addition to regular rules, orders, special orders, or regulations.

(c) Extrahazardous, which classification shall be applied to tunnels or mines where gas or vapors have caused an explosion or fire, where the likelihood of encountering petroleum vapors exists, or where tests show a concentration of hydrocarbon petroleum vapors in excess of 20 percent of the lower explosive limit within three inches of the roof, face, floor, or walls of any open workings Construction in extrahazardous tunnels shall conform to safety measures set forth in Sections 7977 to 7985, inclusive, any rules, regulations, orders, or special orders of the division, or any special rules, orders, or regulations adopted by the board

7956. All personnel, including both employees working above ground and those in the tunnel or mine, shall be informed of the classification designated by the division for that job. A notice of the classification and any special orders, rules, or regulations to be used in construction, remodeling, demolition, or operation of the tunnel or mine shall be prominently posted at the site.

7957. An emergency rescue plan shall be developed by the employer for every tunnel or mine Such plan, including a current map of the tunnel or mine, shall be provided to local fire and rescue units, to the division, and to every employee at the place of employment.

7958. A trained rescue crew of at least five men shall be provided at all tunnels and underground mines with 10 or more employees. At underground mines or tunnels with more than 25 employees, a minimum of two trained rescue crews shall be maintained Employees may be used for such rescue crews.

7959. Rescue crews shall be familiar with all emergency equipment necessary to effect a rescue or search for missing employees in case of an accident or explosion. Such rescue crews shall hold practices with equipment and using emergency rescue plan procedures at least once monthly during construction or operation of the tunnel or mines At least one rescue crew shall be maintained above ground at all times and within 30 minutes travel of the tunnel or mine site if the total employees on all shifts working underground exceed 25.

7960 In any tunnel or underground mine, tests for gas or vapors shall be made prior to start of work at each shift. If any concentration of gas at or above 10 percent of the lower explosive limit is recorded, and if the tunnel or mine is classified nongassy, the division shall be notified immediately.

7961. The division shall investigate immediately any notification of a gas reading 10 percent of the lower explosive limit or higher by an employer in a tunnel or underground mine classified as nongassy If the inspection determines the likelihood of encountering more gas or vapor, the division may halt operations until the tunnel or mine can be reclassified.

7962. A safety representative qualified to recognize hazardous conditions and acceptable to the division shall be designated by the employer in any tunnel or mine. He shall have the authority to correct unsafe conditions and unsafe practices, and shall be responsible for directing the required safety programs.

7963. All underground mines and tunnels shall have telephone or other communication systems to the surface in operation at any time there are persons underground Such systems shall be installed in such a manner that destruction or removal of one phone or communication device does not make other phones or communication devices inoperative.

7964. Whenever an access shaft is used as the normal means of entrance or exit to an underground mine or tunnel, it shall be constructed of fireproof material or fireproofed by chemical or other means.

CHAPTER 2. GASSY AND EXTRAHAZARDOUS TUNNELS

7965. Any tunnel or mine classified by the division as gassy shall operate under special procedures adopted by the board, as well as rules, regulations, special orders, or general orders for nongassy mines and tunnels

7966. In any tunnel classified as gassy by the division, there shall be tests for gas or vapors taken prior to each shift and at least hourly during actual operation. A log shall be maintained for inspection by the division showing results of each test. No excavation, muck removal, or other production work shall take place until a probe hole at least 200 feet deep has been drilled through the face of the tunnel or mine

and tests made on soil removed from the test probe During construction or operation of a gassy tunnel or mine, no production may be started unless at least 20 feet of probe hole remains ahead of the face or digging area.

7967. Whenever gas levels in excess of 10 percent of the lower explosive limit are encountered in a tunnel or mine classified as gassy, the division shall be notified immediately by telephone or telegraph.

7968. In any gassy tunnel or mine the devision may order work halted until adequate testing can be completed to determine the level of hazard from gases or vapors A notice of such shutdown shall be filed with the division inspector's superiors as soon as practicable Any overruling of such order must be made by the chief or his designated representative and must be in writing An onsite inspection must be made by the person overruling an inspector's order prior to resumption of work.

7969. In any gassy tunnel or mine the division shall review plans for electrical lighting and power for equipment. When it is necessary for safety, the inspector may require changes in the amount and type of lighting, and may require permissive-type wiring, switches tools, and equipment.

7970. In any tunnel or mine classified gassy, smoking shall be prohibited and the employer shall be responsible for collecting all personal sources of ignition such as lighters and matches from employees entering the tunnel.

7971. Whenever there is any ignition of gas or vapor in a tunnel or mine, all work shall cease, employees shall be removed, and reentry except for rescue purposes shall be prohibited until the division has conducted an inspection and authorized reentry for maintenance or production in writing.

7972. If the level of gas in any tunnel or mine reaches 20 percent of its lower explosive level at any time all men shall be removed, the division notified immediately by telephone or telegram, and no one shall reenter the tunnel or mine until written approval is given by the division.

7973 In any tunnel or mine classified as gassy, all employees shall be informed of any special orders made by the division following an inspection Such notice shall be given before entering the tunnel or mine A copy of any orders subsequently written by the division shall be posted and all employees shall be notified at a safety meeting called by the safety representative before they are permitted to start work.

7974 In any tunnel classified as gassy by the division, ventilation shall include continuous exhausting of fumes and air Fans for this purpose shall be located at the surface, and shall be reversible from a single switch at the portal or shaft

7975. A "kill" button capable of cutting off all equipment shall be maintained in any gassy tunnel or mine The safety representative or his designated representative shall cut off power at any time gas or vapor levels reach 10 percent of the lower explosive level or more Before work is restarted every employee underground shall be informed of the level of gas or vapor recorded, and a permanent record shall be called to the surface and retained in a special log.

