75002. "Judge" means a justice of the Supreme Court or of a district court of appeal, or a judge of a superior court or a municipal court. A judge or justice of any other court does not acquire status as a judge for the purposes of this chapter by reason of designation as a judge pro tempore of, or assignment by the Judicial Council or its chairman to, any of the said courts.

75003. "Salary" means the compensation received by a judge as the emolument of the office of judge, but does not include any additional compensation received by reason of designation as a judge pro tempore or assignment by the Judicial Council or its chairman.

Article 2. Retirement for Service

Age and service requirements

75025. Every judge who has the age and service qualifications specified in one of the following subdivisions, and who is not ineligible for retirement under Section 75026, shall be retired for service upon filing notice of retirement with the Sec-

retary of State, specifying the date upon which his retirement is to become effective:

(c) Age 70, with an aggregate of 20 years of service as a judge, the last five years of which has been served immediately preceding the effective date of retirement.

Upon the effective date of the retirement of any such judge, the judicial office from which he has retired shall become vacant, and a successor shall thereupon be appointed to fill the vacancy

Contributions

75026. No judge shall be eligible to retire under Section 75025 if he has not received a salary from which contributions for the Judges' Retirement Fund have been deducted for a period or periods aggregating at least 10 years unless, prior to the effective date of his retirement, he has paid into the Judges' Retirement Fund a sum equal to the contributions which would have been deducted from his salary during the period of 10 years immediately preceding the effective date of his retirement if he had received a salary subject to deduction of contributions for the Judges' Retirement Fund during all of that period, excluding any time within the 10-year period during which contributions for the Judges' Retirement Fund were actually deducted from his salary, any time in that period in respect to which he has made payment under Section 75029, and any time in that period which is included in the computation of his service under Section 75031. The sum payable shall be computed by applying the rate or rates of deduction applicable to judges' salaries during such time to the salary which the judge last received as the incumbent of a judicial office to which he was elected by the people.

Office expiring before qualifications satisfied

75027. Any judge whose term of office expires within 30 days before he has rendered the minimum service required for retirement at his age shall be deemed to have rendered such minimum service.

Computation of service

75029. In computing the number of years of service as a judge a person has for the purposes of this chapter, there shall be included such number of years as he has presided as a justice of a court which was superseded by a municipal court, if he

became a judge of such municipal court upon its creation, and if, prior to the effective date of his retirement, he has paid into the Judges' Retirement Fund a sum equal to the amount which would have been deducted from his salary and paid into that fund had he been a judge of the municipal court during the time he was a justice of the superseded court, computed by applying the rate or rates of deduction applicable to judges' salaries during such time to the rate of salary which he actually received during his first year of service as judge of such municipal court.

If he was serving as a justice of the peace at the time of his election or appointment as a justice of the Supreme Court or of a district court of appeal or judge of a superior court, the time so served as such justice of the peace shall be included in computing the number of years he has been a judge for purposes of retirement under Section 75025, if he has served at least 10 years as a justice of the Supreme Court or of a district court of appeal or judge of a superior court immediately preceding his retirement, and if he has paid into the Judges' Retirement Fund a sum equal to the amount which would have been deducted from his salary and paid into that fund had he been a judge during the time he was a justice of the peace, computed by applying the rate or rates of deduction applicable to judges' salaries during such time to the rate of salary he actually received during his first year of service as a judge.

Such contributions shall be computed by ascertaining the average annual amounts paid by the judge or justice for the period during which he actually made contributions to the Judges' Retirement Fund and applying this rate to the period of 20 years.

This section shall remain in effect until the ninety-first day after final adjournment of the 1955 Regular Session of the Legislature.

against any one or more of the employers named in the application. Where such an election is made, the employee must successfully prove his claim against any one of the employers named, and any award which the commission shall issue awarding compensation benefits shall be a joint and several award as against any two or more employers who may be held liable for compensation benefits. If, during the pendency of any claim wherein the employee or his dependents has made an election to proceed against one or more employers, it should appear that there is another proper party not yet joined, such additional party shall be joined as a defendant by the commission on the motion of any party in interest, but the liability of such employer shall not be determined until supplemental proceedings are instituted. Any employer joined as a defendant subsequent to the first hearing or subsequent to the election provided herein shall not be entitled to participate in any of the proceedings prior to the commission's final decision, nor to any continuance or further proceedings, but may be permitted to ascertain from the employee or his dependents such information as will enable the employer to determine the time, place, and duration of the alleged employment. On supplemental proceedings, however, the right of the employer to full and complete examination or cross-examination shall not be restricted.

Right of contribution

At any time within one year after the commission has made an award for compensation benefits in connection with an occupational disease, any employer held liable under such award may institute proceedings before the commission for the purpose of determining an apportionment of liability or right of contribution. Such a proceeding shall not diminish, restrict, or alter in any way the recovery previously allowed the employee or his dependents, but shall be limited to a determination of the respective contribution rights, interests or liabilities of all the employers joined in the proceeding, either initially or supplementally; provided, however, if the commission finds on supplemental proceedings for the purpose of determining an apportionment of liability or of a right of contribution that an employer previously held liable in fact has no liability, it may dismiss such employer and amend its original award in such manner as may be required.

Disability or death resulting from silicosis

In any proceeding before the commission for the purpose of determining an apportionment of liability or of a right of contribution where any employee incurred a disability or death resulting from silicosis in underground metal mining operations, the determination of the respective rights and interests of all of the employers joined in the proceedings either initially or supplementally shall be as follows:

(a) All employers whose underground metal mining operations resulted in a silicotic exposure during the period of the employee's employment in such operations shall be jointly and severally liable for the payment of compensation and of medical, surgical, legal and hospital expense which may be awarded

to the employee or his estate or dependents as the result of disability or death resulting from or aggravated by such exposure.

Reimbursement to employers

(b) If any of the employers who have not contributed to payment of the original award shall be without the commission's jurisdiction, or are dead, insolvent, or not subject to enforcement of awards against them for such contributions, either directly or through solvent insurance carriers, then upon such showing being made to the satisfaction of the commission, it shall make an award in favor of the employer or employers who have paid the original award, payable out of the fund used for payment of the additional compensation provided for in Section 4751 of this code, in an amount equal to the unreimbursed portions of the original payment or payments to which such employer or employers are found entitled as aforesaid. The use of the fund for such reimbursement in addition to the purposes specified in Section 4751 of this code is hereby authorized. The Legislature finds that as a matter of public policy and public welfare, sufferers from silicosis resulting from employment in underground metal mines should be compensated for such disability; that due to the peculiar nature of this disease it often does not manifest itself until long after periods of exposure have expired; that this frequently results in disability occurring in or after the last of a series of employments where such exposure existed; that underground metal mining is a class of industry having special character, both as to silicotic hazard and investment hazard; that the latter hazard has resulted in the past in closure of mines, disappearance or financial nonresponsibility of former owners or lessees of such mines and consequent inability of the commission to enforce against them compensation awards for proportionate liability in silicosis cases. It is inequitable that total ultimate liability should fall on one or more such employers who happen to be solvent or have solvent insurance carriers within the commission's jurisdiction or in reach of its process. Therefore the Legislature finds that, to the extent that the commission determines that proper contributions to a joint and several award for compensation for silicosis cannot be enforced against an employer who is or was engaged in underground metal mining for any of the above reasons, it shall direct that contribution shall be paid, either directly or by way of reimbursing any employer or employers who have paid said award, by payment from the fund provided for in Section 4751 of this code. Such payments or reimbursement for payments the Legislature finds will protect employees in the metal mining industry and will promote the general public welfare in mining communities.

Legislative findings

Presumption of silicotic exposure

(c) In making its determination in the supplemental proceeding for the purpose of determining an apportionment of liability or of a right of contribution of percentage liabilities of the various employers engaged in underground metal mining operations the commission shall consider as a rebuttable presumption that employment in underground work in any mine for a continuous period of more than three calendar months will

result in a silicotic exposure for the employee so employed during the period of employment if the underground metal mine was driven or sunk in rock having a composition which will result in dissemination of silica or silicotic dust particles when drilled, blasted or transported.

Any employer shall be entitled to rebut such presumption by showing to the satisfaction of the commission, or its referee, that the mining methods used by the employer in the employee's place of employment did not result during his employment in the creation of silica dust in sufficient amount or concentration to constitute a silicotic hazard. Dust counts, competently made, at such intervals and in such locations as meet the requirements of the Division of Industrial Safety for safe working conditions may be received as evidence of the amount and concentration of silica dust in the workings where such counts have been made at the time when they were made. The commission may from time to time, as its experience may indicate proper, promulgate orders as to the frequency with which such dust counts shall be taken in different types of workings in order to justify their acceptance as evidence of the existence or nonexistence of a silicotic hazard in the property where they have been taken.

whole or in part an allocation which has been assigned to such local agency under the provisions of Section 29 and 30. It is therefore important, in order to expedite the filing of applications and the payment of claims under the act cited that this section go into effect immediately.

In addition it appears that there are some cities which have been without a governing body for several years, and that the allocation under Section 25 of this chapter to those cities could be utilized by the counties in which such cities are located. CHAPTER 242

An act to amend Section 802 of the Agricultural Code, relating to the maturity of grapes.

[Approved by Governor April 17, 1953. Filed with Secretary of State April 17, 1953.]

In effect September 9, 1953

The people of the State of California do enact as follows:

SECTION 1. Section 802 of the Agricultural Code is amended to read:

802. As applied to grapes:

"Mature"

(a) "Mature" means that each bunch of the varieties classified above in Group A shall test not less than 17 percent soluble solids in juice, as determined by the Balling or Brix scale hydrometer; however, in view of differences in climatic conditions prevailing north and west of San Gorgonio Pass, which results in the Thompson Seedless and Malaga varieties of grapes grown in that area having, at maturity, a higher percentage of soluble solids than mature grapes of these varieties grown in the area south and east of San Gorgonio Pass. Thompson Seedless and Malaga grapes produced in the area north and west of San Gorgonio Pass shall so test not less than 18 percent, except that Thompson Seedless grapes produced in the area north and west of San Gorgonio Pass shall be considered mature if they so test not less than 17 percent and if the juice contains soluble solids equal to or in excess of 25 parts to every part of acid contained in the juice (the acidity of the juice to be calculated as tartaric acid without water of crystallization); however, the varieties Emperor, Gros Colman, Bleu Grau, Drodelabi, Fresno Beauty, Servian Blue, Pierce Isabella, Pierce, Isabella Regia, California Concord, Concord, Dattier de Beyrouth, Red Malaga, Khalili, Persian 23, Dizmar, Ribier, Delight and Perlette shall so test not less than 16 percent and the varieties Olivette Blanche, Lady Finger, Rish Baba, and Khandahar shall so test not less than 15 percent; however, the Blackrose and Cardinal varieties shall so test either not less than 16 percent or not less than 15 percent if the juice contains soluble solids equal to or in excess of 25 parts to every part of acid contained in the juice (the acidity of the juice to be calculated as tartaric acid without water of crystallization).

"Mature" in the case of all other varieties shall mean that the average or composite test of all the grapes in any container or bulk lot shall be not less than 17 percent soluble solids in juice, as determined by the Balling or Brix scale hydrometer; however, white varieties of the Muscat type shall test not less than 18 percent and the variety Burger shall test not less than 16 percent.

Severability clause

In the event that the maturity standard fixed for the Thompson Seedless and Malaga varieties of grapes produced in that area northwest of the San Gorgonio Pass should be declared void, it is the intent of the Legislature that the other maturity standards prescribed in this section shall prevail.

Any varieties included in Group A may be placed in the standard for juice grapes and other varieties may be placed in the standard established for table grapes, but regardless of standard, the maturity of varieties included in Group A shall be determined by testing the juice from entire bunches representative of the least mature grapes in any container and constituting not less than 10 percent by weight of the contents of the container. The maturity of all varieties not included in Group A shall be determined by testing the juice from a composite sample representative of the average of the grapes in any container or bulk lot. The standards provided by this section are minimum standards, and the tolerance allowed by Sections 800 and 801 shall not be applied to any test made in accordance with this section for the purpose of determining whether any lot of grapes complies with the maturity standard for the variety.

Definitions

(b) "Waterberry" means a disease characterized by a watery, soft or flabby condition of the berries. Such affected berries are low in sugar content, have tender skins and are very easily crushed.

(c) "Redberry" means a condition closely resembling waterberry generally found in black varieties. Such grapes show a red or brownish red color in addition to the general characteristics of waterberry.

(d) "Raisined berries" means grape berries which are fully cured, resembling raisins, which do not contain sufficient juice to drop from the berry under ordinary pressure between thumb and finger.

(e) "Sunburned or dried berries" means grapes which show complete drying out, from any cause, of part or all of any individual berries.

Protests

Sec. 11. Any person interested and objecting to the formation of said parking district or to the extent thereof or to the inclusion of his property therein or to the acquisitions and improvements as proposed, or to the issuance of bonds or to the doing of any other things as proposed in the resolution of intention may file a written protest with the clerk of the legislative body at any time prior to the time fixed for the hearing.

Hearing

At the hearing the clerk of the legislative body shall present to it all protests filed with him and the legislative body shall hear and determine the same. Its decision thereon shall be final and conclusive; provided, however, that if the owners of taxable real property in said district having an assessed valuation of more than one-half of the assessed valuation of all taxable real property in said district at the conclusion of the hearing have on file and not withdrawn their written protests objecting to the formation of said district, the legislative body shall make a finding that such majority protest has been filed, and upon such finding being made the proceeding shall be deemed abandoned and no further proceedings shall be had or taken pursuant to said petition. Any protest filed may be abandoned and withdrawn by written notice of such abandonment or withdrawal signed by the person who signed the protest and filed with the clerk of the legislative body at any time prior to the conclusion of the hearing. If a proceeding is terminated by the filing of a majority protest no new petition for the same purpose may be filed until the expiration of one year from the date of the finding of the legislative body that such majority protest was filed. However, a new petition for a modified project may be filed at any time. Said hearing may be continued from time to time at the discretion of the legislative body. At said hearing the legislative body may make such changes in the boundaries of the proposed district as it shall find to be proper and advisable and shall define and establish such boundaries, but said legislative body shall not modify such boundaries so as to include any territory which will not in its judgment be benefited by the proposed project, and no territory shall be excluded from the proposed district which will in the judgment of said legislative body be benefited by the proposed project.

At said hearing, the legislative body may also increase, decrease, change, or otherwise modify the acquisitions or improvements to be made, but the legislative body shall not increase, decrease, change or otherwise modify said acquisitions or improvements without first procuring from the city engineer or other competent person a supplemental report showing the effect thereof upon the estimates and other data given in the original report.

If the legislative body proposes to make changes in the boundaries of the proposed district or in the acquisitions and improvements, it shall take the proceedings required by Section 12 hereof and shall continue the hearing to the time fixed for hearing objections to the proposed changes.

SEC. 6. Section 12 of said act is amended to read:

Change of boundaries, etc.

SEC. 12. The legislative body shall not make any change in the boundaries of the proposed district or in the acquisitions and improvements, except after notice of its intention so to do given by two insertions in the newspaper in which the resolution of intention was published and specifying a time for hearing objections to any such proposed change, which time shall be not less than twenty (20) days after the first publication of said notice. Written objections to any proposed change may be filed with the clerk of said legislative body by any interested person at any time prior to the hour set for hearing the same. Said legislative body shall hear and pass upon such objections at the time appointed or at any time to which the hearing thereof may be adjourned and its decision thereon shall be final and conclusive.

If the boundaries are changed, protests objecting to the formation of the district made by owners of real property excluded by the change shall not be counted in computing a majority protest as hereinbefore provided but written protests objecting to the formation of the district made by owners of real property remaining in the district and by the owners of real property added by the change and filed not later than the time fixed for hearing objections to such change shall be counted in computing a majority protest as hereinbefore provided.

At the conclusion of the hearing fixed by the resolution of intention, if no majority protest is on file as hereinbefore provided and if all protests and objections, including protests and objections to changes, have been overruled and denied, then said legislative body shall be deemed to have acquired jurisdiction to proceed further under this act.

When the legislative body has so acquired jurisdiction to proceed further, it may adopt an ordinance declaring that said parking district is formed and describing the acquisitions and improvements to be made.

SEC. 7. Section 13 of said act is amended to read:

Acquisition of land, property, etc.

SEC. 13. Before issuing any bonds the city shall contract for the purchase of the land, property and rights of way to be acquired, (which contracts may provide that the city's obligation to purchase thereunder shall be contingent upon the avail-

ability of funds from the sale of bonds and contributions, if any) or the city shall procure options to purchase such land, property and rights of way, or, if all or any portion thereof cannot be acquired by contract or under option at a price which the legislative body deems satisfactory, the legislative body shall cause an action or actions to be brought in the name of the city for the condemnation thereof and, before issuing any bonds, shall obtain a judgment in such action or actions. If after the amount to be paid for the land, property and rights of way to be acquired has been fixed by contract or by option or by a judgment or judgments, the legislative body finds and determines that it will not be feasible to issue bonds in an amount necessary to make the acquisitions and improvements described in the ordinance declaring the district formed and the incidental expenses in connection therewith and the proceedings therefor, after deducting any amount to be contributed by the city for such purposes, the legislative body may eliminate, change or otherwise modify any of the proposed acquisitions or improvements, after notice and hearing as provided in Section 12 hereof, and the majority protest provisions of said Section 12 shall apply.

Condemnation

Except as otherwise provided in this act, any condemnation action brought hereunder shall be governed by those provisions of the Code of Civil Procedure which are applicable thereto; provided, however, that the limitations provided in Sections 1251 and 1255a of said code as to the time within which the sum of money assessed must be paid and the time within which the proceedings may be abandoned shall not apply. In any such condemnation action the ordinance declaring that the parking district is formed and describing the acquisitions and improvements to be made shall be conclusive evidence of the public necessity of the proposed acquisitions and improvements, that the property to be taken is necessary therefor and that the proposed acquisitions and improvements are planned and located in the manner which will be most compatible with the greatest public good and the least private injury.

SEC. 8. Section 14 of said act is amended to read:

Ordinance, etc. Bond issue

SEC. 14. When the amount to be paid for the land, property and rights of way finally determined to be acquired has been fixed by contract or by option or by a judgment or judgments, the legislative body may by ordinance, resolution or indenture provide for the issuance of bonds of the district in an amount not exceeding the amount necessary to make the proposed acquisitions and improvements, to pay the incidental expenses in connection therewith and the proceedings therefor and to establish a reserve fund for the payment of the principal of and interest on said bonds, less any amount to be contributed by the city for such purposes.

The legislative body shall describe the form of bonds and of the interest coupons to be attached thereto. Said bonds shall all mature with 30 years after the date thereof and shall be payable at the times and at a place to be fixed by the legislative body and designated in such bonds. The legislative body may make such

bonds or any portion thereof callable for redemption before maturity at such time or times, at such price or prices and upon such other terms and conditions as it may determine. Any bond callable before maturity shall contain a recital to that effect. The bonds shall be issued in the denomination of one thousand dollars ($1,000) each, shall be payable on the day and at the place fixed in such bonds, with interest at the rate specified in such bonds, which rate shall not be in excess of the maximum rate stated in the resolution of intention, and shall be paid semiannually except the interest for the first year may be paid at the end of said year. Said bonds shall be signed by the chief executive of the city or by such other officer thereof as the legislative body shall in said ordinance, resolution or indenture authorize and designate for that purpose and also signed by the treasurer thereof and countersigned by the clerk. The interest coupons on said bonds shall be numbered consecutively and signed by the treasurer. All of the signatures on said bonds and on the interest coupons thereof may be made by printed, lithographed or engraved facsimile except the countersignature of the clerk which shall be manually affixed. In case any such officer whose signature or countersignature appears on the bonds or coupons shall cease to be such officer before the delivery of such bonds to the purchaser, such signature or countersignature shall nevertheless be valid and sufficient for all purposes, the same as if such officer had remained in office until the delivery of the bonds.

Each of said bonds shall state in substance that the bond together with the interest thereon is payable solely from the net revenues from the operation of the parking place or places acquired and improved with the proceeds thereof, the net revenues (or a portion thereof) from parking meters on certain public ways within the district (if such be the case), and, to the extent provided in this act, from a limited (stating the limits) ad valorem assessment to be levied upon taxable real property in the district (if such be the case), and that neither the city nor any officer thereof is to be held otherwise liable for its principal or interest.

SEC. 9. Section 15 of said act is amended to read:

Additional provisions of ordinance, etc

Sec. 15. The ordinance, resolution or indenture providing for the issuance of said bonds may also provide:

(1) For the maintenance and operation of the parking facilities, for the establishment of a special fund or funds into which all revenues derived from the operation of the parking facilities shall be placed, for the payment from said fund or funds of the expenses of operating and maintaining said parking places, and for the allocation and pledge of the remaining revenues to the payment of said bonds and the interest thereon.

(2) For the installation of parking meters on the public ways within the district as provided in the resolution of intention, to the extent such meters have not already been installed, for the maintenance of meters on such public ways for the period of time specified in the resolution of intention, for the establishment of a special fund or funds into which the net revenues

(or portion thereof as specified in the resolution of intention) shall be paid, and for the allocation and pledge of said net revenues, or said portion thereof, to the payment of said bonds and the interest thereon.

(3) For the levy each year, if so provided in the petition and in the resolution of intention, of an ad valorem assessment on all taxable real property in the district, to the extent to which revenues from the parking lots and from parking meters pledged to the payment of principal and interest of said bonds have been or are expected to be insufficient in any year to pay such principal and interest or to the extent to which any reserve fund established for said bonds has been or will be used to pay such interest and principal. The rate of ad valorem assessment shall be fixed by the legislative body each year in accordance with such provision. Such ad valorem assessment shall not exceed the limits stated in the resolution of intention. Such assessment shall be levied, collected and enforced in the same manner, at the same times, and with the same penalties and interest, as in the case of taxes levied for the city.

(4) For interest and redemption funds, sinking funds, reserve funds, and any other funds necessary or convenient for use in the payment of said bonds and the interest thereon.

(5) For restrictions on the operation by the city or the district of other facilities for the public parking of motor vehicles which would compete with the facilities, the revenues of which are pledged to the payment of the bonds and the interest thereon.

Said ordinance, resolution or indenture may also contain any other provisions necessary or desirable to carry out the intent and purpose of, not inconsistent with the provisions of, this act.

The provisions of said ordinance, resolution, or indenture shall constitute covenants for the benefit and protection of the holders of said bonds, and any such holder may enforce the same by mandamus or other appropriate remedy. Any provision of said ordinance, resolution or indenture, except a provision as to the amount or time of payment of principal or interest on the bonds, may be later eliminated or modified by the legislative body, if the holders of not less than sixty percent (60%) of the outstanding bonds have agreed in writing to such elimination or modification.

SEC. 10 Section 19a is added to said act, to read:

Sec. 19a. A commissioner appointed to fill a vacancy created by the death, resignation, incapacity or removal of a commissioner shall hold office for the unexpired term of the former incumbent. Term of appointed commissioner

SEC 11 Section 20 of said act is amended to read:

Sec 20. All property acquired under the provisions of this act shall be condemned or acquired in the name of the city and title to such property shall be in the city but shall be held by the city subject to the provisions of this act, and the parking places acquired shall be under the jurisdiction and control of the commission of the district for which the same were acquired The commission shall operate, manage and control said parking Status of property acquired Operation, regulation, etc.

places and shall make and enforce all necessary rules and regulations for the use thereof. It shall fix, regulate and collect rentals, fees or other charges for the parking of vehicles therein and may provide different rates for different classes of customers or users Such rentals, fees or other charges shall be fixed after public hearing following such notice as the commission may prescribe.

Legislative intent

The providing of adequate public parking places in cities largely depends upon the formation of parking districts. Such districts will be created and will be successful only if so operated as to serve the property within the district adequately. It is the intent of this act, if the ordinance, resolution or indenture providing for the issuance of the bonds provides for the levy of an ad valorem assessment upon the taxable real property in the district, that the owners of real property in a parking district which is created hereunder to provide parking places to solve the parking problems of the district may receive preferential rates, charges, or rentals for themselves, their tenants and the classes of persons who call upon or do business with them, all to the end that the property which bears the burden and provides a solution for the parking problem shall receive a special benefit.

All parking places acquired and constructed under this act shall be public parking places; but nevertheless, if the ordinance, resolution or indenture providing for the issuance of the bonds provides for the levy of an ad valorem assessment upon the taxable real property in the district, the commission having jurisdiction over the parking places for any district may restrict or partially restrict the use of such parking places to owners and tenants, and classes of persons designated by such owners or tenants of real property in the parking district and may establish rates or charges or rentals for the owners and tenants of such properties and classes of persons designated by such owners or tenants which differ from and are less than the rates, charges, or rentals charged other persons.

Rentals, fees, etc

The commission shall fix such rentals, fees or charges as will produce sufficient revenue, when added to the expected revenues from parking meters pledged to the payment of the bonds of the district, to pay the principal and interest of said bonds as the same fall due, and also to call and retire prior to maturity any bonds which, under the provisions of the ordinance, resolution or indenture providing for the issuance of the bonds, are to be called and retired prior to maturity if revenues are sufficient to make such call.

Covenants

The commission shall abide by all covenants made by the legislative body in the issuance of the bonds

Employees

All employees required for the proper operation, management and control of the parking places acquired and constructed under this act shall be city employees selected as other city employees are selected.

Discontinuance of parking places

As long as any of the bonds of the district or any interest thereon remain unpaid, the parking places acquired for the district shall be used as public parking places and for no other

purpose After such bonds and all interest thereon have been paid such property shall continue to be used as public parking places; provided, that such use may be discontinued as to such property or any portion thereof if the legislative body, after public hearing following such notice thereof as the legislative body may prescribe, determines by a four-fifths vote of all its members that the public interest and necessity and the needs of the district no longer require that such property, or such portion thereof, be used as public parking places. Thereafter the property as to which such determination is made may be used by the city for any public purpose or it may be sold as other city property is sold when no longer needed for a public purpose. If any ad valorem assessment has been levied upon the real property in the district as in this act provided, then the proceeds of such sale shall be used to make refund of such assessments to the then owner of each parcel of real property which has been so assessed in the proportion which the total assessments levied upon such parcel bears to the total of all such assessments but no refund as to any parcel shall exceed the total assessments theretofore paid in respect of said parcel, and any portion of the proceeds remaining after such refunds have been made shall be placed in the general fund of the city.

The maximum rentals, fees and charges to be collected by the operator shall be fixed by the commission after public hearing as provided in Section 20 hereof and shall be recited in the lease or contract, and no higher rentals, fees or charges shall be collected by the operator without amendment of said lease or contract agreed to by the board after like public hearing Neither the commission nor any such operator shall conduct on any parking place any business other than that of the operation of public parking facilities. If the ordinance, resolution or indenture providing for the issuance of the bonds provides for the levy of an ad valorem assessment upon the taxable real property in the district, any such lease or contract may provide that the use of the parking places shall be restricted or partially restricted to owners and tenants, and classes of persons designated by such owners or tenants, of real property in the district, and may provide for maximum rates or charges or rentals for such owners or tenants and classes of persons designated by such owners or tenants which differ from and are less than the maximum rates, charges

or rentals charged other persons, all as provided in Section 20 hereof.

To provide revenues for the district, the legislative body conducting the proceeding for the formation of the district, at any time prior to the formation of the district, or after the formation of the district and prior to the appointment of a commission therefor, may enter into a contract or lease with any owner or tenant of property in the district under which said owner or tenant, for a specified rental or other consideration and for a specified period not exceeding 10 years, reserves a reasonable proportion or number of parking spaces in a parking place of the district, for the use of the owner of such property, the tenant or tenants thereof, the employees of any such owner or tenant performing services on such property, and the customers of, or other classes of persons designated by, such owner or tenant and entering said property as invitees or otherwise. The procedure specified in this act for the formation of the district and the issuance of the initial bonds shall be followed so far as applicable; provided, that at the hearing the legislative body shall have no power to change the boundaries of the district and the acquisitions and improvements finally ordered to be made must be ones which the legislative body, following the hearing, finds to be of benefit to the district as originally formed. Notwithstanding the provisions of Section 18 hereof, the bonds so issued to provide additional public parking facilities for the district may in part be secured by revenues from facilities acquired with the proceeds of bonds previously issued, to the extent that the allocation and pledge of such revenues to payment of the additional bonds is not prohibited by the ordinance, resolution or indenture providing for the bonds previously issued. The revenues from such additional facilities may be used to pay principal and interest on bonds previously issued to the extent authorized by the ordinance, resolution or indenture providing for the issuance of the bonds issued for such additional facilities.

SEC. 44. Section 35571 of said code is amended to read:

Restriction on use

35571. If the ordinance, resolution, or indenture providing for the issuance of the bonds provides for the levy of an ad valorem assessment upon the taxable real property in the district, any lease or contract may provide that the use of the parking places shall be restricted, or partially restricted, to owners and tenants of real property in the district, and classes of persons designated by them, and may provide for maximum rates, charges, or rentals for such persons which differ from and are less than the maximum rates, charges, or rentals charged other persons.

SEC. 48. Section 35705 is added to said code, to read:

Discontinuance

35705. After the bonds of the district and all interest thereon have been paid the property shall continue to be used

as public parking places. However, such use may be discontinued as to such property or any portion thereof if the legislative body, after public hearing following such notice thereof as the legislative body may prescribe, determines by a four-fifths vote of all its members that the public interest and necessity and the needs of the district no longer require that such property, or such portion thereof, be used as public parking places Thereafter the property as to which such determination is made may be used by the city for any public purpose or it may be sold as other city property is sold when no longer needed for a public purpose If any ad valorem assessment has been levied upon the real property in the district as provided in this part, then the proceeds of such sale shall be used to make refund of such assessments to the then owner of each parcel of real property which has been so assessed in the proportion which the total assessments levied upon such parcel bears to the total of all such assessments, but no refund as to any parcel shall exceed the total assessments theretofore paid in respect of said parcel, and any portion of the proceeds remaining after such refunds have been made shall be placed in the general fund of the city.

Urgency

SEC. 49. This act is an urgency measure necessary for the immediate preservation of the public peace, health and safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The constantly increasing traffic congestion in the State of California and particularly in its urban areas brings death or injury to many persons each day. The development of freeways is causing, and will continue to cause, an increase in the number of motor vehicles which are driven to the central business areas and in such areas traffic congestion detrimental to the public safety is in a large measure caused by the inability of the operators of motor vehicles to find quickly and easily a place to park. The provisions of this act are necessary to permit the formation of parking districts to provide parking places in such congested areas and it is therefore necessary that this act take effect immediately.

Effect Stats 1953, Ch 192

SEC. 50. Sections 16 to 48, inclusive, of this act become operative only if Part 4 of Division 18 of the Streets and Highways Code is enacted by the Legislature at its 1953 Regular Session, in such case at the same time as said Part 4 of Division 18 of the Streets and Highways Code takes effect, at which time Sections 3, 4, 5, 9, 11, 12, 13, 14, 15, 20, 21, and 25 of the Parking District Act of 1951 amended by this act, and Sections 19a and 23a added to said act by this act, are all hereby repealed.

