At the time and place fixed for the hearing, or at any time to which said hearing may be continued, the board shall consider all written and oral objections to the proposed project. Upon the conclusion of the hearing the board may abandon the proposed project or proceed with the same, or a portion thereof, unless prior to the conclusion of said hearing written protests against the proposed project signed by a majority in number of the property owners who are registered voters residing within such zone or participating zones be filed with the board, in which event further proceedings relating to such project must be suspended for not less than six months following the date of the conclusion of said hearing, or said proceeding may be abandoned at the discretion of the board.

Each person so appointed shall be permitted to attend every meeting of the board in which any matter affecting his zone is discussed or considered. The board shall not discuss, consider or act on any matter which affects any zone unless each member of the advisory committee for that zone has been notified in writing as to the time and place of the meeting at least five days before the meeting. Vacancies in the advisory committees shall be filled by appointment by the board.

SEC. 17. The board shall have power, in any year:

Said taxes shall be based upon the assessment rolls used by the county for general tax purposes. Tax levy

In the event of project cooperation with any of the governmental bodies as authorized in subdivision 7 of Section 6 of this act, and the making of a contract with any such governmental body for the purposes set forth in said subdivision 7, by the terms of which work is agreed to be performed by any such governmental body in any specified zone or participating zones, for the particular benefit thereof, and by said contract it is agreed that the district is to pay to such governmental body, a sum of money in consideration or subvention for the performance of said work by such governmental body, the board may levy and collect a special tax upon the property in such zone or participating zones, whereby to raise funds to enable the district to make such payment. Special tax

Said taxes shall be levied and collected together with, and not separately from taxes for county purposes, and the revenues derived from said taxes shall be paid into the county treasury to the credit of said district, and the respective zones thereof, and the board shall have the power to control and order the expenditure thereof for said purposes; provided, however, that no revenues, or portions thereof, derived in any of the several zones from the taxes levied under the provisions of this section shall be expended for constructing, maintaining, operating, extending, repairing or otherwise improving any works or improvements located in any other zone, except in the case of joint projects, or for projects authorized or established outside such zone, or zones, but for the benefit thereof. (3) Said board shall call such special bond election by ordinance and not otherwise and submit to the qualified electors of said zone or participating zones, the proposition of incurring a bonded debt in said zone or participating zones in the amount and for the purposes stated in said resolution and shall recite therein the objects and purposes for which the indebtedness is proposed to be incurred; provided, that it shall be sufficient to give a brief, general description of such objects and purposes, and refer to the recorded copy of such resolution adopted by said board, and on file for particulars; and said ordinances shall also state the estimated cost of the proposed work and improvements, the amount of the principal of the indebtedness to be incurred therefor, and what part or installment of such indebtedness shall be paid each and every year, and which shall not in any one year be less than one-fortieth (1/40) of the whole amount of the principal and interest of such indebtedness, and the rate of interest to be paid on said indebtedness, and shall fix the date on which such special election shall be held, and the form and contents of the ballot to be used. No other notice of such election need be given nor need polling place cards be issued.

Defects or irregularities

Any defect or irregularity in the proceedings prior to the calling of such special bond election shall not affect the validity of the bonds authorized by said election. If at such election two-thirds ($\frac{2}{3}$) of the votes cast are in favor of incurring such bonded indebtedness, then bonds for such zone or participating zones for the amount stated in such proceedings shall be issued and sold as in this act provided.

Such bonds shall be returned to such holders thereof or in case of death to the duly appointed personal representative of the holder's estate, upon the giving of receipt therefor, with or without return of the receipt given by the treasurer at the time of such deposit and registry. And the treasurer, at the request of such holder, or such personal representative, may detach and deliver to such holder or personal representative, mature coupons from time to time, first taking receipts therefor.

SEC. 22. The board shall levy a tax each year upon all land in the zone or zones of issuance sufficient to pay the interest and such portion of the principal of said bonds as is due or to become due before the time for making the next general tax levy. Such taxes shall be levied and collected in the respective zones of issuance together with and not separately from taxes for county purposes, and when collected shall be paid into the county treasury of said San Benito County to the credit of the zone of payment, and be used for the payment of the principal and interest on said bonds, and for no other purpose. The principal and interest on said bonds shall be paid by the county treasurer of said San Benito County in the manner provided by law for the payment of principal and interest on bonds of said county.

Levying, assessing, etc.

SEC. 23. The provisions of law of this State, prescribing the time and manner of levying, assessing, equalizing and col-

lecting county property taxes, including the sale of property for delinquency, and the redemption from such sale, and the duties of the several county officers with respect thereto, are, so far as they are applicable, and not in conflict with the specific provisions of this act, hereby adopted and made a part hereof.

Legislative declarations

SEC. 24. Notwithstanding Section 54903 of the Government Code, the San Benito County Water Conservation and Flood Control District is validly created for the purposes of assessment and taxation.

For the Fiscal Year 1953-1954, but for no other fiscal year, notwithstanding Section 23 of this act, the assessment and equalization of property for the purpose of zone taxation shall be effected as provided in this section.

Assessments of the district for the Fiscal Year 1953-1954 are liens on the property the same as if they were county taxes, except that the district assessment liens attach as of noon on the day after this act becomes effective.

Assessment presumption

It is presumed that the assessments of property made by the county assessor and by the State Board of Equalization for county taxation purposes for the Fiscal Year 1953-1954 are the correct assessments for purposes of assessment by the district and the rolls prepared by the county assessor and the State Board of Equalization shall be used for purposes of levying and collecting the taxes for the district. If the ownership or value of any real property changes between noon on the first Monday in March, 1953, and the date on which attaches the lien for assessments of the district for the Fiscal Year 1953-1954, then, on petition of the taxpayer affected to the assessing authority, suitable entry shall be made on the assessment roll, in the manner prescribed by the State Board of Equalization, to indicate such change in the ownership or taxability or value of the property for purposes of assessment by the district.

Equalization of assessments

In equalizing the assessments made by the county assessor, the Board of Supervisors of San Benito County, sitting as the county board of equalization, in addition to its regular equalization duties, shall also, in the same manner and under the same rules, equalize the valuation of land for purposes of assessment by the district in accordance with the requirements of this section and any such changes made by the county board of equalization in the assessment roll shall be entered in the manner prescribed by the State Board of Equalization.

Failure to seek change

If, for purposes of assessment within the district, a change in the assessment for county taxation purposes is not sought under this section before the end of the period during which such assessment may be equalized, or corrected on a petition for reassessment, such assessment, if valid for county taxation purposes, is conclusively presumed to be the correct assessment for assessment purposes of the district.

Necessary procedure

The board may prescribe by ordinance any necessary procedure, in accordance with the policy of this act, for the purpose of assessing, equalizing, levying, and collecting taxes within the district for the Fiscal Year 1953-1954. Except as provided in

this section, Section 23 of this act is applicable to the assessment and equalization of property for the purpose of assessing and equalizing within the district for the Fiscal Year 1953-1954.

Bonds as legal investments

SEC. 25. The bonds of the district issued for any zone or zones thereof pursuant to this act, shall be legal investments for all trust funds, and for the funds of all insurance companies, banks, both commercial and savings, and trust companies, and for the state school funds, and whenever any money or funds may by law now or hereafter enacted be invested in bonds of cities, cities and counties, counties, school districts or municipalities in the State of California, such money or funds may be invested in the said bonds of said district issued in accordance with the provisions of this act, and whenever bonds of cities, cities and counties, counties, school districts or municipalities, may by any law now or hereafter enacted be used as security for the performance of any act, such bonds of said district may be so used.

This section of this act is intended to be and shall be considered the latest enactment with respect to the matters herein contained, and any and all acts or parts of acts in conflict with the provisions hereof are hereby repealed.

Bonds exempt from state tax

SEC. 26. All bonds issued by said district under the provisions of this act shall be free and exempt from all taxation within the State of California. SEC. 27. All contracts for any improvement or unit of work when the cost thereof according to the estimate of the engineer, will exceed five thousand dollars ($5,000), shall be let to the lowest responsible bidder or bidders in the manner hereinafter provided. The board shall first determine whether such contract shall be let as a single unit for the whole of the work, or shall be divided into severable convenient parts, or both, according to the best interests of the district. The board shall make call for bids and advertise such call by three (3) weekly insertions once a week in a newspaper of general circulation in said district inviting sealed proposals for the construction or performance of the improvement or work before any contract is made therefor. Such call for bids shall state whether such work is to be performed as a unit for the whole thereof or shall be divided into severable convenient specific parts, or both, as stated in the call. The board may let such work by single contract for the whole thereof as a unit or it may divide such work into severable convenient parts by separate contracts, as stated in such call, according to the best interests of the district. The board shall require the successful bidder or bidders to file with the board good and sufficient bonds to be approved by the board conditioned upon the faithful performance of the contract and upon the payment of their claims for labor and material in connection therewith, such bonds to con-

The district shall have the power to purchase in the open market without advertising for bids therefor, materials and supplies for use in any work therewith either under contract or by force account.

Making of improvements

SEC. 28. Any improvement for which bonds are voted under the provisions of this act, shall be made in conformity with the report, plans, specifications and map theretofore adopted, as above specified, unless the doing of any of such work described in said report, shall be prohibited by law, or be rendered contrary to the best interests of the district by some change of conditions in relation thereto, in which event the board may order necessary changes made in such proposed work or improvements and may cause any plans and specifications to be made and adopted therefor.

Additional bonds

SEC. 29. Whenever bonds have been authorized by any zone or participating zone of said district and the proceeds of the sale thereof have been expended as in this act authorized, and the board shall by resolution determine that additional bonds should be issued for carrying out the work of flood control, or for any of the purposes of this act, the board may again proceed as in this act provided, and submit to the qualified voters of said zone or participating zone, the question of issuing additional bonds in the same manner and with like procedure as hereinbefore provided, and all the above provisions of this act for the issuing and sale of such bonds, and for the expenditure of the proceeds thereof, shall be deemed to apply to such issue of additional bonds.

Should a proposition for issuing bonds for any zone or participating zones submitted at any election under this act fail to receive the requisite number of votes of the qualified electors voting at such election to incur the indebtedness for the purpose specified, the board shall not for six months after such election call or order another election in such zone or participating zone for incurring indebtedness and issuing bonds under the terms of this act for the same objects and purposes.

Whenever any selection of a right of way for such works or adjuncts thereto is made by the district the board thereof must transmit to the State Lands Commission, the Controller of the State and the recorder of the county in which the selected lands are situated, a plat of the lands so selected, giving the extent thereof and the uses for which the same is claimed or desired, duly verified to be correct. If the State Lands Commission shall approve the selections so made it shall endorse its approval upon the plat and issue to the district a permit to use such right of way and lands

The State of California shall be a defendant in such action, and consent therefor is given. Service of summons therein shall be made on the Attorney General. The Attorney General shall appear in such action on behalf of the State in the same manner as with appearances in civil actions. Within thirty (30) days after proof of publication of said summons shall have been filed in said proceeding, the State, any property owner or resident in said district, or any person interested may appear as a defendant in said action by serving and filing an answer to said complaint, in which case said answer shall set forth the facts relied upon to show the invalidity of the district and shall be served upon the district attorney before being filed in such proceeding. (d) The department may accept evidence of a payment to a driver or owner of a vehicle involved in any accident by the insurance carrier of any other person involved in such accident on account of damage to property or bodily injury as effective to relieve such driver or owner from the security and suspension provisions of this chapter in respect to any claim for property damage or bodily injury arising out of the accident by the person on whose behalf such payment was made. A payment to the insurance carrier of the driver or owner under its right of subrogation shall be the equivalent of a payment to such driver or owner.

CHAPTER 1632

An act to add Chapter 2 to Division 7 of the Education Code, and to add Section 11130.5 to said code, and to amend Sections 13521 and 13526 of said code, relating to school district employees.

[Approved by Governor July 3, 1953. Filed with Secretary of State July 6, 1953.]

In effect September 9, 1953

The people of the State of California do enact as follows:

SECTION 1. Chapter 2 is added to Division 7 of the Education Code, to read:

CHAPTER 2. COMMUNIST PARTY MEMBERSHIP FORBIDDEN

12600. The Legislature of the State of California finds that:

Legislative findings

(a) There exists a world-wide revolutionary movement to establish a totalitarian dictatorship based upon force and power rather than upon law.

(b) This world-wide revolutionary movement is predicated upon and it is designed and intended to carry into execution the basic precepts of communism as expounded by Marx, Lenin, and Stalin.

(c) Pursuant to the objectives of the world communism movement, in numerous foreign countries the legally constituted governments have been overthrown and totalitarian dictatorships established therein against the will of the people, and the establishment of similar dictatorships in other countries is imminently threatening. The successful establishment of totalitarian dictatorships has consistently been aided, accompanied, or accomplished by repeated acts of treachery, deceit, teaching of false doctrines, teaching untruth, together with organized confusion, insubordination, and disloyalty, fostered, directed, instigated, or employed by communist organizations and their members in such countries.

(d) Within the boundaries of the State of California there are active disciplined communist organizations presently functioning for the primary purpose of advancing the objectives of the

world communism movement, which organizations promulgate, advocate, and adhere to the precepts and the principles and doctrines of the world communism movement. These communist organizations are characterized by identification of their programs, policies, and objectives with those of the world communism movement, and they regularly and consistently cooperate with and endeavor to carry into execution programs, policies, and objectives substantially identical to programs, policies, and objectives of such world communism movement.

(e) One of the objectives of the world communism movement is to place its members in local government positions and in the public school system. If this objective is successful, propaganda can be disseminated by the members of these organizations among public school pupils by those members who would have the opportunity to teach them and to whom, as teachers, they would look for guidance, authority, and leadership. The members of such groups would use their positions to advocate and teach their doctrines and teach the prescribed Communist Party line group dogma or doctrine without regard to truth or free inquiry. This type of propaganda is sufficiently subtle to escape detection in the classroom.

There is a clear and present danger, which the Legislature of the State of California finds is great and imminent, that in order to advance the program, policies and objectives of the world communism movement, communist organizations in the State of California and their members will engage in concerted effort to hamper, restrict, interfere with, impede, or nullify the efforts of the governing boards of school districts to comply with and enforce Section 8275 of the Education Code of the State of California which prohibits the advocacy or teaching of communism with the intent to indoctrinate any pupil with or inculcate a preference in the mind of any pupil for communism for the purpose of undermining the patriotism for and the belief in the Government of the United States and of the State of California in the minds of the pupils of the Public School System.

The Legislature specifically finds that the requirement that all persons (certificated or noncertificated) now employed by the school districts of this State, or hereafter making application for employment by any of such districts, shall declare under oath that they are not knowingly members of the Communist Party, is a reasonable measure to meet the clear and present danger hereinabove found.

The Legislature further specifically finds that an indirect or evasive answer to a question relating to any of the matters specified in Section 12604 or 12605, or an answer which neither affirms nor denies shall, for the purposes of this act and chapter, be considered as a failure and refusal to answer, regardless of the ground or explanation given for any such answer.

School district employees.

Oath

12601. No person who is knowingly a member of the Communist Party shall hereafter be employed by, or, except as provided in Section 12602, retained in the employment of, any school district. Prior to the first day of service as an employee

CHAPTER 1639

An act making an appropriation to the Division of Beaches and Parks for the acquisition of land in Orange County as part of the state system of beaches and parks.

[Approved by Governor July 3, 1953. Filed with Secretary of State July 6, 1953.]

In effect September 9, 1953

The people of the State of California do enact as follows:

Appropriation. Acquisition of land for state park purposes.

SECTION 1. There is hereby appropriated to the Division of Beaches and Parks, Department of Natural Resources, from the State Beach Fund the sum of seven hundred fifty thousand dollars ($750,000), or so much thereof as may be necessary to be expended subject to the conditions provided in this act for the acquisition for state park purposes of land in Orange County known as Bolsa Chica Beach proposed state park site, consisting of 15,460 lineal feet, more or less, of beach frontage and such acreage as can be purchased at a reasonable price, to be determined by appraisal and negotiation or by condemnation proceedings, said land situate, lying and being between the extension of Los Patos Avenue, at the southerly terminus of Sunset Beach and the northerly city limits of Huntington Beach and between the ordinary high tide of the Pacific Ocean and State Highway No. 101, Alternate, excepting therefrom an easement for railroad purposes as said railroad now exists. This appropriation shall be expended in the acquisition of aforesaid property and shall not be matched by like amounts or any amounts, in money, property or lands received from private or any other sources.

Orange County tidelands oil receipts.

SEC. 2. The State of California received from the state-owned tideland production area along the Orange County coast the sum of four million six hundred thirty-six thousand nine hundred ninety-three dollars and thirty-seven cents ($4,636,993.37) in 1947, the sum of seven million seven hundred forty-seven thousand eight hundred seventy-nine dollars and ninety-six cents ($7,747,879.96) in 1948, the sum of seven million three hundred thirteen thousand seventy-one dollars and eighty-three cents ($7,313,071.83) in 1949, the sum of six million eight hundred twenty-seven thousand eight hundred seventy-six dollars and seventy-four cents ($6,827,876.74) in 1950, the sum of eight million four hundred sixty-eight thousand four hundred thirty dollars and thirty-two cents ($8,468,430.32) in 1951, the

sum of seven million six hundred five thousand five hundred fifty-six dollars and seventy-three cents ($7,605,556.73) in 1952. The County of Orange received no income from the State through tideland drilling operations in this area. However, in other areas of this State, the State by legislative action has relinquished its rights to other tideland pools and in these cases the municipalities contiguous thereto have reaped the entire benefit therefrom, and the State has received nothing. Approximately two-thirds of the money impounded under the tideland suit in the State Beach Fund have come from oil royalties collected from the tidelands of Orange County. The Legislature believes that equity and simple justice demand that a small portion of the millions of dollars obtained from the state tidelands of Orange County be used in the acquisition of the aforesaid described property which is eminently suited to beach recreation use, and which would prove to be of great recreational value to all of the citizens in the southern counties of the State. By reason thereof the Legislature hereby expressly declares that this appropriation constitutes a valid exception to any policy requiring the matching of state funds by other sources in acquiring park properties. Thus, the equities of the situation will be met, and a beautiful state beach park will be created for the enjoyment of the citizens of California.

Limitations

SEC. 3. The sum herein appropriated shall not become available for the purposes of this act until the release from trust by the Federal Government or pursuant to the order of a court of competent jurisdiction of all or any part of the money deposited in the Special Deposit Fund pursuant to Chapter 7 of the Statutes of 1951, or the money held in trust by the Treasurer of the United States pursuant to that act, and until a report has been submitted by the State Park Commission indicating that funds are available for the acquisition of all historical monuments, parks and beaches recommended for acquisition and indicating further that estimated revenues on a current basis from off-shore oil royalties are sufficient to provide for the maintenance and operation of all of the acquisitions recommended by the Park Commission and approved by the Legislature, and until the Legislature indicates its approval of such report by reappropriating the money appropriated by Section 1 of this act.

CHAPTER 1640

(c) Pursuant to the objectives of the world communism movement, in numerous foreign countries the legally constituted governments have been overthrown and totalitarian dictatorships established therein against the will of the people, and the establishment of similar dictatorships in other countries is imminently threatening. The successful establishment of totalitarian dictatorships has consistently been aided, accompanied, or accomplished by repeated acts of treachery, deceit, teaching of false doctrines, teaching untruth, together with organized confusion, insubordination, and disloyalty, fostered, directed, instigated, or employed by communist organizations and their members in such countries.

(d) Within the boundaries of the State of California there are active disciplined communist organizations presently functioning for the primary purpose of advancing the objectives of the world communism movement, which organizations promulgate, advocate, and adhere to the precepts and the principles and doctrines of the world communism movement. These communist organizations are characterized by identification of their programs, policies, and objectives with those of the world communism movement, and they regularly and consistently cooperate with and endeavor to carry into execution programs, policies and objectives substantially identical to programs, policies, and objectives of such world communism movement.

(e) One of the objectives of the world communism movement is to place its members in state and local government positions and in state supported educational institutions. If this objective is successful, propaganda can be disseminated by the members of these organizations among pupils and students by those members who would have the opportunity to teach them

and to whom, as teachers, they would look for guidance, authority, and leadership. The members of such groups would use their positions to advocate and teach their doctrines and teach the prescribed Communist Party line group dogma or doctrine without regard to truth or free inquiry. This type of propaganda is sufficiently subtle to escape detection.

There is a clear and present danger, which the Legislature of the State of California finds is great and imminent, that in order to advance the program, policies and objectives of the world communism movement, communist organizations in the State of California and their members will engage in concerted effort to hamper, restrict, interfere with, impede, or nullify the efforts of the State and the public agencies of the State to comply with and enforce the laws of the State of California and their members will infiltrate and seek employment by the State and its public agencies.

SEC. 2. Section 1028, as added by Chapter 1418 of the Statutes of 1947, of said code is amended to read:

Cause for dismissal

1028. It shall be sufficient cause for the dismissal of any public employee when such public employee advocates or is knowingly a member of the Communist Party or of an organization which during the time of his membership he knows advocates overthrow of the Government of the United States or of any state by force or violence.

SEC. 3. Section 1028.1 is added to said code, to read:

1028.1. It shall be the duty of any public employee who may be subpenaed or ordered by the governing body of the state or local agency by which such employee is employed, to appear before such governing body, or a committee or subcommittee thereof, or by a duly authorized committee of the Congress of the United States or of the Legislature of this State, or any subcommittee of any such committee, to appear before such committee or subcommittee, and to answer under oath a question or questions propounded by such governing body, committee or subcommittee, or a member or counsel thereof, relating to:

(a) Present personal advocacy by the employee of the forceful or violent overthrow of the Government of the United States or of any state.

(b) Present knowing membership in any organization now advocating the forceful or violent overthrow of the Government of the United States or of any state.

(c) Past knowing membership at any time since September 10, 1948, in any organization which, to the knowledge of such employee, during the time of the employee's membership advocated the forceful or violent overthrow of the Government of the United States or of any state.

(d) Questions as to present knowing membership of such employee in the Communist Party or as to past knowing membership in the Communist Party at any time since September 10, 1948.

Any employee who fails or refuses to appear or to answer under oath on any ground whatsoever any such questions so

propounded shall be guilty of insubordination and guilty of violating this section and shall be suspended and dismissed from his employment in the manner provided by law.

Exception

SEC. 4. The provisions of this act shall not be applicable to school district employees, it being the intent of the Legislature that similar provision be made in the Education Code for such employees by other acts.

CHAPTER 1690

An act to add Sections 2020 and 2021 to the Water Code, relating to underground water.

In effect September 9 1953

[Approved by Governor July 4, 1953 Filed with Secretary of State July 7, 1953]

The people of the State of California do enact as follows:

SECTION 1. Section 2020 is added to the Water Code, to read:

2020. At any time after the filing of the report by the department as provided in Section 2016 the department, if it appears that underground water is being pumped in an amount which, if not restricted, would destroy or irreparably injure the waters of the basin due to ocean water intrusion before final judgment can be had, may, on notice, pursuant to the provisions of Section 527 of the Code of Civil Procedure, apply to the court for a preliminary injunction, restricting the pumping of water of the basin so as to avoid irreparable injury to, or destruction of, the waters of the basin, and the court may issue the injunction, subject to the provisions of Section 2021, equitably restricting and apportioning the reduction in the pumping of water, without requiring bond. Prevention of ocean water intrusion

The provisions of this section apply only to actions to determine rights to waters of underground basins located in the arid, southern coastal area defined by the exterior boundaries of the Counties of Santa Barbara, Ventura, Los Angeles, Orange, and San Diego. Applicable areas

SEC. 2. Section 2021 is added to said code, to read:

2021. Where a preliminary injunction has been granted pursuant to Section 2020, the final judgment shall equitably compensate in quantities of water for such variations as there may be between the rights of the parties to the use of water on which such preliminary injunction is based, and as such rights are determined in such final judgment. Equitable compensation

SEC. 3. The water supplies in the underground basins in the arid, southern coastal area in this State, now being rapidly depleted by excessive pumping are threatened with irreparable injury or destruction by ocean water intrusion This excessive pumping has been continued after the rights of users have been submitted to the courts for determination, and, because of the lengthy nature of such litigation, the water of such basins can be irreparably injured or destroyed before final judgment in such actions. Legislative declaration

This act relates to actions brought by the users to determine rights to the waters of underground basins and is intended to facilitate the issuance of preliminary injunctions in such cases in order that the extraction of water be equitably reduced to the end that the waters of the basin can be saved for future use.

The Legislature finds and declares that the solution of the problems arising because of ocean water intrusion in the basins located in the arid southern coastal area of this State are unique to that area and are problems as to which a general law would not be applicable.

[Approved by Governor July 6, 1953. Filed with Secretary of State July 7, 1953.]

One Member of the Senate appointed by the Senate Committee on Rules and one Member of the Assembly appointed by the Speaker shall meet with and advise with the commission to the extent that such advisory participation is not incompatible with their respective positions as Members of the Legislature. The Members of the Legislature so appointed are hereby constituted a legislative interim committee on the subject of this act with all the powers and duties imposed upon such committees by the Joint Rules of the Legislature. The members of the commission and of the interim committee shall receive no additional compensation for their services under this act, but shall be reimbursed for their actual and necessary expenses incurred in connection with the performance of their duties hereunder, to be paid out of the money appropriated for the support of the commission. The Governor of California is empowered and directed to forward a copy of this act to the Governor of the State of Arizona and to request that the governor or legislature of that state appoint representatives of the State of Arizona to confer and act in conjunction with said commission for the purposes hereinafter specified, upon the understanding that each state will pay all expenses and charges of its representatives.

Same: Joint action with Arizona

SEC. 2. It shall be the duty of said commission to confer and act in conjunction with said representatives to be appointed on behalf of the State of Arizona for the following purposes:

(a) To make a joint investigation at the joint expense of said two states as to the location of the common boundary between the two states with respect to the present channel of the Colorado River from the southern boundary of the State of Nevada to the international boundary between the State of California and the United Mexican States;

(b) To investigate, negotiate and report as to the necessity and advisability of a compact between said two states defining or relocating said common boundary;

SEC. 4. The President and the Congress of the United States are respectfully requested to provide for the appointment of a representative of the United States to meet and confer with the said commission and said representatives of the State of Arizona, and to assist in carrying out the purposes of this act.

Urgency

SEC. 5. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Section 1 of Article IV of the Constitution, and shall go into immediate effect. The facts constituting such necessity are:

Owing to the meandering of the Colorado River since the adoption of the Constitution of California in 1849 and since the adoption of the Arizona Constitution in 1912, doubts exist as to where the true boundary line between the two states may be. Conflicts which may lead to violence, exist between private claimants of title to the same land under the laws of Arizona and under the laws of California. Uncertainties exist as to the right of public officials of California to assess, tax and police certain lands, which uncertainties affect the public revenues of California. Because of said facts it is necessary that this act go into effect immediately.

Calculation of pensions under this section shall be made on the basis of current interest rate and mortality tables. Pension increase

This section shall not apply to any contracting agency, nor to pensions payable to the retired employees of any contracting agency unless and until the contracting agency elects to be subject to the provisions of this section and of Section 20839 by amendment to its contract made in the manner prescribed for approval of contracts, except that an election among the employees is not required, or in the case of contracts made after this section takes effect, by express provision in such contract making the contracting agency subject to the provisions of this section.

CHAPTER 4. STATE GENERAL OBLIGATION BONDS

Article 1. General

Short title

16720. This chapter shall be known and may be cited as the State General Obligation Bond Law.

Purpose

16721. The purpose of this chapter is to provide a procedure which may be adopted by other acts for use with whatever modifications are necessary in authorizing the issuance and sale of state general obligation bonds and providing for the repayment of such bonds. This chapter does not itself authorize the issuance or sale of any bonds.

Definitions

16722. As used in this chapter, the following words shall have the meaning given to them in this section, unless the context otherwise requires:

(a) "Bond" means a state general obligation bond issued pursuant to an act adopting the provisions of this chapter.

(b) "Committee" means the finance committee or other body created by any such act and authorized to cause bonds to be issued by the adoption of a resolution or resolutions.

(c) "Board" means the state board, department, or agency authorized by any such act to request the committee to cause bonds to be issued for the purpose of creating a fund which is to be expended by the board for the purposes specified in said act.

(d) "Fund" means the fund created by any such act, and into which the proceeds from the sale of the bonds are paid.

(e) "Bond act" means the act authorizing the issuance of state general obligation bonds and adopting this chapter by reference.

Incorporation by reference

16723. Any bond act may adopt the provisions of this chapter by reference to its short title, and such reference shall serve to incorporate the provisions of this chapter in said act as though set out in full therein. Notwithstanding such adoption by reference, the bond act may contain provisions applicable to the bonds issued thereunder, and, in case of conflict, the provisions in the bond act shall prevail.

Whenever any bond act so adopting this chapter contains a provision providing for the submission of the bond act to the people of the State of California for approval, in the required

publication of the bond act prior to the election, the entire text of this chapter shall, in addition to the entire text of the bond act, be printed at length in said publication. This provision shall not be applicable when the bond act is approved and ratified by means of an amendment to the Constitution of the State of California.

16724. The bond act shall contain the following provisions: Bond act contents

(a) A statement of the total amount of bonds authorized to be issued and the purpose for which the proceeds from the sale of the bonds may be used.

(b) The creation of a committee and fund, and the naming of the board.

(c) A statement that the bonds are valid obligations of the State and a pledge of the full faith and credit of the State for the punctual payment of both principal and interest thereof.

(d) An appropriation from the General Fund in the State Treasury of such sum annually as will be necessary to pay the principal and interest on the bonds as they become due and payable.

(e) A requirement that there be collected annually in the same manner and at the same time as other state revenue is collected such a sum, in addition to the ordinary revenues of the State, as shall be required to pay the principal and interest on the bonds; and a provision making it the duty of all officers charged by law with any duty in regard to the collections of said revenue to do and perform each and every act which shall be necessary to collect such additional sum

(f) A provision requiring the transfer into the General Fund in the State Treasury, on the several dates on which funds are remitted pursuant to Section 16676 of the Government Code for the payment of the then maturing principal and interest on the bonds, from the fund, so far as available therein, of amounts equal to all sums so becoming due for principal and interest; and a provision that if the money so returned on said remittance dates is less than the principal and interest then due and payable, the balance remaining unpaid shall be transferred to the General Fund out of the fund as soon thereafter as it shall become available, together with interest thereon from such remittance dates until so returned at the same rate as borne by the bonds, compounded semiannually. This provision shall not be required whenever the fund will have receipts only from the proceeds of the sale of bonds issued pursuant to the bond act, or from proceeds of investments made pursuant to Section 16759.

(g) An appropriation from the General Fund to be available for expenses incurred by the State Treasurer in having the bonds prepared and in advertising their sale or their prior redemption; for expenses incurred by the committee pursuant to Section 16758; and for payment for legal services, upon approval of the State Board of Control, pursuant to Section 16760. This appropriation shall contain a requirement that out of the first money realized from the sale of bonds, there shall be redeposited

to the credit of such appropriation such sums as have been expended for the above purposes, which may be used for the same purposes and repaid in the same manner whenever additional sales are made; and a further requirement that whenever all the bonds authorized by the bond act have been sold, the amount of said appropriation shall revert to the unappropriated surplus of the General Fund.

(h) A provision incorporating the provisions of this chapter, and a declaration that the provisions hereof are included in said act as though set out in full therein.

Record of proceedings

16725. The Controller, the State Treasurer and the committee shall keep full and particular account and record of all their proceedings under the bond act and this chapter and they shall transmit to the Governor an abstract of all such proceedings thereunder, with an annual report, to be transmitted by the Governor to the Legislature annually. All books and papers pertaining to the matters provided for in the bond act and this chapter shall at all times be open to the inspection of the Governor, the Attorney General, any committee of either branch of the Legislature, or any joint committee of both, any citizen of the State, or any interested party.

Transfer to General Fund

16726. Upon request of the board stating that the purposes for which the bonds were issued and sold has been effected, the committee shall certify this fact to the State Controller, and thereupon the unencumbered balance of cash remaining from the proceeds of the sale of the bonds in the fund shall, on order of the State Controller, be transferred therefrom to the General Fund.

Article 2. Issuance of Bonds

Determination of necessity

16730. Upon request of the board, supported as required in the bond act, the committee shall determine the necessity or desirability of issuing any bonds authorized to be issued and the amount of bonds then to be issued and sold. Successive issues of bonds may be authorized and sold and shall be designated by an appropriate number or other designation. It is not necessary that all of the bonds authorized to be issued be sold at any one time.

Resolution contents

16731. Whenever the committee determines that the sale of all or any part of the bonds authorized to be issued is necessary or desirable, it shall adopt a resolution to that effect. The resolution shall authorize and direct the State Treasurer to arrange for the preparation of the requisite number of suitable bonds and shall specify as to such bonds then to be sold:

(a) The aggregate number, aggregate par value, denominations and the date of the bonds to be then sold. Such denominations shall be in the sum of one thousand dollars ($1,000), or multiples thereof. The date appearing on said bonds shall be deemed to be the date of issuance for all purposes of this chapter, irrespective of the actual date of delivery of such bonds and the payment of the purchase price thereof.

(b) The dates of maturity, and the amount and numerical sequence of the bonds maturing at each date of maturity, which amounts need not be equal, but which dates shall be at annual or semiannual intervals, and the first of which dates of maturity shall be not more than five years, and the last of which dates of maturity shall be not more than 45 years, after the date of the bonds.

(c) Whether or not the bonds are to be subject to redemption at the option of the board prior to maturity, and, if so, the provisions for such redemption, the manner of the call thereof, and the price or prices at which the bonds shall be subject to redemption.

(d) The annual rate, or rates, of interest which the bonds to be issued shall bear, to be in multiples of one-fourth of 1 percent, which rate, or rates, at the discretion of the committee, may be determined by the bidder at the time of sale of said bonds, not exceed 5 percent per annum, payable semiannually.

(e) The number, numerical sequence, and due dates of the interest coupons to be attached to the bonds.

(f) The technical form and language of the bonds and interest coupons.

(g) Whether or not the right is reserved to make delivery in the form of temporary or interim bonds, certificates, or receipts, exchangeable for definitive bonds when executed and available for delivery, and if such right is reserved the denominations and form of such temporary securities.

(h) Whether or not the bonds are to be subject to registration, and if so, whether such registration is to be as to principal only, or as to both principal and interest, or in either of such forms at the option of the holder, and the form and all of the terms and conditions of such registration. If such registration is provided for, all of the provisions of this chapter with reference to the payment of bonds and interest coupons shall be subject to the terms and conditions of such registration with respect to the payment of registered bonds and the interest thereon

(i) All other terms and conditions of the bonds and of the execution, issuance and sale thereof, which shall be consistent with all of the provisions of this chapter.

(j) The date and hour fixed for the sale of the bonds, but such date may be changed by the Governor, in his discretion, by his directions given to the State Treasurer under Section 16750.

Dates of maturity

16732 In determining the dates of maturity of the bonds, and the amount thereof to mature at each date of maturity, the committee shall be guided, so far as it may deem to be practicable, by the amounts and dates of maturity of the revenue estimated to accrue to the fund pursuant to the bond act. The committee shall fix and determine the dates and amounts of such maturities in such manner that, together with the dates and amounts of interest payments on the bonds, they shall co-

incide, as nearly as it may deem to be practicable, with the dates and amounts of such estimated revenues.

Rate of interest

16733. The rate of interest to be borne by the bonds need not be uniform for all bonds of the same issue, and shall be the rate or rates specified in the bid accepted by the State Treasurer and fixed and determined by the committee in a resolution adopted at or after the sale of the bonds. The interest coupons first payable may be so payable at any time within one year after the date of such bonds

Method of payment

16734 Both principal of and interest on the bonds shall be payable in lawful money of the United States, at the Office of the State Treasurer, or at the office of the state fiscal agent in the City of New York, State of New York, or at the office of any duly authorized agent of the State Treasurer.

Reference to bond act

16735. Each bond shall contain a reference to the bond act, and if subject to call or redemption prior to maturity, a recital to that effect.

Article 3. Preparation and Execution of Bonds

Preparation of bonds

16740. Immediately after the adoption by the committee of any resolution in conformity with Section 16731, the State Treasurer shall arrange for the preparation of the requisite number of suitable bonds, in accordance with the resolution, and in so doing shall arrange for the imprinting thereon of the interest rates and other appropriate matter after the sale of the bonds and the awarding thereof to the successful bidder.

Signatures and seal

16741. All bonds shall bear the facsimile signature of the Governor and the facsimile countersignature of the Controller and shall be endorsed by the State Treasurer either by original signature or by a signature stamp, and each of said bonds shall bear an impress or a facsimile of the Great Seal of the State of California Interest coupons attached to each bond shall bear the facsimile signature of the State Treasurer. Each such signature shall be that of the person who shall be in office at the date of the affixing thereof, in the case of original or stamped signatures, or at the date of authorizing the affixing thereof, in the case of facsimile signatures. Bonds and coupons so executed, when sold, shall be valid and binding notwithstanding any of such persons having ceased to hold his respective office before their issuance and delivery.

Cancellation

16742. Whenever the committee may determine by resolution that for any reason any bonds which have been prepared and executed under the foregoing provisions should not be sold or issued, the State Treasurer shall cancel them by perforation with a suitable device in a manner to indicate such cancellation and the date thereof. Upon the committee so determining by resolution, new bonds, conforming to its directions, may be prepared and executed in lieu of any bonds so canceled, and may be sold and issued in the same manner as provided for other bonds in this chapter.

16743. If the right so to do has been reserved in the resolution adopted in conformity with Section 16731, temporary or interim bonds, certificates, or receipts may be issued and delivered in lieu of definitive bonds, and shall be exchangeable for such definitive bonds when they are executed and available for delivery. Such temporary securities shall conform to such resolution, and the signature of the State Treasurer alone, which may be by signature stamp, shall be sufficient execution thereof. Temporary securities

Article 4. Sale of Bonds

16750. Following the adoption by the committee of any resolution in conformity with Section 16731, the Governor shall direct the State Treasurer, in writing, under the seal of the State, to offer the bonds specified in the resolution for sale at a specified day and hour. Direction of sale

16751. Due notice of the time and place of sale of the bonds shall be given by the State Treasurer by publication in one newspaper published in the City and County of San Francisco, by publication in one newspaper published in the City of Sacramento, and by publication in one newspaper published in the City of Los Angeles, once a week during two weeks prior to such sale In addition to the notice last above provided for, the State Treasurer may give such further notice as he may deem advisable, but the expense and cost of such additional notice shall not exceed the sum of one thousand dollars ($1,000) for each sale so advertised. Notice

16752. The State Treasurer may from time to time, by public announcement at the place and time fixed for the sale, continue such sale to such time and place as he may select.

16753. Each bid shall be in writing and signed by the bidder and sealed, and shall be accompanied by the deposit of a certified check or cashier's check for one-half of one percent (0.5%) of the par value of the bonds so offered for sale, but not exceeding one hundred thousand dollars ($100,000), drawn on a bank or trust company authorized to transact and transacting business in the State of California, payable to the State Treasurer. Such deposit shall not bear interest. Bids and deposits

16754. The bonds specified in the resolution and in the direction of the Governor shall be sold by the State Treasurer at the time so directed by the Governor, or at the time to which the sale shall have been so continued, at public sale, upon sealed bids, to the bidder whose bid will result in the lowest net interest cost on account of such bonds, but the State Treasurer must reject any and all bids for the bonds which shall be below the par value thereof plus the interest which shall have accrued thereon from the date thereof (or, if any past due coupon or coupons have been detached from said bonds prior to the delivery thereof, then from the due date of the latest coupon so detached) to the date of the purchaser's payment for said bonds. The net interest cost under each bid shall be determined by ascertaining the total amount of interest which the State would Bond sale

be required to pay under that bid, from the date of sale to the respective maturity dates of the bonds then offered for sale, at the coupon rate or rates specified in such bid, less the total amount of the premium, if any, offered by such bid. The bid under which the amount so ascertained is the least shall be deemed to be the bid resulting in the lowest net interest cost. In effect immediately

[Approved by Governor July 8, 1953. Filed with Secretary of State July 8, 1953.]

The people of the State of California do enact as follows:

Legislative consent. Acquisition of ferry system

SECTION 1. The consent of the Legislature is hereby given to the acquisition from the City of Martinez by the Department of Public Works, of the ferry system operated across Carquinez Straits between the Cities of Benicia and Martinez.

Conditioned

SEC. 2. Such consent is conditioned upon the transfer to the State by the City of Martinez of its entire properties, real and personal, comprising said ferry system, without charge or cost to the State, such transfer to include, without being limited to, all franchises, ferry boats, slips, and all real and personal property and equipment necessary or appropriate to the operation of said ferry system. The transfer of said property, if made, shall be free and clear of all debts or claims of any nature whatsoever.

Maintenance and operation

SEC. 3. Upon acquisition of said ferry system it shall be maintained and operated by the Department of Public Works as part of the system of state highways. The director of said department shall, by executive order, fix rates of toll from time to time for the use of the ferries, to the end that the ferry system shall be as nearly self-supporting as possible. No other provision of law shall affect the power or duty of the director of said de-

partment to fix rates of toll for the use of said ferries, nor the power and duty of the Department of Public Works to collect the tolls so fixed by the director.

The director may, if he concludes it is in the public interest to do so, contract with one or more persons, including corporations, for the operation of the ferry system by them.

Deposit of money received

SEC. 4. Said department shall deposit all money received from the operation of the ferry system in the State Highway Fund. The costs of operation and maintenance of said ferry system, including costs of rehabilitation of said system and the cost of any insurance authorized by this act, shall be paid out of the State Highway Fund from funds available to said department for the maintenance of state highways; provided, however, that in no event shall the amount expended from the State Highway Fund for such purposes during any one year exceed by more than one hundred thousand dollars ($100,000) the amount of money received from the operation of the ferry system.

Insurance

SEC. 5. The department may, for the protection of the State of California, insure said ferry system against all risks in any amount up to the full insurable value thereof, and may insure any liability of the State, its officers and employees, arising out of the operation of said ferry system.

Restaurant facilities, etc.

SEC. 6. The department may maintain restaurant facilities or other concessions on said ferry system. Such facilities may be operated directly by the department or may be leased out as concessions.

Rules, etc., governing use of ferries

SEC. 7. The department is authorized to promulgate reasonable rules and regulations governing the use of said ferries. It is unlawful to operate on any such ferries, or on the approaches thereto, a vehicle of a size or weight or at a speed greater than that which such ferry or its approaches, with safety to itself and to the traveling public, will permit. The department shall determine the maximum size, weight and speed of vehicles which with safety can be permitted on such ferries, or the approaches thereto, and shall by appropriate signs notify the public of its determination. It is prima facie evidence of violation of this section to exceed the limit specified by the department upon such signs. Any damages done to said ferry system or to the approaches thereto may be recovered by said department in a civil action as provided by law in the case of damage to any state highway. Any such damage occurring by reason of failure to comply with the provisions of this section may be recovered by the department and a violation of the limits specified on the signs erected by the department is prima facie evidence of such violation.

SEC. 8. Section 374 of the Streets and Highways Code is amended to read:

Route 75

375. Route 75 is from:

(a) Oakland to Route 4 near Stockton via Walnut Creek and Antioch.

(b) Route (a) above, north of Walnut Creek to a connection with Route 74 in Benicia.

SEC. 10. Section 8 and Section 9 shall become effective upon the acquisition by the Department of Public Works of the ferry system operated across Carquinez Straits between the Cities of Benicia and Martinez.

Urgency

SEC. 11. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The City of Martinez is about to close down the ferry system operated across Carquinez Straits between the Cities of Benicia and Martinez. It is vitally necessary that this ferry system be continued in operation to serve numerous refineries, chemical plants, steel companies, and other industries necessary for national defense, workers commuting both to and from such industries, and the extremely important Benicia Arsenal. The maintenance of this ferry system is a proper state function, and, in the interest of public welfare, action should immediately be taken to authorize its acquisition.

Such permit may be renewed each permit year without further registration by application to the department, accompanied by a renewal fee of fifty dollars ($50), on or before June 30th immediately preceding the permit year for which the permit is issued. CHAPTER 1741

An act to add Article 6.5 to Chapter 2, Part 1, Division 1, Title 5 of the Government Code, relating to zoning of airport approaches.

In effect September 9, 1953

[Approved by Governor July 7, 1953. Filed with Secretary of State July 8, 1953.]

The people of the State of California do enact as follows:

SECTION 1. Article 6.5 is added to Chapter 2, Part 1, Division 1, Title 5 of the Government Code, to read:

Article 6.5. Airport Approaches Zoning Law

Short title

50485. This article shall be known and may be cited as the "Airport Approaches Zoning Law."

Definitions

50485.1. As used in this article, unless the context otherwise requires:

"Airport" means any area of land or water designed and set aside for the landing and taking off of aircraft and utilized or to be utilized in the interest of the public for such purposes.

"Airport hazard" means any structure or tree or use of land which obstructs the airspace required for the flight of aircraft in landing or taking off at an airport or is otherwise hazardous to such landing or taking off of aircraft.

"Airport hazard area" means any area of land or water upon which an airport hazard might be established if not prevented as provided in this article.

"City or county" means any city, county, or city and county.

"Person" means any individual, firm, copartnership, corporation, company, association, joint stock association, city or county, or district, and includes any trustee, receiver, or assignee.

"Structure" means any object constructed or installed by man, including, but without limitation, buildings, towers, smokestacks, and overhead lines.

"Tree" means any object of natural growth.

Airport hazard a public nuisance

50485.2. It is hereby found that an airport hazard endangers the lives and property of users of the airport and of occupants of land in its vicinity and also, if of the obstruction type, in effect reduces the size of the area available for the landing, taking off and maneuvering of the aircraft, thus tending to destroy or impair the utility of the airport and the public investment therein. Accordingly, it is hereby declared: (a)

that the creation or establishment of an airport hazard is a public nuisance and an injury to the community served by the airport in question; (b) that it is therefore necessary in the interest of the public health, public safety, and general welfare that the creation or establishment of airport hazards be prevented; and (c) that this should be accomplished, to the extent legally possible, by exercise of the police power. It is further declared that both the prevention of the creation or establishment of airport hazards and the elimination, removal, alteration, mitigation, or marking and lighting of existing airport hazards are public purposes for which a city or county may raise and expend public funds and acquire land or property interests therein.

Airport zoning regulations by city etc

50485.3. In order to prevent the creation or establishment of airport hazards, every city or county having an airport hazard area within its territorial limits may adopt, administer, and enforce, under the police power and in the manner and upon the conditions hereinafter prescribed, airport zoning regulations for such airport hazard area, which regulations may divide such area into zones, and, within such zones, specify the land uses permitted and regulate and restrict the height to which structures and trees may be erected or allowed to grow.

Conflicts in regulations More stringent governs

50485 4. In the event that a city or county has adopted, or hereafter adopts, a comprehensive zoning ordinance regulating, among other things, the height of buildings, any airport zoning regulations applicable to the same area or portion thereof may be incorporated in and made a part of such comprehensive zoning regulations, and be administered and enforced in connection therewith.

In the event of conflict between any airport zoning regulations adopted under this article and any other regulations applicable to the same area whether the conflict be with respect to the height of structures or trees, the use of land, or any other matter, and whether such other regulations were adopted by the city or county which adopted the airport zoning regulations or by some other city or county, the more stringent limitation or requirement shall govern and prevail.

Adoption of regulations

50485.5. No airport zoning regulations shall be adopted, amended or changed under this article except by action of the legislative body of the city or county in question after a public hearing in relation thereto, at which parties in interest and citizens shall have an opportunity to be heard At least 15 days' notice of the hearing shall be published in an official paper, or a paper of general circulation, in the city or county in which is located the airport hazard area to be zoned

Airport zoning commission

50485.6. Prior to the initial zoning of any airport hazard area under this article, the city or county which is to adopt the regulations shall appoint a commission, to be known as the airport zoning commission, to recommend the boundaries of the various zones to be established and the regulations to be adopted therefor. Such commission shall make a preliminary report and hold public hearings thereon before submitting its final report,

and the legislative body of the city or county shall not hold its public hearings or take other action until it has received the final report of such commission. Where a city or county planning commission already exists, it shall be appointed as the airport zoning commission.

Reasonable regulations

50485.7. All airport zoning regulations adopted under this article shall be reasonable and none shall impose any requirement or restriction which is not reasonably necessary to effectuate the purposes of this article. In determining what regulations it may adopt, each city or county shall consider, among other things, the character of the flying operations expected to be conducted at the airport, the nature of the terrain within the airport hazard area, the character of the neighborhood, and the uses to which the property to be zoned is put and adaptable.

Removal, etc., of structures not required

50485.8. No airport zoning regulations adopted under this article shall require the removal, lowering, or other change or alteration of any structure or tree not conforming to the regulations when adopted or amended, or otherwise interfere with the continuance of any nonconforming use, except as provided in Section 50485.10.

Administration, enforcement

50485.9. All airport zoning regulations adopted under this article shall provide for the administration and enforcement of such regulations by an administrative agency which may be an agency created by such regulations or any official, board, or other existing agency of the city or county adopting the regulations, if satisfactory to that city or county. The duties of any administrative agency designated pursuant to this article shall include that of hearing and deciding all applications for permits and variances under Section 50485.10.

Permits to replace, etc., structures

50485.10. Any airport zoning regulations shall provide that before any nonconforming structure or tree may be replaced, substantially altered or repaired, rebuilt, allowed to grow higher, or replanted, a permit must be secured from the administrative agency authorized to administer and enforce the regulations, authorizing such replacement, change or repair. No permit shall be granted that would allow the establishment or creation of an airport hazard or permit a nonconforming structure or tree or nonconforming use to be made or become higher or become a greater hazard to air navigation than it was when the applicable regulation was adopted or than it is when the application for a permit is made. Except as provided herein, all applications for permits shall be granted. No such permit shall be required to make maintenance repairs to or to replace parts of existing structures which do not enlarge or increase the height of the existing structure.