7976. In any tunnel or mine classified as gassy, the division shall determine the number of fire extinguishers necessary and their locations.

7977. Any tunnel or mine classified as extrahazardous by the division shall comply with the provisions for gassy tunnels in this chapter, as well as regulations, rules, special orders, and general orders of the division or board.

7978. In any extrahazardous tunnel or mine smoking by employees or open flame shall be prohibited. Welding or cutting with arc or flame underground in other than fresh air shall be done under the direct supervision of qualified persons who shall test for gas and vapors before welding or cutting starts and continuously during such an operation. No cutting or welding shall be permitted in atmospheres where any concentration of gas or vapor reaches 20 percent of the lower explosive level or more.

7979. In tunnels or mines classified extrahazardous, sufficient air must be supplied to maintain an atmosphere of all of the following conditions:

(a) Not less than 20 percent oxygen.

(b) Not more than 0 5 percent carbon dioxide

(c) Not more than 5 parts per million nitrogen dioxide.

(d) No petroleum vapors or other toxic gases in concentrations exceeding the threshold limit values established annually by the American Conference of Governmental Industrial Hygienists.

7980. All electrical equipment and machines, including diesel engines, used in tunnels or mines classified extrahazardous shall be permissible equipment.

7981. An escape chamber, identified by prominent lighting, shall be maintained within 1,000 feet of the face of any tunnel classified extrahazardous, and shall be supplied with an independent air supply and a separate communication system.

7982. Records of airflow and air sample tests to assure compliance with required standards shall be maintained by the employer at the site of any tunnel or mine classified extrahazardous. Such records shall be made available to any division representative upon request.

7983. The main fan line used for ventilation in any tunnel or mine classified extrahazardous shall contain a cut-off switch capable of halting all machinery underground automatically should the fan fail or its performance fall below minimum power needed to maintain a safe atmosphere.

7984. In any tunnel or mine classified extrahazardous a device or devices which automatically and continuously test the atmosphere for gases or vapors shall be maintained Such device or devices shall be placed as near the face or area of operation as practical, but never more than 200 feet from such point. The division shall determine if additional monitors are necessary and where they should be located.

7985. All such testing device or devices shall be U S Bureau of Mines approved and shall automatically sound an alarm and activate flashing red signals visible to employees underground whenever the concentration of gases or vapors reaches or exceeds permissible levels

Permissible levels may be established lower than the limits set in division rules, regulations, or general orders whenever a division inspector considers such action necessary to make the operation safe for employees.

CHAPTER 3. LICENSING AND PENALTIES

7990. In any tunnel or mine under jurisdiction of the division, the use of explosives shall be limited to persons licensed by the division

7991 To obtain a license under Section 7790, a person shall pass an oral and written examination given by the division. Application for such license shall cost fifteen dollars ($15), which is nonreturnable. Licenses shall be renewable annually at a fee of five dollars ($5)

7992 The board shall determine qualifications for persons seeking an "explosive operator's license" and rules and regulations for use of explosives in tunnels or mines

7993. Any person holding an "explosive operator's license" who is convicted of violating any safety order involving the use or handling of explosives shall have his license suspended for not less than 30 days upon hearing by the division, in addition to any other penalties he may be assessed.

7994 Any person holding an "explosive operator's license" who is convicted of violating safety orders involving use or handling of explosives in which the violation is judged to be responsible for an accident involving serious injury or death shall have his license revoked for at least one year, in addition to any other penalties he may be assessed Any person who has had his "explosive operator's license" revoked may apply for a new license after the minimum period of revocation expires. He shall be required to pass all examinations before a new license is granted.

7995. Any person who has had his "explosive operator's license" revoked who is subsequently convicted of violations of a safety order involving the use or handling of explosives shall have his license permanently revoked in addition to other penalties he may be assessed

7996. All safety equipment required to provide safe employment in tunnels or underground mines shall be U S Bureau of Mines approved, and shall be certified acceptable by the division.

7997. The board shall review and update general orders for tunnels and mines annually. Representatives of the unit inspecting tunnels and mines shall be consulted during each review and shall be permitted to submit suggested changes to the general orders at any time."

Bill ordered reprinted, and to be re-referred to the Committee on Labor Relations.

SEC 12. Chapter 1.7 (commencing with Section 17270) is added to Division 14 of the Education Code, to read:

CHAPTER 1.7. ADJUSTMENTS TO USABLE ASSESSED VALUATION

17270. The Legislature hereby declares that its intent in enacting this chapter is to provide a reasonable and equitable method for ascertaining the value of property located within school districts for use in connection with the administration of state laws providing for the allocation of state funds to such districts for school purposes on the basis of value and provide for more equal educational opportunity for students residing in districts of varying wealth per unit of average daily attendance and to improve the equity among taxpayers residing in or owning property in districts of varying wealth.

The Legislature hereby further declares that in enacting this chapter it has no intention to affect in any way, whether directly or indirectly, any determination of the assessed value of property for tax purposes.

17271. Each school district shall report to the Superintendent of Public Instruction:

(a) The total assessed valuation of the district; and

(b) The amount equal to:

(1) Ten percent of the total assessed valuation in the 1973–1974 fiscal year.

(2) Twenty percent of the total assessed valuation in the 1973–1974 fiscal year.

(3) Thirty percent of the total assessed valuation in the 1974–1975 fiscal year.

(4) Forty percent of the total assessed valuation in the 1975–1976 fiscal year.

(5) Fifty percent of the total assessed valuation in the 1976–1977 fiscal year and following.

