and Constitutional Amendments passed by the
California Legislature

1995–96 Regular Session
1995–96 First Extraordinary Session
1995–96 Second Extraordinary Session
1995–96 Third Extraordinary Session
1995–96 Fourth Extraordinary Session

Compiled by
BION M. GREGORY
Legislative Counsel

1995–96

FOURTH EXTRAORDINARY SESSION

EXTRAORDINARY SESSION SPECIAL RULES OF EFFECTIVENESS

Except for a statute calling an election, a statute providing for a tax levy or an appropriation calling for the usual current expenses of the state, and an urgency statute, all of which take effect immediately following enactment, a statute adopted during an extraordinary session takes effect on the 91st day following the adjournment of the special session (see subdivision (c) of Section 8 of Article IV of the California Constitution). The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 1995–96 Fourth Extraordinary Session convened in the Assembly on February 13, 1996, and in the Senate on February 1, 1996. It adjourned *sine die* on March 28, 1996. The 91st day after adjournment is June 27, 1996.

EXECUTIVE DEPARTMENT
STATE OF CALIFORNIA

A PROCLAMATION
by the
Governor of the State of California

WHEREAS, an extraordinary occasion has arisen and now exists requiring that the Legislature of the State of California be convened in extraordinary session; now therefore,

I, PETE WILSON, Governor of the State of California, by virtue of the power and authority vested in me by Section 3 (b) Article IV of the Constitution of the State of California, do hereby convene the Legislature of the State of California to meet in extraordinary session at Sacramento, California, on the 1st day of February, 1996, at a time appointed by each house of the Legislature of said day for the following purpose and to legislate upon the following subject:

To consider and act upon legislation relative to making permanent prior year reductions in health and welfare programs which otherwise would have been temporary, including but not limited to prior year welfare grant reductions and elimination of automatic cost-of-living increases for health and welfare programs.

IN WITNESS WHEREOF I have hereunto set my hand and caused the Great Seal of the State of California to be affixed this 29th day of January 1996.

Governor of California

ATTEST:

Secretary of State

STATUTES OF CALIFORNIA

1995–96

FOURTH EXTRAORDINARY SESSION

1996 CHAPTER

CHAPTER 1

An act to amend Sections 4643, 4791, 11450.01, 11450.015, 11450.017, 11450.018, 11452, 11453, 11462, 12200.01, 12200.015, 12200.017, 12200.018, 12550, and 19355.5 of the Welfare and Institutions Code, and to amend Section 37 of Chapter 722 of the Statutes of 1992, relating to human services.

[Approved by Governor March 29, 1996. Filed with Secretary of State March 29, 1996.]

The people of the State of California do enact as follows:

SECTION 1. Section 4643 of the Welfare and Institutions Code is amended to read:

4643. (a) If assessment is needed, it shall be performed within 120 days following initial intake. Assessment shall be performed within 60 days following initial intake where any delay would expose the client to unnecessary risk to his or her health and safety or to significant further delay in mental or physical development, or the client would be at imminent risk of placement in a more restrictive environment. Assessment may include collection and review of available historical diagnostic data, provision or procurement of necessary tests and evaluations, and summarization of developmental levels and service needs. On November 1, 1996, the 120 days allowed for assessment shall revert to 60 days and if unusual circumstances prevent the completion of assessment within 60 days following intake, this assessment period may be extended by one 30-day period with the advance written approval of the department.

(b) In determining if an individual meets the definition of developmental disability contained in subdivision (a) of Section 4512, the regional center may consider evaluations and tests, including, but not limited to, intelligence tests, adaptive functioning tests, neurological and neuropsychological tests, diagnostic tests performed by a physician, psychiatric tests, and other tests or evaluations that have been performed by, and are available from, other sources.

SEC. 2. Section 4791 of the Welfare and Institutions Code is amended to read:

4791. (a) The Legislature finds that the state faces an unprecedented fiscal crisis and that the services set forth in this division are necessary to enable persons with developmental disabilities to live in the least restrictive setting.

(b) In order to ensure that services to eligible consumers are available throughout the contract period, regional centers shall administer their contracts within the level of funding available within the annual Budget Act.

(c) To carry out the intent of this provision, and notwithstanding Chapter 5 and Section 4643, each regional center contract shall include provisions which ensure the regional center will provide services to eligible consumers within the funds available in the contract throughout the contract term. Regional centers shall implement innovative, cost-effective methods of services delivery, which may include, but not be limited to, the use of vouchers, consumer or parent services coordinators, increased administrative efficiencies, and alternative sources of payment for services.

(d) In the event that there is an unallocated budget reduction in the total regional center budget during the 1992–93 fiscal year, which does not exceed forty million eight hundred thousand dollars ($40,800,000) in the total regional center budget, not less than 40 percent of the reduction shall be used to reduce the regional center operations budget line item with the remainder of the reduction applied to the regional center purchase of services budget line item.

(e) In the event that there is an unallocated regional center budget reduction that exceeds forty million eight hundred thousand dollars ($40,800,000) in the total regional center budget in the 1992–93 fiscal year the initial forty million eight hundred thousand dollars ($40,800,000) of the reduction shall be applied pursuant to subdivision (d) above, with the remainder of the reduction applied 25 percent to the regional center operations budget line item with the remainder of the reduction applied to the regional center purchase of services budget line item.

(f) The Budget Act of each fiscal year from 1993–94 to 1995–96, inclusive, and through October 31, 1996, shall determine the distribution of any unallocated reduction within the regional center budget item.

(g) On or before July 15, of each fiscal year the department shall provide regional centers with a variety of options for reducing operations and service costs.

(h) Within 30 days of the enactment of the Budget Act, each regional center shall develop and submit a plan to the department describing in detail how it intends to absorb any unallocated reduction and shall achieve savings necessary to provide services to eligible consumers throughout the contract term within the limitations of the funds allocated. Prior to adopting the plan, each regional center shall hold a public hearing in order to receive comment on the plan. The regional centers shall provide notice to the community at least 10 days in advance of the public hearing.

(1) The plan submitted to the department may include, but not be limited to:

(A) Innovative and cost-effective methods of services delivery that include, but are not limited to, the use of vouchers; the use of consumers and parents as service coordinators; alternative methods of case management; the use of volunteer teams, made up of consumers, parents, other family members, and advocates, to

conduct the monitoring activities described in Section 4648.1; increased administrative efficiencies; alternative sources of payment for services; use of available assessments in determining eligibility; and alternative nonresidential rate methodologies or service delivery models, or both. In addition, the regional center shall take into account, in identifying the consumer's service needs, the family's responsibility for providing similar services to a child without disabilities.

(B) The maximization of all alternative funding sources, including federal and generic funding sources.

(C) Assurances that all other operations expenditure reductions are considered before any reductions are made in nonsupervisory, service coordination staff.

(2) The regional centers shall implement components of their plans upon approval of the department. The department shall review and approve, or require modification of portions of the regional centers' plan, within 30 days of receipt of the plan.

(i) Notwithstanding any other provision of law, the Director of Developmental Services may adopt, amend, repeal, or suspend regulations as necessary to permit program flexibility and allow regional centers to achieve cost savings or innovative approaches to service delivery, including, but not limited, to those specified in subparagraph (A) of paragraph (1) of subdivision (g) without adversely affecting consumer health and safety or placing persons with disabilities in a more restrictive environment. Furthermore, any such regulatory change shall not authorize categorical reductions; changes in service delivery shall have an exemption process. It is the intent of the Legislature that any such action be deemed an emergency necessary for the immediate preservation of the public peace, health, and safety, or general welfare for purposes of subdivision (b) of Section 11346.1 of the Government Code.

(j) Notwithstanding any other provision of law, the State Director of the Department of Developmental Services may require one or more regional centers to take any actions he or she determines to be necessary to ensure reductions are made in the regional center operations budget, including, but not limited to, the following:

(1) Require a regional center to centralize billing and other fiscal and administrative functions.

(2) Require a regional center to reduce office space through the decentralization of service coordinators by allowing service coordinators to work in their homes and in community-based programs.

(3) Require a regional center to freeze or reduce levels of pay for administrative and managerial employees.

(4) Require a regional center to contract for specified functions currently conducted directly by the regional center.

(5) Require regional centers to seek Medi-Cal provider status for regional center staff performing reimbursable activities.

(k) Notwithstanding any other provisions of law, the director may terminate a regional center contract if he or she determines that the regional center is unable or unwilling to make the necessary reductions in its operations budget or if the action is necessary to avoid reductions in the purchase of services for regional center consumers.

(*l*) Notwithstanding any other provisions of law, the department may directly operate a regional center after the termination of a contract.

(m) If the director determines that regional centers cannot provide services throughout the contract term within the funds provided by the Budget Act, he or she shall immediately report to the Governor and the appropriate fiscal committees of the Legislature and recommend actions to secure additional funds or reduce expenditures, including any actions which require the suspension of the entitlement to service set forth in this division.

(n) Developing and implementing the plan shall be considered a contractual obligation pursuant to Section 4635 of the Welfare and Institutions Code. Accordingly, the department shall make reasonable efforts to assist regional centers in fulfilling their contractual obligations and provide technical assistance, as necessary. In addition, a regional center's failure to develop and implement the plan may be considered grounds for contract termination or nonrenewal. If at any time the director of the department determines that a regional center's plan does not adequately address a funding deficiency during the contract period, the director may require the use of operational funds to reduce the deficiency in purchase of services funds.

(o) This section shall remain operative only until November 1, 1996, shall remain in effect only until January 1, 1997, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1997, deletes or extends that date.

SEC. 3. Section 11450.01 of the Welfare and Institutions Code is amended to read:

11450.01. (a) Notwithstanding any other provision of law, commencing October 1, 1992, the maximum aid payments specified in paragraph (1) of subdivision (a) of Section 11450 in effect on July 1, 1992, shall be reduced by 4.5 percent.

(b) (1) The department shall seek the approval from the United States Department of Health and Human Services that is necessary to reduce the maximum aid payments specified in subdivision (a) by an additional amount equal to 1.3 percent of the maximum aid payments specified in paragraph (1) of subdivision (a) of Section 11450 in effect on July 1, 1992.

(2) The reduction provided by this subdivision shall be made on the first day of the month following 30 days after the date of approval by the United States Department of Health and Human Services.

(c) This section shall remain operative only until November 1, 1996, shall remain in effect only until January 1, 1997, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1997, deletes or extends that date.

SEC. 4. Section 11450.015 of the Welfare and Institutions Code is amended to read:

11450.015. (a) Notwithstanding any other provision of law, the maximum aid payments in effect on June 30, 1993, in accordance with paragraph (1) of subdivision (a) of Section 11450 as reduced by subdivisions (a) and (b) of Section 11450.01, shall be reduced by 2.7 percent beginning the first of the month following 60 days after the enactment of this section.

(b) Commencing November 1, 1996, the maximum aid payment levels in effect on June 30, 1996, shall be increased by the total dollar amount of the decrease made in each payment level during the 1992–93 fiscal year pursuant to Section 11450.01.

SEC. 5. Section 11450.017 of the Welfare and Institutions Code is amended to read:

11450.017. (a) Notwithstanding any other provision of law, the maximum aid payment in effect on June 30, 1994, in accordance with paragraph (1) of subdivision (a) of Section 11450 as reduced by subdivisions (a) and (b) of Section 11450.01 and subdivision (a) of Section 11450.015, shall be reduced by 2.3 percent beginning the first of the month following 50 days after the effective date of this section.

(b) The decrease in aid provided for pursuant to this section shall not prevent the increases in aid that shall occur on November 1, 1996, pursuant to Sections 11450.01 and 11450.015.

SEC. 6. Section 11450.018 of the Welfare and Institutions Code is amended to read:

11450.018. (a) Notwithstanding any other provision of law, the maximum aid payment in accordance with paragraph (1) of subdivision (a) of Section 11450 as reduced by subdivisions (a) and (b) of Section 11450.01, subdivision (a) of Section 11450.015, and subdivision (a) of Section 11450.017, shall be reduced by 4.9 percent for counties in Region 2, as specified in Section 11452.018.

(b) Notwithstanding any other provision of law, through October 31, 1996, the maximum aid payment in accordance with paragraph (1) of subdivision (a) of Section 11450, as reduced by subdivision (a) and (b) of Section 11450.01, subdivision (a) of Section 11450.015, subdivision (a) of Section 11450.017, and subdivision (a) of this section shall be reduced by 4.9 percent.

(c) Prior to implementing the reductions specified in subdivisions (a) and (b), the director shall apply for and obtain a waiver from the United States Department of Health and Human Services of Section 1396a(c)(1) of Title 42 of the United States Code. The reduction shall be implemented to the extent the waiver is granted and only so long as the waiver is effective. This subdivision shall not apply if either the federal waiver process set forth at Section 1315 of Title 42 of the

United States Code or Section 1396a(c) is repealed or modified such that a waiver is not necessary to implement subdivision (a) or (b).

(d) The decreases in aid provided for pursuant to this section shall not prevent the increases in aid that shall occur on November 1, 1996, pursuant to Section 11450.01 and Section 11450.015.

(e) This section shall become operative and the reductions specified in subdivisions (a) and (b) shall commence on the first day of the month following 30 days after the receipt of federal approval or on the first day of the month following 30 days after a change in federal law that allows states to reduce aid payments without any risk to federal funding under Title XIX of the Social Security Act, whichever is earlier, but no earlier than October 1, 1995.

SEC. 7. Section 11452 of the Welfare and Institutions Code is amended to read:

11452. (a) (1) Minimum basic standards of adequate care shall be distributed to the counties and shall be binding upon them. The standards are determined on the basis of the schedule set forth in this section, as adjusted for cost-of-living increases or decreases pursuant to Section 11453, which schedule is designed to ensure:

(A) Safe, healthful housing.

(B) Minimum clothing for health and decency.

(C) Low-cost adequate food budget meeting recommended dietary allowances of the National Research Council.

(D) Utilities.

(E) Other items including household operation, education and incidentals, recreation, personal needs, and insurance.

(F) Allowance for essential medical, dental, or other remedial care to the extent not otherwise provided at public expense.

(2) The schedule of minimum basic standards of adequate care is as follows:

Number of eligible needy persons in the same family	Minimum basic standards of adequate care
1	$ 341
2	560
3	694
4	824
5	940
6	1,057
7	1,160
8	1,265
9	1,371
10	1,489

plus fourteen dollars ($14) for each additional needy person.

(3) (A) No adjustment shall be made under this section for the 1990–91 and 1991–92 fiscal years to reflect any change in the cost of living. Elimination of the cost-of-living adjustment pursuant to this subparagraph shall satisfy the requirements of Section 11453.05, and no further reduction shall be made pursuant to that section.

(B) Any cost-of-living adjustment under this section for the 1991–92 fiscal year and any subsequent fiscal year pursuant to Section 11453 shall not include any adjustment to reflect increases for the cost of living for the 1990–91 and 1991–92 fiscal years.

(C) For the 1992–93, 1993–94, 1994–95, 1995–96 fiscal years, and through October 31, 1996, a cost-of-living adjustment equivalent to 70 percent of the amount calculated pursuant to subdivision (a) of Section 11453 shall be made under this section. This adjustment, by reducing the cost-of-living adjustment that would otherwise have been made, shall satisfy the requirements of Section 11453.05, and no further reduction shall be made pursuant to that section.

(b) The minimum basic standard of adequate care shall also include the amount or amounts resulting from an allowance for recurring special needs, as specified in subdivision (e) Section 11450, and the amount or amounts resulting from the granting of a nonrecurring special need, equal to the amounts specified in paragraphs (1) and (2) of subdivision (f) of Section 11450.

(c) The department shall establish rules and regulations assuring the uniform application statewide of the provisions of this section.

SEC. 8. Section 11453 of the Welfare and Institutions Code is amended to read:

11453. (a) Except as provided in subdivision (c), the amounts set forth in Section 11452 and subdivision (a) of Section 11450 shall be adjusted annually by the department to reflect any increases or decreases in the cost of living. These adjustments shall become effective July 1 of each year, unless otherwise specified by the Legislature. The cost-of-living adjustment shall be calculated by the Commission on State Finance based on the changes in the California Necessities Index, which as used in this section means the weighted average changes for food, clothing, fuel, utilities, rent, and transportation for low-income consumers. The computation of annual adjustments in the California Necessities Index shall be made in accordance with the following steps:

(1) The base period expenditure amounts for each expenditure category within the California Necessities Index used to compute the annual grant adjustment are:

Food	$ 3,027
Clothing (apparel and upkeep)	406
Fuel and other utilities	529
Rent, residential	4,883
Transportation	1,757
Total	$10,602

(2) Based on the appropriate components of the Consumer Price Index for All Urban Consumers, as published by the United States Department of Labor, Bureau of Labor Statistics, the percentage change shall be determined for the 12-month period ending with the December preceding the year for which the cost-of-living adjustment will take effect, for each expenditure category specified in subdivision (a) within the following geographical areas: Los Angeles-Long Beach-Anaheim, San Francisco-Oakland, San Diego, and, to the extent statistically valid information is available from the Bureau of Labor Statistics, additional geographical areas within the state which include not less than 80 percent of recipients of aid under this chapter.

(3) Calculate a weighted percentage change for each of the expenditure categories specified in subdivision (a) using the applicable weighting factors for each area used by the State Department of Industrial Relations to calculate the California Consumer Price Index (CCPI).

(4) Calculate a category adjustment factor for each expenditure category in subdivision (a) by (1) adding 100 to the applicable weighted percentage change as determined in paragraph (2) and (2) dividing the sum by 100.

(5) Determine the expenditure amounts for the current year by multiplying each expenditure amount determined for the prior year by the applicable category adjustment factor determined in paragraph (4).

(6) Determine the overall adjustment factor by dividing (1) the sum of the expenditure amounts as determined in paragraph (4) for the current year by (2) the sum of the expenditure amounts as determined in subdivision (d) for the prior year.

(b) The overall adjustment factor determined by the preceding computation steps shall be multiplied by the schedules established pursuant to Section 11452 and subdivision (a) of Section 11450 as are in effect during the month of June preceding the fiscal year in which the adjustments are to occur and the product rounded to the nearest dollar. The resultant amounts shall constitute the new schedules which shall be filed with the Secretary of State.

(c) (1) No adjustment to the maximum aid payment set forth in subdivision (a) of Section 11450 shall be made under this section for the purpose of increasing the benefits under this chapter for the

1990–91, 1991–92, 1992–93, 1993–94, 1994–95, and 1995–96 fiscal years, and through October 31, 1996, to reflect any change in the cost of living. For the 1996–97 fiscal year, the cost-of-living adjustment that would have been provided on July 1, 1996, pursuant to subdivision (a) shall be made on November 1, 1996. Elimination of the cost-of-living adjustment pursuant to this paragraph shall satisfy the requirements of Section 11453.05, and no further reduction shall be made pursuant to that section.

(2) No adjustment to the minimum basic standard of adequate care set forth in Section 11452 shall be made under this section for the purpose of increasing the benefits under this chapter for the 1990–91 and 1991–92 fiscal years to reflect any change in the cost of living.

(d) Adjustments for subsequent fiscal years pursuant to this section shall not include any adjustments for any fiscal year in which the cost of living was suspended pursuant to subdivision (c).

SEC. 9. Section 11462 of the Welfare and Institutions Code is amended to read:

11462. (a) (1) Effective July 1, 1990, foster care providers licensed as group homes, as defined in departmental regulations, including public child care institutions, as defined in Section 11402.5, shall have rates established by classifying each group home program and applying the standardized schedule of rates. The department shall collect information from group providers beginning January 1, 1990, in order to classify each group home program.

(2) Notwithstanding paragraph (1), foster care providers licensed as group homes shall have rates established only if the group home is organized and operated on a nonprofit basis as required under subdivision (h) of Section 11400. The department shall terminate the rate effective January 1, 1993, of any group home not organized and operated on a nonprofit basis as required under subdivision (h) of Section 11400.

(b) A group home program shall be initially classified, for purposes of emergency regulations, according to the level of care and services to be provided using a point system developed by the department and described in the report, "The Classification of Group Home Programs under the Standardized Schedule of Rates System," prepared by the State Department of Social Services, August 30, 1989.

(c) The rate for each rate classification level (RCL) has been determined by the department with data from the AFDC-FC Group Home Rate Classification Pilot Study. The rates effective July 1, 1990, were developed using 1985 calendar year costs and reflect adjustments to the costs for each fiscal year, starting with the 1986–87 fiscal year, by the amount of the California Necessities Index computed pursuant to the methodology described in Section 11453. The data obtained by the department using 1985 calendar year costs shall be updated and revised by January 1, 1993.

(d) As used in this section, "standardized schedule of rates" means a listing of the 14 rate classification levels, the single rate established for each RCL, and the rate floor for each RCL.

(e) The standardized schedule of rates shall be phased in commencing July 1, 1990.

(1) In order to phase in the standardized schedule of rates, a "rate floor" has been established for each RCL.

(2) The rate floor for fiscal year 1990–91 shall be 85 percent of the standard rate for each RCL. The rate floor shall be increased to 92.5 percent of the standard rate for fiscal year 1991–92 for each RCL, shall be equal to the standard rate for each RCL for the period July 1, 1992, to September 13, 1992, inclusive, and shall be 92.5 percent of the standard rate for each RCL for the period September 14, 1992, to June 30, 1993, inclusive.

(3) The rate floor for each RCL shall be 95 percent of the standard rate for each RCL for the 1993–94 fiscal year. The rate floor shall be equal to the standard rate for each RCL for the 1994–95 fiscal year and beyond.

(f) Except as specified in paragraph (1), the department shall determine the RCL for each group home program on a prospective basis, according to the level of care and services that the group home operator projects will be provided during the period of time for which the rate is being established.

(1) For a group home program for which the department established a rate effective prior to June 30, 1990, that took into account the program's historical costs, the department shall establish the rate for fiscal year 1990–91 by determining the RCL on a retrospective basis, according to the level of care and services actually provided between July 1 and December 31, 1989, or between July 1, 1989, and March 31, 1990.

(2) Group home programs that fail to maintain at least the level of care and services associated with the RCL upon which their rate was established shall inform the department. The department shall develop regulations specifying procedures to be applied when a group home fails to maintain the level of services projected, including, but not limited to, rate reduction and recovery of overpayments.

(3) The department shall not reduce the rate, establish an overpayment, or take other actions pursuant to paragraph (2) for any period that a group home program maintains the level of care and services associated with the RCL for children actually residing in the facility. Determinations of levels of care and services shall be made in the same way as modifications of overpayments are made pursuant to paragraph (2) of subdivision (b) of Section 11466.2.

(4) Beginning July 1, 1994, for group homes paid at rates below the standard rate established by subdivision (g), a group home program shall remain at its current RCL if it maintains at least the level of care and services associated with that percentage of the points required

to be at that RCL that equals the percentage of the standard rate used to establish the group home's rate. In no event, however, shall points per child per month be reduced more than 10 points below the minimum required for the current RCL. The RCL for a program shall not increase due to the operation of this paragraph absent any program changes approved by the department pursuant to subdivision (k).

(5) A group home program that substantially changes it staffing pattern from that reported in the group home program statement shall provide notification of this change to all counties that have placed children currently in care. This notification shall be provided whether or not the RCL for the program may change as a result of the change in staffing pattern.

(g) The standardized schedule of rates for fiscal year 1990–91 is:

		FY 1990–91	
Rate Classification Level	Point Ranges	Standard Rate	Rate Floor (85%)
1	Under 60	$1,183	$1,006
2	60–89	1,478	1,256
3	90–119	1,773	1,507
4	120–149	2,067	1,757
5	150–179	2,360	2,006
6	180–209	2,656	2,258
7	210–239	2,950	2,508
8	240–269	3,245	2,758
9	270–299	3,539	3,008
10	300–329	3,834	3,259
11	330–359	4,127	3,508
12	360–389	4,423	3,760
13	390–419	4,720	4,012
14	420 & Up	5,013	4,261

(h) (1) For fiscal year 1990–91, the standardized schedule of rates shall be implemented as follows:

(A) Any group home program which received an AFDC-FC rate in the prior fiscal year below the standard rate for the fiscal year 1990–91 RCL shall receive their 1989–90 rate plus an amount equal to the California Necessities Index (CNI). The rate for fiscal year 1990–91 at which the state will participate shall not exceed the standard rate for the RCL.

(B) If the CNI increase to the group home program's fiscal year 1989–90 rate does not raise the group home program to the rate floor for the RCL, the group home program shall receive a rate equal to the rate floor for the RCL.

(C) A group home program which received an AFDC-FC rate for fiscal year 1989–90 at or above the standard rate for the RCL for fiscal year 1990–91 shall continue to receive that fiscal year 1989–90 rate.

(2) For the 1996–97 fiscal year, commencing after October 31, 1996, and the 1997–98 fiscal year, the standardized rate for each RCL shall be adjusted by an amount equal to the California Necessities Index computed pursuant to the methodology described in Section 11453.

(A) Any group home program which received an AFDC-FC rate in the prior fiscal year at or above the adjusted standard rate for the RCL in the current fiscal year shall continue to receive that rate.

(B) A group home program which received an AFDC-FC rate in the prior fiscal year below the standard rate for the RCL in the current fiscal year shall receive that rate adjusted by an amount equal to the CNI. The rate for the current fiscal year shall not exceed the standard rate for the RCL and shall not be less than the rate floor for the RCL.

(3) Beginning with that portion of the 1996–97 fiscal year commencing November 1, 1996, the standardized schedule of rates shall be adjusted annually by an amount equal to the CNI computed pursuant to Section 11453, subject to the availability of funds.

(A) Any group home program which received an AFDC-FC rate in the prior fiscal year at or above the adjusted standard rate for the RCL in the current fiscal year shall continue to receive that rate.

(B) Any group home program which received an AFDC-FC rate in the prior fiscal year below the adjusted standard rate for the RCL in the current fiscal year shall receive the adjusted RCL rate.

(i) (1) (A) The rate for a new group home program of a new or existing provider shall be established at the rate floor for the new program's projected RCL.

(B) On and after the operative date of this subparagraph, the department shall not, prior to July 1, 1993, establish a rate for a new group home program of a new or existing provider.

(2) The department shall not establish a rate for a new program of a new or existing provider unless the provider submits a recommendation from the host county, the primary placing county, or a regional consortium of counties that the program is needed in that county; that the provider is capable of effectively and efficiently operating the program; and that the provider is willing and able to accept AFDC-FC children for placement who are determined by the placing agency to need the level of care and services that will be provided by the program.

(3) The department shall encourage the establishment of consortia of county placing agencies on a regional basis for the

purpose of making decisions and recommendations about the need for, and use of, group home programs and other foster care providers within the regions.

(4) The department shall annually conduct a county-by-county survey to determine the unmet placement needs of children placed pursuant to Sections 300 and Section 601 or 602, and shall publish its findings by November 1 of each year.

(j) The department shall develop regulations specifying ratesetting procedures for program expansions, reductions, or modifications, including increases or decreases in licensed capacity, or increases or decreases in level of care or services.

(k) (1) For the purpose of this subdivision, "program change" means any alteration to an existing group home program planned by a provider that will increase the RCL or AFDC-FC rate. An increase in the licensed capacity or other alteration to an existing group home program that does not increase the RCL or AFDC-FC rate shall not constitute a program change.

(2) (A) Prior to July 1, 1993, the rate for a group home program shall not increase, as the result of a program change, from the rate established for the program effective June 30, 1992. For rate increases as a result of a program change which became effective between July 1, 1992, and the effective date of this paragraph, the department shall adjust rates downward as necessary to comply with this chapter. Notwithstanding any other provisions of law, a group home provider shall be allowed to change a group home program to reflect a decrease in services due to the provisions of this paragraph.

(B) For the 1993–94 fiscal year, the rate for a group home program shall not increase, as the result of a program change, from the rate established for the program effective July 1, 1993, except as provided in paragraph (3).

(C) For the 1994–95 fiscal year, the 1995–96 fiscal year, and through October 31, 1996, the rate for a group home program shall not increase, as the result of a program change, from the rate established for the program effective July 1, 1994, except as provided in paragraph (3).

(3) (A) For the 1993–94 fiscal year, the 1994–95 fiscal year, the 1995–96 fiscal year, and through October 31, 1996, the department shall not establish a rate for a new program of a new or existing provider or approve a program change for an existing provider that either increases the program's RCL or AFDC-FC rate, or increases the licensed capacity of the program as a result of decreases in another program with a lower RCL or lower AFDC-FC rate that is operated by that provider, unless both of the conditions specified in this paragraph are met.

(i) The licensee obtains a letter of recommendation from the host county, primary placing county, or regional consortium of counties regarding the proposed program change or new program.

(ii) The county determines that there is no increased cost to the General Fund.

(B) Notwithstanding subparagraph (A), the department may grant a request for a new program or program change, not to exceed 25 beds, statewide, if (i) the licensee obtains a letter of recommendation from the host county, primary placing county, or regional consortium of counties regarding the proposed program change or new program, and (ii) the new program or program change will result in a reduction of referrals to state hospitals during the 1993–94 fiscal year, the 1994–95 fiscal year, the 1995–96 fiscal year, or through October 31, 1996.

(*l*) General unrestricted or undesignated private charitable donations and contributions made to charitable or nonprofit organizations shall not be deducted from the cost of providing services pursuant to this section.

(m) The department shall, by October 1 each year, commencing October 1, 1992, provide the Joint Legislative Budget Committee with a list of any new departmental requirements established during the previous fiscal year concerning the operation of group homes, and of any unusual, industrywide increase in costs associated with the provision of group care which may have significant fiscal impact on providers of group homes care. The committee may, in fiscal year 1993–94 and beyond, use the list to determine whether an appropriation for rate adjustments is needed in the subsequent fiscal year.

(n) This section shall become operative on July 1, 1995.

SEC. 10. Section 12200.01 of the Welfare and Institutions Code is amended to read:

12200.01. (a) Notwithstanding any other provision of law, commencing November 1, 1992, the payments schedules set forth in Section 12200 in effect on June 30, 1992, except subdivisions (e), (g), and (h) shall be reduced by 5.8 percent.

(b) Notwithstanding subdivision (a), in no event shall the combined amount of the federal Supplementary Security Income payment and the state Supplementary State Program payment level for any applicant or recipient be reduced below the level required by the federal Social Security Act in order to maintain eligibility for federal funding under Title XIX of the federal Social Security Act (Subchapter 19 (commencing with Section 1396) of Chapter 7 of Title 42 of the United States Code).

(c) This section shall remain operative only until November 1, 1996, shall remain in effect only until January 1, 1997, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1997, deletes or extends that date.

SEC. 11. Section 12200.015 of the Welfare and Institutions Code is amended to read:

12200.015. (a) Notwithstanding any other provision of law, the maximum aid payments in effect on June 30, 1993, in accordance with

Section 12200, as reduced by subdivision (a) of Section 12200.01, except subdivisions (e), (g), and (h) of Section 12200, shall be reduced by 2.7 percent beginning the first of the month following 60 days after the enactment of this section.

(b) Commencing November 1, 1996, the maximum aid payment levels in effect on June 30, 1996, that were reduced by Section 12200.01 shall be increased by the dollar amount of the decrease made in each payment level during the 1992–93 fiscal year pursuant to Section 12200.01.

(c) Notwithstanding subdivision (a), in no event shall the payment schedules be reduced below the level required by the federal Social Security Act in order to maintain eligibility for federal funding under Title XIX of the federal Social Security Act, contained in Subchapter 19 (commencing with Section 1396) of Chapter 7 of Title 42 of the United States Code.

SEC. 12. Section 12200.017 of the Welfare and Institutions Code is amended to read:

12200.017. (a) Notwithstanding any other provision of law, the maximum aid payments in effect on June 30, 1994, in accordance with Section 12200, as reduced by subdivision (a) of Section 12200.01 and Section 12200.015, except subdivisions (e), (g), and (h) of Section 12200, shall be reduced by 2.3 percent effective September 1, 1994.

(b) Notwithstanding subdivision (a), in no event shall any maximum aid payment schedule in any payment category established pursuant to Section 12200 be reduced below the level required by the federal Social Security Act in order to maintain eligibility for federal funding under Title XIX of the federal Social Security Act, contained in Subchapter 19 (commencing with Section 1396) of Chapter 7 of Title 42 of the United States Code.

(c) In no event shall the reduction of any maximum aid payment level pursuant to this section result in a change in share of cost or eligibility for services under Article 7 (commencing with Section 12300) for any aged, blind, or disabled person who was receiving services under that article in 1994 prior to the enactment of this section because of that reduction in maximum aid payment, provided he or she continues to meet other applicable requirements.

(d) The decrease in aid provided for pursuant to this section shall not prevent the increases in aid that shall occur on November 1, 1996, pursuant to Sections 12200.01 and 12200.015.

SEC. 13. Section 12200.018 of the Welfare and Institutions Code is amended to read:

12200.018. (a) If permitted by federal law, and notwithstanding any other provision of law, through October 31, 1996, the payment schedules set forth in Section 12200 in effect on June 30, 1995, as reduced by subdivision (a) of Section 12200.01, Section 12200.015, and subdivision (a) of Section 12200.017, except subdivisions (e), (g), and (h), shall be reduced by 4.9 percent.

(b) If permitted by federal law, and notwithstanding any other provision of law, the payment schedules set forth in Section 12200 in effect on June 30, 1995, as reduced by subdivision (a) of Section 12200.01, Section 12200.015, subdivision (a) of Section 12200.017, and subdivision (a) of this section, except subdivision (e), (g), and (h), shall be adjusted, for each county to reflect regional variations in housing costs based on the lowest quartile of monthly rents reported in the Decennial Census data for 1990, in the following manner:

(1) For the regions where the lowest quartile rent equals or exceeds four hundred dollars ($400) per month, the payment schedules shall not be reduced. This region shall consist of the following counties:

(A) Alameda County
(B) Contra Costa County
(C) Los Angeles County
(D) Marin County
(E) Monterey County
(F) Napa County
(G) Orange County
(H) San Diego County
(I) San Francisco County
(J) San Luis Obispo County
(K) San Mateo County
(L) Santa Barbara County
(M) Santa Clara County
(N) Santa Cruz County
(O) Solano County
(P) Sonoma County
(Q) Ventura County

(2) For counties where lowest quartile rent is below four hundred dollars ($400) per month, the payment schedules shall be reduced by 4.9 percent. This paragraph shall apply to the following counties:

(A) Alpine County
(B) Amador County
(C) Butte County
(D) Calaveras County
(E) Colusa County
(F) Del Norte County
(G) El Dorado County
(H) Fresno County
(I) Glenn County
(J) Humboldt County
(K) Imperial County
(L) Inyo County
(M) Kern County
(N) Kings County
(O) Lake County
(P) Lassen County

(Q) Madera County
(R) Mariposa County
(S) Mendocino County
(T) Merced County
(U) Modoc County
(V) Mono County
(W) Nevada County
(X) Placer County
(Y) Plumas County
(Z) Riverside County
(AA) Sacramento County
(AB) San Benito County
(AC) San Bernardino County
(AD) San Joaquin County
(AE) Shasta County
(AF) Sierra County
(AG) Siskiyou County
(AH) Stanislaus County
(AI) Sutter County
(AJ) Tehama County
(AK) Trinity County
(AL) Tulare County
(AM) Tuolumne County
(AN) Yolo County
(AO) Yuba County

(c) Subdivisions (a) and (b) shall be operative, and the reductions in payment schedules shall commence on the first of the month following approval and implementation by the Social Security Administration but no earlier than December 1, 1995.

(d) Subdivisions (a) and (b) shall not be operative if any payment schedule set forth in Section 12200 would be reduced below the level required by subsection (e) of Section 1382g of Title 42 of the United States Code in order to maintain eligibility for federal funding under Title XIX of the Social Security Act, contained in Subchapter 19 (commencing with Section 1396) of Chapter 7 of Title 42 of the United States Code.

(e) If subdivisions (a) and (b) are not operative, the payment schedules set forth in Section 12200, except subdivisions (e), (g), and (h), shall for the 1995–96 fiscal year be reduced, commencing December 1, 1995, to the minimum amounts, not to exceed 4.9 percent of the maximum aid payment in effect on June 30, 1995, permitted by the federal Social Security Act by subsection (e) of Section 1382g of Title 42 of the United States Code that will maintain eligibility for federal funding under Title XIX of the Social Security Act, contained in Subchapter 19 (commencing with Section 1396) of Chapter 7 of Title 42 of the United States Code.

(f) In no event shall the reduction of any payment schedule pursuant to this section result in a change in eligibility or share of cost

for services under Article 7 (commencing with Section 12300) for any aged, blind, or disabled person who was receiving services under that article in 1995 prior to the enactment of this section because of that reduction in maximum aid payment, provided he or she continues to meet other applicable requirements.

(g) The decrease in aid provided for pursuant to this section shall not prevent the increases in aid that shall occur on November 1, 1996, pursuant to Section 12200.01 and 12200.015.

SEC. 14. Section 12550 of the Welfare and Institutions Code is amended to read:

12550. For the purposes of this article, "special circumstances" means those which are not common to all recipients and which arise out of need for certain goods or services, and physical infirmities or other conditions peculiar, on a nonrecurring basis, to the individual's situation. Special circumstances shall include replacement of essential household furniture and equipment, or clothing when lost, damaged or destroyed by a catastrophe, necessary moving expenses, required housing repairs, and unmet shelter needs.

This section shall become operative on November 1, 1996.

SEC. 15. Section 19355.5 of the Welfare and Institutions Code is amended to read:

19355.5. Notwithstanding any other provision of law, effective the first day of the month after which this section is enacted, all rates established for the 1992–93 fiscal year pursuant to Section 19356 under this chapter for work-activity programs shall be reduced proportionately by the percentage necessary to effect a total savings of not less than four million seventy-one thousand dollars ($4,071,000) and not more than six million seven hundred seventy-eight thousand dollars ($6,778,000) of General Fund money. The department is encouraged to increase the number of individuals mutually served and the utilization of federal dollars, pursuant to subdivision (b) of Section 19356.6, to minimize this rate reduction in the 1992–93 fiscal year while achieving the required savings in General Fund money. Should the utilization of federal funds during the 1992–93 fiscal year so permit, the department may adjust the rate of each work-activity program prior to July 1, 1993, in an amount not to exceed the adjustment to be given effective July 1, 1993. Commencing July 1, 1993, the rate established for the 1992–93 fiscal year pursuant to this section shall be adjusted to the extent necessary to achieve a savings of six million seven hundred seventy-eight thousand dollars ($6,778,000) in the subsequent 12-month period. The rate in effect as of July 1, 1993, shall remain in effect until November 1, 1996.

SEC. 16. Section 37 of Chapter 722 of the Statutes of 1992 is amended to read:

Sec. 37. The amounts payable pursuant to paragraph (1) of subdivision (a) of Section 11450 of the Welfare and Institutions Code in effect on July 1, 1992, shall be reinstated on November 1, 1996.

CONCURRENT RESOLUTIONS

1995–96

FOURTH EXTRAORDINARY SESSION

1995–96 RESOLUTION CHAPTERS

RESOLUTION CHAPTER 1

Senate Concurrent Resolution No. 1—Relative to the Joint Rules for the 1995–96 Fourth Extraordinary Session.

[Filed with Secretary of State February 22, 1996.]

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Joint Rules of the Senate and Assembly for the 1993–94 Regular Session, except Joint Rules 51, 54, 55, 61, and the provision of Joint Rule 62(a) requiring that notice of a hearing of a bill be published in the Daily File, shall govern relations between the Senate and Assembly for the 1995–96 Fourth Extraordinary Session and that the extraordinary session shall be in recess during the same time periods when the 1995–96 Regular Session is in recess.

RESOLUTION CHAPTER 2

Senate Concurrent Resolution No. 2—Relative to final adjournment of the 1995–96 Fourth Extraordinary Session of the Legislature.

[Filed with Secretary of State March 29, 1996.]

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the 1995–96 Fourth Extraordinary Session of the Legislature shall adjourn sine die on March 28, 1996.

Statutory Record, 1989–1996 ..... S-5

Superior Numbers S-929

PREFACE

Digests

The Summary Digest consists of a short summary of each law enacted, and of each constitutional amendment, concurrent or joint resolution adopted by the Legislature in 1996.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the "Digest Chapters Superior Numbers" section.

Cross Reference Tables

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

New General Laws

Lists new general laws passed in the years 1989–1996 which do not specifically amend, add to, or repeal any existing code or general law.

Index

A subject matter index to all measures, including constitutional amendments and resolutions, is included.

Statutory Record

This edition of the Summary Digest includes a statutory record for 1989–1996. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

EFFECTIVE DATES

Regular Session

The 1995–96 Regular Session reconvened on January 3, 1996, and adjourned *sine die* on November 30, 1996. Statutes enacted in 1996, other than those taking immediate effect, will become effective January 1, 1997. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute, and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

Extraordinary Sessions

An urgency statute enacted at a special session of the Legislature takes effect immediately, as outlined above, and the same rules apply with respect to a delayed *operative date.* A nonurgency statute takes effect on the 91st day after adjournment of the special session at which the bill was passed. The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 1995–96 First Extraordinary Session reconvened on January 3, 1996. The Assembly adjourned *sine die* on September 1, 1996; the Senate adjourned *sine die* on August 31, 1996. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is December 1, 1996. Please refer to the preceding year's Statutes and Amendments to the Codes for statutes enacted prior to the reconvening date.

The 1995–96 Second Extraordinary Session reconvened on January 3, 1996. The Assembly adjourned *sine die* on September 1, 1996; the Senate adjourned *sine die* on August 31, 1996. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is December 1, 1996. Please refer to the preceding year's Statutes and Amendments to the Codes for statutes enacted prior to the reconvening date.

The 1995–96 Third Extraordinary Session convened on January 4, 1996, and adjourned *sine die* on March 15, 1996. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is June 14, 1996.

The 1995–96 Fourth Extraordinary Session convened in the Assembly on February 13, 1996, and in the Senate on February 1, 1996. It adjourned *sine die* on March 28, 1996. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is June 27, 1996.

DIGESTS OF STATUTES ENACTED IN 1996

1995–96 REGULAR SESSION

BILL CHAPTERS

Ch. 1 (AB 1168) Campbell. Bonds: public education facilities.

(1) The Leroy F. Greene State School Building Lease-Purchase Law of 1976 (Greene Act) provides for the acquisition and construction of facilities by the state and the lease-purchase of those facilities by school districts.

The Higher Education Facilities Bond Act of 1986, the Higher Education Facilities Bond Act of 1988, and the Higher Education Facilities Bond Act of June 1992 provide for the issuance, pursuant to the State General Obligation Bond Law, of bonds in an amount not to exceed $400,000,000, $600,000,000, and $900,000,000, respectively, and the expenditure of the proceeds therefrom to aid the University of California, the California State University, including the California Maritime Academy, and the California Community Colleges for, among other things, the construction and equipping of educational facilities, as specified. Existing law establishes the Higher Education Facilities Finance Committee to administer those acts and to authorize the issuance and sale of bonds to the extent necessary to fund the education facilities construction apportionments expressly authorized by the Legislature in the annual Budget Act.

This bill would enact the Public Education Facilities Bond Act of 1996 which, upon approval by the state electorate, would provide for the issuance of state general obligation bonds in an amount not to exceed $3,000,000,000, exclusive of refunding bonds, issued pursuant to that act, and the expenditure of $2,025,000,000 of revenues therefrom to provide aid to school districts, county superintendents of schools, and county boards of education, as specified, in accordance with the Greene Act and related school facilities programs, as specified, and would require that any funds remaining from designated school construction bond measures enacted in prior years be transferred to the State School Building Lease-Purchase Fund for apportionment under the Greene Act. The bill would also authorize the Treasurer to sell any unsold bonds from those designated measures for purposes of the Greene Act.

This bill would provide that, of the bond proceeds authorized under the Public Education Facilities Bond Act of 1996, not more than $900,000,000 may be used for, among other things, the acquisition of portable classrooms, the reconstruction or modernization of facilities, as specified, the purchase and installation of air-conditioning equipment and insulation materials, as specified, the funding of projects in districts with enrollment increases due to the locating or expansion of state or federal prisons, the acquisition of relocatable child care and development facilities, the funding of projects for county boards of education, as specified, the funding of projects in districts that lack funding priority due to the size of pupil enrollment, the funding of projects for high priority roof replacement, the construction projects or the purchase of furniture or equipment designed to increase school security, and the identification, assessment, or abatement of hazardous asbestos, as specified, and of lead.

This bill would provide that, of the bond proceeds authorized under the Public Education Facilities Bond Act of 1996, not more than $100,000,000 may be used for seismic retrofit projects of existing public school facilities, not more than $40,000,000 may be used by school districts that will contribute 60% or more of the cost of a project, and not more than $25,000,000 may be used for projects that include joint use facilities.

This bill would provide that $975,000,000 of the bond proceeds authorized under the Public Education Facilities Bond Act of 1996 be expended to assist in meeting the capital outlay financing needs of California's public higher education system and would expressly include the Hastings College of the Law, among the institutions for which the proceeds of those bonds may be expended, consistent with the purposes of the bill. The bill would specify that the addition of the Hastings College of the Law among the institutions for which the proceeds of the bonds may be expended is not intended to mark a change from the funding authorizations made under the Higher Education Facilities Bond Act of 1986, or the Higher Education Facilities Bond Act of 1988, but is intended to state more clearly what was intended by the Legislature in those acts as well.

This bill would require that any request for funds from the bonds issued pursuant to the Public Education Facilities Bond Act of 1996 for the purposes of public higher education facilities be accompanied by the 5-year capital outlay plan of the particular

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

university or college and include a schedule that prioritizes the seismic retrofitting needed to significantly reduce seismic hazards in buildings identified as high priority by the university or college, as specified. The bill would also authorize the expenditure of the revenues of the bonds for the construction or improvement of off-campus facilities of the California State University approved by the Trustees of the California State University on or before July 1, 1990.

(2) This bill would provide that the Public Education Facilities Bond Act of 1996 be submitted to the voters at the March 26, 1996, direct primary election in accordance with specified law.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (AB 680) Mazzoni. Bonds: public facilities.

Existing law specifies information that must be included in the statewide ballot pamphlet for each state measure to be voted upon.

Existing law requires that every bond measure submitted to the people by the Legislature shall appear on the ballot of the first statewide election occurring at least 131 days after the adoption of the proposal by the Legislature. Existing law also requires the Secretary of State to mail ballot pamphlets to voters before the election, in which measures contained in the ballot pamphlet are to be voted on, with the mailing commencing not less than 40 days before the election and completed no later than 21 days before the election.

This bill would waive those requirements and specified other election requirements with respect to submitting to the voters at the March 26, 1996, direct primary election, the Public Education Facilities Bond Act of 1996 contained in AB 1168 of the 1995–96 Regular Session. This bill would be operative only if AB 1168 is enacted.

Existing law requires the Secretary of State to submit the Seismic Retrofit Bond Act of 1996 on the March 26, 1996, direct primary election, and if the voters do not approve the measure at that election, the Secretary of State is required to submit the measure to the voters at the November 5, 1996, general election. This bond measure, if approved, would authorize $2,000,000,000 in state general obligation bonds for the seismic retrofit of state-owned highways and bridges throughout the state. The ballots are required to have printed thereon the words "Seismic Retrofit Bond Act of 1996" and in the same square under those words, a specified ballot statement.

This bill would revise that ballot statement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (AB 285) Hauser. Energy resources.

Existing law creates the Geothermal Resources Development Account in the General Fund for deposit of revenues from specified mineral lands leasing activities.

This bill would appropriate $1,000,000 from that account to the State Energy Resources Conservation and Development Commission for a grant to Lake County for construction of a specified pipeline.

The bill would become operative only when AB 1671 is enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 4 (AB 1496) Sher. Sexually violent predators.

(1) Existing law specifies procedures for the civil commitment of sexually violent predators. Pursuant to these procedures, a person who is in custody under the jurisdiction of the Department of Corrections may be referred to the State Department of Mental Health for an evaluation as to whether the person may be a sexually violent predator.

This bill would provide that the Board of Prison Terms may order that such a person remain in custody for no more than 45 days for the purposes of the evaluation, except as provided.

This bill also would provide that, upon the filing of a petition for commitment of a person who is a sexually violent predator, a judge of the superior court shall review the petition and determine whether there is probable cause to believe the person is likely to engage in sexually violent predatory criminal behavior upon release. If the judge determines that there is probable cause for such a finding, the judge shall order the person to be detained in a secure facility.

NOTE: Superior numbers appear as a separate section at the end of the digests.

These provisions would be repealed on January 1, 1998.

(2) Existing law also provides for a probable cause hearing for purposes of ordering the trial of a sexually violent predator.

This bill would provide that, if no probable cause is found, any person subject to parole shall report to parole. If there is probable cause for purposes of ordering a trial, the person shall remain in custody in a secure facility until the trial is completed.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (SB 1313) Mountjoy. Voters: residency confirmation.

Existing law requires the county elections official to conduct a preelection residence confirmation procedure by mailing a specified nonforwardable postcard to each registered voter of the county preceding the direct primary election. For elections held in odd-numbered years, existing law authorizes the county elections official, in lieu of mailing that postcard, to include the return address of the office of the county elections official on the outside of the sample ballot or sample ballot envelope, along with an "address correction requested" statement and a statement requiring return of the sample ballot to the mail carrier if the person named in the sample ballot is not at that address.

Existing law requires the county elections official, based upon the postal notices on the returned residency confirmation postcards or the sample ballots returned, to cancel or correct, among other things, the appropriate affidavits of registration.

This bill would repeal the existing residency confirmation procedure and would enact a preprimary election procedure to be conducted by the last day of February immediately prior to the primary election. It would delete the provisions requiring the county elections official to take the required action on the basis of the returned sample ballots, and would repeal provisions requiring a postgeneral election residency confirmation process according to existing procedures.

This bill would authorize the mailing of an alternate residency confirmation postcard, as specified, to a voter who has not voted in any election within the preceeding 4 years whose residence, address, or party affiliation has not been updated during that time.

This bill would require the county elections official, based on the change-of-address information received indicating the voter has moved to a new address within, or in another county, to correct or cancel the voter's registration or to place the voter's name on an inactive file of voters who do not receive election materials and are not counted toward the qualification of candidates or measures, among other things.

By revising the procedures for purging voters' names from the voter registration lists, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 6 (SB 681) Hurtt. Local government assistance.

(1) Existing law provides for the award of moneys to the counties from the General Fund for juvenile facilities, as specified, only if county matching funds are provided, as specified.

This bill would specify exceptions to the requirement.

(2) Existing law requires each county to pay the state $25 per month for the time a person from that county is committed to the Department of the Youth Authority, as specified.

This bill would revise and recast this provision to require the county to pay the state $150 per month for the time a person from that county is committed to the Department of the Youth Authority, effective January 1, 1997.

The bill would also require each county to pay the state for each person committed to the Department of the Youth Authority pursuant to a scale with regard to the offense on which the commitment is based.

(3) Existing law continuously appropriates special fund moneys for apportionments to cities and counties of a portion of the revenues derived from a per gallon tax on motor

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

vehicle fuels in accordance with prescribed formulas. A city's or county's entitlement to the apportioned funds from the tax imposed at a rate of more than 9¢ per gallon is conditional upon its expenditure from its general fund for street and highway purposes of an amount not less than the annual average of its expenditures during the 1987–88, 1988–89, and 1989–90 fiscal years. Under existing law, this condition is not applicable for the 1992–93, 1993–94, 1994–95, 1995–96, and 1996–97 fiscal years.

This bill would delete that condition. Thus, this bill would make funds available to cities and counties that would not be eligible otherwise, thereby making an appropriation.

(4) Existing law requires any county receiving certain state allocations to maintain specified levels of financial support of county funds for health services.

This bill would revise county realignment financial responsibilities.

(5) Existing law authorizes the board of supervisors in any county to adopt a general assistance standard of aid, including the value of in-kind aid.

This bill would provide that the value of in-kind aid includes, but is not limited to, the value of specified amounts of medical aid and care.

(6) Existing law authorizes the board of supervisors of any county to adopt a standard of aid below a specified level if the Commission on State Mandates makes a finding that the prescribed level would result in significant financial distress to the county. The commission may make a finding of financial distress for a period of up to 12 months and is required to act on county applications within specified time periods.

This bill would authorize the commission to make a finding of financial distress for a period of up to 36 months and would extend the application periods.

(7) Existing law authorizes the board of supervisors of each county to adopt residency requirements for purposes of determining a person's eligibility for general assistance.

This bill would authorize counties to establish a standard of general assistance for applicants or recipients who share housing with unrelated persons who are not legally responsible for them, and would prohibit an employable individual from receiving aid for more than 3 months in any 12-month period whether or not the months are consecutive. The bill would also authorize a county to require adult applicants and recipients of benefits under the general assistance program to undergo screening for substance abuse.

(8) Existing law permits a reduction for the 1994–95 fiscal year of up to $15,000,000 in the amount a county or a city is required to deposit into the health account each month.

This bill would permit a reduction of up to $25,000,000 in that amount and would delete that fiscal year restriction.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 7 (AB 1483) Villaraigosa. Local government.

Existing law provides for the operation of local juvenile ranches, camps, and forestry camps.

This bill, in order to assist the counties in the operation of these local juvenile facilities for the 1995–96 fiscal year, would appropriate $32,700,000 from the General Fund to the Department of the Youth Authority for distribution to eligible counties, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 8 (AB 1095) Martinez. Public utilities: gas corporations: public disclosure.

Existing law requires the Public Utilities Commission to require every public utility other than a common carrier to print and keep open to public inspection, schedules showing all rates, tolls, rentals, charges, and classifications collected or enforced, or to be collected or enforced, together with all rules, contracts, privileges, and facilities that in any manner affect or relate to rates, tolls, rentals, classifications, or service.

Existing law also requires that public records of a state or local agency be open for public inspection.

This bill would provide that the commission may exempt from the requirements for public inspection, a contract negotiated by the gas corporation for service subject to the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

commission's jurisdiction with rates, terms or conditions differing from the schedules on file with the commission, except under specified conditions.

This bill would also provide that a local agency is exempt from any requirement to make available for public inspection a contract negotiated by the local agency for the provision of gas, but may disclose the contract information under specified conditions.

The provisions of the bill would be repealed January 1, 2001.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 9 (AB 1519) Morrow. Education technology.

Existing law establishes various programs for the introduction of education technology into the classroom, including, among other programs, the Morgan-Farr-Quackenbush Educational Technology Act of 1992, which has as its primary mission ensuring that the procurement and use of technology is clearly guided by the needs of pupils.

This bill would establish the Education Technology Grant Program of 1996 (grant program), to be repealed as specified, for the purposes of awarding technology implementation grants on a 50 percent matching basis to school districts and county offices of education maintaining kindergarten and grades 1 to 12, inclusive, for the wiring of and between classrooms, as specified, and the purchase of hardware and software necessary to utilize telecommunications and information services for instructional purposes. The Education Technology Trust Fund would be created for the purposes of that grant program. The bill would specify that of the total sum of moneys appropriated from the Education Technology Trust Fund by the bill and Assembly Bill No. 1302 of the 1995–96 Regular Session, 34 percent shall be allocated to school districts having pupils enrolled in grades 9 to 12, inclusive, and 50 percent shall be allocated to school districts having pupils enrolled in kindergarten and grades 1 to 8, inclusive, and to county offices of education. The bill would require the State Allocation Board, in consultation with the State Department of Education, to develop a formula for the allocation of technology implementation grants to applicant school districts and county offices of education. The bill would provide for a waiver of the matching requirement by the State Allocation Board if the State Department of Education makes a determination of financial hardship. Applicant school districts and county offices of education would be required to include certain information in their applications for technology implementation grants.

This bill would require the State Allocation Board to award technology implementation grants and would require the Office of Public School Construction to administer the grant program.

This bill would authorize the Public Utilities Commission to allocate $17,500,000 for the purpose of telecommunications development in public schools, as described in a specified decision of the commission, thereby imposing a tax. The bill would require the commission to order that $17,500,000 be deposited into the Education Technology Trust Fund. The bill would appropriate $17,500,000 to the State Allocation Board from the amount deposited in the Education Technology Trust Fund for allocation by the board for technology implementation grants and administrative costs, as specified.

To the extent the funds appropriated to the State Allocation Board by this bill, from the amount deposited in the Education Technology Trust Fund, are allocated to school districts, as defined by existing law for purposes of Section 8 of Article XVI of the California Constitution, and the use of those funds furthers the educational mission of school districts, the funds may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

This bill would provide that it would become operative only if A.B. 1302 of the 1995–96 Regular Session is enacted and contains specified provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 10 (AB 1869) Katz. Transportation.

(1) Under the Social Service Transportation Improvement Act, transportation planning agencies and county transportation commissions are required to adopt and submit reports to the Director of Transportation on all existing social service transportation services in their respective geographic areas, and were required, not later than December 31, 1981, to adopt and submit to the Secretary of the Business, Transportation and Housing Agency an action plan describing in detail the steps required to accomplish the consolidation of social service transportation services. The action plan includes designating a single agency or multiple agencies as consolidated transportation service agencies.

This bill would provide that in Ventura County, the county transportation commission is the consolidated transportation service agency.

(2) Existing law requires a local transportation commission to be established for each county not within the jurisdiction of a statutorily created regional transportation planning agency or a council of governments. A local transportation commission is required to be comprised of members appointed by the county board of supervisors, members appointed by the city councils of cities in the county, members appointed by a transit district in the county, and a member representing other transit operators in the county.

This bill would authorize members of the county board of supervisors, the city councils, the transit district, and other local transit operators to serve as members of the local transportation commission. The bill would also grant the commission specific powers.

(3) Existing law prohibits certain funds from being allocated to a public transit operator for operating purposes unless the operator meets prescribed efficiency standards, except as specified.

This bill would, for a stated reason, exempt the Santa Cruz Metropolitan Transit District from the prohibition until July 1, 1998.

(4) Existing law creates and prescribes the powers and duties of the Los Angeles County Metropolitan Transportation Authority.

This bill would impose a state-mandated local program by requiring the authority to adopt a specified change order procedure for contracts awarded by the authority.

The bill would also impose a state-mandated local program by requiring the authority to require its inspector general to prepare a questionnaire to be completed by any firm seeking to do business with the authority. The bill would require the questionnaire to solicit information on specified topics, and would prohibit the authority from contracting or doing business with any firm that knowingly provides false information in the questionnaire.

(5) Existing law provides for the relinquishment of state highways or portions of state highways to any county or city by the California Transportation Commission in accordance with specified criteria and procedures.

This bill would authorize the commission to relinquish a specified segment of State Route 224 to a city in which that segment is located, if the city has agreed to accept the relinquishment. The relinquishment would be upon terms and conditions approved by the commission and would be effective on the day immediately following the date of that approval.

The bill would also revise the descriptions of State Routes 48 and 138.

(6) Under existing law, within each 4-year period beginning July 1, 1988, the funds from the State Highway Account in the State Transportation Fund, with the exception of those for specified programs, are required to be expended in accordance with the so-called county minimums and north-south split formulas. For purposes of this funding, county boards of supervisors may elect to pool their counties' minimum programming with adjacent counties.

The bill would designate that portion of the county population and state highway mileage in El Dorado and Placer Counties that is within the jurisdiction of the Tahoe Regional Planning Agency to be counted separately for purposes of receiving funding.

This bill would allow the regional transportation planning agency in Placer and El Dorado Counties to pool its minimum programming.

(7) Under existing law, various documents are required under the Vehicle Code to be submitted to the Department of Motor Vehicles.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that whenever certain documents are required to be submitted, those documents may be submitted to the department by electronic transmission or other means approved by the department.

(8) Existing law requires motor vehicles and certain other vehicles to be registered and fees paid prior to, among other things, driving those vehicles on a highway. Existing law exempts from the registration and fee requirements a vehicle that is towed upon the order of a peace officer pursuant to certain, limited provisions of the Vehicle Code.

This bill would extend the exemption to the towing of a vehicle upon the order of a peace officer pursuant to any provision of the Vehicle Code.

(9) Existing law authorizes certain officials, under specified circumstances, to apply to the Department of Motor Vehicles for regular series license plates for state-owned vehicles that are issued to them.

This bill would extend that authorization, under specified circumstances, to limited described counties, to any member of that county board of supervisors who is regularly issued a county-owned vehicle.

(10) Existing law authorizes the Department of Motor Vehicles to issue a restricted class A driver's license for the operation of any 2-axle vehicle weighing 4,000 pounds or more unladen when towing a livestock trailer not exceeding 15,000 pounds gross vehicle weight rating or gross vehicle weight, if all of specified conditions are met.

This bill would apply the above provisions to the towing of trailers exceeding 10,000 pounds, but not exceeding 15,000 pounds.

(11) Existing law prohibits a person under 18 years of age from operating, or riding upon a bicycle as a passenger, upon a street, bikeway, or other public bicycle path or trail unless the person is wearing a helmet meeting one of 2 specified standards.

This bill would include an additional helmet safety standard set by the American Society for Testing Materials (ASTM F-1447 standard) as a third option to meeting the specified helmet standards.

(12) Existing law provides for the removal of a vehicle by a peace officer or specified public employee under enumerated circumstances, including when a vehicle is found with a registration expiration date in excess of one year, as specified.

This bill would provide for the removal under the same circumstances when the registration expiration date is in excess of 6 months, rather than one year, as specified.

(13) Existing law makes it unlawful for a person under the age of 21 years who has a blood-alcohol concentration of 0.01% or greater, as measured by a preliminary alcohol screening test, to drive a vehicle.

This bill would expressly include other chemical testing as an alternative to the preliminary alcohol screening test.

(14) Existing law requires a peace officer to immediately forward to the Department of Motor Vehicles a sworn report of all information relevant to certain enforcement action, including information which adequately identifies the person, and a statement of the officer's grounds for belief that the person violated certain driving-under-the-influence statutes.

This bill would provide that, for purposes of the above and a related statute, a report is a sworn report when it bears an entry identifying the maker of the document or a signature that has been affixed by means of an electronic device approved by the department.

(15) Existing law prohibits flashing lights on vehicles except as otherwise specifically permitted.

This bill would allow vehicles owned or operated by licensed contractors or construction companies to display flashing amber warning lights to the front, sides, or rear of the vehicles while engaging in activities on a highway or in the vicinity of a highway that are related to construction projections, as specified. The bill would specify the affect of this provision on civil liability actions.

(16) Existing law requires the Department of the California Highway Patrol to adopt regulations prescribing the conditions under which the transportation of an inhalation hazard, as defined, shall be accompanied by an escort vehicle and the conditions of that transportation.

This bill would repeal this provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(17) Existing law requires the Department of Motor Vehicles to remit all money collected from motor vehicle weight fees to the Treasurer for deposit in the State Highway Account in the State Transportation Fund. The Controller is then required to transfer from that account to the Motor Vehicle Account, which is also in the fund, an amount equal to the costs incurred by the department and the Franchise Tax Board in connection with the administration of the provisions regarding weight fees.

This bill, instead of requiring the Controller to transfer that amount, would provide that the Legislature shall appropriate the amount specified above from the State Highway Account to the department and the board.

(18) The bill would make various additional technical and nonsubstantive changes.

(19) This bill would incorporate additional changes in Section 22651 of the Vehicle Code proposed by this bill and A.B. 1228 if both bills are enacted and this bill is enacted last.

(20) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(21) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 11 (AB 1418) Bordonaro. Family day care homes: pilot project.

Pursuant to provisions that were repealed on January 1, 1996, the State Director of Social Services was required to authorize the Counties of Placer, Fresno, San Diego, San Luis Obispo, and Ventura to operate a pilot project, for a period not to extend beyond January 1, 1996, for the purpose of testing the feasibility of permitting 2 additional schoolage children to be cared for in a family day care home. Those provisions required the Assembly Office of Research to submit a prescribed evaluation of the project to the Legislature by March 30, 1995.

This bill would reenact the pilot project excluding the evaluation provisions, and would repeal it on January 1, 1997.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 12 (AB 1397) Poochigian. Corrections: fines and forfeitures, inspections of correctional facilities, and Violent Weapons Suppression Program.

(1) Under existing law, a county or court that implements a comprehensive program to identify and collect certain fines and forfeitures that have not been paid after 60 days from the date on which they were due and payable may deduct and deposit in the county treasury the cost of operating that program. That provision does not apply to a time payment plan.

This bill would provide that this provision does apply to a defendant who is paying through time payments if he or she is delinquent in making payments according to the agreed-upon payment schedule.

(2) Existing law requires the Department of the Youth Authority to inspect and to adopt and prescribe the minimum standards governing construction, operation, programs of education and training, and qualifications of personnel for specified juvenile correctional facilities.

This bill would transfer responsibility for these activities from the Department of the Youth Authority to the Board of Corrections. The bill would make related changes with regard to this transfer of responsibility.

(3) Existing law sets forth procedures under which the juvenile hall of any county in the state may detain a minor for not to exceed 60 days when the juvenile hall in the county of residence of the minor becomes unfit or unsafe for detention of minors. The terms "unfit" and "unsafe" include a condition in which a juvenile hall is considered by the juvenile court judge or the probation officer of that county to be too crowded for the proper and safe detention of minors.

This bill also would include within the terms "unfit" and "unsafe" a condition in which the juvenile hall is considered by the Board of Corrections to be too crowded for the proper and safe detention of minors.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law establishes various projects to aid in the apprehension and prosecution of criminals, including the California Career Criminal Apprehension Program and the Street Terrorism Enforcement and Prevention Act.

This bill would appropriate $1,200,000 from the General Fund to the Department of Justice, Bureau of Narcotics Enforcement, for support of the Violent Weapons Suppression Program.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 13 (SB 668) Polanco. Optometry.

Under existing law, the practice of optometry includes, among other things, the examination of the human eye or eyes, or its or their appendages, and the analysis of the human vision system, either subjectively or objectively, and the use of pharmaceutical agents for the sole purpose of the examination of the human eye or eyes for any disease or pathological condition. Existing law authorizes the State Board of Optometry, with the advice and consent of the Division of Allied Health Professionals of the Medical Board of California to designate the specific topical pharmaceutical agents to be used for these purposes.

This bill would provide for the certification of optometrists to diagnose and treat certain conditions of the human eye or its appendages, and to use therapeutic pharmaceutical agents. It would impose education and training requirements in order to obtain this certification, and would require the board to issue a certificate to applicants meeting prescribed criteria. It would also require certificate holders to complete a minimum of 50 hours of continuing education every 2 years if legislation is enacted that requires the licensure of optometrists on a 2-year renewal cycle. The bill would require, if this legislation is not enacted, a minimum of 25 hours of continuing education every year.

This bill would also require that an optometrist who is certified to use therapeutic pharmaceutical agents ensure that any of his or her patients who receive therapeutic pharmaceutical agent services have access to emergency care 24 hours per day, 7 days per week. It would also require that physicians and surgeons ensure that all of their patients for whom they are providing care have access to emergency medical care 24 hours per day, 7 days per week.

The bill would establish a Therapeutic Pharmaceutical Agent Advisory Committee within the board to consist of 6 members, 3 of whom would be appointed by the California Medical Board, and 3 of whom would be appointed by the California Board of Optometry. It would require the committee to recommend protocols for use by the board in its decisionmaking process. The bill would provide that its provisions not be construed to limit the existing scope of practice of optometry.

The bill would prohibit an optometrist from advertising or otherwise holding himself or herself out to be a specialist in eye disease. The bill would provide that the failure of a therapeutic pharmaceutical agent certified optometrist, or a physician and surgeon, to maintain adequate and accurate records relating to the provision of services to their patients constitutes unprofessional conduct. It would also make it unprofessional conduct for an optometrist to hold himself or herself out as a medical doctor, or to fail to refer a patient to a medical doctor when the patient fails to respond to treatment within a reasonable amount of time.

The bill would authorize the board to charge a fee for the certification, and renewal of certification, of an optometrist to use therapeutic pharmaceutical agents, and would require the fee to be equal to the actual costs to the board of the reviewing and processing of applications for certifications, monitoring the practice by certificate holders, and enforcing the provisions of law governing the use of therapeutic pharmaceutical agents.

Existing law, the Pharmacy Law, authorizes only a physician and surgeon, podiatrist, or veterinarian to prescribe or write a prescription, as defined, and to dispense drugs and devices to patients in his or her office, under prescribed conditions.

This bill would authorize those optometrists who are certified to use therapeutic pharmaceutical agents to prescribe and dispense drugs.

Under existing law, there is a State Optometry Fund in the General Fund that is continuously appropriated for use by the State Board of Optometry for enforcement purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specifically charge the board with the enforcement of the law regulating the furnishing of drugs and devices to patients of an optometrist. By expanding the purposes for which moneys in a continuously appropriated fund may be expended and providing for the deposit of new fees in the fund, this bill would make an appropriation.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 14 (AB 1859) Brown. Administrative regulations: Division of Workers' Compensation.

The Administrative Procedure Act contains provisions relating to the adoption, review, approval, filing, publication, and judicial review of regulations adopted by state agencies in accordance with statutory mandates. The act exempts the Public Utilities Commission, the Division of Workers' Compensation, and the Workers' Compensation Appeals Board from provisions relating to the adoption, review, approval, and judicial review of regulations, and limits the application of provisions relating to the filing and publication of regulations to only the rules of procedure of these agencies.

This bill would, except for provisions relating to judicial review, repeal this exemption and limitation with respect to the Division of Workers' Compensation.

Ch. 15 (AB 1489) Hawkins and Gallegos. Pupils: expulsion.

(1) Existing law that is effective but not operative until July 1, 1996, or thereafter, in part requires the governing board of a school district to set a date of one year from the date the expulsion occurred when a pupil expelled for possessing, selling, or otherwise furnishing a firearm at school or at a school activity may apply for readmission, except that the governing board is authorized to set an earlier date on a case-by-case basis.

This bill would make this provision operative upon enactment of this bill.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 16 (AB 835) Weggeland. Education technology.

Existing law appropriates $10,000,000 to the State Department of Education for the purpose of allocating grants pursuant to the Morgan-Farr-Quackenbush Educational Technology Act of 1992. Under existing law, the priority in the allocation of funds is given to those applications that include the acquisition of donated computers refurbished by certain entities including community colleges or nonprofit organizations certified for computer refurbishing by the State Department of Education.

This bill would instead provide that the funds are appropriated for the purposes of acquiring repaired, refurbished, or upgraded donated computers for use by local education agencies. The bill additionally would require the department to contract with a local education agency to administer this program pursuant to a management and fiscal plan approved by the State Board of Education. The bill would permit the board to authorize the local administering entity to use up to $150,000 of the amount appropriated for necessary administrative expenses. The remaining funds would be required to be used solely to purchase parts or supplies, or both, that are needed to repair, refurbish, or upgrade donated computers. By authorizing the use of the funds for additional purposes, the bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 17 (SB 691) Hayden. School employees: assaults.

(1) Under existing law, whenever any employee of a school district or county superintendent of schools is attacked, assaulted, or menaced by any pupil, the employee and any person under whose direction or supervision the employee is employed who has knowledge of the incident are required to promptly report the incident to specified law enforcement authorities. Failure to make the report is a misdemeanor punishable by a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

fine of not more than $200. An act by specified persons to inhibit or impede the making of the report is a misdemeanor punishable by a fine of not less than $100 and not more than $200.

This bill would instead provide that the failure to make the report is an infraction punishable by a fine of not more than $1,000 and would also include physical threats by a pupil within the acts that must be reported. The bill would also provide that inhibiting or impeding the making of the report is an infraction punishable by a fine of not less than $500 and not more than $1,000.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 18 (SB 265) O'Connell. Family day care homes.

Existing law provides for the licensure of family day care homes, and defines, in part, a large family day care home as providing day care for 7 to 12 children, and a small family day care home as providing day care for 6 or fewer children.

This bill would revise the definition of family day care homes to allow a large family day care home to care for no more than 14 children and a small family day care home to care for no more than 8 children, provided that certain prescribed conditions are met in the case of small homes providing care for more than 6, and large homes providing care for more than 12, children. The bill would make conforming, technical changes.

Existing law prohibits small family day care homes from providing care for 6 or fewer infants at one time unless certain conditions are met.

This bill would repeal those provisions and would repeal certain obsolete provisions relating to a related San Diego County Pilot project.

Existing law provides that the willful or repeated violation of the provisions regulating child day care facilities is subject to criminal sanction.

By changing the definition of a family day care home to increase the number of children authorized to be cared for, this bill would expand the class of facilities subject to the standards for family day care homes thereby changing the definition of a crime and imposing a state-mandated local program.

This bill would state legislative findings that the uses of a congregate care facility, as defined, are distinguishable from the uses of a family day care home, and that the Legislature does not intend for the expansion that this bill would authorize for family day care homes to apply to congregate care facilities.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 19 (SB 411) Calderon. Residential mortgage lending.

The California Residential Mortgage Lending Act regulates the making of residential mortgage loans by specified entities. The act requires the licensing of persons who make and service loans on residential real property.

This bill would permit a residential mortgage lender licensed under the act to provide brokerage services to a borrower, if the licensee first enters into a written brokerage agreement, as specified. The bill would restrict the licensee from brokering certain types of loans, specify the terms of the brokerage agreement with borrower, provide remedies to a borrower if a licensee makes a materially false or misleading statement, limit the type of fees or charges that a licensee can impose, and require annual reporting of loans brokered by the licensee under these provisions.

Under existing law, a real estate broker who negotiates a loan to be secured directly or collaterally by a lien on real property is required, among other things, to deliver a disclosure statement to the borrower before the borrower becomes obligated to complete the loan, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that these provisions apply to a residential mortgage loan arranged by a residential mortgage lender, as specified.

The bill would also limit the percentage level, as defined, of brokerage services that a licensee can provide, impose educational requirements on employees of licensees that provide brokerage services, and give the Commissioner of Corporations primary regulatory jurisdiction over transactions in which brokerage services are provided by a licensed residential mortgage lender.

The bill would also provide that the Secretary of the Business, Transportation and Housing Agency shall report to the Legislature, as specified.

All of the above provisions would be repealed on June 30, 2001.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 20 (SB 848) Kopp. Vehicles: speed limits.

(1) Existing law prescribes a maximum vehicular highway speed limit of 65 miles per hour.

This bill would establish a maximum speed limit of 55 miles per hour upon 2-lane, undivided highways, as described, would set forth a statement of legislative intent regarding the placement of signs on these highways, and for a limited time, would establish a 55 miles-per-hour speed limit upon certain other multilane highways, unless a greater speed limit has been posted pursuant to an engineering and traffic survey.

(2) This bill would set forth legislative findings regarding an extended period of time for the Department of Transportation and local agencies to conduct engineering and traffic surveys and, to the extent that funds are available, would require the Department of Motor Vehicles to inform drivers of changes in maximum speed limits.

(3) Because local authorities would be required, pursuant to existing law, to perform certain duties with respect to the changes in those speed limits, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 21 (AB 242) Sher. Nonyard wood waste diversion: report.

(1) Existing law, the California Integrated Waste Management Act of 1989, requires the California Integrated Waste Management Board, in consultation with the State Air Resources Board, to submit, on or before March 31, 1993, and annually thereafter, as part of a specified annual report, a report to the Legislature on nonyard wood waste diversion.

This bill would delete an obsolete reference in those provisions.

(2) The act authorizes cities and counties to form regional agencies, including rural regional agencies, to meet specified requirements of the act. The act makes each city or county that is a member agency of a regional agency liable for any civil penalties that may be imposed by the board pursuant to specified provisions of the act, and authorizes the regional agency to apportion any civil penalties between or among the cities or counties that are member agencies of the regional agency if the total amount of civil penalties that may be imposed against the regional agency is equivalent to that amount which is the sum of the penalties that may be imposed against each city or county that is a member agency of the regional agency.

This bill would require, notwithstanding those provisions, that any such penalty imposed on a rural regional agency be imposed only on a member rural city or county that is in violation of the act as a city or county irrespective of its membership in the rural regional agency. The bill would authorize the California Integrated Waste Management Board to consider specified factors in determining whether to impose those penalties.

Ch. 22 (SB 998) Committee on Local Government. Validations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would enact the First Validating Act of 1996, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 23 (SB 96) Greene. Negotiable notes.

(1) Under the State Building Construction Act of 1955, the State Public Works Board is authorized to issue negotiable notes and negotiable bond anticipation notes in order to obtain interim funds to pay the cost of public buildings.

This bill would specify that negotiable notes include commercial paper notes or other forms of negotiable short-term indebtedness and would make conforming changes.

(2) Under the act, no public buildings may be acquired or financed unless authorized by a separate act or appropriation enacted by the Legislature. In that separate enactment, the Legislature is to provide whether specified forms of indebtedness shall be issued by the board to finance acquisition or construction.

This bill would repeal the provision that directs the Legislature to provide, in the separate enactment, whether specified forms of indebtedness shall be issued by the board.

(3) Under the act, the board is authorized to finance specified prison facilities using lease purchase financing arrangements by the issuance of bonds, which is defined to include notes.

This bill would specify that notes include commercial paper notes or other forms of negotiable short-term indebtedness, and would make conforming changes.

(4) Under the act, the board is authorized to finance energy conservation in state buildings through the issuance of revenue bonds.

This bill would authorize the board to issue notes, including commercial paper notes and other forms of short-term indebtedness, and bond anticipation notes for this purpose.

(5) This bill would declare the intent of the Legislature that these provisions take effect retroactively as to specified public buildings, facilities, or projects.

(6) Existing law provides alterative procedures to existing general obligation bond law procedures that permit a bond act finance committee as created by the bond act to issue all or part of the bonds authorized to be issued by a bond act as commercial paper notes, subject to a resolution of necessity and other requirements, as specified. Existing law specifies that the proceeds of commercial paper notes shall be used to pay commercial paper program costs including interest payable on maturing commercial paper notes.

This bill would require the proceeds of commercial paper notes be used to pay the state administrative costs of commercial paper but would provide that the interest payable on maturing commercial paper notes and other costs associated with commercial paper be paid from the General Fund.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 24 (AB 1770) Brewer. Public utilities: services to tenants.

(1) Existing law provides for the furnishing of utility services, including residential electrical, gas, heat, and water services, by privately owned public utilities subject to the jurisdiction and control of the Public Utilities Commission and similar services by publicly owned public utilities, including municipal corporations subject to their governing bodies and municipal utility districts and public utility districts subject to their boards of directors. Existing law requires the decision of a district to require a new residential applicant to deposit a sum of money, prior to establishing an account and furnishing service, to be based solely upon the creditworthiness of the applicant as determined by the entity.

This bill would, with respect to municipally owned utilities and municipal utility districts, prohibit the seeking of any recovery of charges or penalties for the furnishing of services from any subsequent tenant or the property owner due to nonpayment of charges by a previous tenant. For this purpose, a subsequent tenant would not include an adult who lived at the residence when the charges or penalties accrued. The bill would prohibit these public utilities from demanding or receiving security in an amount that exceeds specified amounts. The bill would authorize the public utility, in the event of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

tenant nonpayment of all or a portion of the bill, to apply the deposit to the final bill issued when service is terminated.

Because this bill would create new duties for municipally owned utilities and municipal utility districts, the bill would impose a state-mandated local program.

(2) Existing law prohibits any water corporation, municipality, district, or other public agency furnishing water for residential use to a tenant to seek to recover charges or penalties for the furnishing of water to or for the tenant's residential use from any subsequent tenant because of the nonpayment of charges by a previous tenant, but permits the corporation, municipality, district, or public agency to require that service to subsequent tenants be furnished on the landlord's or property owner's account.

This bill would, with respect to municipally owned utilities and municipal utility districts, authorize the public utility to collect a deposit from a tenant service applicant prior to establishing an account for the tenant. The bill would prohibit these public utilities from demanding or receiving security in an amount that exceeds specified amounts. The bill would authorize these public utilities, in the event of tenant nonpayment of all or a portion of the bill, to apply the deposit to the final bill issued when service is terminated.

The bill would prohibit the municipal corporation or district from requiring that service to subsequent tenants be furnished on the account of the landlord or property owner unless the property owner consents through a written agreement.

(3) Existing law provides that accounts of a municipal utility district that are delinquent become a lien on the property to which services were rendered, with the force, effect, and priority of a judgment lien, when a certificate to this effect is filed for recordation with the county recorder.

This bill would exempt residential property from this provision.

(4) This bill would not apply to master-metered apartment buildings.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 25 (AB 1855) Sher. Air pollution: emission limits.

Existing law prohibits, with specified exceptions, the discharge of air contaminants into the atmosphere that exceed a specified shade or opacity.

This bill would prohibit the State Air Resources Board or any air pollution control district or air quality management district from imposing a discharge requirement on emissions of visible smoke, as specified, from any diesel engine or generator used exclusively to operate a drinking water system in specified circumstances. The bill would also make technical changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 26 (AB 1002) Burton. Workers' compensation: acupuncturists.

Existing law, until January 1, 1997, defines the term "physician" as including acupuncturists for purposes of treating injured employees entitled to workers' compensation medical benefits.

This bill would extend the repeal date of January 1, 1997, to January 1, 1999.

Ch. 27 (AB 1928) Sweeney. Multifamily rental and affordable housing: financing.

Existing law authorizes redevelopment agencies, housing authorities, and the California Housing Finance Agency, to issue bonds, and otherwise finance the acquisition, construction, or development of multifamily rental and other affordable housing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that the financing authority of these entities extends to the acquisition, construction, rehabilitation, refinancing, and development of the housing described above. The bill would state legislative intent that these changes clarify the circumstances under which local and state agencies may issue mortgage revenue bonds, and are therefore declaratory of existing law.

Prior law, which was repealed on January 1, 1996, authorized any city or county to issue revenue bonds for the purpose of providing financing for multifamily rental housing, and capital improvements related to that housing.

This bill would revise and reenact these provisions, and would provide for their repeal as of January 1, 2002.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 28 (AB 1624) Kuehl. Income taxes: exclusions: German property claims.

The Personal Income Tax Law allows various exclusions in computing the income that is subject to the taxes imposed by that law.

This bill would enact the Holocaust Victim Compensation Relief Act to authorize an exclusion under that law for any amount received as compensation in any taxable year by a taxpayer pursuant to the German Act Regulating Unresolved Property Claims, as specified.

This bill would make a specified legislative declaration regarding the statewide public purpose of this bill.

This bill would take effect immediately as a tax levy.

Ch. 29 (SB 714) Lockyer. Income taxes: exclusions: German property claims.

The Personal Income Tax Law allows various exclusions in computing the income that is subject to the taxes imposed by that law.

This bill would authorize an exclusion under that law for any amount received as compensation in any taxable year by a taxpayer pursuant to the German Act Regulating Unresolved Property Claims, as specified.

This bill would make a specified legislative declaration regarding the statewide public purpose of this bill.

This bill would take effect immediately as a tax levy.

Ch. 30 (AB 1672) Takasugi. Diesel fuel tax.

The Diesel Fuel Tax Law imposes a tax, with certain exemptions, upon the specified removal, entry, sale, delivery, and use of diesel fuel for each gallon of fuel subject to the tax. That law requires specified persons to obtain a license under that law and provides that whenever the State Board of Equalization deems it necessary, the board may require any person to deposit with it appropriate security, not to exceed, among other things, $1,000,000, when the person has established to the satisfaction of the board the sufficiency of that security.

This bill would set that security limit at $1,000,000 without requiring the person to establish to the satisfaction of the board the sufficiency of the security in the case of specified licenses, or where a person has established to the satisfaction of the board a specified payment history.

Ch. 31 (AB 1543) McPherson. Postsecondary education: appropriation for community colleges.

(1) A specified item of the Budget Act of 1994 appropriated $886,651,000 from the General Fund to the Board of Governors of the California Community Colleges for apportionments to community college districts.

This bill would augment that appropriation by $5,000,000, as specified.

(2) Existing provisions of the California Constitution establish a guaranteed minimum level of state funding for school districts and community college districts using a specified formula based on General Fund proceeds of taxes and allocated local proceeds of taxes.

This bill would provide that the funds appropriated in the bill shall count toward the minimum school district and community college district funding requirements of the California Constitution.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) The bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 32 (SB 1106) Leslie. Mortgages: prepayment penalties.

Existing law prescribes the circumstances when a prepayment penalty may be charged, and in certain cases the maximum amount thereof, with respect to loans secured by a mortgage or deed of trust on real property improved with one to 4 dwelling units.

This bill would, except as otherwise provided, provide that the borrower under any installment loan, as defined, secured by a deed of trust or mortgage or any other lien on residential real property of four units or less shall be entitled to prepay the whole or any part of the installment loan, plus interest, at any time, and that nothing in this provision shall preclude the borrower from becoming obligated to prepay a prepayment charge, as specified.

Ch. 33 (SB 862) Kopp. Governmental organization.

Existing provisions of the Cortese-Knox Local Government Reorganization Act of 1985 specify procedures and requirements for various changes of organization by cities, counties, and districts, including changes of territorial jurisdiction.

This bill would provide that within 15 days of the approval by the local agency formation commission of any change of organization or reorganization that includes or accommodates, or is intended to facilitate, detachment of specified territory from the Broadmoor Police Protection District in San Mateo County and annexation to another local agency which has initiated the annexation, the district board of commissioners may, within 15 days thereafter, adopt a resolution determining whether the detachment may adversely affect the district's ability to provide law enforcement services in the remainder of the district. If the resolution determines the proposed detachment may have an adverse financial effect, the reorganization would not become effective unless approved by the voters of the district. The Broadmoor Police Protection District would be responsible for paying for the election if its board adopts the resolution. The bill would establish a conclusive presumption that local agencies adopting a prescribed resolution for detachment of contiguous territory from the district intend to annex the territory.

The bill would state the findings and declarations of the Legislature of the need for special legislation.

The provisions of this bill would be repealed on January 1, 2002.

Ch. 34 (SB 703) O'Connell. California Community Colleges.

The Budget Act of 1995 appropriated $1,065,412,000 for apportionments for local assistance by the Board of Governors of the California Community Colleges.

This bill would appropriate $9,400,000 from the General Fund in augmentation of, and for the purposes of, that appropriation, and for purposes of reimbursing community colleges for property tax revenue shortfalls. To the extent that the funds appropriated by this bill are allocated to community college districts for purposes of the bill, the funds may be applied toward the minimum funding requirements imposed by Section 8 of Article XVI of the California Constitution.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 35 (SB 274) Killea. Transit development board: San Diego County.

(1) Existing law creates the San Diego Metropolitan Transit Development Board in San Diego County and provides for a 15-member appointive governing body, one of whom is required to be a member of the county board of supervisors appointed by the board of supervisors. Under existing law, that person is required to represent a supervisorial district that is completely within the jurisdiction of the transit development board.

This bill, instead, would require that person to be a representative of one of the 2 supervisorial districts that has the greatest percentage of area within the jurisdiction of the transit development board.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill deletes an obsolete reference to the Governor's appointee to the transit development board.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 36 (SB 86) Haynes. Dependent minors: jurisdictional hearing.

Existing law provides that the juvenile court shall, at the jurisdictional hearing, first consider only the question of whether the minor is a dependent child of the court, and permits the admission of any matter or information relevant and material to the circumstances or acts that are alleged to bring the child within the jurisdiction of the juvenile court. However, it also provides that proof by a preponderance of evidence legally admissible in a civil case must be introduced to support such a finding. Existing law also provides that the juvenile court may receive and consider the reports and recommendations of the probation officer in dependency hearings. These provisions have been interpreted by the California Supreme Court in the case of In re Malinda S., 51 Cal. 3d 368, to allow the admission of these reports and recommendations in determining the jurisdiction of the court in these matters even though they include otherwise inadmissible hearsay.

This bill would specify that a social study prepared by the petitioning agency may be admitted into evidence at the jurisdictional hearing, and constitutes competent evidence upon which a finding of jurisdiction may be based, as specified. It would require the preparer of the report to be available for examination on its contents. It would also provide that hearsay evidence contained in the report shall not be sufficient in itself to support a jurisdictional finding unless it would be admissible over objection in a civil or criminal action, the hearsay declarants are made available for cross-examination, the hearsay declarant is a child under the age of 12 years and is the subject of the hearing, or the declarant is a peace officer, health care professional, social worker, or teacher, as specified.

Ch. 37 (AB 363) Cannella. Wetlands habitat: mitigation bank sites.

The Sacramento-San Joaquin Valley Wetlands Mitigation Bank Act of 1993, among other things, authorizes the Department of Fish and Game, in cooperation with certain other agencies, to adopt regulations that establish standards and criteria for the mitigation bank site qualification process, for the evaluation of wetland habitat values created at the bank sites, and for the operation and evaluation of bank sites.

This bill would, additionally, authorize those regulations to establish standards and criteria for the evaluation of wetland habitat acreage created at the bank sites.

Ch. 38 (AB 597) Speier. Cemeteries.

Existing law provides for the regulation of cemetery authorities under the direction of the Department of Consumer Affairs.

This bill would provide for loans of $2,559,000 from funds within the Department of Consumer Affairs to the Cemetery Fund, to be repaid no later than January 1, 2001. The bill would appropriate $2,559,000 from the Cemetery Fund for transfer to the support item of the 1995 Budget Act for the Department of Consumer Affairs.

Existing law provides for the examination of a cemetery authority's endowment care fund in various circumstances, and authorizes the imposition of a fee, not to exceed $100 per day if the examination is over 2 days.

This bill would authorize an examination when the accountant or auditor qualifies his or her certification of the report on the fund. It would eliminate the $100 per day limit on the fee, would provide for recovery of reasonable and necessary costs of examination in certain instances, and would make related changes.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 39 (SB 1073) Costa. Housing elements.

Existing law requires every city, county, and city and county to revise the housing element of its general plan as frequently as is appropriate, but not less than every 5 years, to reflect the results of the periodic review of the housing element. Existing law further provides that specified councils of governments must complete the third and fourth revisions of the housing elements of their general plans by specified dates.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would extend the deadlines by which the specified councils of governments and other local governments must complete the third and fourth revisions of the housing elements of their general plans. The bill also would provide that these modifications shall not be construed to reinstate any state-mandated local program suspended by the Budget Act of 1992–93, 1993–94, 1994–95, or 1995–96, nor to limit any existing responsibility of any jurisdiction to adopt a housing element in accordance with existing law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 40 (SB 890) Leslie. Healing arts: medicine and optometry.

Existing law requires an optometrist who is certified to use therapeutic pharmaceutical agents to ensure that any of his or her patients who receive therapeutic pharmaceutical agent services have access to emergency care 24 hours per day, 7 days per week. Existing law also requires physicians and surgeons to ensure that all of their patients for whom they are providing care have access to emergency medical care 24 hours per day, 7 days per week.

This bill would repeal those provisions.

This bill would declare that it would take effect immediately as an urgency statute.

Ch. 41 (SB 261) Beverly. Securities.

Existing law makes it unlawful to offer or sell a security unless it is qualified, or exempt from qualification requirements. Existing law exempts certain transactions from the qualification requirement applicable to offers or sales in an issuer transaction.

This bill would additionally exempt offers or sales of a security under a stock purchase plan or agreement or a stock option plan or agreement that complies with requirements of federal law applicable to certain compensatory benefit plans.

Existing law also exempts transactions from the qualification requirement applicable to offers or sales in an issuer transaction if there will be only one class of stock that is owned beneficially by no more than 35 persons, and certain requirements are met. Among the requirements is a requirement that the stock certificates have stamped or printed a legend restricting transfer of the stock in the manner set forth in the rules of the Commissioner of Corporations.

This bill would eliminate the legend requirement, but would require each purchaser to represent that the purchaser is purchasing for the purchaser's own account (or trust if the purchaser is a trustee), and not with a view to or for sale in connection with any distribution of the stock.

Existing law exempts certain exchanges incident to a merger or sale of corporate assets from qualification requirements for the sale of securities in an issuer transaction.

This bill would revise those provisions to exempt certain exchanges incident to a merger, consolidation, or sale of assets, other than a rollup transaction, in consideration of the issuance of equity securities of another entity if certain requirements are met.

Existing law permits a security for which a registration statement has been filed under the federal Securities Act of 1933 in connection with the same offering to be qualified by coordination with the federal registration.

This bill would provide that the term "registration statement" includes an offering statement as defined under a specified federal securities regulation.

The bill would provide that the term "effective," when used in connection with an offering statement, means an offering statement that has been qualified under that regulation.

Existing law provides for the qualification of certain securities by permit. Existing law provides for the filing of a small company application by permit if it meets certain statutory requirements, including a limitation of $1,000,000 on the total offering of voting common stock that may be sold in a 12-month period by an applicant, a minimum offering price of voting common stock of $5 per share, and the submission of an application and disclosure document that has been reviewed and signed by each member of the board of directors.

This bill would instead provide that the $1,000,000 stock offering limitation would apply to the combined sale of voting common stock and preferred stock by the applicant. The bill would provide for a minimum offering price of $2 per share for voting common stock,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

preferred stock, and conversion of preferred stock into voting common stock. The bill would also require the application and disclosure document to be reviewed and signed by a majority of the members of the board of directors rather than by each member.

Existing law imposes various fees in connection with securities-related actions by the Commissioner of Corporations.

This bill would impose a fee for filing the notice of transactions under provisions related to the offer or sale of securities under limited offers or certain compensatory benefit plans, and would increase the fee for filing a notice of an exchange incident to a merger, consolidation, or sale.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 42 (SB 99) Kopp. Courts: trial court funding.

Existing law establishes the Trial Court Trust Fund for the purpose of funding trial court operations. Among other things, these provisions quarantee a minimum allocation to Ventura County, as specified. Existing law establishes the Trial Court Improvement Fund in the State Treasury, provides for the deposit of specified moneys in the fund, provides for the distribution of moneys in the fund subject to appropriation by the Legislature, as specified, and provides for the reversion of unused moneys in the fund each year to the Trial Court Trust Fund. Existing law also requires the Judicial Council to present an annual report to the Legislature on the use of the Trial Court Improvement Fund, including appropriate recommendations.

This bill would delete these provisions for the transfer of moneys to and from the Trial Court Improvement Fund; and provide that, in addition to its authority for the disbursement of moneys in the Trial Court Improvement Fund pursuant to existing law, the Trial Court Budget Commission, with the approval of the Judicial Council, may set aside funds for statewide trial court projects for the 1995–96 fiscal year only by allocating a portion of the annual appropriation for the trial courts, not to exceed $5,000,000, to the Trial Court Improvement Fund, thereby making an appropriation. The bill would provide that moneys in the fund shall be administered by the Judicial Council, and would authorize the Trial Court Budget Commission to designate all or a portion of the funds for specified projects. The bill would revise the minimum trial court funding allocation for Ventura County. The bill would provide that any funds in the Trial Court Improvement Fund that are unencumbered at the end of the fiscal year shall be reappropriated to the Trial Court Improvement Fund for the following fiscal year, in an amount not to exceed $5,000,000, and would also make related changes with regard to the disbursement of moneys in the fund. The bill also would require the annual report of the Judicial Council to include detailed information as to the amount of trial court funding which is set aside in the manner described above, the purposes for which funds were expended, the courts which received support for services therefrom, and the specific benefit to each of those courts.

This bill would also appropriate $26,300,000 from the General Fund to the Trial Court Trust Fund for the 1995–96 fiscal year, and would require $1,300,000 to be designated as a reserve against any unforeseen and unavoidable operations costs that may be incurred by a court during the 4th quarter of the 1995–96 fiscal year, as specified. The bill would also appropriate $26,300,000 from the Trial Court Trust Fund for the support of the trial courts during the remainder of the 1995–96 fiscal year.

The bill would also require the Judicial Council to report to the Legislature on or before March 31, 1997, on the implementation of Rule 991 of the California Rules of Court, relating to trial court coordination implementation.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 43 (AB 1565) Bordonaro. Forest resources: fire suppression and detection.

(1) Existing law, an item of the Budget Act of 1995, appropriates funds for support of the Department of Forestry and Fire Protection that are available for emergency fire suppression and detection costs, as prescribed.

This bill would appropriate $26,400,000 from the General Fund to the department, in augmentation of that budget item, and would authorize the Director of Finance to withhold authorization for the expenditure of those funds until, and to the extent that, preliminary estimates of potential deficiencies are verified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The bill would declare that it makes an appropriation for the usual current expenses of the state and shall go into immediate effect.

Ch. 44 (SB 632) M. Thompson. Alcoholic beverage licenses: limited liability companies.

The Alcoholic Beverage Control Act sets forth procedures for applications for alcoholic beverage licenses by limited partnerships and requires limited partnerships to maintain a register of ownership interests available for inspection by the Department of Alcoholic Beverage Control.

This bill would set forth similar procedures and requirements for limited liability companies, as specified. This bill would also eliminate certain restrictions upon the scope of existing signature requirements for alcoholic beverage license applications by limited partnerships.

The Alcoholic Beverage Control Act also requires that an application for an alcoholic beverage license by a limited partnership contain the names of and be signed by the general partners and by the limited partners owning 10% or more of the capital or profits of the limited partnership.

This bill would require that an application for an alcoholic beverage license by a limited liability company managed by its members contain the names of the members and officers and be signed by the members or an authorized officer. The bill would require that an application by a limited liability company managed by one or more managers contain the names of the manager or managers, officers, if any, and members owning 10% or more of the voting interests of the company and be signed by the manager or managers or an authorized officer.

The Alcoholic Beverage Control Act authorizes a licensee, upon compliance with a specified statute, to transfer any alcoholic beverage license to a corporation whose entire stock is owned by the licensee or his or her spouse.

This bill would authorize a licensee, upon compliance with the same specified statute, to transfer any alcoholic beverage license to a limited liability company whose entire membership consists of the licensee or his or her spouse. This bill would, subject to certain conditions and certain fee, investigation, and reporting requirements, also specify that an alcoholic beverage license is transferred when the ownership of 50% or more of the membership interests in a limited liability company subject to certain reporting requirements proposed by this bill is transferred to a person or persons who did not hold 50% or more of the membership interests in that company on the date upon which the license was issued.

Existing law provides for the transfer of an alcoholic beverage license upon the transfer of ownership in a corporation or limited partnership, as specified. Existing law also provides that a corporation, as newly constituted by transfer under this provision, shall not be eligible for any new credit from an alcoholic beverage supplier or manufacturer, as specified, until all delinquent payments owed by the corporation, as formerly constituted, are made.

This bill would instead provide that the new corporation shall not be eligible for any credit from any person, as specified, until those delinquent payments are made.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 45 (SB 19) Johannessen. State-mandated local programs.

Existing law requires the state to reimburse local agencies and school districts for the costs of state-mandated local programs. Existing law requires the Commission on State Mandates to adopt procedures for receiving claims for reimbursement of those costs, and requires the commission to submit to the Controller its adopted parameters and guidelines for reimbursement of claims. Commencing on July 1, 1996, the Controller is required to prepare claiming instructions to assist local agencies and school districts for each mandate that requires state reimbursement derived from the statute or executive order creating the mandate and the parameters and guidelines provided by the commission and approved by the Legislature, within 30 days after receiving the adopted parameters and guidelines.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the Controller to issue the claiming instructions, within 60 days after receiving the adopted parameters and guidelines, and would specify that the parameters and guidelines are adopted by the commission.

Existing law requires the Controller on behalf of any authorized state agency to prepare and issue new or revised claiming instructions for new mandates determined by the commission and for which funding is provided, as specified, within 30 days.

This bill would instead require the Controller, within 60 days after receiving revised adopted parameters and guidelines from the commission or other information necessitating a revision, to prepare and issue revised claiming instructions, and would delete the requirement that the specified funding be provided.

Existing law provides that a local agency or school district seeking reimbursement for state-mandated costs shall, by November 30 following the fiscal year in which costs are incurred, file an annual reimbursement claim that details the costs actually incurred for that fiscal year.

This bill would, instead, provide that a local agency or school district seeking reimbursement for state-mandated cost may file an annual reimbursement claim by that date.

Existing law specifies the procedures for reimbursement for state-mandated costs to be claimed.

This bill would specify additional procedures for making claims if revised claiming instructions are issued by the Controller, to be operative on July 1, 1996.

Existing law requires the Controller to disburse reimbursement funds according to prescribed procedures which require each local agency or school district to which a mandate is applicable to submit claims when funds are appropriated for the initial year in which the costs will be incurred and requires the Controller to pay any eligible claims within 60 days of the filing deadline.

This bill would require that, commencing July 1, 1996, the Controller pay any eligible claim within 60 days of the filing deadline for claims for reimbursement or 15 days after the date the appropriation for the claim is effective, whichever is later, and would make related changes.

Existing law requires that interest be paid on local agency claims if payment is more than 12 months after adoption of a statewide cost estimate or more than 12 months after related subsequent claims.

This bill would require that interest be paid if the payment is more than 365 days after the adoption of the estimate for an initial claim or beginning on the 61st day for payment of a subsequent claim relating to that same statute or executive order if payment is more than 60 days after the filing deadline for or receipt by the Controller of the subsequent claim, whichever is later.

Existing law requires the Legislative Analyst and the Department of Finance to make certain reports to the Legislature regarding state mandates by September 1 of each year.

This bill would change that date to December 1. It would revise the duties of the Legislative Analyst to specify that a statewide association of local agencies or a Member of the Legislature may submit a proposal to the Chairs of the Assembly Committee on Local Government and the Senate Committee on Local Government recommending the elimination or modification of a state-mandated local program, and that the chairs of the committees may refer up to 10 of those proposals per year to the Legislative Analyst for review. It would require the Legislative Analyst to review and report to the Legislature on each of those proposals, and recommend that the Legislature adopt, reject, or modify the proposal.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 46 (AB 771) Aguiar. Subdivisions: tentative maps: time extensions.

(1) Existing law, known as the Subdivision Map Act, establishes a statewide regulatory framework for controlling the subdividing of land. The existing act generally requires that a subdivider submit, and have approved by the city or county in the jurisdiction in which the land is situated, a tentative and a final subdivision map in connection with any division of land creating 5 or more parcels, and that a parcel map be filed in connection with divisions of land creating 4 or fewer parcels. In addition, existing law authorizes a subdivider to seek approval of a vesting tentative map, which confers a vested right to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

proceed with development in substantial compliance with specified ordinances, policies, and standards.