Variances allowed

Any person desiring to erect any structure, or increase the height of any structure, or permit the growth of any tree, or otherwise use his property in violation of airport zoning regulations adopted under this article, may apply to the administrative agency for a variance from the zoning regulations in question. Such variances shall be allowed where a literal application or enforcement of the regulations would result in prac-

tical difficulty or unnecessary hardship and the relief granted would not be contrary to the public interest but do substantial justice and be in accordance with the spirit of the regulations and this article; provided, that any variance may be allowed subject to any reasonable conditions that the administrative agency may deem necessary to effectuate the purpose of this article.

Permits conditioned

In granting any permit or variance under this section, the administrative agency may, if it deems such action advisable to effectuate the purposes of this article and reasonable in the circumstances, so condition such permit or variance as to require the owner of the structure or tree in question to permit the city and county, at its own expense, to install, operate, and maintain thereon such markers and lights as may be necessary to indicate to flyers the presence of an airport hazard.

Court review

50485.11. Any person aggrieved or taxpayer affected by any decision of the administrative agency or of any governing body of a city or county, may petition a court for a review of the matter in accordance with law.

The court shall have exclusive jurisdiction to affirm, modify, or set aside the decision brought up for review, in whole or in part, and if need be, to order further proceedings by the administrative agency. The findings of fact of the administrative agency, if supported by substantial evidence, shall be accepted by the court as conclusive, and no objection to a decision of the administrative agency shall be considered by the court unless such objection shall have been urged before the administrative agency, or, if it was not so urged, unless there were reasonable grounds for failure to do so.

In any case in which airport zoning regulations adopted under this article, although generally reasonable, are held by a court to interfere with the use or enjoyment of a particular structure or parcel of land to such an extent, or to be so onerous in their application to such a structure or parcel of land, as to constitute a taking or deprivation of that property in violation of the Constitution of this State or the Constitution of the United States, such holding shall not affect the application of such regulations to other structures and parcels of land.

Violations

50485.12. Each violation of this article or of any regulations, orders, or rulings promulgated or made pursuant to this article, shall constitute a misdemeanor. In addition, the city or county adopting zoning regulations under this article may institute in any court of competent jurisdiction an action to prevent, restrain, correct or abate any violation of this article, or of airport zoning regulations adopted under this article, or of any order or ruling made in connection with their administration or enforcement, and the court shall adjudge to the plaintiff such relief, by way of injunction (which may be mandatory) or otherwise, as may be proper under all the facts and circumstances of the case, in order fully to effectuate the purpose of this article and of the regulations adopted and orders and rulings made pursuant thereto.

Acquisition of property

50485.13. In any case in which: (a) it is desired to remove, lower, or otherwise terminate a nonconforming structure or use; or (b) the approach protection necessary cannot, because of constitutional limitations, be provided by airport zoning regulations under this article; or (c) it appears advisable that the necessary approach protection be provided by acquisition of property rights rather than by airport zoning regulations, the city or county within which the property or nonconforming use is located or the city or county owning the airport or served by it may acquire, by purchase, grant, or condemnation in the manner provided by the law under which a city or county is authorized to acquire real property for public purposes, such air right, air navigation easement, or other estate or interest in the property or nonconforming structure or use in question as may be necessary to effectuate the purposes of this article. In the case of the purchase or grant of any property or any easement or estate or interest therein or the acquisition of the same by the power of eminent domain by a city or county making such purchase or exercising such power, there shall be included in the damages for the taking, injury or destruction of property the cost of the removal and relocation of any structure or public utility which is required to be moved to a new location.

Local governing bodies rights reserved

50485.14. Neither this article nor anything expressed in it is intended to be or is to be construed as a denial of the power of local governing bodies and agencies to provide for zoning regulations pursuant to Article XI, Section 11, of the Constitution.

SEC. 18 At any time prior to the sale and delivery of the bonds, an action may be commenced by the board in the name of the district in the Superior Court of the State of California, in and for the County of Sacramento, to determine the validity of any of the bonds. SEC. 20. Whenever the district shall have any moneys in any sinking fund established for the purpose of providing for the payment of the principal or interest of any bonded indebtedness, which money is not immediately required for the purpose of making such payment, the same or any part thereof may be invested temporarily in any bonds already issued by such district or in any bonds of the United States of America or the State of California Such investment may be made by direct purchase of any issue of bonds of the district or any part thereof at the original sale of such bonds or by the purchase of such bonds after they have been so issued. Any bonds so purchased and held in any such sinking fund may from time to time be sold and the proceeds temporarily reinvested in bonds as above provided. Sales of any bonds so purchased and held in the sinking fund shall, from time to time, be made in season so that the proceeds may apply to the purpose for which the sinking fund was created except that if such moneys shall not be required for the purpose of paying the interest or any part of the principal of the outstanding bonds, the bonds of the district purchased from such moneys may be canceled by the treasurer of said district upon order by the board. After such cancellation such bonds shall cease to be an obligation of the district for any purpose whatsoever.

Payment of interest, etc.

Deposit of proceeds

SEC. 24. The board may, with the consent of any holder or holders of outstanding bonds of the district, exchange refunding bonds bearing a lower rate of interest for such outstanding bonds. Exchanging refunding bonds

Whenever any holder of outstanding bond or bonds shall have consented to such exchange, the board may, by resolution entered in its minutes, order the refunding of such bonds. The resolution shall designate the numbers, denominations, dates of maturity and aggregate principal amounts of the bonds so to be refunded and shall provide for the issuance of refunding bonds in exchange therefor, the form, numbers, denominations, dates of maturity and aggregate principal amounts of which shall be the same as the bonds so to be refunded. The resolution shall also fix the rate of interest said refunding bonds shall bear, which rate shall be less than the rate provided in the bonds to be refunded. The resolution shall also fix the form of the interest coupons attached to said refunding bonds, which shall be the same as the bonds so to be refunded, excepting that the rate and amounts of interest shall be less as hereinabove provided.

The refunding bonds shall be signed by the chairman of the board or such other member of the board as said board may by resolution designate, and shall be countersigned by the treasurer of the district, and the seal of said district shall be affixed thereto. In case any officer whose signature or countersignature appears on said bonds or coupons shall cease to be such officer before the delivery of such bonds to the purchaser, such signature or countersignature shall nevertheless be valid and sufficient for all purposes the same as

if such officer had remained in office until the delivery of the bonds.

Each refunding bond may be exchanged for its corresponding outstanding bond as the board by agreement with the holder of such outstanding bond may determine, except that in effecting such exchange, any and all matured coupons on said refunding bonds shall be detached and canceled and the principal and accrued interest of both issues shall be accepted at par value and the district shall pay said holder in cash out of moneys in the bond interest fund of the district an amount equal to the difference between the interest on the outstanding bond and on the refunding bond accrued to the date of such exchange.

When any refunding bonds shall have been exchanged, taxes shall be levied and collected to pay the principal and interest thereof as provided by Section 25, all the provisions of which section shall apply to said refunding bonds to the same extent as to original issues.

The refunding bonds shall also be legal investments for fiduciaries and others as provided in Section 22.

Ad valorem assessment to pay interest, etc.

SEC. 25. The board shall at the time for fixing the general tax levy for county purposes and in the manner of such general tax levy provided, levy and collect annually each year until said bonds are paid or until there shall be a sum in the treasury of such district set apart for that purpose to meet all sums coming due for principal and interest on said bonds, an ad valorem assessment sufficient to pay the annual interest on said bonds and also such part of the principal thereof as shall become due before the time for fixing the next general tax levy. There may be included in such ad valorem assessment a sum sufficient, in the judgment of the board to take care of anticipated delinquencies, except that if the maturity of the indebtedness created by the issuance of bonds be made to begin more than one year after the date of the issuance thereof, ad valorem assessment shall be levied and collected annually at the time and in the aforesaid manner, in an amount sufficient to pay the interest on said indebtedness as it falls due and also to constitute a sinking fund for the redemption thereof on or before maturity. The ad valorem assessment herein required to be levied and collected shall be in addition to all other ad valorem assessments levied for district purposes and shall be collected at the time and in the same manner as other district assessments are collected, and be used for no other purpose than the payment of said bonds and accruing interest.

Such ad valorem assessment shall be levied upon all real property within the district excluding any property belonging to any county, municipality, or political subdivision within the district, or property belonging to the State of California or the United States.

The provisions of law of this State prescribing the time and manner of levying, assessing, equalizing and collecting county property taxes including the sale of property for delinquency,

and for redemption from such sale, and the duties of the several county officers with respect thereto, so far as they are applicable, and not in conflict with the specific provisions of this act, are hereby adopted and made a part hereof. Such officers shall be liable upon their several official bonds for the faithful discharge of the duties imposed upon them by this act.

The board shall, on or before the first weekday in September, or if such weekday falls upon a holiday, then upon the first business day thereafter, fix the rate of ad valorem assessment and designate the number of cents upon each one hundred dollars ($100) on the equalized roll, which rate of assessment shall be sufficient to raise the amount previously fixed by the board as hereinabove prescribed. Such acts by the board shall constitute a valid assessment of the property and a valid levy of the ad valorem assessment so fixed. The board must immediately thereafter transmit to the county auditor a statement of the rate of assessments so fixed by said board and the county auditor shall enter such rate upon the county tax roll Such ad valorem assessments so levied shall be collected at the same time and in the same manner as county taxes and when collected the net amount ascertained as hereinafter provided shall be paid to the treasurer of the district under the general requirements and penalties provided by law for the settlement of other taxes.

Assessments as liens

All assessments levied under the provisions of this act shall be a lien upon the real property on which they are levied and unless the board has by resolution otherwise provided the enforcement of the collection of such ad valorem assessments shall be had in the same manner and by the same means as provided by law for the enforcement of the liens for state and county taxes, all provisions of law relating to the enforcement of the latter being hereby made a part of this act.

Compensation to county

The amount of compensation to be charged by and paid to the county for the performance of service, as in this section provided, for and on behalf of such district, shall be fixed by the board, except that such compensation shall not exceed 1 percent of all moneys collected for such district as in this act provided. The amount so collected by such county shall be placed to the credit of the county general fund.

District validly created for taxation purposes

SEC 26. Notwithstanding Sections 54900 to 54903, inclusive, of the Government Code, the district is validly created for the purposes of taxation.

1953-1954 Fiscal Year

For the Fiscal Year 1953-1954, but for no other fiscal year, notwithstanding Section 25 of this act, the assessment and equalization of property for the purpose of district taxation shall be effected as provided in this section

Assessments of the district for the Fiscal Year 1953-1954 are liens on the real property the same as if they were county taxes, except that the district assessment liens attach as of noon on the day after this act becomes effective.

It is presumed that the assessments of real property made by the county assessor and by the State Board of Equalization for

county taxation purposes for the Fiscal Year 1953-1954 are the correct assessments for purposes of assessment by the district and the rolls prepared by the county assessor and the State Board of Equalization shall be used for purposes of levying and collecting the assessments for the district. If the ownership or taxable situs or value of any real property changes between noon on the first Monday in March, 1953, and the date on which attaches the lien for assessments of the district for the Fiscal Year 1953-1954, then, on petition of the assessment payer affected to the assessing authority, suitable entry shall be made on the assessment roll, in the manner prescribed by the State Board of Equalization, to indicate such change in the ownership or taxability or value of the property for purposes of assessment by the district.

In equalizing the assessments made by the county assessor, the Board of Supervisors of Sacramento County, sitting as the county board of equalization, in addition to its regular equalization duties, shall also, in the same manner and under the same rules, equalize the valuation of real property for purposes of assessment by the district in accordance with the requirements of this section and any such changes made by the county board of equalization in the assessment roll shall be entered in the manner prescribed by the State Board of Equalization.

If, for purposes of assessment by the district, a change in the assessment for county taxation purposes is not sought under this section before the end of the period during which such assessment may be equalized, or corrected on a petition for reassessment, such assessment, if valid for county taxation purposes, is conclusively presumed to be the correct assessment for assessment purposes of the district.

The board may prescribe by ordinance any necessary procedure, in accordance with the policy of this act, for the purpose of assessing, equalizing, levying, and collecting assessments for the district for the Fiscal Year 1953-1954. Except as provided in this section, Section 25 of this act is applicable to the assessment and equalization of real property for the purpose of district assessments for the Fiscal Year 1953-1954.

Expenditure of ad valorem revenue

SEC. 27. After the first bond election in the district at which bonds shall be authorized by the electors of said district the board shall have power, in any year, to levy an ad valorem assessment upon the real property in said district as provided in Section 25 at the time and in the manner set forth therein, to carry out any of the objects or purposes of this act, and to pay the costs and expenses of maintaining, operating, extending and repairing any work or improvement of said district for the ensuing fiscal year. The board shall have power to control and order the expenditures for said purposes of all revenue so derived, except that ad valorem assessments levied under this section for any one year shall not exceed ten cents ($0.10) on each one hundred dollars ($100) of the assessed valuation of the real property in said district as said assessed valuation is shown on the last preceding assessment records for state and county pur-

poses. Such assessment shall be in addition to any assessment levied to meet the bonded indebtedness of said district and all interest thereon.

Bonds, etc., not invalid for error in computation

SEC. 28 The provisions of this act relative to the performance of official duty as to any time or place, the form of any resolution, notice, order, list, certificate of sale, deed or other instrument shall be deemed directory. In effect September 9, 1953

[Approved by Governor July 9, 1953. Filed with Secretary of State July 10, 1953.]

SECTION 1. Section 41 of the act cited in the title hereof is amended to read:

Bids Supplies, etc

All bids shall be upon a schedule showing all articles needed by the district and the several offices thereof, prepared by the clerk of the district, and shall state separately the price of each article to be furnished, and any person may bid upon any article separately.

Except as otherwise provided by this act, the board of directors shall determine annually what goods, merchandise, stores, subsistence, materials and other supplies will be needed by the district for the ensuing year.

In considering such bids the board of directors may accept or reject all or any of them, or may accept or reject a part of any such bid, preference being given, however, to the lowest responsible bidder. All supplies furnished the district, or any officer thereof, shall be furnished at a price no greater than is specified in the bid which may be accepted by the board. The award as to each article shall in all cases be made to the lowest bidder for such article.

All bids shall be opened by the board at an hour and place to be stated in the advertisements for proposals, in the presence of all bidders who attend, and the bidders may inspect the bids. All contracts shall be made with the lowest responsible bidder, who shall give bonds with sufficient sureties for the faithful performance of his contract.

Notices of proposals for furnishing the aforesaid articles shall mention said articles in general, and shall state that the conditions and schedule may be found in the office of the clerk of the district, and shall also state that such articles are to be delivered at such times, and in such quantities, and in such manner as the board of directors may designate.

All proposals shall be accompanied with a certificate of deposit, or certified check on a solvent bank within the district, or county wherein the district is located, of 10 per centum of the amount of the bid, payable at sight to the order of the clerk of the district. If the bidder to whom the contract is awarded shall for five days after such award fail or neglect to enter into the contract and file the required bond, the clerk shall draw the money due on such certificate of deposit or check and pay the same into the treasury of the district; and under no circumstances shall the certificate of deposit or check or the proceeds thereof be returned to such defaulting bidder.

The clerk shall furnish printed blanks for all such proposals, contracts and bonds.

Advertising shall not be classified, and shall be construed to mean the advertising and publication of all official reports, orders, ordinances, resolutions, notices inviting proposals, and all notices of every nature relating to work or business of the district. No part or kind of such advertising shall be charged or contracted for at a higher rate than any other part or kind of the same is charged or contracted for; except in the case of the delinquent tax list. The advertising of the delinquent tax list shall be let to the lowest responsible bidder on a separate

bidding from all other advertising. A square of advertising shall be 234 ems nonpareil.

No officer or employee of the district shall order any article or shall make any publication which is not expressly authorized by this act or by the board of directors.

Unless the amount involved in the purchase at any one time of any articles, for which no contract has been entered into as hereinabove provided, exceeds the sum of two thousand dollars ($2,000), the board of directors may purchase such article or articles without the necessity of advertising or letting contracts therefor; but where the cost of any article or articles, for which no contract has been entered into as hereinabove provided, exceeds the sum of two thousand dollars ($2,000), the board of directors shall advertise for at least five days in a newspaper of general circulation in the district for sealed bids for furnishing the district such article or articles, and shall in the matter of opening and accepting such bids and the letting of contracts for the furnishing of such article or articles in all respects proceed in the manner and form in this section hereinabove provided in the case of contracts for annual supplies.

All bidders shall be afforded an opportunity to examine such plans and specifications and said board shall award the contract to the lowest responsible bidder, and the plans and specifications so adopted shall be attached to and become part of the contract; and the person or corporation to whom the contract is awarded shall be required to execute a bond, to be approved by the board of directors, for the faithful performance of the contract; provided, that in cases of great emergency, by the consent of at least two-thirds of the board of directors, they may proceed at once to do or cause to be done all repair or replacement work necessary to meet such emergency without notice; and provided further, that nothing herein contained shall be deemed to prohibit the board of directors from doing or causing to be done directly by the district, and without any contract therefor, any or all work necessary or proper in or about the making of all current and ordinary repairs or in or about current and ordinary upkeep or maintenance; and provided further, that upon the determination of the board of directors by an affirmative vote of two-thirds of its members that all bids submitted are unsatisfactory or are excessive, the district may proceed to do any necessary and proper work and to make any necessary and proper expenditures, in lieu of contracting for the performance

of such construction, replacement, improvement, alteration, extension or other proposed work.

No plans and specifications when once adopted shall be altered or changed in any manner whereby the cost of the proposed work shall be increased, except by a vote of two-thirds of the board of directors.

Whenever the board of directors shall enter into a contract for any such work, such contract shall not be altered or changed in any manner, unless they shall, by a vote of two-thirds of their number, and with the consent of the contractor, first so order. And whenever any such change or alteration is so ordered, the particular change or alteration shall be specified, in writing, and the cost thereof agreed upon between the board and the contractor. [Approved by Governor July 9, 1953. Filed with Secretary of State July 10, 1953.]

In effect September 9, 1953

The people of the State of California do enact as follows:

SECTION 1. Section 1252.1 is added to the Code of Civil Procedure, to read:

Eminent domain Payment of taxes due

1252.1. At the time of commencement of the trial of any condemnation action in which a public agency exempt from taxes is the plaintiff, the clerk of the court shall serve upon the officer or officers responsible for the computation of all ad valorem taxes on the property being condemned, written notice to prepare and file with the clerk of the court a certificate of all delinquent taxes, penalties and costs, and of all current taxes, due and payable on said property as of the date said notice was served. There shall be filed by the clerk with the court, as part of the records in said action, a copy of said written notice with the acknowledgment of service and the date thereof endorsed thereon by the officer so served. For the purposes of this section, the term taxes shall include ad valorem special assessments levied and collected in the same manner as other taxes. In the event said notices are served at a time when the amount of the current taxes, which are a lien on the property but not yet payable, are not known to the certificating officers, said certificates shall contain, in lieu of a statement of the current taxes, a statement based on (1) the assessed value for the current year of the property being condemned, and (2) the tax rate for the previous fiscal year. Said certificates shall be filed with the clerk of the court, as a part of the records and files of said condemnation action, within 10 days after the service of said notices, and in the event of failure on the part of any officer upon whom such notice is served to file said certificates within said time, it shall be conclusively presumed that as to the taxes for the collection of which such officer is responsible, no taxes are due and payable on said property, or in any manner constitute a lien thereon.

Before making any final order of condemnation in such action, the court shall determine whether said certificates have been filed by all officers upon whom the notices have been served. If said certificates have been filed, the court shall as a part of the judgment direct the payment to the tax collecting agencies, out of the award, the amounts of the delinquent taxes, penalties and costs, and the amounts of the current taxes, shown by said certificates to be due and payable. In the event said certificates show that the amounts of the current taxes which are a lien are not known, and in lieu of the statement of current taxes contain a statement based on the assessed value for the current year and the tax rate for the previous year, the court shall in

lieu of directing the payment of current taxes order the payment of sums bearing the same relation to the amounts shown in said statements as the portion of the current fiscal year from the commencement thereof to the date of the final order of condemnation bears towards an entire fiscal year; provided, that in the event an order permitting the plaintiff to take immediate possession was entered in such action, prior to the payment of any taxes for the fiscal year during which said order was entered, the court shall, for such fiscal year, order the payment of a sum bearing the same relation to the amount of the taxes for such fiscal year, or in the event said amount is not known, to the amount shown in said statement based on the assessed value for the current year and the tax rate for the previous year, as the portion of such fiscal year from the commencement thereof to the date of entry of such order of immediate possession bears towards an entire fiscal year.

In any such action, the payment of the sums ordered by the court to be paid shall be considered to be in lieu of all taxes, current and delinquent, and all penalties and costs, due and payable with respect to the property being condemned, and said judgment shall, in addition to ordering said payments, order the cancellation, as of the date of the judgment, of all taxes, current and delinquent, and all penalties and costs, on said property. Said judgment shall be conclusively binding on all tax collecting agencies upon which the notices were duly served by the clerk of the court.

The subject of the amount of the taxes which may be due on any property shall not be considered relevant on any issue in any such condemnation action, and the mention of said subject, either in the voir dire examination of jurors, or during the examination of witnesses, or as a part of the court's instructions to the jury, or in argument of counsel, or otherwise, shall constitute grounds for a mistrial in any such action.

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution, and shall, therefore, go into effect immediately. The facts constituting such necessity are:

Urgency

In a drainage improvement district organized under this act in Kern County in this State, the need exists for immediate preparation of engineering plans for drainage in order to meet the danger of a diversion of floodwaters for the winter of 1953. Expert opinion has been received that said district may experience a series of unusual rains in the winter of 1952 and 1953. The county surveyor in said county does not have sufficient facilities to prepare such plans and specifications within the time, and if the appointment of another person to do said work must await the ordinary time in which legislation would take effect, it would delay action of preparation for said danger of floodwaters until the following year, thus leaving said district with a menace to the safety of its inhabitants from floods.

In addition, if any weekly installment of tax remains unpaid on the first day of the second calendar month following the month during which the last of the distributions occurred on which the weekly installment was levied, a penalty of 10 percent of the installment, exclusive of penalties, shall be added thereto.

The weekly installment shall be deemed not paid or unpaid on any particular day:

(a) If not paid prior to 5 p.m. of that day, when paid in person.

(b) If the envelope in which the remittance is enclosed bears a post-office cancellation mark dated later than that day, when paid by mail.

CHAPTER 1871

An act to amend Sections 2201, 2211 and 2214 of, and to add Section 2210.5 to, the Streets and Highways Code, relating to financial aid for county highways.

In effect September 9, 1953

[Approved by Governor July 10, 1953. Filed with Secretary of State July 11, 1953.]

The people of the State of California do enact as follows:

SECTION 1. Section 2201 of the Streets and Highways Code is amended to read:

Apportionment of federal aid to counties

2201. Congress has enacted the Federal-Aid Highway Act of 1950 in which federal appropriations have been authorized for projects on secondary roads of various types. By apportionment of the authorization made pursuant to the federal act, it is anticipated that substantial sums will be made available for expenditures on such roads in California. The apportionment to California is to be made available for expenditure on either state highways or county highways which qualify under the federal law. County highways throughout the State are in greater need of such expenditures than are state highways on the Federal-Aid Secondary System. It is therefore, determined by the Legislature that, insofar as permissible under federal law, rules, and regulations, at least eighty-seven and one-half percent (87½%) of the money apportioned to California for such projects as are mentioned in paragraph (b) of Section 1 of the Federal-Aid Highway Act of 1950 should be expended for the improvement of county highways in this State. Inasmuch as these county highways are a matter of state concern and many of the counties are financially unable to furnish funds to be used with federal funds as required by federal law, funds should be provided from state sources therefor.

SEC. 2. Section 2210.5 is added to said code, to read:

Payment of State's share. Aid to county limited

2210.5. The department shall pay the State's share for construction of county highways as provided in this chapter out of the money received in the State Highway Fund under Section 2108, and the money so paid shall be included in the computation of compliance with the requirements of Section 188. The funds made available by this section shall be apportioned for expenditure in the counties on the same formula as provided in paragraph (b) of Section 4 of the Federal-Aid Highway Act of 1944 for apportionment among the states; provided, however, that no county shall receive a total amount in excess of fifty thousand dollars ($50,000) in any one year. None of the money made available by this section shall be expended on any highway, street, or road which is not a county highway, except as expressly otherwise provided in this chapter.

SEC. 3. Section 2211 of said code is amended to read:

Notice of apportionment to county

2211. The department shall notify each county on July 5, 1951, or as soon thereafter as possible of the amount of money to be available for expenditure in the county from the federal

apportionment and of the amount of money hereby made available to pay the State's share in conjunction with the federal aid in the county.

Plans, projects, etc., by county

After receiving notice of apportionment from the department, each county shall have 60 days in which to notify the State Highway Engineer as to what amount of the apportionment the county wishes to claim and to agree to provide matching funds therefor, as may be necessary after first considering the sums made available under Section 2210.5. The counties, in cooperation with the department, shall thereafter select projects in conformance with the Federal-Aid Highway Act of 1950. The counties shall prepare plans, specifications, and estimates of cost for construction of the projects. The projects shall be advertised for each successive fiscal year's funds by October 1st, next succeeding the end of each fiscal year named in the Federal-Aid Highway Act of 1950.

SEC. 4. Section 2214 of said code is amended to read:

Expenditure of federal-aid secondary funds

2214. Federal-aid secondary funds apportioned to any county under Sections 2207-2209, inclusive, and not claimed or used as provided in Sections 2210-2212, inclusive, shall be expended upon federal-aid secondary projects upon the State Highway System in the county group, as specified in Section 187, which includes the county from which released, to the extent that such may be done in conformity with federal law. The money apportioned by the State to match the unexpended balance of the federal aid in any county in accordance with this section and the federal aid shall be deemed an expenditure to meet the requirements of Section 188.4, and such expenditures shall be subject to Section 188.

Operative clause

SEC. 5. The provisions of this act shall not become operative unless the Legislature, prior to January 1, 1955, increases the rate of the motor vehicle fuel license tax imposed by Section 7351 of the Revenue and Taxation Code, and the provisions of this act shall remain operative only during such time as the rate of such tax is in excess of the rate in effect on January 1, 1953.

CHAPTER 1872

An act to amend Section 975 of, and to add Section 975.5 to, the Fish and Game Code, relating to traps for taking crayfish and carp.

[Approved by Governor July 10, 1953. Filed with Secretary of State July 11, 1953.]

In effect September 9, 1953

The people of the State of California do enact as follows:

SECTION 1. Section 975 of the Fish and Game Code is amended to read:

Use of traps restricted

975. Traps may be used throughout the year to take carp in any district under the following restrictions:

Urgency

SEC. 11. This act is an urgency measure necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect, to be operative on July 1, 1953, to be operative only if Assembly Bill No. 3491 is enacted by the Legislature at its 1953 Regular Session. The facts constituting such necessity are:

Every year in California there are more than 3,000 people killed and many thousand injured as a result of traffic accidents. One of the most successful means of reducing traffic accidents and deaths is to secure the proper training of drivers of automobiles. The only method now available of training any large number of our drivers in the safe operation of automobiles is in our public schools. It is impossible to establish driver training in many of our public schools without further financial support. Since school budgets must be made up in July, the program of driver training will be delayed one full year unless this act is passed as an urgency measure. The immediate passage of this act is therefore necessary for the public safety.

If bail is forfeited, the amount of such penalty assessment shall be transmitted by the clerk of the court to the county treasury and thence to the State Treasury pursuant to this section. Bail forfeited.

After a determination by the court of the amount due, the clerk of the court shall collect the same and transmit it to the county treasury. It shall then be transmitted to the State Treasury to be deposited in the General Fund. The transmission to the State Treasury shall be carried out in the same manner as fines collected for the State by a county.

CHAPTER 1882

An act to amend Section 2 of, and to add Section 2.5 to, the Municipal Water District Act of 1911 (Chapter 671, 1911 Statutes), relating to municipal water districts, declaring the severability of the provisions of this act.

In effect September 9, 1953

[Approved by Governor July 10, 1953. Filed with Secretary of State July 11, 1953.]

The people of the State of California do enact as follows:

SECTION 1. Section 2 of the Municipal Water District Act of 1911 is amended to read:

Municipal water district organization

Sec. 2. The people of any county, or of any portion of a county, whether such portion of a county includes unincorporated territory only or incorporated territory of any city or cities or both such incorporated and unincorporated territory, may organize a municipal water district under the provisions of this act. Such cities need not be contiguous and such unincorporated territory may consist of one or more parcels which need not be contiguous one with the other or with any such city or cities. Except as provided in Section 2.5 of this act, the inclusion of any city or cities in the formation of such district shall require the inclusion of the entire corporate area of each such city.

SEC. 2. Section 2.5 is added to said act, to read:

Declaration of intention to petition for formation of district

Sec. 2.5. (a) The proponents of the formation of a municipal water district, who shall be voters residing within the boundaries of the proposed district, may declare their intention to circulate a petition for the formation of such proposed district. Such declaration of intention shall be addressed to the board of supervisors of the county, shall set forth and describe the boundaries of the proposed district, and shall be signed by not less than one hundred (100) proponents, who shall affix opposite their respective signatures their respective residences and dates of signing. If any city be included within the boundaries of the proposed district as set forth and described in such declaration, the entire corporate area of such city as such corporate area exists at the time of making such declaration of

intention shall be included therein, together with all areas for which proceedings for annexation to such city shall have been commenced by valid petition filed with the governing body of such city prior to the making and filing of such declaration of intention. If, prior to the making and filing of such declaration of intention, a valid petition shall have been filed with the governing body of any city, seeking annexation to such city of any territory included within the boundaries of the proposed municipal water district, the entire corporate area of such city as such corporate area exists at the time of making such declaration of intention shall be included within such proposed district, together with all areas for which proceedings for annexation to such city shall have been so commenced by such filing of a valid petition therefor. If, prior to the making and filing of such declaration of intention, a valid petition shall have been filed with the board of supervisors of the county, seeking the incorporation of a new city the proposed boundaries of which shall include any territory included within the boundaries of the proposed municipal water district, the entire area of such proposed city shall be included within such proposed district. The declaration of intention shall be filed with the county clerk not later than ten (10) days following the date upon which the last signature was affixed thereto. If such declaration of intention be made and filed in the manner and within the time herein prescribed, and if the proceedings for formation of such district be commenced and prosecuted in the manner and within the time herein provided, the inclusion within the boundaries of the proposed district of territory formed into a new city or annexed to an existing city pursuant to proceedings which were not commenced by the filing of a valid petition prior to the filing of such declaration of intention, shall not prevent or invalidate the formation of the proposed district even though such territory, or portion thereof, shall be included within such municipal water district without including therein the remainder of the corporate area of such city If such declaration of intention be so made and filed, and if such formation proceedings be so commenced and prosecuted, the inclusion within the boundaries of the proposed district of any city to which territory shall be annexed pursuant to proceedings which were not commenced by the filing of a valid petition prior to the filing of such declaration of intention, shall not prevent or invalidate the formation of the proposed district even though the corporate area of such city as such corporate area existed at the time of making such declaration of intention shall be included within such municipal water district without including therein the territory annexed to such city pursuant to such proceedings.

Examination by county clerk

(b) Within ten (10) days of the date of the filing of such declaration of intention, the county clerk shall examine the same and ascertain whether or not said declaration was signed by the requisite number of proponents who are voters residing within the boundaries of the proposed district. When the county clerk has completed his examination he shall attach to the

declaration his certificate, properly dated, showing the result of such examination; and if from such examination he shall find that said declaration is signed by the requisite number of proponents who are voters residing within the boundaries of such proposed district, or that such declaration is not so signed, the county clerk shall certify that the declaration is sufficient or insufficient, as the case may be. If his certificate shall show such declaration to be insufficient, it shall be filed by him and kept as a public record, without prejudice to the filing of a new declaration to the same effect. But if, by the certificate of the county clerk, such declaration is shown to be sufficient, the county clerk shall publish the text of such declaration in a newspaper printed and published in such county, together with a notice stating that such declaration has been filed in his office and the date of such filing. Not more than five of the names attached to such declaration need appear in such publication, but the number of signers shall be stated.

(c) If, subsequent to the making and filing of the declaration of intention in the manner provided in paragraph (a) of this Section 2.5 but prior to circulating the petition for formation of the proposed district, a valid petition shall have been filed with, or a resolution shall have been adopted by, the governing body of a city, the corporate area of which shall be included in a metropolitan water district, organized under the Metropolitan Water District Act of this State, in a manner which would result in automatic annexation to such metropolitan water district of territory annexed to such city, and such petition or resolution shall initiate formal proceedings for the annexation to such city of territory within such proposed municipal water district, the proponents so declaring their intention to form a municipal water district may omit from the area of the proposed municipal water district described in the petition for formation of such district, all territory which had been or would be annexed automatically to such metropolitan water district upon successful completion of such proceedings for annexation to such city; provided, that in the event any such territory be so omitted, no part of such city shall be included within the proposed municipal water district.

Circulation of petition.

(d) Circulation of a petition for formation of such municipal water district shall be commenced by the proponents within thirty (30) days from the date of filing the declaration of intention with the county clerk and such circulation shall be completed and the petition shall be filed with the county clerk within ninety (90) days from the date of filing such declaration of intention. The proceedings for the formation of such proposed municipal water district, in all particulars not otherwise expressly provided in this Section 2.5, shall be conducted in the manner provided in Section 3 of this act. Except as otherwise authorized in this Section 2.5, the boundaries of the proposed municipal water district shall be described in the petition for formation in the manner in which such boundaries are described in the declaration of intention and shall include the same area.

(e) If, prior to the effective date of the formation of such proposed municipal water district, any territory included therein shall have been annexed to a metropolitan water district organized under the Metropolitan Water District Act of this State, such territory may be excluded from such municipal water district upon compliance with the following provisions of this paragraph (e), to wit:

Exclusion of land annexed to metropolitan water district:

(1) The governing body of such municipal water district, within ninety (90) days after the effective date of the formation of such district, may adopt an ordinance which, after reciting that such territory has been annexed to such metropolitan water district by proceedings theretofore taken under statutory authority, and after referring to the applicable statutes and to the date and place of filing of the certificate or certificates evidencing such annexation, shall describe said territory and shall determine and declare that the said territory shall be, and thereby is, excluded from such municipal water district. Such ordinance shall be effective immediately upon adoption

(2) The governing body, or clerk thereof, of such municipal water district shall file a certified copy of such ordinance with the Secretary of State of the State of California. Upon receipt of the certified copy of said ordinance, the Secretary of State shall, within 10 days, issue his certificate reciting the passage of said ordinance and the exclusion of said area from said municipal water district A copy of said certificate shall be transmitted to, and filed with, the county clerk of the county in which such municipal water district is situated. From and after the date of such certificate the area described therein shall be deemed excluded from, and shall no longer form a part of, said municipal water district, but the taxable property within such excluded area shall remain subject to any taxes theretofore levied by such municipal water district and shall continue taxable by such municipal water district for the purpose of paying the bonded or other indebtedness of such municipal water district, if any, outstanding or contracted for at the time of such exclusion and until such bonded or other indebtedness shall have been satisfied, to the same extent that such property would be taxable for such purpose if such exclusion had not occurred.

(f) Notwithstanding any provision contained in this Section 2 5, a municipal water district may be formed, in the manner provided in Section 3 of this act, without the filing by the proponents thereof of a declaration of intention to form such proposed district. If such prior declaration of intention be not made and filed, and if any city be included within the boundaries of the proposed district as set forth and described in the petition for formation of such district, the entire corporate area of such city as such corporate area exists at the time of filing such petition for formation shall be included therein, together with all areas for which proceedings for annexation to such city shall have been commenced by valid petition filed with the governing body of such city prior to the filing of such petition for formation

Formation of district without declaration of intention

of the proposed district. If such prior declaration of intention be not made and filed, and if prior to the filing of the petition for formation of the proposed district a valid petition shall have been filed with the governing body of any city seeking annexation to such city of any territory included within the boundaries of the proposed municipal water district, the entire corporate area of such city as such corporate area exists at the time of filing such petition for formation shall be included within such proposed district, together with all areas for which proceedings for annexation to such city shall have been so commenced by such filing of a valid petition therefor. If such prior declaration of intention be not made and filed, and if prior to the filing of the petition for formation of the proposed district a valid petition shall have been filed with the board of supervisors of the county seeking the incorporation of a new city the proposed boundaries of which shall include any territory included within the boundaries of the proposed municipal water district, the entire area of such proposed city shall be included within such proposed district. If such prior declaration of intention be not made and filed, the inclusion within the boundaries of the proposed district of territory formed into a new city or annexed to an existing city pursuant to proceedings which were not commenced by the filing of a valid petition prior to the filing of such petition for formation of such municipal water district, shall not prevent or invalidate the formation of the proposed district even though such territory, or portion thereof, shall be included within such municipal water district without including therein the remainder of the corporate area of such city. If such prior declaration of intention be not made and filed, the inclusion within the boundaries of the proposed district of any city to which territory shall be annexed pursuant to proceedings which were not commenced by the filing of a valid petition prior to the filing of such petition for formation of such municipal water district, shall not prevent or invalidate the formation of the proposed district even though the corporate area of such city as such corporate area existed at the time of filing such petition for formation shall be included within such municipal water district without including therein the territory annexed to such city pursuant to such proceedings.

Trainee's benefit rights

Sec. 57.7. Notwithstanding any inconsistent provisions of this act the benefit rights of trainees shall be determined in accordance with the following provisions of this section for the periods and with respect to the matters specified herein. Except as herein otherwise provided, all other provisions of this act shall continue to be applicable in connection with such benefits.

"Military service"

(1) The term "military service" as used in this section means active service in the land or naval forces of the United States, but the service of an individual in any reserve component of the land or naval forces of the United States who is ordered to active duty in any such force for a period of 30 days or less shall not be deemed to be active service in such force during such period.

(3) (a) With respect to any trainee who has an unexpired benefit year at the time of induction into the armed forces, the unexpended balance of benefits remaining to his account shall be re-established beginning with the first day of the first week succeeding the date of his termination of service. Whenever this balance is exhausted the trainee may file a claim and his base period shall be determined in accordance with the provisions of subsection (4) hereof, except that all re-established balances shall lapse 65 weeks after termination of such military service.

For all quarters so excluded there shall be substituted an equal number of quarters immediately preceding his entry into military service, except that the quarter of entry into military service shall be counted as a completed quarter if the commission finds that the inclusion thereof would be more equitable to the trainee.

Acts prior to entry into service not basis for disqualification

(5) No disqualification shall be applied to any trainee after the termination of his military service, by reason of any act or course of action on his part prior to the date of his entry into such service.

Disqualification. Payment by Federal Government

(6) If, under an act of Congress, payments with respect to the unemployment of individuals who have completed a period of military service are payable by the United States, a trainee shall be disqualified for unemployment compensation benefits with respect to any week for which he receives such benefits and no unemployment compensation benefits shall be paid under this section until he has exhausted all his rights to such payments from the United States unless such payments from the United States are payable as a supplement to the benefits provided for under this section, in which case, the weekly benefit amount payable to the trainee pursuant to this section shall be in an amount which, when added to the supplemental benefit payable by the United States, will not exceed the greater of the maximum weekly benefits permitted under either this section or the federal act providing for the payment of such supplemental benefits.

(b) Whenever the driver of a vehicle approaches an oncoming vehicle within 500 feet, such driver shall use a distribution of light or composite beam so aimed that the glaring rays are not projected into the eyes of the oncoming driver, and in no case shall the high-intensity portion which is projected to the left of the prolongation of the extreme left side of the vehicle be aimed higher than the center of the lamp from which it comes at a distance of 25 feet ahead, and in no case higher than a level of 42 inches above the level upon which the vehicle stands at a distance of 75 feet ahead.

Every such diffused nonglaring light shall be subject to approval by the California Highway Patrol.

CHAPTER 1892

An act to amend Sections 9351, 9355.2, and 9359.8 of and to add Section 9355.25 to the Government Code, relating to the Legislators' Retirement System, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor July 10, 1953. Filed with Secretary of State July 11, 1953.] In effect immediately

The people of the State of California do enact as follows:

SECTION 1. Section 9351 of the Government Code is amended to read:

"Service"

9351. "Service" means the period of time, computed in years and fractions thereof, a member has held office as a Member of the Senate or of the Assembly or as an elective officer of the State in any office provided for by the Constitution, except that of judge.

Computing service

In computing years of service under this act, each full term served as a Member of the Senate shall be deemed to constitute four (4) calendar years, each full term served as a Member of the Assembly shall be deemed to constitute two (2) calendar years, and each period of service from the commencement of one general session of the Legislature to the commencement of the next shall be deemed to constitute two (2) calendar years. Each full term served as an elective officer of the State whose

office is provided for by the Constitution shall be deemed to constitute four (4) calendar years.

SEC. 2. Section 9355.2 of said code is amended to read:

Election to withdraw contributions

9355.2. Notwithstanding any other provision of this chapter, if the service of a member is discontinued by any means other than death or retirement pursuant to this chapter, he shall have the right to elect not later than 90 days after the date upon which notice of that right is mailed by this system by registered mail to the member's latest address on file in the office of this system, and without right of revocation, whether to allow his accumulated contributions to remain in the fund. Failure to make such election shall be deemed an irrevocable election to resign from this system and withdraw his accumulated contributions. A member whose membership continues under this section is subject to the same age requirements as apply to other members for retirement, and upon qualification for retirement by age, he shall, upon his application therefor to the board, be retired, and receive a retirement allowance based upon the service with which he is credited, in the same manner as other members of this system.

SEC. 3. Section 9355 25 is added to said code, to read:

Retroactive application

9355 25. Section 9355.2, as in effect on the effective date of the Statutes of 1953, shall be retroactively applied to permit any member whose service was discontinued other than by death or retirement prior to the said effective date and who failed to elect, within the time then specified in Section 9355 2, to allow his contributions to remain in the fund, to make such election within 90 days after notice is mailed under Section 9355.2 to his latest address on file in the office of the system, or, if his contributions have already been repaid to him, within the said 90-day period to redeposit his contributions in the fund, with the same effect as if he had made such election under Section 9355.2 within the time specified therein.

SEC. 4. Section 9359.8 of said code is amended to read:

Death of member before retirement

9359.8. Upon the death of any member before retirement, his accumulated contributions shall be paid to his beneficiary, if he has designated one, and if not, to his estate. There shall also be paid to his beneficiary or estate an amount equal to one-twelfth of the annual compensation of a Member of the Legislature during the 12 months immediately preceding his death, multiplied by the number of completed years of service and prior service for which he is entitled to elect to receive credit, but not to exceed one-half of such annual compensation if the decedent was an elective officer of the State whose office is provided for by the Constitution other than a Member of the Legislature. The benefits provided by this section are in addition to any benefits provided by Division 4 of the Labor Code.

Urgency

SEC. 5. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The exact amount of the benefit under the Legislators' Retirement Act granted to the beneficiary of a Member of the Legislature or other elective state constitutional officer upon his death is in doubt, with the result that qualified persons, who would otherwise be candidates for the office of Member of the Legislature or other elective state constitutional office, may be misled and conclude that they cannot afford to become Members of the Legislature or other elective state constitutional officers. Since any vacancies which have occurred and may occur should be promptly filled by special elections at the earliest possible time, this measure is necessary for the immediate preservation of the public peace, health or safety in order that the best qualified persons will become candidates for election to such vacancies.

CHAPTER 1893

An act to add Sections 24250.1 and 69751.5 to the Government Code, relating to superior courts and to offices of sheriffs and clerks in cities in which regular sessions of the superior court are held.

24250.1. Sheriffs and clerks shall also have offices in each city in which a regular session of the superior court is held pursuant to law. This section does not authorize the establishment of offices in cities in which extra sessions of the superior court are held.

There shall, however, be deducted from the amount of basic salary, wage or other compensation, excluding any pay premium differentials of any type whatso-

Describing and setting forth a proposal to the qualified electors of the City and County of San Francisco to amend the charter of said city and county by amending Section 149 thereof, relating to emergency appointments.

The Board of Supervisors of the City and County of San Francisco hereby submits to the qualified electors of said city and county at an election to be held therein on November 4, 1952, a proposal to amend the charter of said city and county by amending Section 149 thereof so that the same shall read as follows:

Emergency Appointments

Emergency appointments

Section 149. When no list of eligibles exists or no eligible is available on an existing list for a position in the class requisitioned by the appointing officer, and immediate service in the position is required by the appointing officer and another list exists which is deemed by the commission to be suitable to provide temporarily the service desired, the commission shall certify for civil service temporary appointment an eligible from such list; if no such other list deemed by the commission to be suitable exists, the commission pursuant to its rules may authorize the appointing officer to make a non-civil service or emergency appointment thereto for a period not exceeding ninety working days. Such non-civil service or emergency appointment, however, shall cease prior to the expiration of such ninety working days at the time a civil service eligible reports for duty as provided in section 148 of the charter.

If a list of eligibles exists for the position requisitioned, but immediate service is deemed necessary by the appointing officer pending the time an eligible from such list is certified and reports for duty as provided in section 148 of the charter, the commission may authorize the appointing officer to make a non-civil service or emergency appointment thereto for a period not exceeding thirty working days. Such non-civil service or emergency appointment, however, shall cease prior to the expiration of such thirty working days at the time a civil service eligible reports for duty as provided in section 148 of this charter.

No person shall be compensated under any non-civil service or emergency appointment or appointments as authorized under the provisions of the foregoing paragraphs of this section for a period exceeding ninety working days in any fiscal or calendar year, and no claim or warrant therefor shall be approved,

allowed or paid for any compensation in excess of such ninety working days in any fiscal or calendar year.

If no eligibles are available for appointment to a permanent position in the class requested by the appointing officer the commission shall immediately hold an examination and establish an eligible list for such position. If its annual appropriation is insufficient to meet the cost of said examination, it shall report to the mayor the estimated cost thereof, and the mayor shall request and the supervisors shall make supplemental appropriation therefor in the manner provided herein for supplemental appropriations.

Whenever the board of supervisors by a three-fourths vote of all its members shall declare that an unemployment emergency exists throughout the city and county because of extraordinary conditions due to unemployment, and shall fix the period during which such unemployment emergency shall be officially recognized, the civil service commission shall then have power to exempt from civil service examinations during such emergency period all places of employment that may be created by special appropriation to relieve such unemployment emergency; provided, that no action shall be taken under the provisions of this paragraph that will adversely affect the rights of civil service eligibles for employment in the usual temporary and permanent positions that are provided for in the annual salary ordinance. The civil service commission shall adopt special rules for the government of appointments to the emergency positions that may be created under the authority of this paragraph.

Proposition F

Describing and setting forth a proposal to the qualified electors of the City and County of San Francisco to amend the charter of said city and county by amending Section 156 thereof, relating to the transfer in positions of disabled civil service employees.

The Board of Supervisors of the City and County of San Francisco hereby submits to the qualified electors of said city and county at an election to be held therein on November 4, 1952, a proposal to amend the charter of said city and county by amending Section 156 thereof so that the same shall read as follows:

Transfer of Disabled

Transfer of disabled employees

Section 156. When a permanent civil service employee other than a member of the fire department and police department who has served not less than three (3) years in his position, has become incapable through advanced age, accident or other disability, of performing the duties of his position, the civil service commission may, with the consent of the appointing officer or appointing officers involved, transfer him to a position within his capacities to perform, whether or not within the classification for which he qualified for appointment, but such position shall

not be in a classification having a higher compensation schedule than the one from which he is transferred, and his compensation shall not thereafter be increased beyond the maximum salary for the classification to which such employee is transferred, nor in any event shall his salary be increased to equal the salary such employee would have received had he remained in his former position; provided, however, that a permanent employee, including any permanent member of the fire department and police department, who has become incapable of resuming his former position through disability incurred while on active service with the armed forces while on military leave may upon application after his discharge from military service be transferred under the provisions of this section, regardless of his length of service.

Employees transferred under the provisions of this section may, upon recovery from the disability, and with the consent of the civil service commission, return to a vacancy in their former classification.

Positions filled under the provisions of this section shall not be subject to salary standardization, but the salaries thereafter shall be fixed by the civil service commission within the limitations herein set forth, provided, however, that salaries of such employees who were transferred from or to positions the compensations for which are subject to section 151.3 hereof may be revised as of July 1st within the limitations herein set forth to reflect rates of pay adopted under the provisions of section 151.3 for the then ensuing fiscal year by appropriate amendment to the annual appropriation ordinance and annual salary ordinance but without reference or amendment to the annual budget. The civil service commission shall make rules to carry out the intent of this section and such rules shall govern all transfers made under the provisions of this section.

Proposition I

Describing and setting forth a proposal to the qualified electors of the City and County of San Francisco to amend the charter of said city and county by amending Section 172 thereof, relating to disability benefits for bodily injury or illness suffered by members of Fire and Police Departments because of performance of duty, and to service credit during disability.

The Board of Supervisors of the City and County of San Francisco hereby submits to the qualified electors of said city and county at an election to be held therein on November 4, 1952, a proposal to amend the charter of said city and county by amending Section 172 thereof so that the same shall read as follows:

Compensation Insurance Payments

Section 172. The benefit provisions of the workmen's compensation laws included in the Labor Code of the State of California, as they affect the benefits provided for or payable to

Compensation insurance payments

or on account of officers and employees, including teachers of the city and county, shall be administered exclusively by the retirement board, provided that the retirement board shall determine whether the city and county, through the retirement system, shall assume the risks under the said law, in whole or in part, or whether it shall reinsure such risks, in whole or in part, with the state compensation insurance fund. Benefits under such risks as may be assumed by the city and county, and premiums under such risks as may be reinsured shall be paid by the retirement system, and an amount equal to the total of such benefits and premiums, as determined by the actuary for any fiscal year, including the deficit brought forward from previous years, shall be paid during such fiscal year to the retirement system by the city and county.

Every patrol special police officer, as referred to in section 35 of this charter shall be entitled, under this section, to the benefits of such compensation law, if injured while performing regular city and county police duties, which shall include only duties performed while preventing the commission of a crime, or while apprehending the person or persons committing such crime, and shall not include duties of any character performed for private employers either on or off the premises of such employers, provided that no payments shall be made under this paragraph in the event that the patrol special officer shall receive the benefits of such compensation law from any other source.