(5) That such inspection was made at a time when sufficient brood was present to establish the actual presence or absence of disease.

(6) The total number of colonies in the apiary at the time of inspection, and the number of colonies found diseased.

(7) That all diseased colonies of bees found upon said inspection were destroyed prior to the issuance of the certificate.

(8) Any other facts which the certifying officer may deem pertinent to the condition and disease history of the bees during the two-year period immediately preceding the inspection.

Any shipment of bees, used hives or appliances arriving in this State which is not accompanied by a valid certificate, as required by this section, shall be refused entry and returned to the shipper or destroyed, at the option and expense of the owner or person in charge of the shipment.

No such certificate shall be valid longer than sixty (60) days after the last date of inspection of the apiary shown on the certificate, except that a certificate covering a shipment arriving prior to April 1st from a locality having

severe winters shall be valid if it shows the last inspection of the apiary to have been made on or after September 15th of the preceding year.

When any bees or used hives or appliances entering California are found to be infected with disease at time of inspection in this State, the lot or shipment shall be placed under a hold notice as prescribed in Section 275 and shall, at the option and expense of the owner or bailee, be destroyed or shipped out of this State within forty-eight (48) hours of the time of such inspection unless in the opinion of the director or commissioner same can be handled in accordance with the provisions of Sections 275 and 276 without menace or harm from disease to the apicultural industry of this State.

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are: Urgency

The present law requires that bee hives and other bee-keeping appliances brought into this State be stamped with an indelible official stamp showing the state of origin and the date of inspection of the shipment by the apiary inspector or similar official in the state of origin. In some of the states no provision has been made for the use of such stamps The bee keepers in this State and elsewhere commonly move their colonies of bees from one seasonal location to another and in doing so frequently cross state lines. The requirement of a stamp of the state of origin and date of inspection, therefore, operates as an unnecessary impediment to the normal operations of the apiary industry. Inasmuch as the seasonal movement of bees occurs principally in the summer months it is necessary that this act take immediate effect in order that its benefits will be available during the 1953 production season.

CHAPTER 282

An act to add Section 9.5 to the Metropolitan Water District Act, relating to metropolitan water districts and annexations thereto of corporate areas of municipalities as defined in paragraph (a) of Section 9 of said Metropolitan Water District Act, and exclusions of territory from such municipalities

resulting from annexations of such territory therein to certain types of cities within metropolitan water districts, declaring severability of the provisions of this act, declaring the urgency thereof, to take immediate effect.

In effect immediately

[Approved by Governor April 17, 1953. Filed with Secretary of State April 20, 1953.]

The people of the State of California do enact as follows:

SECTION 1. Section 9.5 is added to the act cited in the title hereof, to read:

Definitions applicable

SEC. 9.5. (a) Notwithstanding the limitations contained in paragraph (b) of Section 2 of this act, for the purposes of this Section 9.5 the definitions contained in paragraph (a) of Section 9 of this act shall apply to the terms used in this Section 9.5.

Annexation of municipal territory

(b) The governing body of any municipality may declare its intention to apply to the board of directors of any metropolitan water district for consent to annex to such metropolitan water district the corporate area of such municipality as such corporate area exists at the time of making such declaration of intention or as such corporate area will exist upon the conclusion of proceedings referred to in paragraph (c) of this Section 9.5 for the annexation to any city of territory within such municipality in a manner that would result in automatic annexation of such territory to such metropolitan water district upon the consummation of the annexation of such territory to such city. Except as provided in paragraph (c) of this Section 9.5, whenever the governing body of any municipality shall make such declaration of intention and shall file a certified copy thereof with the board of directors of such metropolitan water district, any territory lying within such corporate area of such municipality so proposed to be annexed as stated in such declaration of intention shall not be annexed to such metropolitan water district except as a part of the corporate area of such municipality, until such time as the limitations prescribed in this Section 9.5 shall have ceased to be operative. If any proceedings referred to in paragraph (c) of this Section 9.5 shall fail to result in the annexation of territory within such municipality to the city conducting such proceedings, the declaration of intention so made and filed by such municipality shall be deemed to relate to the corporate area of such municipality, including the territory for which annexation to such city shall have so failed.

Same

(c) If, prior to the making and filing of the declaration of intention in the manner provided in paragraph (b) of this Section 9.5, a valid petition shall have been filed with the governing body of a city, the corporate area of which shall be included in such metropolitan water district in a manner which except for the limitations prescribed in this Section 9.5 would result in automatic annexation to such metropolitan water district of territory annexed to such city, and such petition shall pray for the annexation to such city of territory within such

municipality, the governing body so declaring its intention shall not apply to the board of directors of such metropolitan water district for consent to the proposed annexation of the corporate area of such municipality until such proceedings for the annexation to such city of the territory within such municipality shall have been completed or terminated. Such annexation of any such territory to such city in manner resulting in automatic annexation thereof to such metropolitan water district shall also, without other proceedings, result in the exclusion of such territory from such municipality, such exclusion to be effective concurrently with the annexation of such territory to such city and to such metropolitan water district: provided, that the taxable property within such excluded area shall continue taxable by such municipality to the same extent and in the same manner and for the same purposes as though such area had been excluded pursuant to proceedings conducted therefor in the manner and form provided by the organic law governing such municipality and the exclusion of territory therefrom. If any proceedings referred to in this paragraph (c) shall fail to result in the annexation to such city of territory within such municipality, upon the termination of such unsuccessful city proceedings the governing body of such municipality may apply to the board of directors of such metropolitan water district for consent to annex thereto the corporate area of such municipality, including the territory for which annexation to such city shall have so failed

(d) If the governing body of such municipality previously shall have made and filed its declaration of intention in the manner provided in paragraph (b) of this Section 9.5, the formal application to the board of directors of such metropolitan water district for consent to annex such corporate area shall be made and filed with such board of directors not later than thirty (30) days from the date of completion or termination of all proceedings referred to in paragraph (c) of this Section 9.5 for the annexation of territory within such municipality to a city in such manner that if the annexation to the city be consummated the territory automatically would be annexed to such metropolitan water district and would be excluded from such municipality.

Application

(e) In the event that application shall be made, within the time herein prescribed, by the governing body of a municipality to the board of directors of a metropolitan water district, for consent to annex the corporate area of such municipality to such metropolitan water district, such application shall be granted or denied by the board of directors of such metropolitan water district within three (3) months from the date such application is filed with such board of directors. Failure of such board of directors to grant such application within the period prescribed shall constitute denial of the application.

Approval by municipal governing body

(f) The governing body of such municipality, within thirty (30) days from the date upon which such application shall

have been granted by the board of directors of such metropolitan water district, shall approve or disapprove such annexation subject to the terms and conditions fixed by the board of directors of such metropolitan water district in granting such consent. If such annexation be so approved, the governing body of such municipality, within said period of thirty (30) days, shall call, and order to be held, an election within the corporate area of such municipality for the purpose of submitting to the qualified electors of such municipality the proposition of annexing such corporate area to such metropolitan water district, subject to the terms and conditions so fixed by the board of directors of such metropolitan water district. Such election shall be called and ordered to be held on a suitable date not later than three (3) months from the date on which it is so called by such governing body. Failure of such governing body to call such election within the period prescribed shall constitute disapproval by such governing body of the proposed annexation.

Election

(g) Except as otherwise expressly provided in this Section 9.5, the proceedings for the annexation of the corporate area of such municipality to such metropolitan water district shall be conducted in accordance with the provisions of paragraph (c) of Section 9 of this act and the annexation election shall be conducted and the returns thereof canvassed in the manner provided by law for elections in such municipality. In the event that the proposition for such annexation shall receive the affirmative vote of a majority of electors of such municipality voting thereon at such election, the results shall be certified and all documents filed in the manner provided in said paragraph (c) of Section 9 of this act by a date not later than sixty (60) days from the date of the holding of such election.

Completion of annexation

(h) Upon successful completion, in accordance with the provisions of this Section 9.5 and of paragraph (c) of Section 9 of this act, of the proceedings for annexation of the corporate area of such municipality to such metropolitan water district, all territory comprised within the corporate area of such municipality at the time of the filing with the board of directors of such metropolitan water district of the application by the governing body of such municipality for consent to such annexation, shall become a part of such metropolitan water district as a part of the corporate area of such municipality. Nothing herein contained shall prevent the annexation of any such territory to any city irrespective of the fact that the corporate area of such city may be a part of such metropolitan water district in a manner which except for the limitations prescribed in this Section 9.5 would result in automatic annexation to such metropolitan water district of territory annexed to such city. Nothing contained in this Section 9.5 shall authorize the annexation to a metropolitan water district, as a separate unit, of less than the entire corporate area of a municipality.

Failure of annexation

(i) In the event that the proceedings to annex the corporate area of such municipality to such metropolitan water district

shall fail to result in the consummation of such annexation, the governing body of such municipality which shall have filed its declaration of intention in the manner hereinabove provided, immediately shall file with the Secretary of State evidence of the failure of such annexation proceedings. Upon the filing of such evidence in the Office of the Secretary of State any territory then within such municipality which theretofore shall have been annexed to any city, the corporate area of which shall be included in such metropolitan water district in a manner which except for the limitations prescribed in this Section 9.5 would have resulted in automatic annexation to such metropolitan water district of such territory concurrently with its annexation to such city, shall become, and be, a part of such metropolitan water district, and the taxable property therein shall be subject to taxation thereafter for the purposes of such metropolitan water district, including the payment of bonds and other obligations of such district at the time authorized or outstanding, and such annexation shall be deemed to have occurred in accordance with the provisions of paragraph (b) of Section 9 of this act, except for the effective date of such automatic annexation, which shall be the date of filing in the Office of the Secretary of State of the evidence of failure of the proceedings for the annexation of the corporate area of such municipality to such metropolitan water district. Any such territory thereafter annexed to any such city, subject to the limitations prescribed in this Section 9.5 in the event that new proceedings shall be instituted under the provisions hereof, shall become, and be, a part of such metropolitan water district at the time, in the manner, and with the effect prescribed in said paragraph (b) of Section 9 of this act.

Formal application for consent to annex territory to district

(j) Notwithstanding any provision contained in this Section 9.5, the governing body of any municipality, in the manner provided in paragraph (c) of Section 9 of this act, may apply to the board of directors of a metropolitan water district for consent to annex to such metropolitan water district the corporate area of such municipality without first having declared its intention to make such application. If such prior declaration of intention be not made and filed, upon making formal application for consent to such annexation, in the manner provided in said paragraph (c) of Section 9 of this act, any territory lying within such corporate area of such municipality so proposed to be annexed thereafter shall not be annexed to such metropolitan water district except as a part of the corporate area of such municipality until such time as the limitations prescribed in this Section 9.5 shall have ceased to be operative. If, prior to the making and filing of such formal application, a valid petition shall have been filed with the governing body of a city for annexation thereto of territory within such municipality in a manner which except for the limitations prescribed in this Section 9.5 would result in automatic annexation to such metropolitan water district of territory annexed to such city, then such formal application shall not be made by the gov-

erning body of such municipality until such proceedings for the annexation to such city of the territory within such municipality shall have been completed or terminated. The filing of such formal application for consent to such annexation shall have the same effect as though such formal application for such consent were filed pursuant to a prior declaration of intention made and filed in accordance with the provisions of this Section 9.5 and effective as of the time of filing such formal application.

Severability clause

SEC. 2. If any section, subsection, subdivision, sentence, clause or phrase of this act, or of the act or acts of which this act is amendatory or supplemental, is for any reason held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this act. The Legislature hereby declares that it would have passed this act, and each section, subsection, subdivision, sentence, clause and phrase thereof, irrespective of the fact that any one or more sections, subsections, sentences, clauses or phrases of this act, or that any one or more sections, subsections, subdivisions, sentences, clauses or phrases of the act or acts of which this act is amendatory or supplemental, be declared unconstitutional. If any section, subsection, subdivision, sentence, clause or phrase of this act for any reason be held to be unconstitutional and such unconstitutional provision shall have purported to repeal or amend any provision of the act or acts of which this act is amendatory or supplemental, the provision existing and in force at the time of the enactment of this act shall remain and be in full force and effect notwithstanding such purported repeal or amendment.

Urgency

SEC. 3. This act is hereby declared to be an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall therefore go into immediate effect. A statement of the facts constituting such necessity is as follows:

The inhabitants of a substantial portion of the County of Los Angeles, in the southern part of this State, are in dire need of obtaining immediately an adequate supply of water for domestic and municipal use, and for this purpose have formed Central Basin Municipal Water District, a district duly organized and existing under the Municipal Water District Act of 1911 of this State; the supply of water so urgently needed for domestic and municipal use by said inhabitants can be obtained from The Metropolitan Water District of Southern California, a district duly organized and existing under the Metropolitan Water District Act of this State, which act is sought to be amended by the within and foregoing act, but arrangements for obtaining said water by said inhabitants are dependent upon the annexation of said Central Basin Municipal Water District to said The Metropolitan Water District of Southern California; this cannot be brought about effectually unless and until the amendments to the Metropolitan Water District Act provided by the within and foregoing amendatory act shall have become effective.

DIVISION 1. UNEMPLOYMENT AND DISABILITY COMPENSATION

PART 1. UNEMPLOYMENT COMPENSATION

CHAPTER 1. GENERAL PROVISIONS

Article 1. Policy and Interpretation

Public policy 100. As a guide to the interpretation and application of this division the public policy of this State is declared as follows:

Experience has shown that large numbers of the population of California do not enjoy permanent employment by reason of which their purchasing power is unstable. This is detrimental to the interests of the people of California as a whole.

The benefit to all persons resulting from public and private enterprise is realized in the final consumption of goods and services. It is contrary to public policy to permit the supply of consumption goods and services at prices which do not provide against that harm to the population consequent upon periods of unemployment of those who contribute to the production and distribution of such goods and services.

Experience has shown that private charity and local relief cannot alone prevent the effects of unemployment. Experience

has shown that if the State awaits the coming of excessive unemployment it can neither create immediately the organization necessary to orderly, economical and effective relief nor bear the financial burden of relief without disrupting its whole system of ordinary revenues and without jeopardizing its credit.

The Legislature therefore declares that in its considered judgment the public good and the general welfare of the citizens of the State require the enactment of this measure under the police power of the State, for the compulsory setting aside of funds to be used for a system of unemployment insurance providing benefits for persons unemployed through no fault of their own, and to reduce involuntary unemployment and the suffering caused thereby to a minimum.

It is the intent of the Legislature that unemployed persons claiming unemployment insurance benefits shall be required to make all reasonable effort to secure employment on their own behalf.

Part of national plan

101. This part is a part of a national plan of unemployment reserves and social security, and is enacted for the purpose of assisting in the stabilization of employment conditions. The imposition of the tax herein imposed upon California industry alone, without a corresponding tax being imposed upon all industry in the United States, would, by the corresponding penalty upon California industry, defeat the very purposes of this law as set forth in this article. Therefore when existing federal legislation which provides for a tax upon the payment of wages by employers in this State, against which all or any part of the employer contributions required under this part may be credited is repealed, amended, interpreted, affected or otherwise changed in such manner that no portion of such contributions may be thus credited, then upon the date of such change, the provisions of this part requiring employer contributions and providing for payment of unemployment compensation benefits shall cease to be operative and any assets in the Unemployment Fund or Unemployment Administration Fund shall in the discretion of the State Treasurer be held in the then existing depositaries or otherwise in the State Treasury. In the case of the Unemployment Administration Fund, such money may thereafter be dealt with by the State Treasurer pursuant to the conditions of the grant thereof to the State by the United States Government or agency thereof.

Power of Legislature

102. All the rights, privileges or immunities conferred by this division or by acts deemed pursuant thereto shall exist subject to the power of the Legislature to amend or repeal this division at any time.

Determining balance in Unemployment Fund

980. In determining the balance in the Unemployment Fund for the purpose of Section 979 there shall be excluded any estimated contributions not legally due and payable with respect to the final calendar quarter of the calendar year, except any payment of contributions made under Section 1137 and except any payment of contributions by employers terminating business during any calendar quarter. There shall also be excluded any amounts available for transfer to the Disability Fund.

Power to suspend reduced rates

981 Whenever it appears that the funds in the Unemployment Fund are less than one and one-half times the amount of unemployment compensation benefits paid during the preceding calendar year, the commission, by appropriate notice, may invoke a contribution rate of 2 7 percent from all employers, in lieu and regardless of any reduced or lower rate elsewhere prescribed in this division The rate established pursuant to this section shall be effective only until the expiration of the next quarter during which the fund again becomes equal to or in excess of one and one-half times the amount of unemployment compensation benefits paid during the then preceding calendar year.

Experience necessary to qualify for reduced rate

982. No employer shall be eligible for a contribution rate of less than 2 7 percent for the rating period January 1, 1941, to June 30, 1941, unless he has had a pay roll subject to tax under this division in each of the five years preceding January 1, 1941, and unless his separate account has been subject to benefit charges during the period of 12 complete consecutive calendar quarters ending on the computation date for that rating period and he is qualified under Section 978. No employer shall be eligible for a contribution rate of less than 2.7 percent for any subsequent rating period unless his reserve account has been subject to benefit charges during the period of 12 complete consecutive calendar quarters ending on the computation date for that rating period and he is qualified under Section 978 or 979.

Requisites for reduced rate.

983. No employer's contribution rate for any rating period commencing on or after January 1, 1942, shall be less than 2.7 percent if he has failed:

(a) To file with the director on or before the date on which they become delinquent the contribution reports and worker earning reports required of employers under this part for periods ending on or before the computation date for such rating period. Timely filing of reports

(b) To pay within two months or within such further time as the director may fix after the computation date for such rating period all contributions, excluding interest and penalties, shown to be due on reports filed with the director for periods ending on or before such computation date. Timely payment of taxes

(c) This section shall not apply in any case where the employer establishes to the satisfaction of the director that his failure to file or pay was not due to any intention to evade or avoid the provisions of this division. Application of section

984. Beginning on January 1, 1936, each worker shall contribute one-half of 1 percent of the wages paid to him by each employer with respect to employment; and beginning on January 1, 1937, nine-tenths of 1 percent of such wages and on and after January 1, 1938, and after his employer has satisfied the conditions set forth in this part with respect to becoming an employer, 1 percent of such wages; except that the rate of contributions required of a worker shall not in any year exceed 50 percent of the general rate required of employers. Employee contributions

985. Section 984 shall not apply to that part of remuneration which, after remuneration equal to three thousand dollars ($3,000) has been paid to an individual by an employer with respect to employment during any calendar year, is paid after December 31, 1939, and prior to January 1, 1947, to such individual by such employer with respect to employment during such calendar year; or that part of the remuneration which, after remuneration equal to three thousand dollars ($3,000) with respect to employment after 1939 has been paid to an individual by an employer during any calendar year after 1946, is paid to such individual by such employer during such calendar year. $3,000 limitation

986. Each employer shall, notwithstanding any provisions of law in this State to the contrary, withhold in trust the amount of his workers' contributions from their wages at the time the wages are paid, shall show the deduction on his pay roll records, shall furnish each worker with a statement in writing showing the amount which has been deducted, in such form and at such times as may be prescribed, and shall transmit all such contributions to the fund, in addition to his own contributions, pursuant to authorized regulations. Withheld in trust

987. Each employer shall be liable for any and all contributions required to be made by his workers on account of wages which he has paid to them regardless of whether or not he has deducted the contributions from the workers' wages at the time they were paid, but no employer shall be liable for worker contributions required on behalf of himself or of any of his employees with respect to wages paid while there is in effect at the Liability of employer

time the wages were paid a rule or regulation or interpretation of the director or of the department that such wages were not subject to such contributions.

Not subject to garnishment, etc

988. Contributions by workers, payable as provided in this article, shall be exempt from garnishment, attachment, execution or any other remedy for the collections of debts, and in the event of the insolvency or bankruptcy of an employer shall not be considered any part of his assets and shall be paid to the director prior to the payment of any other claim against the employer.

Publication of annual tax rates

989. The annual tax rate or contribution rate which under this division is determined to apply to any particular employee or any particular employer, or group of employees or group of employers, shall be made public and available for public inspection but in no case shall the amount of tax paid by any employee or employer, or group of employees or group of employers, be disclosed to the public.

Payments of less than one cent

990. In the payment of any contributions, a fractional part of a cent shall be disregarded unless it amounts to one-half cent ($0.005) or more, in which case it shall be increased to one cent ($0.01).

Erroneous payments to another state

991. Any contributions paid to the Unemployment Fund or Disability Fund with respect to wages on which contributions previously have been paid in error and without negligence on the part of the employing unit to another state having an unemployment compensation law shall be deemed for the purposes of this division to have been paid to this State at the time of the erroneous payment to the other state.

Permissive legislation for "100 percent offset"

992. During such times as the Federal Unemployment Tax Act is amended so that employers are allowed, against the tax imposed by Section 1600 of that act, credits amounting to 100 percent of such tax on account of contributions paid under this act, then the additional contributions provided for by Section 993 shall be required to be paid into the Unemployment Fund.

Same

993. Every employer who on each of some 20 days during a calendar year, each day being in a different calendar week, had in employment for some portion of the day, whether or not at the same moment of time, eight or more individuals shall, subject to Section 992, pay into the Unemployment Fund in addition to the amounts required by other provisions of this division an amount equal to three-tenths of 1 percent of all wages paid by him in employment during that calendar year and included in the measure of the contributions allowed as the credit against the tax imposed by Section 1600 of the Federal Unemployment Tax Act.

Same Contingent effect

994. Sections 992 and 993 shall not become operative unless the Federal Security Administrator certifies that they are in conformity with the provisions of Title III of the Social Security Act and Sections 1601, 1602, and 1603 of the Federal Unemployment Tax Act.

Article 4. Reserve Accounts

1025. The director shall keep separate records of the amounts paid into the fund by each employer in his own behalf, or chargeable to him as benefits; but nothing in this division shall be construed to grant any employer or his employees prior claims or rights to the amount contributed by him to the fund, either on his own account or on behalf of his employees. The amount of employer contributions shall be pooled and available to pay unemployment compensation benefits to any employee entitled thereto regardless of the source of contributions. Contribution payments pooled

1026. The director shall maintain a separate account for each employer, and shall credit his account with all the contributions paid on his own behalf. Unemployment compensation benefits paid to an unemployed individual during any benefit year shall be charged against the account of his employer during his base period, but if the individual performed services in employment for more than one employer during his base period, unemployment compensation benefits paid to him shall be charged against the respective accounts of such employers in the proportion that the total wages paid to the individual in employment for each employer bears to the total wages paid to the individual in employment for all employers during the base period. Separate reserve account for each employer

1027. The maximum amount of benefits chargeable against employers' accounts by reason of unemployment compensation benefits paid to any one individual for any one benefit year shall not be in excess of 18 times the weekly benefit amount of that individual for that benefit year. Maximum charge to reserve account

1028. The charge of unemployment compensation benefits to an employer's account required by Section 1026 shall be made in such manner as to include as of each computation date all unemployment compensation benefit payments made on or before the computation date Payments chargeable

1029. Whenever an employer ceases to pay wages in employment the account of the employer, unless it has been transferred under Article 5 of this chapter, shall be canceled on the records of the department after a period of three consecutive years has elapsed following the latest calendar quarter in which the employer paid wages in employment. Cancellation of inactive accounts

1030. Any employer who is entitled under Article 4 of Chapter 5 of this part to receive notice of the filing of a new or additional claim or notice of computation may, within 10 days after mailing of such notice, submit to the department any facts within its possession disclosing whether the claimant left such employer's employ voluntarily and without good cause or was discharged from such employment for misconduct connected with his work. The department shall consider such facts together with any information in its possession and promptly issue to the employer its ruling as to the cause of the termination of the claimant's employment. Appeals may be taken from Employer's right to notify department of cause of claimant's leaving Determination of cause Appeals

said rulings in the same manner as appeals from determinations on benefit claims.

Right to benefits not affected by determination

1031. No ruling made under Section 1030 may constitute a basis for the disqualification of any claimant but a determination by the department made under the provisions of Section 1328 may constitute a ruling under Section 1030.

Employer's reserve account not charged

1032. If it is ruled under Sections 1030 or 1328 that the claimant left the employer's employ voluntarily and without good cause or was discharged by reason of misconduct connected with his work, benefits paid to the claimant which are based upon wages paid by such employer prior to the date of the termination of employment, shall not be charged to the account of such employer unless he failed to furnish the information specified in Section 1030 within the time limit prescribed in that section.

Statement of reserve account and contribution rate

1033. The director shall not less frequently than once each year furnish each employer with an itemized statement of the charges to his account, and a statement of his account showing the credits and charges, the net balance of his reserve and his contribution rate for the applicable rating period.

Protest of charges

1034. The employer within 60 days after the date of mailing of any statement of charges or credits and charges to his account, or within an additional period not exceeding 60 days which may for good cause be granted by the director, may file with the director a written protest on any item shown thereon. The protest shall set forth the specific grounds on which it is made. No protest may be made on the ground that a claimant was ineligible for a benefit payment where the employer was notified as required by this division and any authorized regulation of the filing of a claim for such benefits or of a determination of the claimant's eligibility therefor and the employer failed to file a timely appeal on such benefit claim, or a final decision of a referee or of the Appeals Board affirmed the payment of such benefits. Except as to corrections made by the director as provided in Section 1036, the contribution rate and other items shown on any such statement of charges or statement of account shall be final unless a protest is filed within the time prescribed in this section.

Petition for review

1035. The director shall give notice to the employer of his action on a protest filed under Section 1034. Within 30 days of notice of disallowance of the protest the employer may file with the Appeals Board a petition for review of the protest. A decision of the Appeals Board in any such protest proceeding shall be subject to judicial review, as provided by law, if an appropriate proceeding is filed by the employer within 60 days of the date of mailing of the decision. The director may in writing extend for a period of not exceeding two years the time within which such proceeding may be instituted if written request for such extension is filed with the director within the 60-day period.

Correction of errors

1036. Prior to the expiration of the rating period to which a statement relates the director shall give notice to the employer

of the correction of any error which the director finds in any statement of account or statement of charges. If the correction increases the contribution rate the notice of correction shall be included in a notice of assessment of any applicable deficiency in contributions for the rating period and the procedures governing petitions for reassessment shall apply. If the correction reduces the contribution rate the notice of correction shall be included in a notice of the amount of any applicable overpayment of contributions paid for the rating period and the procedures governing claims for refund shall apply. Any other notice of correction shall be subject to protest and review in the same manner as in respect to an original statement of account or statement of charges.

Rate payable while protest pending

1037. If a protest involving the contribution rate is pending when any contribution to which such rate relates is due, the employer shall pay the contribution at the rate shown in the statement furnished by the director. Such a protest, however, shall constitute a claim for refund under Article 9 of this chapter, and if a final determination on the protest reduces the contribution rate the amount of overpayment shall be promptly credited or refunded as provided in that article.

Serving of notices

1038. Notices to be given employers under this article shall be served personally or by mail. If by mail the service shall be made pursuant to Section 1013 of the Code of Civil Procedure and shall be addressed to the employer at his address as it appears in the records of the department.

Article 5. Transfer of Reserve Accounts

Transfer of employer's reserve account

1051. Whenever any employing unit acquires the organization, trade, or business, or substantially all of the assets thereof, or a distinct and severable portion of such organization, trade, or business, of any employer, excepting any assets retained by the employer incident to the liquidation of his obligations (whether or not the acquiring employing unit was an "employing unit" within the meaning of Section 135 prior to such acquisition), and continues such organization, trade, or business, or such distinct and severable portion thereof without substantial reduction of personnel resulting from such acquisition, an application may be made within 90 days of such acquisition for transfer of reserve account. The application shall contain the name and address of the predecessor, the date of acquisition, the name of the successor, the number of employees prior to and subsequent to the date of acquisition, and, in case of severable portions, such pay roll data as may be required by the department to determine the proper amount to be transferred.

Application within 90 days of acquisition

Transfer to successor

1052. Upon receipt of the application the separate account, actual contribution and benefit experience and pay rolls of the predecessor or that part thereof, as determined by authorized regulations, which pertains to the organization, trade, or business, or portion thereof acquired, shall be transferred to the successor employer for the purpose of determining its rate of

contribution after such acquisition with the same effect for such purpose as if the operations of the predecessor had at all times been carried on by the successor. Such separate account shall be transferred by the director to the successor employer and, as of the date of the acquisition, shall become the separate account or part of the separate account, as the case may be, of the successor employer, and the benefits thereafter chargeable to the predecessor employer on account of employment relating to the transferred organization, trade, or business or transferred portion thereof prior to the date of the acquisition shall be charged to the separate account. This section shall not apply to any acquisition which is determined by the director to have been made solely or primarily for the purpose of obtaining a more favorable rate of contributions under Sections 978 or 979.

Application after 90-day period

1053. Sections 1051 and 1052 are applicable to applications for transfer of reserve accounts made after the 90-day period beginning with the date of acquisition but prior to the cancellation of the reserve account pursuant to Section 1029 if the reserve account has not been reacquired by the predecessor on re-entering business or, in the case of distinct and severable portions, if the predecessor did not continue in business, but any amendment of the contribution rate shall be made as of the first day of the calendar quarter next succeeding the date of the application.

Reports in lieu of application

1054. The provisions of this article requiring a specific application for transfer of reserve account shall not apply to any successor who through error or inadvertence continued to file contribution reports and pay contributions for the account and at the rate determined by the department to apply to the predecessor employer, but such reporting and payment shall be deemed to be in lieu of the application and shall be given the same effect as though a specific application had been filed during the 90-day period beginning with the date of acquisition.

Petition for hearing

1055. In event of a denial of an application for transfer of reserve account, any interested party may petition for hearing before the Appeals Board and the decision of the Appeals Board, after affording the parties reasonable opportunity for fair hearing, shall be final. Within 60 days after the mailing of the notice of that decision any interested party may bring an action against the director with respect to that decision to require the transfer of the reserve account as required by law. The director, in writing, at any time prior to the expiration of said 60-day period may extend the time during which such action may be instituted for a period not exceeding two years from the date of mailing of the decision of the Appeals Board.

Regulations to joint accounts

1056. The director may prescribe regulations for the establishment, maintenance, and dissolution of joint accounts by two or more employers and shall, in accordance with such regulations, upon application by two or more employers to establish such account or to merge their several individual accounts in

a joint account, maintain such joint account, as if it constituted a single employer's account.

Transfer of joint venture accounts

1057. Upon dissolution of a joint venture each participating employer may within 90 days apply for the transfer of his proportionate share of the reserve account. Upon receipt of the application the separate account, actual contribution and benefit experience and pay rolls of such joint venture shall be apportioned among the employers making such application in the same proportion that assets are distributed among the participating employers, and the portion thereof of each shall be transferred to each such employer for the purpose of determining its rate of contribution after the dissolution with the same effect for such purpose as if the applicable portion of the operations of such joint venture had at all times been carried on by such employer. Such portion of such separate account shall be transferred by the director to each such employer and as of the date of such dissolution shall become the separate account or part of the separate account, as the case may be, of such employer. The benefits thereafter chargeable to such joint venture on account of employment relating to such joint venture prior to the date of such dissolution shall be charged to the separate accounts of such employers in proportion to their participation in the joint venture. Any such joint venture shall promptly notify the director of its dissolution.