The existing act prohibits the sale, leasing, or financing of any parcel of real property, or the construction of any building thereon, for which either a final subdivision map or parcel map is required, until that map, in full compliance with the act and any local ordinance enacted pursuant thereto, has been filed. The act provides for the expiration of tentative maps after specified periods of time, and specifically extends by 24 months the expiration date of any tentative subdivision map or any parcel map for which a tentative map has been approved that had not expired on September 13, 1993. This extension is in addition to any other extension of the expiration date provided for in specified provisions of the Subdivision Map Act. Existing law further provides that any legislative, administrative, or other approval by any local agency, state agency, or other political subdivision of the State of California that pertains to a development project included in a map that is extended pursuant to the bill shall be extended by 24 months under specified conditions.

This bill would create a state-mandated local program by providing a similar extension, for 12 months, for a tentative or vesting tentative subdivision map or parcel map for which a tentative map or vesting tentative map has been approved, that has not expired on or before the effective date of the bill.

(2) The existing Subdivision Map Act provides that when a tentative map is required, an approved or conditionally approved tentative map shall expire 24 months after its approval or conditional approval, or after any additional period of time as may be prescribed by local ordinance, not to exceed an additional 12 months. The act authorizes a subdivider to file with the appropriate legislative body, prior to the expiration of the approved or conditionally approved tentative map, an application to extend the time at which the map will expire, for a period or periods not exceeding a total of three years.

This bill would create a state-mandated local program by extending the period that the tentative map may be extended to five years.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 47 (SB 636) Haynes. Vehicles: driver education.

(1) Existing law generally requires employers to secure the payment of workers' compensation in one or more prescribed ways.

This bill would require a driving school owner who employs one or more driving instructors or other employees to sign a statement, under penalty of perjury, in a form determined and retained by the Department of Motor Vehicles stating that the owner is in compliance with those requirements, as prescribed. Because a violation of this requirement would be a misdemeanor, the bill would create a new crime and thus impose a state-mandated local program. The bill would prohibit the department from issuing or renewing a license certificate unless it determines that the driving school owner has complied with this requirement. The bill would specify that the department, after notice and hearing, may suspend or revoke a license if the school owner has failed to comply with this requirement.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 48 (SB 1451) Kelley. School district elections.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the election of school district governing board members under various methods, including a method whereby each member of the governing board is elected by the registered voters of the entire school district, as specified.

This bill would authorize, in addition, a method under which each membership position on the governing board of the Santee Elementary School District would be identified, by number or otherwise, each candidate for the governing board would be required to declare candidacy for only one identified membership position, and each of the identified membership positions on the governing board would be filled by an election that includes the registered voters of the entire district.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 49 (SB 947) Beverly. Real property: assignments.

Existing law provides for various secured interests in real property. Existing law provides that a written assignment of interest in rents, issues, and profits of real property made in conjunction with a loan secured by real property, stating that it is absolute, shall be deemed to constitute a present transfer of the assignor's interest in existing and future rents, issues, and profits of that real property effective upon the execution and delivery of the assignment. Existing law also provides for the recordation of such an assignment, as specified, and sets forth the effect of recordation.

This bill would revise and recast these provisions to apply to a written assignment of an interest in leases, rents, issues, or profits made in connection with an obligation secured by real property, regardless of how the assignment is denoted, and would specify requirements regarding these assignments.

Existing law prescribes the instances when a receiver may be appointed by a court in which an action or proceeding is pending, or by a judge thereof.

This bill would authorize the appointment of a receiver in a case brought by an assignee under a specified assignment of leases, rents, issues, or profits or in an action by a secured lender for specific performance of an assignment of rents provision in a deed of trust, mortgage, or separate assignment document.

Ch. 50 (SB 849) Maddy. Small employer health coverage: standard employee risk rates.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Commissioner of Corporations and of insurers by the Insurance Commissioner. Existing law imposes certain requirements on the premiums for contracts offered to small employer groups by health care service plans and disability insurers. Existing law requires that premiums for renewal of in force business by health care service plans or insurers that are small employer carriers be adjusted by applying a risk adjustment factor which must be within certain amounts on certain dates.

This bill would require that the risk adjustment factor effective on July 1, 1996, apply to in force business at the earliest of either the time of renewal or July 1, 1997, and would make related changes.

Existing law requires the Major Risk Medical Insurance Board to enter into contracts with private organizations that qualify as participating health plans to provide major risk medical coverage to individuals and their dependents.

This bill would provide instead that the board shall provide coverage through participating health plans and may contract for the processing of applications, the enrollment of subscribers, and activities necessary to administer the program. The bill would provide that the board shall not be required to specify the amounts encumbered for each contract but may allocate funds to each contract based on projected and actual subscriber enrollments in a total amount not to exceed revenue available for the program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 51 (AB 178) Johnson. Bail: general assistance checks.

Existing law authorizes a defendant to deposit with the clerk of the court a specified sum, instead of giving bail under specified circumstances. Upon delivering to the officer

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

in whose custody the defendant is a certificate of the deposit, the defendant must be discharged from custody.

This bill would provide that the clerk of the court shall not accept a general assistance check for this deposit or any part thereof.

Ch. 52 (SB 1358) Lewis. Travel.

Existing law provides for a Travel Consumer Restitution Corporation, supervised by the Department of Justice, for the purpose of providing restitution to an aggrieved person subject to certain limitations, as specified. Existing law requires the corporation to establish an operations fund and a restitution fund for the payment of claims. Existing law also provides for annual assessments on travel agents in an amount to keep the level of the restitution fund at a balance of $1,600,000, as specified.

This bill would revise annual assessment provisions in order to keep the level of the restitution fund at a balance of $1,200,000, and would make related changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 53 (SB 1515) Maddy. Horseraces: stabling and vanning.

Existing law requires an association or fair conducting a racing meeting in the northern zone to provide all stabling required by the California Horse Racing Board without cost to participating horsemen.

This bill would permit any stabling and vanning reimbursement funds that are not expended during the meeting in which they are collected to be allocated to the organization representing racing fairs to offset its costs of maintaining the stalls contracted for by fairs.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 54 (SB 1327) Johnston. Insurance: inspections.

Under existing law, no policy of residential property insurance may be issued, delivered or renewed unless the named insured is offered coverage for loss or damage caused by the peril of earthquake.

This bill would provide that no person may use a geographically based earthquake assessment system or program for the purpose of requiring earthquake insurance, or imposing a fee or other condition in lieu of earthquake insurance, in connection with a loan secured by a condominium project or an individual unit of a condominium project unless the system's or program's analytical assumptions and methodology used in the assessment have been approved by the Insurance Commissioner, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 55 (SB 1147) Watson. Medi-Cal: disproportionate share providers.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. The reimbursement is based on factors including the cost of eligible capital projects.

Existing law specifies that a disproportionate share hospital that has submitted final plans for an eligible capital project may substitute final plans and shall qualify for supplemental reimbursement for the revised capital project if specified conditions are met, including, the requirements that final plans are submitted prior to June 30, 1995, and that the revisions in the substitute plan serve to replace buildings that are not in compliance with current seismic safety standards, and limits the supplemental reimbursement to the supplemental reimbursement for the original capital project, as evidenced by the architect's and engineer's certified cost estimate or the original plan submission and the revised plan submission.

This bill would authorize an alternative reimbursement for eligible disproportionate share providers if the revised plans are submitted prior to December 31, 1996, and the plans are necessary to comply with the current seismic safety standards, and would limit the supplemental reimbursement to an amount no greater than the original capital project.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 56 (SB 389) Kopp. Family law: dissolution of marriage.

Existing provisions of the Family Code provide for dissolution of marriage, the division of property on dissolution of marriage, and for the custody and support of children. Existing law also provides for a summary dissolution of marriage where there are no children of the marriage, community property assets are less than $25,000, and other requirements are met.

This bill would enact special procedures for judicial case management, applicable to dissolution actions, upon stipulation of the parties. The bill would authorize the Judicial Council to modify these procedures by rule.

The bill would require all dissolution actions, to the greatest extent possible, to be assigned to the same superior court department for all purposes. The bill would require the Judicial Council to adopt a standard of judicial administration prescribing a minimum length of assignment of a judicial officer to a family law assignment. These provisions would be operative on July 1, 1997.

Ch. 57 (SB 141) Beverly. Limited liability companies.

Existing law requires the filing of the articles of organization of limited liability companies with the Secretary of State.

This bill would also provide for filings with county recorders, as specified, thereby imposing a state-mandated local program.

Existing law provides that a person may acquire a membership interest directly from a limited liability company either in accordance with the company's operating agreement or, if there is no provision in the operating agreement, on the vote of all members of the company.

This bill would provide instead that if a person seeks to acquire a membership interest, and the operating agreement does not provide for this event, the person must obtain the vote of a majority in interest of the members.

Existing law provides that an employer may not require an employee to invest in the business of the employer as a part of the consideration for employment. Existing law also provides that any property put up by an employee as part of a contract of employment shall be deemed to be a bond usable only for liquidating accounts between the employer and employee, and shall not be commingled with the property of the employer.

This bill would provide that these provisions do not apply to membership interests issued by limited liability companies to employees under specified conditions.

Existing law provides for the withdrawal of a member of a limited liability company.

This bill would revise provisions governing the effect of the withdrawal of a member.

Existing law provides that a membership or economic interest in a limited liability company is assignable with the unanimous vote of the members, except as provided.

This bill would provide that a membership or economic interest may be assigned with the consent of a majority in interest of the members.

Existing law provides that a decision to continue the business of the limited liability company after dissolution of the company requires the unanimous vote of all members of the company.

This bill would delete the requirement that this vote be unanimous so that, instead, the consent of a majority in interest of the members would be required.

Existing law provides that in order to dissolve a limited liability company, the company shall file a certificate of cancellation of articles of organization with the Secretary of State identifying, among other things, the party that will be responsible for assuming any tax liability of the dissolved company.

This bill would require the Secretary of State to notify a limited liability company filing the certificate of cancellation that the company will be dissolved only if the Franchise Tax Board notifies the Secretary of State that certain taxes and fees imposed on the company have been paid or secured.

Existing law provides that the organization, internal affairs, and related matters of a foreign limited liability company are governed by the laws of the state where the company is organized.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that if the company is organized in a foreign country, these matters would be governed by the laws of that country.

Existing law requires a limited liability company to pay the income tax liability of a nonresident member of the company if the company does not attach to its income tax return a form containing the agreement of each nonresident member to be subject to personal jurisdiction for income tax purposes, as specified.

This bill would provide that a limited liability company is subject to penalties and interest if it is required to pay the income tax liability of a nonresident member but fails to do so.

The bill would also make clarifying and technical changes. It would declare that it shall not be construed to permit a domestic or foreign limited liability company to render professional services in this state, as defined.

The bill would also declare the intent of the Legislature that existing business entities should be permitted to convert into or transfer real property to limited liability companies without incurring a documentary transfer tax, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that is it to take effect immediately as an urgency measure.

Ch. 58 (AB 3092) Gallegos. Elections: order of ballot precedence: numbering of ballot measures.

Existing law sets forth the order of precedence in which offices and measures shall be listed on the ballot.

This bill would delete an obsolete reference to judge of the justice court.

Existing law permits the county elections official, in counties using a voting system, to vary the order of school, county, city, and district offices appearing on the ballot in order to allow for the most efficient use of space on the ballot. However, it requires that the office of Superintendent of Public Instruction always precede any school, county, or city office.

This bill would also permit those county elections officials to vary the order of ballot measures submitted to the voters for those purposes. It would also require that state measures always precede local measures.

Existing law requires that, commencing with the November 2, 1982, general election, all state measures in all elections at which state measures are submitted to a vote be numbered in a continuous sequence for a period of 20 years, recommencing with the number "1" at the completion of the 20-year cycle.

This bill would shorten that numbering cycle to a 10-year period, commencing with the November 3, 1998, general election.

Ch. 59 (AB 2591) Harvey. Community college facilities: Kern Community College District.

An existing special statute, enacted in furtherance of a legislative finding of unique circumstances, authorizes the Kern Community College District to dispose of specified property in Bakersfield, California. This special statute specifies that escrow on the disposal of this property shall close no later than January 1, 1996.

In furtherance of a legislative finding of unique circumstances, this bill would extend the deadline for the closure of escrow for the disposal of this property, and an additional, specified piece of property, to January 1, 2002.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 60 (SB 52) Peace. Civil procedure.

(1) Existing law authorizes the court to allow a party to amend any pleading or proceeding, as specified, in furtherance of justice. Existing law authorizes the court to relieve a party or his or her legal representative from a judgment, dismissal, order, or other proceeding taken against him or her through his or her mistake, inadvertence, surprise, or excusable neglect, as provided.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make organizational, clarifying, changes to these provisions.

(2) Existing law authorizes a judgment creditor to claim certain costs of enforcing a judgment, and specifies procedures therefor. Existing law sets forth procedures for the service of papers by mail, express mail, or facsimile transmission, and provides for the extension of certain time periods depending on the method used.

This bill would expressly provide that the latter provision applies to the former provision.

Ch. 61 (SB 1585) Craven. Mobilehomes: age requirements.

Existing law provides that the management of a mobilehome park and the ownership or management of a subdivision, cooperative, or condominium for mobilehomes may require that a prospective purchaser comply with any rule or regulation limiting residency based upon age requirements if it complies with the Federal Fair Housing Act, as amended by Public Law 100-430, and implementing regulations.

This bill would require it to comply with this federal law, as amended by Public Law 104-76.

This bill would also extend the applicability of provisions of existing law regarding residency in a mobilehome in a subdivision, cooperative, or condominium to a resident-owned mobilehome park.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 62 (AB 2961) Committee on Higher Education. Postsecondary education.

(1) Chapter 758 of the Statutes of 1995 reorganized, revised, recast, and repealed obsolete and redundant provisions of the Education Code relating generally to postsecondary education and revised and recast certain provisions of other codes to conform to those changes.

This bill would make technical changes in certain provisions of law that prevailed over Chapter 758 of the Statutes of 1995, to conform those provisions to the numbering system adopted in Chapter 758 of the Statutes of 1995 and would make other technical changes.

(2) The Budget Act of 1995 requires the Student Aid Commission, among other things, to contract with the Bureau of State Audits to review the request for proposal that the commission intends to release to procure a maintenance contractor for the Financial Aid Processing System. The Budget Act of 1995 also requires the commission to state its business needs, as specified, in this request for proposal.

This bill would repeal these requirements.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 63 (AB 3031) Baca. Postsecondary education: community college districts: contract education courses.

Existing law requires the governing board of each community college district to charge each student a fee of $13 per unit per semester. Existing law exempts from this fee requirement students enrolled in specified noncredit courses and California State University and University of California students enrolled in remedial classes provided by a community college district under specified conditions.

This bill would also exempt from this fee requirement students enrolled in specified credit contract education courses, if the entire cost of the course, including administrative costs, is paid by the public or private agency, corporation, or association with which the district is contracting and if these students are not included in the calculation of the average daily attendance of that district.

Ch. 64 (AB 2850) Cortese. Redevelopment: sale or lease of property: exemption.

The existing Community Redevelopment Law establishes procedures for the sale or lease for development of any property of a redevelopment agency acquired in whole or in part with tax increment moneys. These procedures include provision for public hearing and adoption of an approving resolution, as specified.

This bill would provide that the above procedures do not apply to the sale or lease of a small housing project, as defined, if the legislative body adopts a resolution that authorizes the agency to sell or lease a small housing project, as specified. The bill also

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

would provide that the agency may sell or lease a small housing project if prior to the sale or lease, the agency holds a public hearing pursuant to existing provisions of law. The bill further would provide that any agency that has sold or leased a small housing project pursuant to these provisions shall, within 30 days after the end of the agency's fiscal year in that the sale or lease occurred, file a report with the legislative body that discloses specified information about the project.

Ch. 65 (AB 3169) Martinez. Local agencies: law enforcement.

Existing law recommends that the legislative body of a local agency furnish each newly hired police officer and deputy sheriff employed full time by the local agency with specified items, including a protective vest.

This bill would strongly urge the legislative body of a local agency to furnish a protective vest to each newly hired police officer and deputy sheriff employed full time and would make legislative findings in this regard.

Ch. 66 (AB 3029) Harvey. Dairy products.

Existing law condemns various practices in the marketing of milk and other dairy products, including the issuance of coupons, premiums, certificates, or similar devices.

However, existing law also exempts from these provisions any person who engages in cross-promotions involving any dairy products, including fluid milk products, if the dairy product involved in the cross-promotion is promoted without any express or implied reference to any particular brand or brands of the dairy product, and if all brands of the dairy product at all outlets at which the dairy product is sold are simultaneously and equally benefited by the cross-promotion.

This bill would additionally exempt from these provisions any organization that does not process or distribute dairy products that engages in cross-promotions involving any dairy product, including fluid milk products, if the reference to the dairy product involved in the cross-promotion is generic only, and if the cross-promotional device is available for redemption on all brands of the dairy product at all outlets at which the dairy product is sold.

Ch. 67 (AB 2296) Gallegos. Testimony of a witness: hypnosis.

Existing law permits the admission of testimony by a witness who has undergone hypnosis for the purpose of recalling events that are the subject of his or her testimony if certain conditions are met. One of the conditions is that the hypnosis must be performed by, among others authorized, a licensed marriage, family and child counselor certified in hypnosis, as specified.

This bill would eliminate the requirement that the licensed marriage, family and child counselor be certified in hypnosis, and would instead require that he or she be experienced in the use of hypnosis.

Ch. 68 (AB 1786) Burton. In-home supportive service providers: statewide automated child support services.

(1) Existing law requires that the State Department of Social Services ensure that the Statewide Automated Child Support System be operational in all counties, other than the County of Los Angeles, by October 1, 1995.

This bill would delay the date by which this system is required to be operational until October 1, 1997.

Existing law specifies those costs that the state will pay with respect to development and implementation of the system and the Los Angeles Automated Child Support Enforcement System Replacement System.

This bill would make various changes in these provisions.

This bill would appropriate $9,978,000 from the General Fund, in augmentation of the Budget Act of 1995, to pay the nonfederal share of costs resulting from the loss of enhanced federal funding for these systems, in accordance with a specified schedule.

(2) Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law authorizes the City and County of San Francisco to increase the wages of all in-home supportive service providers in the 1995-96 fiscal year.

This bill would extend that authorization to include the 1996-97 fiscal year.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 69 (SB 430) Greene. California Assessment of Academic Achievement Act.

Under existing law, the California Assessment of Academic Achievement Act, to be repealed as of January 1, 2000, the Superintendent of Public Instruction is required to design and implement a statewide pupil assessment program, including as part of that program the alignment of assessment with the knowledge and skills called for under the curriculum frameworks and with the statewide academically rigorous content and performance standards adopted by the State Board of Education.

This bill instead would require that the alignment of the assessment be made with the statewide academically rigorous content and performance standards not the curriculum frameworks.

The Superintendent of Public Instruction, as part of his or her duties pursuant to this provision, is required to develop and annually update for the Legislature a 5-year cost projection, implementation plan, and timetable for implementing the program.

This bill additionally would require the superintendent to submit the annual update on or before March 1 of each year to the chairperson of the fiscal subcommittee considering budget appropriations in each house. The bill would require that the update explain any significant variations from the 5-year cost projection for the current year budget and the proposed budget.

Under existing law, the State Board of Education is required to adopt statewide academically rigorous content and performance standards pursuant to the recommendations of the Commission for the Establishment of Academic Content and Performance Standards in all core curriculum areas to serve as the basis for assessing the academic achievement of individual pupils and of schools, school districts, and the California education system.

This bill would require the State Board of Education to review the existing curriculum frameworks for conformity with the new statewide standards and modify the curriculum frameworks to bring them into alignment with the standards.

This bill would provide that not less than 60 days prior to adoption of the statewide pupil assessment tests, the State Board of Education shall make the proposed tests available for inspection by the public. The bill would require that the proposed tests be available for inspection by the public, as specified.

Existing law established the Commission for the Establishment of Academic Content and Performance Standards, consisting of 21 members, including 11 members appointed by the Governor and one member jointly appointed by the Governor and the Superintendent of Public Instruction who is the chair of the commission.

This bill would eliminate the member jointly appointed by the Governor and the superintendent and would instead provide for 12 members to be appointed by the Governor.

Under existing law, the State Board of Education is required to hold regional public hearings throughout the state on the current curriculum framework for the purpose of determining the degree of rigorous, academic focus within each curriculum area.

This bill would require the board to make any changes that the board deems appropriate to the curriculum frameworks as a result of these hearings.

Existing law requires the Commission for the Establishment of Academic Content and Performance Standards to make available to the public the information derived from the framework hearings and to hold regional, public hearings throughout the state for public comment on that information as it relates to the establishment of rigorous, academic standards.

This bill would require the commission to take public comments into consideration in the development of the standards.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the Legislative Analyst to oversee the development of a request for proposal and contract for an independent financial and programmatic evaluation of the testing program, as specified.

This bill would appropriate $130,000 from the General Fund, with $55,000 to the Superintendent of Public Instruction for the costs of the State Department of Education to implement the statewide pupil assessment system upon approval of an expenditure plan by the Director of Finance and $75,000 to the Commission for the Establishment of Academic Content and Performance Standards for the expenses of the commission during the 1995–96 fiscal year.

By extending the duties imposed on school districts under the California Assessment of Academic Achievement Act until January 1, 2002, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 70 (SB 388) Kopp. Transportation: San Francisco Bay Area Rapid Transit District: annexations.

Existing law requires the San Francisco Bay Area Rapid Transit District (BART) to meet its service commitments within its boundaries as they existed on January 1, 1971, before the district may expend any district funds for the purpose of extending services and facilities outside of those boundaries.

This bill would exempt from that requirement the extension of services and facilities south of the Daly City Station to the terminus of the BART-San Francisco Airport Extension.

Ch. 71 (SB 530) Kelley. Structural pest control.

Existing law provides that, if requested, notice of the date and place of fumigation shall be given to the fire department serving the area in which fumigation is to be performed not less than 2 hours prior to the time fumigation begins.

This bill would require that the notice be given by the fumigator, whether or not requested. It would also require the notice to specify the chemicals to be used.

Existing law provides for a 2-year pilot project, to be repealed effective January 1, 1997, requiring the Director of the Department of Pesticide Regulation to contract with the Los Angeles County Agricultural Commissioner to perform increased structural fumigation, inspection, and enforcement activities.

This bill would, instead, permit the Los Angeles County Agricultural Commissioner to contract with the director for those activities; would authorize the Orange County Agricultural Commissioner to also contract for those activities; and commencing January 1, 1998, the bill would authorize the San Diego County Agricultural Commissioner to contract for those activities. The bill would provide for the fee to be paid to the counties rather than the director.

This bill would repeal all the above requirements on January 1, 1999. The bill would make related changes.

Ch. 72 (SB 415) M. Thompson. Public utilities: carriers.

Existing law provides for a procedure for claims made by highway carriers and freight forwarders, and provides for an alternative procedure when the claims are made to collect charges in excess of those originally billed by a highway carrier or freight forwarder under specified conditions.

This bill would eliminate the alternative procedure.

This bill would, instead, prohibit a highway carrier, a freight forwarder, a party representing either of these entities, or an assignee of either of these entities, based on

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

a filed tariff or filed contract, from collecting or attempting to collect any additional charge in excess of the charge originally billed by the carrier or freight forwarder for transportation service previously provided, except where there are mistakes acknowledged by both parties or that are the result of intentional misrepresentation by the shipper. This bill would likewise preclude the liability of a person or entity against whom a claim for an additional amount has been brought based upon a filed tariff or filed contract except when there are acknowledged mistakes or the claim is the result of the intentional misrepresentation of the shipper.

Since existing law makes any public utility, as defined, and any corporation other than a public utility, which violates the Public Utilities Act guilty of a misdemeanor, and the provisions of the bill would be within the act, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 73 (SB 798) Mountjoy. Heaters: gas logs.

Existing law prohibits the sale of any unvented heater that is designed to be used inside any dwelling house or unit, with the exception of electric heaters, or decorative gas logs for use in a vented fireplace.

This bill would, notwithstanding this prohibition, permit natural gas fueled unvented decorative gas logs and fireplaces to be sold if the Department of Housing and Community Development and the State Department of Health Services approve of their use, they are listed by an agency approved by the Department of Housing and Community Development, and they meet standards required by the bill to be developed by the Department of Housing and Community Development and the State Department of Health Services, and adopted by the California Building Standards Commission. The bill would provide that the cost of developing these standards shall not exceed $145,000. This bill would also require that installation of natural gas fueled unvented decorative gas logs be in accordance with the California Building Standards Code. Since violation of this installation requirement would be a misdemeanor under existing law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 74 (AB 2804) Granlund. Medi-Cal: inpatient adjustment funding.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for the payment of additional reimbursement to disproportionate share hospitals that provide a disproportionate share of Medi-Cal recipients, and requires the department to establish a list of disproportionate share hospitals and to establish procedures to reimburse the disproportionate share hospitals using identified factors. Payments are made to these hospitals from moneys paid by hospitals into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes.

This bill would, pursuant to a specified formula, provide for a secondary supplemental payment adjustment to disproportionate share hospitals for the 1995–96 payment adjustment year. It would be funded by federal funds, and a nonfederal share derived from a transfer of funds deposited into the Medi-Cal Inpatient Payment Adjustment Fund from public hospitals, thus constituting an appropriation.

Existing law requires the department to issue annually a list of disproportionate share hospitals.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law permits the department, to the extent practicable, in developing this list, to utilize applicable data consistent with analysis compiled or developed by the California Medical Assistance Commission.

This bill would eliminate this authority.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 75 (SB 1513) Kelley. Sewer revenue bonds: works.

Existing law permits local agencies authorized to acquire, construct, own, or operate a sewer system to issue sewer revenue bonds to acquire or construct works after notice, hearing, and election. This law defines "works," to include sewage treatment plants, intercepting and collecting sewers, outfall sewers, force mains, pumping stations, ejector stations, and all other appurtenances necessary, useful, or convenient, for the collection, treatment, purification, or disposal of sewage, and necessary lands, rights-of-way, or other property.

This bill would, for bonds issued or reissued on or after January 1, 1997, include within this definition certain facilities for the recycling of water, including, but not limited to, distribution and dispersal facilities of all types, and necessary lands, rights-of-way, or other property. The bill would make other conforming, technical, and nonsubstantive changes.

Ch. 76 (AB 1286) Takasugi. Property taxation: intercounty pipeline rights-of-way: assessment.

Existing property tax law requires the county assessor to assess all property that is subject to taxation at its full value.

This bill would establish a rebuttable presumption in favor of a full cash value assessment for an intercounty pipeline right-of-way for any of the 1984–85 to 2000–01 tax years, inclusive, provided that certain specified valuation standards are met in determining that assessed value. The bill would also provide that the determined values shall be rebuttably presumed to be correct if these specific methodologies are used and would bar any right of the taxpayer to challenge these valuations.

This bill would also provide, for those same tax years, that escape assessments may be made and that refunds shall be made on the basis of these specified valuation standards. The bill would also provide that the provisions of the bill are superseded by any settlement agreement entered into prior to the effective date of these provisions between a taxpayer and a county with respect to the assessment of any intercounty pipeline right-of-way.

This bill would make legislative findings and declarations with respect to the local assessment of intercounty pipeline rights-of-way, and would state the intent of the Legislature in enacting these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 77 (AB 2181) Miller. Budget Act of 1995: contingencies or emergencies.

The Budget Act of 1995 appropriated $5,000,000 from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance. That act also appropriated $2,500,000 from the General Fund for loans for that purpose.

This bill would appropriate $305,387,000, as scheduled, in augmentation of these Budget Act appropriations.

This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 78 (SB 1330) Committee on Budget and Fiscal Review. Education finance.

(1) Under Section 8 of Article XVI of the California Constitution (hereafter Section 8), the state is required to appropriate in each fiscal year a computed minimum amount of moneys from the General Fund proceeds of taxes, as specified, for the support of school districts, as defined, and community college districts.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would declare the intent of the Legislature to effectuate the terms of the proposed settlement agreement in California Teachers Association v. Gould, to resolve the outstanding indebtedness and other issues resulting from the emergency loans made to school districts and community college districts pursuant to specified statutes enacted in 1992 and 1993, and to affirm that retroactive and forward loan mechanisms will not be used in the future.

(2) Existing law requires that for the 1995–96 and 1996–97 fiscal years the revenue limits for each county superintendent of schools be reduced by a 12.59% deficit factor, except that if the settlement agreement is effective, the revenue limit for each county superintendent of schools is instead reduced by an 11.70% deficit factor. Existing law also requires that for the 1995–96 and 1996–97 fiscal years the revenue limit for each school district be reduced by an 11.01% deficit factor, except that if the settlement agreement is effective, the revenue limit for each school district is instead reduced by a 10.12% deficit factor. Existing law further provides for an equalization adjustment for each school district for the 1995–96 fiscal year which only becomes operative if and when the settlement agreement is effective. Existing law appropriates $5,000,000 for the California Academic Volunteer and Mentor Services Program, appropriates $10,000,000 for the Healthy Start Support Services for Children Act, and appropriates $15,000,000 for a specified pupil assessment program, only if that settlement agreement is effective.

This bill would declare the intent of the Legislature to effectuate the terms of the proposed settlement agreement by facilitating the release of funds for the purposes described above.

(3) Existing law requires the Controller to deduct certain amounts from specified apportionments to school districts for the payment of nonuse payments on unused schoolsites for a specified period of time, as determined by the State Allocation Board. Existing law also requires the amount deducted to be transferred to the State School Site Utilization Fund, and any funds in that fund, including interest, that are not subject to return to school districts revert to the General Fund.

The bill would require that funds in the State School Site Utilization Fund that are not subject to return to a school district revert to the State School Deferred Maintenance Fund. The bill would make this provision operative on July 1, 1997.

(4) Under existing law, for the purposes of Section 8, "General Fund revenues appropriated for school districts and community college districts, respectively" and "moneys to be applied by the state for the support of school districts and community college districts" excludes any appropriation that is not made for allocation to a school district, or to a community college district, regardless of whether the appropriation is made for any purpose that may be considered for the benefit of a school district, as defined, or a community college district, except as specified.

This bill would require that for an appropriation that is not made for allocation to and administration by school districts, as defined, or community college districts, to be counted towards the state's minimum funding obligation to school districts, as defined, and community college districts pursuant to Section 8, the appropriation must have statutory authorization independent of the annual Budget Act that reflects a legislative determination that the appropriation shall be counted toward satisfying that obligation.

This bill would also require that specified appropriations made for the 1995–96 fiscal year, or for any subsequent fiscal year, shall not be included within the total allocations to school districts and community college districts from General Fund proceeds of taxes, as specified.

(5) Existing law makes legislative declarations with respect to the $1,083,000,000 emergency loan and the Legislature's intent to recapture the amount that was appropriated in excess of the minimum funding requirements for the 1991–92 fiscal year to school districts and community college districts by classifying that amount as an emergency loan and repaying that emergency loan with an appropriation in the 1992–93 fiscal year, as specified. Existing law makes findings and declarations with respect to a $1,083,000,000 over appropriation to school districts for the 1991–92 fiscal year and the intent of the Legislature to recapture that amount by reclassifying it as an emergency loan. Existing law further declares that if for any reason the reclassification of that amount as an emergency loan is not implemented, then there shall be no emergency loan or loan repayment, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal those provisions.

(6) Existing law appropriates $732,000,000 from the General Fund for transfer to Section A of the State School Fund for apportionment to school districts for the 1992–93 fiscal year as an emergency loan and specifies that the appropriation is not included, for any fiscal year, within the amounts appropriated for the purposes of meeting the state's minimum funding obligation to school districts, as defined, or community college districts.

This bill would repeal that provision as of the date the last loan repayment is made, as specified.

(7) Existing law requires the Department of Finance to make certain computations relating to provisions that would have discharged specified loans to school districts and county offices of education, which provisions have been previously repealed.

This bill would repeal that provision.

(8) Existing law appropriates $241,000,000 from the General Fund for transfer to Section B of the State School Fund for apportionment to community college districts for the 1992–93 fiscal year as an emergency loan and specifies that the appropriation is not included, for any fiscal year, within the amounts appropriated for the purpose of meeting the state's minimum funding obligation under Section 8.

This bill would repeal that provision as of the date the last loan repayment is made, as specified.

(9) Existing law suspends, for the 1992–93 fiscal year, the portion of the state school funding obligation established under Section 8 that may be suspended by urgency statute, in the event that any appellate court of the state determines that specified provisions in Chapter 703 of the Statutes of 1992 are unconstitutional, unenforceable, or otherwise invalid. Existing law also provides, subject to that provision making the suspension, that for the purpose of computing the state's minimum funding obligation to school districts and community college districts for the 1993–94 fiscal year, the 1992–93 amount of "total allocations to school districts and community college districts from the General Fund proceeds of taxes appropriated pursuant to Article XIII B and allocated proceeds of taxes" shall be calculated in a specified manner. It further provides the if the amount computed exceeds the state's minimum funding obligations to school districts and community college districts under Section 8, the difference shall be applied toward any outstanding maintenance factor obligation.

This bill would repeal those provisions.

(10) Existing law, for the 1993–94 fiscal year, suspends the portion of the state school funding obligation established in Section 8 of Article XVI of the California Constitution that may be suspended by urgency statute, in the event that any appellate court of this state determines that any of specified provisions are unconstitutional, unenforceable, or otherwise invalid. Existing law also declares that the amount of General Fund revenues appropriated for the support of school districts and community college districts that would otherwise be considered to be appropriated for the purposes of Section 8 would be limited for the 1993–94 fiscal year, as specified.

This bill repeal that provision.

(11) Existing law specifies the provisions of law that govern the repayment of the $1,083,000,000 emergency loan.

This bill would repeal that provision as it relates to repayment.

(12) Existing law appropriates $608,691,000 from the General Fund for transfer to Section A of the State School Fund for apportionment to school districts and county superintendents of schools for the 1993–94 fiscal year as an emergency loan and specifies that the appropriations shall not be deemed for any fiscal year to be included within the amounts appropriated for the purposes of meeting the state's minimum funding obligation under Section 8.

This bill would repeal that provision as of the date the last loan repayment is made, as specified.

(13) Existing law appropriates $178,000,000 from the General Fund for transfer to Section B of the State School Fund for apportionment to community college districts for the 1993–94 fiscal year as an emergency loan and requires that the appropriation shall not be deemed for any fiscal year to be included within the amounts appropriated for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the purposes of meeting the state's minimum funding obligations to school districts and community college districts under Section 8.

This bill would repeal that provision as of the date the last loan repayment is made, as specified.

(14) Existing law specifies that the emergency loans described in Chapter 703 of the Statutes of 1992 shall be considered as one loan to be repaid from amounts appropriated for the purpose of meeting the state's minimum funding obligation to school districts and community college districts pursuant to Section 8, and sets forth a method for repayment of those loans. Existing law also requires the Department of Finance to make certain computations for the purposes of computing the repayment amounts.

This bill would repeal those provisions.

(15) Existing law declares the intent of the Legislature that until either the loan payment described in Chapter 703 of the Statutes of 1992 is made or until a certain amount is spent per pupil, as specified, that the aggregate sum under Section 8 for education programs for kindergarten and grades 1 to 12, inclusive, (hereafter K-12) less any amount appropriated for revenue limits for school districts and county offices of education and special education programs and services, not exceed the total amount appropriated for those K-12 programs appropriated for the purposes of Section 8.

This bill would repeal that provision.

(16) Existing law, for the 1993–94 fiscal year, suspends the portion of the state's minimum funding obligation to school districts and community college districts pursuant to Section 8 that may be suspended by urgency statute, in the event that any appellate court of this state determines that any of specified provisions are unconstitutional, unenforceable, or otherwise invalid. Existing law declares that the amount of General Fund revenues appropriated for the support of school districts and community college districts that would otherwise be considered to be appropriated for the purposes of Section 8 would be limited for the 1993–94 fiscal year, as specified.

This bill would repeal that provision.

(17) This bill would appropriate $150,000,000 for the 1996–97 fiscal year, $200,000,000 for the 1997–98 fiscal year, $250,000,000 for the 1998–99 fiscal year, $310,000,000 for the 1999–2000 fiscal year, $350,000,000 for the 2000–01 fiscal year, and $350,000,000 for the 2001–02 fiscal year from the General Fund for the purposes of discharging in full the indebtedness resulting from the emergency loan made to school districts and community college districts in Chapter 703 of the Statutes of 1992. The bill would require that for the purposes of making the computations required by Section 8, including computation of the state's minimum funding obligation to school districts and community college districts in subsequent fiscal years, those appropriations are deemed General Fund revenues appropriated for school districts and community college districts, as specified, and included within the total allocations to school districts and community college districts from General Fund proceeds of taxes, as specified, for the fiscal year in which the appropriation is made.

(18) This bill would provide that the amount that is required to be appropriated for the purpose of satisfying the state's minimum funding obligation to school districts and community college districts pursuant to Section 8 of Article XVI of the California Constitution shall, in addition to all other funds required to be appropriated to school districts, as defined, and community college districts, be increased by $50,000,000 for the 1996–97 fiscal year, $50,000,000 for the 1997–98 fiscal year, $50,000,000 for the 1998–99 fiscal year, $35,000,000 for the 1999-2000 fiscal year, and $40,000,000 for the 2000–01 fiscal year. The bill would also require that for the purposes of Section 8, including, but not limited to, the purposes of determining the total allocations to school districts and community college districts from General Fund proceeds of taxes, as specified, the amount of the state's minimum funding obligation to school districts and community college districts pursuant to Section 8 be increased in each of those fiscal years and all following fiscal years by those amounts. The bill would also clarify that in the event of a suspension of Section 8, the required maintenance factor repayment, as described in (19), be computed in a manner that includes those increases.

(19) Under existing law, as set forth in subdivisions (d) and (e) of Section 8, the state is required to compute a maintenance factor for any fiscal year in which allocations made pursuant to Section 8 are less than the allocations made pursuant to Section 8 in the prior

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

fiscal year because either Section 8 was suspended pursuant to subdivision (h) of that section, or the fiscal year was one in which the percentage growth in California per capita personal income in a fiscal year is greater than the percentage growth in per capita General Fund revenues plus $^1/_2$ of 1%. The maintenance factor is equal to the difference between the amount of General Fund moneys that would have otherwise been appropriated, as specified, and the amount of General Fund moneys actually appropriated to school districts and community college districts in that fiscal year. The maintenance factor is required to be adjusted annually for changes in enrollment and inflation, as specified, until it is allocated in full. The maintenance factor is required to be allocated in a manner determined by the Legislature in each fiscal year, as specified.

This bill would increase the amount of the maintenance factor computed pursuant to subdivisions (d) and (e) of Section 8 by $275,000,000 in the 1995–96 fiscal year, and would require that amount to be adjusted and allocated as described above.

(20) This bill would appropriate the sum of $241,834 from the General Fund to the Department of Finance, without regard to fiscal year, for payment to the California Teachers Association for attorney's fees and costs incurred by the association for the purposes of California Teachers Association v. Gould.

(21) This bill would find and declare that its provisions further the purposes of Section 8.

(22) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 79 (AB 3361) Bustamante. Notary publics: surety bond.

Existing law requires any person appointed as a notary public to meet certain qualifications and to execute a surety bond in the sum of $10,000.

This bill would raise the amount of that bond to $15,000.

Ch. 80 (AB 3015) Hawkins. Common interest developments: reserve funds.

Existing law generally prohibits the board of directors of the governing association of a common interest development from expending funds designated as reserve funds for any purpose other than the repair, restoration, replacement, or maintenance of the major components which the association is obligated to repair, restore, replace, or maintain and for which the reserve fund was established. Existing law requires the board to cause a study of the reserve account requirements to be conducted at least once every 3 years if the current replacement value of the major components is greater than $^1/_2$ of the gross budget of the association for any fiscal year, as specified.

This bill would revise and recast those provisions. The bill would revise the latter provision to require the board to cause to be conducted a visual inspection of the accessible areas of the major components which the association is obligated to repair, restore, replace, or maintain if the current replacement value of the major components is greater than $^1/_2$ of the gross budget of the association, excluding the reserve account, for that 3-year period, rather than for any fiscal year.

Ch. 81 (AB 2845) Sweeney. Local governmental finance.

Under existing law, if the treasurer of any local agency determines that the agency has excess funds, the treasurer may, upon the adoption of a resolution, deposit the funds in the county treasury for the purpose of investment by the county treasurer.

This bill would require that a report prepared by the treasurer or chief fiscal officer of a local agency concerning invested funds be provided to the treasurer or other official responsible for the funds of any local agency that has funds on deposit in the county treasury.

The bill would also provide that any audit conducted regarding funds so invested in the county treasury be rendered to the depositary, the auditor, the controller, the secretary, or the corresponding officer of the local agency, the treasurer or other official responsible for the funds of any local agency that has funds on deposit in the county treasury, and to the presiding judge of any superior court that has ordered that assets of an estate be deposited with the county treasurer.

The bill would declare that it is to take effect as an urgency statute.

Ch. 82 (AB 2278) Battin. Alcoholic beverages: licenses: club.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The Alcoholic Beverage Control Act defines the term "club" for purposes of club licenses to include any golf club, which owns, maintains, or operates a regular golf links together with a clubhouse thereon.

This bill would provide that a club license for a golf club entitles the licensee to make sales of alcoholic beverages from any golf cart, as defined, operating on the golf club premises.

Ch. 83 (AB 2478) K. Murray. Schools: solicitations by licensed optometrists.

Existing law prohibits a licensed dentist that provides voluntary dental health screening programs for pupils on school premises from soliciting a pupil, or a pupil's parent or guardian, or encouraging, or advising treatment or consultation for the pupil by the licensed dentist, or any affiliate of the licensed dentist, for any condition discovered in the course of the dental health screening. Existing law also states that it is the intent of the Legislature that no licensed dentist use voluntary dental health screening programs for the generation of referrals or for financial benefit.

Existing law requires the governing board of any school district to provide for the testing of the sight of each pupil enrolled in the schools of the district, except if the parent or guardian of the pupil has filed a statement refusing consent.

This bill would prohibit a licensed optometrist who provides voluntary vision testing programs for pupils on school premises from soliciting a pupil, or a pupil's parent or guardian, or encouraging, or advising treatment or consultation for the pupil by the licensed optometrist, or any affiliate of the licensed optometrist, for any condition discovered in the course of the vision testing. This bill would also state that it is the intent of the Legislature that no licensed optometrist use voluntary vision testing programs for the generation of referrals or for financial benefit.

Ch. 84 (AB 2082) Conroy. Execution of the death penalty.

Existing law provides that persons sentenced to death shall have the opportunity to elect to have the punishment imposed by lethal gas or lethal injection. If no election is made, the penalty of death shall be imposed by lethal gas.

This bill, instead, would provide that the method of execution shall be by lethal injection when no election is made.

Ch. 85 (AB 2118) Hauser. Alcoholic beverages: tied-house restrictions: brewing industry.

The Alcoholic Beverage Control Act prohibits a manufacturer, bottler, importer, or wholesaler of products of the brewing industry from furnishing, giving, renting, lending or selling, directly or indirectly, any equipment, fixtures, or supplies, other than alcoholic beverages, to any person engaged in operating, owning, or maintaining any on-sale premises, as specified.

This bill would, for purposes of that prohibition, provide that supplies do not include paper beverage coasters, as specified.

Ch. 86 (AB 2146) Rainey. Probate: disposition of property.

(1) Existing law authorizes a conservator to take specified action with respect to mutual fund and other dividend reinvestment plans in which the conservatee, or other specified person, has or will have an interest, only after authorization or direction by order of the court.

This bill would create an exception to this provision with respect to the sale of mutual funds held without designation of a beneficiary.

(2) Existing law authorizes the guardian or conservator to sell securities, under certain conditions, without authorization, confirmation, or direction of the court, as specified.

This bill would amend that provision to authorize a guardian or conservator to sell securities that are to be directly redeemed by the issuer thereof.

(3) Existing law also authorizes the public guardian, rather than a probate referee, to appraise property described in the inventory of an estate if the public guardian files with the inventory an appraisal showing that the estimated value of the property, including cash items, does not exceed $10,000. In addition, the successor of a decedent may, without

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

procuring letters of administration or awaiting probate of the will, take specified actions related to the collection or recovery of property due or belonging to the decedent, if the gross value of the decedent's estate does not exceed $60,000.

This bill would authorize the public guardian to appraise the property described above if the estimated value of the property does not exceed $100,000, as specified. The bill would require an appraisal by a probate referee, however, where a conservator seeks authority to sell the conservatee's personal residence or to sell other property valued in excess of $10,000, as specified. The bill would also provide that the successor of a decedent may take specified actions with respect to the collection or recovery of property without procuring letters of administration or awaiting probate of the will, if the gross value of the decedent's estate does not exceed $100,000.

(4) Existing law permits a person or persons to make a claim as successor of a decedent to a particular item of real property by filing an affidavit stating, among other things, that the gross value of all real property in the decedent's estate located in this state does not exceed $10,000.

This bill would instead require that the affidavit state that the gross value of the real property does not exceed $20,000.

Ch. 87 (AB 2074) Hannigan. Sheriffs and marshals.

Existing law sets forth the duties of the sheriff and marshal with respect to the courts. Existing law contains various provisions for the consolidation of these court services.

This bill would authorize the board of supervisors of Solano County to commence public hearings regarding the consolidation of court services in the county. The bill would also authorize a concurrent advisory election among the superior and municipal court judges of the county and provide that the consolidation shall occur pursuant to the board's determination. The bill would also specify the method for the employment of personnel of the marshal's office and the sheriff's office following consolidation and provide for the implementation of consolidated court services to be agreed upon by representatives of various public entities, as specified.

Ch. 88 (AB 1668) Takasugi. Property taxation: welfare exemption: interest rates: information requests.

(1) The California Constitution authorizes the Legislature to classify personal property for differential taxation or for exemption by means of a statute approved by a $^2/_3$ vote of the membership of each house. Pursuant to this constitutional authorization, existing property tax law exempts, until January 1, 1996, personal property owned and operated by an organization incorporated by an act of the United States Congress whose purposes are to provide adequate facilities to assist in meeting local and national emergencies and to promote the public welfare and provide aviation and aerospace education.

This bill would eliminate the provision repealing that exemption, thereby extending it indefinitely.

(2) Existing property tax law requires a county assessor to comply by the 1st Monday in each month with a written request by a city, or a lighting, water, or irrigation district, for specified information with respect to property on the unsecured roll that is located within the requesting city or district.

This bill would, as provided, include within that specified information the location of property on the unsecured roll that is located within the requesting city or district. By requiring county assessors to determine and report additional information to requesting cities and districts, this bill would impose a state-mandated local program.

(3) Existing property tax law requires that interest be paid at the greater of 3% per annum or the "county pool apportioned rate" on any amount that is refunded to a property taxpayer , and that any interest so paid be calculated with respect to the longest of any of certain applicable time periods. For purposes of this requirement, existing law defines the "county pool apportioned rate" for each fiscal year with respect to which a refund is paid as the annualized rate of interest earned as of June 30 of that fiscal year on certain idle, pooled moneys held by the county treasurer.

This bill would, for each fiscal year, require each county treasurer to advise the Controller of the county pool apportioned rate determined for that treasurer's county,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and of the computations made in deriving that rate, no later than 60 days after the end of that fiscal year. This bill would also modify those provisions establishing the period during which interest at the "county pool apportioned rate" is to accrue to provide, as specified, that interest accrues from the date of payment of tax, the date of the recordation of a deed, or the date of filing a claim for refund, as applicable, and that the computation of interest terminates as of a date within 30 days of the mailing or personal delivery of a refund.

(4) Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 89 (AB 896) Knight. Local agencies.

Existing law provides that any unclaimed individual items of less than $10 may be transferred to the general fund of a local agency after one year or upon an order of the court without publication of a notice.

This bill would raise the amount of those items from $10 to $15.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 90 (AB 2007) K. Murray. Juveniles: wards: subpoenas.

Existing law relating to wardship proceedings requires the juvenile court or the clerk of the juvenile court to issue subpoenas requiring attendance and testimony of witnesses and production of papers at any hearing under the Juvenile Court Law, upon the request of the probation officer, district attorney, the minor, or the minor's parent, guardian, or custodian, and authorizes the court to issue these subpoenas on its own motion. Another provision of existing law, a part of the provisions relating to dependency proceedings, requires the juvenile court or the clerk of the juvenile court or an attorney, as provided, to issue subpoenas requiring attendance and testimony of witnesses and production of papers at any hearing under the Juvenile Court Law, upon the request of the probation officer, district attorney, the minor, the minor's parent, guardian, or custodian, or on motion of the court.

This bill would revise and recast these provisions, and would provide that the district attorney and the attorney of record for the minor may issue these subpoenas with regard to hearings concerning minors who are alleged or determined by the juvenile court to be persons who may be adjudged to be wards of the juvenile court.

Ch. 91 (AB 2208) K. Murray. Criminal trials: prosecutors: recusals.

Existing law provides a procedure for the disqualification of a district attorney from performing an authorized duty.

This bill would provide a comparable procedure for the disqualification of a city attorney from performing an authorized duty in a criminal matter.

Ch. 92 (AB 2242) Burton. Food facilities.

Existing law, the California Uniform Retail Food Facilities Law, regulates food facilities, as defined, and requires that food be served, stored, and displayed in these facilities in a clean and sanitary manner. Existing law requires that each food establishment, as defined, except produce stands and swap meet prepackaged food stands, be fully enclosed in a building consisting of floors, walls, and an overhead structure that meet the minimum standards prescribed by the law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that these provisions shall not be construed to require the enclosure of dining areas or open-air barbecue facilities.

This bill would provide, in addition, that these provisions shall not be construed to require the enclosure of outdoor displays that meet certain requirements. The requirements would include, among others, that only prepackaged nonpotentially hazardous food and uncut produce, or both be displayed or sold and that the outdoor displays be contiguous with a food establishment that is in compliance with the above full enclosure requirement. The bill would also provide that these provisions are not to be construed to allow outdoor displays in violation of local ordinances.

Ch. 93 (AB 2686) Kaloogian. Minors: juvenile court jurisdiction.

Existing law specifies the jurisdiction of the juvenile court over minors on the basis of criminal conduct. Existing law provides, however, that in counties that so provide, the municipal court has jurisdiction over minors who are alleged to have committed only a Vehicle Code infraction or a violation of a local ordinance relating to specified motor vehicle offenses.

Under existing law, in counties that had not adopted and implemented this provision prior to August 15, 1993, the municipal court is required to use the procedures set forth in the juvenile court law in hearing cases involving minors who are at least 16 years of age and who are alleged to have committed certain of these Vehicle Code infractions. In counties that had adopted and implemented this provision prior to August 15, 1993, the municipal court is permitted to use the procedures established by the Vehicle Code. These provisions are operative until January 1, 1998, at which time the provision requiring the municipal court to use the procedures set forth in the juvenile court law would apply.

This bill would delete the provisions described above pertaining to the use of procedures. The bill instead would provide that the cases described above for which the municipal court has jurisdiction shall not be governed by the procedures set forth in the juvenile court law. The bill would provide that specified procedures for bail shall apply to these cases. The bill would authorize a county to adopt these provisions in a trial court coordination plan and would make related changes.

Ch. 94 (AB 2491) Boland. Bail.

Existing law requires a court to declare forfeited the undertaking of bail or the money or property deposited as bail if a defendant fails to appear for certain proceedings without sufficient excuse.

This bill would define "arrest" for the purposes of this provision. The bill would also make clarifying changes.

Ch. 95 (AB 2781) Cunneen. Mobilehomes.

Under existing law, legal owners and holders of junior liens against mobilehomes in mobilehome parks are entitled to sell the mobilehome within the park, upon the default of the registered owner, by either foreclosing the security interest or requesting the mobilehome park management to terminate the tenancy and offering to reimburse the management's attorney's fees and costs in an action to evict the tenant. In either case, the right of the legal owner or lienholder to sell the mobilehome in the park is contingent upon payment of rent and satisfaction of other specified obligations.

This bill would revise and recast these provisions to provide that the legal owner or junior lienholder may sell the mobilehome within the park to a third party and keep the mobilehome on the site within the park until it is sold only if specified requirements are met.

Ch. 96 (AB 2861) Villaraigosa. Anatomical gifts: disabilities: discrimination.

Under existing law, the Uniform Anatomical Gift Act, an individual who is at least 18 years of age may make an anatomical gift for any of the various stated purposes, limit an anatomical gift to one or more of those purposes, or refuse to make an anatomical gift.

This bill would preclude a hospital, physician and surgeon, procurement organization, or other person from determining the ultimate recipient of an anatomical gift on the basis of the potential recipient's physical or mental disabilities, as defined in the federal

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Americans with Disabilities Act of 1990, except to the extent that the physical or mental disability has been found by a physician and surgeon, following a case-by-case evaluation of the potential recipient, to be medically significant to the provision of the anatomical gift.

This bill would provide that these provisions shall not be deemed to require referrals or recommendations for or the performance of medically inappropriate organ transplants, as defined.

The bill would require a court to accord priority on its calendar and handle expeditiously any action brought to seek any remedy authorized by law for purposes of enforcing compliance with this provision.

Ch. 97 (AB 3304) Napolitano. Notary public.

(1) Existing law requires an officer taking the acknowledgment of an instrument to endorse thereon or attach thereto a prescribed certificate. Existing law sets forth one form for general use for the acknowledgement of an instrument, and provides that any certificate of acknowledgment taken in another place shall be sufficient in this state if it is taken in accordance with the laws of the place where the acknowledgment is made.

This bill would provide that on documents to be filed in another state or jurisdiction of the United States, a California notary may complete any acknowledgment form as may be required in that other state or jurisdiction on a document if the form does not require the notary to make any determination or certification not allowed by California law.

(2) Existing law requires, within a prescribed time period, every person appointed a notary public to file an official bond, and take, subscribe, and file an oath of office in the office of the county clerk of the county within which the person maintains a principal place of business, as specified.

This bill would instead require this person to take and subscribe the oath either in the office of this county clerk or before another notary public in that county.

Ch. 98 (AB 3366) Knox. ATM: surcharge disclosure.

Existing law prohibits the operator of an automated teller machine (ATM) from imposing a surcharge upon ATM usage when the customer is using an access device not issued by that operator unless the surcharge is clearly disclosed prior to completion of any transaction.

This bill would, commencing July 1, 1997, provide that no operator of an ATM in this state shall impose any surcharge upon a customer for the usage of that machine whether or not the customer is using an access device issued by that operator unless the surcharge is clearly disclosed to the customer electronically on the ATM, and, unless the disclosure is made prior to the customer being obligated to pay the surcharge, the customer shall be provided an opportunity to cancel the transaction without incurring any surcharge, with specified exceptions. The bill would also provide for total price and fee disclosure with respect to the sale of goods and services conducted at an ATM, as specified.

Ch. 99 (AB 3144) Granlund. Alcoholic beverages: manufacturers and winegrowers: electronic data services.

The Alcoholic Beverage Control Act regulates the provision of signs and other advertising matter to licensed retail premises by manufacturers and others.

That law provides that nothing in that law prohibits any alcoholic beverage manufacturer, manufacturer's agent, or winegrower from furnishing electronic data services, as specified, to a licensed retail premises.

This bill would provide that nothing in that law prohibits any alcoholic beverage manufacturer, manufacturer's agent, winegrower, or wholesaler from furnishing those electronic data services relating to, among other things, electronic invoice transmissions.

The Alcoholic Beverage Control Act provides that any manufacturer, winegrower, manufacturer's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director, or agent of any such person, may furnish, give, lend, or rent specified types of signs.

This bill would expand that list of signs to include acrylic table tent holders.

Ch. 100 (AB 2189) Poochigian. Juvenile facilities: Tulare County.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the Department of the Youth Authority to adopt minimum standards for the construction and operations of juvenile halls. Existing law authorizes the Board of Corrections, however, to conduct annual inspections of any juvenile hall in order to determine whether the juvenile hall is a suitable place for the confinement of minors.

This bill would declare that it is in the public interest to encourage innovation and experimentation in the operation and maintenance of juvenile detention facilities. The bill would, to these ends, authorize Tulare County to undertake the construction and operation of a juvenile detention facility that shall not be subject to existing laws or regulations governing staffing ratios and housing capacity of such a facility, except as specified, subject to review and approval by the Board of Corrections, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 101 (SB 1982) Russell. Children: family reunification.

(1) Existing law requires that, whenever a minor is removed from a parent's or guardian's custody, the juvenile court order the probation officer to provide child welfare services to the minor and the minor's parents or guardians for the purpose of facilitating reunification of the family, as provided. Under these provisions, reunification services need not be provided when the court finds, by clear and convincing evidence, that specified circumstances exist.

This bill additionally would provide that reunification services need not be provided when the court finds, by clear and convincing evidence, that the minor meets one of several specified criteria, that the parent or guardian willfully abandoned the minor, and the court finds that the abandonment constituted a serious danger to the child. The bill would also make a conforming change.

(2) Existing law provides that in specified circumstances in which the court need not provide reunification services, the court shall not order reunification services unless it finds that those services are likely to prevent reabuse or continued neglect of the child or that failure to try reunification will be detrimental to the child, as provided.

This bill would specify that this finding shall include within the specified circumstances, the circumstance specified in (1).

Ch. 102 (SB 2030) Killea. Employment contracts: continuing contracts.

Existing law requires that every employment agency give a written contract to every job seeker from whom a fee or deposit is to be received. The contract must include a contract expiration date, as specified.

This bill would create an exception to that provision by permitting a domestic agency operating as a registry, as defined, to enter into a continuing contract subject to termination by written notice, as specified.

Ch. 103 (SB 1942) O'Connell. Tangible personal property: secondhand dealers.

Existing law provides a comprehensive scheme for the regulation of the acquisition of secondhand personal property, as specified. Persons who perform the service of an auctioneer for a fee or salary are exempted from regulation.

This bill would also exempt from that regulatory scheme secondhand dealers whose business is limited to the reconditioning and selling of major household appliances, subject to specified conditions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 104 (SB 2006) Haynes. Vehicles: speed traps: definition.

Existing law defines a "speed trap" as a particular section of a highway with a prima facie speed limit provided by the Vehicle Code or by local ordinance, which speed limit is not justified by an engineering and traffic survey conducted within 5 years prior to the date of the alleged violation, and where enforcement involves the use of radar or other electronic devices which measure the speed of moving objects. Existing law makes that definition inapplicable to local streets and roads, as defined by the latest functional usage and federal-aid system maps submitted to the Federal Highway Administration. When those maps have not been submitted, existing law defines a local street or road, for the purposes of the speed trap definition, as a street or road that primarily provides access

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to abutting residential property, has a roadway width of not more than 40 feet, is not more than 1/2 mile of uninterrupted length, and is not more than one traffic lane in each direction.

This bill would, additionally, make the definition of local street or road specified above applicable when the street or road is not shown on the functional usage and federal-aid system maps specified above.

Ch. 105 (SB 1394) Monteith. Grand Jury.

Existing law provides for the removal of public officers for willful or corrupt misconduct in office. Existing law requires that an accusation in writing against any officer of a district, county, or city for willful or corrupt misconduct in office may not be presented without the concurrence of at least 12 grand jurors.

Existing law also provides that the required number of grand jurors is 23 in a county having a population exceeding 4,000,000, 11 in a county having a population of 20,000 or less, upon approval by the county board of supervisors, and 19 in all other counties.

This bill would provide that, in a county in which the required number of grand jurors is 11, an accusation in writing against an officer of a district, county, or city for willful or corrupt misconduct in office may not be presented without the concurrence of at least 8 grand jurors.

Ch. 106 (SB 1930) Russell. Industrial loan companies.

Existing law authorizes an industrial loan company to make a loan or acquire an obligation that is repayable in unequal periodic payments throughout its term and that is secured by real or personal property, or both, provided that it is not a consumer loan or obligation. Existing law requires a nonconsumer loan or obligation with a term in excess of 10 years be repaid in substantially equal installments, with certain exceptions applicable to loans secured primarily by real property.

This bill would provide that a nonconsumer loan or obligation secured solely or primarily by personal property shall have a term not to exceed 15 years and 30 days.

Ch. 107 (SB 1495) Lewis. Loans: credit insurance.

Existing law provides that a licensee under the California Finance Lenders Law can provide credit insurance on either a loan or an open-end credit agreement. Existing law requires the licensee to have the form of credit insurance and schedule of rates approved by the Insurance Commissioner and to file those documents with the Commissioner of Corporations as soon as practicable after the Insurance Commissioner's approval.

This bill would recast the above requirement to instead require those documents to be filed with the Commissioner of Corporations prior to the offer or sale of the credit insurance.

Ch. 108 (SB 1491) Mountjoy. Vehicles: permanent fleet registration.

Existing law authorizes the registered owner of a fleet of specified types of vehicles consisting of a certain number of vehicles to apply to the Department of Motor Vehicles for participation in a permanent fleet registration program. Vehicles registered under this program are required to display certain alternative information on both the right and left side of each motor vehicle and on the right and left side or on the front and rear of each trailer.

This bill would revise the display requirements to allow the permanent fleet registration number to be displayed on a motor vehicle under 6,000 pounds unladen weight that is owned or leased by a public utility on both the right and left side or on the front and rear of the vehicle .

Ch. 109 (SB 1426) Johnson. Controlled substances: fenfluramine.

Existing law classifies controlled substances within Schedules I to V, inclusive, and places the greatest restrictions on those controlled substances in Schedule I. Existing law classifies fenfluramine and its salts and isomers as Schedule IV controlled substances and prohibits their sale.

This bill would delete fenfluramine and its salts and isomers from Schedule IV and would repeal the prohibition against their sale. The bill would provide that it shall not

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

become operative unless fenfluramine and its salts and isomers are removed from Schedule IV of the federal Controlled Substances Act.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 110 (SB 1552) Wright. Industrial loan companies: loans.

Existing law generally prohibits an industrial loan company from making loans to, or purchasing obligations from, persons who do not reside or have a place of business in this state, unless those loans or obligations comply with specified conditions, or unless those loans and obligations do not exceed 20%, in the aggregate, of an industrial loan company's total assets, as specified. An industrial loan company may apply to the Corporations Commissioner for approval to increase its loans to 30% of a company's total assets.

This bill would provide that an industrial loan company may apply to the commissioner for approval to increase this amount to 40%.

Ch. 111 (SB 2082) Leslie. AIDS: HIV.

Existing federal law, the Ryan White Comprehensive AIDS Resources Emergency Act of 1990, requires the Secretary of Health, Education, and Welfare to develop a list of potentially life-threatening infectious diseases to which emergency response employees, as described, may be exposed in responding to emergencies, guidelines describing the circumstances in which these employees may be exposed to the diseases, and guidelines describing the manner in which medical facilities should make determinations about whether an emergency response employee has been exposed to an infectious disease. The act requires that a designated officer, as described, shall receive notifications and responses from and make requests to a medical facility on behalf of an emergency response employee who has transported a victim of an emergency to a medical facility under circumstances in which the employee may have been exposed to an infectious disease. The act requires the designated officer to inform such an emergency response employee of certain responses received from the medical facility.

Existing state law prescribes criminal and civil sanctions for the disclosure of the result of a blood test to detect antibodies to the probable causative agent of AIDS in an identifying manner, with certain exceptions.

Existing state law also provides that all information and records obtained in the course of providing intake, assessment, and services to persons with developmental disabilities, or in the course of providing certain mental health services to either voluntary or involuntary recipients of services, are confidential, except as specified.

This bill would add to the exceptions to the state law provisions restricting disclosures a disclosure to the designated officer of an emergency response employee, and disclosure from that designated officer to an emergency response employee regarding possible exposure to HIV or AIDS, but only to the extent necessary to comply with provisions of the Ryan White Comprehensive AIDS Resources Emergency Act of 1990. The bill would require the designated officer and exposed emergency response employee to be subject to certain confidentiality requirements regarding disclosure of results of an HIV test.

Ch. 112 (SB 1528) Rogers. Vehicle emission certificate requirements: transfer: exemption.

Existing law requires a certificate of compliance or noncompliance with motor vehicle emission standards to be submitted to the Department of Motor Vehicles upon the initial registration of a vehicle and upon the transfer of registration of a vehicle, with specified exceptions.

This bill would make the requirement regarding the submission of the certificate upon transfer of a vehicle inapplicable when the transferor is the sibling of the transferee.

Ch. 113 (SB 1537) Kelley. Pharmacist: performing tests.

Existing law provides for the licensure and discipline of pharmacists administered by the California State Board of Pharmacy. Existing law also provides for the licensure and regulation of clinical laboratories and various clinical laboratory health care professionals by the State Department of Health Services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law prohibits a person from performing a clinical laboratory test or examination classified as waived or of moderate complexity under the federal Clinical Laboratory Improvement Amendments of 1988 (CLIA; 42 U.S.C. 263a; P.L. 100-578) unless the clinical laboratory test or examination is performed under the overall operation and administration of the laboratory director and the test is performed by certain persons.

This bill would add to the persons who are authorized to perform a clinical laboratory test or examination under this provision a pharmacist when ordering drug therapy-related laboratory tests.

Ch. 114 (SB 1435) Monteith. Vehicle registration: exemption: silage.

Existing law exempts specified farm vehicles from vehicle registration requirements under prescribed conditions.

This bill would also exempt a motor vehicle that is specifically designed for, and used exclusively in, an agricultural operation for purposes of carrying, or returning empty from carrying, silage, as defined, and in a specified manner.

Ch. 115 (SB 1574) Beverly. Mosquito abatement districts: incompatible offices.

Existing law authorizes the establishment of vector control districts, including, but not limited to, mosquito abatement districts, establishes qualifications for their governing boards, provides for appointment of members of the boards, and regulates activities of the districts. Existing common law precludes the simultaneous holding of incompatible offices.

This bill would, notwithstanding contrary provisions of law, including, but not limited to, the common law doctrine of incompatibility of offices, permit appointment of a member of a city council to the district board of these districts, if he or she meets the qualification requirements. This bill would make findings that these provisions are declaratory of existing law.

Ch. 116 (SB 1527) Wright. Vehicle offenses.

(1) Under existing law, it is a misdemeanor for any person to lend any disabled person placard to any other person if the person desiring to borrow it would not be entitled to its use, and it is a misdemeanor for any person to knowingly permit its use by one not entitled to it, except as specified.

This bill would make it a misdemeanor, thereby imposing a state-mandated local program by increasing the duties imposed on local law and correctional agencies, for any disabled person to permit the use for parking purposes of a special identification license plate by one not entitled to use it, or for any person to use a vehicle displaying a disabled person or disabled veteran special identification license plate issued to another to park in parking spaces or stalls designated for disabled persons unless transporting a disabled person.

(2) Existing law makes it an infraction for a driver of a vehicle to enter an intersection or marked crosswalk, notwithstanding any official traffic control signal indication to proceed, unless there is sufficient space on the other side of the intersection or marked crosswalk to accommodate the vehicle driven without obstructing the through passage of vehicles from either side.

This bill would make it an infraction, thereby creating a new crime and imposing a state-mandated local program, for any person to similarly enter a railroad or rail transit crossing. The bill would make a related, conforming change.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 117 (SB 1411) Johnson. Highways: outdoor advertising.

The Outdoor Advertising Act regulates the placement of advertising displays adjacent to and within specified distances of certain highways. Among other things, the act

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

prohibits, with specified exceptions, the placement of an advertising display on property adjacent to a section of landscaped freeway.

This bill would exempt from that prohibition an advertising display used exclusively to identify development projects, business centers, or associations located within, or sponsored by, the City of Costa Mesa to support economic development activities, if the display meets specified conditions.

The bill would set forth facts and declare that the provisions specified above constitute necessary special legislation.

Ch. 118 (SB 1852) Committee on Elections and Reapportionment. Ballot card stubs.

Existing law requires that each ballot card have 2 stubs attached, separated from the ballot card and from each other by perforated lines so that they may be readily detached. It requires that one stub have the serial ballot number printed on it, and that it be detached from the remainder of the ballot before it is handed to the voter. It requires that the other stub have specified items of information printed thereon, including the words "This ballot stub shall be removed by a precinct board member and handed to the voter before the ballot is placed in the ballot container."

This bill would require, instead, that the words state "This ballot stub shall be removed and retained by the voter."

Ch. 119 (SB 1850) Kelley. Agriculture and marketing: California Avocado Commission.

(1) Existing law establishes the California Avocado Commission to deal with advertising, promotion, production research, quality and maturity standards, the collection and dissemination of crop volume and related statistics, and related marketing research relative to avocados.

For these purposes, this bill would define "person" to mean an individual, partnership, corporation, or limited liability company.

(2) Existing law provides, with respect to the election of producer members to the commission, that if a producer has a financial interest in the production of avocados within more than one district, the producer may stand for election in any district in which the producer has a financial interest in the production of avocados. However, a producer who chooses to stand for election in a particular district may not stand for reelection in any other district for a period of 4 years from the date of his or her most recent election to the commission.

The bill would provide that the foregoing provisions do not apply in an election to fill vacancies created by reapportionment.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 120 (AB 134) Rainey. Sheriffs and constables.

(1) Existing law sets forth the duties of county sheriffs, including the procedures regarding the return of process or notice. Existing law further specifies that a county sheriff shall command the aid of as many male inhabitants of the sheriff's county as the sheriff thinks necessary.

This bill would delete the limitation to only male inhabitants of the county, and make various technical, nonsubstantive changes.

(2) Existing law sets forth general and specific duties and authority of county constables.

This bill would delete those provisions.

(3) The Sacramento County Court Services Consolidation Act provides that the Board of Supervisors of the County of Sacramento may, by ordinance, abolish the office of marshal of the municipal court and consolidate the services and personnel of the Sacramento County Marshal's department into the Sacramento County Sheriff's Department. These provisions would be repealed on January 1, 1998.

This bill would delete the repeal of these provisions, thus making the consolidation of the departments permanent.

Ch. 121 (AB 2191) Cunneen. Trade secrets: definition.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, the Uniform Trade Secrets Act, defines trade secret, for purposes of civil actions, to mean information that derives independent economic value from not being generally known to the public or other persons who can obtain economic value from its disclosure or use and is the subject of reasonable efforts to maintain its secrecy. Existing provisions of the Penal Code define trade secret differently than the Uniform Trade Secrets Act and provide that a person who steals a trade secret or fraudulently appropriates or copies without permission any article representing a trade secret is guilty of theft.

This bill would conform the Penal Code definition of trade secret with that of the Uniform Trade Secrets Act. The bill would also make technical, nonsubstantive changes.

Ch. 122 (AB 2254) Cunneen. Criminal procedure: reinstatement of proceedings.

Existing law guaranteeing a criminal defendant's right to a speedy trial requires the court to dismiss the complaint against the defendant if the preliminary examination is set or continued beyond 10 court days from the time of the arraignment or plea and the defendant has remained in custody for that time on that charge. Existing law also requires the court to dismiss the action when a defendant is not brought to trial in a superior court within 60 days after the finding of the indictment or the filing of the information. Existing law further requires all proceedings in a criminal prosecution to be suspended while the court considers the question of the defendant's present mental competence.

This bill would specify that these time limits also begin to run upon the reinstatement of criminal proceedings after the defendant has been determined to be mentally competent.

Ch. 123 (AB 2376) Margett. Probation: reports.

Existing law provides that, if a person is convicted of a felony and is eligible for probation, before judgment is pronounced, the court shall refer the matter to a probation officer to complete a report. The court is required to consider the report at the hearing to determine the suitability of probation in the case. The report is required to be made available to the prosecution and the defense within specified time periods prior to the hearing, unless the parties waive those time periods.

This bill would provide that the preparation of the report or the consideration of the report by the court may be waived only by stipulation of the prosecuting and defense attorneys and the consent of the court, but that if the defendant is ultimately sentenced and committed to the state prison, a probation report is required to be completed.

Ch. 124 (AB 3470) Committee on Judiciary. Maintenance of the Codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would restate existing provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature for consideration during 1996, and would not make any substantive change in the law.

Ch. 125 (SB 655) Craven. Service authority for freeway emergencies.

Existing law authorizes a county, and cities within the county, to create a service authority for freeway emergencies for the purpose of establishing and implementing an emergency motorist aid system, including emergency call boxes and emergency mechanical service patrols, on portions of the California Freeway and Expressway System located within the county in which the authority is established. Existing law requires the Department of the California Highway Patrol to answer the calls and provide central dispatching services for the system on specified freeways and highways.

This bill would authorize the service authority in the County of San Diego, with the concurrence of the department, under specified conditions, to conduct a demonstration program to evaluate the effectiveness of contracting out response and dispatching services that are supplemental to the services provided by the department.

The bill would require the department to study the effectiveness of the demonstration program and report its findings to the Legislature by January 1, 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill's provisions would be repealed on January 1, 2000, unless that date is extended or deleted by a later enacted statute.

Ch. 126 (SB 1848) O'Connell. Long-term health care facilities: informed consent: alternative decisionmaking process.

Existing law authorizes an attending physician and surgeon of a resident in a skilled nursing or intermediate care facility to initiate a medical intervention, that requires the informed consent of the patient, for a resident of that facility when the physician has determined that the resident lacks the capacity to provide informed consent and after the facility conducts an interdisciplinary team review, as described, of the prescribed medical intervention. Under existing law, this authority would be repealed on January 1, 1997.

This bill would delete the repeal of this provision, thereby extending the authority indefinitely.

Existing law, pursuant to the above provisions, authorizes a skilled nursing or intermediate care facility to administer a medical intervention that requires informed consent prior to the facility convening an interdisciplinary team review in the case of an emergency.

This bill would require the interdisciplinary team to meet within one week of the emergency for an evaluation of the medical intervention if the emergency results in the application of physical or chemical restraints.

Existing law requires the State Department of Health Services to convene a committee to assess the need for changes to the process for the initiation of medical intervention for the above-described long-term health care facility residents. Under existing law, the committee was required to make recommendations to the Legislature regarding any identified changes to be made to that process by July 1, 1995.

This bill would repeal these provisions.

Ch. 127 (SB 1921) O'Connell. Insurance: foreign investments.

Under existing law, an insurer may invest in or otherwise acquire or loan upon securities and investments in a foreign country that are substantially of the same kinds, classes, and investment grades as those eligible for investment under the Insurance Code. The foreign investments are subject to certain restrictions. A domestic insurer with admitted assets in excess of $500,000,000 may acquire any foreign investment if the insurer abides by specified limits in the investment of its total admitted assets.

This bill would exempt from the investment limits that apply to domestic insurers with admitted assets in excess of $500,000,000, a property and casualty insurer that has admitted assets in excess of $500,000,000, and foreign investments that do not exceed 4% of its total admitted assets.

Ch. 128 (SB 671) Lewis. Firearms: dealers' record of sale.

(1) Existing law prohibits the delivery of any pistol, revolver, or other firearm capable of being concealed upon the person within 15 days of the application to purchase, the submission of any correction to the application pursuant to certain requirements, or the receipt of a specified fee, whichever occurs later. As of January 1, 1996, the minimum period prior to delivery was reduced to 10 days in the case of a firearm other than a pistol, revolver, or other firearm capable of being concealed upon the person.

This bill would reduce the minimum period prior to delivery to 10 days in the case of all firearms delivered on or after April 1, 1997.

(2) Under existing law, it is an offense punishable by imprisonment in a county jail not exceeding one year, or in the state prison, or by a fine not to exceed $1,000, or by both the fine and imprisonment for licensed firearm dealers to sell, loan, or transfer a pistol, revolver, or other firearm capable of being concealed upon the person to any person under the age of 21 years or any other firearm to a person under the age of 18 years.

This bill would make a violation of this provision punishable by imprisonment in the state prison for 2, 3, or 4 years where the licensed firearm dealer delivers a pistol, revolver, or other firearm capable of being concealed upon the person to a person who the dealer knows, or should know, is a minor. By increasing the penalty for a crime, this bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law requires every firearms dealer to keep a register in which certain information is to be entered pursuant to specified procedures. A violation of these provisions is a misdemeanor. Existing law also requires the dealer to submit to the Department of Justice 2 copies of the original sheet of the register by placing the copies in the mail, postage prepaid, and properly addressed to the department in Sacramento.

This bill would set forth procedures under which the electronic or telephonic transfer of applicant information would be the exclusive means by which firearm purchaser information would be submitted to the department on or after January 1, 1998. The bill would require the dealer to keep a record of the electronic or telephonic transfers containing the same information currently required to be entered on the dealers' record of sale register. The Department of Justice would be required, among other things, to develop standards for all appropriate electronic and telephonic equipment and telephone numbers to effect the transfer of information to the department under these provisions. Because the bill would create a new crime, it would impose a state-mandated local program.

(4) Existing law requires the Attorney General to maintain a registry of information reported to the Department of Justice regarding the licensing of firearms dealers and including various transactions involving pistols, revolvers, or other firearms capable of being concealed upon the person. This registry is required to include, among other information, the name and address of, and other information about, the person from whom the owner acquired or the person being loaned the pistol, revolver, or other firearm capable of being concealed upon the person.

This bill would additionally require this registry to include when the firearm was acquired or loaned.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 129 (AB 1901) Alby. Sex offenders: registration: rehabilitation.

(1) Existing law generally provides that any person convicted of a felony or of a misdemeanor sex offense may file a petition for a certificate of rehabilitation and pardon. If, after hearing, the court finds that the petitioner has demonstrated by his or her course of conduct his or her rehabilitation and his or her fitness to exercise all of the civil and political rights of citizenship, the court is required to make an order declaring that the petitioner has been rehabilitated, and recommending that the Governor grant a full pardon to the petitioner.

This bill would provide that the court shall have the discretion, rather than the duty, to make an order declaring the rehabilitation of a petitioner and recommending that the Governor grant a full pardon to the petitioner.

(2) Existing law provides that a person required to register with local law enforcement officials as a sex offender may petition for a certificate of rehabilitation and pardon and, upon obtaining a certificate of rehabilitation, shall be relieved of any further duty to register as a sex offender.

This bill would make this provision providing for no further duty to register as a sex offender inapplicable to specified sex offenders.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 130 (AB 2014) Boland. Sex crimes: limitations of actions.

Existing law establishes statutory limitation periods for commencing criminal actions. Existing law provides that, notwithstanding other specified time limitations, a criminal complaint may be filed within one year of the date of a report to a responsible adult or agency by a child under 18 years of age that the child is the victim of a specified sex crime, if certain requirements are met. Existing law also provides that, notwithstanding other specified time limitations, a criminal complaint may be filed within one year of the date of a report to a law enforcement agency by a person of any age alleging that he or she, while under the age of 18 years, was the victim of a specified sex crime, if certain requirements are met.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that these provisions apply to a cause of action arising before, on, or after the effective date of the provisions, as provided, thereby reviving and extending already expired statute of limitations periods.

Ch. 131 (AB 2116) Alby. Domestic violence: arrest.

Existing law specifies circumstances under which a peace officer may make an arrest without a warrant.

This bill additionally would permit a peace officer to make a warrantless arrest of a person who commits an assault or battery upon his or her spouse, upon a person with whom he or she is cohabiting, or upon the parent of his or her child if the peace officer has reasonable cause to believe that the person to be arrested has committed the assault or battery and the peace officer makes the arrest as soon as that reasonable cause arises, whether or not the assault or battery has in fact been committed.

Ch. 132 (SB 1221) Calderon. Prisoners: civil rights.

Under existing law, a person sentenced to imprisonment in a state prison may during that period of confinement be deprived of only those rights as is reasonably related to legitimate penological interests. Existing law additionally enumerates certain civil rights of a state prisoner, including, among others, the right to inherit, own, sell, or convey real or personal property and to purchase, receive, and read any and all newspapers, periodicals, and books accepted for distribution by the United States Post Office.

This bill would delete from those enumerated civil rights of a state prisoner the right to have personal visits.

Ch. 133 (SB 1760) Lockyer. Juvenile crime enforcement.

Existing law sets forth the powers and duties of the Board of Corrections, as specified.

This bill would create the Juvenile Crime Enforcement and Accountability Challenge Grant Program under the authority of the Board of Corrections, as specified, and would specify eligibility requirements for the grants.

The bill would direct the Board of Corrections to award grants that provide funding for 3 years.

The bill would also authorize the Board of Corrections to award up to $2,000,000 to counties, pursuant to those provisions. The bill would direct the Board of Corrections to develop an interim and a final report on the program, and to submit those reports to the Legislature, on or before March 1, 1999, and March 1, 2001, respectively. The bill would provide for funding for the program from the Budget Act of 1996, thereby making an appropriation.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 134 (AB 3229) Brulte. Local law enforcement: supplemental funding.

Existing provisions of the California Constitution and related implementing statutes provide for the imposition of a specified statewide sales and use tax rate, and require that the revenues derived from that rate be allocated to qualifying local agencies, as described, to supplement otherwise available funding for local public safety services, as defined.

This bill would require the Controller, pursuant to written requests from a county or city and county, to allocate $100,000,000, which is appropriated by the Budget Act of 1996, to counties, cities, and a certain special district in the County of San Mateo, for purposes of the Citizens Option for Public Safety (COPS) Program established by this bill.

This bill would, pursuant to the COPS program, require all Local Law Enforcement Fund moneys allocated to a county pursuant to this bill to be deposited in a Supplemental Law Enforcement Services Fund (SLESF), as provided, for allocation in accordance with specified formulas and procedures to the county sheriff, district attorney, the county, cities, and a certain special district in the County of San Mateo, to be expended exclusively, except as otherwise provided for certain counties with respect to misdemeanor prosecutions, for county jails, police, sheriff, and district attorney services. This bill would require a city receiving a SLESF allocation to deposit that allocation in its own SLESF, prior to expending those moneys as required by this bill. This bill would, as provided, require each county auditor and city treasurer to regularly report with

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

respect to SLESF allocations to, among other local bodies, a Supplemental Law Enforcement Oversight Committee (SLEOC) established in each county, and would also require each SLEOC to at least annually review expenditures by local law enforcement officials of SLESF moneys. By imposing additional duties upon local officials in connection with the administration of a city or county SLESF, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 135 (SB 900) Costa. Water bonds.

Under existing law, various bond acts have been approved by the voters to provide funds for water projects, facilities, and programs.

This bill would enact the Safe, Clean, Reliable Water Supply Act, which, if adopted, would authorize for the purposes of financing prescribed water programs, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of $995,000,000. The bill would also provide for the use of bond funds from the Water Conservation and Water Quality Bond Law of 1986 for drainage water management to be undertaken in accordance with this bond act and would revise requirements relating to the disposition of funds that are repaid to the state pursuant to contracts entered into in accordance with the Clean Water and Water Reclamation Bond Law of 1988.

The bill would provide for the submission of this bond act, and the changes in the 1986 and 1988 bond laws, to the voters at the November 5, 1996, general election.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 136 (AB 2063) Isenberg. Redevelopment project funding.

Existing law permits a redevelopment agency, under specified circumstances, to pay all or part of the costs of land, or the installation and construction of any structure or other improvement that is publicly owned within or without a project area. It prohibits an agency from providing any form of direct assistance to an automobile dealership on a parcel not previously developed for urban use, or a development on a parcel of 5 acres or more not previously developed for urban use that would generate sales and use taxes, except as specified.

This bill would further prohibit a redevelopment agency from providing any form of direct or indirect assistance to a development or business for the acquisition, construction, improvement, rehabilitation, or replacement of property that is or would be used for gambling or gaming of any kind whatsoever, or any facility wherein banked or percentage games, any form of gambling device or lotteries, other than the California State Lottery, are or will be played. The bill would provide, however, that this prohibition is not intended to prohibit a redevelopment agency, under specified conditions, from acquiring property on or in which an existing gambling enterprise is located.

This bill would make a legislative finding and declaration that specified amendments to existing law made by the bill shall not be deemed to invalidate, impair, or otherwise affect specified contracts or agreements between a redevelopment agency and a gambling-related business.

Ch. 137 (AB 2056) Alby. Adult day health care.

Existing law, the California Adult Day Health Care Act, provides for the licensure and regulation of adult day health centers. Existing law requires that the governing board of an adult day health center be comprised of 4 or more persons, at least $^1/_2$ of whom are recipients of the services of the adult day health center, their relatives, or representatives of community organizations interested in programs for the elderly. The Director of the Department of Aging is authorized to except from this requirement applicants that are

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

licensed as a health facility, clinic, or community care facility if certain requirements are met.

This bill would delete the requirement that the applicants be licensed as a health facility, clinic, or community care facility to qualify for the exemption.

Ch. 138 (AB 2089) Cortese. Property taxation: secured roll: consolidated tax statement.

Existing property tax law requires a county tax collector, annually on or before November 1 of each year, to mail a county tax bill, or a copy thereof, for every property on the secured property tax roll.

This bill would, subject to certain conditions and limitations, authorize a county tax collector to adopt a procedure under which he or she issues, upon the written request of a taxpayer received prior to September 1, a consolidated tax statement for all properties entered on the secured property tax roll with respect to which the requesting taxpayer is the assessee. This bill would also require an adopting county tax collector to annually provide written notice to taxpayers of their authority to request a consolidated property statement under these provisions, and of those conditions and limitations specified by this bill with respect to this authority.

Ch. 139 (AB 2138) Campbell. Health care service plans: financial statements: governmental entities.

Existing law requires a health care service plan to submit financial statements prepared as of the close of its fiscal year within 120 days after the close of the year.

This bill would require submission 180 days after the close of the fiscal year for public entities or political subdivisions of the state whose audits are conducted by a county grand jury.

Ch. 140 (AB 2140) Kuehl. Crimes: consumer products: prohibited writings.

Existing law prohibits tampering with food, drink, medicine, pharmaceutical products, or the public water supply. Existing law also prohibits tampering with a coin-operated machine, a public utility, or a computer system, and defacing public property.

This bill would make it a misdemeanor to stamp, print, place, or insert any writing, as defined, in or on any product or box, package, or other container containing a consumer product offered for sale, without the consent of the owner or manager of the premises where the product is stored or sold, or of the product manufacturer or authorized distributor or retailer of the product. Because the bill would create a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 141 (AB 2298) Cunneen. Children's hospitals.

Existing law requires the governing body of each county or counties, except for those counties that contract with the state for health services, to establish a community child health and disability prevention program plan for the purpose of providing early and periodic assessments of the health status of children in the county and in order to make referrals for diagnosis and treatment when needed.

Existing law requires the State Department of Health Services to distribute funds to children's hospitals, as defined, that, among other things, perform services upon referral by a Child Health and Disability Prevention program provider.

This bill would revise the definition of children's hospital to clarify that the Children's Hospital at Stanford, Palo Alto is the Lucile Salter Packard Children's Hospital and Medical Center.

Ch. 142 (AB 2608) Morrissey. Dependent children.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, except as provided, whenever a minor is removed from a parent's or guardian's custody, the juvenile court is required to order the provision of family reunification services. However, reunification services need not be provided to a parent or guardian when the court finds certain conditions by clear and convincing evidence, including where a minor has been removed for additional abuse, following a previous removal and return to a parent's or guardian's custody, except if the jurisdiction of the juvenile court has been dismissed prior to the additional abuse.

This bill would eliminate the latter exception.

Ch. 143 (AB 2651) Hawkins. Security officers.

Existing law establishes various categories of peace officers and other public officers, and specifies their duties and powers.

This bill would provide that a sheriff's security officer is a public officer, and not a peace officer, employed by the sheriff of a county, whose primary duty is the security of locations or facilities as directed by the sheriff. These officers would have the authority to carry or possess a firearm, baton, and other safety equipment and weapons, as specified.

Ch. 144 (AB 2766) Poochigian. Irrigation districts.

The Irrigation District Law governs the sale of property that is included within an irrigation district for delinquent assessments. That law authorizes, among other things, after a collector's deed has been delivered to the district, the redemption of that property upon the payment of specified charges or the sale of the property at a public auction if the property is not redeemed.

This bill would also authorize the sale of unredeemed property at a public auction if one installment of a delinquent assessment has been delivered to the district, and would authorize the board of a district to establish a minimum sale price for that sale that includes certain prescribed costs. The bill would, for the purposes of a redemption of property after a collector's deed has been delivered to the district, require the payment of additional charges, including the costs incurred in connection with recording the certificates of sale and redemption, the costs of publication of notice incurred in connection with the delinquency, and, unless otherwise waived by the district, other costs incurred in connection with the preparation for a proposed sale of property.

Ch. 145 (AB 2958) Harvey. Contractors: unlicensed activity: statutes of limitation.

The Contractors' State License Law provides that it is a misdemeanor for any person to engage in the business or act in the capacity of a contractor without having a license. A prosecution for a violation must be commenced within 3 years of the date of the contract, completion, or abandonment of the work, as specified. Existing law also provides for administrative citations to be issued by the Contractors' State License Board, within 3 years of the act or omission that is the basis for the citation.

This bill would extend the period of time within which prosecutions may be commenced or administrative citations issued from 3 to 4 years. The bill would also provide that this statute of limitation applies to prosecution of bid activity by an unlicensed contractor.

Ch. 146 (AB 3001) Napolitano. Evidence: business records.

(1) Existing law requires business records produced pursuant to a subpoena duces tecum and by a business that is neither a party nor the place where any cause of action is alleged to have arisen to be accompanied by the affidavit of the custodian or other qualified witness, stating prescribed items.

This bill would require the affidavit to include identity of the records and a description of the mode of preparation of the records.

(2) Existing law provides that a copy of business records is admissible in evidence if certain requirements are met, including the requirement that the originals would be admissible if the custodian had been present and testified to the matters in the affidavit.

This bill would revise that requirement to include situations where the original would be admissible if another qualified witness had been present and so testified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 147 (AB 3035) B. Thompson. Transportation: North San Diego County Transit Development Board.

Existing law creates and prescribes the powers and duties of the North San Diego County Transit Development Board, including doing anything necessary to carry out its prescribed purposes.

This bill specifies that doing anything necessary to carry out the board's prescribed purposes includes the adopting of ordinances and regulations pertaining to the use, operation, and maintenance of its property and facilities, including its public transit systems and related facilities within its area of jurisdiction and those areas beyond the board's jurisdiction served by the board pursuant to a contract or a memorandum of understanding with another transit agency.

Ch. 148 (AB 3097) Campbell. Health: local agency joint powers agreement.

Existing law requires counties to provide or secure certain public health care services, and authorizes the formation of local health care districts and the establishment of municipal hospitals for the purpose of providing needed public health care services.

Existing law, the Joint Exercise of Powers Act, permits 2 or more public agencies to enter an agreement to jointly exercise any power common to the contracting parties.

This bill would provide that, notwithstanding the law relating to joint exercise of powers, a private, nonprofit hospital in a county of the 9th class may enter into joint powers agreements with a public agency.

The bill would also state the finding and declaration of the Legislature that a special law is necessary and that a general law cannot be made applicable.

Ch. 149 (AB 3265) Gallegos. Osteopathic physicians and surgeons: diversion program.

Existing law authorizes the Osteopathic Medical Board of California to establish diversion evaluation committees to evaluate licensees who request participation in a diversion treatment program for drug or alcohol abuse, and requires the board to establish criteria for the acceptance, denial, or termination of participants in the diversion program.

This bill would add provisions regarding the methods by which a person may participate in the diversion program, and would provide, among other things, that neither acceptance nor participation in the diversion program precludes the board from investigating or disciplining a participant for unprofessional conduct.

Existing law provides for the confidentiality of all board and committee records of proceedings regarding treatment of a participant in the diversion program except in the case of a criminal proceeding.

This bill would also provide an exception to the requirement of confidentiality of the records if a participant withdraws or is terminated from the diversion program at a time when the diversion evaluation committee determines that he or she presents a threat to the public health and safety, and the bill would require each participant to sign an agreement of understanding regarding this exception.

Ch. 150 (SB 195) Costa. Sexual harassment.

Existing law provides that a person is liable in a cause of action for sexual harassment when the plaintiff proves, among other things, that there is a business, service, or professional relationship between the plaintiff and the defendant. Existing law enumerates various relationships to which this provision may apply, including the relationships between psychotherapist and patient, marriage, family, or child counselor and client, and licensed clinical social worker and client. This provision is also applicable to relationships that are substantially similar to the ones that are specifically enumerated.

This bill would delete the references to marriage, family, or child counselor and licensed clinical social worker, and would instead reference a definition of psychotherapist that includes those professionals as well as other healing art practitioners.

Ch. 151 (SB 237) Lewis. California Interscholastic Federation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the State Department of Education (department) to exercise general supervision over the course of physical education in elementary and secondary schools of the state, as specified. Existing law describes the California Interscholastic Federation (CIF) as a voluntary organization consisting of school and school-related personnel with the responsibility for administering interscholastic athletic activities in secondary schools and sets forth legislative intent that the CIF, in consultation with the department, implement certain policies. Existing law further sets forth the authority of the department over interscholastic activities. All these provisions of existing law become inoperative on July 1, 1997, and as January 1, 1998, are repealed.

This bill would instead make those provisions inoperative on January 1, 2001, and would repeal those provisions as of January 1, 2001, and would make conforming changes to related provisions of law. The bill would require the department to work with the CIF and other interested organizations to review issues surrounding the current definition of interscholastic athletics and a specified proposal and to report to the Legislature by January 1, 1997, as to whether statutory amendments regarding that definition are necessary.

This bill would also require the CIF to make reports to the Legislature on or before January 1, 1999, on interscholastic athletics, as specified.

Ch. 152 (SB 577) Rosenthal. Seismic safety: seismic gas shutoff devices: water heaters.

Existing law relating to state building standards and seismic safety requires the installation of earthquake sensitive gas shutoff valves in specified buildings, and generally regulates the manufacture and sale of these valves. Existing law requires the State Architect to adopt standards governing earthquake sensitive gas shutoff valves for installation in buildings, on or before a specified date, and to establish a certification procedure for and to certify seismic gas shutoff valves, as specified. Existing law also requires new seismic gas shutoff valves sold on or after a specified date to be certified prior to sale by the State Architect. Existing law further requires all new and replacement water heaters sold in California after a specified date and all existing water heaters to be braced, anchored, or strapped to resist falling or horizontal displacement due to earthquake motion, as specified.

This bill would replace references to earthquake sensitive or seismic gas shutoff valves with the term earthquake sensitive or seismic gas shutoff devices and delete the above references to specified dates. The bill would require the State Architect to certify specified gas shutoff devices, as defined, that are activated by phenomena other than motion. The bill would except from its definition of "seismic gas shutoff device" any device installed on a gas distribution system owned or operated by a public utility. In addition, this bill would revise the bracing requirements for water heaters to apply to all new and replacement water heaters, and all existing residential water heaters, and would require any water heater to be secured in accordance with the California Plumbing Code, or modifications made thereto by a city, county, or city and county pursuant to a specified provision of existing law. Because violation of these provisions relating to earthquake protection is punishable as a misdemeanor, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill also would make technical and organizational changes to these provisions.

The bill also would declare that it is to take effect immediately as an urgency statute.

Ch. 153 (SB 659) Wright. Mental health.

Existing law requires the State Department of Mental Health, until December 31, 1996, to contract with one or more counties for county demonstration projects to develop and implement the model adult and senior county interagency mental health system.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete that program and would establish the Adult and Older Adult Mental Health System of Care Act. The provisions would be implemented only to the extent that funds are appropriated in the Budget Act.

Ch. 154 (SB 805) Monteith. Commission on State Mandates.

Existing law creates the Commission on State Mandates, consisting of 5 members, including a public member appointed by the Governor and approved by the Senate. Existing law specifies that the public member shall serve a 4-year term subject to renewal and receive a specified per diem allowance.

This bill would expand the membership of the board to 7 members by providing for the appointment by the Governor and approval by the Senate of 2 additional members, who would be 2 of the following: a city council member, a member of a county or city and county board of supervisors, or a governing board member of a school district. It would specify that those members shall also serve a 4-year term subject to renewal and receive the per diem allowance.

Ch. 155 (SB 842) Committee on Criminal Procedure. Senate Committee on Criminal Procedure.

The Temporary Standing Rules of the Senate for the 1995–96 Regular Session set out the standing committees of the Senate and specify those areas of law assigned to each committee. The Senate Committee on Criminal Procedure is assigned bills amending the Evidence Code, the Penal Code, and statutes of a penal nature, and those bills relating to the Youth and Adult Corrections Agency. Previously, under the Temporary Standing Rules of the Senate for the 1994–95 Regular Session, these bills were assigned to the Senate Judiciary Committee.

This bill would revise various relevant statutes to reflect the current jurisdiction of the Senate Judiciary Committee and the creation of the Senate Committee on Criminal Procedure.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 156 (SB 864) Craven. Local government finance.

(1) Under existing law, the legislative body of a local agency having money in a sinking fund of, or surplus money in, its treasury not required for the immediate necessity of the local agency, may invest the funds in any of several specified investments, including repurchase agreements and reverse repurchase agreements that are made with primary dealers of the Federal Reserve Bank of New York, and shares of beneficial interest issued by diversified management companies. If a county or city and county chooses to invest surplus funds, the board of supervisors is required to establish a county treasury oversight committee with a specified membership and duties.

This bill would specify that restrictions on campaign contributions by the employer of a member of an oversight committee include the period during which the employee is a member of the committee. The bill would also expand restrictions on campaign contribution activities by a member of an oversight committee to include raising funds for a candidate for local treasurer or the governing board of any local agency that has deposited funds in the county treasury. The bill would also delete the requirement that investments in repurchase agreements may only be made with primary dealers of the Federal Reserve Bank of New York. The bill would also revise and recast the conditions under which investments may be made in shares of beneficial interest and would increase the percentage of an agency's surplus funds that may be invested in this type of investment from 15% to 20%.

(2) Existing law requires a local agency treasurer or chief fiscal officer to render a quarterly financial report regarding investments to the chief executive officer, the internal auditor, and the legislative body. If a local agency has placed all of its investments in the Local Agency Investment Fund, Federal Deposit Insurance Corporation-issued accounts in a bank or savings and loan association, a county investment pool, or a combination of these investments, the treasurer or chief fiscal officer may instead supply the most recent statement received from the institution.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would instead provide that the exception to the requirement that a quarterly report be rendered would apply for local agency investments that have been placed in any of these institutions.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 157 (SB 1624) Craven. Mobilehomes.

The existing Mobilehome Residency Law prohibits a homeowner of a mobilehome from being charged a fee for a guest who does not stay with the homeowner for more than a prescribed period.

Under the law, a senior mobilehome owner, as defined, may share his or her mobilehome with any person over 18 years of age if that person is providing live-in health care or supportive care to the homeowner pursuant to a written treatment plan prepared by the homeowner's physician and surgeon.

The law prohibits a homeowner from being charged a fee based on the number of members in his or her immediate family, as defined.

This bill would authorize a senior mobilehome owner who is living in a mobilehome park reserved for older persons, as described, to share his or her mobilehome with any person over 18 years of age if that person is a parent, sibling, child, or grandchild of the senior homeowner and requires live-in health care, live-in supportive care, or supervision pursuant to a written treatment plan prepared by a physician and surgeon. The bill would prohibit management from charging a fee for this person and would provide, among other things, that this person shall have no rights of tenancy in the park and that management shall not be required to manage, supervise, or provide for the person's care. The bill also would provide that this person shall comply with the rules and regulations of the mobilehome park and a violation of those rules and regulations by that person shall be deemed a violation thereof by the homeowner pursuant to existing provisions of law.

Ch. 158 (SB 1738) Wright. Nursing: nurse-midwives.

Existing law provides for the licensure and regulation of the practice of nurse-midwifery and provides that a nurse-midwife is not authorized to practice medicine and surgery by the provisions of this chapter.

This bill would provide that the certificate to practice nurse-midwifery authorizes the holder to perform and repair episiotomies, and to repair first-degree and second-degree lacerations of the perineum, in a licensed acute care hospital and a licensed alternate birth center, if certain conditions are met, including that these procedures be performed pursuant to protocols approved by various individuals.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 159 (SB 1932) Johnston. Courts: San Joaquin County.

Existing law provides for the superior and municipal courts in San Joaquin County.

This bill would authorize the Board of Supervisors of San Joaquin County to consolidate the court security functions and service of process and notice functions for the superior and municipal courts within San Joaquin County, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 160 (AB 3116) Brulte. County correctional facilities.

Existing law contains various bond acts for the construction of local correctional facilities.

This bill would enact the Youthful and Adult Offender Local Facilities Bond Act of 1996 which, if adopted, would authorize, for purposes of constructing, renovating, remodeling, or replacement of county juvenile and adult correctional facilities, the issuance of $700,000,000 in bonds pursuant to the State General Obligation Bond Law.

The bill would provide for submission of the bond act to the voters at the November 5, 1996, general election in accordance with specified law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 161 (SB 852) Rogers. Veterans' Bond Act of 1996.

This bill would enact the Veterans' Bond Act of 1996 which, if adopted, would authorize, for purposes of financing a specified program of farm, home, and mobilehome purchase assistance for veterans, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of $400,000,000. The act would recast certain provisions applicable to all veterans farm and home purchase bond acts relating to the transfer of funds to the General Fund for the payment of debt service, as defined, and would authorize refunding, pursuant to the State General Obligation Bond Laws, of bonds issued or sold under prescribed veterans bond acts.

The bill would provide for submission of the act to the voters at the November 1996, general election in accordance with specified law.

Pursuant to existing law, the express statutory authority establishing the Veterans' Finance Committee of 1943 was repealed.

This bill would reenact this provision and would ratify the acts of the committee.

This bill would provide that bonds to provide farm and home aid for veterans in accordance with the Veteran's Farm and Home Purchase Act of 1974, may be sold by negotiated sale by the Treasurer with the approval of the Veterans' Finance Committee of 1943.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 162 (SB 1393) M. Thompson. 1996-97 Budget. [1]

This bill would make appropriations for support of state government for the 1996-97 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 163 (SB 1777) O'Connell. Education: class size reduction.

(1) Under existing law, the Morgan-Hart Class Size Reduction Act of 1989, any school district that maintains any of grades 9 to 12, inclusive, may apply to the Superintendent of Public Instruction for an apportionment to implement a program to reduce class size in those grades.