Whenever any member of the fire or police department, as defined in sections 169, 171.1.1 and 168 1.1, respectively, is incapacitated for the performance of his duties by reason of any bodily injury received in or illness caused by the performance of his duty, as determined by the retirement board, he shall become entitled, regardless of his period of service with the city and county, to disability benefits equal to and in lieu of his salary as fixed by the charter, while so disabled, for a period or periods not exceeding twelve months in the aggregate, with respect to any one injury or illness. Said disability benefit shall be reduced in the manner fixed by the board of supervisors by the amount of any benefits other than medical benefits payable to such person under the Labor Code concurrently with said disability benefit, and because of the injury or illness resulting in said disability. Such disability benefits as are paid in the absence of payments of any benefits other than medical benefits under the workmen's compensation laws included in said Labor Code, shall be considered as in lieu of such benefits, payable to such person under the said Code concurrently with said disability benefits, and shall be in satisfaction and discharge of the obligations of the city and county to pay such benefits under the Labor Code. Medical treatment which may become necessary to relieve or cure said member from the effects of the injury or illness shall be furnished by the city and county, in the same manner that such treatment is furnished under said Labor Code, but without first requiring continuing awards of such treatment by the Industrial Accident Commission of the State of Cali-

fornia, relating to impairments of permanent or of extended and uncertain duration. The provisions of this paragraph shall be administered exclusively by the retirement board, and the city and county shall pay to the retirement system during each fiscal year, an amount equal to the total disability benefits paid by said system during that year. A member of the fire or police department shall receive credit as service, under the retirement system, for time during which he is incapacitated for performance of duty and receives said disability benefit. Contributions for the retirement system shall be deducted from said benefits in the same manner as they would be deducted from salary paid to him, and the city and county shall contribute, in addition to its other contributions provided herein, to the retirement system on the basis of said benefits in the same manner as it would contribute on salary paid to said member.

Any such publication shall contain certificates of the mayor, the clerk of the board of supervisors and the city attorney of the correctness of such codification and publication.

Any such ordinance shall be amended by an ordinance amending or repealing the particular sections thereof or adding sections thereto. For the purposes of any codification and the validity thereof, the procedure, effect, adoption or enactment and publication of any prior codification, including the enacting ordinance, amendments thereto, the contents of any such code, the certification and publication thereof and all other proceedings and matters in respect thereto, shall be deemed to be valid.

PROPOSITION N

Describing and setting forth a proposal to the qualified electors of the City and County of San Francisco to amend the charter of said City and County by adding thereto Section 165.1.3, relating to and increasing retirement allowances of miscellaneous officers and employees retired prior to July 1, 1947.

The Board of Supervisors of the City and County of San Francisco hereby submits to the qualified electors of said city and county at an election to be held therein on November 4, 1952, a proposal to amend the charter of said city and county by adding thereto Section 165.1.3, to read as follows:

Retirement Continued—Increasing Retirement Allowances of Miscellaneous Officers and Employees Retired Prior to July 1, 1947

Retirement allowances

Section 165.1.3. Every retirement allowance payable by the San Francisco city and county employees' retirement system, for time commencing on the effective date of this section, hereby designated as the first day of the month next following its ratification by the Legislature, to or on account of any person who was retired prior to July 1, 1947, as a member of said system under section 165, is hereby increased by the amount of $25 per month, provided such member was entitled to be credited under the retirement system with at least twenty years of service upon which the retirement allowance was determined at retirement. If the member was entitled to be credited with less than twenty years of such service, then said monthly increase shall be an amount which shall bear the same ratio to $25 that the service with which the member was entitled to be credited at effective date of retirement, bears to twenty years. This section does not give any member retired prior to the effective date hereof, or his successors in interest, any claim against the city and county for any increase in any retirement allowance paid or payable for time prior to said effective date. If a member elected at retirement to have his retirement allowance modified under Options 2 or 3, provided by ordinance, and if his beneficiary is living on said effective date, the increase in his allowance shall be modified under the option elected at retirement, and on the basis of current ages, mortality tables and interest rate. If the beneficiary of such a person who elected at retirement to have his allowance modified under one of said options is not living on said effective date, or if the retired member is not living on said effective date and the beneficiary is receiving the modified retirement allowance, then the allowance shall be increased as provided herein for persons who did not elect an option.

The increase in the retirement allowance shall be apportioned between service rendered prior to the entry of the member into the retirement system and service rendered as a member, in the same proportion that such prior and current service

respectively, bears to the total service credited at retirement. Contributions to the retirement system necessary for the payment of the increases in the retirement allowances provided in this section, shall be provided, with respect to the portion of the benefit based on service rendered as members, from the reserves held by the retirement system on account of miscellaneous members, the necessary amount being transferred upon said effective date, from said reserves to the reserves held by the retirement system to meet the obligations on account of benefits that have been granted and on account of prior service of members. The contribution being required of the city currently, as percentages of salaries of persons who are members under section 165.2, shall be increased to percentages determined by the actuary as necessary to replace the reserves so transferred. Contributions to the retirement system necessary for the payment of said increases with reference to prior service, shall be paid to the system by the city and county by annual appropriations, provided that such appropriation for any year shall not be less than the amount disbursed during that year on account of said increases.

Service rendered to the said Superior or Municipal Court in and for the city and county, other than as a phonographic reporter, by persons prior to becoming members under this section on the effective date of this section, hereby declared to be the first day of the month next following its ratification by the Legislature, shall be credited under the retirement system to such persons, provided that it would have qualified for credit when rendered, if said persons had been subject then, as they will be under this section, to the provisions of Section 165.2 of this charter and of the ordinances and provisions of the Municipal Code of the City and County of San Francisco relating to retirement of members under said section.

Service rendered to said Superior Court on and after September 15, 1945, or to said Municipal Court on and after September 1, 1947, by phonographic reporters prior to becoming members under this section on the effective date of this amendment shall be credited under the retirement system to such persons.

Said service, rendered prior to becoming a member under this section on the effective date of this section, shall only be credited to each of such persons if he elect, by written notice, on a form provided by the retirement system, filed in the office of the retirement board of said system prior to July 1, 1953, to receive credit for all or any part of said service, and to pay into the retirement fund, at times and in the manner hereinafter provided, the following amounts: (1) an amount equal to the normal contributions he would have contributed, had he been a member of the retirement system under Section 165.2, during the time for which he has elected to receive credit for service, on the basis of compensation paid to him by the city and county on account of said service, and (2) an amount equal to the interest which would have been credited to his account on account of such contributions from the date upon which they would have been made, to the date of payment of such contributions to the retirement system. However, a member shall not receive credit for any portion of such service rendered prior to April 1, 1922, unless he has elected to receive credit for, and has paid into the retirement fund such amounts with respect to, all of said service rendered after March 31, 1922. Such amounts shall be paid into the retirement fund by lump sum payment, or pay roll deductions or other installments, over a period not exceeding thirty-six months from July 1, 1953, provided that any balance remaining unpaid at his retirement shall become due and payable forthwith. Benefits, not provided by such amounts, granted to said persons on account of said service rendered

Such service shall include time during which such person was absent from a status included in the paragraph above by reason of service in the armed forces of the United States in any war in which the United States has engaged.

Notwithstanding the foregoing provisions, any such employee or attache not already a member of the system and who is such an employee or attache on the effective date of this amendment, shall not become a member of the retirement system, unless he elect prior to July 1, 1953, on a form provided by the retirement system, to be a member of said system, and if he does not so elect, he shall not be a member of the retirement system, and shall not be prevented from continuing in such employment by reason of such provision.

PROPOSAL No. "G"

To amend Article XX, Sections 167, 173 and 175 of the Charter of the City of Sacramento to read as follows:

Pension Board

Retirement System Creation

Sec. 167. In order to continue in force, with such modifications as are set forth in this Charter, provisions already existing for retirement and death benefits for officers and employees of the City, the Sacramento City Employees' Retirement System, hereinafter referred to as the Retirement System or the System, is hereby created. Elective officers and members of Board and Commissions shall not be eligible to membership in said Retirement System, and the City Council may exclude from such membership persons employed on a temporary or part-time basis. The City Council is hereby empowered to enact, by a vote of three-fourths of its members, any and all ordinances necessary to carry into effect the provisions of Sections 167 to 175, both inclusive, of this Charter provided that the said Council shall secure, through the Retirement Board, an actuarial report of the cost and effect of any proposed change in the benefits under the Retirement System, before enacting an ordinance or before voting to submit any proposed Charter amendment providing for such change.

City Manager

The City Manager in office upon the date when this Section becomes effective shall receive credit for service rendered by him to the City prior to that date, and shall pay to the Retirement System in one sum or in installments, (1) an amount equal to the contributions and interest which would have been credited to him on the effective date hereof, if he had never been excluded from membership in the Retirement System, and (2) interest on the amount in (1) immediately preceding from said effective date to the date of payment to said System. Payment of the amount due shall be completed not later than thirty-six months after said effective date, or the date of his earlier retirement. Said City Manager's rate of contribution shall be based on his nearest age at the date of his employment by the City.

Disabled employees

Sec. 173(b). Any member of the Retirement System who shall become disabled by reason of any bodily injury received in the performance of duty may be retired, and if not qualified for service retirement, he shall receive a retirement allowance equal to seventy-five per cent (75%) of the average monthly salary paid him one year prior to his retirement. Such retirement allowance shall be paid until the date upon which said member would have qualified for service retirement had such member rendered service without interruption, and on and after said date said retirement allowance shall be equal to the retirement allowance said member would have received if retired for service on said date, based on the average monthly salary paid him one year prior to retirement, according to the rank or ranks held by him during the year next preceding his retirement. If at the time of retirement for disability, the member is qualified for retirement for service, said member shall receive a retirement allowance equal to one-half (½) the average monthly salary paid him one year prior to his retirement. In case his disability

shall cease, his allowance shall cease, and he shall be restored to service in the rank he occupied at the time of his retirement. If an allowance is continued, in accordance with paragraph (d) of this Section, because of the death of a member retired under this paragraph, prior to the date upon which the member would have qualified for service retirement, the allowance continued shall be reduced upon said date in the same manner as the member's allowance would have been reduced had the member not died.

Sec. 173.1. Persons who have not retired and who are members of the Retirement System under Section 175, and who elected to be such members rather than members under Section 173, shall have the option of being members under Section 173 instead of Section 175, said option to be exercised in writing on a form furnished by the Retirement Board, to be filed in the office of said Board not later than ninety (90) days after the effective date hereof, hereby declared to be the first day of the month next following its ratification by the Legislature. Any such person who affirmatively exercises such option within the time specified, shall be subject to the provisions of Section 173, beginning on the first day of the month in which said form is filed as required, and said person shall no longer be subject to the provisions of Section 175. The contributions with interest standing to the credit of such person on such effective date, however, shall not be affected by change of membership from Section 175 to Section 173. Option

Retirement—Miscellaneous Officers and Employees

Sec. 175.1. Miscellaneous officers and employees, as defined in section 175.2, who are members of the Retirement System under section 175 of the Charter on the effective date hereof, hereby designated as the first day of July, 1953, and persons who become miscellaneous officers and employees after said effective date, shall be members of the Retirement System under this section 175.1 on and after said date and shall be subject to the following provisions of section 175.1 and sections 175.2, 175 3, 175.4, 175.5, 175.6, 175.7, 175.8, 175.9, 175.10, 175.11 and 175.12 (which shall apply only to members under section 175.1 unless otherwise indicated) in addition to the provisions contained in sections 167 to 172, both inclusive, of this Charter notwithstanding the provisions of any other section of the Charter, provided that the Retirement System shall be applied to persons employed on a part-time, temporary or substitute basis only as the City Council shall determine by ordinance enacted by three-fourths of all members of the Council. Miscellaneous officers and employees

Sec. 175.2. The following words and phrases as used in this section, unless a different meaning is plainly required by the context, shall have the following meaning: Definitions

"Retirement allowance," or "allowance," shall mean equal monthly payments, beginning to accrue upon the date of retire-

ment, and continuing for life unless a different term of payment is definitely provided by the context.

"Compensation," as distinguished from benefits under the workmen's compensation laws of the State of California, shall mean all remuneration whether in cash or by other allowances made by the City for service qualifying for credit under this section.

"Compensation earnable" shall mean the compensation as determined by the Retirement Board, which would have been earned by the member had he worked, throughout the period under consideration, the average number of days ordinarily worked by persons in the same grade of class of positions as the positions held by him during such period and at the rate of pay attached to such positions. The computation for any absence of a member shall be based on the compensation earnable by him at the beginning of the absence, and that for time prior to entering the service of the City, shall be based on the compensation earnable by him in the position first held by him in such service.

"Benefit" shall include "allowance," "Retirement allowance," and "death benefit."

"Accumulated normal contributions" shall mean normal contributions plus interest.

"Final compensation" means the highest average annual compensation earnable by a member during any period of five consecutive years during his membership in the system. For the purposes of this section, periods of service separated by breaks in service may be aggregated to constitute a period of five consecutive years, if the periods of service are consecutive except for such breaks. If a break in service did not exceed six months in duration, time included in the break and compensation earnable during such time shall be included in computation of final compensation. If a break in service exceeded six months in duration, the first six months thereof and the compensation earnable during those six months shall be included in computation of final compensation, but time included in the break which is in excess of six months and the compensation earnable during such excess time shall be excluded in computation of final compensation.

For the purposes of the retirement system and of this section, the terms "miscellaneous officer or employees," or "member," as used in this section shall mean any officer or employee who is not a member of the fire or police departments as defined in the Charter for the purpose of the retirement system and is not a member of the Retirement System under section 173 of the Charter.

"Retirement system" or "system" shall mean Sacramento Employees' Retirement System as created in section 167 of the Charter.

"Board" or "retirement board" shall mean retirement board as created in section 159 of the Charter.

"Council" shall mean the Council of the City of Sacramento.

"Charter" shall mean the Charter of the City of Sacramento.

Words used in the masculine gender shall include the feminine and neuter genders, and singular numbers shall include the plural and the plural the singular.

"Interest" shall mean interest at the rate adopted by the Retirement Board.

Computation of allowance

Sec. 175.3. Any member who completes at least twenty years of service in the aggregate, credited in the retirement system and attains the age of fifty-five years, said service to be computed under section 175.8, may retire for service at his option. Members shall be retired for service on the first day of the month next following the attainment by them of the age of seventy years. Upon retirement for service, a member shall receive a service retirement allowance equal to the fraction of one-sixtieth of his final compensation, set forth opposite his age at retirement, taken and applied by interpolation of said fractions to the preceding quarter year, in the following table in the column applicable to his sex, multiplied by the number of years of service with which he is entitled to be credited:

Age at Retirement	Fraction Men	Women
55	.7381968	.7606902
56	.7822692	.8015202
57	.8300286	.8454756
58	.8818560	.8929770
59	.9382848	.9443484
60	1.0000000	1.0000000
61	1.0544790	1.0529628
62	1.1113284	1.1085072
63	1.1712492	1.1672862
64	1.2344172	1.2296820
65 and over	1.3015110	1.2959700

The fractions herein set forth at ages other than age 60 are based on the interest rate and mortality tables used under the Retirement System with respect to miscellaneous members on the effective date hereof, and shall be adjusted by the board in accordance with such interest and mortality tables as the board may adopt with respect to such members.

Before the first payment of a retirement allowance is made, a member retired under this section or section 175.4 may elect to receive the actuarial equivalent of his allowance, partly in a lesser allowance to be received by him throughout his life, and partly in other benefits payable after his death to another person or persons provided that such election shall be subject to all the conditions prescribed by the Council to govern similar elections by other members of the retirement system, including the character and amount of such other benefits. The service retirement allowance upon retirement after twenty years of service and after attaining the age of sixty-five years, shall not be less than sixty dollars ($60.00) per month, prior to modi-

fication under the election provided in the next preceding sentence, and exclusive of any benefit provided by additional contributions. Part-time service and compensation shall be reduced to full-time service and compensation in the manner prescribed by the Council, and when so reduced shall be applied on full-time service and compensation in the calculation of retirement allowances.

Disability

Sec. 175.4. Any member who becomes incapacitated for performance of duty because of disability determined by the retirement board to be of extended and uncertain duration, and who shall have completed at least ten years of service, in the aggregate, credited under the retirement system, computed as provided in section 175.8 shall be retired upon an allowance of one and one-half per cent of his final compensation, as defined in section 175.2 hereof for each year of credited service, if such retirement allowance exceeds one-fourth ($\frac{1}{4}$) of his final compensation; otherwise one and one-half ($1\frac{1}{2}$) per cent of his final compensation multiplied by the number of years of service which would be creditable to him were such service to continue until attainment by him of age sixty, but such retirement allowance shall not exceed one-fourth ($\frac{1}{4}$) of such final compensation. Part-time service and compensation shall be reduced to full-time service and compensation in the manner prescribed by the Council, and when so reduced shall be applied as full-time service and compensation in the calculation of retirement allowances. The question of retiring a member under this section may be brought before the retirement board on said board's own motion, by recommendation of the office or department in which the member is employed, or by said member or his guardian. The application or motion for retirement, however, only shall be made not later than the last day for which the member receives compensation, or within four months after the last day for which compensation is paid, or while he is physically or mentally incapacitated to perform his duties from such last day to the time of the application or motion. If his disability shall cease, his retirement allowance shall cease, and he shall be restored to service in the position or classification he occupied at the time of his retirement.

Effect of workmen's compensation

Sec. 175.5. No modification of benefits provided for or on account of persons who are members under Section 175.1, shall be made because of any amounts payable to or on account of any member under workmen's compensation laws included in the Labor Code of the State of California.

Death benefits

Sec. 175.6. If a member shall die before retirement, regardless of cause, and not later than the last day for which he receives compensation, or within four months after the last day for which the member receives compensation, or while the member is physically or mentally incapacitated for the performance of his duties, if such incapacity has been continuous from such last day to the date of death, a death benefit shall be paid to his estate or designated beneficiary consisting of an amount equal to one-twelfth ($\frac{1}{12}$) of the compensation earnable by him

during the twelve months immediately preceding death multiplied by his completed years of service as a member of the System, not to exceed six, plus his contributions and interest credited thereon. Upon the death of a member after retirement and regardless of the cause of death, a death benefit in the amount of Three Hundred Dollars ($300.00) shall be paid to his estate or designated beneficiary.

Election to withdraw contributions

Sec. 175.7. Should any miscellaneous member cease to be employed as such a member, through any cause other than death or retirement or transfer to another office or department, all of his contributions, with interest credited thereon, shall be refunded to him subject to the conditions prescribed by the Council to cover similar terminations of employment and re-employment with and without re-deposits of withdrawn accumulated contributions, of other members of the retirement system, provided that if such a member is entitled to be credited with accumulated contributions which exceed Five Hundred Dollars ($500.00), he shall have the right to elect, without right of revocation and within 90 days after said termination of service, or if the termination was by lay-off, 90 days after the retirement board determines the termination to be permanent, whether to allow his accumulated contributions to remain in the retirement fund. Failure to make such election shall be deemed an irrevocable election to withdraw his accumulated contributions unless the member is entitled to be credited with at least 20 years of service. A member whose membership continues under this section is subject to the same age and disability requirements as apply to other members for service or for disability retirement but he is not subject to a minimum service requirement. After the qualification of such member for retirement by reason of age or disability he shall be entitled to receive a retirement allowance based upon the amount of his accumulated contributions and service standing to his credit at the time of retirement and on the employer contributions held for him and calculated in the same manner as for other members, except that the provisions for minimum service and disability retirement allowances do not apply to him, unless he meets such minimum service requirements. Upon the death of such a member prior to retirement under this section, such death benefit as may be payable under section 175.6 shall be computed upon the basis of his average annual compensation earnable for the year preceding the date of termination of such service, multiplied by the years of city service prior to such termination not to exceed six.

Computation of service time

Sec. 175.8. The following time and service shall be included in the computation of the service to be credited to a member for the purpose of determining whether such member qualifies for retirement and of calculating benefits, but only if withdrawn accumulated normal contributions based on such time and service, have been or are redeposited in the Retirement System:

(1) Time during which said member is a member of the Retirement System and during and for which said member is

entitled to receive compensation because of service as a miscellaneous officer or employee.

(2) Service in the fire and police departments which is not requisite to membership under Section 175.1, shall be credited under this section upon a change in status of a member of either of such departments entitling him to membership in the Retirement System under section 175.1, provided that the accumulated normal contributions standing to the credit of such member, including amounts redeposited by him, shall be adjusted by refund to the member or by payment by the member to bring the amount to the amount which would have been credited to him had the member been a miscellaneous employee throughout the period of his service in either of such departments at the compensation he received in such departments.

(3) Time during which said member is absent in military service from a status included in paragraphs (1) or (2) next preceding, and for which such member is entitled to receive credit as service for the city by virtue of contributions made by or for him, as provided by the Council.

(4) Prior service determined and credited as prescribed by the Council for other members of the System

Source of payments

Sec. 175.9. All payments provided hereunder to or on account of persons who are members under Section 175.1, shall be made from funds derived from the following sources, plus interest earned on said funds:

(1) The normal rate of contribution of each member under section 175.1 shall be based on his nearest age at the effective date of his membership in the Retirement System. The normal rate of contribution of each such member, to be effective from the effective date of membership under said section, shall be such as, on the average for such member, will provide, assuming service without interruption under section 175 3, one-half of that portion of the service retirement allowance to which he would be entitled if retired at age sixty. The normal rate established for age 59 shall be the rate for any member who has attained a greater age before entrance into the System, and that established for age 20 shall be the rate for any member who enters the System at a lesser age. Members' normal rates of contribution shall be changed by the Board in the manner prescribed by the Council for changing contribution rates of members on the basis of a periodical actuarial valuation and investigation provided by the Charter and the Council. No adjustment shall be included in members' normal rates because of time during which members have contributed at different rates.

(2) There shall be deducted from each payment of compensation made to a member under Section 175.1, a sum determined by applying the member's normal rate of contribution to such compensation. The sum so deducted shall be paid forthwith to the retirement system. Said contribution shall be credited to the individual account of the member from whose salary it was deducted, and the total of said contributions, together with

interest credited thereon in the same manner as is prescribed by the Council for crediting interest to contributions of other members of the retirement system, shall be applied to provide part of the retirement allowance granted to said member, or shall be paid to said member or his estate or beneficiary as provided in sections 175.6 and 175.7. Subject to rules prescribed by the Board, any member may elect to make contributions in excess of his contributions herein required, for the purpose of providing additional benefits, and benefits provided hereunder for such member shall be exclusive of such additional benefits. The exercise of this privilege by a member does not require the City to make any contributions. Additional contributions shall be administered in the same manner as normal contributions.

(3) Contributions based on time included in paragraphs (1) and (3) of section 175.8, and deducted prior to the effective date hereof, from compensation of persons who become members under Section 175.1 and standing with interest thereon, to the credit of such members on the records of the Retirement System on said date, shall continue to be credited to the individual accounts of said members and shall be combined with and administered in the same manner as the contributions deducted after said date.

(4) The total contributions, with interest thereon, made by or charged against the City and standing to its credit, on the effective date hereof, in the accounts of the Retirement System, on account of persons who become members under section 175.1, shall be applied to provide the benefits hereunder for or on account of them.

(5) The City shall contribute to the Retirement System such amounts as may be necessary, when added to the contributions referred to in the preceding paragraphs of this section 175.9, to provide the benefits payable to or on account of persons who are members under Section 175 1. Such contributions of the City to provide the portion of the benefits hereunder which shall be based on service rendered by each member prior to the date upon which his rate of contribution is determined in paragraph (1), Section 175.9, shall not be less during any fiscal year than the amount of such benefits paid during said year. Such contributions of the City to provide the portion of the benefits hereunder which shall be based on service rendered by respective members on and after the date stated in the next preceding sentence, shall be made in annual installments, and the installment to be paid in any year shall be determined by the application of a percentage to the total salaries paid during said year, to persons who are members under section 175.1, said percentage to be the ratio of the value at the effective date hereof or at the date of the last valuation prior to said date, or at the later date of a periodical actuarial valuation and investigation into the experience under the System as provided by the Charter and the Council, of the benefits thereafter to be paid to or on account of persons who are members under Section 175.1, from contributions of the City, less the amount of such contributions,

and plus accumulated interest thereon, then held by said system to provide said benefits on account of service rendered by respective members after the date stated in the sentence next preceding, to the value at said respective dates of salaries thereafter payable to said members. Said values shall be determined by the actuary, who shall take into account the interest which shall be earned on said contributions, the compensation experience of members, and the probabilities of separation by all causes, of members from service before retirement and of death after retirement. Said percentage shall be changed by the Board on the basis of said values determined in said periodical actuarial valuation and investigation into the experience under the system. Nothing in this paragraph, however, shall prevent the calculation and use under the System in the manner described for the percentage under this paragraph, of one percentage relating to all persons who are members under Section 175.1 and Section 175.13, and to be applied to the total compensation paid during the respective year to such persons, for the determination of the City's contribution to the Retirement System, with substantially the same effect as if separate percentages had been calculated under the respective sections. The percentage to be used under said two sections, shall be ten and forty-one hundredths per cent (10.41%) until redetermined by the Retirement Board on the basis of the periodical investigation and actuarial valuation under the System, and the contributions resulting from its use shall be applied to provide part of the benefits under both of said sections, without segregation according to section.

(6) To promote the stability of the retirement system through a joint participation in the result of variations in the experience under mortality, investment and other contingencies, the contributions of both members and the City held by the system to provide the benefits for or on account of persons who are members under Section 175.1, shall be a part of the fund in which all other assets of said system are included. Nothing in this section shall affect the obligations of the City to pay to the retirement system any amounts which may or shall become due under the provisions of the Charter prior to the effective date hereof, and which are represented on said effective date, in the accounts of said system by debits against the City.

Right to retire

Sec. 175.10. Upon the completion of the years of service set forth in section 175.3 of this Charter as requisite to retirement, a member shall be entitled to retire at any time thereafter in accordance with the provisions of said section 175.3 and nothing shall deprive said member of said right.

Employment after retirement

Sec. 175.11. No person retired for service under section 175.3 or for disability under section 175.4, and entitled to receive a retirement allowance under the Retirement System shall serve in any elective or appointive position in the City service, including membership on boards and commissions, nor shall such persons receive any payment for service rendered to the

City after retirement, provided that service as an election officer or juror shall not be affected by this section.

Should any such person retired for disability, engage in gainful occupation prior to attaining the age of fifty-five years, the retirement board shall reduce that part of his monthly pension or retirement allowance which is provided by contributions of the City, to an amount which, when added to the amount earned monthly by him in such occupation, shall not exceed the amount of the maximum compensation earnable by a person holding the position which he held at the time of his retirement, or if that position has been abolished, the maximum compensation earnable by a person holding it immediately prior to its abolition.

Construction

Sec. 175.12. Any section or part of any section in this Charter, insofar as it should conflict with these sections 175.1, 175.2, 175.3, 175.4, 175.5, 175.6, 175.7, 175.8, 175.9, 175.10, 175.11 and 175.12, or with any part thereof, shall be superseded by the contents of these sections. In the event that any word, phrase, clause or subsection of these sections shall be adjudged unconstitutional, the remainder thereof shall remain in full force and effect.

If a break in service exceeded six months in duration, the first six months thereof and the compensation earnable during those six months shall be included in computation of final compensation, but time included in the break which is in excess of six months and the compensation earnable during such excess time shall be excluded in computation of final compensation.

Computation of allowance

member, regardless of his age at retirement, for each year of service in the aggregate, computed under Section 175.22, as the contributions of the member and the City are calculated to provide upon retirement for service at age 55, or upon completion of 20 years of such service at an age higher than 55, or upon retirement with less than 20 years of such service at age 65, for each year of such service. Any member may retire for service after attaining the age of fifty years and rendering at least twenty years of service in the aggregate, computed under Section 175.22, but if his retirement is below age fifty-five, his retirement allowance shall be such as can be provided at the age of retirement by the actuarial value, at the age of retirement, of the retirement allowance to which he would be entitled at the date upon which he would qualify for retirement under the first sentence of this paragraph, deferred to that date. If, at the date of retirement for service, or retirement for disability resulting from an injury received in performance of duty, said member has no wife, children, or dependent parents, who would qualify for the continuance of the allowance after the death of said member, or with respect to the portion of the allowance which would not be continued regardless of dependents, or upon retirement for disability resulting from other causes, with respect to all of the allowance and regardless of dependents at retirement, a member retired under this section, or section 175.16, may elect before the first payment of the retirement allowance is made, to receive the actuarial equivalent of his allowance or the portion which would not be continued regardless of dependents, as the case may be, partly in a lesser allowance to be received by him throughout his life, and partly in other benefits payable after his death to another person or persons, provided that such election shall be subject to all the conditions prescribed by the Council to govern similar election by other members of the Retirement System, including the character and amount of such other benefits.

Service disability Allowance

Sec. 175.16. Any member of the Fire or Police Department who becomes incapacitated for the performance of his duty by reason of any bodily injury received in, or illness caused by performance of his duty, and if such incapacity is determined by the Board as being of extended and uncertain duration, shall be retired. If he is not qualified for service retirement, he shall receive a retirement allowance equal to fifty per cent of the final compensation of said member. If at the time of retirement because of disability, he is qualified as to age and service for retirement under Section 175.15, he shall receive an allowance equal to the retirement allowance he would receive if retired under Section 175.15, but not less than fifty per cent of said final compensation. Any member of the Fire or Police Department who becomes incapacitated for performance of his duty, by reason of a cause not included under the provisions of the immediately preceding sentence, and who shall have completed at least ten years of service in the aggregate, computed as provided in Section 175 22, shall be retired upon an allowance of one and

one-half per cent of the final compensation of said member as defined in Section 175.14 for each year of service, provided that said allowance shall not be less than twenty-five per cent of said final compensation. The question of retiring a member under this section may be brought before the Retirement Board on said Board's own motion, by recommendation of the head of his department, or by said member or his guardian. The application or motion for retirement, however, only shall be made not later than the last day for which the member received compensation, or within four months after the last day for which compensation is paid, or while he is physically or mentally incapacitated to perform his duties from such last day to the time of the application or motion. If his disability shall cease, his retirement allowance shall cease, and he shall be restored to the service in the rank he occupied at the time of his retirement.

Death before retirement. Allowance

Sec. 175.17. If a member of the Fire or Police Department shall die before retirement by reason of an injury received in, or illness caused by the performance of his duty, a death allowance shall be paid, beginning on the date next following the date of death, to his surviving wife throughout her life or until her remarriage. If the member, at the time of death, was qualified for service retirement, but had not retired, the allowance payable shall be equal to the retirement allowance which the member would have received if he had been retired for service on the day of death, but such allowances shall not be less than fifty per cent of the average monthly compensation earnable by said member during the five years immediately preceding death. If death occurs prior to qualification for service retirement, the allowance payable shall be equal to fifty per cent of the average monthly compensation earnable by said member during the five years immediately preceding death. If there be no surviving wife entitled to an allowance hereunder, or if she die or remarry before every child of such deceased member attains the age of eighteen years, then the allowance which the surviving wife would have received had she lived and not remarried shall be paid to his child or children under said age, collectively, until every child dies or attains said age, provided that no child shall receive any allowance after marrying or attaining age eighteen. Should said member leave no surviving wife and no children under the age of eighteen years, but leave a parent or parents dependent upon him for support, the parents so dependent shall collectively receive a monthly allowance equal to that which a surviving widow otherwise would have received, during such dependency. No allowance, however, shall be paid under this section to a surviving wife following the death of a member unless she was married to the member prior to the date of the injury or onset of the illness which results in death.

Death after retirement Allowance

Sec. 175.18. Upon the death of a member after retirement for service or because of disability which resulted from injury received in, or illness caused by the performance of duty, one-half his retirement allowance shall be continued throughout

life or until remarriage, to his surviving wife. If there be no surviving wife entitled to an allowance hereunder, or if she die or remarry before every child of such deceased member attains the age of eighteen years, then the allowance which the surviving wife would have received had she lived and not remarried shall be paid to his child or children under said age, collectively, to continue until every such child dies or attains said age, provided that no child shall receive any allowance after marrying or attaining the age of eighteen years. Should said member leave no surviving wife and no children under the age of eighteen years, but leave a parent or parents dependent upon him for support, the parents so dependent shall collectively receive a monthly allowance equal to that which a surviving wife otherwise would have received, during such dependency. No allowance, however, shall be paid under this section to a surviving wife unless she was married to the member prior to the date of the injury or onset of the illness which was incurred in performance of duty and which results in death, or if death does not result from such injury or illness, unless she was married to the member at least one year prior to retirement.

Sec. 175.19. That portion of any allowance payable because of the death or retirement of any member of said departments which is provided by contributions of the City shall be reduced in the manner fixed by the Council, by the amount of any benefits other than medical benefits, payable to or on account of such person, under the Workmen's Compensation Laws of the State of California and because of the injury or illness resulting in said death or retirement. Such portion as is paid because of death or retirement which resulted from injury received in or illness caused by performance of duty, and in the absence of payments of any benefits other than medical benefits under said laws, shall be considered as in lieu of all benefits, other than medical benefits, payable to or on account of such person under said laws, and shall be in satisfaction and discharge of the obligation of the City to pay such benefits.

Sec. 175.20. If a member of the Fire or Police Department shall die before retirement, from causes other than an injury received in or illness caused by the performance of duty, or regardless of cause, if no allowance shall be payable under section 175.17 preceding, and if death shall occur not later than the last day for which he receives compensation, or within four months after the last day for which the member receives compensation, or while the member is physically or mentally incapacitated for the performance of his duties, and if such incapacity has been continuous from such last day to the date of death, a death benefit shall be paid to his estate or designated beneficiary, consisting of an amount equal to one-twelfth of the compensation earnable by him during the twelve months immediately preceding death multiplied by his completed years as a member of the System not to exceed six, plus his contributions and interest credited thereon. Upon the death of a member after

retirement and regardless of the cause of death, the sum of three hundred dollars shall be paid to his estate or designated beneficiary in the manner and subject to the conditions prescribed by the Council for the payment of a similar benefit upon the death of other retired members.

Election to withdraw contributions

Sec. 175.21. Should any member of the Fire or Police Department cease to be employed as such a member, through any cause other than death or retirement or transfer to another office or department, all of his contributions, with interest credited thereon, shall be refunded to him subject to the conditions prescribed by the Council to cover similar terminations of employment and re-employment with and without re-deposits of withdrawn accumulated contributions, of other members of the retirement system, provided that if such a member is entitled to be credited with accumulated contributions which exceed Five Hundred Dollars ($500.00), he shall have the right to elect, without right of revocation and within 90 days after said termination of service, or if the termination was by layoff, 90 days after the retirement board determines the termination to be permanent, whether to allow his accumulated contributions to remain in the retirement fund. Failure to make such election shall be deemed an irrevocable election to withdraw his accumulated contributions unless the member is entitled to be credited with at least 20 years of service. A member whose membership continues under this section is subject to the same age and disability requirements as apply to other members for service or for disability retirement but he is not subject to a minimum service requirement. After the qualification of such member for retirement by reason of age or disability he shall be entitled to receive a retirement allowance based upon the amount of his accumulated contributions and service standing to his credit at the time of retirement and on the employer contributions held for him and calculated in the same manner as for other members, except that the provisions for minimum service and disability retirement allowances do not apply to him, unless he meets such minimum service requirements. Upon the death of such a member prior to retirement under this section, such death benefits as may be payable under section 175.20 shall be computed upon the basis of his average annual compensation earnable for the year preceding the date of termination of such service, multiplied by the years of City service prior to such termination not to exceed six.

Computation of service time

Sec. 175.22. The following time shall be included in the computation of the service to be credited to the member for the purposes of determining whether such member qualifies for retirement, and calculating benefits, excluding, however, any time, the contributions for which were withdrawn by said member upon termination of his service while he was a member under any other Charter section, and not redeposited upon reentry into service:

(1) Time during which said member is a member of the Retirement System, and during and for which said member is

entitled to receive compensation because of services as a member of the Fire or Police Department.

(2) Service in other offices and departments of the City, which is not requisite to membership under Section 175.13, shall be credited under this section upon a change in status of a member of such offices and departments entitling him to membership in the Retirement System under Section 175.13, provided that the accumulated normal contributions standing to the credit of such member, including amounts redeposited by him, shall be adjusted by refund to the member or by payment by the member to bring the amount to the amount which would have been credited to him had the member been a member of the Fire or Police Department throughout the period of his service in such other offices or departments at the compensation he received in such other offices and departments.

(3) Time during which said member is absent in military service from a status included in (1) or (2) next preceding, and for which said member is entitled to receive credit as service for the City by virtue of contributions made by or for him, as provided by the Council.

(4) Prior service determined and credited as prescribed by the Council for other members of the System.

Sec. 175.23. All payments provided hereunder for persons who are members under Section 175 13 shall be made from funds derived from the following sources, plus interest earned on said funds: Source of payments

(1) The normal rate of contribution of each member under section 175.13 shall be based on his age taken to the next lower completed quarter year, (a) at the date he became a member under section 175, in the case of persons who are members under this section, or (b) at the date he becomes a member under section 175.13 in the case of persons who become members on or after the effective date hereof, without credit for service counted under section 175.22 as rendered prior to the date upon which his age is based for determination of his rate of contribution according to the sentence next preceding, from said age. The normal rate of contribution of each such member, to be effective from the effective date of membership under section 175.13 shall be such as, on the average for such member, will provide, assuming service without interruption under section 175.15, one-half of that portion of the service retirement allowance to which he would be entitled, excluding automatic continuance to dependents, upon first qualifying as to service and age not less than 55 years, for retirement under that section, which is based on service rendered after the date upon which his age is based for determination of his rate of contribution according to the first sentence in this paragraph, and assuming the contribution to be made from that date, it being the intention that the retirement allowance of such member, upon retirement for service when qualified at age 55 or higher age, shall be, on the average, one-half of his compensation.

(2) There shall be deducted from each payment of compensation made to a member under this section, a sum determined by applying the member's rates of contribution to such compensation payment. The sum so deducted shall be paid forthwith to the Retirement System. Said contribution shall be credited to the individual account of the member from whose salary it was deducted, and the total of said contributions, together with interest credited thereon in the same manner as is prescribed by the Council for crediting interest to contributions of other members of the Retirement System, shall be applied to provide part of the retirement allowance granted to, or allowance granted on account of said member, or shall be paid to said member of his estate or beneficiary as provided in Sections 175.20 and 175.21. Subject to rules prescribed by the Board, any member may elect to make contributions in excess of his contributions herein required, for the purpose of providing additional benefits, and benefits provided hereunder for such member shall be exclusive of such additional benefits. The exercise of this privilege by a member does not require the City to make any contributions. Additional contributions shall be administered in the same manner as normal contributions.

(3) Contributions based on time included in paragraphs (1) and (3) of section 175.22, and deducted prior to the effective date thereof, from compensation of persons who become members under Section 175.13, and standing with interest thereon, to the credit of such members on the records of the Retirement System on said date, shall continue to be credited to the individual accounts of said members and shall be combined with and administered in the same manner as the contributions deducted after said date.

(4) The total contributions, with interest thereon, made by or charged against the City and standing to its credit, in the accounts of the Retirement System, on account of persons who become members under Section 175 13, shall be applied to provide the benefits hereunder for or on account of them.

(5) The City shall contribute to the Retirement System such amounts as may be necessary, when added to the contributions referred to in the preceding paragraphs of this section 175.23, to provide the benefits payable to or on account of persons who are members under Section 175.13 Such contributions of the City to provide the portion of the benefits hereunder which shall be based on service rendered by each member prior to the date upon which his age is based for determination of his rate of contribution in paragraph (1) of Section 175.23, shall not be less during any fiscal year than the amount of such benefits paid during said year. Such contributions of the City to provide the portion of the benefits hereunder which shall be based on service rendered by respective members on and after the date stated in the next preceding sentence, shall be made in annual installments and the installment to be paid in any year shall be determined by the application of a percentage to the total compensation paid during said year, to persons who are members under

section 175.13, said percentage to be the ratio of the value on the effective date hereof, or at the date of the last valuation prior to said date, or at the later date of a periodical actuarial valuation and investigation into the experience under the System as provided by the Council, of the benefits thereafter to be paid to or on account of persons who are members under Section 175.13, from contributions of the City, less the amount of such contributions, and plus accumulated interest thereon, then held by said System to provide said benefits on account of service rendered by respective members after the date stated in the sentence next preceding, to the value at said respective dates of salaries thereafter payable to said members Said values shall be determined by the actuary, who shall take into account the interest which shall be earned on said contributions, the compensation experience of members, and the probabilities of separation by all causes, of members from service before retirement and of death after retirement. Said percentage shall be changed by the Board on the basis of said values determined in said periodical actuarial valuation and investigation into the experience under the System. Nothing in this paragraph, however, shall prevent the calculation and use under the System in the manner described for the percentage under this paragraph, of one percentage relating to all persons who are members under Section 175.1 and Section 175.13, and to be applied to the total compensation paid during the respective year to such persons, for the determination of the City's contribution to the Retirement System, with substantially the same effect as if separate percentages had been calculated under the respective sections. The percentage to be used under said two sections, shall be ten and forty-one hundredths per cent (10.41%) until redetermined by the Retirement Board on the basis of the periodical investigation and actuarial valuation under the System, and the contributions resulting from its use shall be applied to provide part of the benefits under both of said sections, without segregation according to section.

(6) To promote the stability of the Retirement System through a joint participation in the result of variations in the experience under mortality, investment and other contingencies the contributions of both members and the City held by the System to provide the benefits for or on account of persons who are members under Section 175.13, shall be a part of the fund in which all other assets of said System are included. Nothing in this section shall affect the obligations of the City to pay to the Retirement System any amounts which may or shall become due under the provisions of the Charter prior to the effective date hereof, and which are represented on said effective date, in the accounts of said System by debits against the City.

Right to retire

Sec. 175 24. Upon the completion of the years of service set forth in Section 175 15 as requisite to retirement, a member shall be entitled to retire at any time thereafter in accordance with the provisions of said section 175 15, and nothing shall deprive said member of said right.

Employment after retirement

Sec. 175.25. No person retired for service under section 175.15 or for disability under section 175.16 and entitled to receive a retirement allowance under the Retirement System shall serve in any elective or appointive position in the City service, including membership on boards and commissions, nor shall such person receive any payment for service rendered to the City after retirement, provided that service as an election officer or juror shall not be affected by this section. Should any such person retired for disability engage in a gainful occupation prior to attaining the age of fifty-five years, the Retirement Board shall reduce that part of his monthly retirement allowance which is provided by contributions of the City, to an amount which, when added to the amount earned monthly by him in such occupation, shall not exceed the amount of the maximum compensation earnable by a person holding the position which he held at the time of his retirement, or, if that position has been abolished, the compensation earnable by the member holding it immediately prior to its abolition.

Construction

Sec. 175.26. Any section or part of any section in this Charter, insofar as it should conflict with these sections 175.13, 175.14, 175.15, 175.16, 175.17, 175.18, 175.19, 175.20, 175.21, 175.22, 175.23, 175.24, 175.25 or 175.26, or with any part thereof, shall be superseded by the contents of said sections. In the event that any word, phrase, clause or section of these sections shall be adjudged unconstitutional, the remainder thereof shall remain in full force and effect.

Civil Service

Merit system

Section 1000. Merit Basis of Appointment. Appointments and promotions in the Competitive Service of the City shall be made according to merit and fitness and from eligible lists to be established in accordance with civil service rules and regulations adopted in the manner provided in this Charter.

Legal effect of rules and regulations

Section 1001. Civil Service Rules and Regulations. Civil service rules and regulations as provided for in this Article shall have the force and effect of law only after having been adopted in an ordinance or ordinances by the City Council.

The civil service rules and regulations shall provide for such matters as the City Council and the Personnel Board may deem necessary, proper, or expedient to carry out the intent and purpose of the civil service provisions of this Charter.

Section 1002. Competitive and Excepted Service. The civil service of the City shall be divided into the Competitive Service and the Excepted Service.

Excepted service

(a) The Excepted Service shall comprise the following offices and positions:

1. The individual offices held by all elective officers;
2. The City Manager and an Assistant City Manager, if any;
3. The City Attorney and his legal assistants, if any;
4. The Director of Finance;
5. The Director of Personnel, if any;
6. One private secretary to the City Manager;
7. All posts as members of boards and commissions;
8. Positions occupied by persons employed to render professional, scientific, technical, or expert service of an occasional and exceptional nature;
9. Positions in any class or grade created for a special or temporary purpose, and which are to exist for a period of not longer than ninety days;
10. Positions of any class or grade exempted from the Competitive Service for a maximum period of six months in any calendar year provided that the Personnel Board upon application of the City Manager and after public notice and hearings recommends to the City Council such exemption and the City Council grants such exemption by motion adopted by four of its members. Any such exemption shall not affect the tenure of any person whose appointment has become final under civil service;
11. Part-time positions or employments requiring less than twenty regular hours of employment per week;
12. School crossing guards.

Competitive service

(b) The Competitive Service shall comprise all positions not specifically included by this Section in the Excepted Service.

(c) Any person who, on the effective date of this Charter, holds a position or employment included in the Competitive Service as defined in this Section or who is on an eligible or

re-employment list for a position or class of position in such Competitive Service, shall retain all status previously held prior to the effective date of this Charter in such position, employment, eligible list, or re-employment list.

(d) The person holding the position of City Clerk, City Treasurer, or City Marshal, each formerly an elective officer, if he shall have served continuously in such position for the period of six months immediately prior to such effective date, shall assume regular status in the Competitive Service under this Charter—as to the person formerly holding the position of City Clerk, in the position of Clerk of the Council; as to the person formerly holding the position of City Treasurer, in a position having similar duties in the department headed by the Director of Finance; and as to the person formerly holding the position of City Marshal, in a position of Chief of Police, the duties of which position shall be prescribed by the City Council by ordinance.

Appointments from competitive to excepted service

Section 1003. Appointments From Competitive Service to Excepted Service. In the event an officer or employee of the City holding a position in the Competitive Service is appointed to a position in the Excepted Service, and should subsequently be removed therefrom, he shall revert to his former position in the Competitive Service without loss of any rights or privileges and upon the same terms and conditions as if he had remained in said position continuously.

Position classification and pay plan

Section 1004. Position Classification and Pay Plan. The City Manager shall prepare, install, and maintain a position classification and pay plan covering all positions in both the Competitive and the Excepted Services of the City, subject to civil services rules and regulations and the approval of the City Council.

Recruitment and examination

Section 1005. Recruitment and Examinations. Examinations of applicants for positions in the Competitive Service shall be practical and relate to those matters which fairly test the relative capacity of the applicants to discharge the duties of the positions to which they seek to be appointed.

No person may be an applicant who is not a citizen of the United States, or who has not resided in the City of Santa Ana for at least one year next preceding the date of such examination. The residential requirement may be waived by the City Manager, upon approval of the Personnel Board as to particular examinations, whenever he believes such waiver is in the public interest, but in each instance he must declare in the proceedings the reasons therefor.

In all examinations for entrance into the Competitive Service of the City, veterans who attain a passing grade shall be allowed an additional preferential credit of five percent, and disabled veterans obtaining a passing grade shall be allowed a preferential credit of ten percent, of the maximum possible grade for such examination. The term "veteran" means a person who has served on active duty in the armed forces of the United States in time of war or armed intervention (and prior

to the cessation of hostilities, as declared by the President or the Congress of the United States) for a period of at least ninety days and has received an honorable discharge or release from active duty.

Promotions

Section 1006. Promotions. Vacancies in positions of the higher classes in the Competitive Service of the City shall, as far as practicable, be filled by promotion of employees occupying positions of lower classes having duties and responsibilities which can reasonably be considered as affording training and experience for the performance of the duties of the higher class; provided that the City Manager, with the approval of the Personnel Board, may hold examinations for positions of such higher classes on the basis of open competitive examinations or both open and promotional competitive examinations in the manner to be provided in the civil service rules and regulations. Eligibility for promotional examination shall be subject to civil service rules and regulations.

In promotional examinations where all applicants are employees of the City, civil service rules and regulations may provide for additional preferential credit based upon years of service to the City, such preferential credit not to exceed five percent of the maximum possible grade for such examination.

Appointment

Section 1007. Eligible Lists, Certification, and Appointment. Upon completion of any examination, the City Manager shall cause to be prepared and shall approve an eligible list with the persons who passed such examination being listed in relative order of the points they received, from highest to lowest. Such eligible list shall remain in effect for two calendar years unless within such period, the City Manager, or such person under the City Manager having charge of personnel administration, shall not be able to certify for appointment the number of persons required under the provisions of this Section.

Upon receipt of notice of a vacancy in the Competitive Service, the City Manager or such person under the City Manager having charge of personnel administration, shall certify to the appointing power the names of the three highest candidates on the eligible list for such position. The appointing power may appoint, of the three thus certified, whichever one in his opinion is best qualified for such position. No candidate may be certified more than three times for any one class or classified position from an eligible list resulting from any one examination.

If no eligible list for the classification exists, or an existing list for the classification contains less than the required three persons who are eligible and available for appointment, the City Manager, or such person under the City Manager having charge of personnel administration, shall so notify the appointing officer who may appoint one of the lesser number of persons or may make a temporary appointment to the vacancy, at his discretion. Such temporary appointment may not be for longer than ninety calendar days, nor may temporary appointments be

made to any positions for longer than one hundred and twenty working days in any one calendar year.

Upon appointment to a position in the Competitive Service, other than a temporary appointment, the person so appointed or promoted shall hold probationary status in such position and in the class to which it has been allocated. The duration of the period of probationary status shall be determined by the civil service rules and regulations provided for in this Article but in no instance shall extend over a period of more than one year. During such probationary period the employee may be rejected at any time without right of a hearing before the Personnel Board. When an employee has been retained continuously in probationary status for the required period, he shall achieve permanent status.

An employee rejected during the probationary period from a position to which he has been promoted shall be reinstated to the position from which he was promoted, unless he is dismissed from the service of the City in addition to the rejection, in which event he shall have the right of a hearing before the Personnel Board as to such order of dismissal in the manner prescribed in Section 1008 of this Article.

Section 1008. Suspensions, Demotions, Dismissals. The board or officers having appointive power are vested with the right to exercise the disciplinary and removal powers hereinafter provided.

An employee serving a probationary period in a position in the Competitive Service shall be subject to suspension without pay for a period not to exceed thirty days or to dismissal by the officer having the power of appointment, and the employee so disciplined or discharged shall not have a right of appeal, except that an employee who held permanent status in some other position or employment included within the Competitive Service immediately prior to his appointment to probationary status shall not be discharged from the service of the City without right of appeal to the Personnel Board in the manner prescribed in this Section.