As used in this section only, "employer" includes the successor of an employer and any subsequent successor employer or employers.

Definitions

1058. As used in this article the term "joint venture" means a separate employing unit which has been organized by two or more employers to accomplish a contract or project or series of contracts or projects and which is wholly owned by such employers As used in this section only, "employer" means any individual or type of organization, including any partnership, joint venture, association, trust, estate, joint stock company, insurance company, corporation whether domestic or foreign, and the receiver, trustee in bankruptcy, trustee or successor thereof, and the legal representative of a deceased person.

The provisions of Sections 1057 and 1058 shall apply to dissolutions occurring prior as well as subsequent to the effective date of Section 41 5 of the Unemployment Insurance Act as amended in the 1953 Regular Session of the Legislature; provided, that notice of any such prior dissolution shall have been given to the commission within 120 days after the effective date of Section 41.5 of the Unemployment Insurance Act as amended in the 1953 Regular Session of the Legislature, but any transfer in respect to any such prior dissolution shall not affect any rate of contribution for any period prior to January 1, 1954.

(Amended by Stats 1953, Ch. 1394.)

[ORIGINAL SECTION]

1059. The provisions of Sections 1057 and 1058 shall apply to dissolutions occurring prior as well as subsequent to September 22, 1951, if notice of any such prior dissolution is given to the director on or before January 21, 1952, but any transfer in respect to any such prior dissolution shall not affect any rate of contribution for any period prior to January 1, 1952.

Changes in contribution rate

1060. A change in contribution rate caused by a transfer under this article of all or a portion of the separate account, actual contribution and benefit experience and pay rolls shall not become effective earlier than the beginning of the calendar quarter next succeeding the effective date of the transfer.

Article 6. Records, Reports and Contribution Payments

Pay roll records required

1085. Every employing unit shall keep a true and accurate work record of:

(a) All his workers.

(b) The wages paid by him to each worker.

(c) Such other information as the director deems necessary to proper administration of this division.

Registration as employer

1086. Each employing unit within 15 days after becoming an employer as defined in this part shall register with the department on a form prescribed by the department

Registration by Board of Equalization

1087. Any officer or employee of the Sales and Use Tax Division of the Board of Equalization who is authorized to accept an application for a seller's permit under Section 6066 of the Revenue and Taxation Code or authorized to register a retailer under Section 6226 of the Revenue and Taxation Code is a duly authorized agent of the Department of Employment for purposes of accepting registration of employers as required in this part.

The department shall reimburse the Board of Equalization for any additional costs incurred by reason of services by any of its officers or employees to the department pursuant to this section.

Contribution return and report of wages

1088. Each employer shall file with the director within the time required for payment of contributions, a return and a report of wages of his workers in such form and containing such information as the director prescribes.

Information regarding claims given workers by employers

1089. Each employer shall post and maintain in places readily accessible to individuals in his service such printed statements concerning benefit rights and other matters as may be prescribed by authorized regulations. Each employer shall, pursuant to authorized regulations, supply each individual at the time he becomes unemployed with copies of printed statements or materials relating to claims for benefits. Such printed statements shall be supplied by the director to each employer without cost to him.

Notice by representative of insolvent or deceased employing unit

1090. Every assignee, receiver, trustee in bankruptcy, or other representative of an insolvent employing unit, and every

administrator or executor of the estate of a deceased employing unit, shall within 30 days after assuming office send notice in writing of the name and address of the employing unit, his own name and address, and such other information as may be required by the director.

Final returns required of corporations terminating business

1091. Every domestic corporation within 10 days of its quitting business or commencing of proceedings to wind up its affairs and voluntarily dissolve, in accordance with the provisions of Sections 4600 to 4603, inclusive, of the Corporations Code, and every foreign corporation within 10 days of its surrendering its right to engage in business in the State of California, in accordance with the provisions of Sections 6700 and 6701 of the Corporations Code, shall submit to the department a final return setting forth in detail its contribution liability, if any, theretofore unreported.

Such records shall be open to inspection and shall be subject to being copied by the director or his authorized representative at any time during the business hours of the employing unit. Any claimant or his authorized representative at a hearing before a deputy or referee or the Appeals Board shall be supplied with information from such records to the extent necessary for the proper presentation of his claim.

Presumption of eligibility in absence of records

1093 In the event any employer shall fail to keep and furnish to the director, upon notice, any required records or reports necessary for a full determination, decision on appeal, or other proper disposition of any claim for benefits in any proceeding under this division, within such reasonable time as the director may by rule, regulation, or procedure prescribe, it shall be conclusively presumed that the claimant is entitled to the maximum total amount of benefits payable under this division unless it is established by other evidence which the director deems sufficient that a lesser total amount of benefits is properly due and owing to the claimant. If so established by other evidence upon default of the employer, after notice, such lesser total amount of benefits thus determined shall be conclusive. In all cases in which such presumptions shall apply, if the claimant has earned wages in employment for more than one employer during his base period, the accounts of the employer or employers who have properly kept and furnished the required records or reports shall not be charged with benefits in an amount exceeding that which such accounts would have been charged had the claimant been entitled only to benefits determined by the total of the wages earned and the number of calendar quarters worked for them and all benefits paid in excess thereof shall be charged solely against the accounts of the employer or employers who have failed to keep or furnish the required records or reports.

Charges to employers' accounts

Use of information furnished department

1094. Except as otherwise specifically provided in this division the information furnished to the director by an employing unit, pursuant to this division, shall be for the exclusive use

and information of the director in discharge of his duties and shall not be open to the public, nor admissible in evidence in any action or special proceeding, other than one arising out of the provisions of this division. Such information may be tabulated and published in statistical form for the use and information of state departments and the public, except that the name of the employing unit or of any worker shall never be divulged in the course of such tabulation or publication.

(c) To furnish an employer or his authorized agent with information to enable him to fully discharge his obligations or safeguard his rights under this division.

(d) To enable an employer to receive a reduction in contribution rate.

Reporting through agent

1096. Where a number of workers are normally employed in employment in the course of a year by several employers, such employers, with the approval of the director, may appoint an agent. The agent may maintain records and prepare and file returns and reports required under this division with respect to such workers, including returns and reports of wages paid to the workers, and may pay the employers' and workers' contributions levied under this division with respect to wages paid to such workers and perform such other acts on behalf of such employers as the director may authorize all in the same manner as though the agent were the employer of the workers

Same

1097. The manner of crediting to each employer the employment experience of the group of employers who have appointed an agent pursuant to Section 1096, for the purpose of any classification of employers made pursuant to this division for the determinations of future rates of employers' contributions, may be prescribed by authorized regulations. Employers who operate or do business in more than one place may, with the approval of the director, appoint a separate agent in each such place.

Same

1098. Nothing contained in Sections 1096 or 1097 shall be construed to make the agent the employer of the workers, or relieve any employer of his obligations to comply with this division, except to the extent that his obligations are discharged by the agent.

Article 7. Payment of Reported Contributions

Any employer to whom an extension is granted and who pays the amount required within the period for which the extension is granted shall pay, in addition to the contributions, interest at the rate of 3 percent per annum from the date on which the payment would have been delinquent without the extension until the date of payment. No penalty charged against an employer with respect to any calendar quarter under this section shall be less than four dollars ($4) or in excess of two hundred fifty dollars ($250). The specific written demand required by this section may be served either personally or by mail, addressed to the employing unit at the same address that appears on the records of the department. Service is complete at the time of deposit in the United States mail. Penalty for unreported wage items

1115. If the director finds that the collection of any contributions imposed under this division will be jeopardized in any case where an employing unit is insolvent, or is delinquent in a substantial amount of contributions due under this division, or has discontinued or is about to discontinue business at any of its known places of business, or the business is of a temporary or seasonal nature, the director may require returns or payment of contributions, or reports of wages of workers, for periods less than calendar quarters. Returns when jeopardy exists

Article 8. Assessments

1126. If any employing unit fails to make a return as required under this division the director shall make an estimate based upon any information in his possession or that may come into his possession of the amount of wages paid for employment in the period or periods for which no return was filed and upon the basis of such estimate shall compute and assess the amounts Assessment and penalty for failure to make returns

If any part of the deficiency is due to negligence or intentional disregard of this division or authorized regulations, a penalty of 10 percent of the amount of the deficiency shall be added to the assessment

Penalty for fraud

1128. If the failure of the employing unit to file a return within the time required by this division and authorized regulations or if any part of the deficiency for which an assessment is made is due to fraud or an intent to evade this division or authorized regulations, a penalty of 25 percent of the amount of contributions assessed shall be added to the assessment.

Interest

1129. The amount of each assessment, exclusive of penalty, shall bear interest at the rate of one-half percent per month or fraction thereof from and after the last day of the month following the close of the calendar quarter for which the contributions should have been returned until the date of payment.

Offsets

1130. One or more assessments may be made for the amount due for one or for more than one period and overpayments may be offset against underpayments.

1132. Except in the case of failure without good cause to file a return, fraud or intent to evade any provision of this division or authorized regulations, every notice of assessment shall be made within three years after the last day of the month following the close of the calendar quarter during which the contribution liability included in the assessment accrued or within three years after the deficient return is filed, whichever period expires the later. An employing unit may waive this limitation period or may consent to its extension.

Petition for reassessment

1133 Any employing unit against whom an assessment is made under Sections 1126 or 1127 or any person directly interested in such assessment may petition for reassessment within 30 days after service of notice of the assessment. An additional 30 days for the filing of a petition may for good cause be granted by the Appeals Board. If a petition for reassessment is not filed

within the 30-day period, or within the additional period granted by the Appeals Board, the assessment becomes final at the expiration of the period.

Hearing by Appeals Board

1134. If a petition for reassessment is filed within the time prescribed, the Appeals Board shall review the assessment and if requested by the petitioner shall, unless a hearing has previously been afforded petitioner on the same grounds as set forth in the petition, grant a hearing before the Appeals Board or its duly authorized representatives, giving 10 days' notice of the time and place of the hearing. The Appeals Board may decrease or increase the amount of the assessment but the amount may be increased only if a 10-day notice of the increase is given by the Appeals Board with opportunity for hearing before the Appeals Board with respect to such increase. The order or decision of the Appeals Board upon the petition for reassessment and the assessment becomes final 30 days after service upon the petitioner of notice of the order or decision. 1136. The director may cancel any assessment or portion thereof which he finds to have been erroneously made, but an assessment which has become final may be canceled only upon the approval of the Appeals Board.

Jeopardy assessment

1137. If the director finds that the collection of any contributions will be jeopardized by delay he shall thereupon make an assessment of such contributions, noting upon the assessment that it is a jeopardy assessment levied under this section The amount of such assessment shall be immediately due and payable, whether or not the time otherwise allowed by law, or authorized regulations has expired. If the amount of contribution, interest and penalty specified in the jeopardy assessment is not paid within 15 days after the service upon the employer of notice of the assesment, it is final unless a petition for reassessment is filed with the Appeals Board within that time. The penalties and interest provided in Sections 1127, 1128, 1129 and 1135 in respect to assessments shall attach to the amount of the contributions specified therein.

do so to recover any contributions, interest or penalty due. Notice of the sale may be served upon the person who deposited the securities personally or by mail. If service is by mail it shall be made in the manner prescribed by Section 1013 of the Code of Civil Procedure and addressed to the person at his address as it appears in the records of the department. Article 9. Refunds and Overpayments

Refunds of excess employee contributions

1176. If, by reason of an employee receiving wages from more than one employer during any calendar year after the calendar year 1946, the wages received by him during such year exceed three thousand dollars ($3,000), and the sum of the amount of tax imposed by Section 984 plus the amount of any contributions under Section 3260 deducted from such wages exceeds thirty dollars ($30), the employee is entitled to a refund of the amount of the excess. Refunds under this section shall be made by the director from the Disability Fund if, within six months after the calendar year in which the excess wages are received, the employee makes a claim establishing his right to the refund. No interest shall be allowed or paid with respect to such refund. The director shall in accordance with authorized regulations determine the portion of the aggregate amount of such refunds made during any calendar year which is applicable to voluntary plans for which deductions were made under Section 3260, such determination to be based upon the relation during the preceding calendar year of the amount of wages subject to contributions to the Disability Fund to the amount of wages exempt from contributions to the Disability Fund under Section 3252. The director shall in accordance with authorized regulations prorate such aggregate amount among the applicable voluntary plans and shall assess and recover from the employer, or the insurer if the insurer has indemnified the employer with respect thereto, the amount so prorated. The provisions of Section 3265 in respect to assessment and recovery of amounts paid by the Disability Fund shall apply to the assessments under this section.

Apportionment of refund

Credit or refund of overpayments

1177. If the director determines that any amount of contributions, penalty or interest has been erroneously or illegally collected he shall set forth on the records of the department the amount collected in excess of the amount legally due and the name of the employing unit or other person by whom it was paid and shall if a claim has not already been filed give notice to such employing unit or other person of such amount. The

excess amount shall be credited on any amounts then due from or accrued against the employing unit and the balance shall be refunded to the employing unit or its successor, administrators or executors.

1178. No refund or credit shall be allowed unless:

(a) A claim therefor is filed with the director within three years from the last day of the calendar month following the close of the calendar quarter for which the overpayment was made or within six months after assessments made under Article 8 of this chapter become final or within 60 days from the date of overpayment, whichever period expires the later, but prior to the expiration of such periods the director may allow credits on his own initiative even though no claim is filed. Time for filing claim

(b) The employing unit conforms, within one year after the allowance of credit or approval of the claim for refund, to authorized regulations with respect to the refund to workers entitled thereto of any money deducted by the employing unit under Section 984. Wage earner refunds

1179. Every claim for refund shall be in writing and shall state the specific grounds upon which the claim is founded. Failure to file a claim with the director or after denial thereof by the director, to file a petition for review with the Appeals Board within the time prescribed by Sections 1178 and 1180 constitutes a waiver of any demand against the State or the director on account of overpayment. Contents of claim

1180. The director shall give notice to the claimant whenever he disallows any claim for refund in whole or in part, notice to be served in the manner prescribed for service of notice of assessments under Section 1131. Notice of disallowance

Within 30 days of notice of disallowance, the claimant may file with the Appeals Board a petition for review of the claim. If the petition is filed within the time prescribed the Appeals Board shall review the claim and, if requested by the claimant, shall grant a hearing before the board or its authorized representative, giving 10 days' notice of the time and place of the hearing. A hearing is not required on such petition if a prior hearing has been afforded claimant involving the same issues, but regardless of any prior proceedings, if the claimant files an affidavit setting forth new and additional evidence in support of his claim, the Appeals Board may grant an additional hearing under this section. Petition for review Hearing

1181. Interest shall be allowed and paid only to the extent that interest and penalties collected under this division are available therefor upon any overpayment of contributions at the rate of 6 percent per annum from the date of overpayment to the date of the allowance of the refund or credit, but no interest shall be allowed if the director determines that any overpayment was made intentionally or by reason of negligence on the part of the employing unit. Interest

1182. No suit or proceeding shall be maintained in any court for the recovery of any amount of contributions, interest or penalties alleged to have been erroneously or illegally Action to recover contributions paid

assessed or collected unless a claim for refund or credit has been filed pursuant to this article. Within 90 days after the mailing of the notice of the action by the Appeals Board upon such claim, the claimant may bring an action against the director on the grounds set forth in the claim in a court of competent jurisdiction in the County of Sacramento for the recovery of the whole or any part of the amount with respect to which the claim has been disallowed. The director may in writing extend for a period of not exceeding two years the time within which such action may be instituted if written request for such extension is filed with the director within the 90-day period. Failure to bring action within the time specified constitutes a waiver of any demand against the State on account of alleged overpayments. If the director fails within 60 days to mail notice of an action on a claim after the claim is filed the claimant may consider the claim denied and file a petition for review of the denial with the Appeals Board as set forth in this article. If the Appeals Board fails to mail notice of action on any petition for review within 90 days after such petition is filed with the Appeals Board the claimant may consider the claim disallowed and may bring an action against the director as provided herein.

Judgment

1183. If in any action authorized by Section 1182 judgment is rendered for the plaintiff, the amount of the judgment shall first be credited on any contributions, interest and penalties due from the plaintiff under this division, and the balance of the judgment shall be refunded to the plaintiff. In any such judgment, interest shall be allowed and paid only to the extent that interest and penalties collected under this division are available therefor, at the rate of 6 percent per annum upon the amount of contributions found to have been illegally collected from the date of payment of the contributions to the date of the judgment.

Interest

Recovery of erroneous refunds

1184. If any refund or portion thereof is erroneously made, the director shall assess such amount to the employing unit or other person to whom the refund was made, together with any interest paid thereon, but no assessment shall be made with respect to any amount of wage-earner contributions which the employer has refunded to his employees. The amount of the assessment shall bear interest at the rate of 6 percent per annum commencing 30 days after the service of notice of such assessment, if not paid within such period, until the date of repayment. The director shall give the employing unit against whom the assessment is made a written notice of the assessment in accordance with the provisions of Section 1131. Such notice must be given within three years from the date the refund was made unless the employing unit waives this limitation period or consents to its extension. Sections 1133, 1134, 1135 and 1136 shall be applicable to assessments made under this section. The director shall collect the amount of any assessment made under this section in the same manner that other assessments are collected.

CHAPTER 5. UNEMPLOYMENT COMPENSATION BENEFITS

Article 1. Eligibility and Disqualifications
(Amended by Stats. 1953, Ch. 1294)

[ORIGINAL HEADING]
Article 1. Eligibility

1251. Unemployment compensation benefits are payable from the Unemployment Fund to unemployed individuals who are eligible under this part. Unemployment compensation benefits

1252. An individual is "unemployed" in any week during which he performs no services and with respect to which no wages are payable to him, or in any week of less than full-time work if the wages payable to him with respect to that week are less than his weekly benefit amount. Authorized regulations shall be prescribed making such distinctions as may be necessary in the procedures applicable to unemployed individuals as to total unemployment, part-total employment, partial unemployment of individuals attached to their regular jobs, and other forms of short-time work. For the purpose of this section only the term "wages" includes any and all compensation for personal services whether performed as an employee or as an independent contractor. "Unemployed" defined

1253. An unemployed individual is eligible to receive unemployment compensation benefits with respect to any week only if the director finds that: Eligibility for benefits

(a) A claim for benefits with respect to that week has been made in accordance with authorized regulations.

(b) He has registered for work, and thereafter continued to report, at a public employment office or such other place as the director may approve. Either or both of the requirements of this subdivision may be waived or altered by authorized regulation as to partially employed individuals attached to regular jobs.

(c) He was able to work and available for work for that week, and had made such effort to seek work on his own behalf as may be required in accordance with such regulations as the director shall prescribe.

(d) He has been unemployed for a waiting period of one week as defined in Section 1254.

(Amended by Stats. 1953, Ch. 1289.)

[ORIGINAL SECTION]

1253. An unemployed individual is eligible to receive unemployment compensation benefits with respect to any week only if the director finds that:

(a) A claim for benefits with respect to that week has been made in accordance with authorized regulations.

(b) He has registered for work, and thereafter continued to report, at a public employment office or such other place as the director may approve. Either or both of the requirements of this subdivision may be waived or altered by authorized regulation as to partially employed individuals attached to regular jobs.

(c) He was able to work and available for work for that week.

(d) He has been unemployed for a waiting period of one week as defined in Section 1254.

(e) He has made such effort to seek work on his own behalf as may be required by authorized regulations.

Waiting period week

1254. No week shall be counted as a week of unemployment under subdivision (d) of Section 1253:

(a) Unless it occurs within the benefit year which includes the week with respect to which he claims payment of unemployment compensation benefits, but this requirement shall not interrupt the payment of such benefits for consecutive weeks of unemployment. The week immediately preceding a benefit year, if part of one uninterrupted period of unemployment which continues into that benefit year shall be deemed, for the purposes of this section only, to be within such benefit year as well as within the preceding benefit year.

(b) If unemployment compensation benefits have been paid with respect to that week.

(c) Unless the individual was eligible for unemployment compensation benefits with respect thereto in all respects, except for the requirements of subdivision (d) of Section 1253 and Section 1281.

Ineligibility due to receipt of other benefits

1255. An individual is not eligible for unemployment compensation benefits on account of unemployment for any week or part of any week with respect to which he has received or is seeking unemployment benefits under an unemployment compensation law of any other state or of the United States. If the appropriate agency of the other state or of the United States finally determines that he is not entitled to unemployment compensation benefits, this section shall not apply.

Disqualification

1256. An individual is disqualified for unemployment compensation benefits if the director finds that he left his most recent work voluntarily without good cause or that he has been discharged for misconduct connected with his most recent work.

An individual is presumed to have been discharged for reasons other than misconduct in connection with his work and not to have voluntarily left his work without good cause unless his employer has given written notice to the contrary to the director within five days after the termination of service, setting forth facts sufficient to overcome the presumption. If the employer files such notice, the question shall immediately be determined in the same manner as benefit claims.

(Added by Stats. 1953, Ch. 1294.)

Same

1257. An individual is also disqualified for unemployment compensation benefits if:

(a) He wilfully made a false statement or representation or wilfully failed to report a material fact to obtain any unemployment compensation benefits under this division.

(b) He, without good cause, refused to accept suitable employment when offered to him, or failed to apply for suitable employment when notified by a public employment office.

(Added by Stats. 1953, Ch. 1294.)

1258. "Suitable employment" means work in the individual's usual occupation or for which he is reasonably fitted, regardless of whether or not it is subject to this division. "Suitable employment"

In determining whether the work is work for which the individual is reasonably fitted, the director shall consider the degree of risk involved to his health, safety, and morals, his physical fitness and prior training, his experience and prior earnings, his length of unemployment and prospects for securing local work in his customary occupation, and the distance of the available work from his residence. Any work offered under such conditions is suitable if it gives to the individual wages at least equal to his weekly benefit amount for total unemployment.

In any particular case in which the director finds it impracticable to apply one of the foregoing standards he may apply any standard which is reasonably calculated to determine what is suitable employment.

(Added by Stats. 1953, Ch. 1294.)

1259. Notwithstanding any other provisions of this division, no work or employment shall be deemed suitable and benefits shall not be denied to any otherwise eligible and qualified individual for refusing new work under any of the following conditions: Where benefits not denied

(a) If the position offered is vacant due directly to a strike, lockout, or other labor dispute.

(b) If the wages, hours, or other conditions of the work offered are substantially less favorable to the individual than those prevailing for similar work in the locality.

(c) If, as a condition of being employed, the individual would be required to join a company union or to resign from or refrain from joining any bona fide labor organization.

(Added by Stats. 1953, Ch. 1294.)

1260. If an individual is disqualified under Section 1256 or 1257, under a determination transmitted to him by the department, he is ineligible to receive unemployment compensation benefits for the week subsequent to the occurrence of the cause of his disqualification in which he first registers for work and for not more than four weeks which immediately follow that week. An individual so disqualified shall be required to report at a public employment office as provided in subdivision (b) of Section 1253 and an additional week of disqualification shall be imposed for each week during which he does not so report unless good cause for such failure is shown. Period of disqualification

(Added by Stats. 1953, Ch. 1294.)

1261. When successive disqualifications under Sections 1256 or 1257 occur, the director may extend the period of ineligibility provided for in Section 1260 for an additional period not to exceed eight additional weeks. Successive disqualifications

(Added by Stats. 1953, Ch. 1294.)

1262. An individual is not eligible for unemployment compensation benefits, and no such benefit shall be payable to him, if he left his work because of a trade dispute. Such individual shall remain ineligible for the period during which he continues Trade dispute

out of work by reason of the fact that the trade dispute is still in active progress in the establishment in which he was employed.

(Added by Stats 1953, Ch. 1294.)

Fraud conviction cancels wage credits

1263 Any individual convicted under Section 2101 by any court of competent jurisdiction of wilfully making a false statement or knowingly failing to disclose a material fact to obtain or increase any benefit or payment under this division shall forfeit any rights to benefits after such conviction based upon any wages paid to him in the calendar quarter in which the offense occurred and in all prior calendar quarters.

(Added by Stats 1953, Ch. 1294.)

Article 2. Computation (Amount and Duration)

"Base period"

1275. Unemployment compensation benefit award computations shall be based on wages paid in the base period. "Base period" means: for benefit years beginning in November, December, or January, the four calendar quarters ended in the next preceding month of June; for benefit years beginning in February, March, or April, the four calendar quarters ended in the next preceding month of September; for benefit years beginning in May, June, or July, the four calendar quarters ended in the next preceding month of December; for benefit years beginning in August, September, or October, the four calendar quarters ended with the next preceding month of March. Wages used in the determination of benefits payable to an individual during any benefit year shall not be used in determining such individual's benefits in any subsequent benefit year.

"Benefit year"

1276. "Benefit year," with respect to any individual, means the one-year period beginning with the first day of the week with respect to which the individual first files a valid claim for benefits and thereafter the one-year period beginning with the day on which such individual again files a valid claim after the termination of his last preceding benefit year. As used in this section, "valid claim" means any claim for benefits made in accordance with the provisions of this division and authorized regulations if the individual filing the claim is unemployed and has been paid not less than the minimum amount of wages in employment for employers necessary to qualify for benefits.

Requirement for using lag period wages

1277. Wages paid prior to the filing of a valid claim and not used in the computation of the award may be used for the purpose of computing the amount of any other award only if within the 12-month period following the date of the filing of the valid claim the individual was paid sufficient wages to meet the eligibility requirements of Section 1281. This section is not applicable to the computation of an award for disability benefits but the establishment of a valid claim for disability benefits shall not constitute a valid claim for unemployment compensation benefits unless the claimant has sufficient wages to entitle the claimant to an award under this section.

Disability claims not affected

1278. For the purposes of this chapter, wages shall be counted as "wages for employment for employers" for benefit purposes with respect to any benefit year only if the benefit year begins subsequent to the date on which the employer from whom the wages were earned has satisfied the conditions of this division with respect to being an employer. "Wages for employment for employers"

1279. Each individual eligible under this chapter who is unemployed in any week shall be paid with respect to that week an unemployment compensation benefit in an amount equal to his weekly benefit amount less the amount of wages in excess of three dollars ($3) payable to him for services rendered during that week. The benefit payment, if not a multiple of one dollar ($1), shall be computed to the next higher multiple of one dollar ($1). For the purpose of this section only "wages" includes any and all compensation for personal services whether performed as an employee or as an independent contractor. Benefits during partial employment

1280. An individual's "weekly benefit amount" is the amount appearing in Column B in the following table opposite that wage bracket in Column A which contains the amount of wages paid to the individual for employment by employers during the quarter of his base period in which his wages were the highest. "Weekly benefit amount"

1281. (a) An individual cannot establish a valid claim or a benefit year during which any benefits are payable unless he has during his base year been paid wages for employment by employers of not less than three hundred dollars ($300). If more than 75 percent of his base-period wages were paid during a single calendar quarter, he is not eligible for unemployment compensation benefits unless his total wages during the base period are not less than 30 times his weekly benefit amount. (Article 3 repealed by Stats. 1953, Ch. 1294)

[ORIGINAL ARTICLE]

Article 3. Disqualifications

1301. An individual is disqualified for unemployment compensation benefits if the director finds that he left his most recent work voluntarily without good cause or that he has been discharged for misconduct connected with his most recent work.

An individual is presumed to have been discharged for reasons other than misconduct in connection with his work and not to have voluntarily left his work without good cause unless his employer has given written notice to the contrary to the director within five days after the termination of service, setting forth facts sufficient to overcome the presumption. If the employer files such notice, the question shall immediately be determined in the same manner as benefit claims

1302. An individual is also disqualified for unemployment compensation benefits if:

(a) He wilfully made a false statement or representation or wilfully failed to report a material fact to obtain any unemployment compensation benefits under this division.

(b) He, without good cause, refused to accept suitable employment when offered to him, or failed to apply for suitable employment when notified by a public employment office.

1303. "Suitable employment" means work in the individual's usual occupation or for which he is reasonably fitted, regardless of whether or not it is subject to this division.

In determining whether the work is work for which the individual is reasonably fitted, the director shall consider the degree of risk involved to his health, safety, and morals, his physical fitness and prior training, his experience and prior earnings, his length of unemployment and prospects for securing local work in his customary occupation, and the distance of the available work from his residence. Any work offered under such conditions is suitable if it gives to the individual wages at least equal to his weekly benefit amount for total unemployment.

In any particular case in which the director finds it impracticable to apply one of the foregoing standards he may apply any standard which is reasonably calculated to determine what is suitable employment.

1304. Notwithstanding any other provisions of this division, no work or employment shall be deemed suitable and benefits shall not be denied to any otherwise eligible and qualified individual for refusing new work under any of the following conditions:

(a) If the position offered is vacant due directly to a strike, lockout, or other labor dispute.

(b) If the wages, hours, or other conditions of the work offered are substantially less favorable to the individual than those prevailing for similar work in the locality.

(c) If, as a condition of being employed, the individual would be required to join a company union or to resign from or refrain from joining any bona fide labor organization.

1305. If an individual is disqualified under Section 1301 or 1302, under a determination transmitted to him by the department, he is ineligible to receive unemployment compensation benefits for the week subsequent to the occurrence of the cause of his disqualification in which he first registers

for work and for not more than four weeks which immediately follow that week An individual so disqualified shall be required to report at a public employment office as provided in subdivision (b) of Section 1253 and an additional week of disqualification shall be imposed for each week during which he does not so report unless good cause for such failure is shown.

1306. When successive disqualifications under Sections 1301 or 1302 occur, the director may extend the period of ineligibility provided for in Section 1305 for an additional period not to exceed eight additional weeks.

1307. An individual is not eligible for unemployment compensation benefits, and no such benefit shall be payable to him, if he left his work because of a trade dispute Such individual shall remain ineligible for the period during which he continues out of work by reason of the fact that the trade dispute is still in active progress in the establishment in which he was employed.

1308. Any individual convicted under Section 2101 by any court of competent jurisdiction of wilfully making a false statement or knowingly failing to disclose a material fact to obtain or increase any benefit or payment under this division shall forfeit any rights to benefits after such conviction based upon any wages paid to him in the calendar quarter in which the offense occurred and in all prior calendar quarters.

Employee leaving to be married, etc

1309. Notwithstanding any other provision of this division, an employee who leaves his or her employment to be married or to accompany his or her spouse to or join her or him at a place from which it is impractical to commute to such employment or whose marital or domestic duties cause him or her to resign from his or her employment shall not be eligible for unemployment insurance benefits for the duration of the ensuing period of unemployment and until he or she has secured bona fide employment subsequent to the date of such voluntary leaving; provided that, notwithstanding any other provision of this division, this section shall apply only to claims for unemployment compensation benefits and shall not apply to claims for unemployment compensation disability benefits. The provisions of this section shall not be applicable if the individual at the time of such voluntary leaving was and at the time of filing a claim for benefits is the sole or major support of his or her family.

Article 3. Filing, Determination, and Payment of Unemployment Compensation Benefit Claims

(Amended by Stats 1953, Ch. 1294)

[ORIGINAL HEADING]

Article 4. Filing, Determination, and Payment of Unemployment Compensation Benefit Claims

Filing benefit claims

1326. Claims for unemployment compensation benefits shall be made in accordance with authorized regulations. Except as otherwise provided in this article, benefits shall be promptly paid if the claimant is found eligible or promptly denied if the claimant is found ineligible.

