(c) During the 1974–1975 fiscal year, 30 percent

(d) During the 1975–1976 fiscal year, and during any fiscal year thereafter, 25 percent "

Amendment No. 22

On page 8, strike out lines 31 to 40, inclusive; and on page 9, strike out lines 1 to 32, inclusive, and insert

"(a) While local communities may accept or reject federal and state planned transportation development, considerable pressure is exerted to accept these plans because the upper levels of government have the power to and do transfer funds to other areas when their plans are rejected by the local communities To preclude the continuation of this practice, the authority of the local communities to influence the transportation development within their areas must be established by statute so that local communities may be free of undue duress to the maximum extent possible.

(b) The effects of transportation development on economic growth and stability evidence no marked difference between urban and rural areas However, urban transportation development materially affects the locational structure of urban society, both as to individuals and businesses, the public costs of mobility, land usage, the environment, the rate at which fossilized and other energy fuels are consumed, and other community values In short, the quality of life for current and

future generations is to a large extent determined by the transportation decisionmaking process. Therefore, providing an adequate, safe, and efficient transportation system may be the objective of rural transportation planning. However, it is but one of several objectives used to establish the criteria by which urban transportation development plans should be evaluated.

(c) Of all the states, California has both the greatest number and the highest percentage of its total population living in urban areas Therefore, the consequence of urban sprawl and the impotency of voluntary regional planning represent the major impediments to rational transportation planning in California The creation of regional authorities with the responsibility for implementing that which is planned by the authority is a condition precedent to meaningful urban multimodal planning.

(d) The absence of confidence in the street and road planning and needs determination practices requires the use of arbitrary allocation formulas developed by compromises reached decades ago which do not reflect current and future needs The addition of multimodal considerations will complicate the problem of revenue allocation which was never rationally resolved even for roads only solutions to transportation problems In order to minimize useless planning by those who do not have the authority or the resources to implement their plans, the responsibilities for the construction, operation, and control of resource allocation for the various types of components should be established before multimodal planning commences

(e) The poor quality and absence of practical alternatives for urban transportation are the consequence of the erroneous assumption that the designation and appropriation of most resources to the completion of grand road systems, such as the National System of Interstate and Defense Highways and the California Freeway and Expressway System, will solve urban problems Primary attention must be given to changing planning practices so that planning is directed to the solution of transportation problems, rather than simply the conscious stimulation of highway travel, in urban areas which, in turn, leads to the designation of additional urban highway systems "

Article 17. Los Angeles Unified School District Retirement System

14130. Chapter 1305 of the Statutes of 1971, modified the State Teachers' Retirement System for improving benefits for, and providing a source of financing from teachers and school districts which did not maintain a local retirement system. These changes make it impossible to continue the prior relationship of the Los Angeles and San Francisco systems to the State Teachers' Retirement System. To enable these local systems to separately determine their future course of action, Chapter 1305 of the Statutes of 1971 makes no change in the local systems other than to terminate additional subventions after June 30, 1972.

The purpose of this article is to grant authority to the Los Angeles Unified School District to take any and all necessary steps to determine whether it wishes to merge with the State Teachers' Retirement System and thereby gain the advantage of the benefit improvements and financing structure of that system, or to continue to operate a separate system under a local benefit and financing program. This authority shall include the right to expend moneys out of the local system fund to cover the expenses of the investigation of the advantages of the merger and to consummate the merger if this course appears desirable, as well as to create and maintain reasonable contingency reserves to insure an orderly and adequate transition fully protecting the interests of the Los Angeles teachers.

14131. Notwithstanding any other provision of this code, the provisions of this article shall govern the matters included in this article.

14132. The modifications to the State Teachers' Retirement System retirement, disability and family allowances formulae contained in Chapter 1305 of the Statutes of 1971 shall not apply to the Los Angeles Unified School District Retirement System, hereinafter called the city local system.

14133. An election shall be held any time prior to July 1, 1972, to determine if the affected members of the city local system are to be covered only by that system or to be covered only by the State Teachers' Retirement System The election shall be decided by a simple majority of those voting. The election shall be effective as of July 1, 1972.

The election shall be in such manner as specified by the governing board of the Los Angeles Unified School District and the results shall be transmitted to the State Teachers' Retirement System by that board no later than June 30, 1972 All costs of the election shall be borne by the employer reserve in the city local system

14133.1. If the affected members of the city local system vote in an election held prior to July 1, 1972, to be covered only by the city local system, Sections 14133 2 through 14133.8 shall apply.

14133 2 Effective July 1, 1972, all members of the city local system are excluded from membership in the State Teachers' Retirement System except for nonlocal service A person so excluded shall retain the right to receive a retirement allowance for nonlocal service which is creditable in the State Teachers' Retirement System unless he withdraws his contributions therefor as provided in Section 14070.

14133 3. All persons who first enter employment in the Los Angeles Unified School District on or after July 1, 1972, in positions which otherwise would be eligible for membership in the State Teachers' Retirement System are members of the city local system. The State Teachers' Retirement System shall not accept these persons into membership

14133 4. Member and employer contributions for service performed in the Los Angeles Unified School District shall be paid to the city local system

14133 5 All persons on the city local system retired rolls on June 30, 1972, shall remain on the local rolls The State Teachers' Retirement System will continue the subvention in Section 14120 to the local district for those persons, will pay the retired update and annual improvement factor increase directly to the retirant and will pay the two-thousand-dollar ($2,000) retired death benefit upon their death. Such retired death benefit will be reduced by the retired death benefit payable by the city local system.

14133 6 The city local system shall provide concurrent retirement benefits for service in the city local system as provided in Sections 13838, 13990 and 14211 as these sections read on July 1, 1972, for:

(a) Any person who was a member of both retirement systems on June 30, 1972; and

(b) Any person who could have qualified under (a) above if he had not taken a refund from either but not both systems; provided he qualifies for and redeposits prior to retirement in either system.

14133.7. Notwithstanding the provisions in Section 14211, a member of the city local system may retire concurrently and receive credit from the State Teachers' Retirement System for service performed in other states of the United States, its territories and possessions and the Dominion of Canada provided that the person is eligible under Sections 13998, 13999 and 14000, and the benefits attendant thereto

14133 8 The city local system shall provide for and assume total financial responsibility for the full Permanent Fund benefit earned through June 30, 1972, as those benefits existed in subdivision (a) of Section 14240 on June 30, 1972

The accumulated Permanent Fund contributions related to Los Angeles local service shall be transferred to the city local system as of July 1, 1972

14134. If affected members of the city local system on June 30, 1972, vote in an election held prior to July 1, 1972, to be covered only by the State Teachers' Retirement System, Sections 14134 1 through 14139 shall apply.

14134 1 The subvention to the city local system shall be canceled and the retired rolls transferred to the State Teachers' Retirement System as of July 1, 1972, together with the present value of the

annuity and other benefits being paid from the employer and employees' reserves in the city local system less the present value of the benefit being provided out of subventions.

14134.2. There shall be no reduction of any benefit being paid to an individual as a result of Section 14134.1.

14134.3. All service credited to the individual accounts in the city local system shall be transferred to the State Teachers' Retirement System on the same basis as credentialed service is credited in the State Teachers' Retirement System.

14134.4. The Los Angeles Unified School District shall transfer to the Teachers' Retirement Fund as of July 1, 1972, the total contributions on deposit in the individual accounts of members of the city local system, and shall transfer not less than:

(a) An amount equal to the contributions that would have been required had all service prior to July 1, 1972, been performed as a nonlocal member of the State Teachers' Retirement System plus credited interest through June 30, 1972, plus 6 percent interest from July 1, 1972, to the actual date of transfer; plus

(b) An amount equal to 8 percent of the employee compensation as provided in Section 13832 for service performed from the date due in the system's office plus 6 percent interest.

14134.5. The Los Angeles Unified School District shall also deposit in the Teachers' Retirement Fund an amount equal to 3.2 percent of employee compensation as provided in Section 13832 as the employer's contribution for service performed from the date due in the system's office, plus 6 percent interest.

14134.6. If the accumulated contributions in the person's account at the time of transfer to the State Teachers' Retirement System are not equal to those required in Section 14134.4, the difference between the amount in the account and the required amount is an unfunded liability and is the responsibility of the employer. The Los Angeles Unified School District shall, at the time of the transfer of assets, provide the additional amount of accumulated contributions required to put each individual account in balance if the shortage is due to the rate of contributions which had been required by the city local system. Such amount shall be a charge against the residual funds remaining on deposit with the Los Angeles Unified School District. Clerical errors in assignment of rates or errors in rates due to incorrectly reported birth dates are the responsibility of the member.

14134.7. Any funds transferred by the governing board of the Los Angeles Unified School District in accordance with Section 14134.4 in addition to the accumulated contributions already in the member's account shall be deposited as employer contributions in the Teachers' Retirement Fund, and shall not be credited to the member's account and shall not be refundable.

14134.8. Persons who elected to retain the $\frac{1}{70}$th formula when the $\frac{1}{60}$th formula was adopted by the city local system are liable for the portion of contributions related to that election plus credited interest through June 30, 1972, and regular interest thereafter.

14134.9. Adjustments to accounts caused by late discovery shall be made in accordance with Sections 14134.4, 14134.5, 14134.6 and 14134.8.

14134 10 Those persons who took a refund of their contributions and interest from the city local system prior to July 1, 1972, and who have Permanent Fund contributions on deposit in the State Teachers' Retirement System for such service shall have the accumulated Permanent Fund contributions on deposit in the State Teachers' Retirement System as of July 1, 1972, treated in the same manner as the Permanent Fund contributions of all nonlocal members.

Upon discovery and notification to such persons, they shall:

(a) Redeposit the contributions required with regular interest; or

(b) Leave the Permanent Fund accumulated contributions on deposit and receive an actuarially reduced retirement allowance.

14138 The Los Angeles Unified School District may continue the current annual report of member contributions and service for fiscal year 1972–1973 for all nonlocal certificated members working in the Los Angeles Unified School District The 8-percent employee and 3 2-percent employer contributions for these nonlocal members shall be remitted monthly If an annual report is submitted instead of a monthly report, it is due on July 31, 1973, and is delinquent on August 31, 1973 The provisions of Section 14056 shall apply.