This bill would create the Class Size Reduction Program to provide funding to school districts to reduce class size in kindergarten and grades 1 to 3, inclusive, to no more than 20 pupils per certificated teacher. The bill would require that the Superintendent of Public Instruction apportion to each applicant school district an amount equal to $650 per each pupil enrolled in classes participating in the program, as specified, for class size reduction, provided the school district certifies that it has met certain requirements. The bill would require the Superintendent to apportion $325 per each pupil enrolled in classes participating in the program for reimbursement for any class in kindergarten or any of grades 1 to 3, inclusive, that is reduced, as specified, for at least half of the instructional minutes offered per day. The bill would provide that the number of pupils for which a school district may claim funding shall not exceed 20 per certificated teacher providing direct instructional services to those pupils. The bill would provide that class size shall be determined in the same manner that class size is determined when computing apportionments and allowances from the State School Fund, as specified.

This bill would require the State Department of Education to contract for an independent evaluation of the Class Size Reduction Program to be completed on or before March 28, 2002. The bill would require that the report be submitted to specified fiscal and policy committee chairpersons in each house of the Legislature and to the Governor and Director of Finance no later than March 28, 2002.

(2) Under existing law, the governing board of a school district or a county board of education may request the State Board of Education to waive all or part of any section of the Education Code or any regulation adopted by the State Board of Education that implements the Education Code, except certain listed provisions.

This bill would provide that the State Board of Education may not waive the Class Size Reduction Program in kindergarten and grades 1 to 3, inclusive.

(3) This bill would appropriate $771,000,000 to the Superintendent of Public Instruction for the exclusive purpose of allocating funds to school districts pursuant to the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Class Size Reduction Program. The bill would require that the appropriation be included in the amounts appropriated by the state in the 1996–97 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that fiscal year.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 164 (SB 1789) Greene. School facilities: class size reduction facilities funding.

(1) Existing law provides for the acquisition and construction, or reconstruction or modernization, of public school facilities by the state and the lease-purchase of those facilities by school districts pursuant to the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (the Greene Act); establishes a program for the acquisition of portable classrooms known as the State Relocatable Classroom Law of 1979; authorizes local government entities to propose to the electors therein that bonds of the entity be issued and sold for school facilities purposes; authorizes the creation of community facilities districts to finance the acquisition of elementary and secondary schoolsites and structures; and authorizes school districts to impose limited fees upon residential and commercial development projects for the construction or reconstruction of school facilities.

This bill would establish the Class Size Reduction Facilities Funding Program for the purpose of assisting school districts with the facilities-related costs associated with reducing class size in kindergarten and grades 1 to 3, inclusive, pursuant to a specified Class Size Reduction Program. The bill would express findings and declarations of the Legislature with respect to the financial consequences of the transition to smaller class sizes under the program.

This bill would require the Superintendent of Public Instruction to develop an application for funding under this bill by August 1, 1996, and would require school districts to submit an application for funding to the Superintendent of Public Instruction by October 1, 1996. The bill would require that a school district application include certifications by the governing board of the school district of the number of new classes that will be established by the school district in each affected grade. The bill would also require a school district application to include certification by the governing board of the school district that the school district is qualified for new construction funding under the Greene Act or that the school district has insufficient space to house all the new classes that need to be established to participate under the Class Size Reduction Program. The bill would specify calculations, relating to the number of new teaching stations that would need to be established by the school district in order to reduce class sizes pursuant to the Class Size Reduction Program, that would be required of a school district that seeks to qualify for funding under the act but does not qualify for construction funding under the Greene Act.

This bill would provide that the Class Size Reduction Facilities Funding Program would become inoperative on June 30, 1999, and as of January 1, 2000, would be repealed, unless a later enacted statute, which becomes effective on or before January 1, 2000, deletes or extends the dates on which these provisions become inoperative and are repealed.

(2) Under existing law, the Greene Act, the State Allocation Board is required to provide for the manner of determining the area of adequate school construction in a school district at the time the district is applying for funding under the Greene Act. Existing law provides that the area of adequate school construction existing in an applicant school district does not include, among other things, the portable classrooms made available to the district under the State Relocatable Classroom Law of 1979.

This bill would exclude from the area of adequate school construction existing in an applicant school district any classroom acquired or constructed and continuously used by the district primarily for the purpose of reducing class size in kindergarten and any of grades 1 to 3, inclusive, pursuant to the school district's participation in the Class Size Reduction Program in kindergarten and grades 1 to 3, inclusive.

(3) Under existing law, the Greene Act provides that no project shall be approved, the building area of which, when added to the area of adequate school construction existing

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

in the applicant school district at the time of the application will provide a total area of school building construction per unit of estimated average daily attendance in excess of that amount computed in accordance with specified provisions.

This bill would provide that pupils housed in any classroom acquired or constructed primarily for the purposes of reducing class size in grades 1 to 3, inclusive, pursuant to participation in the Class Size Reduction Program shall not be considered in determining or estimating the average daily attendance of the district.

(4) Section 8 of Article XVI of the California Constitution requires that the moneys applied by the state for the support of school districts and community colleges shall not be less than a specified percentage of General Fund revenues.

This bill would appropriate, without regard to fiscal year, $200,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts for the purposes of the Class Size Reduction Facilities Funding Program. From this sum, the Superintendent of Public Instruction would apportion to each applicant school district $25,000 for each additional teaching station that needs to be established for the purposes of class size reduction that cannot be housed in existing teaching stations, as specified. The bill would require that appropriation to be included in the amount appropriated by the state in the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that fiscal year.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 165 (SB 1861) Johnson. Redevelopment: Tustin Marine Corps Air Station.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of a redevelopment project area located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission.

This bill would add to the Community Redevelopment Law provisions authorizing the establishment of a redevelopment project for the territory occupied by the Tustin Marine Corps Air Station. The bill would specify the purposes and the general location of the authorized project area, and the conditions within the project area that would constitute blight. The bill also would authorize the redevelopment project area to include lands, not to exceed a specified area, contiguous with the air station if those lands meet existing prerequisites for the establishment of a project area and would prohibit a redevelopment agency from acquiring by condemnation any lands in that area contiguous to the air station.

The bill also would require the redevelopment agency of the project area to take specified actions with respect to the redevelopment project's fiscal affairs, would modify the application of the Community Redevelopment Law to the project relating to requirements for the deposit of funds into the Low- and Moderate-Income Housing Fund, would exempt the project from other specified requirements of the Community Redevelopment Law, and would specify that these provisions shall not apply to the requirement that tax increment revenues attributable to the property that is located outside the military base be allocated to the Low- and Moderate-Income Housing Fund.

Under existing law, every redevelopment plan submitted by a redevelopment agency to the legislative body thereof is required to be accompanied by a report containing specified information including an environmental impact report on any project that the agency intends to carry out or approve which may have a significant effect on the environment pursuant to the California Environmental Quality Act (CEQA).

This bill would exempt a redevelopment plan prepared pursuant to this bill from those provisions if the redevelopment agency determines at a public hearing, as specified, that the need to adopt a redevelopment plan at the soonest possible time requires the agency to delay application of the provisions of CEQA to the redevelopment plan. The bill would provide that if the redevelopment agency finds that the application of CEQA to the redevelopment plan is required to be delayed, the redevelopment agency is required to certify an environmental impact report for the redevelopment plan within a specified period of time following the effective date of the ordinance adopting the redevelopment plan. The bill also would provide that if, as a result of the preparation of the environmental document prepared pursuant to these provisions, it is necessary to amend

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the redevelopment plan to mitigate any impacts, the agency would be required to amend the redevelopment plan, as specified. The bill further would provide that if the environmental document is determined to be inadequate, the redevelopment agency shall not continue with projects that implement the redevelopment plan until an adequate environmental document has been certified. This determination, according to the bill, would not affect the validity of the redevelopment plan. The bill additionally would provide that until the redevelopment agency, or the community, certifies an environmental impact report for the redevelopment plan, all projects, as defined in CEQA, that implement the redevelopment plan would be subject to CEQA, including, but not limited to, specific plans and rezonings. The bill also would require the environmental document for any implementing project to include an analysis and mitigation of potential cumulative impacts, if any, that otherwise would not be known until an environmental document for the redevelopment plan is certified or approved and to include a reporting or monitoring program required pursuant to specified provisions of CEQA.

Existing law permits a redevelopment agency, under specified circumstances, to pay all or a part of the costs of land, or the installation and construction of any structure or other improvement that is publicly owned within or outside of a project area.

This bill would prohibit a redevelopment agency from providing any form of direct or indirect assistance to a development or business for the purpose of establishing, improving, or maintaining a gambling enterprise of any kind, as specified, other than the California State Lottery, but would provide that the prohibition is not intended to prohibit a redevelopment agency from acquiring property on or in which a gambling enterprise is located, for the purpose of selling or leasing the property for uses other than gambling, if the agency acquires the property for fair market value.

This bill would declare that, due to the unique circumstances relating to the closure of the Tustin Marine Corps Air Station, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 166 (SB 846) M. Thompson. Public resources: watershed management: Napa Resource Conservation District: income and bank and corporation tax credits: habitat restoration and improvement projects.

(1) Under existing law that requires specified agreements with the Department of Fish and Game to protect fish and wildlife resources, for any project that involves routine maintenance and operation of water supply, drainage, flood control, or waste treatment and disposal facilities, notice to, and agreement with, the department is not required subsequent to the initial notification and agreement unless the work as described in the agreement is substantially changed or conditions affecting fish and wildlife resources substantially change and the resources are adversely affected by the activity conducted under the agreement.

This bill would also authorize the department to enter into agreements for projects in the Napa River watershed in accordance with a watershed management plan developed by the Napa Resource Conservation District and would not require notice and agreement for a project subsequent to the initial notification and agreement, unless the work as described in the agreement is substantially changed, or conditions affecting fish and wildlife resources substantially change, and those resources are adversely affected by the activity conducted under the agreement.

(2) Existing law authorizes a resource conservation district to develop certain districtwide plans to address soil and related resource problems in the district. Existing law authorizes the directors of a district, among other things, to manage as agents of this state or any of its agencies, any soil conservation, water conservation, water distribution, flood control, erosion control, erosion prevention, or erosion stabilization project, within or adjacent to the district.

This bill would authorize the Napa Resource Conservation District to develop and implement a watershed management plan for the Napa River watershed, as prescribed, including the development of a form agreement that, if signed by an interested landowner, and submitted to and approved by the department, would be considered an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

agreement as described in paragraph (1), above. The bill would require the district, on or before January 1, 1998, to submit to the Senate Natural Resources and Wildlife Committee and the Assembly Water, Parks, and Wildlife Committee a report, as prescribed.

(3) The Personal Income Tax Law and the Bank and Corporation Tax Law provide a credit against the taxes imposed by those laws in an amount equal to 10% of the qualified costs paid or incurred by a taxpayer or partnership for salmon and steelhead trout habitat restoration and improvement projects, as specified, not to exceed an aggregate credit of $500,000 per year.

This bill would instead provide a credit in an amount equal to the lesser of 10% of the qualified costs paid or incurred by a taxpayer or partnership, as specified, or an amount determined by a specified formula. The bill would limit the credit amount that may be granted with respect to any taxable or income year to any taxpayer or partnership to $50,000.

This bill would also, as specified, revise certain of those conditions that must be certified to exist by the Department of Fish and Game for the granting of the credit and revise the duties of a taxpayer or partnership in obtaining the credit.

Ch. 167 (SB 1705) Lewis. Life insurers: funding agreements: separate accounts.

Existing law provides for the liquidation or rehabilitation of insurers by the Insurance Commissioner, and specifies that claims allowed in those proceedings shall be given an order of preference. Under existing law, claims having preference by the laws of the United States or this state are under the 4th order of preference.

This bill would include claims having preference by the laws of the United States under a 6th order of preference.

Existing law provides that under the 5th order of preference are included all claims under insurance and annuity policies and contracts, including funding agreements, of an insolvent insurer that are not covered claims. Existing law provides that any valid and allowed claim against the general account for contractual benefits under an obligation authorized by an admitted life insurer, as specified, shall be included as a claim under the above preference.

This bill would also include under the above preference, a claim under an obligation authorized with reference to provisions dealing with modified guaranteed annuities that cannot be satisfied out of a separate account, as specified.

This bill would clarify existing legislative intent relating to various funding agreements. The bill would declare that specified provisions are severable.

This bill would make technical, nonsubstantive changes to existing law.

Ch. 168 (SB 1950) Mello. State Bar: first-year law student's examination.

Existing law regulating admission to the practice of law provides that a first-year law student attending a nonaccredited law school must pass an examination and may not receive credit for the first year or subsequent years of study until he or she has passed the examination, subject to limited exceptions. The examination is given by the examining committee established by the Board of Governors of the State Bar of California.

This bill would provide that those who pass the examination within its first 3 administrations upon becoming eligible to take the examination shall receive credit for all law studies completed to the time the examination is passed, and those who do not pass within that time but who subsequently pass shall receive credit for one year of legal study only.

The bill would also delete outdated provisions.

Ch. 169 (SB 2111) Beverly. Publicly owned utilities for furnishing water service: sale or lease.

Existing law sets forth procedures by which a municipal corporation may lease, sell, or transfer a public utility owned and operated by it for furnishing water service.

This bill would revise these procedures and include the requirement for a public hearing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 170 (AB 3499) Pringle. Bank and corporation taxes: rates: budget implementation.

The Bank and Corporation Tax Law provides that for calendar or fiscal years ending in 1987 or thereafter, corporations other than financial corporations shall annually pay to the state a franchise or income tax computed at the rate of 9.3%.

This bill would provide that for any income year beginning on or after January 1, 1997, the franchise or income tax rate shall be 8.84%.

The Bank and Corporation Tax Law provides for the levy of an alternative minimum tax in conformity with federal law, subject to certain modifications that include a tentative minimum tax. The Bank and Corporation Tax Law imposes a tentative minimum tax rate of 7%.

This bill would reduce that tentative minimum tax rate to 6.65% for income years beginning on or after January 1, 1997.

This bill would take effect immediately as a tax levy.

Ch. 171 (SB 713) Maddy. Property taxation.

Existing property tax law with respect to supplemental tax assessments authorizes an eligible county to recover its costs of administering the supplemental roll. Existing law requires the State Board of Equalization to certify a county as an eligible county only if (1) the county's average assessment level is at 95% of the required assessment level determined by the board's most recent survey of that county, and (2) the sum of the differences from that assessment level does not exceed 7.5% of the total required assessed value of that county as determined by the same survey.

This bill would, for purposes of for the first of these criteria, require the board survey to be the board's most recent survey commenced on or after January 1, 1987, and would apply the 2nd of these criteria commencing with the 1996–97 fiscal year. This bill would also make technical, clarifying changes with respect to the certification of a county as an eligible county.

Existing property tax law defines a possessory interest for purposes of taxation.

This bill would make a technical, nonsubstantive change to that definition.

Existing property tax law establishes a rebuttable presumption affecting the burden of proof in favor of a taxpayer or assessee who has supplied the assessor with all information as required by law in any administrative hearing involving any of certain specified assessment matters, including the appeal of an escape assessment. Existing law provides that this presumption does not apply in the case of an administrative hearing with respect to the appeal of an escape assessment resulting from a taxpayer's failure to file a change in ownership statement, business property statement, or permit for new construction.

This bill would instead provide that the presumption does not apply in the case of an administrative hearing with respect to the appeal of an escape assessment resulting from a taxpayer's failure either to file a change in ownership statement or business property statement, or to obtain a permit for new construction.

Existing property tax law excuses a holder of a possessory interest in real property owned by a state or local government entity from filing a preliminary change in ownership report or change in ownership statement with respect to a renewal of that interest. Existing law requires the local governmental entity that is the fee owner of the real property in which the possessory interest has been created to file any report or statement as may be required with respect to the renewal of that interest.

This bill would, as an alternative to complying with this filing requirement, allow a local governmental entity to annually file with the county assessor a real property usage report, containing specified information.

Existing property tax law limits the number of assessment appeals boards created within any county to 10.

This bill would reduce this limit from 10 to 5 commencing January 1, 2005.

Existing property tax law provides, as specified, for the payment of escape assessments for prior fiscal years over a 4-year period.

This bill would require that interest at the rate of 0.75% per month be added to the outstanding balance of taxes due in the case in which the assessee was responsible in whole or in part for the error requiring an escape assessment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing property tax law generally provides for the payment of interest on property tax refunds at the greater of 3% or the county pool apportioned rate, as defined, but requires that interest be paid at the rate specified by statute prior to January 1, 1993, on any refund that became due and payable prior to March 1, 1993, and had not been refunded as of April 6, 1995.

This bill would make technical, clarifying changes to this requirement.

This bill would provide that amendments made by Chapter 498 of the Statutes of 1995 to a specified statute relating to the franchise tax on general corporations are declaratory of existing law.

This bill would incorporate additional changes in Section 5151 of the Revenue and Taxation Code proposed by AB 1668 of the 1995–96 Regular Session of the Legislature, to be operative only if AB 1668 and this bill are both enacted and become effective, as specified, and this bill is enacted last.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 172 (SB 1431) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 1996, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 173 (SB 1438) Kelley. County employees: hiring requirements.

Existing law requires that a criminal record be obtained for administrators and staff persons having contact with clients of various types of facilities licensed by the State Department of Social Services.

Certain provisions, which were repealed as of January 1, 1996, permitted Riverside County to require that specified prospective county employees be fingerprinted, and to use the fingerprints to obtain a record of criminal convictions for each prospective employee from an appropriate law enforcement agency. Among other things, those provisions specified conditions under which information obtained by the county could be used in making employment decisions, as specified.

This bill would reenact those provisions which were repealed as of January 1, 1996, but would make the provisions applicable to all counties. The bill would repeal these provisions on January 1, 2001.

Ch. 174 (SB 1522) Greene. Mediation services: confidentiality.

Under existing law, when persons agree to conduct and participate in a mediation for the purpose of compromising, settling, or resolving a civil dispute, anything said in the course of the mediation is not admissible in evidence nor subject to discovery, and all communications, negotiations, and settlement discussions by and between participants or mediators are confidential. If the testimony of a mediator is sought to be compelled in any civil action or proceeding regarding anything said in the course of a mediation, the court is required to award reasonable attorney's fees and costs to the mediator against the person seeking the testimony.

This bill would make these provisions applicable when a person consults a mediator or mediation service for the purpose of retaining mediation services.

Ch. 175 (SB 1572) Monteith. California State World Trade Commission: membership.

Existing law establishes the California State World Trade Commission, including specified appointed and ex officio, nonvoting members, in the Trade and Commerce Agency, for the promotion and development of international trade by the state.

This bill would include the Secretary of Food and Agriculture as an ex officio, nonvoting member of the commission.

Ch. 176 (SB 1599) Beverly. Commercial law: letters of credit.

Existing provisions of the Commercial Code govern letters of credit, and the relationship, rights, and duties of the parties that deal with letters of credit.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal these provisions and replace them with new provisions concerning that subject. Among other things, the new provisions recognize additional forms of letters of credit and the use of electronic media.

The bill would also make technical conforming changes to other related provisions.

Ch. 177 (SB 1631) Watson. Records.

(1) Former law, repealed on January 1, 1996, permitted the Los Angeles County Recorder, within 30 days of recordation of a deed, quitclaim deed, or deed of trust, to notify by mail the party or parties executing the document, and to require, as a condition of recording, that a deed, quitclaim deed, or deed of trust affecting real property within the County of Los Angeles to indicate the assessor's identification number that fully contains all, or a portion of, the real property described in the legal description, as specified.

This bill would reauthorize the Los Angeles County Recorder to provide that notice and to require the assessor's identification number for these purposes.

This bill would specify that following adoption of an authorizing resolution by the Los Angeles County Board of Supervisors, the Los Angeles County Recorder would be permitted to notify the party or parties executing the document, as specified.

This bill would require any contract entered into by the Los Angeles County Recorder for the processing, or the mailing, or both the processing and the mailing, of the notice to the parties executing the recordation of a deed, quitclaim deed, or deed of trust, to be awarded by competitive bid.

(2) Former law, repealed on January 1, 1996, permitted the Los Angeles County Recorder to collect a fee to cover the cost of mailing the notice when a deed, quitclaim deed, or deed of trust was filed with the recorder, not to exceed $10.

This bill would authorize the Los Angeles County Recorder to collect a fee for those purposes in an amount not to exceed $7.

(3) This bill would prohibit a county from being reimbursed for any costs incurred as a result of the changes made by these provisions.

Ch. 178 (SB 1650) Mello. Capacity.

Existing law provides that a determination that a person is of unsound mind or lacks the capacity to make a decision or do a certain act must be supported by evidence of a deficit in certain mental functions, as specified. Existing law also provides that a person has the capacity to give informed consent to a proposed medical treatment if the person is able to do certain specified things.

This bill would revise and recast these and other related provisions, and make related technical changes.

Existing law provides that if a court determines that there is no form of medical treatment for which a conservatee has the capacity to give an informed consent, the court shall, on petition of the conservator, give the conservator the power to require the conservatee to receive the treatment. Existing law requires an interview by a court investigator of the conservatee prior to the time the petition for an order is filed, in order to notify the conservatee that he or she has the right to object to the order.

This bill would instead require the interview to occur prior to the hearing on the petition.

Ch. 179 (SB 1815) Lewis. Insurers: investments.

Under existing law, a domestic admitted insurer, other than a domestic life insurer, may maintain its securities and moneys outside California with a qualified custodian, as specified. A qualified custodian may place the securities or moneys in a qualified subcustodian, as defined. A qualified subcustodian must meet requirements of net worth and shareholders' equity, among others. Qualified subcustodians may be located in this state, a reciprocal state, or outside the United States.

This bill would change certain net worth requirements in provisions relating to qualified subcustodians to shareholder equity requirements and would make related changes. The bill would also allow the Insurance Commissioner to consider other specified factors to determine if a qualified foreign subcustodian is financially secure.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also revise certain restrictions on placement of assets in qualified depositories.

Ch. 180 (SB 1871) Wright. Credit cards: disclosure.

Existing law requires a card issuer to furnish each cardholder with an annual statement of the amount of interest or finance charges which a cardholder paid during the preceding calendar year, as specified.

This bill would repeal that provision. The bill would instead authorize a cardholder to request information regarding the total amount of finance charges no more than once a year, and would require the card issuer to furnish the information without charge within 30 days of receiving the request, as specified.

Ch. 181 (SB 2047) Leslie. Insurance.

Existing law authorizes public entities to pool self-insured claims or losses among themselves, and provides that such a pooling arrangement shall not be considered insurance nor be subject to regulation under the Insurance Code. Existing law defines reinsurance as insurance of an insurer against loss or liability under original insurance of the insurer, but does not provide for reinsurance against losses of entities other than insurers.

This bill would provide that any liability or loss under a joint powers agreement of public entities for the pooling of self-insured claims or losses may be reinsured to the same extent and the same manner as insurance provided by an insurer.

Ch. 182 (SB 2092) Haynes. Open meetings.

Under existing law, the meetings of the legislative body of a local agency are required to be conducted openly and publicly, with specified exceptions.

This bill would provide that, notwithstanding that law, a legislative body of a local agency that provides health care services pursuant to specified contracts may hold a closed session to hear a charge or complaint from a member enrolled in its health plan, as specified, and would make a related change concerning agenda notice of the closed session.

Ch. 183 (SB 1595) Mountjoy. Commercial vehicles: driver's license endorsement.

Existing law requires the driver of a vehicle carrying hazardous materials that is required to display a placard or marking, pursuant to a specified provision of existing law, to have a commercial driver's license and obtain an endorsement issued by the Department of Motor Vehicles.

This bill would exempt from that endorsement requirement any person operating a vehicle transporting asphalt or coal tar pitch at a temperature that requires the display of a marking on the vehicle and that is described and classified by the United States Department of Transportation as "elevated temperature liquid n.o.s. Division 9."

Ch. 184 (SB 1607) Leslie. Architects: licensing.

The Architects Practice Act provides for licensing and regulation of persons engaged in the practice of architecture. The act is administered by the California Board of Architectural Examiners.

This bill would define "responsible control" by an architect, and would make conforming changes to incorporate that term into various provisions of the act. The bill would also make other changes in the act, including authorizing the board to suspend temporarily an architect's license for an indefinite period.

Existing law provides that a licensed architect may be disciplined for incompetence or recklessness in the construction or structural design of a building.

This bill would instead provide that a licensed architect may be disciplined for any incompetence or recklessness.

The bill also makes technical changes and deletes outdated provisions.

Ch. 185 (SB 1711) Calderon. Common interest developments: liability.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides personal immunity for volunteer officers and volunteer directors of an association that manages a residential common interest development, over and above prescribed insurance coverage, to persons suffering injury, as specified, as a result of a tortious act or omission of the volunteer officer and volunteer director if, among other requirements, the act or omission was performed within the scope of the officer's or director's association duties.

This bill would provide that, for purposes of the above described immunity, these association duties shall include any decision on whether to conduct an investigation of the common interest development for latent deficiencies prior to the expiration of the applicable statute of limitations and any decision on whether to commence a civil action against the builder for defects in design or construction. The bill would include a statement of legislative intent.

Ch. 186 (AB 2574) Bowler. Vehicles: dealer's licenses.

Existing law prohibits a person who holds a motor vehicle dealer's license from doing specified acts, including advertising the total price of a vehicle without including all costs to the purchaser at the time of sale, except taxes, vehicle registration fees, certificate of compliance or noncompliance fees not exceeding $35, finance charges, and any dealer document preparation charge. The dealer document preparation charge is prohibited from exceeding $35.

This bill would increase the dollar amounts specified above to $45.

Ch. 187 (AB 3137) Miller. Insurance: insurers: escheat.

Existing law provides that all property, as defined, distributable in the course of a voluntary or involuntary dissolution or liquidation of a business association that is unclaimed by the owner within 6 months after the date of final distribution or liquidation escheats to the state. Escheated property is administered by the Controller, with money and proceeds from the sale of property deposited in the Abandoned Property Account in the Unclaimed Property Fund, to be transferred on a regular basis to the General Fund, as specified.

This bill would provide for transfer to the Department of Insurance of all property distributable in the course of voluntary or involuntary dissolution or liquidation of an insurer, as specified, with any proceeds of sale of property or other funds to be deposited in the Insurance Fund for expenditure by the Insurance Commissioner to fund proceedings and to pay expenses on nonasseted estates for which liabilities have been or will be incurred.

This bill would also provide that insurance rebates ordered or negotiated pursuant to Proposition 103 would escheat to the state if an insurer, after a good faith effort, determined that the policyholder entitled to the rebate could not be located, as specified. This provision would be repealed upon a determination by the Insurance Commissioner that all Proposition 103 rebates have been paid or have escheated to the state, as specified. These funds would be deposited in the Insurance Fund, except as specified, and would be available for expenditure by the commissioner to repay a specified loan. The bill would state legislative intent.

The bill would allow a policyholder to file a claim for escheated funds that have been deposited in the Insurance Fund, as specified. The department would not be required to conduct outreach programs to locate policyholders.

Since this bill would affect the distribution of insurance rebates ordered or negotiated under Proposition 103, it would amend Proposition 103 and, thus, would require a $^2/_3$ vote for enactment.

Existing law provides for the examination of insurers and other persons by the commissioner in various instances, and authorizes the collection of the expense of the examination from the insurer or other person examined.

This bill would provide that the revenue raised from the examination of insurers and other persons in the 1996–97 fiscal year shall not exceed the examination fee revenue estimate for the 1996–97 Governor's Budget by more than $2,000,000.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 188 (SB 1472) Solis. Social services: county administration.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the state and each county share the administrative costs for implementation of various public social services programs.

Existing law provides that, until June 30, 1996, if county-imposed funding reductions prevent a county from fully funding the county share of the nonfederal administrative costs for these public social services programs, the reimbursements to counties for the state share of these costs shall not be reduced.

This bill would revise the conditions under which those reimbursements shall not be reduced to include circumstances when an application for relief for the 1995–96 fiscal year was approved and the level of relief of county match available was at least the amount specified in the application for the 1995–96 fiscal year, and would extend those provisions until June 30, 1997.

The bill would specify that its provisions would be operative on the date the Budget Act of 1996 is enacted.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 189 (SB 441) Johnston. Sacramento Ballpark Authority.

Existing law provides for the establishment of several different local governmental agencies.

This bill would, upon the adoption of a resolution by the affected jurisdictions, create a local agency known as the Sacramento Ballpark Authority with a specified membership that may include representatives appointed by the boards of supervisors of the Counties of El Dorado, Placer, Sacramento, San Joaquin, and Yolo that choose to join, and the City of Sacramento. The bill would require the authority, if created, to facilitate the construction and operation of a ballpark suitable for professional baseball in Sacramento. The bill would authorize the authority to issue revenue bonds and would prohibit the authority from receiving property tax revenues, levying taxes, as specified, or assessments, or issuing general obligation bonds. The bill would provide that the authority shall be terminated on or after January 1, 2007, under certain circumstances.

The bill would make legislative findings and declarations concerning the need for a special statute.

Ch. 190 (SB 1192) Polanco. Mental health plans.

Existing law requires the State Department of Mental Health to ensure that local managed mental health care plans meet specified requirements in the development of local managed mental health care plans.

Existing law also specifies that each county shall have the right of first refusal to serve as a local managed health care plan, and requires the State Department of Mental Health to ensure the services are provided if a county does not make that election.

This bill would recast those provisions to refer to mental health plans, and would delete the reference to local managed mental health plans.

Existing law provides for the allocation of state matching funds to participating counties for the provision of psychiatric services, and specifies the allocation method for state funds transferred for acute inpatient psychiatric services.

This bill would revise the allocation procedures for the 1994–95 fiscal year to include alternatives to hospital services as approved by participating small counties within the scope of those purposes for which the allocated funds may be used, and, by revising the use to which appropriated funds may be applied, this bill would result in an appropriation.

Existing law requires that the distribution of state matching funds transferred to the State Department of Mental Health for acute inpatient psychiatric services be based on specified principles, including the principle that funds be set aside for a self-insurance risk pool for small counties, as defined.

This bill would authorize the State Department of Mental Health to provide those funds directly to any management entity designated in writing by all counties participating in the self-insurance risk pool and would limit state obligations and liability with respect to funding and administration of funds for the self-insurance risk pool.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 191 (SB 1763) Committee on Budget and Fiscal Review. State government.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, until July 1, 1996, authorized the Department of Consumer Affairs, with agreement of the State Personnel Board, to waive specific civil service statutes, and required the department to design pilot alternative competitive examination, appointment, and discipline processes to achieve certain purposes.

This bill would reenact these provisions until July 1, 1997, except that the department would be required to design and implement alternative competitive examination, appointment, and discipline processes following a State Personnel Board hearing.

Existing law requires the Department of Finance to develop a performance budgeting pilot project in accordance with certain principles, and involving at least 4 departments, including the Stephen P. Teale Data Center, the Department of Parks and Recreation, the Department of General Services, and the Department of Consumer Affairs, or other departments substituted by the Department of Finance.

This bill would authorize the Department of General Services to enter into a performance budget contract that would include the authority, notwithstanding existing statutes and regulations, to contract for personal services comparable to state service, to waive provisions of the State Civil Service Act and provisions governing personnel administration, and to procure goods from the private sector even though the goods may be available through the Prison Industry Authority. The bill would also exempt state agencies from a requirement that all state printing be done in the Office of State Printing, as specified. These provisions would remain in effect until July 1, 1997, except for provisions relating to financial performance, which would remain in effect until January 1, 2000.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 192 (SB 1794) Wright. Personal income taxes: renter's credit: budget implementation.

The Personal Income Tax Law authorizes various credits against the taxes imposed by that law, including a refundable credit for qualified renters. A "qualified renter," generally, is an individual who was a resident of this state and who rented and occupied premises in this state as a principal residence during at least 50% of the taxable year.

This bill would suspend the renter's credit until January 1, 1997.

This bill would take effect immediately as a tax levy.

Ch. 193 (SB 1770) Johnston. State-owned property.

Existing law sets forth the duties of the Department of General Services in acquiring, developing, and disposing of state property. Existing law requires the department to prepare a list, to be known as the Surplus Property Inventory, of state-owned real property that is or will be unused or underutilized by the landholding agency both at present and in the foreseeable future as well as other specified surplus property, and to annually sell, lease, or exchange not less than 10% of properties identified in the inventory.

This bill would repeal this provision. It would require state agencies, when purchasing real property, to review the Surplus Property Inventory and purchase, lease, or trade property on that list, if possible, prior to purchasing property not on that list.

This bill would require the department to undertake and complete, by July 1, 1997, an environmental impact report governing the development of state offices and associated facilities on priority state-owned sites in the Capitol area, specifically facilities on specified blocks.

This bill would require the department to undertake and complete a comprehensive facilities plan for the consolidation of the Sacramento headquarters of specified state agencies as anchor tenants on specified blocks of the Capitol area, based on specified factors. It would require the department to submit the plan to the Legislature no later than July 1, 1997.

This bill would require the department to prepare a comprehensive regional plan for the acquisition of state office space within the Sacramento region that includes specified state agencies as anchor tenants in space that consolidates, to the extent feasible, those agencies' operations currently located within separate facilities. It would require the plan to establish priorities to develop and construct, or otherwise acquire, state building projects within the next 20 years, including identification of specified considerations. It

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

would require the department to submit the plan to the Legislature on or before July 1, 1997.

This bill would additionally authorize the department to sell, lease, exchange, or transfer specified state properties, subject to certain conditions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 194 (AB 2972) Olberg. Schools: transportation funding.

Existing law provides that each school district or county office of education shall receive a home-to-school transportation allowance in the amount received in the prior fiscal year, but in no event in excess of the prior year's approved home-to-school transportation costs, increased by the amount provided in the annual Budget Act. Existing law also provides for a home-to-school transportation allowance for school districts and county offices of education that provide transportation services by means of a joint powers agreement.

This bill would, for the 1996–97 fiscal year only, require the Superintendent of Public Instruction to provide a home-to-school transportation allowance of $3,012,000 to school districts and county offices of education that provide transportation services by means of a joint powers authority, in lieu of the amount otherwise authorized in existing law and in the provisions of this bill, if the joint powers authority meets specified conditions as of June 30, 1996.

This bill would provide that the home-to-school transportation allowance received by the Oakland Unified School District in the 1996–97 fiscal year and each fiscal year thereafter shall be computed as if the home-to-school transportation aid received by the district in the 1995–96 fiscal year was $2,500,000.

This bill would prescribe criteria for determining the eligibility of school districts for supplemental home-to-school transportation funds, if funds are specifically appropriated therefor. The bill would require the Superintendent of Public Instruction to apportion funds, when appropriated, to reimburse eligible school districts, as specified, for the unreimbursed cost of home-to-school transportation per unit of average daily attendance, as specified.

The bill would require the Superintendent of Public Instruction to apportion amounts appropriated in the Budget Act of 1996 for the purpose of home-to-school transportation funding equalization as established by this act and existing law, for the purpose of the 1996–97 home-to-school transportation allowance for school districts and county offices of education that provide transportation services by means of a joint powers authority, and for the purpose of the home-to-school transportation allowance provided to the Oakland Unified School District, as specified.

Ch. 195 (AB 3369) Bordonaro. Youthful offenders: Youth Authority.

(1) Existing law authorizes a court to commit to the Youth Authority any person convicted of a public offense who, among other things, is found to be under the age of 21 years at the time of apprehension. If a person under the age of 21 years is not committed to the authority pursuant to this provision, the Director of Corrections is authorized to transfer this person to the authority with the approval of the Director of the Youth Authority. Existing law requires that the duration of the transfer extend until any of specified acts occur, including the inmate reaching the age of 25 years.

This bill would reduce the age limit for authorizing a transfer of a person to the Youth Authority by the Director of Corrections to under 18 years, and would require the transfer to terminate when the inmate reaches 18 years of age, except as specified.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 196 (AB 3482) Davis. Education: Teacher Reading Instruction Development Program: Comprehensive Reading Leadership Program: Core Reading Program Instructional Materials.

(1) Existing law authorizes school districts to develop school development plans that include staff development activities directly related to annual school improvement objectives, as specified, and, among other things, to assist personnel to improve instructional practices in each subject and strengthen knowledge of subject matter.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would enact the Teacher Reading Instruction Development Program, which would effectuate legislative intent, expressed in the bill, that each certificated teacher of pupils enrolled in kindergarten and grades 1 to 3, inclusive, possess the knowledge and skills to effectively teach pupils to read. Under the Teacher Reading Instruction Development Program, a school district, in order to be eligible for funds under the program, would be required to certify to the State Department of Education that not less than 90% of its certificated employees who provide direct instructional services to pupils enrolled in kindergarten or any of grades 1 to 3, inclusive, have received inservice training in reading instruction that addresses specified issues.

This bill would also enact the Comprehensive Reading Leadership Program, which would effectuate legislative intent, expressed in the bill, with regard to the encouragement of members of governing boards of school districts, school administrators, and teachers identified by the governing board of the school district as having demonstrated leadership in reading instruction to implement a comprehensive reading program for kindergarten and grades 1 to 3, inclusive, that emphasizes basic reading skills and continued improvement of reading skills, as specified. Under the Comprehensive Reading Leadership Program, county offices of education would be authorized to apply to the State Board of Education with regard to proposed local reading leadership programs. From the applications received pursuant to this provision, the State Board of Education would designate a county office of education that has proposed a leadership program that, in the judgment of the board and in accordance with specified criteria, provide an effective leadership training program, as specified. Designated county offices of education would be eligible for funding under the bill for their reading leadership programs.

This bill would also enact a program relating to core reading program instructional materials, which would effectuate legislative intent that each pupil in kindergarten and grades 1 to 3, inclusive, be furnished with a complete set of core reading program instructional materials adopted by the State Board of Education in 1996. The bill would authorize school districts to apply to the State Board of Education for funding for the purchase of a complete set of core reading program instructional materials, in accordance with specified criteria.

(2) Section 8 of Article XVI of the California Constitution requires that the moneys applied by the state for the support of school districts and community colleges shall not be less than a specified percentage of General Fund revenues.

This bill would appropriate $152,000,000 from the General Fund to the State Department of Education, without regard to fiscal years, for the purpose of allocating funds to school districts for the purchase of core reading instructional materials. The bill would appropriate $13,000,000 from the General Fund to the State Department of Education, without regard to fiscal years, for the purposes of allocating funds to school districts for the provision of inservice training pursuant to the Teacher Reading Instruction Development Program. The bill would appropriate $2,000,000 from the General Fund to the State Board of Education, without regard to fiscal years, for allocation to county offices of education and school districts pursuant to the Comprehensive Reading Leadership Program.

This bill would specify that, for the purpose of making the computations required by Section 8 of Article XVI of the California Constitution, the funds appropriated by the bill would deemed to be "General Fund revenues appropriated to school districts," as defined, and included with the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined, for the 1995–96 fiscal year.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 197 (AB 3483) Friedman. Health.

Existing law creates an Emergency Medical Services Authority in the Health and Welfare Agency. It requires the authority to, among other things, provide technical assistance to agencies, counties, and cities for developing components of emergency medical services systems.

This bill would establish the Emergency Medical Services for Children Program within the authority, contingent upon available funding, and would authorize local emergency

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

medical service agencies to develop the program and, if so, to integrate an emergency medical services for children program component, as specified, into their emergency medical services plan. It would provide that no more than $120,000 per fiscal year shall be expended from the General Fund by the authority for the program. This bill would require the authority, among other things, on or before March 1, 2000, to produce a report for the Legislature describing any progress made on the implementation of the program.

Existing law, the California Safe Drinking Water Act, requires the State Department of Health Services to administer provisions relating to the regulation of drinking water and public water systems.

Existing law requires the department to assess fees to public water systems for specified costs and requires that the department submit an invoice to the water systems prior to September 1 of the fiscal year that the costs are incurred.

This bill would limit the application of this requirement to public water systems serving 1,000 or more service connections or treating water on behalf of one or more public water systems and would revise the invoice submission procedures.

Existing law continuously appropriates funds in the Safe Drinking Water Account for purposes of the California Safe Drinking Water Act.

This bill would delete the continuous appropriation and would provide for use of these funds for purposes of that act upon appropriation by the Legislature.

Existing law repeals these and related fiscal provisions on January 1, 1997.

This bill would, instead, repeal those provisions on January 1, 2002, and would extend total fee limitations indefinitely.

Existing law establishes the State Vital Record Improvement Account in the Health Statistics Special Fund for specified purposes, including the improvement and automating of vital records maintained by the State Registrar.

This bill would terminate that account, and would specify that funds in the account shall remain in the account for expenditure upon appropriation by the Legislature.

Existing law, effective until January 1, 1997, requires the imposition of various fees for certified copies of birth or death records, marriage records, marital dissolution records, and specifies that an additional fee of $2 shall be imposed for allocation to specified accounts for modernization and improvement of public record systems and collection of the data.

This bill would extend these requirements until January 1, 1999, but would require that a fee of up to $2 shall be imposed for that purpose and would make conforming changes in the allocations.

Existing law provides for the establishment and implementation of a program of benefits for persons with acquired traumatic brain injuries, and provides that program shall remain in effect until January 1, 1997.

This bill would extend the effective date of these provisions to January 1, 2000.

Existing law requires the Director of Health Services to establish and administer a program to provide drug treatments to persons infected with human immunodeficiency virus, to the extent funds are available, and to maintain a list of drugs to be provided under the program.

This bill would require manufacturers of the drugs to pay a 15% rebate to the department for each drug, based on the average wholesale cost of the drugs. It would permit the department to adopt emergency regulations to implement amendments to provisions relating to this program made during the 1996 portion of the 1995–96 Regular Session.

Existing law requires the Maternal and Child Health Branch of the State Department of Health Services to administer a comprehensive shelter-based services grant program for battered women.

This bill would define terms used in those provisions, would recast provisions for the implementation of the program to specify that the grants shall be administered pursuant to a request for application process, include grants for shelters that propose to maintain shelters previously granted funding, revise the schedule of areas or services for which the grants may be used, require the administration of grants to agencies to conduct demonstration projects to serve battered women that include new and innovative service approaches, revise the scope of the intent of the Legislature with respect to the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provision of services in underserved communities, and authorize the Director of Health Services to award additional grants to shelter-based agencies when it is determined that there exists a critical need for shelter or shelter-based services, revise matching fund requirements, and specify minimum training requirements for appropriate staff and volunteers having client contact.

Existing law requires the State Department of Developmental Services to enter into contracts with nonprofit entities to operate regional centers for the provision of services to persons with developmental disabilities, provides for initial intake and assessment services to determine the level of service for which an applicant is eligible, and requires that, if assessment is needed, it shall be performed within a certain time period.

This bill would revise the time period during which the assessment is required to be provided.

Existing law specifies the responsibilities of regional centers for the provision of services under a contract with the State Department of Developmental Services.

This bill would revise those responsibilities.

Existing law requires the State Department of Developmental Services to establish rates for payment of community living facilities for the provision of services to persons with developmental disabilities, and specifies that the cost of providing 24-hour care out-of-home nonmedical care and supervision in community care facilities shall be funded by the Aid to Families with Dependent Children (AFDC) program, in which counties participate financially.

This bill would specify that for the 1996–97 fiscal year, the rate schedule authorized by the department in operation June 30, 1996, shall be increased based on the amount appropriated in the Budget Act of 1996, and specifies that the increase be applied as a percentage for all contractors.

Existing law requires regional centers to submit, prior to August 1 of each year, to the State Department of Developmental Services and the State Council on Developmental Disabilities a program budget plan for the subsequent following year.

This bill would specify that regional centers shall not be subject to any law, regulation, or policy of state agencies pertaining to the planning and acquisition of information technology, and would require the State Department of Developmental Services to jointly develop guidelines with the Association of Regional Center Agencies for use by regional centers in the expenditure of funds for those information activities.

Existing law provides for the placement of certain individuals in various state hospitals for mental health treatment.

This bill would express the intent of the Legislature that persons placed for mental health treatment through criminal proceedings be placed at Atascadero State Hospital in the 1996–97 fiscal year, unless there are unique circumstances that would preclude the placement and that not more than 227 persons whose placement has been required by provisions of the Penal Code be placed in Metropolitan State Hospital in the 1996–97 fiscal year.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

This bill would revise eligibility requirements for Medi-Cal benefits for families who lose eligibility for AFDC benefits due to the reuniting of separated spouses, subject to federal financial participation.

Existing law provides for the determination of maximum allowable reimbursement rates for Medi-Cal drug treatment programs.

This bill would revise the method of calculating those maximum rates, and would require the State Department of Health Services to develop individual and group rates for extensive counseling for outpatient drug-free treatment according to limitations contained in the bill.

Existing law provides for the provision of Medi-Cal benefits through contracts between the State Department of Health Services and providers for managed care services.

This bill would, until July 1, 1997, exclude hospice benefits from the scope of Medi-Cal benefits provided through specified managed care programs where the department is contracting with prepaid health plans that are contracting with, governed, owned, or operated by a county health authority.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the State Department of Mental Health to implement managed mental health care for Medi-Cal beneficiaries through fee-for-service or capitated rate contracts negotiated with mental health plans, including counties, counties acting jointly, any qualified individual or organization, or a nongovernmental entity.

Existing law provides for the transfer of funding and responsibility for fee-for-service mental health services from Medi-Cal managed care plans to local mental health plans and for the allocation of state funds for acute inpatient psychiatric and other mental health services, as determined by the State Department of Mental Health, and requires the provision of those services on a capitated rate upon federal approval.

Under existing law, a qualifying county may elect, with the approval of the department, to operate under the requirements of a capitated, integrated service system field test in specified circumstances.

Existing law requires the transfer of state matching funds to the State Department of Mental Health for the remaining Medi-Cal fee-for-service mental health services and the state matching funds associated with field test counties, no later than July 1, 1996, upon agreement between the State Department of Mental Health and the State Department of Health Services.

This bill would change the date by which those remaining matching funds shall be transferred to the State Department of Mental Health from July 1, 1996, to July 1, 1997.

Existing law, until January 1, 1997, provides for the provision of drugs that are reimbursed through the Medi-Cal program without prior authorization when they are on an approved list of contract drugs, and, commencing January 1, 1997, those procedures would be revised to require the establishment of a drug formulary for prescribed drugs.

This bill would suspend until January 1, 1999, the operative date of those provisions applicable to the establishment of a drug formulary, would revise procedures for the placement of drugs on the list of contract drugs, would revise, and extend until January 1, 1999, requirements for reporting on treatment authorization requests to the Legislature, and would extend until January 1, 1999, those provisions for the use of a list of contract drugs for purposes of the Medi-Cal program.

Existing law, until January 1, 1997, requires the State Department of Health Services to report to the Legislature on the treatment authorization process.

This bill would extend the effective date of that requirement to January 1, 1997, and would require the Bureau of State Audits to prepare a report by January 1, 1998, on the drug program management techniques of the drug contracting program and the comparability of the program to other private sector third party payers.

Existing law, until January 1, 1997, authorizes the State Department of Health Services to enter into contracts with manufacturers of single-source and multiple-source drugs under the Medi-Cal program, and specifies procedures for the implementation of that authority.

This bill would extend that authority to January 1, 1999.

Existing law, until July 1, 1996, requires pharmaceutical manufacturers to provide the State Department of Health Services with a supplemental 10% rebate in addition to rebates pursuant to other provisions of law, less any state supplemental rebate provided under separate state agreements for each prescription drug reimbursed through the Medi-Cal program.

This bill would extend that requirement until January 1, 1997.

Existing law provides for targeted case management services under the Medi-Cal program, and authorizes local agencies to implement targeted case management services, establishes local government financial contribution for the coverage of services through the targeted case management program, and, for the 1994–95 and 1995–96 fiscal years, limits the contribution to $20,000,000.

This bill would revise the contribution requirements and would extend the contribution limit indefinitely.

Existing law provides that, to the extent required under federal law, a family who was receiving Aid to Families with Dependent Children (AFDC) program benefits in at least 3 of the 6 months prior to the month the family became ineligible for assistance due to specified reasons, shall remain eligible for Medi-Cal benefits during the succeeding 6-month period.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, instead, provide that during any period for which federal financial participation is obtained, to the extent required by federal law, a family who was receiving AFDC benefits in at least 3 of the 6 months immediately preceeding the month in which that family became ineligible for that assistance due to specified reasons, shall remain eligible for Medi-Cal benefits during the immediately succeeding 6-month period.

Existing law specifies that any aged, blind, or disabled person eligible for Medi-Cal benefits immediately prior to specified maximum aid payment reductions in benefits under the State Supplementary Program for the Aged, Blind and Disabled shall not be responsible for paying his or her share of cost for Medi-Cal benefits, if he or she had that Medi-Cal eligibility without a share of costs interrupted or terminated by the maximum aid payment reductions and if he or she, but for those reductions, would be eligible to continue receiving Medi-Cal benefits without a share of costs.

This bill would extend this provision to reductions made during the 1996 portion of the 1995–96 Regular Session.

Existing law, operative until July 1, 1996, and which would be repealed on January 1, 1997, provides for state-funded perinatal services and medical services to infants up to one year of age, in families with incomes above 185%, but not more than 200% of the federal poverty level.

Existing law requires the department to provide for outreach activities in order to enhance participation and access to perinatal services, with these activities to be funded from funds appropriated for provision of these services and available federal funds.

This bill would extend those provisions indefinitely, but would eliminate the outreach activity funding provisions.

Existing law requires the State Department of Mental Health to implement managed mental health care for Medi-Cal beneficiaries through fee-for-service or capitated rate contracts with mental health plans, and specifies that emergency regulations developed to implement those provisions shall remain in effect until July 1, 1996, or until the regulations are made permanent, whichever occurs first.

This bill would extend the effective period of those regulations until July 1, 1997, or until the regulations are made permanent, whichever occurs first.

Existing law creates the child health and disability prevention program, administered by the State Department of Health Services, under which health screening and other services are provided through community child health and disability prevention programs.

The bill would require the department, by March 1, 1997, to report specified data to the Legislature concerning this program.

Existing law establishes various social services programs to prevent teenage pregnancies and assist teenage parents.

This bill would establish the Community Challenge Grant Program in the State Department of Health Services to provide community challenge grants to reduce the number of teenage and unwed pregnancies. It would require the department to administer grants to be awarded to described entities for the purpose of implementing locally developed prevention and intervention strategies. It would require the Secretary of the Health and Welfare Agency to appoint an advisory committee to advise and consult with the department regarding the program. It would set forth requirements for grant applications, provide criteria for grant selection, and require the department to issue periodic reports that describe the projects that have been awarded grants. The bill would terminate the program on July 1, 1999, require the department to conduct an evaluation and report its findings to the Legislature on or before January 1, 1999, and repeal these provisions as of January 1, 2000.

Existing law establishes the Office of Family Planning in the State Department of Health Services, and authorizes the department to enter into contracts with agencies, institutions, and organizations to provide family planning services, as described. Existing law requires family planning services to be offered to all persons eligible for Medi-Cal benefits, to all persons eligible for public social services for which federal reimbursement is available under the federal Social Security Act, and to any persons in a family for which current social, economic, and health conditions of the family indicate that the family would likely become a recipient of financial assistance within the next 5 years. Existing

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

law requires the office to develop and implement a sliding fee schedule for family planning services based on family size and income.

This bill would also establish the State-Only Family Planning Program in the department, to provide comprehensive clinical family planning services, as described, to low-income men and women.

The bill would require that a person is eligible to receive the services if the person is a resident of the state, has a family income at or below 200% of the federal poverty level, has no other health coverage, except as described, and is not otherwise eligible for Medi-Cal services without a share of cost. The bill would require the provider of the services to determine whether a person meets the eligibility standards. It would require an individual to sign a statement under penalty of perjury pertaining to eligibility. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

The bill would authorize licensed medical personnel with family planning skills, knowledge, and competency only to provide the full range of family planning medical services. The bill would place certain requirements on Medi-Cal enrolled providers.

The bill would require providers of the services to submit claims for reimbursement to the fiscal intermediary of the department.

The bill would set forth a grievance process.

The bill would authorize the department to adopt emergency regulations.

The bill would exempt the program from certain requirements relating to the use of contractual claims processing services.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would provide that if any provision of the bill or the application thereof to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the bill which can be given effect without the invalid provision or application, and to this end the provisions of this bill are severable.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 198 (AB 3484) Friedman. Medi-Cal.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for the payment of additional reimbursement to hospitals that provide a disproportionate share of care to Medi-Cal recipients, and requires the department to establish a list of disproportionate share hospitals and to establish procedures to reimburse the disproportionate share hospitals using identified factors. Payments are made to these hospitals from moneys paid by hospitals into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes.

Under existing law, of the moneys contained in the Medi-Cal Inpatient Payment Adjustment Fund, $239,757,690 is annually appropriated to the Health Care Deposit Fund, which is used for implementation of the Medi-Cal program.

This bill would, commencing with the 1996–97 fiscal year and for each fiscal year thereafter, reduce the amount appropriated from the Medi-Cal Inpatient Adjustment Fund to the Health Care Deposit Fund to $229,757,690, thus constituting an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 199 (AB 3487) Katz. Health Programs: Cigarette and Tobacco Products Surtax Fund.

Existing law establishes the Tobacco Use Prevention Program, in which the State Department of Health Services is required to implement a program of selecting local lead agencies for the implementation of tobacco use prevention activities, and authorizes

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the department to withhold funding from counties that do not comply with program requirements.

This bill would revise that authorization to refer to the withholding of funds from noncompliant local lead agencies and would authorize the reallocation of the funds to other local entities.

Existing law provides that the State Department of Education shall award and administer grants for projects directed at the prevention of tobacco-related diseases, and specifies that any school district or county office of education that does not have a tobacco-free district policy implemented by July 1, 1996, shall not be eligible to apply for the grants.

This bill would extend that date to July 1, 1997.

Existing law specifies that the provisions requiring the implementation of the Comprehensive Perinatal Outreach Program shall become inoperative July 1, 1996, and shall be repealed on January 1, 1997, unless a later enacted statute revises or repeals that date.

This bill would extend that limitation to provide that those provisions shall become inoperative July 1, 1997, and shall be repealed January 1, 1998, unless a later enacted statute changes or repeals that date.

Existing law specifies that the provisions requiring the implementation of the Tobacco Use Prevention Program shall become inoperative July 1, 1996, and shall be repealed on January 1, 1997, unless a later enacted statute revises or repeals that date.

This bill would extend that limitation to provide that those provisions shall become inoperative July 1, 1997, and shall be repealed January 1, 1998, unless a later enacted statute changes or repeals that date.

Existing law specifies that the provisions requiring the implementation of the Cigarette and Tobacco Product Surtax Medical Research Program shall become inoperative July 1, 1996, and shall be repealed on January 1, 1997, unless a later enacted statute revises or repeals that date.

This bill would extend that limitation to provide that those provisions shall become inoperative July 1, 1997, and shall be repealed January 1, 1998, unless a later enacted statute changes or repeals that date.

Existing law specifies that the provisions requiring the reimbursement of selected primary care clinics for the delivery of medical services, including preventative health care and smoking prevention and cessation services, including case management services, to eligible beneficiaries whose income is under 200% of the federal poverty level shall become inoperative July 1, 1996, and shall be repealed on January 1, 1997, unless a later enacted statute revises or repeals that date.

This bill would extend that limitation to provide that those provisions shall become inoperative July 1, 1997, and shall be repealed January 1, 1998, unless a later enacted statute changes or repeals that date, would exclude case management services from the scope of that program, would revise the date by which the department is required to adopt and provide each clinic with a schedule for programs, and would make technical revisions.

Existing law specifies that the provisions requiring the implementation of the Access for Infants and Mothers (AIM) program and provisions for the establishment of the continuously appropriated Perinatal Insurance Fund shall become inoperative July 1, 1996, and shall be repealed on January 1, 1997, unless a later enacted statute revises or repeals that date.

This bill would extend that limitation to provide that those provisions shall become inoperative July 1, 1997, and shall be repealed January 1, 1998, unless a later enacted statute changes or repeals that date, and, by extending the operative period of the continuously appropriated Perinatal Insurance Fund, this bill makes an appropriation.

Existing law specifies the powers and duties of the Major Risk Medical Insurance Board in the implementation of a program to provide perinatal and infant services and, until January 1, 1997, authorizes that board to adopt emergency regulations as necessary to administer the program.

This bill would extend that authorization to adopt emergency regulations to January 1, 1998, and would limit that authorization to the adoption of emergency regulations for certain purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law, operative until July 1, 1996, and repealed on January 1, 1997, provides for the provision of perinatal services, perinatal outreach, coordination, and expansion services, provides limitations on the use of funds from the Health Education Account in the Cigarette and Tobacco Products Surtax Fund for purposes of the perinatal outreach, coordination, and expansion services.

This bill would extend the operation and effective period of those programs within the Medi-Cal program.

Existing law, operative until July 1, 1996, and repealed on January 1, 1997, requires the State Department of Health Services to establish data collection and reporting requirements to annually report health expenditures and authorizes the use of money allocated for local health purposes to expand the scope of benefits, to fund special projects under the County Medical Services Program, and to compensate hospitals and other emergency health providers for emergency treatment of out-of-county indigent patients and authorizes the use of funds available from appropriations for certain local health care purposes for use in funding increased program costs due to caseload increases and provider rate increases.

This bill would extend the operative and effective date of those provisions for one year, and, to the extent it authorizes a change in the use of appropriated funds, this bill would result in an appropriation.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits, and requires that each county that receives CHIP funds submit reports containing specified information to the State Department of Health Services.

This bill would revise the time period and required information that each county receiving CHIP funding shall be required to provide to the State Department of Health Services.

Existing law requires counties to maintain a specified maintenance of effort level in order to receive those funds and limits the authority for the CHIP program to make it inoperative on July 1, 1996, and to repeal that authority on January 1, 1997.

This bill would revise the maintenance of effort requirements for the 1996-97 fiscal years and would extend the CHIP to make it inoperative on July 1, 1997, and to repeal it on January 1, 1998.

Existing law provides for various programs for the provision of health services.

This bill would, until July 1, 1997, require the Rural Health Policy Council, through the Office of Statewide Health Planning and Development to develop and administer a competitive grants program for projects located in rural areas pertaining to the delivery of health and medical services in rural areas, and authorizes the Office of Statewide Health Planning and Development to administer certain funds appropriated by the Budget Act of 1996 for those purposes consistent with the requirements of Proposition 99.

This bill would impose limitations on the use of funds from the Cigarette and Tobacco Products Surtax Fund to reflect the requirements of Proposition 99.

This bill would specify that any unappropriated funds from the 1996–97 fiscal year contained in any of the accounts in the Cigarette and Tobacco Products Surtax Fund shall remain in that account, and be available for appropriation for the 1997–98 fiscal year.

This bill would also require the Office of the Legislative Analyst to prepare an analysis, which may be contained in the Analysis of the 1997–98 Budget Bill, but which shall be submitted not later than March 1, 1997, on the expenditure of specified funds, by county, for health care.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 200 (AB 3492) Frusetta. School safety.

(1) Existing law, the Conflict Resolution and School Violence Reduction Program, establishes a statewide grant program coordinated through the county offices of education to provide grants to schools for conflict resolution projects. Existing law

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

requires a participating county office of education to give first priority to applicants for grants that submit a proposal containing a component to train teams of school staff, administrators, and pupils, as specified, and to select any school within the jurisdiction to be a grant recipient based on specified criteria. Existing law provides that the Superintendent of Public Instruction may retain 2% of the funds distributed for the Conflict Resolution and School Violence Reduction Program for the purposes of administering the provisions of the program, for conducting an evaluation, and for disseminating information regarding successful conflict resolution projects.

This bill would rename the program as the School Violence Reduction Program and would provide for grants to schools and school districts. The bill would eliminate the requirement that a participating county office of education give first priority to applicants for grants that submit a proposal containing a component to train teams of school staff, administrators, and pupils, and to select any school within the jurisdiction to be a grant recipient based on specified criteria. This bill would require participating county offices of education to establish selection criteria, as specified, for the approval of applications submitted by schools and school districts for school violence reduction programs. This bill would require the participating county office of education to provide for the selection of an application review panel comprised of representatives from local law enforcement, education, and community agencies and county probation offices. This bill would authorize the Superintendent of Public Instruction to retain 3% of the funds distributed pursuant to a specified funding provision for the purposes of administering the program and disseminating information regarding successful school violence reduction programs. This bill also would authorize the Superintendent of Public Instruction to retain $500,000 of the funds distributed pursuant to a specified funding provision for the purposes of administering the Truancy Reduction and Public Safety Grant Program.

(2) Existing law establishes compulsory school attendance requirements for minors. Existing law also establishes truancy interventions, including school attendance review boards.

This bill would establish a demonstration program to be cited as the Targeted Truancy and Public Safety Grant Program. The bill would establish the goals of the program to be development and implementation of intervention strategies that will end the escalating pattern of truancy, antisocial behavior, and delinquency for high-risk youth, as defined, who are participants in the grant program. The bill would permit school districts and county offices of education to apply to the State Department of Education for 3-year grants in a total amount not to exceed $1,250,000, and would require at least matching funds that could be in-kind resources, as specified. The bill would require the statewide distribution of grants to be geographically balanced, as determined by the Superintendent of Public Instruction. The bill would specify funding priorities to be used by the Superintendent of Public Instruction in awarding grants, and would specify required objectives. The bill would require the Superintendent of Public Instruction to establish minimum standards, funding schedules, and procedures for selecting participating school districts or county offices of education. The bill would require collaborative multiagency efforts to address truancy and delinquency behaviors, and that grants only be awarded when the chief probation officer in an applicant's county supports the application and will assist in implementation of the program. The bill would require the State Department of Education to collaborate with the Board of Corrections to develop methods of evaluating the program, to contract with an independent evaluator to assess the overall success of the program, and to collect data and present to the Legislature on or before March 1, 2001, a final analysis of the grant program.

(3) This bill would appropriate $10,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts and county offices of education for the purposes of the Targeted Truancy and Public Safety Grant Program. The bill would require those appropriations to be included in the amounts appropriated by the state in the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) This bill would appropriate $150,000 from the General Fund to the Superintendent of Public Instruction for the purpose of contracting for an evaluator as required by the Targeted Truancy and Public Safety Grant Program.

(5) The bill would appropriate $3,000,000 from the General Fund to the School Safety Account in the General Fund for allocation by the Superintendent of Public Instruction as provided in a provision of the School Violence Reduction Program. If the amount in the General Fund to be transferred to the School Safety Account exceeds $3,000,000, the bill would require those funds to be appropriated in augmentation of the $3,000,000 appropriation and prohibit that amount from exceeding $10,000,000.

(6) Existing law provides for the establishment in the General Fund of a School Safety Account which is continuously appropriated for the purposes of the Conflict Resolution and School Violence Reduction Program. Existing law provides the manner in which those funds are allocated.

This bill would appropriate for the 1996–97 fiscal year, in addition to the funds already appropriated for this program, $4,200,000 from the General Fund to the State Department of Education to be allocated to county offices of education for the purposes of awarding School Violence Reduction Program grants, as specified. The bill would require those appropriations to be included in the amounts appropriated by the state in the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts for that fiscal year.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 201 (AB 3493) Committee on Budget. State government.

(1) Existing law sets forth various provisions for the administration of the state government, funded pursuant to the annual Budget Act.

This bill would express the intent of the Legislature in enacting its provisions to make the necessary statutory changes to implement the Budget Act of 1996 relative to the administration of state government.

(2) Under existing law, the chief officer of the Department of Savings and Loan is the Savings and Loan Commissioner who is appointed by the Governor with the consent of the Senate.

This bill would repeal this appointment authority and instead provide that the Superintendent of Banks shall also serve as the commissioner.

(3) Existing law provides for the Sixth District Agricultural Association, which is known as the California Museum of Science and Industry.

This bill would require the California Museum of Science and Industry to study the feasibility of transferring management and operation of the museum facilities to the California Museum Foundation of Los Angeles, or other alternatives for restructuring, and, if feasible, prepare a plan to accomplish that transfer or alternative restructuring plan. The bill would require the California Museum of Science and Industry to provide an interim and a final report of the study to the Legislature by specified dates.

(4) Under existing law, the first $832,765 of revenues received each year by the California Museum of Science and Industry from parking facilities, rental of museum facilities, or other business activities are required to be deposited in the General Fund, and all funds received in excess of that amount from those activities are required to be deposited in the Exposition Park Improvement Fund.

This bill, instead, would require all revenue received by the museum from those sources during the 1996–97 fiscal year only to be deposited in the Exposition Park Improvement Fund.

(5) Existing law establishes the Natural Disaster Assistance Fund as a special fund in the State Treasury which, with its subsidiary accounts, is continuously appropriated for the purposes of the Natural Disaster Assistance Act.

This bill would, effective July 1, 1997, delete 3 special accounts in the fund but retain the Earthquake Emergency Investigations Account.

(6) Existing law establishes in the Reserve for Economic Uncertainties a Disaster Response-Emergency Operations Account until June 30, 1996, to be used for specified purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would expressly provide that for recovery activities, as defined, funds shall be allocated pursuant to specified provisions of law, including specific provisions of the annual Budget Act, and would extend the operative date of the account to July 1, 1999.

(7) Existing law requires the Department of Finance to certify annually to the Controller the amount determined to be the fair share of administrative costs due and payable from each state agency and to certify to the Controller any amount redetermined to be the fair share of administrative costs due and payable from any state agency. Existing law defines "administrative costs" as the amounts expended by various specified state entities for supervision or administration of the state government or for services to the various state agencies.

This bill would include the Office of Information Technology among the above state entities for purposes of this definition.

(8) Existing law requires the Director of Finance to provide to the Legislature, on or before May 21 of each year, an estimate of the General Fund revenues for the ensuing fiscal year and an estimate of the General Fund workload budget for the ensuing fiscal year.

This bill would instead require the Director of Finance to provide to the Legislature (a) on or before February 1 of each year, all proposed statutory changes necessary to implement the Governor's Budget; (b) on or before April 1 of each year, certain proposed adjustments to the Governor's Budget; (c) on or before May 1 of each year, all proposed adjustment to the Governor's Budget in appropriations for capital outlay; (d) on or before May 14 of each year, an estimate of General Fund revenues for the current fiscal year and for the ensuing fiscal year, any proposals to reduce expenditures to reflect undated revenue estimate, and all proposed adjustments to the Governor's Budget, as specified. This bill would also provide that the Director of Finance may authorize suspension for the current fiscal year of any of these provisions not sooner than 30 days after notification in writing of the necessity for this suspension to the chairpersons of the committee in each house that considers the State Budget and the Chairperson of the Joint Legislative Budget Committee.

(9) Existing law authorizes the proportionate reduction or appropriations made in any fiscal year for the AFDC, SSP, IHSS, and Medi-Cal programs when the Director of Finance determines that estimated General Fund revenues are more than 5% less than the estimated General Fund workload budget with respect to the fiscal year.

This bill would repeal those authorizations.

(10) Under existing law, the Housing Rehabilitation Loan Fund is created in the State Treasury, and is continuously appropriated for specified purposes, including related administrative expenses of the Department of Housing and Community Development.

This bill would authorize expenditures for administrative expenses from the Housing Rehabilitation Loan Fund for additional programs, as specified. It would require that appropriations authorized by the Budget Act of 1996 for the support of the Department of Housing and Community Development from the California Disaster Housing Repair Fund and the California Homeownership Assistance Fund instead be authorized for expenditure from this fund. By authorizing additional purposes for the expenditure of funds from, and additional funds for the deposit into, this continuously appropriated fund, this bill would make an appropriation.

(11) Under existing law, the California Disaster Housing Repair Fund is continuously appropriated to the Department of Housing and Community Development for making deferred payment loans to provide disaster relief for repair of housing damaged or destroyed as a result of a natural disaster. Under existing law the director of the department may authorize the sale of the beneficiary interest of specified loans the proceeds of which are required to be deposited into the California Disaster Housing Repair Fund.

This bill would require that proceeds from sales after July 1, 1996, be deposited in the General Fund. This bill also would require that, on or after July 1, 1996, the unencumbered fund balance and reserves be transferred to the Housing Rehabilitation Loan Fund and subsequent income and other specified resources be deposited to the Housing Rehabilitation Loan Fund with specified exceptions. By authorizing additional income and resources to be deposited into the continuously appropriated Housing Rehabilitation Loan Fund, this bill would make an appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(12) Existing law provides that the Self-Help Housing Fund, a continuously appropriated fund in the State Treasury, consists of specified moneys, including moneys that the California Self-Help Housing Program receives in repayment or return of the funds, including interest thereon. It provides that assistance under the program shall be considered a purchase or rehabilitation loan for purposes of specified provisions of law. However, commencing July 1, 1992, the Department of Housing and Community Development has not been required to make loans from this fund and the department may retain within the fund moneys necessary for administering and monitoring loans made prior to July 1, 1992.

This bill would again permit the use of these fund moneys for loans by deleting the provisions that prohibit the making of loans after the specified date and permit the retention of fund moneys for administration and monitoring of loans made prior to that date. By permitting the use of these continuously appropriated fund moneys for loan purposes, this bill would make an appropriation.

(13) Existing law establishes the Rental Housing Construction Fund in the State Treasury and continuously appropriates the moneys in that fund to the Department of Housing and Community Development.

This bill would provide that appropriations authorized for the support of the department from the Family Housing Demonstration Account and the Urban Predevelopment Loan Fund shall instead be authorized for expenditure from the Rental Housing Construction Fund. By authorizing additional expenditures from the continuously appropriated Rental Housing Construction Fund, this bill would make an appropriation.

(14) Existing law establishes the Urban Housing Predevelopment Loan Fund in the State Treasury, funded from specified sources, and continuously appropriates that fund to the Department of Housing and Community Development for the administration of specified types of predevelopment loans and the repayment of specified fund transfers.

This bill would require that, notwithstanding any other provision of law, on or after July 1, 1996, the unencumbered balance in the fund be transferred to the Rental Housing Construction Fund and that subsequent income and other resources received by the department pursuant to these provisions be deposited to the Rental Housing Construction Fund. By providing for a new use of continuously appropriated funds in the Urban Housing Predevelopment Loan Fund, and authorizing additional income and resources to be deposited into the continuously appropriated Rental Housing Construction Fund, this bill would make appropriation.

(15) Under existing law, the Department of Housing and Community Development is required to implement the Family Housing Implementation Program, under which it may make loans from the continuously appropriated Family Housing Demonstration Account to sponsors for purposes of assisting the development of community housing developments.

This bill would require that on or after July 1, 1996, the unencumbered account balance and reserves be transferred out of the Family Housing Demonstration Account, but be retained within the Rental Housing Construction Fund.

(16) Existing law authorizes the Department of Housing and Community Development to provide specified financial assistance to households from the continuously appropriated Homeownership Assistance Fund.

This bill would require that, on or after July 1, 1996, the unencumbered fund balance and reserves, along with subsequent income and resources, be transferred to, and deposited in, the Housing Rehabilitation Loan Fund. By authorizing additional income and resources to be deposited into the continuously appropriated Housing Rehabilitation Loan Fund, this bill would make an appropriation.

(17) Existing law provides procedures for the allocation of gasoline tax revenues to cities and counties based in part on the city's or county's general fund expenditures, including fines and forfeitures expended for street and highway purposes, as specified.

This bill would provide that notwithstanding these provisions, specified Solano County municipal court fines and forfeitures in the amount of $426,381 shall be deposited to the General Fund of Solano County.

(18) This bill would state that any appropriation made for support of the State Banking Department for supervision and regulation of savings associations, payable from

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the Savings Association Special Regulatory Fund, shall be deemed to be made for support of the Department of Savings and Loan for supervision and regulation of savings associations, payable from the Savings Associations Special Regulatory Fund.

(19) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 202 (AB 3495) Kaloogian. Natural resources.

(1) Existing law sets forth, in regard to state institutions and state-occupied buildings, the duties of the State Fire Marshal with regard to the preparation and adoption of building standards relating to fire protection in the design and construction of the means of egress and the adequacy of exits and the installation and maintenance of fire alarm and fire extinguishment equipment or systems, the preparation and adoption of regulations, other than building standards, for the installation and maintenance of equipment and furnishings that present unusual fire hazards, and the enforcement of certain regulations and standards relating to fire and panic safety. Existing law authorizes a local fire chief to enter any state institution, or state-owned or state-occupied building, to prepare a fire suppression preplanning program, and to investigate any fire in a state-occupied building, and authorizes the State Fire Marshal to authorize a local chief fire official to make certain inspections of state-owned or state-occupied buildings for the purpose of enforcing certain regulations and standards relating to fire and panic safety.

This bill would delete the provisions summarized above relating to the duties and authority of the State Fire Marshal with regard to state-occupied buildings, and make conforming changes relating to local chief fire officials and fire chiefs.

(2) Existing law vests the Department of Parks and Recreation with specified powers and duties, including control over the state park system.

This bill would prescribe procedures for the operation and funding of the department during the 1996–97 fiscal year, as specified.

(3) Existing law establishes the Department of Forestry and Fire Protection and requires the department to perform various functions pertaining to forest resources and fire protection.

This bill would express the Legislature's intent that cooperative agreements that are entered into between the department and local government provide for the equitable sharing of costs associated with capital outlay projects that enlarge, enhance, or replace facilities for the purpose of benefiting the cooperating local government, and would require the department to prescribe those terms and conditions for those agreements that would result in an equitable sharing of those costs in proportion to the benefits derived, as specified. The bill would require that any installment payments that are made in connection with a cooperative agreement that is entered into pursuant to those provisions be made over a period of time not exceeding 20 years at the same rate of interest as the state's Pooled Money Investment Account, and would require that any reimbursements for facility improvement costs under a cooperative agreement be deposited in the General Fund.

(4) Existing law authorizes the Department of Parks and Recreation to enter into concession contracts for units of the state park system, subject to specified requirements.

This bill would authorize the department to enter into a concession contract for the development, operation, and maintenance of the Crystal Cove Historic District as a public use facility for a period of up to 60 years, upon those terms and conditions that the department determines are in the best interest of the state.

(5) Existing law establishes the California Conservation Corps in the Resources Agency for the purpose of implementing and administering various activities and programs intended to enhance the educational opportunities and employability of the state's youth.

This bill would prescribe procedures for the operation and funding of the corps during the 1996–97 fiscal year, as specified.

(6) Existing law requires the payment of a $9 service fee to the Department of Motor Vehicles for the issuance or renewal of identification of off-highway motor vehicles subject to identification, except as provided, and requires, until January 1, 2003, the payment of an additional $6 special fee to be paid at the time of payment of the service fee for the issuance or renewal of an identification plate or device.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would decrease to $7 the amount of the service fee required to be paid for the issuance or renewal of identification of off-highway motor vehicles subject to identification, and would, until January 1, 2003, increase to $8 the additional special fee for the issuance or renewal of an identification plate or device.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 203 (AB 3497) Richter. Education finance: revenue limits.

(1) Existing law requires each county superintendent of schools to make specified calculations to determine a base revenue limit for each school district in the county. As part of that computation, existing law requires the Superintendent of Public Instruction to compute a revenue limit equalization adjustment for the 1995–96 fiscal year for each school district's base revenue limit pursuant to a specified formula.

This bill would require the county superintendent of schools, in conjunction with the Superintendent of Public Instruction, to compute an equalization adjustment for each school district in the county so that no district's 1996–97 base revenue limit per unit of average daily attendance is less than the 1995–96 fiscal year statewide average base revenue limit for the appropriate size and type of district, as adjusted for inflation. This bill would make conforming changes to related provisions of law so that the amount of the increase to each school district's revenue limit is included in the computation of school district's revenue limit in subsequent fiscal years.

This bill would appropriate an amount equal to the total statewide amount computed pursuant to those equalization provisions for each school district for the 1996–97 fiscal year, but not to exceed $147,000,000, to the Superintendent of Public Instruction for allocation to school districts as equalization adjustments for the 1996–97 fiscal year.

(2) Pursuant to Section 8 of Article XVI of the California Constitution, the state is required to appropriate a computed minimum level of funds from the General Fund for the support of school districts and community college districts for each fiscal year (hereafter "the state's minimum funding obligation pursuant to Section 8"). Existing law requires the Controller each fiscal year, to transfer from the General Fund to Section A of the State School Fund, certain amounts certified by the Superintendent of Public Instruction for the purpose of making apportionments to school districts. The Budget Act of 1996 identifies the amount appropriated for the purposes of meeting the state's minimum funding obligation pursuant to Section 8 for the 1996–97 fiscal year. Existing law applies a deficit factor to the revenue limits computed for county superintendents of schools and school districts.

This bill would require the Department of Finance to compute the amount by which the amount required to be appropriated for the purpose of meeting the state's minimum funding obligation pursuant to Section 8 for the 1996–97 fiscal year, exceeds the total amount actually appropriated for that purpose for the 1996–97 fiscal year, as determined as of February 1, 1998, and as certified by the Department of Finance. The bill would require that of the amount computed by the Department of Finance, a computed percentage of that amount be set aside from General Fund revenues for community college districts, to be appropriated by the Legislature. The bill would appropriate an amount equal to the remaining balance of the amount computed by the Department of Finance from the General Fund to the Superintendent of Public Instruction, with 50% of the balance allocated for the purposes of equalizing revenue limits, as specified, and with 50% of the balance allocated for the purposes of reducing the deficit factors applied to the revenue limits computed for county superintendents of schools and school districts. The bill would set forth a method for computing equalization adjustments to the revenue limits of school districts based on the statewide average base revenue limits for school districts for the 1996–97 fiscal year, as adjusted for inflation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 204 (AB 3488) Ducheny. Education Trailer Bill to Budget Act of 1996. [2]

(1) Under existing law, a deficit factor of 12.59% is applied to reduce the revenue limits for each county superintendent of schools for the 1994–95, 1995–96, and 1996–97 fiscal years. Existing law provides that with respect to the 1995–96 and 1996–97 fiscal years, if a settlement agreement in California Teachers Association v. Gould is effective,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the revenue limit for each county superintendent of schools shall be reduced instead by an 11.70% deficit factor.

This bill would instead require a 12.59% deficit factor for the 1994–95 fiscal year, an 11.70% deficit factor for the 1995–96 fiscal year, and an 11.547% deficit factor for the 1996–97 and 1997–98 fiscal years, as adjusted. It would also eliminate the requirement that the 11.70% deficit factor for the 1995–96 and 1996–97 fiscal years only apply if a settlement is reached in California Teachers Association v. Gould. The bill would also require that, in making revenue limit computations for any fiscal year, the revenue limit be computed as if it had not been reduced by a deficit factor in previous fiscal years.

(2) Existing law defines "cost" for the purpose of the Child Care and Development Services Act.

This bill would additionally define "reasonable and necessary costs."

(3) Existing law requires the Superintendent of Public Instruction to administer all state preschool programs, as specified. An applicant or contracting agency, as defined, is eligible to contract to operate a state preschool program.

This bill would specify that a state preschool applicant or contracting agency has 120 days prior to the 1st day of the beginning of the new preschool year to certify eligibility and enroll families into their program.

(4) Existing law requires the Superintendent of Public Instruction to implement a plan that establishes reasonable standards and assigned reimbursement rates, as specified, and prohibits reimbursement from exceeding actual program costs that are reasonable and necessary and that are within the maximum reimbursable amount.

This bill would delete the prohibition against exceeding actual program costs that are reasonable and necessary and that are within the maximum reimbursable amount.

(5) Existing law limits the amount a child development contractor may retain in a reserve fund.

This bill would authorize the child development contractor to retain all earned funds, as defined, and use them for reasonable and necessary costs, as defined.

(6) Existing law authorizes the Superintendent of Public Instruction to enter into and execute local contractual agreements with any public or private entity or agency for the delivery of child care and development services or the furnishing of property, facilities, personnel, supplies, equipment, and administrative services related to the delivery of child care and development services.

This bill would require the State Department of Education to develop a prototype of a new contracting system, as specified, to be implemented by no more than 5% of child care and development contractors and to be conducted over a 2-year period. The bill would require an independent evaluation of the prototype to be conducted with an interim evaluation required to be submitted to the legislative budget committees by January 1, 1999, and a final evaluation report submitted to those committees by January 1, 2000.

(7) Existing law requires the governing board of each school district, as a condition for the receipt of school apportionments from the State School Fund, to adopt rules and regulations establishing school district policies as they relate to specified subjects, including evaluations of certificated employees, as specified.

This bill would delete the requirement that evaluations be made of certificated employees.

(8) Existing law, as set forth in Section 8 of Article IX of the California Constitution, requires the state to apply a minimum amount of funding for each fiscal year for the support of school districts, as defined, and community college districts (hereafter the state's minimum funding obligation under Section 8). Existing law directs that the amount of state funding appropriated in each fiscal year to comply with the state's minimum funding obligation under Section 8, be distributed to school districts, as defined, to community college districts, and to state-operated schools according to a specified formula.

This bill would specify that this provision does not apply to the 1996–97 fiscal year.

(9) Existing law requires that the revenue limit for each school district for the 1994–95, 1995–96, and 1996–97 fiscal years be reduced by an 11.01% deficit factor. The bill would provide that with respect to the 1995–96 and 1996–97 fiscal years, if a settlement

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

agreement in California Teachers Association v. Gould is effective, the revenue limit for each school district be reduced by a 10.12% deficit factor.

This bill would instead require an 11.01% deficit factor for the 1994–95 fiscal year, a 10.12% deficit factor for the 1995–96 fiscal year, and a 9.967 deficit factor for the 1996–97 and 1997–98 fiscal years, as adjusted. It would also eliminate the requirement that the 10.12% deficit factor for the 1995–96 and 1996–97 fiscal years only apply if a settlement is reached in California Teachers Association v. Gould. The bill would further require that, in making revenue limit computations for any fiscal year, the revenue limit be computed as if it had not been reduced by a deficit factor in previous fiscal years.

(10) Existing law provides that for any unified school district that commenced operation on or after June 30, 1978, or any school district that receives approval from the State Department of Education for a new continuation education high school, the Superintendent of Public Instruction shall compute an adjustment to the district revenue limit, as specified.

This bill would provide that the adjustment for a new continuation education high school computed pursuant to this provision may be applicable for any unified school district that was not fully operational during the first fiscal year of operation of the continuation education high school, as specified. The bill would also increase the amount of the revenue limit per unit of average daily attendance computed by a school district that claimed average daily attendance for continuation education high schools at the second principal apportionment for the 1995–96 fiscal year by $100 and if the amount appropriated for this purpose is insufficient to fully fund this increase, the amount would be adjusted on a pro rata basis.

This bill would appropriate $2,000,000 from the General Fund for transfer to Section A of the State School Fund for the purposes of that increase in the 1996–97 fiscal year to the revenue limit of school districts claiming average daily attendance for continuation high schools. The bill would require those appropriations to be included in the amounts appropriated by the state for the 1996–97 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(11) Existing law requires the State Department of Education to grant applications for apportionments for the purchase of transportation equipment according to specified priorities and requires a school district or county office of education receiving these grants to pay a percentage of the estimated cost of a new schoolbus based on a specified calculation.

This bill would instead require a school district or county office of education to pay $1/2$ of the estimated cost of a new schoolbus. The bill would appropriate $35,000,000 to the State Department of Education for the purpose of funding grants to school districts and county offices of education for the purchase of transportation equipment. The bill would require those appropriations to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(12) Existing law requires a school district to establish procedures for reviewing teacher assignments yearly and to report to the governing board of the school district on the assignments, as specified. Existing law requires each chief schoolsite administrator annually to file with the district superintendent a signed affidavit stating whether all certificated persons for whom he or she is responsible are assigned to areas within their credential authorization. Existing law requires each district superintendent to submit annually to the county superintendent of schools a signed affidavit attesting to the legality of all certificated employee assignments for the current school year. Existing law requires a county superintendent of schools to annually monitor and review school district certificated employee assignment practices in a least $1/3$ of the school districts within his or her jurisdiction.

This bill would instead require only the county superintendent of schools to annually review school district certificated employee assignment practices according to specified priorities.

(13) Existing law requires county superintendents of schools to compute instructional personnel services units for each school district and county office of education operating special education programs and related services for the purposes of making apportionments for those programs. As part of the computations, the superintendent

NOTE: Superior numbers appear as a separate section at the end of the digests.

must compute a specified amount for each school district and county office of education that operates an extended year program. Existing law further requires that for the 1995–96 fiscal year, no amount may be allocated for instructional personnel services units for services to children with exceptional needs who are younger than 3 years of age if those units are generated by an extended year program.

This bill would also require that for the 1996–97 fiscal year, no amount may be allocated for instructional personnel services units for services to children with exceptional needs who are younger than 3 years of age if those units are generated by an extended year program.

(14) Existing law sets forth various requirements for the issuance of diplomas, certificates, or other documents conferred upon a pupil as evidence of completion of a prescribed course of study, including, among other courses of study, graduation from high school. Existing law establishes the Golden State Examination Program for the purpose of administering the Golden State Examination to pupils enrolled in public high schools.

This bill would establish an honors diploma for high school graduates to be called the "Golden State Seal Merit Diploma" to recognize pupils who have mastered the high school curriculum, as specified. The Golden State Seal Merit Diploma would be awarded jointly by the State Board of Education and the Superintendent of Public Instruction. This bill would require the State Board of Education, on recommendation of the Superintendent of Public Instruction, to determine and adopt the means and performance standards by which pupils may demonstrate mastery of the curriculum. The bill would provide that for subject matter areas included in the Golden State Examination, that examination shall serve as the means for demonstrating mastery of the curriculum. Each school district that awards high school diplomas would be required to maintain records in order to identify pupils who have earned a Golden State Seal Merit Diploma and to affix an appropriate insignia to the diploma and transcript of each pupil that earns a Golden State Seal Merit Diploma. By imposing additional responsibilities on school districts, this bill would create a state-mandated local program.

This bill would appropriate $1,000,000 from the General Fund to the Superintendent of Public Instruction for the purposes of the Golden State Seal Merit Diploma. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(15) Existing law authorizes the governing board of a school district to establish and maintain one or more alternative schools within the district and defines an alternative school as one that is operated in a manner designed, among other things, to maximize the opportunity for pupils to develop specified positive values and for teachers, parents, and pupils to develop the learning process and its subject manner and to continuously react to the changing world. Existing law authorizes the establishment of charter schools that operate independently from the existing school district structure as a method to accomplish, among other things, the encouragement of different and innovative teaching methods and the creation of new professional opportunities for teachers.

This bill would authorize a school district to apply for funds to establish a single gender academy as a magnet school or as an alternative education magnet school. The Superintendent of Public Instruction would award grants on a competitive basis and would consider whether the proposed academy meets specified requirements. The bill would appropriate $5,000,000 from the General Fund to the State Department of Education without regard to fiscal year for the establishment and implementation of single gender academies. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(16) Existing law requires the Controller to transfer each fiscal year an amount determined according to specified formulas from the General Fund to Section A of the State School Fund for the purpose of providing the state funding portion of revenue limits to county superintendents of schools and school districts.

This bill, notwithstanding these formulas, would require the Superintendent of Public Instruction, for the 1997–98 fiscal year, and each fiscal year thereafter, to certify to the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Controller the amounts that do not exceed the amounts necessary to fund the revenue limits of school districts and county superintendents of schools, as specified.

(17) Existing law, the Budget Act 1995, appropriates $886,651,000 for the purposes of apportionments to community college districts.

This bill would appropriate $48,000 from the General Fund in augmentation of that appropriation for apportionments to community college districts. The bill would require that appropriation to be included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(18) Existing law sets forth a method for determining annual apportionments to community college districts.

This bill would appropriate $76,932,000 from the General Fund for transfer by the Controller to Section B of the State School Fund for the purpose of providing one-time block grants to community college districts. The Chancellor of the California Community Colleges would be required to allocate the block grants to community college districts in an amount per actual statewide full-time equivalent student enrollment reported for the 1995–96 fiscal year in a manner that ensures that the allocation to each community college district is not less than $100,000. Community college districts would be required to expend the allocation for specified instructional supplies, materials, and supplies. Of that sum, $2,100,000 would be allocated to the Mt. San Antonio Community College District for information systems, as specified, and $596,719 to the Los Angeles Community College District for the East Los Angeles College's Automotive Technology Training Facility. The bill would require that $55,615,000 of that appropriation to be included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8, $19,659,000 of that appropriation to be included in that amount for the 1994–95 fiscal year, and $1,658,000 to be included in that amount for the 1991–92 fiscal year.

(19) Existing law establishes a program to provide community college districts with state funding for deferred maintenance projects on school facilities and sets forth various requirements a community college district must meet to receive those funds, including among others, that the community college district pay for 50% of the deferred maintenance project.

The bill appropriates $60,000,000 from the General Fund to the Chancellor of the California Community Colleges for the purposes of allocating funds to community college districts for one-time deferred maintenance projects for the 1996–97 fiscal year. The bill would require that to be eligible to receive such an allocation, the community college district must comply with existing law requirements pertaining to allocations for school facilities and, in addition, pay for a computed percentage of the cost of the deferred maintenance project. The bill would authorize the Chancellor of the Community College Districts to utilize up to $14,000,000 of that appropriation to backfill a property tax deficiency for community college districts for the 1995–96 fiscal year provided specified conditions are met. The bill would require that appropriation to be included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

This bill would appropriate $20,000,000 from the General Fund to the Chancellor of the California Community Colleges for the 1996–97 fiscal year for the purpose of allocating funds to community college districts to fund architectural barrier removal projects for the 1996–97 fiscal year. Those amounts would be distributed by the Chancellor of the California Community Colleges to community college districts on a project-by-project basis on priority of need for the project. Community college districts would be required to contribute an equal matching amount to the project, unless waived as specified. The Chancellor of the California Community Colleges would be required to develop architectural barrier removal criteria prior to the release of funds and would be required to submit recommendations or architectural barrier removal criteria to specified entities and persons. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(20) Existing law establishes the California Early Intervention Services Act for the purpose of providing a statewide system of coordinated, comprehensive, family centered, multidisciplinary, interagency programs, responsible for providing appropriate early intervention services and support to infants and toddlers with exceptional needs and their families. Existing law also establishes a system to provide special education and related services to infants and toddlers, preschool age children, and pupils enrolled in kindergarten, and grades 1 to 12, inclusive. Generally, school districts, county offices of education, and special education local plan areas receive state funding for special education and related services on the basis of instructional personnel services units, as described in (13).

This bill would reappropriate funds from the amount appropriated to fund instructional personnel services units in the Budget Act of 1996 if that amount exceeds the amount necessary to fund the total statewide number of instructional personnel services units for the 1996–97 fiscal year and the reimbursement amount received by the State Department of Education from the Department of Developmental Services for the purposes of operating programs under the California Early Intervention Services Act are insufficient. The amount reappropriated to the State Department of Education for the California Early Intervention Services Act would be the lesser of the amount necessary to fully fund the costs of the department in operating programs under that act, as specified, or the amount by which that appropriation to fund instructional personnel services unit exceeds the amount necessary to fund the total statewide number of instructional personnel services units computed for the 1996–97 fiscal year.

(21) Existing law appropriates $31,262,000 from the General Fund for partial payment of the Settlement Agreement and Stipulation dated March 31, 1995, in Long Beach Unified School District v. State of California.

This bill would clarify that the appropriation is to be included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of computing and meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(22) Existing law requires evaluations of teachers as described in (7) herein and establishes the Teachers' Retirement Fund.

This bill would appropriate $6,065,000 from the General Fund to the Controller for reimbursement of claims filed by school districts for the 1994–95 fiscal year for required teacher evaluations. The bill would also appropriate $1,533,000 from the General Fund to the Controller for transfer to the Teachers' Retirement Fund for reimbursement of costs incurred for the 1994–95 fiscal year. The bill would require those appropriations to be included in the amounts appropriated by the state for the 1994–95 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

This bill would appropriate from the General Fund to the Controller for reimbursement of claims filed by school districts for the 1994–95 and 1995–96 fiscal years, $3,616,000 and $10,500,000, respectively, for required teacher evaluations. The bill would require those appropriations to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(23) Existing law appropriates $279,327,000 from the General Fund for transfer to Section A of the State School Fund for allocation to school districts and county offices of education, as specified, to be used for instructional materials, deferred maintenance, education technology, or any other nonrecurring costs. Existing law required prior to the use of these funds, that the governing board of the school district or county board of education hold a public hearing at which time the board is required to report on the needs of, and resources for, instructional materials, deferred maintenance, education technology, or any other nonrecurring costs.

This bill would appropriate $200,000,000 from the General Fund to Section A of the State School Fund for allocation to school districts and county offices of education, as specified, to be used for instructional materials, deferred maintenance, education technology, or any other nonrecurring costs. The bill also would require the governing board of the school district or the county board of education to hold a public hearing to report on the needs of, and resources for, instructional materials, deferred maintenance, education technology and any other nonrecurring costs in the district or county office

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of education. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(24) Under existing law, a school district may receive apportionments for the purpose of deferred maintenance on school facilities from the State School Deferred Maintenance Fund if it meets certain requirements, including among other requirements, that the school district provide a matching amount. The State Allocation Board is authorized to approve applications for those funds.

This bill would also appropriate $50,000,000 from the General Fund to the State School Deferred Maintenance Fund to be allocated by the State Allocation Board to fund applications received by the Office of Public Construction for the purposes of payments for deferred maintenance projects for school districts maintaining kindergarten or any of grades 1 to 12, inclusive. With respect to those amounts the State Allocation Board would be required to give first priority for apportionment of those amounts to school districts requesting funds for projects that meet the criteria for critical hardship as of June 30, 1996. If funds remain after those hardships have been funded, the State Allocation Board would be required to allocate those funds to school districts pursuant to existing law and any criteria established by the board.

(25) Under existing law, a school district may be reimbursed by the amount necessary to pay costs mandated by the courts for desegregation programs.

This bill would appropriate $7,200,000 from the General Fund for transfer by executive order of the Director of Finance to the Controller for reimbursement of approved claims received from specified school districts and county offices of education for costs of court-ordered desegregation programs.

(26) Existing law establishes a mechanism for providing emergency loans to a school district that is experiencing a fiscal crisis.

This bill would appropriate $650,000 from the General Fund to Section A of the State School Fund for apportionment by the Superintendent of Public Instruction to the Alhambra City High School District for the purposes of making a loan to the district, except that the loan would not be disbursed until the school district notifies the Controller of its acceptance of the terms of the loan, as specified, within 90 days of the effective date of this bill. The bill would require that appropriation to be included in the amount appropriated by the state in the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(27) Existing law requires science to be included within the adopted course of study for elementary and secondary schools.

This bill would appropriate $4,000,000 from the General Fund to the State Department of Education for the purpose of establishing the Discovery Science Center in Orange County. Those amounts would be used on a one-time basis for the construction and start-up costs for the Discovery Science Center in Orange County, as specified. The center would be required to serve as a resource for public elementary and secondary schools and to offer programs to Orange County schools, residents, and visitors. The bill would require that appropriation to be included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(28) Existing law establishes the California Library Services Act for the purpose of providing all residents with the opportunity to obtain from the public libraries needed materials and informational services by facilitating access to the resources of all libraries in the state. Existing law also authorizes the formation of library districts.

This bill would appropriate $1,000,000 from the General Fund to the State Department of Education for the purpose of allocating funds to the Soledad Union School District for the construction of a regional community library in Monterey County. Those amounts would be used on a one-time basis to provide the remaining balance of funds necessary for the construction of a joint use library in Monterey County that will serve the pupils of the Soledad Union School District and the adults in the community visitors. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(29) Existing law establishes a program for the provision of special education services to pupils with exceptional needs.

This bill would appropriate $800,000 from the General Fund to the State Department of Education for allocation to the Claremont Unified School District for the purpose of allocating funds to that school district for costs with respect to special education facilities at the Sumner Elementary School site. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(30) Existing law establishes various categorical programs, including among others, adult education programs, programs for adults in correctional facilities, special education programs, and child care and preschool programs.

This bill would provide that the amounts appropriated for those programs in specified items of the Budget Act of 1996 are in lieu of the amounts that would otherwise be required to be appropriated for those programs.

(31) Existing law authorizes the State Board of Education to reserve a sum of money to support demonstration and experimental projects for educational problems associated with general curriculum development, among other things. Under existing law, one of the requirements for maintaining the validity of the clear teaching credential is the completion of an individual program of professional growth which may include participation in school curriculum development projects.

This bill would appropriate $375,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Oakland Museum of California for activities related to the California Gold Rush, including curriculum development, teacher training, outreach development, exhibits, on-line resources, and museum programs. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(32) Existing law authorizes school districts to establish various programs.

This bill would appropriate $2,760,000 from the General Fund to the Pomona Unified School District for the purpose of funding the one-time startup costs for the Educational Village Project at that school district. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(33) Existing law provides for grants to be made to school districts from the California Public School Library Protection Fund. Existing law requires that 30% of the money in the fund be allocated to schools that currently do not have a school library and 70% of the money in the fund be allocated to replace outdated library materials.

This bill would appropriate $12,000,000 from the General Fund to the California Public School Library Protection Fund for the aforementioned purposes. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(34) Existing law requires that an adjustment be made to the revenue limit of a unified school district that commenced operations on or after June 30, 1978, or any school district that receives approval from the State Department of Education for a new continuation education high school for the 1979–80 fiscal year or any year thereafter.

This bill would appropriate $2,000,000 from the General Fund for transfer to Section A of the State School Fund for the purposes of continuation high school equalization for the 1996–97 fiscal year, as specified. The bill would require that appropriation to be included in the amounts appropriated by the state in the 1996–97 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(35) Existing law provides for the reimbursement of state-mandated local costs.

This bill would appropriate $50,000,000 from the General Fund as a contingency expenditure, to be authorized by the Department of Finance for allocation as appropriate for the reimbursement of state-mandated cost claims submitted by school districts and county offices of education. The bill would require that appropriation to be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(36) Under existing law, school districts are authorized to receive reimbursement for the costs of voluntary and court-ordered desegregation plans, as specified. Prior to receiving reimbursement, the governing board of a school district must submit its desegregation plan to the Superintendent of Public Instruction and the Controller.

This bill would appropriate $528,000 from the General Fund for transfer by executive order of the Director of Finance to the Controller for reimbursement of claims received by the Ocean View Elementary School District for the costs of its voluntary desegregation program for the 1992–93, 1993–94, 1994–95, and 1995–96 fiscal years. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(37) Existing law establishes the Immigrant Workforce Preparation Act.

This bill would appropriate $6,400,000 from the General Fund to the Superintendent of Public Instruction to be apportioned to school districts for the costs of programs and services established pursuant to the Immigrant Workforce Preparation Act. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(38) This bill would make a one-time appropriation of $980,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Museum of Tolerance at the Simon Wiesenthal Center for the purposes of acquiring hardware and software to upgrade the Multimedia Learning Center so that it can be formatted for direct communication into classrooms. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(39) Existing law provides for California Indian education centers that serve as educational resource centers in Indian communities to the Indian students, parents, and the public schools.

This bill would make a one-time appropriation of $2,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Golden Gate Institute for Indigenous Cultures and the California Indian Museum for the purpose of assisting in the retrofit and renovating of designated buildings at the Presidio in San Francisco. The bill would require that appropriation to be included in the amounts appropriated by the state in the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(40) Existing law prescribes a method of determining state apportionments to school districts and county offices of education.

This bill would appropriate $387,000,000 from the General Fund to the Superintendent of Public Instruction for the purposes of providing funds to each regular public school, as defined. The bill would require the Superintendent of Public Instruction to allocate the funds in an equal amount per unit of actual average daily attendance for each regular public school, provided, however, that no regular public school shall receive less than $25,000. The bill would require proposals for the use of the funds to be submitted by the schoolsite council or schoolwide advisory group or support group to the governing board of the school district for approval. The bill would provide that if the schoolsite council, schoolwide advisory group, or school support group and the governing board of the school district cannot agree on the use of the funds by May 1, 1997, the county superintendent of schools shall notify the Superintendent of Public Instruction and the Superintendent of Public Instruction shall require that the funds be returned to the state. The bill would require that the county board of education approve the proposed use of funds by schools operating under the jurisdiction of county offices of education. By imposing additional requirements on county offices of education this bill would create a state-mandated local program.

This bill would require that $14,593,000 be included in the amounts appropriated by the state for the 1991–92 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year. The bill would require that

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

$186,584,000 be included in the amounts appropriated by the state for the 1994–95 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year. The bill would require that $185,823,000 be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(41) Under existing law, the governing board of any school district may initiate and carry on any program, activity, or may otherwise act in any manner which is not in conflict with or inconsistent with any law, including operating magnet schools.

This bill would appropriate $350,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Los Angeles Unified School District for the purposes of the Los Angeles Police Academy Magnet Schools. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(42) Existing law provides that the adopted course of study shall provide instruction in personal and public safety, including health and the effects of alcohol on the human body.

This bill would appropriate the sum of $20,000 to the Superintendent of Public Instruction for allocation for the purposes of the Chino Drug Awareness Program. This bill would require that appropriation to be included in the amounts appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 for that fiscal year.

(43) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(44) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 205 (SB 1556) Johnston. Reporting on incarcerated individuals.

Existing law provides for various human services programs, funded by a combination of federal, state, and local funds, some of which are administered at the state level by the State Department of Social Services.

This bill would require a city, county, or city and county operating a jail to report to the department, twice each month, the name, known aliases, birth date, social security number, and expected release date, if known, of any person who has been incarcerated for a period exceeding 30 days, but would limit this requirement to one report for each new period of incarceration and would authorize the Director of Social Services to suspend the requirement when other information sources ensure that public assistance payments are not paid to ineligible persons. It would require the department to report this information to state and federal government departments and to local agencies that administer public benefits for which incarceration affects eligibility.

By requiring local entities to report information to the department, the bill would create a state-mandated local program.

This bill would appropriate $230,000 from the General Fund to the State Department of Social Services for the purpose of implementing the bill in the 1996–97 fiscal year, and would authorize the department to hire personnel and contract for services necessary for the implementation of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions. In the alternative, a local agency would be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

permitted to receive from the department $25 for each name reported to the department.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 206 (SB 1780) Committee on Budget and Fiscal Review. Social services.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, under which each county provides cash assistance and other benefits to qualified low-income families. Each county is required to pay a share of the cost of both aid grant and administrative costs for the AFDC program.

Existing law also provides for the Food Stamp Program, under which counties distribute food coupons, provided for pursuant to federal law, to eligible households.

This bill would, with specified exceptions, require applicants for, and recipients of, AFDC and Food Stamp benefits, as a condition of eligibility, to be fingerprint imaged, pursuant to a statewide fingerprint imaging system, which would be required to be established pursuant to the bill. Since this program would impose additional duties upon each county, it would constitute a state-mandated local program.