An employee, other than one serving a probationary period, holding a position in the Competitive Service shall be subject to suspension without pay for a period not to exceed thirty days in any one calendar year, or to demotion, or to dismissal from his position and from the municipal service, subject to the right of hearing by or appeal to the Personnel Board as provided in this Article. Each or any of these actions relating to suspension, demotion, or dismissal may be taken by the officer having power of appointment to the position on the grounds of incompetency, inefficiency, dishonesty, misconduct, insubordination, failure to observe departmental or City rules or the rules and regulations as provided for in this Article, or failure to cooperate reasonably with his superiors or fellow employees.

Such employee shall be entitled to receive, upon his request, at the office of the board or officer taking such action, not later than the third business day thereafter, a written statement in

which shall be separately stated each of the charges against him upon which such suspension, demotion, or removal is based, a copy of which statement shall be filed by the appointing power bringing the charges with the Personnel Board, the Clerk of the Council, and the City Manager. The employee shall have ten days after receipt of such statement within which to file an answer to the charges should he desire to do so.

The answer shall be filed in the offices of the Personnel Board, the Clerk of the Council, and the City Manager. In his answer, or otherwise if no statement of charges has been made available to him as required, such employee may request a hearing by the Personnel Board to review such suspension, demotion, or dismissal which hearing shall be called and held in the manner provided for in the civil service rules and regulations. If a hearing is requested, the Personnel Board shall thereupon set a date for hearing the matter, which date shall not be sooner than five nor longer than ten days after the filing of the request for hearing. Hearings may be conducted informally and the rules of evidence need not apply. Such employee shall have an opportunity at such hearing to be heard in person or by counsel and the right to subpoena witnesses. All hearings held under the provisions of this Section shall be open to the public.

The Personnel Board shall make written findings which shall state as to each charge whether or not such charge is sustained. The Personnel Board shall also set forth in writing its conclusions and recommendation based upon such findings and within ten days after concluding the hearing, it shall certify its findings, conclusions, and recommendation to the board or officer from whose action the appeal was taken, and to the City Manager and the City Council.

If, with respect to a suspension, demotion, or dismissal, the Personnel Board shall conclude that the employee charged was not guilty of the act resulting in such suspension, demotion, or dismissal, a recommendation by it of reinstatement without loss of pay shall be binding upon the appointing power who forthwith shall order such reinstatement. In the event that the Personnel Board shall conclude that the employee was guilty of the act resulting in such suspension, demotion, or dismissal but that the penalty was not warranted under the circumstances, a recommendation by it of reinstatement with loss of pay shall be binding upon the appointing power who forthwith shall order such reinstatement with loss of pay. The conclusions and recommendations of the Personnel Board as to reinstatement with or without loss of pay shall be final and no appeal may be taken therefrom.

If, with respect to a suspension, demotion, or dismissal, the Personnel Board concludes that such suspension, demotion, or dismissal was warranted, any recommendation by it shall be advisory only and shall not be binding on the appointing power and, in such instance, the decision of the appointing power shall be final and no appeal may be taken therefrom.

Vacancies created under this Section may be filled by the appointing power by temporary appointment pending the completion of any proceedings taken hereunder.

A reduction in pay shall be treated as a demotion under this Section, unless the reduction in pay is part of a plan to reduce salaries and wages in connection with a general economy or curtailment program. A failure to grant an increase in pay at a time when an increase would otherwise have been granted as part of a plan to increase salaries and wages throughout the City service shall likewise be treated as a demotion under this Section.

Abolition of positions

Section 1009. Abolition of Positions, Lay-offs. No provisions of this Article shall be construed as interfering with the power of the City Council by stating in its proceedings its reasons therefor, to abolish a position, combine the duties of two or more positions, or reduce the number of employees in a given class except as specifically provided in Article VII of this Charter. Should an abolished position be renewed or a combined position be separated or any position or positions involving substantially the same duties be created or filled within two years, the employee or employees discharged shall be entitled to be appointed thereto.

All lay-offs occasioned by the abolishment of a position, the combination of duties of two or more positions, or the reduction in number of employees in a given class shall be governed by seniority in service and shall be in the reverse order of employment. Re-employment shall be in the reverse order of lay-offs.

Prohibited acts

Section 1010. Prohibitions. No person in a position, office, or employment in the service of the City of Santa Ana or who is an applicant for appointment thereto shall in any way be favored or discriminated against because of his race, religion, or political opinions.

No person holding any position in the service of the City, excepting elective officers and members of appointive boards and commissions, or on an eligible list, shall take an active part in any municipal political campaign in behalf of any candidate, or contribute thereto, nor shall such person seek signatures to any petition to advance the candidacy of any person for any municipal office. Nothing in this Section shall be construed to prevent any such persons from seeking election or appointment to public office. Upon becoming a candidate for public office, any such person shall request and be granted a leave of absence, without pay, to remain in effect during the period of time such person is a candidate.

No officer or employee of the City and no candidate for any City office shall, directly or indirectly, solicit any assessment, subscription, or contribution, whether voluntary or involuntary, for any political candidate, from anyone on an eligible list or holding any position in the service of the City, excepting elective officers and members of appointive boards and commissions.

No person shall willfully or through culpable negligence make any false statement, certificate, mark, rating, or report in regard to any application, test certification, or appointment held or made under the provisions of this Article or in any manner commit or attempt any fraud preventing the impartial execution of such provisions or of the rules and regulations made hereunder. In addition to the penalties provided for in this Charter for violations of its provisions, any person who by himself or with others willfully or corruptly violates any of the provisions of this Article shall upon conviction thereof be ineligible for a period of three years for employment in the service of the City and shall immediately forfeit his office or position if he be an officer or employee of the City.

Administrative contracts

Section 1011. Contract for Performance of Administrative Functions. The City Council, upon recommendation of the City Manager, may contract with the governing body of any other city or of any county within this state, or with any state department or other state agency for the preparing or conducting of competitive examinations for positions in the service of the City or for the performance of any other personnel administration service.

ways, alleys, avenues, highways, boulevards, concourses, drive- "The streets of the city"
ways, bridges, parks, parkways, and public grounds or waters within or belonging to the City.

Subject to the provisions of this Charter, the City Council shall have the power in behalf of the City to grant franchises or rights or make contracts providing for the furnishing of the City and its inhabitants with transportation, communication, terminal facilities, water, light, heat, power, refrigeration and storage, or any other public utility or service, or using the streets of the City for the operation of plants, works, or equipment for the furnishing thereof, or traversing any portion of the streets of the City for the transmitting or conveying of any such service elsewhere.

The City Council may grant a franchise to any person, firm, or corporation, whether operating under an existing franchise or not, and may prescribe the terms and conditions of any such grant. The City Council may also provide, by procedural ordinance, the method of procedure and additional terms and conditions for making such grants, subject to the provisions of this Charter.

No grant of any franchise may be transferred or assigned by the grantee except by consent in writing of the City Council and unless the transferee or assignee thereof shall covenant and agree to perform and be bound by each and all of the terms and conditions imposed in the grant or by procedural ordinance and by this Charter.

The City may issue permits for the construction of spur or side tracks in and over the streets of the City and the running of cars thereon for the purpose of connecting warehouses, factories, or other business industries and enterprises with any line of railroad within the City, upon such terms and subject to such regulations and conditions as shall be prescribed from time to time by ordinance. Such tracks shall be used for the transportation of freight only and shall not be used as a main line or part thereof. Such tracks must be laid and operated in such manner and under such restrictions as not to interfere with the use of the streets of the City by the public. All such permits shall be revocable at the pleasure of the City Council.

Section 1301. Franchises: Terms of Franchises. Every Terms
franchise shall state the term for which it is granted, which, unless it be indeterminate as provided for herein, shall not exceed twenty-five years.

A franchise grant may be indeterminate, that is to say, it may provide that it shall endure in full force and effect until the same, with the consent of the Public Utilities Commission or its successors of the State of California, or the Inter-State Commerce Commission as the case may be, shall be voluntarily surrendered or abandoned by its possessors, or until the State of California, or some municipal or public corporation, thereunto duly authorized by law, shall purchase by voluntary agreement or shall condemn and take, under the power of eminent domain, all property actually used and useful in the exercise

of such franchise and situate within the territorial limits of the State, municipal, or public corporation purchasing or condemning such property, or until the franchise shall be forfeited for noncompliance with its terms by the possessor thereof.

Section 1302. Franchises: Grants to Be in Lieu of All Other Franchises. Any franchise granted by the City with respect to any given utility service shall be in lieu of all other franchises, rights, or privileges owned by the grantee, or by any successor of the grantee to any right under such franchise, for the rendering of such utility service within the limits of the City as they may now or hereafter exist, except any franchise derived under Section 19 of Article XI of the Constitution of the State of California as said section existed prior to amendment thereof adopted October 10, 1911. The acceptance of any franchise hereunder, shall operate as an abandonment of all such franchise, rights, and privileges within the limits of the City as such limits shall at any time exist, in lieu of which such franchise shall be granted.

Any franchise granted hereunder shall not become effective until written acceptance thereof shall have been filed by the grantee thereof with the Clerk of the Council. Such acceptance shall be filed within thirty days after the adoption of the ordinance granting the franchise, or any extension thereof granted by the City Council, and when so filed, such acceptance shall constitute a continuing agreement of such grantee that if and when the City shall thereafter annex, or consolidate with, additional territory, any and all franchises, rights, and privileges owned by the grantee therein, except a franchise derived under said constitutional provision, shall likewise be deemed to be abandoned within the limits of such territory.

Resolution of intention, etc

Section 1303. Franchises: Resolution of Intention, Notice, and Public Hearing. Before granting any franchise, the City Council shall pass a resolution declaring its intention to grant the same, stating the name of the proposed grantee, the character of the franchise, and the terms and conditions upon which it is proposed to be granted. Such resolution shall fix and set forth the day, hour, and place when and where any persons having any interest therein, or any objection to the granting thereof, may appear before the City Council and be heard thereon. The City Council shall direct the Clerk of the Council to publish said resolution at least once within fifteen days of the passage thereof, in the official newspaper. The time fixed for such hearing shall not be less than twenty nor more than sixty days after the passage of said resolution. At the time set for the hearing, the City Council shall proceed to hear and pass upon all protests and its decision thereon shall be final and conclusive. Thereafter, it may grant, or deny, the franchise, subject to the right of referendum of the people.

Duties of grantees

Section 1304. Franchises: Duties of Grantees. By its acceptance of any franchise hereunder, the grantee shall covenant and agree to perform and be bound by each and all of the terms

and conditions imposed in the grant, or by procedural ordinance, and shall further agree to:

(a) Comply with all lawful ordinances, rules, and regulations theretofore or thereafter adopted by the City Council in the exercise of its police power governing the construction, maintenance, and operation of the grantee's plants, works, or equipment;

(b) Pay to the City on demand the cost of all repairs to the public property made necessary by any of the operations of the grantee under such franchise;

(c) Indemnify and hold harmless the City and its officers from any and all liability for damages proximately resulting from any operations under such franchise;

(d) Remove and relocate without expense to the City any facilities installed, used, and maintained under the franchise if and when made necessary by any lawful change of grade, alignment, or width of any public street, way, alley, or place that is not a freeway to which all rights of access have been acquired by the State of California, including the construction of any subway or viaduct, or if the public health, comfort, welfare, convenience, or safety so demands;

(e) Pay to the City during the life of the franchise a percentage, to be specified in the grant, of the gross annual receipts of the grantee within the limits of the City, or such other compensation as the City Council may prescribe in the grant.

Misdemeanor

Section 1305. Exercise of Privilege Without Franchise. The exercise by any person, firm, or corporation of any privilege for which a franchise is required, without possessing a valid and existing franchise therefor, shall be a misdemeanor and shall be punishable in the same manner as violations of this Charter are punishable and each day that such condition continues to exist shall constitute a separate violation.

Eminent domain

Section 1306. Eminent Domain. No franchise grant shall in any way, or to any extent, impair or affect the right of the City to acquire the property of the grantee thereof either by purchase or through the exercise of the right of eminent domain and nothing herein contained shall be construed to contract away or to modify or to abridge, either for a term or in perpetuity, the City's right of eminent domain with respect to any public utility.

City-owned utilities

Section 1307. City-owned Utilities. In the event that any public utility shall be taken over by the City, by purchase or through the exercise of the right of eminent domain, the franchise shall have no value.

No public utility owned by the City shall be sold, leased, or otherwise transferred unless authorized by the affirmative votes of two-thirds of the electors voting on such proposition at a general or special election at which such proposition is submitted.

Article XIV

Retirement

Retirement system

Section 1400. Employees' Retirement System. Plenary authority and power are hereby vested in the City, its City Council, and its several officers, agents, and employees to do and perform any act, or exercise any authority granted, permitted, or required under the provisions of the State Employees' Retirement Law, as it now exists or may hereafter be amended, to enable said City to continue as a contracting City participating in the state retirement system.

The City Council is directed to comply with all the provisions of the State Employees' Retirement Law, as now enacted, or as it may hereafter be amended, including the levy of all necessary taxes.

The City Council may terminate any such contract with the Board of Administration of the State Employees' Retirement System only under authority granted by ordinance adoption by a two-thirds vote of the electors of the City voting on such proposition at an election at which such proposal is presented.

PROPOSITION F

That the Charter of the City of Long Beach be amended by adding thereto a new section to be known as Section 260.8 and by amending Section 260 6, to read, respectively, as follows:

"Public Improvement Fund"

Sec. 260.8. The "Public Improvement Fund" is hereby created and established. Said fund shall be a continuing fund and not subject to transfer at the close of a fiscal year. Money placed therein shall be used exclusively for the payment of costs and expenses for the acquisition, construction, reconstruction, development, operation, repair and maintenance of public improvements and the acquisition of such lands, rights and property as may be necessary or convenient therefor. Except for the City's 1952-1953 fiscal year, no such use of such money shall be made unless provision therefor is made in the official budget of the City adopted by the City Council. Whether or not such provision is so made, none of such money shall be so used unless, prior thereto, a majority of those voting thereon vote in favor of a proposition, for each such use, submitted by the City Council at any City election wherein all City electors are entitled to vote. Such money, however, may be used without such prior approval of the electors and without the necessity of a provision therefor in any budget of the City, for payment of costs and expenses, for land subsidence remedial work, or to meet a public emergency caused by war, fire, flood, explosion, storm, earthquake, epidemic, riot or insurrection, if the City Council, by not less than a vote of two-thirds of all of the members thereof, declares the need for such land subsidence remedial work or declares the existence of such public emergency. In such event, the City Council may authorize the transfer of money from said fund to any other City fund or funds for such

subsidence remedial work or to meet such public emergency. Any such transfer shall be made by journal entry on the books of the City in a manner prescribed by the City Manager.

Within thirty days after the effective date of this section, the City Treasurer shall transfer to the "Public Improvement Fund" fifty per cent of all revenue derived by the City from oil, gas and other hydrocarbons, and fifty per cent of the interest, earnings, income and/or profits from investment of said revenue which is in the "Harbor Revenue Fund" on the date of such transfer. Within said thirty days, he shall also transfer to the "Public Improvement Fund" fifty per cent of all revenue in the "Harbor Reserve Fund" and the "Tideland Oil Fund" on the date of such transfer.

At least once each calendar month thereafter, the City Treasurer shall transfer to the "Public Improvement Fund" fifty per cent of all revenue derived by the City from oil, gas and other hydrocarbons and placed in the "Harbor Revenue Fund", which is not required by this Charter to be transferred from said "Harbor Revenue Fund" to the "Harbor Reserve Fund". He shall also transfer to the "Public Improvement Fund", at least once each calendar month thereafter, fifty per cent of all revenue, so derived, which is required by this Charter to be transferred to the "Harbor Reserve Fund" and fifty per cent of all revenue, so derived, which is required by this Charter to be placed in the "Tideland Oil Fund".

Revenue from development of hydrocarbons beneath city land

Sec. 260.6. Any and all money derived by the City of Long Beach from the development of oil, gas or other hydrocarbon substances from beneath all tidelands and submerged lands specified and described in those certain grants from the State of California to the City of Long Beach, to wit, 1911 Statutes, page 1304, 1925 Statutes, page 235, and 1935 Statutes, page 794, except from beneath such of said lands as are located within the Harbor District of the City of Long Beach as said district was bounded and described on May 1, 1946, shall be paid into the "Tideland Oil Fund". Money placed in the "Tideland Oil Fund", not required by this Charter to be transferred to the "Public Improvement Fund", shall be used exclusively for the purposes of establishing, constructing, maintaining and improving public parks, parkways, highways, playgrounds, and the construction, maintenance and operation of wharves, docks, piers, slips, quays and other utilities, structures and appliances necessary or convenient for the promotion and accommodation of commerce and navigation, as shall have been provided for in the official budget of the City adopted by the City Council; provided, however, such money may not be used and expended for any purpose in violation of the provisions of said grants from the State of California to the City of Long Beach.

Money remaining in the "Tideland Oil Fund" and not required by this Charter to be transferred therefrom, however, shall not be used for any of the aforesaid purposes unless, prior thereto, a majority of those voting thereon vote in favor of a proposition, for each such use, submitted by the City Council

at any City election wherein all City electors are entitled to vote. Such money, however, may be used without such prior approval of the electors and without the necessity of a provision therefor in the official budget of the City, for the payment of costs and expenses, for land subsidence remedial work, or to meet a public emergency caused by war, fire, flood, explosion, storm, earthquake, epidemic, riot or insurrection, if the City Council, by not less than a vote of two-thirds of all of the members thereof, declares the need for such land subsidence remedial work or declares the existence of such public emergency, provided, however, that such money shall not be used for any purpose in violation of the provisions of said grants from the State of California to the City of Long Beach.

Provided further, however, the sum of Two Hundred Fifty Thousand Dollars of the money remaining in said "Tideland Oil Fund" and not required by this Charter to be transferred therefrom, may be used each fiscal year for any purpose not in violation of said grants from the State of California to the City of Long Beach, as shall have been provided for in the official budget of the City, without prior approval of the electors of such use. If any or all of said sum of Two Hundred Fifty Thousand Dollars is not used within a fiscal year, the unused amount shall accumulate and shall likewise be available for such use in any succeeding fiscal year.

That the foregoing is a full, true and correct copy of said proposed amendment to the charter of the City of Long Beach, ratified by the electors of said City, as aforesaid, on file in the office of the City Clerk of said City of Long Beach.

IN WITNESS WHEREOF, Burton W. Chace, Mayor, as aforesaid, and Margaret L. Heartwell, City Clerk, as aforesaid, have hereunto set their hands and caused the corporate seal of the City of Long Beach to be thereunto duly affixed on this 26th day of December, 1952.

Limitation

Subd. (b). Whenever the Department shall exercise the power to borrow money pursuant to this section 229 the Board may authorize the issuance of bonds in any amount which, when added to the aggregate amount of (i) bonds of the Department outstanding at the time of the acceptance of a proposal for the purchase of the bonds so authorized and payable out of the revenue fund out of which the bonds so authorized are to be payable, and (ii) bonds of the City outstanding at that time and serviced out of that revenue fund, shall not exceed the amount of the surplus (including surplus arising from contributions in aid of construction) derived from the operation of the works to which that fund pertains, as of the end of the last fiscal year which ended not less than four months prior to the making of the finding and determination provided for in clause (1) of subdivision (a) of subsection 16 of this section 229.

Subd. (c). The limitation prescribed in subdivision (b) of this subsection 6 shall not be applicable to the issuance of any refunding bonds pursuant to this section 229, and the amount of any issue of such refunding bonds may equal, but shall not exceed, the amount required for the payment or redemption of the bonds to be refunded thereby, including the premiums, if any, due upon such redemption, but excluding any interest due upon such redemption.

Clause (1) — the amount of surplus (including surplus arising from contributions in aid of construction) derived from the operation of the works of the Department to which the revenue fund out of which such bonds are to be payable pertains, as of the end of the last fiscal year which ended not less than four months prior to the making of such finding and determination, and that the ascertainment of such surplus has been in accordance with sound accounting practice; provided, however, that such finding and determination need not be made in the case of the authorization of refunding bonds, or in any case where the voters have assented to the issuance of bonds in excess of the limitation specified in subdivision (b) of subsection 6 of this section 229;

Clause (2)—that the amount of bonds of the Department payable out of the revenue fund out of which such issue of bonds is to be payable and outstanding at the time of the acceptance of such proposal, plus the amount of bonds of the City serviced out of that revenue fund and outstanding at that time, does not exceed an amount stated in said finding and determination; subject, however, to the same proviso as in the next preceding clause (1);

Clause (5)—that upon the issuance of such bonds any and all acts, conditions and things required to exist, to happen and to be performed, precedent to and in the issuance thereof, will exist, will have happened and will have been performed, in due time, form and manner, as required by the Constitution and statutes of the State of California and this charter.

Subd. (b). The Board may also, by resolution, find and determine any other facts relevant to the legality of the issue.

Recital in resolution of issue

Subd. (c). The Board, by resolution adopted in connection with any issue of bonds pursuant to this section 229, may direct that there shall be included in each of the bonds of that issue a certification and recital that any and all acts, conditions and things required to exist, to happen and to be performed, precedent to and in the incurring of the indebtedness evidenced by that bond, and in the issuing of said bond, exist, have happened and have been performed in due time, form and manner, as required by the Constitution and statutes of the State of California and the charter of the City, and that said bond, together

with all other indebtedness of the Department and of the City pertaining to the municipal works for or on account of which the indebtedness evidenced by said bond was incurred, is within every debt and other limit prescribed by the Constitution and statutes of the State of California and the charter of the City.

Subd. (d). From and after the issuance of any issue of bonds the findings and determinations of the Board respecting that issue made pursuant to this subsection 16 shall be conclusive evidence of the existence of the facts so found and determined in any action or proceeding in any court in which the validity of such bonds is at issue, and no bona fide purchaser of any such bond containing the certification and recital permitted by this subsection 16 shall be required to see to the existence of any fact, or to the performance of any condition, or the taking of any proceeding, required prior to such issue, or to the application of the purchase price paid for such bonds. Evidence

Subd. (e). Bonds shall be deemed to be issued, within the meaning of this subsection 16 whenever the definitive bonds, or any temporary bonds or interim receipts exchangeable therefor, have been delivered to the purchasers thereof, and the purchase price thereof received, or in the case of bonds to be refunded through exchange, whenever such exchange has been made. Pledge of revenues

Section 142. Pledge of Net Parking Meter Revenues.

In addition to all other powers elsewhere enumerated in this Article, the City Council shall have power to pledge, place a charge upon, or otherwise make available and authorize payment of all or any part of the net revenues collected by the City from the establishment and operation of on-street parking meters within the City now owned or controlled or hereafter acquired or controlled by the City, for such periods of years as shall be determined by the City Council, for the payment of operation and maintenance costs of any one or more projects,

authorized by this Article or as security or further protection for the payment of principal of and interest on bonds issued pursuant to this Article.

Section 143. Issues of Bonds; Series and Divisions. The City Council may provide for one or several issues of bonds and may issue bonds in series, or may divide any issue into one or more series or divisions and fix different maturities or dates for each series or division, different rates of interest, or different terms and conditions for the bonds of the several series or divisions. It is not necessary that all bonds of the same authorized issue be of the same kind or character, have the same security, or be of the same interest rate, but the terms thereof shall in each case be provided for by the City Council by a resolution of issue at the time of or prior to the issue thereof. Bond issues

Section 144. Authorization of Revenue Bonds. Each issue of revenue bonds shall be authorized by the City Council by a resolution of issue adopted by affirmative votes of at least five (5) members of the City Council at a duly assembled meeting. Authorization

Section 145. Resolutions of Issue. Resolutions of issue shall provide for the aggregate principal amount, date or dates, maturities, interest rates, denominations and form, and may provide for the registration, transfer and interchange, of any revenue bonds and coupons issued pursuant to this Article; and shall prescribe the purpose or purposes for which said bonds are to be issued and the terms and conditions on which said bonds are to be executed, issued, secured, sold and paid, and, if desired, the terms and conditions on which said bonds may be redeemed prior to maturity or refunded. Resolution

Section 146. Provisions Relating to Bonds. The following provisions shall govern and apply to (a) all revenue bonds issued pursuant to this Article and (b) each resolution of issue relating to the bonds thereby authorized; General provisions

(1) Date of Bonds. Bonds shall bear dates prescribed by the resolution of issue.

(2) Maturity. Bonds may be serial bonds or sinking fund bonds with such maturities as shall be provided in the resolution of issue. No bond by its terms shall mature in more than forty (40) years from its own date and, in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date of each such series or division shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized.

(3) Interest. Bonds shall bear interest at a rate of not to exceed six (6) per cent per annum, payable annually or semiannually, or in part annually and in part semiannually.

(4) Coupon or Registered Bonds. Bonds may be issued as coupon bonds or as registered bonds. A resolution of issue may provide for the interchange of coupon bonds for registered bonds and registered bonds for coupon bonds, and may provide that the bonds shall be registered as to principal only, or as

to both principal and interest, or otherwise as the resolution of issue shall prescribe.

(5) Redemption. Bonds may be callable upon such terms and conditions and upon such notice as the resolution of issue shall prescribe and upon payment of such premium (not exceeding six per cent (6%) of the par value of such bonds) as may be fixed in the resolution of issue. No bond shall be subject to call or redemption prior to its fixed maturity date, unless the right to exercise such call is expressly stated on the face of the bond.

(6) Source of Payment. All revenue bonds shall be payable exclusively from revenues.

(7) Reference on Bonds to Resolution of Issue. Reference on the face of a revenue bond to the resolution of issue by its date of adoption is sufficient to incorporate all of the provisions thereof and of this Article into the body of said revenue bond and its appurtenant coupons. Each taker and subsequent holder of a revenue bond or coupons, whether such coupons are attached to or detached from said revenue bond, shall have recourse to all of the provisions of the resolution of issue and of this Article and shall be bound thereby.

(8) Recital in Bonds. All revenue bonds shall contain a recital on their face that neither the payment of principal of nor of interest on such bonds constitutes a debt, liability or obligation of the City of San Jose, except as provided in this Article.

(9) Place and Manner of Payment. The principal of and interest on bonds may be paid at any one or more places within or without the State of California and in any specified coin or currency of the United States of America, as may be provided in the resolution of issue.

(10) Execution and Authentication of Bonds; Validity of Signatures and Counter-signatures. Bonds may be executed and authenticated by the manual, lithographed or printed facsimile signature of any officer or officers of the City and may also be authenticated by a trustee of fiscal agent appointed by the City Council. If any of the officers whose signatures or countersignatures appear on the bonds cease to be officers before the delivery of the bonds or coupons to the purchasers thereof, their signatures or countersignatures shall nevertheless be valid and of the same force and effect as if such officers had remained in office until the delivery of the bonds and coupons.

(11) Issuance of Temporary Bonds. Pending the actual issuance or delivery of definitive bonds, the City Council may issue temporary or interim bonds, certificates or receipts of any denominations whatsoever, and with or without coupons, and with such provisions as the City Council shall determine, to be exchanged for definitive bonds when ready for delivery. In the absence of an express recital on its face that a temporary bond or interim receipt is non-negotiable, such bond or interim receipt is a negotiable instrument.

(12) Replacement of Lost, Destroyed, Mutilated or Stolen Bonds. Lost, destroyed, mutilated or stolen bonds or coupons may be replaced as provided in the resolution of issue.

(13) Security. All revenue bonds shall be secured by an exclusive pledge and charge upon (a) all or a portion of the gross revenues of the project for the acquisition, construction and completion of which said bonds are issued or authorized to be issued, (b) revenues from on-street parking meters, and (c) all or a portion of revenues of any existing off-street vehicular parking facilities operated or controlled by the City, all as provided for in the resolution of issue, provided, however, the Council may in its resolution of issue elect not to pledge or place a charge upon the revenues of said existing off-street vehicular parking facilities operated or controlled by the City. Gross revenues of a project include improvements and extensions of such project later constructed or acquired. The gross revenues of the project, any interest earned on the gross revenues of the project, and all pledged on-street parking meter revenues and pledged revenues of said existing off-street vehicular parking facilities shall constitute a trust fund for the security and payment of the principal of and interest on the bonds and so long as any bonds or interest thereon are unpaid said revenues and interest shall not be used for any other purpose; provided, however, that a resolution of issue may provide that if the principal of and interest on the bonds and all charges to protect and secure them are paid when due, an amount for the maintenance and operation costs of the project may be apportioned from revenues, but only to the extent specified in the resolution of issue.

(14) Bonds of Same Issue to be Equally Secured. Bonds of the same issue shall be equally secured by a pledge and charge upon revenues, without priority for number, date of bonds, of sale, or execution, or of delivery; except that if the City Council authorizes the issuance of bonds of different series it may provide that the bonds in any series shall, to the extent and in the manner prescribed in the resolution of issue, be subordinated and be junior in standing with respect to the payment of principal and interest and the security thereof to such other bonds as may be specified in the resolution of issue.

(15) Refunding Bonds. The City Council may provide for the issuance, sale or exchange of refunding bonds for the purpose of redeeming, retiring or refunding any revenue bonds issued under this Article, subject to any limitations contained in the resolution of issue pursuant to which such revenue bonds are issued. All provisions of this Article applicable to the issuance of revenue bonds shall be applicable to the refunding bonds and to the issuance, sale or exchange thereof.

(16) Amount of Refunding Bonds. Refunding bonds may be issued in a principal amount sufficient to provide funds for the payment of all bonds to be refunded thereby, and, in addition, for the payment of all expenses incident to the calling, retiring or paying of such outstanding bonds and the issuance

of such refunding bonds. Such expenses may include the difference in amount between the par value of the refunding bonds and any amount less than par for which the refunding bonds are sold, any amount necessary to be made available for the payment of interest upon such refunding bonds from the date of sale thereof to the date of payment of the bonds to be refunded, or to the date upon which the bonds to be refunded will be paid pursuant to call thereof or agreement with the holders thereof, and also the premium, if any, necessary to be paid in order to call and retire the outstanding bonds and the interest accruing thereon to the date of call or retirement.

(17) Validity of Bonds Not Affected by Actions of City Relative to Project. The validity of the authorization and issuance of any revenue bonds by the City Council shall not be dependent on or affected in any way by:

(a) Proceedings taken by the City for the acquisition, construction or completion of any project or any part thereof;

(b) Any contracts made in connection with the acquisition, construction or completion of any project; or

(c) The failure to complete any project for which bonds are authorized to be issued.

Sale

Section 147. Sale of Bonds. Before selling any bonds the City Council shall give notice inviting sealed bids in such manner as the City Council may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder. If no bids are received or if the City Council determines that the bids received are not satisfactory as to price or responsibility of the bidders, the City Council may reject all bids received, if any, and either readvertise or sell the bonds at private sale.

Section 148. Sale Below Par. The City Council may sell bonds at a price below the par or face value thereof, provided that the maximum net interest cost (computed on a 360-day year basis) on bonds sold below par or face value shall not exceed an average of six per cent (6%) per annum, payable semi-annually, to the respective maturity dates of said bonds.

Expenses and interest

Section 149. Payment of Incidental Expenses and Interest and Creation of Funds from Proceeds of Sale of Bonds. All costs and expenses incidental to the issuance and sale of bonds, including the cost of preparation of the bonds and coupons, the cost of all surveys, of preparation of plans and specifications, of all architectural, engineering, inspection, legal, trustee's and fiscal agent's fees, the creation of a bond reserve fund, the creation of a working capital fund, and bond interest estimated to accrue during the period of acquisition or construction of a project and for a period of not to exceed six (6) months thereafter, all as provided for in the resolution of issue, may be paid out of the proceeds of sale of the bonds.

A resolution of issue may provide that the City Council will prescribe, revise and collect rates, fees and charges for use of the facilities provided by the project acquired, constructed or completed from the proceeds of sale of the bonds issued pursuant to such resolution of issue, or for any services rendered in connection with such project, and for use of any on-street parking meters and off-street vehicular parking facilities any revenues from which are pledged to secure the bonds; that such rates, fees and charges shall at all times be sufficient to yield revenues from the project and net revenues from such on-street parking meters and existing off-street vehicular parking facilities equal to all redemption payments and interest charges on said bonds as the same fall due, together with such additional sums as may be required for any sinking fund, reserve fund or other special fund provided for the security or further protection of said bonds, or as a depreciation charge or other charge in connection with such project; and that such rates, fees and charges shall not be reduced below an amount sufficient to provide funds to meet all obligations specified in the resolution of issue.

(8) Limitations Upon Power to Encumber Project. A resolution of issue may limit, restrict or prohibit, except upon such terms and conditions as may be provided therein, any right, power or privilege of the City to mortgage or otherwise encumber, or to sell, lease or dispose of a project or to enter into any lease or agreement which impairs or impedes the operation of a project or of any part thereof necessary to provide adequate revenues, or which otherwise impairs or impedes the rights of the holders of the bonds with respect to such revenues.

(9) Proceeds of Project Taken by Eminent Domain. A resolution of issue may provide that if any part of a project shall be taken by eminent domain or other proceeding authorized by law, the proceeds to the City therefrom shall be applied to the replacement of such project or to the payment and retirement of the bonds issued pursuant to such resolution of issue, or as otherwise set forth in said resolution of issue.

A resolution of issue may authorize the City to designate any bank or trust company in any city in which any bonds are made payable as the City's paying agent in such city. A resolution of issue may fix and determine the conditions upon which any trustee, fiscal agent or paying agent shall receive, hold or disburse any or all revenues deposited with it by or by authority of the City or the City Council. A resolution of issue may prescribe the duties and powers, if any, of any such trustee, fiscal agent or paying agent with respect to the issuance, authentication, sale and delivery of the bonds, the payment of the principal thereof and interest thereon, the redemption thereof, the registration and discharge from registration of bonds and the management of any funds provided for in the resolution of issue as security for the bonds.

(16) Amendment or Modification of Resolution of Issue. A resolution of issue may prescribe procedure by which its terms and conditions may be subsequently amended or modified with the consent of the City and the vote or written assent of the holders of a specified principal amount or proportion of the bonds issued and outstanding, including

CHAPTER 38

Assembly Joint Resolution No. 4—Relative to requesting the Fish and Wildlife Service of the United States Department of the Interior to establish a special season for the taking of migratory game birds.

[Filed with Secretary of State January 20, 1953]

Migratory game birds season

WHEREAS, Wild geese, widgeons, and coots are migratory game birds, the taking of which is regulated by the United States pursuant to certain treaties with Mexico and Canada in accordance with the Federal Migratory Bird Treaty Act; and

WHEREAS, The Migratory Bird Treaty Act is administered by the Fish and Wildlife Service of the United States Depart-

ment of the Interior and said service is authorized to fix the seasons during which migratory birds may be taken; and

WHEREAS, The current seasonal migration of wild geese, widgeons, and coots is somewhat later than usual and the open season prescribed for the taking of wild geese, widgeons, and coots has expired with the result that great numbers of widgeons are descending upon and devouring the growing lettuce and other green crops in the Imperial and Coachella Valleys and great numbers of wild geese and coots are descending upon and devouring the barley, alfalfa, and other green crops in the San Joaquin Valley and the Sacramento Valley; and

WHEREAS, The fact that the birds may not be shot at results in their remaining in flocks so that an entire flock will land on one field and completely destroy the crop growing thereon which is far more burdensome on the individual farmer than the depredations of the birds when they are scattered as they are during the open seasons; and

WHEREAS, It is estimated that the total loss from such depredations during the current growing season may exceed millions of dollars and that such loss could be greatly reduced if the birds could be shot at; and

WHEREAS, The establishment of a special season for wild geese and coots in the San Joaquin Valley and the Sacramento Valley and for widgeons in the Imperial and Coachella Valleys would keep the birds scattered, tend to drive them to the refuges and feeding grounds provided for them, and eliminate the destruction of entire fields of crops of the individual farmers concerned; and

WHEREAS, The establishment of such special seasons on wild geese, widgeons, and coots is urgently necessary to prevent great and irreparable loss to the farmers of this State; now, therefore, be it

Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California hereby urgently requests the Director of the Fish and Wildlife Service of the United States Department of the Interior to take immediate steps to provide for an open season on widgeons in the Imperial and Coachella Valleys and an open season on wild geese and coots in the San Joaquin Valley and the Sacramento Valley in the State of California, said open seasons to cover the remaining portion of January and all of February, 1953; and be it further

WHEREAS, Such practice has been sufficiently widespread to be of a major concern to the apparel industry of California and is injurious to other California industries which use the name "California" on their labels; and

WHEREAS, Under the federal law (15 U.S.C.A. Sec. 1125) any person who affixes or uses in connection with any goods or services a false designation of origin and with knowledge of such falsity causes or procures the same to be transported or used in commerce is liable to a civil action by any person doing business in the locality falsely indicated as that of origin or by any person who believes that he is or is likely to be damaged by the use of such false description or representation; and

WHEREAS, Lawsuits instituted for the purpose of enjoining such activities and for the collection of damages suffered thereby are costly, lengthy, and in many cases unsuccessful due to the difficulty of proof required; and

WHEREAS, The Federal Trade Commission has in some instances, under its power to prohibit unfair methods of competition, investigated such activities; and

WHEREAS, It is felt by the Legislature of the State of California that this is the most proper and efficient method of controlling such unfair activities and that the Federal Trade Commission should, with renewed vigor, continue its patrol of such offenses and in proper cases issue cease and desist orders; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Federal Trade Commission be respectfully requested to henceforth investigate all instances of the use of the word "California" on labels by firms in the apparel industry other than those who actually manufacture such apparel in California and, in the proper cases, issue cease and desist orders; and be it further

The legislative body of said City of Riverside did, within fifteen days after filing such proposed Charter, cause it to be published once in the said Riverside Daily Press, and caused copies of such Charter to be printed in convenient pamphlet form and in type of not less than 10-point, and caused such copies to be mailed to each of the qualified electors of said City; and said legislative body caused a notice to be advertised in said Riverside Daily Press that copies of said Charter could be had upon application therefor at the office of the City Clerk of said City. That said Charter was published in all editions of said Riverside Daily Press on the 8th day of July, 1952; and that said notice that copies of said Charter were available was published in every edition of said newpaper published during the period beginning on the 8th day of July, 1952, and ending on the 16th day of September, 1952. duly mailed to each of the voters in the said City during the period of time beginning July 17, 1952, and ending August 1, 1952. On the 5th day of August, 1952, the legislative body of the City of Riverside, California, by the affirmative vote of seven members of the Council, passed and adopted Ordinance No. 1778 called a special municipal election to be held in said City on the 16th day of September, 1952, for the purpose of submitting to the qualified voters of said City of Riverside the proposition "Shall the proposed Charter of the City of Riverside, which was prepared and proposed by a duly elected Board of Freeholders and filed in the office of the City Clerk on June 24, 1952, be ratified and adopted?"; and consolidating said special municipal election with the municipal primary election to be held in said City on said date. That notice of said election and of said ordinance was duly published in said Riverside Daily Press on August 13, 1952. Notice of the measures to be voted on at said special municipal election consolidated was published in said Riverside Daily Press on September 2nd, and September 9th, 1952.

The said Board of Freeholders fixed Tuesday, September 16th, 1952, as the date of the election at which said proposed charter should be submitted to the electors of said City of Riverside.

That on the 16th day of September, 1952, the said special municipal election, consolidated with the municipal primary election, was duly held and conducted in said City of Riverside, and the voters voted on the measure "Shall the proposed Charter of the City of Riverside, which was prepared and proposed by a duly elected Board of Freeholders and filed in the office of the City Clerk on June 24, 1952, be ratified and adopted?". The governing body of said City of Riverside, being the Mayor and Council, met at their usual place of meeting on the 23rd day of September, 1952, and canvassed the returns of said special municipal election consolidated, and it was found and determined that there were 8,845 votes for the ratification of the Charter and 4656 votes against the ratification of the Charter. In addition to all other powers elsewhere enumerated in this Article, the Council shall have power to pledge, place a charge upon, or otherwise make available and authorize payment of all or any part of the net revenues collected by the City from the establishment and operation of (i) on-street parking meters within the City now owned or controlled or hereafter acquired or controlled by the City, and (ii) existing off-street parking facilities, for such periods of years as shall be determined by the Council, for the payment of operation and maintenance costs of any one or more projects authorized by this Article or as security or further pro-

Bond issues

Section 5. Issues of Bonds; Series and Divisions The Council may provide for one or several issues of bonds and may issue bonds in series, or may divide any issue into one or more series or divisions and fix different maturities or dates for each series or division, different rates of interest, or different terms and conditions for the bonds of the several series or divisions. It is not necessary that all bonds of the same authorized issue be of the same kind or character, have the same security, or be of the same interest rate, but the terms thereof shall in each case be provided for by the Council by a resolution of issue at the time of or prior to the issue thereof.

Resolutions of issue

Section 7. Resolutions of Issue Resolutions of issue shall provide for the aggregate principal amount, date or dates, maturities, interest rates, denominations and form, and may provide for the registration, transfer and interchange, of any revenue bonds and coupons issued pursuant to this Article; and shall prescribe the purpose or purposes for which said bonds are to be issued and the terms and conditions on which said bonds are to be executed, issued, secured, sold and paid, and, if desired, the terms and conditions on which said bonds may be redeemed prior to maturity or refunded.

Bonds

Section 8. Provisions Relating to Bonds. The following provisions shall govern and apply to (a) all revenue bonds issued pursuant to this Article, and (b) each resolution of issue relating to the bonds thereby authorized:

(1) Date of Bonds. Bonds shall bear dates prescribed by the resolution of issue.

(2) Maturity. Bonds may be serial bonds or sinking fund bonds with such maturities as shall be provided in the resolution of issue. No bond by its terms shall mature in more than forty (40) years from its own date, and, in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date of each such series or division shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized issue.

(3) Interest. Bonds shall bear interest at a rate of not to exceed six (6) per cent. per annum, payable annually or semi-annually, or in part annually and in part semi-annually.

(4) Coupon or Registered Bonds Bonds may be issued as coupon bonds or as registered bonds. A resolution of issue may provide for the interchange of coupon bonds for registered bonds and registered bonds for coupon bonds, and may provide that the bonds shall be registered as to principal only, or as to both

principal and interest, or otherwise as the resolution of issue shall prescribe.

(5) Redemption. Bonds may be callable upon such terms and conditions and upon such notice as the resolution of issue shall prescribe and upon payment of such premium (not exceeding six per cent. (6%) of the par value of such bonds) as may be fixed in the resolution of issue. No bond shall be subject to call or redemption prior to its fixed maturity date, unless the right to exercise such call is expressly stated on the face of the bond.

(6) Source of Payment. All revenue bonds shall be payable exclusively from revenues.

(7) Reference on Bonds to Resolution of Issue. Reference on the face of a revenue bond to the resolution of issue by its date of adoption is sufficient to incorporate all of the provisions thereof and of this Article into the body of said revenue bond and its appurtenant coupons. Each taker and subsequent holder of a revenue bond or coupons, whether such coupons are attached to or detached from said revenue bond, shall have recourse to all of the provisions of the resolution of issue and of this Article and shall be bound thereby.

(8) Recital in Bonds. All revenue bonds shall contain a recital on their face that neither the payment of principal of nor of interest on such bonds constitutes a debt, liability or obligation of the City of Richmond, except as provided in this Article.

(9) Place and Manner of Payment. The principal of and interest on bonds may be paid at any one or more places within or without the State of California and in any specified coin or currency of the United States of America, as may be provided in the resolution of issue.

(10) Execution and Authentication of Bonds; Validity of Signatures and Countersignatures. Bonds may be executed and authenticated by the manual, lithographed or printed facsimile signature of any officer or officers of the City and may also be authenticated by a trustee or fiscal agent appointed by the Council If any of the officers whose signatures or countersignatures appear on the bonds ceases to be such officer before the delivery of the bonds or coupons to the purchasers thereof, such signature or countersignature shall nevertheless be valid and of the same force and effect as if such officer had remained in office until the delivery of the bonds and coupons.

(11) Issuance of Temporary Bonds. Pending the actual issuance or delivery of definitive bonds, the Council may issue temporary or interim bonds, certificates or receipts of any denominations whatsoever, and with or without coupons, and with such provisions as the Council shall determine, to be exchanged for definitive bonds when ready for delivery. In the absence of an express recital on its face that a temporary bond or interim receipt is non-negotiable, such bond or interim receipt is a negotiable instrument.

(12) Replacement of Lost, Destroyed, Mutilated or Stolen Bonds. Lost, destroyed, mutilated or stolen bonds or coupons may be replaced as provided in the resolution of issue.

(13) Security. All revenue bonds shall be secured by an exclusive pledge and charge upon (a) all or a portion of the gross revenues of the project for the acquisition, construction and completion of which said bonds are issued or authorized to be issued, (b) revenues from on-street parking meters, and (c) revenues of any existing off-street parking facilities, all as provided for in the resolution of issue. Gross revenues of a project include improvements and extensions of such project later constructed or acquired. The gross revenues of the project, any interest earned on the gross revenues of the project, and all pledged on-street parking meter revenues and pledged revenues of existing off-street parking facilities shall constitute a trust fund for the security and payment of the principal of and interest on the bonds and so long as any bonds or interest thereon are unpaid said revenues and interest shall not be used for any other purpose; provided, however, that a resolution of issue may provide that if the principal of and interest on the bonds and all charges to protect and secure them are paid when due, an amount for the maintenance and operation costs of the project may be apportioned from revenues, but only to the extent specified in the resolution of issue.

(14) Bonds of Same Issue to Be Equally Secured. Bonds of the same issue shall be equally secured by a pledge and charge upon revenues, without priority for number, date of bonds, of sale, of execution, or of delivery; except that if the Council authorizes the issuance of bonds of different series it may provide that the bonds in any series shall, to the extent and in the manner prescribed in the resolution of issue, be subordinated and be junior in standing with respect to the payment of principal and interest and the security thereof to such other bonds as may be specified in the resolution of issue.

(15) Refunding Bonds. The Council may provide for the issuance, sale or exchange of refunding bonds for the purpose of redeeming, retiring or refunding any revenue bonds issued under this Article, subject to any limitations contained in the resolution of issue pursuant to which such revenue bonds are issued. All provisions of this Article applicable to the issuance of revenue bonds shall be applicable to the refunding bonds and to the issuance, sale or exchange thereof.

(16) Amount of Refunding Bonds. Refunding bonds may be issued in a principal amount sufficient to provide funds for the payment of all bonds to be refunded thereby, and, in addition, for the payment of all expenses incident to the calling, retiring or paying of such outstanding bonds and the issuance of such refunding bonds. Such expenses may include the difference in amount between the par value of the refunding bonds and any amount less than par for which the refunding bonds are sold, any amount necessary to be made available for the payment of interest upon such refunding bonds from the date of

sale thereof to the date of payment of the bonds to be refunded, or to the date upon which the bonds to be refunded will be paid pursuant to call thereof or agreement with the holders thereof, and also the premium, if any, necessary to be paid in order to call and retire the outstanding bonds and the interest accruing thereon to the date of call or retirement.

(17) Validity of Bonds Not Affected by Actions of City Relative to Project. The validity of the authorization and issuance of any revenue bonds by the Council shall not be dependent on or affected in any way by:

(a) Proceedings taken by the City for the acquisition, construction or completion of any project or any part thereof;

(b) Any contracts made in connection with the acquisition, construction or completion of any project; or

(c) The failure to complete any project for which bonds are authorized to be issued.

Section 9. Sale of Bonds. Before selling any bonds the Council shall give notice inviting sealed bids in such manner as the Council may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder. If no bids are received or if the Council determines that the bids received are not satisfactory as to price or responsibility of the bidders, the Council may reject all bids received, if any, and either readvertise or sell the bonds at private sale.

Section 10. Sale Below Par. The Council may sell bonds at a price below the par or face value thereof, provided that the maximum net interest cost (computed on a 360-day year basis) on bonds sold below par or face value shall not exceed an average of six per cent. (6%) per annum, payable semi-annually, to the respective maturity dates of said bonds. Sale of bonds

Section 11. Payment of Incidental Expenses and Interest and Creation of Funds From Proceeds of Sale of Bonds. All costs and expenses incidental to the issuance and sale of bonds, including the cost of preparation of the bonds and coupons, the cost of all surveys, of preparation of plans and specifications, of all architectural, engineering, inspection, legal, financial and economic consultant's, trustee's and fiscal agent's fees, the creation of a bond reserve fund, the creation of a working capital fund, and bond interest estimated to accrue during the period of acquisition or construction of a project and for a period of not to exceed six (6) months thereafter, all as provided for in the resolution of issue, may be paid out of the proceeds of sale of the bonds. Payment of costs

Senate Joint Resolution No. 5—Relative to the proposal of the Federal Communications Commission to withdraw radio-telegraph frequencies used by the California State Department of Agriculture in its Federal-State Market News Service.

[Filed with Secretary of State, April 8, 1953]

WHEREAS, Further notice of a proposed rule-making by the Federal Communications Commission, dated September 17, 1952, has been received following the adoption by this Legislature of Senate Joint Resolution No. 1 (Res. Chap. 15) at the 1952 Second Extraordinary Session and in said further notice the commission continues to propose that by amendment to its rules certain uses by the domestic fixed service of frequencies below 25 megacycles are to be deleted, thereby discontinuing such uses by the California Department of Agriculture in cooperation with the United States Department of Agriculture; and Discontinuance of Federal-State Market News Service radio-telegraph frequencies

WHEREAS, Such discontinuance would cause undue hardship in the disruption of the efficient radio-telegraph communications system used within this State for its Federal-State Market News Service for the past 25 years; and

WHEREAS, Congress, by the Flood Control Act of December 22, 1944, as amended by the Flood Control Act of May 17, 1950, has authorized remedial flood control works as a part of a project referred to as "Sacramento River, Major and Minor Tributaries" for construction in cooperation with the State of California, which would afford protection to the people in this area; and

WHEREAS, The California Legislature has, by the State Water Resources Act of 1945, authorized the works contemplated by Congress; and

WHEREAS, Congress has made nine hundred forty-six thousand dollars ($946,000) available to accomplish authorized work on the lower reaches of Butte Creek, which work has been completed; and

WHEREAS, It is estimated that seven hundred thousand dollars ($700,000) of additional federal funds will be required to complete the authorized works on the upper reaches of Butte Creek and the diversion structure on Little Chico Creek; and

WHEREAS, The Legislature of California has made available all funds necessary to carry out the State's participation in the construction of the works; and

WHEREAS, The additional work contemplated by the congressionally authorized project is necessary if more than minimum protection is to be afforded to the residents in the area concerned; and

WHEREAS, The State Water Resources Board has included in its recommendation to Congress for federal flood control funds for the 1954 Fiscal Year, sufficient funds to complete the flood control works on the Butte and Little Chico Creeks, thus recognizing its importance to the welfare and safety of the people of this State; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That Rule 41 be added to the Joint Rules of the Senate and Assembly for the 1953 Regular Session of the California Legislature, to read:

CHAPTER 88

Senate Concurrent Resolution No. 48—Relative to administration of the Unemployment Insurance Act.