17273. The Superintendent of Public Instruction shall compute for each school district the amount derived by multiplying the assessed

valuation redistribution amount per unit of average daily attendance by the average daily attendance of the district for the preceding fiscal year.

The amount computed pursuant to this section is the redistribution amount.

17274. (a) Each school district shall compute the amount which the revenue derived from the levy and collection of school district taxes would have been if it had been collected and been based upon an assessed valuation reduced by the percentage specified in subdivision (b) of Section 17271.

(b) The amount computed pursuant to subdivision (a) shall be subtracted from the total amount of tax revenue To that result shall be added the redistribution amount.

(c) If the amount computed pursuant to subdivision (b) is less than the amount actually raised by the levy and collection of local school district taxes, the difference shall be transmitted to the School District Wealth Equalization Fund.

(d) If the amount computed pursuant to subdivision (b) is more than the amount raised by the levy and collection of local school district taxes, the Superintendent of Public Instruction shall allow to the district an amount equal to such difference from the School District Wealth Equalization Fund.

SEC. 13. Section 17300 of the Education Code is amended to read:

17300. It is the intent of the Legislature that the administration of the laws governing the financial support of the public school system in this state be conducted within the purview of the following principles and policies:

The system of public school support should be designed to strengthen and encourage local responsibility for control of public education Local school districts should be so organized that they can facilitate the provision of full educational opportunities for all who attend the public schools. Local control is best accomplished by the development of strong, vigorous, and properly organized local school administrative units. It is the state's responsibility to create or facilitate the creation of local school districts of sufficient size to properly discharge local responsibilities and to spend the tax dollar effectively

Effective local control requires that all local administrative units contribute to the support of school budgets in proportion to their respective abilities, and that all have such flexibility in their taxing programs as will readily permit of progress in the improvement of the educational program Effective local control requires a local taxing power, and a local tax base which is not unduly restricted or overburdened.

The system of public school support should assure that state, local, and other funds are adequate for the support of a realistic ~~foundation~~ *educational* program. It is unrealistic and unfair to the less wealthy districts to provide for only a part of the financing necessary for an adequate educational program.

The system of public school support should permit and encourage local school districts to provide and support improved district organization and educational programs The system of public school support

should prohibit the introduction of undesirable organization and educational practices, and should discourage any such practices now in effect Improvement of programs in particular districts is in the interests of the state as a whole as well as of the people in individual districts, since the excellence of the programs in some districts will tend to bring about program improvement in other districts.

The system of public school support should make provision for the apportionment of state funds to local school districts on a strictly objective basis that can be computed as well by the local districts as by the state The principle of local responsibility requires that the granting of discretionary powers to state officials over the distribution of state aid and the granting to these officials of the power to impose undue restriction on the use of funds and the conduct of educational programs at the local level be avoided

The system of public school support should effect a partnership between the state, the county, and the local district, with each participating equitably in accordance with its relative ability The respective abilities should be combined to provide a financial plan between the state and the local agencies ~~known as the foundation program~~ for public school support. Toward this ~~foundation~~ *support* program, each county and district, through a uniform method should contribute in accordance with its true financial ability.

The system of public school support should provide ~~, through the foundation program,~~ for essential educational opportunities for all who attend the public schools Provision should be made ~~in the foundation program~~ for adequate financing of all educational services.

The broader based taxing power of the state should be utilized to raise the level of financial support in the properly organized but financially weak districts of the state, thus contributing greatly to the equalization of educational opportunity for the students residing therein It should also be used to provide a minimum amount of guaranteed support to all districts, for such state assistance serves to develop among all districts a sense of responsibility to the entire system of public education in the state State assistance to all districts also would create a tax leeway for the exercise of local initiative

The Legislature further declares that in order to reduce the burden of inequitable property taxation it is in the best interest of the state to provide, from other than ad valorem property taxes, a predominate portion of the statewide cost of education in the elementary and secondary schools of the state The Legislature further declares that the funds to be provided are required in order to reduce the disproportionate demand upon property taxpayers for support of educational services and programs, equalize wide variations in the ability of local communities to support such services and programs, and to assist school districts in meeting increased demands due to concentrations of educationally disadvantaged pupils

In recognition of these disparities it is the intent of the Legislature to apportion funds for school purposes in such a manner as to provide adequate educational programs for all students regardless of where they reside or the wealth of their parents and neighbors.

In implementing its intent the Legislature declares that, although the present system of funding does not meet desirable criteria, sudden changes of great magnitude in the system of public school finance would disrupt the educational system of many districts and thereby damage the whole public school system of the state, the educational welfare of all students, and the economy of the state; therefore, rapid change is undesirable and unacceptable

Accordingly, the Legislature declares its intent to improve with all reasonable and deliberate speed, financial support of education in districts which have less than the statewide average assessed valuation per unit of average daily attendance as rapidly as those districts can efficiently utilize additional support, and at the same time allow districts with more than the statewide assessed valuation per unit of average daily attendance sufficient time to readjust their programs to new methods of financing to avoid precipitous disruption of present programs.

SEC. 14. Section 17301 of the Education Code is repealed.