Notice of claim filed

1327. A notice of the filing of a new or additional claim shall be given to the employing unit by which the claimant was last employed immediately preceding the filing of such claim, and the employing unit so notified shall submit within 10 days after

the mailing of such notice any facts then known which may affect the claimant's eligibility for benefits.

Determination of eligibility

1328. The facts submitted by an employer pursuant to Section 1327 shall be considered and a determination made as to the claimant's eligibility for benefits. The claimant and any employer who prior to the determination has submitted any facts or given any notice pursuant to Section 1327 and authorized regulations shall be promptly notified of the determination and the reasons therefor and may appeal therefrom to a referee within 10 days from mailing or personal service of notice of the determination. The 10-day period may be extended for good cause.

Computation of benefit amount

1329. Upon the filing of a new claim for benefits, a computation on the claim shall promptly be made, which shall set forth the maximum amount of benefits potentially payable during the benefit year and the weekly benefit amount. The claimant and each of the claimant's base period employers shall be promptly notified of the computation.

Protest of computation

1330. Upon the receipt of notice of the computation, the claimant and any base period employer so notified may protest the accuracy of the computation. Any such protest shall be considered and a determination made as to the accuracy of the computation. The claimant and the base period employer submitting the protest shall be promptly notified of the determination and may appeal therefrom in the manner prescribed in Section 1328.

Submission of facts by base period employer

1331. Upon the receipt of notice of the computation, any base period employer so notified shall submit any facts then known which he was not previously required to submit under Section 1327 which may affect the claimant's eligibility for benefits. A determination shall be made thereon and the claimant and the base period employer submitting the facts shall be promptly notified of the determination and the reasons therefor. An appeal may be taken in the manner prescribed in Section 1328.

Reconsideration of computation or determination

1332. Any computation or determination provided for in this article may for good cause be reconsidered by the department prior to the filing of an appeal therefrom. Notice of any reconsidered determination shall be given promptly to the claimant and any employer or employing unit which received notice under Sections 1327 and 1329, and the claimant or employer may appeal therefrom in the manner provided in this article for appeals from other determinations.

Regulations on notices and protests

1333. Notices, protests, and information required under this article shall be submitted in accordance with authorized regulations.

Hearing and decision by referee

1334. A referee after affording a reasonable opportunity for fair hearing, shall, unless such appeal is withdrawn, affirm, reverse, or modify any determination which is appealed under this article. The claimant and any employer becoming a party to the appeal by submitting a protest or information pursuant to Sections 1326 to 1333, inclusive, of this article shall be promptly notified in writing of the referee's decision, together

with his reasons therefor. The decision shall be final unless, within 10 days after mailing of such decision, further appeal is initiated to the Appeals Board pursuant to Section 1336. The 10-day limitation may be extended for good cause.

Payment pending appeal

1335. If an appeal is filed, benefits with respect to the period prior to the final decision on the appeal shall be paid only after such decision, except that:

(a) If benefits for any week are payable in accordance with a determination by the department irrespective of any decision on the issues set forth in the appeal, such benefits shall be promptly paid regardless of such appeal, or

(b) If a referee affirms a determination allowing benefits, such benefits shall be paid regardless of any appeal which may thereafter be taken, and regardless of any action taken under Section 1336 or otherwise by the director, Appeals Board, or other administrative body or by any court.

If such determination is finally reversed, no employer's account shall be charged with benefits paid because of that determination.

Proceedings by Appeals Board

1336. Any party to a decision by a referee may appeal to the Appeals Board from the decision. The Appeals Board may on its own motion affirm, modify, or set aside any decision of a referee on the basis of the evidence previously submitted in the case, or may direct the taking of additional evidence. The Appeals Board may remove to itself or transfer to another referee the proceedings on any claim pending before a referee. The Appeals Board shall promptly notify the parties to any proceedings of its findings and decision.

Time limit on decisions of board

1337. The decision of the Appeals Board on an appeal from the findings of a referee must be rendered within 60 days after the filing of the appeal unless the board requires the taking of further evidence. If the Appeals Board requires the taking of further evidence, the hearing shall be commenced within 60 days after the filing of the appeal, and the decision of the board shall be filed within 60 days after completion of the hearing.

Appeals Board decision

1338. If the Appeals Board issues a decision allowing benefits the benefits shall be paid regardless of any further action taken by the director, the Appeals Board, or any other administrative agency, and regardless of any appeal or mandamus, or other proceeding in the courts. If the decision of the Appeals Board is finally reversed or set aside, no employer's account shall be charged with the benefits paid pursuant to this section.

Benefits to be paid through employment offices

1339. Unemployment compensation benefits shall be paid through public employment offices or such other agency as may be prescribed by authorized regulations.

Minors

1340 Minors who are eligible for benefits may be paid and receive benefits in their own right, and a receipt signed by a minor shall be valid and binding.

Payments of benefits due deceased, etc

1341. Benefits due a deceased or legally declared incompetent person may be paid to such person or persons as appears to the director to be legally entitled thereto in accordance with

authorized regulations. Such payment shall be made upon affidavit executed by the person or persons claiming to be entitled to the benefits and the receipt of the affidavit or affidavits shall fully discharge the director from any further liability with reference to the payment, without the necessity of inquiring into the truth of any of the facts stated in the affidavit.

Benefit rights cannot be waived

1342. Any waiver by any person of any benefit or right under this division is invalid. Benefits are not subject to assignment, release or commutation, and are exempt from all claims of creditors and from all process of law except collection thereof by the person entitled thereto in his own right. Any agreement by any individual in the employ of any person or concern to pay all or any portion of the contributions required of his employer under this division is void.

Article 4. Benefit Overpayments
(Amended by Stats. 1953, Ch. 1294)

[ORIGINAL HEADING]

Article 5. Benefit Overpayments

Liability for overpayments of benefits

1375. Any person who is overpaid any amount as benefits under this division is liable for the amount overpaid unless:

(a) The overpayment was not due to fraud, misrepresentation or wilful nondisclosure on the part of the recipient, and

(b) The overpayment was received without fault on the part of the recipient, and its recovery would be against equity and good conscience.

Notice

1376. The amount of the overpayment shall be assessed to the liable person and he shall be notified of the basis of the assessment. In the absence of fraud, misrepresentation, or wilful nondisclosure, notice of such assessment shall be mailed or personally served not later than one year after the close of the benefit year in which the overpayment was made.

Appeal

1377. Within 10 days from the date of mailing or serving of the notice of overpayment, the person affected may file appeal to a referee. The referee, after affording reasonable opportunity for a fair hearing, shall unless the appeal is withdrawn, affirm, set aside, or modify the findings set forth in the notice of overpayment. The party shall be notified of the referee's decision, together with his reasons therefor, which shall be final unless within 10 days from the date of notification or mailing of the decision a further appeal is initiated to the Appeals Board pursuant to Section 1336. The 10-day period for an appeal to the referee or to the Appeals Board may be extended for good cause.

Determination by Appeals Board

1378. The Appeals Board after affording the person a hearing shall review the overpayment and determine what amount, if any, shall be recovered.

Recovery

1379. The director, subject to the provisions of this article, may recover the amount of overpayment by filing a civil action within one year after the notice of the overpayment or by off-

setting that amount against any amount of benefits to which the liable person is entitled in any benefit year which begins during the one-year period next succeeding the date of the notice.

No recovery if determination affirmed

1380. No person shall be liable for the amount of benefits received where the benefits were paid pursuant to a referee's decision which affirmed an initial determination or in accordance with a final decision of the Appeals Board, regardless of any further appeal. An employer's experience rating account shall not be charged with any benefits erroneously or unlawfully paid.

Article 5. Benefit Rights of Trainees

(Amended by Stats. 1953, Ch 1294)

[ORIGINAL HEADING]

Article 6. Benefit Rights of Trainees

Benefit rights of "trainees"

1401. Notwithstanding any inconsistent provisions of this division the benefit rights of trainees shall be determined in accordance with the provisions of this article for the periods and with respect to the matters specified in this article. Except as otherwise provided in this article all other provisions of this division shall continue to be applicable in connection with such benefits.

"Military service"

1402. "Military service" as used in this article means active service in the land or naval forces of the United States, but the service of an individual in any reserve component of the land or naval forces of the United States who is ordered to active duty in any such force for a period of 30 days or less shall not be deemed active service in that force during that period.

"Trainee"

1403. "Trainee" as used in this article means an individual who entered military service after April 1, 1940, and who continued such service for not less than 90 consecutive days and whose military service was terminated on or before the ninetieth day after the final adjournment of the 1955 Regular Session of the Legislature.

(Amended by Stats. 1953, Ch. 1883.)

[ORIGINAL SECTION]

1403. "Trainee" as used in this article means: (a) an individual who entered military service after April 1, 1940, and who continued such service for not less than 90 consecutive days and whose military service was terminated on or before October 1, 1947; and (b) an individual who entered military service after June 1, 1950, and whose military service was terminated on or before July 1, 1953.

Re-established benefit balances

1404. When any trainee has an unexpired benefit year at the time of induction into the armed forces, the unexpended balance of benefits remaining to his account shall be re-established beginning with the first day of the first week succeeding the date of his termination of service. Whenever this balance is exhausted the trainee may file a claim and his base period shall be determined in accordance with Section 1406. All re-established balances shall lapse 65 weeks after termination of military service.

Benefit year

1405. Except as provided in Section 1404, the benefit year of all trainees shall be one year from the first day of the first week following the date of termination of military service.

Base period, use of "frozen" wage credits

1406. With respect to the determination of the benefit rights of any trainee, the base period shall exclude those quarters during which the trainee was in military service 60 days or more. For all quarters so excluded there shall be substituted an equal number of quarters immediately preceding his entry into military service. The quarter of entry into military service shall be counted as a completed quarter if the director finds that the inclusion thereof would be more equitable to the trainee.

(Amended by Stats 1953, Ch. 1883.)

[ORIGINAL SECTION]

1406. With respect to the determination of the benefit rights of any trainee, the base period shall consist of the first four out of the last five completed calendar quarters, excluding those quarters during which the trainee was in military service 60 days or more. For all quarters so excluded there shall be substituted an equal number of quarters immediately preceding his entry into military service. The quarter of entry into military service shall be counted as a completed quarter if the director finds that the inclusion thereof would be more equitable to the trainee.

1407. No disqualification shall be applied to any trainee after the termination of his military service, by reason of any act or course of action on his part prior to the date of his entry into such service.

Benefits under federal act

1408. If, under an act of Congress, payments with respect to the unemployment of individuals who have completed a period of military service are payable by the United States, a trainee shall be disqualified for unemployment compensation benefits with respect to any week for which he receives such federal benefits and no unemployment compensation benefits shall be paid under this article until he has exhausted all his rights to such payments from the United States unless such payments from the United States are payable as a supplement to the benefits provided for under this article, in which case, the weekly benefit amount payable to the trainee pursuant to this article shall be in an amount which when added to the supplemental benefit payable by the United States, will not exceed the greater of the maximum weekly benefits permitted under either this article or the federal act providing for the payment of such supplemental benefits.

(Amended by Stats. 1953, Ch. 1883.)

[ORIGINAL SECTION]

CHAPTER 6. FINANCIAL PROVISIONS

Article 1. Deposit Account

1501. The director may in accordance with law deposit for the purpose of clearance all money collected under this division, in a state or national bank in this State. After clearance the money so deposited shall be deposited in the State Treasury to the credit of the proper fund as prescribed in this division.

Clearing account

Article 2. Unemployment Fund

(Article 2 added by Stats. 1953, Ch. 313, as part of codification)

1521. The Unemployment Fund is continued in existence as a special fund, separate and apart from all public money or funds of this State. This fund shall consist of (1) all employer contributions collected under this division; (2) interest earned upon any money in the fund; (3) any property or securities acquired through the use of money belonging to the fund; (4) all earnings of such property or securities; and (5) all other money received for the fund from any other source. All money in the fund shall be mingled and undivided.

Unemployment Fund

All money in the Unemployment Fund and in the various accounts of that fund is continuously appropriated without regard to fiscal years for the purposes authorized in this article.

1522. The Unemployment Fund shall be administered by the director exclusively for the purposes of this division without liability upon the part of the State beyond the amounts paid into and earned by the fund.

Administered by director

1523. Withdrawals by the director from the Unemployment Fund are exempted from the operation of Sections 16002 and 16003 of the Government Code.

Withdrawals

1524. The State Treasurer is ex officio the treasurer and custodian of the Unemployment Fund. He shall administer the fund in accordance with the directions of the director. The official bond of the State Treasurer shall cover the faithful performance of his duties as treasurer of the Unemployment Fund.

State Treasurer custodian

1525. There shall be maintained within the fund three separate accounts:

Separate accounts maintained

(a) A clearing account.

(b) An Unemployment Trust Fund account.

(c) A benefit account.

1526. All contributions and amounts payable to the Unemployment Fund after proper clearance shall be forwarded to the Treasurer who shall immediately deposit them in the clearing account.

Clearing account

1527. Immediately after clearance, all money in the clearing account except interest on contributions, penalties and fines collected shall be deposited in or invested in the obligations of the Unemployment Trust Fund of the United States of America or its authorized agent to the credit of this State, any provisions of law in this State relating to the deposit, administra-

Unemployment Trust Fund account

tion, release, or disbursement of money in the possession or custody of this State to the contrary notwithstanding. The amounts so deposited or invested shall be entered in the Unemployment Trust Fund account.

Benefit account

1528. The benefit account consists of all money requisitioned from this State's account in the Unemployment Trust Fund, and any money so requisitioned shall be transferred out of the Unemployment Trust Fund account into the benefit account.

Requisition of amounts for benefit account appropriation

1529. Money shall be requisitioned from this State's account in the Unemployment Trust Fund solely for the payment of benefits and in accordance with authorized regulations. The director shall from time to time requisition from the Unemployment Trust Fund such amounts, not exceeding the amounts standing to this State's account therein, as he deems necessary for the payment of benefits for a reasonable future period. Upon receipt thereof the Treasurer shall deposit such money in the benefit account of the Unemployment Fund. Any balance of money requisitioned from the Unemployment Trust Fund which remains unclaimed or unpaid in the benefit account after the expiration of the period for which such sums were requisitioned shall either be considered in preparing subsequent estimates and may be utilized for the payment of benefits during succeeding periods, or, in the discretion of the director, shall be redeposited with the Secretary of the Treasury of the United States of America, to the credit of this State's account in the Unemployment Trust Fund.

Disposition of funds upon termination of Unemployment Trust Fund

1530. The provisions of this article to the extent that they relate to the Unemployment Trust Fund, shall be operative only so long as that fund continues to exist and so long as the Secretary of the Treasury of the United States of America continues to maintain for this State a separate book account of all funds deposited therein by this State for benefit purposes, together with this State's proportionate share of the earnings of the Unemployment Trust Fund, from which no other state nor the United States is permitted to make withdrawals. If and when such Unemployment Trust Fund ceases to exist, or such separate book account is no longer maintained, all money, properties, or securities therein, belonging to the Unemployment Fund of this State shall be transferred to the treasurer of the Unemployment Fund, who shall hold, invest, transfer, sell, deposit, and release such money, properties, or securities in a manner approved by the director in accordance with the provisions of this division. Such money shall be invested in bonds or other interest-bearing obligations of the United States of America or the State of California. Such investment shall at all times be so made that all the assets of the fund shall always be readily convertible into cash when needed for the payment of benefits. The Treasurer shall dispose of securities or other properties belonging to the Unemployment Fund only under the direction of the director.

1531. The director shall, without presenting vouchers and itemized statements therefor, withdraw from the benefit account any sums which he deems necessary for the payment of benefits for a reasonable future period. The Controller shall draw his warrant for any claim presented by the director for the payment of benefits under this account and the Treasurer shall pay the warrant. Upon the withdrawal thereof, such sums shall be deposited in a benefit payment account in such bank or public depository and under such conditions as the director determines, with the approval of the Department of Finance. Such bank or public depository shall be one in which general funds of the State may be deposited, but no public deposit insurance charge or premium shall be paid out of the benefit payment account. The director may, out of funds available for administration, pay premiums on insurance for the protection of money in his possession.

Withdrawals from benefit account

Protection of money

1532. Money in the benefit payment account shall be used solely to pay benefits pursuant to authorized regulations and no other disbursement shall be made therefrom, but amounts erroneously and illegally deposited in such account may be refunded therefrom. The procedure prescribed by such regulations shall be deemed to satisfy and shall be in lieu of any and all statutory requirements not contained in this division of specific appropriation or other form of release by state officers of money in their custody prior to expenditure which might otherwise be applicable to withdrawals from the benefit payment account. Any balance of money withdrawn from the benefit account which remains unclaimed or unpaid in the benefit payment account after the expiration of the period for which such sums were withdrawn shall be considered in preparing subsequent estimates and may be utilized for the payment of benefits during succeeding periods or, in the discretion of the director, shall be redeposited in the benefit account.

Used solely for benefit payments

1533. Except as otherwise provided in this chapter, money in the clearing and benefit accounts may be deposited by the Treasurer, under the direction of the director, in any bank or public depositary in which public funds of the State may be deposited, but no public deposit insurance charge or premium shall be paid out of the fund. Money in the clearing and benefit accounts shall not be commingled with other state funds, but shall be maintained in a separate account on the books of the depositary. Such money shall be secured by the bank or public depositary to the same extent and in the same manner as required under Chapter 4, Part 2, Division 4, Title 2 of the Government Code and collateral pledged shall be maintained in a separate custody account.

Money in clearing and benefit accounts

1534. Refunds or judgments payable pursuant to this part may be paid from the clearing account or from the benefit account with respect to any money erroneously deposited therein, upon warrants issued by the Controller under the direction of and in accordance with authorized regulations. Refunds of interest, penalties and fines collected after January 29, 1945, and

Refunds or judgments

interest payable on refunds and judgments pursuant to this division may not be paid from the benefit account but may be paid from the clearing account to the extent that interest, penalties and fines collected are currently on deposit in that account.

Contingent appropriation for administration

1535. During such time as the Federal Social Security Act and Federal Unemployment Tax Act are amended so as to remove the requirement that all money withdrawn from the Unemployment Fund be used solely in the payment of unemployment compensation, exclusive of expenses of administration, and for refunds of sums erroneously paid into such fund and refunds paid in accordance with the provisions of Section 1606 (b) of the Federal Unemployment Tax Act, then notwithstanding any other provisions of this division to the contrary there is hereby continuously appropriated out of the Unemployment Fund for the purpose of administering this division, including salaries and other expenses of the Department of Employment and the acquisition of necessary real property, all amounts collected under Section 993.

(Added by Stats. 1953, Ch. 312, as part of codification.)

Unclaimed refunds

1536. Any amounts determined by the director or his authorized representatives to be payable to employing units as refunds of contributions erroneously paid which are unclaimed at the end of three years from such determination shall be included in the revenue to the Unemployment Fund or in the case of interest or penalties, to the Department of Employment Contingent Fund. The employing unit or person entitled to such payment shall not thereafter maintain any claim, action or proceeding with respect to such amounts.

Same

1537. Whenever any warrant drawn on an account in the Unemployment Fund or on the Unemployment Administration Fund or the Department of Employment Contingent Fund by the State Controller or the director remains unclaimed after three years the amount thereof shall revert to the account and the fund from which the amount was payable.

Article 3. Administration Fund

(Article 3 added by Stats. 1953, Ch. 311, as part of codification)

"Unemployment Administration Fund"

1555. The Unemployment Administration Fund is continued in existence as a special fund in the State Treasury. All money which is deposited or paid into this fund is hereby continuously appropriated and made available to the director for the purposes authorized in this article without regard to fiscal years. Any balances in this fund shall not lapse at any time, but shall be continuously available to the director for expenditure consistent with the purposes authorized.

Same

1556. The Unemployment Administration Fund shall consist of all money appropriated by this State for the purpose of administering this part, and all money received from the United States of America, or any agency thereof, including the Social Security Administration, the Railroad Retirement Board and the United States Employment Service, or from any other

source, for such purpose. Money received from the Railroad Retirement Board as compensation for services or facilities supplied to it shall be deposited in this fund.

Separate account

1557. Money in the Unemployment Administration Fund shall not be commingled with other state funds, but shall be maintained in a separate account on the books of the depositary. Such money shall be secured by the depositary in which it is held to the same extent and in the same manner as required under Chapter 4, Part 2, Division 4, Title 2 of the Government Code, and collateral pledged shall be maintained in a separate custody account.

Cost of administration

1558. All money in the Unemployment Administration Fund shall be expended solely for the purpose of defraying the cost of the administration of this division, and for no other purpose whatsoever, and all money received from the Federal Government for the fund pursuant to Section 302 of the Social Security Act shall be expended solely for the purposes and in the amounts found necessary by the Social Security Administration for the proper and efficient administration of this division.

Revolving fund

1559. All money in the Unemployment Administration Fund shall be deposited, administered, and disbursed, in the same manner and under the same conditions and requirements as is provided by law for other special funds in the State Treasury, but the director may draw, without at the time furnishing vouchers and itemized statements, sums not to exceed in the aggregate one million dollars ($1,000,000) to be used as a revolving fund where payment of compensation earned, traveling expense advances, or other cash payments are necessary. At the close of each fiscal year or at any other time, upon the demand of the Department of Finance, the money so drawn shall be accounted for and substantiated by vouchers and itemized statements submitted to and audited by the Controller.

Deposit

1560. All money in the Unemployment Administration Fund, in excess of current requirements, and not otherwise invested, may be deposited by the State Treasurer in banks and otherwise held and invested by him in the same manner as provided by law in the case of other special funds in the State Treasury, and under the same rules and regulations that govern the deposit of other public funds.

State Treasurer liable

1561. The State Treasurer is liable on his official bond for the faithful performance of his duties in connection with the Unemployment Administration Fund. This liability shall exist in addition to any liability upon any separate bond now existing or which may be given in the future. All sums recovered on the official bond for losses sustained by the Unemployment Administration Fund shall be deposited in that fund.

Obligation of State to replace federal advances

1562. This State recognizes its obligations to replace, and pledges the faith of this State that funds will be provided in the future, and applied to the replacement of, any money received after July 1, 1941, from the Federal Government under Title 3 of the Social Security Act, any unencumbered

balances in the Unemployment Administration Fund as of that date, any money thereafter granted to this State pursuant to the provisions of the Wagner-Peyser Act, and any money thereafter made available by this State or its political subdivisions matched by money granted to this State pursuant to the provisions of the Wagner-Peyser Act, which the Social Security Board finds have, because of any action or contingency, been lost or expended for purposes other than, or in amounts in excess of, those found necessary by the Social Security Board for the proper administration of this part. Such money shall be replaced within a reasonable time by money appropriated by the Legislature from the general funds of this State to the Unemployment Administration Fund. The director shall report to the Director of Finance, in the same manner as is provided generally for the submission of financial requirements for the ensuing year, and the Governor shall include in his budget report to the next regular session of the Legislature, the amount required for such replacement.

Article 4. Contingent Fund

(Article 4 added by Stats. 1953, Ch. 310, as part of codification)

Department of Employment Contingent Fund

1585. The Department of Employment Contingent Fund is continued in existence as a special fund in the State Treasury. All interest on contributions and penalties collected under this division shall be deposited in or transferred to this fund.

Appropriation

1586. All amounts in the Contingent Fund are hereby continuously appropriated without regard to fiscal years for refund of amounts collected after January 29, 1945, and erroneously deposited therein, for interest payable under this division on refunds and judgments and for the administration of the Department of Employment.

Authorization for expenditure

1587. No expenditure for administration shall be made from the Contingent Fund except under an authorization made by the Director of Finance in the manner prescribed in Section 11006 of the Government Code. No such authorization shall be made as a substitution for a grant of federal funds, or for any portion thereof, which in the absence of the authorization would be available to the Department of Employment.

Transfer

1588. Any amount authorized to be expended from the Contingent Fund for administration may be transferred to the Unemployment Administration Fund, but any amount not needed for the purpose for which authorized shall, upon order of the Director of Finance, be retransferred to the Contingent Fund.

Refunds from various funds

1589. In lieu of filing claims for refund and interest payable on refunds against each of the funds from which an amount has been determined to be due under this division the director may file a single claim with the State Controller showing the amount payable from each fund for payment from the Contingent Fund, and the Controller shall thereupon draw his

warrant on the Contingent Fund and transfer the amounts certified by the director to be due from the Clearing Account—Unemployment Fund and the Unemployment Compensation Disability Fund to the Contingent Fund.

CHAPTER 7. COLLECTIONS

Article 1. Priority and Lien of Tax

Priority of contributions etc.

1701. The wage earner and employer contributions required to be paid by any employing unit under this division, together with interest and penalties, shall be satisfied first in any of the following cases:

(a) Whenever the employing unit is insolvent.

(b) Whenever the employing unit makes a voluntary assignment of its assets.

(c) Whenever the estate of the employing unit in the hands of the executors, administrators, or heirs is insufficient to pay all the debts due from the deceased.

(d) Whenever the estate and effects of an absconding, concealed, or absent employing unit required to pay any amount under this division are levied upon by process of law.

(Amended by Stats. 1953, Ch. 449.)

[ORIGINAL SECTION]

1701. The wage earner and employer contributions required to be paid by any employing unit under this division, together with interest and penalties, shall be satisfied first in any of the following cases;

(a) Whenever the employing unit is insolvent.

(b) Whenever the employing unit makes a voluntary assignment of his assets.

(c) Whenever the estate of the employing unit in the hands of executors, administrators, or heirs is insufficient to pay all the debts due from the deceased.

(d) Whenever the estate and effects of an absconding, concealed, or absent employing unit required to pay any amount under this division are levied upon by process of law.

Preference

1702. Section 1701 does not give the State a preference over any recorded lien which attached prior to the date when the amounts required to be paid became a lien and the preference given to the State by that section is subordinate to the preferences given to claims for personal services by Sections 1204 and 1206 of the Code of Civil Procedure.

Recording of certificate of delinquency

1703. If an employing unit is delinquent in a payment of any contributions, penalties or interest provided for in this division, the director may, not later than three years after the payment became delinquent, or within five years after the last entry of a judgment under Section 1815, file for record in the office of any county recorder a certificate specifying the amount of contributions, interest and penalties due, the name and address as it appears on the records of the department of the employing unit liable for the same and the fact that the department has complied with all provisions of this division in the determination of the amount required to be paid. From the time of the filing for record, the amount required to be

paid together with interest and penalty constitutes a lien upon all real property in the county owned by the person or acquired by him before the lien expires. The lien has the force, effect, and priority of a judgment lien and shall continue for five years from the time of the filing of the certificate unless sooner released or otherwise discharged. The lien may, within five years from the date of the filing of the certificate or within five years from the date of the last extension of the lien, be extended by filing for record a new certificate in the office of the county recorder of any county and from the time of such filing the lien shall be extended to the real property in such county for five years unless sooner released or otherwise discharged.

Release or subordination of liens

1704. The director may at any time release all or any portion of the property subject to any lien obtained under this chapter from such lien or subordinate the lien to other liens and encumbrances if he determines that the contributions, interest and penalties are sufficiently secured by a lien on other property or that the release or subordination of the lien will not endanger or jeopardize the collection of such contributions, interest and penalties.

Certificate

1705. A certificate by the director to the effect that any property has been released from a lien or that the lien has been subordinated to other liens is conclusive evidence that the property has been released or that the lien has been subordinated as provided in the certificate.

Article 2. Liability of Successors, Officers and Fiduciaries

Duty of purchaser

1731. Any person or employing unit that acquires the organization, trade or business, or substantially all the assets thereof, of an employer shall withhold in trust money or other property sufficient in amount or value to cover the amount of any contributions, interest and penalties due or unpaid from such employer until such employer produces a certificate from the department stating that no contributions, interest or penalties are due.

Liability of purchaser

1732. Any person or employing unit that fails to withhold money or other property as provided in Section 1731 shall be personally liable for the payment of the contributions, interest and penalties due from the employer up to but not exceeding the purchase price. Upon request of either of the parties to such acquisition the department shall within 30 days issue a certificate, or a statement showing the amount of contribution claimed to be due. The failure to issue a certificate or a statement within the period of 30 days shall be deemed equivalent to the issuance of a certificate stating that no contributions, interest or penalties are due.

Issuance of certificate

1733. If the department issues a statement showing the amount of contributions, interest and penalties claimed to be due, the amount stated therein shall be withheld and paid to

the department on demand, such amount, however, not to exceed the purchase price. The issuance of any certificate stating that no contributions, interest and penalties are due, or the failure to issue such certificate or statement within the period of 30 days shall not release the employer from liability on account of any contributions, interest and penalties then or thereafter determined to be due from him, but shall release the acquiring person or employing unit from any further liability on account of any such contributions, interest and penalties.

Remedies for collection

1734. The director shall have all of the remedies for collection against any person or employing unit that acquires the organization, trade or business, or substantially all the assets thereof of an employer as are provided by this division against any employer liable for contributions, interest and penalties due. The time within which the obligation may be enforced against the person or employing unit acquiring the organization, trade or business, or substantially all the assets thereof of an employer shall start to run with the day of the acquisition or with the day the liability against the employer becomes final, whichever is the later.

Personal liability

1735. Any officer of a domestic or foreign corporation, whose duty it is to prepare or to supervise the preparation of contribution returns, who wilfully fails to comply with the provisions of Section 1091 shall be held personally liable for all contributions, penalties, and interest which may be due, owing and unpaid by such corporation to the Unemployment Fund at the time of quitting business, dissolution or withdrawal.

Same

1736. In addition to other penalties prescribed in this division, failure to file the notice required by Section 1090 shall cause the assignee, receiver, trustee in bankruptcy, or other representative of an insolvent employing unit, or the administrator or executor of the estate of the deceased employing unit to be personally responsible for all loss in contributions, penalties and interest attributable to such failure. This liability may be enforced by civil action in the name of the State of California against the assignee, receiver, trustee in bankruptcy, or other representative of the insolvent employing unit, and against the administrator or executor of the deceased employing unit.

Article 3. Withhold Notices

Withhold notices

1755. If any person or employing unit is delinquent in the payment of any contributions, penalties or interest provided for in this division, the director may, not later than three years after the payment became delinquent or within five years of the last recording of an abstract under Article 5 of this chapter or of a certificate under Section 1703, give notice of the amount of the delinquency by registered mail, to all persons having in their possession or under their control any credits or other personal property belonging to the delinquent person or employing

unit, or owing any debts to such person or employing unit at the time of the receipt of the registered notice. No person so notified shall transfer or make any disposition of such credits or other personal property or debts without retaining an amount sufficient to pay the amount specified in said notice unless the director consents to a transfer or disposition, or unless 45 days have elapsed from the receipt of the notice. All persons so notified must, within five days after receipt of the notice, advise the director of any and all such credits, other personal property or debts, in their possession, under their control, or owed by them. If such notice seeks to prevent the transfer or other disposition of a deposit in a bank or other credits or personal property in the possession or under the control of a bank, the notice to be effective shall be delivered or mailed to the branch or office of such bank at which such deposit is carried or at which such credits or personal property is held.