[Filed with Secretary of State, April 10, 1953]

Hay baling as agricultural labor

WHEREAS, The baling of hay by a farmer or his employees, whether on his own land or on the farm of his neighbor, has traditionally been regarded as agricultural labor in this State; and

WHEREAS, Services performed in connection with such hay baling were intended to be exempt from the Unemployment Insurance Act as agricultural labor; and

WHEREAS, Because of the Department of Employment's numerous changes of position on what constitutes "agricultural

labor" and the consistent inconsistency of the department's interpretation of the "agricultural labor" exemption, the Legislature in 1949 enacted 7.3 of the Unemployment Insurance Act to ensure that hay baling by a farmer or his employees would continue to be regarded as "agricultural labor," while leaving for judicial determination the question of whether hay baling performed by persons other than a farmer or his employees constituted agricultural labor; and

WHEREAS, Such action by the Legislature was intended to state the existing law in terms so plain the department could not deviate therefrom, rather than to change the law; and

WHEREAS, It now appears that the department has seized upon this 1949 statute as an indication that hay baling by a farmer or his employees was not agricultural labor prior to 1949, and has within the past year levied assessments based on such hay baling services performed prior to 1949 and in some cases extending as far back as 1943; and

WHEREAS, In enacting Section 45.1 of the Unemployment Insurance Act, providing in part that actions filed by the department to collect contributions must be commenced "within three years after any amount shown to be due in _____ any assessment made by the commission becomes delinquent," the Legislature intended to impose a three-year statute of limitation commencing with the date the contributions would have become delinquent if reported or assessed at the time the contributions were due, and the department is wilfully failing to give effect to said legislative intent; and

WHEREAS, Not only is the department's ruling that such services were not "agricultural labor" prior to 1949 a direct and flagrant violation of the legislative intent mentioned above, but the attempt now to assess and collect taxes based on wages paid 10 years ago is a bureaucratic act contrary to every principle of equity, good conscience and common decency; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Department of Employment be requested to recognize the fact that hay baling by a farmer or his employees is, and always has been, both traditionally and within the intent of the Legislature, agricultural labor; and be it further

Resolved, That the department be requested to give effect to such tradition and intent by reversing its erroneous interpretation of the agricultural labor exemption and canceling the erroneous, unjust and unconscionable assessments mentioned above; and be it further

Resolved, That irrespective of any other action the department is requested to adopt a policy denying retroactive effect to any rule, regulation or interpretation issued by it which would change the scope of the "agricultural labor" exemption and result in contributions or increased contributions becoming due under the act; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the Director of Employment, to each member of the Unemployment Insurance Appeals Board, and to the Governor.

CHAPTER 89

Senate Joint Resolution No. 17—Relative to motor vehicle fuel taxes collected by the Federal Government.

[Filed with Secretary of State, April 10, 1953.]

Use of federal motor vehicle fuel tax revenues

WHEREAS, A critical need exists for immediate modernization of the highways of the Nation for the security and economic welfare of the people; and

WHEREAS, Additional funds are sorely needed to accomplish this vital improvement of our highways; and

WHEREAS, The Federal Government is imposing taxes on motor vehicle fuels for general purposes, constituting an invasion of a tax resource that might better be reserved to the states which have demonstrated their ability to collect motor vehicle fuels taxes effectively and economically; and

WHEREAS, The general principle that revenues collected from highway users as such should be expended for their benefit on the highways, roads and streets is recognized by the Federal Government in its dealings with the states but is violated by the Federal Government in its own fiscal policy; and

WHEREAS, In the interests of the national economy and defense it is desirable that federal aid for highways should, at the very least, equal the amount of motor vehicle fuels taxes collected by the Federal Government; now, therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of California urgently requests the Federal Government to abandon the field of excise taxes on motor fuels or, in the alternative, to provide that the amount of federal aid for highways be increased at least to the amount of motor vehicle fuels taxes collected by the Federal Government, and that such increase in federal aid be distributed among the individual states in proportion to the amount of motor vehicle fuels taxes collected in such states; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President of the Senate, the Speaker of the House of Representatives and to each Senator and Representative from California in the Congress of the United States.

CHAPTER 90

Senate Joint Resolution No. 26—Relative to submerged lands.

[Filed with Secretary of State, April 10, 1953.]

Ownership of submerged land

WHEREAS, The several states have from their inception claimed and exercised full ownership and control of the lands and resources beneath both inland and offshore waters within their historic boundaries; and

WHEREAS, The several states, including many municipalities, public port authorities and private individuals acting under authority granted by the states, have spent enormous sums of money reclaiming and improving these lands and natural resources relying on the validity of their titles; and

WHEREAS, Under this state and local control the constitutional powers delegated by the states to the Federal Government respecting national defense, navigation, commerce and international relations have in no way been impaired; and

WHEREAS, In three separate lawsuits brought by the United States against California, Texas and Louisiana, the U. S. Supreme Court held that these states had no rights of ownership in the so-called marginal sea belt or the lands and resources beneath it; and

WHEREAS, The Supreme Court also held that the Federal Government has paramount rights in and full dominion and power over the submerged lands and resources beneath this marginal sea belt by which it can take, without compensating the owners, any resources of value that might be discovered; and

WHEREAS, These decisions overrule earlier decisions and are contrary to the spirit of the Fifth Amendment to the Constitution which prohibits taking private property for public use without just compensation and the Tenth Amendment which protects the sovereignty and rights of the several states; and

WHEREAS, This "paramount rights" doctrine threatens the nationalization of all natural resources and lands, including forests, minerals, and fisheries, whether state or privately owned; and

WHEREAS, The jurisdiction of several California state agencies, including the Fish and Game Commission, Public Utilities Commission and Lands Commission has already been encroached upon by the Federal Government under this "paramount rights" doctrine; and

WHEREAS, Congress has the constitutional right and power to enact legislation fully restoring the rights of the states; now, therefore, be it

Resolved by the Senate and Assembly of the State of California jointly, That the Congress of the United States is respectfully memorialized to enact such legislation as will be necessary to restore the ownership of the states to all lands and resources beneath navigable waters, both inland and offshore, within their historic boundaries; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each member of the United States Congress.

Any rules adopted by the board pursuant to this section shall provide: (1) no employee may be placed in a different class unless he shall first have filed his written consent thereto; (2) no change of class status may be allowed where the same would result in a promotion; (3) no employee may be placed in a different class unless the board finds that he possesses the minimum qualifications required for such class and that he is capable of performing the duties prescribed therefor. No employee who is placed in a different class pursuant to the provisions of this section may at the time he is placed in such class be credited with more seniority therein than he had accumulated in his former class.

Proposed Charter Amendment No. 4

Section 106 of the Charter of the City of Los Angeles is amended to read:

Sec. 106. From the examinations made by the board it shall prepare a register in each class of position, in the classified civil service, other than that of unskilled laborers employed by the day, of the persons whose general average standing upon examination for such class is not less than the minimum fixed by the rules of said board, and who are otherwise eligible, and such persons shall take rank upon the register as candidates in the order of their relative excellence, as determined by their examination without reference to priority of the date of examination; provided, however, that the board may prescribe a minimum score in the written portion of any examination of not to exceed sixty-five per cent (65%), including credit for past service in examinations for promotion, and may exclude from subsequent portions of the examination any candidate who fails to attain such minimum score. Register of job candidates

The board shall also keep a register, upon which shall be entered, in the order of their application, the names of all who apply for employment in the class of unskilled laborers, and who, after such medical or physical examination as the board may prescribe, are found to be capable of performing in a satisfactory manner the duties of the occupation sought. In case any registered applicant in said class of unskilled laborers shall be employed, and subsequently laid off or dismissed through lack of work, or through no fault of his own, that fact shall be forthwith certified to the Board of Civil Service Commissioners by the head of the department in which such laborer was em-

ployed, and he shall be restored to his original place upon the register.

PROPOSED CHARTER AMENDMENT NO. 5

Section 125 of the Charter of the City of Los Angeles is amended to read:

Suspension and restoration of employees

Sec. 125. In addition to all other matters, the board shall by its rules provide for:

(a) The manner and order, not inconsistent with the provisions hereof, in which persons shall be suspended and restored where such suspension results from lack of work, lack of funds or abolishment of position or otherwise, excepting suspension for personal delinquency, and in all such cases such suspension and restoration shall be based upon seniority as hereinafter provided, or where not so provided, as provided by the rules of the board.

No assignment of employees to positions within a class, except as hereinafter in this section provided, for which no different examination requirements have been established by the board shall affect the requirements of this section governing suspension and restoration for lack of work, lack of funds or abolishment of position or otherwise, but, in all such cases, all employees within the same class-group, as hereinafter defined, and for which similar examinations are required by the board shall be considered as one class-group for such purposes.

Whenever suspension other than for personal delinquency is to be made in any class in an office, department or bureau of the city, or major division established in and by a department having control of definite revenues and funds (and hereinafter referred to as a class-group), the person to be suspended shall be selected in the order determined by his length of service in such class and in classes of higher rank since original regular appointment to such class in the classified civil service, after deducting periods of absence from such service as provided by the rules of the board. The person having the shortest length of service in such class and in classes of higher rank shall be suspended first; and any person so suspended shall be entitled to displace the person holding a position in a class-group in which a regular position was formerly held by the person so suspended, who has a shorter length of service in such class-group and in classes of higher rank since original regular appointment to such class in the classified civil service, after deducting periods of absence from the city service as provided by the rules of the board.

The class-group in which suspension is to be made or the class-group in which restoration is to be made, shall include all positions created from such class-group subsequent to the original regular appointment therein of the person so suspended or restored. The determination of the Board of Civil Service Commissioners as to the class-group from which such positions were subsequently created shall be final and conclusive.

(b) The establishment in each class in each office, department or bureau of the city or major division established in and by a department having control of definite revenues and funds of a reserve list which shall consist of the names of those persons who have been theretofore regularly appointed to, and have served beyond the probationary period in or have been regularly promoted to a position in such class and have been suspended from their positions since January 1, 1928, for causes other than personal delinquency, whether for lack of funds, lack of work, abolishment of position or otherwise; provided, that any person in the classified civil service who has served therein since January 1, 1928, and was suspended for causes other than for personal delinquency shall be entitled upon his written request therefor to have his name placed upon the reserve list in each such class group in which he was regularly appointed and served beyond the period of probation and from which class he was suspended prior to January 1, 1928. Each person whose name appears on the reserve list, until regularly restored to a position in his class in the office, department, bureau or major division from which he was suspended as hereinbefore provided for in this section, shall be certified for appointment, as in this section provided for, to a position in his class in the office, department, bureau or major division from which he was suspended; provided that after this section takes effect, the name of any person, except as in this section provided for, who has been out of the service of the city for more than five years shall be permanently stricken from the reserve list by the board.

During suspensions other than for personal delinquency, the name of the person so suspended shall be placed and retained on the reserve list, as in this section provided for, in each class in each office, department, bureau or major division in which such person has served beyond the period of probation and from which he has been suspended for any cause other than personal delinquency.

Whenever any vacancy is to be filled, it shall be filled in the following order: First, by certifying from such reserve list, if any, in the class and office, department, bureau or major division in which such vacancy exists, the name of the person with greatest length of previous service in such class and all classes of higher rank as hereinbefore provided, or by transfer of a person whose service in such class and classes of higher rank is greater than that of any person on the reserve list of the office, department, bureau or major division where such vacancy is to be filled; secondly, by certifying from the promotional list, if any, as provided for in Section 107 of this article, of the office, department, bureau or major division where such vacancy is to be filled; thirdly, by certifying from the reserve list of other offices, departments, bureaus and major divisions as shall be provided for by the rules of the board; fourthly, by certifying from the appropriate register of eligibles as elsewhere provided for in this article. As to certifications to be made from other than the reserve list of the office, department,

bureau or major division in which such vacancy exists, the board may by its rules provide that when the list or register from which certification is to be made does not contain as many names as may be certified for any vacancy or vacancies under the provisions of Section 109 of this Charter, additional names, up to but not exceeding the maximum number therein specified, shall be certified from the list or register next in the order above provided.

The board shall have the same power and duty to review as to regularity of procedure all cases of suspension for lack of work, lack of funds or abolishment of position or otherwise, as elsewhere provided in the charter for removal, discharge, or suspension for cause; but the question of the necessity for such suspension for lack of work, lack of funds or abolishment of position shall not be subject to such review.

Section 115 of this charter shall be deemed superseded hereby.

PROPOSED CHARTER AMENDMENT No. 6

City Employees' Retirement System.

That the provisions of Article XXXIV of the Charter of the City of Los Angeles, providing for the establishment and maintenance of the City Employees' Retirement System, be amended by amending Sections 501, 502, 506, 507, 508, 508.1, 509, 510, 511 and 512, to read as follows:

Sec. 501. Definitions.

Definitions

For the purpose of this Article, the following words and phrases shall have the meaning ascribed to them in this section unless a different meaning is clearly indicated by the context:

"Accumulated Contributions": Shall mean the total of the amounts paid into the fund, together with regular interest thereon, by deduction from the member's salary as provided in section 507 and such additional amounts paid by the member as authorized under said section.

"Annuity": Shall mean payments for life derived from the accumulated contributions of a member as provided in this Article.

"Beneficiary": Any person receiving or entitled to receive, any benefit provided by this Article.

"City Service" or "Service": Shall mean only those periods during which a member received compensation from the city as an employee or during which he not only received Workmen's Compensation benefits (Div. IV, Labor Code) for temporary disability on account of any injury or illness arising out of and in the course of his employment with the city but for which he also made contributions to the fund as provided in this Article.

"Compensation Earnable": Shall mean the full salary, wage or compensation established for any position or office in the city service for the particular period involved in any calculation required; provided, however, that in the case of any such salary, wage, or compensation in excess of Five Hundred Dol-

lars ($500.00) per month, compensation earnable shall mean that portion thereof not exceeding sixty per cent (60%) of the highest salary, wage, or compensation established for any office or position to which appointment may be made under Section 109 of this Charter.

"Continuous Service": As applied to prior service means all prior city service regardless of interruptions in such service; and as applied to service as a member it shall mean uninterrupted city service except that discontinuance of such service of a member for any cause whatever, followed by reentrance into the city service within three years from the date of such discontinuance, shall not be considered as a break in the continuity of service.

"Dependent Parent": Shall mean only a person whom the Board of Administration, upon investigation and after a hearing in the matter, shall find is the parent of a member to or for whom the member, during the last year of his service, contributed at least one-half (½) the necessary living expenses.

"Member": Any person included in the membership of the Retirement System under the provisions of Sec. 502. In addition to periods of city service for compensation, such membership shall continue during such temporary period or periods in which a member is not receiving compensation, as the Board of Administration may by rule determine.

"Prior Service": The city service of an employee, as defined herein, at any time before the 1st day of July, 1937; provided, that no credit for such service shall be allowed to any person entering city service after the 1st day of July, 1947, except in the case of a former member returning to such service and resuming membership in the Retirement System.

"Regular Interest": Shall mean interest credited to the individual account of each member as provided in this Article.

"Reserve Basis": A system which provides for the accumulation and maintenance of a fund which will at all times be equal to the difference between the present value of the obligations assumed and the present value of the money to be received for paying such obligations, where such present values are estimated in accordance with accepted actuarial methods and on the basis of an assumed rate of interest and the mathematical probabilities of the occurrence of such contingencies as affect both the payment of the assumed obligations and the receipt of money with which they are to be paid.

Members

Sec. 502. Members of the System.

A. All persons who are members of the Retirement System on the effective date of this amendment, shall continue as members thereof. Every employee, unless excluded therefrom under the provisions of Subsection B of this section, shall become a member of the Retirement System on the first day of the calendar month next succeeding his entry into the city service.

Every person who is a member on the effective date of this amendment and who was in city service as an employee between the first day of July, 1937 and the sixteenth day of April, 1947, during any period in which he was not also a member of the Retirement System, and as such contributing to the Retirement Fund or during any such period for which he did not make or is not making back contributions pursuant to the former provisions of this section, shall have the option to designate all or any portion of such service for which he desires to receive retirement credit, provided, however, that the period so designated must be such as will make his service, as a member, continuous. Such option shall be exercised in writing, filed with the Board of Administration, designating the period of city service for which the member desires to receive retirement credit, and must be accompanied by a single payment of back contributions or by an irrevocable agreement to pay such back contributions in installments, in such manner as the Board of Administration shall by rule provide. The back contributions to be paid shall be in an amount equal to all of the contributions which he would have made to the Fund had he been a member during such period, together with all regular interest which, had he so made the same, would have been credited thereon prior to the date of such payment; provided, however, that in the case of such installment payments thereof, interest shall also be paid upon the unpaid balance of the same at the rate at which regular interest was last credited to members' accounts. Every member who makes up back contributions, as hereinabove provided, shall be allowed credit for the period of city service designated in the declaration filed by him with the Board of Administration, the same as though he had been a member during such period; provided, however, that should he, for any reason, cease to be a member before making up the full amount thereof, he shall be allowed retirement credit, counter-calendarwise, for the same portion of such designated period as the amount made up by him is of such full amount. Said written election shall be filed with the Board of Administration not more than one (1) year after the effective date of this amendment.

Same
Exclusions

B. The following employees shall not be members of said Retirement System:

(1) Persons employed by the Department of Education or by any Borough Government.

(2) Persons serving on any Board of Commissioners whose compensation consists of attendance fees per meeting attended.

(3) Members of the Fire and Police Pension System and members of the Water and Power Employees' Retirement Plan,

provided, however, that this exclusion shall not operate during any period of city service in which any such person is employed in any capacity which renders him ineligible for current membership in said System or Plan. Nothing in this Article shall be construed to prevent any person entitled to the payment of any benefit on account of service as a member of the System or Plan herein mentioned, from receiving payment on account of any benefit to which such person is entitled as a member of this Retirement System; provided, nevertheless, that no payment shall be made under provisions of this Article, for or on account of any period of service for which such person is entitled to receive or is receiving any benefit under the Fire and Police Pension System or the Water and Power Employees' Retirement Plan.

(4) Inmates of city institutions who are allowed compensation for such services as they are able to perform.

(5) Persons in city institutions principally for the purpose of receiving training but who receive compensation.

(6) Persons employed under contract for a definite period or for the performance of a particular special service.

(7) Persons employed only on call or for seasonal work.

(8) Any person employed on an intermittent or part-time basis, unless he is a member at the time he commences to serve on such a basis; or unless the appointing power certifies to the Board of Administration that his employment is regular and continuous and will probably extend for at least one year and require service for at least one-half the time required of employees in the same group or class of service on a full-time basis.

(9) Any officer of the city elected or appointed for a fixed term who files a written declaration of his desire not to become a member of the System within ninety (90) days next following the last day of the calendar month during which his first deduction on account of member contributions to the Retirement Fund is taken. When such a declaration is filed any contributions already taken shall be refunded.

Sec. 506. Budget. Budget

Said Board shall annually prepare and transmit to the Mayor and Controller a budget setting forth the estimated cost of maintaining said retirement fund, which said budget shall include therein separate items as follows:

(1) A sum equal to a percentage of the salaries of all members of said retirement system, which said percentage shall be the same as that shown in the last actuarial report rendered, as hereinbefore provided to be the percentage required for members of such departments with no past service.

(2) A sum sufficient to liquidate, over a period of years to be determined by said Board, the deficit shown by said last rendered actuarial report to have accrued because of prior service of members and the additional liabilities assumed by the System under this amendment.

(3) The amount of any deficit which may remain in said retirement fund in the event the appropriation of any previous

year shall have proved insufficient to pay the demands drawn against said retirement fund.

(4) Administration expense.

For the purpose of providing funds to meet the budget for said City Employees' Retirement Fund the Council or Controller shall annually levy, in addition to all other taxes levied by the city, a tax clearly sufficient to provide the total amount of all items in said budget; provided, however, that said City Council may appropriate from any available funds, all or any part of the total amount of all or any of the items in the budget for said City Employees' Retirement Fund, in which event the tax levy to be made for said fund shall be clearly sufficient to provide the difference between the amount so appropriated and the total amount of all items in said budget.

Members' contributions

Sec. 507. Contribution of Members.

Each member of said Retirement System shall contribute to said Retirement Fund by salary deduction at the rate of contribution established by the Board of Administration. The rate of such contribution and deduction shall be expressed as a percentage of compensation earnable and shall be a single rate for both sexes based on age at the time of entrance into the System, and shall be such as will accumulate, on the average and on a reserve basis, a sum sufficient for the payment of an annuity of one one-hundred-twentieth (1/120) of final compensation, multiplied by the number of years and parts thereof of city service subsequent to the first day of July, 1937. No adjustment shall be included in the rates adopted subsequent to this amendment because of any time during which members have theretofore contributed at different rates. The rate of contribution and deduction for members over the age of fifty-nine (59) years at the time of entrance into the system shall be at the rate established for the age of fifty-nine (59) years.

The Board of Administration shall certify to the Administrative head of each department or office the rate of contribution for each member in said department or office. The administrative head of such department or office shall cause such rate of contribution to be applied to the compensation earnable of each member for each payroll period and shall certify to the Controller the amount to be contributed by each member whose name appears on such payroll and shall deduct from the salary to be paid each member, exclusive of overtime, the amount of the contribution of such member, and shall draw a payroll check for the total amount of such contributions which shall be paid into the City Employees' Retirement Fund.

Said Board of Administration shall maintain an individual account of the contributions made by or for each member, as hereinabove provided. Regular interest shall be credited to such individual accounts and to the actuarial reserve accounts as of the last day of June and December of each year at such

rate as the Board of Administration may deem proper in the light of the Fund's earnings, exclusive of profits and losses on principal heretofore or hereafter resulting from sales of securities. No such interest shall be credited at any other time or to the individual account of any person who is not a member; provided, however, that such interest shall be credited to the individual account of a member who either retires or dies for any period of service between the next preceding last day of June or December and the date of such retirement or death at the rate at which regular interest was last credited to members' individual accounts.

The Board of Administration shall, by rule, provide for: the making up of back contributions in accordance with the provisions of Section 502-A; the re-deposit of withdrawn accumulated contributions in accordance with the provisions of Section 512-A; the making up of contributions which a member failed to make for any period during which he received Workmen's Compensation benefits (Div. IV, Labor Code) for temporary disability on account of any injury or illness arising out of and in the course of his employment with the city, together with an amount equal to the regular interest which would have been credited thereon had he made the same; and the making of additional contributions to provide a larger annuity benefit at the time of retirement.

Each member shall be deemed to consent and agree to each deduction made as provided for herein and the payment of each payroll check to such member shall be a full and complete discharge and acquittance of all claims and demands whatever for the services rendered by each member during the period covered by such payroll, except such claims as such member has to the benefits or payments provided for in this article. The right of each and every member to be paid his accumulated contributions in the event of any subsequent repeal of this article is hereby declared to be a vested property right of each such member. Furthermore, the right of each and every member to be paid his accumulated contributions upon his separation from the city service, as provided in Section 512, and the right of each and every beneficiary to be paid the member's accumulated contributions upon his death before retirement or his unused contributions upon his death after retirement, as provided in Section 511, are hereby declared to be vested property rights of each such member or beneficiary provided, however, that should the member or beneficiary entitled thereto fail to make claim or demand payment thereof within ten (10) years from the date of such separation or death, whichever be applicable, or within ten (10) years from the effective date of this amendment, whichever shall be the later, said accumulated contributions or unused contributions shall be transferred to such reserve account or accounts in the Retirement Fund as the Board of Administration, in its sole discretion, may determine and, thereafter, any action or proceeding to enforce payment thereof to any such member or beneficiary shall be forever barred.

Service retirement

Sec. 508. Service Retirement.

A. Every member shall be retired on the first day of the calendar month next succeeding that month in which he shall have reached the age of seventy (70) years, provided that the chief administrative officer of any department shall not be so retired during any period in which the appointing power requests, in writing filed with the Board of Administration, the retention in service of such chief administrative officer, and provided, further, that no member occupying an elective office for a fixed term shall be so retired until the expiration of the last term to which such member may be so elected.

B. Any member who shall have completed ten (10) or more years of continuous service, as defined herein, shall be so retired at any time after attaining age sixty (60), upon filing with the Board of Administration his written application therefor designating therein the date upon which such retirement shall be effective, which date shall be not less than thirty (30) nor more than sixty (60) days from and after the filing of such application; provided, that any member who has completed the minimum number of years of service entitling him to retire, as hereinabove set forth, and who has attained age fifty-five (55) or has completed thirty (30) or more years of service regardless of age, may elect to retire and be paid the actuarial equivalent of the retirement allowance which would be payable to him if he had then attained age sixty (60). Application for such earlier retirement shall be made in the same manner as that hereinabove provided for regular service retirement.

Any person whose membership has heretofore been terminated or any member whose membership may hereafter be terminated, for any reason, after he has completed five (5) or more years of continuous service, may elect to leave his accumulated contributions in the Retirement Fund and thereafter be paid a service retirement allowance, as in this paragraph provided. Such election shall be irrevocable and must be in writing, filed with the Board of Administration within three (3) years from the date of such termination or within three (3) years from the effective date of this amendment, whichever shall be the later, and upon the execution and filing of the same, such person's individual account shall be credited with an amount equal to all of the regular interest which, had he otherwise been entitled to the same, would have been credited thereto between the date of such termination of membership and the date of the filing of such election and, thereafter, regular interest shall, until he shall be paid a service retirement allowance, be credited thereto in the same manner as members' individual accounts shall be credited therewith. In the event that any such person should die before being paid a service retirement allowance, the only benefit which shall be paid under the provisions of this article is the payment of his accumulated contributions under the provisions of Section 511 A (1). Failure to file such a declaration within said period shall constitute an irrevocable decision not to take the benefits of this paragraph. Every person

or member who elects to leave his accumulated contributions in the Fund, as in this paragraph provided, may at any time after attaining age seventy (70) or at any time after attaining age sixty (60) and after ten (10) years has elapsed since he first became a member apply for retirement and be paid a retirement allowance, based upon his then accumulated contributions and his service as of the date his membership was terminated calculated in accordance with the provisions of Subsection C of this section; provided, that any such member may, at any time after attaining age fifty-five (55) and after ten (10) years has elapsed since he first became a member, elect to retire and be paid the actuarial equivalent of the retirement allowance which would be payable to him if he had then attained age sixty (60).

Retirement allowance

C. Any person heretofore or member hereafter retired on account of service shall receive a retirement allowance which shall consist of:

(1) An annuity which shall be the actuarial equivalent of his accumulated contributions at the time of his retirement, calculated in accordance with approved actuarial methods as of the date of retirement.

(2) A pension for all military service and prior service for which he is entitled to retirement credit and for all service during or for which he contributed to the Retirement Fund, which pension shall be, from and after the effective date of this amendment, in such an amount that the same, when added to that portion of his annuity not derived from additional contributions or not in excess of an amount equal to one one-hundred-twentieth ($1/120$) of his final compensation, as presently herein defined, multiplied by the number of years and parts thereof for which his contributions are on deposit in the Fund at the time of retirement, shall be a sum which shall be equal to one-sixtieth ($1/60$) of his final compensation, as presently herein defined, calculated as of the date of retirement, multiplied by the number of years and parts thereof of such military service, prior service and service during or for which he so contributed; provided, however, that if such member had been on disability retirement under the provisions of this article, such sum shall be reduced by an amount equal to the annuity which the total of the disability annuity payments made to him would have provided had they still been part of his accumulated contributions at the time of his retirement hereunder.

Every person who became a member by virtue of being an employee on the first day of July, 1937, and who has heretofore been or may hereafter be retired by reason of having reached age seventy (70), as provided in Subsection A hereof, and who shall not be entitled to any of the benefits of Section 508.1 in a larger amount, shall receive such additional pension that his retirement allowance shall be not less than thirty (30) percent of his final compensation, as presently herein defined, or Sixty Dollars ($60) per month, whichever sum is larger.

The provisions of this section shall not operate so as to reduce the retirement allowance of any person retired prior to the effective date of this amendment.

No person who shall have been retired from the service and employment of the City of Los Angeles pursuant to the provisions of this article shall thereafter be paid for any service rendered as an officer or employee of said city, except for service rendered as an election officer or as an officer elected by the electors of said city.

Same: Minimum

Sec. 508.1. Minimum Service Retirement Allowance.

From and after the effective date of this amendment, every person heretofore or member hereafter retired pursuant to the provisions of Section 508 and who, on the effective date of such retirement, was or is at least sixty (60) years of age and had or has at least ten (10) years of continuous service immediately preceding such date, shall receive such additional pension that, for ten (10) such years, his total monthly retirement allowance shall be not less than Sixty Dollars ($60.00) if retired at age sixty (60), Sixty-four Dollars ($64.00) if retired at age sixty-one (61), Sixty-eight Dollars ($68.00) if retired at age of sixty-two (62), Seventy-two Dollars ($72.00) if retired at age of sixty-three (63), Seventy-six Dollars ($76.00) if retired at age of sixty-four (64) and Eighty Dollars ($80.00) if retired at age of sixty-five (65) or over, plus an additional One Dollar ($1.00) per month for each additional completed year of service, not exceeding twenty (20) such additional years; provided, however, that no person whose service retirement credit is based, in whole or in part, upon service rendered for less than full-time, shall receive a greater percentage of such additional pension than that which such service bears to that of full-time; and provided further, that the provisions of this section shall not operate to reduce the retirement allowance of any person retired prior to the effective date of this amendment.

Same: Optional

Sec. 509. Optional Retirement Allowance.

At any time before the first payment of a retirement allowance on account of any voluntary, compulsory or disability retirement, the person or member to be retired, or retired, as the case may be, may elect to receive in lieu of his retirement allowance as provided in Section 508 or Section 510 the actuarial equivalent at that time of such retirement allowance, in accordance with any of the following:

(1) An optional retirement allowance payable throughout the balance of his life, with the provision that upon his death such optional retirement allowance shall be continued through the life of and paid: to the member's surviving spouse; or to his minor children, in the event there be no surviving spouse; or to his dependent parents, in the event there be no surviving spouse or minor children; provided that, in the case of a minor child, the same shall terminate with the monthly payment next preceding the date on which said child attains the age of eighteen (18) years; or

(2) An optional retirement allowance payable throughout the balance of his life, with the provision that upon his death one-half ($\frac{1}{2}$) of such optional retirement allowance shall be continued through the life of and paid: to the member's surviving spouse; or to his minor children, in the event there be no surviving spouse; or to his dependent parents, in the event there be no surviving spouse or minor children; provided that, in the case of a minor child, the same shall terminate with the monthly payment next preceding the date on which said child attains the age of eighteen (18) years; or

(3) Any other optional retirement allowance which the member may elect to receive and which shall be authorized by the Board of Administration; provided, however, that should any provision be made therein for the payment of any benefit after the death of the member, such benefit shall be payable to only those persons mentioned in (1) and (2) hereof and shall terminate, in the case of a minor child, with the monthly payment next preceding the date on which said child attains the age of eighteen (18) years.

The amount of every such optional retirement allowance shall be so calculated that the liability of the system at the date of retirement under the optional retirement allowance shall be equal to the liability of the system at the same date under the retirement allowance provided in Section 508, Section 508.1 or Section 510. For the purpose of this section, the liability of the system is defined as the present value, in accordance with tables adopted by the Board, of the retirement allowance or optional retirement allowance calculated by approved actuarial methods, giving due weight to the average probabilities of survivorship of all parties involved in the allowance, or optional allowance, to the limitation of payments to age eighteen in the case of a minor child, and to the requirement for refund of unused contributions after the death of the member or beneficiary as provided for in Section 511.

Sec. 510. Disability Retirement. Disability retirement

A. Any member who has ten (10) or more years of continuous service and who has become physically or mentally incapacitated and who is incapable, as a result thereof, of performing his duties, may be retired upon written application of such member, or of any person acting in his behalf, or of the head of the department in which such member is employed. Any such written application may be made at any time within, but not exceeding, six months after the discontinuance of the service of such employee or the termination of any duly authorized sick leave with pay, provided such incapacity has been continuous from the discontinuance of such service.

Said Board shall cause such member to be examined by and a written report thereon rendered by three regularly licensed, practicing physicians selected by said Board and shall hear such other evidence relating to such disability of such member as may be presented to said Board. If, upon considering the report of such physicians and such other evidence as shall have been

presented to it, said Board finds that said member has become physically or mentally incapacitated and is incapable, as a result thereof, of performing his duties and if said Board finds that such disability was not due to intemperance or the willful misconduct of such member, he shall be retired as of the date of the discontinuance of his service on account of such disability, or termination of sick leave with pay.

Any person heretofore or member hereafter retired on account of disability shall receive a disability retirement allowance which shall consist of:

(1) An annuity which shall be the actuarial equivalent of his accumulated contributions at the time of his retirement calculated in accordance with approved actuarial methods as of the date of retirement; and

(2) A pension which shall be, from and after the effective date of this amendment, in such an amount that the same, when added to that portion of his annuity not derived from additional contributions, shall be a sum which shall be equal to one-seventieth (1/70) of his final compensation, as presently herein defined, calculated as of the date of retirement, multiplied by the number of years of continuous service of such member; provided, however, that such sum, in the case of any such person whose service if continued to the age of sixty (60) years would have amounted to or would amount to eighteen (18) years or more, shall be not less than one-fourth ($\frac{1}{4}$) of his final compensation, as presently herein defined.

The provisions of this section shall not operate so as to reduce the retirement allowance of any person retired prior to the effective date of this amendment.

Re-entry into service

B. The Board of Administration may, from time to time in its discretion, require any beneficiary under the age of sixty (60) years who shall have been retired because of disability to submit to medical examination by three regularly licensed practicing physicians selected by the Board. Upon the basis of such examination and other proper evidence, said Board shall determine whether such beneficiary is still incapacitated for service in the position held by him at the time of his retirement. If said Board shall determine that such beneficiary is not so incapacitated, he shall be restored to duty in the position held by him at the time of said retirement order, and upon his return to active service his retirement allowance shall be cancelled.

Should any such beneficiary re-enter the service of the city, as hereinabove provided, and be eligible for membership in said retirement system, he shall immediately upon such re-entry become a member of said Retirement System, and thereafter his rate of contributions shall be that established for his age at the time of such re-entry. The balance, if any, of his accumulated contributions, after deducting the annuity payments made to him on account of his disability retirement allowance, shall be credited to the individual account of such member and he shall receive credit for services rendered

by him prior to the date of such retirement order in the same manner as though such member had never been retired for disability.

C. The failure, neglect, or refusal of any beneficiary, to submit to such medical examination as the Board may order pursuant to subdivision B hereof, or to return to active service pursuant to said subdivision, within such reasonable time as said Board may determine upon shall be sufficient cause for cancellation of such retirement allowance, in the discretion of said Board, in which event the accumulated contributions of such beneficiary, less any payments made on account of the annuity provided herein, shall be returned to such beneficiary.

Said Board of Administration shall have the power to hear and determine all matters pertaining to the granting or termination of any retirement allowance provided for in this section, and the determination of said Board shall be final and conclusive.

Sec. 511 Payments Upon Death.

Payment upon death Before retirement

A. Upon the death of any member before retirement:

(1) His accumulated contributions, except as otherwise provided in Section 507, shall be paid: to such person as he shall have nominated by written designation duly executed and filed with the Board of Administration; or, if there be no such written designation of beneficiary, then to the surviving spouse of such deceased member, or to his children in the event there be no surviving spouse, or to his parents in the event there be no surviving spouse or children. In the event there be no written designation of beneficiary, surviving spouse, children or parents, then said accumulated contributions shall be paid to the executor or administrator of the estate of such deceased member, or to any other person legally authorized to collect money due the decedent.

(2) In the event such member shall have had at least One (1) year of service for which he is entitled to service retirement credit, then a limited pension, amounting to one-twelfth (1/12) of the compensation earnable of such member during the last year of his service, multiplied by the number of years of service, not exceeding six (6), shall be paid in equal monthly installments of one-twenty-fourth (1/24) of such compensation earnable;

(a) To the surviving spouse of such deceased member; or

(b) To the minor children of such member, in the event there be no surviving spouse; or

(c) To the dependent parents of such member, in the event there be no surviving spouse or minor children, provided, however, that no such limited pension shall be paid in the event the Board of Administration, upon investigation and after a hearing in the matter, finds that the death of such member was due to or resulted from the intemperance or the willful misconduct of such member. In the event any such beneficiary should die before receiving the full amount of such limited pension, the same shall be continued to the persons who, in the

order hereinabove set forth, qualify as beneficiaries thereof as of the date of death of such deceased beneficiary and who, within sixty (60) days after such date, make demand for payment thereof; provided, however, that in the event no such demand is made within such time, the said limited pension shall conclusively be deemed to have been terminated as of such date of death.

(3) In the event such member was eligible to retire pursuant to the provisions of Section 508 and that the person or persons entitled to be paid such limited pension is or are the same person or persons entitled to be paid, against the claims or demands of any and all other persons thereto, the full amount of such member's accumulated contributions, then such person or persons may, by a written instrument duly executed, acknowledged and filed with the Board of Administration, waive payment of such limited pension and such accumulated contributions and elect to be paid, in lieu thereof, the optional retirement allowance which would have been paid to such member throughout his life and continued, upon his death, throughout the life or lives of such person or persons as his designated survivor or survivors, had he, as of the day preceding his death, been retired pursuant to the provisions of Section 509 (1) and designated such person or persons as his survivor or survivors. The duly appointed, qualified and acting guardian of the estate of a minor child or an incompetent shall make such waiver and election on behalf of such minor child or incompetent. In no event shall the benefits of this subdivision be payable to any person after the allowance of a limited pension pursuant to the provisions of subdivision (2) of this Subsection nor shall the limited pension be payable to any person after the allowance of the benefits of this section.

B. Upon the death of a member after retirement, or, upon the death of all of his survivors to whom a retirement allowance was paid under any of the provisions of Section 509, the unused contributions, except as otherwise provided in Section 507, and any accrued but unpaid retirement allowance, shall be paid in the same manner as that provided in subdivision (1) of Subsection A of this section for the payment of the accumulated contributions of a member who dies before retirement. For the purpose of this subsection, the phrase "unused contributions" shall mean the remainder, if any, of the accumulated contributions of such deceased member after deducting the total of all amounts paid on account of any annuity to such member and to his survivor or survivors.

C. Upon the death of any member after retirement, there shall be paid to the surviving spouse of such deceased member, or to his children in the event there be no surviving spouse, or to his parents in the event there be no surviving spouse or children, or to such person as he shall have nominated by written designation duly executed and filed with the Board of Administration in the event there be no surviving spouse, children or parents, the sum of Five Hundred Dollars ($500.00); provided,

In the event there be no surviving spouse, children, parents or specially designated nominee, or in the event that the requirements herein stated with respect to the expense of burial of such member have not been complied with within such time as said Board, in its discretion, may determine, then said sum of Five Hundred Dollars ($500.00) shall be paid to the executor or administrator of the estate of such deceased member, or to any other person legally authorized to receive money due the decedent.

Sec. 512. Withdrawal of Accumulated Contributions.

Accumulated contributions. Withdrawal

A. Every person who has heretofore or member who may hereafter become separated from the service of the city and who does not receive any retirement allowance as provided in this article shall, nevertheless, receive and be paid, except as otherwise provided in Section 507, his accumulated contributions upon written demand made to the Board of Administration. Any such person who heretofore so received and was paid such contributions or any such person or member who hereafter so receives and is paid such contributions and who either heretofore re-entered such service and as a result of such re-entry again became a member in said retirement system or should, within ten (10) years from the date of such separation, re-enter such service and as a result of such re-entry again become a member in said retirement system, may, within one (1) year after such re-entry or within one (1) year after the effective date of this amendment, whichever shall be the later, deposit in said retirement fund by a single payment, an amount equal to both the accumulated contributions previously withdrawn and the regular interest which, had he left such contributions in the fund and been otherwise entitled to such interest, would have been credited to his individual account between the date of such separation and the date of such re-entry or he may, within such time, enter into such irrevocable agreement as said Board may authorize for the payment thereof in installments, together with interest upon the unpaid balance thereof at the rate at which regular interest was last credited to members' accounts and, in either event, he shall receive service retirement credit, except as hereinafter limited, for the periods of city service for which said contributions were originally made. Should he re-enter such service within three (3) years from the date of such separation and comply with the provisions of this Subsection, his rate of contribution shall be that provided for his age as of his original entry into such system; provided, however, that should he fail to comply with said provisions or had he heretofore made such re-entry or should he make such re-entry more than three (3) years after the date of such

separation, his rate of contribution shall be that provided for his age as of such re-entry into such system. The provisions of this Subsection shall not operate so as to affect the rights of any person or member who heretofore re-entered the service of the city after separation therefrom and redeposited his withdrawn accumulated contributions in accordance with the former provisions of this section or who is making installment contributions on account of such redeposit pursuant to the former provisions of Section 508-C (2).

Same Permit to remain in fund

B. Every person who has heretofore or member who may hereafter become separated from the service of the city and who does not receive any retirement allowance as provided in this article may, nevertheless, but subject to the conditions provided in Section 507, permit his accumulated contributions to remain in the fund. Any such person or member who permits such contributions to remain in the fund and who should, within ten (10) years from the date of such separation or within ten (10) years from the effective date of this amendment, whichever shall be the later, re-enter such service and as a result of such re-entry again become a member in said retirement system, shall, if his account has not otherwise been credited therewith, have his individual account credited, as of the date of such re-entry, with an amount equal to the regular interest which, had he otherwise been entitled to the same, would have been credited thereto between the date of such separation and the date of such re-entry. Should he re-enter such service within three (3) years from the date of such separation, his rate of contribution shall be that provided for his age as of his original entry into such system; provided, however, that should he make such re-entry more than three (3) years after the date of such separation, his rate of contribution shall be that provided for his age as of such re-entry into such system.

C Any member who for any reason, shall cease to be a member before re-depositing the full amount required under Subsection A hereof, shall be allowed retirement credit, counter-calendarwise, for the same portion of the periods of city service for which he was making such re-deposit as the amount re-deposited by him is of such full amount.

CHAPTER 105

Senate Concurrent Resolution No. 16—Relative to a survey of State utilization of a microwave or wire line system of communications.

[Filed with Secretary of State, April 20, 1953.]

Survey of Federal-State Market News Service communications

WHEREAS, It has been recommended by the Federal Communications Commission, in its notice of proposed rule-making relative to discontinuance of the use of short wave radio-telegraph frequencies by the Federal-State Market News Service, that consideration be given to other methods of communication, which notice stated in part: "Initially, the commission wishes to emphasize as strongly as possible that its proposal in no way intended to terminate the market news service in the State of California, nor do we believe that adoption of this proposal will, in fact, require the service to be terminated. The commission has a full appreciation and awareness of the importance and value of the market news service and of the necessity for maintaining it in California. However, we believe, for the reasons set forth in detail below, that the public interest requires that the use of radio frequencies below 25,000 kc for this service by FSMNS should be discontinued and that conversion to wire lines or to available microwave frequencies will result in improvement in the market news service which will be of benefit to its users in the State of California." (Published in 17 Federal Register, page 8667); and

WHEREAS, Representatives of said commission have confirmed this recommendation in discussions with officers responsible for the radio communications systems of the State; and

WHEREAS, The use of a microwave or wire line system of communications by the State would permit the development of an integrated plan designed to furnish a more flexible, speedy, and economical receipt and transmission of messages by public agencies, both state and local; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Department of Finance,

through its Division of Communications in conjunction with the Legislative Auditor, be requested to make a complete survey of the feasibility of utilization of a microwave system of communications, a wire line system of communications or any alternative system of communications which would meet the need, including estimates of the cost of establishing such systems.

The Council may also authorize said Purchasing Agent to sell to any other public corporation, state or municipal, any supplies, material and equipment which said City may have been able to purchase in quantity at a reduced price.

Supplies shall be furnished upon requisition either from the stores under the control of the Purchasing Agent or by purchase, and whenever so purchased shall be paid for by the Department or office furnished therewith. He shall have charge of such storerooms and warehouses of the City as the Manager may provide or the Council by ordinance may authorize. PROPOSITION G.

Amend Section 94 of Article VII of the Charter of The City of San Diego to read as follows:

City contracts and bids

"Section 94. In the construction, reconstruction or repair of public buildings, streets, utilities and other public works, and in furnishing supplies, materials, equipment or contractual services for the same, when the expenditure therefor shall exceed the sum of $2,500.00, the same shall be done by written contract, except as otherwise provided in this Charter, and the Council, on the recommendation of the Manager or the head of the Department in charge if not under the Manager's jurisdiction, shall let the same to the lowest responsible and reliable bidder, not less than ten days after advertising for one day in the official newspaper of the City for sealed proposals for the work contemplated If the cost of said public contract work exceeds the sum of $1000.00, but is not in excess of $2500.00, the Council may let said contract without advertising for bids, but not until the Purchasing Agent of the City shall have secured competitive prices from contractors interested, which shall be taken under consideration by said Council before said contract is let. The Council may, however, upon the recommendation of the Manager and by a vote of five of its members, order the performance of any such construction and reconstruction or repair work by appropriate city forces when the estimates submitted as part of the Manager's recommendation indicate that the work can be done by the city forces more economically than if let by contract.

In case of a great public calamity, such as extraordinary fire, flood, storm, epidemic or other disaster the Council may, by resolution passed by a vote of five of its members, determine and declare that the public interest or necessity demands the immediate expenditure of public money to safeguard life, health or property, and thereupon they may proceed, without advertising for bids or receiving the same, to expend, or enter into a contract involving the expenditure of any sum required in such emergency, on hand in the City treasury and available for

such purpose. All contracts before execution shall be approved as to form and legality by the City Attorney.

Each bidder shall furnish with his bid such security or deposit insuring the execution of the contract by him as shall be specified by the Council or as provided by general law.

The Council shall require each contractor under this Section to insure the faithful performance of his contract by delivering to the City a surety bond in an amount specified by the Council, executed by a surety company authorized to do business in the State of California, and in addition thereto, the retention of sufficient payments under the contract to insure the protection of the City against labor or material liens.

The Council, on the recommendation of the Manager, or the Head of the Department not under the jurisdiction of the Manager, may reject any and all bids and readvertise for bids. The Council may provide that no contract shall be awarded to any person, firm or corporation if prison or alien labor is to be employed in performing such contract, or if the wage schedule for employees engaged in performing such contract is based on more than eight hours of labor per day. Any contract may be let for a gross price or on a unit basis and may provide for liquidated damages to the City for every day the contract is uncompleted beyond a specified date. It shall be competent in awarding any contract to compare bids on the basis of time completion, provided that when any award has been made in consideration, in whole or in part, of the relative time estimates of bidders for the completion of the work, the performance in accordance with such time limits shall be secured by a surety bond as hereinabove provided with adequate sureties and penalties, and provided further, that for any contract awarded solely or partially on a specified time for completion the Council shall not extend such time limits unless such extension be recommended by the Manager and the Head of the Department concerned.

No officer, whether elected or appointed, of The City of San Diego shall be or become directly or indirectly interested in, or in the performance of, any contract with or for The City of San Diego, or in the purchase or lease of any property, real or personal, belonging to or taken by said City or which shall be sold for taxes or assessments or by virtue of legal process or suit of said City. Any person wilfully violating this section of the Charter shall be guilty of a misdemeanor and shall immediately forfeit his office and be thereafter forever barred and disqualified from holding any elective or appointive office in the service of the City. No officer, whether elected or appointed, shall be construed to have an interest within the meaning of this section unless the contract, purchase, lease, or sale shall be with or for the benefit of the office, board, department, bureau or division with which said officer is directly connected in the performance of his duties and in which he or the office, board, department, bureau or division he represents exercises legis-

lative, administrative or quasi-judicial authority in the letting of or performance under said contract, purchase, lease or sale.

All contracts entered into in violation of this Section shall be void and shall not be enforceable against said City; provided, however, that officers of this municipality may own stock in public utility service corporations and the City permitted to contract for public utility service when the rates for such service are fixed by law or by virtue of the Public Utilities Commission of the State of California; and provided further, that no officer shall be prohibited from purchasing the services of any utility whether publicly or privately owned, whether or not the rates are fixed by law or by the Public Utilities Commission of the State of California; and provided further, that in designating any bank as a depository for the funds of said City, any officer interested as a stockholder or otherwise in such bank shall not be deemed to have an interest in such City contract within the meaning of this section, and in each of the cases enumerated herein such contracts shall be valid and enforceable obligations against the municipality."

Relief and Pension Fund for members of Fire Department.

That Sections (168)4; (169)5; (170)6; subsections (d), (f) and (g) of Section (175)11; subsection (B) of Section (176)12; and subsections (B) and (C) of Section (177)13 of the Charter Amendment to the Charter of the City of Bakersfield, which is known as "Relief and Pension Fund for Members of the Fire Department of the City of Bakersfield" be amended to read as follows:

Section (168) 4.