~~17301. (a) The State Controller shall during each fiscal year transfer from the General Fund of the state to the State School Fund such sums, in addition to the sums accruing to the State School Fund from other sources, as shall provide in the State School Fund for apportionment during the fiscal year a total amount per pupil in average daily attendance during the preceding fiscal year credited to all kindergarten, elementary, high school, junior college and adult schools in the state and to the county school tuition funds, as certified by the Superintendent of Public Instruction, one hundred eighty dollars ($180).~~

~~(b) The Controller shall also transfer, as needed during each fiscal year, such additional amounts from the General Fund to the State School Fund as are certified from time to time by the Superintendent of Public Instruction to be necessary to meet actual computed apportionments from the State School Fund for the purposes set forth in Section 17303.5; provided that the total of such additional amounts transferred in a fiscal year shall not exceed, except pursuant to subdivision (c) of this section, ninety-eight dollars and ninety-two cents ($98.92) for the fiscal year 1970-1971 and fiscal years thereafter, per pupil in average daily attendance during the preceding fiscal year credited to all kindergarten, elementary, high school, junior college and adult schools in the state and to the county school tuition funds, as certified by the Superintendent of Public Instruction, less the amount, if any, by which seventy cents ($0.70) multiplied by the number of units of average daily attendance credited during the preceding fiscal year to all kindergarten, elementary, high school, junior college and adult schools in the state and to the county school tuition funds exceeds twenty-one dollars and fifty cents ($21.50) multiplied by the total average daily attendance credited during the preceding school year to elementary school districts which during the preceding school year had less than 901 units of average daily attendance, to high school districts which during the preceding school year had less than 301 units of average daily attendance, and to unified districts which during the preceding school year had less than 1,501 units of average daily attendance.~~

~~For purposes of this subdivision, amounts transferrable to the State School Fund for the purposes of subdivision (b) and subdivision (i) of Section 17303.5, commencing with the amounts transferrable for the 1969–1970 fiscal year, shall be considered separately, and amounts otherwise transferrable but not required for the respective purposes of those subdivisions in any fiscal year shall be retained in the General Fund to be devoted to the respective purposes in the next succeeding fiscal year.~~

~~(c) In addition to the amounts authorized to be transferred to the State School Fund from the General Fund under subdivisions (a) and (b) of this section, the Controller shall transfer from the General Fund to the State School Fund during the fiscal year, upon certification of the Superintendent of Public Instruction, if necessary to meet actual computed apportionments for the fiscal year for the purposes set forth in Sections 17303 and 17303.5, an amount not to exceed the lesser of: (1) 1 percent of the total apportionment from the State School Fund in the preceding fiscal year for the purposes set forth in Section 17303 or 17303.5, or (2) the net amount, if any, by which the total amounts authorized to be transferred from the General Fund to the State School Fund under subdivisions (a) and (b) of this section in prior fiscal years have exceeded the total amounts actually apportioned in prior fiscal years for the purposes set forth in Sections 17303 and 17303.5.~~

The Superintendent of Public Instruction shall also, by rule and regulation, prescribe the accounting procedures and all other procedures to govern the fixing of district tax rates and the disposition of the additional tax revenues provided pursuant to this section.~~

~~Of the additional tax revenues provided pursuant to this section, there shall be expended by a school district during a fiscal year, no more than the actual additional cost during that fiscal year of educating pupils in grades seven and eight as computed for purposes of subdivision (a). If at the end of any fiscal year there remains an unencumbered balance derived from the revenue of the increase in tax rate hereby provided, such balance shall be used exclusively in the following fiscal year for the payment of the obligations for which such tax revenues are afforded by this section and to offset such tax rate increase.~~

SEC. 67. Section 20816 of the Education Code is repealed.

~~20816. (a) The maximum rate of school district tax, including any maximum rate fixed pursuant to Section 20803, is increased in any fiscal year for any school district situated wholly or in part within a county which, in the 1968–1969 fiscal year, household furnishings and personal effects were enrolled on the county assessment roll.~~

~~(b) The increase in maximum tax rate shall be in an amount equal to the 2 percent of the total of the school district tax rates at which property taxes were levied and collected for purposes of the district during the 1968–1969 fiscal year, but subject to the provisions of subdivision (c).~~

~~(c) On or before the first day of February in any year, the governing board of the district may submit a petition to the county superintendent of schools requesting that officer to fix the maximum tax rate of the district for the next succeeding fiscal year at a rate higher than that provided for in subdivision (b). The petition shall demonstrate, on the basis of the best information available to the governing board, that the net loss in revenue which would have resulted to the district in the 1968–1969 fiscal year if household furnishings and personal effects had been exempted from property taxation, taking into consideration increases in state equalization aid which would have accrued to the district as result thereof, exceeds the revenues produced by the increase in maximum tax rate provided for in subdivision (b).~~

~~The assessor shall estimate the total amount of assessed value lost by reason of the exemption for household furnishings and personal effects between the 1968–1969 and 1969–1970 fiscal years and shall certify his findings to the county auditor and the county superintendent of schools. The county superintendent of schools shall estimate the amount of equalization aid to be received by the district on the basis of the loss in assessed value certified by the assessor. The county auditor shall apply the tax rate of the district for the 1968–1969 fiscal year to the amount of assessed value determined by the assessor and from the amount computed shall subtract the amount certified by the county superintendent of schools. The tax rate of the district for this purpose shall then be computed by determining the rate which will reflect this remaining amount. The district shall be bound by this determination of the auditor, whether it is more than, or less than, the amount of increase authorized by subdivision (b).~~

~~This subdivision (c) shall not apply to any district which has not first availed itself of this subdivision on or before February 1, 1972.~~

SEC. 68. Sections 2, 3, 4, 5, 6, 7, 9, 10, 11, 60, 61, 62, 64, 65, 66, and 67 of this act shall become operative on July 1, 1975. From July 1, 1973, until July 1, 1975, the taxes for special purposes actually levied in all school districts which will be eliminated pursuant to those sections of this act shall be reduced by an amount which will limit the revenues of each district to not more than will provide the prior year's expenditure level plus the application of the reasonable expenditure increment factor pursuant to Article 3 (commencing with Section 17701) of Chapter 3 of Division 14 of the Education Code. All such rates shall be reduced proportionately unless the county superintendent of schools approves an alternate method of reduction."