Existing law establishes the Greater Avenues for Independence (GAIN) program, under which each county provides AFDC program recipients with employment and training services, in accordance with approved county plans. Existing law that is operative until July 1, 1996, also states that the Legislature may appropriate from the Employment Training Fund up to specified amounts in the Budget Acts of 1994 and 1995 for purposes of funding the local assistance portion of the nonfederal share of cost in the GAIN program and to execute training contracts for up to $20,000,000 in excess of amounts appropriated in specified provisions of the Budget Act of 1995.

This bill would eliminate those provisions making that authorization inoperative, would state that the Legislature may appropriate up to $20,000,000 from the Employment Training Fund for purposes of funding the local assistance portion of the nonfederal share of cost in the GAIN program, and would revise those provisions of the authority to execute training contracts to apply to specified provisions of the Budget Act of 1996.

Existing law provides that a specified increase in maximum aid payment levels under the AFDC program, as well as an automatic cost-of-living adjustment in these levels, will take effect on November 1, 1996.

This bill would eliminate a portion of this increase and delay the remainder of this increase, including the automatic cost-of-living adjustment, until November 1, 1997.

Existing law provides that when a family does not include a needy child qualified for AFDC benefits, aid shall be paid to a pregnant mother in the amount that would otherwise be paid to one person, if the mother and child, if born, would have qualified for AFDC benefits.

This bill would limit the payment of aid under these circumstances to the month in which the birth is anticipated and the 3-month period immediately prior to the month in which the birth is anticipated.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which payments are made on behalf of low-income children in foster care placements, including group homes.

Existing law contains ratesetting provisions for group homes that require rate adjustments commencing on November 1, 1996.

This bill would delay application of these provisions until November 1, 1997.

Existing law specifies that a group home AFDC-FC reimbursement rate shall not increase, during the period commencing July 1, 1994, and ending October 31, 1996, as a result of a program change, except under specified circumstances.

This bill would extend this requirement to apply to the entire 1996–97 fiscal year.

This bill would also require the department to develop no later than February 1, 1997, a reimbursement rate proposal for specified children placed in out-of-home care, with this proposal to be implemented only upon statutory authorization.

Existing law contains provisions specifying time periods in which interest begins to accrue on an overpayment to a group home under the AFDC-FC program.

This bill would, instead, provide that interest begins to accrue on a group home overpayment on the date of the issuance of the final audit report.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, effective until January 1, 1997, requires the department to implement a program in any participating county whereby the department shall be reimbursed for AFDC overpayment recoveries, in accordance with specified criteria.

This bill would indefinitely extend these provisions, but would eliminate the reimbursement criteria, and instead provide that reimbursement would be made to a participating county based on a plan of operations approved by the department, in accordance with specified requirements.

Existing law provides that families who were formerly recipients of AFDC benefits for 3 of the previous 6 months, and who meet all federal requirements for transitional child care, shall be eligible for 12 months of transitional child care.

This bill would, instead, provide that families who were recipients of AFDC benefits for 3 of the previous 6 months, and who meet all federal requirements for 24 months of transitional child care, shall be eligible for transitional child care for 2 years, with implementation of this provision being subject to the obtaining of federal approval for federal financial participation.

Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), which requires the department to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement Supplemental Security Income (SSI) payments made available pursuant to the federal Social Security Act.

Existing law provides that an increase in maximum SSP payment levels will take effect on November 1, 1996.

This bill would eliminate a portion of this increase and delay the remainder of this increase until November 1, 1997.

Existing law requires that an automatic cost-of-living adjustment be made to SSP benefit levels on January 1, 1997.

This bill would delay that adjustment until January 1, 1998.

Existing law contains provisions for making emergency payments to SSP recipients under certain special circumstances, as defined.

This bill would delay the operative date of these provisions until July 1, 1997.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either pursuant to employment by the recipient or by or through contract by the county, qualified aged, blind, and disabled persons are provided with services to enable them to remain in their own homes.

Under existing law, one of the methods by which a county may provide for in-home supportive services is through the creation of a public authority or through a contract with a nonprofit consortium.

This bill would make various changes in provisions relating to the provision of in-home supportive services by a public authority or nonprofit consortium, as well as other provisions governing requirements for county IHSS program contracts.

Existing law, which is operative until July 1, 1997, and is to be repealed on January 1, 1998, permits any county to issue invitations for bids for, and subsequently to enter into, managed care, capitated rate contracts to serve nonseverely impaired IHSS recipients becoming eligible after the start date of contracts. This provision authorizes a county to permit an IHSS recipient eligible prior to the start date of contracts entered into under this provision to receive services from the contractor, if the recipient elects to do so. This provision also authorizes a county that has an existing IHSS contract that is not a managed care capitation contract to negotiate a managed care capitation contract on a sole source basis with the current contractor.

This bill would revise the scope of that authority to enter into contracts by providing for contracting for the provision of IHSS services using a task frequency mode of service delivery, as defined, and would require the county to provide case management. The bill would revise the method of reimbursement for the provision of those services provided under the contracts.

The bill would permit a recipient to choose any available mode of service, and, if receiving services from the contractor, to change his or her provider and to disenroll from the contractor after giving notice.

The bill would also require the State Department of Social Services to make annual reports to the appropriate committees of the Legislature commencing July 1, 1997.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also extend the operative date of this authority to July 1, 2001, and the repeal date of these provisions until January 1, 2002.

Existing law permits the department to allocate funds to counties to assist in the child support collection program.

This bill would, if AB 1058 is enacted during 1996, and that bill contains specified provisions, also permit the department to allocate funds appropriated in the Budget Act to the Judicial Council for specified family law-related purposes.

Existing law, effective until January 1, 1997, requires the department to conduct a demonstration project, until July 1, 1996, in 10 counties for the placement in foster care of children affected by substance abuse or acquired immune deficiency syndrome (AIDS).

This bill would extend the effective date of these provisions until January 1, 1998, would extend the date during which the demonstration project operates until June 30, 1997, and would impose certain funding requirements for "recovery services" provided under the project.

Existing law requires each county to provide aid and health care to its indigent population not supported by other means, with these programs commonly referred to as general assistance programs.

Existing law permits a county to reduce its financial support levels under its general assistance program below statutorily mandated levels upon a showing to the Commission on State Mandates that the county is in significant financial distress.

This bill would make various changes in these provisions.

Existing law also permits a county to take various actions regarding its general assistance program, including the imposition of residency requirements and the imposition of employment-related requirements which, if not met, will be grounds for temporary discontinuance of benefits. This authority will terminate on January 1, 1997.

This bill would indefinitely extend this authority.

Existing law provides for funding of work-activity programs by the Department of Rehabilitation, both as part of its vocational rehabilitation services and as part of the Habilitation Services Program administered by that department. Work-activity program services are provided to persons with developmental disabilities.

This bill would make changes in ratesetting provisions for these services.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 207 (SB 27) Kopp. County assessor: qualifications.

Existing law does not establish any education and experience qualifications for the office of county assessor.

This bill would provide that no person shall exercise the powers and duties of the office of assessor unless he or she holds a valid appraiser's certificate issued by the State Board of Equalization. However, a duly appointed or elected person could exercise these powers for a period not to exceed one year under a temporary appraiser's certificate, as specified.

The bill would, however, exempt persons holding office as assessor on January 1, 1997, from these requirements.

Ch. 208 (SB 210) Solis. Special education.

(1) Existing law requires each school district, special education local plan area, or county office of education to ensure that a specified continuum of program options is available to meet the needs of individuals with exceptional needs.

This bill would add to that continuum of options regular education programs consistent with federal law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

By imposing additional requirements on school districts and county offices of education, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 209 (SB 825) Kelley. Courts: municipal and superior court judges.

Existing law authorizes the Governor, upon the occurrence of a vacancy in a municipal court judgeship, to reduce the number of municipal court judgeships and increase the number of superior court judgeships by one, as specified, including upon the resignation or retirement of a municipal court judge who is 65 years of age or older.

This bill would revise the latter provision to apply to any municipal court judge who has reached the age of retirement.

Ch. 210 (SB 1443) Lockyer. Substance abuse: parenting class.

Existing law provides for the incarceration or treatment of persons who have committed offenses involving substance abuse.

This bill would provide, in addition, that upon the diversion or conviction of a person for any offense involving substance abuse, the court may require, in addition to any or all other terms of diversion or imprisonment, fine, or other reasonable conditions of sentencing or probation imposed by the court, that the defendant participate in and complete counseling or education programs, or both, including, but not limited to, parent education or parenting programs operated by community colleges, school districts, other public agencies, or private agencies.

Ch. 211 (SB 1563) Wright. Local government finance: property tax revenue allocations.

Existing law generally requires the county auditor, in each fiscal year, to allocate property tax revenues to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also requires a county auditor to make certain property tax revenue allocations to "qualifying cities," as defined, in accordance with a specified Tax Equity Allocation (TEA) formula and to make corresponding reductions in the amount of property tax revenue that is allocated to the county.

This bill would, in the case in which a "qualifying city" becomes the successor agency to a special district as a result of a merger with that district as described in a specified statute, require the county auditor to additionally allocate to that successor "qualifying city" that amount of property tax revenue that otherwise would have been allocated to that special district pursuant to general allocation requirements.

This bill would also state the intent of the Legislature in enacting these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 212 (SB 1600) Leonard. Prisoners: discretionary release.

Existing law provides that notice of any hearing to review or consider the parole suitability or setting of a parole date for any prisoner sentenced to a life sentence shall be sent by the Board of Prison Terms at least 30 days before the hearing to, among other persons, the judge of the superior court before whom the prisoner was tried and convicted.

This bill would provide that the written notice to the judge of the superior court before whom the prisoner was tried and convicted shall be sent by certified mail with return receipt requested. The judge receiving this written notice would be authorized to forward to the parole board specified information that is pertinent to the question of whether the parole board should grant parole or under what conditions parole should be granted. The bill would provide that the parole board shall review and consider all

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

information received and consider adjusting the terms or conditions of parole accordingly.

Ch. 213 (SB 1605) Leslie. California State Library Gold Medal for Excellence in the Humanities and Science: California State Library Foundation.

Existing law provides for the powers and duties of the State Librarian.

This bill would authorize the State Librarian to annually award the California State Library Gold Medal for Excellence in the Humanities and Science to an individual or organization for publication of a work that has enriched the collection of the State Library and enriched the state by significantly contributing to the intellectual, cultural, and scientific knowledge of the people of the state. The bill would require the State Librarian to consult an advisory panel to assist in making the selection of an award recipient. The panel would consist of one representative from the Governor, the President pro Tempore of the Senate, the Speaker of the Assembly, and the Chief Justice of the California Supreme Court. The bill would authorize the State Librarian to seek private contributions to defray the cost of awarding the gold medal and related expenses.

The bill would authorize the State Librarian to enter into an operating agreement with the California State Library Foundation whereby the California State Library Foundation may be designated by the State Librarian as the only authorized provider of copies and reproductions of rare and valuable State Library materials and may provide copies and reproductions of documents and other information found in the collection of the State Library, as requested by members of the public. The bill would authorize the State Librarian to permit the California State Library Foundation to use State Library facilities and equipment, as specified. The bill would also authorize the collection of fees from the public for copying, reproduction, and other services provided by the California State Library Foundation at a level consistent with the cost of providing these services.

Ch. 214 (SB 1648) Wright. Hazardous waste: petroleum contaminated debris.

Existing law requires the Department of Toxic Substances Control to prepare and adopt a list of hazardous wastes subject to the hazardous waste control laws. A non-RCRA hazardous waste is defined as a hazardous waste subject to the hazardous waste control laws, but which is not identified as a hazardous waste in specified federal regulations adopted pursuant to the Resource Conservation and Recovery Act of 1976.

This bill would exempt debris that is contaminated only with petroleum or any of its fractions from regulation under the hazardous waste control laws if specified conditions are met with regard to the contents and disposal of the debris.

Ch. 215 (SB 1952) Mello. Public utilities: economic development.

Existing law requires the Public Utilities Commission to authorize public utilities to engage in programs to encourage economic development. It does not authorize the commission to establish discriminatory rates for the purpose of attracting or benefiting specific industries or business entities. However, it authorizes the commission to provide incentives for the benefit of industries or business entities located within the boundaries of enterprise zones, economic incentive areas, or recycling market development zones.

This bill would also authorize the commission to provide incentives for the benefit of industries or business entities located within the boundaries of federal rural enterprise communities.

Ch. 216 (AB 1127) Friedman. Foster youth.

Existing law imposes various obligations upon foster care providers.

This bill would require foster care providers of adolescents in long-term foster care to ensure that these children receive age-appropriate pregnancy prevention information.

This bill would make a foster care provider, or when the provider objects, the county case manager, responsible for ensuring that these individuals receive referrals to health services when a foster child reaches the age of 18 or is emancipated, whichever occurs first.

The bill would also require the State Department of Social Services, in consultation with the State Department of Health Services, to convene a working group, to include specific representatives, for the purposes of developing a specified prevention plan.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 217 (AB 1346) Baldwin. Civil assessments.

Existing law provides that, in addition to any other penalty in criminal cases, the court may impose a civil assessment not exceeding $250 against any defendant who fails, after notice and without good cause, to appear in court for any proceeding authorized by law.

This bill would additionally authorize the court, in addition to any other penalty in infraction, misdemeanor, or felony cases, to impose a civil assessment against any defendant who fails to pay all or any portion of a fine ordered by the court.

Existing law further provides that if this civil assessment is imposed, no bench or arrest warrant shall be issued with respect to the failure to appear at the proceeding for which the assessment is imposed.

This bill would additionally provide that if a civil assessment is imposed for a failure to pay a fine, no bench or arrest warrant shall be issued with respect to the failure to pay the fine. It also would provide that an outstanding, unserved bench or arrest warrant for a failure to appear or for a failure to pay a fine shall be recalled prior to the subsequent imposition of a civil assessment.

The bill would provide that it shall take effect immediately as an urgency statute.

Ch. 218 (AB 1936) Rainey. Elections: ballot pamphlet and ballots: judicial candidates.

(1) Existing law sets forth specific procedures for the appointment of justices to the courts of appeal and the filling of vacancies when these justices leave office. Part of this process includes submission of the appointees' names to the voters for approval or disapproval. When this occurs, the Secretary of State is required to set forth in the ballot pamphlet for that appellate court district an explanation of the electoral procedure that applies to this process.

This bill would require that the state ballot pamphlet explanation concerning this process inform the voters of how long the term of the justice will be if he or she is approved by the voters.

(2) Existing law requires local elections officials to have ballots printed for the elections within their jurisdictions. When the appointment of a justice of the Supreme Court or court of appeal is submitted to the voters for approval or disapproval, the ballot must contain specified information concerning the vote for that candidate.

This bill would impose a state-mandated local program by requiring that the ballot also include an instruction to the voters , in a specified location, to vote "yes" or "no" for each judicial office, and would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 219 (AB 2011) Hauser. Horseracing.

Existing law provides that a licensed association or fair that is conducting a live meeting in any horseracing zone may accept wagers on any race conducted in this state, if specified requirements are met. Existing law also provides that during calendar periods when both a fair and a thoroughbred association conduct live racing, the thoroughbred association shall be the association authorized to distribute the signal and accept wagers on out-of-zone races.

This bill, in addition, would provide until January 1, 1999, that during calendar periods when the San Mateo County Fair and the Humboldt County Fair both conduct race meetings, the San Mateo County Fair shall be the association authorized to distribute the signal and accept wagers on out-of-zone races, as specified. The bill would also require the San Mateo County Fair to retain, from license fees, $^{3}/_{4}$ of 1% of the out-of-zone wagering handle and to distribute that amount to the Humboldt County Fair.

This bill would also declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 220 (AB 2176) Miller. Peace officers: disciplinary investigation.

Existing law provides that peace officer personnel records, or information obtained from these records, are confidential and shall not be disclosed in any criminal or civil proceeding except by discovery.

This bill would provide that, notwithstanding the above, a department or agency which employs peace officers may release factual information concerning a disciplinary investigation if the peace officer who is the subject of the disciplinary investigation, or the peace officer's agent or representative, publicly makes a statement he or she knows to be false concerning the investigation or the imposition of disciplinary action.

Ch. 221 (AB 2736) Weggeland. Redevelopment: military base conversion redevelopment agencies.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas of those communities known as project areas. The Community Redevelopment Law contains provisions authorizing the establishment of a redevelopment project area located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission. Existing law authorizes the establishment of the March Joint Powers Redevelopment Agency, with the authority to engage in redevelopment activities within a prescribed territory and subject to a prescribed scheme, for the replacement and tax-increment financing of, dwelling units, other than barracks or dormitory-style housing, to include housing affordable to very low, low-, and moderate-income households demolished, or removed as part of the redevelopment project.

This bill would delete specified provisions relating to the formula for the replacement of housing demolished or removed within the boundaries of March Air Force Base.

This bill would amend various provisions of the Community Redevelopment Law relating to military base closure redevelopment agencies, which the bill would rename "military base conversion redevelopment agencies." More specifically, the bill would change the definitions of "blighted area" and "physical conditions that cause blight" applicable to military base closure redevelopment agencies. The bill would revise the requirements of any military base conversion redevelopment agency, by requiring specified payments to be made to affected local education agencies and other taxing entities, as specified, and by deleting existing provisions requiring certain apportionments to school and community college districts.

This bill would add provisions to the law relating to the allocation of tax-increment revenue for the purpose of providing housing to persons of low and moderate income. The bill would state that these provisions shall not be interpreted or applied to reduce the tax increment payable or received by affected taxing entities pursuant to existing law. The bill also would state that the authority and procedures for deferral of allocation of tax increment revenues that is governed by these provisions shall not apply to the tax increment revenues attributable to the property that is located outside the military base and which is allocated to the Low- and Moderate-Income Housing Fund.

Under existing law, every redevelopment plan submitted by a redevelopment agency to the legislative body thereof is required to be accompanied by a report containing specified information, including an environmental impact report on any project that the agency intends to carry out or approve which may have a significant effect on the environment pursuant to the California Environmental Quality Act (CEQA).

This bill would exempt a redevelopment plan prepared pursuant to this bill from those provisions if the redevelopment agency determines at a public hearing, as specified, that the need to adopt a redevelopment plan at the soonest possible time requires the agency to delay application of the provisions of CEQA to the redevelopment plan. The bill would provide that if the redevelopment agency finds that the application of CEQA to the redevelopment plan is required to be delayed, the redevelopment agency is required to certify an environmental impact report for the redevelopment plan within a specified period of time following the effective date of the ordinance adopting the redevelopment plan. The bill also would provide that if, as a result of the preparation of the environmental document prepared pursuant to these provisions, it is necessary to amend the redevelopment plan to mitigate any impacts, the agency would be required to amend

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the redevelopment plan, as specified. The bill further would provide that if the environmental document is determined to be inadequate, the redevelopment agency shall not continue with projects that implement the redevelopment plan until an adequate environmental document has been certified. This determination, according to the bill, would not affect the validity of the redevelopment plan.

The bill additionally would provide that until the redevelopment agency, or the community, certifies an environmental impact report for the redevelopment plan, all projects, as defined in CEQA, that implement the redevelopment plan would be subject to CEQA, including, but not limited to, specific plans and rezonings. The bill also would require the environmental document for any implementing project to include an analysis and mitigation of potential cumulative impacts, if any, that otherwise would not be known until an environmental document for the redevelopment plan is certified or approved, and to include a reporting or monitoring program required pursuant to specified provisions of CEQA.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 222 (AB 3129) Lee. Alameda Naval Air Station: Fleet Industry Supply Center.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas of those communities known as blighted areas. The Community Redevelopment Law contains provisions authorizing the establishment of redevelopment project areas located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission.

This bill would authorize the adoption of a redevelopment plan covering all or part of the Alameda Naval Air Station and the Fleet Industrial Supply Center in the City of Alameda. It would require that tax increment payments be made to affected taxing entities pursuant to a specified provision of law.

This bill would provide that dwelling units, as defined, in the Alameda Naval Air Station and the Fleet Industrial Supply Center Project Area made available to a member of the Homeless Collaborative, pursuant to specified provisions of federal law and thereafter substantially rehabilitated, as defined, shall be deemed substantially rehabilitated units for purposes of compliance with provisions of law requiring a redevelopment agency to make specified percentages of units available at affordable housing cost to persons of low and moderate income.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, because of the unique circumstances applicable to the City of Alameda and the County of Alameda due to the closure of the Alameda Naval Air Station and the Fleet Industrial Supply Center, a general statute cannot be made applicable and this special statute is therefore necessary. The bill would make legislative findings and declarations relative to the transfer of federal military property, as specified, from a previous redevelopment area to a redevelopment area permitted by this bill.

Ch. 223 (SB 1539) Johnson. Industrial loan companies.

Existing law provides that an industrial loan company may not invest its funds except in investments that are legal investments for commercial banks or in choses in action issued by other industrial loan companies.

This bill would specify that the investments that are legal investments for commercial banks include the capital stock, obligations, or other securities of one or more corporations, subject to rules and orders prescribed by the Corporations Commissioner.

Ch. 224 (SB 1579) Leonard. Vehicles: driving under the influence: failure to appear.

(1) Existing law authorizes a court to give notice to the Department of Motor Vehicles of a failure to appear for specified violations relating to vehicles when any person has violated a written promise to appear in court, a lawfully granted continuance of his or her promise to appear in court, or an order to appear in court. If thereafter the case in

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

which the promise was given is adjudicated or the person who has violated the court order appears in court or otherwise satisfies the order of the court, the magistrate or clerk of the court hearing the case is required to sign and file with the department a certificate to that effect.

Existing law authorizes a court to give notice to the department if any person has willfully failed to pay a lawfully imposed fine within the time authorized by the court, except as specified. If thereafter the fine is fully paid, the magistrate or clerk of the court is required to issue and file with the department a certificate showing that the fine has been paid.

This bill would, additionally, require a court to give notice to the department of a failure to appear for specified violations relating to driving under the influence of alcohol, drugs, or a combination of alcohol and drugs, when any person has violated a written promise to appear in court, a lawfully granted continuance of his or her promise to appear in court, or an order to appear in court. If thereafter the case in which the promise was given is adjudicated or the person who has violated the court order appears in court or otherwise satisfies the order of the court, the bill would require the magistrate or clerk of the court hearing the case to sign and file with the department a certificate to that effect.

By imposing additional duties upon the courts, the bill would create a state-mandated local program.

(2) The bill would require the department to refuse to issue or renew a driver's license when it has received a notice as authorized under existing law, as specified above, or as required under the provision specified above that the bill would add.

The bill would authorize any notice received by the department as specified in the provision that the bill would add to be removed from the department records when the notice has been on file 10 years.

The bill would require the department to suspend the driving privilege of a person for whom the department has received the notice specified in the provision the bill would add, after giving 45 days' notice. The bill would require the suspension to continue until the department receives a specified certificate from the court to the effect that the case has been adjudicated, that the person has appeared in court, or that the person has otherwise satisfied the order of the court.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 225 (SB 1816) Lewis. Industrial loan companies.

Existing law prohibits an industrial loan company from making any loan to, or purchasing a contract, loan, or chose in action from, specified persons and entities, including officers and directors of the company. This prohibition does not apply to the purchase of a contract, loan, or chose in action from a finance lender, a mortgage broker, a mortgage banker, a real estate broker, or other licensed lender, provided written authorization for the purchase is obtained from the Corporations Commissioner.

This bill would provide that the prohibition also does not apply to the purchase of life insurance by an industrial loan company on behalf of an officer or director as part of the officer's or director's employee benefit plan package.

Ch. 226 (SB 1839) Committee on Revenue and Taxation. Hazardous waste: fees: prepayment.

The Hazardous Substance Tax Law establishes procedures for the collection of the fees imposed upon the management of hazardous waste, and provides for the prepayment of specified generator fees. A violation of that law is a crime.

This bill would eliminate, as specified, requirements governing the prepayment of those generator fees with respect to generators with minimal liability.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires each owner or operator of a hazardous waste facility to pay a facility fee for each reporting period, as specified.

This bill would correct an erroneous reference in those provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 227 (SB 1890) Calderon. Industrial loan companies.

Existing law generally requires any loan or obligation, made or acquired by an industrial loan company, as specified, which loan or obligation is secured primarily by real property and has an outstanding principal balance of $10,000 or more, to be secured by real property or personal property having a combined fair market value of at least 115% of the principal amount owing on the loan or obligation and on specified prior encumbrances.

This bill would instead provide that these loans shall be secured either by real property, or by real and personal property combined, having a fair market value of at least 110% of the principal amount owing on the loan and other encumbrances. The bill would also provide that the principal amount of private mortgage insurance may be included in making these calculations.

Existing law provides that certain loans may be secured by real property with a lower fair market value than otherwise required, subject to requirements that the Corporations Commissioner may impose.

This bill would provide that any loan or obligation saleable in the secondary market or owned for less than 90 days comes under these provisions, as specified.

Ch. 228 (SB 1913) Johannessen. Vehicle license fees: vehicle modifications or additions.

The Vehicle License Fee Law provides that the annual amount of the license fee for any vehicle, other than a trailer coach which is required to be moved under permit, is 2% of the market value of the vehicle, as specified. It provides for the determination of the market value of any vehicle and for reclassification to increase the market value of a vehicle that is modified or to which additions are made at a cost of $200 or more, except as specified.

This bill would, until January 1, 2000, limit this reclassification requirement to commercial vehicles, as defined, and raise the cost of modifications or additions that requires reclassification to $2,000. This bill would also exclude certain vehicle emission systems and radiotelephone equipment, as specified, from those modifications or additions requiring reclassification.

This bill would take effect immediately as a tax levy.

Ch. 229 (SB 2102) Committee on Agriculture and Water Resources. Certified farmers' markets.

Existing law, the California Uniform Retail Food Facilities Law, regulates sanitary standards in retail food establishments, including certified farmers' markets and vehicles selling food. Existing law prohibits food preparation at certified farmers' markets. Existing law imposes the primary responsibility for the enforcement of this law on local health agencies, and provides that the willful violation of any of these provisions is a misdemeanor.

Existing law, until January 1, 1997, also provides an exception to this prohibition for food samples if certain sanitary conditions are met, including the use of potable water for hand washing and sanitizing and the disposal of utensils and hand washing water in a manner approved by the local enforcement agency. Existing law, until January 1, 1997, also authorizes vendors selling food adjacent to and under the jurisdiction and management of a certified farmers' market to store, display, and sell food from a table or display fixture apart from the vehicle in a manner approved by the local enforcement agency.

This bill would delete the January 1, 1997, repeal date for these exceptions, thereby extending the existing law indefinitely.

To the extent that this bill would continue the duties of local public health agencies and local enforcement agencies, this bill would impose a state-mandated local program. Also, by continuing indefinitely the imposition of requirements on certified farmers'

NOTE: Superior numbers appear as a separate section at the end of the digests.

markets, the bill would expand the scope of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 230 (AB 372) Cortese. Mortgages.

Existing law requires a beneficiary or assignee of the beneficiary of an obligation secured by any deed of trust to execute and deliver to the trustee specified documents, including the original note, deed of trust, and request for a full reconveyance, when the obligation has been satisfied. Existing law conclusively presumes, until January 1, 1988, that a fee charged by a trustee, beneficiary, or mortgagee for all services involved in the preparation, execution, and recordation of the full reconveyance to be reasonable if it does not exceed $65.

This bill would delete the inoperative date of the presumption.

Ch. 231 (AB 964) Isenberg. Vehicles: highways: closures.

Existing law authorizes a local authority to adopt rules and regulations, by ordinance or resolution, for temporarily closing to through traffic a highway under its jurisdiction when all of specified conditions are, after a public hearing, found to exist. Existing law prohibits the temporary closure from being more than 18 months, except that this period may be extended for an additional period of not more than 18 months.

This bill would authorize the temporary closure specified above to be extended for not more than 5 consecutive periods of not more than 18 months each if, prior to each extension, a public hearing is held and the specified conditions, that the bill would revise, are found to continue to exist.

The bill would require the local authority to mail written notice of the public hearings specified above to all owners of property adjacent to the portion of highway where a temporary closure or extension of temporary closure is proposed.

Ch. 232 (AB 1285) Hauser. State Coastal Conservancy: Cascade Ranch.

Existing law requires the Director of General Services, when so requested by the State Coastal Conservancy, to lease, rent, sell, exchange, or otherwise transfer any land, interest therein, or option acquired as specified, pursuant to an implementation plan approved by the conservancy.

This bill would authorize the conservancy to request the Department of General Services to retain, reserve, transfer, or convey to a public entity, nonprofit organization, or other eligible third party, any portion of, or interest in, the real property known as Cascade Ranch in San Mateo County if the conservancy makes specified determinations.

Ch. 233 (AB 1438) Campbell. Special education: nonpublic, nonsectarian schools or agencies.

Existing law requires a nonpublic, nonsectarian school or agency to submit a list of uniform tuition fees for services, as a condition of certification, and requires the Superintendent of Public Instruction to ensure that tuition fee information is uniformly collected from those schools and agencies that seek certification. Existing law requires the superintendent to not certify or to decertify a nonpublic, nonsectarian school or agency that does not submit that list by June 30, 1996. Existing law provides for the inoperation of this provision on June 30, 1999.

This bill would extend the requirement that the superintendent not certify or decertify a nonpublic, nonsectarian school or agency that does not submit the list of uniform tuition fees for services to June 30, 1998. The bill would provide that uniform tuition fees are based on the per-day costs of providing special education and designated

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

instruction and services, as specified, that are contained in the total operating budget of a school or agency. The bill would specify that the total operating budget includes, but is not limited to, certain costs that are incurred or projected to be incurred for the administration and operation of the school. The bill would require separate service fees, as specified, to be deducted from the total operating budget. This bill would extend the date of inoperation to June 30, 2001.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 234 (AB 1997) House. Annexation: City of Chowchilla.

Existing law permits a city to annex noncontiguous territory within the county in which the city is located, under specified conditions.

This bill would provide that notwithstanding existing law, upon approval by the local agency formation commission, and subject to enumerated conditions, the City of Chowchilla may annex noncontiguous territory of not more than 1,280 acres, located in the County of Madera and which constitutes state correctional facilities.

The bill would provide that if, after the completion of the annexation, the state sells that territory or any part thereof, all of the territory which is no longer owned by the state shall cease to be part of the City of Chowchilla.

The bill would also provide that if territory is annexed, the city may not annex any territory not owned by the state and not contiguous to the city although the territory is contiguous to the territory annexed by the provisions of the bill.

The bill would provide that when territory ceases to be part of the city pursuant to these provisions, the legislative body of the city shall adopt a resolution, as specified, conforming the detachment of that territory from the city.

The bill would specify that if territory annexed to the city becomes contiguous to the city, its limitations concerning the annexation of the territory would not apply.

Under the Mills-Alquist-Deddeh Act, all transit operators and city or county governments with responsibility for providing municipal services to a given area collectively, are authorized to file claims with the transportation planning agency for only those funds that represent that area's apportionment, as defined, in the local transportation fund.

This bill would define the term "area," for purposes of apportioning funds for the County of Madera to include specified prisons even if annexed by the City of Chowchilla.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 235 (AB 2050) Alby. Child day care facilities.

Existing law provides for the licensure and regulation of child day care facilities by the State Department of Social Services.

Existing law requires the department to obtain each applicant's criminal record prior to issuing a license, and authorizes the Director of Social Services to grant an exemption from disqualification based on a criminal conviction for a license or special permit, or for employment, residence, or presence in a child day care facility under certain circumstances. Existing law prohibits the granting of an exemption where the conviction is for prescribed offenses involving sexual offenses and other violent felonies.

This bill would also prohibit the granting of an exemption where the person is convicted of a prescribed crime involving sexual offenses for which the offender is required to register with state and local police authorities.

Ch. 236 (AB 2214) Richter. Richvale Irrigation District.

(1) The Irrigation District Law generally defines "voter" to mean a registered voter and resident of an irrigation district. That law generally requires a board member of an irrigation district to be a voter, landowner of the district, and a resident of the division which he or she represents.

This bill would authorize the Board of Directors of the Richvale Irrigation District to adopt a resolution that authorizes persons holding title to real property within the district to vote. The bill would impose a state-mandated local program by imposing additional requirements on local authorities relating to the conduct of that district's election. The bill would allow any eligible voter, as defined, to be a member of the board of that district and would prescribe related matters.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would provide that these provisions are operative as long as the district does not provide certain services for domestic purposes and would require the district to notify the Secretary of State 30 days prior to commencing to provide any of those services.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 237 (AB 2262) Cunneen. Insurance: agents and brokers.

Existing provisions relating to the general regulation of the business of insurance set forth various requirements as respects the provision of notice by an insurer.

This bill would provide for the purposes of those provisions that the obligation of an insurer to furnish any notice to its insured required by law may be carried out by an insurer's general agent.

Ch. 238 (AB 2287) Woods. Walnut burl: theft.

(1) Existing law requires persons who sell, buy, or transport lots of over 200 pounds of fruits, nuts, or vegetables for commercial purposes, with specified exceptions, to provide, obtain, or possess, as the case may be, a record showing proof of ownership of each lot. Existing law also requires that proof of ownership be made available for inspection upon request of the Secretary of Food and Agriculture, the county agricultural commissioner, or any peace officer upon probable cause to believe that the fruits, nuts, or vegetables are in unlawful possession. Any violation of these requirements is a misdemeanor under existing provisions of law.

This bill would include in these provisions persons who sell, buy, or transport lots of over 200 pounds of any burl wood from a walnut tree, living or dead. Thus, the bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 239 (AB 2319) Weggeland. Income taxes: earnings withholding orders: service.

Existing law allows an earnings withholding order for taxes or any other notice or document required in connection with a withholding order for taxes to be served by mail, as specified.

This bill would require the Franchise Tax Board to establish a pilot program to issue earnings withholding orders, required to be served or provided on after January 1, 1997, and before January 1, 1999, to certain government and private employers by magnetic media, electronic transmission, or other electronic technology. The bill would require the board to report to the Legislature, on or before January 1, 1999, as to the results of the pilot program, as specified.

Ch. 240 (AB 2383) Weggeland. Real property: transfer disclosure.

Existing law requires specified written disclosures to be made to prospective transferees of real property.

This bill would make clarifying changes to these provisions.

Ch. 241 (AB 2562) Setencich. Fruits, nuts, and vegetables: standards.

(1) Existing law authorizes the Secretary of Food and Agriculture to adopt quality and maturity standards for fruits, nuts, and vegetables.

Existing law also requires the secretary to create an industry-funded standardization program, and authorizes an assessment on the handlers of commodities to implement and enforce the program. Existing law also allows producers of commodities to file a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

petition requesting that a commodity be excluded from the application of the provisions of the standardization program. These provisions are to be repealed on January 1, 1997.

This bill would extend the repeal date of the existing law until January 1, 2000. Since a violation of these provisions is a misdemeanor, this bill would impose a state-mandated local program by continuing in existence until January 1, 2000, a crime that otherwise would be repealed.

This bill, commencing January 1, 1997, and until March 31, 1997, would authorize producers of commodities to file a petition requesting that a commodity be excluded from the application of the provisions of the standardization program.

(2) Existing law requires the secretary to appoint a committee to provide recommendations to the secretary on all matters pertaining to the standardization program and authorizes the committee to set assessment rates to be paid by the handlers of the commodities.

This bill would authorize committee members to participate in meetings of the committee by means of telephone conference calls.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 242 (AB 2566) Goldsmith. Law library trustees.

Existing law specifies the membership of the board of law library trustees for each county.

This bill would make special provision for the membership of the board of law library trustees in San Diego County, as specified.

Ch. 243 (AB 2575) Caldera. Streets and highways: property and business improvement districts.

(1) Existing law authorizes a city council to initiate proceedings to form a property and business improvement district by the adoption of a resolution expressing its intention to form a district, upon the written petition, signed and acknowledged, of the property owners in the proposed district who will pay more than 50% of the assessments proposed to be levied.

This bill, instead of requiring that the petition be signed and acknowledged, would require that the petition be signed by the specified property owners.

(2) Existing law requires that the petition specified above include the management district plan.

This bill would, instead, require that the petition include a summary of the management district plan.

(3) Existing law requires that the resolution of intention specified above contain, among other things, the management district plan. The management district plan is required to contain, among other things, a list, by assessor's parcel number, of the properties to be benefited.

This bill would delete the requirement that the list be by assessor's parcel number, would require that the list be of properties to be assessed, and would require that the list include the assessor's parcel numbers.

(4) Existing law requires the city council, within 15 days of the receipt of the written petition specified above, to appoint an advisory board to make specified recommendations to the city council.

This bill would, instead, require that the appointment of the advisory board be made before adopting a resolution establishing the district.

Ch. 244 (AB 2590) Burton. San Francisco Bay Area Rapid Transit District: purchases, contracts.

Existing law authorizes the general manager of the San Francisco Bay Area Rapid Transit District to act for the governing board of the district in the case of public works contracts and procurements of less than $50,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would increase the above amount to $100,000, and would require the general manager to notify the governing board of each action taken pursuant to that authorization.

Ch. 245 (AB 2616) Woods. Mental health facilities.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law defines a health facility to include a psychiatric health facility licensed by the State Department of Mental Health.

This bill would provide that notwithstanding any other provision of law, and to the extent consistent with federal law, a psychiatric health facility shall be eligible to participate in various federal programs if certain conditions are met.

This bill would revise those conditions.

Existing law establishes procedures regarding voluntary admissions to county psychiatric health facilities, and defines that term to mean the nonhospital 24-hour acute care facility provided by the county pursuant to the requirements stated above.

This bill would require that the beds in a psychiatric health facility shall be licensed as acute psychiatric beds.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 246 (AB 2789) Kuehl. State park system: Malibu Pier: operating agreement: repair refurbishment, and operation.

Existing law authorizes the Department of Parks and Recreation to enter into operating agreements for the care, maintenance, administration, and control of lands within the state park system pursuant to specified review procedures.

This bill would authorize the department and the City of Malibu to enter into an operating agreement for the repair, refurbishment, and operation of the Malibu Pier for a period not to exceed 30 years if the agreement also requires the rent to be reviewed and adjusted at least every 5 years to reflect economic conditions in the area in which the pier is located.

The bill would make related legislative findings and declarations.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 247 (AB 2824) Bordonaro. Community care facilities: delayed egress devices.

Existing law provides for licensure and regulation of community care facilities by the State Department of Social Services. Violation of these licensing provisions is a crime.

This bill would permit residential facilities and foster family homes with persons that have developmental disabilities, as defined, to install and utilize delayed egress devices, as defined, if certain conditions are met. By changing the definition of a crime, this bill would impose a state-mandated local program. By requiring that local fire protection officials approve the installed delayed egress devices, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 248 (AB 2992) Napolitano. Controller: duties.

Existing law requires the Controller, upon settlement of the account of a person indebted to the state, to issue a numbered certificate showing who is to make the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

payment, the amount, and the fund to be credited, and when the account is settled to give the debtor a discharge.

This bill would repeal those requirements.

The Timber Yield Tax Law imposes a tax on every timber owner and every other person who harvests or causes timber to be harvested at a specified rate of the total immediate harvest value of that timber. All taxes, interest, penalties, and other amounts paid or collected under that law, except as specified, are deposited in the Timber Tax Fund, a specified portion of which is allocated to the Controller for transmittal to county treasurers, as specified, on November 30 and May 31 of each fiscal year.

This bill would instead require the Controller to transmit the balance that existed in that fund on the preceding November 10 or May 10, as specified.

Chapter 268 of the Statutes of 1984 created the Computer Software Refund Fund to provide refunds of certain taxes with respect to custom computer programs. These refunds were to be paid on or before September 15, 1984.

This bill would require the Controller, on or before March 15, 1997, to transfer any remaining funds in the Computer Software Refund Fund to the General Fund and would thereafter abolish the Computer Software Refund Fund.

Ch. 249 (AB 3403) W. Murray. Redevelopment: notices.

Existing law relating to community development plans requires local agencies to publish notices regarding hearings on proposed redevelopment plans and proposed amendments to community redevelopment plans. Existing law also requires these notices to be mailed to the last known assessee or owner of each parcel of land in the redevelopment area.

This bill would require these notices to be written in nontechnical language and in a clear and coherent manner using words with common and everyday meaning. Because this bill would impose additional responsibilities upon local agencies with respect to redevelopment notices, it would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 250 (AB 2451) Hauser. Commercial fishing: salmon enhancement.

(1) Existing law prohibits until January 1, 1997, with specified exceptions, a person who is 16 years of age or more and less than 70 years of age from taking salmon for commercial purposes or from being on board a vessel on which salmon are taken for commercial purposes while salmon are being taken or transported unless that person has a commercial fishing salmon stamp affixed to his or her commercial fishing license. Existing law also prohibits until January 1, 1997, with specified exceptions, the operator of a vessel on which salmon are taken for commercial purposes from permitting a person on board that vessel while salmon are being taken or transported, unless that person is less than 16 years of age or 70 years of age, or unless that person has a commercial fishing salmon stamp affixed to the person's commercial fishing license. Existing law, until January 1, 1997, provides for the issuance of the commercial fishing salmon stamps for specified fees.

This bill would continue that existing law beyond January 1, 1997, by extending that repeal date to January 1, 2002. Because existing law makes a violation of those prohibitions a crime, the bill would impose a state-mandated local program by extending the duration of a crime.

(2) Because existing law requires the money collected for the issuance of the stamps to be deposited in the continuously appropriated Fish and Game Preservation Fund, the bill would make an appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 251 (AB 2215) Cortese. Fish and Wildlife Pollution Account: Fish and Game Preservation Fund.

Under existing law, various subaccounts are created within the Fish and Wildlife Pollution Account in the Fish and Game Preservation Fund. Existing law specifies the uses for which the funds in the subaccounts may be expended by the Director of Fish and Game or his or her deputy or designee. Existing law also requires the Department of Fish and Game to maintain a cost accounting system to account for the cost of each activity or program engaged in by the department.

This bill would require the department to maintain a cost accounting system consistent with existing law that accounts for the costs of each activity or program using funds from the subaccounts.

Ch. 252 (AB 2697) Brewer. Insurance: Insurance Guarantee Association.

Existing law provides for the creation of the California Insurance Guarantee Association, composed of various lines of insurers, but excluding, among others, life, disability, and health insurers. Under existing law, the association provides insolvency insurance to members, and pays certain claims against member insurers in the event of the insolvency of the member.

This bill would provide that the association has the right to intervene as a party in specified proceedings in which the liquidation of a member insurer is sought.

Ch. 253 (AB 205) Cannella. State employees.

Existing law permits the Director of the Department of Personnel Administration to authorize higher allowances than those provided by current regulations for reimbursement of traveling expenses of officers and employees of the state while traveling on official state business in the greater Los Angeles metropolitan area during, or immediately before or after, the 1984 Olympics.

This bill would repeal this provision.

Ch. 254 (AB 2091) Alpert. Alcoholic beverages: licenses: convention centers and event centers.

The Alcoholic Beverage Control Act limits the number of on-sale general alcoholic beverage licenses which may be issued in any county based on the ratio of licenses to the specific number of inhabitants in the county. The act provides that premises owned by the state, any incorporated city, county, city and county, airport district, or other district or public corporation of the state, or premises leased to any city or county, shall be exempt from the limitation, provided the premises are operated as a bona fide public eating place, with specified exceptions.

This bill would extend this exemption to convention centers and event centers which are operated by municipal, independent nonprofit agencies for the purpose of providing meeting rooms, exhibit space, or event and theatrical seating. The bill would require that any license issued pursuant to these provisions be issued only on the condition that all revenues generated from the license be segregated and allocated for the operations and capital requirements of the convention center or event center.

Ch. 255 (AB 2979) Speier. Unemployment compensation: employers of domestic service employees: reporting.

Existing law requires an employer to file with the Director of Employment Development a report of unemployment contributions and a report of wages paid to his or her workers within a specified time. Existing law authorizes the director to prescribe the form of these reports.

This bill would allow employers employing individuals performing domestic service to file reports of wages by telephone, effective July 1, 1997. The Department of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Employment Development would compute the employer unemployment contributions owed, and these employers would be authorized to pay the contributions by credit card or charge card, as specified.

Ch. 256 (SB 1474) Kopp. Transportation: Metropolitan Transportation Commission: regional transit coordinating councils: duties.

Existing law requires the Metropolitan Transportation Commission, in coordination with the transit operator coordinating council established by the commission pursuant to a specified provision of existing law, to adopt rules and regulations to promote the coordination of fares and schedules for all public transit systems within its jurisdiction.

This bill would, instead, require the commission to adopt the specified rules and regulations in coordination with a regional transit coordinating council.

The bill would authorize the commission, in consultation with the council, to identify those functions performed by individual public transit systems that could be consolidated to improve service. The bill would authorize the commission to recommend that those functions be consolidated, as specified.

The bill would also authorize the commission to improve service coordination and effectiveness in specified transit corridors by recommending specified improvements in those corridors.

Ch. 257 (SB 1479) Lewis. Dentists: licensure.

Existing law provides for the licensure and regulation of the practice of dentistry by the Board of Dental Examiners of California. Existing law requires the board to administer provisions of law relating to the establishment of diversion treatment programs for drugs or alcohol, and requires the board to establish criteria for the acceptance, denial, or termination of licentiates in a diversion program.

This bill would add provisions regarding the methods by which a person may participate in the diversion program, and would provide, among other things, that neither acceptance nor participation in the diversion program precludes the board from investigating or disciplining a participant for unprofessional conduct, except under certain prescribed circumstances.

Existing law provides for the confidentiality of all board and committee records of proceedings regarding treatment of a participant in the diversion program except in the case of a criminal proceeding.

This bill would also provide an exception to the requirement of confidentiality of the records if a participant withdraws or is terminated from the diversion program at a time when the diversion evaluation committee determines that he or she presents a threat to the public health and safety, and the bill would require each participant to sign an agreement of understanding regarding this exception.

Ch. 258 (SB 1519) Johnson. Department of Justice: internet directory.

Existing law requires the Attorney General to establish and maintain a variety of automated computer database systems, including the online missing persons registry, the Violent Crime Information Network, and the Missing and Exploited Children's Recovery Network. Existing law also requires the Department of Justice to maintain state summary criminal history information and specifies who may be furnished with this information.

This bill would require the Department of Justice to establish and maintain a publicly accessible computer internet directory of information relating to persons for whom an arrest warrant has been issued pursuant to an alleged violation of any offense defined as a violent felony, critical missing children, and unsolved homicides.

Ch. 259 (SB 1532) Wright. Hazardous waste: generator fees.

Existing law requires each operator of a hazardous waste facility to pay the board a facility fee for each reporting period and requires each generator of hazardous waste to pay a generator fee for each calendar year, unless the generator has paid a facility fee for each specific site for the calendar year for which the generator fee is due. Those fees are deposited in the Hazardous Waste Control Account and the funds in the account may be expended by the Department of Toxic Substances Control, upon appropriation by the Legislature, for specified purposes with regard to hazardous waste regulation and,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to the Carpenter-Presley-Tanner Hazardous Substance Account Act, for removal and remedial actions related to the release of hazardous substances.

A facility operating pursuant to a standardized permit or grant of interim status is exempt from the annual facility fee for a period of time equal to the number of years that the facility lawfully operated prior to September 21, 1993, and paid facility fees.

This bill would instead require that the facility receive a credit for the annual facility fee and would exempt a generator from the generator fee if the generator received that credit under the facility fee provisions for each specific site, for the calendar year for which the generator fee is due.

The bill would make a statement of legislative intent that this change in the provision imposing the generator fee is declaratory of existing law.

Ch. 260 (SB 1847) Russell. Physicians and surgeons: patient advice.

Existing law states that it is the public policy of the state that licensed physicians and surgeons be encouraged to advocate for medically appropriate health care, as defined, for their patients. Existing law provides that the application and rendering by any person, as defined, of a decision that penalizes a physician and surgeon principally for advocating for medically appropriate health care, as defined, violates public policy.

This bill would prohibit any person from penalizing a physician and surgeon for that advocacy, or from in any way discouraging a physician and surgeon from communicating information to a patient in furtherance of medically appropriate health care.

Ch. 261 (SB 1876) Solis. Evidence.

Under existing law, evidence of a person's character or a trait of his or her character is inadmissible when offered to prove his or her conduct on a specified occasion, except as provided.

This bill would provide that in a criminal action in which the defendant is accused of an offense involving domestic violence, as defined, evidence of the defendant's commission of other domestic violence is not inadmissible under the above rule, except as specified. The bill also would require the people to disclose this evidence to the defendant, including statements of witnesses or a summary of the substance of any testimony that is expected to be offered, at least 30 days before the scheduled date of trial or at a later time as the court may allow for good cause.

Ch. 262 (AB 1818) Baca. Judges.

(1) Existing law provides that the Court of Appeal for the Second Appellate District consists of 5 divisions having 4 judges each, and 2 divisions having 3 judges each, to hold sessions as specified.

This bill would instead provide that the Court of Appeal for the Second Appellate District shall consist of 7 divisions having 4 judges each, to hold sessions as specified.

(2) Existing law provides that the Court of Appeal for the Fourth Appellate District consists of 3 divisions. Existing law requires that one of these divisions hold its regular sessions in Orange County and provides that that division shall have 5 judges.

This bill would provide that the division, which is directed to hold its regular sessions in Orange County, shall have 6, rather than 5, judges.

(3) Existing law prescribes the number of judges for the superior and municipal courts in each county.

This bill would increase the number of judges in specified counties, thereby establishing a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 263 (SB 457) Kelley. Transportation: intercity passenger rail service.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Under existing law, an intercity rail service receiving specified state funding is eligible to continue to receive those funds only if it maintains a ratio of fare revenues to avoidable costs of at least 55%. In order to receive state funding, a commuter rail service is required to maintain a ratio of fare revenues to avoidable costs of at least 40%. The California Transportation Commission, at the request of the Department of Transportation, may waive those requirements for up to 3 years.

This bill would delete those provisions and would authorize the department, upon approval of the Secretary of Business, Transportation and Housing, to enter into interagency transfer agreements with specified joint exercise of powers entities, pursuant to which the respective joint powers entity would assume responsibility for intercity passenger rail services within a particular corridor, and be allocated funds for that purpose pursuant to the agreement. The transfer of funds would constitute an appropriation. The bill would specify various terms to be included in the agreement. A business plan, as specified, would be required to be prepared for the provision of intercity passenger rail services pursuant to an interagency transfer agreement.

The bill would authorize expansion of the membership of the Southern California Regional Rail Authority, an existing joint exercise of powers entity formed to operate the commuter rail network known as Metrolink, for the purpose of administering intercity rail services in specified southern California counties.

The bill would create the Capitol Corridor Joint Powers Board, subject to being organized, as provided, specify its membership, prescribe its functions and responsibilities, and authorize the board to enter into an interagency agreement with the department to assume responsibility for Capitol Corridor intercity rail services. The board would be organized when 2 jurisdictions elect to appoint members to the board and only those jurisdictions that appoint members to the board prior to December 31, 1996, would be member-agencies of the board.

The bill would authorize specified local agencies to form a joint exercise of powers board for the purpose of assuming responsibility for intercity rail passenger services in the San Joaquin Corridor.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 264 (AB 1794) Granlund. State highways: relinquishment.

Existing law defines State Highway Route 39 in the state highway system.

This bill would delete that portion of State Highway Route 39 that is within the city limits of the City of Azusa, except as specified, from the state highway system when the Department of Transportation and the city agree to the terms of the relinquishment of that particular portion to the city, and would make related changes.

Ch. 265 (AB 2047) Hauser. Automobile dismantlers: advertising.

(1) Existing law makes it unlawful for any person to act as an automobile dismantler without a license or a temporary permit issued by the Department of Motor Vehicles. Existing law regulates the activities of a licensed automobile dismantler.

This bill would prohibit any person required to be licensed as an automobile dismantler under the Vehicle Code from advertising the services of an automobile dismantler without indicating in that advertisement the occupational license or permit number of the automobile dismantler as issued by the department. Because under existing law a violation of this provision would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 266 (AB 2636) Bowler. Transportation: Sacramento Regional Transit District: ordinances.

Existing law creates the Sacramento Regional Transit District and prescribes the functions, powers, and duties of the district and its board of directors.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, in addition to the enumerated powers, expressly authorize the board to adopt specified ordinances and provide specified penalties for violation of those ordinances. The bill would authorize the board to designate persons regularly employed by the district as inspectors or supervisors to enforce those ordinances as well as specified provisions of the Penal Code and Vehicle Code.

Ch. 267 (SB 223) Ayala. Vehicles: towing and storage : liens.

Existing law provides that every person has a possessory lien for the compensation to which he or she is legally entitled for the towing or storage of any vehicle that has been authorized to be removed by a public agency, a private property owner, or a lessee, operator, or registered owner of the vehicle.

This bill would extend the possessory lien to include labor associated with recovery or load salvage involving the described vehicles.

Ch. 268 (SB 1729) M. Thompson. Corporations: securities.

Existing law makes it a crime for any person to offer or sell in this state any security in an issuer or nonissuer transaction, unless the sale or security is either qualified or exempted.

This bill would exempt from qualification any security issued by an issuer registered as an open-end management company or unit investment trust under the Investment Company Act of 1940 if a registration statement for that security is effective under the Securities Act of 1933, and, prior to any offer or sale of any securities pursuant to this exemption, the issuer files with the Commissioner of Corporations a notice of intention to sell and a copy of the current prospectus, and pays a specified filing fee.

The bill would also require an issuer, if any offer or sale is made pursuant to this exemption more than 12 months after the date of filing of the notice, to file another notice of intention to sell, a copy of the current prospectus, and a specified filing fee.

Existing law imposes various fees in connection with securities-related actions by the Commissioner of Corporations.

This bill would impose a fee for filing the notice of transactions under certain provisions that would be added by SB 261, and would increase the fee for filing a notice of an exchange incident to a merger, consolidation, or sale of assets, except as specified.

Ch. 269 (SB 2038) Rogers. Air pollution: stationary source offsets.

Existing law allows increases in emissions of air pollutants at a stationary source to be offset by emission reductions credited to a stationary source in another district if specified conditions are met.

This bill would make a nonsubstantive technical change in those provisions.

Ch. 270 (SB 2116) Killea. Olympic license plates: fee.

(1) Existing law imposes an additional $100 fee for the initial issuance of a set of commemorative Olympic reflectorized license plates.

This bill would reduce that additional fee from $100 to $50.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 271 (AB 2009) Cortese. Waste: solid waste facilities: permits.

Existing law, the California Integrated Waste Management Act of 1989, regulates the management of solid waste. The act requires the California Integrated Waste Management Board and certified local enforcement agencies to perform specified functions with regard to the regulation of solid waste management, including the issuance and enforcement of solid waste facilities permits. The board is required to concur or object to the issuance, modification, or revision of any solid waste facilities permit within 60 days of the board's receipt of any proposed solid waste facilities permit. However, the board is required to object to the permit and to submit its determination and specific objections to the local enforcement agency, the applicant, and the city or county within which the facility is located, until a countywide integrated waste management plan has been approved by the board, if the board makes a determination concerning specified diversion requirements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete that requirement that the board object to the permit until the countywide integrated waste management plan is approved.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 272 (AB 2633) Firestone. County retirement systems.

The County Employees Retirement Law of 1937 authorizes the board of retirement and board of investment to contract with attorneys in private practice for legal services and advice.

This bill would authorize boards of retirement and investment in Kern County, Orange County, San Joaquin County, and Santa Barbara County to contract with county counsel or with attorneys in private practice, or employ staff attorneys, for legal services.

Ch. 273 (SB 2084) Leslie. Fishing: public access to impounded waters.

Existing constitutional law reserves to the people the right to fish upon and from the public lands of the state and in the waters thereof, excepting fish hatcheries, with specified incompatible exceptions. Existing statutory law requires the owner of a dam to accord to the public for the purpose of fishing, the right of access to the waters impounded by the dam during the open season for the taking of fish in the stream or river, subject to the regulations of the Fish and Game Commission.

This bill would make that statutory right of public access inapplicable to any impoundment of water by a dam that is wholly located on privately owned land that is primarily agricultural or residential in nature if the impounded waters are from a stream or river that is not naturally frequented by fish and if the dam does not prevent the free passage of fish over or around the dam. The bill would declare that the above described provision is intended to be declaratory of existing law.

Ch. 274 (AB 2297) Cunneen. Children.

Existing law creates the Aid to Families with Dependent Children-Foster Care program, under which a combination of federal, state, and county funds are used to provide reimbursement to families and facilities providing foster care to eligible children.

Existing law also requires each county to provide child welfare services.

This bill would, until July 1, 2001, provide for the establishment in Santa Clara County, at the county's option, of a pilot project to continue the provision of intensive wrap-around services, as defined, to eligible children in foster care or at imminent risk of this placement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 275 (AB 2329) Goldsmith. Dependent children.

Under existing law, when a peace officer or social worker takes a minor into custody on the basis of specified abuse or neglect, he or she is required to take immediate steps to notify the minor's parent, guardian, or a responsible relative that the minor is in custody and the place where the minor is being held. Existing law requires the juvenile court to order that the parent or guardian shall not be notified of the exact whereabouts of the minor under certain circumstances, and also authorizes the peace officer or social worker to refuse to disclose the place where the minor is being held under certain circumstances.

This bill would revise these provisions to specify that the peace officer or social worker is required to take immediate steps to notify the minor's parent, guardian, or a responsible relative that the minor is in custody and that the child has been placed in a facility authorized by law to care for the child. The bill would also require the peace officer or social worker to provide a telephone number where the minor may be contacted, rather than the location where the minor is being held. The bill would require that the address of any licensed foster family home in which the child has been placed be kept confidential until the dispositional hearing, except as specified.

Ch. 276 (AB 2421) Baca. California Community Colleges Economic Development Program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law establishes the California Community Colleges Economic Development Program and sets forth specified components of the mission of that program, subject to approval and amendment by the Board of Governors of the California Community Colleges, in meeting the vocational education and training needs of business and industry in the state.

This bill would additionally specify that a component of the mission of the program is to assist communities experiencing military base downsizing and closures.

Ch. 277 (SB 1562) Greene. School facilities.

(1) Existing law includes various state general obligation bond acts, as approved by the voters, that provide for the issuance of bonds to raise revenues for, among other purposes, elementary and secondary school facility construction.

This bill would repeal and reenact the provisions governing state school bonds including the State School Building Aid Law of 1949, the State School Building Aid Law of 1952, the State School Construction Law of 1957, and the Urban School Construction Aid Law of 1968.

(2) Existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976, provides bond funding for the construction, reconstruction, modernization, and replacement of school facilities and the performance of deferred maintenance activities on school facilities.

This bill would repeal and reenact this law and would make technical, nonsubstantive changes in those provisions.

(3) Existing law also provides for the Emergency School Classroom Law of 1979, school district revenue bonds, the Archie-Hudson and Cunneen School Technology Revenue Bond Act, and the California School Finance Authority.

This bill would repeal and reenact those bodies of law and would make technical, nonsubstantive changes in those provisions.

(4) Existing law sets forth specific requirements for the location and construction of school buildings including, among other provisions, the Field Act.

This bill would repeal and reenact those provisions and would make technical, nonsubstantive changes in those provisions.

(5) Under existing law, the governing board of any school district is authorized to levy a fee, charge, dedication, or other requirement against any development project within the boundaries of the school district for the purpose of funding the construction or reconstruction of school facilities.

This bill would repeal and add those provisions and would make technical, nonsubstantive changes in those provisions.

(6) This bill would provide that it is to be construed as a restatement and not as a new enactment.

(7) This bill would provide that the above-referenced provisions of the bill would become operative on January 1, 1998.

Ch. 278 (AB 420) Weggeland. Vehicles: manufactured homes: transportation.

(1) Existing law authorizes the Department of Transportation and local authorities with respect to highways under their respective jurisdictions to issue, upon application in writing and if good cause appears, a special or annual permit authorizing the applicant to move a manufactured home exceeding specified width limitations, but not exceeding 14 feet in total width, exclusive of specified lights and devices, upon any highway under the jurisdiction of the party granting the permit.

This bill would establish specific conditions and specifications applicable to the movement of manufactured homes that are 14 feet to 16 feet in total width, would specifically prohibit the department from issuing a permit to move a manufactured home that is in excess of 14 feet in total width unless that department determines that all of the specified conditions and specifications have been met, and would revise legislative findings and declarations regarding the movement of manufactured homes on the highways. Because a violation of the specific conditions and specifications applicable to the movement of manufactured homes would be a crime, the bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 279 (AB 734) Conroy. Public contracts: nonresident contractors.

Existing law requires a state agency to give a California company, as defined, a preference on construction contracts as against a nonresident contractor. The preference would be equal to any preference that the nonresident contractor receives on public entity construction contracts in the other state.

This bill would require a nonresident contractor to disclose to the awarding agency any and all bid preferences provided to that contractor by the state or country in which it has its principal place of business.

Ch. 280 (AB 2131) W. Murray. Department of the Youth Authority: correctional education authority.

Under existing law, the Department of the Youth Authority has jurisdiction over all educational training and treatment institutions established and maintained in the state as correctional schools for the reception of wards of the juvenile court and other persons committed to the department. Existing law requires that the educational program of the department be responsive to the needs of all wards, including those who are educationally handicapped or limited-English-speaking wards.

This bill would establish within the Department of the Youth Authority a correctional education authority for the purposes of carrying out the education and training of wards committed to the youth authority. The correctional education authority would be required to adopt standards of proficiency in basic skills for wards attending any of grades 7 to 12, inclusive, and would be required to meet the model curriculum standards adopted by the Superintendent of Public Instruction. The bill would provide that differential standards and assessment procedures may be adopted for pupils who meet specified criteria, including wards for whom an individualized education program has been developed and for whom the regular instructional program has been modified or for wards who have been diagnosed with a learning handicap or disability. The correctional education authority would be authorized to issue diplomas of graduation from high school to wards who have completed the required course of study and meet the standards of proficiency in basic skills adopted by the correctional education authority. The bill would also authorize the authority to administer to wards the general educational development tests that have been approved by the State Board of Education. The bill would also provide that for purposes of receiving federal funds, the correctional education authority shall be deemed a local educational agency.

Ch. 281 (AB 2173) Margett. San Gabriel Basin Water Quality Authority Act.

(1) The San Gabriel Basin Water Quality Authority Act authorizes the San Gabriel Water Quality Authority to plan, finance, and implement groundwater remediation activities, as prescribed. The act authorizes the authority to impose an annual pumping right assessment, not to exceed $35 per acre-foot, to carry out certain activities, as prescribed. The act provides that the act shall remain in effect only until January 1, 1998.

This bill would require the board of the authority, if it determines that its actions are in accordance with a specified basinwide groundwater quality management and remediation plan and specified records of decision issued by the United States Environmental Protection Agency, to institute a limited function status, pursuant to which the authority would, by contract, delegate to a specified water master or water district the operating responsibilities of the authority, as prescribed. To the extent the bill would impose new duties on the board, the bill would impose a state-mandated local program.

The bill would decrease the authorized pumping right assessment to $20 per acre-foot, and would authorize the authority to adopt, by resolution, rules and regulations for the collection of pumping right assessments, as prescribed.

The bill would change the above repeal date to July 1, 2002.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 282 (AB 2494) Margett. Contractors.

Existing law provides that a contractor who has been disciplined 2 or more times within a 10-year period is required to disclose that information, as specified. A contractor is also required prior to entering into a contract to perform work on residential property with 4 or fewer units, to provide a disclosure notice, as specified. A failure to comply with these requirements may subject a contractor to various monetary penalties.

This bill would, instead, require disclosure with respect to a contractor who has had his or her license suspended or revoked 2 or more times within an 8-year period, as specified. The bill would retain monetary penalties for the violation of this disclosure requirement. A failure to comply with the other disclosure and notice requirements would constitute grounds for disciplinary action rather than subjecting the contractor to monetary penalties as under current law.

Existing law provides that a civil penalty of $15,000 may be assessed against a licensee for a violation of provisions relating to the aiding, abetting, or conspiring with an unlicensed person to evade licensing requirements, or the entering into a contract with an unlicensed contractor.

This bill would, instead, provide that the civil penalty shall not exceed $15,000. It would also make related clarifying changes in those penalty provisions.

Ch. 283 (AB 2770) Cannella. Bingo.

Existing law permits cities, counties, and cities and counties to allow bingo games to be conducted by specified organizations for charitable purposes. A city, county, or city and county is authorized to impose a specified license fee and also to impose an additional fee of 1% of the monthly gross receipts over $5,000 derived from bingo games, collected monthly.

This bill would delete the provision authorizing that additional fee of 1% of the monthly gross receipts over $5,000 and would authorize an additional fee to be imposed and collected monthly for law enforcement and public safety costs that are directly related to bingo activities, not to exceed the actual service costs incurred by the city, county, or city and county.

Ch. 284 (AB 3047) Olberg. Stationary sources: demolition or removal: portable emissions units.

Existing law authorizes air pollution control districts and air quality management districts to establish a system to require a permit to build, erect, alter, replace, operate, or use any article, machine, equipment, or contrivance that may cause the issuance of air contaminants. Existing law requires the districts to establish a system by which reductions in emissions are used to offset future increases.

This bill would prohibit a district from requiring, as part of its permit system or otherwise, that any form of emission offset or emission credit be provided to offset emissions resulting from any activity related to, or involved in, the demolition or removal of a stationary source. The bill would authorize an owner or operator of an existing portable emissions unit, as defined, to relocate that equipment within the same air basin if specified requirements are met. The bill would require that any equipment that is relocated pursuant to those provisions remain subject to all previously imposed permit terms and conditions, and, except as specified, would prohibit a district from imposing any new permit terms or conditions on permitted equipment that is relocated if the relocated equipment is placed into substantially the same service that it was placed into at its previous location.

Ch. 285 (SB 678) Polanco. Public utilities natural gas surcharge: public policy programs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities.

This bill would require the commission to prepare and submit a report to the Legislature that recommends an approach to financing existing low-income public policy programs that does not create a competitive imbalance between natural gas providers and nonutility natural gas providers.

Ch. 286 (SB 1550) Lewis. Bank and corporation taxes: doing business: conventions and trade shows.

The Bank and Corporation Tax Law imposes a tax on every corporation doing business within the limits of this state, except as specified. Existing law provides that a bank or corporation is doing business in this state if it is actively engaging in any transaction for the purpose of financial or pecuniary gain or profit.

This bill would provide, for purposes of that law only, for income years beginning on or after January 1, 1996, that any corporation that is not incorporated in this state and whose sole activity in this state is engaging in convention and trade show activities, as specified, in this state for 7 or fewer calendar days, or any portion thereof, during the income year and that does not derive more than $10,000 of gross income reportable to this state, as specified, from those activities is not a corporation doing business in this state.

This bill would take effect immediately as a tax levy.

Ch. 287 (SB 2002) Ayala. Contractors: licensing: exemptions.

Existing law provides for the licensing and regulation of contractors by the Contractors' State License Board.

This bill would specifically exempt from these provisions admitted surety insurers whenever those surety insurers engage a contractor to undertake the completion of a contract on which a performance or completion bond was issued by the surety insurer, provided all actual construction work is performed by duly licensed contractors.

Ch. 288 (SB 2027) Watson. Parent and child: termination of rights.

Existing law provides that an action may be brought for the purpose of having a child under the age of 18 years declared free from the custody and control of either or both parents under specified circumstances, including, the situation in which the child's parent or parents are mentally disabled and likely to remain so. In order to support a finding under this provision, the evidence of any 2 experts, each of whom shall be either a physician or surgeon, certified as specified, or a licensed psychologist who has a doctoral degree in psychology and at least 5 years of postgraduate experience in the diagnosis and treatment of emotional and mental disorders is required.

This bill would, in addition to this requirement, authorize a court to call, in specified circumstances, a licensed clinical social worker or a marriage, family, and child counselor, experienced as specified.

Ch. 289 (SB 2060) Johnson. Political Reform Act of 1974: filing of statements.

(1) Existing provisions of the Political Reform Act of 1974 require candidates for elective office, prior to soliciting or receiving any contribution or loan relating to that office, to file a statement of intention to be a candidate for that office with the Fair Political Practices Commission and, for specified candidates, to thereafter establish a campaign bank account into which campaign funds must be deposited and provide a statement to the commission regarding the location of and other information pertaining to the account.

This bill would instead require that an original and one copy of these statements be filed with the Secretary of State and that the copy be available to the commission.

(2) The act requires that statewide elected officers, Members of the Legislature, Members of the Board of Equalization, and candidates for election to those offices file statements of economic interests with specified agencies.

This bill would impose a state-mandated local program by requiring that the agency that receives the original filing of these statements to forward a copy to the Secretary of State.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

Ch. 290 (AB 3131) Lee. Security bars: fire safety: regulations.

Existing law known as the State Housing Law, generally regulates the construction, maintenance, occupancy, and use of buildings used for human habitation, including regulation of fire safety by the State Fire Marshal. Existing law also generally requires the State Fire Marshal to prepare, adopt, and submit for approval building standards pursuant to the California Building Standards Code, and other regulations relating to fire and panic safety establishing minimum requirements for the installation and maintenance of security bars that present a fire or panic hazard.

This bill would prohibit the sale of security bars, referred to as "burglar bars" in this bill, in California at wholesale or retail unless the burglar bars are either labeled or their packaging contains warning information pursuant to regulations adopted by the State Fire Marshal.

This bill would require the State Fire Marshal, by a specified date, to develop and adopt regulations specifying labeling and packaging information that address the requirements in the California Building Standards Code intended to promote safety in the event of a fire. It would require that the regulations direct the consumer or installer to contact the local fire department or local building official to determine whether the city or county requires that burglar bars have a release mechanism on the outside for use by the fire department in the event of a fire emergency.

This bill would require a contractor or installer of burglar bars to provide the owner of the residential dwelling, as defined, the above information prior to installing burglar bars.

This bill would make certain of its provisions operative 180 days after the regulations required by this bill are adopted by the State Fire Marshal.

The violation of provisions of the State Housing Law and provisions relating to the State Fire Marshal constitute a misdemeanor. Because this bill would make changes to those provisions, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 291 (AB 317) Granlund. Local agencies: shopping cart retrieval.

Existing law regulates the operation of businesses which retrieve missing shopping carts, as specified, but does not regulate the provision of similar services by a city, county, or city and county.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize a city, county, or city and county to impound certain shopping carts, as specified, and would declare the intent of the Legislature that this regulation constitutes a matter of statewide concern that shall be governed solely by these provisions.

Ch. 292 (AB 1460) Morrissey. Air pollution: heavy-duty motor vehicles: excessive smoke emissions.

Existing law requires the State Air Resources Board to develop a test procedure for the detection of, and to adopt regulations prohibiting the use of heavy-duty motor vehicles that have, excessive smoke emissions, for purposes of a roadside inspection program, and provides for the enforcement of those provisions, including requiring the vehicle owner to immediately correct deficiencies and to pay a specified civil penalty for a violation of the state board regulations. Existing law also requires the state board to adopt standards for excessive emissions of smoke for purposes of requiring vehicle owners or operators to inspect their vehicles.

This bill would prohibit the use of any heavy-duty motor vehicle that emits excessive smoke. The bill would subject the vehicle owner to that civil penalty for a violation of that prohibition, and would make related changes.

Ch. 293 (AB 2419) Bowler. Transportation: congestion management programs.

(1) Existing law requires the development, adoption and updating of a congestion management program for each county that includes an urbanized area. Existing law requires congestion management programs to be incorporated into the regional transportation improvement program by December 15 of each odd-numbered year.

This bill would provide that this incorporation requirement does not apply in those counties that do not prepare a congestion management program in accordance with existing law.

(2) Under existing law, a congestion management program is required to contain specified elements.

This bill would delete the trip reduction element and would make corresponding changes.

(3) Under existing law, a congestion management program is required to be developed for specified counties and to include every city and the county. The program is required to be developed and adopted by the county transportation commission or by another public agency designated by the county board of supervisors and the city councils of a majority of cities representing a majority of the population in the incorporated area of the county.

This bill would make those requirements inapplicable in a county in which a majority of local governments, collectively comprised of the city councils and the county board of supervisors which, in total, represent a majority of the population of the county, adopt resolutions electing to be exempt from the congestion management program.

Ch. 294 (AB 2630) Morrissey. Adult education: funding.

Existing law authorizes school districts to conduct education programs for adults. Existing law prohibits adult education programs, courses, and classes from being used to supplant the regular high school curriculum for high school pupils enrolled in adult education, and specifies various criteria that those programs, courses, and classes must meet. Existing law requires enrollment of a high school pupil in an adult education program, course, or class to be for sound educational purposes and specifies those purposes to include, among others, enrollment in adult education programs, courses, or classes that allow the pupil to gain vocational and technical skills, provided the regular high school does not offer a program of vocational and technical education.

This bill would instead permit a high school pupil to enroll in an adult education program, course, or class if the program, course, or class allows the pupil to gain vocational and technical skills beyond that provided by the regular high school's vocational and technical education program.

Ch. 295 (AB 2648) B. Thompson. Local planning.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing provisions of the Planning and Zoning Law prohibit enactment of local ordinances that prohibit or discriminate against any residential development because of, among other things, the age of the owners or intended occupants of the residential development. It provides that nothing in that law shall be construed to prohibit extending preferential treatment to residential developments assisted by federal or state governments or by a local entity.

This bill would provide, in addition, that nothing in those provisions shall be construed to prohibit the County of Riverside from enacting and enforcing zoning to provide housing for older persons, in accordance with state or federal law, if enacted prior to January 1, 1995.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

The bill would declare that, because of the unique circumstances applicable to the zoning classifications implemented by the County of Riverside, a statute of general applicability cannot be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution.

Ch. 296 (AB 3317) Margett. School district reorganization: Los Angeles County Office of Education.

Existing law authorizes the reorganization of school districts, which may be initiated upon the filing with the county superintendent of schools of a petition to reorganize one or more school districts signed by a specified number of registered voters, specified property owners, or the majority of the members of the governing boards of the school districts that would be affected by the proposed reorganization. Existing law places other responsibilities on the county superintendent of schools with respect to the reorganization process.

This bill would authorize county superintendents of schools to provide the following assistance with respect to efforts to reorganize one or more school districts: (1) provide assistance prior to the initiation of an action to reorganize, as specified; (2) process and evaluate multiple petitions, as specified; and (3) provide assistance to newly reorganized school districts during the interim period.

This bill would prohibit the Los Angeles County Office of Education from using funds allocated to it pursuant to the Budget Act to instigate, solicit, or promote the development of plans to reorganize school districts, except as specified.

Ch. 297 (AB 3262) Ackerman. State Board of Forestry: Range Management Advisory Committee.

Existing law requires the State Board of Forestry to appoint an 11-member Range Management Advisory Committee, as prescribed, and consult with that advisory committee on rangeland resource issues under consideration by the board. Existing law authorizes the Secretary of the Resources Agency to consult with the advisory committee on rangeland resource issues.

This bill would require the secretary, the Secretary for Environmental Protection, and the Secretary of Food and Agriculture to notify the advisory committee of, and would encourage them to consult with the advisory committee on, rangeland resource issues that are under consideration by their respective agencies or department.

Ch. 298 (SB 292) Costa. School attendance.

(1) Existing law specifies that a day of attendance for certain pupils who are also enrolled part time in classes of the California State University or the University of California or in a community college, as specified, is 180 minutes. Existing law requires this 180-minute minimum schoolday to be reported as attendance for $^{3}/_{4}$ of the full 240-minute minimum schoolday for purposes of computing the average daily attendance of these pupils.

This bill would require that commencing with the 1995–96 fiscal year the attendance in excess of the 180-minute minimum for these pupils be computed and reported by determining the percentage of the full 240-minute minimum schoolday the pupils are actually in attendance and would prohibit the reporting of more than one full day of attendance for these pupils.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law permits the governing board of a community college district to admit to any community college under its jurisdiction as a special part-time student any high school student who is eligible to attend and provides a method for reimbursing community college districts for that attendance. Existing law also permits the governing board of any school district to determine which students would benefit from advance scholastic or vocational work and to authorize those students to attend a community college as special part-time students, as specified.

This bill would provide that for the purpose of receiving state apportionments, a community college may only report full-time equivalent students (FTES) for high school pupils permitted to attend a community college as special part-time students if those students are enrolled in community college classes that are open to the general public.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 299 (SB 1888) Mello. Air pollution: visibility obscurants.

Existing law prohibits the discharge into the atmosphere of any air contaminant of a specified shade or opacity and makes certain exceptions to that requirement.

This bill would exempt from those provisions the use of an obscurant, as defined, for the purposes of training military personnel and the testing of military equipment by the United States Department of Defense on any military reservation.

Ch. 300 (SB 1896) Costa. Local agency fees: public utilities: California Telecommunications Infrastructure Development Act.

Existing law prescribes the conditions under which cities and counties are authorized to impose specified fees.

This bill would enact the California Telecommunications Infrastructure Development Act, to specify that any permit fee imposed by a city, including a chartered city, a county, or a city and county, for the placement, installation, repair, or upgrading of telecommunications facilities such as lines, poles, or antennas, by a telephone corporation authorized to provide telecommunications services, shall not exceed the reasonable costs of providing the service for which the fee is charged, and shall not be levied for general revenue purposes.

This bill would declare, among other things, that its provisions do not constitute a change in existing law.

Ch. 301 (SB 2050) Calderon. Retail installment accounts: default.

Existing law provides that a seller or holder of a retail installment account or a retail installment contract may require a buyer to pay a delinquency charge for each installment that is in default for 10 days or more in an amount not to exceed $10.

This bill would revise these provisions to authorize a seller or holder of a retail installment account or a retail installment contract to impose a delinquency charge not in excess of $15 when the period of default is not less than 15 days, or to charge the fee described above, as specified. The bill would require the seller or holder of a retail installment account to provide a minimum of 20 days between the monthly billing date and the date upon which the minimum payment is due, exclusive of the applicable grace period described above.

Ch. 302 (AB 988) Hawkins. Criminal procedure.

Existing law provides, with respect to specified proceedings or investigations regarding felony offenses, that if a person refuses to answer a question or produce evidence on the ground that he or she may be incriminated and if the person is ordered to comply but would have been privileged to withhold the answer given or the evidence produced except for the order, the person shall not be prosecuted or subjected to any penalty or forfeiture for, or on account of, any fact or act concerning which he or she was required to answer or produce evidence, except as specified.

This bill would expressly provide that this provision does not prohibit the district attorney or any other prosecuting agency from requesting an order granting use immunity or transactional immunity to a witness compelled to give testimony or produce evidence.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 303 (AB 1432) Richter. Education: district interns.

Existing law authorizes the governing board of any school district that maintains kindergarten or grades 1 to 12, inclusive, or that maintains classes in bilingual education, or, in the case of special education programs for pupils with mild and moderate disabilities, the Los Angeles Unified School District, to employ district interns to provide instruction to pupils in those grades or classes as a classroom teacher. Prior to employing those district interns, existing law requires the governing board to certify to the Commission on Teacher Credentialing that an insufficient number of fully credentialed teachers are available.

This bill would delete the requirement that the governing board certify to the Commission on Teacher Credentialing that an insufficient number of fully credentialed teachers are available. The bill would require that any district interns be hired in consultation with an accredited public institution of higher education offering an approved program of pedagogical teacher preparation.

Ch. 304 (AB 2108) Mazzoni. Solid waste: new tires: disposal fee: waste tire haulers.

(1) Existing law, the California Integrated Waste Management Act of 1989, regulates the handling and management of solid waste and is administered by the California Integrated Waste Management Board.

Existing law, the California Tire Recycling Act, a part of the waste management act, requires every person who leaves tires for disposal with a seller of new or used tires to pay a disposal fee of $.25 per tire to the seller. The tire recycling act authorizes the seller to retain 10% of that fee as reimbursement for any costs associated with the collection of the fee and requires the remainder to be remitted to the state on a quarterly basis for deposit in the California Tire Recycling Management Fund, which the act creates in the State Treasury.

This bill would instead require a fee to be paid by every person who purchases a new tire, as defined, from a retail seller of new tires, permit the seller to retain 10% of the fee as reimbursement for costs, and require the remainder to be remitted to the state on a quarterly basis.

(2) The waste management act requires every person who engages in the transportation of waste tires to hold a valid waste tire hauler registration, except as specified, and requires any person engaged in the transportation of waste tires to follow specified requirements.

This bill would authorize any traffic officer, as defined, and any peace officer, as specified, to enforce those provisions as authorized representatives of the board.

The bill would require the waste tire hauler registration and a copy of the manifest for the waste tires to be presented upon demand of an authorized representative of the board.

(3) The bill would require any person operating a vehicle, or combination of vehicles, in the transportation of waste tires, to be registered with the board, unless specifically exempted, as specified. The bill would make violation of this requirement an infraction, thereby imposing a state-mandated local program by creating a new crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 305 (AB 3103) Bowler. Department of the California Highway Patrol: executive reorganization.

(1) The Governor's Reorganization Plan No. 1 of 1995, which took effect on July 12, 1995, abolished the California State Police Division in the Department of General Services and transferred the functions of the division and the duties and responsibilities assigned to that division to the Department of the California Highway Patrol.

This bill would codify the changes made by the plan. The bill would require any section of any act enacted during the 1996 calendar year that substantively amends or otherwise

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

affects a section affected by this bill to prevail over this bill, whether enacted prior to, or subsequent to, this bill.

(2) Under existing law, disability benefits payable for eligible sworn members of the Department of the California Highway Patrol whose disability is solely the result of cumulative trauma or injury is required to be limited to the period of temporary disability or entitlement to maintenance allowance.

This bill would further limit the benefits to the actual period of temporary disability or entitlement to maintenance allowance, or for one year, whichever is less.

(3) The bill would require the Commissioner of the Department of the California Highway Patrol, until January 1, 1998, to appoint an interagency task force to discuss and recommend methods of improving security at state agency offices where state employees have direct contact with the public. The task force would be comprised of representatives of the Department of Motor Vehicles, the Department of General Services, the Department of the California Highway Patrol, the Employment Development Department, the Health and Welfare Agency, the Department of Industrial Relations, and the Department of Justice and would present its recommendations for improving security to the Governor and the Legislature on or before December 31, 1997.

Ch. 306 (AB 2748) Napolitano. County employees' retirement: benefits.

The County Employees Retirement Law of 1937 authorizes safety members to purchase safety membership service credit for general membership service upon payment of specified contributions.

This bill would allow specified active safety members not previously within the field of membership as a safety member to purchase not more than 5 years of safety membership service credit upon payment of the difference between member and employer contributions actually paid as a general member and what would have been paid had the person been a safety member. The provision would only be applicable to Los Angeles County.

Ch. 307 (SB 1799) Mountjoy. Nomination papers: signatures.

Existing law specifies the number of registered voters required to sign a nomination paper for various offices.

This bill would declare that these provisions are mandatory, not directory, and that no nomination paper shall be deemed sufficient that does not comply with these provisions. The bill also would declare that its provisions shall not be construed to prohibit withdrawal of signatures pursuant to a specified provision of existing law, or to prohibit a court from validating a signature which was previously rejected upon showing of proof that the voter whose signature is in question is otherwise qualified to sign the nomination paper.

Ch. 308 (SB 218) M. Thompson. Public entities.

(1) Existing law prescribes the composition of the governing body for a county sanitation district. Existing law, notwithstanding those provisions, prohibits a member of the San Luis Obispo County Board of Supervisors from serving as a member the governing body of the South San Luis Obispo County Sanitation District.

This bill would prohibit a member of the board of supervisors from serving as a member of that governing body unless, in the absence of that supervisor, there would otherwise be an even number of members of the governing body.

(2) Existing law authorizes any eligible county, upon the recommendation of the county assessor, and by resolution of the board of supervisors of that county adopted not later than December 1 of the fiscal year for which it is to first apply, to elect to participate in the State-County Property Tax Administration Program. Existing law defines "eligible county" as a county in which additional property tax revenue allocated to school entities would reduce the amount of General Fund moneys apportioned to school entities.

This bill would require both the County of Solano and the County of San Benito to be deemed eligible counties that may, upon the recommendation of the county assessor, and by resolution of the board of supervisors of the county adopted on or before March 31, 1996, elect to participate in the program. For the Counties of Fresno, Orange, San Benito,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and Solano, the bill would provide that any loan agreement signed on or before July 31, 1996, shall be deemed a loan agreement for the 1995–96 fiscal year for these purposes.

(3) The Napa County Flood Control and Water Conservation Act creates the Napa Flood Control and Water Conservation District, specifies its objects and purposes, and prescribes its duties and powers. Under the act, the Napa County Board of Supervisors acts as the ex officio board of supervisors of the district.

This bill would instead require the board of supervisors of the district to be composed of 11 directors, including the members of the Napa County Board of Supervisors and additional specified public officials, thereby imposing a state-mandated local program by increasing the duties of those specified public officials. The bill would make conforming changes. The bill would provide that these provisions are to take effect on January 1, 1997.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 309 (SB 362) Kopp. Public financing.

Existing law authorizes the state and local governmental agencies to issue various bonds, notes, and other evidences of indebtedness.

This bill would authorize the state and a legislative body of a local governmental agency in selecting any person, which is defined to include any broker, dealer, municipal securities dealer, investment advisor, or investment firm, to provide underwriting services involving the issuance of securities, to consider, among other things, prior conduct of the person, or any employee of the person, including, but not limited to, acts constituting fraud or a violation of federal or state securities laws and that resulted in the issuance by, or on behalf of, a governmental regulatory agency of a cease and desist order, a preliminary injunction that has not been dissolved or replaced by a permanent injunction or a permanent injunction, censure, or any other administrative or judicial enforcement order.

Ch. 310 (SB 1421) Johnson. City of Tustin: term limits.

The law existing prior to January 1, 1996, did not authorize the imposition of limitations on the number of terms that persons may serve on governing bodies of general law cities. As of that date, existing law authorizes a city council of a general law city to adopt a measure that imposes a limit on the number of terms a member of a city council may serve, provided that it is submitted to the city voters at a regularly scheduled election and is approved by a majority vote.

This bill would permit the city council of the City of Tustin to adopt, without voter approval, a measure to limit the number of terms a member of the city council may serve provided that a proposal containing those provisions was submitted to, and was approved by, a majority vote of the city voters at a regularly scheduled election. The bill also would provide that any ordinance adopted pursuant to these provisions would apply prospectively from the effective date of the enactment of this bill.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances within the City of Tustin that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 311 (SB 1496) Johnson. Insurance: insurers: tender offers.

Existing law provides that no person may make a tender offer for, or a request for tenders of, any voting security of a domestic insurer or of any other person controlling a domestic insurer, if, as a result of the consummation, the person would acquire control of the insurer, unless the person files specified information relative to the transaction with the Insurance Commissioner. Existing law also provides that these provisions do not apply to tender offers or related transactions that have been exempted by the commissioner on the grounds that the transactions are not comprehended within the purposes of these provisions.

This bill would specifically exempt a transaction from these tender offer requirements if the insurer whose shares are to be acquired remains a direct or indirect subsidiary of the same ultimate controlling company person within the insurer's holding company

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

system, neither the acquiring person nor any affiliate acquires or incurs any debt, guarantee, or other liability related to the transaction, and no shares are purchased by or sold to a person who is not an affiliated person in that system.

Ch. 312 (SB 1536) Lewis. Optometry.

Existing law regulates the practice of optometry and requires any optometrist who has an office for the practice of optometry to be registered to practice optometry. Existing law also requires any optometrist who has more than one office to have a branch office license for each additional office.

This bill would provide that neither an optometrist nor an individual practice association shall be deemed to have an additional office solely by reason of the optometrist's participation in an individual practice association, as defined, or the individual practice association's creation or operation. It would provide that the provision not be construed to exempt an optometrist who is a member of an individual practice association and who practices in more than one location, to obtain a branch office license for each additional location, but that he or she is not required to obtain additional branch office licenses solely due to his or her participation in an individual practice association.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 313 (SB 1639) Ayala. Obligations: vehicles: conditional sales contracts.

(1) Existing law requires written notice of intent to dispose of a repossessed or surrendered motor vehicle to be given to all persons liable on a conditional sales contract, and provides that those persons are only liable for any deficiency remaining after disposition of the vehicle if that notice is given, except as specified.

This bill would require this notice to contain a provision informing persons liable on a motor vehicle conditional sales contract that they will be liable, upon disposition of the vehicle, for the deficiency balance plus interest at the contract rate, or at the legal rate of interest if there is no contract rate, from the date of disposition to the date of entry of judgment.

The bill would also provide that the notice does not affect the discretion of the court to strike out an unconscionable interest rate or to determine whether the rate is unconscionable.

(2) Existing law imposes various requirements upon conditional sales contracts for the financing of an automobile by the seller of the automobile. Among other things, existing law requires that at least 15 days' written notice of intent to dispose of a repossessed or surrendered motor vehicle be given to all persons liable on the contract.

This bill would provide that if a creditor has requested a cosigner as a condition of granting credit to any person for the purpose of acquisition of a motor vehicle, the creditor or holder shall give the cosigner a written notice of delinquency prior to the repossession of the motor vehicle if the motor vehicle is to be repossessed pursuant to the credit agreement. The bill would provide that a creditor or holder who fails to comply with this requirement may not recover any costs associated with the repossession of the vehicle from the cosigner.

These provisions would apply to sellers of motor vehicles who obtain a conditional sales contract and to other lenders who give value to a purchaser to acquire a motor vehicle.

Ch. 314 (SB 1691) Craven. Local agency formation.

Existing law establishes a local agency formation commission in each county to review and approve or disapprove of local governmental agency changes of organization or reorganization within the county and to perform other related functions. Existing law provides, among other things, that a change of organization or reorganization may be made subject to various specified terms and conditions including (1) the establishment, continuation, termination, combining, consolidation or separation of offices, departments or boards, and (2) the designation of the method for selection of members of the legislative body of a district, or the number of those members, or both, where there are proceedings for a consolidation or a reorganization providing for a consolidation or formation of a new district where those changes are authorized by the principal act under which a district is established.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that notwithstanding specified provisions of acts prescribing the procedure for the establishment of certain types of districts, the local agency formation commission, in approving either a consolidation or reorganization involving two or more special districts, may increase the number of directors to serve on the board of directors of the consolidated or reorganized district to 7, 9, or 11 directors. The bill would also require that as members' terms expire the number of members of the new legislative body be reduced to the number permitted under the principal act governing the district or a larger number specified by the commission in approving the consolidation or reorganization. The bill would also permit the new governing body not to fill vacancies, as specified. The types of districts whose principal acts would be so amended include mosquito abatement districts, county sanitation districts, sanitary districts, cemetery districts, hospital districts, recreation and park districts, resource conservation districts, irrigation districts, county water districts, public utility districts, and municipal water districts.

Ch. 315 (SB 1736) Kelley. Cuyamaca Rancho State Park: Boy Scouts of America: agreement extension.

Existing law authorizes the Department of Parks and Recreation to extend, for a period not to exceed 25 years, the existing agreement, dated March 30, 1950, between the State of California and the San Diego County Council, Boy Scouts of America, successor in interest to the Cuyamaca Rancho Camp Association, Inc., for the use of a portion of Cuyamaca Rancho State Park, as a recreational playground and camp, upon those terms and conditions determined to be in the best interests of the state.

This bill would authorize the department to enter into, for a period not less than 20 years and not to exceed 25 years, an agreement, between the State of California and the Desert Pacific Council of the Boy Scouts of America, for the use of a portion of Cuyamaca Rancho State Park.

Ch. 316 (SB 1742) Maddy. Commercial law.

Existing law contains various provisions governing the use of a negotiable instrument, defined as an unconditional promise or order to pay a fixed amount of money under certain conditions, and governing the rights and duties of parties with respect to negotiable instruments. A negotiable instrument is a note if it is a promise, and a draft if it is an order, and a check is one recognized form of a draft.

Existing law also provides uniform rules governing the collection by banks of checks and other instruments for the payment of money and the relationship of banks with their depositors in connection with the collection and payment of items.

This bill would include "demand draft" within the definition of a check for these purposes, and define that term as a writing not signed by a customer that is created by a 3rd party under the purported authority of the customer for the purpose of charging the customer's account with a bank, as specified. The bill contains other related provisions.

Ch. 317 (SB 1953) Mello. Monterey County: courthouse construction fund.

Existing law authorizes a county to establish a courthouse construction fund, as specified.

This bill would provide that deposits collected in the Monterey County Courthouse Construction Fund shall continue through the 30th year after the initial year for which the surcharge or additional penalty, as defined, is collected, or through the 30th year after any borrowings are made for any courthouse construction, as specified.

Ch. 318 (AB 166) Cannella. Public employees: Medicare.

Existing law authorizes the State Teachers' Retirement System, until July 1, 1995, to apply to the Board of Administration of the Public Employees' Retirement System for elections among certificated employees who are members of the State Teachers' Retirement System for the election of Medicare coverage.

This bill would extend that date to July 1, 1999, and would repeal the provision on January 1, 2000, and make related changes in other statutes.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 319 (AB 571) Machado. State contracts: procurement of recycled paper products.

Existing law provides that it is the intent of the Legislature to encourage the procurement of recycled paper products by various state agencies and requires state agencies to give purchase preference to recycled paper products, as defined, as well as set percentage goals for the purchase of recycled paper. Existing law provides that it is the intent of the Legislature to encourage the procurement of recycled paper products by various state agencies and requires state agencies to give purchase preference to recycled paper products, as defined, as well as set percentage goals for the purchase of recycled paper. Existing law defines "recycled paper" for certain fine grades of paper and increases the postconsumer material content in these papers, as specified, effective January 1, 1999.

This bill would delete the definition of "recycled paper" for those fine grades of paper and delete the provision increasing the postconsumer material content in those papers. For certain paper, the bill would require no less than 20% of fiber weight of postconsumer materials beginning December 31, 1994, and would increase that to 30% beginning December 31, 1998.

Ch. 320 (AB 2160) Baldwin. State expenditures.

(1) Existing law authorizes the State Board of Control to limit the amount, time, and place of expenses and allowances to be paid to state officers and employees while traveling on state business; govern the presentation and audit of claims against the state; and govern other various matters relating generally to payment of state funds.

This bill would delete the board from various responsibilities, in some cases require other state agencies, including the Treasurer, the Department of Personnel Administration, and the Director of Finance, to fill those duties, and make other related changes.

(2) Existing law provides that at the request of one or more specified employees of any institution within the Department of the Youth Authority, the State Department of Mental Health, and the State Department of Developmental Services, these departments may, at their option, provide, within the grounds of the institution, meals and subsistence for employees who do not reside within the institution, or living facilities, meals and subsistence for employees who reside within the institution. Existing law also permits these entities to make a reasonable charge for all facilities taken by or furnished to employees, to be determined by the State Board of Control, and to be deducted from the salary of the employee.

This bill would repeal these provisions.

(3) The bill would incorporate additional changes in Section 45655 of the Revenue and Taxation Code made by SB 1832 only if both bills are chaptered and this bill is chaptered last.

Ch. 321 (AB 2171) Davis. California Board of Architectural Examiners: rules of professional conduct.

The Architects Practice Act requires the California Board of Architectural Examiners to adopt a code of rules governing the examination of applicants for licenses to practice architecture in this state.

This bill would authorize the board, by rule or regulation, to adopt rules of professional conduct for architects that are not inconsistent with state or federal law. Every person who holds a license issued by the board would be governed and controlled by these rules.

Ch. 322 (AB 2360) Morrissey. Vehicles: firefighting equipment: definition.

Existing law prohibits any person from operating firefighting equipment unless the person has in his or her immediate possession a valid driver's license for the appropriate class or a specified restricted driver's license. Existing law defines "firefighting equipment" to mean a motor vehicle used to travel to and to suppress fires or to transport equipment to be used to suppress fires, and the equipment is owned or under the exclusive control of, among other entities, a federal or state agency.

This bill, for purposes of the above, would revise the definition of "firefighting equipment" to mean a motor vehicle used to travel to and from the scene of any

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

emergency situation or to transport equipment used in the control of any emergency situation, and which equipment is owned by, or under the exclusive control of, among others, a federal or state fire agency or department, rather than any federal or state agency.

Ch. 323 (AB 2244) Woods. Vehicles: cotton module movers.

Existing law exempts specified cotton module movers from vehicle weight limitations under prescribed conditions in 10 counties, from September 15 to March 15.

This bill would extend this authorization to 10 additional specified counties.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 324 (AB 2492) Aguiar. Courts.

Existing law authorizes the superior court in San Bernardino County to appoint 4 court commissioners.

This bill would authorize the appointment of an additional court commissioner if the superior court eliminates an occupied juvenile court referee position. In doing so, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 325 (AB 2626) Machado. Commercial feed: licenses and complaints.

(1) Existing law requires each person to obtain a license annually from the Secretary of Food and Agriculture for each plant that the person will operate in order to manufacture or distribute commercial feed.

This bill, instead, would require each person to obtain a license from the secretary for each location where commercial feed is manufactured, distributed, sold, or stored for later sale, and would also require each person to obtain a license if the person's name and address appears on the label of commercial feed as guarantor, except as provided.

(2) Under existing law, each application for a license is required to be accompanied by a fee of $25 for each plant for each fiscal year or portion of a fiscal year. In addition, existing law requires a penalty of $10 to be added to the fee if a license is not renewed within one calendar month after the beginning of the fiscal year.

This bill, instead, would provide for an application fee of $50 for each plant for a 2-year period, or portion of a 2-year period beginning July 1 of each odd-numbered year. In addition, the bill would require a penalty of $20 to be added to the fee if a license is not renewed within one calendar month following its expiration.

(3) The bill also would authorize, for purposes of existing law governing commercial feed, any person to register a complaint with the Feed, Fertilizer, and Livestock Drugs Branch regarding the safety of whole hays upon the submission of a written complaint and the payment of a $250 complaint filing fee, which would be used for the purpose of investigating those complaints.

The bill also would (a) require the secretary to conduct an investigation with regard to the safety of whole hays if a complaint is filed, and (b) authorize the secretary to conduct such an investigation absent the filing of a complaint under specified circumstances.

Ch. 326 (AB 2735) Weggeland. State park system: California Citrus State Historic Park.

Existing law, the California Wildlife, Coastal, and Park Land Conservation Act, authorizes the expenditure of $10,000,000, as a grant to a local agency, for the acquisition of land in and near the California Citrus State Historic Park located in the Arlington Heights area of the City of Riverside.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also authorize the city to encumber those moneys, in an amount determined by resolution of the city council, for the development of the park, thereby making an appropriation by authorizing those funds to be expended for a new purpose. The bill would specify that any funds expended pursuant to those provisions be for purposes that are consistent with the general plan for the state historic park.

The bill would declare that this authorization is an amendment of the act within the meaning of Section 6 of the act and is consistent with the act.

Ch. 327 (AB 2768) Poochigian. Crime prevention: rural crimes.

Existing law provides a variety of crime prevention programs, including authority for counties to create task forces on violent crimes against women and for the district attorney to establish a community conflict resolution program.

This bill would authorize the County of Tulare to develop the Rural Crime Prevention Demonstration Project to be administered by the county district attorney's office pursuant to a joint powers agreement with the county sheriff's office for a 3-year period.

Ch. 328 (AB 2771) Alpert. Optometry.

Existing law provides for the regulation and licensure of the practice of optometry and requires an optometrist to renew his or her license by January 31 of every year.

This bill would instead require an optometrist to renew his or her license every 2 years by the last day of his or her birth month, and would make conforming changes.

Ch. 329 (AB 3025) Hawkins. Redevelopment: low- and moderate-income dwelling units.

The existing Community Redevelopment Law requires that when dwelling units housing persons of low or moderate income are destroyed or removed from the low- and moderate-income market as part of a redevelopment project, as specified, an equal number of replacement units shall be rehabilitated, developed, or constructed, as specified. The Community Redevelopment Law sets forth numerous duties of the redevelopment agency with respect to these replacement units, including the responsibilities of the agency regarding long-term affordability standards. Under existing law, these provisions remain in effect only until January 1, 1997, and as of that date are repealed, unless a later enacted statute, which is enacted before January 1, 1997, deletes or extends that date. The Community Redevelopment Law contains alternate provisions, which become effective January 1, 1997, relating to low-and moderate-income replacement units. These alternate provisions do not expressly provide for certain options available to a redevelopment agency under the statute described in the first two sentences of this paragraph, including the options to satisfy low- and moderate-income housing requirements by acquisition of housing outside the project area under certain conditions, by the aggregation of new or substantially rehabilitated dwelling units in one or more project areas, or by acquisition of certain long-term affordability covenants. The alternate provisions also do not permit sales of owner-occupied low- and moderate-income units prior to the expiration of the land use controls established by the redevelopment agency. The other statute contains this authority.

This bill would extend the January 1, 1997, sunset date to January 1, 2001, and require the Department of Housing and Community Development to report to the Legislature regarding redevelopment agencies' use of specified provisions of law by January 1, 2000. By extending for 3 years the existing duties of a redevelopment agency with respect to the replacement of low- and moderate-income housing, this bill would impose a state-mandated local program.

In addition, the bill would extend the operative date of the alternate provisions relating to low- and moderate-income replacement units from January 1, 1997, to January 1, 2001.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 330 (AB 3335) Granlund. Credit unions: supervisory committee.

(1) Existing law provides that every credit union shall have a supervisory committee and provides that the powers of the committee include, among other things, the power to fill vacancies in the supervisory committee until the next annual meeting of members, to declare vacant any office of the supervisory committee as specified, and to supervise the acts of the board of directors, officers, and credit committee or credit manager.

This bill would delete the power of the supervisory committee to supervise the acts of its board of directors, officers, and credit committee or credit manager.

The bill also would require the supervisory committee to review the credit union's policies and control procedures to safeguard against fraud and self-dealing, as specified.

(2) Existing law requires the supervisory committee to make or cause to be made an audit of the books and records and an examination of the business affairs of the credit union. Existing law also requires the supervisory committee to make a full report of the assets and liabilities, receipts and disbursements of the credit union to the board of directors, as specified.

This bill would authorize the supervisory committee to make or cause to be made any supplementary inspections of the securities, cash, and accounts of the credit union, or audits as necessary, and submit reports of those audits to the board of directors.