Disability

Whenever any member of the Fire Department shall become disabled by reason of bodily injuries received in or by reason of sickness caused by the discharge of the duties of such member in such Department and such disability shall continue for one (1) year or shall become so physically or mentally disabled as a result of such injuries or sickness as to render his retirement from active service necessary, the Pension Board shall order and direct that such member be retired from active service and, thereafter, such member so retired shall, during his lifetime, be paid from said pension fund, in equal monthly installments, the retirement allowance as provided in Section 13. Provided, however, that any such retirement allowance shall cease when the member's disability ceases and, in such event, such member shall be restored to the same rank or position which he held at the time of retirement. Provided, further, that the Pension Board shall have the power and authority to hear and determine all matters pertaining to the granting and termination of any such retirement allowance. Said Board shall make its findings in writing, based upon the report or reports of at least three regularly licensed, practicing physicians, and such other evidence concerning such disability as shall be presented to it. One of such physicians shall be the Health Officer of the City of Bakersfield, one shall be selected by the member applying for such retirement allowance and at least one shall be selected by said Pension Board.

Section (169) 5.

Death

Whenever any member shall die either,

(a) As a result of any injury arising out of or sustained by him while in the discharge of his duties as a member of the Fire Department, or

(b) From sickness caused by or resulting from the discharge of his duties as a member of such Department; the death allowance provided in Section 13 (Subsection C—Death Benefit) shall be paid, in equal monthly installments, as follows:

(1) To his widow during her lifetime or until she remarries and, thereafter, to the legally appointed guardian of his child or children until such child or children shall have attained the age of eighteen (18) years or shall have married.

(2) In the event such deceased member shall leave no widow, such death allowance shall be paid to the legally appointed guardian of his child or children until such child or children shall have attained the age of eighteen (18) years or shall have married.

(3) In the event such deceased member shall leave neither widow nor child or children under the age of eighteen (18) years, such retirement allowance shall be paid to his parent or parents or to his sister or brother who, in the order named, was or were either wholly or partially dependent upon him. Such Disability and Retirement Board shall have the power and authority to determine all matters pertaining to such dependency. Provided, however, that should said Board determine that such parent or parents or sister or brother was or were only partially dependent upon such deceased member, then and in that event, only such percentage of such death allowance shall be paid as is equal to the percentage of such dependency as determined by said Board. Provided, further, that said Board may from time to time re-examine into the financial status of any such parent or parents or sister or brother and, should it determine that the same has changed since the death of the member, it shall decrease or terminate the payment of said death allowance in accordance with its determination.

Section (170) 6.

Death allowance to child

In the event that a widow receiving a death allowance fails, neglects or refuses to properly or adequately provide for a dependent child or children of a deceased member, the Pension Board, upon its determination thereof, shall have the power and authority, in its sole discretion, to pay all or any part of such death allowance for the benefit of such dependent child or children in accordance with whatever regulations, requirements or rules it shall promulgate in connection therewith.

Section (175) 11.

Contributions

Contributions

(d) The dependent contributions, which shall be required in the same manner as normal contributions of each member throughout his membership in addition to the normal contributions, shall be such as would be necessary to provide upon the date of his service retirement at fifty-five (55) years of age or upon the completion of twenty (20) years service at an age higher than fifty-five (55) years, when accumulated with interest and applied by actuarial rates and tables and approved by the Retirement Board, for the continuance after his death and throughout the life of a widow, whose age at such date is the

same as the age of said member, of two-thirds (2/3) of the annuity provided by his accumulated normal contributions upon said retirement at fifty-five (55) years of age or at said higher ages. If at the date of retirement for service or retirement for disability, said member has no wife who qualifies for the continuance of an allowance to her after the death of said member, the said dependent contributions, with accumulated interest thereon, shall be paid to him upon said date, or at his option, applied in the same manner as his normal contributions to provide for him an annuity which shall be added to the annuity provided by said normal contributions.

(f) There shall be paid into the Retirement Fund each year by contributions of the City, the amounts as necessary to fund all pensions and other benefits allowable under the Retirement System to members on account of current service. Such amounts required on account of current service, shall be determined by applying a percentage, to be changed only as recommended by the Actuary in the light of periodical investigation and valuation results, to members' earned salary. Said percentage shall be the ratio of the liabilities under the System on account of current service, which are not met by member's contributions, and less the assets derived from the City's current service contributions, to the present value at the date of determination of members' future compensation. After the close of each month the Retirement Board shall determine the aggregate amount of the members' earned compensation during such month and shall determine the City's contribution by applying said percentage, and shall certify the amount of the contribution to the City Auditor, who shall then transfer an equal amount to the Retirement Fund from the budget appropriation or General Fund for the then current fiscal year.

(g) There shall be paid into the Retirement Fund each year by contributions of the City, the amounts necessary to pay all pensions and all other benefits allowable under the Retirement System to members on account of prior service; provided that such prior service liabilities may be met by an annual appropriation, instead of by one appropriation, for such prior liabilities payable that year to a member on retirement, and provided further, that such appropriation for any one fiscal year shall not be less than the amount disbursed during that year on account of prior service. Before the first of each fiscal year the Board shall certify to the City Auditor, City Manager and City Council the amount due within such year to the Retirement Fund under subsections (f) and (g) of this Section 11, and the City Auditor shall transfer an equal amount to the Retirement Fund from the Budget or General Fund during the said fiscal year.

Section (176) 12.

Retirement allowance

(B) Allowance on Service Retirement

A member, upon retirement for service as provided in subsection (A) of this section, shall receive a retirement allowance which shall consist of:

(a) An annuity which shall be the actuarial equivalent of his accumulated contributions, excluding his accumulated dependent contributions unless he shall exercise his option as provided in Section 11, subsection (d), at the time of his retirement, and

(b) A pension which, when added to the annuity purchased by his accumulated normal contributions, shall equal the same percentage of his final compensation for each year of current service credited to him, as his normal contributions and the contributions of the City are calculated to provide for him, upon retirement for service at the minimum age provided in subsection (A) of this Section, for each year of such service; and

(c) An additional pension which shall be equal to the same percentage of his final compensation for each year of prior service credited to him, as the sum of his and the City's normal contributions is calculated to provide for him, upon retirement for service at the minimum age provided in subsection (A) of this Section, for each year of service as a member of the System; and provided that, if said member shall have been retired for disability after the effective date of this amendment, and

(d) a second additional pension in such an amount as shall make his retirement allowance equal to the allowance he would have received had he never retired for disability.

(e) Upon the death of a retired member, two-thirds (⅔) of the retirement allowance shall be continued to his widow throughout her life or until she remarries provided, however, that she shall have been married to him at least one (1) year prior to his retirement and is of the same age as said member. If such widow is of a different age than said member, then the retirement allowance which shall be so continued to her shall be the actuarial equivalent of the retirement allowance which would have been continued to her had she been the same age as said member. If there be no such widow or if any such widow shall die, then the allowance which would have been paid to her had she been eligible therefor or had she continued to live, shall be paid to the legally appointed guardian of the child or children of such deceased member until such child or children shall die or shall have attained the age of eighteen (18) years If payment of the allowance shall terminate by reason of the remarriage of the widow or the attainment of the age of eighteen (18) years by such child or children before the total of the monthly payments made shall equal the sum of the member's contributions, with interest thereon, as of the date of his retirement, then an amount equal to the difference between said total and said sum shall be paid in one amount to his remarried widow or, if there be no such widow to his child or children; provided, however, that such amount shall not be paid to any widow who was not married to such member at least one (1) year prior to his retirement.

Section (177) 13.

(B) Allowance on Disability Retirement

Disability allowance

Upon retirement for disability as provided in subsection (A) of this Section, a member,

(a) If his disability shall be determined by the Retirement Board to be the result of injury or illness incurred in the performance of duty, shall receive

(1) An annuity which shall be the actuarial equivalent of his accumulated contributions, excluding his accumulated dependent contributions, unless he shall exercise his option as provided in Section 11, subsection (d), at the time of his retirement; and

(2) A pension which, when added to the annuity purchased by his accumulated normal contributions, shall be equal to a monthly retirement allowance of one-half ($\frac{1}{2}$) of his final compensation.

(b) If his disability shall be determined by the Retirement Board to be not the result of injury or illness incurred in the performance of duty, shall receive

(1) An annuity which shall be the actuarial equivalent of his accumulated contributions, excluding his accumulated dependent contributions, unless he shall exercise his option as provided in Section 11, subsection (d), at the time of his retirement; and

(2) A pension which, when added to the annuity purchased by his accumulated normal contributions, shall make his retirement allowance equal to: one and one-quarter ($1\frac{1}{4}$) per centum of his final compensation multiplied by the number of years credited to him, provided such allowance is at least one-fourth ($\frac{1}{4}$) of his final compensation; or one and one-quarter ($1\frac{1}{4}$) per centum of his final compensation multiplied by the number of years of service credited to him were his service to continue until his attainment of the age of fifty-five (55) years, provided such retirement allowance shall not exceed one-fourth ($\frac{1}{4}$) of such final compensation.

(c) Upon the death of a member who has been retired by reason of disability as a result of injury or illness incurred in the performance of duty, the retirement allowance shall be continued to his widow to whom he was married at least one (1) year prior to his retirement throughout her life or until she remarries. Upon the death of a member who has been retired by reason of disability which is not the result of injury or illness incurred in the performance of duty, two-thirds ($\frac{2}{3}$) of the retirement allowance shall be continued to his widow to whom he was married at least one (1) year prior to his retirement and who is of the same age as said member throughout her life or until she remarries. If such widow is of a different age than said member, then the retirement allowance which shall be so continued to her shall be the actuarial equivalent of the retirement allowance which would have been continued to her had she been the same age as said member. If there be no such widow or if any such widow shall die, then the allowance which would have been paid to her had she survived such member and been eligible therefor or had she continued to live, shall be paid to the legally

appointed guardian of the child or children of such deceased member until such child or children shall die or shall have attained the age of eighteen (18) years. If payment of the allowance shall terminate by reason of the remarriage of the widow or the attainment of the age of eighteen (18) years by such child or children before the total of the monthly payments made shall equal the sum of the member's contributions, with interest thereon, as of the date of his retirement, then an amount equal to the difference between said total and said sum shall be paid in one amount to his remarried widow or, if there be no such widow, to his child or children; provided, however, that such amount shall not be paid to any widow who was not married to such member at least one (1) year prior to his retirement.

(C) Death Benefit

Death benefit

Upon the death of a member before retirement, the Retirement System shall be liable for a death benefit which, if an amount be due under either paragraph (3) or (4) next following, and if there be a surviving wife or surviving children, shall be paid in monthly installments to the surviving wife and children as prescribed herein, otherwise the amounts due under paragraphs (1) and (2) shall be paid as prescribed therein, and such death benefit shall consist of

(1) His accumulated contributions, to be paid in a lump sum, to his widow, or, in the event there be no widow, to his child or children or, in the event there be no widow or child or children to the beneficiary whom he nominates by written designation duly executed and filed with the Retirement Board, and in addition thereto,

(2) An amount equal to his compensation earnable during the six months immediately preceding his death to be paid in a lump sum to his widow or, in the event there be no widow to his child or children or, in the event there be no widow or child or children to his parent or parents whom the Retirement Board shall determine, to have been dependent, in whole or in part, upon such member; and, if the Retirement Board determines such death to be the result of injury or illness incurred while in the performance of duty, in addition thereto,

(3) An amount sufficient, when added to the amount provided in paragraph (1) of this Section to provide an allowance equal to one-half (½) of the member's final compensation, payable as provided in Section (169) 5. If payment of the allowance be terminated because of marriage of the widow or attainment of the age of eighteen (18) years by a child, before the total of the monthly payments made shall equal the sum of the amounts provided in the paragraphs (1) and (2) hereof then an amount equal to the difference between said total and said sum shall be paid in one amount to the married widow, or if there be no such widow, to the child or children of the deceased member. If the Retirement Board determines that death be not the result of injury or illness incurred in the performance of duty, and if said member be qualified for retirement from service under

subsection (A) of Section 13 of this Amendment, then, in addition to the amounts provided in said paragraphs (1) and (2)

(4) An amount sufficient, when added to the amounts provided in said paragraphs (1) and (2), when applied according to rates and tables actuarially recommended and approved by the Retirement Board, to provide an allowance to be paid to the widow to whom said member was married at least one (1) year prior to his death to be equal in amount to the allowance calculated as in subsection (B) of Section 13 of this Amendment, which would have been payable to her if the said member had retired for disability at the time of his death and had died instantly thereafter, and to continue throughout her life or until her remarriage. If there be no such widow or if she die before all surviving children of such deceased member shall have attained the age of eighteen (18) years, then to his child or children until such child or children shall have attained the age of eighteen (18) years. If payment of the allowance be terminated because of marriage of the widow or attainment of the age of eighteen (18) years by such child or children before the total of the monthly payments made shall equal the sum of the amounts provided in paragraphs (1) and (2) hereof, then an amount equal to the difference between said total and said sum shall be paid in one amount to the married widow, or if there be no such widow, to the child or children of the deceased member.

(5) A member or a beneficiary after the death of a member may, by written election duly executed and filed with the Retirement Board, have the death benefit, provided to be paid in a lump sum in this Section, paid in monthly or annual installments subject to such rules and regulations as the said Board may adopt.

Such notice shall state the proposed work to be done or the supplies or materials to be furnished as provided by the Council; provided, however, the Council may reject any and all bids, if deemed excessive, and readvertise for bids, or provide for the work to be done under the direction of the City Manager. In case no bid is received, the Council may likewise provide for the work to be done under the direction of the City Manager. In the event, however, a desired commodity, material, service, or special machine or appliance is required by the City which may not be obtained on a competitive basis, or where during the progress of any public works the need arises for a commodity, material, machine or service, which was not and could not have been reasonably foreseen, and the cost of which does not exceed twenty-five hundred dollars, the City Manager shall have the power, with the approval of the Council, to acquire the same by contract without the necessity of advertising for bids, and to obligate the City therefor. Resolved by the Senate, the Assembly concurring, a majority of all members elected to each house voting for the adoption of this resolution and concurring therein, That the said amendments to the charter of the City of Bakersfield herein set forth as presented and submitted to and ratified and adopted by the qualified electors of the City of Bakersfield, be and the same are hereby adopted as a whole for and as amendments to the said charter of the City of Bakersfield.

CHAPTER 108

Senate Concurrent Resolution No. 58—Relative to a twenty-five cent ($0 25) toll on the Golden Gate Bridge.

[Filed with Secretary of State, April 20, 1953.]

Toll on Golden Gate Bridge

WHEREAS, The great Golden Gate Bridge was constructed through a thirty-five million dollar ($35,000,000) bond issue authorized by the people of the City and County of San Francisco, and the Counties of Marin, Napa, Sonoma, Mendocino, and Del Norte; and

WHEREAS, The Golden Gate Bridge and Highway District was created by the Legislature of this State for the purpose of operating the bridge for the convenience of the public at the lowest possible tolls; and

WHEREAS, The Golden Gate Bridge and Highway District has operated the Golden Gate Bridge as the highway link between San Francisco and Marin County and the Redwood Empire Counties comprising the district and through increased

traffic has accumulated a reserve fund which under the present rates will continue to grow substantially; that the present reserve fund is a protection to the bridge for the lack of insurance that the insurance underwriters will not carry on the bridge and also for emergency purposes for the repair and maintenance of the bridge and future alterations and improvements to the physical properties of the bridge and its approaches; and

WHEREAS, The directors of the bridge, in the absence of a contrary expression from the Legislature or the supervisors of the counties comprising the Golden Gate Bridge and Highway District have understandably pursued a conservative financial policy designed to afford maximum protection to the taxpayers of the district, the bondholders, and other creditors, including the State of California, which has made available the sum of five million dollars ($5,000,000) to the bridge district for the purpose of reducing the Waldo grade; and in pursuance of that policy the directors have been reluctant to reduce their present basic toll of forty cents ($0.40) for each passenger vehicle and occupants; and

WHEREAS, There is considerable variation in the estimates of experts as to the effect of reducing the basic toll from forty cents ($0.40) to twenty-five cents ($0.25), and the only way accurately to determine that effect is to put a twenty-five cent ($0.25) toll in operation on an experimental basis; and

WHEREAS, Since the supervisors of the counties in the district are responsible for the over-all protection of the interests of the taxpayers in the district, it is appropriate that the bridge directors have the assurance of the supervisors that such reduction would meet with their approval; and

WHEREAS, The Legislature believes that a twenty-five cent ($0 25) toll would result in benefits to the residents, commerce, and industry of the district and of the State of California generally, outweighing other considerations; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Legislature respectfully requests the Supervisors of the City and County of San Francisco and the Counties of Marin, Napa, Sonoma, Mendocino, and Del Norte to investigate and determine whether a reduction of basic tolls on the Golden Gate Bridge to twenty-five cents ($0.25) would not be for the benefit of the residents and taxpayers of their respective counties and to advise the Board of Directors of the Golden Gate Bridge and Highway District and the Legislature of their determination, if possible before the next meeting of said directors on April 24th; and be it further

Resolved, That the Legislature respectfully requests the Board of Directors of the Golden Gate Bridge and Highway District, with the approval of the supervisors in the district, to reduce the basic toll for each passenger vehicle and occupants to twenty-five cents ($0.25) for an experimental period of one year beginning July 1, 1953; and be it further

Resolved, That the Secretary of the Senate be directed to send a copy of this resolution to the Boards of Supervisors of the City and County of San Francisco, the Counties of Marin, Napa, Sonoma, Mendocino, and Del Norte, and the Board of Directors of the Golden Gate Bridge and Highway District.

CHAPTER 109

Assembly Concurrent Resolution No. 58—Relative to the election of Assemblyman Gordon R. Hahn to the Los Angeles City Council.

[Filed with Secretary of State, April 22, 1953.]

Gordon R Hahn

WHEREAS, One of our highly esteemed colleagues has just secured a magnificent victory in the primary election campaign in the City of Los Angeles in his contest for the office of city councilman; and

WHEREAS, This gentleman has contributed much to the welfare of the State of California during his years of faithful and intelligent service as a member of this assemblage; and

WHEREAS, The respect with which he is held by the Members of the Legislature is of the highest order; and

WHEREAS, His fearless, forthright, and intelligent approach to legislative considerations pending before him augurs well for his highly valuable service to the good people of the City of Los Angeles; now, therefore, be it

Resolved by the Assembly of the State of California, the Senate thereof concurring, That the Legislature of the State of California does hereby formally extend its heartiest congratulations to Assemblyman Gordon R Hahn upon his election to the Los Angeles City Council; and be it further

Resolved, That the Members of this Legislature extend to Assemblyman Gordon R. Hahn their best wishes for a continued successful career as a public servant; and be it further

Resolved, That the Chief Clerk of the Assembly be directed to transmit suitably prepared copies of this resolution to Assemblyman Gordon R. Hahn.

CHAPTER 110

Assembly Joint Resolution No. 12—Relative to permitting the deduction of certain soil preparation expenditures for farmers and ranchers, in the Internal Revenue Code.

[Filed with Secretary of State, April 23, 1953.]

Federal tax deductions for soil preparation expenditures

WHEREAS, Section 23(a) of the Internal Revenue Code provides that in computing net income there shall be allowed as a deduction all the ordinary and necessary expenses paid or in-

curred during the taxable year in carrying on any trade or business; and

WHEREAS, In the interpretation of such section the Treasury Department has issued Section 23(a)-11 of Regulation 111, which states, in part, that amounts expended in the development of farms, orchards, and ranches prior to the time when the productive state is reached may be regarded as investment of capital; and

WHEREAS, The Commissioner of Internal Revenue has ruled in Mimeograph Letter 6030 that a correct interpretation of such regulation gives the taxpayer the option to capitalize, prior to the time when the productive state is reached, expenditures incurred during the period of development which might otherwise be deductible as current expenses, but it does not permit capital items to be treated as ordinary and necessary business expenses; that typical items which are required to be capitalized, and to which the option does not apply, are such preparatory expenditures as the cost of clearing brush, trees, and stumps; leveling and conditioning land; the cost of trees and the planting of trees; drilling and equipping wells; building irrigation canals and ditches; laying irrigation pipes; installing drain tile or ditches to prevent erosion; straightening creek beds to correct erosion; constructing earthen, masonry, or concrete tanks, reservoirs, dams, or ditches; building roads; and the cost of physical equipment having a life in excess of one year; now, therefore, be it

Resolved by the Assembly and the Senate of the State of California, jointly, That the Congress of the United States be requested to amend the Internal Revenue Code to provide specifically that ranchers and other farmers have the option either to deduct or to capitalize and depreciate expenditures for brush clearing, soil and water conservation, reseeding, and other expenditures for maintaining the productivity of the land; and be it further

Resolved, That the Chief Clerk of the Assembly be directed to transmit copies of this resolution to the Chairman of the Finance Committee of the Senate, the Chairman of the Ways and Means Committee of the House of Representatives, and to each Senator and Representative from the State of California, in the Congress of the United States.

CHAPTER 111

Assembly Concurrent Resolution No. 65—Approving certain amendments to the charter of the City of Long Beach, State of California, ratified by the qualified electors of said city at a special municipal election held therein on the third day of April, 1953.

[Filed with Secretary of State, April 24, 1953.]

CHAPTER 113

Assembly Joint Resolution No. 25—Relative to memorializing the Congress of the United States in relation to the protection of parity prices for agricultural commodities.

[Filed with Secretary of State, April 27, 1953.]

WHEREAS, The economic structure of the agricultural industry of the United States depends in large part upon the system of guaranteeing to the producers of agricultural commodities "parity prices" which are designed to keep the purchasing power of such producers on a level comparable to that of persons in other industries and occupations; and "Parity Price Protection Act"

WHEREAS, The successful operation of the parity price provisions is a prerequisite to a sound economy affecting the entire United States; and

WHEREAS, The importation into the United States of products of a kind covered by the parity price provisions at prices less than the parity prices fixed for those products threatens to undermine the parity price structure and endanger the entire economy of the Country; and

WHEREAS, The harmful effects of importing products of a kind which are subject to parity price regulations at less than the parity price may be overcome by simply establishing an import duty on such imported products which will bring the

ultimate cost thereof into proper relation to the parity prices; and

WHEREAS, There is now a movement in the Congress of the United States to enact a "Parity Price Protection Act" which will provide for tariff duties on agricultural commodities of kinds which are subject to parity price regulations which are imported at prices less than the parity prices in order to equalize the prices at which the domestic and imported products may be sold; now, therefore, be it

Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to take such steps as may be necessary to enact a parity price protection law imposing import duties on agricultural commodities of a kind subject to parity price regulations in such amounts as will equalize the ultimate cost of such products with the parity price for domestic products of the same kind; and be it further

Resolved, That the Chief Clerk of the Assembly is directed to transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

Senate Joint Resolution No. 28—Relative to the leasing of restricted Indian lands in the State of California.

[Filed with Secretary of State, April 30, 1953.]

Indian land leases

WHEREAS, There are within the State of California more than 611,000 acres of restricted lands known as Indian reservations, rancherias, and allotments, located in many parts of the State which are controlled and managed by the Federal Government, and a portion of such land could and would be greatly increased in value to the Indian possessors by an act of Congress to authorize leasing such lands for a period of more than five (5) years; and

WHEREAS, Persons who are financially able to pay Indians a substantial annual rental, to plant and care for and harvest highly specialized crops, such as grapes, requiring four years to produce, and dates, which require eight years of laborious, painstaking care to bring them to the stage of production, to erect buildings and to make other improvements, will not invest their capital with a lease limited to five (5) years; and

WHEREAS, In many instances valuable restricted Indian lands produce but little or nothing and the Indian possessors continue to be handicapped and poverty stricken, and an example of the inequity and handicap resulting from the existing federal law is evidenced at Palm Springs where Indian Avenue,

a paved street, separates the restricted land of the Indians from the lands of the City of Palm Springs. On the city side of the avenue, under the laws of the State of California, the lands may be leased for as long as 99 years, while on the reservation side of this same avenue the Indians are limited to leases not to exceed five (5) years for lands equally valuable; and

WHEREAS, Congressman John Phillips has pending in Congress remedial legislation, H.R. 2976 "To authorize the leasing of restricted Indian lands in the State of California for public, religious, educational, recreational, residential, business, and other purposes requiring the grant of long-term leases"; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California hereby memorializes Congress to enact H.R. 2976; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Secretary of the Interior, to the Commissioner of Indian Affairs, to the Chairman of the Senate Committee on Interior and Insular Affairs, to the Chairman of the House Committee on Interior and Insular Affairs, and to each Senator and Representative from California in the Congress of the United States.

[Filed with Secretary of State, April 30, 1953.]

Remedial legislation for Indians

WHEREAS, Remedial congressional legislation is urgently needed for the benefit of the Indians of California on several subjects, some of which are now before Congress represented by bills and other bills are being drafted which deal with the following subjects:

A bill, H.R. 1063, by Congressman Poulson "To amend title 18 United States Code entitled 'crimes and criminal procedure,' with respect to state jurisdiction over offenses committed by or against Indians in the Indian country, and to confer on the State of California civil jurisdiction over Indians in the State."

Senate Concurrent Resolution No. 51—Relative to the trapping of condors.

[Filed with Secretary of State, April 30, 1953.]

Condor trapping permits

WHEREAS, Recent action by the California Fish and Game Commission in approving the issuance to the San Diego Zoological Society of a permit to take one pair of condors for propagation purposes has aroused apprehension on the part of some conservation groups that such action may lead to similar applications by other zoological societies; and

WHEREAS, The permit approved by the commission and issued by the department stipulates that other zoological societies and zoos would be supplied with any young birds which may result from the breeding of the California condors, and it was understood that only one such permit would be issued; and

WHEREAS, The permit was issued for a limited time only upon the assurance of the San Diego Zoological Society that the birds would not be disturbed and that no trapping would be attempted during the nesting time; and

WHEREAS, The conservation of the California condor is considered of paramount interest to all conservationists and nature lovers of this State, as well as of the Nation; and

WHEREAS, It is feared that the issuance of such permits would be inimical to the future of this rare bird; now, therefore, be it

WHEREAS, The Legislature, through its committees, has continued to study the problems incident to such acquisition or

operation concurrently with the activities of the Water Project Authority; and

WHEREAS, The subcommittee of the Assembly Committee on Conservation, Planning, and Public Works has recognized that a complete management survey is essential to the proper consideration of the problems involved in the proposed acquisition or operation and recommended that such a survey be made in order to assist both the Water Project Authority and the legislative committee in their deliberations; now, therefore, be it

Resolved by the Assembly of the State of California, the Senate thereof concurring, That the Legislature concurs with the above recommendation of the subcommittee of the Assembly Committee on Conservation, Planning, and Public Works; and be it further

Resolved, That the Water Project Authority is requested to make a complete management survey in connection with the proposed state acquisition or operation of the Central Valley Project and report thereon to the Joint Committee on Water Problems not later than July 31, 1953; and be it further

Resolved, That the Chief Clerk of the Assembly is directed to transmit a copy of this resolution to the Water Project Authority.

WHEREAS, The San Francisco Chronicle won an American Heritage Foundation award for "A Political Primer for Americans," published March 10, 1952, which was considered the most effective special supplement published by a newspaper in support of the "get-out-the-vote" campaign; and San Francisco Chronicle and Earl C Behrens

WHEREAS, This prize winning supplement was ably edited by the distinguished Earl C. Behrens, Chronicle political editor; and

WHEREAS, This award is but a further acknowledgment of the highest ethics in the profession of journalism, the sound and courageous editorial policy, the accurate and impartial reporting, and the sincere and abiding concern for the welfare of its community, its State, and its Nation, consistently displayed by the San Francisco Chronicle and Earl C. Resolved by the Senate of the State of California, the Assembly thereof concurring, That this Legislature commends the San Francisco Chronicle and its eminent political editor, Earl C. Behrens, for their splendid contribution to the cause of good citizenship, and heartily congratulates them for winning the esteemed American Heritage Foundation award; and be it further

CHAPTER 122

Senate Concurrent Resolution No. 62—Relative to increased share for the Pacific Coast in the federally financed shipbuilding and ship repair program.

[Filed with Secretary of State, May 8, 1953.]

WHEREAS, Under a directive from United States Budget Director Joseph M. Dodge, the Federal Government has re- West Coast shipyards

quired shipbuilding and ship repair contracts hereafter to be awarded on the basis of the lowest dollars-and-cents bid, instead of regionally, with the exception that Pacific Coast shipyards will be given a preference on some of the smaller ship repair jobs; and

WHEREAS, The Navy Department has adopted a new formula for computing the estimated differential cost in moving a ship from the West Coast to the East Coast and back, which formula is much lower than the present one and therefore gives the eastern yards an added competitive advantage in obtaining ship repair contracts; and

WHEREAS, Since the remoteness of the West Coast from the big steel producing centers results in a somewhat higher pattern of material costs in this area, the combination of the directive and the new formula in effect destroys West Coast shipbuilding as a major industry; and

WHEREAS, For the past few years shipbuilding and repair jobs have been regularly diverted to the East, and West Coast yards have been systematically ignored; and

WHEREAS, It has been pointed out that in spite of repeated protests by a committee of the California Congressional Delegation, the policies of the Department of the Navy in providing for the repair and conversion of ships tend to discriminate against government and private shipbuilding and repair facilities located on the West Coast and to favor those located on the East Coast; and

WHEREAS, During the year 1952, the Department of the Navy diverted two heavy cruisers, the "Boston" and "Canberra," and an Essex type carrier, the "Ticonderoga," from the Puget Sound Naval Shipyard moth ball fleet, to East Coast shipyards for major conversion work. The total value of the work on these three major vessels would approximate two hundred fifty million dollars ($250,000,000); work that in the interests of economical operation should have been performed on the Pacific Coast; and

WHEREAS, In response to the protests at the loss of such a huge volume of work, the Department of the Navy recently announced a so-called "new policy" affecting ship repair and conversion on the Pacific Coast; and

WHEREAS, This so-called "new policy" in no material way affects the long declared policy and action of the Navy Department in concentrating practically all new naval ship construction in East Coast shipyards; and the diversion of hundreds of millions of dollars in ship conversion work on major types of naval vessels from Pacific Coast naval and private shipyards, to shipyards on the East Coast; and

WHEREAS, It is sound public policy to encourage and maintain widespread facilities for the repair and conversion of naval craft on the West Coast, in order that the dispersal of these facilities will create maximum protection in the event of any emergency requiring increased use of these facilities; and

WHEREAS, The maintenance and availability of such facilities on the West Coast depend in a large measure upon work being provided by the Department of the Navy at all times in order to prevent substantial loss and closing down of yard facilities, both private and public; and

WHEREAS, The policies of the Department of the Navy are resulting in the elimination of major private shipbuilding on the entire Pacific Coast, and are having serious repercussions upon the development and maintenance of government navy yards and naval facilities in the same area, the result of which is creating a serious hazard in preparation for national defense; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Legislature of the State of California respectfully memorializes the President of the United States, the Secretary of the Navy, and the Director of the Bureau of the Budget to rescind their recent orders relating to federally financed shipbuilding and ship repair contracts which have had the effect of severely discriminating against the Pacific Coast shipyards and, in the interest of strengthening our national defense, to prescribe orders and regulations increasing considerably the West Coast's share in the federal shipbuilding and ship repair program; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President of the United States, to the Secretary of Defense, to the Secretary of the Navy, to the Director of the Bureau of the Budget, and to each Senator and Representative from California in the Congress of the United States.

Assembly Concurrent Resolution No. 70—Relative to extending congratulations and felicitous greetings to the Republic of Mexico upon the occasion of its national holiday, Cinco de Mayo.

[Filed with Secretary of State, May 11, 1953]

Cinco de Mayo

WHEREAS, Cinco de Mayo, the national holiday of the Republic of Mexico, has been venerated by the people of Mexico for 91 years since that day in 1862 when a small group of valiant and courageous men, under the sterling leadership of Ignacio Zarogoza, defeated the much more numerous forces of the French in the Battle of Guadalupe; and

WHEREAS, This glorious victory instilled in the hearts of the people of Mexico an abiding spirit of liberty and culminated, ultimately, in the conquest of freedom and independence over foreign domination; and

WHEREAS, Cinco de Mayo is a memorable date to a people who have not only fought their own battle for independence and thereby won our admiration and respect, but also have con-

tinually exercised their liberty so that today the Republic of Mexico is a friendly neighbor which has joined us and other freedom loving peoples in establishing a better world in which free people may live; now, therefore, be it

Resolved by the Assembly of the State of California, the Senate thereof concurring, That the Members of the Legislature on behalf of the people of the State of California, extend to the people of Mexico congratulations and felicitous greetings upon the occasion of the celebration of their great national holiday, Cinco de Mayo, conveying to them our sincere expression of warm friendship; and be it further

Resolved, That the Chief Clerk of the Assembly is hereby directed to transmit a suitably prepared copy of this resolution to His Excellency, the President of the Republic of Mexico.

Assembly Concurrent Resolution No. 71—Relative to the death of Howard Thornton Boulter.

[Filed with Secretary of State, May 11, 1953.]

Death of Howard Thornton Boulter

WHEREAS, Howard Thornton Boulter, editor of the San Diego Evening Tribune, passed away in San Diego on April 24, 1953; and

WHEREAS, He was born on July 8, 1907, at Omaha, Nebraska, and moved to California early in his life; and

WHEREAS, One of California's leading newspapermen, his keen interest in public affairs and his unceasing efforts on behalf of the people of California were repeatedly acknowledged by his confreres in the newspaper profession and were rewarded by the friendship of all who knew him; and

WHEREAS, Howard Thornton Boulter gave freely of his time and energy in all his activities, civic, professional and social, selflessly reserving to others the glory he so well deserved himself; and

WHEREAS, He leaves behind his wife, two sons, Tom and Steve, and a countless multitude of sorrowing friends; now, therefore, be it

Resolved by the Assembly of the State of California, the Senate thereof concurring, That the Legislature hereby expresses its feeling of great sorrow and regret at the loss of Howard Thornton Boulter, a valuable and highly esteemed citizen of California; and be it further

Resolved, That the Members of the Legislature extend their deepest sympathy to Mrs. Howard Thornton Boulter, his wife, and to his sons, Tom and Steve; and be it further

Resolved, That the Chief Clerk of the Assembly, as a token of the deep sense of loss experienced by the Legislature, be instructed to prepare and to transmit suitable copies of this resolution to Mrs. Howard Thornton Boulter and to the San Diego Evening Tribune.

Senate Joint Resolution No. 37—Relative to requesting the United States to construct a portion of a highway in substitution for the highway closed by the establishment of the Chocolate Mountain Aerial Gunnery Range.

[Filed with Secretary of State, May 12, 1953.]

Federal highway aid in Imperial County

WHEREAS, In 1949 when the United States Navy sought to establish the Chocolate Mountain Aerial Gunnery Range as a target area for jet planes, the Board of Supervisors of Imperial County in the interest of patriotism gave its consent thereto insofar as the establishment of the range required the closing of the only direct traversable road between Niland, Imperial County, and Blythe, Riverside County; and

WHEREAS, The Board of Supervisors of Imperial County took this action freely and without the requirement that the United States condemn the interest the county had in this road, thus permitting the Chocolate Mountain Aerial Gunnery Range to be established immediately at the time when it was needed and without the necessity for lengthy and costly litigation; and

WHEREAS, The county road through the Chocolate Mountain Aerial Gunnery Range was the only road of any economic value connecting the populous west portion of Imperial County with the less developed eastern portion of Imperial County, and also served as the only short-diagonal for interstate traffic connecting U. S. Highways 60 and 66 with the populous portion of Imperial County and the metropolitan area of San Diego County; and

WHEREAS, At the time of the establishment of the Chocolate Mountain Aerial Gunnery Range the Government of the United States, through the Department of the Navy, gave assurances to the Board of Supervisors of Imperial County that the United States would build a replacement road on account of closing of the existing road, the cost thereof to be viewed as the cost to acquire the Chocolate Mountain Aerial Gunnery Range; and

WHEREAS, The Bureau of Public Roads has authority under existing law to replace existing highways and highway connections that are shut off from general public use by necessary and required restrictions at military and naval reservations; and

WHEREAS, There is a practicable route from Imperial County to Blythe along the southerly end of the Chocolate Mountain Aerial Gunnery Range, which route commences from a county road running easterly from Brawley at a point approximately three miles west of the Highline Canal, and then proceeds east across the Coachella Branch of the All American Canal, across the Southern Pacific Railway near Glamis, along the southern boundary of the Chocolate Mountain Aerial Gunnery Range, and thence along an existing county road to Palo Verde, and from there to Blythe; and

WHEREAS, Such a road would make the distance between Brawley and Blythe 90 miles as compared to the distance of 85

miles by the way of the road across the Chocolate Mountain Aerial Gunnery Range, now closed, 152 miles by the existing road by way of Mecca and Box Canyon, and 129 miles by the existing road by the way of Holtville, Ogilby, and Palo Verde; and

WHEREAS, The Board of Supervisors of Imperial County is willing to give assurances that it will construct to accepted local standards the road from Brawley to Blythe along the southern boundary of the Chocolate Mountain Aerial Gunnery Range, except the portion from the point of beginning to Glamis, and that it will maintain the entire road, including such excepted portion, if the United States constructs such excepted portion in accordance with the recommendations of the Report of Road Replacement from Imperial Valley to Palo Verde Valley in California, prepared by E. Q. Sullivan (formerly State Highway Division Engineer), Consulting Engineer, for the Imperial County Board of Supervisors in April, 1953; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature on behalf of the State of California approves the proposed assurances of the Board of Supervisors of Imperial County as herein set forth, or as subsequently amended, for the purpose of obtaining a direct county road between Imperial County and Blythe; and be it further

Resolved, That the Legislature finds that there is an urgent need for the re-establishment of this road in order to assure the development of the eastern portion of Imperial County and to provide a connecting highway between U. S. Highway Routes 60 and 66 and San Diego; and be it further

Resolved, That the Legislature memorializes the Congress of the United States to provide funds for the construction of that portion of the road between Imperial County and Blythe which is a condition of Imperial County constructing the remainder of the road and maintaining the entire road, and that such construction be carried out for the United States by its Bureau of Public Roads; and be it further

Resolved, That the Secretary of the Senate send copies of this resolution to the President of the United States, the Secretary of the Navy, the Secretary of Commerce, the Chief of Bureau of Public Roads, the President of the Senate, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

Section 6. Authorization of Revenue Bonds. Each issue of revenue bonds shall be authorized by the Council by a resolution of issue adopted by affirmative votes of at least four (4) members of the Council at a duly assembled meeting.

Section 7. Resolutions of Issue. Resolutions of Issue shall provide for the aggregate principal amount, date or dates, maturities, interest rates, denominations and form, and may provide for the registration, transfer and interchange, of any revenue bonds and coupons issued pursuant to this Article; and shall prescribe the purpose or purposes for which said bonds are to be issued and the terms and conditions on which said bonds are to be executed, issued, secured, sold and paid, and, if desired, the terms and conditions on which said bonds may be redeemed prior to maturity or refunded.

Bonds

Section 8. Provisions Relating to Bonds. The following provisions shall govern and apply to (a) all revenue bonds issued pursuant to this Article and (b) each resolution of issue relating to the bonds thereby authorized:

(1) Date of Bonds. Bonds shall bear dates prescribed by the resolution of issue.

(2) Maturity. Bonds may be serial bonds or sinking fund bonds with such maturities as shall be provided in the resolution of issue. No bond by its terms shall mature in more than forty (40) years from its own date and, in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date of each such series or division shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized issue.

(3) Interest. Bonds shall bear interest at a rate of not to exceed six (6) per cent. per annum, payable annually or semi-annually, or in part annually and in part semi-annually.

(4) Coupon or Registered Bonds. Bonds may be issued as coupon bonds or as registered bonds. A resolution of issue may provide for the interchange of coupon bonds for registered bonds and registered bonds for coupon bonds, and may provide that the bonds shall be registered as to principal only, or as to both principal and interest, or otherwise as the resolution of issue shall prescribe.

(5) Redemption. Bonds may be callable upon such terms and conditions and upon such notice as the resolution of issue shall prescribe and upon payment of such premium (not exceeding six per cent (6%) of the par value of such bonds) as may be fixed in the resolution of issue. No bond shall be subject to call or redemption prior to its fixed maturity date, unless the right to exercise such call is expressly stated on the face of the bond.

(6) Source of Payment. All revenue bonds shall be payable exclusively from revenues.

(7) Reference on Bonds to Resolution of Issue. Reference on the face of a revenue bond to the resolution of issue by its date of adoption is sufficient to incorporate all of the provisions thereof and of this Article into the body of said revenue bond and its appurtenant coupons. Each taker and subsequent holder of a revenue bond or coupons, whether such coupons are attached to or detached from said revenue bond, shall have recourse to all of the provisions of the resolution of issue and of this Article and shall be bound thereby.

(8) Recital in Bonds. All revenue bonds shall contain a recital on their face that neither the payment of principal of nor of interest on such bonds constitutes a debt, liability or obligation of the City of San Rafael, except as provided in this Article.

(9) Place and Manner of Payment. The principal of and interest on bonds may be paid at any one or more places within or without the State of California and in any specified coin or currency of the United States of America, as may be provided in the resolution of issue.

(10) Execution and Authentication of Bonds; Validity of Signatures and Countersignatures. Bonds may be executed and authenticated by the manual, lithographed or printed facsimile signature of any officer or officers of the City and may also be authenticated by a trustee or fiscal agent appointed by the Council. If any of the officers whose signatures or countersignatures appear on the bonds cease to be officers before the delivery of the bonds or coupons to the purchasers thereof, their signatures or countersignatures shall nevertheless be valid and of the same force and effect as if such officers had remained in office until the delivery of the bonds and coupons.

(11) Issuance of Temporary Bonds. Pending the actual issuance or delivery of definitive bonds, the Council may issue

temporary of interim bonds, certificates or receipts of any denominations whatsoever, and with or without coupons, and with such provisions as the Council shall determine, to be exchanged for definitive bonds when ready for delivery. In the absence of an express recital on its face that a temporary bond or interim receipt is non-negotiable, such bond or interim receipt is a negotiable instrument.

(12) Replacement of Lost, Destroyed, Mutilated or Stolen Bonds. Lost, destroyed, mutilated or stolen bonds or coupons may be replaced as provided in the resolution of issue.

(13) Security. All revenue bonds shall be secured by an exclusive pledge and charge upon (a) all or a portion of the gross revenues of the project for the acquisition, construction and completion of which said bonds are issued or authorized to be issued, (b) revenues from on-street parking meters, and (c) revenues of any existing off-street parking facilities, all as provided for in the resolution of issue. Gross revenues of a project include improvements and extensions of such project later constructed or acquired. The gross revenues of the project, any interest earned on the gross revenues of the project, and all pledged on-street parking meter revenues and pledged revenues of existing off-street parking facilities shall constitute a trust fund for the security and payment of the principal of and interest on the bonds and so long as any bonds or interest thereon are unpaid said revenues and interest shall not be used for any other purpose; provided, however, that a resolution of issue may provide that if the principal of and interest on the bonds and all charges to protect and secure them are paid when due, an amount for the maintenance and operation costs of the project may be apportioned from revenues, but only to the extent specified in the resolution of issue.

(14) Bonds of Same Issue to be Equally Secured. Bonds of the same issue shall be equally secured by a pledge and charge upon revenues, without priority for number, date of bonds, of sale, of execution, or of delivery; except that if the Council authorizes the issuance of bonds of different series it may provide that the bonds in any series shall, to the extent and in the manner prescribed in the resolution of issue, be subordinated and be junior in standing with respect to the payment of principal and interest and the security thereof to such other bonds as may be specified in the resolution of issue.

(15) Refunding Bonds. The Council may provide for the issuance, sale or exchange of refunding bonds for the purpose of redeeming, retiring or refunding any revenue bonds issued under this Article, subject to any limitations contained in the resolution of issue pursuant to which such revenue bonds are issued. All provisions of this Article applicable to the issuance of revenue bonds shall be applicable to the refunding bonds and to the issuance, sale or exchange thereof.

(16) Amount of Refunding Bonds. Refunding bonds may be issued in a principal amount sufficient to provide funds for

the payment of all bonds to be refunded thereby, and, in addition, for the payment of all expenses incident to the calling, retiring or paying of such outstanding bonds and the issuance of such refunding bonds. Such expenses may include the difference in amount between the par value of the refunding bonds and any amount less than par for which the refunding bonds are sold, any amount necessary to be made availabe for the payment of interest upon such refunding bonds from the date of sale thereof to the date of payment of the bonds to be refunded, or to the date upon which the bonds to be refunded will be paid pursuant to call thereof or agreement with the holders thereof, and also the premium, if any, necessary to be paid in order to call and retire the outstanding bonds and the interest accruing thereon to the date of call or retirement.

(17) Validity of Bonds Not Affected by Actions of City Relative to Project. The validity of the authorization and issuance of any revenue bonds by the Council shall not be dependent on or affected in any way by:

(a) Proceedings taken by the City for the acquisition, construction, or completion of any project or any part thereof.

(b) Any contracts made in connection with the acquisition, construction or completion of any project; or

(c) The failure to complete any project for which bonds are authorized to be issued.

Section 9. Sale of Bonds. Before selling any bonds the Council shall give notice inviting sealed bids in such manner as the Council may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder. If no bids are received or if the Council determines that the bids received are not satisfactory as to price or responsibility of the bidders, the Council may reject all bids received, if any, and either readvertise or sell the bonds at private sale.

Section 10. Sale Below Par. The Council may sell bonds at a price below the par or face value thereof, provided that the maximum net interest cost (computed on a 360-day year basis) on bonds sold below par or face value shall not exceed an average of six per cent (6%) per annum, payable semi-annually, to the respective maturity dates of said bonds.

Section 11. Payment of Incidental Expenses and Interest and Creation of Funds From Proceeds of Sale of Bonds. All costs and expenses incidental to the issuance and sale of bonds, including the cost of preparation of the bonds and coupons, the cost of all surveys, of preparation of plans and specifications, of all architectural, engineering, inspection, legal, trustee's and fiscal agent's fees, the creation of a bond reserve fund, the creation of a working capital fund, and bond interest estimated to accrue during the period of acquisition or construction of a project and for a period of not to exceed six (6) months thereafter, all as provided for in the resolution of issue, may be paid out of the proceeds of sale of the bonds.

Resolutions of issue

Section 12. Provisions Relating to Resolutions of Issue. The following provisions shall govern and apply to each resolution of issue adopted by the Council:

(1) Construction Fund; Investment. A resolution of issue may provide that the proceeds of sale of all revenue bonds authorized thereby shall either be deposited in a fund separate and apart from all other funds of the City or paid direct to any bank or trust company designated by the Council as the fiscal agent of the City, and that said proceeds shall be held by the City or such fiscal agent in a separate account to be designated the Construction Fund and be disbursed in the manner and upon the conditions provided in the resolution of issue for the object and purpose of the acquisition, construction and completion of the project therein designated, including the payment of all incidental expenses and interest and the creation of funds as provided for in Section 11 of this Article. (4) Rates, Fees and Other Charges. A resolution of issue may provide that the Council will prescribe, revise and collect rates, fees and charges for use of the facilities provided by the project acquired, constructed or completed from the proceeds of sale of the bonds issued pursuant to such resolution of issue, or for any services rendered in connection with such project, and for use of any on-street parking meters and existing off-street parking facilities any revenues from which are pledged to secure the bonds; that such rates, fees and charges shall at all times be sufficient to yield revenues from the project and net revenues from such on-street parking meters and existing off-street parking facilities equal to all redemption payments and interest charges on said bonds as the same fall due, together with such additional sums as may be required for any sinking fund, reserve fund or other special fund provided for the security or further protection of said bonds, or as a depreciation charge or other charge in connection with such project; and that such rates, fees and charges shall not be reduced below

an amount sufficient to provide funds to meet all obligations specified in the resolution of issue.

(5) Holding and Application of Revenues. A resolution of issue may require the City to hold or cause to be held in trust the revenues pledged to the payment of the principal of and interest on the bonds issued pursuant to said resolution of issue, or to any reserve or other fund created for the security or further protection of the bonds, and to apply such revenues or cause them to be applied only as provided in the resolution of issue.

(8) Limitations Upon Power to Encumber Project. A resolution of issue may limit, restrict or prohibit, except upon such terms and conditions as may be provided therein, any right, power or privilege of the City to mortgage or otherwise encumber, or to sell, lease or dispose of a project or to enter into any lease or agreement which impairs or impedes the operation of a project or of any part thereof necessary to provide adequate revenues, or which otherwise impairs or impedes the rights of the holders of the bonds with respect to such revenues.

(9) Proceeds of Project Taken by Eminent Domain. A resolution of issue may provide that if any part of a project shall be taken by eminent domain or other proceeding authorized by law, the proceeds to the City therefrom shall be applied to the replacement of such project or to the payment and retirement of the bonds issued pursuant to such resolution of issue, or as otherwise set forth in said resolution of issue.

(10) Insurance. A resolution of issue may specify or limit the kinds and amounts of insurance to be maintained by the City on a project, or any part thereof (including insurance of any project against loss of revenues from any cause whatsoever, against public liability or property damage and against loss by fire or any other hazard, as may be provided in any resolution of issue), and providing for the payment of the premiums thereon, and specifying the use and disposition of proceeds of any such insurance thereafter collected.

A resolution of issue may authorize the City to designate any bank or trust company in any city in which any bonds are made payable as the City's paying agent in such city. A resolution of issue may fix and determine the conditions upon which any trustee, fiscal agent or paying agent shall receive, hold or disburse any or all revenues deposited with it by or by authority of the City or the Council. A resolution of issue may prescribe the duties and powers, if any, of any such trustee, fiscal agent or paying agent with respect to the issuance, authentication, sale and delivery of the bonds, the payment of the principal thereof and interest thereon, the redemption thereof, the registration and discharge from registration of bonds and the management of any funds provided for in the resolution of issue as security for the bonds.

(14) Limitation on Additional Indebtedness. A resolution of issue may limit or restrict the incurring of additional indebtedness payable in whole or in part from the revenues charged with payment of the bonds issued pursuant to such resolution of issue.

(15) Events of Default. A resolution of issue may designate the rights, limitations, powers and duties arising upon breach by the City of any of the covenants, conditions or obligations therein contained, and may provide the terms and conditions upon which all bonds issued thereunder may be declared or become due and payable prior to maturity and the terms and conditions upon which such declaration and its consequences may be waived.