Bill ordered reprinted, and to be re-referred to the Committee on Education.

"SECTION 1. Chapter 8 (commencing with Section 39280) is added to Part 1 of Division 26 of the Health and Safety Code, to read:

CHAPTER 8. AIR POLLUTION CONTROL SUBVENTION PROGRAM

39280. As used in this chapter, "dollars budgeted" means moneys derived from revenue sources within a district or districts for use in the district's or districts' air pollution control programs.

39281. The board shall administer, pursuant to this chapter, such funds as may be appropriated to it for the purposes of this chapter.

39282. The board may subvene up to one dollar ($1) for every dollar budgeted for use by any of the following:

(a) A county or regional air pollution control district whose boundaries include an entire air basin.

(b) A unified district formed pursuant to Article 7 (commencing with Section 24330) of Chapter 2 of Division 20 whose boundaries include an entire air basin.

(c) County districts, including any unified districts, whose boundaries together include an entire air basin, and who are parties to one joint powers or other enforceable agreement which provides for all of the following:

(1) Uniform rules and regulations among all districts, excluding administrative rules and regulations.

(2) At least four meetings per year of the Basinwide Air Pollution Control Coordinating Council formed under Section 39272, or an equivalent procedure for basinwide consideration of policy matters.

(3) Suitable sharing of qualified air pollution personnel and equipment.

Subventions under this section shall not exceed twenty-three cents ($0.23) per capita. A subvention made pursuant to Section 39283 shall preclude subvention under this section.

39283. In air basins where funds are not subvened pursuant to Section 39281, the board may subvene up to two dollars ($2) for every three dollars ($3) budgeted by an air pollution control district. Subventions under this section shall not exceed eighteen and four-tenths cents ($0.184) per capita

39284. In air basins having less than 98,000 population, the board may subvene more than the specified amount allowed under Section 39282, if the subvention does not exceed forty-five thousand dollars ($45,000) per air basin, and each air pollution control district affected adopts a budget equal to or exceeding twenty-three cents ($0.23) per capita.

39285. The per capita limits in Sections 39282 and 39283 and the forty-five thousand dollar ($45,000) limit in Section 39284 may be increased by the board to reflect the effects of inflation on the moneys needed to carry out air pollution control programs No increase shall be made without the prior written approval of the Director of Finance.

39286. No moneys shall be subvened pursuant to this chapter unless the air pollution control district or districts affected are actively and effectively engaged in the reduction of air contaminants pursuant to the coordinated basinwide air pollution control plan and related county programs approved by the board pursuant to Section 39274 and 39275. When the board finds, pursuant to a resolution from the board of directors of an air pollution control district, or upon completion of proceedings conducted by the board pursuant to Section 39054, 39274, or 39275, that an air pollution control district is not so engaged in the reduction of air contaminants, the subvention which would have been allocated to such district pursuant to Section 39282 or 39283, plus such additional sum as may be necessary, if moneys are available from appropriations for the purposes of this chapter, shall be allocated to

the board itself to carry out the approved plan or program If the board acts under this section pursuant to a resolution of the board of directors of an air pollution control district, it may do so without proceeding under Section 39054, 39274, or 39275.

39287. The subvention otherwise due an air pollution control district may be reduced by the board up to an amount equal to the funds which are granted to the district by the federal government. In so reducing a subvention, the board shall take into account all the following factors:

(a) The purpose for which the federal funds were granted.

(b) The needs of the district in relationship to the needs of other districts.

(c) Any special and worthy programs conducted by the district not required by the plan or program approved by the board pursuant to Sections 39274 and 39275.

(d) The severity of air pollution within the district.

(e) Any other factors which the board reasonably determines should be considered.

39288. The board may review as it deems necessary the programs and expenditures by each air pollution control district receiving a subvention under this chapter to ascertain that the funds budgeted from nonstate sources are in fact being expended substantially in accordance with the budget on which the subvention was based. If the board finds that such are not being so expended, the board may do any of the following:

(a) Cease any further payments under the subvention.

(b) Withhold future subventions.

(c) Bring an action against the district or the counties or cities supporting the district to recover the subvention paid that fiscal year.

(d) Assume the powers of the district without further proceedings under other provisions of this part.

The board may allocate to itself sufficient moneys to conduct reviews authorized by this section.

39289. Any moneys not otherwise subvened or allocated by the board pursuant to this chapter may be used for supplemental subventions upon application up to a one-to-one matching basis or, in the board's discretion, for any other purpose related to the control of contaminants from nonvehicular sources. Matching supplemental subventions having unusual merit shall be given preference over expenditures for other purposes. In making supplemental subventions the board may consider federal grants received by the applicant and by other air pollution control districts.

39290. The board shall adopt such regulations as may be necessary or advisable to carry out the purposes and provisions of this chapter.

39291. Any moneys appropriated to the board for expenditure under this chapter not allocated during the fiscal year shall revert to the General Fund.

SEC. 2. Section 235 is added to the Revenue and Taxation Code, to read:

235. Equipment used to abate or control atmospheric pollution or contamination by removing, altering, disposing, or storing of pollutants, contaminants, or wastes, and which has been constructed, reconstructed, erected, acquired, or installed to meet air pollution control emission standards established by or pursuant to law, is exempt from property taxation for five years after the equipment is placed in operation.

SEC 3. Section 2 of this act shall become operative upon the effective date of a constitutional amendment authorizing such property tax exemptions.

SEC. 4. There is hereby appropriated for the fiscal year 1972–1973, from the General Fund to the State Air Resources Board, the sum of four million six hundred thousand dollars ($4,600,000) for the purposes of carrying out the provisions of Chapter 8 (commencing with Section 39280) of Part 1 of Division 26 of the Health and Safety Code.