14139. The city local system shall submit a list of all members of that system as of June 30, 1972, who have credentialed service which would qualify for membership in the State Teachers' Retirement System. The list shall be submitted to the State Teachers' Retirement System no later than August 31, 1972

14140 If any provision of this article or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of this article which can be given effect without the invalid provision or application, and to this end the provisions of this article are severable.

CHAPTER 10. COUNTY CONTROLLED DISTRICTS

60400. "County controlled district," as used in this chapter, means every governmental agency or entity which is located wholly within a county and is governed by the board of supervisors of the county.

60401 The Legislature finds and declares that there has been a proliferation of county controlled districts in this state which are unresponsive to the electorates they have been established to serve, politically nonaccountable, lacking of any participation in the democratic process, and unable to fulfill the urban and regional needs of

the people of the state, and which are severely undermining the strength and effectiveness of local self-government by counties throughout the state.

60402 Every county controlled district which is vested with the power to tax or levy an assessment is hereby dissolved on January 1, 1976. All property, assets, and liabilities of a county controlled district shall be transferred on such date to the county in which it is located.

60403. The county in which a county controlled district is located shall, on the date specified in Section 60402, succeed to all powers, duties, and functions of the county controlled district for the purpose of winding up the affairs of the district All taxable property within the former boundaries of the county controlled district shall continue to be taxable for the purpose of paying the bonded or other indebtedness of such district outstanding or contracted for at the time of the dissolution of the district, and until such bonded or other indebtedness shall have been satisfied. The amount of money to be raised by taxes for such purpose shall be determined, and such taxes shall be levied and collected, pursuant to the provisions of the law under which the county controlled district was governed prior to its dissolution.

60404. Any county may create assessment or other special zones as provided by law to assume the powers, duties, and functions of county controlled districts dissolved pursuant to this chapter.

60405 Any county may submit to the voters of the county the question of whether the county as a whole should succeed to the liabilities of any county controlled district dissolved pursuant to this chapter and thereafter operate the facilities of the district as part of the county government If the question is approved by a majority of the voters voting on the proposition, all taxable property within the county shall be taxable for the purpose of paying the bonded or other indebtedness of the county controlled district outstanding or contracted for at the time of the dissolution of the district

60406 After the effective date of this chapter, no county controlled district shall be created located wholly within a county and vested with the power to tax or levy an assessment, whether by special law or pursuant to a general law authorizing the formation of a district."

RESOLUTIONS

The following resolutions were offered:

By Assemblyman Powers:

House Resolution No. 56

Relative to the regulation of advertising practices by public utilities

WHEREAS, There has been considerable public criticism of the advertising programs of many public utilities in California, and

WHEREAS, This criticism is hereby found to be justified with regard to some of the advertising done by California utilities; and

WHEREAS, Excessive amounts of money collected from the ratepayers appear to be spent by some California public utilities on advertising; and

WHEREAS, Many of the individual advertising campaigns do not appear to be justified in terms of the benefits which accrue to the ratepayers from such campaigns, and

WHEREAS, The Public Utilities Commission has the authority to disallow unreasonable advertising expenditures from the total operating expenses which public utilities are permitted to recover from their ratepayers and thereby effectively stop such unreasonable and unjustified advertising, and

WHEREAS, The commission has exercised this authority in a generally satisfactory manner, and in recent rate cases particularly has shown evidence of becoming stricter in its allowance of advertising expenses; now, therefore, be it

Resolved by the Assembly of the State of California, That the Public Utilities Commission is urged to continue its strict regulation of advertising by public utilities and particularly that the commission include explicit findings on advertising in its decision in every major rate case; and be it further

Resolved, That the commission is urged to continue the downward pressure evident in recent cases on the overall level of advertising expenditures by public utilities; and be it further

Resolved, That the commission is urged to adopt the following guideline in its examination of individual advertising campaigns and to set strict standards in its interpretation of the guideline that advertising expenditures shall be allowed only if it is demonstrated, with the burden of demonstration on the public utility, that such expenditures produce substantial benefits for the ratepayers, and be it further

Resolved, That in its regulation of the advertising expenditures of public utilities the commission attempt to develop explicit guidelines and a consistent body of precedents on what constitutes a reasonable level of advertising expenditures and what constitutes advertising of substantial benefit to the ratepayers

Resolution read, and referred by the Speaker pro Tempore to the Committee on Rules

By Assemblymen Powers and Moretti

House Resolution No. 57

Relative to the Public Utilities Commission

WHEREAS, The Assembly Committee on Commerce and Public Utilities has studied the subject of the estimating practices of household goods carriers, and

WHEREAS, The committee has found that the regulation of household goods carriers' estimates by the Public Utilities Commission prohibits charging less than certain minimum rates, but does not prohibit the making of estimates which do not reflect a proper application of those minimum rates; and

WHEREAS, The committee has found that this system of regulation actually encourages deliberate underestimating by some household goods carriers as a competitive practice; and

WHEREAS, The committee has also found, according to the carriers' own reports filed with the Public Utilities Commission, substantial underestimating did occur in 1969; and

WHEREAS, The committee has found that a system of regulation which encourages underestimation as a competitive practice, supported by statistical evidence of a widespread or deliberate underestimation, clearly demonstrates that a serious problem exists, and

WHEREAS, The Public Utilities Commission investigated this problem for 1½ years and came to the conclusion that "as a means of protecting the public the present estimating rule has proved to be worthless"; and

WHEREAS, The commission proceeded to issue a new rule effective April 1, 1972, which aims at resolving a problem related to the problem of underestimating as a competitive practice but which does not appear to have any direct effect on the problem of deliberate underestimating, and

WHEREAS, The best that the commission could say about the anticipated effect of the new rule on underestimating was that "hopefully, it will engender a desire on the part of carriers to be more accurate in estimating to avoid collection problems", and

WHEREAS, It appears that this new order may be a step in the right direction, but it does not go far enough in correcting prevailing abuses involving deliberate underestimating; now, therefore, be it

Resolved by the Assembly of the State of California, That the Public Utilities Commission is hereby requested to accumulate evidence involving its experience under its new estimating rules, to institute proceedings concerning the problem of deliberate underestimating by household goods carriers; and therefrom to develop regulations and orders which are designed to eliminate deliberate underestimating as a competitive practice; and be it further

Resolved, That the commission is requested to complete its investigation and to prepare and issue orders and regulations designed to eliminate deliberate underestimating by household goods carriers as a competitive practice by March 15, 1973.

Resolution read, and referred by the Speaker pro Tempore to the Committee on Rules.

"My son, if you aspire to serve the Lord,
prepare yourself for an ordeal.
Be sincere of heart, be steadfast,
and do not be alarmed when disaster comes.
Cling to Him and do not leave Him,
so that you may be honoured at the end of your days.
Whatever happens to you, accept it,
and in the uncertainties of your humble state, be patient,
since gold is tested in the fire, and chosen men
in the furnace of humiliation.
Trust Him and He will uphold you,
follow a straight path and hope in Him."—AMEN

(3) Confirming and establishing the exact areas available for public use in streets, highways, flood control channels, public utility and other public ways.

(4) Minimizing the loss of area by property owners whose boundaries have been disturbed by earth movements such as but not limited to slides, subsidence, lateral or vertical displacements or similar disasters caused by man or by earthquakes or other acts of God, by equitably reestablishing property lines or by allocating to adjacent owners areas of land released by the narrowing or relocating the lines of public streets, highways or other public ways, with the consent of the city, county or state, as the case may be, under whose jurisdiction such streets, highways or ways are vested, given for the promotion of the general welfare.

SEC 2 Chapter 3 6 (commencing with Section 751 50) is added to Title 10 of Part 2 of the Code of Civil Procedure, to read:

CHAPTER 3 6 EARTH MOVEMENTS DISASTERS ACT

751 50 If the boundaries of land owned either by public or by private entities have been disturbed by earth movements such as, but not limited to, slides, subsidence, lateral or vertical displacements or similar disasters caused by man, or by earthquake or other acts of God, so that such lands are in a location different from that at which they were located prior to the disaster, an action in rem may be brought to equitably reestablish boundaries and to quiet title to land within the boundaries so reestablished

751 51 (a) An action authorized by this chapter may be commenced by

(1) A county in which lands were affected by a disaster described in Section 751 50 with or without the joinder of a city or cities included in the county and within the area so affected

(2) A city, if the disaster has affected land in the city.

(b) In an action authorized by this chapter every entity in actual and peaceable possession of, or having an estate or interest in or lien upon any of the land affected by the action, whose possession or evidence of estate or interest is either recorded or known to the plaintiffs, the city, if the land is within a city, the county in which the land is located, and the State of California must be designated in the complaint of the action, and given notice in the manner required by this chapter.

(c) All unknown entities, including owners, lien or interest claimants, heirs, devisees, legatees or assigns, may be described in the caption and complaint as "all entities claiming any interest in or lien upon, the real property herein described or any part of it."

751 52. An entity which is a permissive plaintiff under this chapter, may bring a separate action with respect to separate portions of the disaster area of sufficient size to equitably reestablish boundaries without harm to other areas of the common disaster, its decision regarding the desirability of the separate action, and regarding the area to be dealt with in each action to be approved by the court.

751 53 The complaint shall substantially include:

(a) A statement of the facts which make the provisions of this chapter applicable.

(b) A description of the exterior boundaries of the real property area sought to be affected by the action

(c) A specification of the estate, title, interest or claim owned, and in the actual possession of the plaintiff or plaintiffs in described parts of the entire real property sought to be affected by the action.

(d) A specification of the estate, title, interest or claim, so far as they are known to the plaintiffs or either of them, and so far as they are capable of being discovered by reasonably diligent search by the plaintiff or plaintiffs, in each separate part of the entire real property sought to be affected by the action

(e) A specification of the street areas sought to be vacated or offered by the plaintiff, or plaintiffs, to be vacated in whole or in part for judicial equitable allocation to landowners for the mitigation of the losses inflicted upon the landowners by the particular disaster or disasters to which this act is applicable

751 54 Summons, publication of notice, posting and related matters and procedures shall be governed by the provisions of Sections 751 05 through 751 10, inclusive, of the Code of Civil Procedure

751 55 Upon the completion of the service, publication and posting of the summons, as may be required by this chapter, the court has complete jurisdiction over the parties plaintiff or plaintiffs and the entire real property described in the complaint as intended to be affected by the action, and over every entity having or claiming an estate, right, title or interest in or to, or lien upon, all or any part of the property, and shall be considered to have obtained the possession and control of the property for the purposes of the action with complete jurisdiction to render the judgment provided for in this chapter

751.56. (a) An answer to the complaint must be served within 90 days after the first publication of the notice, or such further time not exceeding 30 days, as the court for good cause may grant

(b) An answer must:

(1) Specifically set out the particulars in which the claimant's estate, right, title, or interest in or to, or lien upon all or any part of the property is different from, or greater than, the interest of the claimant as it is described in the complaint.