(16) Amendment or Modification of Resolution of Issue. A resolution of issue may prescribe a procedure by which its terms and conditions may be subsequently amended or modified with the consent of the City and the vote or written assent of the holders of a specified principal amount or proportion of the bonds issued and outstanding, including

(a) provision for meetings with bondholders and the manner in which the consents of the bondholders may be given;

Bonded indebtedness

Section 16. Revenue Bonds Excluded from Bonded Indebtedness of City. Revenue bonds issued under this Article shall not be taken into consideration in determining the bonded indebtedness which the City of San Rafael is authorized to incur pursuant to Section 14 of Article III of this Charter and shall be excluded from any limitation provided by this Charter or by law on the amount of bonded indebtedness of the City.

Francis Kevin Murray, John Joseph Murray, Jr., Eugene Thomas Murray, World War II veteran, Richard Aloysius Murray, with two years' service in Korea and now stationed in Hawaii with the United States Navy, and two daughters, Anita Lillian Mitchell, and Dolores Margaret Wilcsinszky. CHAPTER 139

Senate Joint Resolution No. 32—Relative to memorializing the Congress of the United States in relation to the enactment of federal dangerous drug controls.

[Filed with Secretary of State, May 20, 1953.]

Federal dangerous drug controls

WHEREAS, The recent reports of the pathetic and tragic cases of narcotic addiction by teen-age youngsters have shocked the citizens of this State; and

WHEREAS, Narcotic addiction among thrill-seekers, chiefly under the age of 21, is mounting at a most unhealthy pace, resulting in an alarming increase in the number of addictions; and

WHEREAS, It is the belief of our own enforcement agencies that there exists a deliberate exploitation of naive boys and girls by drug traffickers, who aim to open up a rich new market by enslaving a huge new crop of addicts; and

WHEREAS, It is the opinion of veteran narcotic enforcement officers that by far the most dangerous offenders in this traffic are those who engage in it from the profit motive only, those who are nonusers and who, for the sake of money, cold bloodedly and viciously ensnare our youth and our adults into narcotic addiction; and

WHEREAS, The drugs now composing the major law enforcement problem in our State are heroin, marihuana, and barbiturates; and

WHEREAS, At present there are no federal controls over the ultimate distribution of barbiturates, leaving each state to enact legislation in this field, even though the control of barbiturates and central nervous stimulants such as amphetamine and its derivatives is actually a federal problem involving interstate commerce; and

WHEREAS, Although California's Dangerous Drug Act has received nation-wide commendation as the most workable of all state laws, the fact that such controls do not exist in neighboring states allows those who wish to trade illegally in barbiturates merely to travel to other areas where they can be purchased across the counter and then bring them back into our State; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact legislation for the control of dangerous drugs similar to the California Dangerous Drug Act; and be it further

Resolved, That the Secretary of the Senate is hereby requested to transmit copies of this resolution to the President of the Senate, the Speaker of the House of Representatives of the Congress of the United States and to each Senator and Representative from California in the Congress of the United States.

CHAPTER 140

Federal narcotic enforcement

WHEREAS, Narcotic addiction among thrill-seekers, chiefly under the age of 21, is mounting at a most unhealthy pace, resulting in an alarming increase in the number of addictions; and

WHEREAS, It is the opinion of veteran narcotic enforcement officers that by far the most dangerous offenders in this traffic are those who engage in it from the profit motive only, those who are nonusers and who, for the sake of money, cold bloodedly and viciously ensnare our youth and our adults into narcotic addiction; and

WHEREAS, The drugs now composing the major law enforcement problem in our State are heroin, marihuana, and barbiturates; and

WHEREAS, The supply of heroin, marihuana, and many other narcotics is primarily obtained by smuggling these drugs into this Country from other countries; and

WHEREAS, The present staff of federal enforcement agents is totally incapable of effecting the necessary search and border inspection to reduce substantially the illegal importation of narcotics from other countries; and

WHEREAS, At present the state and local narcotic enforcement officers have no authority until the drugs have entered our Country, at which time the drugs are distributed so rapidly that the problem of tracking them down is multiplied beyond description; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to increase the staff of federal enforcement agents and the number of border inspections; and be it further

Narcotic Drugs Import and Export Act

WHEREAS, The recent reports of the pathetic and tragic cases of narcotic addiction by teen-age youngsters have shocked the citizens of this State; and

WHEREAS, Narcotic addiction among thrill-seekers, chiefly under the age of 21, is mounting at a most unhealthy pace, resulting in an alarming increase in the number of addictions; and

WHEREAS, It is the belief of our own enforcement agencies that there exists a deliberate exploitation of naive boys and girls by drug traffickers, who aim to open up a rich new market by enslaving a huge new crop of addicts; and

WHEREAS, It is the opinion of veteran narcotic enforcement officers that by far the most dangerous offenders in this traffic are those who engage in it from the profit motive only, those who are nonusers and who, for the sake of money, cold bloodedly and viciously ensnare our youth and our adults into narcotic addiction; and

WHEREAS, The drugs now composing the major law enforcement problem in our State are heroin, marihuana, and barbiturates; and

WHEREAS, The League of Nations, United Nations, and many enforcement agencies have recommended more severe sentences as one of the best methods to suppress the use and traffic of narcotics; and

WHEREAS, The penalties in the Narcotic Drugs Import and Export Act for second and subsequent narcotic offenders are wholly inadequate to stem the rising tide of illegal drug activity; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to amend Section 2 of the Narcotic Drugs Import and Export Act to increase the penalties for second and subsequent narcotic offenders; and be it further

Resolved, That the Secretary of the Senate is hereby requested to transmit copies of this resolution to the President of the Senate, the Speaker of the House of Representatives of the Congress of the United States and to each Senator and Representative from California in the Congress of the United States.

Add Subsection (1.1) to, and amend Subsections (3) and (4) of, Section 33 of the Charter to read as follows:

DEFINITIONS.

Definitions

(1.1) The following words and phrases as used in this Section, unless a different meaning is plainly required by the context, shall have the following meaning:

"Retirement allowance," or "allowance," shall mean equal monthly payments, beginning to accrue upon the date of retirement, and continuing for life unless a different term of payment is definitely provided by the context.

"Compensation," as distinguished from benefits under the Labor Code of the State of California, shall mean all remuneration, whether in cash or by other allowances made by the City for service qualifying for credit under the Retirement System; provided that when the compensation of a member is a factor in any computation to be made under this System, there shall be excluded from such computation any compensation based on overtime put in by a member. For the purpose of this System, overtime is the aggregate service performed by an employee as a member in all positions, in excess of the hours of work considered normal for employees on a full-time basis and for which monetary compensation is paid.

"Compensation earnable" shall mean the monthly compensation as determined by the Board of Administration, which would have been earned by the member had he worked, throughout the period under consideration, the average time ordinarily worked by persons in the same grade or class of positions as the positions held by him during such period and at the rate of pay attached to such positions. The computation for any absence of a member shall be based on the compensation earnable by him at the beginning of the absence, and that for time prior to entering the employ of the City, shall be based on the compensation earnable by him in the position first held by him in such employ.

"Benefit" shall include "allowance," "retirement allowance," and "death benefit."

"Accumulated normal contributions" shall mean the sum of all contributions plus interest.

"Accumulated additional contributions" shall mean the sum of all additional contributions plus interest.

"Accumulated contributions" shall mean accumulated normal contributions plus accumulated additional contributions.

"Final compensation" means the highest average compensation earnable by a member during any period of five consecutive years of service; compensation earnable to be computed as described in the definition of "compensation earnable". For the purposes of this paragraph, periods of service separated by breaks in service may be aggregated to constitute a period of five consecutive years, if the periods of service are consecutive

except for such breaks. If a break in service did not exceed six months in duration, time included in the break and compensation earnable during such time shall be included in the computation of final compensation. If a break in service exceeded six months in duration, the first six months thereof and the compensation earnable during those six months shall be included in the computation of final compensation, but time included in the break which is in excess of six months and the compensation earnable during such excess time shall be excluded in the computation of final compensation.

"Member" means any officer or employee who is included in the membership of this Retirement System.

"Retirement System" or "System" shall mean Oakland Municipal Employees' Retirement System as heretofore created under authority granted in this Section, said Retirement System being hereby continued in effect.

"Board" or "Retirement Board" shall mean board of administration as created in this Section.

Words used in the masculine gender shall include the feminine and neuter genders, and singular numbers shall include the plural and the plural the singular.

"Interest" shall mean interest at the rate adopted by the Retirement Board.

"Service" shall mean any service rendered prior to July 1, 1939, as an employee of the City of Oakland, which for the purpose of this System is designated as "prior service"; and any service rendered after June 30, 1939, in a status requisite for membership in the Retirement System, but only prior service and service rendered as a member of the Retirement System shall be credited under the System.

This Subsection shall become effective on July 1, 1953, or the 1st day of the month next following approval by the Legislature, whichever is later.

WHO MAY BE RETIRED—RETIREMENT BENEFITS.

Retirement Eligibility and benefits

(3) Any member who completes at least twenty years of service in the aggregate with which he is entitled to be credited under the System, and attains the age of fifty-two years, or completes at least 10 years of such service and attains the age of sixty years, may retire for service at his option. Members shall be retired for service on the first day of the month next following the attainment by them of the age of seventy years, regardless of length of service. Upon retirement for service after the effective date hereof, a member shall receive a service retirement allowance equal to the fraction of one-sixtieth of his final compensation, set forth opposite his age at retirement, taken and applied by interpolation of said fractions to the preceding completed quarter year of age, in the following table

in the column applicable to his sex, multiplied by the number of years of service with which he is entitled to be credited:

64	1.2444586	1.2487750
65 and over	1.3147929	1.3216755

The fractions herein set forth at ages other than age 60 are based on the interest rate and mortality tables used under the Retirement System on the effective date hereof, and shall be adjusted by the Board in accordance with such interest and mortality tables as the Board may adopt thereafter.

The Retirement System also shall provide for retirement for disability after ten years of service credited under the System, and before age 60, and for death benefits for members of the System. The City Council also shall provide that a member retiring may elect, before the first payment of the retirement allowance is made, to receive the actuarial equivalent of his allowance in a lesser allowance to be received by him throughout his life and in other benefits payable after his death to another person, including an allowance throughout the life of such person.

For the purpose of this Section, the qualifying ten year periods of service shall be accumulated during any continuous periods of not more than twelve years, provided any absence from or return to actual service during such twelve-year periods is approved by the Civil Service Board in the case of persons in the classified civil service or by the City Council in the case of other persons within the Retirement System.

This Subsection shall become effective on July 1, 1953, or the 1st day of the month next following approval by the Legislature, whichever is later.

MEMBERS' AND CITY'S CONTRIBUTIONS.

Same: Contributions

(4) Contributions to the Retirement System, required of members and the City, shall be as follows:

(a) The normal rate of contribution of each member as determined by the actuary and approved by the Board and to be effective on the effective date hereof, shall be based on his

nearest age at the effective date of his membership in the Retirement System, and if effective from the effective date of his membership, shall be such as, on the average for such member, will provide, assuming service without interruption from said effective date until retirement, one-half of the portion of the service retirement allowance which is based on such service, and to which he would be entitled if retired at age sixty. The normal rate established for age 59 shall be the rate for any member who has attained a greater age before entrance into the System, and that established for age 20 shall be the rate for any member who enters the System at a lesser age. Members' normal rates of contributions shall be changed by the Board on the basis of the periodical actuarial valuation and investigation provided by the Charter. No adjustment shall be included in members' normal rates because of time during which they have contributed at different rates.

(b) There shall be deducted from each payment of compensation made to a member, a sum determined by applying the member's normal rate of contribution to such compensation. The sum so deducted shall be paid forthwith to the Retirement System, and shall be credited to the individual account of the member from whose compensation it was deducted, and the total of said contributions, together with interest credited thereon, shall be applied to provide part of the retirement allowance granted to said member; or said total of said contributions, together with interest credited thereon shall be paid to said member upon termination of his employment by the City prior to retirement, or to his estate or beneficiary upon his death, in the manner provided by the City Council. The City Council, however, shall provide for election by members who are entitled to be credited with at least 10 years of service and whose employment is terminated by cause other than death or retirement, to allow their accumulated contributions to remain in the Retirement Fund, to continue as members of the System and to be subject to the same age and disability requirements as apply to other members for service or disability retirement, but they shall not be subject to a minimum service requirement, and the minimum retirement allowances shall not apply to them, unless they meet such minimum service requirement. Subject to rules prescribed by the Board, any member may elect to make contributions in excess of his contributions herein required, for the purpose of providing additional benefits, and benefits provided hereunder for such member shall be exclusive of such additional benefits. The exercise of this privilege by a member shall not require the City to make any contributions. Additional contributions shall be administered in the same manner as normal contributions.

(c) Contributions deducted prior to the effective date hereof, from compensation of members of the System, and standing with interest thereon, to the credit of such members on the records of the Retirement System on said date, shall continue to be credited to the individual accounts of said members and shall

be combined with and administered in all respects in the same manner as the contributions deducted after said date.

(d) The total contributions, with interest thereon, made by or charged against the City and standing to its credit, on the effective date hereof, in the accounts of the Retirement System, shall be applied to provide part of the benefits under this System.

(e) The City shall contribute to the Retirement System such amounts as may be necessary, when added to the contributions referred to in the preceding paragraphs of this Section 33, to provide the benefits payable under the System. Such contributions of the City to provide the portion of the benefits hereunder which shall be based on service rendered prior to July 1, 1939, shall not be less during any fiscal year than the amount of such benefits paid during said year. Such contributions of the City to provide the portion of the benefits hereunder which shall be based on service rendered by respective members on and after July 1, 1939, shall be made in annual installments, and the installment to be paid in any year shall be determined by the application of a percentage to the total compensation paid to members during said year. Said percentage shall be the ratio of the value at the date of the periodical actuarial valuation and investigation into the experience under the System as provided by the Charter, of the benefits thereafter to be paid from contributions of the City, less the amount of such contributions, and plus accumulated interest thereon, then held by said System to provide said benefits on account of service rendered by respective members on and after July 1, 1939 to the value at said date of compensation thereafter payable to said members. Said values shall be determined by the actuary, who shall take into account the interest which shall be earned on said contributions, the compensation experience of members, and the probabilities of separation by all causes, of members from service before retirement and of death after retirement. Said percentage shall be changed by the Board on the basis of said values determined in said periodical actuarial valuation and investigation into the experience under the System. The initial percentage to be used under this Section, shall be six and eighty-four hundredths per cent (6.84%) until redetermined by the Board of Administration on the basis of the periodical investigation and actuarial valuation under the System.

This Subsection shall become effective on July 1, 1953, or the 1st day of the month next following approval by the Legislature, whichever is later.

FINANCING OF HARBOR AND AIRPORT OPERATIONS

Port of Oakland: General obligation bonds

Sec. 223 (1). General Obligation Bonds of the City. The City of Oakland may from time to time incur general obligation bonded indebtedness in the manner provided by law for the acquisition, construction or completion of any port facilities or improvements of the Port of Oakland, including land, rights of way and air easements. The proceeds from the sale of any general obligation bonds now authorized, or which may hereafter be authorized, for any such purposes, shall be under the control of, and shall be expended by, the Board for the objects and purposes for which such general obligation bonded indebtedness was incurred. Whenever, in the opinion of the Board, it is desirable for the City of Oakland to incur additional general obligation bonded indebtedness for any project within the jurisdiction or control of the Board, the Board shall prepare tentative plans, estimates and bond retirement schedules and submit its recommendations in writing to the City Council, which shall thereupon take such action as it deems advisable to reject or carry out such recommendations.

Same Revenue bonds

Sec. 223 (2). Revenue Bonds of the Board. In addition to all powers herein granted to the City of Oakland, and as an alternative procedure for the financing of harbor and airport improvements, the Board is authorized to issue revenue bonds payable exclusively from the revenues of a project as in this Section 223 defined and such revenue bonds shall not constitute a debt, liability or obligation of the City of Oakland and shall be payable exclusively from revenues, and other funds (including interest thereon) which may be established as additional security for said revenue bonds, as in this Section 223 provided.

Financing methods

Sec. 223 (3). Methods of Financing Not Exclusive. Nothing in this Section 223 contained shall in any way abridge, control, limit, restrict or revoke the power of the electors of the City of Oakland to vote for and cause to be authorized and issued general obligation bonds of the City of Oakland for the acquisition, construction or completion of any project herein defined, or any additions thereto or betterments or improvements thereof, irrespective of whether or not revenue bonds

for such purpose have been, or may thereafter be issued hereunder, and nothing herein contained shall prevent the financing of any project or any additions, betterments or improvements thereof from any other funds which may be legally available for that purpose. Revenue bonds authorized to be issued hereunder shall not be subject to charter limitations as to the amount of general obligation bonded indebtedness of the City of Oakland, nor be taken into consideration in determining the amount of general obligation bonded indebtedness which the City of Oakland is authorized to incur, and the issuance of revenue bonds as in this Section 223 provided shall be deemed to constitute a supplemental and additional method of providing funds for the financing of harbor and airport improvements. Such revenue bonds shall be issued in the name of the Board of Port Commissioners of the City of Oakland and shall constitute obligations only of the Board, payable in accordance with their terms from revenues of any project, as in this Section 223 authorized.

Definitions

Sec. 223 (4). Definitions. The following terms whenever used or referred to in this Section 223, or in any resolution authorizing the issuance of revenue bonds, shall have the following meanings, respectively, unless a different meaning appears from the context:

(a) Revenue Bonds. The term "revenue bonds" means the written evidence of any obligation issued by the Board, payment of which is secured by a pledge of revenues or any part of revenues, as provided in this Section, in order to obtain funds with which to carry out any of the purposes of this Section, irrespective of the form of such obligation.

(b) Project. The term "project" means (i) any one or more, or all of, the harbor and port facilities referred to in Section 212 of this Charter and (ii) any airport facilities, the jurisdiction and control over which have been, or may hereafter be, vested in the Board by the City of Oakland; provided that the Board may limit or restrict the term "project" to any particular facility or facilities which may be designated by the Board as a specific project in any resolution of issue for the purpose in such resolution provided.

(c) Revenues. The term "revenues" means and includes any and all rates, tolls, fees, rentals and other charges received or receivable in connection with, and any and all income and receipts of whatever kind and character derived by the Board from, the operation of a project, or arising from a project, including any such revenues as may have been or may be impounded or deposited in any fund created for the security or further protection of revenue bonds or for the purpose of providing for the payment of the principal thereof or the interest thereon. The term "revenues" also includes net revenues from any existing facilities under the jurisdiction of the Board to the extent that the same shall be pledged or otherwise made available for the payment of principal and interest of revenue

bonds or as security or further protection for revenue bonds issued by the Board.

(d) Resolution of Issue. The term "resolution of issue" means any agreement entered into by the Board, including any resolution adopted by the Board, pursuant to which revenue bonds are issued, and includes any agreement entered into or resolution adopted by the Board amending, modifying or supplementing a resolution of issue irrespective of the form thereof.

Rates, etc

Sec. 223 (5). Rates, Tolls and Charges. Without limiting any power in this Charter conferred upon the Board, the Board has power for any of the purposes of this Section 223 to fix rates, tolls, fees, rentals or charges for the use of the facilities provided by any project, or for any services rendered in connection therewith, and to alter, change or modify the same at its pleasure, subject to any contractual obligation which may be entered into by the Board with respect to the fixing of such rates, tolls, fees, rentals or other charges; and, by a resolution of issue or otherwise, to enter into covenants to increase rates, tolls, fees, rentals or other charges from time to time; provided, however, that any person shall be permitted to use or operate any facilities provided by any project only upon payment of the regularly established charge therefor, except as may be otherwise specifically provided in a resolution of issue. All rates, fees, rentals and other charges shall be paid only in such coin or currency as on the date of payment is legal tender for public and private debts.

Resolution of issue

Sec. 223 (6). Authorization of Revenue Bonds. Each issue of revenue bonds shall be authorized by the Board by a resolution of issue adopted by the affirmative votes of at least four (4) members of the Board at a duly assembled meeting. Each resolution of issue shall prescribe the purpose or purposes for which, and the terms and conditions on which, said revenue bonds are to be issued.

Revenue bonds

Sec. 223 (7). Provisions Relating to Revenue Bonds. The Board shall have power to determine all of the terms and conditions of the issuance and sale of revenue bonds pursuant to this Section 223, and without limiting in any way the generality of such power, the Board is expressly authorized in its discretion to provide, in connection with any issue of such revenue bonds, as follows:

(a) Series and Divisions. Revenue bonds may be issued in series, and any issue may be divided into one or more series or divisions with different maturities or dates for each series or division, different rates of interest and different terms and conditions for the bonds of the several series or divisions. Revenue bonds of the same authorized issue need not be of the same kind or character, have the same security, or be of the same interest rate, but the terms thereof in each case shall be as provided for by the Board.

(b) Form and Date of Bonds. Bonds shall be of such form and tenor and shall bear such date or dates as may be prescribed by the resolution of issue.

(c) Maturity. Bonds may be serial bonds or sinking fund bonds with such maturity or maturities as shall be provided in the resolution of issue. No bond by its terms shall mature in more than forty (40) years from its own date and, in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date of each such series or division shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized issue.

(d) Interest. Bonds shall bear interest at a rate of not to exceed six (6) per cent. per annum, payable annually or semi-annually, or in part annually and in part semi-annually.

(e) Coupon or Registered Bonds. Bonds may be issued as coupon bonds or as registered bonds, with or without coupons, with appropriate provisions for the interchange of coupon bonds for registered bonds and registered bonds for coupon bonds; bonds may be registered as to principal only, or as to both principal and interest; and new bonds or coupons may be issued in place of bonds or coupons which have been surrendered and cancelled whenever appropriate as incidental to the discharge of any bond from registration; all on such terms and conditions, and at such place or places, within or without the State of California, as the Board may determine.

(f) Redemption. Bonds may be callable upon such terms and conditions, at the option of the Board or by operation of any sinking fund, and upon such notice as the resolution of issue shall prescribe and upon payment of such premium (not exceeding six (6) per cent. of the par value of such bonds) as may be fixed in the resolution of issue. No bond shall be subject to call or redemption prior to its fixed maturity date, unless the right to exercise such call is expressly stated on the face of the bonds.

(g) Source of Payment. All revenue bonds shall be payable exclusively from revenues as more particularly defined in the resolution of issue.

(h) Reference on Bonds to Resolution of Issue. Reference on the face of a revenue bond to the resolution of issue by its date of adoption shall be sufficient to incorporate all of the provisions thereof and of this Section 223 into the body of said revenue bond and its appurtenant coupons and each taker and subsequent holder of a revenue bond or coupons, whether such coupons are attached to or detached from said revenue bond, shall have recourse to all of the provisions of the resolution of issue and of this Section 223 and shall be bound thereby.

(i) Recital in Bonds. Bonds may contain a recital that all acts, conditions and things required to exist, to happen and to be performed, precedent to and in the issuance of the bonds have existed, happened and been performed in due time, form

and manner as required by law and this Charter, all of which facts the Board is authorized to find and determine prior to the issuance of the bonds. Revenue bonds shall also contain a recital on their face that neither the payment of principal of nor of interest on such bonds constitutes a debt, liability or obligation of the City of Oakland.

(j) Place and Manner of Payment. The principal of and interest on bonds may be payable at any one or more places within or without the State of California and in any specified coin or currency of the United States of America, as may be provided in the resolution of issue.

(k) Execution and Authentication of Bonds; Validity of Signatures and Countersignatures. Bonds may be executed and authenticated by the manual, lithographed or printed facsimile signature of any officer or officers of the Board and may also be authenticated by a trustee or fiscal agent appointed by the Board. If any of the officers whose signatures or countersignatures appear on the bonds cease to be officers before the delivery of the bonds or coupons to the purchasers thereof, their signatures or countersignatures shall nevertheless be valid and of the same force and effect as if such officers had remained in office until the delivery of the bonds and coupons.

(*l*) Issuance of Temporary Bonds. Pending the actual issuance or delivery of definitive bonds, the Board may issue temporary or interim bonds, certificates or receipts of any denominations whatsoever, and with or without coupons, and with such provisions as the Board shall determine, to be exchanged for definitive bonds when ready for delivery. In the absence of an express recital on its face that a temporary bond or interim receipt is non-negotiable, such bond or interim receipt is a negotiable instrument.

(m) Replacement of Lost, Destroyed, Mutilated or Stolen Bonds. Lost, destroyed, mutilated or stolen bonds or coupons may be replaced as provided in the resolution of issue.

(n) Security. All revenue bonds shall be secured by an exclusive pledge and charge upon all or a portion of the gross revenues of any project for or in connection with which said revenue bonds are issued or authorized to be issued, including revenues of any existing facilities, all as provided for in the resolution of issue. Gross revenues of a project may include revenues from additions, betterments, improvements and extensions of such project later constructed or acquired. The gross revenues of a project and any interest earned on the gross revenues of such project shall constitute a trust fund for the security and payment of the principal of and interest on the revenue bonds and so long as any revenue bonds or interest thereon are unpaid said revenues and interest shall not be used for any other purpose; provided, however, that a resolution of issue may provide that if the principal of and interest on the bonds and all charges to protect and secure them are paid when due, an amount for the maintenance and operation costs of a

project may be apportioned from revenues, but only to the extent specified in the resolution of issue.

(o) Revenue Bonds of same Issue to be Equally Secured. Revenue bonds of the same issue shall be equally secured by a pledge and charge upon revenues, without preference or priority by reason of number, date of bonds, or date of sale, execution, or delivery of bonds; except that if the Board authorizes the issuance of bonds of different series it may provide that the bonds in any series shall, to the extent and in the manner prescribed in the resolution of issue, be subordinated and be junior in standing with respect to the payment of principal and interest and the security thereof to such other bonds as may be specified in the resolution of issue.

(p) Refunding Bonds. Refunding bonds may be issued and sold or exchanged for the purpose of redeeming, retiring or refunding any revenue bonds issued under this Section 223, subject to any limitations contained in the resolution of issue pursuant to which such revenue bonds are issued. All provisions of this Section applicable to the issuance of revenue bonds shall be applicable to the refunding bonds and to the issuance, sale or exchange thereof. Refunding bonds may be issued in a principal amount sufficient to provide funds for the payment of all bonds to be refunded thereby, and, in addition, for the payment of all expenses incident to the calling, retiring or paying of such outstanding bonds and the issuance of such refunding bonds. Such expenses may include the difference in amount between the par value of the refunding bonds and any amount less than par for which the refunding bonds are sold, any amount necessary to be made available for the payment of interest upon such refunding bonds from the date of sale thereof to the date of payment of the bonds to be refunded, or to the date upon which the bonds to be refunded will be paid pursuant to call thereof, and also the premium, if any, necessary to be paid in order to call and retire the outstanding bonds and the interest accruing thereon to the date of call or retirement.

(q) Validity of Revenue Bonds not Affected by Actions of City or Board Relative to Project. The validity of the authorization and issuance of any revenue bonds by the Board shall not be dependent on or affected in any way by:

(i) Proceedings taken by the City or the Board for the acquisition, construction or completion of any project or any part thereof;

(ii) Any contracts made in connection with the acquisition, construction or completion of any project; or

(iii) The failure to complete any project for which bonds are authorized to be issued.

(r) Sale of Revenue Bonds. Notice inviting sealed bids shall be given in such manner as the Board may prescribe prior to any sale of revenue bonds. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder. If no bids are received or if the Board determines that the bids received are not satisfactory as to price or

responsibility of the bidders, the Board may reject all bids received, if any, and either readvertise or sell the bonds at private sale. The Board may sell bonds at a price below the par or face value thereof, provided that the maximum net interest cost (computed on a 360-day year basis) on bonds sold below par or face value shall not exceed an average of six (6) per cent. per annum, payable semi-annually, to the respective maturity dates of said bonds.

(s) Payment of Incidental Expenses and Interest and Creation of Funds from Proceeds of Sale of Revenue Bonds. All costs and expenses incidental to the issuance and sale of revenue bonds, including the cost of preparation of the revenue bonds and coupons, the cost of all surveys, of preparation of plans and specifications, of all architectural, engineering, inspection, legal, financial and economic consultant's, trustee's and fiscal agent's fees, the creation of a bond reserve fund, the creation of a working capital fund, and bond interest estimated to accrue during the period of acquisition or construction of a project and for a period of not to exceed three (3) years thereafter, all as provided for in the resolution of issue, may be paid out of the proceeds of sale of the revenue bonds.

Sec. 223 (8). Provisions Relating to Resolutions of Issue. The Board is hereby further authorized in its discretion to provide in and by each resolution of issue which may be adopted by the Board as follows: Resolution of issue

(a) Construction Fund. The proceeds of sale of revenue bonds shall either be deposited in a fund separate and apart from all other funds of the City and the Board or paid direct to any bank or trust company designated by the Board as its fiscal agent, and said proceeds shall be held either by the City or such fiscal agent in a separate account to be designated the "Construction Fund" and be disbursed in the manner and upon the conditions provided in the resolution of issue for the object and purpose of the acquisition, construction and completion of the project therein designated, or for additions, betterments or improvements thereof, including the payment of all incidental expenses and interest and the creation of funds as provided for in subparagraph (s) of paragraph 7 of this Section 223. Moneys in any construction fund may be invested as the Board in its sole discretion shall determine, subject only to such limitations as may be provided in the resolution of issue. Moneys in a construction fund remaining unexpended after said object and purpose shall have been completed may be applied to the payment of the principal of and interest on said revenue bonds, and none of said moneys may be transferred to any other fund of the City or the Board or used for any purpose other than as specified in the resolution of issue.

(b) Continuous Operation of Project; Repairs, Renewals and Replacements. So long as any bonds thereby authorized shall be outstanding, the City and the Board shall operate the project designated in the resolution of issue continuously and in an efficient and economical manner and in good working

order and condition and shall make all necessary repairs, improvements and replacements; provided that the Board in its discretion may, subject to the terms of any resolution of issue. abandon or discontinue operation of any one or more facilities comprising a part of a project.

(c) Rates, Fees and Other Charges. The Board will prescribe, revise and collect rates, tolls, fees, rentals and charges for use of the facilities provided by the project, the revenues from which are pledged to secure the bonds; and the Board will provide that such rates, tolls, fees, rentals and charges shall at all times be sufficient to yield revenues from such project and from any existing facilities the revenues from which are pledged to secure any bonds equal to all redemption payments and interest charges on said revenue bonds as the same fall due, together with such additional sums as may be required for any sinking fund, reserve fund or other special fund provided for the security or further protection of said revenue bonds, or as a depreciation charge or other charge in connection with such project, and that such rates, tolls, fees and charges shall not be reduced below an amount sufficient to provide funds to meet all obligations specified in the resolution of issue.

(d) Holding and Application of Revenues. The Board shall be required to hold or cause to be held in trust the revenues pledged to the payment of the principal of and interest on the bonds issued pursuant to said resolution of issue, or to any reserve or other fund created for the security or further protection of the bonds, and to apply such revenues or cause them to be applied only as provided in the resolution of issue.

(e) Preservation and Protection of Security of Bonds. The Board shall be required to preserve and protect the security of the bonds issued thereunder and the rights of the holders and to warrant and defend such rights and, also, to pay and discharge or cause to be paid and discharged all lawful claims for labor, materials and supplies or other charges which, if unpaid, might become a lien or charge upon revenues, or which might impair the security of any revenue bonds. Any right, power or privilege of the City or the Board to mortgage or otherwise encumber, or to sell, lease or dispose of a project or to enter into any lease or agreement which impairs or impedes the operation of a project or of any part thereof necessary to provide adequate revenues, or which otherwise impairs or impedes the rights of the holders of the bonds with respect to such revenues, may be limited, restricted or prohibited except upon such terms and conditions as may be provided in the resolution of issue.

(f) Proceeds of Project Taken by Eminent Domain. If any part of a project shall be taken by eminent domain or other proceeding authorized by law, the proceeds to the City or the Board therefrom shall be applied to the replacement of such project or to the payment and retirement of the bonds or otherwise as set forth in said resolution of issue.

(g) Insurance. Insurance of specified kinds and amounts shall be maintained by the Board on a project, or any part thereof (including insurance of any project against loss of revenues from any cause whatsoever, against public liability or property damage and against loss by fire or any other hazard, as may be provided in any resolution of issue). The premiums thereon shall be paid by the Board from revenues, or other specified funds or sources of income, and the use and disposition of proceeds of any such insurance thereafter collected shall be as specified in such resolution.

(h) Books, Records and Accounts.

(i) The Board will keep accurate books and records of account showing all revenues received from the operation of any project and all expenditures thereof, and all revenues from any facilities pledged or otherwise made available as security or as further protection for the revenue bonds issued pursuant to said resolution of issue.

(ii) All such books and records shall be be open at all times during business hours to the inspection of the holders of one or more of the bonds or of any specified percentage of such holders or their duly authorized representatives.

(iv) Summaries of all such statements will be published at least annually in the official newspaper of the City.

(v) The books and records of the City and the Board pertaining to the operation of any project and to all of said other revenues shall be audited by independent public accountants in such manner and under such circumstances as may be set forth in the resolution of issue.

(i) Trustee; Fiscal Agent; Paying Agents. A bank or trust company qualified to do business in the State of California shall be appointed as a trustee or fiscal agent for the Board and holders of bonds issued under said resolution of issue, and any such trustee may be authorized to act on behalf of the holders of the bonds or any stated percentage thereof, and to exercise and prosecute on behalf of the holders of the bonds such rights and remedies as may be available to the holders. The Board may be authorized to designate any bank or trust company in any city in which any bonds are made payable as the Board's paying agent in such city, and may fix and determine the conditions upon which any trustee, fiscal agent or paying agent shall receive, hold or disburse any or all revenues deposited with it by or by authority of the Board. A resolution of issue may prescribe the duties and powers, if any, of any such trustee, fiscal agent or paying agent with respect to the issuance, authentication, sale and delivery of the bonds, the payment of the principal thereof and interest thereon, the redemption thereof, the registration and discharge from registration of bonds and the man-

agement of any funds provided for in the resolution of issue as security for the bonds.

(j) Competitive Projects. Neither the City nor the Board shall, while any revenue bonds authorized by this Section 223 are issued or outstanding, acquire, construct, complete or maintain any projects or facilities or places within or without the City of Oakland, which compete in any way with any project or which are similar to any facilities or projects maintained or operated by the City or the Board through the issuance of revenue bonds pursuant to this Section 223.

(k) Limitation on Additional Indebtedness. The incurring of additional indebtedness payable in whole or in part from the revenues charged with payment of the revenue bonds issued pursuant to such resolution of issue shall be limited, restricted or prohibited as provided in such resolution.

(*l*) Events of Default. The rights, limitations, powers and duties arising upon breach by the Board of any of its covenants, agreements or obligations shall be as contained in the resolution of issue, which may also provide the terms and conditions upon which all bonds issued thereunder may be declared or become due and payable prior to maturity and the terms and conditions upon which such declaration and its consequences may be waived.

(m) Amendment or Modification of Resolution of Issue. A resolution of issue may prescribe a procedure by which the terms and conditions of the bonds and the resolution of issue may be subsequently amended or modified with the consent of the Board and the vote or written assent of the holders of a specified principal amount or proportion of the bonds issued and outstanding, including provision for meetings with bondholders and the manner in which the consents of the bondholders may be given. A resolution of issue may set forth a specific statement of the effect of each such amendment or modification upon the rights of the holders of all of the bonds and interest coupons appertaining thereto. If desired, a resolution of issue may contain a provision that bonds held by the Board or by the City or by the State of California or any public corporation, political subdivision, city, county, district or any agency of any thereof, shall not be counted as outstanding bonds or be entitled to vote or consent, but shall nevertheless be subject to any such amendment or modification.

(n) Use of Surplus. After all of the revenue bonds issued pursuant to a resolution of issue shall have been fully paid or discharged, or provision for their payment and discharge irrevocably made, any surplus moneys in any construction fund or other fund provided for the security or further protection of the bonds may, subject to the limitations and restrictions in said resolution of issue, become subject to control of the Board and be expended by the Board for any lawful purpose.

(o) Additional Covenants and Agreements. The Board will take such other action and do such other things and make any and all such additional covenants and agreements as the Board shall

deem necessary or advisable for the better security of the bonds or to make the bonds more marketable.

Sec. 223. (9). Rights of Bondholders. Except as provided otherwise in any resolution of issue, the holder of any bond issued pursuant to this Section 223 may, by mandamus or other appropriate proceedings, require and compel the performance of any of the duties imposed upon the Board or the City or the Council or any official or employee of the Board or the City or assumed by any thereof in connection with the acquisition, construction, completion, operation, maintenance, repair, reconstruction or insurance of any project, or the collection, deposit, investment, application and disbursement of rates, fees and charges derived from the operation and use of any project and all other revenues, or in connection with the deposit, investment or disbursement of the proceeds received from the sale of the bonds under this Section. Issues of bonds

Section 85. Issues of Bonds: Series and Divisions. The Council may provide for one or several issues of bonds and may issue bonds in series, or may divide any issue into one or more series or divisions and fix different maturities or dates for each series or division, different rates of interest, or different terms and conditions for the bonds of the several series or divisions. It is not necessary that all bonds of the same authorized issue be of the same kind or character, have the same security, or be of the same interest rate, but the terms thereof shall in each case be provided for by the Council by a resolution of issue at the time of or prior to the issue thereof.

Resolution of issue

Section 85.1. Authorization of Revenue Bonds. Each issue of revenue bonds shall be authorized by the Council by a resolution of issue adopted by affirmative votes of at least five (5) members of the Council at a duly assembled meeting. Resolutions of issue shall provide for the aggregate principal amount, date or dates, maturities, interest rates, denominations and form, and may provide for the registration, transfer and interchange, of any revenue bonds and coupons issued pursuant to this Article; and shall prescribe the purpose or purposes for which said bonds are to be issued and the terms and conditions on which said bonds are to be executed, issued, secured, sold and paid, and, if desired, the terms and conditions on which said bonds may be redeemed prior to maturity or refunded.

Bonds and resolutions of issue

Section 85.2. Provisions Relating to Bonds. The provisions of Sections 85.3 to 85.18, inclusive, shall govern and apply to (a) all revenue bonds issued pursuant to this Article and (b) each resolution of issue relating to the bonds thereby authorized.

Section 85.3. Date of Bonds. Bonds shall bear dates prescribed by the resolution of issue.

Section 85.4. Maturity. Bonds may be serial bonds or sinking fund bonds with such maturities as shall be provided in the resolution of issue. No bond by its terms shall mature in more than forty (40) years from its own date and, in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date of each series or division shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized issue.

Section 85.5. Interest. Bonds shall bear interest at a rate of not to exceed six (6) per cent per annum, payable annually or semi-annually, or in part annually and in part semi-annually.

Section 85.6. Coupon or Registered Bonds. Bonds may be issued as coupon bonds or as registered bonds. A resolution of issue may provide for the interchange of coupon bonds for registered bonds and registered bonds for coupon bonds, and may provide that the bonds shall be registered as to principal only, or as to both principal and interest, or otherwise as the resolution of issue shall prescribe.

Section 85.7. Redemption. Bonds may be callable upon such terms and conditions and upon such notice as the resolution of issue shall prescribe and upon payment of such premium (not exceeding six per cent (6%) of the par value of such bonds), if any, as may be fixed in the resolution of issue. No bond shall be subject to call or redemption prior to its fixed maturity date, unless the right to exercise such call is expressly stated on the face of the bond.

Section 85.8. Source of Payment. All revenue bonds shall be payable exclusively from revenues.

Section 85.9. Reference on Bonds to Resolution of Issue. Reference on the face of a revenue bond to the resolution of issue by its date of adoption is sufficient to incorporate all of the provisions thereof and of this Article into the body of said revenue bond and its appurtenant coupons. Each taker and subsequent holder of a revenue bond or coupons, whether such coupons are attached to or detached from said revenue bond, shall have recourse to all of the provisions of the resolution of issue and of this Article and shall be bound thereby.

Section 85.10. Recital in Bonds. All revenue bonds shall contain a recital on their face that neither the payment of principal of nor of interest on such bonds constitutes a debt, liability or obligation of the City of Berkeley, except as provided in this Article.

Section 85.11. Place and Manner of Payment. The principal of and interest on bonds may be paid at any one or more places within or without the State of California and in any specified coin or currency of the United States of America, as may be provided in the resolution of issue.

Section 85.12. Execution and Authentication of Bonds; Validity of Signatures and Countersignatures. Bonds may be executed and authenticated by the manual, lithographed or printed facsimile signature of any officer or officers of the City and may also be authenticated by a trustee or fiscal agent appointed by the Council, all as may be provided in the resolution of issue. If any of the officers whose signatures or countersignatures appear on the bonds cease to be officers before the delivery of the bonds or coupons to the purchasers thereof, their signatures or countersignatures shall nevertheless be valid and of the same force and effect as if such officers had remained in office until the delivery of the bonds and coupons.

Section 85.13. Issuance of Temporary Bonds. Pending the actual issuance or delivery of definitive bonds, the Council may issue temporary or interim bonds, certificates or receipts of any denominations whatsoever, and with or without coupons, and with such provisions as the Council may determine, to be exchanged for definitive bonds when ready for delivery. In the absence of an express recital on its face that a temporary bond or interim receipt is non-negotiable, such bond or interim receipt is a negotiable instrument.

Section 85.14. Replacement of Lost, Destroyed, Mutilated or Stolen Bonds. Lost, destroyed, mutilated or stolen bonds or coupons may be replaced as provided in the resolution of issue.

Section 85.15. Security. All revenue bonds shall be secured by an exclusive pledge and charge upon all or a portion of (a) the gross revenues of the project for the acquisition, construction and completion of which said bonds are issued or authorized to be issued, (b) revenues from on-street parking meters, and (c) revenues of any existing off-street parking facilities, all as provided for in the resolution of issue. Gross revenues of a project include improvements and extensions of such project later constructed or acquired. The gross revenues of the project, any interest earned on the gross revenues of the project, and all pledged on-street parking meter revenues and pledged revenues of existing off-street parking facilities shall constitute a trust fund for the security and payment of the principal of and interest on the bonds and so long as any bonds or interest thereon are unpaid said revenues and interest shall not be used for any other purpose; provided, however, that a resolution of issue may provide that if the principal of and interest on the bonds and all charges to protect and secure them are paid when due, an amount for the maintenance and operation costs of the project and any and all other costs and expenses relative to the project or to the bonds, may be apportioned from revenues, but only to the extent specified in the resolution of issue.

Section 85.16. Bonds of Same Issue to be Equally Secured. Bonds of the same issue shall be equally secured by a pledge and charge upon revenues, without priority for number, date of bonds, of sale, of execution, or of delivery; except that if the Council authorizes the issuance of bonds of different series it may provide that the bonds in any series shall, to the extent and in the manner prescribed in the resolution of issue, be subordinated and be junior in standing with respect to the payment of principal and interest and the security thereof to such other bonds as may be specified in the resolution of issue.

Section 85.17. Refunding Bonds. The Council may provide for the issuance, sale or exchange of refunding bonds for the purpose of redeeming, retiring or refunding any revenue bonds issued under this Article, subject to any limitations contained in the resolution of issue pursuant to which such revenue bonds are issued. All provisions of this Article applicable to the issuance of revenue bonds shall be applicable to the refunding bonds and to the issuance, sale or exchange thereof. Refunding bonds may be issued in a principal amount sufficient to provide funds for the payment of all bonds to be refunded thereby, and in addition, for the payment of all expenses incident to the calling, retiring or paying of such outstanding bonds and the issuance of such refunding bonds. Such expenses may include the difference in amount between the par value of the refunding bonds and any amount less than par for which the refunding bonds are sold, any amount necessary to be made available for the payment of interest upon such refunding bonds from the date of sale thereof to the date of payment of the bonds to be refunded, or to the date upon which the bonds to be refunded will be paid pursuant to call thereof or agreement with the holders thereof, and also the premium, if any, necessary to be paid in order to call and retire the outstanding bonds and the interest accruing thereon to the date of call or retirement.

Section 85.18. Validity of Bonds Not Affected by Actions of City Relative to Project. The validity of the authorization and issuance of any revenue bonds by the Council shall not be dependent on or affected in any way by:

(a) Proceedings taken by the City for the acquisition, construction, or completion of any project or any part thereof.

(b) Any contracts made in connection with the acquisition, construction or completion of any project; or

(c) The failure to complete any project for which bonds are authorized to be issued.

Sale of bonds

Section 86. Sale of Bonds. Before selling any bonds the Council shall give notice inviting sealed bids in such manner as the Council may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder. If no bids are received or if the Council determines that the bids received are not satisfactory, the Council may reject all bids received, if any, and either readvertise or sell the bonds at private sale. The Council may sell

bonds at a price below the par or face value thereof, provided that the maximum net interest cost (computed on a 360-day year basis) on bonds sold below par or face value shall not exceed an average of six per cent (6%) per annum, payable semi-annually, to the respective maturity dates of said bonds.

Payment of expenses, etc

Section 87. Payment of Incidental Expenses and Interest and Creation of Funds from Proceeds of Sale of Bonds. All costs and expenses incidental to the issuance and sale of bonds, including (without limiting the generality of the foregoing) the cost of preparation of the bonds and coupons, the cost of all surveys, of preparation of plans and specifications, of all architectural, engineering, inspection, legal, financial and economic consultant's, trustee's, and fiscal agent's fees, the creation of a bond reserve fund, the creation of a working capital fund, and bond interest estimated to accrue during the period of acquisition or construction of a project and for a period of not to exceed six (6) months thereafter, all as provided for in the resolution of issue, may be paid out of the proceeds of sale of the bonds.

Resolutions of issue

Section 88. Provisions Relating to Resolutions of Issue The provisions of Sections 88.1 to 88.15, inclusive, shall govern and apply to each resolution of issue adopted by the Council.

Section 88.1. Construction Fund; Investment. A resolution of issue may provide that the proceeds of sale of all revenue bonds authorized thereby shall either be deposited in a fund separate and apart from all other funds of the City or paid direct to any bank or trust company designated by the Council as the fiscal agent of the City, and that said proceeds shall be held by the City or such fiscal agent in a separate account to be designated the "Construction Fund" and be disbursed in the manner and upon the conditions provided in the resolution of issue for the object and purpose of the acquisition, construction and completion of the project therein designated, including the payment of all incidental expenses and interest and the creation of funds as provided for in Section 87 of this Article. Moneys in any construction fund may be invested as the Council in its sole discretion shall determine, subject only to such limitations as may be provided in the resolution of issue A resolution of issue may provide that any moneys in a construction fund remaining unexpended after said object and purpose shall have been completed shall be applied to the payment of the principal of and interest on said bonds, and that none of said moneys shall be transferred to any other fund of the City or used for any purpose other than as specified in the resolution of issue.

Section 88.2. Continuous Operation of Project: Repairs, Renewals and Replacements. A resolution of issue may provide that, so long as any bonds thereby authorized shall be outstanding, the City shall operate the project designated in the resolution of issue continuously and in an efficient and economical manner and in good working order and condition and shall make all necessary repairs, improvements and replacements.

Section 88 3. Rates, Fees and Other Charges. A resolution of issue may provide that the Council will prescribe, revise and collect rates, fees and charges (a) for use of the facilities provided by the project acquired, constructed or completed from the proceeds of sale of the bonds issued pursuant to such resolution of issue, (b) for any services rendered in connection with such project, and (c) for use of any on-street parking meters and existing off-street parking facilities any revenues from which are pledged to secure the bonds. A resolution of issue may provide that such rates, fees and charges shall at all times be sufficient to yield revenues from the project and net revenues from such on-street parking meters and existing off-street parking facilities equal to all redemption payments and interest charges on said bonds as the same fall due, together with such additional sums as may be required for any sinking fund, reserve fund or other special fund provided for the security or further protection of said bonds, or as a depreciation charge or other charge in connection with such project. A resolution of issue may provide that such rates, fees and charges shall not be reduced below an amount sufficient to provide funds to meet all obligations specified in the resolution of issue.

Section 88 4. Holding and Application of Revenues. A resolution of issue may require the City to hold or cause to be held in trust the revenues pledged to the payment of the principal of and interest on the bonds issued pursuant to said resolution of issue, or to any reserve or other fund created for the security or further protection of the bonds, and to apply such revenues or cause them to be applied only as provided in the resolution of issue.

Section 88.5. Preservation and Protection of Security of Bonds. A resolution of issue may require the City to preserve and protect the security of the bonds issued thereunder and the rights of the holders thereof and to warrant and defend such rights A resolution of issue may require the City to pay and discharge or cause to be paid and discharged all lawful claims for labor, materials and supplies or other charges which, if unpaid, might become a lien or charge upon revenues, or which might impair the security of any bonds issued for the acquisition, construction or completion of any project. A resolution of issue may limit, restrict or prohibit, except upon such terms and conditions as may be provided therein, any right, power or privilege of the City to mortgage or otherwise encumber, or to sell, lease or dispose of a project or to enter into any lease or agreement which impairs or impedes the operation of a project or of any part thereof necessary to provide adequate revenues, or which otherwise impairs or impedes the rights of the holders of the bonds with respect to such revenues.

Section 88.6. Proceeds of Project Taken by Eminent Domain. A resolution of issue may provide that if any part of a project shall be taken by eminent domain or other proceeding authorized by law, the proceeds to the City therefrom shall be applied to the replacement of such project or to the payment

and retirement of the bonds issued pursuant to such resolution of issue, or as otherwise set forth in said resolution of issue.

Section 88.7. Insurance. A resolution of issue may specify or limit the kinds and amounts of insurance to be maintained by the City on a project, or any part thereof (including insurance of any project against loss of revenues from any cause whatsoever, against public liability or property damage and against loss by fire or any other hazard, as may be provided in any resolution of issue), and provide for the payment of the premiums thereon, and specify the use and disposition of proceeds of any such insurance thereafter collected.