SEC. 5. There is hereby appropriated for the fiscal year 1972–1973, from the General Fund to the State Air Resources Board, the sum of two million four hundred thousand dollars ($2,400,000) for the State Air Resources Board's nonvehicular programs This appropriation shall be reduced by the amount of any appropriation made from the General Fund in the Budget Act for fiscal year 1972–1973 for the State Air Resources Board's nonvehicular programs. Any appropriation in such Budget Act to the State Air Resources Board from the Motor Vehicle Account in the State Transportation Fund, shall be reduced by the amount by which the appropriation for the State Air Resources Board's nonvehicular programs is increased by this act

SEC 6 This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

Air pollution is widespread and affects the health of many people. Effective air pollution control has not been developed in some counties, in part due to lack of funds. This act will provide the lacking funds and should bring about, without further delay, effective air pollution control programs throughout the state."

Mr. Cullen was granted unanimous consent that the following reports, submitted by the California Information Systems Implementation Committee, pursuant to the provisions of Assembly Bill No. 1663, Chapter 1237, Statutes of 1971, be printed in the Journal:

California Information Systems Implementation Committee

Sacramento, February 4, 1972

Members of the Legislature
and
Governor Ronald Reagan

Dear Members and Governor Reagan: Under the provisions of Chapter 1237, Statutes of 1971, (AB 1663—MacDonald), a California Information Systems Implementation Committee is established for the specific purpose of formulating recommendations regarding the appropriate legislative and executive actions required to implement the state's electronic data processing (EDP) policies which are currently set forth in the Government Code (commencing with Section 11700). The committee is to begin its work immediately and will expire on June 30, 1972

Chapter 1237 also requires the submission of a report to the Legislature and the Governor on February 1, 1972 specifying the recommendations and procedures for implementing conclusions reached by the committee. Because of the length of the 1971 session, it has been determined that a letter describing the objectives and plans of the committee will be transmitted to fulfill the reporting requirements. The detailed report containing the recommendations and an implementation plan will be completed and submitted before June 30, 1972.

Joint Legislative-Executive Effort

For the first time the numerous problems associated with the effective statewide control, utilization and management of electronic data processing technology will be considered jointly by the Legislature and the administration through the California Information Systems Implementation Committee. This committee is composed of the chairmen of the Joint Legislative Budget Committee, the Joint Legislative Audit Committee, and the Assembly Committee on Efficiency and Cost Control, together with the Director of the Department of Finance and General Services, and the Governor or his designee (the Secretary of Business and Transportation).

The specific purposes of the committee can be summarized as follows:

1. Review existing EDP policies.
2. Develop an organization structure within state government which will provide for implementation of policies and plans and also encourage the utilization of EDP technology to meet the state's information requirements.
3. Develop a methodology to be used to determine the optimum development of the state's computer resources
4. Determine the necessary activities required to effectively operate state data processing installations.
5. Determine how to maximize EDP as a management tool.
6. Prepare a report designed to stimulate action.

The Current Environment

Numerous studies by the Legislature, administration and private consultants have identified the problems that exist and which will impede the state's use of modern computer technology during the 1970's. This environment can be described as follows:

1. A continued orientation to "departmental data processing" which encourages individual departments to develop plans for new information systems and the acquisition of electronic computers without consideration of the overall requirements of the state This has resulted in:
   a. Continued requests by individual departments to acquire computer hardware and develop department-oriented information systems Each attempt to integrate systems or control their acquisitions becomes a major confrontation with the requesting department.
   b. The lack of a standard approach to the design of information files makes an interchange of data between departments or retrieval of data by the Legislature and executive branch management costly and extremely difficult if not impossible.
   c. A lack of statewide standards in the operation of computer centers, with a resultant absence of compatibility in programming languages, file management systems, teleprocessing monitors and operating systems. This situation also limits the possibility for computer centers to absorb workload from other centers, serve as a backup or communicate with each other. Therefore, most centers operate at less than optimum efficiency.

2. There are no existing plans to develop a statewide data communications network to support the various state information systems (in operation or in the design stages) which will require extensive data communications capability.
3. Insufficient progress has been made toward the utilization of current state-of-the-art computer technology. The state should capitalize on such concepts as: the establishment of data bases with terminal access to this data from remote locations; the use of mini-computers for pre-processing and communications control; and the use of independent manufacturers' plug to plug compatible devices (disk devices. tape units, terminals, etc.) which can lower hardware cost significantly.

A Time for Action

We are convinced that the studies, research and the efforts of the past five years have brought the state to a level of awareness which can now be translated into a specific plan which will enhance the use of electronic data processing as well as provide significant dollar savings or an improved level of service or both.

Costs for EDP totaled $83 million in fiscal year 1971–72 A recent feasibility study to develop a consolidated EDP service center approach for fiscal and personnel functions revealed that without consolidation, agencies performing these functions would expend over a five-year period a total of $32,271,214 for EDP. Through the consolidated approach these agencies anticipate expending $28,523,510 or a savings of $4,747,704. This is just one example of the savings that can result from consolidation. Significantly improved information systems using modern EDP equipment are other benefits to be gained from consolidation.

We intend to develop recommendations which will have the backing of both the Legislature and the administration It is anticipated that these recommendations will include full consideration of the needs of all state users of EDP as well as the following major items.

Consolidation of Computer Resources

The existing 45 electronic computers currently operating in the executive branch (exclusive of the state colleges and the university) could be consolidated into from five to eight service centers These centers could be organized along agency or functional lines (such as for Law Enforcement) or both. To fully utilize the computer technology available today, these centers should be equipped with large scale electronic computers.