(2) Be confined to rights based on events occurring at the time of, or since the time of the disaster

(c) To whatever extent, if at all, the answering party has rights against anyone whatsoever, based upon facts or events which occurred before the disaster, the claims shall remain unaffected by the action brought under this chapter and shall be assertable subsequent to the conclusion of the action at any time and in any manner permitted by law, notwithstanding the judgment granted in this action, recognizing however the finality of this judgment as to the consequences, with respect to land boundaries as applicable to land in the disaster area.

751 57 A party to an action authorized by this chapter may file a notice of the pendency of the action in the form and at the place and with the effects specified by law.

751 58 The vacating of streets, highways, or other public ways within or abutting the area affected by the disaster, in whole or in part, by the voluntary action of the governmental agency under whose jurisdiction the streets, highways, or ways are vested, for the purpose of making it possible for the court to mitigate the hardships suffered by entities because of the change in land boundaries caused by the disaster can be accomplished by the affected governmental agency expressing the offer in the proceedings followed by the court's acceptance thereof in an action authorized by this chapter, without complying with any other formalities of law.

751.59 In an action of the type authorized by this chapter, judgment shall not be given by default, but the court must require proof of the facts alleged in the complaint and other pleadings

751 60 The judgment shall.

(a) Determine the land boundaries of each parcel of land located within the entire area of real property sought to be affected by the action, whether owned publicly or privately, as fixed by the disaster, except as these boundaries have been judicially and equitably readjusted and as liberalized by judicial equitable allocation of lands voluntarily vacated by a city, county or the state under this act

(b) Determine the entity or entities having estates, rights, titles, interests and claims in and to each parcel, whether legal or equitable, present or future, vested or contingent, or whether they consist of mortgages or liens of any description

(c) Approve and direct the proper filing of an official map covering the entire area of real property sought to be affected by the action, as a substitute for the plat maps previously filed, but rendered inaccurate by the disaster

751 61 In reaching the conclusions called for by Section 751 60, the court shall give effect to the changes in land boundaries caused by the disaster, mitigated, however, so far as can equitably be done by

adjustment of land boundaries and by allocating to contiguous lots parts of the land released by a city, county or the state by its voluntary vacation of areas formerly constituting public ways, which vacatings of streets shall be approved by the judgment

751 62 The judgment shall be conclusive with respect to land boundaries upon every entity who at the commencement of the action had or claimed an estate, right, title or interest in or to or lien upon a part of the entire area of real property described in the complaint as intended to be affected by the action, and upon every entity claiming under any such person by title subsequent to the commencement of the action

751.63 A certified copy of the judgment shall be recorded, at the expense of the plaintiff or plaintiffs in the action, in the office of the recorder of the county in which the affected land is situated and shall constitute constructive notice of the findings therein and of the official plat or plats referred to therein, which findings and plats shall supersede and control all prior plats, maps and documents to the extent inconsistent therewith

751 64 The remedies provided for by this chapter are cumulative and in addition to any other remedy provided by law for quieting or establishing title to real property or the boundaries of it

751 65 This chapter may be cited as the Earth Movements Disaster Act."

REQUEST FOR UNANIMOUS CONSENT TO PRINT IN JOURNAL

Mr. Thomas was granted unanimous consent that the following letters of transmittal be printed in the Journal:

Joint Legislative Audit Committee

The Honorable Speaker of the Assembly
The Honorable Members of the Assembly of the Legislature of California

Sirs: We transmit herewith the Auditor General's report resulting from his review of the Medi-Cal funding system currently in use by the fiscal intermediaries of the state The fiscal intermediaries maintain bank accounts of their own wherein state warrants are deposited for funds to pay Medi-Cal providers

The current staggered check funding system of the intermediaries is presently saving the state approximately $650,000 per year over previous procedure However, the Centralized Treasury System plan for Medi-Cal, if implemented, would enable the state to earn an additional $389,000 per year. Savings of $104,000 would result from eliminating Blue Shield's bank service charges and reconciliation costs Retention of the funds in the state treasury rather than in Blue Shield's bank accounts would result in interest earnings of $285,000

It is recommended that the Department of Health Care Services adopt the Centralized Treasury System plan no later than August

1972, and combine California Blue Shield's two bank accounts into one Centralized Treasury System account to realize the benefits stated above.

Respectfully submitted,

VINCENT THOMAS, Chairman
Joint Legislative Audit Committee

Above report referred to the Committee on Efficiency and Cost Control.

The Honorable Speaker of the Assembly
The Honorable Members of the Assembly of the Legislature of California

Sirs: We herewith transmit a performance audit report prepared by the Auditor General on the State Controller's operations.

The Controller's Office is one of several fiscal control agencies responsible for the collection, control, investment, expenditure and auditing of the state's resources. No overall conclusion is expressed in the report which suggests that each functional area be studied separately Such a study would include agencies other than the Controller's Office.

Six recommendations are made in the report all of which require legislation. Some of the legislation has been unsuccessful in the past.

The Controller by statute serves on more than 20 boards and commissions Some of these positions are inconsistent with his other duties and responsibilities For example, as a member of the Board of Equalization he hears appeals of Franchise Tax Board decisions which he makes as a member of that board

Changes in the administration and collection of inheritance taxes, in addition to those already made by the Controller, could save the state over $1 million each year. By transferring to the Controller's Office the inheritance tax duties now performed by the counties some $785,000 could be saved.

The complete abolishment of the inheritance tax referee system, which was attempted by the Controller on several occasions, could save the state about $200,000 a year. The heirs would receive about $2 million more by eliminating the appraiser's fees charged against the estates

As of August 30, 1971 about $17 million of inheritance tax payments due to the state were delinquent. The six percent interest on such delinquencies is not an effective incentive to encourage early payment of taxes.

The sale of $1 5 million of stock certificates held by the state as custodian of unclaimed property needs to be expedited Statutes need to be amended clarifying the state's title and allowing some flexibility in the handling of such sales Also, it is recommended that unclaimed property of deceased persons be treated the same as abandoned property to allow an earlier transfer of about $7 million to the state's general fund

Respectfully submitted,

VINCENT THOMAS, Chairman
Joint Legislative Audit Committee

Above report referred to the Committee on Revenue and Taxation.

As used in this section the term "water agencies" means any person operating a dam having an impounding capacity of 2,500 acre-feet or more, and any public agency representing the owners of, or controlling, water rights that in the determination of the board would or could be affected by zone or district projects.

The board shall appoint the representative of the soil conservation districts from a list of one or more nominees proposed by all of such districts acting in concert.

The board shall appoint the representative of the water agencies from a list of one or more nominees proposed by all of such agencies acting in concert.

Representatives of the unincorporated area shall be not less than three in number and shall be nominated and appointed by the board. The rate of tax for such purpose shall not be levied on the assessed valuation of any elementary district included in such high school district if the elementary district has 10 percent or less of the pupils in grades seven and eight who reside in the elementary district attending a junior high school of the high school district.~~

~~(b) The computations prescribed by subdivision (a) shall be made on the basis of current estimates of cost and average daily attendance, pursuant to rules and regulations of the Superintendent of Public Instruction. ~~Of the additional tax revenues provided pursuant to this section, there shall be expended by a school district during a fiscal year, no more than the actual additional cost during that fiscal year of educating pupils in grades seven and eight as computed for purposes of subdivision (a). If at the end of any fiscal year there remains an unencumbered balance derived from the revenue of the increase in tax rate hereby provided, such balance shall be used exclusively in the following fiscal year for the payment of the obligations for which such tax revenues are afforded by this section and to offset such tax rate increase.~~

SEC 3. Section 20810 of the Education Code is repealed.

SEC. 3.5. Chapter 6.10 (commencing with Section 6499.230) is added to Division 6 of the Education Code, to read:

CHAPTER 6.10. EDUCATIONALLY DISADVANTAGED YOUTH PROGRAMS

6499.230 It is the intent of the Legislature to provide quality educational opportunities for all children in the California public schools. The Legislature recognizes that because of differences in family income, differing language barriers, and pupil transiency, differing levels of financial aid are necessary to provide quality education for all students.

6499.231. From the funds appropriated by the Legislature for the purposes of this chapter, the Superintendent of Public Instruction, with the approval of the State Board of Education, shall administer this chapter and make apportionments to school districts to meet the total approved expense of the school districts incurred in establishing education programs for pupils who qualify economically and educationally in preschool, kindergarten, or any of grades 1 through 12, inclusive. Nothing in this chapter shall in any way preclude the use of federal funds for educationally disadvantaged youth.

6499.232 Maximum apportionments allowable to school districts shall be determined by the following factors:

(a) An index of "potential impact of bilingual-bicultural pupils" determined by dividing the percent of pupils in the district with Spanish and Oriental surnames, as determined by the annual ethnic survey conducted by the Department of Education, by the statewide average percentage of such pupils for unified, elementary, or secondary districts, as appropriate.

(b) A ratio of the district's "index of family poverty," defined as the district's Elementary and Secondary Education Act, Title I entitlement, divided by its average daily attendance in grades 1 through 12, or any thereof maintained, divided in turn by the state average index of family povery for unified, elementary, or secondary districts, as appropriate.

(c) A ratio of the district's "index of pupil transiency," as computed from the relationship between the district's average daily attendance and its total annual enrollment, divided by the state average index of pupil transiency for unified, elementary, or secondary districts, as appropriate.

The district's total maximum apportionment under this chapter shall be determined by computing the product of (1) one-third the sum of the above three factors, (2) the number of pupils receiving aid for dependent children support, and (3) a constant amount of three hundred dollars ($300), or such amount as the Superintendent of Public

Instruction may determine so that the sum of all allocations will not exceed the funds appropriated by the Legislature for the purposes of this chapter.