Ch. 331 (AB 3355) Firestone. Contractors: workers' compensation.

Existing law exempts from certain workers' compensation requirements of the Contractors' State License Board applicants or licensees who have no employees, provided a statement is filed with the board that the contractor or applicant for a contractor's license does not employ any person in any manner so as to become subject to the workers' compensation laws.

This bill would provide that the filing of a false statement constitutes cause for disciplinary action.

Ch. 332 (AB 3080) Hoge. Fire protection: State Fire Marshal.

Under existing law, the Governor's Reorganization Plan No. 3 of 1995 abolished the Office of the State Fire Marshal and the position of State Fire Marshal in the State and Consumer Services Agency, and created the Office of the State Fire Marshal and the position of State Fire Marshal in the Department of Forestry and Fire Protection, and transferred the functions of the former office and former position to the office or position, as the case was, in the department. The State Fire Marshal became a chief deputy director of the department, appointed by the Governor.

This bill would make additional changes to the law to further that plan.

Existing law requires the State Fire Marshal to encourage the adoption of fire prevention measures by means of education.

This bill would add engineering and enforcement measures to those that the State Fire Marshal is required to encourage for the purpose of fire prevention.

Existing law requires any chemical manufacturing concern, or any flame-retardant application concern, or any concern marketing a flame-retardant fabric or material that desires to have its name appear on the approval list of chemicals, chemically treated fabrics, or flame-retardant applicator concerns to first make application to the State Fire Marshal and to pay a registration fee. Existing law also sets forth the renewal registration fee period for general applicators, as defined.

This bill would add that the renewal registration fee period provisions apply to chemical manufacturing concerns and concerns marketing a flame-retardant fabric as well as to general applicators.

Existing law requires the State Fire Marshal to adopt building standards and other regulations establishing minimum requirements for the prevention of fire and for the protection of life and property against fire and panic in buildings and structures used for specified occupancies.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete the references to numerous of the specified occupancies for which the State Fire Marshal is required to adopt building standards and regulations under existing law and would substitute the term "assembly occupancies" therefor. Because specified local agencies with jurisdiction in the area affected by the standard or regulation adopted by the Fire Marshal have responsibility for enforcing those building standards and regulations and because a violation of the bill's provisions and the standards and regulations adopted by the State Fire Marshal would be a misdemeanor, the bill would impose a state-mandated local program.

The bill also would make nonsubstantive conforming changes to the law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 333 (AB 3504) Burton. Elections: ballots: format.

Existing law specifies the order of precedence of offices on the ballot, and imposes various formatting requirements applicable to the printing of office and candidate names appearing on an official ballot at an election.

This bill would require that each group of names of candidates for a particular office be printed in immediate succession to another group of names of candidates for a particular office so as to avoid unnecessary spacing or gaps in the sequence in which each series of groups of names are listed on the ballot. It would set forth formatting rules to apply if it is necessary to leave spaces on the ballot, as specified.

Existing law requires that every legislative ballot measure submitted to the people by the Legislature appear on the ballot of the first statewide election occurring at least 131 days after the adoption of the proposal by the Legislature.

This bill would require, notwithstanding this or other provisions of law, that SCA 4 (Res. Ch. 36, Stats. 1996), and SCA 18 (Res. Ch. 34, Stats. 1996), of the 1995–96 Regular Session, be submitted to the voters at the November 5, 1996, statewide general election.

This bill would require the Secretary of State to include information on SCA 4 and SCA 18, as required by a specified provision of law, on the ballot pamphlet for the 1996 statewide general election. It would further provide that if it is the determination of the State Printer that the inclusion of that information on the ballot pamphlet is not possible, or the inclusion of that information would delay or impede the timely printing of the official ballots, then neither SCA 4 nor SCA 18 shall be placed on the ballot of the November 5, 1996, statewide general election, but instead shall appear on the ballot of the next statewide general election pursuant to law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 334 (SB 1879) Rosenthal. Alcoholic beverages: delivery.

The Alcoholic Beverage Control Act provides that no alcoholic beverage may be delivered to an on-sale or off-sale alcoholic beverage licensee on Sunday or except between the hours of 6 a.m. and 8 p.m. of any day other than Sunday. Existing law also provides that beer and wine may be delivered to those licensees between the hours of 4 a.m. and 8 p.m. on any day other than Sunday and may be delivered at the platform of the manufacturing, producing, or distributing plant at any time. Existing law provides that these provisions do not prohibit the transportation or the carriage and delivery in transit at any time of beer or wine between the premises of a manufacturer, winegrower, wholesaler, distiller, importer, or any of them.

This bill would instead provide that any alcoholic beverage may be delivered to on-sale and off-sale licensees between the hours of 3 a.m. and 8 p.m. on any day other than Sunday and to those specified plants at any time. This bill would also extend the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

application of the provision for the transportation or the carriage and delivery of beer and wine between the premises of a manufacturer, winegrower, wholesaler, distiller, or importer to any alcoholic beverage.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 335 (SB 1382) Peace. Veterans' Home of California.

Existing law establishes a Veterans' Home of California, Yountville, located in Napa County. Existing law authorizes the Department of Veterans Affairs to establish and construct a 2nd veterans' home to be located on one or more sites in one of several specified counties in southern California, and states the intent of the Legislature to authorize the department to begin preliminary work on 2 additional veterans' homes in southern California.

Existing law, the State Building Construction Act of 1955, authorizes the State Public Works Board to acquire or construct public buildings and to issue revenue bonds, negotiable notes, and negotiable bond anticipation notes to finance that construction.

Existing law requires that the Controller make a loan from the General Fund of up to $1,680,000 to the department, subject to certain conditions, for certain purposes relating to construction of the second and third sites of the southern California veterans' home and requires that the loan be repaid from bond funds authorized in subsequent legislation, or if no bond funds are authorized, from the support appropriation for the department in future budget acts.

This bill would repeal the provision relating to the loan and would authorize the State Public Works Board, if certain conditions are met, to issue revenue bonds, negotiable notes, and negotiable bond anticipation notes pursuant to the State Building Construction Act of 1955 to finance the construction of sites 2, 3, and 4 of the veterans' home in southern California, including repayment of any loans granted pursuant to the repealed provision. The bill would appropriate these funds, without regard for fiscal year, and would appropriate $66,000,000 in available matching federal funds, to the board on behalf of the department for this purpose. This bill would specify the amount of authorized capital outlay for the project, including, but not limited to, the percentage of augmentation funding. The bill would authorize the State Public Works Board to borrow funds for all phases of the projects.

The bill would authorize the department to enter into any lease agreement with the State Public Works Board necessary to achieve completion of construction. The bill would require the Director of Veterans Affairs to notify the Chairperson of the Joint Legislative Budget Committee of the director's intention to execute any lease agreement at least 45 days prior to its execution. The bill would condition the expenditure of funds generated from the issuance of the bonds on the commitment of certain federal matching funds for the project, and would require that prescribed notice be given regarding the availability of federal funds.

This bill would require an administrator at the Barstow site and at each site of the southern California home and would make conforming changes.

This bill would become operative only if AB 2015 is enacted and takes effect.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 336 (AB 2015) Knight. Veterans' Home of California.

Existing law establishes a Veterans' Home of California, Yountville, located in Napa County. Existing law authorizes the Department of Veterans Affairs to establish and construct a 2nd veterans' home to be located on one or more sites in one of several specified counties in southern California, and states the intent of the Legislature to authorize the department to begin preliminary work on 2 additional veterans' homes in southern California.

Existing law, the State Building Construction Act of 1955, authorizes the State Public Works Board to acquire or construct public buildings and to issue revenue bonds, negotiable notes, and negotiable bond anticipation notes to finance that construction.

Existing law requires that the controller make a loan from the General Fund of up to $1,680,000 to the department, subject to certain conditions, for certain purposes relating to construction of the second and third sites of the southern California home and requires that the loan be repaid from bond funds authorized in subsequent legislation, or if no

NOTE: Superior numbers appear as a separate section at the end of the digests.

bond funds are authorized, from the support appropriation for the department in future budget acts.

This bill would appropriate $144,000 from the General Fund to the department for allocation to the California Veterans Home Project Team and to the Governor's Commission on a Southern California Veterans Home.

This bill would be operative only if SB 1382 is enacted and takes effect.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 337 (AB 1856) McPherson. Elections: student poll workers.

Existing law authorizes an elections official to appoint members of election precinct boards who are voters of either the same precinct or a precinct in the same general area, with certain exceptions.

This bill would permit an elections official to appoint not more than 2 students per precinct who possess specified qualifications to serve under the direct supervision of precinct board members designated by the elections official, subject to approval by the board of the school in which the student is enrolled. It would prohibit a student appointed pursuant to these provisions from tallying votes.

Ch. 338 (SB 258) O'Connell. Home inspectors.

Existing law does not regulate persons who perform home inspections for a fee.

This bill would define terms related to paid home inspections, establish a standard of care for home inspectors, and prohibit certain inspections in which the inspector or the inspector's employer, as specified, has a financial interest. The bill would also provide that contractual provisions seeking to waive the statutory duty of care or limit the liability of a home inspector to the cost of the home inspection report are contrary to public policy and invalid. The bill would provide that the time for commencement of a legal action for breach of duty arising from a home inspection report shall not exceed 4 years from the date of the inspection.

Ch. 339 (AB 385) Tucker. Alcoholic beverages: licenses: fee revenues.

The Alcoholic Beverage Control Act provides that all money collected as annual license renewal fees and surcharges to the annual license fees under the act shall be deposited in the State Treasury to the credit of the Alcohol Beverage Control Fund for transfer to the General Fund on the order of the Controller.

This bill would eliminate the transfer of these moneys to the General Fund on order of the Controller and instead provide that, as all other money collected as fees, these moneys shall be allocated, upon appropriation by the Legislature, to the Department of Alcoholic Beverage Control for the enforcement and administration of the Alcoholic Beverage Control Act.

This bill would state the Legislature's intent in enacting the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 340 (AB 1389) Setencich. Copyright: contracts.

Federal law generally regulates the creation and protection of copyrights. Under existing state law, when there is a conveyance of any right to reproduce, distribute, perform, or display any physical work of art, any ambiguity as to the nature or extent of the rights is construed in favor of the creator or owner of the work of art, unless there is a conflict with federal copyright law.

This bill would regulate contracts between proprietors of retail establishments, as specified, and copyright owners and performing rights societies. The bill would specify required terms of the contracts, prohibit certain conduct by representatives or agents of performing rights societies, and would provide for civil penalties.

Ch. 341 (AB 2306) Firestone. Cal Grant Program.

Existing law establishes the Cal Grant Program, a state educational opportunity grant program that is based upon the financial need of the applicant. Under existing law, a Cal Grant Program award may be utilized at certain California private or independent postsecondary educational institutions or programs or at any California public postsecondary educational institution or program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, additionally, would authorize the use of Cal Grant Program awards at any nonprofit regionally accredited institution headquartered and operating in California that certifies to the Student Aid Commission that 10% of the institution's operating budget is expended for the purposes of institutionally funded student financial aid in the form of grants and that demonstrates to the Student Aid Commission that it has the administrative capacity to administer the funds.

Ch. 342 (AB 2536) Miller. Real estate fees.

Existing law prescribes various fees to be charged by the Real Estate Commissioner to applicants and licensees of the department and to the public for specified public reports. Under existing law, certain higher levels of fees are in effect until December 31, 1997, at which time those fees are to be replaced by certain lower levels of fees.

Existing law also provides for the Real Estate Commissioner, by regulation, to prescribe lower fees than the maximum fees otherwise prescribed by law if the balance in the Real Estate Fund exceeds a specified amount in certain fiscal years. Pursuant to Chapter 416 of the Statutes of 1993, if the commissioner does not act within a specified timeframe, the provisions containing the higher fees would automatically be repealed and the provisions containing the lower fees would automatically become operative and effective. Pursuant to that law, similar provisions would apply if any funds are transferred from the Real Estate Fund to the General Fund in certain fiscal years.

This bill would delete the December 31, 1997, termination date now applicable to the higher levels of fees, thereby extending those fees indefinitely, unless repealed pursuant to the provisions of Chapter 416 of the Statutes of 1993. Since these higher fees would be deposited into the continuously appropriated Real Estate Fund, the bill would make an appropriation. The bill would also provide that the alternative provisions containing the lower fee levels would only become operative upon failure of the commissioner to act or upon transfer of funds from the Real Estate Fund to the General Fund, as specified.

Ch. 343 (AB 2617) Baca. Juveniles: disclosure of records.

Existing law prohibits a school district from permitting access to pupil records to any person without written parental consent or judicial order, except as provided.

This bill would authorize any school district, including any county office of education or superintendent of schools, to participate in an interagency data information system that permits access to a computerized data base system within and between governmental agencies or districts, as provided.

Existing law generally provides, with certain exceptions, for the confidentiality of juvenile court records. Existing law provides for the dissemination of that information to school authorities, as specified, in the school system in which the minor is a student.

This bill would authorize a city, county, or city and county to establish a computerized data base system that permits the probation department, law enforcement agencies, and school districts to access probation department, law enforcement, school district, and juvenile court information and records, as provided.

Ch. 344 (AB 2674) Morrissey. Manufacturing technology grants.

Existing law establishes the Manufacturing Technology Program within the Trade and Commerce Agency, for the purpose of providing matching grants and technical assistance to California nonprofit organizations and public agencies to perform various functions relating to the development of manufacturing technology in the state. Pursuant to the program, grants are awarded on a competitive basis to eligible applicants.

This bill would provide that the Manufacturing Technology Program consists of the California Manufacturing Excellence Program and the Manufacturers Technology Matching Grant Program. It would provide that the California Manufacturing Excellence Program would award the grants provided for by existing law, in a specified order of priority. It would provide that the Manufacturers Technology Program would award grants, based on a competitive process, to California-based small- and medium-sized manufacturers, as defined, nonprofit agencies, and consortia of small- and medium-sized business and nonprofit agencies.

This bill would specify that it shall take effect only if SB 1801 of the 1995–96 Regular Session is enacted and takes effect.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 345 (AB 2897) Bowler. Evidence: video or digital images.

Existing law, the best evidence rule, generally prohibits the admission of evidence other than the original of a writing to prove the content of a writing. Existing law exempts from this rule a printed representation of computer information or a computer program which is being used by or stored on a computer or computer readable storage media to prove the existence and content of the computer information or computer program.

This bill would provide an additional exemption for a printed representation of an image stored on video or digital media to prove the existence and content of the image stored on the video or digital media, as specified.

Ch. 346 (AB 2975) Granlund. Property taxation: payment of refunds.

Existing property tax law provides for the payment of refunds to taxpayers under specified circumstances, pursuant to a claim for refund, as provided.

This bill would, under certain conditions, authorize the payment of a property tax refund, made on the basis of a reduction in the value of taxable property, to the latest recorded owner of that property as shown on the tax roll, rather than to the individual or entity that paid the amount of tax to be refunded.

Ch. 347 (AB 3125) Hawkins. Housing elements: identification of adequate housing sites.

Existing law requires each city, county, and city and county to adopt for its jurisdiction, according to specified deadlines, a general plan that includes certain mandatory elements, including a housing element.

Existing law requires the Department of Housing and Community Development to evaluate each housing element for consistency with state law including, among other things, a program setting forth a 5-year schedule of actions the local government is undertaking or intends to undertake to achieve the goals of the housing element that includes the identification of sites to be made available to encourage the development of a variety of types of housing for all income levels. It permits the department to allow a local government to identify adequate sites for this purpose by a variety of methods, as specified.

This bill would authorize a locality to identify sites that contain permanent housing units located on a military base undergoing closure or conversion as adequate sites, as specified.

Ch. 348 (AB 3148) Ducheny. Filing fees.

Existing law provides that no fee shall be charged to file a respondent's appearance, stipulation, and waiver of rights in the action under the Soldiers' and Sailors' Civil Relief Act of 1940 in an action for dissolution of marriage in any case where the respondent is a member of the armed forces of the United States and does not contest the action for dissolution.

This bill would extend the fee waiver to filing a defendant's appearance, stipulation, and waiver of rights in these circumstances in an action for legal separation or nullity, or to establish paternity, as well as for dissolution of marriage.

Ch. 349 (AB 3233) Knowles. Insurance.

Existing provisions of the Insurance Code set forth various fees to be paid by persons licensed by the Department of Insurance. Under existing law, the Insurance Commissioner is authorized to increase or decrease the fees set forth in the Insurance Code, by a uniform percentage, to allow the department to meet the appropriation authorized by the annual Budget Act.

This bill would provide that the fee increase may not exceed 10% without the prior approval of the Legislature.

The bill would become operative only if AB 3137 is also enacted and becomes operative.

Ch. 350 (AB 3313) Brewer. Insurance: assigned risk plans.

Existing law provides for the formation of an assigned risk plan for automobile bodily injury and property damage liability insurance. The plan apportions eligible applicants

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

for insurance coverage among insurers admitted to transact liability insurance. Effective dates of coverage under the assigned risk plan are determined in part by an electronic effective date procedure established by the plan.

This bill would modify certain provisions relating to effective dates under the electronic effective date procedure and make other related changes.

Ch. 351 (SB 1318) Calderon. Limited liability partnerships.

The Uniform Partnership Act authorizes the establishment of registered limited liability partnerships and foreign limited liability partnerships for persons in the law and accountancy professions and provides that partners generally are not liable for debts, obligations, or liabilities chargeable to the partnership, except as may be provided by a specific agreement among the partners. These provisions provide for persons to reserve limited liability partnership names with the Secretary of State, as specified, and provide for certain security agreements to be filed with the Secretary of State.

This bill would delete the provisions relating to the reservation of limited liability partnership names. The bill would also revise and recast the provisions applicable to limited liability partnerships providing legal services and delete the requirement for those partnerships to file security agreements with the Secretary of State.

Ch. 352 (SB 1434) Kelley. Local government organization: dissolutions.

Existing law, the Cortese-Knox Local Government Reorganization Act of 1985, establishes in each county a local agency formation commission with specified powers and duties with respect to the review and adoption of local agency changes of organization and reorganizations, as defined. After the conclusion of the hearing on a proposed change of organization or reorganization, the commission is required to adopt a resolution approving or disapproving the proposal and including certain determinations.

Existing law requires the local agency that is the authority conducting a change of organization or reorganization, in any resolution ordering a change of organization or reorganization subject to the confirmation of the voters, to call an election within designated territory, depending upon the change or organization or reorganization.

This bill would govern any proposal for a change of organization or reorganization submitted by specified water districts in San Diego County.

The bill would require that in any resolution ordering a change of organization or reorganization subject to the confirmation of the voters in prescribed circumstances, the conducting authority shall call that election within the territory of each district ordered to be formed or dissolved, and a reorganization involving the dissolution of two or more districts shall be confirmed by an election within the territory of the district ordered to be dissolved, or the reorganization shall be confirmed only by both a majority vote within the territory of any district proposed to be dissolved and a majority vote within the territory of all or any districts subject to the reorganization.

The bill would be repealed on January 1, 2002.

Ch. 353 (SB 1463) Johannessen. Vehicles: lengths.

Existing law prohibits vehicles operated on the highway from exceeding specified maximum lengths.

This bill would allow the Department of Transportation or local authorities, with regard to highways under their respective jurisdictions, to issue a special permit authorizing an applicant to operate a truck tractor semitrailer combination with a kingpin to rearmost axle measurement of not more than 46 feet when used exclusively or primarily in connection with motorsports, as defined.

Ch. 354 (SB 1571) Kopp. Failure to appear: bail.

(1) Existing law provides that a court shall declare forfeited the undertaking or deposit of bail if, without sufficient excuse, a defendant fails to appear for arraignment, trial, judgment, or any other occasion prior to the pronouncement of judgment if the defendant's presence in court is lawfully required, or fails to surrender himself or herself in execution of the judgment after appeal. The court is required to vacate an order of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

forfeiture if the defendant either voluntarily or in custody appears in court within 180 days of the date of forfeiture or date of making of a notice, as specified.

This bill would authorize the surety or depositor to file a motion, based upon good cause, for an order extending the 180-day period that includes a declaration or affidavit that states the reasons why there is good cause to extend that period. If, after a hearing, the court finds good cause to extend the 180-day period, the court would be authorized to extend that period up to an additional 180 days.

(2) Under existing law, every person who is charged with the commission of a misdemeanor or a felony who is released from custody on their own recognizance or on bail, and who willfully fails to appear in court as required, is guilty of a misdemeanor or of a felony, respectively.

This bill would provide that every person who is charged with or convicted of a misdemeanor or a felony who is released from custody on their own recognizance or on bail, and who willfully fails to appear in court as required, is guilty of a misdemeanor or of a felony, respectively.

Ch. 355 (SB 1734) Kelley. Juveniles: home supervision.

Existing law makes liable the father, mother, spouse, or other person liable for the support of a minor, the estate of that person, and the estate of the minor for the reasonable costs of support of the minor while the minor is placed, or detained in, or committed to, any institution or other place, as specified.

This bill would authorize the juvenile court to make these persons and their estates liable for the cost to the county of home supervision or electronic surveillance of a minor.

Ch. 356 (SB 1914) Johannessen. Public works: local agencies.

Under the Local Agency Public Construction Act, specified counties may, until January 1, 2001, provide for an alternative procedure for bidding on the design and construction of building projects with a cost not exceeding $50,000,000, subject to certain conditions.

This bill would extend this authorization to the Cities of West Sacramento and Davis.

Ch. 357 (SB 2177) Kopp. Parole: discharge and revocation.

(1) Under existing law, the Board of Prison Terms is the parole authority for all prisoners sentenced to a term of imprisonment in state prison. When certain prisoners have been released on parole from state prison continuously for a certain period of time, they are required to be discharged from parole unless the Department of Corrections determines that they will be retained on parole. The department is required to make a written record of its determination and to transmit a copy thereof to the parolee.

This bill instead would provide that when any prisoner has been released on parole from state prison continuously for a certain period of time, that person is required to be discharged from parole unless, in some cases, the department recommends to the board that the person be retained on parole and, in all cases, the board determines that the person will be retained. The board would be required to make a written record of its determination and the department would be required to transmit a copy of the board's decision to the parolee.

(2) Under existing law, the Board of Prison Terms is required to review certain prisoner requests for reconsideration of denial of good-time credit and setting of parole length or conditions, while the Department of Corrections has responsibility for all other prisoners.

This bill would eliminate the department's responsibility in that area and transfer to the board the authority to review all prisoner requests for reconsideration.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 358 (SB 1140) Peace. Public utilities: telephones.

Under existing law, the Public Utilities Commission has the authority to regulate public utilities, including telephone corporations. Existing law prohibits a telephone corporation from authorizing a different telephone corporation to make any change in a telephone subscriber's long-distance carrier unless specified requirements have been met.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would prohibit a residential subscriber's local exchange telephone corporation from making any change in the subscriber's provider of telephone service except upon an independent verification by a third party, and would make conforming changes reflecting federal law.

Ch. 359 (AB 8) Friedman. Health insurance: small employer coverage.

Existing law imposes various requirements on health care service plans and insurers with respect to small employer coverage. Among other things, plans and insurers that sell coverage to small employers are required to make available coverage to all small employers. For that purpose, small employers are employers that employ at least 3, but no more than 50, eligible employees, as specified.

This bill would expand the definition of small employers to mean employers that employ at least 2, but no more than 50, eligible employees.

Ch. 360 (SB 371) Rosenthal. Health insurance: small employer coverage.

Existing law imposes various requirements on health care service plans and insurers with respect to small employer coverage. Among other things, plans and insurers that sell coverage to small employers are required to make available coverage to all small employers. For that purpose, small employers are employers that employ at least 3, but no more than 50, eligible employees, as specified.

This bill would expand the definition of small employers to mean employers that employ at least 2, but no more than 50, eligible employees. The change to 2 employees would apply on and after July 1, 1997.

Existing law defines "program" for small employer health insurance purposes as the "Voluntary Alliance Uniting Employers Purchasing Program."

This bill would change the definition to instead refer to the "Health Insurance Plan of California."

Ch. 361 (AB 124) Rainey. Economic poisons.

(1) Existing law requires each registrant of an economic poison to pay to the Director of Pesticide Regulation an assessment on all sales by the registrant of its registered and labeled economic poisons for use in this state.

This bill would require the Director of Pesticide Regulation to keep a record of the classes and sources of income credited to, and disbursed from, the Department of Pesticide Regulation Fund and would require the Department of Pesticide Regulation to publish a report describing in detail the amount and source of funding of, and the costs to operate, each branch of the department.

(2) Under existing law, for various purposes, including administration of the law relating to the registration of economic poisons in this state, the term "economic poison" is defined, and includes "pesticide."

This bill would substitute the use of the word "pesticide" for the term "economic poison" in provisions of the Food and Agricultural Code.

(3) Existing law provides that state law occupies the entire field of regulation regarding the registration, sale, transportation, or use of pesticides.

This bill would require the director to notify the promulgating entity if the director determines that an ordinance or regulation is preempted by state law, and to maintain an action for declaratory relief to have the ordinance or regulation declared void, and also to bring an action to enjoin enforcement of the ordinance or regulation.

Ch. 362 (AB 748) Kuykendall. Vessel traffic services: marine exchange: oil spill funds.

(1) Existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, and related provisions in the Harbors and Navigation Code, authorize the Marine Exchange of Los Angeles-Long Beach Harbor, Inc., a nonprofit mutual benefit Corporation, to operate a vessel traffic service (VTS) system for the Los Angeles and Long Beach Harbors under specified circumstances and to impose fees upon all covered vessels, as defined. Those related provisions specify the VTS area in which the marine exchange may operate the VTS system.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would include a part of Santa Monica Bay within that operational area. The bill would redefine "covered vessel" for those purposes and would require certain vessels entering or transiting the VTS area to comply with VTS measures established by the marine exchange.

(2) The act requires the administrator for oil spill response to attempt to negotiate an agreement with the Coast Guard by December 31, 1991, for a VTS system to protect the harbors of this state.

This bill would instead require the administrator to negotiate an agreement with the Coast Guard, appropriate port agencies, or appropriate organizations for a VTS system to protect the harbors of the state, and would make related changes.

The bill would authorize the administrator, if a VTS system covers waters outside the jurisdiction of a local port authority, to grant from the Oil Spill Response Trust Fund, as prescribed, such money as determined to be necessary for the purchase and installation of equipment required for the establishment or expansion of a VTS system, and would specify related matters.

(3) The act and related provisions require the marine exchange to cooperate fully with the administrator for oil spill response and provide that, upon certification by the administrator that the Coast Guard has commenced operation of a VTS system for the VTS area, the authorization for the marine exchange to operate a VTS is revoked. If authorization is not revoked, the marine exchange is required, on or before July 1, 1993, and every 2 years thereafter, to submit a complete description of the VTS system to the administrator.

This bill would instead require that submission on or before January 1, 1997, and every 2 years thereafter.

(4) Under existing law, no covered vessel, as defined, may assert any claim against the marine exchange or any officer, director, employee, or representative of the marine exchange for any damage, loss, or expense sustained arising out of or connected with the operation of the VTS system, and each of those vessels is required to defend, indemnify, and hold harmless the marine exchange from claims against the marine exchange, except claims arising out of gross negligence in the operation of the VTS system.

This bill would make those provisions applicable to vessels subject to the laws relating to the VTS system and would make conforming changes relating to the liability of the VTS System to other provisions of the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act.

The bill would make various technical and clarifying changes and would make various conforming changes in the act and in the related provisions regarding operation of a VTS system by the marine exchange.

(5) Under the act, a designated amount is required to be maintained in the Oil Spill Response Trust Fund, as prescribed. Commencing on June 30, 2003, the amount designated is required to be adjusted for inflation, as specified.

This bill would delete that requirement for adjustment for inflation and would make related changes.

Ch. 363 (AB 749) Kuykendall. Vessels: operating under the influence.

(1) Existing law makes it an infraction for a person under the age of 18 years to operate a motorized recreational vessel with 0.05% or more, by weight, of alcohol in his or her blood.

This bill would make that offense applicable to a person under the age of 21 years with 0.01% or more, by weight, of alcohol in his or her blood and would apply that provision to the operation of any motorized vessel or the manipulation of water skis, an aquaplane, or a similar device. This requirement would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 364 (AB 1004) Kuykendall. Local agency employees: eligibility for office: volunteer firefighters.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law prohibits an employee of a local agency from being sworn into office as an elected or appointed member of the legislative body of that local agency unless he or she resigns as an employee. Any volunteer firefighter who does not receive a salary is excepted from this prohibition.

This bill would include a volunteer firefighter within that exception where the salary the volunteer firefighter would otherwise receive is applied directly by the local agency toward the purchase of disability, life, health, or similar insurance coverage.

Ch. 365 (AB 1373) Olberg. Surface mining operations: regulations: reporting fees.

Existing law requires a person in charge of a surface mining operation to submit specified reports and to pay specified fees to the Department of Conservation and to a lead agency, as prescribed. The State Board of Mining and Geology is required to adopt, by emergency regulation, a schedule of fees, as specified, to cover the Department of Conservation's costs in carrying out that provision and the Surface Mining and Reclamation Act of 1975.

This bill would, instead, authorize the board to adopt that schedule of fees by emergency regulation.

Ch. 366 (AB 1694) Johnson. Sales and use tax: exemption: loan of vehicle.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption from the use tax for the loan of any motor vehicle by a retailer to a state university, the University of California, or an accredited private or parochial secondary school for driver training purposes.

This bill would provide a partial exemption from the use tax for the loan by any retailer of any motor vehicle to any employee of the University of California or the California State University by limiting the measurement of the tax to the fair rental value of the vehicle, if certain conditions are met.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 367 (AB 1943) Bordonaro. Environmental protection: general permits.

(1) Under existing law, the California Environmental Protection Agency is administered by the Secretary for Environmental Protection. Specified state agencies are established within the agency.

Existing law, the Environmental Protection Permit Reform Act of 1993, among other things, requires the secretary to establish an administrative process which may be used, at the request of a permit applicant, to designate a consolidated permit agency, as defined, for projects that require permits from 2 or more environmental agencies, as defined.

This bill would include specified certified unified program agencies under the unified hazardous waste and hazardous materials management regulatory program as an environmental agency for purposes of the law.

The bill would authorize specified state environmental agencies to adopt a process to precertify equipment and processes as being in compliance with any laws and regulations applicable to the state environmental agency.

The bill would require a state environmental agency which adopts regulations, to the extent feasible and appropriate, to adopt standardized permits, as defined, to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

incorporate equipment and processes precertified pursuant to the bill. Where applicable, the state environmental agencies would be required to include, as part of their precertification, a model standardized permit ordinance that local environmental agencies may adopt.

The bill would also authorize local environmental agencies, as defined, to adopt standardized permits to incorporate equipment and processes precertified, as provided in this bill. The bill would prescribe related matters.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 368 (AB 2187) Conroy. State civil service: military service.

Existing law provides to persons in military service various rights and benefits with respect to civil service employment lists, examinations, reinstatement, and seniority. Existing law prohibits these rights and benefits from being extended to or being granted to a person who, after January 1, 1956, voluntarily requests and obtains an extension of his or her original term of military service, or who was on an indefinite tour of duty or on a tour of duty in excess of 4 years' duration, as specified.

This bill would repeal these prohibitions.

Ch. 369 (AB 2195) Baca. Public employee retirement: benefits.

The Public Employees' Retirement Law authorizes active and retired state and school employees to receive service credit for active military service rendered prior to state or school employment upon payment of specified costs.

This bill would increase the basis of the service credit from one year of credit for each 5 years of credited state service to one year of service credit for each credited year of state service and would make the benefit available to active and retired employees with at least one year of state service.

Ch. 370 (AB 2233) W. Murray. Cemeteries: regulation.

Existing law provides that the Department of Consumer Affairs succeeds to, and is vested with, all the duties, powers, purpose, responsibilities, and jurisdiction of the Cemetery Board as of January 1, 1996, in the absence of a consolidation of this board with the Funeral Directors and Embalmers Board or other restructuring of the boards.

The Cemetery Act provides for the regulation of certain private cemeteries and provides for examinations of endowment care funds established by those cemeteries.

Existing law requires a cemetery authority to appoint a board of trustees as trustees of its endowment care fund, or, in lieu thereof, to appoint a bank or trust company as trustee.

This bill would provide that if a cemetery authority fails to file the report concerning the condition of its endowment care fund, as specified, or if the report is materially not in compliance with law or the endowment care fund is materially not in compliance with the law, the cemetery authority may be required to appoint a bank or trust company as trustee, provided that the cemetery authority has received written notice of the alleged violation and has an opportunity to correct the violation, and there has been a finding of a material violation in an administrative hearing.

Ch. 371 (AB 2237) W. Murray. Cemeteries: dead bodies.

Existing law prohibits a person from knowingly or willfully interring the remains of more than one body in a single burial plot, or placing a casket or other human remains in an already occupied grave.

This bill would require the statute of limitations for a violation of this provision to begin to run at the time the violation is discovered.

Because this bill would change the statute of limitations for a violation of the provisions governing dead bodies, it would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 372 (AB 2299) Davis. Alcoholic beverages: on-sale licenses.

The Alcoholic Beverage Control Act provides for the issuance of an on-sale general license and provides for the issuance of various special or temporary licenses.

This bill would authorize the issuance of an on-sale general license to any maritime museum association that meets specified conditions.

Ch. 373 (AB 2300) McPherson. Joint exercise of powers.

Existing law requires the procurement of insurance or official bonds by any state agency to be subject to approval of the Department of General Services, except as provided.

This bill would exempt from these provisions an insurance and risk pooling arrangement formed pursuant to a joint powers agreement entered into by a public agency conducting agricultural, livestock, industrial, cultural, or other types of fairs or exhibitions, as provided in existing law.

Ch. 374 (AB 2307) Firestone. Postsecondary education: State Guaranteed Loan Reserve Fund: Loan Study Council.

(1) Existing law establishes the State Guaranteed Loan Reserve Fund, which consists of money received from federal, state, or local governments, or from other private or public sources, for the purposes of the state guaranteed loan program.

A provision of law that was repealed as of January 1, 1996, made an appropriation for the 1992–93 fiscal year to the Student Aid Commission from the State Guaranteed Loan Reserve Fund for the amount of funds necessary to make payments for the purchase of defaulted loans. This provision also made an appropriation from the Federal Trust Fund for transfer to the State Guaranteed Loan Fund of all federal reinsurance payments received on defaulted student loans and deposited in the Federal Trust Fund.

This bill would reenact this provision without limiting its application for any particular fiscal year by providing that the appropriation be continuous. The bill would specify that this appropriation would be operative only if the annual Budget Act for the fiscal year is not chaptered on or before July 15, and shall not exceed the amount deemed by the commission to be required by federal law or regulation.

(2) Existing law requires the Student Aid Commission to establish a Loan Study Council composed of 17 members, appointed by the commission and including representatives of students, postsecondary educational institutions, eligible lenders, and participating secondary markets.

This bill would require the Student Aid Commission to appoint to the council a representative from the California Lenders for Education Association, and delete from the council 1 of the 5 representatives of the lending community participating in the Federal Family Education Loan Program.

Ch. 375 (AB 2448) Alpert. Domestic violence: San Diego County.

Existing law requires each law enforcement agency to develop a system for recording domestic violence-related calls for assistance, to support these calls with a written incident report, to compile the number of calls per month, including the number involving weapons, and to submit these figures to the Attorney General.

This bill would authorize the San Diego Association of Governments to serve as a clearinghouse for criminal justice data involving domestic violence in San Diego County. The bill would establish specific requirements for collecting and developing this data, including the creation of an advisory committee.

Ch. 376 (AB 2472) Hoge. Boxing.

Existing law, the Boxing Act, establishes the State Athletic Commission to regulate athletic contests in this state. Existing law prohibits any person from participating in a boxing or martial arts contest, match, or exhibition without a license issued by the commission. Existing law requires all professional boxers to undergo an examination by a licensed physician and surgeon who specializes in neurology and neurosurgery. Existing law provides discretion to the commission to deny or revoke a license for medical reasons, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require any person applying for a license or the renewal of a license as a professional boxer or martial arts fighter to provide documentary evidence that he or she has received a negative HIV and HBV test within 30 days prior to the date of application or renewal. This bill would provide that this information and any other medical information concerning the applicant or licensee is confidential and not subject to discovery or subpoena. The bill would authorize an applicant or licensee whose license has been denied, suspended, or revoked because of his or her HIV or HBV status, to appeal that decision and would require the commission to notify the applicant or licensee of his or her right to a closed hearing for that appeal, as specified.

Ch. 377 (AB 2560) Setencich. Boxing: pension fund.

Existing law, known as the Boxing Act, regulates the sport of boxing in California. Existing law requires the State Athletic Commission to establish a pension plan and a disability insurance program for professional boxers who engage in boxing contests. Existing law requires the commission to establish a schedule of contributions to the pension plan and to the disability insurance program to be paid by professional boxers, managers, and promoters on an equitable basis.

This bill would, instead, delete existing provisions of law requiring the establishment of a disability insurance program. The bill would require the commission to establish a method by which the pension plan would be financed and to designate those persons who must contribute to the financing of the plan, as specified.

Existing law requires a representative of the commission to withhold the contributions of a boxer and his or her manager to the pension plan at the time of the payment of the purse. Existing law requires these contributions to be deposited in the Boxers' Pension Account.

This bill would require those contributions to be made at the time and in the manner prescribed by the commission, if the commission requires contributions by a boxer and his or her manager. This bill would require the commission, or its designee, to invest the money contained in the Boxers' Pension Account according to a specified standard of care.

Existing law authorizes a professional boxer to contribute to the pension plan at a higher rate than established by the commission.

This bill would delete this provision. The bill would authorize the commission to award a covered boxer a medical early retirement benefit in lieu of a pension, as specified. This bill would also make technical, nonsubstantive changes to existing law.

Ch. 378 (AB 2743) Ackerman. Public Employees' Retirement: membership.

The Public Employees' Retirement Law provides that elective officers may elect membership in the Public Employees' Retirement System under certain conditions.

This bill would provide that elected or appointed officers of contracting agencies in specified positions are excluded from membership.

Ch. 379 (AB 2760) Napolitano. Deputy Secretary of Women Veterans Affairs.

Existing law requires there to be an Undersecretary of Veterans Affairs, appointed by the Secretary of Veterans Affairs.

This bill would, in addition, require that, until January 1, 2001, there be within the department, and that the secretary appoint, a Deputy Secretary of Women Veterans Affairs who would have responsibility over administration of women veterans affairs.

Ch. 380 (AB 3072) Granlund. Air pollution: vehicles: tools.

Existing law establishes the motor vehicle inspection and maintenance program implemented by the Department of Consumer Affairs, and authorizes the State Air Resources Board to certify new motor vehicles and new motor vehicle engines. Existing law requires manufacturers of all 1980 and newer model-year motor vehicles to provide certain emission control service information for the inspection, test, and repair of those vehicles, and requires the department to periodically conduct surveys to determine whether the service information requirements are being fulfilled by actual field availability of the information.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would modify that survey requirement to require the department to periodically conduct surveys to determine whether the service information and tool requirements imposed by federal and state law are being fulfilled by actual field availability of the information and tools.

Ch. 381 (AB 3167) Martinez. Animals: pets or companions: use as food.

Existing law prohibits any person from possessing, importing into this state, selling, buying, giving away, or accepting any carcass or part of any carcass of any animal traditionally or commonly kept as a pet or companion with the sole intent of using or having another person use any part of the carcass as food. Existing law also prohibits any person from engaging in any of these acts with respect to this type of animal with the sole intent of killing or having another person kill the animal for the purpose of using or having another person use any part of the animal for food.

This bill would add to these prohibitions the exportation from this state of the carcass or animal for the purposes specified and would broaden the scope of intent involved in the prohibited acts. By expanding the scope of an existing crime, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 382 (AB 3171) Martinez. Medicine: licensing: continuing education requirements.

Existing law establishes the Medical Board of California and vests within the board jurisdiction over administration of laws relating to the practice of medicine, and establishes 2 divisions of the board, the Division of Medical Quality and the Division of Licensing.

Existing law requires the Division of Licensing to consider including various courses in determining its continuing education requirement.

This bill would, in addition, require the division to consider including a course in the special care needs of individuals and their families facing certain end-of-life issues.

Ch. 383 (AB 3221) Gallegos. School employees: retirement.

The State Teachers' Retirement Law authorizes members after entry into other school employment covered by a different retirement system, to elect within 90 days to continue in the State Teachers' Retirement System.

The bill would exclude those members from membership in the State Teachers' Retirement System unless the members elect within 60 days to continue in that system.

Ch. 384 (AB 3372) Ducheny. Building standards: California Building Standards Commission.

Under existing law, all building standards, with certain exceptions, that are within the authority of, and adopted by, state agencies are required to be submitted to and approved by the California Building Standards Commission and to be published in the California Building Standards Code. Existing law specifies procedures for the expedited review and adoption of emergency standards.

This bill would provide that with respect to sections of the California Building Standards Code not under the authority of any state agency, the commission has the authority to adopt amendments to the California Building Standards Code if they are substantially the same as the model code amendments that were adopted on an emergency basis by the code publishers.

The bill would authorize the California Building Standards Commission to consider adoption of emergency amendments made to the model codes in a prescribed expedited rulemaking process outside the annual code adoption cycle set forth under existing law, and would require the commission to ensure that its rulemaking process in this regard meets specified standards.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill also would provide that amendments to the California Building Standards Code adopted pursuant to these provisions would take effect at a prescribed time following adoption.

This bill would provide that nothing in its provisions shall be construed to permit amendments to the California Building Standards Code that decrease the level of disabled access provided.

Ch. 385 (AB 3453) Kaloogian. Retirement: California State University.

Existing law authorizes eligible employees of the California State University to elect either to join the Public Employees' Retirement System or an optional retirement program available to those employees. Existing law also provides for industrial disability leave and nonindustrial disability insurance for personnel of the California State University as a supplement to benefits under the Public Employees' Retirement System and the State Teachers' Retirement System.

This bill would make the provisions relating to industrial disability leave and nonindustrial disability insurance applicable to participants in the optional retirement program.

This bill would also permit the Trustees of the California State University to include investment funds in the optional retirement program.

Ch. 386 (AB 3458) Speier. State legal services: contracts.

Under existing law, state contracts for the procurement of materials, supplies, equipment, or services, with specified exceptions, are not effective unless reviewed and approved by the Department of General Services.

Existing law prohibits state agencies from employing any legal counsel other than the Attorney General, except for specified agencies, unless the agency has first obtained the written consent of the Attorney General.

This bill would provide that, in approving a contract for legal services, the department would have to require the state agency to demonstrate that the Attorney General has consented to the employment of outside counsel. The bill would also require the department, until January 1, 2001, to maintain a list of approved contracts for legal services with a consideration in excess of $20,000. The list, which would be provided quarterly to the Legislature, would include the providers, the length of each contract, applicable hourly rates, and the need for the services.

Ch. 387 (SB 1643) Solis. Children: supervised visitation providers.

Existing law authorizes a court, in a proceeding involving child custody and visitation, to order visitation to be limited to situations in which a 3rd person is present under certain circumstances.

This bill would require the Judicial Council to develop standards for supervised visitation providers in accordance with specified guidelines, and to report on these guidelines to the Legislature.

Ch. 388 (SB 44) Kopp. Property taxation.

Existing property tax law defines a change in ownership of real property to include, among other things, the renewal, assignment, or sublease of a taxable possessory interest.

This bill would, as provided, prohibit any renewal or extension of a taxable possessory interest during the reasonably anticipated term of possession used by the assessor to value that interest from constituting a change in ownership until the end of that reasonably anticipated term of possession. This bill would define an "assignment" of a possessory interest to mean the transfer of all rights held by a transferor in a possessory interest, and would, as specified, revise and recast those provisions defining a change in ownership to include a sublease of a taxable possessory interest in tax exempt property. This bill would also specify, as provided, that a change in ownership of real property does not include any transfer of a possessory interest that is subject to a sublease with a remaining term that exceeds half of the remaining term of the leasehold.

Existing property tax law authorizes a taxpayer to file an application for reduction in an assessment in accordance with certain procedures and requirements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, in the case in which a duplicate application for reduction in assessment, as defined, is filed with respect to the same assessment, authorize the clerk receiving those applications to accept only the first application filed, and to reject any subsequent application.

Ch. 389 (SB 251) Ayala. Court-appointed counsel.

Under existing law, in any case in which a defendant is provided legal assistance, either through the public defender or private counsel appointed by the court, the court may, after notice and a hearing, make a determination of the present ability of the defendant to pay all or a portion of the cost for legal assistance. The court also may impose a lien on any real property owned by an indigent criminal defendant, or in which the defendant has an interest, to compensate the county for the cost of providing legal assistance to the defendant. Existing law further provides that when the public defender or an assigned counsel represents a person who is a minor in a criminal proceeding, at the expense of a county, the court may order the parent or guardian of the minor to reimburse the county for all or any part of that expense.

This bill would provide that every defendant shall be assessed a registration fee not to exceed $25 when represented by appointed counsel, unless he or she is financially unable to pay the fee. The bill also would provide that the parent of any minor, or other person who is liable for the support of the minor, on whose behalf a petition is filed to commence proceedings in the juvenile court to declare the minor a ward of the court, when the minor is represented by appointed counsel, shall be assessed a registration fee not to exceed $25 at the time the legal services are provided, unless the parent or other person is financially unable to pay the fee.

The bill would provide that these provisions shall be operative in a county only upon the adoption of a resolution or ordinance by the board of supervisors electing to establish the registration fee.

The bill also would declare that it is to take effect immediately as an urgency statute.

Ch. 390 (SB 794) Kopp. Administrative procedure.

(1) Existing law requires the administrator for oil spill response to adopt regulations for the expedited licensing and use of oil spill cleanup agents.

This bill would require the administrator, prior to January 1, 1997, to prepare regulations regarding licensing of oil spill cleanup agents that are substantially the same as regulations adopted by the State Water Resources Control Board that were in effect on December 31, 1996, except that the authority of the administrator shall be substituted for that of the board, and would require the administrator to submit these regulations to the Office of Administrative Law for filing with the Secretary of State and publication in the California Code of Regulations. It would also exempt these regulations from the Administrative Procedure Act, and would provide that the regulations shall remain in effect until a date of 2 years from the date of filing with the Secretary of State or until the date new regulations adopted by the administrator are filed with the Secretary of State, whichever date is earlier.

(2) Existing law authorizes the administrator to charge a fee for the costs of processing an application for a license for an oil spill cleanup agent, not to exceed $1,000.

This bill would authorize the administrator to require renewal of a license every 5 years and to charge a fee for the cost of processing the renewal, not to exceed $100.

(3) Chapter 938 of the Statutes of 1995, which will be operative on July 1, 1997, authorizes a state agency before, on, or after July 1, 1997, to adopt interim or permanent regulations to govern an adjudicative proceeding under provisions contained in Chapter 938 relating to administrative adjudication.

This bill would authorize a state agency to adopt these regulations, as well as other regulations relating to administrative adjudication, commencing on the effective date of this act, and would make other technical and clarifying changes.

(4) The bill would declare that it furthers the purposes of Proposition 103 for a specified reason.

Since the provision that would be amended by this bill is part of an initiative statute that may be amended by the Legislature only by a $^2/_3$ vote, the bill would require a $^2/_3$ vote.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 391 (SB 925) Costa. Insurance.

Existing law imposes various regulations on insurance issued by fraternal benefit societies. Existing law exempts from these regulatory provisions a lodge, as specified, if, among other things, it provides in its bylaws or rules or regulations for the payment of death benefits not exceeding $1,000, or disability benefits not exceeding $1,000.

This bill would increase the maximum permissible death benefits to $5,000.

Ch. 392 (SB 1181) Haynes. Mobilehome Residency Law: rent control.

Existing law provides that certain rental agreements relating to mobilehomes located in a mobilehome park, which meet specified criteria, are exempt from local measures which establish a maximum amount that a landlord may charge a tenant for rent.

This bill would provide that if a mobilehome space within a mobilehome park is not the location of the principal residence, as defined, of the homeowner located thereon and the homeowner has not rented the mobilehome to another party, it shall be exempt from any ordinance, rule, regulation, or initiative measure adopted by any city, county, or city and county which establishes a maximum amount that a landlord may charge a tenant for rent. The bill would also require the management to notify the homeowner before modifying the rent or other terms of the tenancy, as specified. The bill would provide that the homeowner shall have 90 days from the date the notice is mailed to review and respond to the notice. The bill would prohibit management from modifying the rent or other terms of tenancy upon a showing that the information upon which the management relied in determining that the mobilehome space was not the homeowner's principal residence was incorrect. These provisions would not apply while the homeowner is unable to rent or lease the mobilehome for a prescribed reason, while the mobilehome is available for sale, or if the legal owner has taken possession or ownership of the mobilehome from a registered owner through a surrender of ownership interest or a foreclosure, as specified.

Ch. 393 (SB 1373) Maddy. California-bred races.

(1) Existing law requires every licensee conducting a horseracing meeting to provide for the running of at least one race each racing day limited to California-bred horses, to be known as the "California-bred race."

This bill would state that it is the intent of the Legislature that thoroughbred racing associations achieve a goal of distributing at least 10% of the total stakes purses for the racing meeting as purses for California-restricted stakes races.

(2) Existing law provides for owner premiums, and breeder and stallion awards. Existing law requires a sum equal to 13.33% of the amount deducted for thoroughbred purses to be distributed by the official registering agency for thoroughbreds for breeder awards, owner premiums, and stallion awards. Of the funds received by the official registering agency for thoroughbreds, existing law provides that after deducting 5% to compensate the agency for its administrative costs and educational, promotional, and research expenses, the agency is required to distribute 55% to the breeder fund for breeder awards, 15% to the owner fund for owners premiums, and 20% to the stallion fund for stallion awards. The remaining 10% is required to be deposited in the California-bred race fund, to be used for the promotion of California-bred races and from which purses are to be provided or supplemented for California Cup Day and other California-bred races. Any funds not so used during any year are required to be used to augment the owner fund of that year and are distributable therefrom.

This bill would require 20% of the total advertised purse for any open race to be distributed as an owner premium to the owner of a California-bred thoroughbred horse conceived by a registered eligible thoroughbred stallion that finishes first in the race, and an amount equal to 10% of the total advertised purse for any open race to be distributed as an owner premium to the owner of a California-bred thoroughbred horse that finishes first in the race and that was not conceived by a registered eligible thoroughbred stallion. The bill would require owner premiums to be listed in the racing program, and to be distributed at the same time as the purse.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the official registering agency, after deducting 5% for administrative costs, to distribute the balance of the deposits, 10% to be used for the promotion of California-bred races, for owner premiums. After these deductions, the bill would require 75% of the remainder to be paid to the breeder fund for breeder awards, and 25% of the remainder to be paid to the stallion fund for stallion awards.

The bill would also require the official registering agency for thoroughbreds to establish procedures for the registration of eligible thoroughbred stallions, and authorize the agency to charge a fee for doing so.

(3) Existing law provides for the payment of a daily state license fee by a fair or association conducting horseracing at varying rates depending on the amount handled in its parimutuel pool and the type of racing.

This bill would provide that if there is a reduction in the amount of license fees that a thoroughbred racing association pays, an amount equal to 5% of any savings resulting from the reduction shall be paid to the official registering agency for thoroughbreds and distributed as required pursuant to existing law.

Ch. 394 (SB 1450) Kelley. Mobilehomes and manufactured housing: sales: escrow accounts and transporters.

Existing law with respect to transactions by or through a dealer for the sale or lease, with an option to buy, a new or used manufactured home or mobilehome requires that an escrow account be established and requires that prescribed escrow instructions be included for every transaction. Existing law requires that, among other things, the escrow instructions specify, with respect to an installed manufactured home or mobilehome, that all funds in the escrow account be disbursed either at the time the buyer receives delivery of the home and the home passes inspection pursuant to specified provisions of law applicable to the buyer or, if the inspection provisions are not applicable to the buyer, at the time the buyer receives delivery of the home and all agreed upon delivery requirements have been met.

This bill would add to these provisions that, if mutually agreed upon between buyer and dealer, the escrow instructions may specify that funds be disbursed to a government agency for the payment of fees and permits required as a precondition for an installation acceptance or certificate of occupancy, and the information that may be acceptable to the escrow agent.

Under existing law, the Department of Housing and Community Development regulates sales, distribution, and the transportation under permit of mobilehomes, manufactured homes, and commercial coaches, including the issuance of occupational licenses and the issuance of transportation decals and other visual displays.

This bill would delete the provisions relating solely to the transportation of, including the issuance of transportation decals for, and the definition of "transporter" in connection with, mobilehomes, manufactured homes, and commercial coaches.

Ch. 395 (SB 1493) Johnson. Governmental liability.

Existing law defines the term "prisoner" to include an inmate of a prison, jail, or penal or correctional facility for the purposes of the law relating to the liability of public agencies and their employees.

This bill would amend this provision to specify that a lawfully arrested person who is brought into a law enforcement facility for the purpose of being booked, as specified, becomes a prisoner, as a matter of law, at the time of his or her initial entry into a prison, jail, or penal or correctional facility, as specified.

Ch. 396 (SB 1525) Wright. Common interest developments: insurance.

Existing law requires the association of a common interest development to prepare and distribute to members of that association a summary of the liability coverage policy for its director and officers and a summary of the association's earthquake and flood insurance policy.

This bill would revise and recast these provisions to instead require an association to distribute to the association's members a summary of the association's policies of insurance, including information regarding the coverage provided by, and the status of, each policy, as specified. The bill would require the summary to contain a specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

statement informing the members of their right to review the policies and their potential liability notwithstanding those policies.

Ch. 397 (SB 1530) Marks. Solicitations: fraudulent bills.

Existing law provides that it is unlawful for a person to solicit payment of money by means of a written statement or invoice, or any writing that reasonably could be interpreted as a statement or invoice, for goods not yet ordered or for services not yet performed and not yet ordered unless there appears on the face of the billing, invoice, or statement a specified warning. A violation of these provisions is punishable by imprisonment in a county jail not exceeding 6 months, by a fine not exceeding $1,000, or by both that fine and imprisonment.

This bill instead would provide that it is unlawful for a person to solicit payment of money by means of a written statement or invoice, or any writing that reasonably could be considered a bill, invoice, or statement of account due, but is in fact a solicitation for an order, unless the solicitation conforms to specified requirements. The bill would revise certain requirements governing the display and content of the solicitation and would increase the amount of the fine that may be imposed for a violation of these provisions to $2,500. By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 398 (SB 1546) Lewis. Pest control.

Existing law authorizes a registered pest control company to subcontract work. Existing law provides that the consumer may dictate acceptance of the proposed subcontractor or may select an appropriate person or entity of the consumer's choosing.

This bill would instead provide that the registered company shall not subcontract structural fumigation work without the written consent of the consumer. It would provide that the consumer may authorize the subcontracting of the work as proposed or may contract directly with another registered company licensed to perform the work.

Existing law provides that subcontracting of work does not relieve the prime contractor or the subcontractor from responsibility for, or from disciplinary action because of, any act or omission on its part, which would otherwise be a ground for disciplinary action.

This bill would provide that the registered company making the initial proposal including proposed work that the registered company intends to subcontract shall not be subject to disciplinary action or otherwise responsible for any act or omission in the performance of the work that the consumer directly contracts with another registered company to perform.

Existing law requires a notice to a consumer before a registered company may charge a consumer for work not actually rendered by the company or under its direct supervision. Under existing law, that notice is required to be given before authorizing the performance of the work.

This bill would require the notice to be given for fumigation, and would revise the contents of the notice. It would also revise the contents of a notice required in a pest control report.

This bill would also revise requirements applicable when a Branch 3 registered company subcontracts a fumigation to a Branch 1 registered company, and would impose requirements where the consumer contracts directly with a Branch 1 registered company.

This bill would incorporate additional changes to Section 8516 of the Business and Professions Code proposed by AB 3473, contingent upon the prior enactment of that bill.

Ch. 399 (SB 1542) Peace. San Diego Unified Port District.

(1) Existing law, the San Diego Unified Port District Act, provides for the San Diego Unified Port District.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under the act, the district may be established or organized and governed as provided in the act.

This bill, in addition, would authorize the district, subject to specified provisions, to use the powers and authority granted to it to protect, preserve, and enhance the physical access to San Diego Bay, the natural resources of the bay, including plant and animal life, and the quality of water in the bay.

(2) The act specifies that the area within the district shall include all the corporate areas of the cities of San Diego, Chula Vista, Coronado, National City, and Imperial Beach, and any unincorporated territory in the County of San Diego contiguous thereto, which is economically linked to the development and operation of San Diego Bay, included in the district by the board of supervisors of the county, as authorized by the act.

This bill, in addition, would specify that the regulatory, taxing, and police power jurisdiction of the district as otherwise provided in the act, shall apply to the above-described area.

The bill also would extend the district's power to exercise its land management authority and powers over any other lands or interest in lands acquired by the district in furtherance of the district's powers and purposes as provided in (14).

(3) Under the act, ordinances passed by the board do not go into effect until the expiration of 30 days from their publication, except as specified.

This bill, instead, would provide that ordinances passed by the board shall not go into effect until 30 days from the date of passage by the board, except as specified.

(4) Under the act, all grants, franchises, leases, permits, rights, or privileges for one year or less are required to be made by the port director in accordance with any regulations the board prescribes by resolution, and all grants, franchises, leases, permits, rights, or privileges for more than one year are required to be made by ordinance, except as provided.

This bill, instead, would require all grants, franchises, leases, permits, rights, or privileges for 5 years or less to be made by the executive director in accordance with any regulations the board prescribes by resolution, and all grants, franchises, leases, permits, or privileges for more than 5 years to be made by ordinance, except as provided.

(5) Under the act, the district may bring an action to determine the validity of any of its bonds, warrants, contracts, obligations, or evidence of indebtedness, as specified.

This bill also would authorize the district to bring an action to determine the validity of any of its taxes, revenues, rates, and charges.

(6) Under the act, any proposed use by the district of any particular land within its jurisdiction that would constitute a public nuisance may be prohibited by ordinance adopted by the city within which the land is located.

This bill would repeal this provision.

(7) Under the act, the district is authorized to exercise the right of eminent domain within the boundaries of the district to take any property necessary or convenient to exercise its powers.

This bill would authorize the district to exercise this right of eminent domain provided it is consistent with, and pursuant to, specified provisions of the act.

(8) Under the act, the district is authorized to refund any indebtedness.

This bill also would authorize the district (a), for the exclusive purpose of securing financing or refinancing of any project or purpose permitted by the act, through the issuance of bonds or certificates of participation by a joint powers authority, to borrow money or purchase or lease property from the port authority, and (b) to enter into any liquidity or credit agreement it deems necessary for certain financing or refinancing purposes.

(9) Under the act, the district, within its boundaries, is authorized to acquire, purchase, take over, construct, maintain, operate, develop, and regulate grain elevators, bunkering facilities, belt or other railroads, floating plants, and other facilities necessary for, or incident to, the development and operation of a harbor or for the accommodation and promotion of commerce, navigation, fisheries, or recreation in the district.

This bill, in addition, would authorize the district to acquire, purchase, develop, construct, maintain, repair, operate, and regulate highways, streets, roadways, bridges, railroads, trolleys, buses, and similar transportation facilities, parking facilities, power,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

communication facilities, water and gas pipelines, and all other transportation and utility facilities or betterments incidental, necessary, or convenient to the development and operation of air terminal and rail facilities, and the other purposes for which the district was established.

(10) The bill also would authorize the district to exercise its right of eminent domain, as specified in (7), and other activities, as specified in (9), if the activities are adjacent to lands specified in (9), the board finds that adequate areas for these activities do not presently exist within those lands, and the activities are necessary or incidental to carrying out the purposes described in (14).

(11) Under the act, the district board is authorized to provide for the issuance, sale, or exchange of refunding bonds to redeem or retire any bonds issued by the district.

This bill, among other things, would authorize the district board to do these things by resolution and without the necessity of an election.

(12) Under the act, whenever the district board deems it necessary for the district to incur a revenue bonded indebtedness for the acquisition, construction, completion, or repair of any or all improvements, works, property, or facilities authorized by the act, the board is required to issue those revenue bonds in accordance with the Revenue Bond Act of 1941 and by ordinance adopted by $^2/_3$ of all the members of the board and subject to referendum.

This bill would revise the method by which the district board could incur a revenue bonded indebtedness for these purposes.

(13) Existing law authorizes the district, in any year, to levy assessments, reassessments, or special taxes and to issue bonds to finance waterway construction projects and related operations and maintenance, or operations and maintenance projects independent of construction projects in accordance with, and pursuant to, specified provisions of law.

This bill would add to those specified provisions of law the Refunding Act of 1984 for 1915 Improvement Act Bonds, as specified in the Streets and Highways Code.

(14) Under the act, the tide and submerged lands conveyed to the district by any city included in the district shall be held by the district and may be used for specified general statewide purposes.

This bill would add to that list of specified general statewide purposes the establishment and maintenance of those lands for open space, ecological preservation, and habitat restoration.

(15) This bill also would make technical, nonsubstantive changes in those provisions by, among other things, changing the title of port director to executive director.

Ch. 400 (SB 1565) Committee on Local Government. Local agencies.

(1) Existing law contains a reference to the Street Opening Act of 1903, which has been repealed.

This bill would delete a reference to that act.

(2) Existing law describes the boundaries of each county in the state.

This bill would revise the description of the boundaries of Alameda County, as specified.

(3) Under existing law, there are obsolete cross references in provisions governing reclamation districts conducting all-mailed ballot elections.

This bill would revise those references to reflect existing sections of the Elections Code and would make a clarifying change.

(4) Under existing law the Santa Barbara County Board of Supervisors is authorized to conduct specified meetings by audio teleconferencing until January 1, 1997.

This bill would continue that authorization indefinitely.

Ch. 401 (SB 1582) Maddy. Unclaimed property.

Existing law provides for the administration of an estate by a public administrator. Existing law requires the public administrator to, upon receipt, deposit all money of the estate in an insured account in a financial institution or with the county treasurer of the county in which the proceedings are pending. Existing provisions of law regarding summary disposition of defined small estates by a public administrator require, if there are no beneficiaries, the public administrator to deposit the balance of a decedent's estate

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

with the county treasurer for use in the general fund of the county, as specified, and to give the Controller a prescribed notice if the amount of the deposit exceeds $10,000. Existing law provides that the county treasurer may release to the depositor of specified unclaimed money, their heir, beneficiary, or duly appointed representative, unclaimed money if claimed prior to a certain time upon submitting proof satisfactory to the treasurer.

This bill would authorize the county treasurer to release unclaimed money deposited pursuant to those provisions of existing law regarding summary disposition of small estates to any blood relative of either the decedent or the decedent's predeceased spouse who files a specified affidavit, as specified. This bill would also require the public administrator to give the above-described notice if the amount of the deposit exceeds $5,000.

Ch. 402 (SB 1594) Craven. Mobilehome parks: mobilehome ombudsman sign.

(1) Under the existing Mobilehome Residency Law, the management, as defined, of a mobilehome park, as defined, is required to post on a sign provided by the Department of Housing and Community Development only the name, address, and telephone number of the mobilehome ombudsman designated pursuant to a specified provision of the Mobilehome-Manufactured Housing Act of 1980. The Mobilehome Residency Law requires that the sign be posted by the management in a conspicuous public place within the mobilehome park.

This bill would specify that the sign provided by the Department of Housing and Community Development be printed in large boldface print. The bill would also require that the sign be posted either in the mobilehome park clubhouse or in another conspicuous public place within the mobilehome park and would make a violation of the provisions an infraction. Because a violation of these provisions is punishable as an infraction, the bill would impose a state-mandated local program by creating a new crime.

This bill also would provide that the enforcement of these provisions requiring the posting of the ombudsman sign may be accomplished by telephonic or written communication, or by site inspection, as specified, and that these provisions do not require enforcement by site inspection of every mobilehome park, or reissuance of a new ombudsman sign to every mobilehome park in the enforcement agency's jurisdiction to ensure that the ombudsman signs required by this section are posted.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 403 (SB 1608) Wright. Psychiatric health facilities.

Existing law provides for state licensing of psychiatric health facilities.

This bill would require the State Department of Mental Health to establish a system for the imposition of prompt and effective civil sanctions against psychiatric health facilities in violation of the laws and regulations of this state.

Ch. 404 (SB 1645) Ayala. Veterinary medicine.

Existing law provides for the licensing of veterinarians. These licensing provisions are administered by the Board of Examiners in Veterinary Medicine in the Department of Consumer Affairs, until July 1, 1998, when the provisions that establish the board become inoperative. The licensing provisions require applicants for a license to take an examination consisting of a national and a state board examination. Existing law requires the Veterinary Medical Board to set the fee for filing an application for the national examination and sets the maximum amount of that fee at $250. This fee is collected by the board and credited to the Veterinary Medical Board Contingent Fund, a continuously appropriated fund.

This bill would, instead, set the maximum amount of that fee at $325. However, the bill would provide that when the board becomes inoperative pursuant to the above

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions, the change in the maximum amount of the fee would terminate and the maximum amount of the fee would be $250.

This bill would, also, require the fees to be reduced by an amount that corresponds to any money redeposited into the Veterinary Medical Board Contingent Fund from money that was transferred pursuant to the Budget Act of 1991 from the Veterinary Medical Board Contingent Fund to the General Fund. The bill would limit this reduction to an amount that does not cause the Veterinary Medical Board Contingent Fund to have a reserve of less than 3 months of annual authorized board expenditures. The bill would prohibit the board from setting the fees at an amount that would result in a Veterinary Medical Board Contingent Fund reserve of more than 10 months of annual authorized board expenditures.

Since the bill would authorize an increase in the amount of moneys in the fund, it would, thereby, make an appropriation.

Ch. 405 (SB 1675) Russell. Minors: dependency mediation.

Existing law authorizes, until December 31, 1996, prescribed counties, as a pilot project, to increase the fee for a certified copy of a certified copy of a birth certificate by $3 for the purpose of providing dependency mediation services in the juvenile court. Public agencies are exempt from paying this amount. Existing law specifies the effect of this increase on a court's progress towards achieving its required cost reduction goals.

This bill would extend the applicability of this authorization to the board of supervisors of any county, as specified.

Existing law provides that each juvenile court in prescribed counties is encouraged to develop a dependency mediation program to provide a problem-solving forum for all interested persons to develop a plan in the best interests of the child, emphasizing family preservation and strengthening.

This bill would extend the applicability of these provisions to each juvenile court.

Ch. 406 (SB 1739) Russell. Mutual insurers: conversion.

Under existing law, a domestic incorporated mutual life insurer or life and disability insurer that issues nonassessable policies on a reserve basis may convert into a stock life insurer or stock life and disability insurer, as specified. Current law specifies procedures and restrictions governing such a conversion.

This bill would revise and recast these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 407 (SB 1863) Johnson. Mortgage insurance.

Existing law requires a mortgage guaranty insurer to limit its coverage for insurance against nonpayment of a first lien or charge on real estate to a maximum of a net of 25% at risk of the entire indebtedness to the insured, or in lieu thereof, to elect to pay the entire indebtedness to the insured and acquire title to the authorized real estate security.

Existing law also requires a mortgage guaranty insurer to limit its coverage for insurance against nonpayment on a junior lien to a maximum of a net of 25% of risk of the combined indebtedness of all existing mortgage loan amounts secured by all liens or charges on the real estate, or in lieu thereof, to elect to pay the entire indebtedness to the insured and acquire title to the authorized real estate security.

This bill would require a mortgage guaranty insurer to limit its coverage for insurance against nonpayment in each of the above situations to no more than a net of 30% of risk, as specified.

This bill would also authorize the Insurance Commissioner to adopt regulations to increase the maximum coverage limitation of a mortgage guaranty insurer to an amount not to exceed a net of 35% of risk of the entire indebtedness, if Freddie Mac or Fannie Mae increases the required amount of mortgage guaranty insurance.

The bill would provide that these provisions do not apply to the California Housing Loan Insurance Fund or to any program it may develop in conjunction with any federal or federally sponsored mortgage lender or insurer.

Existing law authorizes mortgage guaranty insurance or reinsurance to be ceded by contract if the assuming insurer is either a mortgage guaranty insurer that meets certain requirements, or a nonaffiliated insurer or reinsurer that meets certain requirements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, with respect to the provisions that permit ceding insurance to a nonaffiliated insurer or reinsurer, instead permit an assuming insurer or a reinsurer to be under common control with the ceding mortgage guaranty insurer but not owned in whole or in part by the ceding insurer or another mortgage guaranty insurer.

Ch. 408 (SB 1891) Costa. Water transfers.

Existing law authorizes the transfer of water, or the right to the use of water, that is available as a result of prescribed water conservation efforts.

This bill would provide that upon the completion of the term of such a transfer agreement, the right to the use of the water shall revert to the transferor as if the water transfer had not been undertaken.

Ch. 409 (SB 1901) Maddy. Alcoholic beverages: licenses: suspension.

The Alcoholic Beverage Control Act requires the suspension of a taxpayer's alcoholic beverage license in the case in which that taxpayer fails to pay any taxes or penalties due under the Alcoholic Beverage Tax Law.

This bill would expand this suspension requirement to also apply in the case of a taxpayer who fails to pay any taxes or penalties due under the Sales and Use Tax Law, the Bradley-Burns Uniform Local Sales and Use Tax Law, or the Transactions and Use Tax Law, when that liability arises in whole or in part from the exercise of the privilege of an alcoholic beverage license. This bill would also provide that any suspension under this expanded requirement may only be imposed if the taxpayer is at least 3 months delinquent.

Ch. 410 (SB 1907) O'Connell. Trusts: power of beneficiary.

Existing law requires a person who is a beneficiary of a trust and who holds a power to take or distribute income or principal to or for his or her benefit pursuant to a standard to exercise that power reasonably and in accordance with the standard. Existing law provides that, in any case in which the standard governing the exercise of the power does not clearly indicate that a broader power is intended, the holder of the power may exercise it in his or her favor only for his or her health, education, support, or maintenance.

This bill would revise these provisions to, among other things, provide that, unless a broader power is intended by express reference to these provisions, this beneficiary may take or distribute income or principal to or for his or her benefit only for his or her health, education, support, or maintenance, as provided. The bill would provide that its changes would apply retroactively to trusts meeting certain criteria, except as specified.

Ch. 411 (SB 1922) Wright. Health care facilities: Cal-Mortgage Loan Insurance Program.

Existing law, the California Health Facility Construction Loan Insurance Law, authorizes the Office of Statewide Health Planning and Development to insure health facility construction, improvement, and expansion loans. Existing law authorizes the office to assume or direct managerial or financial control of the borrower in certain prescribed manners.

This bill would provide that the office shall not be liable for any debt of the borrower, other than the loan insured under the above-described law, that is a result of the office asserting its legal remedies against a borrower insured under that law.

Existing law requires each applicant for insurance to be given an opportunity for a fair hearing.

This bill would provide for judicial review of the final decision of the hearing by the filing of a petition for writ of mandate within 30 days of the final decision.

The bill would also provide that if a borrower has defaulted on making payments to the borrower's bond trustee, the office may defease a portion or all of the bonds or purchase a portion or all of the bonds, and would require the Treasurer to purchase the bonds on behalf of the office, if requested. It would provide that, if a loan insured by the office has gone into bankruptcy and a plan has been proposed for adoption, upon a certification by the office that the insurance is in place and would be in place if the plan

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

were adopted, the office shall have the right to vote on the plan on behalf of the holders of the loan insured by the office.

Ch. 412 (SB 1980) M. Thompson. Dungeness crab.

Existing law authorizes the Director of Fish and Game to specify by public announcement when crab traps may be set and baited prior to the opening date of the Dungeness crab season in Fish and Game Districts 6, 7, 8, and 9, and authorizes the setting and baiting of crab traps under the announcement if no other attempt is made to take or possess Dungeness crab in those districts.

This bill would require the director to make that public announcement on or before November 20 of any year if requested on or before November 10 of that year.

Ch. 413 (SB 2011) Killea. Hospice pilot project.

Existing law creates a Special Hospital: Hospice Pilot Project to be established and administered by the State Department of Health Services to determine the need of hospice patients for acute inpatient hospital care. Existing law repeals these provisions on January 1, 1997, except for certain reporting requirements that are repealed on January 1, 1998.

This bill would delete these repeal dates and delete the reference to "pilot" within those provisions.

Ch. 414 (SB 2018) Johnson. Boating safety.

Existing law authorizes each county and entities other than a county to receive state financial aid from the Department of Boating and Waterways for boating safety and enforcement programs.

This bill would authorize the department to grant funds from the Harbors and Watercraft Revolving Fund to local public agencies, nonprofit organizations, and colleges and universities for scholarship funding relating to boating safety education and to finance the purchase of vessels and related safety equipment for use in boating safety education classes. The bill would authorize the department to adopt regulations necessary to implement its provisions.

Ch. 415 (SB 2175) Rogers. Veterans: farm and home purchase benefits.

Existing law, the California National Guard Members' Farm and Home Purchase Act of 1978, provides for farm and home purchase benefits for designated members of the California National Guard to be administered by the Military Department with authorization for the department to assign, pursuant to agreement, the administration of the act to the Department of Veterans Affairs or the California Housing Finance Agency. For purposes of administering the act, the Military Department is required, among other things, to adopt rules and regulations that establish preferences in the granting of benefits conferred by the act and to prescribe and determine the qualifications of all members.

This bill would revise the act to provide instead for the administration of the act by the Department of Veterans Affairs.

Under existing law, loans for homes or farms available for veterans under the Veterans Farm and Home Purchase Act of 1974 (the Cal-Vet program) may be amortized for periods not to exceed 40 years, except that loans for mobilehomes may be amortized for periods not to exceed 30 years.

This bill would specify that the 30-year amortization limitation with respect to mobilehomes under the Cal-Vet program would apply only to mobilehomes located in mobilehome parks, as defined, and would make a conforming change.

Ch. 416 (AB 2068) Richter. Hearsay: exceptions.

Existing law, known as the "hearsay rule," provides that, at a hearing, evidence of a statement that was made other than by a witness while testifying at the hearing and that is offered to prove the truth of the matter stated is inadmissible. Several exceptions to the hearsay rule permit the admission of certain kinds of such evidence, including dying declarations, declarations against interest, and statements of the declarant's then existing mental or physical state if offered for specified purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would create a new exception to the hearsay rule for evidence of a statement made by a declarant who is unavailable, as specified, that purports to narrate, describe, or explain the infliction or threat of physical injury upon the declarant by the party against whom the statement is offered, and meets other specified criteria.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 417 (SB 1500) Mountjoy. State real property.

Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services, with the approval of the State Public Works Board, to sell, exchange, lease, or transfer specified parcels of state property. The bill would also exempt a sale, exchange, lease, or transfer from specified provisions of the California Environmental Quality Act, would designate the funds into which proceeds are to be deposited, and would require the reservation of mineral rights, as specified.

This bill would also delete the authority of the director to sell, lease, or exchange specified parcels that the director was previously authorized to sell or exchange.

This bill would additionally authorize the Director of Parks and Recreation, with the approval of the State Public Works Board and the Director of General Services, to sell or exchange a specified parcel of state property.

Ch. 418 (SB 435) Solis. Overseas trade offices: India.

Existing law sets forth the duties of the Director of the California State World Trade Commission, in the Trade and Commerce Agency, in promoting foreign trade, including conducting various studies, and the establishment of overseas trade offices. The Governor is an ex officio member of the commission.

This bill would state the recommendation of the Legislature that the Governor instruct the director to continue to study the viability of California products in India and the feasibility of establishing an overseas trade office in that country. It would recommend that the director be instructed to publish any new findings made pursuant to these provisions and report back to the Legislature by January 1, 1998.

Ch. 419 (AB 2057) K. Murray. Crimes: places of worship.

Existing law authorizes the Governor to offer a reward of not more than $50,000, payable out of the General Fund, for information leading to the arrest and conviction of persons who have committed any of several specified crimes.

This bill would authorize the Governor to offer a reward of not more than $100,000, payable out of the General Fund, for information leading to the arrest and conviction of a person who commits arson upon a place of worship, thereby making an appropriation.

Ch. 420 (AB 1999) Knight. Peace officer: fleeing.

(1) Existing law makes it a misdemeanor or a felony punishable by specified imprisonment or a fine of not less than $170 nor more than $2,000, or by both the fine and imprisonment, for any person, while operating a motor vehicle and with the intent to evade, to willfully flee, or to otherwise attempt to evade a pursuing peace officer's motor vehicle or bicycle if certain conditions exist and the pursued vehicle is driven in a willful or wanton disregard for the safety of persons or property.

This bill would increase the amount of the fine to not less than $1,000 nor more than $10,000 and would describe acts that constitute driving in a willful or wanton disregard for the safety of persons or property.

(2) Existing law makes it a misdemeanor or a felony punishable by specified imprisonment or by a fine of not less than $1,000 nor more than $10,000, or by both the imprisonment and fine, to engage in the conduct described in (1), except with regard to the safety of persons or property, when that conduct proximately causes death or serious bodily injury to any person.

This bill would increase the minimum fine to $2,000.

Ch. 421 (AB 1137) Baldwin. Manslaughter.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that voluntary manslaughter is punishable by imprisonment in the state prison for 3, 6, or 11 years.

Existing law also provides that when any person is convicted of 2 or more felonies, and a consecutive term of imprisonment is imposed, the aggregate term of imprisonment for all these convictions shall be the sum of the principal term, the subordinate term, and any additional term. The subordinate term for each consecutive offense which is not a violent felony consists of $1/3$ of the middle term of imprisonment prescribed for each other felony conviction for which a consecutive term is imposed.

This bill instead would authorize imposition of a full, separate, and consecutive term for each voluntary manslaughter offense, whether or not the offenses were committed during a single transaction.

Ch. 422 (AB 3224) Poochigian. Juvenile records: confidentiality.

(1) Existing law generally provides for the confidentiality of information contained in records concerning juvenile offenders. However, there are exceptions to this policy, such as notification to school officials, at the school of attendance, of any minor who commits a specified misdemeanor or felony.

The bill would require, in the case of a minor who has been found by a juvenile court to have committed any felony, that the court notify the sheriff of the county or counties in which the minor resides and in which the offense was committed, of that finding, as specified. The bill would require that this information be kept confidential. An intentional violation of this confidentiality provision would be a misdemeanor punishable by a fine of up to $500. By creating a new crime, this bill would establish a state-mandated local program.

The bill also would impose additional duties on local officials, by requiring court employees to notify county sheriffs in the manner described above, and by requiring local officials to disclose specified information upon request, thereby creating state-mandated local programs.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 423 (AB 588) Rainey. Crimes: assault: battery: public transportation.

Existing law provides increased punishment for assault or battery when the victim of these offenses is an operator, driver, station or ticket agent, or passenger on certain transportation vehicles.

This bill would repeal and recast the assault offense and would add a battery offense to apply to situations where these offenses are committed against any person on the property of, or in a motor vehicle of, a public transportation provider, as defined. Because this bill would expand the scope of existing crimes, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 424 (AB 622) Conroy. Electric and gas service: master-meter customers.

Existing law requires the Public Utilities Commission to set electric and gas rates for master-meter customers at a level that enables the master-meter customer to recover the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

costs of operating its submeter system at a cost to the users of the electric or gas service no greater than if the corporation furnished service directly through individual meters.

This bill would permit the transfer of the ownership and operational responsibility for the provision of electric or gas service from an owner of a master-metered mobilehome park or manufactured housing community that provides electric or gas service to residents to the electric or gas corporation providing service in the area in which the mobilehome park or manufactured housing community is located. Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 425 (AB 2219) Mazzoni. Beverage containers: community conservation corps.

(1) Existing law, the California Beverage Container Recycling and Litter Reduction Act, requires the Department of Conservation to certify one operator to establish a pilot program, the Pacific Beach Pilot Mobile Recycling Program, incorporating all convenience zones in the Pacific Beach area of San Diego County. Existing law requires the department to submit a report on the pilot program to the Legislature by July 1, 1996. Existing law provides that the pilot program will remain in effect only until January 1, 1997.

This bill would extend the date for submittal of the pilot program report to the Legislature to April 11, 1997, and would provide that the pilot program remain in effect until January 1, 1998.

(2) Existing law requires a distributor of specified beverage containers to pay a redemption payment to the Department of Conservation, for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund. The money in the fund is continuously appropriated to the department to pay refund values and for other purposes. After all expenditures have been made from the fund, the balance in the fund may be expended by the department for specified purposes, and from that balance the department may annually issue $7,000,000 in grants, as adjusted for the cost of living, to certified community conservation corps, as defined, that meet specified criteria and are designated by a city, or a city and county, with a specified population, to perform litter abatement, recycling, and related activities.

This bill would additionally include, as eligible for those grants, community conservation corps that are designated by a county to perform litter abatement, recycling, and related activities, and are certified by the California Conservation Corps as meeting requirements concerning operation and other specified criteria, thereby making an appropriation.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 426 (AB 2243) Alpert. Air pollution: gasoline vapor control systems.

Existing law authorizes air pollution control districts and air quality management districts to adopt stricter procedures and performance standards than those adopted by the State Air Resources Board for determining the compliance of systems for the control of gasoline vapor emissions.

This bill would prohibit districts from requiring the retrofitting, removal, or replacement of any existing system, which is installed and operating in compliance with applicable requirements, before a specified 4-year period, except as specified. The bill would revise the duties of the state board relating to the certification of vapor control systems, and make related changes.

Ch. 427 (AB 2411) Machado. Milk.

(1) Existing law regulates the content and standards for manufactured milk products in this state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, in addition, would require any pasteurized milk or milk product, frozen dessert, cheese, or product resembling milk products to be produced, distributed, or sold in accordance with the current good manufacturing practices set forth in the Code of Federal Regulations.

The bill also would require any sanitary, sterilization, or pasteurization requirement relating to or affecting the production of raw milk for pasteurization, or the processing, distribution, or sale of any pasteurized milk or pasteurized milk product, frozen dessert, cheese, or product resembling milk products, that is adopted by the Secretary of Food and Agriculture, to be in conformity with the current good manufacturing practices set forth in the Code of Federal Regulations. The bill also would authorize the secretary, after public hearing, to adopt regulations referencing specified recommendations of the United States Public Health Service/Food and Drug Administration.

(2) Existing law authorizes the secretary to adopt regulations pertaining to temperature requirements for market milk delivered to consumers and to establish temperature requirements for market milk delivered to consumers that differ from any or all requirements provided for under provisions of law governing market milk and cream.

This bill would delete obsolete language in these provisions requiring the secretary to initiate public hearings in connection with these requirements not later than July 1, 1972.

(3) Existing law requires market milk to be cooled to 50 degrees Fahrenheit or below, whether it is raw or pasteurized, and except as otherwise provided, to be so maintained until it is delivered to the consumer.

This bill would require the market milk to be cooled to 45 degrees Fahrenheit or below.

(4) Existing law sets forth provisions governing extra light milk.

This bill would apply these provisions, instead, to one percent lowfat milk.

Ch. 428 (AB 2414) Rainey. Bank and corporation taxes: alternative minimum tax.

The Bank and Corporation Tax Law provides for the levy of an alternative minimum tax in partial conformity with federal law, subject to certain modifications that include a tentative minimum tax. The tentative minimum tax is imposed on specified items of income and items of tax preference at a rate of 7%.

This bill would make certain legislative findings and declarations regarding the alternative minimum tax. The bill would require the Franchise Tax Board and the Department of Finance to prepare and make specified recommendations to the Legislature aimed at simplifying the alternative minimum tax.

Ch. 429 (AB 2635) Morrissey. Air pollution: portable internal combustion engines: registration program: recordkeeping and reporting.

Existing law authorizes air pollution control districts and air quality management districts to establish a permit system requiring persons who build, erect, alter, operate, or use any article, machine, equipment, or contrivance that may cause the issuance of air contaminants to obtain a permit to ensure compliance with applicable air quality standards.

Existing law requires the State Air Resources Board to establish an optional registration program, by regulation, for portable internal combustion engines, as defined, and requires that the regulations adopted by the state board, on or before January 1, 1997, include specified provisions.

This bill would revise that program and those specified regulatory provisions to apply to portable equipment, as defined, and to delay the date by which the inclusion of those provisions is required until July 1, 1997. The bill would require any recordkeeping and reporting requirements prescribed by the state board for the purpose of tracking engine utilization and movement to be the minimum that is necessary to provide sufficient emission inventory data and allow adequate enforcement of the registration program. The bill would make technical and clarifying changes in those provisions.

The bill would require the state board to include the registration program in the state implementation plan.

The bill would prohibit source testing of engine emissions under prescribed conditions.

The bill would make related legislative findings and declarations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 430 (AB 2676) Pringle. Accountants: professional conduct: duty to report.

Existing law authorizes the State Board of Accountancy, after notice and hearing, to revoke, suspend, or refuse to renew any permit or certificate, as specified, or to censure the holder of that permit or certificate for unprofessional conduct, as respects various causes, including conviction of a crime substantially related to the qualifications, functions, and duties of a certified public accountant or public accountant.

This bill would, with respect to standards of professional conduct, require a licensee to report to the board in writing, within 30 days of the time the licensee has knowledge of certain events occurring after January 1, 1997, including conviction of a crime, as specified.

Ch. 431 (AB 2827) Escutia. White collar crimes.

Existing law provides that any person who commits 2 or more related felonies, a material element of which is fraud or embezzlement, which involve a pattern of related felony conduct, as defined, which conduct involves the taking of more than $500,000, is, upon conviction of 2 or more felonies in a single criminal proceeding, subject to 2, 3, or 5 additional years in the state prison and a fine not to exceed $500,000 or double the value of the taking, whichever is greater, and shall be liable for the costs of restitution to any victims of that crime.

This bill would provide that, where the conduct involves the taking of more than $100,000, but not more than $500,000, the person is subject to a fine not to exceed $100,000 or double the value of the taking, whichever is greater. This bill also would provide that a person is subject to an additional term of one year in the state prison if the loss exceeds $100,000 but does not exceed $150,000, or 2 years in the state prison if the loss exceeds $150,000 but does not exceed $500,000.

Ch. 432 (AB 3204) Knox. Emergency Telephone Users Surcharge Law.

Under the existing Emergency Telephone Users Surcharge Act, the amounts of surcharges required to be collected are due quarterly and are to be remitted to the State Board of Equalization by the service supplier no later than the last day of the second month following a calendar quarter.

This bill would instead require those amounts to be collected monthly and remitted to the board no later than the last day of the second month following the month in which the surcharges were collected and would require the filing with the board of monthly returns, rather than quarterly returns. However, the collection for the 4th quarter of calendar year 1996 would have to be remitted by February 15, 1997.

Ch. 433 (AB 3474) Committee on Environmental Safety and Toxic Materials. Hazardous waste: recyclable materials.

(1) Existing law subjects recyclable materials to the requirements of the hazardous waste control laws unless the Department of Toxic Substances Control issues a variance or unless the material meets specified requirements, including if the material meets specified requirements, including being recycled within 90 days of its generation. Such a waste is exempt from the hazardous waste control laws to the same extent that the waste is exempt from specified federal regulations.

A violation of the laws regulating hazardous waste is a crime.

This bill would delete the requirement that a recyclable material be recycled within 90 days of its generation and would instead require the material to be recycled within applicable generator accumulation time limits, as specified. The bill would delete the provision that this waste is exempt from the hazardous waste control laws to the same extent that the waste is exempt from those federal regulations.

The bill would revise the requirements for fuels removed from fuel tanks, for exclusion from classification as a waste.

(2) Existing hazardous waste control laws exclude infectious waste from the definition of recyclable materials under those laws.

This bill would repeal that exclusion.

(3) The bill would impose a state-mandated local program by revising the definition of a crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 434 (SB 571) Peace. Services: elderly and developmentally disabled.

Existing law, the California Residential Care Facilities for the Elderly Act, provides for the licensure and regulation of residential care facilities for the elderly. It defines residential care facility for the elderly as a housing arrangement chosen voluntarily by persons 60 years of age or over, or their authorized representative, where varying levels and intensities of care and supervision, protective supervision, or personal care, as well as health-related services upon adoption of prescribed regulations by the State Department of Social Services, are provided.

This bill would require the referring agency or facility, or its designee, to provide to the residential care for the elderly administrator all information in its possession concerning any history of dangerous propensity of the client prior to the placement in a residential care facility for the elderly. However, no confidential client information could be released without the consent of the client or an authorized representative.

Existing law expresses the intent of the Legislature that expenditures on state programs for persons with developmental disabilities shall have measureable and desirable results.

This bill would require the State Department of Developmental Services to ensure that the client master file entry of any person with developmental disabilities placed by a regional center is updated within 30 days after the change of residence.

Ch. 435 (SB 802) Monteith. Economic poisons.

(1) Existing law provides that whenever a county agricultural commissioner suspends a pest control operator registration, a pest control aircraft pilot registration, a pest control adviser registration, or a permit to use restricted materials, the party suspended may appeal to the Director of Pesticide Regulation within 10 days of mailing or personal service of the commissioner's order.

This bill instead would authorize the county agricultural commissioner to refuse, suspend, or revoke a county registration or permit described in the previous paragraph and would require that before that action is taken, the party so registered or the permittee be given a written notice of the proposed action unless the action is taken in the belief that continuance of a registration or permit would endanger public health, safety, or the environment. The bill would provide that the registered party or the permittee has the right to request a hearing before the commissioner within 20 days after receiving notice of the proposed action. The bill would require that, if a hearing is requested, notice of the time and place of the hearing be given at least 10 days before the date set for the hearing. The bill would authorize the commissioner to take the proposed action if a hearing is not requested in a timely manner. The bill would authorize the party whose registration or permit is refused, suspended, or revoked, if he or she requested and appeared at a hearing, to appeal to the director within 10 days of mailing or personal service of the commissioner's decision. The bill would make conforming changes.

(2) Existing law makes it unlawful for any person to engage for hire in the business of pest control unless the person has a pest control business license for the then current calendar year issued by the director.

This bill instead would make it unlawful for a person to advertise, solicit, or operate as a pest control business unless the person has a valid pest control business license issued by the director. The creation of this new crime would impose a state-mandated local program.

(3) Existing law proscribes certain activities of pest control dealer designated agents.

This bill would make it unlawful for any pest control dealer designated agent to fail to supervise employees actively in the use and sale of pesticides and to exercise responsibility in carrying on the business of a pest control dealer. The creation of this new crime would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law requires every manufacturer or importer of, or dealer in any economic poison, with prescribed exceptions, to obtain a certificate of registration from the Department of Pesticide Regulation before the economic poison is offered for sale.

This bill, except as specified, would prohibit data, other than public literature, previously submitted to the Director of Pesticide Regulation or to the Administrator of the United States Environmental Protection Agency to support an application for the original registration of a pesticide, or to support an application for an amendment adding any new use to that registration and that pertains solely to that new use, from being considered by the director to support an application by another person without the written permission of the original data submitter or its assigns or successors in interest.

(5) Existing law prohibits the use or possession of any pesticide designated as a restricted material for any agricultural use except under a written permit of the commissioner, except as specified.

This bill would authorize the issuance of any permit for a one-year period. The bill would authorize issuance of a permit for perennial agricultural plantings, nonproduction agricultural sites, or nonagricultural sites for up to a 3-year period.

The bill would require the permittee or a designated agent to report immediately any change in the information submitted or pertinent to the issuance of a valid permit to the appropriate commissioner.

(6) The California Public Records Act imposes certain duties upon the Secretary of Food and Agriculture with regard to the disclosure of information concerning pesticides.

This bill instead would impose those duties upon the Director of Pesticide Regulation. The bill would revise the contents of the affirmation required to be signed by the person who requests certain information under the act relative to pesticides.

(7) The bill would require the Department of Pesticide Regulation to evaluate any minor crop provisions in any enacted reauthorization of the federal Insecticide, Fungicide, and Rodenticide Act and to submit a report to the Legislature recommending any conforming statutory changes for California to realize the full benefit of any such federal program.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 436 (SB 902) Leslie. Transportation: transportation planning agencies: highways.

(1) Under existing law, a portion of the money in the Transportation Planning and Development Account in the State Transportation Fund, upon appropriation by the Legislature, is required to be allocated by the Director of Transportation for specified transportation planning purposes.

This bill would require the director, upon appropriation by the Legislature, to allocate funds from specified sources to certain transportation planning agencies for regional transportation planning purposes in an amount commensurate with their historical annual allocation.

(2) For purposes of funding the construction and improvement of the interregional road system, existing law designates eligible interregional and intercounty routes, including a specified portion of State Highway Route 65.

This bill would revise the description of the eligible portion of State Highway Route 65.

(3) Under the Mills-Alquist-Deddeh Act, county auditors are required to pay to transit operators, from the local transportation fund for public transportation purposes, amounts allocated by the appropriate transportation planning agency for the county, as designated by the Director of Transportation. For certain counties, local transportation commissions established by the county board of supervisors, have been designated as the transportation planning agency for the county.

This bill would create the El Dorado County Transportation Planning Agency, with a specified membership, as the designated transportation planning agency for El Dorado

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

County. Because local agencies would be required to appoint the agency's members, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 437 (SB 1063) Peace. Non-RCRA hazardous waste: classification: transportation and handling: zinc.

(1) Existing law defines the term "hazardous waste" for purposes of the hazardous waste control laws as meaning a waste that meets specified criteria adopted by the Department of Toxic Substances Control.

This bill would make a statement of legislative intent regarding zinc.

The bill would require the Department of Toxic Substances Control, by July 1, 1997, to evaluate the extent to which the state hazardous waste classification criteria, guidelines, or testing requirements, as they pertain to zinc-containing waste streams, are needed, to make specified determinations, and to adopt, amend, or repeal regulations that reflect those determinations.

(2) Existing law requires any person producing a hazardous waste to provide the person who will transport the hazardous waste with an applicable manifest that is completed as required by the department. Existing law prohibits the transportation of hazardous waste by any person, unless the person holds a registration issued by the department.

This bill would require the department, by March 31, 1997, to review the requirements that govern the transport, handling, or consolidation and transfer of non-RCRA hazardous wastes that meet specified requirements, and to report to the appropriate policy committees in both houses of the Legislature any recommendations that the department may have concerning appropriate changes to statutory requirements that govern that activity.

Ch. 438 (SB 1081) Leslie. Land use: frontier counties.

Existing law generally imposes land use and planning requirements on cities and counties, including the requirement that each city and county prepare and adopt a comprehensive, long-term general plan for its physical development, as specified. Existing law requires that the general plan contain certain mandatory elements, including a housing element, and specifies the contents and manner of adoption of that and the other mandatory elements.

This bill would designate as a "frontier county" any county with a population of less than 35,000 as of January 1, 1997, that has at least 50% federal land ownership, and that has issued less than 250 building permits in 1995, as specified.

This bill would make legislative findings and declarations that the provision of basic health, welfare, land use planning, and economic development programs by rural counties is a matter of statewide interest. Further, the bill would state legislative intent to protect the economic viability, and health and safety of specified rural counties by studying ways to reduce the burden of preparing and adopting housing elements. The bill would require the Department of Housing and Community Development to report to the Legislature, by January 1, 1998, its recommendation regarding adapting housing element requirements to the conditions, needs, and opportunities of frontier counties, as specified.

Ch. 439 (SB 1316) Russell. Real estate appraisers.

(1) Existing law, the Real Estate Appraisers' Licensing and Certification Law, regulates the licensing and certification of real estate appraisers and defines various terms related thereto, including "certificate," "certification," and "license."

This bill would delete the definitions of "certificate" and "certification" and would revise the definition of "license" to mean any license, certificate, permit, registration, or other means issued by the Office of Real Estate Appraisers authorizing the person to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

whom it is issued to act as a real estate appraiser. The bill would make various conforming changes to reflect this change in terminology.

(2) Existing law establishes the Office of Real Estate Appraisers and provides for the appointment by the Governor of a director of the office. Existing law authorizes the director to appoint a deputy director of regulatory licensing and a deputy director of administration.

This bill would delete the specific authorization for a deputy director of regulatory licensing and a deputy director of administration, and instead would authorize the director to appoint not more than 4 deputy directors as the director deems appropriate, as specified.

(3) Existing law establishes the Real Estate Appraisers' Advisory Committee to assist the director in the administration of the Real Estate Appraisers' Licensing and Certification Law.

This bill would abolish that committee and make related changes.

(4) Existing law authorizes the director to issue a citation that may contain an order to pay an administrative fine to a state licensed or state certified real estate appraiser who violates any provision of the Real Estate Appraisers' Licensing and Certification Law or regulations adopted to carry out its purposes.

This bill would authorize the director to issue a citation to any licensee, applicant, or person who acts in a capacity that requires a license, and who violates the Real Estate Appraisers' Licensing and Certification Law or regulations adopted to carry out its purposes. This bill would require the citation to contain specified information concerning the consequences of failing to respond to the citation.

(5) Existing law establishes various procedures for the licensure or certification of real estate appraisers.

This bill would require an applicant for licensure to submit 2 fingerprint cards for the purpose of a criminal record check, rather than one card. The bill would authorize issuance of a temporary license or certificate valid for up to 150 days, rather than 120 days.

(6) Existing law specifies fees to take an examination for a license or certification as a real estate appraiser.

This bill would delete specified examination fees and instead provide that the fees are not to exceed the cost to the Office of Real Estate Appraisers as determined by competitive bid. The bill would also revise and recast these provisions.

(7) Existing law establishes the Administration and Recovery Accounts in the Real Estate Appraisers Regulation Fund, and provides that after January 1, 1996, 5% of license or certificate fees are to be credited to the Recovery Account.

This bill would provide that on and after January 1, 2000, 5% of license or certificate fees are to be credited to the Recovery Account. The bill would also require interest to be paid on all money transferred from the Real Estate Appraisers Regulation Fund to the General Fund.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 440 (SB 1588) Committee on Transportation. Vehicles.

(1) Existing law requires specified documents to be submitted to the Department of Motor Vehicles in order to complete transactions with the department involving vehicles.

This bill would authorize the department to allow a person to submit any document required to be submitted to the department by using electronic media deemed feasible by the department instead of requiring the actual submittal of the document. The bill would also allow the submittal of documents requiring signatures, as specified, and would authorize the department to establish specified criteria regarding the use of this process. The bill would make conforming and related changes.

(2) Under existing law, the residence address in any record of the Department of Motor Vehicles is confidential, with specified exceptions.

This bill would clarify an existing exception in that provision.

(3) Existing law provides that the confidentiality specified in (1) above does not apply to an attorney when the attorney states that the motor vehicle or motorcycle registered owner or driver residential address information is needed in a civil or criminal action, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete the specific reference to motorcycle and would include a reference to a vessel in that exception.

(4) Existing law exempts from the confidentiality provision specified in (2) above the release of residential addresses on file with the department of persons participating in a vehicle retirement program to reduce air pollution.

This bill would delete that exception.

(5) Existing law provides for confidential records of the department to be released under certain exceptions.

This bill would clarify to whom this exception applies.

(6) Existing law authorizes the department to collect specific fees for the issuance and renewal of, among other things, an ambulance driver certificate and a schoolbus or school pupil activity driver's license.

This bill would clarify existing law by providing that, in addition to the above listed fees, the department is authorized to collect its costs for submitting fingerprints to the Department of Justice pursuant to existing law.

(7) Existing law requires the driver of an overtaken vehicle to give way to the right in favor of the overtaking vehicle on audible signal.

This bill would require an overtaken vehicle to also give way to the right upon the momentary flash of headlights by the overtaking vehicle. Because existing law makes it a crime to violate this provision, this bill would constitute a state-mandated local program by expanding the scope of that crime.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 441 (SB 1592) Rosenthal. Medicine.

(1) Existing law, the Medical Practice Act, requires the Medical Board of California to create a Committee on Affiliated Healing Arts Professions of the board.

This bill would delete this provision.

(2) Existing law requires physicians and surgeons, as a condition of licensure, to disclose certain information to the Medical Board of California, including that they immediately report any change of address to the board.

This bill would instead require physicians and surgeons to report each change of address within 30 days to the board, and would also require physicians and surgeons to report each change of name to the board within 30 days.

(3) Under existing law, the Hearing Aid Dispensers Examining Committee, under the jurisdiction of the Division of Allied Health Professions of the Medical Board of California, oversees the licensing, and administers the regulation, of individuals who engage in the practice of fitting and selling hearing aids. Existing law authorizes the committee to make recommendations to the board and the board is required to adopt rules and regulations as may be necessary to enable the board to carry into effect these provisions.

This bill would delete the latter provision and, instead, would authorize the committee to adopt, amend, or repeal, in accordance with the Administrative Procedure Act, regulations necessary to enable the committee to effect laws relating to the practice of fitting or selling hearing aids, subject to the review and approval of the board, with specified exceptions.

Ch. 442 (SB 1928) Johnston. Air pollution: districts: rules and regulations.

(1) Existing law requires air pollution control districts and air quality management districts to adopt and enforce rules and regulations to achieve and maintain the state and federal ambient air quality standards.

This bill would require the district rules and regulations to include a process to approve alternative methods of complying with emission control requirements that provide equivalent emission reductions, emissions monitoring, or recordkeeping.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require a district to allow implementation of those alternative methods if a facility demonstrates to the satisfaction of the district that the alternative methods will provide equivalent performance.

The bill would impose a state-mandated local program by imposing those new duties on districts.

The bill would prohibit a district, if a district rule specifies an emission limit for a facility or system, from setting operational or effectiveness requirements for any specific emission control equipment operating in that facility or system.

The bill would require a district, after the district has established the cost-effectiveness, in a dollar amount, for any rule or regulation adopted pursuant to specified law, to allow alternative means of producing equivalent emission reductions for any stationary source that has a demonstrated compliance cost exceeding that amount.

(2) Existing law requires a district, upon the State Air Resources Board's approval of the district's attainment plan, and each January 1 thereafter, to publish a list of regulatory measures scheduled or tentatively scheduled for consideration during the following year, and generally prohibits a district from proposing a regulatory measure for consideration during any year that is not contained in the district's most recently published list of proposed regulatory measures. Existing law exempts from those provisions any modification of existing rules that the district determines is necessary to preserve the original intent of the rules, as stated upon their adoption.