Data Base Approach

In order to provide required information for both legislative and executive decisionmaking, together with the routine production of reports and services to the public, the concept of utilizing multi-use data bases structured to facilitate the one-time collection and storage of data in common formats should be a part of any overall plan.

An Organizational Structure for EDP

The problem of how the state should be organized to best control, manage and utilize its EDP resources must be addressed by this committee. The logical alternatives available for consideration include:

1. A governmental unit structure to provide management of EDP consolidated centers together with a strong central EDP control and development unit in an existing state agency such as the Department of Finance.
2. A Department of Data Processing Services which would centralize all responsibility within one state organizational unit
3. A strong centralized EDP planning, evaluation, and control unit (with management audit authority) that would operate within the existing consolidation group structures.

Funding for Consolidation

The issue of providing sufficient funds to accomplish the conversion of existing departmental data processing systems to consolidated EDP service centers must be addressed. There is little doubt that consolidation will require a specific commitment from the Legislature and administration for additional funds.

Personnel Resources

The entire question of EDP personnel resources must be evaluated as a part of any major statewide consolidation effort. A salary and classification structure must be established to attract and retain the necessary EDP specialists The existing EDP training program to develop personnel must be enhanced and conducted on a statewide basis

These items and others will be further developed for presentation to the Legislature and the Governor before June 30, 1972.

Sacramento, May 17, 1972

Members of the Legislature
and
Governor Ronald Reagan

Dear Members and Governor Reagan· The California Information Systems Implementation Committee respectfully submits for your con-

sideration its second interim report together with a number of recommendations which we believe should become part of the Budget Bill of 1972.

Joint Legislative-Executive Committee

This committee is a joint legislative-executive body which was established by Chapter 1237 (Statutes of 1971). Its specific purpose is to formulate recommendations regarding appropriate legislative and executive actions required for implementing the state's electronic data processing policies as set forth in the Government Code.

In an interim report to all members of the Legislature and Governor Reagan on February 4, 1972, we stated that for the first time the numerous problems associated with the effective statewide control, utilization, and management of electronic data processing (EDP) technology will be considered jointly by the Legislature and the Administration through this committee We also called your attention to the fact that numerous studies by the Legislature, Administration and private consultants have identified the problems that exist and which will impede the state's use of modern computer technology during the 1970's.

After summarizing these problems, our report maintained that state officials had been brought to a level of awareness which could now be translated into a specific plan. A primary feature of any plan was to be, in our judgment, the establishment of from five to eight consolidated EDP service centers.

1971 Conference Committee (Budget Bill) Actions

As you will recall, the 1971 Conference Committee acted to eliminate budgetary support for the Office of Management Services because of a lack of progress in resolving the problems associated with electronic data processing. All the higher management positions were abolished and fifteen staff positions were transferred to the Department of Finance together with the responsibility for the control and coordination of EDP.

The 1971 Conference Committee also made numerous recommendations which were designed to hasten EDP consolidation and halt continued proliferation and misuse of departmental computers.

Following these actions, the exempt position of the State Data Processing Officer was authorized in the Department of Finance (also under Chapter 1237) and an EDP Control and Development Unit was established by the Director of Finance.

EDP Master Plan and Implementation Schedule Approved

The California Information Systems Implementation Committee has regularly met during 1972, and technical staff associated with each of the members have participated in all deliberations. It was agreed by the committee that the State Data Processing Officer would develop a Long-Range Master Plan and prepare an implementation schedule following the guidelines established in our February 4, 1972 report

This master plan has now been completed and was approved by Governor Ronald Reagan and his Cabinet in April 1972 The Information Systems Committee reviewed the plan and granted approval in May 1972.

Essentials of the EDP Master Plan

In preparing the plan, over 60 unconsolidated users of electronic data processing were identified by the Department of Finance. These users were being serviced by more than 25 separate computer installations throughout state government.

Consolidated Data Centers

The plan will establish five major consolidated data centers utilizing the principle of the computer utility. These centers are designated as follows:

Center	*Title*
I	Business and Services Center
II	Revenue Center
III	Human Relations Center
IV	Law Enforcement
V	State Colleges

These major data centers will use large-scale computers, provide backup capability, be capable of modular expansion and contraction, and will be linked to user departments by remote terminals and satellite mini-processors.

The Law Enforcement Center and State Colleges will continue to function under a structure that has received previous legislative and executive fiscal and organizational sanction. The remaining centers are slated for in-line upgrades to newer or expanded computers in order to achieve the projected cost reductions The initial phases of the plan will result in consolidation of computers, computer operations, and systems programming support.

Standard Operating Procedures

Each new consolidated data center will have a uniform organizational structure. The standard business programming language for all centers will be ANS COBOL, and uniform conventions for use in teleprocessing applications will be installed at all centers A state teleprocessing network will also be installed to serve all departments.

Legislation has been prepared which will authorize exempt data center directors to be appointed as required to provide technical leadership and management to each center, and revolving funds are proposed to facilitate the funding of the centers.

Common Data Bases

When consolidation of computers has been achieved, the benefits associated with common integrated data bases will be realized. The concept of the common data base is that each data element is maintained only once and is utilized by any computer program requiring that element. This approach will permit new or improved applications to be developed with fewer tasks, less time, and lower costs The data base approach also has the potential for more readily providing information for decisionmaking to legislative and executive agencies.