6499.233. For the fiscal year 1972–1973, the superintendent shall allocate to local districts an amount equal to not less than 40 percent of the total amount computed under Section 6499.232. For the fiscal year 1973–1974, the superintendent shall allocate not less than 40 percent of the total amount so computed and not more than 90 percent of the amount computed. For the 1974–1975 fiscal year and thereafter, the superintendent shall allocate to each district not less than 40 percent nor more than 100 percent of the amount so computed.

6499.234. In approving programs under this chapter, the State Board of Education shall give due consideration to the effectiveness of the program and shall not continue in operation any program that, upon evaluation, has been shown to be of low effectiveness and which has only limited possibility of improved effectiveness.

For the fiscal year 1973–1974 and for each year thereafter, districts which demonstrate a high degree of program effectiveness shall receive amounts up to their entitlement limits. Districts which demonstrate low levels of program effectiveness shall continue to receive their initial apportionments but the Superintendent of Public Instruction may reduce the additional computed apportionments due such districts, if he determines that such programs have limited possibilities of improved achievement

6499.235. The Superintendent of Public Instruction shall apportion the funds available for programs in accord with procedures specified in this chapter and policies which may be adopted by the State Board of Education. Funds shall be allocated to each district within its entitlement based upon a plan submitted by the district to the Superintendent of Public Instruction, and approved by the State Board of Education The plan shall include (1) an explicit statement of what the district seeks to accomplish, (2) a description of the program and activities designed to achieve these purposes, and (3) a planned program of annual evaluation, including a statement of the criteria to be used to measure the effectiveness of the program.

6499.236. The State Board of Education shall adopt regulations setting forth the standards and criteria to be used in the administration, monitoring, evaluation, and dissemination of programs submitted for consideration under this chapter; 1 percent of the total appropriation for the purposes of this chapter shall be retained by the Department of Education for these purposes Funds appropriated for the purposes of this chapter not allocated as previously specified shall be allocated by the State Board of Education to promote the intent of this chapter to provide education programs to as many eligible pupils as possible and to stimulate the development, implementation, and evaluation of innovative programs.

6499 237. The Superintendent of Public Instruction shall submit annually to the Governor and to each house of the Legislature a report evaluating the programs established pursuant to this chapter, together with his recommendations concerning whether the same should be continued in operation.

6499 238 There is hereby appropriated from the General Fund in the State Treasury to the State School Fund for the fiscal year 1972–1973 an amount equal to twenty-one dollars and fifty cents ($21.50) multiplied by the total statewide average daily attendance of the preceding fiscal year in kindergarten and grades 1 to 12, inclusive, to be used for the purposes of Chapter 6.10 (commencing with Section 6499.230) of Division 6 of the Education Code. For the fiscal year 1973–1974 the amount per such unit of average daily attendance shall be forty-three dollars ($43); and for the fiscal year 1974–1975 and thereafter, it shall be fifty-three dollars and seventy-five cents ($53.75).

SEC. 4. Section 6741 of the Education Code is amended to read:

6741. A student shall be deemed to be a resident of the high school district in which he lived at the time of his admission to the program and the excess cost for a school year of educating such student shall be paid by the high school district of which he is a resident to the county superintendent who is providing education for the students. The excess cost shall be determined by dividing the total current expense of education as defined in Section 17503 and also excluding expense of boarding and lodging during such school year by the total number of units of average daily attendance in such school or classes during such school year, less state and federal apportionments on account of such average daily attendance.

Average daily attendance of students shall be computed, for purposes of this article, by dividing the number of days such student attended the schools or classes by the number of days that the schools or classes were taught, except that with respect to a student attending such schools or classes for more than 175 days in a school year, the average daily attendance shall be computed by using the divisor of 175.

For purposes of computing average daily attendance 180 minutes of class attendance shall be deemed to constitute a schoolday, and no more than 15 hours of class time per week shall be considered.

Not later than July 15th of each year, the superintendent of schools of the county providing education for students shall forward his claim for the excess expense reimbursement to the high school district of residence of each student during the preceding school year, and the governing board of such high school district shall upon receipt thereof pay such claims.

~~The governing board of the high school district to which the claim is presented may include in its budget the amount necessary to pay the claim, and, if the amount is included in the budget, the board of supervisors shall levy a school district tax to raise the amount. The school district tax shall be in addition to any other school district tax authorized by law to be levied. All amounts raised by such a tax shall be expended only for the purposes of this article.~~

The tax shall be in addition to any other school district tax authorized by law to be levied.~~

SEC. 7. Section 6913.1 of the Education Code is repealed.

~~6913.1. The maximum rate of school district tax for any school year is hereby increased by such amount as the governing board of any school district which maintains or has entered into an agreement with another district or with the county superintendent of schools for educational services or facilities, including the rental of property or purchase of equipment, for mentally retarded minors who come within the provisions of Sections 6902 and 6903 may include in its budget and the board of supervisors shall levy a school district tax necessary to raise such amount.~~

~~Such budget expenditures may include the cost of equipment and facilities, the lease or lease-purchase of buildings, lease of land, alteration or additions to existing buildings, or other necessary capital outlay expenditures in connection with such educational services.~~

~~If at the end of any school year there remains an unencumbered balance derived from the revenue of the increase in the tax rate hereby provided, such balance shall be used exclusively in the following fiscal year for the expenditures of the school district during that fiscal year required or authorized for the education of mentally retarded minors who come within the provisions of Sections 6902 and 6903.~~

SEC. 8. Section 13520.3 is added to the Education Code, to read:

SEC. 12 Chapter 1 7 (commencing with Section 17270) is added to Division 14 of the Education Code, to read:

CHAPTER 1.7. ADJUSTMENTS TO USABLE ASSESSED VALUATION

17270. The Legislature hereby declares that its intent in enacting this chapter is to provide a reasonable and equitable method for ascertaining the value of property located within school districts for use in connection with the administration of state laws providing for the allocation of state funds to such districts for school purposes on the basis of value and provide for more equal educational opportunity for students residing in districts of varying wealth per unit of average daily attendance and to improve the equity among taxpayers residing in or owning property in districts of varying wealth

The Legislature hereby further declares that in enacting this chapter it has no intention to affect in any way, whether directly or indirectly, any determination of the assessed value of property for tax purposes.

17271. Each school district shall report to the Superintendent of Public Instruction:

(a) The total assessed valuation of the district; and

(b) The amount equal to:

(1) Ten percent of the total assessed valuation in the 1972–1973 fiscal year.

(2) Twenty percent of the total assessed valuation in the 1973–1974 fiscal year.

(3) Thirty percent of the total assessed valuation in the 1974–1975 fiscal year

(4) Forty percent of the total assessed valuation in the 1975–1976 fiscal year.

17272. The Superintendent of Public Instruction shall compute the total amounts reported to him pursuant to subdivision (b) of Section 17271 for each type of district He shall make a separate computation for elementary school districts, high school districts, and unified school districts He shall divide the total for each type of district by the statewide average daily attendance for the preceding fiscal year for each type of district. 17273. The Superintendent of Public Instruction shall compute for each school district the amount derived by multiplying the assessed valuation redistribution amount per unit of average daily attendance by the average daily attendance of the district for the preceding fiscal year.

The amount computed pursuant to this section is the redistribution amount

17273.5. The "district assessed valuation" for each district is the total assessed valuation minus the amount reported for it pursuant to subdivision (b) of Section 17271 plus the redistribution amount for the type of district computed pursuant to Section 17273.

17274. (a) Each school district shall compute the amount which the revenue derived from the levy and collection of school district taxes would have been if it had been collected and been based upon an adjusted assessed valuation computed pursuant to Section 17273.5

(b) Each district shall compute the total amount of revenue derived from the levy of school district taxes on property lying within the district

(c) If the amount computed pursuant to subdivision (a) is less than the amount computed pursuant to subdivision (b), the difference shall be transmitted to the School District Wealth Equalization Fund

(d) If the amount computed pursuant to subdivision (a) is more than the amount computed pursuant to subdivision (b), the Superintendent of Public Instruction shall allow to the district an amount equal to such difference from the School District Wealth Equalization Fund

SEC 13. Section 17300 of the Education Code is amended to read:

17300. It is the intent of the Legislature that the administration of the laws governing the financial support of the public school system in this state be conducted within the purview of the following principles and policies:

The system of public school support should be designed to strengthen and encourage local responsibility for control of public education. Local school districts should be so organized that they can facilitate the provision of full educational opportunities for all who attend the public schools Local control is best accomplished by the development of strong, vigorous, and properly organized local school administrative units It is the state's responsibility to create or facilitate the creation of local school districts of sufficient size to properly discharge local responsibilities and to spend the tax dollar effectively

Effective local control requires that all local administrative units contribute to the support of school budgets in proportion to their respective abilities, and that all have such flexibility in their taxing programs as will readily permit of progress in the improvement of the educational program Effective local control requires a local taxing power, and a local tax base which is not unduly restricted or overburdened.

The system of public school support should assure that state, local, and other funds are adequate for the support of a realistic ~~foundation~~ *educational* program. It is unrealistic and unfair to the less wealthy

districts to provide for only a part of the financing necessary for an adequate educational program.

The system of public school support should permit and encourage local school districts to provide and support improved district organization and educational programs. The system of public school support should prohibit the introduction of undesirable organization and educational practices, and should discourage any such practices now in effect. Improvement of programs in particular districts is in the interests of the state as a whole as well as of the people in individual districts, since the excellence of the programs in some districts will tend to bring about program improvement in other districts.

The system of public school support should make provision for the apportionment of state funds to local school districts on a strictly objective basis that can be computed as well by the local districts as by the state. The principle of local responsibility requires that the granting of discretionary powers to state officials over the distribution of state aid and the granting to these officials of the power to impose undue restriction on the use of funds and the conduct of educational programs at the local level be avoided.

The system of public school support should effect a partnership between the state, the county, and the local district, with each participating equitably in accordance with its relative ability. The respective abilities should be combined to provide a financial plan between the state and the local agencies ~~known as the foundation program~~ for public school support Toward this ~~foundation~~ *support* program, each county and district, through a uniform method should contribute in accordance with its true financial ability.