This bill would provide a similar exemption if the district determines that the modification is necessary to increase opportunities for alternative compliance methodology, as described in (1), above.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 443 (SB 1987) M. Thompson. Milk products plant license: limited manufacturing permit.

(1) Existing law requires any hotel, restaurant, boardinghouse, hospital, or other concern or agency that manufactures a product of milk for the use of any patron, guest, patient, or employee to obtain a milk products plant license.

This bill would require a hotel, restaurant, or boardinghouse that manufactures hard frozen or semifrozen dairy products for the use of any patron, guest, or employee to obtain a limited manufacturing permit, as specified. The bill also would specify that the fee for the permit shall be $100 for the initial permit and $100 for the annual renewal of the permit.

(2) Existing law imposes license fees for all frozen milk products, all imitation frozen milk products, and for semifrozen (soft-serve) milk products plants, and permit fees for limited packaging permits issued to licensed semifrozen (soft-serve) milk products plants in the amount of $300 for the issuance of the initial permit and $150 for the annual renewal of the permit.

Existing law also imposes a license fee for any other dairy product for which a license is required in the amount of $100 for the calendar year for which the license is issued and a specified renewal fee.

This bill would repeal these latter provisions.

Ch. 444 (SB 2073) Leonard. Environmental protection: fish and game.

(1) Existing law, the California Environmental Quality Act, requires state and local lead agencies to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

The Department of Fish and Game is required to be the lead agency for purposes of the act for any project involving the issuance of a permit required pursuant to certain

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

statutes relating to aquaculture. The act authorizes the preparation of a master environmental impact report for certain projects.

This bill would delete the requirement that the department be the lead agency for any project involving the issuance of a permit required pursuant to those certain statutes relating to aquaculture. The bill would also authorize the preparation of a master environmental impact report for regulations adopted by the Fish and Game Commission for the regulation of hunting and fishing.

(2) The act authorizes a plan or other written documentation required by a certified regulatory program of a state agency to be submitted in lieu of an environmental impact report pursuant to prescribed procedures.

The act authorizes a lead agency, based on an initial study, to make a finding that a proposed subsequent project will have no significant effect on the environment that was not identified in a master environmental impact report and no new or additional mitigation measures may be required. The act also authorizes a lead agency to prepare a focused environmental impact report on a subsequent project identified in a master environmental impact report.

This bill would prohibit the use of such a plan or other written documentation where a lead agency cannot make that finding and is required to prepare an environmental impact report or where the lead agency is authorized to prepare a focused environmental impact report.

Ch. 445 (SB 2104) Mountjoy. Yacht and ship broker licensing.

(1) Existing law provides for the licensing of yacht and ship brokers. For purposes of that law, "broker" is defined to include a person who leases or rents, offers to lease or rent, places for rent, solicits listings of yachts for rent, or negotiates the sale, purchase, or exchange of leases on yachts, for a period of more than 90 days during any 12-month period, and who does not own those yachts.

This bill would, instead, require the rental or lease to be for a period of more than 90 consecutive days to any one person or business during any 12-month period, and would make other technical changes to that definition.

(2) Existing law also specifies that a person shall be deemed qualified to submit an application for a broker's license if, as shown on the Department of Boating and Waterways' records, the person has been employed, within 5 years preceding his or her application, as a licensed salesperson for at least one year, or has been licensed as a broker within 5 years preceding his or her application.

This bill, in addition, would provide that a person shall be deemed qualified to submit an application for a broker's license if the person has been employed as a broker or a yacht salesperson in another state as a primary occupation for at least 3 continuous years immediately preceding his or her application. The bill would specify the form of proof of employment as a broker in another state.

(3) Existing law requires the department to notify an applicant in the event of his or her failure to pass the required examination, authorizes the department to suggest further study, and, upon payment of the required fee, requires the department to schedule a reexamination.

This bill would prohibit an applicant, who fails to pass the written examination upon his or her 3rd attempt to do so, from retaking the examination for 6 months from the date of taking the 3rd examination.

(4) Existing law requires an applicant to procure, file, and maintain with the department a bond in the amount of $10,000 before any broker's license may be issued or renewed by the department.

This bill would increase the amount of that bond to $15,000.

(5) Existing law requires the department to hold a deposit given instead of the bond required in (4) above for a period of 4 years after the expiration of the license.

This bill, in addition, would authorize the department to require the filing of an additional cash deposit if an action is commenced on the cash deposit of a licensed broker, and, upon the recovery in any action on the deposit, would require the broker to immediately file a new bond, equal to the amount specified in the action or recovery, but no greater than the amount specified in (4) above, whichever is less. The bill also would specify that failure to file an additional cash deposit within 30 days after

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

notification that such an additional cash deposit is required, or after the recovery on a cash deposit, constitutes a failure to comply with the provisions of law governing the licensing of yacht and ship brokers, in which case that broker's license may be suspended.

(6) Existing law authorizes the department to charge and collect fees for the licensing of yacht and ship brokers in accordance with a certain schedule, and to collect a criminal records investigation fee for both a salesperson's and broker's license, in an amount determined by the Department of Justice, not to exceed the amount needed to reimburse the department for conducting the criminal investigation.

This bill, in addition, would authorize the department to charge and collect a criminal records investigation fee for both a salesperson's and broker's license, in an amount determined by any other state or federal custodian of criminal records from which the department has requested information concerning an applicant's criminal record.

Ch. 446 (SB 126) M. Thompson. Medi-Cal: administration: benefits.

(1) Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which specified medical benefits are provided to public assistance recipients and certain other low-income persons.

This bill would designate pediatric day health care as a covered benefit only to the extent that no additional net program costs are incurred.

(2) Existing law provides that the department shall specify circumstances under which request shall be granted for authorization for services provided by specified health facilities.

This bill would further require the department, as of July 1, 1997, to specify circumstances under which requests shall be granted for authorization for services provided by specified intermediate care facilities.

Ch. 447 (SB 1554) Kelley. Municipal hospitals, county hospitals, and local health care districts: governing boards: conflicts of interest.

Existing law provides for the establishment and administration of municipal hospitals managed by a board of trustees, including, but not limited to, appointment of the members of the board of trustees. Existing law authorizes the board of trustees to enter into various contracts involving the operation of the municipal hospital.

Existing law permits the board of supervisors in each county to establish and maintain a county hospital.

Existing law provides for the formation and administration of local health care districts including provisions relating to financing through assessments and bond issuance, and the appointment of the governing board.

Existing law prohibits public officials from having a financial interest in any contract made by them in their official capacity.

This bill would provide that no member of a municipal hospital's or health care district's medical or allied health professional staff who is an officer of the municipal hospital or health care district, nor any member of a county hospital's medical or allied health professional staff who is an officer of the board of supervisors, or a board or commission appointed by the board of supervisors for the operation of a county hospital shall be deemed to be financially interested in designated contracts made by the municipal or county hospital or health care district body or board of which the officer is a member, if the officer abstains from any participation in the making of the contract, the officer's relationship to the contract is disclosed to the body or board and noted in its official records, and thereafter the body or board, without any participation by the officer, finds that the contract is fair to the district and in its best interest and authorizes the contract in good faith.

Ch. 448 (SB 1688) Marks. Residential care facilities.

Existing law requires the Public Utilities Commission to design and implement a program whereby each telephone corporation provides a telecommunications device for individuals who are certified as deaf or hearing impaired, and organizations that represent those individuals as determined by the commission, and a program whereby specialized or supplemental telephone communications equipment may be provided to subscribers who are certified to be disabled. Existing law authorizes the commission to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

impose a surcharge, until January 1, 1997, to pay for the costs of this program. Existing law requires that the certification of disability be made by a licensed physician and surgeon, or by a qualified state agency.

This bill would extend the authority for the surcharge until January 1, 2001.

Existing law provides for the licensure of residential care facilities and residential care facilities for the elderly by the State Department of Social Services. Existing law makes a violation of these provisions a misdemeanor.

This bill would require the department to provide to residential care facilities and residential care facilities for the elderly a form, containing certain prescribed information, notifying the resident that he or she is entitled to obtain services and equipment for the deaf, hearing impaired, or disabled from the telephone company. It would require the facilities to attach the form to each resident admission agreement.

By imposing this requirement on residential care facilities and residential care facilities for the elderly, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 449 (SB 1695) Kopp. Child day care facilities: family day care homes.

Existing law provides for the licensure and regulation of child day care facilities, including family day care homes. Existing law also states the intent of the Legislature that family day care homes be required to be situated in residential surroundings, and to prohibit any restrictions relating to the use of single-family residences for family day care homes.

This bill would require a family day care home provider who operates the home on rental property to provide written notice to the landlord or property owner of the operation of the family day care home, as prescribed. The bill would also authorize a landlord or property owner to require a family day care home provider to pay an increased security deposit for operation of the family day care home.

Ch. 450 (SB 1713) Alquist. Vehicles: total loss salvage vehicles: dismantled vehicles: registration.

(1) Existing law, on or after January 1, 1997, requires the Department of the California Highway Patrol to inspect a total loss salvage vehicle or a dismantled vehicle to determine its proper identity, whenever an application is made to the Department of Motor Vehicles to register the vehicle.

This bill would, instead, require the Department of Motor Vehicles to conduct the inspection or request that the inspection be performed by the Department of the California Highway Patrol.

The bill would require the Department of the California Highway Patrol to conduct a comprehensive inspection, as described, on a random basis, those vehicles that have been presented to the Department of Motor Vehicles for registration after completion of the reconstruction process to determine the proper identity of those vehicles.

The bill would prohibit the Department of Motor Vehicles from registering a vehicle that has been referred to the Department of the California Highway Patrol, as specified above, or that has been selected for inspection by that department, as specified above, until the applicant for registration submits to the Department of Motor Vehicles a certification of inspection issued by the Department of the California Highway Patrol, in addition to other documents required under existing law.

(2) Existing law requires that a person submitting a vehicle for the inspection specified above present to the Department of the California Highway Patrol bills of sale, invoices, or other acceptable proof of ownership of component parts, and invoices for minor component parts of the vehicle. The bills of sale and invoices are required to include the year, make, model, and the vehicle identification number of the vehicle from which the parts were removed or sold.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, instead, require the person to have the specified bills of sale and invoices available for presentation to the department upon demand.

The bill would require the seller of a salvage vehicle, or the agent of the seller, to inform the purchaser of the vehicle that ownership documentation for certain replacement parts used in the repair of the vehicle will be required for the specified inspection. Because a violation of this provision would be a crime, the bill would impose a state-mandated program by creating a new crime.

The bill would authorize the department, if the vehicle identification number, year, make, or model required under the provision specified above cannot be determined, to accept, in lieu of that information, a certification on a form provided by that department, signed by the person submitting the vehicle for inspection, that the part was not obtained by means of theft or fraud.

(3) Existing law requires that, in addition to any other fees specified in the Vehicle Code or the Revenue and Taxation Code, a fee of $50 be paid to the Department of the California Highway Patrol at the time the inspection specified above is made.

Existing law requires the department, after deducting specified costs to the department, to deposit the fees in the Motor Vehicle Account in the State Transportation Fund. The money deposited in the account is required to be available, upon appropriation by the Legislature, for expenditure to offset the costs incurred as a result of conducting the specified inspections.

This bill would, instead, require that the fee be not more than $50, as determined by the department to cover the actual costs of conducting the inspections, and that it be paid to the Department of Motor Vehicles at the time the inspection is made.

The bill, instead of authorizing the Department of the California Highway Patrol to deduct its costs prior to depositing the money in the account, would require that, after deposit in the account and upon appropriation by the Legislature, not more than $3 of each fee be paid to the Department of Motor Vehicles, with the remainder to be paid to the Department of the California Highway Patrol.

(4) The provisions of existing law, including the proposed charges specified above, would be repealed on January 1, 2003.

(5) The bill would appropriate $641,000 to the Department of the California Highway Patrol from the Motor Vehicle Account in the State Transportation Fund for purposes of the inspection program specified in (1) above.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 451 (SB 2144) Mountjoy. Vehicles: ownership transfers: lienholders.

Existing law authorizes an application for transfer of a vehicle certificate of ownership when the required certificate of ownership is lost, stolen, damaged, or mutilated.

This bill would require the application to also include, if applicable, the notarized signature of the lienholder, except if an insurance company or its agent meets specified criteria for an exemption from this requirement.

Ch. 452 (AB 9) Goldsmith. AFDC: restricted payments.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which qualified families are provided with cash assistance. The AFDC program is administered and partially funded by the counties. The AFDC program is partially funded by federal participation and is subject to federal requirements for federal participation. Existing law, enacted pursuant to Chapter 838 of the Statutes of 1995, provides for payment of aid under the AFDC program on a restricted payment basis, in certain circumstances.

This bill would require the State Department of Social Services to provide a copy of a specified initial data report on the implementation of these restricted payment provisions to the appropriate committees of the Legislature.

Ch. 453 (AB 153) Ducheny. Vehicles: motorcycles.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that, until January 1, 1997, the definition of "motorcycle," for purposes of the Vehicle Code, does not include certain motor vehicles that are enclosed and are used by public agencies for the enforcement of parking violations. That law also provides that it shall become inoperative if the Director of Transportation receives notice of a determination by the National Highway Traffic Safety Administration that the implementation of that provision would subject California to a transfer of funds pursuant to a specified provision of federal law. That law also provides that the director shall submit the notice of determination to the Secretary of State and that the law shall be repealed upon receipt of that notice.

This bill would delete the January 1, 1997, repeal date and the provisions relating to the notice of determination under federal law, which law is no longer in effect with respect to motorcycles.

Ch. 454 (AB 753) Morrow. Physicians and surgeons and podiatrists: podiatrist assistants.

Existing law, the Medical Practice Act, provides for the licensure of podiatrists and of physicians and surgeons and defines their scopes of practice. Existing law authorizes a physician assistant to perform certain prescribed services under the supervision of a licensed physician and surgeon provided that the physician assistant is licensed by the Physician Assistant Examining Committee and the physician and surgeon is approved to supervise the physician assistant by the Medical Board of California or the Osteopathic Medical Board of California. Existing law provides that violation of that provision is a misdemeanor.

This bill would authorize a physician assistant performing medical services under the supervision of a physician and surgeon to assist a podiatrist who is a partner, shareholder, or employee in the same medical group as the supervising physician and surgeon. The bill would require a physician assistant to assist a doctor of podiatric medicine according to patient-specific orders from the supervising physician and surgeon, and would require the supervising physician and surgeon to be physically available to the physician assistant for consultation when assistance is provided.

The bill would also provide that a physician assistant assisting a podiatrist shall be limited to performing those duties included within the scope of practice of a podiatrist. By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 455 (AB 1077) Hannigan. Nursing.

Existing law, the Nursing Practice Act, provides for the certification of nurse practitioners and authorizes them to furnish drugs and devices incidental to the provision of family planning services and to essentially healthy persons in certain listed health facilities, among others, pursuant to a standardized procedure.

Existing law provides that the furnishing of drugs or devices by nurse practitioners is conditional on the issuance of a number to the nurse practitioner by the Board of Registered Nursing that indicates that the nurse practitioner has completed certain requirements. Under existing law the board is authorized to charge a fee for the issuance of these numbers for deposit in the Board of Registered Nursing Fund, a continuously appropriated fund.

This bill would instead authorize nurse practitioners to furnish drugs and devices in certain circumstances, in accordance with standardized procedures or protocols developed by the nurse practitioner and his or her supervising physician and surgeon, and would require the nurse practitioner to function pursuant to a standardized procedure, as defined, or protocol. The bill would define the term "furnishing."

The bill would provide that these provisions and other provisions of law would not authorize a nurse practitioner in solo practice to furnish drugs or devices.

NOTE: Superior numbers appear as a separate section at the end of the digests.

By expanding the circumstances in which nurse practitioners are authorized to furnish dangerous drugs and devices this bill would increase the number of practitioners who would be required to obtain a number from the board and pay the appropriate fee. This would therefore increase the amount of moneys to be deposited in the continuously appropriated fund, thereby constituting an appropriation.

Under existing law nurse practitioners are prohibited from furnishing controlled substances under the Uniform Controlled Substances Act.

This bill would authorize nurse practitioners to furnish Schedule III through Schedule V controlled substances under the Uniform Controlled Substances Act.

Ch. 456 (AB 2345) Morrissey. Vehicles: weight violations.

Existing law imposes fines for specified weight violations, based on the amount of the excessive weight violation. Existing law prohibits the suspension of the fine under certain conditions with a limited exception.

This bill would authorize the court to exercise discretion with respect to imposing the specified fine for an excessive weight violation if any applicable local permit was obtained prior to the court hearing and, at the time of issuance of the notice to appear, the motor carrier was transporting construction equipment or materials and a valid extra-legal load permit from the Department of Transportation was in effect.

Ch. 457 (AB 2420) Hannigan. Transportation: Yolo County: transportation district.

(1) Existing law establishes various local entities to carry out transportation functions within their respective areas of jurisdiction.

This bill would create the Yolo County Transportation District in Yolo County, prescribe the membership of the district's governing board, and prescribe the functions, powers, and duties of the district.

The bill would, among other things, provide that the district succeeds to all of the rights, powers, duties, and obligations of the existing Yolo County Transit Authority, a joint exercise of powers agency, grant the district the power to impose a retail transactions and use tax, subject to member agencies and voter approval, and, in conjunction therewith, issue bonds for capital outlay expenditures.

By requiring the newly created district to perform specified functions and by requiring the board of supervisors to call and conduct an election, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, with regard to certain mandates, no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 458 (AB 2500) Kuykendall. Corporations: securities.

(1) Existing law provides that an individual, as defined, who intends to solicit, receive, collect, or solicit any subscription or contract to pay, compensation of any kind, from any owner or holder of any security, for the purpose of protecting, enforcing, or representing the rights of the security owners or holders, shall first apply for and secure a certificate from the Commissioner of Corporations, authorizing the individual to do so. Under existing law, any individual who violates the certification requirement or other provisions of the Security Owners Protection Law is both civilly and criminally liable.

This bill would delete the certification requirement. The bill would prohibit any individual, in connection with the solicitation, receipt, or collections of, or solicitation of any subscription or contract to pay, any contributions, fees, funds, or compensation of any kind, from any owner or holder of any security, for the purpose of protecting, enforcing, or representing the rights of the security owners or holders evidenced by the security, from engaging in specified acts. By so doing, this bill would expand the scope of an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

existing crime, thereby imposing a state-mandated local program. This bill would also increase the criminal penalties for violation of the Security Owners Protection Law.

(2) Existing law excludes from the definition of individual, any person who the commissioner by rule designates as not being comprehended within the purpose of the law.

This bill would delete this exclusion.

(3) Existing law authorizes the commissioner to establish rules and regulations governing the provisions of the Security Owners Protection Law and to make public certain information concerning any company or individual if to do so would prevent fraud or injury to the public. Existing law also provides that the administrative costs of enforcing the law shall come from the State Corporations Fund.

This bill would delete these provisions.

(4) Existing law permits a person who has violated the Security Owners Protection Law to avoid civil liability by making a written offer, prior to the commencement of a suit, to return any compensation. Existing law specifies the matters to be contained in the offer, requires the approval of the form of the offer by the commissioner, and permits the commissioner to impose further specified conditions for approval of an offer. The commissioner may also issue a cease and desist order or a suit to enjoin violations of the law.

This bill would delete these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 459 (AB 775) Aguiar. Escrow Agents' Fidelity Corporation.

Existing law provides that a licensed escrow agent in referring to corporate licensure under the Escrow Law in any communication, as specified, shall only use a statement, to the effect that the escrow company holds a specified Department of Corporations escrow license number.

This bill would instead require the inclusion of that statement when referring to corporate licensure in any communication.

Existing law prohibits Fidelity Corporation and its members from advertising, printing, displaying, publishing, distributing, or broadcasting any statement or representation with regard to a guarantee of trust obligations without first obtaining written approval of the Commissioner of Corporations.

This bill would limit the applicability of the provision to statements and representations in advertisements that are false or misleading or calculated to deceive or misinform the public.

Existing law also provides that any advertising referring to Fidelity Corporation shall state in type not smaller than the largest size of type used in the body of the advertisement a statement to the effect that the Escrow Agents' Fidelity Corporation is a private corporation and is not an agency or other instrumentality of the State of California.

This bill would delete the type size requirement and instead require a statement to be displayed in a clear and conspicuous manner. The bill would also provide that the State of California does not guarantee payment of a claim.

Ch. 460 (AB 2258) Kuykendall. Crimes: child abuse.

Existing law provides that a person having the care or custody of a child under 8 years of age who assaults the child, as provided, resulting in the child's death, shall be punished by imprisonment in the state prison for 15 years to life.

This bill would increase the penalty for a violation of this provision to 25 years to life.

Ch. 461 (SB 2161) Leslie. Sex offenders.

(1) Existing law authorizes a person who is required to register annually with local law enforcement officials as a sex offender to petition for a certificate of rehabilitation and pardon. Upon obtaining a certificate of rehabilitation, that person is relieved of any

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

further duty to register as a sex offender. Failure to register when required is a misdemeanor.

This bill would provide that the person is relieved of any further duty to register upon receipt of the certificate of rehabilitation if he or she is not in custody, on parole, or on probation.

(2) Existing law specifies procedures for the civil commitment of sexually violent predators. Pursuant to these procedures, a person who is in custody under the jurisdiction of the Department of Corrections may be referred to the State Department of Mental Health for an evaluation as to whether the person may be a sexually violent predator. For these purposes, existing law defines a "sexually violent offense" as one of specified sex offenses committed by force, violence, duress, menace, or fear of immediate and unlawful bodily injury upon the victim or another person.

This bill would add specified sex offenses upon a child under the age of 14 years to that list of offenses.

(3) This bill would incorporate additional changes in Section 290.5 of the Penal Code, proposed by AB 1901, to be operative only if AB 1901 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 462 (AB 3130) Boland. Sexually violent predators.

(1) Under existing law, any person committed to a state hospital pursuant to a plea of not guilty by reason of insanity is authorized to be placed on outpatient status.

This bill would authorize a person committed as a sexually violent predator to be placed on outpatient status.

(2) Existing law provides a waiver of civil and criminal liability to administrators and staff of the Forensic Conditional Release Program and to employees of the State Department of Mental Health for any criminal acts committed by persons on parole or judicial commitment status who receive supervision or treatment.

This bill would extend that waiver of liability to the Board of Prison Terms for persons who are considered for placement under a hold by the board.

The bill also would provide that any finding that a person is a sexually violent predator shall not toll, discharge, or otherwise affect that person's period of parole.

(3) Existing law provides for the civil commitment of sexually violent predators. A sexually violent predator is defined as a person who has been convicted of a sexually violent offense against 2 or more victims for which he or she received a determinate prison sentence and who has a diagnosed mental disorder that makes the person a danger to the health or safety of others.

This bill would revise the definition of a sexually violent offense for purposes of this definition of sexually violent predator.

Existing law defines "predatory," for purposes of the provisions governing sexually violent predators, as an act directed toward a stranger or an individual with whom a relationship has been established or promoted for the primary purpose of victimization.

This bill would add to that definition an act directed at a person of casual acquaintance with whom no substantial relationship exists.

(4) Under existing law, when the Director of Corrections determines that an individual who is in custody under the jurisdiction of the Department of Corrections, and who is either serving a determinate prison sentence or whose parole has been revoked, may be a sexually violent predator, the director is required, at least 6 months prior to the individual's scheduled release date, to refer the person for an evaluation by the State Department of Mental Health.

This bill would authorize the Director of Corrections to refer a person for this evaluation at a time less than 6 months prior to the release date if the inmate was received with less than 9 months to serve or if the release date is modified by judicial or administrative action.

(5) Existing law provides for a hearing procedure to determine whether there is probable cause to believe that a person who is the subject of a petition for civil commitment as a sexually violent predator is likely to engage in sexually violent predatory criminal behavior upon his or her release from prison.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if an inmate's parole or temporary parole hold will expire before a probable cause hearing is conducted, the agency bringing the petition may request an urgency review.

(6) Under existing law, whenever any inmate in a state prison who is serving a term for committing a violent felony, the paroling authority is required to notify the sheriff or the chief of police, or both, and the district attorney who has jurisdiction over the community into which the person is scheduled to be released. The notice is required to be given 15 days prior to release, or, if release is to a county other than where he or she was committed, at least 45 days prior to the release. Those agencies have 15 days from receipt of notice to provide written comment to the department regarding the impending release. Those time limits are not applicable where the release date is advanced by a judicial or administrative procedure.

Existing law also requires the sheriff or chief of police to notify certain persons, including victims and witnesses, and authorizes notice to any other appropriate person, upon the pending release of a violent felon.

This bill would make all these provisions applicable to any person who was committed as a sexually violent predator, and would require the State Department of Mental Health to provide certain identifying information concerning sexually violent predators to local law enforcement agencies, upon request. By imposing additional duties on local law enforcement agencies, this bill would impose a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 463 (AB 2012) Hauser. Transportation: North Coast Railroad Authority.

Existing law creates the North Coast Railroad Authority and prescribes the membership of its board of directors.

This bill would eliminate the District Director of Transportation for State Transportation District 1 as a nonvoting ex officio member of the board of directors.

Ch. 464 (AB 2027) Frusetta. Vehicles: weights: permits.

(1) Existing law requires the Department of Transportation to develop a standard application form for a permit to operate or move certain vehicles and loads over the highway. Funds collected by the department are deposited in the State Highway Account in the State Transportation Fund. Local authorities are required to use the standard application form developed by the department.

This bill would require the department to develop a standard permit form for the permit specified above and would authorize the standard permit form to be used as the standard application form.

The bill would also require local authorities to use the standard permit form developed by the department. To the extent that the bill would thereby mandate a new program on local government, it would impose a state-mandated local program.

(2) Existing law authorizes local authorities to charge a fee for the issuance of the permit specified above.

This bill would require the fee to be calculated to produce a total estimated revenue that is not more than the estimated total cost incurred by the local authority in administering its authority under specified provisions relating to the issuance of the permit.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 465 (AB 2090) Bordonaro. Transportation: state-local partnership program.

Existing law prescribes a state-local partnership program for funding highway and exclusive public mass transit guideway improvement projects. Under that law, construction contracts for a project on the eligibility list are required to be let by June 30 of the fiscal year for which funds for the state's share of funding for the project are appropriated, except that in Orange County the deadline for letting contracts for projects which otherwise would have been required to have been let by June 30, 1995, is extended to June 30, 1996.

This bill would extend that deadline for Santa Barbara County to December 31, 1996, and, for specified projects in the City of Petaluma and the City of Vallejo, would extend the deadline to June 30, 1997.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 466 (AB 2174) Margett. Corporations: commodities.

Existing law, the California Commodity Law of 1990, prohibits the sale or purchase of, or the offer to sell or purchase any commodity under any commodity contract or under any commodity option, or the offer to enter into, or entrance into, as seller or purchaser, any commodity contract or any commodity option. Existing law exempts specified transactions from these prohibitions. Under existing law, any person who violates this law is liable for civil penalties which are deposited into the State Corporations Fund. Existing law also requires any commodity merchant, or any person who is a telephonic seller of a commodity or a commodity contract that transacts business in this state pursuant to a specified exemption, to file an annual notice of transacting business and to pay a fee fixed by the Commissioner of Corporations at not more than $350. The fee is deposited into the State Corporations Fund for expenditure when appropriated by the Legislature for support of the programs established by this law.

This bill would eliminate the requirement that commodity merchants and telephonic sellers file an annual notice and pay a yearly fee. The bill would also delete the requirement that these fees be deposited into the State Corporations Fund for expenditure when appropriated by the Legislature. This bill would instead provide that the programs established by this law be supported from funds appropriated by the Legislature from the State Corporations Fund that derive from filing fees for applications for the qualification of the sale of securities.

Ch. 467 (AB 2313) Takasugi. Industrial loan companies: securities transactions.

Under existing law, it is unlawful for an industrial loan company to offer or sell any security, other than an investment certificate authorized by the Corporations Commissioner, in an issuer transaction unless the sale has been qualified under the Corporate Securities Law of 1968. Existing law exempts from the qualification requirement the offer or sale of a nonrecourse participation interest in a note or other obligation that is a receivable of the industrial loan company issuing the participation interest, as specified.

This bill would also exempt from the qualification requirement the offer or sale of a security to an affiliate meeting specified requirements if notice is provided to the Commissioner of Corporations, as specified. The bill would define the term "affiliate."

This bill would also exempt from the qualification requirement the offer or sale of a security meeting specified requirements relating to the sale of a security to specified financial institutions, insurance companies, investment plans, institutional investors, government agencies, or to certain corporations.

Ch. 468 (AB 2339) Harvey. Food labeling.

Existing law requires that chopped beef or hamburger be labeled and advertised in a specified manner when that food is represented as being of certain quality or relative leanness or fat content. Existing law requires that any such representation disclose the maximum fat content of the chopped beef or hamburger by one of 3 designations, "Does

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

not exceed 30 percent fat", "Does not exceed 22 percent fat", and "Does not exceed 15 percent fat", except that if the chopped or ground beef or hamburger is processed from the primal cut chuck, the designation is required to be "Does not exceed 26 percent fat". It is a misdemeanor for any person to fail to comply with these provisions.

This bill would delete the list of designations. The bill, instead, would prohibit the fat content of any chopped or ground beef or hamburger from exceeding 30% fat, except with regard to that processed from the primal cut chuck, which would be prohibited from exceeding 26% fat. The bill would permit certain designations of any maximum fat content within these limits. Because this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 469 (AB 2384) Kuykendall. Real estate.

Existing law, the Real Estate Law, generally regulates the sale, lease, or exchange of real property in this state. Existing law defines certain terms for purposes of that law, including the term "advance fee."

This bill would revise the definition of "advance fee" by providing that it does not include "security" as that term is used to denote any payment, fee, deposit, or charge used as a security for a rental agreement for residential property, as specified.

This bill would also provide that "advance fee" does not include a "screening fee." This bill would declare that it shall become operative only if AB 2263 of the 1995–96 Regular Session is enacted and becomes operative.

Ch. 470 (AB 2431) Aguiar. Education: Leroy F. Greene State School Building Law: portable classrooms.

Under existing law, known as the Leroy F. Greene State School Building Law ("Greene Law"), the State Allocation Board, with the administrative assistance of the Department of General Services, apportions bond funds to eligible school districts that apply for those funds for the purpose of constructing, reconstructing, remodeling, or replacing school buildings. Under the Greene Law, for purposes of calculating the existing area of adequate school construction of an applicant district in order to determine the maximum building area that may be funded, a portable classroom that has been leased or owned by a school district for 20 years or more is excluded from the calculation of this maximum building area. The Greene Law allows a school district to replace a portable classroom that has been leased or owned by a school district for 20 years or more with a new portable classroom without affecting the eligibility of the district for funding under the law.

This bill would, notwithstanding any other provision of law, authorize a school district to replace a portable classroom that has been leased or owned by the district for 20 years or more with a permanent building if the resulting area of new building construction is no greater than the area that would be authorized under the Greene Law for the lease or purchase of a portable classroom and the district funds this construction through the issuance of general obligation bonds or by the issuance of bonds under the Mello-Roos Community Facilities Act of 1982 or by any other financing mechanism that does not encumber the school district's general fund.

Ch. 471 (AB 2488) Alby. Health facilities.

Under existing law, the State Department of Health Services and the State Department of Developmental Services have authority to jointly develop and implement licensing and Medi-Cal regulations appropriate to intermediate care facilities/developmentally disabled-habilitative (ICF/DDH) and intermediate care facilities/developmentally disabled-nursing.

This bill would add to the licensing requirements of these facilities, commencing July 1, 1997, a requirement that the applicant or designee of the applicant attend an 8-hour orientation program approved by the State Department of Developmental Services that

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

outlines certain requirements, relating to the operation of an ICF/DDH or intermediate care facility/developmentally disabled-nursing facility.

Ch. 472 (AB 2528) Miller. Public employees: investigations and hearings.

(1) Existing civil service law provides that when ordered to do so, a person shall not be excused from testifying or from producing any book or paper in that investigation or hearing upon the ground that the testimony, evidence, book, or paper required of him or her may tend to incriminate or subject him or her to penalty or forfeiture.

This bill, instead, would provide that when ordered to do so, a witness shall not be excused from testifying or from producing any documentary evidence in that investigation or hearing upon the ground that the testimony or documentary evidence required of the witness may tend to incriminate or subject the witness to penalty or forfeiture, provided the witness is granted use and derivative use immunity.

This bill would also revise procedures relating to petitions for rehearing and service of decisions, as specified.

(2) Existing law requires that the State Personnel Board be reimbursed for the entire cost of hearings conducted by the hearing office pursuant to statutes administered by the board, or by interagency agreement, and authorizes the board to bill the appropriate state agencies for the costs incurred in conducting hearings involving employees of those state agencies.

This bill would provide that the board shall be reimbursed for the costs incurred in conducting hearings involving employees of the California State University and employees of counties not administering their own merit systems, and would authorize the board to bill the California State University and state departments having responsibility for the overall administration of grant-in-aid programs for these costs.

Ch. 473 (AB 2480) Takasugi. Income taxes: deductions.

The Personal Income Tax Law allows various deductions in computing the income that is subject to the taxes imposed by that law, including certain deductions that are incorporated by reference to specified federal statutes.

This bill would provide that in the case of certain deductions based on federal deductions for health insurance costs of self-employed individuals, qualified retirement contributions, and contributions of an employer to an employee's trust or annuity plan and compensation under a deferred-payment plan, specified amounts used for purposes of limiting those deductions in computing federal tax shall also apply for state tax purposes.

This bill would take effect immediately as a tax levy.

Ch. 474 (AB 2722) McPherson. Airport districts.

Existing provisions of the Monterey Peninsula Airport District Act of 1941, Chapter 52 of the Statutes of 1941, establish the powers and duties of the Monterey Peninsula Airport District.

This bill would revise the powers and duties of that district.

Ch. 475 (AB 2916) Friedman. Medi-Cal: pilot projects.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law requires the Director of Health Services, as one of the methods of procuring services under the Medi-Cal program, to contract with various types of entities to establish pilot programs that demonstrate the value, or lack thereof, of alternative forms of financing and delivering health care services, with each program to be for a duration of not to exceed 4 years, and to be evaluated annually.

Existing law also permits the director to renew these projects for 3 years, and thereafter to implement them permanently, or in the alternative to grant one-year extensions until an evaluation can be completed or the permanent establishment of the program can be completed.

This bill would permit the maximum number of years for the original pilot program contract to increase from 4 to 5 years.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also increase from 3 to up to 5, the number of years for program contract renewals.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 476 (AB 2935) Figueroa. Real estate licensees: duty of care.

Existing law specifies the duties of a real estate agent to the buyer in a residential real property transaction, and sets forth the findings and declarations of the Legislature in this regard.

This bill would modify the findings and declarations of the Legislature to provide that the above provisions regarding the duties of a real estate agent to the buyer in a residential real property transaction preempt the common law regarding this duty.

Ch. 477 (AB 3061) Weggeland. Corporations: securities.

Existing law, the General Corporation Law, provides that when provided in the articles of incorporation, a corporation may issue shares convertible into any class or series under certain conditions.

This bill would provide that, in addition, the articles may provide for the issuance of shares which are convertible if the corporation is a "listed corporation," as defined, both at the time of the original issuance of the convertible shares and at the time of the conversion, as specified.

Existing law, the Corporate Securities Act of 1968, provides that it is unlawful for any person to offer or sell in this state any security in an issuer transaction, as specified, unless the sale is qualified or exempted. Existing law provides that certain evidences of indebtedness and its purchasers are exempt from state usury laws if the evidence of indebtedness is issued in compliance with specific provisions.

This bill would make the usury exemption applicable to an evidence of indebtedness issued in accordance with those provisions regardless of whether subsequent to its issuance the evidence of indebtedness is determined by a court of competent jurisdiction to be a security.

Existing law, the Franchise Investment Law, provides that it is unlawful for any person to offer or sell in this state any franchise unless the offer has been registered or exempted. Existing law exempts from certain provisions of the act, the offer and sale of a franchise if the franchisor meets specified requirements.

This bill would revise those requirements and would also exempt, subject to specified conditions, any offer, sale, or other transfer of a franchise to a nonresident under specified conditions, or to certain experienced franchisees, any offer, but not the sale, by a franchisor of a franchise, while an application for renewal or amendment is pending, as specified, and any modification of a franchise agreement with an existing franchisee of a franchisor, as specified.

Ch. 478 (AB 3176) Brulte. School facilities: construction approval process.

Existing law, as set forth in the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereafter the Greene Act), sets forth the approval process for site acquisition, the construction of any new school, or for the addition to, or reconstruction or alteration of, any existing building for lease-purchase.

This bill would make findings and declarations that some believe the school facilities construction requirements set forth in the Greene Act have become lengthy and complex and that some believe streamlining of the approval process is necessary to efficiently provide the children of the state with classrooms in the most expedient and cost-effective manner.

The bill would require the Joint Committee on School Facilities to complete and submit a report to the Governor and the Legislature by July 1, 1997, that contains recommendations for streamlining the approval process set forth in the Greene Act, reducing the costs of school construction, and increasing local authority over the approval of site acquisition and of plans and specifications.

Ch. 479 (SB 999) Committee on Local Government. Validations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would enact the Second Validating Act of 1996, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 480 (SB 1259) Kelley. San Diego Unified Port District.

(1) Existing law, the San Diego Unified Port District Act, sets forth provisions governing the San Diego Unified Port District.

Under the act, employment in the district is divided into the unclassified and classified service, as specified.

This bill would include within the unclassified service (a) management employees having significant responsibilities for formulating or administering district policies and programs, (b) employees who are required to develop or present management positions with respect to employer-employee relations, who, in the regular course of their duties, have access to confidential information concerning employer-employee relations, or who contribute significantly to the development of management positions, and (c) persons employed for temporary expert professional services for a specified period.

(2) Under the act, the district board is authorized to adopt civil service regulations for the keeping of service records for all employees in the civil service, and for their use as one of the bases for promotions or layoffs through stoppage or lack of work.

This bill would revise these provisions to require the board to adopt civil service regulations for the keeping of service records for all employees in the civil service, and for their use as one of the bases for the promotion, removal, suspension, layoff, or transfer of any employee.

(3) Under the act, money in the San Diego Unified Port District Revenue Fund may be used for, among other things, encouraging and promoting commerce, navigation, and transportation in and through the district harbor.

This bill, in addition, would authorize money in the fund to be used for encouraging and promoting the region's commercial airport.

(4) This bill also would make technical, nonsubstantive changes in provisions of the act.

Ch. 481 (SB 1377) Peace. Juvenile offenders.

Existing law prohibits any court from conducting a preliminary examination or trying the case of any person who was a minor when he or she is alleged to have committed a crime unless the matter has first been submitted to the juvenile court and that court has ordered the person to be prosecuted under the general law, as specified. Existing law specifies a procedure whereby any other court may certify a case involving a minor who is charged with a crime to the juvenile court.

Existing law provides that certain juveniles who have been found by the juvenile court to be an unfit subject to be dealt with under the juvenile court law may be tried in a court of criminal jurisdiction. Existing law also provides specified procedures subsequent to the finding of unfitness that determine the disposition of a minor's case depending upon whether there was a previous offense, there is Youth Authority jurisdiction, the minor was over or under 16 years of age at the time of the commission of the offense, or there is a conviction of the violations for which unfitness was found. Under certain conditions, a complaint against a minor may be filed directly in a court of criminal jurisdiction.

This bill would make technical changes.

Ch. 482 (SB 1494) Dills. Judges: retirement: health: benefits.

(1) The Public Employees' Medical and Hospital Care Act authorizes judges under specified circumstances to continue health coverage upon assuming employer contributions.

This bill would make a technical clarifying change in that provision.

(2) The Judges' Retirement System II Law provides that after a marriage is dissolved, the nonmember shall have no further interest in the retirement fund.

This bill would provide that the nonmember shall have no further interest in the fund.

Ch. 483 (SB 1488) Johnson. Mortgages: defamation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law regulates the procedures for the foreclosure of a mortgage or deed of trust. Existing law requires, among other things, the posting and publishing of a notice indicating when the property will be sold, and the recording of the notice of default, as specified. Existing law sets forth a procedure to be followed by any person who desires a copy of any notice of default or notice of sale under a deed of trust or mortgage. Existing law defines a privileged publication or broadcast for the purposes of the law relating to defamation.

The bill would provide that the mailing, publication, and delivery of notices and the performance of specified procedures are privileged communications for the purposes of the law relating to defamation.

Under existing law, a foreclosure sale may be postponed, as provided. Existing law specifies the maximum fee that may be charged for postponement upon the written request of the trustor made to either the beneficiary or trustee.

This bill would apply this maximum fee to any postponement made to either the beneficiary or trustee.

Ch. 484 (SB 1866) Committee on Insurance. Nonprofit hospital service plans.

Existing law regulates the formation, organization, and operation of corporations that are not organized for profit which meet specified requirements to operate nonprofit hospital service plans.

This bill would repeal these provisions of law.

This bill would state legislative intent.

Ch. 485 (SB 1985) Dills. School crimes: report.

Under existing law, the State Department of Education is required to distribute annually, upon request, to each office of the county superintendent of schools and each county probation department a summary of that county's school district crime reports and county crime reports.

This bill would include each county sheriff as a recipient of those reports.

Ch. 486 (SB 2076) Haynes. Custodial officers: Riverside and Kern Counties.

Existing law defines a custodial officer as a public officer, not a peace officer, employed by a law enforcement agency of specified counties. This custodial officer may carry or possess a firearm while engaged in specified duties under the direction of a sheriff or chief of police.

This bill would add Riverside County and Kern County to this definition.

Ch. 487 (SB 2095) Committee on Appropriations. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $3,250,149.51 from various funds and accounts of the state, as specified, to the Executive Officer of the State Board of Control to pay claims accepted by the State Board of Control.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 488 (SB 1367) O'Connell. Vehicles: violations: fines.

(1) Existing law, until January 1, 1998, requires the Department of Transportation, in consultation with the Department of the California Highway Patrol, to develop 3 pilot projects, 2 in northern California and one in southern California with the highways involved in the projects designated and identified as "Safety Enhancement-Double Fine Zones" with increased fines levied for traffic violations occurring within these zones.

This bill would include the Golden Gate Bridge and a designated portion of Route 46 within the highways involved in the pilot projects. Because the inclusion of these additional routes in the pilot projects would impose certain additional duties upon local authorities, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 489 (SB 1466) Johannessen. Service stations: public restrooms: gasoline requirements.

Existing law requires the Department of Food and Agriculture to establish specifications for gasoline, as specified.

This bill would require gasoline sold for use in Inyo or Mono County, or a portion of Kern County, as specified, to meet certain specified standards.

Existing law generally requires every service station located within 660 feet of an accessible right-of-way of any interstate or primary highway to provide separate restroom facilities for men and women for use by its customers during business hours, as specified. Existing law provides that an intentional violation of this provision is an infraction.

This bill would provide that service stations in rural areas, as defined, where the traffic count is less than a specified amount, that are subject to these provisions, are only required to provide a single restroom to be used by both men and women and accessible to the disabled, provided the facility is equipped with a locking mechanism to be operated by the user of the restroom, except as specified.

Ch. 490 (AB 932) Speier. Family law: support.

Existing law authorizes the court, in a proceeding for dissolution of marriage or legal separation of the parties, to order a party to submit to an examination by a vocational training counselor, as provided.

This bill would authorize the court, in a proceeding involving child or family support, to require either parent to attend job training, job placement and vocational rehabilitation, and work programs, as specified.

Ch. 491 (AB 2179) Miller. Claims against the state: appropriation. [3]

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $1,194,841.31 from various funds and accounts of the state, as specified, to the Executive Officer of the State Board of Control to pay claims accepted by the State Board of Control.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 492 (SB 511) Leslie. Dentistry: licensure: probation.

(1) Existing law authorizes the Board of Dental Examiners of California to deny an application to take an examination for licensure as a dentist or dental auxiliary under prescribed circumstances.

This bill would also authorize the board to deny issuance of a license to an applicant at any time prior to licensure under those same circumstances.

(2) Existing law authorizes the board to place a licensee on probation under prescribed circumstances.

This bill would authorize the board to issue a probationary license to an applicant for licensure as a dentist or dental auxiliary upon the applicant's successful completion of the board examination.

(3) Existing law authorizes a member of the board to enquire of any applicant concerning his or her qualifications.

This bill would require each applicant to furnish fingerprint cards for identification and criminal record purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law includes as unprofessional conduct by a person licensed under the Dental Practice Act, suspension or revocation of the person's license issued by another state or territory on certain grounds.

This bill would also include as unprofessional conduct discipline imposed by another state or territory on certain grounds.

(5) Existing law authorizes a licensee to petition the board for early termination of probation.

This bill would also authorize a licensee to petition the board for modification of a condition of probation.

(6) Existing law provides that it is a misdemeanor to perform certain acts relating to the practice of dentistry.

This bill would provide that it is a misdemeanor for a person to be under the influence of alcohol or a controlled substance while engaged in the practice of dentistry in actual attendance on patients to an extent that impairs the person's ability to conduct the practice of dentistry with safety to patients and the public, thereby imposing a state-mandated local program by creating a new crime.

(7) Existing law provides for the licensure and regulation of health care service plans by the Commissioner of Corporations. Under existing law, a violation of the provisions governing health care service plans is subject to criminal sanction.

This bill would provide that nothing in the law regulating health care service plans would prohibit a health care service plan from entering into a contract with a dental college approved by the Board of Dental Examiners under which the dental college provides for or arranges for the provision of dental care to enrollees of the plan by students and certain clinicians or instructors. It would require a health care service plan to disclose to enrollees, as prescribed, if it contracts with a dental college for the delivery of dental care by students of dentistry or dental hygiene and clinicians or instructors of the dental college. By imposing this requirement on health care service plans, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 493 (SB 792) Hughes. County employee retirement: benefits.

(1) The County Employees Retirement Law of 1937 authorizes ex-spouses who are receiving payments from a county retirement system pursuant to a court order dividing community property to designate beneficiaries.

This bill would terminate those benefits upon the death of the surviving ex-spouse.

(2) Existing law requires payment for retirement service credit to be made prior to retirement.

This bill would permit payments to be made within 120 days after retirement.

(3) Existing law requires the retirement board to sign or authorize all warrants, checks, and electronic fund transfers drawn on the retirement fund.

This bill would authorize the board to designate the treasurer.

(4) Existing law requires members who file disability applications to wait 90 days before filing service retirement applications.

The bill would permit members to file service retirement applications at any time. The bill would also prescribe the determination of marriage status for child survivor purposes.

Ch. 494 (SB 1447) Mello. Income taxes: designations: senior citizens: Alzheimer's disease.

Under the Personal Income Tax Law, taxpayers are allowed until January 1, 1997, to contribute amounts in excess of their tax liability for the support of the California Fund for Senior Citizens or the California Alzheimer's Disease and Related Research Fund.

This bill would extend the operation of those contribution provisions to January 1, 2000.

Ch. 495 (SB 1520) Johnston. Highways: outdoor advertising displays.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under the Outdoor Advertising Act, the Department of Transportation regulates the placement of outdoor advertising displays that are within view of the public highways in unincorporated areas. Under other provisions of law, on-premises advertising displays are subject to regulation by local governmental entities and are expressly exempt from regulation under the Outdoor Advertising Act.

This bill would provide that on-premises advertising displays within a development project area, as specified, shall continue to be deemed an on-premises advertising display exempt from state regulation regardless of specified occurrences affecting the property. The bill would exempt on-premises advertising displays, as defined, from specified regulatory provisions.

This bill would provide that it shall remain in effect only until January 1, 1999, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1999, deletes or extends that date.

Ch. 496 (SB 1570) Greene. Education: academic achievement.

Existing law, the California Assessment Academic Achievement Act, requires the Superintendent of Public Instruction to design and implement a statewide pupil assessment program. Under existing law, the Commission for the Establishment of Academic Content and Performance Standards is required to develop academically rigorous content standards and performance standards. Existing law also requires the State Board of Education to adopt tests that yield valid, reliable estimates of school performance, school district performance, and statewide performance of pupils in grades 4, 5, 8, and 10, as specified.

This bill would require the State Board of Education to transmit to the Governor and the Legislature a plan, as described, for the establishment of incentives for the improvement of pupil academic achievement. The bill would require the Superintendent of Public Instruction to develop the plan and the State Board of Education to approve it. In developing this plan and the recommendations for the establishment of incentives, the bill would require the superintendent to establish and consult with an advisory committee consisting of, among other persons, public school educators, university academicians, businesspersons, and parents. The plan would be required to include, but not be limited to, financial and other positive incentives for schools and school districts that demonstrate successful academic achievement and a proposed budget and level of funding required to implement the incentives proposed in the plan. The bill would provide that academic achievement shall be determined with reference to the academic content and performance standards adopted by the State Board of Education.

The bill would appropriate $45,000 from the General Fund to the Superintendent of Public Instruction to develop the plan.

Ch. 497 (SB 1591) Beverly. Commercial law.

Existing provisions of the Commercial Code govern securities, and the relationships, rights, and duties of the issuers of and parties that deal with certificated and uncertificated securities.

This bill would repeal those provisions and replace them with new provisions concerning that subject. Among other things, the new provisions would more specifically deal with the rights and duties of securities intermediaries, and also revise provisions relating to security interests in securities. This bill would make related conforming changes.

This bill would incorporate additional changes to Section 9105 of the Commercial Code made by Senate Bill 1599 and Senate Bill 2091, and to Sections 1105, 9103, 9106, 9304 and 9305 of the Commercial Code made by Senate Bill 1599.

Ch. 498 (SB 1687) Marks. Disabled persons.

Under existing law, individuals with certain disabilities are entitled to equal access rights to various facilities; and persons licensed to train dogs as guide dogs, signal dogs, or service dogs may take the dogs, for purposes of training, into specified places where disabled persons are required to be given access. Under existing law, any person who denies or interferes with admittance to, or enjoyment of, public facilities or otherwise

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

interferes with the rights of an individual with a disability, is liable for each offense for the actual damages and any amount determined by a jury, or the court sitting without a jury, up to a maximum of 3 times the amount of actual damages but in no case less than $750.

Under existing law, disabled persons who are owners of, and persons training, guide dogs, signal dogs, or service dogs are required to ensure that the dog is on a leash and tagged with an assistance dog identification tag issued by the county clerk, animal control department, or other authorized agency.

This bill would make numerous changes to these provisions including, among other things, all of the following:

(1) Permit any person claiming to be aggrieved by an alleged unlawful practice in violation of these provisions to file a complaint with the Department of Fair Employment and Housing.

(2) Make a violation of the federal Americans with Disabilities Act a violation of these provisions.

(3) Increase the minimum amount of damages that may be assessed against a person who denies or interferes with admittance to, or enjoyment of, the public facilities or otherwise interferes with the rights of an individual with a disability to $1,000.

(4) Make a person described above liable for any provable damage done to the premises or facilities by his or her dog.

(5) Require a person who applies for an assistance dog identification tag to sign an affidavit declaring that he or she fully understands a provision of the Penal Code that makes it a misdemeanor for any person to knowingly and fraudulently represent himself or herself, through verbal or written notice, to be an owner or trainer of any canine licensed as, to be qualified as, or identified as, a guide dog, signal dog, or service dog.

(6) Require, upon the death or retirement of an assistance dog, as specified in paragraph (5) above, the owner or person in possession of the assistance dog identification tag to return it immediately to the county clerk or animal control department that issued the tag.

(7) Specify that the provisions of existing law requiring the Department of Food and Agriculture to specify the shape, size, and color of the tags shall not be subject to certain requirements of the Administrative Procedure Act.

(8) Specify that nothing in the provisions of law governing assistance dog identification tags is to be construed to limit the access of any person in violation of the federal Americans with Disabilities Act of 1990.

(9) Declare that the provision of the Penal Code, specified in paragraph (5) above, is intended to provide equal accessibility for all trainers or owners of animals that are trained as guide dogs, signal dogs, or service dogs in a manner that is not less than that provided by the federal Americans with Disabilities Act of 1990.

Existing law declares it to be an unlawful employment practice to deny or to aid, incite, or conspire in the denial of the rights guaranteed by the Unruh Civil Rights Act or of the right to freedom from violence against the person.

This bill would additionally declare it to be an unlawful employment practice to deny or to aid, incite, or conspire in the denial of the rights of individuals with disabilities, including the right to be accompanied by a guide dog, signal dog, or service dog.

Ch. 499 (SB 1724) Monteith. Criminal prosecutions: funding.

Existing law permits, until June 30, 1996, the Counties of Merced and Stanislaus, with the concurrence of their respective district attorneys, to use moneys paid to each county which exceed the county's cost of administering the child support enforcement program of the district attorney, for, and only for, children-related services, if specified conditions are met.

This bill would permit the Counties of Merced, San Luis Obispo, and Stanislaus, with the concurrence of their respective district attorneys, and in consultation with their respective family support division administrators, to use these moneys for children-related services, including child abuse and molestation cases, if specified conditions are met.

This bill would repeal those provisions on January 1, 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 500 (SB 1899) Alquist. Environmental quality: public agency budget reductions.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

This bill would exempt from the act specified actions taken on or after July 1, 1995, by a publicly owned transit agency, except as specified, to implement public agency budget reductions caused by the failure of agency revenues to adequately fund agency programs and facilities.

The bill would impose a state-mandated local program by imposing new duties on local lead agencies with regard to determining the applicability of, and filing and posting notice of, the exemption.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 501 (SB 1910) Johannessen. Administrative regulations.

The Administrative Procedure Act requires the Office of Administrative Law to perform various functions and duties with respect to the adoption, review, and approval of administrative regulations. Existing law also requires the Office of Administrative Law to provide the official compilation, printing, and publication of regulations, known as the California Code of Regulations.

This bill would require the Office of Administrative Law to make the California Code of Regulations available on the Internet, free of charge, on and after July 1, 1998, and authorize the office to contract with another state agency or private entity in order to provide this service.

Ch. 502 (SB 1945) Craven. Public employees: retirement.

(1) The Public Employees' Retirement Law authorizes local government and public agencies to contract for retirement benefits for local employees.

This bill would prohibit contracting agencies and public agencies that become subject to federal bankruptcy proceedings from rejecting retirement coverage contracts or assuming or assigning those contracts without the prior consent of the retirement board.

(2) Existing law authorizes the establishment of a deferred compensation program for members of the system.

This bill would permit that program to be offered to all state and local public employees.

Ch. 503 (SB 2100) Haynes. Trade and Commerce Agency: programs.

(1) Existing law requires the Secretary of Trade and Commerce to report annually to the Governor and the Legislature about the policies, plans, budgeting, and accomplishments of the Trade and Commerce Agency and its programs.

Existing law provides for the creation of an advisory council to advise the secretary in carrying out the functions of the agency, including cooperation in the preparation and updating of an industrial marketing plan, to contain specified information, and according to specified criteria, and to be reported to the Governor, the Secretary of Business, Transportation, and Housing, and the Legislature on or before March 1 of each year.

This bill would repeal those provisions, and would, instead, require the secretary to include as part of the annual report to the Governor and the Legislature about the agency and its programs, a report on the foreign and domestic business development marketing programs administered by the agency.

(2) Existing law requires dry cleaning plants in the state to register with the Trade and Commerce Agency, and to pay a specified fee sufficient to cover the costs of administering the registration program. Existing law establishes the Dry Cleaning Fund

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

within the agency to receive the fees, and continuously appropriates moneys in the fund to the agency for purposes of administering the registration program and promoting environmental, business loan, and technical assistance programs related to that industry.

This bill would repeal these provisions. It would specify that any balance remaining in the Dry Cleaning Fund as of January 1, 1997, shall be transferred to the General Fund.

Ch. 504 (SB 2162) Leslie. Vehicles: registration: nonoperation: fees and penalties.

Existing law generally requires the registered owner of a vehicle who does not intend to renew the vehicle registration to file a certification of nonoperation and pay a $5 fee. The certificate is required to be filed annually, prior to the expiration of registration of the vehicle.

This bill would authorize the filing of a certificate of nonoperation after the expiration of the registration of a vehicle, but not later than 90 days after the registration expiration date, subject to payment of a $10 fee, rather than the $5 fee, and a specified penalty. The bill would provide that the authorization for the late filing would remain in effect only until January 1, 2000.

The bill would also make a certificate of nonoperation valid until the vehicle's registration is renewed, rather than only for one registration year.

The bill would require the Department of Motor Vehicles to report, as specified, to the Legislature on or before January 1, 1999.

Ch. 505 (AB 744) Kuykendall. Bank and corporation taxes: cancellation.

The Bank and Corporation Tax Law generally imposes a franchise tax on corporations doing business within the limits of this state measured by its income at a rate of 9.3%. However, that law imposes a minimum franchise tax on certain banks and corporations doing business within this state at a rate of $800, except as specified.

This bill would cancel any outstanding tax, penalty, interest, or additions to tax for specified banks and corporations, if specified conditions are met.

This bill would also make legislative findings and declarations as to the public purpose served by this cancellation provision.

This bill would take effect immediately as a tax levy.

Ch. 506 (AB 850) Morrissey. Income taxes: exclusions: qualified retirement income.

The existing Personal Income Tax Law imposes a tax on the income of a nonresident that is derived from sources within this state.

This bill would enact the Morrissey Retirement Income Protection Act to provide under that law that in the case of a nonresident, income from sources within this state shall not include "qualified retirement income," as defined, from certain deferred compensation arrangements, as specified.

This bill would take effect immediately as a tax levy.

Ch. 507 (AB 1041) Alpert. Teacher credentialing.

Existing law specifies the training and qualifications for teachers seeking authorization to teach limited-English-proficient pupils.

This bill would clarify that a teacher who was previously a permanent employee, and then was employed in any California public school district within 39 months of the previous permanent status, and who meets other specified qualifications, may be assigned to provide specially designed content instruction delivered in English to limited-English-proficient pupils. The bill would also extend by 2 years the date before which teachers must complete 45 clock hours of staff development in methods of specially designed content instruction delivered in English in order to teach limited-English-proficient pupils.

Existing law requires the Commission on Teacher Credentialing to develop guidelines, in consultation with the Superintendent of Public Instruction, for the provision of specified staff development. Existing law also authorizes a teacher who completes specified staff development in methods of specially designed content instruction delivered in English to also provide instruction for English language development in a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

self-contained classroom under specified conditions, including certification that the teacher has training in teaching limited-English-proficient pupils.

This bill would specify that the guidelines for training to meet the requirement that a teacher who completes specified staff development in methods of specially designed content instruction delivered in English must satisfy to provide instruction for English language development in a self-contained classroom may provide for 20 hours, or fewer hours as the Commission on Teacher Credentialing may specify, of training in any aspect of English language development or specially designed content instruction delivered in English.

Existing law permits a teacher who has completed staff development as specified, who has taught for 9 years in California public schools, and who has had experience or training in teaching limited-English-proficient pupils, to provide in a self-contained classroom specially designed content instruction delivered in English to limited-English-proficient pupils.

This bill would permit the training to be 20 hours, or less as specified by the commission, in any aspect of English language development or specially designed content instruction delivered in English.

Existing law requires a school district or county office of education to award a certificate of completion of staff development in methods of specially designed content instruction delivered in English or English language development, or both, in accordance with the staff development that the teacher completed.

This bill would require specified agencies to issue a certificate of completion, as specified. The bill would specify that the certificate of completion is valid in all California public schools. The bill would also require any school district or county office of education that issues a certificate of completion to forward a copy of the certificate to the Commission on Teacher Credentialing within 90 days of issuing the certificate. The bill permits the teacher to be charged a fee to cover the actual costs, as specified, by the agency issuing the certificate of completion, and the commission's costs, as specified. To the extent the bill would thereby impose new duties upon local education entities, those duties would be a state-mandated program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 508 (AB 1348) Knowles. Juveniles: costs of support.

Existing law provides that the father, mother, spouse, or other person liable for the support of a minor, the estate of that person, and the estate of the minor, shall be liable for the reasonable costs of support of the minor while the minor is placed, or detained in, or committed to any institution or other place, as specified, and for the cost to the county for any investigation related to the sealing and for the sealing of records, as specified.

This bill would provide that these persons shall not be liable for these costs specified above if a petition to declare the minor a dependent child of the court, as specified, is dismissed at or before the jurisdictional hearing.

Existing law provides for the liability of a parent or guardian for the reasonable costs of food, shelter, and care of a minor while in the custody of the probation department when specified circumstances are applicable.

This bill would specifically provide that the above-described provision applies to minors placed into a children's receiving home or foster care home or facility. The bill would revise the specified circumstances of liability where a petition to declare the minor a dependent child of the court was dismissed at or before the jurisdictional hearing.

Existing law also provides that these persons shall be liable for the cost to the county for legal services rendered to the minor or to any of these persons, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that these persons shall not be liable to the county for any of the legal services provided to these persons or to the minor if a petition to declare the minor a dependent child of the court, as specified, is dismissed at or before the jurisdictional hearing.

This bill would also make a technical change.

Ch. 509 (AB 1724) McPherson. School facilities: areas zoned for agricultural production.

(1) Under existing law, prior to commencing the acquisition of real property for a new schoolsite, the governing board of a school district is required to evaluate the property at a public hearing using the site selection standards established by the State Department of Education.

This bill would provide that prior to commencing the acquisition of real property for a new schoolsite in an area designated in a city, county, or city and county general plan for agricultural use and zoned for agricultural production, the governing board of the school district shall make certain findings, including a finding that the school district will attempt to minimize any public health and safety issues resulting from the agricultural uses that may affect the pupils and employees at the schoolsite.

By imposing additional duties on the governing boards of school districts, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 510 (AB 2165) Goldsmith. Children: adoption.

(1) Existing law requires each person filing an adoption petition to be fingerprinted and requires an examination of any criminal record.

This bill would authorize, with regard to independent adoptions, licensed private adoption agencies to certify prospective adoptive parents by a preplacement evaluation, to be completed no more than one year prior to the signing of an adoptive placement agreement. The bill would limit the fees that may be charged for specified services with respect to that preplacement evaluation.

(2) Existing law authorizes specified persons, including a legal guardian who has been the child's legal guardian for more than 3 years, who desire to adopt a child, to file a petition for the independent adoption of the child.

This bill would reduce this time period with regard to legal guardians to one year, with certain exceptions. It also would authorize first cousins to file such a petition.

(3) Existing law provides for the payment of a specified fee when a petition is filed for the independent adoption of a child, except as provided.

The bill would instead provide that whenever a petition is filed for the independent adoption of a child, prior to the filing of a report in the superior court by the Department of Social Services or the delegated county adoption agency, the petitioner shall pay specified fees relating to the filing of the petition and for a postplacement evaluation to the department or agency.

(4) Under existing law, after the consent to an independent adoption is signed by the birth parents, the birth parents have 90 days to revoke consent, sign a waiver of the right to revoke consent, or allow the consent to become permanent, as provided.

This bill would authorize an adoption service provider to assist the birth parent or parents with the signing of the waiver.

Ch. 511 (AB 2508) House. Solid waste: rigid plastic packaging containers: floral industry.

Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, requires every rigid plastic

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

packaging container, as defined, sold or offered for sale in this state, to generally meet one of specified criteria.

This bill would include as a permitted criteria that the container is a container containing floral preservative that is subsequently reused by the floral industry for at least 2 years.

Ch. 512 (AB 2655) Kaloogian. County employees: retirement.

The County Employees Retirement Law of 1937 authorizes county boards of supervisors to elect to provide that the retirement system administrator not be subject to county civil service.

The bill would authorize boards of retirement, or both the boards of retirement and boards of investments, in Sacramento County, San Diego County, Kern County, and San Joaquin County to elect to provide that assistant administrators and chief investment officers of the county retirement system not be subject to county civil service.

Ch. 513 (AB 2659) Kaloogian. State Coastal Conservancy: City of Carlsbad: coastal zone: mitigation fees: floriculture.

Existing law, the California Coastal Act of 1976, requires that all mitigation fees collected to mitigate development on nonprime agricultural lands in the coastal zone, as defined, in the City of Carlsbad, as specified, be deposited in the State Coastal Conservancy Fund, and appropriates that money to the State Coastal Conservancy for expenditure by the conservancy for specified coastal resources purposes in accordance with a specified order of priority including, in the lowest rank, for the purpose of any project or activity benefiting natural resources in the coastal zone in the city that is provided for in the local coastal program of the city.

This bill would authorize the conservancy to establish a special account in the State Coastal Conservancy Fund for the deposit of those mitigation fees. The bill would specify that any interest accruing on the money in the special account is required to be expended in accordance with those specified purposes and priorities.

The bill would also include in that lowest priority rank for the expenditure of money by the conservancy for coastal resources purposes, open field cultivated floriculture, and would make legislative findings and declarations in that regard.

Ch. 514 (AB 2680) Speier. Vital statistics.

Existing law prescribes the information to be included in certificates of live births and requires local registrars to collect that information. Existing law also provides that a section of the certificate of live birth that contains certain medical and social information is confidential and that access to the contents of that section shall be limited to certain persons.

This bill would require local registrars that have automated birth registration to electronically capture the mother's marital status in an electronic file. The bill would prohibit transcription of this information onto the actual hard copy of the certificate of live birth. The bill would preclude the disclosure of marital status information except as prescribed.

By adding to the duties of local registrars, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 515 (AB 2801) Granlund. Local mental health services.

Under the Bronzan-McCorquodale Act, the State Department of Mental Health administers the provision of funds to counties for community mental health services programs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law permits negotiated net amount or rates to be used as the cost of services for community mental health services pursuant to contracts between the state and a county or contracts between a county and a subprovider of services, or both, subject to specified requirements.

Existing law also permits counties to receive, under certain circumstances, Medi-Cal reimbursement for mental health services. One of the requirements for obtaining Medi-Cal reimbursement is the submission by a county of year-end cost reports.

This bill would require year-end cost reports to be submitted by December 31 following the close of the fiscal year.

This bill would require a county seeking to participate in the negotiated rate setting process for community mental health services under the Medi-Cal program for any fiscal year to submit to the department a negotiated rate proposal along with the prior fiscal year cost report, and the department to respond with comments to the proposal by January 31 following the submission of the prior year cost report.

The bill would specify that failure to submit the negotiated rate proposal and the prior fiscal year cost report shall result in disapproval of the rate proposal and consequent settlement of the current year cost report to actual cost.

Existing law requires the department to implement managed mental health care for Medi-Cal beneficiaries through fee-for-service or capitated contracts negotiated with mental health plans, including counties, any qualified individual or organization, or a nongovernmental entity.

This bill would authorize the department, if a county is not complying with these provisions, or regulations or policies adopted thereunder, to impose sanctions, including, but not limited to, fines, penalties, withholding of payments, special requirements, probationary or corrective actions, or other actions deemed necessary to prompt and ensure contract and performance compliance. It would require the department to implement this provision through the adoption of emergency regulations, which would not be subject to the review and approval of the Office of Administrative Law, with these regulations to be effective for not more than 180 days.

Existing law further requires that no sooner than October 1, 1994, state matching funds for Medi-Cal fee-for-service acute psychiatric inpatient services, and associated administrative days, be transferred to the department, and that no later than July 1, 1998, upon agreement by the department and the State Department of Health Services, state matching funds for the remaining Medi-Cal fee-for-service mental health services and the state matching funds associated with capitated rate counties be transferred to the department.

This bill would change this date from July 1, 1998, to January 1, 1997.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 516 (AB 2808) Bustamante. Education: competitive grant programs.

Existing law provides for educational programs that include a grant to develop the programs, such as school improvement plans and the extended schoolday activities and violence reduction act.

This bill would require the Superintendent of Public Instruction to award educational technology competitive grants to school districts or county offices of education with respect to certain categories based on regular average daily attendance. The bill would require the superintendent to use the prior year's second principal regular average daily attendance to determine the category in which a school district or county office of education would be placed. The bill would allocate program funds proportionally, as specified, among the different categories. School districts or county offices of education would compete for program grant funds with those in the same category. The bill would declare that it would be applicable only to education technology grants awarded on or after January 1, 1997.

Ch. 517 (AB 2835) Bordonaro. Community care facilities: adult day care facilities.

Existing law regulates the licensure of community care facilities, including adult day care facilities, and authorizes a community care facility to provide incidental medical

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

services. Existing law provides that a violation of the provisions governing community care facilities is subject to criminal sanction.

This bill would require the Department of Social Services to adopt emergency regulations for community care facilities for adults by February 1, 1997, to specify the incidental medical services that may be provided, those that are prohibited, and the conditions under which they may be provided.

This bill would make other changes of a technical, nonsubstantive nature.

To the extent that this bill would change the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 518 (AB 2971) Olberg. Mojave Water Agency: groundwater pollution: remediation.

Under existing law, the State Water Resources Control Board and the regional water quality control boards exercise the regulatory functions of the state in the field of water quality. Under the federal Clean Water Act and the Porter-Cologne Water Quality Control Act, point source discharges of pollutants to surface waters require a waste discharge permit under the national pollutant discharge elimination system (NPDES) program. The Porter-Cologne Water Quality Control Act prescribes various requirements relating to the discharge of mining waste, but limits public agency liability for the remediation of drainage from abandoned mines, as prescribed.

The Mojave Water Agency Law provides for the Mojave Water Agency and authorizes the agency's board to undertake specified functions for purposes of providing sufficient water for the land and inhabitants of the agency, including undertaking any necessary measures with regard to wells or facilities used for the extraction of groundwater, whether operating, inactive, or abandoned, to enhance the management of groundwater resources.

This bill would authorize the agency to undertake activities that have been approved by an oversight agency, defined as either the state board or the appropriate regional board, to remediate groundwater pollution or pollutants in soils that threaten to cause groundwater pollution on lands within the jurisdiction of the agency. The bill would provide that, notwithstanding any other provision of law, if the agency has implemented an approved remediation plan, the agency shall not be deemed, based on these remediation activities, to be the owner or operator of affected lands, as defined, or related facilities on those lands, and shall not be deemed, based on actions taken to implement the remediation plan, to be responsible for any discharge of pollutants on or from those affected lands or related facilities on those affected lands. The bill would limit the responsibilities of the agency, as specified. The bill would provide that it has no effect on specified matters and would make related legislative findings and declarations.

Ch. 519 (AB 3022) Sher. Solid waste: local fee authority: nonprofit charitable reusers.

Existing law, the California Integrated Waste Management Act of 1989, regulates the management and handling of solid waste.

The act permits a city , county, district, or regional agency to impose fees in amounts sufficient to pay for costs pertaining to the management of solid waste, including authorizing the charging of fees to pay the costs of solid waste management planning under the act.

This bill would authorize a city, county, district, or regional agency to structure those solid waste management fees in a manner that limits, as prescribed, the fees charged nonprofit charitable reusers, as defined, including exempting nonprofit charitable reusers from fees imposed on the handling and disposal of their residue, as defined. The bill would make legislative findings and declarations in that regard.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 520 (AB 3050) Hawkins. Minors: restitution.

Existing law makes a parent or guardian having custody and control of a minor jointly and severally liable for civil damages, up to specified amounts, for willful misconduct by the minor that results in death, personal injury, or property damage, as specified, as well as for specified fines imposed on the minor for certain acts of vandalism subject to the parent's ability to pay. Existing law further creates a rebuttable presumption that a parent or guardian with joint or sole legal and physical custody and control of a minor who is the subject of a juvenile court restitution order, fine, or penalty assessment is jointly and severally liable therefor. Under existing law, if a petition that alleges that a minor is a ward of the juvenile court on the basis of criminal conduct is sustained, the court is authorized to issue a citation to the minor's parents or guardians ordering them to appear for a hearing.

This bill would provide that the latter hearing is for the purpose of imposing a restitution fine, as specified, and that the hearing may be held immediately following the disposition hearing or at a later date. The bill would provide additional factors that the court may consider in determining ability to pay. The bill would specify that nothing in the latter provision described above shall be interpreted to make an insurer liable for a loss caused by the willful act of the insured or the insured's dependents, and would make related changes. The bill would also provide that the provisions of existing law described above concerning the rebuttable presumption of liability and the issuance of a citation do not apply to foster parents.

Ch. 521 (AB 3464) Committee on Natural Resources. Forest practices: exemptions.

(1) Existing law, the Z'berg-Nejedly Forest Practice Act of 1973, authorizes the State Board of Forestry to exempt from the act specified forest management activities if the board determines that the exemption is consistent with the act. Under the act, exempt activities include the cutting or removal of trees, as specified, to reduce flammable materials and maintain a fuelbreak for a distance of not more than 150 feet on each side from an approved and permitted Group R occupancy, as defined, in compliance with specified requirements. That exemption requires the board to adopt regulations, initially as emergency regulations, that the board considers necessary to implement and to obtain compliance with the exemption.

This bill would modify the exemption to exempt the cutting or removal of trees to reduce flammable materials and maintain a fuelbreak for a distance of not more than 150 feet on each side from an approved and legally permitted structure, as defined, that complies with the California Building Code. Because a willful violation of the act, or of regulations adopted by the board pursuant to the act, is a misdemeanor, a willful violation of the terms of the exemption, or of regulations adopted by the board pursuant to that exemption, would be a misdemeanor, thereby imposing a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 522 (SB 1998) Mountjoy. County free libraries.

Existing law permits the governing body of a city or library district to withdraw from the county free library system. Existing law requires the county to agree to a property tax agreement in order for the city or library district to withdraw.

This bill, for Los Angeles County only, would require Los Angeles County to transfer back to the city or library jurisdiction that is withdrawing from the Los Angeles County free library system, that portion of the property tax proceeds attributable to properties located within the city or library district and specified surrounding jurisdictions being used for Los Angeles County free library purposes. The bill would also require that the personal and real property used for Los Angeles County free library purposes within the withdrawing city or library jurisdiction be transferred to the city or library district upon

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

their request, as specified. To the extent the bill would thereby impose new duties upon Los Angeles County, those duties would be a state-mandated local program.

This bill would become operative on July 1, 1997.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 523 (AB 1767) Margett. County free libraries.

Existing law permits the governing body of a city or library district to withdraw from the county free library system.

SB 1998 of the 1995–96 Regular Session, for Los Angeles County only, would, if enacted, require that Los Angeles County transfer back to the city or library district that is withdrawing from the Los Angeles County free library system, that portion of the property tax proceeds attributable to properties located within the city or library district and specified surrounding jurisdictions being used for Los Angeles County free library purposes. The bill would also require that the personal and real property used for Los Angeles County free library purposes within the withdrawing city or library district transferred to the city or library district upon their request, as specified.

SB 1998 would also provide that if there is one or more county library facilities within the territorial boundaries of the withdrawing entity, the withdrawing entity may acquire any or all of those facilities from the county and the county shall transfer to the withdrawing entity each facility and the personal property related to library services at specified prices, including the fair market value of the facility.

This bill additionally would provide that if the facility or personal property was purchased with bond proceeds or other forms of indebtedness, the acquisition shall take place only if the withdrawing entity assumes any remaining indebtedness and does not impair the repayment of the indebtedness. This bill would also provide that if any portion of the facility was donated to the county by the withdrawing entity or any moneys were donated by the withdrawing entity towards the construction or acquisition of the facility, the value of the donation shall be subtracted from the fair market value.

This bill would become operative July 1, 1997 only if SB 1998 of the 1995–96 Regular Session is enacted and becomes effective on or before January 1, 1997.

Ch. 524 (AB 2692) Mazzoni. Insurance: credit in accounting and financial statements.

Existing law specifies conditions whereby credit in accounting and financial statements may be allowed on account of reinsurance ceded to certain nonadmitted and alien reinsurers, as specified. For those purposes, the terms "deposits" and "funds" are defined to include securities authorized as general investments for domestic incorporated insurers.

This bill would additionally define those terms to include cash and securities listed by the Security Valuation Office of the National Association of Insurance Commissioners, and meeting specified liquidity standards.

Ch. 525 (AB 2263) K. Murray. Landlord-tenant: screening fees.

Existing law provides for the payment of a security deposit as a condition of renting residential property.

This bill would provide for the payment of a nonrefundable applicant screening fee as a condition of renting a residential property, as specified, and would require a landlord to provide an applicant, as defined, with a copy of a consumer credit report obtained with respect to the applicant, upon the payment of an application screening fee and applicant's request. This bill would become operative only if AB 2384 is enacted and becomes effective on or before January 1, 1997.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 526 (SB 1486) Calderon. Health and safety.

Under existing law, no person may engage in the practice of an asbestos consultant or site surveillance technician unless certified by the Division of Occupational Safety and Health.

This bill would provide that certification as an asbestos consultant or site surveillance technician is not required when a licensed contractor or registered asbestos abatement contractor meeting certain training requirements takes no more than 12 bulk samples of suspected asbestos-containing material in connection with a construction project on a residential dwelling for the purpose of bid preparation for asbestos abatement, evaluating exposure to its own employees during construction or asbestos abatement, or determining for its own purposes or for the purpose of communicating whether or not a contract for asbestos abatement has been satisfactorily completed. The bill would prohibit licensed contractors and asbestos abatement contractors from providing professional health and safety services or performing any asbestos risk assessment. It would also provide that a bid for asbestos abatement may communicate the results and location of sampling for the presence of asbestos and how the asbestos will be abated.

Under existing law, when a building owner or operator contracts with an asbestos consultant or site surveillance technician for performance of the activities as an asbestos consultant or site surveillance technician, that asbestos consultant or site surveillance technician may not have any financial or proprietary interest in an asbestos abatement contractor hired for the same project.

This bill would provide that the prohibition does not apply when a licensed contractor or registered asbestos abatement contractor meeting certain training requirements takes no more than 12 bulk samples of suspected asbestos-containing material in connection with a construction project on a residential dwelling for bid preparation for asbestos abatement, evaluating exposure to its own employees during construction or asbestos abatement, or determining for its own purposes or for the purpose of communicating whether or not a contract for asbestos abatement has been satisfactorily completed. It would provide that a licensed contractor or asbestos abatement contractor may seek compensation for bid preparation, including the cost of laboratory analysis of asbestos-containing material.

Ch. 527 (SB 1596) Kopp. Health care coverage: benefits: pharmacists.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a misdemeanor. Existing law also provides for the regulation of disability insurers administered by the Insurance Commissioner.

Existing law requires that health care service plans and disability insurers provide coverage for certain benefits and services.

This bill would authorize health care service plans and certain disability insurers, that offer coverage for a service that is within the scope of practice of a duly licensed pharmacist, to pay or reimburse the cost of the service performed by a pharmacist for the plan or insurer if the pharmacist otherwise provides services for the plan or insurer.

Ch. 528 (SB 1597) Hurtt. Contractors: license fees.

Existing law specifies various fees for contractors' licenses.

This bill would require the Contractors' State License Board, on or before July 1, 1997, and biennially thereafter, to reduce the amount of fees to be collected in order to generate revenues sufficient to maintain the board's reserve fund at a level approximately equal to 3 months of annual authorized board expenditures.

The bill would state legislative intent that fees not be increased but, instead, that reserve requirements be lowered, thereby triggering lower fees or credits.

Ch. 529 (SB 1636) Mountjoy. Medi-Cal: disproportionate share providers.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the State Department of Health Services is required to make supplemental payments to certain outpatient disproportionate share hospitals based on specified criteria.

Under existing law, each hospital contracting to provide services under the Medi-Cal program pursuant to a selective provider contract that meets the criteria contained in the state medicaid plan for disproportionate share hospital status is eligible to negotiate with the commission for distributions from the Emergency Services and Supplemental Payments Fund.

This bill would include, within the scope of those hospitals that are eligible to negotiate with the department for the supplemental payments, a hospital that meets eligibility criteria and that is designated by the National Cancer Institute as a comprehensive or clinical cancer research center that primarily treats acutely ill cancer patients and that is exempt from the Medicare prospective payment system.

Ch. 530 (SB 1666) M. Thompson. Olive oil.

Existing law makes it unlawful for any person to manufacture olive oil in this state unless licensed by the State Department of Health Services. Existing law also prohibits a product consisting of the blending of olive oil with other edible oils from being labeled as "olive oil," but imposes no other labeling requirements on olive oil.

This bill would include legislative findings and declarations concerning olive oil produced from California olives, and would direct the State Director of Health Services to convene a working group of industry leaders involved in the production and sale of olive oil. The bill would require the director to make recommendations to the Legislature by May 1, 1997, regarding the development of olive oil labeling standards.

Ch. 531 (SB 1717) Solis. Drivers' licenses: legal, nonimmigrant applicant.

Existing law requires the Department of Motor Vehicles to require every applicant for an original driver's license or identification card to submit satisfactory proof that the applicant's presence in the United States is authorized under federal laws and to adopt regulations to carry out this requirement.

This bill would require the department to issue a 90-day temporary driver's license to a legal, nonimmigrant applicant who has successfully completed an application and related requirements for a driver's license. The bill would also provide that if the United States Immigration and Naturalization Service is unable to verify the applicant's presence before the temporary license expires, the department shall extend the temporary license, at least 15 days before the temporary license expires, for an additional 120 days and notify the applicant by mail that the temporary license is being extended.

The bill would authorize any person whose driver's license expiration date has been adjusted by the department, in conformity with federal law, to apply for an extension of the term of the license by submitting to the department satisfactory proof that the applicant's presence in the United States has been reauthorized or extended under federal law. The bill would require the department, after verification of the reauthorization or extension under federal law, to adjust the expiration date of the driver's license so that it does not exceed the expiration date of the revised federal document.

The bill would require the department to establish, on or before July 1, 1997, a procedure for receiving mailed requests for the extension of limited term licenses.

Ch. 532 (SB 1740) Johnston. Health insurance.

Existing law prohibits health care service plans, self-insured employee welfare benefit plans, and certain life and disability insurers from disclosing information concerning any genetic test results of an applicant, enrollee, or insured.

This bill would enact parallel provisions applicable to multiple employer welfare arrangements.

This bill would also prohibit those entities from seeking, using, or maintaining any genetic information for any nontherapeutic purpose.

Existing law requires a self-funded or partially self-funded multiple employer welfare arrangement to meet certain requirements to be eligible for a certificate of compliance,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

including the requirement that the application for the certificate be filed by June 30, 1995.

This bill would provide that the filing deadline is November 30, 1995.

Existing law prohibits health care service plans, self-insured employee welfare benefit plans, disability insurers covering hospital, medical, and surgical expense, and nonprofit hospital service plans from discriminating in enrollment or rates because of a person's genetic characteristics.

This bill would also prohibit discrimination in renewal.

This bill would also revise the definition of genetic characteristics.

Since a violation of the provisions regulating health care service plans is a crime, the bill would impose a state-mandated local program by expanding the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 533 (SB 1798) Killea. Health care service plans: nonphysician providers.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations.

This bill would authorize a medical group, physician, or independent practice association that contracts with a health care service plan to enter into a contract with a licensed nonphysician provider to provide certain services to a plan enrollee covered by the contract between the plan and the group, physician, or association. It would authorize the licensed nonphysician provider to bill the plan directly under certain circumstances, and would authorize the plan to require a nonphysician provider to complete an appropriate credentialing process.

This bill would also permit the plan either (1) to list licensed nonphysician providers that contract with medical groups, physicians, and independent practice associations in any listing or directory of plan health care providers that is provided to enrollees or to the public, or (2) to include a notification in the plan's evidence of coverage or provider list that the health care service plan has contracts with nonphysician providers and list the types of contracted nonphysician providers. It would permit that the notification inform an enrollee that he or she may obtain a list of nonphysician providers by contacting his or her primary or specialist medical group. The bill would further state that the above provisions of the bill shall not be construed to authorize, or otherwise require the commissioner to approve, a risk-sharing arrangement between a plan and a provider.

Ch. 534 (SB 1875) Maddy. Health care service plans: appeals and grievances.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, with certain exceptions, requires licensure from the Department of Corporations before any person may engage in the business of a plan, as defined, or receive advance or periodic consideration in connection with a plan from, or on behalf of, any persons.

Existing law requires every plan to do certain things, including, but not limited to, establishing and maintaining a grievance system approved by the department under which enrollees may submit their grievances to the plan.

Existing law permits the grievance or complaint to be submitted to the department for review and resolution prior to any arbitration, and permits the department to refer any grievance or complaint to the State Department of Health Services, the Department of Aging, the federal Health Care Financing Administration, or any other appropriate governmental entity for investigation and resolution. The law permits the subscriber or enrollee, or the agent, to authorize the provider to assist, in the grievance or complaint including advocating on behalf of the subscriber or enrollee.

Existing law requires a plan's grievance system to include a system of aging of complaints that are pending and unresolved for 30 days or more, and require a quarterly report to the commissioner with a brief explanation of the reasons why each complaint is pending and unresolved.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize a plan to include a prescribed statement relating to Medicare or Medi-Cal appeal rights in the quarterly report. The bill would require the commissioner, if requested by a plan, to include the prescribed statement in, and to attach a brief explanation prepared by the plan to, any written report made available to the public and prepared by the commissioner that describes or compares complaints that are pending and unresolved with the plan for 30 days or more. The bill would prohibit the commissioner from being required to include a statement in, or append a brief explanation to, a written report that the commissioner is required to prepare under the Knox-Keene Health Care Service Plan Act of 1975.

Ch. 535 (SB 1955) Mello. Fishing: Big Creek hatchery.

Existing law declares the policy of the state to encourage the conservation, maintenance, and utilization of the living resources of the ocean and other waters under the jurisdiction and influence of the state for the benefit of all the citizens of the state and to promote the development of local fisheries and distant-water fisheries based in California in harmony with international law.

This bill would require the Department of Fish and Game to assess the current recreational fisheries management and research programs for ocean finfish fisheries, as specified, and, on or before January 1, 1998, to report to the Legislature its recommendations for prioritizing and undertaking marine fisheries management programs and preparing and implementing marine fisheries management plans. The bill would require the assessment and report to address the important state-managed nearshore marine fisheries resources, including, but not limited to, California halibut and rockfish, and to include an estimate of resources required by the department to prepare management plans for those fisheries. The bill would require, to the extent possible, any management plan to identify the amount of funding necessary to implement the plan.

This bill would also appropriate $65,000 from the California Environmental License Plate Fund to the department for a grant to pay the costs of the Big Creek hatchery.

Ch. 536 (SB 1966) Wright. Medical waste.

Existing law, the Medical Waste Management Act, administered by the State Department of Health Services, regulates the management and handling of medical waste, as defined.

This bill would regulate the management and handling of waste pharmaceuticals, as defined, under the act and specify that it is not subject to the hazardous waste control laws.

The bill would also include, as medical waste under the act, biohazardous waste that meets specified conditions.

The bill would require the department, when it is the enforcement agency under the act, to impose and collect an annual medical waste generator fee in an amount not to exceed $25 on small quantity generators of medical waste, except for specified small quantity generators and generators generating only specified biohazardous waste.

The bill would make related changes in the act, renumber provisions of the act in conformity with prior recodification, and make various other technical and clarifying changes.

Ch. 537 (SB 2007) Costa. Oil and gas wells.

(1) Existing law regulates the drilling, operation, maintenance, and abandonment of oil or gas wells, and defines an operator to mean any person drilling, maintaining, operating, pumping, or in control of a well.

This bill would revise that definition to specify that an operator means any person who, by virtue of ownership, or under the authority of a lease or any other agreement, has the right to drill, operate, maintain, or control a well.

(2) Under existing law, a person who acquires ownership or operation of an oil or gas well is required to notify the State Oil and Gas Supervisor or the district deputy, in writing. Acquisition of the well is not final until the operator provides specified information and a bond or deposit for any well that has not produced oil or gas or has not been used for injection for 5 years prior to the date of acquisition.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that the operator is not relieved of responsibility for a well until the supervisor or district deputy acknowledges the change of ownership in writing, and the person acquiring the well provides the required information and bond or deposit.

(3) Existing law authorizes the supervisor, to prevent damage to life, health, and property, to order the reabandonment of any previously abandoned oil or gas well when the future construction of any structure over or in the proximity of the well could result in a hazard, and requires that the owner of the property upon which the structure will be located be responsible for the cost of the reabandonment operations. Existing law further provides that, if the well was not abandoned in accordance with specified procedures in effect at the time of the abandonment, the last operator having an economic interest in, or receiving any benefit from, the well, if still in business in this state, is responsible for those costs associated with reabandonment.

This bill would authorize the supervisor or district deputy to instead order the plugging and reabandonment of any previously abandoned well if the supervisor or district deputy has reason to question the integrity of the previous abandonment and proposed construction, if any, as specified.

(4) Existing law authorizes the supervisor or district deputy to order the abandonment of any well that has been deserted whether or not any damage is occurring or threatened by reason of that well, and specifies that the suspension of drilling operations and removal of drilling machinery is prima facie evidence of desertion after the elapse of 6 months, except as specified.

This bill would delete those provisions pertaining to prima facie evidence of desertion and would require the supervisor or district deputy to instead determine from credible evidence, as specified, whether a well is deserted. The bill would specify that, if the supervisor determines that the current operator of a well does not have the financial resources to fully cover the cost of plugging and abandoning the well, the immediately preceding operator shall be responsible for the costs if the operator acquired ownership of the well after January 1, 1996, except as provided. The bill would authorize the supervisor to undertake the plugging and abandoning of a well if the supervisor is unable to determine that an operator that acquired ownership of the well after January 1, 1996, has the financial resources to fully cover the costs of plugging and abandoning the well.

(5) Existing law requires that an annual production charge on oil and gas be imposed upon the person operating each oil or gas well in the state, based on a specified formula for computing the rate of the production charge.

This bill would require the production charge to be reduced to zero for a period of 10 years for specified types of wells, or wells that have been inactive for a period of at least 5 consecutive years.

(6) Existing law provides procedures for the appeal of orders issued by the supervisor or a district deputy, and requires the Director of Conservation, within 10 days from the taking of the appeal, to give an appellant 10 days notice in writing of the time and place of a hearing, except for good cause, and requires the director to make a written decision with respect to the order appealed from within 10 days after hearing the evidence.

This bill would increase to a minimum of 20 days the time period for that written notice, except in cases where the director determines that there is an immediate threat to human health and safety or to the environment, and increase to 20 days the time period after hearing evidence within which the director is required to make a written decision on an order that has been appealed from, except as specified.

The bill would make various technical and clarifying changes in those provisions.

Ch. 538 (AB 1042) Alpert. Alcoholic beverages: licenses: denial.

Existing law prohibits a license from being issued for any premises for which an application for a license has been denied, or at which a license has been revoked, for reasons pertaining to the premises, unless one year has elapsed from the date the order becomes final.

This bill would also prohibit a license from being issued for any premises for which a license has been denied, for reasons pertaining to the premises, twice within a 36-month period, unless 2 years have elapsed from the date that the last order becomes final.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 539 (AB 2201) House. Vehicles: cargo tanks: flammable liquids: hazardous waste: certification.

(1) Existing law requires the Department of the California Highway Patrol to conduct an annual inspection of specified vehicles used to transport hazardous waste. Existing law requires the Department of Toxic Substances Control to adopt regulations for containers used to transport certain hazardous wastes not subject to specified federal regulations and to issue a certificate of compliance to vehicles that have passed the inspection. Existing law, until January 1, 1998, excludes from that inspection requirement the transportation of hazardous waste in a rolloff bin, as defined, which complies with specified procedures and requirements, and receives a certificate of compliance, as prescribed, from the department. A violation of those requirements is a crime.

This bill would repeal the provisions requiring the inspection of vehicles used to transport hazardous waste and the issuance of a certificate of compliance. The bill would also repeal the requirement for the department to adopt regulations for containers used to transport hazardous waste and would instead require the department to adopt and enforce regulations that are necessary and appropriate to achieve consistency with the findings made by the Federal Highway Administration and the federal Department of Transportation regarding a uniform program for hazardous waste transportation pursuant to federal law. Since a violation of those regulations would be a crime, the bill would impose a state-mandated local program.

The bill would require the Commissioner of the California Highway Patrol to provide for the establishment, operation, and enforcement of random inspections of cargo tanks and hazardous waste transport vehicles and containers. The bill would require the department to compile data and publish an annual report concerning those inspections and on-highway traffic incidents.

The bill would also make conforming changes related to the repeal of the inspection program, including repealing related fees and enforcement requirements.

(2) Existing law imposes various duties and responsibilities on the Department of the California Highway Patrol and the Commissioner of the California Highway Patrol with regard to the certification and registration of cargo tanks, as defined, used for the transportation of flammable liquids or combustible liquids.

This bill would delete the certification and registration duties imposed on the department and the commissioner with respect to those cargo tanks and would delete certain related functions and requirements.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 540 (AB 2246) House. Highways: State Highway Route 145: relinquishment.

Existing law provides for the relinquishment of state highways or portions of state highways to any county or city by the California Transportation Commission in accordance with specified criteria and procedures.

This bill would authorize the commission to relinquish to the City of Madera a specified segment of State Highway Route 145 located within the city, upon terms and conditions the commission finds to be in the best interest of the state, if the city agrees to maintain signs directing motorists to the continuation of State Highway Route 145 and agrees not to reduce the number of lanes within the relinquished section.

Ch. 541 (AB 2530) Miller. Real estate: time-share projects.

Existing law, the Real Estate Law, regulates the sale or lease or offer for sale or lease of lots or parcels in a subdivision located outside of this state. Existing law defines "subdivision" to include a time-share project and a qualified resort vacation club.

This bill would, for purposes of this law, include within the meaning of a subdivision, a multisite time-share project, as defined, which includes accommodations and facilities located either entirely outside of this state or both within and outside of this state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that the sale or lease, or the offering for sale or lease, of lots or parcels in a subdivision shall be subject to specified provisions of law relating to real property securities dealers.

This bill would delete this provision.

Existing law regulates the sale, lease, and offer for sale or lease in this state of time-share projects situated outside this state and qualified resort vacation clubs, as specified.

This bill would require a subdivider or person offering one of these interests for sale to first obtain a permit from the Real Estate Commissioner, and would enact other related provisions.

This bill would provide that exchange programs, as defined, are not a part of a time-share project offering and that an incidental benefit, as defined, is not part of the offering of interests in a subdivision. This bill would also provide that if a purchaser of a time-share interest in a subdivision is offered the opportunity to become a member of an exchange program or to acquire an incidental benefit in connection with a time-share interest, the subdivider must include in the public report specified information regarding the exchange program or the incidental benefit being offered.

Existing law generally requires a person who intends to offer subdivided lands within this state for sale or lease to apply for, and receive, a public report from the Department of Real Estate. Existing law requires the application to disclose specified information concerning the subdivided lands and the proposed offering.

This bill would authorize the commissioner to accept information submitted to another state to qualify the subdivision or project for sale in that state and to use or incorporate information contained in a disclosure statement issued by another state.

This bill would make it unlawful for a person to sell or lease any interest in a multisite time-share project without first obtaining a public report covering each component site, as specified. The bill would also make it unlawful for a subdivider to offer for sale or lease a time-share interest in a single-site time-share project unless the subdivider complies with specified conditions with respect to component sites affiliated through a reservation system. Because a violation of these provisions would be a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Existing property tax law provides for the separate assessment of time-share estates in time-share projects and of time-share projects, upon written request, and also authorizes the county to charge a fee for the initial and the ongoing costs of the separate assessment and billing, and mailings, with respect to a time-share project.

This bill would establish a procedure for the termination of separate assessments of time-share estates in time-share projects and of time-share projects.

Ch. 542 (AB 2666) Knight. Air pollution: Antelope Valley Air Pollution Control District: creation.

(1) Under existing law, there is a county air pollution control district in every county, unless the county is included within one of specified air pollution control districts or air quality management districts.

This bill would provide that, on and after July 1, 1997, the portion of the Antelope Valley that is located in northern Los Angeles County, as described in the bill, shall not be in the South Coast Air Quality Management District and shall instead constitute the territory of the Antelope Valley Air Pollution Control District, which the bill would create, and would prescribe related matters. The bill would prescribe the composition of the district board and would provide that the district is otherwise a county district.

The bill would create a state-mandated local program by imposing new duties on the county.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 543 (AB 2915) Friedman. Breast cancer research.

Existing law, in an uncodified statute (Sec. 9, Ch. 661, Stats. 1993, as amended by Sec. 2, Ch. 483, Stats. 1994), creates a Breast Cancer Research Program and requests the University of California to administer the program as a comprehensive grant and contract program to support research efforts into the cause, cure, treatment, earlier detection, and prevention of breast cancer. It states the intent of the Legislature that the University of California establish a Breast Cancer Research Council with specified membership and duties.

This bill would repeal these uncodified provisions of law and would reenact them, as amended, in a codified statute. It would revise provisions governing membership in the council and impose funding eligibility limitations on council members, among other things.

Existing law provides that revenues derived from a specified increase in cigarette taxes be deposited in the Breast Cancer Fund for allocation, upon appropriation by the Legislature, to one of 2 accounts. This provision provides that $^1/_2$ of the moneys in the fund be allocated to the Breast Cancer Research Account for research with respect to breast cancer, 90% of which is required to be allocated to the Breast Cancer Research Program discussed above.

This bill would require the State Auditor to conduct an audit of the Breast Cancer Research Program 1996–97 fiscal year grant award process. The bill also would require that the State Auditor review laws, rules, and regulations relevant to the Breast Cancer Research Program prior to the audit, make specified determinations in the audit, and report its findings to the Legislature.

Ch. 544 (AB 3142) Granlund. Insurance: health coverage.

Existing law limits exclusions for preexisting conditions or late enrollees by a health benefit plan. Under existing law, a health benefit plan is a group or individual policy or contract that provides medical, hospital, and surgical benefits, but does not include accident only, credit, disability income, and certain other forms of coverage.

Existing law regulates health benefit plans offered by small employer carriers. Under existing law, a health benefit plan is a policy or contract written or administered by a carrier that arranges or provides health care benefits for the covered eligible employees of a small employer and their dependents, but does not include accident only, credit, disability income, and certain other forms of coverage.

This bill would also exclude from both definitions of "health benefit plan" set forth above, policies or certificates of specified disease and policies or certificates of hospital confinement indemnity if the carrier offering those policies or certificates files a certificate with the Insurance Commissioner containing specified information.

Existing law establishes the Major Risk Medical Insurance Program, in which persons unable to secure adequate private health coverage may apply for health coverage. To be eligible, a person must have been rejected for coverage by at least one private health plan.

This bill would provide that rejection for policies or certificates of specified disease or policies or certificates of hospital confinement indemnity, as described, shall not be deemed to be rejection for the purposes of determining eligibility for the Major Risk Medical Insurance Program.

Ch. 545 (AB 3316) Tucker. Driving under the influence: treatment programs.

Existing law provides that the State Department of Alcohol and Drug Programs is the sole authority for the licensure of multiple offender drinking driver programs.

Existing law authorizes a court to consider certain relevant information about the person made available pursuant to a presentence investigation, and requires the court to obtain from the Department of Motor Vehicles a copy of the person's driving record to determine whether the person is eligible to participate in a licensed 18-month or 30-month program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the probation department, when preparing a presentence report for the court, to consider the suitability of placing the defendant in a treatment program that includes the administration of nonscheduled nonaddicting medications to ameliorate an alcohol or controlled substance problem.

This bill would, if the probation department recommends that this type of program is a suitable option for the defendant who would like the court to consider this option, require the defendant to obtain from his or her physician a prescription for the medication, and a finding that the treatment is medically suitable for the defendant, prior to consideration of this alternative by the court.

Ch. 546 (AB 37) Pringle. Local government: military base reuse.

Existing law, until January 1, 2001, provides that a single local reuse entity, as specified by statute or through a process of local resolution, is the only entity that is eligible for certain state benefits for use in a military base conversion. Existing law designates the El Toro Reuse Planning Authority as the single local reuse entity for the Marine Corps Air Station, El Toro.

This bill would instead designate the local redevelopment authority recognized by the United States Department of Defense, Office of Economic Adjustment as the single local reuse entity for the Marine Corps Air Station, El Toro.

Ch. 547 (AB 298) Rainey. Environmental impact reports: congestion management programs: exemption.

(1) Existing law, the California Environmental Quality Act, requires a public lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, unless the project is exempt from the act. Existing law also requires certain counties to develop, adopt, and annually update a congestion management program.

This bill would exempt a project for the development of a congestion management program from the act and make clarifying changes in related provisions.

The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to determining the applicability of, and filing and posting notice of, the exemption.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 548 (AB 2767) Poochigian. School districts: elections: bonds: disclosure.

Existing law authorizes the governing board of a school district to order the county superintendent of schools to call an election and submit to the electors of the school district the question of whether bonds of the school district shall be issued and sold for the purpose of raising money for specified projects. Existing law sets forth certain requirements for the ballot of that election.

This bill would require that the sample ballot contain a specified notice whenever an election is called on the question of whether bonds of a school district shall be issued and sold for specified purposes and the project to be funded by the bonds will require state matching funds for any phase of the project. By imposing this notice requirement for inclusion in the sample ballot, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 549 (AB 3081) Olberg. Real property: fees for development.

Existing law imposes various requirements with respect to fees exacted in connection with land development approvals by public agencies. Existing law defines the term "fee" as a monetary exaction, other than a tax or special assessment, which is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project.

This bill would revise that definition to state that a fee means a monetary exaction, other than a tax or special assessment, whether established for a broad class of projects by legislation of general applicability or imposed on a specific project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project.

Existing law permits any party to protest the imposition of any fees, dedications, reservations, or other exactions imposed on a residential housing development by a local agency by (a) making payment in full or ensuring performance of the necessary conditions, and (b) serving a notice containing specified information, including a statement that the required payment is tendered under protest.

This bill, instead, would require the party protesting the imposition of an exaction to make payment in full or provide satisfactory evidence of arrangements to pay the fee when due. The bill would require the statement to be revised to indicate that the required payment will be tendered under protest when due.

Under existing law, a protest filed against the imposition of any fees, dedications, reservations, or other exactions imposed on a residential housing development is required to be filed at the time of approval or conditional approval of the development or within 90 days after the date of the imposition thereof. Existing law also provides that any party who files a protest pursuant to these provisions may file an action to attack, review, set aside, void, or annul the imposition of the fees, dedications, reservations, or other exactions imposed on a residential housing development by a local agency within 180 days after the date of the imposition.