(Amended by Stats. 1953, Ch 659.)

[ORIGINAL SECTION]

1755 If any person or employing unit is delinquent in the payment of any contributions, penalties or interest provided for in this division, the director may, not later than three years after the payment became delinquent or within five years of the last recording of an abstract under Article 5 of this chapter or of a certificate under Section 1703, give notice of the amount of the delinquency by registered mail, to all persons having in their possession or under their control any credits or other personal property belonging to the delinquent person or employing unit, or owing any debts to such person or employing unit at the time of the receipt of the registered notice. No person so notified shall transfer or make any disposition of such credits or other personal property or debts unless the director consents to a transfer or disposition, or unless 45 days have elapsed from the receipt of the notice. All persons so notified must, within five days after receipt of the notice, advise the director of any and all such credits, other personal property or debts, in their possession, under their control, or owed by them.

Notices to State

1756 Notices to the State, pursuant to Section 1755, shall be given to the state department, board, office or commission prior to the time it presents the claim of the person or employing unit to the State Controller.

Personal liability

1757. If any person notified pursuant to Section 1755 transfers or disposes of credits or personal property in violation of that section, he shall be personally liable to the department, to the extent of the value of the property or the amount of the debts thus transferred or paid, if solely by reason of such transfer or disposition, the department is unable to recover the contributions, penalties, or interest owing by the person with respect to which the notice was given.

(Amended by Stats. 1953, Ch. 659.)

[ORIGINAL SECTION]

1757. If any person notified pursuant to Section 1755 transfers or disposes of credits or personal property in violation of that section, he shall be personally liable to the department for any loss sustained by reason of such transfer or disposition Such liability shall not exceed the actual value of the credits, debts or other personal property under his control or in his possession.

1758. As used in this article "person" includes this State and any county, city and county, municipality, district or other political subdivision thereof. "Person"

Article 4. Warrant for Collection

1785. If any amount required to be paid under this division is not paid when due, the director or his authorized representative may, within three years after the payment became delinquent, or within five years after the last entry of a judgment under Article 5 of this chapter or within five years after the filing for record of a certificate under Section 1703, issue a warrant for the enforcement of any liens and for the collection of any amount required to be paid to the State under this division. The warrant shall be directed to any sheriff, marshal or constable and shall have the same effect as a writ of execution. The warrant shall be levied and sale made pursuant to it in the same manner and with the same effect as a levy of and a sale pursuant to a writ of execution. Warrant for enforcement of liens

1786. The department may pay or advance to the sheriff, marshal or constable, the same fees, commissions, and expenses for his services under this article as are provided by law for similar services pursuant to a writ of execution. The director, and not the court, shall approve the fees for publication in a newspaper. Pay to sheriff, etc

1787. The fees, commissions, and expenses incurred in connection with the levying and execution of a warrant are the obligation of the person or employing unit required to pay any amount under this division and may be collected from him by virtue of the warrant or in any other manner provided in this chapter for the collection of the tax. Expenses of levying and execution of warrant

Article 5. Summary Judgment

1815. If any employing unit is delinquent in the payment of any contributions, penalties or interest provided for in this division, the director may, within three years after the payment became delinquent or within three years of the first recording of an abstract under this article or of a certificate under Section 1703, file in the Office of the County Clerk of Sacramento County, or with the county clerk of the county in which the employer has his principal place of business, a certificate specifying the amount of the contributions, interest and penalty due and the name and last known address of the employer liable therefor. The certificate shall also contain a statement that the director has complied with all the provisions of this division in relation to the computation and levy of the contributions, interest and penalty, and a request that judgment be entered against the employer in the amount set forth in the certificate. The county clerk immediately upon the filing of the certificate shall enter a judgment for the State of California against the employer in the Summary judgment

amount set forth in the certificate. Such judgment may be filed by the county clerk in a loose-leaf book entitled "unemployment contributions judgments."

Recording

1816. An abstract of a judgment secured pursuant to this article or a copy thereof may be recorded with the county recorder of any county and from the time of the recording, the amount of the judgment shall constitute a lien upon all the property of the employer in that county, owned or acquired by him during the life of the lien. The lien shall have the force, effect and priority of a judgment lien. Execution shall issue upon such a judgment upon request of the director in the same manner as execution may issue upon other judgments and sales shall be held under such execution as prescribed in the Code of Civil Procedure. In all proceedings under this section the director or his authorized agents may act on behalf of the State.

Hearing

1817. Prior to the filing of a certificate under this article, the delinquent employer shall be given an opportunity for oral hearing before the Appeals Board or its authorized representative. Notice of the time and place of such hearing must be mailed at least 15 days in advance thereof, and may be sent by registered mail addressed to the last known address of the delinquent employer. In the event the delinquent employer or his representative does not appear at the hearing or if an appearance is made but the delinquent employer does not establish to the satisfaction of the Appeals Board or its authorized representative that the amount of contributions, interest and penalties claimed to be due is erroneous, the director may file the certificate provided for in this article. The hearing provided in this section shall not be required before the filing of a certificate if the employer has previously been afforded a full hearing before the Appeals Board, but if the employer files an affidavit setting forth new and additional evidence to establish that the contributions, interest and penalties sought to be collected are erroneous, the Appeals Board may grant an additional hearing.

Other collection procedures

1818. The right of the director to use the summary judgment procedure contained in this article shall be in addition to any other collection procedure contained in this division. No action taken by the director shall be construed to be an election to pursue the summary judgment procedure to the exclusion of any other collection procedure in this division.

Article 6. Civil Action

No injunction against collection

1851. No injunction or writ of mandate or other legal or equitable process shall issue in any suit, action or proceeding, in any court against this State or against any officer thereof to prevent or enjoin the collection of any contribution sought to be collected under this division.

Action to collect delinquent contributions

1852. In addition to any other collection procedures authorized in this division, the director may bring an action in the courts of this or any other state or of the United States, in the name of the State of California, to collect the amount

of any delinquent employer or worker contributions together with penalties and interest. No such action shall be commenced later than three years after:

(a) The date on which any amount due on a return filed by an employing unit or on an assessment made by the director becomes delinquent.

(b) The date on which an abstract is first recorded under Article 5 of this chapter.

(c) The date on which a certificate is first recorded under Article 1 of this chapter.

Calendar preference

1853. The courts of this State shall give preference on their calendar to any civil action brought by or against the director over all other civil litigation except equity cases, cases involving extraordinary writs, or summary proceedings.

Certificate of delinquency

1854. In any civil action brought by or against the director a certificate attested to by the director or his authorized agent showing the delinquency shall be prima facie evidence of the payment by the employing unit of the amount of wages for employment by employers set forth therein; of the levy of the contributions; of the delinquency; and of the compliance by the director with all the provisions of this division relating to the computation and levy of the contributions specified in the certificate.

CHAPTER 8. HEARING PROCEDURE

Conduct of hearings

1951. The manner in which disputed claims shall be presented, the reports required thereon from the claimant and from any employing unit and the conduct of hearings and appeals shall be in accordance with rules prescribed by the Appeals Board. The Appeals Board shall require referees to consolidate for hearing cases with respect to which the alleged facts and the points of law are the same.

Rules of evidence or procedure

1952. The Appeals Board and its representatives and referees are not bound by common law or statutory rules of evidence or by technical or formal rules of procedure but may conduct the hearings and appeals in such manner as to ascertain the substantial rights of the parties. A full and complete record shall be kept of all proceedings in connection with disputed claims. All testimony at any hearing upon a disputed claim shall be recorded, but need not be transcribed unless the disputed claim is further appealed.

Subpenas

1953. In any proceeding, hearing, investigation or in the discharge of any duties imposed under this division any member of the Appeals Board and any authorized deputy, referee or employee designated by it may administer oaths, take depositions, certify to official acts and issue subpenas to compel the attendance of witnesses and the production of books, papers, correspondence, memoranda and other records.

Same

1954. Obedience to subpenas issued in accordance with this chapter may be enforced by application to the superior court

as set forth in Article 2, Chapter 2, Part 1 of Division 3 of Title 2 of the Government Code.

Self incrimination, etc

1955. No person shall be excused from attending and testifying or from producing books, papers, correspondence, memoranda and other records as required by a subpena issued pursuant to this chapter on the ground that the testimony or evidence, documentary or otherwise, required of him may tend to incriminate him or subject him to a penalty or forfeiture. No individual shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, documentary or otherwise. Nothing in this section exempts any individual from prosecution and punishment for perjury committed in so testifying.

Witness fees

1956. Witnesses subpenaed pursuant to this division shall be allowed the same fees which are prescribed in Sections 1885 and 1885.1 of the Code of Civil Procedure relative to proceedings in the superior court. Such fees and all expenses incurred in any proceeding, hearing, review or investigation by the director or the Appeals Board or the representative of either, except charges for services by counsel or other agent representing claimant, employer, or other interested person, shall be part of the expenses of administering this division, and no individual claiming benefits shall be charged by the Appeals Board, or its representative, fees of any kind in any procedure under this division.

Counsel fees

1957. Any individual claiming benefits in any proceedings before the Appeals Board or its authorized representative may be represented by counsel or agent but no such counsel or agent shall charge or receive for such services more than an amount approved by the Appeals Board. Any person who violates any provision of this section shall for each such violation be fined not less than fifty dollars ($50) nor more than five hundred dollars ($500) or be imprisoned not more than six months or both.

Costs

1958. No cost shall be awarded in hearings on appeal by the Appeals Board, but if in the opinion of the Appeals Board, the claimant or an employer has acted in bad faith and without reasonable basis for appeal, a penalty not exceeding 10 percent of the amount finally awarded on the appeal may be taxed against and deducted from the award by the Appeals Board and shall be placed in the Unemployment Fund. In those cases where a penalty is assessed against an employer his account, as maintained under this act, shall be debited with the amount of the penalty so assessed.

Powers of Appeals Board

1959. For the purpose of any investigation, hearing or proceeding under this division, the Appeals Board may delegate its power in relation thereto to any deputy, referee, or other person properly authorized in writing by it.

(Amended by Stats. 1953, Ch. 1294.)

CHAPTER 5. FINANCIAL PROVISIONS

Article 1. Disability Fund

(Article 1 added by Stats. 1953, Ch. 309, as part of codification)

Disability Fund

3001. The Unemployment Compensation Disability Fund is continued in existence as a special fund in the State Treasury, separate and apart from all other public money or funds of this State. The money and assets of this fund shall be held in trust by the State Treasurer and administered under the direction of the director exclusively, for the purpose of this part.

Custody and investment

3002. The State Treasurer is the treasurer of the Disability Fund and shall have the custody of all money belonging to the Disability Fund and not otherwise held, deposited or invested

under this part. The official bond of the State Treasurer shall cover the faithful performance of his duties as treasurer of the Disability Fund. The Department of Finance shall invest or otherwise deal with the Disability Fund under the supervision of the director.

Investments

3003. Except as provided in Section 3125, all surplus money in the Disability Fund may be invested solely in interest bearing obligations of the United States Government or of the State of California, and all interest or earnings therefrom shall be deposited in the Disability Fund.

Content of fund

3004. The Disability Fund consists of all contributions required of individuals under Section 984 with respect to wages paid by employers for employment; all money received for the purpose of disability benefits from the United States of America or any agency thereof, including the Social Security Board, or from any other source; and any property or securities acquired through the use of money belonging to the Disability Fund and all earnings of such money or securities.

Receipts from Federal Government

3005. All money received from the Federal Government for disability benefit purposes or for the administration of this part shall be deposited in the Disability Fund in accordance with the terms of the federal grant. Unless the Federal Government approves, no money made available to this State under Title 3 of the Social Security Act shall be used for disability benefits or for the administration of this part.

Worker contributions

3006. The director may requisition worker contributions collected under this division during the calendar years 1944 and 1945, and heretofore deposited or invested in the obligations of the Unemployment Trust Fund. Funds so requisitioned from the Unemployment Trust Fund subsequent to July 1, 1947, shall augment the contributions on deposit in the Disability Fund and shall be available for expenditure for the same purposes, except that no portion thereof shall be expended for the purposes of administering this part.

Interest to be deposited in Disability Fund

3007. In addition to the amount of worker contributions collected under this division during the calendar years 1944 and 1945 and heretofore deposited or invested in the obligations of the Unemployment Trust Fund, an amount equal to that sum multiplied by the annual average rate of interest received on the Unemployment Trust Fund for the periods subsequent to May 21, 1946, may also be requisitioned from the Unemployment Trust Fund and deposited in the Disability Fund to augment the amounts available for expenditure for the same purposes, except that no portion thereof shall be used for expenses of administration. In no event shall the total amount requisitioned from the Unemployment Trust Fund for the purposes of this part, including interest or other earnings, be in excess of the amount of worker contributions collected under this division and deposited or invested in the obligations of the Unemployment Trust Fund as provided by Public Law 719 of the Seventy-ninth Congress.

Collections to be deposited in Disability Fund

3008. All money collected under Section 984 on and after May 21, 1946, shall be deposited in the Disability Fund.

Refunds

3009. Refunds or judgments, and interest thereon, payable for contributions erroneously collected under Sections 984 and 985 subsequent to May 21, 1946, may be paid from the Disability Fund on warrants issued by the Controller under the direction of the director.

Unclaimed refunds

3010. Any amounts determined by the director or his authorized representatives to be payable to employing units or workers as refunds of amounts deposited in the various accounts of the Disability Fund which are unclaimed at the end of three years from such determination, shall be included in the revenue to the account in the Disability Fund in which it was deposited. The employing unit or person entitled to such payment shall not thereafter maintain any claim, action or proceeding with respect to such amounts.

Unclaimed warrants

3011. Whenever any warrant is drawn on an account in the Disability Fund by the State Controller or the director, and the same remains unclaimed after three years, the amount thereof shall revert to that account in the Disability Fund from which the amount was payable.

Appropriation

3012. All money in the Disability Fund is continuously appropriated without regard to fiscal years for the purpose of providing disability benefits pursuant to this part, including the payment of refunds or judgments, and interest thereon, the payment of disability benefits, and the payment of the expenses of administration of this part.

Administrative costs

3013. A sum to be determined by the Director of Finance, of amounts deposited in the Disability Fund, may be used for the necessary expenses of administration of this part in addition to any other fund or money available for such purpose. Such sum shall be available to the department for the payment of expenses of administration of this part only to the extent that money received from the United States or any of its agencies is not available for such purposes.

Withdrawals

3014. Withdrawals by the director from the Disability Fund for the payment of refunds or judgments and the payment of disability benefits are exempted from the operation of Section 16003 of the Government Code.

Summary statement of Disability Fund

3015. The director shall, as soon as practicable after the end of each calendar quarter, file with the Governor, the Department of Finance, and the Controller an abstract or statement showing the resources and liabilities and a summary statement of the transactions affecting the Disability Fund and the separate accounts thereof. The Department of Finance shall audit such abstracts and statements.

Article 2. Disability Administration Account

Revolving fund

3051. There is a disability administration account within the Disability Fund. The director may, without at the time furnishing vouchers and itemized statements, withdraw from

this account sums not to exceed in the aggregate two hundred fifty thousand dollars ($250,000) to be used as a revolving fund where payment of compensation earned, traveling expense advances, or other cash payments are necessary. At the close of each fiscal year or at any other time, upon the demand of the Department of Finance, the money so drawn shall be accounted for and substantiated by vouchers and itemized statements submitted to and audited by the Controller.

Article 3. Disability Benefit Payment Account

Disbursements

3075. The director shall, without presenting vouchers and itemized statements, withdraw from the Disability Fund any sums which he deems necessary for the payment of disability benefits for a reasonable future period. The Controller shall draw his warrant for any claim presented by the director for such payment and the Treasurer shall pay the warrant. Upon the withdrawal thereof, such sums shall be deposited in a disability benefit payment account in such bank or public depositary and under such conditions as the director determines, with the approval of the Department of Finance. Such bank or public depositary shall be one in which general funds of the State may be deposited, but no public deposit insurance charge or premium shall be paid out of such account. Money in this account shall be used solely to pay disability benefits by checks drawn on the account by the department pursuant to authorized regulations and no other disbursement shall be made from that account, except that amounts erroneously and illegally deposited in such account may be refunded. The procedure prescribed by such regulations shall satisfy and be in lieu of any and all statutory requirements of specific appropriation or other form of release by state officers of money in their custody prior to expenditure which might otherwise be applicable to withdrawals from such account.

Article 4. Extended Liability Account

Extended liability account

3101. The director shall maintain in the Disability Fund a separate account, to be known as the extended liability account. The extended liability account shall be charged with all disability benefit payments made on or after January 1, 1948, in respect to uninterrupted periods of disability which commenced after termination of employment.

Interest credited to account

3102. The director shall determine the sum of the amount of worker contributions collected under the Unemployment Insurance Act during the calendar years 1944 and 1945, plus the amount of worker contributions collected under Part 5 of Article 10 of that act prior to December 1, 1946. At the end of each calendar year, commencing with the calendar year 1946, an amount equal to such sum multiplied by the annual average rate of interest or other earnings on all investments of the Disability Fund, including the part, if any, of the contributions

collected during 1944 and 1945 deposited or invested in the obligations of the Unemployment Trust Fund, shall be determined by the director and credited to the extended liability account.

Extended liability charges against voluntary plans

3103. If the extended liability account shows an accumulated deficit at the end of any calendar year after interest and other earnings have been credited as provided in Section 3102, the director shall determine the ratio of such deficit to the total of all wages paid in employment during that year. At the end of each calendar year when the extended liability account shows such a deficit, the director shall make an assessment against each employer with employees covered under an approved voluntary plan during that year in an amount equal to the amount of wages exempt under Section 3252 for that year, multiplied by such ratio, but in no event shall any such assessment exceed three one-hundredths of 1 percent (0.03%) of such wages. The provisions of Part 1 of this division with respect to the assessment and collection of contributions shall apply to the assessments provided by this section, except that interest shall not accrue until 30 days after notice of assessment. The amounts of such assessments collected by the director shall be deposited in the Disability Fund to the credit of the extended liability account.

Deficits

3104. At the end of any calendar year when the extended liability account shows a deficit, the extended liability account shall be credited with an amount equal to the total of all wages not exempt under Section 3252 during that year, multiplied by the ratio determined pursuant to Section 3103, but in no event shall such credit exceed three one-hundredths of 1 percent (0.03%) of such wages.

Article 5. Investments in Central Office Building

Authority to invest funds

3125. The director may from time to time, with approval of the Department of Finance, invest the money in the Disability Fund for the construction and equipment of a building or buildings and appurtenant facilities for the use of the Department of Employment as a central office in Sacramento. Costs and expenses necessarily incurred in connection with such investments, including but not limited to the costs of preliminary plans, services, and negotiations, shall be a proper charge against that portion of the Disability Fund available by law for the payment of benefits and shall constitute a part of the investment. The aggregate amount which may be invested under this section shall not exceed nine million five hundred thousand dollars ($9,500,000) except that when necessary because of increased building costs the aggregate amount may be increased with approval of the Director of Employment and the State Public Works Board by an additional amount not to exceed nine hundred fifty thousand dollars ($950,000).

Of the amount herein authorized to be invested upon request of the Director of Employment, there shall be transferred by the Controller five hundred thousand dollars ($500,000) to the Department of Employment Contingent Fund in repayment of the amount authorized to be expended from that fund for preliminary plans and specifications under Chapter 34 of the Statutes of 1950 (Third Extraordinary Session).

(Amended by Stats. 1953, Ch. 1776.)

[ORIGINAL SECTION]

3125 The director may from time to time, with the approval of the Department of Finance, invest the money in the Disability Fund for the construction and equipment of a building or buildings and appurtenant facilities for the use of the Department of Employment as a central office in Sacramento. Costs and expenses necessarily incurred in connection with such investments, including but not limited to the cost of preliminary plans, services, and negotiations, shall be a proper charge against that portion of the Disability Fund available by law for the payment of benefits and shall constitute a part of the investment. The aggregate amount which may be invested under this section shall not exceed nine million five hundred thousand dollars ($9,500,000).

Occupancy of buildings and facilities

3126. Any buildings or facilities acquired pursuant to this article shall be primarily for the occupancy of the Department of Employment and, until such time as the investment is repaid, shall be subject to the administration and supervision of the Department of Employment in accordance with rules and regulations which shall be established by the department with the approval of the Department of Finance. Such regulations shall be comparable to those for the administration and supervision of other state-owned buildings.

Allocation of space

3127. The director shall allocate space to the agencies and services comprising the department. Any buildings or facilities acquired pursuant to this article may contain space in excess of the requirements of the Department of Employment and, until needed, may be leased or let by the director at such rental and upon such terms and conditions as may be approved by the Department of Finance.

Rental charge

3128. For all space allocated by the director to the agencies and services comprising the department, or otherwise leased or let by the director pursuant to this article, the director shall charge a rental, to be approved by the Department of Finance. All such rentals shall be paid into the Disability Fund as repayment of any money invested under the provisions of this article, together with interest to be compounded annually at the close of business on December 31st of each year at a reasonable rate to be determined by the director with the approval of the Department of Finance.

Jurisdiction and control

3129. When the money invested under the provisions of this article for the providing and equipment of buildings or facilities has been repaid to the Disability Fund together with interest, the jurisdiction and control of any such buildings or facilities, and the operation and management thereof, shall vest in the Department of Finance, but the Department of Employment shall have priority to occupy any space within said buildings

or facilities at rental rates not exceeding the cost of providing maintenance and other services.

Construction of buildings and facilities

3130. The construction of buildings and facilities under this article shall be subject to the provisions of the State Contract Act.

CHAPTER 6. VOLUNTARY PLANS

Application for approval

3251. An employer, a majority of the employees employed in this State of an employer, or both, may apply to the director for approval of a voluntary plan for the payment of disability benefits to the employees so electing; the benefits payable as indemnification for loss of wages under any voluntary plan shall be separately stated and designated in the plan "unemployment compensation disability benefits" separate and distinct from other benefits, if any.

Exemption from contributions

3252. Neither an employee nor his employer shall be liable for the worker contributions required under this division with respect to wages paid by the employer while the employee is covered by an approved voluntary plan.

Employee covered by an approved voluntary plan

3253. Except as provided in this article, an employee covered by an approved voluntary plan shall not be entitled to benefits from the Disability Fund for a disability which commenced while he is covered by the voluntary plan. Authorized regulations shall be prescribed to allow benefits to individuals simultaneously covered by one or more approved voluntary plans and the Disability Fund.

Requirements for approval of voluntary plans

3254. The director shall approve any voluntary plan except one filed pursuant to Section 3255, as to which he finds that all of the following exist:

(a) The rights afforded to the covered employees are greater than those provided for in Chapters 2 and 3 of this part.

(b) The plan has been made available to all of the employees of the employer employed in this State or to all employees at any one distinct, separate establishment maintained by the employer in this State. "Employees" as used in this subdivision includes such individuals in partial or other forms of short time employment and employees not in employment as the director shall prescribe by authorized regulations.

(c) A majority of the employees of the employer employed in this State or a majority of the employees employed at any one distinct, separate establishment maintained by the employer in this State have consented to the plan

(d) If the plan provides for insurance the form of the insurance policies to be issued have been approved by the Insurance Commissioner and are to be issued by an admitted disability insurer.

(e). The employer has consented to the plan and has agreed to make the pay roll deductions required, if any, and transmit the proceeds to the plan insurer, if any.

(f) The plan provides for the inclusion of future employees.

(g) The plan will be in effect for a period of not less than one year and thereafter continuously unless the director finds

that the employer or a majority of his employees employed in this State covered by the plan have given notice of the termination of the plan. The notice shall be filed in writing with the director and shall be effective on the date indicated in the notice, but in any event not less than 60 days from the time of the filing of the notice.

(h) The approval of the plan or plans will not result in a substantial selection of risks adverse to the Disability Fund.

Voluntary plans for rotational workers

3255. When workers are engaged in an employment that normally involves working for several employers in the same industry interchangeably, and several employers or some of them cooperate to establish a plan for the payment of wages at a central place or places, and have appointed an agent under Section 1096, such agent, or a majority of workers regularly paid through such central place or places, or both, may apply to the director for approval of a voluntary plan for the payment of disability benefits applicable to all employees whose wages are paid at one or more such central place or places. The director shall approve any voluntary plan under this section as to which it finds that all of the following exist:

(a) The rights afforded to the covered employees are greater than those provided for in Chapters 2 and 3 of this part, and are separately stated and designated "unemployment compensation disability benefits" separate and distinct from other benefits, if any.

(b) The plan applies to all employees whose wages are paid at such central place or places with respect to all employment for which wages are paid at such central place or places.

(c) Seventy-five percent of the workers regularly paid at the central place or places have consented to the plan prior to the filing of the initial application for approval.

(d) If the plan provides for insurance the form of the insurance policies to be issued have been approved by the Insurance Commissioner and are to be issued by an admitted disability insurer.

(e) All employers paying wages through the central place or places have agreed to participate in the plan and the agent appointed under Section 1096 has agreed to make the pay roll deductions required, if any, and transmit the proceeds to the plan insurer, if any.

(f) The plan provides for the inclusion of all future employees paid at the central place or places.

(g) The plan is to be in effect for a period of not less than one year and, thereafter, continuously unless the director finds that the agent or a majority of the employees regularly paid at the central place or places has given written notice of termination of the plan. Such notice shall be filed in writing with the director at least 60 days before it is to become effective and, upon the filing, shall be effective as to wages paid after the beginning of the calendar quarter next following the end of the 60-day period.

(h) The approval of the plan or plans will not result in a substantial selection of risks adverse to the Disability Fund.

Pay roll deductions

3256. During the effective period of a plan approved under Section 3255 the employer, or his agent appointed under Section 1096, may make the pay roll deductions provided for by the plan, with respect to all employment covered by the plan.

Requirements for blanket coverage under voluntary plans

3257. Whenever eighty-five percent (85%) of the employees to whom a plan is available have consented to the plan, the employer, or seventy-five percent (75%) of the employees who have consented to the plan, or both, may elect to make the plan applicable to all employees to whom it is available, except those who reject the plan. In such case, there shall be filed with the director a notice stating that the requisite percentage of employees has consented to the plan and fixing the date upon which the plan will become applicable to all employees to whom it is available. At least 10 days before the date fixed in the notice, a notice shall be posted and circulated in a manner reasonably calculated to bring it to the attention of all employees to whom the plan is available but who have not consented thereto. The notice to such employees shall set forth the date the plan is to become applicable and the manner in which an employee may reject it.

From the time fixed in the notice filed with the director all employees to whom the plan is available shall be deemed to have elected to be covered by the plan, except those who advise the employer in writing of their rejection within the time fixed.

Every person employed after the date the plan becomes applicable and to whom the plan is available, shall be deemed to have elected to be covered by the plan from the time of employment unless he rejects the plan prior to or at the time of employment. Each employee at the time of employment shall be given a written notice specifying his right to consent to or to reject such plan and a written statement setting forth the essential features of the plan.

Any employee covered by a plan may withdraw from the plan as of the beginning of any calendar quarter upon giving reasonable notice in writing directed to the employer.

The form of the statement and the forms of the notices required under this section shall be approved by the director.

Security for noninsured plans

3258. If a voluntary plan does not provide for the assumption by an admitted disability insurer of the liability of the employer to pay the benefits afforded by the plan, the director shall not approve it unless the employer files with the director the bond of an admitted surety insurer conditioned on the payment by the employer of his obligations under the plan, or deposits with the director securities approved by him to secure the payment of such obligations. The penal sum of the bond or the amount of the deposit shall be determined by the director and shall be not less than one-half of the contributions which would have been paid by the employees to be covered by the plan during the preceding year, or one-half of the estimated contributions of such employees for the ensuing year, whichever is

greater. Upon approval, such bond, money, or securities shall upon his written order be deposited with the State Treasurer for the purpose herein specified. The Treasurer shall give his receipt for such deposits and the State shall be responsible for the custody and safe return of any securities so deposited.

Insurer liable for voluntary plan assessments

3259. Whenever an approved voluntary plan is insured by an admitted disability insurer, the insurer shall be substituted for the employer with respect to any assessments under this part which relate to the portion of the voluntary plan insured by such insurer.

Employee contributions to voluntary plans

3260. An employer may, but need not, assume all or part of the cost of the plan, and may deduct from the wages of an employee covered by the plan for the purpose of providing the disability benefits specified in this part and the costs as set forth in Section 3269 an amount not in excess of that which would be required by Section 984 if the employee were not covered by the plan.

Trust funds

3261. All money received or retained by an employer under a plan are trust funds and shall be separately accounted for by the employer. In the event of commingling of the funds or the bankruptcy or insolvency of the employer or the appointment of a receiver for the business of the employer, such funds are entitled to the same preference as are the claims of the State under Sections 1701 and 1702.

Withdrawal of approval of voluntary plan

3262. The director may after notice and hearing withdraw its approval of any voluntary plan if he finds that there is danger that the benefits accrued or to accrue will not be paid, that the security for such payment is insufficient, or for other good cause shown

Employee no longer covered by voluntary plan

3263. An employee who has ceased to be covered by an approved voluntary plan shall, if otherwise eligible, thereupon immediately become entitled to benefits from the Disability Fund to the same extent as though there had been no exemption from contributions as provided in this chapter

(Amended by Stats. 1953, Ch 1371 See Note following Section 2611.)

[ORIGINAL SECTION]

3263 An employee who has ceased to be covered by an approved voluntary plan shall, if otherwise eligible, thereupon immediately become entitled to benefits from the Disability Fund to the same extent as though there had been no exemption from contributions as provided in this chapter In computing the amount of benefits to which an employee is entitled from the Disability Fund during the remainder of a benefit year during a portion of which he received benefits under a voluntary plan, the amount of all benefits, at a weekly rate not exceeding the employee's weekly benefit rate pursuant to Section 2652, paid or to be paid to the employee under all approved voluntary plans during that benefit year, whether before or after cessation of coverage, shall be deducted from the benefits payable from the Disability Fund during that benefit year.

Appeals

3264. If any employer or insurer wholly or partially denies liability upon the claim of an employee for disability benefits under an approved plan, the employee may appeal the denial in the manner provided by law and authorized regulations for

an appeal on a claim for benefits payable out of the Disability Fund. All decisions of the Appeals Board denying benefits under this section shall be subject to review by the courts of this State by the exclusive remedy of filing a petition for writ of mandate. No such petition may be filed, however, until the employee exhausts the administrative remedies provided for in this division, nor may any other action be commenced by an employee upon a denial of his claim by his employer or insurer, as the case may be, other than that prescribed herein.

Appeal decision and enforcement

3265. If, on appeal, it is decided that an employee is entitled to receive disability benefits under an approved voluntary plan and the employer or insurer fails to pay the same within 15 days after notice of a decision by a referee or the Appeals Board, the director shall pay such benefits and assess the amount thereof against the employer or the insurer, and the provisions of Part 1 of this division with respect to the assessment and collection of contributions shall apply to the recovery of such benefit payments. Amounts so collected shall be deposited in the Disability Fund.