The system of public school support should provide, ~~through the foundation program,~~ for essential educational opportunities for all who attend the public schools Provision should be made ~~in the foundation program~~ for adequate financing of all educational services.

The broader based taxing power of the state should be utilized to raise the level of financial support in the properly organized but financially weak districts of the state, thus contributing greatly to the equalization of educational opportunity for the students residing therein. It should also be used to provide a minimum amount of guaranteed support to all districts, for such state assistance serves to develop among all districts a sense of responsibility to the entire system of public education in the state State assistance to all districts also would create a tax leeway for the exercise of local initiative

The Legislature further declares that in order to reduce the burden of inequitable property taxation it is in the best interest of the state to provide, from other than ad valorem property taxes, a predominant portion of the statewide cost of education in the elementary and secondary schools of the state. The Legislature further declares that the funds to be provided are required in order to reduce the disproportionate demand upon property taxpayers for support of educational services and programs, equalize wide variations in the ability of local communities to support such services and programs, and to assist school districts in meeting increased demands due to concentrations of educationally disadvantaged pupils.

In recognition of these disparities it is the intent of the Legislature to apportion funds for school purposes in such a manner as to provide adequate educational programs for all students regardless of where they reside or the wealth of their parents and neighbors

In implementing its intent the Legislature declares that, although the present system of funding does not meet desirable criteria, sudden changes of great magnitude in the system of public school finance would disrupt the educational system of many districts and thereby damage the whole public school system of the state, the educational welfare of all students, and the economy of the state; therefore, rapid change is undesirable and unacceptable.

Accordingly, the Legislature declares its intent to improve with all reasonable and deliberate speed, financial support of education in districts which have less than the statewide average assessed valuation per unit of average daily attendance as rapidly as those districts can efficiently utilize additional support, and at the same time allow districts with more than the statewide assessed valuation per unit of average daily attendance sufficient time to readjust their programs to new methods of financing to avoid precipitous disruption of present programs.

It is further the intent of the Legislature to study the possibility of adopting an apportionment system based upon weighted units of average daily attendance

20806. For the purpose of providing funds for the payment by the district of all or part of the premiums, dues, or other charges for health and welfare benefits on active officers and employees and retired officers and employees who at the time of retirement were enrolled in a health and welfare benefit plan, or on the spouses and dependent children of such active and retired officers and employees, or on both such active and retired officers and employees and their spouses and dependent children, which the governing board of a district may have authorized in accordance with the provisions of Article 1 (commencing with Section 53200) of Chapter 2 of Part 1 of Division 2 of Title 5 of the Government Code and for the expenses incurred by the district in administration of a program involving the payment of such health and welfare benefits, district taxes, *up to a maximum of five cents ($0.05) per one hundred dollars ($100) of assessed valuation,* may be levied and collected annually by the respective district at the same time and in the same manner as other district taxes are levied and collected The tax shall be in addition to any other district tax now or hereafter authorized by law, and shall not be considered in fixing maximum rates of tax for school district purposes Moneys collected pursuant to this section may also be expended for the requirements of Section 13658.

The provisions of this section authorizing the payment of all or part of the premiums, dues, or other charges for health and welfare benefits for the retired officers and employees who at the time of retirement were enrolled in a health and welfare benefit plan, shall be limited in applicability to any school district, or of two or more school districts

governed by governing boards of identical personnel, having an average daily attendance of 400,000 or more as shown by the annual report of the county superintendent of schools for the preceding year.

SEC 64. Section 20807 of the Education Code is repealed.

~~20807. The maximum rate of school district tax under Sections 20751 and 20753, inclusive, for any fiscal year is hereby increased by such amount as will provide the amount of the proposed expenditures for programs for educating handicapped minors under Sections 3759 to 6762, inclusive, which are in excess of state apportionments as shown by the budget of the district as finally adopted by the governing board of the district.~~

~~Such proposed expenditures may include the cost of equipment and facilities, the lease or lease-purchase of buildings, lease of land, alterations or additions to existing buildings, or other necessary capital outlay expenditures in connection with such programs.~~

~~If at the end of any fiscal year there remains an unencumbered balance derived from the revenue of the increase in tax rate hereby provided, such balance shall be used exclusively in the following fiscal year for the expenditures of the school district during that year required or authorized by Sections 6750-6762, inclusive, of this code.~~

SEC 65. Section 20808 of the Education Code is repealed.

~~20808. (a) The maximum rate of any elementary or unified school district is, commencing with the fiscal year 1964-5, increased by an amount sufficient to produce the amount by which the cost during the current fiscal year, of tuition or of educating pupils in grades seven and eight, exceeds the cost during the current fiscal year of educating pupils in grades kindergarten or one through six maintained by the district, exclusive of all federal and state apportionments~~

~~(b) The computations prescribed by subdivision (a) of this section shall be made on the basis of current estimates of cost and average daily attendance, pursuant to rules and regulations of the Superintendent of Public Instruction. The Superintendent of Public Instruction shall also, by rule and regulation, prescribe the accounting procedures and all other procedures to govern the fixing of district tax rates and the disposition of the additional tax revenues provided pursuant to this section.~~

~~Of the additional tax revenues provided pursuant to this section, there shall be expended by a school district during a fiscal year, no more than the actual additional cost during that fiscal year of educating pupils in grades seven and eight as computed for purposes of subdivision (a). If at the end of any fiscal year there remains an unencumbered balance derived from the revenue of the increase in tax rate hereby provided, such balance shall be used exclusively in the following fiscal year for the payment of the obligations for which such tax revenues are afforded by this section and to offset such tax rate increase. If an elementary school district withdraws from a junior high school or a system of junior high schools pursuant to Sections 5828 to 5628, any such remaining unencumbered balance derived from the revenue of the increase in tax rate hereby provided may be transferred by resolution of the governing board of the elementary school district~~

~~to the general fund. In the fiscal year following such transfer, the amount of such remaining unencumbered balance which is transferred to the general fund of the district shall be used to reduce the amount for which the maximum rate of school district tax may be increased pursuant to subdivision (a) of this section for the purposes of educating pupils in grades 7 and 8 in such elementary school district.~~

SEC. 66. Section 20808.5 of the Education Code is repealed.

~~20808.5. (a) The maximum tax rate of a high school district which maintains a junior high school is, commencing with the fiscal year 1961-1965, increased by an amount sufficient to produce the amount by which the cost during the current fiscal year, of educating pupils in grades seven and eight, exceeds the total of federal and state apportionments and the tuition payments received by the district during the current fiscal year for such pupils pursuant to Sections 5605 and 5605.5. The rate of tax for such purpose shall not be levied on the assessed valuation of any elementary district included in such high school district if the elementary district has 10 percent or less of the pupils in grades seven and eight who reside in the elementary district attending a junior high school of the high school district.~~

~~(b) The computations prescribed by subdivision (a) shall be made on the basis of current estimates of cost and average daily attendance, pursuant to rules and regulations of the Superintendent of Public Instruction. The Superintendent of Public Instruction shall also, by rule and regulation, prescribe the accounting procedures and all other procedures to govern the fixing of district tax rates and the disposition of the additional tax revenues provided pursuant to this section.~~

~~Of the additional tax revenues provided pursuant to this section, there shall be expended by a school district during a fiscal year, no more than the actual additional cost during that fiscal year of educating pupils in grades seven and eight as computed for purposes of subdivision (a). If at the end of any fiscal year there remains an unencumbered balance derived from the revenue of the increase in tax rate hereby provided, such balance shall be used exclusively in the following fiscal year for the payment of the obligations for which such tax revenues are afforded by this section and to offset such tax rate increase.~~

SEC. 67. Section 20816 of the Education Code is repealed.

~~20816. (a) The maximum rate of school district tax, including any maximum rate fixed pursuant to Section 20803, is increased in any fiscal year for any school district situated wholly or in part within a county which, in the 1968-1969 fiscal year, household furnishings and personal effects were enrolled on the county assessment roll.~~

~~(b) The increase in maximum tax rate shall be in an amount equal to the 2 percent of the total of the school district tax rates at which property taxes were levied and collected for purposes of the district during the 1968-1969 fiscal year, but subject to the provisions of subdivision (c).~~

~~(c) On or before the first day of February in any year, the governing board of the district may submit a petition to the county superintendent of schools requesting that officer to fix the maximum tax rate of the district for the next succeeding fiscal year at a rate higher than that~~

~~provided for in subdivision (b). The petition shall demonstrate, on the basis of the best information available to the governing board, that the net loss in revenue which would have resulted to the district in the 1968–1969 fiscal year if household furnishings and personal effects had been exempted from property taxation, taking into consideration increases in state equalization aid which would have accrued to the district as result thereof, exceeds the revenues produced by the increase in maximum tax rate provided for in subdivision (b).~~

~~The assessor shall estimate the total amount of assessed value lost by reason of the exemption for household furnishings and personal effects between the 1968–1969 and 1969–1970 fiscal years and shall certify his findings to the county auditor and the county superintendent of schools. The county superintendent of schools shall estimate the amount of equalization aid to be received by the district on the basis of the loss in assessed value certified by the assessor. The county auditor shall apply the tax rate of the district for the 1968–1969 fiscal year to the amount of assessed value determined by the assessor and from the amount computed shall subtract the amount certified by the county superintendent of schools. The tax rate of the district for this purpose shall then be computed by determining the rate which will reflect this remaining amount. The district shall be bound by this determination of the auditor, whether it is more than, or less than, the amount of increase authorized by subdivision (b).~~

~~This subdivision (c) shall not apply to any district which has not first availed itself of this subdivision on or before February 1, 1972.~~

SEC. 68. Sections 2, 3, 4, 5, 6, 7, 9, 10, 11, 60, 61, 62, 64, 65, 66, and 67 of this act shall become operative on July 1, 1974. From July 1, 1972, until July 1, 1974, the taxes for special purposes actually levied in all school districts which will be eliminated pursuant to those sections of this act shall be reduced by an amount which will limit the revenues of each district to not more than will provide the prior year's expenditure level plus the application of the reasonable expenditure increment factor pursuant to Article 3 (commencing with Section 17701) of Chapter 3 of Division 14 of the Education Code. All such rates shall be reduced proportionately unless the county superintendent of schools approves an alternate method of reduction."

and may be set aside to the family of the absentee as specfied herein; provided, however, that such joint tenancy interest may only be set aside to a member of the absentee's family who was a joint tenant with the absentee in such property.