This bill, instead, would require each local agency, with respect to a project for which the agency has elected to impose a fee, dedication, reservation, or other exaction, to provide to the project applicant a notice in writing at the time of the approval of the project, or at the time of the imposition of the fees, dedications, reservations, or other exactions, a statement of the amount of the fees or a description of the dedications, reservations, or other exactions, and a notification that the 90-day approval period in which the applicant may protest has begun. The bill also would provide that the 180-day period to file an action to attack, review, set aside, void, or annul fees, dedications, reservations, or other exactions imposed on a development by a local agency shall be filed within 180 days after the delivery of the notice required by these provisions.

This bill also would expand these protest provisions to apply not only to residential housing developments but to any project undertaken for the purpose of development, as defined under existing provisions of law.

Ch. 550 (AB 3375) Olberg. Sales and use tax: exemptions: railroad equipment.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property.

This bill would exempt from use tax the storage, use, or other consumption in this state of tangible personal property becoming a component part of any railroad equipment, as specified.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would take effect immediately as a tax levy.

Ch. 551 (SB 1439) Ayala. Horseracing: parimutuel pools.

(1) For the purpose of the Horse Racing Law, existing law defines "conventional parimutuel pool" and "exotic parimutuel pool."

This bill would also define "proposition parimutuel pool" as the total wagers under the parimutuel system on propositions approved by the California Horse Racing Board that are based on the results of a live quarter horse horserace.

(2) Under existing law, all revenues distributed to the state as license fees from horseracing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill, by redefining "parimutuel wagering," would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation. The bill would also authorize the imposition of a state tax for the purposes of Article XIII A of the California Constitution, and thus would require for passage the approval of $^2/_3$ of the membership of each house of the Legislature.

Ch. 552 (SB 1480) Mello. Arts education.

Existing law establishes the Local Arts Education Partnership Program (the program), pursuant to which local arts agencies, as defined, may apply for grants for the funding of arts education programs, as specified. Existing law declares the intent of the Legislature that the program not be financed through the General Fund but instead be funded with other funds from the Graphic Design License Plate Account of the General Fund. Under existing law the program is repealed as of January 1, 1998.

This bill would change the date of repeal to January 1, 2003.

Ch. 553 (SB 1501) Kopp. Highways: Imperial County: tolls.

Existing law authorizes tolls to be imposed on bridges and highways under specified circumstances, but does not generally authorize tolls to be imposed for the use of state highways.

This bill would authorize the California Transportation Commission to impose tolls on described segments of newly constructed specified segments of state highway routes in Imperial County, if transportation facilities, including additional highways and capacity enhancing improvements to existing highways, are needed to accommodate additional commercial traffic resulting from the North American Free Trade Agreement, and federal funds have not been made available to the state for those purposes. The toll revenues would be required to be deposited in the Highway Toll Revenue Account, which the bill would create in the State Transportation Fund. The bill would also authorize the commission to issue revenue bonds secured by the toll revenues, and would continuously appropriate to the commission the amount of the toll revenues required to pay the principal and interest of those bonds. The bill would require the commission, upon appropriation by the Legislature, to allocate the remaining funds to the Department of Transportation for the purpose of constructing additional highways or making capacity enhancing improvements to existing highways to accommodate additional commercial traffic resulting from the North American Free Trade Agreement.

The bill would require the tolls on any route to be discontinued upon the receipt of specified federal funds for the cost of the improvements to that route or when the cost of those improvements is fully paid.

Ch. 554 (SB 1755) Calderon. Transportation: Los Angeles County: transit operations: funding.

The Mills-Alquist-Deddeh Act prescribes formulas for the allocation of funds to transit operators.

This bill would revise those formulas for the allocation of funds to transit operators in Los Angeles County.

Ch. 555 (SB 1630) Polanco. Criminal procedure: bench warrants.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law requires a clerk, or judge or justice, to issue a bench warrant on application of the prosecuting attorney whenever the defendant fails to appear in court as required by law or does not appear for judgment when his or her personal appearance is necessary.

This bill requires the clerk, or judge or justice, to issue the bench warrant without application of the prosecuting attorney, and to require the appropriate agency to enter each bench warrant issued on a private surety-bonded felony case into the national warrant system (National Crime Information Center (NCIC)). Because the bill would increase the duties of the clerk, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 556 (SB 686) M. Thompson. Health care coverage: benefits: children.

Existing law requires health care service plans, disability insurers, and nonprofit hospital service plans, that cover hospital, medical, or surgical expenses on a group basis, to offer benefits for the comprehensive preventive care of children, consistent with the Recommendations for Preventive Pediatric Health Care, as adopted by the American Academy of Pediatrics in September of 1987.

This bill would instead require those benefits offered by those health care service plans and disability insurers to be consistent with the Recommendations for Preventive Pediatric Health Care, as adopted by the American Academy of Pediatrics in September of 1987, and the most current version of the Recommended Childhood Immunization Schedule/United States, jointly adopted by the American Academy of Pediatrics, the Advisory Committee on Immunization Practices, and the American Academy of Family Physicians, unless the State Department of Health Services determines that the schedule is not consistent with the purposes of the provisions of law requiring the offering of benefits for the comprehensive preventive care of children.

Ch. 557 (SB 1589) Calderon. Judges: gifts and honoraria.

Existing law limits the amount of gifts, as defined, that may be accepted by judges, as defined, and prohibits judges from accepting any honorarium. The Commission on Judicial Performance is required to enforce these provisions.

This bill would revise the application of the terms gift and honorarium for these purposes.

Ch. 558 (SB 2032) Mountjoy. Indemnity.

Under existing law, agreements contained in, collateral to, or affecting any construction contract with a public agency that purport to impose on the contractor, or relieve the public agency from, liability for the active negligence of the public agency are void and unenforceable.

This bill would also invalidate an additional insured endorsement for the benefit of a public agency that purports to provide indemnity coverage for the active negligence of the additional insured where an indemnity agreement would be invalid under the above provisions.

Ch. 559 (AB 635) Bowler. Firearms: report on use in certain crimes.

Existing law requires the Attorney General to make reports to the Legislature regarding various subjects, including wiretapping, sex abuse offenses, hate crimes, and domestic violence.

This bill would require the Attorney General to provide the Legislature with a written report on the specific types of firearms used in the commission of crimes, as specified, based upon information obtained from state and local crime laboratories, on or before April 15 of each year, commencing in 1998.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 560 (AB 2483) Firestone. Evidence: hearsay.

Under existing law, the hearsay rule, hearsay evidence is inadmissible except as provided by law. Existing law specifies the conditions under which former testimony, as defined, is not made inadmissible by the hearsay rule.

This bill would provide that specified evidence of prior inconsistent statements of a witness properly admitted in a preliminary hearing or trial of the same criminal matter pursuant to a specified provision of law is not made inadmissible by the hearsay rule if the witness is unavailable and former testimony of the witness is admitted, as provided.

Ch. 561 (AB 3365) Campbell. Gang violence suppression.

Existing law defines "community-based" organization for purposes of the Gang Violence Suppression Program as a nonprofit operation established to serve gang members, their families, schools, and the community with programs of community supervision and service that maintain community participation in the planning, operation, and evaluation of their programs.

This bill would include in this definition public park and recreation agencies, public libraries, and public community services departments that provide gang suppression activities, either alone or in cooperation with other public agencies or other community-based organizations. The bill also would provide that community-based organizations funded pursuant to the Gang Violence Suppression Program as of January 1, 1997, shall receive preference over public agencies in any future funding awards.

Ch. 562 (SB 1368) Kopp. Governmental tort liability.

Existing law establishes the procedures for maintaining an action against a public employee arising out of his or her employment, as specified.

This bill would add further requirements to the maintenance of certain actions against a publicly elected or appointed state or local officer governing the specificity of the complaint.

Ch. 563 (SB 392) Committee on Judiciary. Probate law.

(1) Existing law authorizes a decedent's surviving spouse, children, and issue of deceased children, or, if none, the persons who would be entitled to the property of the decedent by intestate succession, to bring an action for the wrongful death of the decedent.

This bill would revise and recast that provision.

(2) Existing law provides a caregiver who is a relative of a minor with the same rights to authorize medical care and dental care for the minor that are given to a guardian if certain requirements are met.

This bill would provide that this medical care may include mental health treatment subject to prescribed limitations.

(3) Existing law provides that a parent or guardian of a minor may authorize an adult into whose care a minor has been entrusted to consent to medical care or dental care, or both, for the minor. Existing law prohibits a health facility from surrendering physical custody of a minor under 16 years of age to any person without authorization by the parent or person with legal custody of the child.

This bill would provide that the caregiver described in (2) above may also make these authorizations.

(4) Existing law requires a county to annually assess certain persons for county expenses related to investigations conducted with regard to a proposed ward. The county may waive the assessment for hardship. However, a county may not assess any fee from a person receiving charity or relief.

This bill would repeal the prohibition against assessment of a fee to persons receiving charity or relief and instead provide that hardship will be rebuttably presumed for any person receiving Medi-Cal benefits.

(5) Existing law generally regulates the appointment and powers of a conservator or guardian.

This bill would authorize certain persons to file any petition for instructions or to grant a guardian or conservator specified power or authority, revise notice requirements for a hearing on a petition for the appointment of a guardian, and provide that specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

additional powers and duties of a temporary guardian or temporary conservator may include specified relief.

(6) Existing law specifies the duties of a personal representative.

This bill would authorize a personal representative to seek to enjoin any action of a lienholder to enforce a lien against property in the decedent's estate.

(7) Existing law requires a guardian or conservator to present his or her account to the court for settlement or allowance after one year from the time of appointment. The ward or conservatee or specified other persons may object to this account.

This bill would authorize the court to order the objector or opposer of the objections to pay costs and expenses, including attorney's fees, if the court determines that the objections or the opposition to the objections were made without reasonable cause and in bad faith.

(8) Existing law requires an investigation regarding a proposed guardianship to be made by a court investigator where the proposed guardian is a relative. Existing law requires this investigation to be made by the county agency designated to investigate a potential dependency where the proposed guardian is a nonrelative.

This bill would define "relative" for purposes of these provisions.

(9) Existing law requires a guardian or conservator to endorse an allowance or rejection on a presented claim for expenses. It also requires a court to make such an endorsement upon approval by the guardian or conservator and, if the claim is allowed, file the claim within 30 days.

This bill would repeal these requirements.

(10) Existing law authorizes the appeal of prescribed judgments and orders regarding conservatorships, guardianships, and personal representatives. Existing law provides that these appeals stay the operation and effect of the judgment or order unless a trial court directs the exercise of the powers of the guardian, conservator, or personal representative or makes a prescribed appointment to exercise the powers for the purpose of preventing injury or loss to person or property.

This bill would provide that an appeal from a trial court order made for this purpose does not stay the order.

(11) Existing law requires a petition regarding the capacity of a person to give informed consent to a specified medical treatment to state specified information. Existing law requires notice of the time and place of the hearing on the petition to be given for the period and in the manner prescribed by order of the court.

This bill would require the petition to also list the names and addresses of specified persons, so far as they are known to the petitioner. This bill would revise and recast the notice requirements, as specified.

(12) Existing law provides for the disposition of money or other property paid or delivered for the benefit of a minor or incompetent person pursuant to a compromise, covenant, or judgment, as specified.

This bill would revise these provisions, as specified.

(13) Existing law prescribes certain requirements for the making of a will.

This bill would authorize a will to be signed by a conservator pursuant to a court order.

(14) Existing law authorizes a court, on petition or on its own motion, to cite a personal representative to appear before the court and provide specified information if the personal representative does not file a prescribed petition or make a report within prescribed time limits.

This bill would instead authorize such a citation for good cause shown on the record.

(15) Existing law prescribes the manner for a notice of hearing on a specified petition requesting an order that administration of all or part of a decedent's estate is not necessary if the petition is filed with a petition for probate of a deceased spouse's will or for administration of the estate of the deceased spouse.

This bill would delete this provision.

(16) Existing law provides that a trustee has a duty to keep the beneficiaries of a trust reasonably informed of the trust and its administration.

This bill would provide that a court may make an award of costs and other expenses and costs of litigation in a proceeding to contest a trustee's account, as specified.

(17) The existing Uniform Statutory Rule Against Perpetuities generally prescribes the validity or nonvalidity of nonvested interests and unexercised powers of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

appointment. It also specifies procedures to determine the time of creation for these interests and powers of appointment and how to reform a disposition that meets certain conditions. Existing law provides that none of these provisions apply in specified instances.

This bill would provide that only the provisions prescribing the validity or nonvalidity of nonvested interests and unexercised powers of appointment are inapplicable in those specified instances.

Ch. 564 (SB 684) Polanco. Medi-Cal: transitional inpatient care.

Existing law authorizes Medi-Cal reimbursement for transitional inpatient care, as defined, provided in general acute care hospitals or licensed skilled nursing facilities.

This bill would also permit transitional inpatient care to be provided by nursing facilities certified to participate as a nursing facility in the Medicare and medicaid programs, pursuant to specified provisions of the federal Social Security Act, and licensed congregate living health facilities, as defined, that are certified to participate as a nursing facility under those Medicare and medicaid provisions of the federal Social Security Act.

Ch. 565 (SB 1306) Wright. Support.

(1) Existing law specifies the priorities for the distribution of satisfaction of a money judgment for support.

This bill would provide for the distribution between multiple families owed support under specified circumstances. The bill would impose a state-mandated local program by adding to the duties of district attorneys.

(2) Existing law provides that individuals who are subject to withholding of unemployment compensation or unemployment compensation disability benefits for payment of support obligations be notified, as specified, with respect to such withholding.

This bill would add to that notice requirement, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 566 (SB 1632) Costa. Real property: rent control.

(1) The Information Practices Act of 1977 governs the disclosure of information maintained by state agencies. Certain violations of that act are a misdemeanor. Existing law, including the Costa-Hawkins Rental Housing Act, regulates local rent control programs.

This bill would add provisions affecting that latter act and applicable to local agencies, regulating the confidentiality of names and other information with respect to tenants or former tenants pursuant to the Information Practices Act of 1977, thereby imposing a state-mandated local program.

(2) Existing law requires any city, county, or city and county that has a system of rent control, and which does not include a system of vacancy decontrol, as defined, to permit reasonable expenses, fees, and other costs for professional services incurred in the course of successfully pursuing specified rights to be included in any calculation of net operating income and operating expenses used to determine a fair return to the owner of the property.

This bill would make a technical, nonsubstantive change to this provision.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 567 (SB 1649) Mello. Health facilities: disclosure.

Existing law requires certain information to be provided to the State Department of Health Services by an applicant for a license to operate a health facility.

This bill would require that the information provided to the department be made available to the public upon request and be included in the department's public file of the facility.

Existing law requires disclosure of the names and addresses of any person or organization, or both, having an ownership or control interest of 5% or more in a management company that operates, or proposes to operate, the facility under a management contract. Existing law requires this and other ownership or control information to be provided to the department upon initial application for licensure, and requires changes in the information to be provided to the department on an annual basis.

This bill would, rather, require disclosure of the names and addresses of any person or organization, or both, having an ownership or control interest of 5% or more in a management company that operates, or proposes to operate in whole or in part, the facility under a management contract, and would require changes in this information be provided to the department upon payment of the annual renewal of the license.

Existing law provides that if the department fails to approve or disapprove the application within 30 days after receipt thereof, the application shall be deemed approved.

This bill would, rather, require the department to approve or disapprove the application for licensure within 30 days after receipt thereof, unless the state department, with just cause, extends the application review period beyond 30 days.

Existing law authorizes the department to deny an application for licensure if a person named in the application was an officer, director, general partner, or owner of a 5% or greater beneficial interest in a licensee, or a management company under contract with a licensee, of certain facilities at a time when one or more violations of law were committed therein that resulted in suspension or revocation of its license, or at a time when a court-ordered receiver was appointed pursuant to prescribed provisions of law.

This bill would add a time when a final Medi-Cal decertification action was take under federal law to this list of situations that may be the bases for denial of an application.

Ch. 568 (SB 1673) Johnston. Delta Protection Commission.

(1) Existing law, the Johnston-Baker-Andal-Boatwright Delta Protection Act of 1992, creates the Delta Protection Commission and requires the commission to prepare and adopt a comprehensive long-term resource management plan for specified lands within the Sacramento-San Joaquin Delta.

Existing law requires the commission to meet at least monthly and abolishes the commission on January 1, 1997.

This bill would instead require the commission to meet at least bimonthly and would extend the existence of the commission to January 1, 1999.

The bill would impose a state-mandated local program since this bill would extend the existence of the commission and existing law requires, within 180 days of the adoption of any amendment to the regional plan by the commission, that all local governments, as specified, submit to the commission proposed amendments which will cause their general plans to be consistent with specified criteria.

(2) Under existing law, a penalty assessment in the amount of 10% is assessed on fines imposed for specified violations occurring within the delta and is deposited in the Sacramento-San Joaquin Delta Protection Fund, to be available, upon appropriation by the Legislature, for support of the commission, as prescribed.

This bill would repeal that penalty assessment and make related changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 569 (SB 1693) Monteith. Development: fees.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes a local agency to charge a variety of fees in connection with the approval of a development project, as defined. Existing law prescribes the responsibilities of the local agency with respect to the fees collected, including requiring the local agency to make certain findings with respect to any portion of a fee that remains unexpended or uncommitted for 5 or more years after the deposit of the fee, and to refund unexpended or uncommitted fees under certain circumstances.

This bill would restrict the above responsibilities of the local agency to unexpended, rather than uncommitted fees. The bill would revise the local agency's duties with respect to these unexpended fees, including requiring the local agency, for the 5th fiscal year following the first deposit into an account or fund, and every 5 years thereafter, to include specified information in findings relating to the funding of a project. The bill would further provide that in the event that sufficient funds have been collected to complete financing on an incomplete public facility, the local agency either identify an approximate date by which the public facility will be commenced or refund, as specified, the unexpended portion of the fee to the then current record owner or owners of lots or units of the development project or projects on a prorated basis.

This bill would also specifically require a local agency to expend a fee for public improvements, as defined, solely and exclusively for the purpose or purposes for which the fee was collected, as specified. The bill would further provide that no fee shall be levied, collected, or imposed for general revenue purposes.

By revising the duties of a local agency with respect to the refund and expenditure of development fees, this bill would impose a state-mandated local program.

Existing law requires that, when fees charged against a development project are collected, a local agency deposit them in a separate fund or account in a manner that will avoid the commingling of those fees with other funds. Existing law also requires that these fees be expended only for the purposes for which they were collected. Existing law further requires that, for each separate account or fund established under these provisions, the local agency make available to the public specified information relating to the fee, interest, other income, expenditures, and refunds occurring during the fiscal year within 60 days of the close of each fiscal year.

This bill would instead require the local agency, within 180 days after the last day of each fiscal year, to make available to the public specified information relating to fees deposited in the account or fund. The bill also would require the local agency to identify the public facility, or facilities, that the fee would be used to finance at the time the fee is imposed. These additional duties required of local agencies would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 570 (SB 1737) Alquist. Property taxation: taxable possessory interest: use of public facility: exclusion.

Existing provisions of the California Constitution authorize the Legislature, with the approval of $^2/_3$ of the membership of each legislative house, to allow a county board of supervisors to exempt from property taxation those properties having a full value too low to justify the costs of assessment and collection.

Existing property tax law implementing this authority limits any exemption granted thereunder by a county board of supervisors to property with a base year value or full value of $5,000 or less.

This bill would increase this maximum value limitation to $50,000 in the case of a possessory interest, for a temporary and transitory use, in a publicly owned convention or cultural facility, as defined. This bill would also make other technical, nonsubstantive changes.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

Ch. 571 (SB 1862) Johnson. Insurance Commissioner: annual report.

Existing law requires the Insurance Commissioner to report to the Legislature annually concerning certain aspects of long-term care insurance, as specified.

This bill would delete that requirement.

Existing law requires mortgage insurers to make a monthly report to the commissioner, as specified.

This bill would delete that requirement. The bill would also delete certain obsolete provisions regarding report requirements with respect to both the Department of Insurance and the Department of Corporations.

Existing law contains 2 similar provisions that require the Insurance Commissioner to make an annual report to the Governor concerning the condition of the insurance business and interests in this state, and other matters concerning insurance, as specified.

This bill would delete one of these provisions and make related changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 572 (SB 2079) Rogers. Vehicles: off-highway motor vehicles: nonresidents: special permits.

(1) Existing law requires that off-highway motor vehicles, as defined, be issued and display an identification plate or device issued by the Department of Motor Vehicles, except as specified. Among the specified exceptions are motor vehicles owned or operated by a nonresident of this state, whether or not the vehicle is identified or registered in a foreign jurisdiction.

This bill would revise the exceptions to include motor vehicles with currently valid identification or registration permits issued by another state, and, as to off-highway motor vehicles owned or operated by a nonresident, to additionally require those vehicles to have a currently valid special permit issued by the Department of Parks and Recreation, as described below. Because operation of an off-highway motor vehicle in violation of this latter provision would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

The bill would authorize the Department of Parks and Recreation to issue to a nonresident a special permit to operate an off-highway motor vehicle otherwise required to be identified under the provisions specified above, to expire on December 31 in the year of issuance, for a fee of not less than $20, as established by the department, subject to adjustment. The bill would require the department to print, distribute, and supervise the sale of those special permits, including allowing for their sale through private and governmental vendors. The bill would require the department, after deducting its administrative and vendor costs, to deposit the fees for the special permits in the Off-Highway Vehicle Trust Fund, for allocation, upon appropriation, pursuant to specified provisions of existing law.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 573 (SB 2132) Johannessen. Human services: exchange of records and information.

Existing law authorizes members of children's multidisciplinary services teams to disclose to one another information and records on a child or the child's family that are relevant to the treatment and services available to that child through integrated children's services programs. Existing law authorizes members of the multidisciplinary teams to establish and maintain a common data base for purposes of planning and delivering services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law prohibits the disclosure of certain of these records or information without the written permission of the child or the child's parent, guardian, or legal representative.

This bill would, until January 1, 2001, authorize the health and social services departments of Solano County, Napa County, Sutter County, and Yuba County, to conduct a pilot project for 4 years that would permit the exchange of client case information among the staff of the various county programs providing human services. The bill would authorize the use by the county of a central case record system for these purposes. The bill would require that an explanation of the pilot project be given to a human services program client before information about the client is recorded and before services are provided. The bill would also require that the client be given an opportunity to refuse participation in the information exchange pilot project.

This bill would require the county to submit an evaluation of the pilot project to the policy committees of the Legislature.

Ch. 574 (AB 1121) Conroy. Telecommunications: federal law: conflicts.

The Public Utilities Act prescribes the powers and duties of the Public Utilities Commission.

The bill would provide that no provision of the Public Utilities Act in conflict with specified federal statutes shall apply to commercial mobile radio service and would authorize the commission to exempt service from any tariff-filing requirements.

Ch. 575 (AB 1530) Richter. Hazardous waste: batteries: federal regulation.

(1) Existing law exempts any collection location that receives, or any person that transports, spent batteries, as defined, generated as waste not subject to the federal Resource Conservation and Recovery Act of 1976, from the requirements concerning the receiving, storage, and transportation of hazardous waste if the batteries are to be sent to a facility authorized to receive the batteries and specified conditions are met.

A violation of the hazardous waste control laws, and any regulation adopted pursuant to those laws, is a crime.

This bill would, in connection with federal law, define the terms "federal battery management act," and "federally regulated battery." The bill would provide that, notwithstanding any other provision of law, the federal battery management act shall be deemed to be the law of this state with regard to the easy removability, environmental labeling, collection, storage, and transportation of federally regulated batteries, and would require that any battery that is a federally regulated battery be managed in accordance with the federal battery management act.

The bill would state legislative intent with regard to those provisions.

The bill would require batteries not subject to those provisions to be managed in compliance with all other requirements of the hazardous waste control laws.

By requiring batteries to be managed in a prescribed manner under the hazardous waste control laws, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 576 (AB 1651) Richter. Hazardous substances: oversight: cost recovery.

Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, authorizes the Department of Toxic Substances Control to expend the money in the Hazardous Waste Control Account in the General Fund, upon appropriation by the Legislature, to pay for, among other things, removal and remedial actions related to the release of hazardous substances. Existing law authorizes the Attorney General to recover from the liable person, as defined, the costs incurred and payable from the account or the Hazardous Substance Cleanup Fund for a removal or remedial action to a hazardous substance release. Under existing law, the amount of any costs which may be recovered

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

under those provisions for a remedial or removal action paid from the Hazardous Substance Cleanup Fund is required to include the amount paid from that fund and interest on that amount calculated at a rate equal to the interest rate of the bonds sold pursuant to the Hazardous Substance Cleanup Bond Act of 1984. Existing law also imposes liability upon those liable persons for administrative costs in an amount equal to 10% of the reasonable cost actually incurred, or $500, whichever is greater. Existing law requires the State Board of Equalization to assess a fee of $8,000 upon a potentially responsible party for oversight of a preliminary endangerment assessment by the department.

This bill would make a statement of legislative intent, would define terms, and would require the department to develop a concise statement of its cost recovery policies and billing procedures, including dispute resolution procedures and availability of program guidance and policies, and distribute the statement to all responsible parties. The bill would require the department to comply with the bill's oversight cost recovery requirements when recovering costs for corrective action pursuant to the hazardous waste control laws, for removal and remedial actions pursuant to the Carpenter-Presley-Tanner Hazardous Substance Account Act, and for response actions pursuant to the California Expedited Remedial Action Reform Act of 1994. The bill would require the department to take specified actions to improve the tracking of indirect oversight costs, as defined, to establish rates for indirect oversight costs which are specific to each program and to review the department's cost recovery policies at least once every 2 years. The bill would also require the department to adopt specified procedures with regard to parties performing hazardous substance release site investigations and cleanups or taking a corrective action or response action, including a meet and confer process, to adopt a billing system, as prescribed, for oversight costs, and to take specified actions with regard to uncollectible accounts.

The department would be required to submit a report to the Legislature, by June 1, 1998, regarding the implementation of those requirements.

The bill would require the Controller to establish a separate subaccount in the Hazardous Waste Control Account for funds received for removal or remedial actions at a specific site and would continuously appropriate the funds in that subaccount to the department to carry out the removal or remedial action and for administrative costs, thereby making an appropriation.

The bill would instead provide that the amount of any remedial or removal action costs that may be recovered for a remedial or removal action paid from the Hazardous Substance Cleanup Fund includes interest on any amount paid from the fund calculated at a rate equal to the interest rate of the bonds sold pursuant to the bond act and that the interest on any amount paid from the state account or the Site Remediation Account shall be calculated at the rate of return earned on investment in the Surplus Money Investment Fund. The bill would also subject any monetary obligation to the department pursuant to the hazardous waste control laws or the hazardous substance account act to interest from the date of the demand at the same rate of return earned on investment in the Surplus Money Investment Fund. The bill would delete the provision specifying the liability for administrative costs.

The bill would delete obsolete provisions and would make conforming changes.

Ch. 577 (AB 2064) Bordonaro. Emergencies: nuclear radiation.

Existing law authorizes the expenditure of specified funds in the Nuclear Planning Assessment Special Account, upon appropriation by the Legislature, for purposes of the Radiation Protection Act of 1993, as specified. Under existing law the amounts available for reimbursement of state and local costs are cumulative biennially, as specified.

This bill would specify the availability of any unexpended funds for specified fiscal years for the San Onofre and Diablo Canyon sites.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 578 (AB 2069) Tucker. Crime: penalty assessments.

Existing law provides that the county board of supervisors may authorize the county courts to impose a specified assessment against certain criminal defendants who are

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

convicted for violating a promise to appear or for any other offense for which an arrest warrant has been issued, whether or not a fine is imposed.

This bill would revise this provision to provide instead that the county board of supervisors may require the courts to impose a specified assessment against criminal defendants who violate their written promise to appear or a lawfully granted continuance of their promise to appear in court or before a person authorized to receive a deposit of bail, or who otherwise fail to comply with any valid court order.

Ch. 579 (AB 2088) Alpert. Hazardous waste: recycled material.

Existing law defines the terms "recycled material" and "waste" for purposes of the hazardous waste control laws. Existing law subjects recyclable materials to the requirements of the hazardous waste control laws, unless the Department of Toxic Substances Control issues a variance or unless the material meets specified requirements.

This bill would revise the definition of the term "recycled material" to exclude an intermediate manufacturing process stream, as defined. The bill would exclude from the definition of "waste" a discarded material that is such an intermediate manufacturing process stream.

Ch. 580 (AB 2144) Goldsmith. Murder and manslaughter.

Existing law provides that, to make a killing either murder or manslaughter, it is requisite that the party die within 3 years and a day after the stroke received or the cause of death administered.

This bill would provide that it is not requisite that the party die within 3 years and a day, but if death occurs beyond that time, there shall be a rebuttable presumption that the killing was not criminal. The bill would provide that the prosecution shall bear the burden of overcoming this presumption. By expanding the scope of existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 581 (AB 2334) Cortese. Geothermal heat exchange wells.

Existing law requires every person who intends to dig, bore, drill, deepen, reperforate, abandon, or destroy a water well, cathodic protection well, or groundwater monitoring well to file a prescribed notice of intent to engage in that activity with the Department of Water Resources. Existing law also requires every person who digs, bores, or drills a water well cathodic protection well, or groundwater monitoring well, abandons or destroys such a well, or deepens or reperforates such a well, to file with the department a report of completion, as prescribed, within 30 days from the date that the well's construction or alteration is completed.

This bill would repeal that provision requiring the filing of notices of intent with the department.

The bill would require a report of completion for a geothermal heat exchange well, as defined, as specified. Since, under existing law, the failure to comply with that requirement would be a misdemeanor, the bill would impose a state-mandated local program by creating a new crime. The bill would extend the filing deadline for reports of completion from 30 days from the date of completion to 60 days from the date of completion of a well's construction, alteration, abandonment, or destruction. The bill would make conforming changes in existing law.

The bill would require the department to develop, and to submit to the State Water Resources Control Board, not later than July 1, 1997, a report regarding recommended standards for the construction, maintenance, abandonment, or destruction of geothermal heat exchange wells and, until the department develops recommended standards, would authorize a local enforcement agency with authority over geothermal heat exchange wells to adopt temporary regulations applicable to geothermal heat exchange wells, as prescribed. The bill would require the board, not later than January 1, 1998, to adopt a model geothermal heat exchange well ordinance that implements the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

recommended standards developed by the department, and to circulate that model ordinance to all cities and counties. The bill would require cities, counties, and water agencies, where appropriate, not later than April 1, 1998, to adopt ordinances applicable to geothermal heat exchange wells, as specified, and, if a city, county, or water agency, where appropriate, fails to adopt an ordinance by May 1, 1998, would require the model ordinance adopted by the board to take effect, as specified, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whole statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 582 (AB 2368) Hauser. Municipal courts.

(1) Existing law requires that sufficient court facilities be maintained in specified cities and towns within each division of the Humboldt County Municipal Court District, or in other locations as otherwise designated from time to time by the board of supervisors.

This bill would instead provide that the location of permanent court facilities and the locations where sessions of the court may be held other than in the county seat shall be as determined by the board of supervisors, as specified.

(2) Existing law establishes the office of Marshal of Santa Barbara County and the department known as the Santa Barbara County Marshal's Office. That department is responsible for all court services for the municipal courts in that county.

This bill would authorize the Board of Supervisors of Santa Barbara County to, by ordinance, abolish the office of Marshal of Santa Barbara County and the department known as the Santa Barbara County Marshal's Office. The bill would authorize the consolidation of the services and personnel of the Santa Barbara County Marshal into the Santa Barbara County Sheriff's Department, as specified. The bill would also create the Court Services Oversight Committee effective upon that consolidation to advise the sheriff regarding court operations, as specified.

Ch. 583 (AB 2593) Brewer. Criminal procedures: extraordinary costs: reimbursement of counties.

(1) Existing law authorizes the Controller to reimburse a county for extraordinary costs in unusual homicide cases if the county provides sufficient justification of the need for the expenditures. Existing law requires a county, in making a request for reimbursement of extraordinary costs, to include a written statement from the assigned trial judge or the presiding judge that contains the opinion of the court as to whether these costs are reasonably necessary for the prosecution or defense of the case.

This bill would delete the requirement of a written statement and instead would prohibit a county from being reimbursed for costs for travel in excess of 1,000 miles on any single round trip without the prior approval of the Attorney General.

(2) Existing law authorizes the County of Calaveras to apply to the Controller for reimbursement of 100% of its costs incident to the homicide trial of Charles Chitat Ng, incurred between January 1, 1991, and January 1, 2000, but prohibits the County of Calaveras from being reimbursed for costs for travel in excess of 1,000 miles on any single round trip without the prior approval of the Attorney General.

This bill would delete the latter provision regarding reimbursement for travel costs in excess of 1,000 miles.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 584 (AB 2601) Burton. Commercial fishing: herring.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law makes it a misdemeanor for a person to take herring for roe for commercial purposes on a vessel unless the operator has a herring permit issued by the Department of Fish and Game under regulations adopted by the Fish and Game Commission.

This bill would require any person who purchases or renews a permit to take herring in San Francisco Bay on or after April 1, 1997, to obtain an annual herring stamp from the department for a fee of $100.

The bill would create a herring research and management account within the Fish and Game Preservation Fund and would require the revenues derived from herring stamps to be deposited in that account together with specified herring landing taxes, specified herring license fees, royalty fees for San Francisco Bay herring permit transfers, and fees from the roe-on-kelp fishery. The bill would provide that the money in the research and management account is to be expended for the evaluation of herring stocks and other herring research, assisting in enforcement of herring regulations, and for specified educational purposes.

(2) Because other provisions of existing law would make a violation of the bill a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department to carry out the Fish and Game Code.

Because the bill would reallocate specified money in the fund, and would impose new duties on the department whose costs are paid from that fund, the bill would make an appropriation.

Ch. 585 (AB 2628) Firestone. Sea cucumbers.

(1) Under existing law, until April 1, 1998, the owner or operator of a commercial fishing vessel and all divers taking sea cucumbers for commercial purposes are required to obtain a revocable sea cucumber permit from the Department of Fish and Game and have that permit in possession when taking sea cucumbers for commercial purposes. Existing law specifies the qualifications for those permits and sets the fees and terms of the permits.

This bill would repeal that existing law. The bill instead would provide, beginning April 1, 1997, and until April 1, 2002, for the issuance and annual renewal by the department of the number of sea cucumber permits issued for the permit year of April 1997 to March 1998, inclusive, upon payment of a fee of $250. The bill would require an applicant for the permit for the April 1, 1997, to March 31, 1998, inclusive, permit year to have landed a minimum of 50 pounds of sea cucumbers during a specified period, and would require an applicant for the renewal of a permit for a subsequent permit year to have had a permit in the previous permit year. The bill would provide for appeal of a permit denial to the Fish and Game Commission. Beginning April 1, 1998, the bill would authorize the transfer of a permit to a licensed commercial fisherman who meets specified conditions, if the transferor has previously held the permit for any 4 permit years and has landed at least 100 pounds of sea cucumbers in each of those permit years, upon payment of a fee of $200. The bill would authorize the commission to adopt regulations that it determines may reasonably be necessary to protect the sea cucumber resource and assure a sustainable sea cucumber fishery or to enhance enforcement activities.

Because existing law would make a violation of the bill and the regulations adopted pursuant thereto a crime, the bill would impose a state-mandated local program by creating a new crime.

(2) The bill would authorize the commission to permanently revoke a permit for a conviction of unlawful taking of California halibut while operating under a permit and to revoke a permit for a conviction of any other violation of the Fish and Game Code or regulations adopted pursuant thereto.

(3) Existing law generally requires money received by the department to be deposited in the Fish and Game Preservation Fund and continuously appropriates the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

money in the fund to the department and the commission to carry out the Fish and Game Code.

Because this bill would cause additional money to be received by the department from fees and would impose additional duties on the department and the commission, the bill would make an appropriation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 586 (AB 2637) Bowler. Peace officers: false claims.

Existing law makes it a misdemeanor to file an allegation of misconduct against any peace officer, knowing the allegation to be false.

This bill would make it a misdemeanor to file a civil action against any peace officer or a lien against his or her property, knowing the claim or lien to be false and with the intent to harass or dissuade the officer from carrying out his or her official duties. The bill would provide that this provision applies only to claims pertaining to actions that arise in the course and scope of the peace officer's duties. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 587 (AB 2711) Boland. Real estate.

(1) Existing law, the Real Estate Law, makes it unlawful for any person to engage in the business of, or act in the capacity of, a real estate broker or salesperson within this state unless licensed by the Department of Real Estate. Existing law provides that prior to denying, suspending, or revoking the license of a licensee, the commissioner of the department must comply with specified procedural requirements.

This bill would permit a licensee against whom an investigation is pending or an accusation has been filed to petition the commissioner to voluntarily surrender the licensee's license. The bill would provide that surrender of a license becomes effective upon acceptance by the commissioner and would prescribe specified procedures for reinstatement of the license.

(2) Under existing law, a real estate salesperson is defined as a natural person who may engage in certain specified activities in the employ of a licensed real estate broker.

This bill would include in those activities, certain property transactions relating to mineral, oil, or gas property.

(3) Existing law requires an applicant for a real estate broker's or real estate salesperson's license to comply with specified educational requirements or to have completed an equivalent course of study, as specified.

This bill would revise the scope of what constitutes an equivalent course of study.

(4) Existing law requires a real estate broker who engages in a certain number of specified transactions during a calendar year to so notify the department in writing.

This bill would repeal that requirement.

(5) Existing law requires a real estate broker engaged in the solicitation and negotiation of a loan secured by real property, to deliver to the person being solicited, or to the borrower, specified disclosure statements. Existing law requires a broker to retain a copy of these statements for 4 years.

This bill would require the broker to retain a copy of these statements for 3 years.

(6) Under existing law, a person acting as a principal or agent who intends, in this state, to sell or lease or offer for sale or lease lots, parcels, or interests in a subdivision, as defined, located outside of this state but within the United States is required, prior to any sales, leasing, or offering, to register the subdivision with the commissioner.

This bill would authorize the commissioner to order any person whom the commissioner finds is violating specified provisions of existing law or regulations of the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

commissioner to cease and desist from committing the violation or to cease and desist from the further sale or lease of an interest in the subdivision, as specified. The bill would allow that person to request a hearing, as specified. This bill would make a technical, nonsubstantive change to existing law.

(7) Existing law regulates the sale, lease, or offer for sale or lease of lots or parcels in a subdivision, and, for purposes of that law, includes within the scope of a subdivision a time-share project.

This bill would revise the description of a time-share project, as specified.

(8) Existing law defines and regulates land projects within this state and prohibits the commissioner from issuing a public report on any land project, as specified, unless he or she makes certain findings.

This bill would delete specified provisions of law relating to land projects.

(9) Existing law provides that no amendment or modification in the declaration of restrictions, bylaws, articles of incorporation, or other instruments affecting the rights to ownership, possession, or use of interests in a subdivision which is also a land project is valid without prior written consent of the commissioner until 3 years from the date on which the subdivider, or his or her successor in interest, ceases to control $^{1}/_{3}$ of the votes required to effect that change.

This bill would delete this requirement and make a related change.

(10) Existing law makes willful violations of specified provisions of law relating to subdivided lands punishable by civil penalties, as specified.

This bill would eliminate this provision of law.

(11) This bill would incorporate additional changes in Section 10250.1 of the Business and Professions Code, proposed by AB 2530, to be operative only if AB 2530 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

Ch. 588 (AB 2867) Brulte. Public utilities: municipal ownership: sale.

(1) Existing law permits any municipal corporation to sell and dispose of any public utility owned by it, by resolution adopted by $^{2}/_{3}$ of the members of its governing body submitting the question to the voters of the municipal corporation at an election and after approval by $^{2}/_{3}$ of the voters voting in that election.

Existing law also generally permits a city to dispose of city-owned property, upon the adoption of a resolution by the legislative body of its findings and intention to sell the property, after a hearing on the matter and the consideration of any protests filed in the matter, which may be overruled by a $^{4}/_{5}$ vote of the legislative body.

This bill, until November 1, 1996, would specifically authorize the City of Fontana to dispose of a water utility owned by the city in a specified manner.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 589 (AB 2919) Weggeland. Nonprofit and cooperative corporations.

Existing law, the Nonprofit Corporation Law, regulates the organization and operation of nonprofit corporations, including nonprofit public benefit corporations, nonprofit mutual benefit corporations, and nonprofit religious corporations. Existing law, the Consumer Cooperative Corporation Law, regulates the organization and operation of consumer cooperatives.

This bill would, among other things:

(1) Provide that the articles of incorporation or the bylaws of a nonprofit corporation may include a provision that requires any amendment to the articles or to the bylaws, and any amendment or repeal of that amendment, to be approved in writing by a specified person or persons other than the board of directors or the members.

(2) Permit the staggering of terms of office of the directors of public benefit corporations and mutual benefit corporations.

(3) Authorize the board of directors of a nonprofit corporation, by a majority vote of qualified directors, to declare vacant the office of any director who fails or ceases to meet any required qualification that was in effect at the beginning of that director's current term of office.

(4) Authorize a person with standing to bring an action to remedy a violation of the provision that limits the number of interested persons, as defined, who may serve on the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

board of a public benefit corporation to not more than 49% of the total members of the board.

(5) Provide that a member who is expelled, suspended, or whose membership is terminated by a public benefit corporation, a mutual benefit corporation, or a cooperative corporation, is liable for any charges, services, benefits, dues, assessments, or fees incurred prior to that expulsion, suspension, or termination.

(6) Change the quorum requirement from a majority to $^{1}/_{3}$ of the members at a meeting of the members of a nonprofit corporation where the bylaws do not set a different quorum requirement.

(7) Set forth procedures for determining the acceptability of signatures by or on behalf of members of a nonprofit corporation or a cooperative corporation engaged in voting by ballot, consent, waiver, or proxy.

(8) Authorize a corporation in the process of winding up to dispose of known claims against it by complying with specified notice requirements.

(9) Authorize the Secretary of State to waive the penalties for the failure of a public benefit corporation, a mutual benefit corporation, or a cooperative corporation to file a specified statement if the secretary determines that the failure is excusable because of reasonable cause or unusual circumstances.

(10) Make technical and clarifying nonsubstantive changes to existing law.

Ch. 590 (AB 2973) Olberg. Veterans' home: administrators.

Existing law establishes a Veterans' Home of California, Yountville, located in Napa County and the Veterans' Home of California, Barstow, located in San Bernardino County. Existing law authorizes the Department of Veterans Affairs to establish and construct additional sites in certain specified counties in southern California. Existing law defines "administrator" for this purpose to mean the administrators of the Yountville and Barstow sites.

This bill would require an administrator at Barstow and at each site of the southern California home, and would make conforming changes.

This bill would declare the second home to be a new state function, and, except for overall management and administration of the home, would declare that the department is authorized to operate the home pursuant to independent contractors. The bill would declare that prior consistent conduct of the department is ratified and confirmed.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 591 (AB 3064) Hawkins. Commission on Peace Officer Standards and Training.

(1) Existing law requires the Commission on Peace Officer Standards and Training, for the purpose of raising the level of competence of local public safety dispatchers, to adopt rules establishing minimum standards relating to the recruitment and training of local public safety dispatchers having a primary responsibility for providing dispatching services for local law enforcement agencies.

This bill would require the commission to establish, by December 31, 1997, and in consultation with representatives of law enforcement organizations, a voluntary professional certification program for law enforcement records supervisors having a primary responsibility for providing records supervising services for local law enforcement agencies.

(2) Existing law requires the Commission on Peace Officer Standards and Training to develop regulations and professional standards on or before July 1, 1996, for the law enforcement accreditation program.

This bill instead would require the commission to develop these regulations and standards when funding for this purpose from nongeneral funds is approved by the Legislature.

Ch. 592 (AB 3342) Knowles. Real estate: real property securities dealers: time-share projects.

(1) Existing law provides for regulation of real property securities dealers by the Commissioner of Real Estate. A person acting as a real property securities dealer must be licensed as a real estate broker, and a permit from the commissioner is required before

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

real property security may be sold by the issuer or real property securities dealer to the public. Existing law also provides for conservatorship and liquidation proceedings, as specified, with respect to real property securities dealers.

This bill would repeal the provisions requiring a permit from the commissioner before real property security may be sold, and would provide that no conservatorship or liquidation proceeding shall be commenced on or after the effective date of this act.

The bill would also provide for the repeal of other existing provisions regulating real property securities dealers upon notification by the commissioner to the Secretary of State that the last pending conservatorship or liquidation proceeding commenced prior to the effective date of this act has been terminated.

The bill would provide that certain permits, orders, and conditions issued or imposed under these provisions prior to repeal shall remain in effect, as specified. Following the repeal, the permits, orders, and conditions would be deemed to have been imposed under the Corporate Securities Law of 1968. The bill would enact other transition provisions.

(2) Existing law regulates the sale, lease, and offer for sale or lease in this state of time-share projects situated outside this state and qualified resort vacation clubs, as specified. Existing law provides that the provisions that regulate real property securities dealers, which would be repealed by this bill, apply to the sale or lease or offering of these time-share projects.

This bill would enact provisions to replace the provisions that would be repealed by this bill. Among other things, it would do the following:

It would define the terms "sale" and "sell" with respect to these time-share projects and vacation clubs to include an offer or attempt to sell, a solicitation of a sale, a contract of sale, or an exchange, as specified.

It would require a subdivider or person offering one of these interests for sale to first obtain a permit from the Real Estate Commissioner, and would enact other related provisions.

The bill would also authorize the commissioner to order a person to desist and refrain from violating the laws governing these activities, and would allow a person injured by a transaction that is in violation of the law to recover damages, interest, and attorney's fees, as specified.

It would provide that certain acts are public offenses, punishable by fine and imprisonment.

(3) This bill would incorporate additional changes in Section 10250.2 of the Business and Professions Code, proposed by AB 2530, to be operative only if AB 2530 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 593 (AB 3446) Brewer. Natural community conservation planning: compensation.

Under the Natural Community Conservation Planning Act, the Department of Fish and Game is required to be compensated for the actual costs incurred in participating in the preparation and implementation of natural community conservation plans according to a schedule in a specified agreement.

This bill would make that compensation permissive.

Ch. 594 (AB 3106) Hoge. Horseracing: organizations representing horsemen and horsewomen.

Existing law requires any association other than a fair that conducts a thoroughbred racing meeting to pay to the owners' organization contracting with the association with respect to the conduct of racing meetings for administrative expenses and services rendered to owners, an amount not to exceed $^2/_3$ of 1% of the portion deducted for purses, and to a trainers' organization for administrative expenses and services rendered

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to trainers and backstretch employees an amount equivalent to 1/3 of 1% of the portion deducted for purses.

This bill would increase the amounts to be paid to those organizations to 2/3 of 1 1/2% to the owners' organization, and 1/3 of 1 1/2% to the trainers' organization until January 1, 1999. This bill would also require all organizations representing horsemen and horsewomen and trainers to submit an annual report, until January 1, 1999, of their expenditures from the previous calendar year to the California Horse Racing Board.

Ch. 595 (SB 398) Dills. Quarter horse racing.

(1) For the purposes of the Horse Racing Law, existing law defines a "California-bred quarter horse" as a quarter horse foal dropped by a mare in California after being conceived in California and remaining in California until the foal is weaned, or any quarter horse foal that is conceived in California on or after January 1, 1981.

This bill, instead, would define a "California-bred quarter horse" as a quarter horse foal conceived in California by a stallion standing in California at the time of conception.

(2) Existing law also defines "quarter horse racing" as that form of horseracing in which quarter horses, as defined, are ridden by jockeys in races over distances not more than one-half of a mile.

This bill would amend the foregoing definition to specify that the distances of the subject races are not more than 5 1/2 furlongs.

(3) Existing law requires any association other than a fair that conducts a quarter horse racing meeting, except a mixed breed meeting, to pay to the horsemen's organization contracting with the association with respect to the conduct of racing meetings for administrative expenses and services rendered to horsemen, an amount equal to its expenses, but not to exceed 3% of the portion.

This bill, instead, would require the association to pay to the horsemen's organization contracting with the association with respect to the conduct of racing meetings for administrative expenses and services rendered to horsemen, an amount not to exceed 3% of the portion.

(4) This bill would also incorporate additional changes in Section 19613 of the Business and Professions Code proposed by AB 3106, to be effective only if both bills are chaptered and this bill is chaptered last.

Ch. 596 (AB 3339) Hoge. Sex offenses: punishment.

Existing law specifies the punishment for sex offenses where the victim is a child and provides that the court may direct an operation to be performed upon the offender for the prevention of procreation where the victim is a female under the age of 10 years.

This bill would repeal the latter provision and provide instead that any person guilty of a first conviction of specified sex offenses where the victim is under 13 years of age may be punished by medroxyprogesterone acetate treatment, upon parole, in addition to any other punishment prescribed by law. The bill would require this punishment upon a 2nd conviction.

Ch. 597 (AB 614) Aguiar. Prisoners: parole.

(1) Existing law requires the Board of Prison Terms or the Department of Corrections, when releasing an inmate on parole, to return the inmate to the county from which he or she was committed, but permits the inmate to be returned to another county if that would be in the best interests of the public and the inmate.

This bill instead would require the board or the department to return the inmate to the county that was the last legal residence of the inmate prior to his or her incarceration, but would permit the inmate to be returned to another county if that would be in the best interests of the public.

(2) Under existing law, if the Board of Prison Terms or the Department of Corrections decides to return an inmate to another county, the agency making this decision is required to place its reasons in writing in the parolee's permanent record.

This bill would additionally require the agency to include these reasons in the notice to the sheriff or chief of police authorized to receive notice of the inmate's release.

Ch. 598 (SB 1231) Lewis. Sentencing: credit: murderers.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law, enacted by an initiative measure, provides that persons convicted of murder, except those convicted of 2nd degree murder where the victim was a peace officer and persons sentenced to life without the possibility of parole or death, may receive a reduction in the time served not exceeding $1/3$ of his or her sentence term for good behavior and participation.

This bill would eliminate those provisions, thereby making all persons convicted of murder ineligible for sentence credit.

(2) This bill also would state that any person who is convicted of murder shall not accrue any sentence credit.

(3) This bill would provide that the provision in (1) above shall become effective only when submitted to, and approved by, the voters, and that the other provisions of the bill shall become operative only if that provision is adopted by the voters.

Ch. 599 (SB 1938) Mountjoy. Juveniles: sex offenses: schools: notification.

Under existing law, a court is required to provide to the superintendent of the school district of attendance written notice that a minor enrolled in a public school has been found by the court to have committed any felony or misdemeanor involving certain criminal offenses. A violation of the confidentiality provisions regarding that written notice is a misdemeanor.

This bill would add to that list of criminal offenses specified sex offenses.

Because the bill would impose additional duties on local officials and expand the scope of an existing crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 600 (AB 2295) Sweeney. Graffiti.

Existing law provides that every person who maliciously defaces with graffiti or other inscribed material, damages, or destroys any real or personal property not his or her own is guilty of vandalism. Existing law prohibits additional specified acts of vandalism involving graffiti. Existing law also authorizes the court to order a defendant to perform community service upon conviction of certain of these offenses, or as a condition of probation, as specified.

This bill would, in a jurisdiction that has adopted a graffiti abatement program, authorize the court to order, upon the conviction of a person for any of the offenses described above, or as a condition of probation, the person, and his or her parents or guardians if the defendant is a minor, to keep the damaged property or another property free of graffiti for a specified period of time. The bill also would authorize the court to order any person ordered to perform community service or graffiti removal pursuant to these provisions to undergo counseling. By increasing the penalty for existing crimes, the bill would impose a state-mandated local program.

This bill would incorporate additional changes in Sections 640.5 and 640.6 of the Penal Code, proposed by AB 2433, to be operative only if AB 2433 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

This bill would incorporate additional changes in Section 13202.6 of the Vehicle Code, proposed by AB 2331, to be operative only if AB 2331 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 601 (AB 360) Hannigan. Delta flood protection: delta levee maintenance.

(1) Existing law creates, until January 1, 1999, the Delta Flood Protection Fund to provide funds for delta levee maintenance subventions. Existing law provides for special delta flood protection projects at certain locations in the delta for specified purposes, as prescribed, and imposes related environmental mitigation and protection requirements. Existing law defines "project" as a flood control improvement or interests in land acquired for flood control improvement.

This bill would revise those provisions to, among other things, extend the existence of the fund until July 1, 2006, authorize the use of fund money for projects at any other location in the delta and certain levees on specified islands bordering the Northern Suisun Bay, extend the application of special delta flood project provisions to specified project levees, as defined, and require net long-term habitat improvement.

The bill would authorize the Resources Agency to establish a team of federal, state, and local agencies, and other persons or entities with a stake in finding a solution to the problems of the delta levees, to develop recommendations for the beneficial reuse of dredged material, as prescribed.

(2) Existing law governing delta levee maintenance requires the Department of Water Resources to develop and submit to the Reclamation Board, for adoption by the board, criteria for the maintenance and improvement of levees that are not project facilities under the State Water Resources Law of 1945, known as nonproject levees, as prescribed. Existing law provides for the reimbursement of eligible local agencies for costs incurred in any year for the maintenance or improvement of nonproject levees. Local agencies that maintain nonproject levees, to be eligible for reimbursement, are required to submit to the board plans for the maintenance and improvement of the levees, as prescribed.

This bill would require those maintenance and improvement criteria to include specified vegetation management guidelines. The bill would revise those reimbursement provisions to, among other things, provide for the reimbursement of eligible local agencies for costs incurred for the maintenance or improvement of project levees, defined as federal flood control levees that are project facilities under the State Water Resources Law of 1945 and other specified existing law, if not less than a majority of the acreage within the jurisdiction of the local agency that maintains the levee is within the primary zone of the delta, as defined. The bill would also require local agencies that maintain project levees, and seek reimbursement, to submit levee maintenance and improvement plans, as prescribed, and would revise plan requirements with regard to subsidence, easements, and net long-term habitat improvement.

The bill would authorize the Department of Water Resources to use maintenance and improvement funds, as specified, in an emergency, as defined, prepare a delta emergency response plan for levee failures, as prescribed, and establish a multiagency emergency response team to advise on methods to ensure that levee emergencies will be resolved as quickly and safely as possible.

The bill would authorize the Department of Water Resources and the board to cooperate with the United States Army Corps of Engineers to develop and implement delta levee rehabilitation, improvement, and realignment, and enhance the environment.

Ch. 602 (AB 564) Cannella. Air toxics: emission inventories and risk assessments.

(1) Existing law, the Air Toxics "Hot Spots" Information and Assessment Act of 1987, requires the State Air Resources Board to compile a list of substances which present a chronic or acute threat to public health when present in the ambient air, as specified. The act requires operators of facilities which are sources of air releases or potential air releases of hazardous materials to develop, submit to the appropriate air pollution control district or air quality management district, and update every 4 years, emissions inventories. The act requires the districts, based on data from the inventories, to designate facilities as high, intermediate, or low priority category facilities. The act

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

requires the highest priority facilities to prepare and submit to the district a health risk assessment and authorizes the districts to require any facility operator to prepare and submit a health risk assessment. The act requires the districts to collect fees from facility operators. The act requires that a facility be granted an exemption by a district if specified criteria are met.

This bill would, instead of that exemption provision, exempt a facility with a specified health prioritization score from the act, except as specified, and would prescribe circumstances that would subsequently make the facility subject to the act.

The bill would exempt a new facility from certain report requirements under prescribed conditions.

The bill would limit the fees charged by a district for processing emissions inventory updates, as prescribed.

The bill would impose a state-mandated local program by imposing new duties on the districts in administering the act.

(2) The act requires the state board to adopt a regulation that requires each district to adopt a fee schedule to recover the reasonable anticipated cost of the state board and the Office of Environmental Health Hazard Assessment in administering the act.

This bill would, commencing with the 1997–98 fiscal year, limit the air toxics program revenues of the state board and the office, as prescribed.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 603 (AB 924) Rainey. Air quality: standards.

(1) Existing law requires air pollution control districts and air quality management districts to prepare a plan to achieve and maintain the state and federal ambient air quality standards.

This bill would require each district that has adopted that plan to annually report to the State Air Resources Board the number of days during the preceding calendar year that the district violated the state standard for each pollutant, thereby imposing a state-mandated local program. The bill would, if a state standard was not violated during more than 3 days, as specified, prohibit the adoption by the district of any new or more stringent control measure unless the district analyzes the costs and benefits of achieving attainment, as specified. The bill would require the state board to review those district analyses, as prescribed.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 604 (AB 939) Cortese. Grape crush report.

Existing law requires every processor who crushes grapes in California to annually furnish to the Secretary of Food and Agriculture a report of the total number of tons of grapes purchased by the processor in California during the preceding crush within each grape pricing district.

This bill would name the section of the Food and Agricultural Code that so provides the "Clare Berryhill Grape Crush Report Act of 1976."

Ch. 605 (AB 1376) Bustamante. Oil spill reporting requirements.

Under existing law, every rupture, explosion, or fire involving a pipeline is required to be immediately reported by the pipeline operator to the fire department having fire suppression responsibilities and to the Office of Emergency Services, and is subject to additional specified reporting requirements.

This bill would authorize the Division of Oil, Gas, and Geothermal Resources to develop field rules for the San Joaquin Valley oil fields which establish volumetric thresholds for emergency reporting by the operator of oil discharges to land associated

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

with onshore drilling, exploration, or production operations, where the oil discharges cannot pass into or threaten the waters of this state, subject to the concurrences of the State Water Resources Control Board and the Department of Fish and Game, as specified. The bill would require the adoption of field rules for the San Joaquin Valley oil fields by January 1, 1998. The bill would prescribe related requirements.

Ch. 606 (AB 2340) Cannella. Agriculture: direct marketing.

(1) Existing law, within the state marketing services provisions of the Food and Agricultural Code, authorizes the Secretary of Food and Agriculture to adopt regulations to allow and encourage the direct sale by farmers to consumers of all types of agricultural products produced within the state.

This bill would repeal and reenact these provisions in a separate part of the Food and Agricultural Code, relating to direct marketing.

(2) Existing law contains numerous provisions governing certified farmers' markets in this state. Existing law also authorizes the secretary to establish qualifications for persons selling products directly to consumers whenever the sales involve the use of any exemption granted by the secretary. In addition, existing law provides that sales outlets may be subject to these qualifications.

This bill, in addition, would authorize the secretary to establish qualifications for certified farmers' markets and producers' sales outlets at or near the location of production.

The bill also would require the secretary to establish a Certified Farmers' Market Advisory Committee with specified duties and responsibilities to ensure the integrity of certified farmers' markets. The bill would repeal these provisions on January 1, 2000.

The bill also would provide for the issuance of certified farmers' market certificates and certified producers' certificates and the inspection of farmers' markets and property by the county agricultural commissioner, thereby imposing a state-mandated local program. This bill would authorize the county agricultural commissioners to charge a fee for certification and inspection.

(3) Under existing law, a violation of the provisions of this bill would be a misdemeanor, thereby imposing a state-mandated local program. In addition, the bill, until January 1, 2000, would authorize the secretary or the county agricultural commissioner to levy civil penalties against a person who violates these provisions relating to direct marketing or any law implemented pursuant to these provisions.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 607 (AB 2507) Ackerman. Removal and remedial actions: responsible parties: charges.

Existing law authorizes a California regional water quality control board to remedy the effects of, and remove, any hazardous substance that has been released from an underground storage tank.

This bill would prohibit the State Water Resources Control Board or a regional board from assessing or collecting charges, after July 1, 1997, to compensate the state board or regional board for some, or all, of its costs incurred in connection with the investigation, analysis, planning, implementation, oversight, or other activity related to a removal or remedial action or a corrective action to a release of a hazardous substance, unless specified requirements are met, except as specified, with regard to providing specified information, including time records and invoices, to the responsible party, and the identification of a party responsible for resolving disputes. The bill would authorize the state board or regional board to adjust the scope of the work or service and increase billing rates, as specified. The bill would require the state board and regional board to adopt a specified billing system by July 1, 1997.

The state board would be required to submit a report, by January 1, 1999, to the Legislature, on the costs of implementing the bill's requirements, including recommendations for improving further program management efficiencies.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 608 (AB 2673) Ducheny. School employees: retirement.

Under existing law, the State Teachers' Retirement System Cash Balance Plan prescribes retirement, disability, and death benefits for part-time educational employees and provides for the administration and operation of the plan. Employers are required to inform employees of their right to elect membership in the State Teachers' Retirement System, an alternative statement plan if offered, or in the Cash Balance Plan.

This bill would delete the requirement of employers to inform employees of their right to elect membership in an alternative plan if offered, would provide a process for participants to transfer funds from qualified retirement plans into the plan, the rights of participants who are also receiving an annuity, and that plan provisions may include charter school employees and make other related changes.

The provisions of the bill would become operative on July 1, 1996.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 609 (AB 2981) Brewer. Air pollution: market-based incentive programs: south coast district.

Existing law requires the State Air Resources Board to develop, and adopt, not later than June 30, 1997, a methodology for use by air pollution control districts and air quality management districts to calculate the value of credits issued for emission reductions from stationary, mobile, indirect, and areawide sources, including those issued under market-based incentive programs, when those credits are used interchangeably.

This bill would define the terms "trading program with capped emissions" and "emission-capped trading program."

The bill would prescribe instances in which the South Coast Air Quality Management District Board may prohibit the south coast district hearing board from granting variances from specified provisions of a market-based incentive program or from specified requirements of federal law.

Ch. 610 (AB 3046) Olberg. Air pollution: market-based incentive program.

(1) Existing law authorizes air pollution control districts and air quality management districts to adopt market-based incentive programs to improve air quality. Existing law requires the districts, as to sources in the South Coast Air Quality Management District and Ventura County until January 1, 1999, and statewide on and after that date, to grant emission reduction credits or marketable trading credits without discount or reduction, except as specified, to sources that are exempt from specified district rules and regulations.

This bill would impose that requirement in additional specified districts as of January 1, 1997, and January 1, 1998, and statewide as of January 1, 1999, thereby imposing a state-mandated local program by imposing new duties on the districts. The bill would make nonsubstantive technical changes in that connection.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 611 (SB 562) M. Thompson. Underground storage tanks: corrective actions.

(1) Existing law requires underground storage tanks which are used to store hazardous substances and are installed after January 1, 1984, to meet certain requirements concerning secondary containment, but exempts underground storage tanks for motor vehicle fuel from those requirements, if the tanks meet alternative conditions.

This bill would, instead, allow this exemption for motor vehicle fuel tanks to apply only to tanks installed before January 1, 1997.

(2) Under existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, owners and operators of petroleum underground storage tanks are required to establish and maintain evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage arising from operating an underground storage tank. Existing law requires every owner

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of an underground storage tank to pay a storage fee of six mills for each gallon of petroleum placed in the tank. The fees are required to be deposited in the Underground Storage Tank Cleanup Fund. The money in the fund may be expended by the State Water Resources Control Board, upon appropriation by the Legislature, for various purposes, including payment of a California regional water quality control board's or local agency's corrective action costs, and the payment of claims to aid owners and operators of petroleum underground storage tanks who take corrective action to clean up unauthorized releases from those tanks. The board is prohibited from reimbursing a claim exceeding $990,000. The board is required to award the claims in accordance with a specified priority ranking, which ranks first those owners of tanks located on property used only for residential use, or property which the owner demonstrates is not used for agricultural purposes, as specified, and secondly, tank owners or operators that meet eligibility requirements for small businesses, or a specified city, county, district, or nonprofit organization. When corrective action is required, the owner, operator, or responsible party is required to prepare a workplan that details the specific actions required to be taken to achieve the required corrective action.

An administrative agency delegated the authority to oversee a site investigation and remedial action pursuant to specified provisions is authorized to issue a certificate of completion which prohibits a public agency from taking specified enforcement actions, except as specified.

This bill would revise the definition of the term "occurrence" and would define the term "site" for purposes of the act. The bill would make a statement of Legislative intent concerning those changes.

The bill would require the board to adopt a specified uniform closure letter.

The bill would allow the board, unless the board determines, in consultation with local agencies and the regional board, that a site is an emergency site, as defined, to suspend corrective action work at the site until the board provides the responsible party eligible for reimbursement with a letter of commitment that the party will receive reimbursement for the corrective action work, the responsible party requests continuation of the work, or the fund is no longer in existence.

The bill would require the board to pay a claim for the costs of corrective action to a person who owns property on which is located a release from a petroleum underground storage tank which has been the subject of a completed corrective action and for which additional corrective action is required because of additionally discovered contamination from the previous release. The bill would revise the amount of the claim amount to not more than $1,000,000, less the minimum level of financial responsibility required to be obtained by tank owners and operators.

The bill would require the board to pay a claim for regulatory technical assistance to a property owner or operator who meets specified requirements and who is otherwise eligible for reimbursement.

The bill would provide that for purposes of ranking reimbursement claims, an owner or operator of a tank that meets the definition of small business, but is domiciled or has the principle office outside of the state, is to be classified in that small business category if the owner or operator otherwise meets the small business requirements. The bill would repeal the domicile requirements for a tank owner or operator which has 500 or fewer employees.

The bill would require the board to determine an applicant's eligibility for a claim for corrective actions costs and notify the applicant of this determination within 60 days of the receipt of the claim application and the bill would prohibit the board from revoking that determination of eligibility, except as specified.

(3) Existing law requires the board to develop and implement a local oversight program for the abatement of, and oversight of the abatement of, unauthorized releases of hazardous substances from underground storage tanks by local agencies. The board is required to enter into an agreement with a local agency to implement the local oversight program. Under existing law, the responsible party is liable for the site-specific oversight costs, calculated as specified, which are incurred in overseeing the cleanup of an unauthorized release from an underground storage tank and the board is required to adopt procedures for assessing and recovering money from responsible parties.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the board to implement a procedure which does not assess an owner, operator, or responsible party taking corrective action pursuant to the act for the costs of a local oversight program, and would require the board to institute an internal procedure for assessing, reviewing, and paying those costs directly between the board and the local agency.

(4) The bill would authorize a joint claim to be submitted for reimbursement of corrective action costs for a commingled plume, as defined, subject to prescribed requirements and procedures, and subject to specified limitations. The bill would make available for expenditure for the 1996–97 fiscal year up to $10,000,000 from a specified item of the Budget Act of 1996 appropriating money from the fund for purposes of that program.

Ch. 612 (SB 1285) Killea. Hazardous materials liability: lenders and fiduciaries.

Existing law, the Carpenter-Presley-Tanner Hazardous Substances Account Act, authorizes the Attorney General to recover from the liable person, as defined, the costs incurred and payable from the Hazardous Waste Control Account, the Site Remediation Account, or the Hazardous Substance Cleanup Fund for a removal or remedial action to a hazardous substances release. Existing law makes a liable person who fails to properly provide a removal or remedial action liable for damages in an amount equal to 3 times the amount of any costs incurred.

This bill would make a statement of legislative intent with regard to the liability of lenders and fiduciaries for hazardous material contamination. The bill would define terms and would exempt from liability a person who is acting in the capacity of a lender under any state or local statute, regulation, or ordinance, to the extent that the statute, regulation, or ordinance requires the taking of a removal and remedial action, or the payment of a penalty, and the liability arises from a release or threatened release of hazardous material at, from, or in connection with the property, or to the extent the statute, regulation, or ordinance authorizes damages arising from a release or threatened release. This exemption would apply to property in which the lender maintains indicia of ownership, as defined, property owned, leased, possessed, or used by a person who is obligated under a loan or obligation and in which the lender holds no security interest, as defined, and property acquired through foreclosure or its equivalent, as defined. The bill would also limit the liability of a fiduciary under those state or local laws from exceeding the assets held in the fiduciary estate.

The bill would exclude, from these immunity provisions, the actual benefit realized by a lender, or a lender who participated in the management of the property, as defined, who failed to be divested of the property in a reasonably expeditious manner, who caused or contributed to the release or threatened release of hazardous material by an act or failure to act, or made the loan primarily for investment purposes. The bill would not exempt a fiduciary from liability if the fiduciary's negligent acts or intentional or reckless conduct caused or contributed to the release or threatened release.

The bill also would not exempt a lender or fiduciary from liability arising from conduct of, or ownership of the property by, the lender or fiduciary, other than in its capacity as a lender or fiduciary, or if the loan obligation, fiduciary relationship, or fiduciary transaction is structured for the purpose of, evading that liability. The bill would also not exempt a fiduciary who is a beneficiary of the estate, as specified, or exempt a lender from compliance with a specified administrative order.

The bill would provide that the immunity provisions do not limit the application or enforcement of specified provisions requiring the securing of a site where there has been a release of a hazardous substance with regard to property that is acquired by a lender through foreclosure or its equivalent. The bill would also provide that these immunity provisions do not exempt or excuse a lender or fiduciary from specified statutory operational requirements or exempt a lender from liability with regard to hazardous waste or certain hazardous materials or hazardous substances releases.

The bill would declare the intent of the Legislature that these immunity provisions do not apply to certain actions filed, or orders issued, before January 1, 1997, or to proceedings to enforce orders issued before that date.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 613 (SB 1187) Maddy. Tidelands revenue: apportionment to counties and cities.

Under existing law, the Controller is required to annually, as of June 30, apportion to each city or county having specified tide and submerged land, 1% of the revenues paid to the state from oil and gas leases within the city or county, except that the total amount apportioned to each city or county in each year may not exceed $100,000 per mile of ocean frontage within, and owned or operated as a park by, that city or county, available to the public free of charge for recreational purposes, and leased by the State Lands Commission. The amounts paid are required to be deposited in a special trust fund and expended for specified purposes.

This bill would require that, in addition to any of the above amounts payable to a city or county, 20% of the revenues paid to the state which are derived from the production of oil, gas, and other hydrocarbons from a state tideland lease, not to exceed a total of $200,000,000, adjusted for inflation, over a 20-year period, be paid to the city or county within whose boundaries the lease is located if the oil, gas, or other hydrocarbons are extracted under specified circumstances.

Ch. 614 (SB 1417) Kelley. Underground storage tanks: City of Blythe.

Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, among other things, requires the State Water Resources Control Board to establish the Blythe Environmental Remediation Demonstration Project, which requires the board, among other things, to develop, by January 1, 1996, proposed regulations to govern cleanup and groundwater plume management procedures, the handling of claims by multiple claimants, and to recommend needed legislation in the board's 1995 annual report if the board determines that it does not have sufficient authority to adopt those regulations.

This bill would repeal those provisions and would, until January 1, 2000, authorize the City of Blythe to take specified actions with regard to commingled plumes within the city and would impose related duties on the board pertaining to the payment of consolidated claims.

The bill would also, until January 1, 2000, except as specified, immunize the city, and its employees, agents, contractors, and subcontractors, from liability with regard to corrective actions taken or omitted, as specified.

The bill would make related legislative findings and declarations.

The bill would become operative only if SB 562 is enacted on or before January 1, 1997, and establishes a statewide program for accommodating joint applications at commingled plume sites.

The bill would declare that it is to take effect immediately as an urgency statute.

and

Ch. 615 (SB 1535) Killea. Solid waste: recycling market development loan programs.

Existing law, the California Integrated Waste Management Act of 1989, regulates the management and handling of solid waste and is administered by the California Integrated Waste Management Board.

The act, until July 1, 1997, provides for the designation of recycling market development zones, provides for a recycling market development loan program, and creates the Recycling Market Development Revolving Loan Subaccount in the Integrated Waste Management Account.

The act requires the board to report on its loan program in the annual report that the board is required to file on or before March 31, 1996, with the Legislature, and to report on its progress in developing and implementing the market development plan in the annual report.

This bill would continuously appropriate the funds deposited in the subaccount to the board for making loans pursuant to the bill. The bill would specify additional terms and conditions for making loans and related powers of the board.

The bill would specify elements of the report.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would extend the operative date of those provisions until July 1, 2006, but would not extinguish any loan obligation or the authority of the state to seek collection of a loan.

Ch. 616 (SB 1549) Monteith. Surface mining operations: exemptions: oil and gas extraction.

Existing law, the Surface Mining and Reclamation Act of 1975, exempts certain activities from its provisions.

This bill would additionally exempt excavations, grading, or other earthmoving activities in an oil or gas field that are integral to, and necessary for, ongoing operations for the extraction of oil or gas that comply with specified conditions.

Ch. 617 (SB 1566) Monteith. Redevelopment: Project areas: agricultural and open-space lands.

(1) The existing Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas in those communities known as project areas. Existing law separately regulates the use of land for agricultural and open-space purposes, as defined.

This bill would provide that agricultural and open-space lands that are enforceably restricted, as defined under existing law, shall not be included within a project area. The bill would further provide that a parcel of land larger than 2 acres that is in agricultural use but that is not enforceably restricted, as defined, shall not be included within a project area unless the redevelopment agency makes specified findings, and would exempt certain land located within specified counties from these provisions.

(2) The existing Community Redevelopment Law requires a redevelopment agency to send a notice of preparation and a copy of a draft environmental impact report to each affected taxing entity, as specified.

This bill would further require that the agency send a copy of the draft EIR to the Department of Conservation, and to agricultural entities and general farm organizations, that provide a written request for notice, if the project area contains land in use, as specified. The bill would require a separate written request for notice for each proposed redevelopment plan or amendment that adds territory and would provide that a request relating to one plan or amendment would not be effective for a subsequent plan or amendment. By requiring new duties of the redevelopment agency with respect to the dissemination of the draft EIR under certain circumstances, this bill would impose a state-mandated local program.

(3) The existing Community Redevelopment Law requires a redevelopment agency that includes in its redevelopment plan a provision for the division of taxes, as specified, to prepare a preliminary report, and to submit this report to each affected taxing entity. Existing law specifies the contents of this report.

This bill would add to the required contents of the preliminary report the total number of acres in the project area that are in "agricultural use," as defined. The bill would further require that the preliminary report be sent to the Department of Conservation, and to agricultural entities and general farm organizations that provide a written request for notice, if the project area contains land in use for agricultural purposes. The bill would require each entity or organization requesting notice to submit a separate request for each proposed redevelopment plan or amendment that adds territory and would provide that the request relating to one plan or amendment would not be effective for a subsequent plan or amendment. By requiring new duties of the redevelopment agency with respect to the preparation and dissemination of the preliminary report under certain circumstances, this bill would impose a state-mandated local program.

(4) The existing Community Redevelopment Law provides that an action may be brought in connection with determining the validity of a redevelopment plan, and related bonds, as specified. Existing law separately regulates the conduct of validating proceedings of this nature, including providing that any "interested person" may bring the action, under specified conditions.

This bill would provide that the Department of Conservation, and specified agricultural entities and general farm organizations that provide a written request for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

notice, are interested persons in any action brought with respect to the validity of an ordinance adopting a redevelopment plan, as specified.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 618 (SB 2170) Mountjoy. Air pollution: market-based incentive programs: recordkeeping.

(1) Existing law authorizes air pollution control districts and air quality management districts to adopt market-based incentive programs.

This bill would require the programs to promote the privatization of compliance and the availability of data in computer format, as specified.

The bill would require districts to allow emission sources to use electronic or computer data storage to comply with emissions monitoring and recordkeeping requirements, including those relating to market-based incentive programs, thereby imposing a state-mandated local program.

The bill would make conforming changes and delete obsolete material.

(2) Existing law requires the district board of the South Coast Air Quality Management District to establish rules and regulations for the granting of variances by a hearing board from air pollution discharge standards. Existing law prohibits the granting of a variance in any air pollution control district or air quality management district from certain permit requirements.

This bill would make that prohibition inapplicable to the granting of variances by a hearing board in the south coast district.

The bill would prohibit any district from granting a variance from a trading program emission cap.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 619 (SB 1112) Polanco. Garment industry: registration.

Existing law, with certain exceptions, requires the registration with the Labor Commissioner of every person engaged in the business of garment manufacturing, including those contracting to have garment manufacturing performed, and authorizes the commissioner to issue certificates of registration and renewals of registration.

This bill would require the Labor Commissioner to notify registrants in writing, and provide an application and instructions for renewal, at least 90 days prior to expiration of registration. The bill would specify that the omission of the Labor Commissioner to comply with this requirement would not excuse nonrenewal.

The bill further would authorize the Labor Commissioner to grant a 90-day extension of registration to an applicant for renewal of registration under specified conditions.

Ch. 620 (SB 1047) Costa. Produce dealers and processors of farm products.

Existing law provides for the regulation and licensing of brokers, cash buyers, commission merchants, and dealers of farm products. These licensees, among other things, receive farm products on consignment or sell farm products on commission. Existing law requires an applicant for such a license to include a balance sheet or statement of financial conditions with his or her application for licensure. Existing law authorizes the filing of a verified complaint with the Secretary of Food and Agriculture by a producer, consignor, or seller of any farm product if that person fails to obtain a settlement of a transaction by a licensee. Existing law requires the complaint to be filed not later than one year after default by the licensee.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete the requirement that a balance sheet or statement of financial condition be submitted with the application for license, and, instead, would require the applicant to submit an affidavit of specified information with the application. The bill would permit the secretary to deny an application if the information prepared, retained, or submitted shows the applicant to be in an unsound financial condition. The bill also would (1) authorize the secretary to require an applicant to file with him or her a balance sheet or statement of financial position that presents fairly the financial condition of the applicant, if, at any time, the secretary has cause or reason to believe that the applicant is in an unsound financial condition so as to impair his or her ability to pay farm products creditors in full for farm products received or handled, or for any reason the secretary deems advisable, (2) require the secretary to refuse to grant a license or the renewal of a license if the license of the applicant has been suspended or revoked within 2 years preceding the application, and (3) require the secretary to conduct a thorough review of the licensee's past performance and compliance with rules and regulations before renewing a license if a complaint has been filed against the licensee.

This bill, until January 1, 1998, would permit the filing of the complaint with the secretary if the amount in controversy is $3,000 or more, or if the total of all complaints against one respondent is $3,000 or more. The bill would require any agreement waiving any right guaranteed by the provisions of the Food and Agricultural Code to set forth the exact language of the provisions being waived, and would require these agreements to be made available to the secretary upon the secretary's request.

The bill also would require the complaint to be filed with the secretary within 9 months of the date that the payment was due, and any investigation initiated by the secretary would be required to be completed within one year from the date the complaint is filed.

Because certain violations of the requirements of the bill relating to licensees are misdemeanors under existing law, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 621 (SB 1414) Greene. Education: class size reduction.

(1) Existing law establishes the Class Size Reduction Facilities Funding Program for the purpose of assisting school districts with the facilities-related costs associated with reducing class size in kindergarten and grades 1 to 3, inclusive, pursuant to the Class Size Reduction Program. Existing law provides that funds allocated to school districts for that purpose be expended solely for the purpose of providing the additional teaching stations necessary for the implementation of the Class Size Reduction Program described in (3). If a school district receives that funding but has not implemented its class size reduction program for all grades and classes for which it received the funding, an amount equal to the amount received by the school district under the Class Size Reduction Facilities Program is required to be deducted from the school district's next apportionment or apportionments of state funds, as specified.

This bill would instead provide that funds allocated pursuant to the Class Size Reduction Facilities Funding Program be expended solely for the purpose of school facilities-related costs associated with the implementation of the Class Size Reduction Program. The bill would further provide that the amount deducted from a school district's next principal apportionment or apportionments of state funds be an amount equal to the amount received by the school district for each class that the school district failed to reduce to a class size of 20 or less pupils.

This bill would additionally provide that the amount apportioned for each additional teaching station shall be increased by 15% for teaching stations if portable classrooms are used and the Superintendent of Public Instruction determines that the schoolsites require classrooms specially designed to accommodate a snow load.

(2) Existing law authorizes a school district to operate a continuous school program in one or more schools of the district. Whenever the governing board of a school district determines to operate one or more schools of the district as a continuous school program

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the governing board is required to publish public notice of the commencement and operation of the program not later than November 1 of the school year preceding the commencement of the program of its intention to operate a continuous program, as specified.

This bill would provide that a school district establishing and operating a continuous school program in one or more schools for the purpose of implementing the Class Size Reduction Program described in (3) for the 1996–97 and 1997–98 school years is not subject to that publication of notice requirement for those school years.

(3) Existing law establishes the Class Size Reduction Program to provide funding to school districts to reduce class size in kindergarten and grades 1 to 3, inclusive, to not more than 20 pupils per certificated teacher.

This bill would provide that charter schools are eligible to receive funds pursuant to the Class Size Reduction Program. Charter schools would be subject to the requirements of that program and would be required to employ teachers for purposes of that program who meet the requirements specified in the approved charter.

(4) Existing law requires the Superintendent of Public Instruction to apportion to each applicant school district an amount equal to $650 per each pupil enrolled in classes participating in Option One of the Class Size Reduction Program, as specified. To participate in Option One, a school district must provide a reduced class size for all pupils in each classroom in each grade level for which funding is claimed.

This bill would further specify that for the purposes of Option One the school district must provide a reduced class size for those pupils in each classroom for a full regular schoolday, as defined.

The bill would also permit school districts applying for funds under Option One to request a 2-year authorization from the State Board of Education to have a teacher-pupil ratio that average 1 to 20, whether or not each group is enrolled in a separate class, provided certain conditions are met, including, among others, that the schoolsite or schoolsites for which a waiver is requested is on a multitrack year-round calendar and that the school district includes a plan demonstrating to the satisfaction of the board that it will fully meet Option One requirements upon expiration of that authorization.

(5) Existing law provides that any school district that chooses to reduce class size through the use of an early-late instructional program is ineligible under the provision of law relating to the computation of instructional time for purposes of the Incentive for Longer Instructional Day and Year in any grade level for which class size reduction funding is received.

This bill would require a school district participating in Option One of the Class Size Reduction Program as described in (3) to provide a reduced class size for all pupils in each classroom for the total number of instructional minutes offered per day in each grade level for which funding is claimed. The bill would provide that any school district that operated under the provision of law relating to the computation of instructional time for purposes of the Incentive for Longer Instructional Day and Year prior to July 1, 1996, may receive funding pursuant to Option One in any grade level for which class size reduction funding would otherwise be received pursuant to Option One.

(6) Existing law requires a school district to certify in its application for funding to implement a class size reduction program that it meets certain criteria, including, among other criteria, that the school district has maintained or further reduced class sizes accomplished through previous apportionments under the program, that the school district has not increased the average class size in any kindergarten, or in any of grades 1 to 3, inclusive, in the district, above the average that existed in the school year preceding the school year in which the district first received an apportionment under the program, and that the school district will maintain specified data that will aid in evaluation of the program, including, but not limited to, individual test scores or other records of pupil achievement and pupil behavior.

This bill would instead require the school district to certify that it has maintained class sizes of no more than 20 pupils per each class that was reduced through previous apportionments made under the Class Size Reduction Program. The bill would also eliminate the requirement that the school district certify that it has not increased the average class size in any kindergarten, or in any of grades 1 to 3, inclusive, in the district, above the average that existed in the school year preceding the school year in which the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

district first received an apportionment under the Class Size Reduction Program and the requirement that the school district certify it will collect and maintain data on records of pupil behavior, as specified.

The bill would require the school district to certify commencing with the 1997–98 school year, that each certificated teacher employed for purposes of the program is providing direct instructional services to each pupil enrolled in the separate class to which the teacher is assigned.

The bill would also require, commencing with the 1997–98 school year and each school year thereafter, that a school district certify that each reduced class is housed in a separate self-contained classroom, or that the square footage per pupil is not less than a specified average at the schoolsite for the 1995–96 school year.

(7) Existing law requires a school district's application for funding under the Class Size Reduction Program to certify pupil enrollment and specifies that classes comprised of special education pupils enrolled in special day classes on a full-time basis shall not be included.

This bill would further provide that a school district may not claim funding for any pupil who is enrolled in independent study for the full regular schoolday nor for any pupil for any portion of the day that the pupil is enrolled in independent study. The bill would also provide that a charter school may not claim funding for any pupil who is enrolled in a program of home-study for the full regular schoolday nor for any pupil for any portion of the full regular day that the pupil is enrolled in a program of home-study.

(8) Existing law provides that if a school district received funding pursuant to the Class Size Reduction Program but has not implemented its class size reduction program for all grades and classes for which it received funding, that an amount equal to the amount received by the school district pursuant to the program be deducted from the next apportionment or apportionments of state funds to the district, as specified. Existing law requires the Superintendent of Public Instruction to develop an enforcement procedure and to incorporate that procedure as an integral part of the school district audit and compliance review.

This bill would, instead, provide that the amount deducted from a school district's next principal apportionment or apportionments of state funds be an amount equal to the amount received by the school district under the Class Size Reduction Program for each class that the school district failed to reduce to a class size of 20 or less pupils. This bill would also instead require the enforcement procedure to be incorporated as an integral part of the school district financial audit and other investigations.

(9) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 622 (SB 1419) Maddy. Health facilities: plan review and building inspection.

Existing law governing clinics requires the Office of Statewide Health Planning and Development, in consultation with the Community Clinics Advisory Committee, to prescribe minimum construction standards of adequacy and safety for the physical plants of clinics and to submit these standards for approval to the California Building Standards Commission. Existing law, the California Building Standards Code, also requires that proposed building standards be submitted to the commission for approval. Existing law provides that a surgical clinic, as defined, shall be deemed to have met these minimum construction standards if it meets certain requirements.

This bill would delete the requirement set forth in the law governing clinics that the building standards be submitted for approval to the commission and would instead refer to the California Building Standards Code. The bill would also repeal the surgical clinic provision.

Existing law also requires the office to review and approve the design and inspection of the reconstruction or retrofit of, or alteration of, or addition to any surgical center as it deems necessary to comply with prescribed regulations, and to establish an appropriate fee for the review and approval of certain seismic hazards evaluation reports and other prescribed inspection duties.

This bill would repeal these requirements and would require the city or county to have plan review and building inspection responsibilities for, and would authorize the office to have plan review responsibilities for, the construction or alteration of surgical clinics

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and chronic dialysis clinics, as prescribed. The bill would, among other things, require the governing authority or owner of the clinic to submit the plans to the office for certification as to whether or not the clinic meets the standards for clinics set forth in the California Building Standards Code if the city or county indicates its review will not include this certification. It would authorize the office to charge fees for the certification process and for performing the plan reviews, in amounts that do not exceed its costs.

Existing law requires that a city or county, as applicable, have plan review and building inspection responsibilities for the construction or alteration of any building where outpatient clinical services of a licensed health facility are provided which is separated from a building in which hospital services are provided. This and a related provision that contains conforming changes will be inoperative as of January 1, 1997. On that date, an alternative provision would become law that requires that any such building be subject to review and inspection by the Office of Statewide Planning and Development.

This bill would delete the provisions that would make these provisions of existing law inoperative, thereby extending indefinitely the operation of the provisions that require a city or county, as applicable, to have plan review and building inspection responsibilities for the construction and alteration of the above described buildings. The bill would repeal the alternative provision that would require that the above described buildings be subject to review and inspection by the office.

This bill also would permit the governing authority of a hospital to request the office to perform plan review and building inspection services for those buildings. The bill would authorize the office, if it agrees to perform these services, to charge an amount equal to its standard fee for the construction and alteration of hospital buildings. The bill would also prohibit, when a building is accepted for review by the office pursuant to this provision, the governing authority of the hospital from requesting that the city or county conduct plan review and building inspection for any subsequent alteration of the same building unless written notification is provided. Because the bill would extend certain duties imposed upon a city or county, it would impose a state-mandated local program.

By authorizing the increase of fee revenues which under existing law would be deposited in the continuously appropriated Hospital Building Fund, this bill would make an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 623 (SB 1425) Kelley. Hazardous substance cleanup: redevelopment agencies.

(1) Existing law establishes a Site Designation Committee within the California Environmental Protection Agency and allows a responsible party for a hazardous materials release site to make one request to the committee to designate an administering agency to oversee a site investigation and remedial action at that hazardous materials release site. The committee is authorized to deny a request to designate an administering agency only if the committee makes certain findings. An administering agency is authorized to issue a certificate of completion to a responsible party who has satisfactorily completed a remedial action.

This bill would additionally allow the committee to deny a request if it finds that the administering agency and the responsible party are local agencies formed, in whole or in part, by the same political subdivision.

(2) Existing law authorizes a redevelopment agency to take any action that the agency determines is necessary, consistent with other state and federal laws, to remedy or remove a release of hazardous substances on, under, or from a project area subject to specified conditions relating to the identity of, notice to, and actions by, the party responsible for the release of hazardous substances, until January 1, 1999. Existing law requires a redevelopment agency to request cleanup guidelines from the Department of Toxic Substances Control and to provide the department and local health and building departments with notification of any cleanup activity pursuant to those provisions at least 30 days before the commencement of the activity.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, operative commencing January 1, 1999, requires a redevelopment agency to obtain the written approval of the department or a California regional water quality control board before removing or remedying hazardous waste from property within a redevelopment project area.

This bill would define the term "local agency" for purposes of those provisions. The bill would require the redevelopment agency taking the remedial action, until January 1, 1999, to additionally request cleanup guidelines from the regional board.

The bill would authorize an agency to designate a local agency in lieu of the department or a regional board to oversee the remediation or removal of hazardous substances from a specific hazardous substance release site in accordance with prescribed procedures and requirements.

(3) Under existing law, a redevelopment agency that undertakes and completes an action to remedy or remove a hazardous substance release on, under, or from property within a redevelopment project, under specified conditions, and with the approval of the department or a regional board, is not liable with respect to that release under specified state laws concerning liability for hazardous substance release cleanup. Existing law also requires the redevelopment agency to reimburse the department or state board for costs incurred in reviewing or approving remedial action or cleanup plans.

This bill would authorize the local agency to review and approve an action to remedy or remove a hazardous substance release and would require the regional board and the local agency to be reimbursed by a redevelopment agency for costs incurred in reviewing and approving cleanup or remedial action plans pursuant to those provisions. The bill would include an agency within the immunity coverage of a certificate of completion, if the remedial action was performed under the provisions authorizing the designation of an administering agency for a hazardous materials release site.

Ch. 624 (SB 1456) Kelley. Repossessors.

Existing law, the Collateral Recovery Act, sets forth a comprehensive scheme for the regulation and licensure of repossessors and repossession agencies.

This bill would delete a prohibition against a licensee collecting claims owed another with specified exception. It would authorize the agency to request written authorization for the release of property not covered by a security interest to someone other than the debtor. It would also make technical and definitional changes, as specified. Certain provisions of the act would be made applicable with respect to "debtors," as defined, rather than registered owners or consumers.

Ch. 625 (SB 1471) Russell. Bonds: liens: foreclosure.

(1) Existing law prescribes a foreclosure process for the collection by a local agency of delinquent improvement bond assessments levied under the Improvement Bond Act of 1915.

This bill would recast the existing foreclosure procedure including requiring the local agency or legislative body that orders the foreclosure action to take one of 2 specified courses of action, require a specified notice to be completed and recorded by the local agency or legislative body responsible for the foreclosure action, and require, by July 1, 1997, the recordation of a specified notice or the retention of a notice of delinquent special tax installment as to those delinquent special tax installments that were removed from the ad valorem tax roll prior to January 1, 1997, except as specified. In so doing, the bill would impose a state-mandated local program.

(2) Existing law prescribes a foreclosure process for the collection by a local agency of delinquent special taxes levied under the Mello-Roos Community Facilities Act of 1982.

This bill would require local agencies or legislative bodies utilizing that process to comply with a revised procedure that is identical to that specified in the Improvement Bond Act of 1915, as revised and as described in (1) above, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 626 (SB 1492) Kelley. Milk stabilization and marketing plans.

Existing law requires each stabilization and marketing plan for milk to contain provisions whereby the Secretary of Food and Agriculture establishes minimum prices to be paid by handlers to producers for market milk in the various classes. In establishing the prices, the secretary is required to take into consideration certain relevant economic factors.

This bill would require the secretary to conduct a study to determine the economic impact on the milk pooling system in California as a result of increased activities in the manufacturing grade milk process. In addition, the bill would require the secretary on or before July 1, 1997, to submit a report, as specified, to the Governor, the Senate Committee on Agriculture and Water Resources, and the Assembly Committee on Agriculture.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 627 (SB 1640) Marks. Land use: closed military bases.

Existing law authorizes the governing body of a city, county, or city and county to adopt an ordinance that allows a building or other structure located on a military base selected for closure by action of the federal Defense Base Closure and Realignment Commission to comply with specified provisions establishing state building standards and state standards of fire safety, or to any regulations or standards promulgated pursuant to state building standards, in a graduated manner over a period of no more than 10 years from the date a lease of the building or other structure is entered into, provided that specified conditions, including the condition that the building or other structure is subleased to a private party, are met. These provisions are applicable only to a building or other structure relating to which a specified sublease is entered into prior to January 1, 1997.

This bill would reduce the period of time for compliance with the specified state standards and regulations from 10 years to 3 years and would delete the condition that the building or other structure be subleased to a private party. This bill also would remove the restriction on the applicability of these provisions to a building or other structure relating to which a specified sublease is entered into prior to January 1, 1997, and would further broaden the applicability of these provisions to a building or other structure transferred by the federal government to the specified local entities as well as to a building or other structure that is leased by a local entity from the federal government.

The bill would specify that these provisions shall only be applicable to specified structures, and would remain in effect only until January 1, 2003, and as of that date are repealed, unless a later enacted statute, which is enacted before that date, deletes or extends that date.

Ch. 628 (SB 1663) Monteith. Bail: licensees.

Existing law requires persons soliciting or negotiating the execution or delivery of an undertaking of bail on behalf of a surety insurer to be licensed as a bail agent. Existing law permits only natural persons to be so licensed.

This bill would also permit the licensure of corporations, if wholly owned by licensed bail agents, and would make related changes.

Existing law requires the Insurance Commissioner to biannually approve or disapprove one or more statewide professional organizations or other providers familiar with bail law to provide education for licensure as a bail agent, and to biannually approve or disapprove the course outlines and schedule of classes to be provided.

This bill would require that approval biennially rather than biannually.

Ch. 629 (SB 1685) Kopp. Restitution.

(1) Under existing law, any defendant convicted of a crime who, prior to sentencing, sells, conveys, assigns, or conceals his or her property with the intent to lessen or impair his or her financial ability to pay any fine or restitution ordered, is guilty of a crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make this provision applicable during the period that a restitution fine or order remains unsatisfied and enforceable. Because the bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) Under existing law, the probation officer is required to notify victims of their right to attend and participate in all sentencing proceedings, and to provide victims with information concerning a victim's right to civil recovery against the defendant and to be compensated from the Restitution Fund.

This bill would require that notice to include information about the victim's responsibility to furnish information relevant to his or her losses to the probation department, district attorney, and court, the right to receive a copy of the restitution order, and the right to enforce a restitution order as a civil judgment.

(3) Under existing law, a court is required to order every person convicted of a crime to pay a restitution fine and restitution to the victim or victims, unless the court finds compelling and extraordinary reasons. Existing law requires the court to determine the amount of losses that the victim incurred, including property repair or replacement, medical expenses, and lost wages or profits.

This bill would revise and recast these provisions to, among other things, require the court to impose a specific dollar amount, including interest, attorney's fees, and costs, for restitution. The bill would authorize the district attorney, as the victim's attorney, to request an order of examination be held to determine the defendant's financial assets. The bill would require an order of examination to be held if the defendant requests a restitution hearing. The bill also would require a victim to receive at least 10 days' notice before any subsequent proceeding held, or court order made, to modify a restitution order. The bill would provide that the determination of the amount of restitution ordered shall not be affected by the indemnification or subrogation rights of any third party.

(4) Existing law requires persons placed on probation by a court to be under the supervision of a county probation officer, who determines the level and type of supervision consistent with the court-ordered conditions of probation.

This bill would require the probation officer to establish an account into which any restitution payments to the victim or to the Restitution Fund that are not deposited in the Restitution Fund would be deposited. Because the bill would increase the duties of probation officers, the bill would impose a state-mandated local program.

(5) Under existing law, when a defendant is ordered to pay restitution, the order is deemed a money judgment, enforceable as a civil judgment, if the defendant is given certain due process rights.

This bill instead would provide that a restitution order shall be fully enforceable by a victim as if the restitution order were a civil judgment, and enforceable in the same manner as is provided for the enforcement of any other money judgment. The bill would require a victim to have access to all resources available under the law to enforce the restitution order. The bill would provide that any portion of a restitution order that remains unsatisfied after a defendant is no longer on probation or parole is enforceable by the victim pursuant to these provisions. The bill would require victims and the State Board of Control to notify the court whenever a restitution order is satisfied.

(6) This bill would require the Judicial Council, in consultation with the State Board of Control, to develop or amend forms, consistent with the purposes of the bill, by June 30, 1997.

(7) Under existing law, an agency that provides assistance to victims and witnesses may receive funds from the Victim-Witness Assistance Fund if it provides, among other things, comprehensive services. Those services may include, among other things, assistance in obtaining restitution for victims.

This bill instead would require those services to include, upon request of a victim, assisting victims in obtaining restitution and assisting local probation departments in ascertaining the victim's economic loss and providing relevant information to the district attorney, probation department, and court prior to the imposition of sentence.

(8) This bill would incorporate additional changes in Section 1214 of the Penal Code proposed by AB 2898, to be operative only if AB 2898 and this bill are both enacted and become effective on January 1, 1997, and this bill is enacted last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 630 (SB 1701) Hurtt. Criminal street gangs.

Existing law, the Street Terrorism Enforcement and Prevention Act, which is operative until January 1, 1997, provides, among other things, that any person who is convicted of a felony committed for the benefit of, at the direction of, or in association with any criminal street gang, with the specific intent to promote, further, or assist in any criminal conduct by gang members, shall, upon conviction of that felony, be punished by an additional consecutive term of 1, 2, or 3 years at the court's discretion. However, if the underlying felony is committed on the grounds of, or within 1,000 feet of, a public or private elementary, vocational, junior high, or high school, as specified, the additional term shall be 2, 3, or 4 years, at the court's discretion.

This bill would make a clarifying change to these provisions. The bill also would extend the operation of the Street Terrorism Enforcement and Prevention Act until January 1, 1998. This bill would impose a state-mandated local program by extending the operation of provisions that establish crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 631 (SB 1722) Killea. Corporate Securities Law of 1968.

Existing law provides for the certification of investment advisers, as defined, pursuant to the Corporate Securities Law of 1968, as specified.

This bill would, for those purposes, further define the term "investment adviser" to include any person who uses the title "financial planner" and who for compensation engages in specified activities, with specified exceptions.

Ch. 632 (SB 1757) Calderon. Hazardous waste: surface impoundments: hazardous substances: expedited remedial action.

(1) Existing law, the Hazardous Waste Treatment Act of 1995, prohibits from land disposal any hazardous waste restricted from land disposal pursuant to the federal Resource Conservation and Recovery Act of 1976 (RCRA), except as specified. Existing law provides that the treatment standards adopted pursuant to the federal act are the minimum treatment standards for that waste.

Under existing law, any hazardous waste land disposal restriction, treatment standard, or land disposal criteria adopted before January 1, 1996, that prohibited land disposal remains in effect only if specified conditions apply to that restriction, standard, or criteria. The Department of Toxic Substances Control is authorized to grant a variance from the restriction, treatment standard, or criteria if the hazardous waste has not been restricted or prohibited under RCRA or if the waste has been granted an equivalent or less stringent variance by the Administrator of the Environmental Protection Agency.

A person discharging a hazardous waste into a surface impoundment that was constructed before July 1, 1986, and for which an application for waste discharge requirements was submitted on or before September 1, 1986, is exempt from those previously adopted restrictions, standards, and criteria. Specified land treatment units are those restrictions, standards and criteria.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would additionally exempt such a surface impoundment and those land treatment facilities from the land disposal prohibitions for hazardous waste restricted from land disposal pursuant to RCRA and from the federal minimum treatment standards. The bill would also make conforming changes.

The bill would revise the requirements for the granting of a waiver from those restrictions and standards to instead prohibit the department from granting a variance for waste that is restricted or prohibited by the Environmental Protection Agency unless the waste has been granted a variance by the administrator and the department's variance does not permit less stringent management, or the Environmental Protection Agency has delegated the authority to grant variances to the department pursuant to RCRA.

(2) Under existing law, the California Expedited Remedial Action Reform Act of 1994, the term "response costs" is defined as including all costs incurred by the state or any responsible person in taking response action under the act, including costs incurred by any state agency in implementing and administering the act and costs incurred by the state in relation to any judicial review or arbitration.

The act requires the department, upon the request of a responsible person to have a site remediated pursuant to the act, to forward the request to the Site Designation Committee in the California Environmental Protection Agency, along with the department's recommendations, and authorizes the committee to select a site for remediation pursuant to the act only if the site meets specified requirements.

This bill would revise the definition of the term "response costs" for purposes of the act to specify that the costs of implementing and administering the act are subject to the limitations imposed by the bill. The bill would require response costs incurred by the state because of an arbitration proceeding to be paid as prescribed.

The bill would authorize the department and the Administrator of the Expedited Site Remediation Trust Fund, on behalf of the trust fund, to recover up to $1/30$ of response costs incurred by the state in implementing and administering the act, in addition to any other recovered response costs. The bill would require the department to specify in the Governor's Budget the amount of costs for which it will seek recovery, and to specify either in that document, or in a separate document submitted to the Joint Legislative Budget Committee, the methodology used in calculating those costs.

Ch. 633 (SB 1978) Haynes. Securities: Secretary of State.

The existing Bond and Undertaking Law generally regulates any bond or undertaking given as security pursuant to any statute of the state, except as specified in the law and to the extent any other statute prescribes a different or inconsistent rule. The law provides that a defined principal may, instead of giving a bond, make a prescribed deposit with a defined officer. It also provides that the deposit has the same force and effect, is treated the same, and is subject to the same conditions, liability, and statutory provisions, as the bond. If a bond is given other than in an action or proceeding and it comes to the attention of the officer that the bond is or has become insufficient, as specified, the officer may serve a specified order on the principal. The law requires, if a sufficient bond is not provided within 10 days after the order, the officer to make an order vacating any rights obtained by giving the original bond, including suspending or revoking any license or certificate for which the bond was given.