Sharing of benefit charges

3266. The proportionate share as determined by authorized regulations of benefits paid from the Disability Fund pursuant to Section 3263 for a disability which commenced while an employee was wholly or partially covered under an approved voluntary plan shall be assessed against the employer responsible for benefits under such plan. The provisions of Part 1 of this division with respect to the assessment and collection of contributions shall apply to assessments provided by this section, except that interest shall not accrue until 30 days after notice of assessment. The amounts of such assessments collected by the director under this section shall be deposited in the Disability Fund.

Reports and information to department

3267. Employers whose employees are participating in an approved voluntary plan and any insurer of an approved plan shall furnish such reports and information and make available to the department such records as the director may by authorized regulations require for the proper administration of this part.

Information from department

3268. The director shall, in accordance with authorized regulations, promptly furnish to employers, employees, or insurers, such information as may be required for the proper administration of an approved voluntary plan.

Assessments for administration

3269. The director shall in accordance with authorized regulations, determine each fiscal year the total amount expended for added administrative work arising out of voluntary plans. The total amount so determined shall be prorated among the approved voluntary plans in effect during that year on the basis of the amount of wages paid in employment by employers to individuals participating in such plans. The director shall make assessments of amounts so prorated against the employers responsible for benefits under such approved plans. The amount assessed shall not exceed two one-hundredths of 1 percent (0.02%) of the amount of wages paid in employment by em-

ployers to individuals participating in such plans. The provisions of Part 1 of this division with respect to the assessment and collection of contributions shall apply to the assessments provided by this section, except that interest shall not accrue until 30 days after notice of assessment. The amounts collected under this section shall be added to amounts otherwise made available for administration of this part.

Approval of plans

3270. The provisions of Section 3254 (h) and 3255 (h), dealing with substantial selection of risks adverse to the Disability Fund shall be inoperative during the calendar years 1954 and 1955.

(Added by Stats. 1953, Ch. 1371 See Note following Section 2611.)

(b) The application for such certification document was made to the issuing authority on or before the date upon which the actual service of such person in such position commenced

Urgency

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

There are many teachers who through no fault of their own were unable to register their credentials within the 30-day limit prescribed by law and are suffering by reason of having been deprived of their salary for periods of varying length, during which they rendered service to the school district and were at all times fully qualified to serve.

In order to restore the confidence of such teachers in the Public School System, and to encourage such teachers to remain in the teaching profession, rather than seeking employment in other fields subject to fewer strict regulations, at a time when an increase rather than a decrease in the number of teachers is essential to furnish an adequate education to the children of the State, it is necessary that this act go into immediate effect.

No provision of Chapters 11, 12, or 13 of Division 4 of said code which had been superseded or otherwise modified prior to the enactment of this act shall be revived or given any other effect than it would have had if this act had not been enacted. Legislative intent

SEC. 3. Chapter 15 is added to Division 6 of said code, to read:

The director shall examine the application, and if he finds that the applicant has fully complied with the provisions of this chapter, he shall issue a license authorizing the applicant to operate a dairy produce exchange. The license shall recite in bold type that the issuance thereof is permissive only

and does not constitute a recommendation or endorsement of the rules and regulations or bases of trade under which said applicant proposes to operate.

Investigation, suspension or revocation of licenses

The director may upon his own motion and shall, upon the verified complaint in writing of any person, investigate the actions of any dairy produce exchange and may temporarily suspend or permanently revoke licenses issued under the provisions of this chapter whenever the holder thereof is guilty of:

For each license, the director shall charge the sum of one hundred dollars ($100), which sum must accompany the application for the license Except as otherwise provided herein each license issued by the director shall continue in effect so long as the licensee shall continue in business, and shall pay a fee of one hundred dollars ($100) annually to the director. Such fee is payable on the first Monday of each calendar year.

Reports, records, etc

4007. The director may require such monthly or other periodical reports, records of market quotations and other statistical information as may be necessary to him in administering this chapter, and all such reports, statistics or information pertinent to each licensee shall be kept on file in the office of the director and subject to public inspection.

4008. The director shall have access to all records of every licensed dairy produce exchange, and may appoint a representative to sit with the board of directors or other governing body of such exchange.

4009. The director shall act as arbitrator in all cases of dispute or contention concerning the maintenance or operation of any licensed dairy produce exchange, or the by-laws, rules or regulations pertaining thereto. Upon receipt of any verified complaint concerning a licensed dairy produce exchange the director shall proceed to make a thorough investigation In this connection, he may conduct hearings, of which all interested parties shall receive due notice, and may require written statements setting forth the views of any or all contending parties. In this connection he shall invite the cooperation and solicit the opinion of the Federal Trade Commission and the Bureau of Agricultural Economics of the United States Department of Agriculture. On the basis of the information so obtained the director shall prescribe a tentative rule which shall be effective in the operation of any licensed dairy produce exchange for a period not to exceed 90 days. If, after such trial period, it shall appear that said tentative rule operates in a fair and equitable manner, it shall then upon order of the director be made a permanent rule of said licensed dairy produce exchange. If, in the conduct of any such investigation, it shall appear that any unlawful act or acts have been committed by any licensed dairy produce exchange, the director may initiate appropriate legal proceedings against such licenses. Disputes

4010. Any person who operates a dairy produce exchange without a license is guilty of a misdemeanor and shall also pay to the State one hundred dollars ($100) for each and every day of such operation; said moneys to be recovered by an action at law brought by the Attorney General in the name of the people. Penalties

Secret rebates, etc

4126. The payment, allowance, or acceptance of secret rebates, secret refunds, or unearned discounts, whether in the form of money or otherwise is an unfair practice.

Free inducements

4127. The giving of any milk, cream, dairy products, services, money, or articles of any kind except to bona fide charities for the purpose of securing or retaining the milk, cream or dairy products business of any wholesale customer or consumer is an unfair practice; provided, however, that nothing herein shall be construed to prohibit a distributor of frozen dairy products

for reasonable compensation as provided in Section 4138, from furnishing a wholesale customer with, and maintaining such refrigeration facilities as shall be reasonably necessary for the storage and preservation of the frozen products distributed by such distributor to such wholesale customer; provided further, that the use of said refrigeration facilities by any person for the storage or preservation of any product other than the frozen products distributed to said wholesale customer by the distributor furnishing such facilities is an unfair practice.

Special prices or services

4128. The extension to any wholesale customer or consumer of special prices or services not made available to all wholesale customers or consumers who purchase milk, cream, or dairy products of like quantity under like terms and conditions is an unfair practice.

Inducements to advertise

4129. No payment of money, credit, compensation, gift or loan of anything of value may be allowed or given to a wholesale customer for advertising or display in connection with the sale of a distributor's milk or cream or dairy products, or for the privilege of placing a sign, advertisement or other advertising material in, on or adjoining any premises occupied by such wholesale customer.

Outside advertising

4130. No outside advertising may advertise items other than the distributor's milk, cream and dairy products and items made from the same, except that the distributor may allocate not in excess of one-third of the advertising space to customer advertising.

Inside advertising

4131. Inside advertising material furnished by a distributor shall be confined and limited to the advertising of the milk, cream or dairy products manufactured by and/or distributed by the manufacturer or distributor of said milk, cream or dairy products and/or their agents and may include the name, brand, price or description of:

(a) The milk, cream and/or dairy products of said manufacturer or distributor.

(b) Fountain products which contain the milk, cream or dairy products as ingredients.

Discrimination in price

4133. Discrimination in price between wholesale customers, or between consumers, who purchase milk, cream, or dairy products of like grade and quality under like conditions of service where the effect of such discrimination may be substantially to lessen competition or to injure or destroy or prevent competition with the person who either grants or knowingly receives the benefit of such discrimination is an unfair practice; provided that nothing herein shall prevent differentials which make only due allowance for differences in the cost of the raw product used in such milk, cream, or dairy products, or the cost of manufacture, processing, sale or delivery resulting from

the different methods or quantities in which said commodities are manufactured, processed, sold or delivered.

Sale under cost

4134. The sale or offer to sell or giving of any article in any transaction involving the sale or disposal of milk, cream or dairy products, for less than the invoice or replacement cost thereof, whichever is lower, to secure or retain the milk, cream, or dairy products business of any wholesale customer or any person who buys as a consumer is an unfair practice.

4135. The sale of milk, cream, and dairy products at less than cost which, as used herein, shall mean the cost of raw product, plus all costs of manufacturing, processing, handling, sale and delivery, including overhead costs is an unfair practice. False statements

4136. False statements or representations, knowingly made, by any wholesale customer or consumer, or anyone acting on the behalf of either, to any distributor or manufacturer, or any representative thereof, that a competitor of such distributor or manufacturer has offered or is offering to sell, or is selling milk, cream, or dairy products to said wholesale customer or consumer at a lower price or prices than said manufacturer or distributor has offered or is offering to sell, or is selling the same, or that said competitor has offered or is offering to do, or is doing any of the business practices heretofore declared to be unfair and unlawful are unfair practices.

Loans

4137. The making or renewal of any money loans to any wholesale customers is an unfair practice.

Furnishing refrigeration facilities

4138. Refrigeration facilities may be furnished by distributor to retail stores and other wholesale customers, only to the extent that they are reasonably necessary for the preservation of frozen products distributed by said distributor on a rental basis for reasonable compensation as determined by the director after conducting a survey. Such compensation must provide for interest on investment, reasonable depreciation, and cost of repairs and maintenance during normal life of such facilities; provided, however, that nothing in the aforesaid fair trade practice provisions shall be construed to prohibit the distributor or manufacturer from placing such equipment on the premises of any wholesale customer and maintaining the same without charging compensation therefor when he satisfies the director, with facts, that said equipment is not accessible for ordinary service therefrom to customers of such wholesale customer, and that it is used only for storage and preservation of frozen products distributed by the manufacturer or distributor furnishing said equipment, and that it results in a reduction of the normal number of deliveries and a saving in delivery costs of such distributor or manufacturer.

Sale of equipment

4139. All equipment, including refrigeration facilities, may be sold to retail stores or other wholesale customers. Such sales may be made for cash or on a conditional sales contract, which

contract must provide for a payment of at least one-third cash and the balance to be paid on monthly installments for a term not to exceed 18 months. The prices prescribed in such conditional sales contract shall include interest at current rates, and shall include installation or maintenance for the life of said contract provided the distributor agrees to perform or cause to be performed such service.

Selling price of equipment

4140. The selling of any new equipment by a distributor or ice cream manufacturer to any customer or individual at a price other than the printed retail list price of the equipment manufacturer, jobber or their agent and at terms different than the printed retail terms of said equipment manufacturer or jobber or agent is prohibited.

Construction of article

4141. Nothing in this article shall be construed to prohibit the meeting, in good faith, of a lawful, competitive price or a lawful, competitive condition, nor shall any of said provisions be construed to prohibit a distributor from making conditional sales of equipment or other property, or from extending credit for merchandise purchased, or from paying a customer's obligations not prohibited hereunder to another distributor in connection with the transfer of said customer's business from the latter to the former; provided, however, that the terms and other conditions of the transactions permitted by this section shall conform to regulations prescribed by the director after investigation and determination by him that such regulations are consistent with good business practice.

Solicitation or collusion

4142. Solicitation by, or collusion or joint participation between or among, any manufacturer, distributor, wholesale customer, consumer, or any representative thereof, to commit any of the aforesaid unfair practices, or the use of any misrepresentation, threat, intimidation, or boycott to effectuate the commission of said unfair practices, shall make all persons participating therein subject to the penalties of this chapter.

Article 3. Applicability of Chapter

Liberal construction

4150. The provisions of this chapter shall be liberally construed as being complementary of and supplemental to the provisions of Chapter 17 of this division of this code. Whenever a provision of this chapter and a similar provision of said Chapter 17 is applicable to the same person and subject matter the provisions of said Chapter 17 shall control; and whenever a provision of this chapter is applicable to any person and subject matter as to which said Chapter 17 makes no express provision the provision of this chapter shall control.

CHAPTER 17. STABILIZATION AND MARKETING OF FLUID MILK AND FLUID CREAM

Article 1. General Provisions

Affected with a public interest

4200. The production and distribution of fluid milk and of fluid cream and the dissemination of accurate, scientific information as to the importance of milk and other dairy products in the maintenance of a high level of public health, is hereby declared to be a business affected with a public interest. The provisions of this chapter are enacted in the exercise of police powers of this State for the purpose of protecting the health and welfare of the people of this State.

Legislative purpose

4201. It is hereby declared that fluid milk and fluid cream are necessary articles of food for human consumption; that the production and maintenance of an adequate supply of healthful milk of proper chemical and physical content, free from contamination, is vital to the public health and welfare, and that the production, transportation, processing, storage, distribution or sale of fluid milk and fluid cream in the State of California is an industry affecting the public health and welfare; that unfair, unjust, destructive and demoralizing trade practices have been carried on and are now being carried on in the production, marketing, sale, processing or distribution of fluid milk and fluid cream, which constitute a constant menace to the health and welfare of the inhabitants of this State and tend to undermine sanitary regulations and standards of content and purity, however effectually such sanitary regulations may be enforced; that health regulations alone are insufficient to prevent disturbances in the milk industry which threaten to de-

stroy and seriously impair the future supply of fluid milk; and to safeguard the consuming public from future inadequacy of a supply of this necessary commodity; that it is the policy of this State to promote, foster and encourage the intelligent production and orderly marketing of commodities necessary to its citizens, including milk, and to eliminate speculation, waste, improper marketing, unfair and destructive trade practices, and improper accounting for milk purchased from producers.

Marketing areas

4202. It is recognized by the Legislature that conditions within the milk industry of this State are such that it is necessary to establish marketing areas wherein different prices and regulations are necessary, and for that purpose the Director of Agriculture of this State shall have the administrative authority, with such additional duties as are herein prescribed, after investigation and public hearing, to prescribe such marketing areas and modify the same when advisable or necessary.

4203 The foregoing statements in this article of facts, policy and application of this chapter are hereby declared a matter of legislative determination.

Purposes

4204. The purposes of this chapter are:

(a) To provide funds for administration and enforcement of this act, by assessments to be paid by producers of fluid milk or fluid cream, or both, and from licenses issued to distributors in the manner prescribed herein.

(b) To authorize and enable the director to prescribe marketing areas and to determine prices to producers for fluid milk or fluid cream, or both, which are necessary due to varying factors of costs of production, health regulations, transportation and other factors in said marketing areas of this State; provided, that the cost to distributors within any marketing area, for fluid milk or fluid cream shall be uniform with all other distributors purchasing fluid milk and fluid cream of similar grade or quality under like terms and conditions.

(c) To authorize and enable the director to formulate stabilization and marketing plans subject to the limitations herein prescribed with respect to the contents of such stabilization and marketing plans and declare such plans in effect for any marketing area.

(d) To enable the dairy industry with the aid of the State to correct existing evils, develop and maintain satisfactory marketing conditions, and bring about a reasonable amount of stability and prosperity in the production and marketing of fluid milk and fluid cream and provide means for carrying on essential educational activities.

Legislative intent

4205. It is the intent of the Legislature that the powers conferred in this chapter shall be liberally construed. Nothing in this chapter shall be construed as permitting or authorizing the development of conditions of monopoly in the production or distribution of fluid milk or fluid cream. In the establishment of the terms and conditions under which fluid milk and fluid cream shall be purchased from producers, and under which distributors and retail stores shall sell and distribute the same,

such terms and conditions shall be those which will, in the several localities and markets of the State and under the varying conditions of production and distribution insure an adequate and continuous supply of pure fresh wholesome fluid milk and fluid cream to consumers thereof at fair and reasonable prices.

The director may prescribe minimum prices to be paid by distributors in accordance with a stabilization and marketing plan for fluid milk and classify said milk according to usage by distributors; provided, that the prices so prescribed shall be based upon the economic relationship of the price of fluid milk for the marketing area involved to the price of manufacturing milk, taking into consideration the additional costs incurred in producing and marketing fluid milk over and above such costs incurred in producing and marketing manufacturing milk.

4247. The director may prescribe minimum prices to be paid by distributors for fluid cream in accordance with a stabilization and marketing plan; provided, that the prices so prescribed shall be based upon the economic relationship of the price of fluid cream for the marketing area involved to the price of manufacturing milk, taking into consideration the additional costs incurred in producing and marketing fluid cream over and above such costs incurred in producing and marketing manufacturing milk.

4248. The director may amend or terminate any stabilization and marketing plan, after notice and public hearing as prescribed in Article 5, in the event that he finds that such plan is no longer in conformity with the standards prescribed in, or will not tend to effectuate the purposes of, this chapter. Such hearing may be held upon the motion of the director and shall be held upon receipt of a petition signed by producers representing not less than 55 percent of the total number of all producers and not less than 55 percent of the total production of all producers who are eligible to petition the director for the formulation of such plan. Termination of plan

4249. The director may amend, after notice and public hearing called and held in the same manner as provided in Article 10, any minimum wholesale and retail prices established under the provisions of this chapter, in the event that he finds that any such price is, or that any such prices are, no longer in conformity with the standards prescribed therefor, or will not tend to effectuate the purposes of this chapter. Amendment and termination of minimum prices

4250. The director may terminate any such minimum wholesale and retail prices without notice or hearing at any time that there is no stabilization and marketing plan in force and effect in such marketing area.

"Department of Agriculture Fund"

4258. All money received by the director hereunder shall be paid monthly into the State Treasury to the credit of the "Department of Agriculture Fund."

Consolidated hearings

4259. Whenever the director determines that it is probable that one or more factors or conditions which affect prices of fluid milk and fluid cream have changed on a relatively uniform basis throughout two or more marketing areas he may consolidate the hearings on the matter of price changes for such areas. No price change shall be made as a result of such a consolidated hearing unless it is uniform throughout the areas affected.

Article 5. Formation and Adoption of Stabilization and Marketing Plans

Marketing areas

4270. The director shall designate marketing areas which he deems necessary or advisable to effectuate the purposes of this chapter, and wherein he finds the conditions affecting the production, distribution and sale of fluid milk, fluid cream or both are reasonably uniform. The director shall have the power to establish additional areas or to modify areas theretofore established when he deems the establishment or modification of such areas necessary or advisable to effectuate the purposes of this chapter. When the director finds, after a public hearing in and for each particular marketing area under consideration for consolidation, that conditions of production and distribution are reasonably uniform in two or more such marketing areas wherein stabilization and marketing plans and minimum wholesale and minimum retail prices are in effect, he may consolidate the areas; provided, that at said hearings more than thirty-five (35) percent of the producers present who supply the areas proposed to be consolidated do not object to such consolidation.

Public hearings

4271. The director shall, prior to the formulation of a stabilization and marketing plan for fluid milk for any marketing area, conduct a public hearing in said area for the purpose of determining whether or not producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area and who represent not less than 65 percent of the total number of producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area, and who produce not less than 65 percent of the total volume of the fluid milk produced for said marketing area by all such producers, desire that a stabilization and marketing plan for fluid milk be formulated for said area; but if a petition is presented to the director by the producers whose

major interest in the fluid milk business is in the production of fluid milk for the marketing area, and who represent not less than 65 percent of the total number of producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area, and who produce not less than 65 percent of the total volume of the fluid milk produced for said marketing area by all such producers, it shall not be necessary that such hearing be held.

4272. The director shall, prior to the formulation of a stabilization and marketing plan for fluid cream for any marketing area, conduct a public hearing in said area for the purpose of determining whether or not producers whose major interest in the fluid cream business is in the production of fluid milk for fluid cream for said marketing area and who represent not less than 65 percent of the total number of producers whose major interest in the fluid cream business is in the production of fluid milk for fluid cream for said marketing area and who produce not less than 65 percent of the total volume of fluid milk for fluid cream produced for said marketing area by all such producers, desire that a stabilization and marketing plan for fluid cream be formulated for said area; but if a petition is presented to the director by producers whose major interest in the fluid cream business is in the production of fluid milk for fluid cream for said marketing area and who represent not less than 65 percent of the total number of producers whose major interest in the fluid cream business is in the production of fluid milk for fluid cream for the marketing area and who produce not less than 65 percent of the total volume of fluid milk for fluid cream produced for said marketing area by all such producers, it shall not be necessary that such hearing be held

Notice of hearing

4273. If the director finds that a stabilization and marketing plan is necessary to accomplish the purposes of this chapter, he shall formulate a stabilization and marketing plan for fluid milk or fluid cream or both for such area and issue a notice of public hearing upon the plan formulated to all producers and distributors of record with the Department of Agriculture who may be subject to the provisions of such plan. The notice of hearing may be effected by mail, or by publication for five successive days in a newspaper of general circulation in the area designated and shall specify the time and place of such hearing, which shall not be held prior to 10 days from the mailing, or from the final publication of such notice; provided, however, that if no daily newspaper of general circulation is published in the area designated, publication of notice for two successive weeks in a weekly newspaper of general circulation in the area will be considered proper publication of notice At the hearing, interested parties shall be heard and records kept of the proceedings of such hearing for determination by the director whether the plan proposed will accomplish the purposes of this chapter If, after public hearing the director determines that the proposed plan will tend to accomplish the purposes of this chapter within the standards herein prescribed, he shall issue an order to all pro-

ducers and distributors of record with the director and subject to the provisions of such plan, declaring such plan in effect within 30 days from the date of such hearing.

Local control boards

4274. The director may appoint local control boards for the marketing areas established as prescribed in this chapter to assist and advise him in matters pertaining to the production and marketing of fluid milk or fluid cream or both or to the operation of a stabilization and marketing plan. The board shall consist of seven members who shall be producers who supply fluid milk or fluid milk for fluid cream to the particular marketing area. The term of office of each such member shall be two years, unless the plan is terminated before said term expires. Said local board may meet in regular session each month, and each member shall be allowed ten dollars ($10) per diem and mileage at the rate of five cents ($0.05) per mile for attending such regular meetings. The board, or any member thereof, may be allowed actual and necessary expenses incurred in attending any meeting or conference called or authorized by the director within or outside of the boundaries of the State of California. Said board with the previous approval of the director may employ such personnel as may be necessary in the performance of its duties and shall adopt rules and regulations for its conduct. The board shall submit a budget of its expenses to the director for his approval. The funds to be used for the maintenance of the board shall be paid from the proceeds of assessments and licenses paid to the director under the plan upon verified claims presented by the board to the director. The board shall not incur any expenses other than those for per diem and mileage, unless approved by the director.

Article 6. Mandatory Provisions

Unfair practices prohibited in plan

4280. Each stabilization and marketing plan shall contain provisions for prohibiting distributors and retail stores from engaging in the unfair practices hereinafter set forth:

(a) The payment, allowance or acceptance of secret rebates, secret refunds, or unearned discounts by any person, whether in the form of money or otherwise.

(b) The giving of any milk, cream, dairy products, services or articles of any kind, except to bona fide charities, for the purpose of securing or retaining the fluid milk or fluid cream business of any customer.

(c) The extension to certain customers of special prices or services not made available to all customers who purchase fluid milk or fluid cream of like quantity under like terms and conditions.

(d) The false or misleading advertising of fluid milk or fluid cream as defined in Sections 17500, 17501, and 17502 of the Business and Professions Code.

(e) The purchase of any fluid milk in excess of 200 gallons monthly from any producer or association of producers unless a written contract has been entered into with such pro-

ducer or association of producers stating the amount of fluid milk to be purchased for any period. The quantity of such milk to be paid for as Class 1 in pounds of milk or pounds of milk fat or gallons of milk, and the price to be paid for all milk received, but in any marketing area where an equalization pool is a part of a stabilization and marketing plan, such contract need not specify the quantity of milk in any one class. The contract shall also state the date and method of payment for such fluid milk, which shall be that payment shall be made for approximately one half of the milk delivered in any calendar month not later than the first day of the next following month and the remainder not later than the 15th day of said month, the charges for transportation if hauled by the distributor, and may contain such other provisions as are not in conflict with this chapter, and shall contain a proviso to the effect that the producer shall not be obligated to deliver in any calendar month fluid milk to be paid for at the minimum price for fluid milk that is used for Class 3, as said class is defined in Section 4228. A signed copy of such contract shall be filed by the distributor with the director within five days from the date of its execution.

(f) The purchasing, processing, bottling, transporting, delivering or otherwise handling in any marketing area of any fluid milk or fluid cream which is to be or is sold or otherwise disposed of by such distributor at any place in the geographical area within the outer, outside and external boundaries or limits of such marketing area, whether such place is a part of the marketing area or not, at less than the minimum wholesale and minimum retail prices effective in such marketing area.

(g) The payment of a lesser price by a distributor to any producer for fluid milk or fluid cream which is distributed to any person, including agencies of the federal, state or local government, located upon property within the geographical limits of any marketing area for less than the minimum prices established by the director to be paid by distributors to producers for fluid milk or fluid cream for said marketing area.

Plan to contain minimum prices for fluid milk

4281. Each such plan shall contain provisions whereby the director designates and prescribes or provides methods for designating or prescribing minimum prices to be paid by distributors to producers, for fluid milk in one or more of the various classes; provided, however, that the prices so designated or prescribed shall be based upon the economic relationship of the price of fluid milk for the marketing area involved to the price of manufacturing milk, taking into consideration the additional costs incurred in producing and marketing fluid milk over and above costs incurred in producing and marketing manufacturing milk; and provided further, the director finds that such prices will tend to effectuate the purposes and policy of this chapter and will insure consumers a sufficient quantity of pure and wholesome milk.

Article 7. Optional Provisions

Report

4290. Each stabilization and marketing plan may contain provisions whereby distributors shall report to each producer from whom fluid milk is secured, the volume of fluid milk received from such producer in pounds of milk, the milk-fat test of such milk and the amount of fluid milk in milk-fat pounds paid for in the several classes and the prices paid for the various classes for each month.

Prescribing minimum prices for fluid cream, etc

4291. Each such plan may contain provisions whereby the director designates and prescribes or provides methods for designating or prescribing minimum prices to be paid by distributors to producers for fluid cream; provided, that the prices so designated or prescribed shall be based upon the economic relationship of the price of fluid cream for the marketing area involved to the price of manufacturing cream, taking into consideration the additional costs incurred in producing and marketing fluid cream over and above costs incurred in producing and marketing manufacturing milk; and provided further, that the director finds that such prices will tend to effectuate the purposes and policy of this chapter and will insure consumers a sufficient quantity of pure and wholesome cream.

4292. Each such plan may contain provisions whereby the director may provide methods for the establishment of minimum prices for fluid milk or fluid milk for fluid cream received within a marketing area regardless of whether such fluid milk or fluid milk for fluid cream is subsequently sold or distributed within or without such marketing area or within or without the jurisdiction of the State of California. Such stabilization and marketing plans may provide for the establishment of prices for fluid milk or fluid milk for fluid cream whether or not such fluid milk or fluid milk for fluid cream is subsequently sold or distributed in another marketing area within the State of California where a stabilization and marketing plan is in effect. The stabilization and marketing plan may provide that producers shall be paid not less than the minimum prices established for the marketing area wherein such fluid milk or fluid milk for fluid cream is ultimately sold or distributed, and may further provide that in the event such fluid milk or fluid milk for fluid cream is subsequently sold or distributed in any place within the jurisdiction of the State of California where no stabilization and marketing plan is in effect, then such fluid milk or fluid milk for fluid cream may be paid by the distributor to the producer thereof at not less than the average price paid by distributors to producers for fluid milk or fluid milk for fluid cream of similar grade and quality at the plants in the vicinity where such fluid milk or fluid milk for fluid cream is so sold or distributed, as such prices are determined by the director from contracts required to be filed with him pursuant to Section 4280.

Milk not used as Class 1 milk

4293. The director may issue and make effective provisions establishing minimum prices to be paid by distributors to pro-

ducer-distributors for milk which is not used by the purchasing distributor as Class 1 milk and which provisions may provide that such milk if used in classes other than Class 1 by the purchasing distributor may be paid for at the minimum prices established by the director for such other usage but which shall not be less than the prices as found by the director to be paid by manufacturing milk plants in or adjacent to the area using milk for similar purposes. Such prices shall remain in effect only for the period during which, as determined by the director, there is a surplus of producer-distributor milk.

Equalization pool

4294. Each such plan may contain provisions whereby the director designates or prescribes methods to provide uniform prices to be paid to all producers supplying fluid milk to distributors for pasteurization purposes in the marketing area involved by pooling the returns of all such fluid milk; provided, that no equalization pool shall be established unless the director, after hearing, determines that producers who supply distributors with not less than sixty-five (65) percent of the total volume of fluid milk used for pasteurization purposes and who represent not less than sixty-five (65) percent of the total number of such producers desire the establishment of such pool, but no hearing shall be necessary if said sixty-five (65) percent, by volume and production, of such producers petition the director in writing to establish such equalization pool as a part of the plan. If the director finds that an equalization pool is necessary to carry out the provisions of this chapter he shall make provision therefor. The director may designate the local control board for the marketing area as his agency to operate the equalization pool and may permit such local board to employ a pool manager and such other necessary personnel and to incur such expenses incidental to the operation of the pool as the director finds are necessary. The director is hereby empowered to require distributors to make reports to the pool manager at such intervals and in such detail as he finds is necessary for the operation of the pool which reports shall be kept confidential as to any individual distributor but shall be available to the director or his agents and the pool manager, and such employees of the pool as are necessary to the operation of the equalization pool.

Premiums and differentials

4295. No provision of any pooling program shall prevent any distributor from paying premiums for quality; provided, all producers supplying fluid milk of like quality to such distributor are paid similar premiums, nor shall any provision prohibit the paying of different prices to producers based on differentials in transportation, adjustments or deductions made by a cooperative association of producers to its members, including the blending of proceeds received from the sale of fluid milk by such cooperative in other markets. Distributors who purchase fluid milk from producers for pasteurization purposes shall deduct from payments due such producers at such time and in such manner such sums as the director determines are sufficient to insure uniform prices to all producers subject to

Deductions

the provisions of the equalization pool, irrespective of the usage of such fluid milk by the distributors. Distributors shall make, in addition to the deductions herein prescribed, such additional deductions per pound milk fat as the director finds necessary to pay all expenses incidental to the operation of the equalization pool, including the establishment of a reserve account to insure prompt payments to producers. The deductions herein prescribed are in addition to any other deductions prescribed by this chapter.

Prohibition

4296. No distributor subject to the provisions of any stabilization and marketing plan shall purchase milk from producers who do not comply with the provisions of this chapter and such plan. No such plan shall involve a limitation upon the production of fluid milk or fluid cream.

Article 8. Sales Stimulation and Consumer Educational Programs

Sales stimulation and consumer educational programs

4310. Each stabilization and marketing plan may contain provisions whereby sales stimulation or consumer educational programs may be formulated and administered to increase the consumption of fluid milk and fluid cream, or other dairy products; provided, that such programs shall be carried on without reference to a particular brand or trade name; and provided further, that no such sales stimulation or consumer educational program shall be carried on which shall make use of false or unwarranted claims on behalf of such products or which disparages the quality, value, sale or use of any fluid milk or fluid cream or any other agricultural commodity authorized by law to be marketed within such marketing area.