SEC 16 This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

A substantial number of citizens of this state, and others who own or possess property in this state, who have or will enter the military service, or other U.S. government service, have performed or may hereafter perform, such service in an area of hostilities in which the United States is, and has been, engaged. In the course of such service, many of such persons are now, or may hereafter be, in a missing status, as defined in U.S. Code Title 37, Chapter 10 or Title 5, Chapter 55, Subchapter VII; that is, declared by authority of those statutes to be missing; missing in action; interned in a foreign country; captured, beleaguered, or besieged by a hostile force; or detained in a foreign country against their will. With particular reference to persons in missing status by reason of hostilities in Southeast Asia: more of them are from California and more of their spouses and families live in California than any other state. The number of them from California, and the number of their spouses and families who live in California, are each larger in proportion to the respective total number than the population of California is as a proportion of the total population of the United States

Such missing status is causing immediate prejudice to the estates of such missing persons, and difficulty and hardship to their families by their inability to consumate transactions, such as to sell property, withdraw funds, cash checks, transfer securities and the like, upon which the families are dependent The provisions and amendments hereby enacted must be effective immediately and without delay in order to avoid such immediate prejudice, hardship, and difficulty.

Such persons in missing status and their families and other members of the armed forces engaged in, or who have died as a result of combat and their families are suffering and will suffer immediate prejudice, hardship, and unfairness by reason of the fact that personal income tax and inheritance tax parts of the Revenue and Taxation Code do

not contain exemptions and exclusions relating to combat service and combat deaths comparable to the provisions of the Internal Revenue Code relating to such matters, and by reason of the fact that certain exemptions and exclusions applicable to earlier wars have not been updated. The Revenue and Taxation Code provisions hereby enacted must become effective immediately in order to avoid such prejudice and hardship.

For these reasons this act is declared to be an emergency measure necessary for the immediate preservation of the public peace, health and safety and shall go into immediate effect.

SEC. 17. This act shall be known as the P.O.W.-M.I.A. Family Relief Act of 1972."

"SECTION 1 Section 402 1 of the Revenue and Taxation Code is amended to read:

402 1. In the assessment of land, the assessor shall consider the effect upon value of any enforceable restrictions to which the use of the land may be subjected. Restrictions shall include but are not necessarily limited to *restrictions imposed upon nonprofit or limited dividend corporations which are federally assisted, insured, or otherwise subsidized to provide housing for elderly or handicapped persons or persons with low or moderate incomes, or to* zoning restrictions limiting the use of land and any recorded contractual provisions limiting the use of lands entered into with a governmental agency pursuant to *federal or* state laws or applicable local ordinances There shall be a rebuttable presumption that restrictions will not be removed or substantially modified in the predictable future and that they will substantially equate the value of the land to the value attributable to the legally permissible use or uses.

Grounds for rebutting the presumption may include but are not necessarily limited to the past history of like use restrictions in the jurisdiction in question and the similarity of sales prices for restricted and unrestricted land The possible expiration of a restriction at a time certain shall not be conclusive evidence of the future removal or modification of the restriction unless there is no opportunity or likelihood of the continuation or renewal of the restriction, or unless a necessary party to the restriction has indicated an intent to permit its expiration at that time.

In assessing land where the presumption is unrebutted, the assessor shall not consider sales of otherwise comparable land not similarly restricted as to use as indicative of value of land under restriction, unless the restrictions have a demonstrably minimal effect upon value.

In assessing land under an enforceable use restriction wherein the presumption of no predictable removal or substantial modification of the restriction has been rebutted, but where the restriction nevertheless retains some future life and has some effect on present value, the assessor may consider, in addition to all other legally permissible information, representative sales of comparable land not under restriction but upon which natural limitations have substantially the same effect as restrictions.

For the purposes of this section, low or moderate incomes are those which are within the limits required of applicants for tenancy on land owned by a nonprofit or limited dividend corporation which is federally assisted, insured, or otherwise subsidized

It is hereby declared that the purpose and intent of the Legislature in enacting this section is to provide for a method of determining whether a sufficient amount of representative sales information is available for land under use restriction in order to ensure the accurate assessment of such land. It is also hereby declared that the further purpose and intent of the Legislature in enacting this section and Section 1630 of the Revenue and Taxation Code is to avoid an assessment policy which, in the absence of special circumstances, considers uses for land which legally are not available to the owner and not contemplated by local government, and that these sections are necessary to implement the public policy of encouraging and maintaining effective land use planning. Nothing in this statute shall be construed as requiring the assessment of any land at less than as required by Section 401 of this code or as prohibiting the use of representative comparable sales information on land under similar restrictions when such information is available.

Joint Committee on Open Space Lands

May 23, 1972

Mr. James Driscoll
Chief Clerk of the Assembly
Room 3194, State Capitol, Sacramento, California

Dear Mr. Driscoll: As Chairman of the Joint Committee on Open Space Lands, it is my pleasure to transmit to the Assembly a "State Open Space and Resources Conservation Program for California". This report graphically points up the need for a uniform and comprehensive approach to preserving California's resources.

We have reached a point in our history when only bold and direct state action will preserve California's open space resources for both present and future generations It is clear that traditional approaches to preserving these resources are no longer adequate As a report to the Legislature prepared by this Committee in 1970 so aptly stated, " . changes in traditional attitudes and methods of dealing with the land are matters of necessity. This message is clear: no action now—no open space in the future."

Sincerely,

JOHN F DUNLAP, Chairman

The school employer shall forward with each quarterly remittance to the Classified School Employee Fund in the State Treasury such an amount, whether or not received from the funding agency, for deposit. 50601. Child care and preschool developmental services pursuant to this division shall be funded by the state on an area basis using the

maximum federal funds available for such purposes, and all funds shall be transmitted through the department to each area council.

The Superintendent of Public Instruction may receive and expend all funds made available by the state, its political subdivisions, the federal government, and other sources, and, within the limitation of funds available, shall act as an agent for the transmittal of such funds for services to the area councils.

"SECTION 1. Section 25210.18 of the Government Code is amended to read

25210.18. The hearing may be continued from time to time, but must be completed within 30 days At the conclusion of the hearing the board shall find and determine the extent to which the services described in the resolution of intention are extended county services. After making the finding the board may abandon the proposed establishment of the county service area or may, after passing upon all protests, determine to establish the area. If the board abandons the proposed establishment of the county service area the county services found by the board to be extended county services shall not thereafter be provided to the area from general funds of the county If the board determines to establish the area it shall by resolution so declare and finally determine and establish the boundaries of the county service area and designate the types of services to be performed therein *and adopt a resolution either:*

(a) Declaring the area finally established without an election; or

(b) Declaring the area established, subject to confirmation by the voters of the proposed area on the question of establishment of such area.

In establishing the boundaries of the area the board may alter the exterior boundaries of the area to include less territory than that described in the notice of the hearing but it may not include any territory not described in the notice of the hearing

Land devoted primarily to agricultural or livestock uses and being used for the commercial production of agricultural or livestock products shall be excluded from a county service area if such land is contiguous to other land which is not included within the described exterior boundaries of the county service area, if the board of supervisors finds that such land will not be benefited by any of the types of extended services proposed to be provided within the county service area Such land may, however, be included in the county service area, if the owner requests its inclusion.

In designating the types of services to be performed in the county service area the board may eliminate one or more of the types of services specified in the resolution of intention to establish the area but may not include any types of services not specified in the resolution of intention.

Upon the adoption of ~~the~~ *a* resolution establishing ~~the~~ *an* area *without an election*, the area is established for all purposes, subject only to compliance with the requirements of Chapter 8 *(commencing with Section 54900)*, Part 1, Division 2, Title 5 of the Government Code and subject to the provisions of Article 2 5 of this chapter.

SEC 2 Section 25210 18a is added to the Government Code, to read:

25210 18a. Any resolution adopted pursuant to Section 25210 18 declaring a county service area established subject to confirmation by the voters upon the question thereof shall:

(a) Call, provide for and give notice of a special election upon such question;

(b) Fix a date of election; and

(c) Provide for the question to be submitted to the voters

The election shall be held and conducted by the county and the ballots canvassed in accordance with the provisions of Article 1 (commenc-

ing with Section 3700) of Chapter 2, Division 4 of the Elections Code.

After canvass of returns of an election on the question of establishment of a county service area, the board of supervisors shall adopt a resolution either (i) confirming the prior declaration of establishment of the area and finally establishing the area, if a majority of the votes cast upon such question are in favor of establishment of the area; or (ii) determining the prior declaration of establishment defeated by failure to receive the required vote, in which case the county services found by the board to be extended county services shall not thereafter be provided to the area from general funds of the county

Any resolution adopted pursuant to this section establishing a county service area shall not be subject to the provisions of Article 2.5 of this chapter.

Upon adoption pursuant to this section of a resolution finally establishing an area, the area is established for all purposes subject only to compliance with the requirements of Chapter 8 *(commencing with Section 54900)*, Part 1, Division 2, Title 5 of the Government Code."

Amendment No. 1

In line 2 of the title of the printed bill, as amended in Assembly May 22, 1972, after "add", insert "Article 13 5 (commencing with Section 14084) and".

Amendment No. 2

On page 3, between lines 2 and 3, insert

"SEC. 3 5. Article 13 5 (commencing with Section 14084) is added to Chapter 4 of Division 10 of the Education Code, to read

Article 13 5 Transfer of Assets—Los Angeles Unified School District Retirement System and Los Angeles Community College District Retirement System

14084 This article details the provisions relating to the transfer of assets from the Los Angeles Unified School District Retirement System and the Los Angeles Community College District Retirement System to the State Teachers' Retirement System should the members of the above-named local systems elect to be wholly covered by the State Teachers' Retirement System, as well as the provisions of law covering the transfer of assets from the State Teachers' Retirement System to the above-named local systems should the members of the local systems elect to be wholly covered by the above-named local systems.