Section 88.8 Books, Records and Accounts. A resolution of issue may provide:

(a) that the City will keep accurate books and records of account showing all revenues received from the operation of any project and all expenditures thereof, and all revenues from on-street parking meters and existing off-street parking facilities pledged or otherwise made available as security or as further protection for the bonds issued pursuant to said resolution of issue;

(b) that all such books and records shall be open at all times during business hours to the inspection of the holders of one or more of the bonds or of any specified percentage of such holders or their duly authorized representatives;

Section 88.9. Trustee; Fiscal Agent; Paying Agents. A resolution of issue may designate a bank or trust company, qualified to do business in the State of California, as a trustee or fiscal agent for the City and holders of bonds issued under said resolution of issue, and may authorize any such trustee to act on behalf of the holders of the bonds or any stated percentage thereof, and to exercise and prosecute on behalf of the holders of the bonds such rights and remedies as may be available to the holders. A resolution of issue may authorize the City to designate any bank or trust company in any city in which any bonds are made payable as the City's paying agent in such city. A resolution of issue may fix and determine the conditions upon which any trustee, fiscal agent or paying agent shall receive, hold or disburse any or all revenues deposited with it by or by authority of the City. A resolution of issue may prescribe the duties and powers, if any, of any such trustee, fiscal agent or paying agent with respect to the issuance, authentication, sale and delivery of the bonds, the payment of the principal

thereof and interest thereon, the redemption thereof, the registration and discharge from registration of bonds and the management of any funds provided for in the resolution of issue as security for the bonds.

Section 88.10. Competitive Projects. A resolution of issue may define the word "compete" as used in the preceding sentence and in such resolution of issue. A resolution of issue may except from the covenant authorized to be made by this section any and all off-street vehicular parking facilities then or thereafter maintained by the City.

Section 88.11. Limitation on Additional Indebtedness. A resolution of issue may limit or restrict the incurring of additional indebtedness payable in whole or in part from the revenues charged with payment of the bonds issued pursuant to such resolution of issue.

Section 88.12. Events of Default. A resolution of issue may designate the rights, limitations, powers and duties arising upon breach by the City of any of the covenants, conditions or obligations therein contained, and may provide the terms and conditions upon which all bonds issued thereunder may be declared or become due and payable prior to maturity and the terms and conditions upon which such declaration and its consequences may be waived.

Section 88 13. Amendment or Modification of Resolution of Issue. A resolution of issue may prescribe a procedure by which its terms and conditions may be subsequently amended or modified with the consent of the City and the vote or written consent of the holders of a specified principal amount or proportion of the bonds issued and outstanding, including provision for meetings with bondholders and the manner in which the consents of the bondholders may be given. A resolution of issue may set forth a specific statement of the effect of each such amendment or modification upon the rights of the holders of all of the bonds and interest coupons appertaining thereto. If desired, a resolution of issue may contain a provision that bonds held by the City or by the State of California or any public corporation, political subdivision, city, county, district or any agency of any thereof, shall not be counted as outstanding bonds or be entitled to vote or consent, but shall nevertheless be subject, to any such amendment or modification.

Section 88.14. Use of Surplus After all of the revenue bonds issued pursuant to a resolution of issue shall have been fully paid or discharged, or provision for their payment and

discharge irrevocably made, any surplus moneys in any construction fund or other fund provided for the security or further protection of the bonds shall become and be the property of the City and be used by the City for any lawful purpose.

Section 88.15. Additional Covenants and Agreements. A resolution of issue may provide for such other acts and matters and may include any and all such additional covenants and agreements on the part of the City as the Council shall deem necessary or advisable.

Bondholders' rights

Section 89. Rights of Bondholders. Except as provided otherwise in any resolution of issue, the holder of any bond issued pursuant to this Article may by mandamus or other appropriate proceedings require and compel the performance of any of the duties imposed upon the City or any official or employee of the City or assumed by any thereof in connection with the acquisition, construction, completion, operation, maintenance, repair, reconstruction or insurance of any project, or the collection, deposit, investment, application and disbursement of rates, fees and charges derived from the operation and use of any project and all other revenues, or in connection with the deposit, investment or disbursement of the proceeds received from the sale of the bonds under this Article. The enumeration of such rights and remedies does not, however, exclude the exercise or prosecution of any other rights or remedies available to the holders of bonds issued pursuant to this Article.

The method provided in this Article for the acquisition, construction and completion of projects and the issuance of revenue bonds shall be deemed an additional method for acquiring, constructing and completing such projects and providing funds therefor; provided that the City of Berkeley may, in its discretion, acquire any properties for off-street vehicular parking facilities and issue general obligation bonds of the City of Berkeley therefor, subject, however, to the condition that the City of Berkeley shall not, while any revenue bonds authorized by this Article are issued and outstanding, acquire, construct or complete any off-street vehicular parking facilities, other than those specifically described in a resolution of issue pursuant to the provisions of Section 88.10 of this Article, which com-

CHARTER AMENDMENT

The Charter of the City of Santa Barbara is hereby amended by repealing Section 2 of Article XIV-A thereof and by adding thereto new Sections to be designated as Sections 2, 2.1 and 2.2 of Article XIV-A of said Charter to read as follows:

"ARTICLE XIV-A
CIVIL SERVICE PROVISIONS

Fire and police departments

Section 2. Notwithstanding any other provision in this Charter contained, the Board of Civil Service Commissioners of the City of Santa Barbara shall have exclusive jurisdiction to hear and determine all matters involving the suspension, removal or dismissal from the service, or reduction in rank, of members of the Fire or Police Department, as in this Article provided, except in case of suspension or removal for lack of funds. The Chief of the Fire Department and the Chief of Police shall not be included within the civil service provisions of this Charter, but they shall be included within the fire and police pension provisions thereof. It is provided however that the elevation of a member of the Fire or Police Department to the office of Chief thereof shall neither deprive such member of, nor alter, his civil service status as a member of the department in the rank held by him at the time of such elevation. In such case such former rank of said member shall continue and remain protected under the civil service provisions of this Charter during his period of service as Chief of the department, and upon the termination of such service as Chief thereof, from whatever cause, he shall actively resume the duties of his said former rank with all rights and privileges conferred by the civil service provisions of this Charter and without loss of seniority the same as though his service in such former rank had not been interrupted. Any member of the Fire or Police Departments who shall be elevated to the office of Chief thereof shall, for and during the period of his said service as Chief, be entitled only to the salary of the Chief of such department and not to the salary derived from his former rank therein.

Section 2.1. The members of the Fire and Police Departments, after completing a six months' probationary period upon first entering the service, shall hold office during good behavior and shall not be suspended, removed or dismissed from the service, or reduced in rank, except for good cause, after a public hearing, or in case of suspension or removal for lack of funds; provided, however, that after becoming eligible to retire under any applicable fire and police pension provision of this Charter, any member may be retired by order of the Board of Fire and Police Pension Commissioners for the good of the service without hearing.

The Chief of the Fire Department and the Chief of the Police Department shall have power to suspend, remove or dismiss from the service or to reduce in rank, for good cause, any member of their respective departments, but when such power is exercised he shall file a written statement of the reasons with the Board of Civil Service Commissioners with certification that a copy of such statement has been served upon the person so suspended, removed or dismissed from the service or so reduced in rank, personally, or if he cannot be found within the City of Santa Barbara after reasonable inquiry, by mailing such copy by registered mail to the last residence address of such member according to the records of such department. Upon such filing, such suspension, removal or dismissal from the service or such reduction in rank shall take effect. Within fifteen days after such statement shall have been filed, the said Board, upon its own motion, may, or upon written application of such member filed with the said Board within five days after service upon him of such statement, shall proceed to hold a public hearing upon the matter of such suspension, removal or dismissal from the service or of such reduction in rank. If, after such hearing said Board shall find that the grounds stated for such suspension, removal or dismissal from the service or for such reduction in rank were insufficient or were not sustained, and also finds in writing that the person so suspended, removed or dismissed from the service or so reduced in rank is a fit and suitable person to fill the position or rank from which he was suspended, removed, dismissed or reduced, as the case may be, said Board shall order said person to be reinstated and restored to duty in his former status and rank from which he was suspended, removed, dismissed or reduced, with pay during said lay-off period. If the said Board shall find that the grounds stated for such suspension, removal or dismissal from the service or for such reduction in rank were sufficient and sustained by the evidence, it may suspend, remove or dismiss from the service or reduce in rank or otherwise discipline the offending member. The decision of such Board upon all matters of suspension, removal or dismissal from the service or of reduction in rank shall be final. In the event of the removal or dismissal of any member from the Police or Fire Departments for good cause, but not for lack of funds, such member shall forfeit all rights and privileges under the fire and police pension provisions of this Charter as now or hereafter provided except that if such member shall have completed five years of contributions by way of salary deductions to any pension fund, he shall be entitled to withdraw the amount of his contributions without interest upon such removal.

Repeal

Section 2.2. In any and all respects wherein the foregoing Sections numbered 2 and 2.1 of Article XIV-A of the Charter of the City of Santa Barbara conflict with Section 1 of Article XIV-A of said Charter, or with any other Section or Article thereof, the latter shall to the extent of such conflict only be deemed repealed. Section 2 of Article XIV-A of said Charter as

written prior to the amendments contained herein, is hereby repealed.

This amendment contained in the foregoing Sections numbered 2 and 2.1 and this Section numbered 2.2 of Article XIV-A of the Charter of the City of Santa Barbara shall take effect on and not before the first day of the calendar month next succeeding the date of approval thereof by the Legislature of the State of California." Senate Joint Resolution No. 35—Relative to renegotiation of contracts between the United States and public agencies for water supply from the Central Valley Project of California.

[Filed with Secretary of State, May 28, 1953.]

Central Valley water contracts

WHEREAS, The United States has entered into numerous contracts with irrigation districts and similar agencies for a supply of water from the Central Valley Project, which contracts provide for payments to be made upon construction costs of the project and, in some instances, upon construction costs of local distribution systems; and

WHEREAS, These contracts have been entered into pursuant to Section 9(e) of the Reclamation Project Act of 1939; and

WHEREAS, The Supreme Court of Wyoming has held provisions of the so-called "9(e)" contracts invalid; and

WHEREAS, In at least two instances, superior courts of California, in considering the matter of the validity of such con-

tracts, have held them invalid in several particulars, namely, the provisions of such contracts which deal with the matters of water rights, credit for payments made upon such contracts, and limitations as to the use of water; and

WHEREAS, In some instances irrigation districts have secured validation of some of such contracts by default, and are now confronted with the problem of being forced to carry out contracts which as to other districts have been declared invalid; and

WHEREAS, Litigation concerning such contracts might extend over a long period of time, causing great uncertainty as to the rights and powers of irrigation districts and similar public agencies with respect to the Central Valley Project of California; and

WHEREAS, The form of contracts used in connection with the Central Valley Project of California should be in accord with the requirements of the laws of the State of California and the United States and should not contain features which have been held invalid; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Secretary of Interior of the United States be requested to renegotiate the existing contracts to provide a more acceptable contract and one that can be uniformly used within the Central Valley Project of California and which will avoid the invalid and objectionable features of the existing contracts; and be it further

Resolved, That the Secretary of the Senate is directed to transmit a copy of this resolution to the President of the United States, to the President of the United States Senate, to the Speaker of the House of Representatives, to the Secretary of Interior of the United States, and to each Senator and Representative from California in the Congress of the United States.

Amend Section 55 of Article V of the Charter of The City of San Diego to read as follows:

Park and recreation department

"Section 55. There is hereby created a department, to be known as the Park and Recreation Department, which shall be under the direction and supervision of a Director of Parks and Recreation, who shall be appointed by the Manager, and who shall have the duty of the control and management of parks, parkways, plazas, beaches, cemeteries, street trees, landscaping of city-owned property, golf courses, playgrounds, recreation centers, recreation camps and recreation activities held on any city playgrounds, parks, beaches and piers, which may be owned, controlled or operated by the City. The City Council shall by ordinance adopt regulations for the proper use and protection of said park property, cemeteries, playgrounds and recreation facilities, and provide penalties for violations thereof. The Manager is charged with the enforcement of such regulations.

All real property owned in fee by the City heretofore or hereafter formally dedicated in perpetuity by ordinance of the

Council or by statute of the State Legislature for park, recreation or cemetery purposes shall not be used for any but park, recreation or cemetery purposes without such changed use or purpose having been first authorized or later ratified by a vote of two-thirds of the qualified electors of the City voting at an election for such purpose. Whenever the City Manager recommends it, and the City Council finds that the public interest demands it, the City Council may, without a vote of the people, authorize the opening and maintenance of streets and highways over, through and across City fee-owned land which has heretofore or hereafter been formally dedicated in perpetuity by ordinance or statute for park, recreation and cemetery purposes.

The Park and Recreation Director shall have such other duties as may be imposed upon him by ordinance of The City of San Diego or as directed by the City Manager.

The City Manager shall have authority, subject to the approval of the Council, to enter into such contracts as may be deemed desirable for the best interests of the City for the joint operation and control of playgrounds by the San Diego Unified School District and the City. Until the income from said investments of said perpetuity fund and the balance of the sale price of said lots each year are sufficient to maintain the cemeteries and to provide perpetual care and upkeep of all graves and lots in said cemeteries the Council shall annually appropriate from other revenues an amount sufficient to enable the City to provide perpetual care and upkeep of all graves and lots in the cemeteries.

There is hereby created a Park and Recreation Commission to consist of seven members, two of whom shall be appointed by the Board of Education of the San Diego Unified School District, one of whom shall be a member of said Board of Education; two of whom shall be appointed by the City Manager; and three of whom shall be appointed by the Mayor with the consent of the Council. any way in derogation or in limitation of any powers conferred upon or existing in the City by virtue of the provisions of the Constitution of the State of California or any other provision of this Charter.

Section 4. Pledge of Net Revenues from Parking Meters and Existing Off-Street Parking Facilities. In addition to all other powers elsewhere enumerated in this Article, the Council shall have power to pledge, place a charge upon, or otherwise make available and authorize payment of all or any part of the net revenues collected by the City from the establishment and operation of (i) on-street parking meters within the City now owned or controlled or hereafter acquired or controlled by the City, and (ii) existing off-street parking facilities, for such periods of years as shall be determined by the Council, for the payment of operation and maintenance costs of any one or more projects authorized by this Article or as security or further protection for the payment of principal of and interest on bonds issued pursuant to this Article. Section 5. Issues of Bonds; Series and Divisions. The Council may provide for one or several issues of bonds and may issue bonds in series, or may divide any issue into one or more series or divisions and fix different maturities or dates for each series or division, different rates of interest, or different terms and conditions for the bonds of the several series or divisions. It is not necessary that all bonds of the same authorized issue be of the same kind or character, have the same security, or be of the same interest rate, but the terms thereof shall in each case be provided for by the Council by a resolution of issue at the time of or prior to the issue thereof. Bond issues

Section 6. Authorization of Revenue Bonds. Each issue of revenue bonds shall be authorized by the Council by a resolution of issue adopted by affirmative votes of at least five (5) members of the Council at a duly assembled meeting.

Section 7. Resolutions of Issue. Resolutions of issue shall provide for the aggregate principal amount, date or dates, maturities, interest rates, denominations and form, and may provide for the registration, transfer and interchange, of any revenue bonds and coupons issued pursuant to this Article; and shall prescribe the purpose or purposes for which said bonds are to be issued and the terms and conditions on which said bonds are to be executed, issued, secured, sold and paid, and, if desired, the terms and conditions on which said bonds may be redeemed prior to maturity or refunded. Resolutions of issue

Section 8. Provisions Relating to Bonds. The following provisions shall govern and apply to (a) all revenue bonds issued pursuant to this Article, and (b) each resolution of issue relating to the bonds thereby authorized: Bonds

(1) Date of Bonds. Bonds shall bear dates prescribed by the resolution of issue.

(2) Maturity. Bonds may be serial bonds or sinking fund bonds with such maturities as shall be provided in the resolution of issue. No bond by its terms shall mature in more than

forty (40) years from its own date, and, in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date of each such series or division shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized issue.

(3) Interest. Bonds shall bear interest at a rate of not to exceed six (6) per cent. per annum, payable annually or semi-annually, or in part annually and in part semi-annually.

(4) Coupon or Registered Bonds. Bonds may be issued as coupon bonds or as registered bonds. A resolution of issue may provide for the interchange of coupon bonds for registered bonds and registered bonds for coupon bonds, and may provide that the bonds shall be registered as to principal only, or as to both principal and interest, or otherwise as the resolution of issue shall prescribe.

(5) Redemption. Bonds may be callable upon such terms and conditions and upon such notice as the resolution of issue shall prescribe and upon payment of such premium (not exceeding six per cent. (6%) of the par value of such bonds) as may be fixed in the resolution of issue. No bond shall be subject to call or redemption prior to its fixed maturity date, unless the right to exercise such call is expressly stated on the face of the bond.

(6) Source of Payment. All revenue bonds shall be payable exclusively from revenues.

(7) Reference on Bonds to Resolution of Issue. Reference on the face of a revenue bond to the resolution of issue by its date of adoption is sufficient to incorporate all of the provisions thereof and of this Article into the body of said revenue bond and its appurtenant coupons. Each taker and subsequent holder of a revenue bond or coupons, whether such coupons are attached to or detached from said revenue bond, shall have recourse to all of the provisions of the resolution of issue and of this Article and shall be bound thereby.

(8) Recital in Bonds. All revenue bonds shall contain a recital on their face that neither the payment of principal of nor of interest on such bonds constitutes a debt, liability or obligation of the City of Richmond, except as provided in this Article.

(9) Place and Manner of Payment. The principal of and interest on bonds may be paid at any one or more places within or without the State of California and in any specified coin or currency of the United States of America, as may be provided in the resolution of issue.

(10) Execution and Authentication of Bonds; Validity of Signatures and Countersignatures. Bonds may be executed and authenticated by the manual, lithographed or printed facsimile signature of any officer or officers of the City and may also be authenticated by a trustee or fiscal agent appointed by the Council. If any of the officers whose signatures or counter-

signatures appear on the bonds ceases to be such officer before the delivery of the bonds or coupons to the purchasers thereof, such signature or countersignature shall nevertheless be valid and of the same force and effect as if such officer had remained in office until the delivery of the bonds and coupons.

(11) Issuance of Temporary Bonds. Pending the actual issuance or delivery of definitive bonds, the Council may issue temporary or interim bonds, certificates or receipts of any denominations whatsoever, and with or without coupons, and with such provisions as the Council shall determine, to be exchanged for definitive bonds when ready for delivery. In the absence of an express recital on its face that a temporary bond or interim receipt is non-negotiable, such bond or interim receipt is a negotiable instrument.

(12) Replacement of Lost, Destroyed, Mutilated or Stolen Bonds. Lost, destroyed, mutilated or stolen bonds or coupons may be replaced as provided in the resolution of issue.

(13) Security. All revenue bonds shall be secured by an exclusive pledge and charge upon (a) all or a portion of the gross revenues of the project for the acquisition, construction and completion of which said bonds are issued or authorized to be issued, (b) revenues from on-street parking meters, and (c) revenues of any existing off-street parking facilities, all as provided for in the resolution of issue. Gross revenues of a project include improvements and extensions of such project later constructed or acquired. The gross revenues of the project, any interest earned on the gross revenues of the project, and all pledged on-street parking meter revenues and pledged revenues of existing off-street parking facilities shall constitute a trust fund for the security and payment of the principal of and interest on the bonds and so long as any bonds or interest thereon are unpaid said revenues and interest shall not be used for any other purpose; provided, however, that a resolution of issue may provide that if the principal of and interest on the bonds and all charges to protect and secure them are paid when due, an amount for the maintenance and operation costs of the project may be apportioned from revenues, but only to the extent specified in the resolution of issue.

(14) Bonds of Same Issue To Be Equally Secured. Bonds of the same issue shall be equally secured by a pledge and charge upon revenues, without priority for number, date of bonds, of sale, of execution, or of delivery; except that if the Council authorizes the issuance of bonds of different series it may provide that the bonds in any series shall, to the extent and in the manner prescribed in the resolution of issue, be subordinated and be junior in standing with respect to the payment of principal and interest and the security thereof to such other bonds as may be specified in the resolution of issue.

(15) Refunding Bonds. The Council may provide for the issuance, sale or exchange of refunding bonds for the purpose of redeeming, retiring or refunding any revenue bonds issued under this Article, subject to any limitations contained in the

resolution of issue pursuant to which such revenue bonds are issued. All provisions of this Article applicable to the issuance of revenue bonds shall be applicable to the refunding bonds and to the issuance, sale or exchange thereof.

(16) Amount of Refunding Bonds. Refunding bonds may be issued in a principal amount sufficient to provide funds for the payment of all bonds to be refunded thereby, and, in addition, for the payment of all expenses incident to the calling, retiring or paying of such outstanding bonds and the issuance of such refunding bonds. Such expenses may include the difference in amount between the par value of the refunding bonds and any amount less than par for which the refunding bonds are sold, any amount necessary to be made available for the payment of interest upon such refunding bonds from the date of sale thereof to the date of payment of the bonds to be refunded, or to the date upon which the bonds to be refunded will be paid pursuant to call thereof or agreement with the holders thereof, and also the premium, if any, necessary to be paid in order to call and retire the outstanding bonds and the interest accruing thereon to the date of call or retirement.

(17) Validity of Bonds Not Affected by Actions of City Relative to Project. The validity of the authorization and issuance of any revenue bonds by the Council shall not be dependent on or affected in any way by:

(a) Proceedings taken by the City for the acquisition, construction or completion of any project or any part thereof:

(b) Any contracts made in connection with the acquisition, construction or completion of any project; or

(c) The failure to complete any project for which bonds are authorized to be issued.

Sale of bonds

Section 9. Sale of Bonds. Before selling any bonds the Council shall give notice inviting sealed bids in such manner as the Council may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder. If no bids are received or if the Council determines that the bids received are not satisfactory as to price or responsibility of the bidders, the Council may reject all bids received, if any, and either readvertise or sell the bonds at private sale.

Section 10. Sale Below Par. The Council may sell bonds at a price below the par or face value thereof, provided that the maximum net interest cost (computed on a 360-day year basis) on bonds sold below par or face value shall not exceed an average of six per cent. (6%) per annum, payable semiannually, to the respective maturity dates of said bonds.

Allocation of proceeds

Section 11. Payment of Incidental Expenses and Interest and Creation of Funds From Proceeds of Sale of Bonds. All costs and expenses incidental to the issuance and sale of bonds, including the cost of preparation of the bonds and coupons, the cost of all surveys, of preparation of plans and specifications, of all architectural, engineering, inspection, legal, financial and economic consultant's, trustee's and fiscal agent's fees, the creation of a bond reserve fund, the creation of a working capital

fund, and bond interest estimated to accrue during the period of acquisition or construction of a project and for a period of not to exceed six (6) months thereafter, all as provided for in the resolution of issue, may be paid out of the proceeds of sale of the bonds.

Section 12. Provisions Relating to Resolutions of Issue. The following provisions shall govern and apply to each resolution of issue adopted by the Council: Resolutions of issue

(1) Construction Funds: Investment. A resolution of issue may provide that the proceeds of sale of all revenue bonds authorized thereby shall either be deposited in a fund separate and apart from all other funds of the City or paid direct to any bank or trust company designated by the Council as the fiscal agent of the City, and that said proceeds shall be held by the City or such fiscal agent in a separate account to be designated the "Construction Fund" and be disbursed in the manner and upon the conditions provided in the resolution of issue for the object and purpose of the acquisition, construction and completion of the project therein designated, including the payment of all incidental expenses and interest and the creation of funds as provided for in Section 11 of this Article. (3) Continuous Operation of Project: Repairs, Renewals and Replacements. (4) Rates, Fees and Other Charges. A resolution of issue may provide that the Council will prescribe, revise and collect rates, fees and charges for use of the facilities provided by the project acquired, constructed or completed from the proceeds of sale of the bonds issued pursuant to such resolution of issue, or for any services rendered in connection with such project, and for use of any on-street parking meters and existing off-street parking facilities any revenues from which are pledged to secure the bonds; that such rates, fees and charges shall at all times be sufficient to yield revenues from the project and net revenues from such on-street parking meters and existing off-street parking facilities equal to all redemption payments and interest charges on said bonds as the same fall due, together with

such additional sums as may be required for any sinking fund, reserve fund or other special fund provided for the security or further protection of said bonds, or as a depreciation charge or other charge in connection with such project; and that such rates, fees and charges shall not be reduced below an amount sufficient to provide funds to meet all obligations specified in the resolution of issue.

(5) Holding and Application of Revenues. A resolution of issue may require the City to hold or cause to be held in trust the revenues pledged to the payment of the principal of and interest on the bonds issued pursuant to said resolution of issue, or to any reserve or other fund created for the security or further protection of the bonds, and to apply such revenues or cause them to be applied only as provided in the resolution of issue.

A resolution of issue may limit, restrict or prohibit, except upon such terms and conditions as may be provided therein, any right, power or privilege of the City to mortgage or otherwise encumber, or to sell, lease or dispose of a project or to enter into any lease or agreement which impairs or impedes the operation of a project or of any part thereof necessary to provide adequate revenues, or which otherwise impairs or impedes the rights of the holders of the bonds with respect to such revenues.

(9) Proceeds of Project Taken by Eminent Domain. A resolution of issue may provide that if any part of a project shall be taken by eminent domain or other proceeding authorized by law, the proceeds to the City therefrom shall be applied to the replacement of such project or to the payment and retirement of the bonds issued pursuant to such resolution of issue, or as otherwise set forth in said resolution of issue.

(10) Insurance. A resolution of issue may specify or limit the kinds and amounts of insurance to be maintained by the City on a project, or any part thereof (including insurance of any project against loss of revenues from any cause whatsoever, against public liability or property damage and against loss by fire or any other hazard, as may be provided in any resolution of issue), and provide for the payment of the premiums thereon, and specify the use and disposition of proceeds of any such insurance thereafter collected.

(15) Events of Default. A resolution of issue may designate the rights, limitations, powers and duties arising upon breach by the City of any of the covenants, conditions or obligations therein contained, and may provide the terms and conditions upon which all bonds issued thereunder may be declared or become due and payable prior to maturity and the terms and conditions upon which such declaration and its consequences may be waived.

Assembly Joint Resolution No. 9—Relative to changes in rules regulating United States armed services commissary stores, their establishment and operation.

[Filed with Secretary of State, June 1, 1953.]

Armed services commissary stores

WHEREAS, There has been established by the Armed Services Committee of the House of Representatives of the Congress of the United States a "Criteria for Determining the Establishment and Disestablishment of Armed Services Commissary Stores"; and

WHEREAS, Said criteria are based upon the Armed Services Commissary Store Regulations containing the following provisions:

"1-301 General Policy. The establishment of commissary stores shall not be authorized in areas where adequate commercial facilities are conveniently available and sell commissary merchandise at reasonable prices, as determined by each service. With the effective date of this regulation, each service shall examine on an individual basis each commissary store in operation and shall make a determination with respect to the necessity for its continued operation. Three months from the effective date of this regulation, and in January of each year thereafter, each service shall re-examine on an individual basis the commissary stores that have been authorized. When it is found that the necessity for a commissary store no longer exists, the authority for its operation shall be withdrawn.

"1-302 Disestablishment of Commissary Stores. Commissary stores now in operation in areas where it has been determined that adequate commercial facilities are conveniently available and sell commissary merchandise at reasonable prices shall be disestablished on or before 1 January 1950. Commissary stores subsequently determined to be in operation in such areas shall be disestablished within 60 days from the date of determination."

WHEREAS, It is believed that the underlying purpose of said regulations and criteria is to restrict the operation of commissary stores to areas and military service establishments where adequate commercial facilities were not available; and

WHEREAS, It is generally recognized that it is for the best interests of the Country that usual commercial facilities conducted by private enterprise be allowed to supply and serve the entire population, including the armed forces, where such usual commercial facilities are available and able to perform such supply and such service function; and

WHEREAS, It is generally believed that the operation of armed services commissary stores is carried on solely as an auxiliary function of the said armed services without any desire by the

United States Government to compete with individual retail business; and

WHEREAS, Through the operation and experience acquired since the adoption of said criteria, it has become apparent that certain improvements can be made in the said criteria and the application thereof which will not only contribute to and aid the functioning of the said commissary branches of the armed services, but also prevent hardship and undesirable governmental competition with usual private commercial facilities; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the policy of said regulations and criteria be more closely followed and complied with in practice and that in accordance therewith the armed services of the United States be requested to review and re-examine the commissary stores established in California with the purpose of determining the necessity for the further continuance of many thereof which are claimed to exist where adequate commercial facilities exist and are conducted by private enterprise near such military installations and are now conveniently available to the military personnel there located and their necessities of service for such commercial facilities, and that such commissary stores be discontinued in accordance with such regulations and criteria where their further maintenance is not in accordance therewith; and be it further

Resolved, That Congress be urged to amend the present law, regulation or criteria, as may be necessary, to provide that such government commissary stores shall include in their operation costs the services for labor to be added to the invoice cost of the commodity and such labor costs recovered on all sales made, thereby placing this service cost where it properly belongs and not upon the shoulders of the taxpayer of this Country; and be it further

Resolved, That said criteria be amended to provide that all questions of adequacy of existing commercial facilities be determined on the basis of a survey made by an unbiased board of not less than three referees; and be it further

Resolved, That all purchases and sales made by the commissary store be in conformity with federal, state and municipal laws applicable to the area where said commissary store is established; and be it further

Resolved, That the Chief Clerk of the Assembly be hereby directed to transmit copies of this resolution to the Armed Services Committee of the House of Representatives of the Congress of the United States and each member thereof, to the armed services and to each Senator and Representative from California in the Congress of the United States.

Assembly Joint Resolution No. 26—Relative to memorializing the Congress of the United States to exempt jury fees from federal income taxation and to exempt jurors from requirement of reporting such fees.

[Filed with Secretary of State, June 1, 1953.]

Federal tax exemption of jury fees

WHEREAS, Under the Public Salary Tax Act, enacted in 1939, jurors are considered to be state or municipal employees, and, therefore, jury fees obtained by them are subject to federal income taxation; and

WHEREAS, The Sixteenth Amendment to the Constitution of the United States, granting to Congress the power to levy and collect income taxes, was not intended to interfere in any way with the constitutional guarantees of trial by jury set forth in the Sixth and Seventh Amendments to the Constitution of the United States, and the constitutions of most of the states; and

WHEREAS, There is a vast and significant difference between the status of a regular state or municipal employee, who is engaged in voluntary occupational pursuits, and that of a juror, whose service is mandatory so that the constitutional guarantee of trial by jury shall remain inviolate; and

WHEREAS, Since the great majority of trial jurors are called away from their regular occupations at a personal financial sacrifice in order to serve in the courts under constitutional mandate, their fees are actually a mere incident to their patriotic service, and should not be considered taxable income; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to exempt jury fees from federal income taxation; and be it further

Resolved, That the Legislature of the State of California respectfully memorializes the Congress of the United States to exempt jurors from the requirement of reporting jury fees for income tax purposes; and be it further

Resolved, That the Chief Clerk of the Assembly be hereby directed to transmit copies of this resolution to the President of the Senate, the Speaker of the House of Representatives of the Congress of the United States, and to each Senator and Representative from California in the Congress of the United States

Resolved by the Senate, the Assembly concurring, That the Legislature of the State of California at its 1953 Regular Session commencing on the fifth day of January, 1953, two-thirds of the members elected to each of the two houses of the Legislature voting therefor, hereby proposes to the people of the State of California that the Constitution of the State be

amended by amending the first paragraph of Section 7½ of Article XI to read as follows:

SEC. 7½. Any county may frame a charter for its own government consistent with and subject to the Constitution (or, having framed such a charter, may frame a new one,) and relating to matters authorized by provisions of the Constitution, by causing a board of 15 freeholders, who have been for at least five years qualified electors thereof, to be elected by the qualified electors of said county, at a general or special election. Said board of freeholders may be so elected in pursuance of an ordinance adopted by the vote of three-fifths of all the members of the board of supervisors of such county, declaring that the public interest requires the election of such board for the purpose of preparing and proposing a charter for said county, or in pursuance of a petition of qualified electors of said county as hereinafter provided. Such petition, signed by 15 per centum of the qualified electors of said county, computed upon the total number of votes cast therein for all candidates for Governor at the last preceding general election at which a Governor was elected, praying for the election of a board of 15 freeholders to prepare and propose a charter for said county, may be filed in the office of the county clerk. It shall be the duty of said county clerk, within 20 days after the filing of said petition, to examine the same, and to ascertain from the record of the registration of electors of the county, whether said petition is signed by the requisite number of qualified electors. If required by said clerk, the board of supervisors shall authorize him to employ persons specially to assist him in the work of examining such petition, and shall provide for their compensation. Upon the completion of such examination, said clerk shall forthwith attach to said petition his certificate, properly dated, showing the result thereof, and if, by said certificate, it shall appear that said petition is signed by the requisite number of qualified electors, said clerk shall immediately present said petition to the board of supervisors, if it be in session, otherwise at its next regular meeting after the date of such certificate. Upon the adoption of such ordinance, or the presentation of such petition, said board of supervisors shall order the holding of a special election for the purpose of electing such board of freeholders, which said special election shall be held not less than 20 days nor more than 60 days after the adoption of the ordinance aforesaid or the presentation of said petition to said board of supervisors; provided, that if a general election shall occur in said county not less than 20 days nor more than 60 days after the adoption of the ordinance aforesaid, or such presentation of said petition to said board of supervisors, said board of freeholders may be elected at such general election. Candidates for election as members of said board of freeholders shall be nominated substantially in the same manner as may be provided by general law for the nomination of candidates for county offices. It shall be the duty of said board

of freeholders, within six months after the result of such election shall have been declared by said board of supervisors, to prepare and propose a charter for said county, which shall be signed in duplicate by the members of said board of freeholders, or a majority of them, and be filed, one copy in the office of the county clerk of said county and the other in the office of the county recorder thereof. Said board of supervisors shall thereupon cause said proposed charter to be published for at least 10 times in a daily newspaper of general circulation, printed, published and circulated in said county; provided, that in any county where no such daily newspaper is printed, published and circulated, such proposed charter shall be published for at least three times in at least one weekly newspaper, of general circulation, printed, published and circulated in such county; and provided, that in any county where neither such daily nor such weekly newspaper is printed, published and circulated, a copy of such proposed charter shall be posted by the county clerk in three public places in said county, and on or near the entrance to at least one public schoolhouse in each school district in said county, and the first publication or the posting of such proposed charter shall be made within 15 days after the filing of a copy thereof, as aforesaid, in the office of the county clerk. Said proposed charter shall be submitted by said board of supervisors to the qualified electors of said county at a special election held not less than 30 days nor more than 60 days after the completion of such publication, or after such posting; provided, that if a general election shall occur in said county not less than 30 days nor more than 60 days after the completion of such publication, or after such posting, then such proposed charter may be so submitted at such general election. If a majority of said qualified electors, voting thereon at such general or special election, shall vote in favor of such proposed charter, it shall be deemed to be ratified, and shall be forthwith submitted to the Legislature, if it be in regular session, otherwise at its next regular session, or it may be submitted to the Legislature in extraordinary session, for its approval or rejection as a whole, without power of alteration or amendment. Such approval may be made by concurrent resolution, and if approved by the majority vote of the members elected to each house, such charter shall become the charter of such county and shall become the organic law thereof relative to the matters therein provided, and supersede any existing charter framed under the provisions of this section, and all amendments thereof, and shall supersede all laws inconsistent with such charter relative to the matters provided in such charter. A copy of such charter, certified and authenticated by the chairman and clerk of the board of supervisors under the seal of said board and attested by the county clerk of said county, setting forth the submission of such charter to the electors of said county, and its ratification by them, shall, after the approval of such charter by the Legislature, be made in duplicate, and filed, one in the Office of the Secretary of State and the other, after being recorded in the office of the

recorder of said county, shall be filed in the office of the county clerk thereof, and thereafter all courts shall take judicial notice of said charter.

CHAPTER 175

Senate Joint Resolution No. 39—Relative to memorializing the Congress of the United States in relation to the livestock industry.

[Filed with Secretary of State, June 5, 1953.]

Livestock industry re federal grain surplus

WHEREAS, The livestock industry of the United States is one of the Nation's most important industries and the prosperity of the Nation depends in substantial part upon the prosperity of the livestock industry; and

WHEREAS, The livestock industry is confronted with a declining price level for its products without any corresponding lessening of its costs of production which results in an extremely unsettled state of affairs amounting to a national emergency; and

WHEREAS, One of the principal factors in the creation of this emergency is that the United States Government is supporting the prices of corn and feed grains at 90 percent of parity and, under the law, the corn and feed grains bought to support the prices thereof cannot be sold on the market at less than 105 percent of parity; and

WHEREAS, The operation of the parity price provisions as to corn and feed grains has caused the accumulation of an enormous surplus thereof in the hands of the United States Government which cannot be sold because the price is too high for the livestock industry to pay; and

WHEREAS, It appears to be inevitable that the price support program for corn and feed grains must terminate at some time because it is inconceivable that the United States Government will continue indefinitely to accumulate huge hoards of corn and feed grains for which it has no use and for which it has no market; and

WHEREAS, the orderly liquidation of the United States Government's surplus on a flexible price basis to be determined by the Secretary of Agriculture would tend to stabilize the livestock industry of the Nation and would avert what well may develop into an economic catastrophe to the entire Nation; now, therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California hereby memorializes the Congress of the United States to take such steps as may be necessary to place the support of corn and feed grain prices upon a flexible basis and to authorize the liquidation of the surplus of corn and feed grains now in the hands of the United States Government at prices which the livestock industry and other potential purchasers are able to pay; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President and the Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Member of the House of Representatives from California in the Congress of the United States.

CHAPTER 176

Senate Joint Resolution No. 40—Relative to memorializing the Federal Reserve Board and the Farm Credit Administration in relation to loans on livestock.

[Filed with Secretary of State, June 5, 1953.]

Credit facilities for livestock producers

WHEREAS, The livestock industry of the United States is in a critical financial condition which the leaders of the industry anticipate will continue through the summer and fall months of the current year; and

WHEREAS, The need for credit facilities to finance livestock producers and feeders during the remainder of the current calendar year may increase beyond the credit facilities which are now available; and

WHEREAS, Preparation should be made to furnish credit facilities to the extent that they are needed in order to forestall the possibility of an economic collapse of the livestock industry which, if it occurred, would be disastrous to the entire economy of the Nation; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California hereby requests the Federal Reserve Board and the Farm Credit Administration to conduct a continuing survey and investigation of the credit facilities available to livestock producers and feeders and to prepare in advance for any emergency which might arise because of the inadequacy of existing credit facilities by making provision for augmenting such facilities; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the chairman and members of the Federal Reserve Board and to the Secretary of Agriculture of the United States.

CHAPTER 177

Senate Joint Resolution No. 41—Relative to memorializing the Congress of the United States in relation to the purchase of beef for the armed forces.

[Filed with Secretary of State, June 5, 1953.]

"Buy-American" policy re beef for armed forces

WHEREAS, The appropriations for the armed forces of the United States in recent years have contained a "Buy-Ameri-

can" provision which has resulted in the purchase of large quantities of beef in the United States for members of the armed forces in this Country and abroad; and

WHEREAS, It is reported that this provision is being opposed by persons who advocate the purchase of supplies for the armed forces in foreign countries in order to better the economic condition of those countries; and

WHEREAS, The livestock industry of the United States is facing a period of readjustment during which every effort must be made to keep the economy of the industry in a stable condition; and

WHEREAS, The closing of this outlet for livestock products might precipitate a collapse of the livestock industry of this Country which might in turn precipitate a national calamity; and

WHEREAS, Whatever virtue there may be in economic aid to foreign countries it would be improvident to extend such aid in a manner that would be likely to bring about an economic disaster to this Country; now, therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California hereby memorializes the Congress of the United States to continue the "Buy-American" policy with respect to the purchase of supplies for the armed forces in this Country and abroad; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President and the Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

CHAPTER 178

Senate Joint Resolution No. 42—Relative to memorializing the Congress of the United States in relation to tariff rates.

[Filed with Secretary of State, June 5, 1953.]

Agricultural and livestock tariffs

WHEREAS, During the past 20 years the tariff rates have been materially reduced, particularly in relation to agricultural and livestock products; and

WHEREAS, The agricultural and livestock industry of the United States is entering upon a period of readjustment during which the industry must be maintained on a stable basis if the economy of the entire Nation is not to be seriously impaired; and

WHEREAS, Any further dislocation of the agricultural and livestock industry through a lowering of the tariff rates on agricultural and livestock products would tend only towards the complication of problems which can be solved only with the greatest of difficulties; and

WHEREAS, Reasonable increases in the tariff duties on agricultural and livestock products would aid in the stabilization of the industry; now, therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature hereby memorializes the President and the Congress of the United States to take such steps as may be necessary, under the Reciprocal Trade Agreement Act or otherwise, to refrain from any lowering of the current customs duties on agricultural and livestock products, but, on the contrary, to increase such duties wherever possible to such extent as may be necessary to provide adequate protection to the agricultural and livestock industry of the United States; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President and the Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

CHAPTER 180

Assembly Joint Resolution No. 32—Relative to encouraging self-help of persons on the aid to needy children assistance program.

[Filed with Secretary of State, June 8, 1953.]

Needy children program

WHEREAS, There is in California a joint federal, state and county program of public assistance to parents and children

under the Social Security Act known as the aid to needy children program, at a current cost of over eighty-nine million dollars ($89,000,000) per year; and

WHEREAS, In the administration of such program the entire earnings of such parents and such children are deducted from the public assistance payments to them, thereby discouraging such persons from seeking or entering upon any gainful occupation whatever and encouraging them to live in idleness; and

WHEREAS, This policy encourages juvenile delinquency and tends to destroy the moral fiber of the many fine people whose misfortune compels them to seek support from this program; and

WHEREAS, It is the public policy of the State of California to encourage all persons capable of self-help to seek gainful employment in order to better themselves, their families, and our society; and

WHEREAS, The standard of support to persons on the aid to needy children program is a bare minimum and should be supplemented with other funds wherever possible; and

WHEREAS, A program allowing persons on the aid to needy children program to retain part of their earnings without reduction in the public assistance would encourage these persons to help themselves, eliminate idleness, improve their standard of living, and would materially reduce the cost of the whole program to the county, state and federal governments; and

WHEREAS, The Federal Security Administration has ruled that the Social Security Act does not permit a state plan of aid to needy children to allow any supplemental income whatever in addition to the public grant of assistance; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Congress and President of the United States be and they are hereby urged and memorialized to enact at this session of Congress such laws as will encourage persons receiving aid to needy children assistance to seek gainful employment and permit them to retain part of their earnings so as to improve their standard of living above the minimum of the public assistance program, and thereby to become self-supporting; and be it further

Resolved, That the Chief Clerk of the Assembly be and he is hereby directed to transmit copies of this resolution to the President of the United States, to the President of the Senate, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Federal Security Administrator.

Air pollution control facilities

WHEREAS, There is pending before the Congress of the United States H. R. 2720, referred to the Committee on Ways and Means; and

WHEREAS, H. R. 2720 would provide for a 60-month rapid amortization for tax purposes of facilities constructed by private industry for the control of air pollution; and

WHEREAS, Both the industries and local governmental agencies of California, which create part of the problem of air pollution and whose interests are adversely affected by air pollution, are in agreement regarding the necessity for construction of air pollution control facilities and equipment, but the scheduling of equipment installations depends upon ability to finance such construction; and

WHEREAS, It is becoming increasingly difficult for private industry to finance construction of these facilities since they are nonproductive, and it may be necessary either to restrict industrial production or to construct air pollution control facilities for industry by using governmental funds; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact H. R. 2720; and be it further

Resolved, That the Chief Clerk of the Assembly is hereby directed to transmit copies of this resolution to the President of the United States, the President of the Senate of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

If the member was entitled to be credited with less than twenty years of such service, said monthly increase shall be an amount which shall bear the same ratio to $25.00 that the service with which the member was entitled to be credited at the effective date of retirement bears to twenty years. Contributions to the retirement system necessary for the payment of the portion of said increases based on service rendered prior to membership in the retirement system, shall be paid to the system by the City in annual appropriations, provided that such appropriation for any year shall not be less than the amount disbursed during that year on account of said portion of the increases.

CHAPTER 199

Senate Joint Resolution No. 45—Relative to memorializing the Secretary of Defense of the United States and other officials and agencies authorized to act in the matter in relation to the enlistment in and strength of the California National Guard and California Air National Guard and the national manpower pool.

[Filed with Secretary of State, June 10, 1953.]

Enlistment age for National Guard

WHEREAS, The Assistant Secretary of Defense for Manpower and Personnel has submitted a recommendation to the Secretary of Defense that the several states be denied the right to enlist in the National Guard young men before attaining the age of 18 years and 6 months and thereby secure for them a classification of 1D and deferment from Selective Service; and

WHEREAS, Said recommendation is based upon the assumption, not supported in fact, that veterans returning to civilian status and who possess a reserve obligation to serve in a civilian component of the Armed Forces, will provide an adequate manpower pool for the National Guard; and

WHEREAS, The Governor has declared by proclamation that the California National Guard and California Air National Guard cannot be maintained at the necessary strength unless the said deferment from Selective Service is extended to the said young men and that the returning veterans will not provide an adequate manpower pool for the National Guard; and

WHEREAS, The approval of said recommendation will remove the last source of manpower available for recruitment in the National Guard and will thereby permanently jeopardize and injure the National Guard which has been an accepted democratic institution for over 300 years; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Secretary of Defense of the United

States to disapprove the recommendation of the Assistant Secretary of Defense for Manpower and Personnel that the several States be denied the right to enlist in the National Guard young men before attaining the age of 18 years and 6 months and thereby secure for them a classification of 1D and deferment from Selective Service; and be it further

Resolved, That the Legislature of the State of California further respectfully memorializes the Secretary of Defense and all other officials and agencies possessing authority to act in the premises to continue the present indispensable authority granted to the several States to by proclamation of the Governor recruit young men before attaining the age of 18 years and 6 months for enlistment in the National Guard and to reserve for them a classification of 1D and appropriate deferment from Selective Service; and be it further

Resolved, That the Secretary of the Senate is directed to transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Secretary of Defense and the Assistant Secretary of Defense for Manpower and Personnel.

Assembly Concurrent Resolution No. 62—Relative to the exemption of orchard trailers from vehicle registration requirements.

[Filed with Secretary of State, June 10, 1953.]

Orchard trailers

WHEREAS, Section 142 of the Vehicle Code contains an enumeration of types of vehicles which are deemed to be "implements of husbandry" and thus exempt from vehicle registration requirements if only incidentally operated or moved over a highway; and

WHEREAS, It is expressly stated in said section that the enumeration therein is illustrative only and not a list of limitations; and

WHEREAS, It is, and always has been, the intention of the Legislature that orchard trailers be included as implements of husbandry within the meaning of Section 142 of the Vehicle Code; now, therefore, be it

Resolved by the Assembly of the State of California, the Senate thereof concurring, That the Department of Motor Vehicles be requested to consider orchard trailers as being included within the term "implement of husbandry" as used in Section 142 of the Vehicle Code and to extend to such vehicles the exemption from the registration requirements provided in said section; and be it further

Resolved, That the Chief Clerk of the Assembly be directed to transmit a copy of this resolution to the Honorable A. H. Henderson, Director of Motor Vehicles.

CHAPTER 201

Assembly Concurrent Resolution No. 75—Relating to the use of undercover license plates for vehicles of law enforcement agencies.

[Filed with Secretary of State, June 10, 1953.]

License plates on law enforcement vehicles

WHEREAS, The Legislature has authorized the issuance of ordinary license plates for certain vehicles which are operated by local, state, and federal law enforcement agencies, rather than requiring such vehicles to be equipped with the special series license plates that are issued for governmental vehicles in general; and

WHEREAS, It was the intention of the Legislature that ordinary license plates be issued for such vehicles only in situations where their use is essential to an adequate law enforcement program, and to that end the Legislature has directed the Attorney General to approve applications for the use of ordinary plates only when he has found a definite need exists; and

WHEREAS, The Attorney General, relying on the advice of the particular agency involved, has never questioned the need of any applicant for such plates; and

WHEREAS, It has come to the attention of the Legislature that various agencies have abused this privilege by obtaining ordinary license plates for some of their vehicles which are not necessary for law enforcement programs; now, therefore, be it

Resolved by the Assembly of the State of California, the Senate thereof concurring, That the Attorney General is hereby urged to analyze more carefully the need of any agency for the use of ordinary license plates, and to adopt a more stringent policy in approving the application of any agency so that the use of such plates will be restricted to those vehicles only which are necessary for law enforcement purposes; and be it further

Resolved, That the Attorney General is requested to reexamine the certificates that have been issued authorizing the use of private license plates and advise the Director of Motor Vehicles of those certificates found to have been issued where no definite need exists for such plates; and be it further

Resolved, That the Director of Motor Vehicles is requested to cancel the private license plates issued under those certificates found by the Attorney General to have been given where no definite need exists; and be it further

Resolved, That the Chief Clerk of the Assembly is hereby directed to send copies of this resolution to the Attorney General and to the Director of Motor Vehicles.

Restoration of Gold Standard

WHEREAS, By constitutional provision, mining was made the paramount industry of the State of California; and

WHEREAS, The industry and well-being of many communities in the State of California and the western United States have been seriously impaired due to the present price of gold, established in the year 1934 and since maintained regardless of the increase in the commodity price index and cost of living since the year 1939; and

WHEREAS, The cost of labor and all other commodities, especially such costs as enter into the production of gold, have increased 100 percent or more; and

WHEREAS, The purchasing power of the dollar has decreased to approximately one-half of what it was in 1939; and

WHEREAS, Our Country does not have a Gold Standard, with gold and the dollar interchangeable at a fixed ratio; and

WHEREAS, The living standards of our Country have been lowered and are being lowered continuously by unwarranted inflation of the Country's currency; and

WHEREAS, The restoration of the Gold Standard with gold and the dollar freely interchangeable at a fixed ratio would stabilize all living costs including the cost of labor, materials

and commodities as well as the operation of our government; and

WHEREAS, All restrictions on the purchase, sale and ownership of gold by American citizens should be removed, in view of the demand for and the price of gold in all foreign countries, in order that gold may seek a natural level to be ascertained by actual sales; and

WHEREAS, It is advisable for our government in the best interests of our national economy to not only maintain the present price of thirty-five dollars ($35) per ounce for gold, but to establish a price for gold based upon the present purchasing power of the dollar, which would indicate a price level more than double the price established in the year 1934 and the commodity price index of the year 1939; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the President and the Congress of the United States be respectfully requested to restore the Gold Standard at the earliest practicable time and that the price of gold be re-established at a price consistent with its present cost of production and the purchasing power of our inflated currency dollar; be it further