Petition

4311. Before any stabilization and marketing plan may provide for sales stimulation and consumer educational programs, not less than sixty-five (65) percent of the producers and who produce not less than sixty-five (65) percent of the total volume of fluid milk consumed in any marketing area shall petition the director in writing for the inclusion of such a program as part of the stabilization and marketing plan. If such a program is requested by distributors it shall be necessary that not less than sixty-five (65) percent of the total number of distributors and who distribute not less than sixty-five (65) percent of the total volume of fluid milk for consumption in the marketing area shall petition the director in writing for the inclusion of such a program as part of the stabilization and marketing plan.

4312. The petition shall bear the signatures of petitioners, their addresses and the approximate daily volume of fluid milk handled in gallons and milk-fat pounds and the type of product distributed, together with the estimated cost of the program each month and the number of months the program is to continue in operation.

Financing

4313. A sales stimulation and consumer educational program instituted by producers shall be financed by all producers supplying fluid milk to the marketing area. Such program, if

instituted by distributors, shall be financed by all distributors supplying fluid milk to the marketing area. If such program is instituted by both producers and distributors, both producers and distributors shall finance the program equally.

Producer assessments

4314. If the program is instituted by producers the director is hereby empowered to require producers to pay assessments of not more than two mills ($0.002) per pound milk fat, or if the program is instituted upon a gallonage basis not more than seven mills ($0.007) for each 10 gallons of fluid milk received by distributors, including the production of distributors who are also producers.

Distributor assessments

4315. If the program is instituted by distributors the director is hereby empowered to require distributors to pay assessments of not more than two mills ($0.002) per pound milk fat, or if the program is instituted upon a gallonage basis not more than seven mills ($0.007) for each 10 gallons of fluid milk received by distributors, including the production of distributors who are also producers.

Joint assessments

4316. If the program is instituted by both producers and distributors, the director is hereby empowered to require both producers and distributors to pay assessments for the purpose of providing funds for formulating, administering, and carrying on such program. The assessments to be paid by distributors shall not exceed two mills ($0.002) per pound milk fat, or if the program is instituted upon a gallonage basis not more than seven mills ($0.007) for each 10 gallons of fluid milk received by distributors including the production of distributors who are likewise producers. Assessments of not more than two mills ($0.002) per pound milk fat, or if the program is instituted upon a gallonage basis, not more than seven mills ($0.007) for each 10 gallons of fluid milk produced by producers and received by distributors, shall likewise be paid by producers. In no instance shall the combined assessments exceed four mills ($0.004) per pound milk fat, or if the program is instituted upon a gallonage basis not more than fourteen mills ($0.014) for each 10 gallons of fluid milk received from producers and processed by distributors for distribution in the marketing area in the form of whole milk, fluid cream, or manufactured dairy products derived from fluid milk.

Public hearing

4317. Before a program may be instituted a public hearing shall be called by the director, the procedure for which public hearing is to be the same as that required for the institution of a stabilization and marketing plan for fluid milk. At such public hearing testimony and evidence shall be taken to determine the necessity of such a program, the estimated costs of the program, the time during which the program is to be continued, and such other matters as are necessary in the institution of the program.

Effectuating program

4318. If, after public hearing and consideration of the testimony and evidence presented at said hearing, the director finds that a sales stimulation and consumer educational program will tend to effectuate the purposes of this chapter, he shall issue an

order making effective such program. Such order shall state the number of months the program shall continue in operation, the rate of assessment per pound milk fat or per gallon to be paid by those petitioning for the program, the names, addresses and business locations of the persons appointed to administer the program and such order may contain other provisions which are necessary and incidental to the operation of the program.

Administration

4319. The person named in the order to administer the program shall be selected by the director in the following manner and in the following number:

(a) If the program was instituted by producers the director shall name five representative producers from nominations made at the public hearing by the petitioners.

(b) If the program was instituted by distributors the director shall name five representative distributors from nominations made at the public hearing by the petitioners.

(c) If the program was instituted by both producers and distributors the director shall name three representative producers from nominations made at the public hearing by the petitioning producers and three representative distributors from nominations made at the public hearing by petitioning distributors.

(d) Distributors who are also producers shall be eligible to nomination for service on, and may be named by the director to serve on the committee to administer any program for which they will be required to pay assessments, and at least one of the persons named by the director to serve on any committee to administer any program for which distributors who are also producers will be required to pay assessments shall be a distributor who is also a producer.

Approval of director

4320. All programs shall be administered by the persons named in the order of the director making the program effective, and shall be administered subject to the approval of the director. All amounts required to be paid to the director under this article by producers or distributors shall be paid to such director on or before the fifteenth day of the month following the month during which such fluid milk was received by distributors and all distributors receiving milk from producers in any area where the provisions of this article are in effect whereby the director is empowered to require payments from producers shall deduct and pay to the director such payments provided for under this article from the payments due for such distributors to such producers for fluid milk.

Termination of program

4321. Upon the termination of any program, if there are any obligations arising thereunder, the final accrual or ascertainment of which requires further acts by any producer or distributor or by the persons appointed to administer the program or by the director, the power or duty to perform such further acts shall continue, notwithstanding such termination.

Article 9. Special Provisions for Frozen Milk or Cream

Purchase for cold storage

4330. Each distributor who purchases from producers fluid milk and/or fluid milk for fluid cream for the purpose of freezing

and holding in cold storage the market cream or concentrated market cream derived therefrom, as authorized in Section 460.5 of this code, shall pay to producers not less than the minimum price for Class 2 milk as provided in the stabilization and marketing plan in the area in which such purchases are made, and shall keep a record of all such lots of fluid milk and/or fluid milk for fluid cream received from each producer. Should such market cream or concentrated market cream be subsequently sold in Class 1 and the Class 1 price established in the stabilization and marketing plan applicable to the area where such market cream or concentrated market cream is sold exceed the price paid for the fluid milk and/or fluid milk for fluid cream established in the stabilization and marketing plan, the distributor shall pay to the producer the difference between the Class 2 and the Class 1 price, less the cost of storage of such market cream or concentrated market cream.

Article 10. Minimum Wholesale and Retail Prices

Minimum prices

4350. Pursuant to the declaration and statements of facts, policy and purposes set forth in this chapter, the director is hereby vested with the additional administrative duty and authority to prescribe and enforce minimum wholesale prices and minimum retail prices as hereinafter set forth.

Function of director

4351. The director shall in all marketing areas wherein a stabilization and marketing plan for fluid milk or fluid cream is in effect under the provisions of this chapter, designate and prescribe or provide methods for designating and prescribing minimum wholesale and minimum retail prices for fluid milk, including pasteurized concentrated milk, or fluid cream.

At the time any stabilization and marketing plan is hereafter established under the provisions of this chapter, the director shall designate and prescribe, or provide methods for designating and prescribing, such minimum wholesale prices and such minimum retail prices; provided, however, that all prices established under the terms of this article shall be such prices as are determined by the director pursuant to the provisions of this article.

Minimum wholesale prices

4352. Minimum wholesale prices, as used herein, shall mean prices at which fluid milk or fluid cream, or both, shall be sold by distributors to retail stores including the prices at which fluid milk or fluid cream shall be sold by distributors to retail stores, restaurants, confectioneries and other places for consumption on the premises but excluding, however, the prices at which fluid milk or fluid cream, or both, shall be sold by distributors to retail stores owned or operated by such distributor. Minimum wholesale prices, as used herein, includes prices at which fluid milk or fluid cream, or both, shall be sold by distributors to other distributors, other than in bulk, which prices may vary from the minimum prices established for sales by distributors to other wholesale customers; provided, however, the director shall not be required to establish such minimum wholesale prices in those

marketing areas wherein he finds, after public hearing held pursuant to this article, that conditions of transportation, production, and distribution are such that the establishment thereof will cause disparity in prices to exist between two or more marketing areas.

Minimum retail prices

4353. Minimum retail prices herein, shall mean prices at which fluid milk or fluid cream, or both, shall be sold by distributors and retail stores to consumers.

Investigation and hearing

4354. In determining minimum wholesale prices and minimum retail prices in any marketing area, the director shall first make an investigation in such marketing area to establish such facts as shall be necessary to permit him to carry out the intent of this article within the standards herein prescribed. In making such investigation, the director may examine the books and records of distributors and retail stores in such marketing area and shall hold one or more public hearings, take testimony and may subpena witnesses All testimony received at such hearings shall be under oath. Notice of any hearing held by the director, pursuant to this article, shall be given by the director to every distributor and retail store in such marketing area whose name appears upon the records of the Department of Agriculture or who files a request for the same with the department, by mail or by publication for the time and in the manner prescribed in Section 4273. A record of any and all hearings held by the director, pursuant to this article, shall be made and filed in the office of the director and shall, at all times, be available to inspection by any interested person.

Economic factors considered

4355. In determining minimum wholesale and minimum retail prices for any marketing area, the director shall take into consideration the following economic factors operative in such marketing area in addition to other matters required by this chapter to be taken into consideration by him:

(a) The quantities of fluid milk or fluid cream, or both, distributed in such marketing area.

(b) The quantities of fluid milk or fluid cream, or both, normally required by consumers in such marketing area.

(c) The cost of fluid milk or fluid cream, or both, in such marketing area to distributors and retail stores, which in all cases shall be, respectively, the prices paid by distributors to producers and the minimum wholesale prices, as established pursuant to this chapter.

(d) The reasonable cost of handling fluid milk or fluid cream, or both, incurred by distributors and retail stores, respectively, including all costs of hauling, processing, selling and delivering by the several methods used in such marketing area in accomplishing such hauling, processing, selling and delivery, as such costs are determined by impartial audits of the books and records, or surveys, or both, of all, or such portion of the distributors and retail stores, respectively, of each type or class in such marketing area as are reasonably determined by the director to be sufficiently representative to indicate the costs of all

distributors and retail stores, respectively, in such marketing area.

Cost of handling and distributing

4356. In determining the cost of handling and distributing fluid milk or fluid cream, or both, by retail stores handling commodities in addition to fluid milk or fluid cream, or both, the director shall determine the cost of doing business for each such representative retail store and for such purpose shall consider all costs and expenses of doing business including depreciation on inventory and equipment. In the absence of satisfactory evidence to the contrary, the cost of handling such fluid milk or fluid cream, or both, shall be presumed to be the same percentage as the cost of doing business of such retail store in conducting its entire business.

Consumption on the premises

4357. The director shall take into consideration the reasonable cost of handling fluid milk or fluid cream, or both, incurred by distributors in hauling, processing, selling and delivering to restaurants, confectioneries or other places for consumption on the premises wherein it is required by law that service to customers be made from the original container. In fixing the minimum wholesale price to be paid distributors by such persons, the director shall take into consideration such legal requirements and other factors and distribution costs peculiarly affecting service to such persons, and if the director reasonably determines that such factors and costs require that the minimum wholesale prices to be paid distributors by such persons vary from the minimum prices established for other wholesale customers, the prices established to be paid by such persons may vary accordingly.

Capacity for processing and distributing

4358. The director shall take into consideration the amount of the available capacity for processing and distributing fluid milk, or fluid cream, or both, of all distributors in such marketing area and the estimated extent to which such available capacity is being used by such distributors.

Purchasing power

4359. The director shall take into consideration the purchasing power of consumers in such marketing area.

Prices effective, when

4360. Following such hearings, investigation and examinations authorized above, the director shall establish minimum wholesale and minimum retail prices for such marketing area, and shall declare such prices effective in the same manner as that prescribed in this chapter for declaring producer prices effective; provided, that the director finds, in writing, with respect to such prices:

(a) That such prices are not more than reasonably sufficient to cover all necessary costs, according to the method or type of distribution, including a reasonable return upon necessary capital invested, of reasonably efficient distributors and retail stores engaged in the distribution of fluid milk, fluid cream, or both, in such marketing area as such necessary costs of reasonably efficient distributors and retail stores are shown to the director by the facts available to the director from the investigations, surveys, audits, and hearings required in this section.

(b) That such prices will tend to maintain in the business of distributing fluid milk and fluid cream, or both, such number of reasonably efficient retail stores and distributors of fluid milk and fluid cream, or both, in such marketing area as the director finds is necessary to insure to consumers in such marketing area sufficient distribution facilities of the several types or methods commonly used by consumers.

(c) That such prices will protect the interests of consumers of fluid milk, fluid cream, or both, in such marketing area by insuring to them adequate and efficient distribution facilities of the several types or methods commonly used by them without requiring such consumers to pay more for their supplies of such fluid milk, fluid cream, or both, than is necessary to maintain such adequate and efficient distribution facilities in such marketing area.

Sale at less than minimum

4361. No distributor shall sell to any retail store, restaurant, confectionery or other place for consumption on the premises, or to any consumer, and no retail store, restaurant, confectionery or other place for consumption on the premises, shall purchase from any distributor or sell to any consumer, any fluid milk or fluid cream, or either of them, at less than the prices as established by the director under the provisions of this article, and the use or attempted use of any method, device or transaction whereby any distributor sells or offers or agrees to sell to any retail store, restaurant, confectionery or other place for consumption on the premises, or consumer or any retail store, restaurant, confectionery or other place for consumption on the premises, buys or offers or agrees to buy from any distributor, or sells or offers or agrees to sell to any consumer fluid milk or fluid cream, or either, at a price less than that established by the director under the provisions of this article, whether by discount, rebate, free service, advertising allowance, lease of refrigeration or other equipment, or gift, or otherwise and whether any such discount, rebate, free service, advertising allowance, lease of refrigeration or other equipment, or gift applies directly to fluid milk or fluid cream or is allowed upon or in connection with the sale or handling of any other commodity or product, is hereby prohibited.

Schedule of prices

4362. Every distributor in any marketing area wherein an order establishing minimum wholesale and minimum retail prices is in effect shall file with the director schedules and any amendments thereto setting forth the prices at which each such distributor is selling or offering or agreeing to sell fluid milk, fluid cream and dairy products, excluding butter, cheese other than cottage cheese, canned milk, powdered milk, casein and ice cream, in such marketing area. Such filings shall be made in such office of the director as he shall designate. Such prices shall not become effective until the fifth day after filing. Evidence of any sale of, or offer or agreement to sell such fluid milk, fluid cream or dairy products by a distributor, made as part of, or in connection with the sale of, or offer or agreement to sell fluid milk and fluid cream, or both, in a marketing area where

prices for fluid milk or fluid cream, or both have been established by the director, at less than the prices theretofore filed with the director by such distributor pursuant to the provisions of this section, shall constitute prima facie proof of a violation of this section. Offers and agreements to sell, as used herein, shall include offers and agreements which are conditional, or which shall become effective, upon the filing thereafter of amended prices by the distributor making such offer. Upon receipt of such amendments the director shall forthwith date, file, and index the same in such manner that the information therein contained shall at all times be kept current and be readily available to any interested party desiring to inspect the same. Any other distributor in the marketing area may meet any such prices so filed; provided, that such distributor shall file with the director a schedule of prices not exceeding the prices so met by him within 24 hours after meeting the same.

Local control boards Qualifications, terms, meetings, etc

4363. The director may appoint local control boards for the marketing areas established pursuant to this chapter to assist and advise him in matters pertaining to the marketing, distribution and sale of fluid milk or fluid cream or both. The board shall consist of nine members, who shall be residents of or engaged in business within the marketing area for which they are appointed by the director, four of whom shall be persons whose major interest is the distribution, marketing or sale of fluid milk or fluid cream or both, one producer-distributor, two retail storekeepers, one person active in the restaurant business or a person representing restaurants and one person, representative of the consuming public, who has no connection with the milk or cream business. In marketing areas where organized labor is the collective bargaining agent of milk plant employees the director may, upon recommendation of a majority of the board members, add a representative of organized labor to the local distributor board. The terms of office of each member shall be two years, unless the plan is terminated before said term expires. Said local board may meet in regular session each month, and each member shall be allowed ten dollars ($10) per diem and mileage at the rate of five cents ($0.05) per mile for attending such regular meetings. The board, or any member thereof, may be allowed actual and necessary expenses incurred in attending any meeting or conference called or authorized by the director within or outside of the boundaries of the State of California. Said board with the previous approval of the director may employ such personnel as may be necessary in the performance of its duties and shall adopt rules and regulations for its conduct. The board shall submit a budget of its expenses to the director for his approval. The funds to be used for the maintenance of the board shall be paid from the proceeds of fees and licenses paid to the director under the plan upon verified claims presented by the board to the director. The board shall not incur any expenses other than those for per diem and mileage, unless approved by the director.

Article 11. Distributors' Licenses, Fees and Bonds

License

4375. No distributor shall deal in fluid milk or fluid cream without first having obtained a license from the director. The special licenses provided in this section are in addition to any and all licenses required by any section of Division 4, Agricultural Code, or any law or ordinance of any county or municipality of this State. Applications for the licenses herein provided shall be made on forms prescribed by the director, shall be accompanied by an application fee of three dollars ($3), and shall state the name and address of the applicant and such details as to the nature of the applicant's business as the director may require. Such applicant shall further satisfy the director of his or its character, responsibility and good faith in seeking to carry on the business stated in the application. Licenses shall be issued for a period of twelve (12) months from the first day of each year or for the remainder of the calendar year from the date of issuance. Application for renewal of a license for the following year by a licensee, together with the application fee of three dollars ($3), shall be made prior to the expiration date of the license held, and if not so made the applicant shall pay an additional sum equal to 100 percent of the application fee before such license shall be issued.

Surety bond

4376. Every distributor before purchasing any fluid milk or fluid cream from a producer must execute and deliver to the director a surety bond in the minimum sum of one thousand dollars ($1,000), executed by the applicant as principal and by a surety company qualified and authorized to do business in this State as surety. Said bond shall be upon a form approved by the director, and shall be conditioned upon the payment in the manner required by this chapter, of all amounts due to producers for fluid milk and fluid cream purchased by such licensee or applicant during the license year. Said bond shall be to the State in favor of every producer of fluid milk and fluid cream. In case of failure by a distributor to pay any producer or producers for fluid milk or fluid cream in the manner required by this chapter, the director shall proceed forthwith to ascertain the names and addresses of all producer-creditors of such distributor, together with the amounts due and owing to them and each of them by such distributor, and shall request all such producer-creditors to file a verified statement of their respective claims with the director. Thereupon the director shall bring an action on the bond on behalf of said producer-creditors. Upon any action being commenced upon said bond, the director may require the filing of a new bond and immediately upon a recovery in any action upon such bond, such distributor shall file a new bond, and upon failure to file same within ten (10) days in either case, such failure shall constitute grounds for the revocation or suspension of the license of such distributor. In the event that recovery upon the bond is not sufficient to pay all of the claims as finally determined and adjudged by the court, any such amount recovered shall be divided pro rata among said producer-creditors.

4377. The minimum bond of one thousand dollars ($1,000) shall be required of distributors purchasing an average daily quantity of fluid milk of less than 100 gallons; distributors purchasing an average daily quantity of 100 gallons and less than 200 gallons during any calendar month during a license year must post a bond in the amount of two thousand dollars ($2,000); distributors purchasing an average daily quantity of 200 gallons and less than 300 gallons during any calendar month during a license year must post a bond in the amount of three thousand dollars ($3,000); distributors purchasing an average daily quantity of 300 gallons or more during any calendar month during a license year shall post a bond in the sum of five thousand dollars ($5,000). Minimum bond amounts

4378. The same bond requirements shall apply to purchases of fluid cream, except that for the purposes of computation of the required bond, 10 gallons of fluid cream shall be deemed the equivalent of 100 gallons of fluid milk. Purchases of fluid cream

4379. In the event that any distributor so increases his purchases of fluid milk or fluid cream during the license year that said purchases exceed the amount for which said distributor is bonded, said distributor shall forthwith post such additional bond or bonds as may be required to comply with the provisions of this article. Increases in purchases

4380. The licenses and bonds provided for in this article shall be required for each distributor, and for the purposes of this article each subsidiary milk plant or branch milk plant whether under one ownership or not shall be considered as an individual distributor. Licenses

4381. For the purposes of this article, a milk plant shall be any place, structure or building where a distributor receives fluid milk or fluid cream and weighs or tests or standardizes or pasteurizes or homogenizes or separates or bottles or packages such fluid milk or fluid cream, except that the provisions hereof shall not apply to a place or structure or building used for the purpose of receiving, weighing, or testing fluid milk or fluid cream which is to be diverted or delivered to the milk plant of the distributor receiving fluid milk or fluid cream which milk plant is licensed and bonded under the provisions of this article. Milk plant

4382. Failure of any distributor who purchases fluid milk or fluid cream from producers to execute and deliver the bond as herein provided and required shall constitute a violation of this chapter; failure of any such distributor to post such additional bond or bonds as may be required to comply with the provisions of this chapter shall likewise constitute a violation of this chapter. Violations

4383. Distributors who are subject to minimum wholesale and minimum retail prices for fluid milk as established by the director shall pay to the director on all milk fat contained in fluid milk purchased from producers, including their own production, if any, a fee in mills per pound of milk fat equal to that required to be deducted from the payments due producers of fluid milk under Section 4384. Such assessed fees received Fees

by the director shall be used in the administration and enforcement of this chapter.

Distributors who are subject to the provisions of any minimum wholesale and minimum retail prices for fluid cream as established by the director shall pay to the director on all milk fat contained in fluid cream purchased from producers, or fluid milk or fluid cream purchased from producers, including their own production, if any, a fee in mills per pound of milk fat equal to that required to be deducted from the payments due producers of fluid milk for fluid cream or fluid cream under Section 4384.

Assessments on producers

4384. Distributors who are subject to the provisions of any stabilization and marketing plan made effective by this chapter, shall deduct as an assessment from payments due producers for fluid milk, fluid cream or both, including each distributor's own production, the sum of two mills ($0.002) per pound milk fat on all milk fat contained in fluid milk, fluid cream or both, or in the case of distributors who do not purchase or receive fluid milk, in milk fat pounds, the sum of seven mills ($0.007) for each 10 gallons of fluid milk sold. Said assessment rates are maximum rates. The director may fix the rate of such assessments at a less amount, and may adjust the rate from time to time, whenever he finds that the cost of administering the provisions of this chapter can be defrayed from revenues derived from such lower rates, in combination with such sums as are provided by Section 4383. The amount of the assessments so deducted shall be paid to the director on or before the fifteenth of the month following the month during which such fluid milk or fluid cream was received.

Purchase from producer-distributor

4385. No bond shall be required of any distributor who purchases fluid milk or fluid cream from a producer-distributor; provided, that the buyer at the time of obtaining possession or control of each delivery pays for the same in full in lawful money of the United States; and provided, that said fluid milk or fluid cream is purchased in package form ready for human consumption, and not in bulk form. Any distributor before purchasing fluid milk or fluid cream on the above terms shall notify the director of his intention to make such purchases, stating from whom, and the average daily quantity of such purchases. Such distributor shall also keep a record of such purchases, showing dates of purchases, amounts of purchases, and the name or names of seller or sellers, and shall make such other and further reports to the director as he may from time to time require.

Retail stores

4386. The provisions of this article with respect to licenses shall not apply to retail stores as said stores are defined in this chapter.

Article 13. Reports and Statistics

Distributor reports and records

4400. All such distributors shall make and file with the director at least once each month such reports as the director may require to enable him to enforce the provisions of this chapter.

Every distributor who purchases fluid milk or fluid cream from a producer shall make and keep for one year a correct record showing in detail the following with reference to the handling, sale, or storage of such fluid milk or fluid cream:

(a) The name and address of the producer.

(b) The date the fluid milk or fluid cream was received.

(c) The amount of fluid milk or fluid cream received.

(d) The official butterfat test of the fluid milk or fluid cream if purchased on a butterfat basis.

(e) The usage of the fluid milk or fluid cream.

(f) Evidence of payment for the fluid milk or fluid cream purchased.

(g) Such further records as the director may require.

Reports confidential

4401. Any record or report made to the director pursuant to the provisions of this article shall be confidential and shall not be divulged except when necessary for the proper determination of any court proceedings or hearing before the director.

Report to Governor

4402 The director shall, within 30 days prior to each general session of the Legislature, submit to the Governor a full and true report of the transactions under this chapter during the preceding biennium, including a complete statement of receipts and expenditures during such period.

Information relating to dairy industry

4403. In addition to the compilation of information pertaining to fluid milk and fluid cream from the reports required by this chapter, the director shall collect, assemble, compile, and distribute statistical data relative to fluid milk, fluid cream, other milk and milk products, and such other information as may relate to the dairy industry and the provisions of this chapter.

Article 14. Penalties

Penalties

4410. (a) The violation of any provision of this chapter, or of any provision of any stabilization and marketing plan or any order of the director establishing minimum wholesale and minimum retail prices for fluid milk or fluid cream formulated under the provisions of this chapter, or of any of the unfair practices set forth in this chapter, is a misdemeanor, and is furthermore ground for revocation or suspension of license in the manner set forth in this chapter. The unfair practice provisions described in this chapter are hereby declared to apply to all distributors, whether or not a plan is in effect in the area in which a distributor is licensed or carries on business.

(b) Every distributor must pay for fluid milk or fluid cream delivered to him or it at the time and in the manner specified in the contract with the producer; failure to make such payment is hereby declared to be a violation of this chapter, and ground for refusal, suspension or revocation of license in the manner set forth in this chapter.

Civil liability

(c) Any person who violates any provision of this chapter or of a stabilization and marketing plan or any order of the director establishing minimum wholesale and minimum retail prices for fluid milk or fluid cream shall be liable civilly in the sum of

five hundred dollars ($500) for each and every violation, such sum to be recovered by the director in any court of competent jurisdiction. All sums recovered under this section shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

Article 15. Disciplinary Proceedings

Suspension, revocation, etc., of licenses

4415. The director may refuse to grant any license herein provided and may revoke or suspend any such license as the case may require when he is satisfied that any applicant or licensee has violated any provision of this chapter, or any provision of any stabilization and marketing plan formulated under the provisions of this chapter, or of any order of the director establishing minimum wholesale and minimum retail prices for fluid milk or fluid cream formulated under the provisions of this chapter. The proceedings shall be conducted in accordance with Chapter 5 of Part 1 of Division 3 of Title 2 of the Government Code, and the director shall have all the powers granted therein.

The decision may include an order refusing, revoking or suspending the license applied for or held by the respondent, or affixing such other conditional and probationary orders as may be proper for the enforcement of this chapter or any provision of any stabilization and marketing plan formulated under the provisions of this chapter, or of any order of the director establishing minimum wholesale and minimum retail prices for fluid milk or fluid cream formulated under the provisions of this chapter.

After any decision including any conditional or probationary orders, should respondent fail, refuse or neglect to comply with any such orders, the director may suspend or revoke the license in accordance with the procedure provided in this section.

Previous violation by any applicant, or by any person connected with said applicant, of any provision of this chapter, or of any provision of any stabilization and marketing plan formulated under the provisions of this chapter, or of any order of the director establishing minimum wholesale and minimum retail prices for fluid milk or fluid cream, formulated under the provisions of this chapter, shall be good and sufficient ground for denial, revocation or suspension of a license.

Shortening the time for hearing

4416. Whenever the director is satisfied, either by investigation or after hearing, that a distributor is unable to pay for fluid milk and/or fluid cream purchased from producers, and is further satisfied that to permit the distributor to continue to purchase and receive fluid milk and/or fluid cream from producers would be likely to cause serious and irreparable loss to producer-creditors and other producers, then the director within his discretion may thereupon and forthwith shorten the time for hearing that is provided for in Chapter 5 of Part 1 of Division 3 of Title 2 of the Government Code, and thereupon may issue an order to show cause why the license of said distributor should not be forthwith suspended or revoked; provided, however, that the time of notice of said hearing shall in no event be less than

five days. At such hearing the distributor proceeded against shall be ordered to show cause why his or its license should not be suspended or revoked or continued under such conditions and provisions, if any, as the director may consider just and proper and for the protection of the best interests of the producer-creditors and producers from whom the distributor has been and is receiving fluid milk and/or fluid cream. Following such hearing, the decision of the director shall become effective at his discretion.

Said hearing, in the case of such emergency, may be called upon written notice, said notice to be served personally or by mail on the distributor involved and may be held at the nearest office of the director or at such place as may be most convenient in the discretion of the director for the attendance of all parties involved.

Legislative findings

SEC. 2. The Legislature hereby finds and declares that there are unique conditions and circumstances, climatic and topographic, within Santa Clara County which necessitate that there be a method whereby water conservation districts in that county may raise additional funds. The heavy demands for water which have been made by the long-established and highly productive agricultural industry in Santa Clara County, coupled with the recent droughts in that area, have made it necessary to construct large and numerous water conservation projects in order that the supply of water may more nearly satisfy the demand. Furthermore, Santa Clara County is unique in that it is so located that it has not directly benefited from the large reclamation and irrigation projects which have been undertaken in the Sacramento and San Joaquin Valleys. It must, to a large extent, satisfy its own water requirements. The large projects which have been instituted and constructed by the various water conservation districts in Santa Clara County entail great annual operation and maintenance expenses, and this act provides a means for the raising of sufficient funds to meet the unique expenses of water conservation districts in Santa Clara County.

Water is vital to the State of California, and there is urgent necessity for its conservation. There are water conservation districts in this State whose expanded conservation operations, with resultant greatly increased current expense, require annual revenue in excess of what can be raised under existing tax limitations. The additional revenue is needed immediately, in order that said water conservation operations may be continued without interruption and at maximum efficiency.

CHAPTER 389

An act to amend Section 810.5 of, and to add Sections 810.51, 810.52, 810.53 and 810.54 to, the Agricultural Code, relating to asparagus standards.

In effect September 9, 1953

[Approved by Governor April 27, 1953. Filed with Secretary of State April 27, 1953.]

The people of the State of California do enact as follows:

SECTION 1. Section 810.5 of the Agricultural Code is amended to read:

Asparagus standards

810.5. Fresh asparagus shall not be wilted, or crushed (except such injuries as are necessarily caused in proper sorting or packing); stalks shall not have badly broken, badly spreading or badly seeded tips and shall be free from decay and from damage caused by dirt, disease, insects, mechanical injury or other causes. Stalks of asparagus, shall not be badly crooked.

"Damage"

"Damage" means any injury from the causes mentioned which materially affects the quality.

Tolerance

Not more than 10 percent, by count, of the asparagus stalks in any one container or bulk lot may be below these requirements, but not to exceed one-half of this tolerance shall be

allowed for any one cause. Asparagus which fails to meet these requirements only because of being "badly crooked" shall be considered as complying with this standard if the container in which it is packed is plainly marked on the outside of the end bearing other markings required by this section, in letters not less than one-half inch in height, with the word "crooks."

In view of differences in climatic and other natural conditions prevailing south and east of San Gorgonio Pass, which causes fresh asparagus grown in that area to be satisfactory in quality only if a large portion of the stalk is green or colored, and therefore must be cut at a shorter length, as compared to asparagus grown in the area north and west of the San Gorgonio Pass, stalks of asparagus produced in the area south and east of San Gorgonio Pass shall have not more than two inches of white on the butt, except that not more than 20 percent of the stalks in any bunch, or when not packed in bunches, 20 percent of the stalks in any container, may have not to exceed 2½ inches of white.