The purpose of the asset valuation method described in this article shall be to provide equality for each party

The transfer of assets provided for in this article shall be in cash or in securities in kind Without in any way limiting the definition of "securities" and so that it may be perfectly clear, this term shall include notes secured by mortgages or real estate mortgages

14084 1 Sections 14085 through 14091 apply to the transfer of assets as of June 30, 1972, as they relate to the Los Angeles Unified School District Retirement System

14085 The total market value of the State Teachers' Retirement Funds' securities shall be established as of the close of business on June 30, 1972 The accrued income on the securities at June 30, 1972, cash on hand, the investment principal in course of collection and the members contributions receivable shall be added to the total market value of securities and, after deducting interest and principal collected in advance and retirement claims payable and filed, this amount shall be divided by the total of member contribution reserves plus reserves for retirement annuities, death annuities, and survivor benefits. The quotient thus obtained, computed to eight places past the decimal,

shall be divided into the total of the cash, market values of the securities in kind which are to be transferred, established as of the close of business on June 30, 1972, and any accrued income thereon, to provide the values of the Los Angeles Unified School District's assets for transfer.

Accrued income properly computed shall include any delinquent interest at the face rate on any item which, while in default, is guaranteed or insured by an agency of the United States government

Values established in accordance with the above procedures shall be obtained and approved by each board, who may obtain the assistance of other parties and may, if they so desire, agree to binding valuations by a mutually agreed upon independent party.

Either the Los Angeles Unified School District or the Teachers' Retirement Board may reject specified securities for transfer and recommend alternative selections.

Selection of securities to be transferred in kind shall not be made in a manner adverse to the Teachers' Retirement Fund While a proportionate division of each holding shall not be required, the State Teachers' Retirement System shall be entitled to a division of the city local system's securities distributed between nonconvertible fixed income investments, equities, and securities convertible into equities in proportion to the book value of these security groupings to the total value of the city local system's portfolio as of June 30, 1972. However, the Teachers' Retirement Board may reject any securities which do not qualify under its investment resolution as amended December 18, 1970.

Should the respective parties be unable to reach agreement on market value of assets by October 15, 1972, the matter shall be submitted to arbitration by an independent party who, in making his determination shall be guided by the State Constitution, existing law, the formal investment resolution of the Teachers' Retirement Board as amended December 18, 1970, and the provisions of this article, and his decision shall be binding upon both parties to the extent that it is legal under state law. The arbitrator shall be mutually agreed upon by the respective boards If agreement cannot be reached, the market value shall be established by a panel of three arbitrators, one appointed by the Los Angeles Unified School District, one by the Teachers' Retirement Board and the third selected by mutual agreement of the first two. Decisions of the arbitration panel shall be binding upon the Los Angeles Unified School District and the State Teachers' Retirement System to the extent that it is legal under state law.

14086. To mitigate the possibility of conflicts arising because of changing market valuations over time, the transfer shall be effected as soon as possible. To this end, a partial transfer consisting of cash and securities in kind valued at market plus accrued income equivalent to 90 percent of the estimated value of the annuity savings (active member accumulated contributions) shown on the city system's records shall be made as soon after June 30, 1972, as possible with a subsequent adjustment in its valuation amount effected as soon as the aforementioned valuation quotient is computed A decision as to which stocks shall be eligible for transfer must be agreed upon by both parties prior

to the valuation date to avoid any possible inequity For the total of the common and preferred stocks to be transferred, any change in the market value between the valuation date and the actual date of transfer shall bear a close relationship to the change in the Standard & Poor's Composite Stock Index of 500 companies between the same dates

14086 1 If the Los Angeles Unified School District Retirement System incurs a net realized loss from the transfer of assets at less than their book values, that loss shall be a charge against the residual funds remaining on deposit with the Los Angeles Unified School District

14086 2 The transfer of cash and securities in kind from the Los Angeles Unified School District to the State Teachers' Retirement System shall be accomplished by that district delivering the cash and securities in kind at the office of the State Treasurer in Sacramento properly registered in the name of the State Teachers' Retirement System in accordance with the registration requirements of the State Teachers' Retirement System This transfer shall be completed by June 30, 1973 Interest on the actual amount of any cash transfer shall be at the rate of 6 percent per annum from July 1, 1972, to date of the transfer Any cash income payments or payments on securities received in the form of securities by the Los Angeles Unified School District after June 30, 1972, which are properly allocable to the Teachers' Retirement Fund shall be paid to the Teachers' Retirement Fund

14087 If the Los Angeles Unified School District's assets contributed are recorded in the State Teachers' Retirement System's accounts at a total amount different than the total member annuity savings (active member accumulated contributions) and present value of retired roll being financed from local system reserves transferred to the State Teachers' Retirement System, the difference shall be recorded in the State Teachers' Retirement System's account as a deferred item which is to be amortized over a 25-year period

14088 All costs of the asset transfer, asset valuation, security registration, and the administrative costs in the implementation of Chapter 1305, Statutes 1971, as they relate to the local system, shall be a charge against the residual funds remaining on deposit with the Los Angeles Unified School District

14089 The balance of assets remaining on deposit with the Los Angeles Unified School District after the transfers, deposits and payments required by this article or after establishment of reserves from which such deposits and payments shall be made, shall be held intact by the districts until the Legislature either prior thereto or thereafter expressly authorizes the expenditure or other disposition thereof

14090 In the event that the members of the Los Angeles Unified School District Retirement System elect to be fully covered by their local system so as to require a transfer of cash and securities in kind from the Teachers' Retirement Fund to the Los Angeles Unified School District Retirement System, the State Teachers' Retirement System shall contribute cash or securities in kind The quotient obtained under Section 14085 shall be divided into the total of the cash, market values of the securities in kind which are to be transferred, established as of

the close of business June 30, 1972, and any accured income thereon, to provide the valuation of the assets which are to be transferred to the local system The actual cash contributed shall bear interest at the rate of 6 percent per annum from the date due until the date of transfer.

14091 If any provision of this article or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of this article which can be given effect without the invalid provision or application, and to this end the provisions of this article are severable ''

Assembly Bill No. 140—An act to add Title 7 8 (commencing with Section 67500) to the Government Code, relating to the San Diego Regional Transportation Agency.

Bill read second time.

Amendment No. 3

On page 1, strike out lines 7 to 9, inclusive, and insert

"PART 1. GENERAL PROVISIONS AND DEFINITIONS

67500. This title shall be known and may be cited as the "San Diego Area Transportation Agency Act."

67501. The Legislature finds and declares that:

The County of San Diego constitutes one of the major regions and metropolitan areas of California The San Diego region has an immediate need for a regional agency and decisionmaking body to plan for the existing and future transportation requirements of the region Since there are 13 city governments and one county government within the region, it is necessary to establish a means for providing an integrated regional transportation system under existing laws These jurisdictions, however, recognize that within the region there is a need for different types of transportation systems and different levels of services It is, therefore, necessary to develop a regional plan to coordinate the various transportation modes and to determine the desirability of individual modes within each jurisdiction.

The planning of regional transportation systems in the regions and metropolitan areas of the state are matters of statewide concern and cannot be adequately provided for by statutes and charters applicable only to the cities and counties The unique nature of the San Diego

region and its regional transportation requirements are such that a general statute cannot be made applicable, and the enactment of a special statute and the creation of a regional transportation agency are required

67502 Unless the context otherwise requires, as used in this title:

(a) "Agency" means the San Diego Area Transportation Agency

(b) "Board" means the governing body of the agency

(c) "Region" means all of the territory within the County of San Diego.

PART 2. ORGANIZATION

67505 The San Diego Area Transportation Agency is hereby created The agency includes all of the territory of the region

67506 (a) The governing body of the agency shall consist of the following 15 members:

(1) One member from the County of San Diego, as provided in subdivision (b).

(2) One member from each of the 13 cities in the County of San Diego, as provided in subdivision (b).

(3) One member from the San Diego Unified Port District, as provided in subdivision (c)

(b) The members and their alternates representing the cities and the county on the comprehensive planning organization policy committee shall also represent their respective jurisdictions on the board.

(c) The Board of Commissioners of the San Diego Unified Port District shall appoint from that body and at any time remove a regular board member and an alternate board member to represent the San Diego Unified Port District on the board

(d) The Director of Public Works shall appoint to the board a representative who shall have no vote from the San Diego District of the Division of Highways of the Department of Public Works

67507 The term of office of regular and alternate members of the board shall be three years The term of office of any regular or alternate member of the board shall, however, end upon his ceasing to be a member of the legislative body which he represents on the board

PART 3 COMPENSATION OF THE MEMBERS OF THE BOARD

67510 Each regular member of the board shall receive compensation of fifty dollars ($50) for each day or portion of a day devoted to attendance on business of the agency The total compensation to be paid to any member during any single month shall not exceed three hundred dollars ($300) In the absence of a regular member, the alternate member attending in his place shall receive the compensation provided by this section

67511 The compensation provided for in this part shall be paid to each member for each day or portion of a day during which he was in attendance (a) at one or more meetings of the board or any committee thereof, and (b) upon any other function or responsibility of the agency

67512 The board shall adopt rules and regulations specifying the functions and responsibilities of the members, other than attendance at meetings of the board or any committee thereof, for which compensation is to be paid and providing a procedure for the submission of claims for that compensation

67513 Each regular or alternate member of the board engaging in necessary travel in attendance on business of the agency shall be entitled to payment of the reasonable and other travel expenses incurred by him The board shall adopt rules specifying what constitutes necessary travel, determining the allowable items and maximum amounts of expense, and providing a procedure for the submission of claims.

PART 4 OFFICERS AND COMMITTEES OF THE BOARD

67515 The board shall elect and, at any time, may remove its president and vice president, both of whom shall be members of the board.

67516. In the absence or disability of the president, the vice president shall exercise all powers of the president

67517. The board may establish standing and special committees of members of the board, determine the number of members to serve on each committee, and shall specify the affairs of the agency to be assigned to each such committee

67518. The president shall make all appointments to standing and special committees. In making appointments, the president shall give consideration to the preferences and experience of the members of the board and, insofar as practical, provide for representation from each of the several areas within the region

67519. A standing or special committee shall have no administrative control over the functions of the agency Each such committee shall keep itself fully informed of those affairs of the agency assigned to it and shall report to the board such information and recommendations as may be necessary to permit the board to properly consider such affairs.