Cost Benefits To Be Achieved

This plan has been designed to achieve direct cost reduction and cost-avoidance totaling $185,000,000 in the next five years. These savings can be projected for the following reasons·

1. The data processing power per dollar invested increases significantly with larger computers.
2. Consolidated data centers permit a fuller and more efficient use of this resource
3. Improved management of consolidated data centers will occur because of the ability to more adequately organize, control, and operate five centers as compared to 25.
4. The cost of data processing support greatly exceeds the cost of computers and related devices Consolidation will result in fewer support personnel, greater productivity of programmers through use of advanced techniques, and reduced facility requirements
5. A significant reduction in the cost of data processing applications by the use of the data base approach, improved computers and storage devices, and faster installation of new applications (which themselves reduce state costs). The latter can occur because of a higher skilled staff which will be using improved techniques resulting in optimum use of both machine and personnel resources.

Conversion Plans

The immediate goal of this plan is to first convert to the Business and Services Center and the Revenue Center the computer programs now run on the decentralized computers slated for consolidation ·

This conversion effort must be completed as rapidly as possible in order to release existing computers and begin achieving savings from the rental payments on these machines Therefore, it is planned to request an augmentation to the budget which will be considered as "seed money" to facilitate this conversion and other related "start-up" projects.

Specific Recommendations

The above discussion is intended to provide sufficient information to support the recommendations which are summarized below

RECOMMENDATION NO 1—Revolving Funds

Four revolving funds are proposed to support the Business and Services, Revenue, Human Relations and Law Enforcement Consolidated Data Centers. The state colleges can continue to operate under their existing budgetary structure

These revolving funds will provide the fiscal mechanism needed to develop and operate the consolidated data centers This will be accomplished by amendments to AB 1251.

RECOMMENDATION NO. 2—Budget Bill Item Changes

Changes are recommended to all Budget Bill items which support data processing. Funds will be identified for (1) computer systems and other processing equipment on lease or to be purchased; (2) EDP site modification; and (3) personnel consisting of computer operations

management and supervision, computer operations, systems support personnel (software), and other positions considered to be a part of computer operations

These funds will be deducted from the appropriate categories of expenditure and reflected as a separately scheduled category of expenditures within the existing appropriation item under the title—"Consolidated Data Center".

RECOMMENDATION NO. 3—Control Language

Budget Bill control language is proposed to provide flexibility in the implementation of this program The Department of Finance is given the authority to transfer funds to the budget items supporting consolidated data centers as required to implement the approved plan.

The Joint Legislative Budget Committee is to be notified quarterly of all such transfers made under this section.

RECOMMENDATION NO 4—Budget Augmentation

A The Information Systems Committee unanimously endorses the request by the Administration that $4 7 million be appropriated in a new budget item These funds are to be used as the "seed money" for this consolidation plan and the funds will be applied to the two major new centers—Business and Services and Revenue Specifically, these funds will be allocated for (1) conversion of existing computer programs to the computers installed at each center; (2) to prepare the computer facilities required to house the consolidated data centers, and (3) for all other one-time expenses related to start-up operations which are not now budgeted in departmental budgets such as freight, magnetic tape and discs, and training.

The Department of Finance estimates that the funds required for this conversion will be recovered from savings within two years and returned to the General Fund

B In addition to the committee request for an augmentation of $4 7 million, Senator Teale, Assemblyman Cullen, and Assemblyman Thomas urge that an additional augmentation of $1 million be added to the Budget Bill in order that the Human Relations Center can also be activated during the 1972–73 fiscal year The Administration plan establishes this center but does not schedule any departments for conversion except the conversion of the Department of Human Resources Development (HRD) which is now in progress

The Legislative Analyst in his Analysis of the Budget Bill for Fiscal Year 1972–73 recommends the establishment of this center because of the acquisition by HRD of a large, new powerful and expandable computer system with federal funds It should be pointed out that this computer can absorb the computer workload of the Departments of Public Health, Mental Hygiene and part of the workload in Social Welfare The Senate Finance Committee adopted this recommendation and its version of the budget stipulates that an agency center be established on January 1, 1973.

Appended to this report is a justification prepared by the Legislative Analyst for the additional $1 million in augmentation funds It appears that this proposed expenditure would be recovered within two years

and generate savings of approximately $6 5 million over a five-year period. The total savings from an agency data center in the Human Relations Agency could be as high as $14 5 million over a five-year period if the assumptions made by the Legislative Analyst are used as a basis for planning.

It should be noted that the Auditor General has also been authorized by the Joint Legislative Audit Committee independent of this committee to study data processing operations in the Human Relations Agency. These findings should provide additional information relative to the consolidation plans for the HRA already proposed by the Administration and the Legislative Analyst Because the $1 million in conversion funds for the departments in the HRA is not available for expenditure until after December 1, 1972, it will be possible to modify the conversion schedule based on the Auditor General's findings, if this should become necessary.

RECOMMENDATION NO. 5—Section 4 Modification

This committee has evaluated the provisions of Section 4 of the Budget Bill and the accompanying Supplemental Report Language. Modification has been proposed which will retain the strong central control of data processing expenditures The proposed language now stipulates that the department directors must certify that criteria and procedures have been met, with final approval given to the Department of Finance. This will simplify the paperwork processing while maintaining central control and authority for approval of expenditures The Senate Finance Committee included the new Section 4 language in its version of the budget.

Additional detailed information on this EDP consolidation program is available upon request.

Once again, we urge your acceptance of these recommendations.

Sincerely,

It is the intent of the Legislature that driver training instruction be provided pupils as a part of the high school curriculum, and the Legislature finds and declares that exceptional children are entitled to the benefit of such instruction so far as their individual capabilities permit, understanding that those pupils herein described often require individualized and amplified driver training instruction in order to succeed in becoming safe operators of motor vehicles Since without a means of self-transportation much of the overall program of education and rehabilitation provided for by the Legislature would be of little avail to the person without the mobility required to become a productive and well-adjusted member of society, the Legislature further declares that it is incumbent upon the state to share in the cost of providing a most needed and desirable program of driver training instruction for these exceptional children.