SEC. 2. Section 810.51 is added to the Agricultural Code, to read:

Containers Markings

810.51. All containers of asparagus shall bear upon them in plain sight and in plain letters on one outside end, (1) the name of the person who first packed or authorized the packing of the asparagus, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer, and (2) one of the size designations defined in Section 810.53 shown in letters not less than one-half inch in height. Asparagus packed in bunches that weigh not less than two pounds each may be marked with one of the grade classifications defined in Section 810.52 in lieu of the size designations in Section 810.53. Crates of such bunch packed asparagus which is badly crooked and so marked with the designation "crooks" need not bear any grade classification or size designation terms. When bunches of different grades are packed in one container, the markings on each container shall clearly show the number of bunches of each grade classification or size designation.

If 90 percent, by count, of the stalks of asparagus in any container have less than 50 percent of the length of the stalk white, the containers may be marked with the term "green."

All markings required by this section which are on containers less than one-half the size of standard containers numbers 51 and 52 may be in letters smaller than one-half inch in height; provided, such markings are in plain sight and in plain letters.

SEC. 3. Section 810.52 is added to the Agricultural Code, to read:

Classification by bunches

810.52. Bunches of asparagus classified according to the following designated grades shall contain the number of stalks indicated in each classification and shall weigh not less than two pounds net when packed. Not less than 12 bunches of asparagus so classified may be packed in standard container number 51 or 52.

Colossal, not more than 14 stalks to a bunch.
Jumbo, 15 to 20 stalks to a bunch.
Extra select, 21 to 28 stalks to a bunch.
Select, 29 to 42 stalks to a bunch.
Extra fancy, 43 to 67 stalks to a bunch.
Fancy, 68 to 100 stalks to a bunch.

For the reasons stated in Section 810.5 stalks of asparagus produced in the area south and east of San Gorgonio Pass which are less than 7¼ inches in length when marked with grade classification, shall be classified according to the following designated grades:

Mammoth, not more than 17 stalks to a bunch.
Giant, 18 to 24 stalks to a bunch.
Fancy regal, 25 to 34 stalks to a bunch.
Regal, 35 to 52 stalks to a bunch.
Fancy standard, 53 to 78 stalks to a bunch.
Standard, 79 to 115 stalks to a bunch.

"Crooks" when packed in bunches shall have no more than 67 stalks to a bunch.

Tolerance

The number of stalks of asparagus packed in bunches shall not vary more than 10 percent from the count of the grade classification as marked, except that 10 percent, by count, of the bunches in any one container may exceed this tolerance.

SEC. 4. Section 810.53 is added to the Agricultural Code, to read:

Stalk size classification

810.53. Asparagus classified according to the following size designations shall be graded so as to comply with the individual stalk size requirements:

Jumbo, stalks which are not less than thirteen-sixteenths inch in diameter.

Large, stalks which are not less than seven-sixteenths inch in diameter.

Standard, stalks which are not less than six-sixteenths inch in diameter.

Small, shall consist of asparagus in which more than 10 percent of the stalks are less than six-sixteenths inch in diameter.

"Diameter"

"Diameter" measurement shall mean the widest portion of the cross section measured at the largest point on the stalk.

The size designation requirements as herein established shall apply to all stalks of asparagus in each container, except that in the case of the Jumbo, Large and Standard sizes 10 percent, by count, of the stalks in any container may be smaller than the size designation specified.

SEC. 5. Section 810.54 is added to the Agricultural Code, to read:

Container size

810 54. Asparagus packed in bunches that weigh not less than two pounds per bunch shall be in standard containers as follows:

(a) Bunches in which the stalks are 7¼ inches or longer in length shall be in standard container number 51.

(b) Bunches in which the stalks are less than 7¼ inches in length shall be in standard container number 52.

Other size containers may be used if conspicuously marked on the outside of the end which bears any marks intended to describe the contents of such container, in letters not less than one-half of an inch in height with the words "irregular container."

The district board may also issue warrants payable upon a future date in the same fiscal year as issued, which shall be evidentiary of the obligation to repay the money so borrowed and interest thereon, and for that purpose such warrant may bear such interest as is fixed by the terms of the agreement to repay.

Urgency

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The citrus industry of California has suffered great damage from the ravages of armored scale insects, especially "yellow scale." A program for controlling and eradicating this pest has been developed but it requires spot chemical treatment of the infected area immediately upon discovery of the infested trees, followed by two eradicative treatments over the entire cultivated unit or over an area 240 feet out in all directions from the infested trees. The first eradicative treatment must be commenced in April or May, after the blooming of the citrus trees, and the second eradicative treatment must be given not less than 30 days, but not more than 45 days, after the first eradicative treatment; in any event, however, both eradicative treatments must be completed by September of the same year. These treatments are necessary not only to save the crops of the infested citrus trees, but also to prevent the spread of "yellow scale" to uninfested areas. These treatments require an immediate expenditure of funds by pest abatement districts, but it is presently possible to raise this money only by taxation, which funds will not become available before January, 1954.

Therefore, in order for infested areas to be treated this year, this act, which gives pest abatement districts the power to borrow money, and which is necessary for the preservation of the peace, health, and safety of the citizens of this State, must take effect immediately.

[Approved by Governor April 28, 1953. Filed with Secretary of State April 28, 1953.]

1362. An amount not exceeding in all 10 percent of the bank's savings deposits in revenue securities of any state of the United States and of any city, county, city and county, political subdivision, public corporation, or district (herein referred to generally as public corporations) of any such state and of any department, board, agency, or authority of any such state or of any such public corporation; provided:

(a) An amount exceeding 25 percent of the paid-up capital and surplus of the savings bank or exceeding 1 percent of the savings deposits of the bank, whichever is greater, may not be invested in revenue securities payable from the income from any one revenue producing property or project or issued by any one public corporation whether issued directly or through a department, board, agency, or authority thereof;

(b) Such revenue securities constitute obligations payable out of the revenues from a revenue producing property owned, controlled, or operated by such state, public corporation, or by a department, board, agency, or authority thereof and are secured by such revenues;

(c) (1) The net income from such property available for the payment of such securities for the five fiscal years next preceding any such investment, shall have averaged at least one and one-tenth times all debt service requirements for principal, interest, and sinking fund of all revenue securities payable only out of the revenues from such property during each of such fiscal years, and for each of such five fiscal years shall have equaled at least all debt service requirements for principal, interest, and sinking fund of such securities, and for the last fiscal year shall have amounted to at least the maximum annual debt service requirement for any fiscal year thereafter on all such securities which were outstanding during such last fiscal year and which will be outstanding in any fiscal year thereafter; and

The gross income from the property, the net income from which is pledged for the payment of such securities, in the last fiscal year prior to such investment was not less than one million dollars ($1,000,000) if located in California, and was not less than five million dollars ($5,000,000) if located elsewhere; and

The issuer is obligated to maintain rates at least sufficient to meet debt service requirements and such obligation is legally enforceable; or

Same

(2) The issuer of the securities is entitled to receive under a legally enforceable contract with a corporation any of the

securities of which are a legal investment for savings banks under Chapter 11 of Division 1 of this code annual payments averaging not less than nine hundred thousand dollars ($900,000) a year commencing with the completion of a project or projects as fixed in the construction contract therefor and continuing during the maximum term for which said revenue securities are to mature; and

Urgency

SEC. 2. This act is hereby declared to be an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Section 1 of Article IV of the Constitution, and shall therefore go into immediate effect. A statement of the facts constituting such necessity is as follows:

The demands of an ever-increasing population require the rapid development of the water resources of this State. A number of public districts have such developments under way and will be issuing bonds to finance the same prior to the time that laws passed in the 1953 Session would ordinarily become effective. The success or failure of such projects depends upon selling tax-free bonds at low rates of interest. The market for such bonds is limited largely to insurance companies as a result of the low rates of interest and due to the conflicting restrictions of the Financial Code that prevent investment of savings banks funds in such bonds. In order to broaden the market for such bonds and thereby further reduce the rate of interest demanded, it is essential that savings banks be permitted to invest limited amounts in such bonds that have, after investigation by the California Districts Securities Commission, been found to be sound securities for safe investment of savings banks funds.

The people of the State of California do enact as follows:

SECTION 1. Section 2327 is added to the Business and Professions Code, to read:

Out-of-state physicians and surgeons. Authority to perform professional services on Boy Scouts, etc., in this State

Termination date

Urgency

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health and safety, within the meaning of Article IV, Section 1, of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The Boys Scouts of America are going to hold their third national jamboree from July 17, 1953, to July 23, 1953, on the Irvine Ranch in Orange County, State of California. It is estimated that approximately 60,000 boy scouts from outside the State of California will attend this jamboree. It is also planned that a medical officer will be provided for each division of 1,320 scouts and it is necessary for the preservation of the public

peace, health and safety that medical officers be in attendance upon each such division. A number of physicians and surgeons from outside the State of California are intending to act as medical officers, and there is no existing reciprocity provision in the Medical Practice Act to permit performance of medical services by such medical officers. Since the jamboree is being held in July, 1953, a regular bill would not become law in time to be effective. It is therefore essential that this act take effect immediately.

[Approved by Governor April 29, 1953. Filed with Secretary of State April 30, 1953.]

Termination date

SEC. 4. Section 812.4a is added to said code, to read:

Carrot containers

812.4a. Notwithstanding the provisions of Section 812.4, bunched carrots may be packed in containers other than those specified in said section if each container is conspicuously marked in letters not less than one-half inch in height with the words "experimental container." The provisions of this section shall remain in effect until the ninety-first day after final adjournment of the 1955 Regular Session of the Legislature and thereafter shall have no force or effect. Experimental containers Termination date

SEC. 6. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are: Urgency

The present law prohibits the use of lids on standard containers 45D and 45F, which are special lettuce crates, if the lids are over 23⅜ inches in length. Many lettuce growers have on hand a large supply of crating material with lids of a longer length and should be permitted to use this material up. The difficulty in obtaining lids of the proper size may seriously disrupt the marketing of lettuce unless the use of material on hand is permitted. Furthermore, recent developments in the methods of packing lettuce and carrots have developed a number of experimental containers for such products. The present law permits only a limited quantity of vegetables to be shipped in such containers and the volume of such shipments is too small to establish whether or not the experimental containers should be made standard. This bill will permit the lettuce and carrot industries to meet the changing needs of those industries Therefore, in order to permit the orderly marketing of lettuce and carrots in the ensuing marketing seasons it is necessary that this act take immediate effect.

If such district is in more than one county, the total estimate provided for in Section 8 hereof shall be divided by the board of trustees in proportion to the value of real property within the district in each county, as shown by the assessment-rolls of the respective counties equalized in the year in which the estimate is made, but if the board of trustees shall find that the assessed valuation of real property in the various counties in which parts of the district are situated is on a different basis as compared with the actual value thereof, so that a division of the estimate as above provided would be inequitable, then the board of trustees shall determine by resolution the amount of said estimate which should be levied on the lands within the district in each county in order that substantially the same proportion of the estimate shall be paid by owners of real property of the same actual value in each county, and shall fix a time for a public hearing on said matter at the office of the district, or at some other convenient place, which time shall be not less than 15 days nor more than 21 days from the date of the adoption of said resolution, and shall give notice of said hearing by publication in a newspaper published in each county in which any part of the district is situated. Said notice shall state the determination of the board as to the division of said estimate and the time and place for the hearing thereon, and shall notify all persons interested that objections to said division of said estimate may be made at said hearing. The board of trustees shall meet at the time and place fixed for said hearing and shall hear all objections to said division of said estimate and any evidence offered in support of said objections and any evidence offered in support of said division. After the hearing of all evidence, if any, offered in regard to said matter, the board of trustees shall, if any objection to said division has been made, make an order reaffirming or modifying said division of said estimate as may be just, but if no objection to said division is made at said hearing, no change shall be made therein. The heavy snows of the winter of 1951-1952 resulted in an extensive winter kill of deer in the mountainous areas of the State affected by this act. In those areas a great number of deer

became snowbound with little forage available. Inasmuch as the larger animals could reach more of the available forage the incidence of death was proportionately greater among the smaller animals, including the female deer and the forked-horn deer. In order to permit the rehabilitation of the deer herds in the areas affected and the restoration of the proper biological balance of the age, sex, and maturity of the animals in the herds it is necessary to protect the forked-horn deer and female deer as provided in this act prior to the 1953 hunting season.

Under the existing law when a teacher fails to renew his certification documents at the legally prescribed time, his salary cannot be paid for the period the documents are not in force. This provision works a severe hardship on the many teachers who by mistake, or because of the pressure of teaching duties, or otherwise, are late in renewing their documents, but who continue to teach in their usual positions during the period the documents are not in force and who are assured by the school district authorities that their salaries will be paid for such period as soon as the renewal is effective.

In order to restore the confidence of such teachers in the Public School System, and to encourage them to remain in the teaching profession, rather than seeking employment in other fields subject to fewer strict regulations, at a time when an increase rather than a decrease in the number of teachers is essential to furnish an adequate education to the children of the State, it is necessary that this act go into immediate effect.

Effectiveness

CHAPTER 628

An act to amend Section 6695 of the Health and Safety Code, relating to sanitary districts, declaring the urgency thereof, to take effect immediately.

[Approved by Governor May 8, 1953. Filed with Secretary of State May 11, 1953.]

In effect immediately

The people of the State of California do enact as follows:

SECTION 1. Section 6695 of the Health and Safety Code is amended to read:

Maximum annual tax levy for all district purposes

6695. Except as otherwise provided in this part, no more than sixty cents ($0.60) on each one hundred dollars ($100) assessed valuation shall be levied for all the district purposes in any one year, besides what is required for the payment of the bond principal and interest for that year.

Urgency

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health and safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The rapid growth of the population of the State during and since World War II has resulted in increased congestion of people in unincorporated areas. The State Legislature has found it necessary to require the treatment of sewage before it is deposited in the streams and waters of the State and in the Pacific Ocean. This has resulted in the requirement for greatly increased numbers of sanitary and other local improvement projects, and it has been found to be impossible in many areas to operate and maintain said facilities within the limits of the present provisions of Section 6695. In order to relieve the financial difficulties created by this limitation in time for the 1953-54 tax levies, it is necessary for this act to go into immediate effect.

Awards to state employees

Any award made by the State Board of Control under the provisions of this section may be paid from the appropriation available to the state agency affected by the adopted proposal.

The board may adopt rules and regulations to carry out the provisions of this section, and may appoint merit award boards made up of state officers, employees or citizens to consider employee proposals and to make recommendations to the board as to the merit of the proposal and whether or not the proposal justifies an award.

Any award granted under the provisions of this section shall be limited to one hundred fifty dollars ($150) unless a larger award is approved by concurrent resolution of the Legislature.

CHAPTER 650

An act to amend Sections 1403 and 1411 of the Fish and Game Code, relating to burros, declaring the urgency thereof, to take effect immediately.

[Approved by Governor May 11, 1953. Filed with Secretary of State May 12, 1953.]

In effect immediately

The people of the State of California do enact as follows:

SECTION 1. Section 1403 of the Fish and Game Code is amended to read:

1403. It is unlawful to kill any undomesticated burro. An undomesticated burro, for the purpose of this chapter, is a wild burro or a burro which has not been tamed or domesticated for a period of three years after its capture. The fact that a burro was killed or captured on publicly owned land, or on land owned by a person or persons other than the killer or capturer is prima facie evidence that the burro was wild or undomesticated at the time it was killed or captured. The commission has no power to modify the provisions of this section by any order, rule, or regulation under Article 1, Chapter 2, Division 1, or any other provision, of this code.

Killing undomesticated burro

This section shall remain in effect until the ninety-first day after the final adjournment of the Regular Session of the Legislature in 1955.

Expiration date

SEC. 2. Section 1411 of said code is amended to read:

Penalties

1411. Violation of any provision of Article 2 of Chapter 3 of Part 3 of Division 4, relating to elk and sea otter, or of Chapter 2 of Division 4a, relating to burros, is a misdemeanor, punishable by imprisonment in the county jail for a term not exceeding one year, or a fine not exceeding one thousand dollars ($1,000) or by both such fine and imprisonment.

Urgency

SEC. 3. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

There is no law in this State which prohibits the wanton shooting of an undomesticated burro and simply leaving it to die. These little animals are descendants of domesticated burros and while they are "wild" in the sense that they are free from man's dominion, they do not possess the instinctive fear of man that is common to truly wild animals. The undomesticated burros live principally in the desert areas of the State and each year numbers of them are wantonly and purposelessly wounded or killed simply because they present inviting and unresisting targets for high-powered rifles in the hands of trigger-happy individuals bereft of any proper spirit of humaneness. The surviving little bands of undomesticated burros form a living link with the pioneer development of this State in which their forebears played a humble but essential part. In order that such burros may be preserved from extinction it is necessary that this act take effect immediately.

CHAPTER 651

The other two states, Oregon and Washington, and Canada want to make this coast-wide program effective in 1953, which they can do by regulation, but which requires legislation in California. In order to give Oregon and Washington sufficient time to act it will be necessary for this bill to be effective as of April 15, 1953.

For the Fiscal Year 1953-1954, but for no other fiscal year, notwithstanding Section 18 of this act, the assessment and equalization of property for the purpose of district taxation shall be effected as provided in this section.

Assessments as liens

Assessments of the district for the Fiscal Year 1953-1954 are liens on the property the same as if they were county taxes, except that the district assessment liens attach as of noon on the day after this act becomes effective.

Assessment standards

It is presumed that the assessments of property made by the county assessor and by the State Board of Equalization for county taxation purposes for the Fiscal Year 1953-1954 are the correct assessments for purposes of assessment by the district and the rolls prepared by the county assessor and the State Board of Equalization shall be used for purposes of levying and collecting the assessments for the district. If the ownership or taxable situs or value of any property changes between noon on the first Monday in March 1953, and the date on which attaches the lien for assessments of the district for the Fiscal Year 1953-1954, then, on petition of the taxpayer affected to the assessing authority, suitable entry shall be made on the assessment roll,

in the manner prescribed by the State Board of Equalization, to indicate such change in the ownership or taxability or value of the property for purposes of assessment by the district.

Equalizing assessments

In equalizing the assessments made by the county assessor, the Board of Supervisors of Marin County, sitting as the county board of equalization, in addition to its regular equalization duties, shall also, in the same manner and under the same rules, equalize the valuation of property for purposes of assessment by the district in accordance with the requirements of this section and any such changes made by the county board of equalization in the assessment roll shall be entered in the manner prescribed by the State Board of Equalization.

If, for purposes of assessments by the district, a change in the assessment for county taxation purposes is not sought under this section before the end of the period during which such assessment may be equalized, or corrected on a petition for reassessment, such assessment, if valid for county taxation purposes, is conclusively presumed to be the correct assessment for assessment purposes of the district.

Assessment procedure

The board may prescribe by ordinance any necessary procedure, in accordance with the policy of this act, for the purpose of assessing, equalizing, levying and collecting taxes or assessments for the district for the Fiscal Year 1953-1954. Except as provided in this section, Section 18 of this act is applicable to the assessment and equalization of property for the purpose of district assessments for the Fiscal Year 1953-1954

SEC. 20. The bonds of the district issued for any zone thereof pursuant to this act, shall be legal investments for all trust funds, and for the funds of all insurance companies, banks, both commercial and savings, and trust companies, and for the state school funds, and whenever any money or funds may by law now or hereafter enacted be invested in bonds of cities, cities and counties, counties, school districts or municipalities in the State of California, such money or funds may be invested in the said bonds of said district issued in accordance with the provisions of this act, and whenever bonds of cities, cities and counties, counties, school districts or municipalities, may by any law now or hereafter enacted be used as security for the performance of any act, such bonds of said district may be so used.

This section of this act is intended to be and shall be considered the latest enactment with respect to the matters herein contained and any and all acts or parts of acts in conflict with the provisions hereof are hereby repealed.

SEC. 22. All contracts for any improvement or unit of work when the cost thereof according to the estimate of the engineer, will exceed two thousand dollars ($2,000), shall be let to the

lowest responsible bidder or bidders in the manner hereinafter provided. The board shall first determine whether such contract shall be let as a single unit for the whole of the work, or shall be divided into severable convenient parts, or both, according to the best interests of the district. The board shall make call for bids and advertise such call by three (3) insertions in a daily newspaper of general circulation or by two (2) insertions in a weekly newspaper of general circulation, printed and published in said district inviting sealed proposals for the construction of performance of the improvement or work before any contract is made therefor. Such call for bids shall state whether such work is to be performed as a unit for the whole thereof or shall be divided into severable convenient specific parts, or both, as stated in the call. The board may let such work by single contract for the whole thereof as a unit or it may divide such work into severable convenient parts by separate contracts, as stated in such call, according to the best interests of the district. The board shall require the successful bidder or bidders to file with the board good and sufficient bonds to be approved by the board conditioned upon the faithful performance of the contract and upon the payment of their claims for labor and material in connection therewith, such bonds to contain the terms and conditions set forth in Chapter 3 of Division 5 of Title 1 of the Government Code and to be subject to the provisions of that chapter. The board shall also have the right to reject any and all bids. In the event no proposals are received pursuant to advertisement therefor, or the estimated cost of such work does not exceed the sum of two thousand dollars ($2,000), or the work consists of channel protection, or maintenance work, or emergency work when necessary in order to protect life and property from impending flood damage, the board of supervisors may, without advertising for bids therefor, have said work done by day labor, under the direction of the board, by contract, or by a combination of the two. The district shall have the power to acquire in the open market without advertising for bids therefor, materials, equipment and supplies for use in any work or for any other purpose; provided, however, that materials and supplies for use in any new construction work or improvement, except work referred to in the preceding sentence, may not be purchased if the cost thereof exceeds two thousand five hundred dollars ($2,500), without advertising for bids and awarding the contract therefor to the lowest responsible bidder.

Improvements in conformity with plan, etc

SEC. 23. Any improvement for which bonds are voted under the provisions of this act, shall be made in conformity with the report, plans, specifications and map theretofore adopted, as above specified, unless the doing of any of such work described in said report, shall be prohibited by law, or be rendered contrary to the best interests of the district by some change of conditions in relation thereto, subsequent to the date of filing the report, plans, specifications and map theretofore adopted, in which event the board of supervisors may order necessary changes made in

such proposed work or improvements and may cause any plans and specifications to be made and adopted therefor.

Additional bonds

SEC. 24. Whenever bonds have been authorized by any zone or participating zone of said district and said bonds have been issued as in this act authorized, and the board shall by resolution determine that additional bonds should be issued for carrying out the work of flood control, or for any of the purposes of this act, the board may again proceed as in this act provided, and submit to the qualified voters of said zone or participating zone, the question of issuing additional bonds in the same manner and with like procedure as hereinbefore provided, and all the above provisions of this act for the issuing and sale of such bonds, and for the expenditure of the proceeds thereof, shall be deemed to apply to such issue of additional bonds

Repeal or amendment of act

SEC. 26. The repeal or amendment of this act shall not in any way affect or release any of the property in said district or any zone thereof from the obligations of any outstanding bonds or indebtedness until all such bonds and outstanding indebtedness have been fully paid and discharged.

Said election shall in all particulars be held as provided by law for holding a municipal election in said city and the cost thereof shall be a city charge. The city council shall cause the results of the election to be certified to the board of supervisors of the district and if a majority of the votes cast on the proposition to withdraw such area from the district are in favor thereof, thereupon the area lying within the exterior boundaries of such city shall no longer be a part of the district; provided, however, that the withdrawal of the area lying within the exterior boundaries of such city from the district shall not release the area so withdrawn from debts and obligations for or upon which it was liable or chargeable at the time such withdrawal was made.

All costs of relocating or otherwise changing any portion of a state highway shall be paid from funds available for rights of way for flood control purposes and not from funds appropriated for state highway purposes.

Disputes

(b) In the event the district and any common carrier railroad or other public utility fail to agree as to the character or location of new improvements or works sought to be performed by the district, the character and location of such new improvements or works and any other controversy relating thereto shall be submitted to and determined by the Public Utilities Commission; and jurisdiction of such controversies is hereby vested in said commission.

Procedure

Claims shall be presented in the general form and manner prescribed by general law relating to the making and filing of claims against counties. Such claims may be amended within said six months to correct defects in form of statement of facts. No action against the district shall be commenced or maintained unless such claim relating thereto has been filed as hereinabove prescribed and action thereon commenced within one year after the cause of action arose.

Action to determine legality of district

SEC. 31. The district formed under this act in order to determine the legality of its existence, may institute a proceeding therefor in the superior court of this State, in and for the County of Marin, by filing with the clerk of said county a complaint setting forth the name of the district, its exterior boundaries, the date of its organization and a prayer that it be adjudged a legal flood control district formed under the provisions of this act. The summons in such proceeding shall be served by publishing a copy thereof once a week for four weeks in a newspaper of general circulation published in said county. Within thirty (30) days after proof of publication of said summons shall have been filed in said proceeding, the State, any property owner or resident in said district, or any person interested may appear as a defendant in said action by serving and filing an answer to said complaint, in which case said answer shall set forth the facts relied upon to show the invalidity of the district and shall be served upon the district attorney before being filed in such proceeding. Such proceeding is hereby declared to be a proceeding in rem and the final judgment rendered therein shall be conclusive against all persons whomsoever, including the district and the State of California.

Employees bonded

SEC. 32. The board may require any officer or employee to give bond for the faithful performance of the duties of his office, in such penal sum as may be fixed by the board. SECTION 1. Section 34153 of the Water Code is amended to read:

34153. The holders of title to a majority in area of land which is susceptible of irrigation from a common source and by the same system of works, may petition for the formation of a district.

Need not be contiguous

(a) The portions of the proposed district are separated by land under the control of a state hospital, or

(b) The boundary of each of the portions of the proposed districts is within two miles of the boundary of another portion of the proposed district.

When a district is proposed to be formed from noncontiguous areas, the petition shall be signed by the holders of title of a majority of the assessed value of land within each of the noncontiguous areas proposed to be included within the district.

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect.

Urgency

The facts constituting such necessity are:

The urgent need for an immediate water supply for irrigation and other agricultural purposes in many now developed agricultural areas within the central valley of this State wherein there is no water supply available except such as may be acquired from or through the limited and unallocated supply of the Central Valley Project, of which limited and unallocated supply some has been tentatively allocated for the supply of such areas by and through water districts yet to be formed, coupled with the existence of previously formed irrigation districts and other governmental agencies and districts in such areas as made necessary by the increasing population of the State, has created a condition wherein it is impracticable or impossible to form water districts in one contiguous body and, in such instances, the water tentatively allocated to such areas might be permanently allocated to other areas or for other than agricultural purposes, and any delay in the formation of water districts in such areas would expose the agricultural development now existing therein to irreparable loss and render future or further development impossible, and the objects of the Water District Act cannot be feasibly or economically achieved and are defeated by the requirement of contiguity. It is therefore necessary that this act shall take effect immediately.

SEC. 3. If any section, subsection, sentence, clause or phrase of this act is for any reason held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this act. The Legislature hereby declares that it would have passed this act and each section, subsection, sentence, clause and phrase thereof, irrespective of the fact that any one or more of the sections, subsections, sentences, clauses or phrases be declared unconstitutional.

Urgency

SEC. 4. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution, and shall go into immediate effect. The facts constituting such necessity are: Continuously since the adoption of the "welfare exemption" it has been understood by the administrators of the law, as well as by the public generally, that it was the purpose and the intent of Legislature in the adoption of sub-

division (3) of Section 214 of the Revenue and Taxation Code to disqualify for tax exemption any property of a tax exempt organization which was not used for the actual operation of the exempt activity, but that such organization could rightfully use the income from the property devoted to the exempt activity for the purposes of debt retirement, expansion of plant and facilities or reserve for operating contingencies without losing the tax exempt status of its property.

Recently, doubt has been cast upon the foregoing interpretation by a decision of the State Supreme Court involving the tax exemption of a hospital. This decision was broad in its application and has caused the postponement or actual abandonment of plans for urgently needed hospital construction and expansion at a time when there are insufficient hospital facilities in this State to properly care for the health needs of its citizens, and virtually no surplus facilities for use in case of serious epidemic or disaster. This Legislature has recognized that in addition to gifts and bequests the traditional method for the financing of the expansion and construction of voluntary religious and community nonprofit hospital facilities is through the use of receipts from the actual operating facilities In its decision the Supreme Court indicated that this was a matter for legislative clarification.

It has never been the intention of the Legislature that the property of nonprofit religious, hospital or charitable organizations otherwise qualifying for the welfare exemption should be denied exemption if the income from the actual operation of the property for the exempt activity be devoted to the purposes of debt retirement, expansion of plant and facilities or reserve for operating contingencies, it having been the intent of the Legislature in adopting subsection (3) of Section 214 to deny exemption to property not used for exempt purposes even though the income from the property was used to support an exempt activity.

Therefore, in order to clarify the legislative intent and to remove any doubt with respect to the status of property actually used for exempt purposes, it is necessary to amend subdivision (3) of Section 214 of the Revenue and Taxation Code. It is essential that this be done at the earliest possible moment to avoid further delays in the construction and expansion of needed hospital facilities.

Public nuisance

The officer may affix to any lot so held a tag or notice warning that the lot is held and stating the reasons therefor. It is unlawful for any person other than an authorized enforcing officer to detach, alter, deface or destroy any such tag or notice affixed to any such lot, or to remove or dispose of such lot in any manner or under conditions other than as prescribed in such tag or notice, except upon written permission of an authorized enforcing officer or by order of court. Affixing of tag or notice

The officer by whom any such lot is held shall cause notice of noncompliance to be served upon the person in possession of said lot, upon the owner if known, and upon any other person known to the officer to claim an interest therein. Such notice may be served personally or by registered mail addressed to the person to be served at his last known address. Service of notice

The notice of noncompliance shall include a description of the lot, the place where and the reasons for which it is held, and shall give notice that said lot is a public nuisance and subject to disposal as provided in this section, unless within a specified time said lot shall have been reconditioned or the deficiency otherwise corrected so as to bring said lot into compliance, or written consent shall have been given by the persons so served to destroy or otherwise dispose of said lot. Within five (5) days from the receipt of such report, the director may file a petition in the superior court in the county where the lot is situated for an order to show cause, returnable in five (5) days, why the lot should not be abated. The owner or person in possession on his own motion within five (5) days from the expiration of the time specified in the notice of noncompliance may file a petition in said court for an order to show cause, returnable in five (5) days, why said lot should not be released to petitioner and any warning tags previously affixed removed therefrom. Final determination by said court in either case shall be within a period of not to exceed twenty (20) days from the date said petition was filed.

or vegetables are to be transported has such facilities. Such permits may be issued for a period not exceeding 12 months.

No permit issued hereunder shall be valid except in the county where issued unless the permit, or a rider securely attached thereto, carries the endorsement of the commissioner of the county (1) to which the fruits, nuts, or vegetables are to be transported or delivered and (2) from which such products are to be transported or delivered.

Any commissioner may refuse to issue or to endorse a permit if in his judgment the permittee does not have available proper and adequate facilities with which to pack, process or otherwise dispose of such commodities in accordance with the provisions of this chapter and the terms of the permit. A permittee shall, upon request of any commissioner, furnish such affidavits, receipts and other evidence as such commissioner reasonably may require as proof that the commodities have been disposed of in accordance with the provisions of this chapter and the terms of the permit.