PART 5 MEETINGS AND VOTING

67520 The board or any committee thereof may meet and transact business at any place or places within the region.

67521 The board shall adopt rules establishing the location of its principal meeting place and fixing the date and times of its regular meetings at that place The board shall also adopt rules of procedure, consistent with this title, concerning its deliberations and the calling, holding, and conduct of meetings of the board and its committees The board shall also determine what constitutes a conflict of interest, establishing rules and regulations thereon If the board decides that a member has a conflict of interest in a matter before the board, the member shall remove himself as to that matter and his alternate shall fill the vacant seat Article 4 6 (commencing with Section 1120) of Chapter 1 of Division 4 of Title 1 shall be applicable to members of the board.

of Division 2 of Title 5, and shall be subject to the provisions of that act and, to the extent of any inconsistency between that act and this title, the provisions of this title shall control

67523 The president, or in his absence, the vice president, shall be the presiding officer of the board In the absence of both the president and the vice president, the board may elect a president pro tem from among the members of the board present at any meeting.

67524 A majority of the board shall constitute a quorum for the transaction of business at any meeting Less than a quorum may continue a meeting and may compel the attendance of absent members of the board

67525. Each member of the board present at a meeting shall be entitled to cast one vote, except that immediately following the vote upon a particular matter one-half or more of the members present may demand weighted voting upon that matter, in which case the members present shall be entitled to cast weighted votes, as follows.

(a) In the case of unweighted voting, if it receives the affirmative vote of the majority of the board

(b) In the case of weighted voting, if it receives the affirmative vote of at least five members of the board present who also represent more than 50 percent of the total number of weighted votes entitled to be cast by the board

67527 Until otherwise provided by law, any city incorporated after the effective date of this title shall be entitled to one vote for both weighted and unweighted voting purposes The board shall review the weighted voting formula periodically, but in no case more frequently than every two years and at least one every five years, and shall recommend to the Legislature any changes it deems appropriate

(b) The agency and the Business and Transportation Agency shall negotiate contracts or agreements whereby federal-aid highway funds available for planning, and the necessary state matching funds from the State Highway Account in the State Transportation Fund, may be made available for support of the activities of the agency insofar as they relate to highway, road, and street planning for the region.

67574 In addition, the regional transportation plan shall include a financial plan for the regional transportation system The financial plan shall include a proposal for each segment of the system, including the amount and sources of revenues necessary to construct and operate that segment

MESSAGES FROM THE GOVERNOR

The following Message from the Governor was received, and by unanimous consent, ordered printed in the Journal:

Veto Message—Assembly Bill No. 70

Governor's Office, Sacramento
June 2, 1972

The Honorable Members of the Assembly
State of California
State Capitol, Sacramento, California

Greetings: I am returning without my signature Assembly Bill No. 70 entitled, "An act to amend Section 888.2 of, and to add Article 4.5 (commencing with Section 913.10) to Chapter 2 of Title 4 of Part 2 of, the Penal Code, relating to grand juries."

The problems of restructuring California's grand jury system has been the subject of much recent discussion. Last year I requested Attorney General Evelle Younger to conduct a comprehensive study of the State's grand jury laws. As a result of this study, legislation has been introduced which would improve our present system of conducting grand jury activities.

Assembly Bill 70, by contrast, addresses only one facet of the grand jury problem and would increase rather than resolve some of the basic objections which have been made due to the current system.

AB 70 would complicate the method prescribed by statute for the selection of grand juries, would require the impanelment of new grand juries in some counties every 30 days under certain circumstances, would prevent a uniform method of administering grand jury selection throughout the state, and would divide responsibility for the utilization of the grand jury process in criminal cases.

I feel that new legislation concerning grand jury selection procedures, incorporating the principle of random selection, should be

part of a comprehensive revision of the grand jury system Such an overall approach is included in Senate Bill 813, presently pending before the Legislature.

Because of the availability of comprehensive legislation, and because of the deficiences contained in AB 70, I am returning the bill unsigned

Respectfully,

RONALD REAGAN, Governor

"SECTION 1. Chapter 3 5 (commencing with Section 13180) is added to Division 7 of the Water Code, to read:

CHAPTER 3 5. REGULATIONS BASED UPON THE FEDERAL WATER POLLUTION CONTROL ACT

13180 The Legislature finds and declares that the health, safety and welfare of the people of the state require that, to the extent reasonably possible, state laws and regulations for the control of the quality of waters of the state should comply with or be consistent with the Federal Water Pollution Control Act (33 U S.C. 1151 et seq.) and acts amendatory thereof or supplementary thereto, and federal regulations and guidelines issued pursuant thereto, in order that the quality of waters of the state be fully protected for use and enjoyment by the people of the state, in order to avoid direct regulation by the federal government of persons already subject to regulation under state law pursuant to this division, and in order to assure continuity of the federal-state program of grants for waste treatment plants pursuant to the federal act and to Chapter 13 (commencing with Section 13970) of this division.

13181. The Legislature further finds and declares that although the Federal Water Pollution Control Act, as originally enacted, declared the policy of Congress to recognize, preserve, and protect the primary responsibilities of the states in preventing and controlling water pollution, subsequent amendments to the federal act, and to regulations and guidelines issued thereunder, have been made and continue to be made which increasingly preempt the field of water pollution control, but that such preemption is subject to nonpreemption in those states which have effective water pollution control laws, provided that such states also comply with, and continue to comply with, the requirements of federal statutes, regulations, and guidelines as they are amended from time to time

13182 The Legislature further finds and declares that pending amendments of the Federal Water Pollution Control Act indicate that there will be many future changes in regulations and guidelines implementing the federal act; that changes therein will probably be made with frequency, and that the most effective way in which to maintain the integrity of the Porter-Cologne Water Quality Control Act without federal preemption is to authorize the state board to adopt and amend state regulations based upon the changing requirements of the federal act, and federal regulations and guidelines issued pursuant thereto, provided that such state regulations are consistent with and help implement the declarations of policy set forth in Section 13000.

13183. The state board may adopt and amend regulations governing water quality and water pollution control, based upon and in compliance with the requirements of the Federal Water Pollution Control Act, and acts amendatory thereof or supplementary thereto, and regulations and guidelines issued thereunder, as they are amended from time to time To the extent necessary to prevent preemption, regulations adopted or amended by the state board may include procedures or provisions different from or inconsistent with those of this division All regulations adopted or amended pursuant to this chapter must be found by the state board to be consistent with the declarations of policy set forth in Section 13000, and to be necessary in the judgment of the board for the purpose of preventing preemption by the federal government.

SEC. 2. This act shall become operative only if, and on the date on which, the State Water Resources Control Board adopts a resolution declaring that Congress in the calendar year 1972 enacted S. 2770 or H.R. 11896, or some substitute bill, containing provisions such as those in Title IV of both S. 2770 and H R. 11896 which authorize the Administrator of the Environmental Protection Agency to issue permits for the discharge of pollutants into navigable and other waters, as defined, and authorize, in lieu of such federal permit program, a state permit program which meets the requirements of federal statutes, regulations, and guidelines. On or before January 15, 1973, the State Water Resources Control Board shall adopt a resolution declaring whether or not the provisions of this act are operative in accordance with the requirements of this section ''

House Resolution No. 63

Relative to a study of competitive bidding for state purchases of data processing equipment

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is hereby requested to assign to an appropriate committee for study the subject of the problems involved in letting such contract without competitive bids and to direct such committee to make recommendations concerning the enforcement of the requirements of competitive bidding with regard to this and other contracts, and be it further

Assembly Bill No. 1744—An act to amend Section 402 1 of, and to add Section 405 2 to, the Revenue and Taxation Code, relating to property taxation.

Bill read second time

Consideration of Author's Amendments

The following amendments, pursuant to the Assembly Rules, were read, and adopted

Amendment No. 1

On page 3, of the printed bill, as amended in Assembly May 25, 1972, between lines 16 and 17, insert

"Interest grant payments made by the federal or a state government, to a lender or mortgagee, for or on behalf of such an owner of such housing shall not be deemed to be income of the owner of such housing earned from such housing, nor shall such payments be included in any capitalization of such income"

Amendment No. 2

On page 3, between lines 36 and 37, insert

"It is hereby declared that the purpose and intent of the Legislature in amending this section is to provide for a more equitable method of assessing low- and *moderate-income family housing than is presently* the general practice in California

Experience has indicated that in the case of federally assisted Section 236 projects, most counties are not applying the "capitalization of income approach" to assessments Such projects as have been completed and placed in operation have been assessed at 100 percent of original cost estimates Assessment in such a manner, which does not take into account the nature of the subsidies provided for the purpose of housing low- and moderate-income families and individuals, places in serious jeopardy the success of such projects and aggravates their overall management problems, especially since a relatively high level of maintenance and repairs is experienced in housing projects of this kind

An alternative to the more equitable assessment practices set forth in this legislative enactment would be to increase rents to tenants To do this would be to defeat the purpose of such programs and make it more difficult than ever to meet the housing needs of many of our citizens This alternative is unacceptable To continue to use the original cost estimates or to use replacement value or comparable sales

approach severely limits the federal government programs' and state programs' ability to meet the housing needs of our people and in fact frequently constitutes an exclusionary practice of local government. Such practice denies individuals and families of low and moderate income reasonable access to housing in communities using such inequitable assessment practices

The Legislature hereby finds that the "income approach" is the most effective evaluation concept in estimating the "full cash value" of such housing projects and that the use of this method of arriving at full cash value will in large part alleviate a critical situation which now exists in this state."

Amendment No. 3

On page 4, strike out line 17, and insert

"SEC. 3. There shall be a presumption that the full cash value of property owned by a nonprofit or limited-dividend corporation, which is federally assisted, insured, or otherwise subsidized to provide housing for persons with low or moderate incomes, may be determined by the capitalization of income method of assessment in those cases where other methods of determining the full cash value of such property, such as by replacement cost or comparable sales, reflect substantially the same value as the value determined by the capitalization of income method

SEC 4. The provisions of Section 1 of this act shall".

Amendment No. 4

On page 4, line 22, strike out "such approval", and insert "defeat of such measure".

Amendment No. 5

On page 4, line 23, strike out "SEC 4", and insert "SEC 5".

To the Honorable Members of the Assembly and Senate.

Assembly Bill No. 83, "An act to amend Sections 3509 and 3510 of the Fish and Game Code, relating to birds, and declaring the urgency thereof, to take effect immediately,"