This bill would revise and recast various provisions of existing law regarding these bonds and deposits as the provisions specifically apply to invention developers, immigration consultants, credit services organizations, dance studios, discount buying organizations, employment agencies, employment counseling services, job listing services, nurses' registries, and auctioneers and auction companies. This bill would, among other things, specify in certain instances that the Secretary of State shall enforce the provisions of existing law governing the filing of bonds or deposits, require the Secretary of State to charge a filing fee to cover the costs of filing the bond or deposit, and require the Secretary of State to notify, on or before January 11, 1997, each assignor of a deposit pursuant to these provisions of the applicability of these provisions. It would also reduce the principal amount of the bond required for a discount buying organization from $30,000 to $20,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 634 (SB 2041) Hughes. School employees: retirement.

(1) The State Teachers' Retirement Law prescribes the rights and benefits of members of the State Teachers' Retirement System.

This bill would delete, redefine, and define various terms for purposes of determining rights and benefits under that system, including providing that the name of the system is the "State Teachers' Retirement System Defined Benefit Plan." The bill would make corresponding changes in some of the provisions of the law.

(2) Existing law prescribes the membership of the Teachers' Retirement Board.

This bill would provide that certain members of the board appointed by the Governor may be participants in the Cash Balance Plan or members of the system.

(3) The State Teachers' Retirement Law prescribes service and disability retirement benefits for members of the State Teachers' Retirement System.

This bill would require the Teachers' Retirement Board to consider, in determining whether a disabled member has good cause to fail to follow a medical treatment program, whether the medical condition has worsened. The bill would recast provisions relating to the reinstatement of a member who is retired for disability.

(4) The bill would delete a limitation upon part-time employment by academic employees of school and community college districts and the California State University who are older than 70 years of age.

(5) The State Teachers' Retirement Law defines various terms for purposes of administering the provisions of the State Teachers' Retirement System.

This bill would define additional terms and make other technical changes.

Ch. 635 (SB 2062) Rogers. Agricultural commissioners: enforcement programs: study.

Existing law provides for county agricultural commissioners with specified duties and responsibilities.

This bill would require the Secretary of Food and Agriculture to encourage representatives of the agricultural industry, consumer groups, county governments, county agricultural commissioners, the Department of Pesticide Regulation, and the Department of Food and Agriculture to conduct a study of specified content and to prepare and submit, on or before January 1, 1998, a report to the Legislature relating to the county agricultural commissioners. The bill also would authorize the study group, by consensus, to select a third party to facilitate meetings and prepare the report to the Legislature.

This bill would appropriate $50,000 to the secretary, as specified, for the purpose of providing funds for the study.

Ch. 636 (SB 2123) Kopp. Juries: access to juror information.

Existing law requires the court to seal its record of personal juror identifying information upon the recording of the jury's verdict in a criminal jury proceeding but provides that any person may petition the court for access to these records. If the petitioner makes a showing of good cause for the release of these records, the court is required to set the matter for hearing. If a hearing is set, the petitioner is required to provide notice of the petition and the time and place of the hearing at least 15 days prior to the date of the hearing to the parties in the criminal action.

This bill would require instead that the petitioner provide this notice at least 20 days prior to the hearing and would define "sealed" or "sealing" for the purposes of this provision. The bill also would make clarifying and conforming changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 637 (AB 444) Archie-Hudson. Postsecondary education: community colleges.

Existing law provides for the California Community Colleges and specifies the duties and responsibilities of the Board of Governors and the Chancellor of the California Community Colleges.

Existing law prescribes a method of calculating each community college district's revenue level for each fiscal year. Funding for credit and noncredit instruction is based generally on a formula based on the number of full-time equivalent students.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would prohibit community college districts from receiving full-time equivalent student (FTES) funding for activities that are fully funded through another source. The bill would require the Board of Governors of the California Community Colleges to adopt regulations to implement this provision.

The bill would also require the State Auditor to report to the Legislature by January 1, 2000, on the status of each community college district's compliance with the requirements of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 638 (AB 682) Tucker. Alcoholic beverages: tied-house restrictions.

Existing provisions of the Alcoholic Beverage Control Act known as "tied-house" restrictions generally prohibit a beer manufacturer or winegrower from having an ownership interest in an on-sale alcoholic beverage license, with certain limited exceptions.

This bill would permit a beer manufacturer or winegrower to provide sponsorship funds for or on behalf of a retail on-sale licensee who is the owner and manager of certain outdoor fairs, if certain conditions are met, as specified.

This bill would make it a misdemeanor for any beer manufacturer or winegrower, through coercion or other illegal means, to induce a beer or wine wholesaler to provide those sponsorship funds, thereby imposing a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 639 (AB 1260) Machado. State Board of Accountancy: licensees.

Under existing law, the State Board of Accountancy is authorized to prepare a printed register that contains specified information, including an alphabetical list of the names, certificate numbers, business connections and addresses of all certified public accountants whose permits are in full force and effect, an alphabetical list of the names of the partnerships of certified public accountants whose permits are in full force and effect, an alphabetical list of the names, permit numbers, business connections and addresses of all public accountants whose permits are in full force and effect, and an alphabetical list of the partnerships practicing public accountancy whose permits are in full force and effect. This register is required to be mailed to those persons listed, and to other persons or concerns as the board, in its discretion, determines is for the public welfare.

This bill would repeal this provision and instead require the board to compile and maintain, or have compiled and maintained on its behalf, a register of licensees that contains information that the board determines is necessary for the purposes for which the board was established. The bill would require the board to make the register available to any licensee and to the public.

Existing law provides that the board must prescribe basic requirements for continuing education.

This bill would specify the continuing education requirements for several categories of licensees.

Existing law provides that when any statute requires preparation of specified documents by certified public accountants, the requirement shall be construed to require preparation by public accountants or certified public accountants.

This bill would instead require preparation by a licensee or licensees with a valid permit to practice public accountancy.

Under existing law, a person who is not a certified public accountant or public accountant may serve as an employee of, or an assistant to, a certified public accountant or public accountant or partnership composed of certified public accountants or public accountants holding a permit to practice, if the employee or assistant works under the control and supervision of a certified public accountant, or a public accountant authorized to practice public accountancy, or a corporation permitted to continue its

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

practice under its corporate form and arrangement, and if the employee or assistant does not issue any statement over his or her name.

This bill would recast the above provision to authorize those persons to serve as employees of, or assistants to, a corporation composed of certified public accountants or public accountants under the above conditions, if under the control and supervision of a certified public accountant, or a public accountant authorized to practice accountancy.

Ch. 640 (AB 1357) Knowles. Tahoe Regional Planning Agency: state audit.

Under the Tahoe Regional Planning Compact, the Tahoe Regional Planning Agency, a bistate agency, has specified powers and duties pursuant to an interstate compact between California and Nevada with regard to the regulation of development in the Lake Tahoe region.

This bill would require the agency to reimburse the State Auditor for all reasonable costs associated with the State Auditor conducting a performance audit of the agency, pursuant to the Supplemental Report on a specified item of the Budget Act of 1996, and would make a statement of legislative intent in that regard.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 641 (AB 1360) Knowles. Health insurance.

Existing law imposes various requirements on health care service plans and insurers with respect to small employer coverage. Among other things, plans and insurance carriers that sell coverage to small employers are required to make coverage available to all small employers.

This bill would authorize a plan or carrier to enter into contractual agreements with qualified associations, as defined, under which the associations or their 3rd-party administrators may assume responsibility for performing specific administrative services, subject to various restrictions. These provisions would be repealed on January 1, 2003.

This bill would require the Department of Corporations to monitor compliance with the above provisions of the bill relating to health care service plans and would require a report to legislative committees with respect to the impact of any noncompliance on January 1, 2002.

Ch. 642 (AB 1387) Brulte. Records: criminal convictions.

(1) Existing law authorizes a court to take judicial notice of specified official acts and court records, and specifies the duties of court clerks.

This bill would enact the Criminal Convictions Record Act, authorizing a court to take judicial notice of enumerated computer-generated court records specified by the Judicial Council which relate to criminal convictions, if certified by the clerk of the recording court; would require clerks prospectively certify and submit these records for entry into a computer system operated by the Department of Justice that can be accessed by authorized agents of a district attorney or other state prosecuting agency, as specified; and would authorize the admission in evidence of these records to prove specified facts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 643 (AB 1723) Martinez. Child day care facilities: earthquake safety.

Existing law, the California Child Day Care Facilities Act, requires that day care centers be licensed by the State Department of Social Services. Existing regulations adopted under that act require that these facilities maintain a current, written disaster and mass casualty plan of action that is subject to review by the department and is required to include certain disaster procedures.

This bill would require each child day care center and family day care home to include an Earthquake Preparedness Checklist as an attachment to its disaster plan. The checklist would be permitted to include various procedures, as determined by the department. The checklist would be made accessible to the public at the child day care

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

center or family day care home, and the licensee would be permitted to select from the list those procedures, if any, the licensee chooses to use in the center or home. However, the bill would provide that the checklist is not a requirement for obtaining or maintaining a license for a child day care center or family day care home, nor is the licensing agency required to monitor or be responsible for enforcing any provision contained in the checklist or ensuring that the checklist is made accessible to the public. The bill would also provide that it shall not be construed to prevent the adoption or enforcement of earthquake safety standards for child day care facilities by local ordinance or to prevent the department from adopting or enforcing regulations on earthquake safety or making earthquake safety drills mandatory.

Ch. 644 (AB 1974) Friedman. Medicine: peer review procedures.

Existing law requires the chief of the medical staff or professional staff or other chief executive officer, medical director, or administrator of any peer review body and the chief executive officer or administrator of any licensed health care facility or clinic to file a report to the appropriate licensing authority in certain situations, including, but not limited to, when specified healing arts practitioners have been denied staff privileges or membership, or had their membership, staff privileges, or employment terminated, revoked, or restricted, for a medical disciplinary cause or reason.

This bill would require the Division of Medical Quality of the Medical Board of California to investigate the underlying circumstances of any report received pursuant to those provisions within 30 days.

Existing law provides for the establishment by the division of diversion evaluation committees, and specifies the duties of those committees. Existing law also authorizes a licensing agency to order a licentiate to be examined by one or more physicians and surgeons or psychologists whenever it appears the licentiate may be unable to practice his or her profession safely because of mental or physical illness.

This bill would require peer review bodies that review physicians and surgeons to report certain information regarding investigations of physicians and surgeons who may be suffering from a disabling mental or physical condition, within 15 days of initiating an investigation, to the diversion program of the Medical Board of California. This bill would require the diversion program administrator to monitor the peer review body's investigation and to notify the chief of enforcement of the division of the investigation in certain circumstances. This bill would make these provisions become operative January 1, 1997. This bill would also require the department to adopt regulations regarding the implementation of these provisions on or before January 1, 1997.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 645 (AB 1985) Speier. Driving under the influence: reckless driving.

(1) Under existing law, gross vehicular manslaughter while intoxicated is punishable by imprisonment in the state prison for 4, 6, or 10 years.

This bill would provide that a person convicted of gross vehicular manslaughter while intoxicated who has one or more prior convictions of vehicular manslaughter or multiple prior convictions of driving under the influence shall be punished by imprisonment in the state prison for a term of 15 years to life.

(2) Existing law, added by initiative statute, defines "serious felony" for purposes of prohibiting plea bargaining in specified cases, except under specified circumstances.

This bill would provide that a "serious felony" also includes the offenses of gross vehicular manslaughter while intoxicated, vehicular manslaughter under certain circumstances, fleeing a peace officer and causing serious bodily injury or death, reckless driving that causes great bodily injury, and driving under the influence, when any of those offenses involve the personal infliction of great bodily injury on any person other than an accomplice, or the personal use of a dangerous or deadly weapon. The bill would state the intent of the Legislature to codify specified case law that includes those crimes within the definition of "serious felony."

(3) Existing law requires the driver of any vehicle involved in an accident resulting in injury or death to another person to stop and exchange specified information with the other drivers involved. Under existing law, the punishment for a person who is convicted of willfully fleeing or attempting to elude a pursuing peace officer and thereby causing

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

death or serious bodily injury to any person, or for a person convicted of reckless driving which causes great bodily injury who previously has been convicted of reckless driving or driving under the influence, is imprisonment in a county jail for not more than one year or in the state prison, a fine, or both that fine and imprisonment.

This bill would provide that any person who flees the scene of the crime after committing any of the above offenses shall be punished, in addition to the punishment prescribed, by imprisonment in the state prison for an additional 5 years.

(4) This bill would incorporate additional changes in Section 191.5 of the Penal Code proposed by AB 2356, to be operative only if AB 2356 and this bill are both enacted and become effective on or before January 1, 1997, and this bill is enacted last.

(5) Because the bill would increase the penalties for several crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 646 (AB 2097) Battin. Career Criminals.

(1) Under existing law, an individual may be the subject of career criminal apprehension efforts if he or she is under investigation for the commission or attempted commission of one or more of several specified felonies and either has committed 3 or more separate felony offenses not arising out of the same transaction or has been convicted during the preceding 10 years of one or more of certain other felonies.

In addition, under existing law, a person is required to be the subject of career criminal prosecution efforts if he or she is under arrest for the commission or attempted commission of one or more of several specified felonies and either is being prosecuted for 3 or more separate offenses involving one of those felonies not arising out of the same transaction or has been convicted during the preceding 10 years of one or more of certain other felonies.

This bill would add several felonies to the list of felonies that subject a person to career criminal apprehension and prosecution efforts.

(2) Under existing law, the Career Criminal Apprehension Program is a program of financial and technical assistance for district attorneys' offices that is administered by the Office of Criminal Justice Planning. The program becomes inoperative on July 1, 1996, and is repealed as of January 1, 1997.

This bill would repeal that repeal date, thereby extending indefinitely that program.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 647 (AB 2202) Baca. Household hazardous products or materials: reusability.

(1) Existing hazardous waste control laws require a public agency, or its contractor, that intends to operate a household hazardous waste collection facility, to submit specified information to the Department of Toxic Substances Control. The department is authorized to allow any household hazardous waste collection facility to accept hazardous waste from conditionally exempt small quantity generators. The department is required to develop a separate and distinct regulatory structure for the permitting of permanent household hazardous waste facilities that conduct specified activities.

Existing law, the California Integrated Waste Management Act of 1989, provides for the management of household hazardous waste and requires the California Integrated Waste Management Board to prepare guidelines and a state policy to guide the effort of local agencies in providing household hazardous waste collection, recycling, and disposal programs.

This bill would define terms and would authorize a public agency to conduct a materials exchange as part of a household hazardous waste collection program, if the public agency determines which reusable household hazardous products or materials, as defined, are suitable for distribution in accordance with a quality assurance plan, as defined, prepared by the public agency.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Under the act, a city, county, or local agency operating a household hazardous waste program in accordance with the act is immune from liability for specified damages or injuries, except as specified.

This bill would revise the exemption from liability for household hazardous waste programs to additionally require the program to be operating in accordance with specified provisions of the hazardous waste control laws.

(3) The bill would make related legislative findings and declarations.

Ch. 648 (AB 2279) Alpert. Credit services organization.

Existing law regulates credit services organizations. Existing law defines a credit services organization to be a person who sells, provides, or performs specified credit services for buyers, such as improving a buyer's credit record or obtaining a loan for a buyer. Existing law provides that the definition of a credit services organization does not include persons engaged in certain professions, including licensed prorators, real estate brokers, and attorneys. In addition, existing law provides that the definition of a credit services organization does not include any person organized, chartered, or holding a license or an authorization certificate to make loans or extensions of credit, as specified.

The bill would revise and recast that definition with respect to licensed real estate brokers and persons authorized, as specified, to make loans or extensions of credit, who are subject to regulation and supervision by a state or federal agency or official with respect to the making of those loans or extensions of credit. The bill also would make a related change.

Ch. 649 (AB 2324) Bates. Real property: University of California: State Department of Health Services.

Existing law authorizes the issuance of revenue bonds for the acquisition and construction or remodeling of office and laboratory facilities of the State Department of Health Services in the City of Richmond.

Existing law requires the department to exchange a parcel of real property located in Berkeley and owned by the department, for a parcel located in Richmond and owned by the Regents of the University of California, subject to various conditions, including, but not limited to, the assent of the regents.

Existing law authorizes the department to acquire alternative facilities in Richmond and either to retain its Berkeley property or to sell it to a private person or entity if the regents do not preliminarily approve the exchange project by June 1, 1995.

This bill would repeal the land exchange provisions described above and would declare the intent of the Legislature that the site be conveyed to the university pursuant to a process mutually agreed to by the department, the Department of General Services, and the regents. It would delete the requirement that each agency shall be responsible for ensuring the property they exchange is free of contamination, and would require the Department of General Services, on behalf of the State Department of Health Services, prior to the vacating of that property to offer to convey title to the property to the university, within a prescribed time period and subject to various reporting requirements concerning contamination of the soil or groundwater and the status of the university's plans for use of the property.

The bill would prohibit the Department of General Services from offering the property to any other entity during the 24 months following the date of the offer to the university. It would authorize the property to be disposed of as surplus property if no agreement is reached between the Department of General Services and the university during the 24-month period.

Existing law requires the department to sell certain Berkeley property to a private entity at the time that the new Richmond laboratory and office facility is occupied.

This bill would delete this provision.

Ch. 650 (AB 2417) Bustamante. Vehicles: farm vehicles: identification plates.

(1) Existing law requires a person, other than a manufacturer or dealer, as an exemption to registration, to obtain an identification plate for specified vehicles that are owned by a farmer and used in specified farming operations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would create an additional category of vehicles subject to the exemption to registration and the identification plate requirement by including farmer-owned, rented, or leased farm-trailers, if used in specified operations. Because a violation of the provision requiring identification plates is a crime, this bill would expand the scope of the crime.

(2) Existing law defines a "farm trailer" as a trailer or semitrailer owned and operated by a farmer in the conduct of agricultural operations, and used exclusively to transport agricultural products upon the highway to the point of first handling and return.

This bill would expand that definition to include a trailer or semitrailer with a gross vehicle weight rating of 6,000 pounds or less that is owned, rented, or leased by a farmer, manufactured and in use prior to January 1, 1997, and operated in connection with agricultural operations under specified conditions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 651 (AB 2430) Hauser. Public utilities: propane.

Existing law requires the Public Utilities Commission to undertake a propane safety inspection and enforcement program for propane distribution systems to ensure compliance with the federal pipeline standards by propane operators within the state.

Existing law requires the State Board of Equalization and the commission to establish a uniform billing surcharge designed to cover the commission's cost in implementing these provisions, with all surcharge fees except those required by the board for administering the trust fund to be deposited by the commission in the Public Utilities Commission Utilities Reimbursement Account in the General Fund, to be used, upon appropriation by the Legislature, for these purposes.

This bill would remove the provisions relating to the State Board of Equalization.

The bill would subject any distribution system to the enforcement program if any portion of the system is located in a public place, and would establish a maximum surcharge designed to partially cover the commission's costs of implementing the program.

This bill would provide that these provisions as further revised, shall not be implemented unless sufficient federal funding has been annually appropriated to the Public Utilities Commission to ensure that only those charges specifically fixed by law, and no additional charges, will be directly or indirectly passed on to California consumers.

Ch. 652 (AB 2512) Speier. False claims actions: University of California.

Existing law authorizes the Attorney General to investigate, and bring a civil action for, false claims made against the state or a political subdivision, as defined, if any portion of the money, property, or services issued from or was provided by the state, and authorizes a prosecuting authority of a political subdivision to intervene in the action, or investigate and bring an action, if the claim involves funds of the political subdivision.

This bill would define the University of California as a political subdivision for these purposes, and would additionally authorize the General Counsel of the University of California to intervene in an action brought by the Attorney General or a private party, or investigate and bring an action as a prosecuting authority, under these provisions if it is determined that the claim involves the University of California.

Ch. 653 (AB 2605) Bordonaro. Animals and cattle.

(1) Existing provisions of the Civil Code specify a procedure for the disposition of personal property that remains on the premises after a tenancy has terminated and the premises have been vacated by the tenant.

This bill would exempt from these provisions the disposition of an animal to which certain provisions of the Food and Agricultural Code apply.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law provides for the testing of bovine animals for bovine tuberculosis and requires every bovine animal that reacts positively to a tuberculin test (reactor) to be permanently branded on the left jaw.

This bill, among other things, would require every reactor to be identified, rather than branded, pursuant to regulations of the Department of Food and Agriculture and the United States Department of Agriculture.

The bill also would make other conforming changes.

(3) Existing law requires indemnification for any bovine animal that was vaccinated for brucellosis after reaching 12 months of age and that was part of an official whole herd adult vaccination plan approved by the Secretary of Food and Agriculture. For these purposes, existing law defines "official whole herd adult vaccination plan" as a plan, approved by the secretary, whereby all female cattle exceeding 12 months of age are vaccinated against brucellosis using a reduced dose of strain 19 vaccine and are identified with the appropriate tattoo symbols in the right ear.

This bill, instead, would define "official whole herd adult vaccination plan" as a plan, approved by the secretary, whereby all female cattle exceeding 12 months of age are vaccinated against brucellosis using a vaccine, as specified, and are identified as required by the department.

(4) Certain provisions of the Food and Agricultural Code provide for the impounding of bovine animals, horses, mules, sheep, swine, or burros whose owners are unknown or cannot be located. Under existing law, if no person appears and claims any of these impounded animals within 5 days, the poundkeeper or other pound officer is required to notify the secretary.

This bill, instead, would require the poundkeeper or other pound officer to immediately notify the secretary upon the impounding of any of these animals.

(5) Existing law requires any person who takes up an estray animal to confine it in a secure place and within 5 days file with the secretary a notice containing certain information regarding the animal.

This bill, instead, would require the person to immediately file that notice with the secretary.

(6) Under the provisions of existing law, as specified in (5) above, the person who takes up an estray animal, the "taker-up," is entitled to a per-day payment for the keeping and care of the animal. Under existing law, the taker-up is not paid for feed and care for more than 5 days prior to the date that the notice, as specified in (5) above, is required to be made to the secretary.

This bill would repeal this latter provision limiting the amount that may be paid to the taker-up for the feed and care of the estray animal prior to the date that the notice is required to be made to the secretary. Because the funds in the Department of Food and Agriculture Fund are continuously appropriated for purposes of these provisions, this bill would make an appropriation by deleting this limitation.

(7) Existing law includes provisions governing cattle protection and identification, and provides that a violation of that law is generally a misdemeanor, punishable as specified.

Existing law authorizes the branding of cattle, as specified, and provides that a cattle record brand may be placed upon either loin in front of the hip and behind the ribs or on the right jaw of the animal.

This bill would delete the provisions specified above that a cattle record brand may be placed on the right jaw of the animal, thereby expanding the scope of an existing crime and imposing a state-mandated local program.

(8) Existing law generally requires cattle to be inspected prior to movement or branding, whichever occurs first, when cattle are sold or ownership is transferred.

This bill, instead, would require cattle to be inspected whenever cattle are sold or ownership is transferred.

(9) Existing law, with limited exceptions, requires cattle that are shipped directly from a registered feedlot in this state for immediate slaughter outside this state to be brand inspected and a brand certificate to be issued.

This bill would repeal this provision.

(10) Existing law prohibits a person from buying, selling, or accepting any animal, unless the seller or donor gives, and the buyer or donee receives, at the time of the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

delivery of the animal, a written bill of sale or written instrument from the owner that gives certain information concerning the animal. Existing law also requires the bill of sale to be made out in triplicate with one copy to be mailed to the secretary within 30 days of the date of the sale.

This bill would repeal this latter provision requiring the bill of sale to be made out in triplicate with one copy to be mailed to the secretary within 30 days of the date of sale.

(11) The bill also would make technical, nonsubstantive changes by, among other things, changing obsolete references from the Director of Food and Agriculture to the Secretary of Food and Agriculture.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 654 (AB 2726) Woods. Pupils: mental health services.

Existing law makes the State Department of Mental Health or any community mental health service designated by the department for the provision of mental health services when required in a child's individualized education program.

This bill would establish procedures governing referrals of pupils to community mental health services and the responsibilities of those entities.

This bill would specify that, commencing July 1, 1997, the fiscal and program responsibilities of community mental health services shall be the same regardless of the location of the placement.

The bill would also require that the Superintendent of Public Instruction and the Secretary of Health and Welfare ensure that the State Department of Education and the State Department of Mental Health, by January 1, 1998, enter into a specified interagency agreement, and would express legislative intent that the designated local agencies of these departments enter into interagency agreements.

By imposing requirements upon community mental health services, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 655 (AB 2741) Ackerman. County real property: sale or lease.

(1) Existing law prescribes various procedures for a county to sell or lease county property but permits the board of supervisors to sell or lease property in specified circumstances without compliance with those procedures by a $^4/_5$ vote of the board.

This bill would additionally authorize the Board of Supervisors of Orange County, by a $^4/_5$ vote, to enter into a lease, concession, or managerial contract involving the leasing or subleasing of all or any part of a county data-processing center without compliance with those procedures.

This bill would delete the minimum price or rental as an item required to be in the resolution.

(2) Existing law, until December 31, 1997, authorizes the Orange County Board of Supervisors to sell or lease all or any part of county-owned property without compliance with specified laws governing the sale or lease of county property, subject to certain conditions, including, among other things, that county-owned property not be sold or leased for less than fair market value.

This bill would extend the repeal date governing these provisions to January 1, 2000, and would delete the requirement that fair market value be received as a condition of selling or leasing county-owned property under this specific procedure.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 656 (AB 2883) Boland. Minors: medical care and counseling.

Under existing law, a minor who is 12 years of age or older may consent to medical care and counseling relating to the diagnosis and treatment of a drug or alcohol related problem, as specified.

This bill would provide that it is the intent of the Legislature that the state shall respect the right of a parent or legal guardian to seek medical care and counseling for a drug or alcohol related problem of a minor child when the child does not consent to the medical care and counseling, and nothing in this section shall be construed to restrict or eliminate this right.

The bill would also provide that in cases where a parent or legal guardian has sought medical care and counseling for a drug or alcohol related problem of a minor child, the physician shall disclose medical information concerning such care to the minor's parents or legal guardian upon their request, even if the minor child does not consent to disclosure, without liability for such disclosure.

Ch. 657 (AB 2904) Hawkins. Real property: broker and salesperson licenses.

Existing law specifies various fees for licensees of the Department of Real Estate, including fees for restricted brokers and restricted salespersons.

This bill would instead provide that the fees for restricted brokers and restricted salespersons shall be the same as fees for unrestricted brokers and unrestricted salespersons, respectively. The bill would also repeal alternative fee provisions that were to have become operative on January 1, 1998, or as otherwise specified.

Ch. 658 (AB 2970) Olberg. Nuisance: controlled substances.

(1) Existing law defines any thing which is injurious to health as a nuisance.

This bill would specifically provide that this definition includes, but is not limited to, the illegal sale of controlled substances.

(2) Existing law defines unlawful detainer by a tenant or subtenant to include the commission of a nuisance upon the premises or using the premises for an unlawful purpose.

This bill would specifically provide that a person who illegally sells a controlled substance upon the premises or uses the premises to further that purpose shall be deemed to have committed a nuisance upon the premises.

Ch. 659 (AB 3036) Mazzoni. Water resources: decisions and orders.

(1) Existing law allows any party aggrieved by a prescribed final order issued by the State Water Resources Control Board in connection with an unauthorized diversion or use of water to obtain review of the order in superior court by filing a petition for writ of mandate within 30 days following the issuance of the order.

Existing law authorizes the state board to order a reconsideration of all or part of a decision or order on the state board's own motion or on petition of any person interested in any application, permit, or license to appropriate water that is affected by the decision or order. Existing law allows any person interested in any application to file, within 30 days after final state board action, a petition for writ of mandate in superior court in the county in which the applicant seeks to divert water, to inquire into the validity of the action.

Existing law authorizes the state board, under certain circumstances, to reserve jurisdiction to revise conditions set forth in a permit and specifies that a decision or order reserving jurisdiction, and a decision or order in the exercise of reserved jurisdiction, are subject to reconsideration by the state board and judicial review pursuant to prescribed provisions of law.

Existing law deems the findings of the state board concerning the revocation of a permit to be prima facie correct until set aside by a court. Existing law allows a holder of a permit that is revoked to file a petition for writ of mandate in the superior court of the county in which the proposed diversion of water is located, to inquire into the validity of the state board order revoking the permit, and declares that the failure to seek reconsideration before the state board does not affect that right to petition. Existing law declares that all rights of the permittee under the permit cease unless the petition for the writ is filed within the time specified and declares that the priority of right of any

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

permittee who files the petition for the writ continues under the permit until the court renders a final judgment with regard to the validity of that board order. Existing law prohibits the permittee from using any of the water, the use of which is subject to the permit, unless the court sets aside the order revoking the permit.

Existing law allows a permittee, to whom the state board has issued a license for an amount of water that is less than that specified in the permit, to file a petition for writ of mandate within 30 days after the issuance of the license, to inquire into the validity of the state board order and declares that, unless the petition is filed within the time specified, all rights of the permittee, other than those set forth in the license, shall lapse. Existing law declares that the rights of the permittee who files the petition for a writ continue under the permit until the court judgment becomes final and requires the permittee to use water in accordance with the license until the court sets aside or modifies the board order. Existing law deems the findings of the state board with regard to the revocation of a license, until modified or set aside by a court, to be prima facie correct. Existing law requires any petition for a writ of mandate that inquires into the validity of a state board order revoking a license to be filed within 30 days after the service of notice of revocation.

Existing law requires a petition for writ of mandate that inquires into the validity of a state board order granting or refusing to grant a request to change the point of diversion or purpose or place of use to be filed within 30 days after service of a copy of the order. Existing law declares that nothing in specified provisions of law prevents the filing of a writ of mandate to inquire into the validity of a finding or state board order made in connection with the granting or refusing to grant a request to temporarily change the point of diversion or purpose or place of use due to a transfer of water and requires the writ to be filed within 30 days after final state board action.

Existing law allows any aggrieved person to file, pursuant to prescribed provisions of law, a petition for writ of mandate for review of any preliminary cease and desist order that the state board issues in connection with the violation of a condition set forth in that person's permit or license.

Existing law authorizes the state board to order a reconsideration of all or part of a decision or order made pursuant to provisions governing the appropriation of water by the Department of Water Resources, on its own motion or on the petition of any person interested in the application for appropriation, as prescribed.

This bill would recast those provisions by prescribing procedures that govern the reconsideration and judicial review of certain state board decisions or orders concerning the determination of water rights, the appropriation of water, the unreasonable use of water, water reuse, and the public trust doctrine. The bill would authorize the state board to order a reconsideration of a decision or order on the state board's own motion or on the filing of a petition of any interested person not later than 30 days from the date on which the state board adopts the decision or order, in accordance with prescribed procedures.

The bill would allow any party aggrieved by any decision or order to file, not later than 30 days from the date of final state board action, a petition for writ of mandate for review of the decision or order. The bill would declare that the failure to seek reconsideration before the state board, with a certain exception, does not affect the right to file the writ. The bill would extend the time period within which a person may petition for the writ if that person seeks reconsideration of the decision or order by the state board. The bill would require the judicial proceedings to be governed by a prescribed provision of the Code of Civil Procedure, except as otherwise specified. The bill would require the court to exercise its independent judgment on the evidence in certain cases, as prescribed, and would prohibit a court from reviewing a decision or order of the state board if no aggrieved party petitions for the writ within the time allowed. The bill would make related changes.

(2) Existing law authorizes any aggrieved person to file a petition for writ of mandate with the superior court to review a decision or order issued by the state board under a specified provision of law, within 30 days after service of a copy of the decision or order. Existing law provides that the failure to file that petition does not prevent a party from challenging the validity of the decision or order of a California regional water quality control board or the state board in any judicial proceeding to enforce the decision or

NOTE: Superior numbers appear as a separate section at the end of the digests.

order or for other civil remedies. Existing law requires the court to exercise its independent judgment on the evidence, as prescribed.

This bill would, instead, allow an aggrieved party, not later than 30 days from the date of a decision or order issued by the state board under Division 7 (commencing with Section 13000) of the Water Code (other than a specified decision or order), to file with the superior court a petition for writ of mandate for review of the decision or order. The bill would provide that any party aggrieved by a final decision or order of a regional board for which the state board denies review may obtain review of the decision or order of the regional board in the superior court by filing in the court a petition for writ of mandate not later than 30 days from the date on which the state board denies review. The bill would provide that a decision or order of the state board or regional board is not subject to court review if no aggrieved party petitions for writ of mandate within the time allowed. The bill would require the court to exercise its independent judgment on the evidence in certain cases, as prescribed.

(3) Existing law provides that specified orders imposing administrative civil liability become final upon issuance and requires payment within 30 days of the issuance of the order. Existing law allows aggrieved parties to petition the state board for review of those specified orders in accordance with prescribed provisions and allows parties aggrieved by those final orders of the state board to obtain review of those orders by filing a petition for writ of mandate in the superior court within 30 days following the issuance of the state board order.

This bill would provide that those orders imposing administrative civil liability are not subject to review by an agency or court except pursuant to specified provisions that authorize an aggrieved person to petition the state board to review prescribed action or inaction by a regional board and the superior court for a review of a final board decision or order. The bill would extend the time for payment in connection with the order during the period in which a person seeks state board review of the order.

(4) Existing law requires the Attorney General, upon request of the state board, to petition the superior court for the issuance of an injunction in the event of noncompliance with specified cease and desist orders and requires the evidence before the court to consist of evidence, as prescribed. Existing law authorizes the court to stay the operation of a specified cease and desist order if it is not against the public interest.

This bill would delete those provisions that require the evidence before the court to consist of prescribed evidence. The bill would delete that provision relating to the authority of the court to stay the operation of that specified order.

(5) This bill would provide that its provisions do not apply to any proceeding for the judicial review of a decision or order of the state board that is pending on December 31, 1996, and would require the applicable existing law in effect on that date to continue to apply to such a proceeding.

Ch. 660 (AB 3170) Martinez. Crimes: theft: vehicles.

(1) Existing law makes it a misdemeanor for any person to take any automobile, bicycle, motorcycle, or other vehicle or motorboat or vessel, without the permission of the owner, for temporary use or operation.

This bill would delete the reference to any automobile, motorcycle, or other vehicle in this provision. The bill would state that the legislative intent behind this change is to clarify and streamline existing law by deleting duplicative provisions and that this change shall not be construed as evidencing a legislative intent to eliminate a crime. Because this bill would increase the penalty for a crime, it would impose a state-mandated local program.

(2) With respect to a defendant previously convicted of felony vehicle theft or felony grand theft who is subsequently convicted of any of those offenses, existing law, scheduled to be operative on and after January 1, 1997, provides that the defendant shall be punished by imprisonment in the state prison for 2, 3, or 4 years.

This bill would clarify the application of this provision.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 661 (AB 3188) House. Psychology.

(1) Existing law provides that it shall not be construed to restrict or prevent activities of a psychological nature on the part of persons who are salaried employees of accredited or approved academic institutions, or public schools, provided that they meet certain criteria.

This bill would require that these salaried employees of any school district have a valid and current credential as a school psychologist issued by the Commission on Teacher Credentialing or act under the supervision of the appropriately credentialed school psychologist, in order to administer psychological testing to, or engage in activities of a psychological nature, as described, with pupils.

The bill would also require the person conducting a test or other assessment to be qualified in accordance with the requirements for the use of the test or assessment, as specified, and to follow ethical requirements, as specified.

(2) Existing law requires that before any action is taken with respect to the initial placement of an individual with exceptional needs in special education instruction, an individual assessment of the pupil's educational needs shall be conducted, by qualified persons, in accordance with prescribed requirements. These requirements include that the tests and other assessment materials be administered by trained personnel in conformance with the instructions provided by the producer of such tests and other assessment materials, except that individually administered tests of intellectual or emotional functioning shall be administered by a psychometrist or credentialed school psychologist where available.

This bill would require instead that the individually administered tests of intellectual or emotional functioning be administered by a credentialed school psychologist.

(3) Existing law requires the Commission on Teacher Credentialing to award credentials for school services for positions including, among others, school psychologists and to establish standards and requirements for this type of credential.

This bill would require the Commission on Teacher Credentialing to consider adopting regulations to enhance the requirements of candidates for a school psychologist credential and to report on its considerations to the appropriate legislative committees on or before July 30, 1997.

Ch. 662 (AB 3502) Weggeland. State property: lease: City of Norco.

Existing law authorizes the Director of General Services to let, with the consent of the state agency concerned, for a period not to exceed 5 years, any real property that belongs to the state if the letting is not expressly prohibited by law and the director deems the letting is in the best interest of the state.

This bill would authorize the Director of General Services, with the consent of the federal government and the Department of Corrections, to lease for a term not to exceed 25 years, to the City of Norco, specified property of the state that is retained primarily to provide a well field for the provision of a potable water supply to the California Rehabilitation Center, subject to various conditions, for the purposes of developing and maintaining a water treatment system for public health purposes. This bill would permit the renewal of the lease upon its expiration for a term not to exceed 20 years.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 663 (AB 3503) Weggeland. March Joint Powers Authority: planning authority.

Pursuant to existing law, the public entity known as the March Joint Powers Authority was created to jointly exercise any power common to its members, which include the County of Riverside, and the Cities of Riverside, Moreno Valley, and Perris. Under existing law, the authority is authorized to perform various functions, including the establishment of the March Joint Powers Redevelopment Agency, which is, in turn, responsible for establishment of the March Air Force Base Redevelopment Project Area.

This bill would find and declare that (1) the Joint Exercise of Powers Act allows 2 or more public agencies to enter into agreements to exercise their common powers; (2)

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified provisions of existing law allow 2 or more cities and counties to create joint area planning agencies to exercise the powers and perform the duties set forth in the Planning and Zoning Law; (3) the County of Riverside, and the Cities of Moreno Valley, Perris, and Riverside, have formed the March Joint Powers Authority to coordinate and promote the reuse of the March Air Force Base and adjacent territory; (4) existing law allows the March Joint Powers Authority to exercise the powers and perform the duties of the legislative body or any other planning agency of a city or county, or both, under the Planning and Zoning Law, if authorized by the governing joint powers agreement; and (5) the March Joint Powers Authority may exercise the powers and perform the duties set forth in the Planning and Zoning Law within the territory specified in the governing joint powers agreement.

The bill also would state that the findings and declarations contained in this bill would not constitute a change in, but are declaratory of, existing law and that the bill shall not affect the authority of a local agency, under provisions of law as they read on the effective date of the enactment of this bill, to perform any function set forth in the bill.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances with respect to circumstances applicable to the March Joint Powers Authority, as regards the duties of the authority in connection with the transfer of the real and other property comprising the military reservation known as March Air Force Base, a statute of general applicability within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 664 (SB 987) Polanco. Occupational safety and health.

Existing law requires employers to obtain a permit from the Division of Occupational Safety and Health prior to initiating any practices, work, method, operation, or process of employment that involves certain dangerous conditions, including, in part, construction or demolition of any building, structure, falsework, or scaffold higher than a three-story building.

This bill would exempt from that permit requirement any construction or demolition of motion picture, television, or theater sets, as specified. However, on and after January 1, 2000, the bill would require an employer with a total of 3 or more serious injuries, fatalities, or serious violations in any prior calendar year related to the construction or demolition of these stages or sets over 36 feet in height occurring at 3 or more separate locations, to thereafter obtain from the division an annual permit to construct or dismantle these stages or sets more than three stories or the equivalent height. Since violation of this requirement would be a misdemeanor, the bill would impose a state-mandated local program. The bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 665 (SB 1576) Calderon. Motor vehicles: conditional sale contracts.

Existing law requires specified conditional sale contracts for the sale of a motor vehicle to contain specified disclosures and limits the amount of the disclosed finance charge.

This bill would revise these limits, as specified, and provide that the limits do not apply to contracts in which the finance charge or a portion thereof is determined by the simple-interest basis and the amount financed as specified is more than $1,650.

Ch. 666 (SB 610) Leonard. Consumer contracts: cable television.

The existing Video Customer Service Act regulates various aspects of video provider services, as specified. The act defines a video provider to include a provider of cable television. The act requires every video provider to allow every residential customer who directly pays his or her bill at least 15 days from the date the bill is mailed to pay the listed

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

charges, unless otherwise agreed to, as specified. It also prohibits assessment of a late fee any earlier than the 22nd day after the bill was mailed.

This bill would, notwithstanding these provisions of existing law, prohibit fees for delinquent payments pursuant to the sale or lease of cable television services on or after January 1, 1997, unless specified requirements are met.

Ch. 667 (SB 1904) Committee on Agriculture and Water Resources. Water.

(1) Existing law authorizes the board of supervisors of a county to dispose of recycled water and any byproducts of that recycling in specified ways, including sale to certain water districts or any other district of which the board of supervisors is the ex officio governing body.

The bill would expand that authorization to include sale to any public entity or water corporation.

(2) Existing property tax law requires county assessors to disclose, furnish abstracts of, and provide access to, all information in their offices, including nonpublic information in their files, to various specified persons and agencies.

This bill would impose a state-mandated local program by requiring assessors to additionally provide access to this information to the Department of Water Resources.

(3) Existing law provides that the owner of certain water impoundment structures constructed prior to January 1, 1969, the capacity of which does not exceed 10 acre feet on January 1, 1975, has a valid water right with a priority as of the date of construction of the structure for the purpose of livestock watering and other prescribed incidental uses. Existing law provides that any person claiming such a water right, who fails to file a claim of water right on or before December 31, 1977, has a water right priority as of the date of filing.

This bill would provide, instead, that the owner has a valid water right if that person files a claim of water right with the State Water Resources Control Board not later than December 31, 1997. The bill would provide that any person who has that water right, who files a claim of water right with the board on or before December 31, 1977, has a water right priority as of the date of construction of the structure and any person who has that water right, who files a claim of water right with the board after December 31, 1977, and before January 1, 1998, has a water right priority as of the date of filing. The bill would require the board, if the claimant establishes the water right, to issue a certificate of the validity of the water right, and would authorize the board to revoke that certificate upon a finding that the water has ceased to be used for those prescribed uses.

(4) Existing law authorizes the board to delegate to any employee of the board, including the members of the board, certain functions relating to the issuance of temporary permits to divert and use water and temporary change orders with regard to a point of diversion or place or purpose of use. Existing law requires the board, not later than 30 days after the issuance of those permits or orders by an employee, to review and validate those permits or orders.

This bill would, instead, authorize the delegation of those functions to any officer or employee of the board.

(5) Existing law generally requires each person who, after December 31, 1965, diverts water to file with the board, prior to July 1 of each year, a statement relating to the diversion and use of the water during the previous year and requires the person to file supplemental statements, at prescribed 3-year intervals, that specify the amount of water diverted, the rate of diversion by months, and any change in other information included in the preceding statement.

This bill would require that person to file a supplemental statement with the board if there is a change in the name or address of the person diverting the water.

(6) Existing law makes the making of any willful misstatement in connection with the preparation of a statement of water diversion and use a misdemeanor.

This bill would subject any person who makes such a material misstatement to civil liability, imposed administratively, in an amount that does not exceed $500 for each violation, as prescribed. The bill would make a related change.

(7) Existing law, until January 1, 1997, authorizes the Contra Costa Water District to issue revenue bonds in accordance with specified law for the purpose of financing the acquisition of land and land rights and the construction, improvement, or acquisition of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

any facilities necessary or convenient for the storage, transmission, distribution, or treatment of water for beneficial use, as prescribed.

This bill would extend that authorization until January 1, 2000.

(8) Existing law governing California water districts provides for the apportionment of water to holders of title to land, as prescribed.

This bill would authorize a district, as an alternative, and in addition, to those methods of apportionment, to enter into long-term water service contracts with holders of title to land, and authorize those contracts to provide that all water charges provided for in those contracts are, when due, a lien on the land and may be collected and enforced, as specified.

(9) The Sacramento Area Flood Control Agency Act requires the board of the Sacramento Area Flood Control Agency, if a certain special capital assessment is prepaid and conditionally satisfied as to a piece of land, to prepare and record in the office of the county recorder of the county in which the land is located, a notice of conditional cancellation of assessment lien as to that parcel. The act also requires the county recorder to mail that original notice of conditional cancellation of assessment lien to the owner of the property after recording the document.

This bill would repeal those provisions of the act.

(10) Under the Clean Water Bond Law of 1984, the Water Conservation and Water Quality Bond Law of 1986, and the Water Conservation Bond Law of 1988, the Department of Water Resources may make loans to local agencies, upon approval of the Legislature by statute, for prescribed purposes.

This bill would make an appropriation by authorizing loans from the Water Conservation Account in the 1984 State Clean Water Bond Fund, the Water Conservation and Groundwater Recharge Account in the 1986 Water Conservation and Water Quality Bond Fund, and the 1988 Water Conservation Fund to specified entities for specified projects in accordance with those bond laws.

(11) The California Safe Drinking Water Bond Law of 1988 permits bond proceeds in the California Safe Drinking Water Fund to be used for a grant program with grants provided to prescribed entities, subject to specific approval of the Legislature.

This bill would make an appropriation by authorizing grants from the fund to specified entities for the purposes of financing specified projects to identify alternatives for system improvements in accordance with that bond law.

(12) The bill would make various conforming changes.

(13) This bill would incorporate additional changes in Section 408 of the Revenue and Taxation Code, proposed by AB 2682 and AB 3351, to be operative only if this bill and either or both AB 2682 and AB 3351 are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(15) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 668 (AB 113) W. Murray. Firearms: curios or relics.

(1) Existing law makes the offense of carrying a concealed firearm within any vehicle or upon the person inapplicable to certain acts, organizations, or individuals, including the possession or transportation of firearms as merchandise by a person who is engaged in specified commercial activity, duly authorized military or civil organizations, members of any target shooting club or organization, and licensed hunters or fishermen while engaged in hunting or fishing.

This bill would recast these provisions.

(2) Existing law prohibits, with certain exceptions, the sale, lease, or transfer of firearms without a license.

This bill would include among the exceptions the delivery of a pistol, revolver, or other firearm capable of being concealed upon the person that is a curio or relic, as defined, by a person licensed as a collector under federal law with a state certificate of eligibility issued to a dealer. The bill would make related changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Under existing law, the exceptions indicated in (2) above include the sale, delivery, or transfer of any firearm by a person acting pursuant to "operation of law," as defined.

This bill would include in this definition firearms received from a local agency by the family of a police officer or deputy sheriff who is killed in the line of duty.

(4) Existing law requires every firearms dealer to keep a register in which specified information is to be entered. A violation of these provisions is a misdemeanor.

This bill would require the register to include, with regard to a pistol, revolver, or other firearm capable of being concealed upon the person, a California Firearms Dealer number, a purchaser's basic firearms safety certificate number, and any curio and relic waiting period exemption and, with regard to a firearm other than a pistol, revolver, or other firearm capable of being concealed upon the person, a California Firearms Dealer number. Because this bill would expand the scope of a crime, it would impose a state-mandated local program.

(5) Existing law prescribes a waiting period for the delivery of firearms.

This bill would exempt from this waiting period, the sale, delivery, loan, or transfer of a pistol, revolver, or other firearm capable of being concealed upon the person, which is a curio or relic, by a dealer or through a law enforcement agency to a person who is licensed as a collector.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would incorporate additional changes in Sections 12077 and 12078 of the Penal Code enacted by SB 671 (Ch. 128, Stats. 1996).

Ch. 669 (AB 772) Aguiar. Department of Transportation: federal funds.

Existing law authorizes the Department of Transportation to coordinate applications, or to act as an applicant, for grants of federal funds in order to provide mass transit services to meet the special needs of elderly and disabled persons pursuant to a federal program that allocates funds to certain private nonprofit corporations and associations.

This bill would recast that provision to continue to provide the department with that authorization in conformance with federal statutory provisions.

The bill would set forth certain legislative findings and declarations.

Ch. 670 (AB 1646) Conroy. Escrow.

Existing law, the Escrow Law, requires escrow agents, in addition to various fees, to pay the Commissioner of Corporations a pro rata share of all costs and expenses reasonably incurred in the administration of the Escrow Law, as specified.

This bill would, instead, impose an annual license fee of $2,000 per escrow office location, would provide for additional assessments, as specified, and would make related changes. The bill would increase from 20 to 30 days the time to pay the annual license fee, as specified. These changes would be repealed on January 1, 2002.

Existing law provides that all money received by the commissioner under the Escrow Law shall be paid into the State Corporations Fund.

This bill would specify that those funds are for the sole purpose of administering and enforcing the Escrow Law.

Existing law authorizes the commissioner to examine an escrow agent's business, as specified, at any time.

This bill would require the commissioner to conduct an examination of an escrow agent every other calendar year, and would authorize an examination within one year of the issuance of a new license.

Under existing law, if the commissioner has reason to believe that any escrow agent is violating certain provisions of law, the commissioner is authorized to investigate the escrow agent's business, as specified.

This bill would state that the cost of any investigation, inspection, or examination of an agent under that provision shall be paid to the commissioner by the agent being investigated.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 671 (AB 3043) Takasugi. Foster care providers.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which qualified families are provided with cash assistance, and includes the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, through which certain needs of eligible children in foster care are provided. The AFDC program is administered and partially funded by the counties. The AFDC program is partially funded by federal participation and is subject to federal requirements for federal participation.

Existing law provides for the establishment of various levels of group home reimbursement rates under the AFDC-FC program and requires that those providers maintain and provide to the department specified information.

This bill would revise the procedures for determining the reimbursement of those group home providers.

The bill would also require the department to report to the appropriate policy and fiscal committees of the Legislature by December 1, 1996, on its progress in implementing certain existing requirements relating to out-of-home child care placement.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 672 (AB 3115) Gallegos. Loans.

Under the California Finance Lenders Law, with respect to consumer or commercial loans, a licensed finance lender or broker may sell certain promissory notes to institutional investors, as defined, evidencing the obligation to repay the loans. A licensee may sell promissory notes for loans made by the licensee or for loans purchased from and made by another licensee under this law.

This bill would provide, until January 1, 2000, that a licensed finance lender may sell promissory notes that evidence the obligation to repay certain types of loans, purchased from and made by an institutional lender, as specified, and may make agreements for the collection of payments and performance of services with respect to those notes.

The bill would also include a residential mortgage lender in the definition of an institutional investor, with respect to consumer loans.

Under the California Finance Lenders Law, for purposes of consumer loans, an institutional investor is defined to include a trust or other business entity established by an institutional investor for specified purposes, if certain requirements are met.

This bill would, for purposes of commercial loans regulated under the California Finance Lenders Law, define an institutional investor in the same manner.

Ch. 673 (SB 354) Rogers. Insurance.

Existing law, to be repealed effective January 1, 1998, sets forth provisions regulating certain multiple employer welfare arrangements, as specified.

This bill would extend that repeal date to January 1, 2001.

Existing law, to be repealed effective January 1, 1998, sets forth requirements for mandatory prelicensing and continuing education requirements with respect to licensure as a fire and casualty broker-agent or as a life agent, as specified.

This bill would delete that date of repeal, thereby extending these provisions indefinitely.

Ch. 674 (SB 515) Johnston. Vehicles: bicycles: rules of the road.

(1) Existing law provides for a California Traffic Safety Program in state government consisting of specified components to improve driver and pedestrian performance.

This bill would require that program to include provisions to improve bicyclist performance.

(2) Existing law requires any person operating a bicycle upon a roadway at a speed less than the normal speed of traffic moving in the same direction to ride as close as practicable to the right-hand curb or edge of the roadway and if a bicycle lane is established to ride within the bicycle lane, except as specified.

This bill would add to the specified exceptions operating a bicycle when approaching a place where a right turn is authorized.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law requires the driver of a vehicle overtaking another vehicle proceeding in the same direction to pass to the left at a safe distance without interfering with the safe operation of the overtaken vehicle, subject to specified limitations and exceptions.

This bill would include overtaking and passing bicycles within the provision specified above, thus expanding an existing crime and imposing a state-mandated local program.

(4) Existing law requires a person under 18 years of age to wear a properly fitted and fastened bicycle helmet, as specified, when operating or riding as a passenger on a bicycle.

This bill would revise an obsolete cross-reference and delete an obsolete requirement in that provision.

(5) Under existing law, a bicycle that is not licensed by a local agency, as specified, may be regulated or licensed pursuant to local ordinance or may be licensed upon request of the owner.

This bill would delete the above authorizations.

(6) Existing law authorizes a bicycle licensing agency to impound and retain possession of any bicycle that is in violation of specified provisions relating to the registration and licensing of bicycles.

This bill would delete the provision specified above that authorizes the impoundment of bicycles.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 675 (SB 1035) Peace. Public utilities: telephones.

Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility, including telephone corporations, in the state and to do all things necessary and convenient in the exercise of its power and jurisdiction.

Existing law, with specified exceptions, directs the commission to require any call identification service offered by a telephone corporation, or by any other person or corporation that makes use of the facilities of a telephone corporation, to allow the caller, at no charge, to withhold, on an individual basis, the display of the caller's telephone number from the telephone instrument of the individual receiving the call.

This bill would prohibit a caller from withholding the display of the caller's business telephone number when that number is being used for telemarketing purposes.

The bill would also prohibit a telephone corporation in a noncompetitive market from charging any subscriber for having an unlisted or unpublished telephone number under specified conditions.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 676 (SB 1111) Ayala. Vehicles: abandonment: lienholder.

(1) Under existing law, not more than 50% of the allowable lien sale preparation fees involving certain vehicles may be charged until, among other things, the lienholder has possession of the required lien processing documents.

This bill would include instances where the registration service agent has possession of the required lien processing documents as an alternative to the above.

(2) Existing law makes it unlawful to abandon a vehicle upon any public or private property without the express or implied consent of the owner or person in lawful possession of the property.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, in addition, make the last registered owner of the vehicle guilty of an infraction if the abandoned vehicle is not redeemed after impound. In addition to any other penalties, the bill would make the registered owner liable for any deficiency remaining after disposal of the abandoned vehicle. The registered owner of the vehicle would be relieved of liability if a report of sale or transfer of the vehicle or a theft report is filed. Because the bill would create a new crime, it would impose a state-mandated local program.

(3) Under existing law, if a money judgment is entered in favor of the vehicle lienholder and the judgment is not paid within 5 days after the judgment becomes final, the judgment may be enforced by a lien sale.

This bill would instead provide that the lienholder may then dispose of the vehicle through a dismantler or scrap iron processor.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 677 (SB 1704) Craven. Housing: manufactured homes and mobilehomes.

Existing law provides for the disclosure of specified information upon the transfer of residential real property.

This bill would make these provisions applicable to the resale of a manufactured home or mobilehome, as defined, on or after January 1, 1999. The bill would also express the intent of the Legislature that the Senate and Assembly jointly appoint an advisory task force, as specified. The bill would require the task force to report its findings and recommendations to the Legislature no later than July 1, 1997.

This bill would specify that the provisions relating to the advisory task force would remain in effect only until January 1, 1999, and as of that date are repealed, unless a later enacted statute, which is enacted before that date, deletes or extends that date.

Existing law requires the Department of Housing and Community Development, or any city, county, or city and county that has assumed responsibility for the enforcement of specified provisions of existing law regarding mobilehomes and mobilehome parks, to enter and inspect all mobilehome parks at least once every 7 years to ensure enforcement of these provisions. Existing law, until January 1, 1997, requires that enforcement agency, after it determines that a mobilehome park is in violation of these provisions, to issue a notice to correct the violation or notice of violation, as specified.

This bill would extend the repeal of the notice requirement until January 1, 1999. By increasing the duties of local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 678 (SB 1721) Killea. Insurance.

Existing law imposes various requirements with respect to disability insurance offered for sale to individuals age 65 or older. However, existing law exempts various forms of disability coverage from these requirements, including, until January 1, 1997, disability policies or certificates sold through direct response methods of delivery.

This bill would extend the exclusion until January 1, 2001.

Ch. 679 (SB 1821) Marks. Civil procedure: personal consumer records.

(1) Existing law authorizes any consumer whose personal records are sought by a subpoena duces tecum to quash or modify it by a motion filed with the court prior to the date specified for production on the subpoena.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would limit the applicability of this authorization to a consumer who is a party to the civil action in which the subpoena duces tecum is served and would authorize other consumers to serve on the requesting party and witness a written objection to the subpoena duces tecum. The bill would authorize the requesting party to bring a motion to enforce the subpoena within 20 days of the service of the written objection, as specified.

(2) Existing law provides that no witness shall be required to produce personal records after receipt of notice that this motion has been brought, except as specified.

This bill would provide that no witness shall be required, except as specified, to produce personal records after receipt of this notice or service of the written objection described in (1).

(3) Existing law applicable to the production of an employee's employment records pursuant to a subpoena duces tecum requires notice of the motion for the subpoena to be given to the witness and prohibits requiring the witness to produce the records except upon an order of the court.

This bill would further provide that any nonparty employee whose employment records are sought by a subpoena duces tecum may, prior to the date of production, serve on the requesting party and the witness a written objection that specifies the specific grounds on which production of the employment records should be prohibited; no witness shall be required to produce employment records after service of a written objection by a nonparty employee, except upon order of the court in which the action is pending or by agreement of the parties, witnesses, and employees affected; and the party requesting an employee's employment records may bring a motion to enforce the subpoena within 20 days of service of the written objection which shall be accompanied by a declaration showing a reasonable and good faith attempt at informal resolution of the dispute between the party requesting the employment records and the employee or the employee's attorney.

Ch. 680 (SB 1877) Rogers. Public employees: retirement.

(1) The State Teachers' Retirement Law prescribes benefits under the State Teachers' Retirement System. The Teacher's Retirement Board also administers the State Teachers' Retirement System Cash Balance Plan.

This bill would prescribe benefits to members of the system and the plan in accordance with the federal Uniformed Services Employment and Reemployment Rights Act of 1994.

(2) The Public Employees' Retirement Law provides that members who elect to be subject to Second Tier benefits shall be paid their accumulated contributions plus current year interest.

This bill would provide that those members shall not receive their accumulated contributions and interest until retirement or upon request after permanent separation from state service. The bill would provide that the retirement board shall determine the rate of interest paid during the period between the election and retirement or separation. The bill would also prescribe benefits to members of the system in accordance with federal law relating to the employment and reemployment rights of members of the uniformed services and would authorize the Public Utilities Commission to transmit monetary contributions to the system pursuant to a specified court consent decree prescribing additional retirement benefits for named retirees.

(3) The County Employees Retirement Law of 1937 requires annual statements to be in a form approved by the board of supervisors and to show specified information.

This bill would provide that annual statements shall be prepared in accordance with specified generally accepted accounting principles. The bill would prescribe benefits to members of county retirement systems in accordance with the federal Uniformed Services Employment and Reemployment Rights Act of 1994.

Ch. 681 (SB 1898) Kopp. Department of Information Technology.

There is in existing law in the executive branch the Department of Information Technology, that is managed by the Director of Information Technology, who is appointed by the Governor with the consent of the Senate. Existing law requires the director, subject to the State Civil Service Act, to appoint any other assistants and other

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

employees as are necessary for the administration of the department and to prescribe their duties.

This bill would require the Governor, upon recommendation by the director, to appoint 2 officers exempt from civil service who are necessary for the administration of the department. The bill would also require that these exempt officers have both knowledge and expertise in the area of information technology. The bill would require that the number of civil service positions allocated to the department on the effective date of the bill be reduced by 2.

Ch. 682 (SB 1959) Calderon. Check cashers: military identification card and deferred deposits.

Existing law regulates the provision of certain services by check cashers, as defined. Existing law requires check cashers to post a complete schedule of fees for specified services provided to customers, and a list of acceptable identification, as specified. In addition, under existing law it is a misdemeanor for a check casher to charge a fee in excess of 3% of the face amount of the check or $3, whichever is greater, for cashing a payroll check or government check if identification is provided by the customer. For purposes of this provision, identification is limited to a California driver's license or a California identification card. Existing law also requires the owner of a check casher's business to obtain a permit to conduct that business, and specifies the information to be provided on an application for that permit.

This bill would expand the scope of these provisions to specifically permit check cashers to defer the deposit of personal checks written by their customers for up to 30 days, as specified. The bill would define a deferred deposit for these purposes.

Among other things, the bill would require every deferred deposit transaction to be made pursuant to a written agreement that has been signed, as specified. The bill would also require disclosure of any fees to be charged for a deferred deposit, as specified. The bill would specifically provide that a customer shall not be subject to criminal penalties for the failure to comply with that written agreement.

The bill would also require applicants for a permit to conduct a check casher's business to disclose whether they intend to enter into deferred deposit agreements. The bill would provide that check cashers who hold a valid permit shall not be subject to the California Finance Lenders Law, as specified.

The bill would provide that the identification required for purposes of the provision limiting the fees that may be charged for cashing a payroll check or a government check may be a valid United States military identification card, in addition to a California driver's license or a California identification card. The bill would also impose restrictions on the fees that may be charged for cashing any personal check, whether for immediate or deferred deposit, and would prohibit a check casher from entering into more than one deferred deposit agreement at a time with the same customer, as specified. The bill would also make a related change. The bill would also permit collection of a fee for the return of a deferred deposit check that is dishonored. A violation of these provisions would be a misdemeanor, thus imposing a state-mandated local program. The bill also would provide that any person who violates these provisions regulating check cashers, shall be liable for a civil penalty not to exceed $2,000. The bill would additionally permit any person who is injured by any violation of those provisions to bring an action, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 683 (SB 2005) M. Thompson. Communicable disease.

Existing law sets forth legislative findings and declarations with regard to the exposure of California health care workers and professionals to risks of infection from deadly, bloodborne diseases and states the intent of the Legislature to reduce this exposure. Existing law requires the program on occupational health and occupational disease prevention of the State Department of Health Services to, among other things, review

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and analyze existing studies, data, and other information on safety-enhanced product design of medical devices that place health care workers at risk of exposure to bloodborne diseases in coordination with the Division of Occupational Safety and Health of the Department of Industrial Relations. Existing law requires the department, to the extent funding is available, to conduct demonstration projects to test the use of safety enhanced medical devices at health facilities that volunteer to participate in the projects.

This bill would revise the findings and declarations and the statement of intent of the Legislature. The bill would clarify existing requirements for sharps injuries documentation.

The bill would require the department to conduct a 3-year pilot sharps injury surveillance study.

Existing law provides that the duties required by these provisions shall be performed to the extent the department obtains funds from private sources and the federal government.

This bill, instead, would appropriate $145,000 from the General Fund to the department for purposes of the program on occupational health and occupational disease prevention to perform the duties required by those provisions. The bill would authorize the program to solicit and accept grant funding from public and private sources to supplement state funds.

Ch. 684 (SB 2045) Rosenthal. Consumer protection: mortgage brokers.

Existing law prohibits enumerated unfair methods of competition and unfair or deceptive trade acts or practices.

This bill would provide that it is an unfair or deceptive act or practice for a mortgage broker or lender, directly or indirectly, to use a home improvement contractor to negotiate the terms of any loan that is secured by the residence of the borrower to finance a home improvement contract, as specified.

Ch. 685 (SB 2108) Alquist. Transportation: Santa Clara County.

(1) Existing law creates the Santa Clara County Transit District, and prescribes the powers and duties of the district, including procedures for contracts and procurement by the district.

This bill would revise those procedures, thereby imposing a state-mandated local program by: (a) requiring that purchases of supplies, equipment, and materials, costing in excess of $25,000, be let to the lowest responsible bidder, (b) permitting purchases in the open market under specified conditions, (c) permitting emergency purchases, as specified, without the necessity of contracts, bids, or notice, and (d) permitting single-source purchases under certain conditions.

The bill would make other changes regarding the designated officers of the district, the method of specifying the compensation of district officers and employees, and the applicability of certain provisions pertaining to collective bargaining.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 686 (AB 293) Hoge. Life and disability insurance.

Existing law requires an insurer to deliver an insurance policy to the owner in order to start the period running during which the owner may exercise statutory rights to return or cancel the policy. Existing law provides that a policy is deemed to have been received 6 months after issuance if the insured has paid premiums.

This bill would provide that the policy is deemed received 6 months after issuance if premiums have been paid.

Existing law establishes time periods for the cancellation or surrender of individual life insurance by the insured or owner.

This bill would make those provisions applicable only to the surrender by the policy owner, and would make other changes to procedures governing the surrender of individual life insurance policies.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 687 (AB 328) Knowles. Insurance: surplus lines.

Existing law generally requires an insurer to be admitted in order to transact business in California, but permits insurance through nonadmitted insurers in various instances, including through a surplus line broker.

Existing law provides that before any nonadmitted foreign or alien insurer may file any pleading in any action, suit, or proceeding instituted against it, the insurer shall either procure a certificate of authority to transact insurance or file a bond in the action. However, this requirement does not apply when the insurance is exempt from requirements regulating insurance by nonadmitted insurers, or when the insurer has lawfully transacted surplus line insurance, as specified, and the insurer has appointed an agent for the service of process. In that case, the court is permitted to require the insurer to file a bond unless it makes a showing that it has sufficient assets.

This bill would provide that the restrictions as to filing suits by nonadmitted foreign or alien insurers do not apply to the above-mentioned categories of insurance and, in addition, those restrictions do not apply to insurance procured by the insured and insurance determined to be exempt by the Insurance Commissioner, but would require that the contract be governed by and in compliance with the laws of the state in which the contract was issued. The bill would provide, in addition, that an insurer need not file a bond if at the time the insurer files any pleading in any action, suit, or proceeding instituted against it, the insurer is an eligible surplus line insurer, as specified, or with respect to a dispute arising out of certain contracts of reinsurance, the reinsurer has complied with specified requirements. These changes would remain in effect until January 1, 2000, when they would be repealed.

Ch. 688 (AB 645) Frusetta. Hazardous waste facilities: disposal and generator fees: permits.

(1) Existing law requires each person who disposes of hazardous waste to land to pay a fee and requires each generator of hazardous waste to pay the State Board of Equalization a generator fee for each generator site for each calendar year. Those fees are deposited in the Hazardous Waste Control Account in the General Fund, and the funds in the account are authorized to be expended, upon appropriation by the Legislature, for specified purposes, including for expenditure by the Department of Toxic Substances Control to administer a hazardous waste control program and the Carpenter-Presley-Tanner Hazardous Substance Account Act.

This bill would authorize the department to adopt regulations exempting victims of disaster from the hazardous waste disposal and generator fees if the hazardous waste is generated in a geographical area identified in a state of emergency proclamation by the Governor, the hazardous waste is generated when property owned or controlled by the victim is damaged or destroyed as a result of the disaster, the hazardous waste is not routinely produced or managed, as specified, and the victim meets any other condition or limitation specified by the department.

(2) Existing law prohibits the operation of a hazardous waste facility unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization from the department. The owner or operator of a hazardous waste facility who holds a hazardous waste facilities permit or a grant of interim status is required to comply with the conditions of the hazardous waste facilities permit or interim status document, and specified requirements and regulations. Existing law makes a declaration that certain amendments made to this provision at the 1989 Regular Session of the Legislature were declaratory of existing law.

This bill would delete that declaration of legislative intent.

Ch. 689 (AB 1012) Machado. Crimes against pupils: sentencing.

Existing law provides that when a judgment of imprisonment is to be imposed and the statute specifies 3 possible terms, the court shall order imposition of the middle term, unless there are circumstances in aggravation or mitigation of the crime. Existing law specifies facts which shall be considered a circumstance in aggravation of a crime in imposing a term under this provision.

This bill would provide that when a person is convicted of a specified felony sex offense, and that felony was committed within a safe school zone against a victim who was a pupil

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

currently attending school, this fact shall be considered a circumstance in aggravation in imposing a term under this provision.

Ch. 690 (AB 2000) Goldsmith. Vehicles: driving under the influence: arrests: penalties.

(1) Existing law makes it an infraction for a person under 21 years of age to knowingly drive a vehicle carrying any alcoholic beverages, except as specified, or for a person under 21 years of age to be a passenger in a vehicle while knowingly possessing any alcoholic beverage, except as specified.

This bill would make those crimes misdemeanors, punishable by specified fines and terms in the county jail. Because the bill would increase the punishment for an existing crime, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 691 (AB 2006) K. Murray. Harassment: restraining orders.

Existing law specifies the manner in which a person who has suffered harassment may seek a temporary restraining order and an injunction prohibiting harassment.

This bill would provide that such an order shall, on request of the petitioner, be served on the respondent, whether or not the respondent has been taken into custody, by any law enforcement officer who is present at the scene of reported harassment involving the parties to the proceedings.

This bill would also require law enforcement officers at the scene of an incident of harassment to verify the existence of the order if the protected person cannot produce a copy of it. If an officer determines that a protective order has been issued, but not served, the bill would require the officer to notify the respondent of the terms of the order and to enforce the order.

By imposing additional duties on law enforcement officers, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 692 (AB 2523) Cunneen. Local business license taxes: nonprofit organizations.

Existing law authorizes counties and cities to impose business license taxes and fees. However, it provides that no business license fee or tax measured by income or gross receipts and levied under those authorizations, whether by a charter or general law jurisdiction, shall apply to any nonprofit organization that is exempted from taxation by certain state and federal statutes, or the successor of either, or apply to the clergy of any religious organization that is exempt from federal income tax under a certain federal statute or a successor statute.

This bill would provide that no charter or general law county, city and county, or city, nor any district or any other local agency, may impose any business license tax or business license fee on any nonprofit organization, as specified, and that no local flat business license tax or fee shall apply to clergy subject to the existing exemption from business license taxes and fees.

This bill would make certain legislative findings and declarations regarding the imposition of local business license taxes and fees on nonprofit organizations.

Ch. 693 (AB 2567) Goldsmith. Small claims court.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, the Small Claims Act, sets forth a comprehensive body of law governing small claims courts. Under existing law, although generally no individual other than the plaintiff and the defendant may take part in the conduct or defense of a small claims action, a party may appear and participate in a small claims action by a representative if the party qualifies under one of specified exceptions to that rule.

This bill would provide that a party who is an owner of rental real property may appear and participate in a small claims action through a property agent under contract with the owner to manage the rental of that property, if specified conditions are met. The bill would also make technical, nonsubstantive changes.

Ch. 694 (AB 2701) B. Thompson. Shorthand reporters.

Existing law provides for a Court Reporters Board in the Department of Consumer Affairs and provides a comprehensive scheme for the regulation of shorthand reporters in this state.

This bill would do the following:

(1) Revise requirements for admission to examination, as specified.

(2) Revise renewal certificate requirements, as specified.

(3) Provide that a certificate may be suspended, revoked, or denied upon a failure to notify the board of a conviction, or failure to comply with or pay a monetary sanction, as specified.

(4) Provide for withdrawal of recognition of a court reporting school by the board for failure to comply with certain requirements and specify certain teacher requirements.

(5) Make various technical and clarifying changes.

Ch. 695 (AB 2819) Caldera. Domestic violence: judicial training.

Existing law requires the Judicial Council to establish judicial training programs for family law matters.

This bill additionally would require the Judicial Council to establish judicial training programs for domestic violence matters.

Ch. 696 (AB 2848) Speier. Abuse reporting: pilot project.

Existing law requires specified persons to report physical injury as a result of assaultive or abusive behavior, including elder abuse or dependent adult abuse, to local law enforcement. Existing law also requires specified persons to report child abuse to a child protective agency.

This bill, operative until January 1, 2002, would authorize the County of San Mateo to establish a pilot project, upon adoption of a resolution by the board of supervisors, to create and adopt a standardized form for reporting violence and abuse of elders or dependent adults. The bill would require the standardized form to be adopted after consultation with the Department of Justice. The bill would also permit any person required to report under the requirements described above to use the reporting form developed by the pilot project to make those reports in San Mateo County. The bill would require the Department of Justice to evaluate the pilot project and submit a report to the Legislature on or before January 1, 2002.

Ch. 697 (AB 2852) Knox. Vehicle devices and documents: unlawful possession.

(1) Existing law makes it a misdemeanor for any person to lend any disabled person placard to any other person if the person desiring to borrow it would not be entitled to its use, and for any person to knowingly permit its use by one not entitled to it, except as specified. Existing law makes it an infraction for any person to display upon a vehicle, or present to any peace officer, any registration card, identification card, temporary receipt, license plate, certain vehicle devices issued by the Department of Motor Vehicles, or permit not issued for that vehicle or not otherwise lawfully used under the Vehicle Code.

This bill would make it a misdemeanor, thereby imposing a state-mandated local program by increasing the duties imposed on local law and correctional agencies, for any disabled person to permit the use for parking purposes of a special identification license plate by one not entitled to use it, or for any person to use a vehicle displaying a disabled person or disabled veteran special identification license plate issued to another to park

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

in parking spaces or stalls designated for disabled persons unless transporting a disabled person.

The bill would, until January 1, 2001, make it a misdemeanor, thereby imposing a state-mandated local program by creating a new crime, for any person to be in possession of certain vehicle devices issued by the department, registration card, identification card, temporary receipt, certificate of ownership, license plate, special plate, or validation tab not lawfully issued and obtained under the Vehicle Code. The bill would, with regard to that new crime, create a rebuttable presumption that a person in possession of 2 or more of these documents, plates, or devices did not obtain them lawfully, except as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 698 (AB 2966) Brulte. Unlawful detainer.

Existing law establishes, until July 1, 1998, a pilot project in courts determined by the Judicial Council, upon approval of the affected courts and the county in which the court is located. Within the pilot project, the plaintiff in specified unlawful detainer actions may demand that the defendant deposit with the court clerk 15 days' prospective rent, calculated as specified, unless the defendant has paid the rent through the month in which the action is filed, provided the plaintiff's complaint contains specified allegations. Existing law requires court clerks to issue receipts for the deposits and to remit the deposits to the county treasury, as specified. Existing law provides, among other things, for a filing fee to be paid by a plaintiff and deposited with the county treasurer for exclusive use by the county and court for the support of this project.

This bill would extend the applicability of these provisions to specified courts in the Counties of Los Angeles and San Bernardino and would revise the measurements of the pilot project's success, as specified. The bill would require the Judicial Council to prepare a reply form, as specified, and a form to inform defendants of certain information regarding the pretrial hearing, including the consequences for defendants of going directly to trial on the same date as the date scheduled for the pretrial hearing. The bill would also extend the operative date of these provisions until December 31, 1998, and would repeal these provisions on July 1, 1999. By requiring court clerks to issue receipts for the above-described deposits and to remit deposits to the county treasury, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 699 (AB 3000) Granlund. Property taxation: tax certificates.

Existing property tax law authorizes a county, by resolution of the county board of supervisors, to issue tax certificates with respect to delinquent or defaulted taxes or assessments levied on separate parcels of real property. Existing law requires the county tax collector to publish rules and procedures for the making of offers on any tax certificate.

This bill would additionally require that tax collector to determine the size of the offering of tax certificates, the parcel to be included in the sale, the fees necessary to conduct the sale and maintain adequate records, to establish rules and procedures for making offers, and to publish and make available those determinations, fees, rules, and procedures.

Existing law requires the tax collector to pay the holder of a tax certificate the purchase price, plus interest, of a tax certificate and cancel the tax certificate if any of several conditions occur, including upon the request of the holder of the tax certificate if either the taxes are permitted to be paid in installments or the taxpayer files an appeal or other claim that disputes the amount owed, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete those 2 circumstances under which the holder of a tax certificate is required to be paid and a tax certificate is required to be canceled.

Existing law also requires a county tax collector, when required by a specified statute to issue a tax certificate for defaulted taxes or assessments levied with respect to a parcel for which a tax certificate is already outstanding, to offer to sell the new certificate to the holder of the outstanding certificate for a period of 6 months, on the same terms as the outstanding tax certificate.

This bill would modify this requirement to instead require a county tax collector to offer to sell the new certificate to the holder of the outstanding certificate for a period of one month after the tax collector provides notice by certified mail to that certificate holder that a new certificate is to be issued for an additional defaulted amount levied with respect to the same parcel.

Existing law provides that the holder of a tax certificate who receives all or part of any amount of taxes that is subject to refund is not obligated to make any refund.

This bill would delete that provision.

Existing law grants the power to sell tax-defaulted property to the county tax collector, upon approval of the board of supervisors, but requires the tax collector to sell the property upon the request of a holder of a tax certificate, without the approval of the board of supervisors.

This bill would delete that requirement that the tax collector sell the property upon the request of a holder of a tax certificate, and would delete the provision that creates the exception for those sales from the requirement of approval of sales of tax-defaulted property by the board of supervisors.

Existing law permits the sale of a tax-defaulted property to any governmental entity for a public use if the entity pays the amount owed to the holder of a tax certificate at the time of sale.

This bill would delete that provision.

This bill would also make technical, clarifying changes to the provisions which authorize the issuance of tax certificates.

Ch. 700 (AB 3257) Baugh. False claims actions: plaintiffs.

Existing law authorizes the Attorney General to bring a civil action for false claims made against a state or political subdivision if any portion of the money, property, or services claimed issued from or was provided by the state, and authorizes a prosecuting authority of a political subdivision to intervene in the action, or investigate and bring action if the claim involves funds of the political subdivision. Existing law authorizes a person to bring a civil action under these provisions on behalf of the person and the state, or the person and the political subdivision, according to specified procedures.

This bill would revise the procedures pursuant to which a person may bring a civil action under these provisions.

Ch. 701 (AB 3323) Hannigan. Highways: environmental mitigation.

Existing law declares the Legislature's intent to annually allocate $10,000,000 to the Environmental Enhancement and Mitigation Demonstration Program Fund to be used for making grants to local, state, and federal agencies and nonprofit entities that undertake projects to mitigate the adverse environmental effects of existing and future transportation facilities. Funds were appropriated in the Budget Act of 1992 and the Budget Act of 1993 to the Department of Transportation for this purpose.

This bill would appropriate $873,756 from that fund to the department for allocation to complete the Guajome Marsh Restoration Project in San Diego County, the Bluff Top Recreational Park Improvement Project in Orange County, and the Hill Slough Wildlife Area Interpretive Center and Marsh Restoration in Solano County. The bill would provide that those funds would be available for expenditure for the Guajome Marsh Restoration Project until June 30, 1997, and for the other 2 projects until June 30, 1999.

The bill would declare the intent of the Legislature that the Department of Fish and Game work with interested parties to develop long-term operation and maintenance funding for the Hill Slough Wildlife Area Interpretive Center and Marsh Restoration.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 702 (SB 18) Committee on Appropriations. Judgments and settlement claims against the state.

Pursuant to existing law, the Legislature may make appropriations it deems proper for the payment of claims against the state under certain circumstances.

This bill would appropriate $3,155,065.22 from the General Fund to the Attorney General, $1,810,539.32 from the General Fund to the State Lands Commission, and $1,114,898 from the Department of Food and Agriculture Fund to the Department of Food and Agriculture, to pay specified judgments and settlement and related claims against the state, and in the case of the appropriation to the Attorney General, to also pay specified attorneys fees, and would specify that any funds remaining from the amounts appropriated pursuant to certain provisions after those payments shall revert to the General Fund or the Department of Food and Agriculture Fund, respectively, within 15 days of the final payment.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 703 (SB 76) Haynes. School districts.

Existing law requires the State Board of Education to adopt rules and regulations establishing standards of ethical conduct applicable to temporary, probationary, or permanent employees of the school district who provide supervision and instruction in interscholastic athletic programs and activities.

This bill would, until January 1, 2002, require the governing board of each school district to comply with any rules and regulations promulgated by the State Board of Education that establish the minimum qualifications for persons employed in a limited assignment supervising the athletic activities of pupils. The bill would require school districts to file annually a certification with the State Board of Education that the school district is in compliance with the minimum qualifications established by the board. By imposing new duties on school districts, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 704 (SB 366) Rogers. Local government finance.

Existing law requires the Controller, pursuant to written requests from a county or city and county, to allocate $100,000,000, which is appropriated by the Budget Act of 1996, to counties, cities, and a special district in San Mateo County for purposes of the Citizens Option for Public Safety (COPS) Program.

This bill would specifically include other named special districts in those allocations, and would also make other technical, clarifying changes.

Ch. 705 (SB 580) Wright. Parole: restitution.

Existing law requires that a prison sentence include a period of parole, except as provided. Existing law also authorizes the Board of Prison Terms or the Department of Corrections to impose as a condition of parole that a prisoner make payments on outstanding restitution fines or orders, as specified.

This bill would authorize the Department of Corrections to contract with the Franchise Tax Board or a private debt collection agency for purposes of collecting restitution payments on behalf of victims.

The bill also would require the department to develop, by January 1, 1998, an implementation plan for the collection and disbursement of victim restitution orders that are imposed as a condition of parole.

Ch. 706 (SB 782) Lewis. Wagering.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law permits any racing association in this state to accept out-of-state wagers on a race or races conducted by that association and to transmit live audiovisual signals of the race or races to locations out of state with the approval of the California Horse Racing Board.

This bill would additionally permit the association to accept out-of-state wagers on races disseminated by that association, with the approval of the board. The bill would also specify the manner of distributing amounts deducted from the wagers for license fees, purses, and commissions.

(2) Under existing law, all revenues distributed to the state as license fees from horseracing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation. The bill would also result in a change in state taxes for the purpose of increasing state revenues within the meaning of Section 3 of Article XIII A of the California Constitution, and thus would require for passage the approval of $^2/_3$ of the membership of each house of the Legislature.

Ch. 707 (SB 876) Rosenthal. Insurance adjusters.

Existing law requires persons acting as insurance adjusters to be licensed by the Insurance Commissioner. Existing law defines an insurance adjuster to be a person other than a private investigator who for consideration agrees to make, or makes, any investigation for the purpose of obtaining, information in the course of adjusting or otherwise participating in the disposal of, any claim under or in connection with a policy of insurance or engages in soliciting insurance adjustment business with reference to certain investigatory matters.

This bill would provide that the activity would be on behalf of an insurer, and includes aiding an insurer in any manner with respect to certain investigatory matters. The bill would provide that those provisions related to the regulation, licensing, and registration of insurance adjusters do not apply to any building contractor, engineer, technical expert, or other person who is engaged by an insurer or licensed adjuster to provide an expert or professional evaluation in connection with damage to insured property, as specified.

The bill would provide that in the event of an emergency situation declared by the commissioner, claims arising out of the emergency may be adjusted by a nonlicensed adjuster acting under the direction, control, charge, or management of a licensed adjuster or insurer, would require the registration of the nonlicensed adjuster, and would limit the authority to a period of 180 days unless renewed.

Existing law provides for disciplinary actions against adjusters.

This bill would permit the commissioner to also issue restricted licenses subject to reasonable conditions and would specify that the unrestricted license is subject to suspension or revocation without a hearing or cause.

The bill would add to the actions that constitute "dishonesty or fraud" for purposes of disciplinary actions against insurance adjusters, by adding impersonating a law enforcement officer or employee of the United States, a state, or political subdivision, or permitting or aiding and abetting that impersonation.

The bill would become operative July 1, 1997.

The bill would incorporate additional amendments to Section 14022 of the Insurance Code to be operative only if AB 3351 and this bill are both enacted and become effective as specified and this bill is enacted last.

Ch. 708 (SB 1179) Rosenthal. Risk-based capital.

Existing law requires life insurers to file an annual risk-based capital report concerning various risks to the insurer's assets. It requires certain actions by insurers based on the report, and, in some instances authorizes the Insurance Commissioner to take action.

This bill would repeal and reenact these provisions to make them applicable to life and health insurers and to property and casualty insurers generally.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 709 (SB 1205) Hughes. California Museum of Science and Industry.

(1) Existing law authorizes the Executive Director of the California Museum of Science and Industry to appoint the chief and the assistant chief of museum security and safety who have the powers of peace officers, as specified in certain provisions of the Penal Code.

This bill, in addition, would authorize the executive director to appoint other safety officers who have the powers of arrest, as specified in certain other provisions of the Penal Code.

(2) Existing law provides that certain persons are not peace officers, but may exercise the powers of arrest during the course and within the scope of their employment if they successfully complete a course in the exercise of those powers.

This bill would include the security officers appointed by the executive director, as described in (1) above, in this provision.

(3) This bill would incorporate additional changes in Section 4108 of the Food and Agricultural Code, proposed by AB 3220, to be operative only if AB 3220 and this bill are both enacted and become effective on or before January 1, 1997, and this bill is enacted last.

(4) This bill also would incorporate additional changes in Section 830.7 of the Penal Code, to be operative only if AB 2713 and this bill are both enacted and become effective on or before January 1, 1997, and this bill is enacted last.

Ch. 710 (SB 1375) Peace. Security services and public employment.

(1) Under existing law, the provisions that require licensure of private investigators and certain private security services contain exemptions for various persons, including a peace officer of the state or a political subdivision. The exemption applies to a peace officer while employed by a private employer to engage in off-duty employment pursuant to specified provisions of law, but does not apply to a peace officer who contracts for his or her services or the services of others as a private investigator for a private employer.

This bill would specify in addition that the exemption does not apply to a peace officer who contracts for services as an armed private investigator, as defined.

The bill would also provide that a registered process server is exempt from requirements of licensure as a private investigator, as specified.

(2) Existing law provides that a person who violates the Private Investigator Act, or who knowingly engages an unlicensed private investigator or private patrol operator, as specified, is guilty of a misdemeanor punishable by a fine not to exceed $1,000, or by imprisonment, or both, as specified.

This bill would provide that a person who knowingly engages a nonexempt person is guilty of a misdemeanor punishable by a fine of $5,000, or by imprisonment, or both, as specified. The bill would specify the disposition of the fine. The bill would also provide that any person who acts as or represents himself or herself to be a private investigator licensee or private patrol operator, who falsely represents that he or she is employed by a licensee, or who carries a badge, identification card, or business card, or uses a letterhead or other specified materials, or advertises that he or she is a licensee, is guilty of a misdemeanor punishable by a fine of $10,000, or imprisonment, or both, as specified. It would specify the disposition of that fine. In creating new crimes the bill would impose a state-mandated local program. The bill would also prohibit licensure following a conviction for specified periods.

(3) Existing law authorizes the superior court to issue injunctive relief to restrain unlicensed private investigator activity or private patrol operator activity, as specified.

This bill would additionally authorize the court to levy a civil fine not to exceed $10,000, and provide that there shall be no requirement to allege facts necessary to show or tending to show lack of adequate remedy at law or irreparable injury. The bill would specify the disposition of that fine, as specified.

(4) Existing law requires a person who is employed as a security guard or security patrolperson to complete a course in the exercise of the power to arrest, and requires a licensee, qualified manager, or security guard who carries a firearm to complete a course of training.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would exempt peace officers who have completed specified courses, and would make related changes.

(5) Existing law generally prohibits local agency officers and employees from engaging in any employment, activity, or enterprise for compensation that is inconsistent, incompatible or in conflict with his or her duties or those of the employing agency. Existing law provides for a determination by the agency of which duties are inconsistent. Existing law permits the local agency to adopt rules governing the applicability of this provision.

This bill would require the adoption of rules, thus imposing a state-mandated local program.

The bill would also provide that these provisions shall not be used as part of the determination of compensation in a collective bargaining agreement with public employees.

(6) The bill would incorporate additional changes in Sections 7522 and 7582.5 of the Business and Professions Code, contingent upon the prior enactment of AB 3351.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 711 (SB 1478) Solis. Health coverage: health care service plans and insurers.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are subject to licensure and regulation by the Department of Corporations. Existing law provides that a willful violation of the provisions governing health care service plans is subject to criminal sanction.

Existing law also provides for the licensure and regulation of disability insurers by the Department of Insurance. Existing law requires a health care service plan and an insurer that issues group or individual policies of disability insurance that covers hospital, medical, or surgical expenses to reimburse claims as soon as practical, but no later than 30 working days after receipt of the claim, unless the claim is contested.

This bill would provide that the obligation of the plan or insurer to comply with this requirement of reimbursement of claims shall not be waived when the plan requires its contracting entities to pay claims for covered services.

This bill would incorporate additional changes in Section 10123.13 of the Insurance Code, proposed by SB 1665, to be operative only if SB 1665 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

Ch. 712 (SB 1557) Mountjoy. Contractors: building permits.

(1) Existing law prohibits a contractor from bidding for the installation or removal of an underground storage tank unless the contractor has passed the hazardous substance removal certification examination or unless the work is to be performed by a contractor who has passed the examination. Violation of these provisions is a misdemeanor.

This bill would make technical, conforming changes to the penalty provisions.

(2) Existing law requires a contractor or subcontractor to pay a subcontractor or a dump truck carrier, the amount due to the subcontractor or carrier within a specified time. Failure of the licensee to comply with this provision constitutes cause for disciplinary action under the Contractors' State License Law and subjects the licensee to a penalty of 2% of the amount due per month for every month that payment is not made.

This bill would specify that the penalty is to be paid to the subcontractor or carrier.

(3) Existing law provides that the official copy of the plans maintained by the building department of a city or county, as specified, shall be open for inspection only on the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

premises of the building department as a public record, and may be duplicated only with the written permission of specified parties, or by order of a proper court.

This bill would further provide that the official copy of the building plans may be duplicated upon the request of any state agency.

Ch. 713 (SB 1726) Wright. Civil actions: coordination.

Existing law specifies the conditions under which the court may change the place of trial. Existing law provides for the coordination of civil actions sharing a common question of fact or law that are pending in different courts.

This bill would revise and recast the provisions of existing law governing the coordination of civil actions. The bill would specify new procedures regarding coordination, including authorization for a judge, upon motion, to transfer an action involving a common question of fact or law from another court to that judge's court if a declaration by the moving party states facts showing a good faith effort to obtain agreement to the transfer from all parties and that the actions are not complex, as specified. The bill would require a petition for coordination to be supported by a declaration stating facts showing that the actions are complex, as defined. The bill would require the Judicial Council to provide by rule the practice and procedure for the transfer or coordination of civil actions, as provided.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 714 (SB 1853) Committee on Elections and Reapportionment. Election documents: recall elections.

Existing law requires each signer of a recall petition or other petition or paper that is required to be signed by voters of a local jurisdiction to personally affix his or her signature, printed name, and place of residence on the petition format, as specified.

This bill would provide that, notwithstanding this requirement, a voter who is unable to personally affix the required information may request another person to print the voter's name and place of residence on the appropriate spaces of the petition or paper, including a recall petition but would require that the voter personally affix his or her mark or signature on the appropriate space of the petition or paper, and that the petition or paper be witnessed by 2 persons by subscribing their names thereon.

Existing law requires that a notice of intention to circulate a recall petition be served on the officer sought to be recalled and that a copy of the notice be filed with the elections official.

This bill would instead require that a copy of the notice of intention be served on the officer sought to be recalled and that the original notice of intention be filed with the elections official.

Existing law requires that the notice of intention be published at the proponents' expense in a newspaper of general circulation pursuant to specified provisions of law. However, if this publication is not possible, it requires that the notice be posted in at least 3 public places within the jurisdiction of the officer to be recalled.

This bill would instead require that a copy of the notice be published in a newspaper of general circulation. It would provide that this publication shall be required unless there is no newspaper of general circulation able to provide timely publication in the jurisdiction of the officer sought to be recalled.

Existing law requires that before any signature may be affixed to a recall petition, each page of each section must bear specified items of information, including a copy of the notice of intention that includes the statement of grounds for recall.

This bill would provide that for these purposes, the copy of the notice of intention shall contain the names of at least 10 recall proponents, as specified. It would make other technical changes.

This bill would require the Secretary of State to provide to county elections officials a recall petition format for distribution to proponents of a recall. By requiring that the recall petition format be made available upon request by the county elections officials, as well as by the Secretary of State, this bill would impose a state-mandated local program.

This bill would also require that the recall petition format made available pursuant to this bill be utilized by proponents of a recall election.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires that each section of a recall petition have attached to it a declaration signed by the circulator of that section of the petition, setting forth specified items of information.

This bill would repeal this requirement. It would instead require that to each section of a recall petition be attached a declaration, signed by the circulator thereof, that complies with a specified provision of law. It would require that the declaration include a statement that the circulator is a registered voter in the jurisdiction of the officer sought to be recalled.

Existing law requires that each section of a recall petition be filed with the elections official of the county in which it was circulated.

This bill would repeal and reenact this provision in a renumbered section.

Existing law requires that each section of a recall petition be filed by the proponents or by persons authorized, in writing by a proponent. It requires every person authorized in writing by a proponent to submit a copy of the written authorization to the elections official each time he or she files a section or sections of a petition.

This bill would repeal and reenact this provision in a renumbered section.

Existing law requires that 30 days after a recall has been initiated, and every 30 days thereafter, the elections official determine from the records of registration what number of registered voters have signed recall petitions.

This bill would repeal this provision. It would instead require the elections official, 30 days after a recall has been initiated, and every 30 days thereafter, or more frequently at the discretion of the elections official, to report to the Secretary of State on the number of signatures submitted, as specified. It would require the elections official, at the end of each 30-day period, to attach to the recall petition a specified form provided by the Secretary of State, and to file a copy of the form in his or her office. By adding to the duties of the local elections officials, this bill would impose a state-mandated local program.

Existing law requires the elections official, upon each submittal of recall petition sections, to count the number of signatures, authorizes the use of a random sampling technique for these purposes if more than 500 signatures are submitted, and requires a report thereon to the Secretary of State.

This bill would repeal and reenact this provision in a renumbered section.

Existing law requires the elections official, immediately after the deadline for submission of all signatures, to verify the signatures in the same manner set forth in specified provisions of law.

This bill would repeal and reenact this provision in a renumbered section.

Existing law requires the elections official, upon completing examination of each recall petition, to attach to the petition a certificate showing the result of the examination, to submit a copy of the petition to the Secretary of State, and to file a copy of the certificate in his or her office.

This bill would repeal and reenact this provision in a renumbered section.

Existing law requires the Secretary of State upon receiving a recall petition certified by the county elections officials to have been signed by the stated number of registered voters, to transmit to the elections official of each county a certificate showing that fact, and showing the total number of signatures collected by the proponents. It requires the elections official to file the certificate in his or her office.

This bill would repeal and reenact this provision in a renumbered section.

Existing law requires the Secretary of State, when the proponents have collected sufficient signatures, to certify that fact to the Governor, and requires the Governor to make or cause to be made publication of notice for the holding of the election. It requires that the recall election be conducted, returned, and the results declared, in all respects as are other state elections.

This bill would repeal and reenact these provisions in renumbered sections.

Existing law specifies the provisions of law applicable for determining the number of signatures required for a recall petition in the case of specified offices of a judge of a superior, municipal, or justice court.

This bill would delete an obsolete reference to justice courts.

Existing law requires, if a recall petition is found by the elections official or, in the case of the recall of a state officer, the Secretary of State, to lack sufficient signatures, that the proponents whose names are listed on the notice of intention be allowed to examine the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

petition, notwithstanding a specified provision of the California Public Records Act in order to determine which signatures were disqualified and the reasons therefor.

This bill would provide instead that if a recall petition is found insufficient by the elections official or the Secretary of State, in the case of the recall of a state office, the petition signatures may be examined in accordance with a specified provision of the California Public Records Act.

Existing law permits any voter who has signed a recall petition to have his or her signature withdrawn from the petition upon filing a written request with the elections official prior to the day the petition is filed. It requires that, in the case of the recall of a state officer, the request be forwarded to the Secretary of State immediately.

This bill would instead permit a voter to have his or her signature withdrawn from the petition upon filing a written request prior to the day the section bearing the voter's signature is filed. It would delete the requirement that the request be forwarded to the Secretary of State in the case of a recall of a state officer.

Existing law provides that, except in the case of a city recall election, an officer whose recall is being sought may file a candidate's statement with the elections official, to be sent to each voter together with the sample ballot.

This bill would delete the exception for a city recall election.

Existing law requires that, with respect to the nomination of candidates to succeed a recalled public officer, the nomination papers and declaration of candidacy be filed not less than 68 days prior to the election and not before the day the order of the election is issued.

This bill would make this provision applicable to the recalls of state officers, would require the filing to be done not less than 59 days prior to the election, and would require the Secretary of State to certify the names of the candidates to be placed on the ballot by the 55th day prior to the election.

Existing law requires that an elections official who is required to certify to the governing board the names of candidates to be placed on the ballot, do so by the 64th day prior to the recall election.

This bill would make this provision applicable to the recalls of local officers, require the filing to be done not less than 75 days prior to the recall election and not before the day the order of the election is issued, and would require the elections official to certify the names of the candidates to be placed on the ballot by the 71st day prior to the recall election.

Existing law imposes misdemeanor penalties upon any person who offers or gives money or other thing of value to another in exchange for a signature on a state or local initiative petition.

This bill would include a state or local referendum or recall petition within this prohibition. By creating new crimes this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 715 (SB 1889) Calderon. Regulated substances.

(1) Existing law requires the administering agency to make a preliminary determination whether there is a significant likelihood that a handler's use of an acutely hazardous material may pose an acutely hazardous materials risk.

If the administering agency determines that there is a significant likelihood of risk, the administering agency is required to require the handler to prepare and submit a risk management and prevention program (RMPP), consisting of specified elements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal those provisions and would instead provide that the program for the prevention of accidental releases of regulated substances adopted by the Environmental Protection Agency pursuant to the Clean Air Act is the accidental release prevention program for the state. The bill would define terms and would define the term "regulated substance" as a substance listed in specified federal regulations and criteria and would require the Office of Emergency Services to determine, by June 30, 1997, which of those extremely hazardous substances meet those criteria or pose a regulated substances accident risk. The office would be required to adopt a list of regulated substances. The bill would require the office and administering agencies, as prescribed, to implement the program, except as specified, thereby imposing a state-mandated local program by imposing new duties upon local agencies. The bill would require the office to adopt regulations, initially as emergency regulations, for the registration of stationary sources subject to the program and the receipt, review, revision, and audit of remedial action plans (RMPs), consistent with specified federal requirements. The bill would require the owner or operator of a stationary source to prepare an RMP when required under the federal regulations. The bill would also require a stationary source to submit an RMP if the administering agency determines there is a significant likelihood of a regulated substance accident risk, except as specified. The RMP would be required to be submitted to the Environmental Protection Agency and to the administering agency, except as specified. The bill would impose criminal penalties upon any person or stationary source who makes a false material statement or representation or certification used for compliance with the program, and upon any stationary source who knowingly violates any requirement of the program, thereby imposing a state-mandated local program by creating new crimes.

The bill would require the office to obtain and maintain state delegation of the federal accidental release prevention program. The bill would allow a person to submit a petition to the office to add or delete a material from the regulated substance list or to revise the state threshold quantities and would require the Office of Environmental Health Hazard Assessment to review the petition, as specified. The office, in consultation with the Office of Environmental Health Hazard Assessment, would be required, by June 30, 1998, to review each listed regulated substance and the state threshold quantity for each substance and to adopt regulations which amend the list.

The bill would specify related matters and make conforming changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 716 (SB 2003) Costa. Mental health: patient transfers.

Existing law prohibits any person who in good faith, and not for compensation, renders emergency care at the scene of an emergency from being liable for any civil damages resulting from any act or omission. Existing law also establishes certain requirements regarding factors for consideration in any action for damages involving a claim for negligence against a physician and surgeon for emergency medical services provided in a general acute care hospital emergency department.

This bill would provide that a general acute care hospital, its licensed professional staff, or any physician and surgeon providing emergency medical services to any person at the hospital shall not be civilly or criminally liable for detaining a person, or for the actions of the person following release from the hospital, if certain conditions exist. The bill would also specify that its provisions would not affect the hospital's responsibility to comply with all state laws pertaining to the use of seclusion and restraint and psychiatric medications for psychiatric patients.

Ch. 717 (SB 2139) Haynes. Medi-Cal: San Diego County project.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the department, upon approval by the Board of Supervisors of the County of San Diego, to establish a multiplan managed care pilot project for the provision of Medi-Cal services.

This bill would, instead, permit the department to implement this program upon approval of the county. It would also make various revisions in the provisions relating to geographic managed care programs, including the specification of various criteria for the contract between the state and the plans.

This bill would also express the intent of the Legislature that, in the event the department contracts with one or more plans for the provision of dental services to Medi-Cal beneficiaries in San Diego County, the provisions relating to this project shall apply to these contracts in the same manner as required for contracts issued for other Medi-Cal services.

Ch. 718 (AB 545) Mazzoni. Nuisance abatement.

Existing law permits a county board of supervisors to establish a procedure for the abatement of a nuisance.

This bill would provide that in any action to abate a nuisance the owner of the parcel upon which the nuisance is found to exist shall be liable for all costs of abatement incurred by the county, as specified. The bill would authorize a county to provide for the recovery of attorneys' fees by the prevailing party, as specified.

Existing law authorizes the legislative body of a city to establish a procedure, by ordinance, to collect nuisance abatement costs and related administrative costs by a nuisance abatement lien.

This bill would also authorize a city to provide for the recovery of attorneys' fees by the prevailing party, as specified.

Ch. 719 (AB 893) Rogan. Probation: ineligibility.

Existing law authorizes the court to grant probation to certain persons convicted of a crime. It prohibits the granting of probation, except in unusual cases where the interests of justice would best be served if probation is granted, for specified felony offenders and provides that other specified felony offenders are ineligible for probation.

This bill would add a person convicted of a violent felony or serious felony who was on probation for a felony offense at the time of the commission of the new offense to the list of persons ineligible for probation.

Ch. 720 (AB 1195) Morrissey. Occupational lead poisoning: employer fees.

Existing law requires the State Department of Health Services to establish and maintain an occupational lead poisoning prevention program to, in part, develop a system for monitoring, follow-up, investigation, training, and regulation, relating to occupational lead poisoning prevention.

Existing law requires employers in specified industries identified by a four-digit Standard Industry Classification number established by the Department of Commerce for which the State Board of Equalization has received information from the State Department of Health Services of documented evidence of potential occupational lead poisoning, to pay an annual fee for this purpose that varies according to the number of employees and the category of industry.

Existing law authorizes the department to exempt from the payment of fees, employers that demonstrate that lead is not present in their places of employment.

This bill would require the department to adopt regulations that define a de minimis amount of lead use or disturbance, would provide that any employer who is within this definition be exempt from payment of fees, and would make other changes of a technical nature.

Ch. 721 (AB 1240) Bordonaro. Air pollution: commercial space programs.

(1) Existing law provides for the protection of the environment, including the regulation of emissions of air pollutants.

This bill would provide, applicable only to Santa Barbara County, Kern County, and San Luis Obispo County, that each commercial space program, as defined, is a separate

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

stationary air emission source if it meets certain requirements. The bill would thereby create a state-mandated local program by imposing new requirements on local agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 722 (AB 1383) Speier. Motor vehicles: consumer affairs.

Existing law governing the Department of Motor Vehicles does not require the department to prepare written material regarding consumer protection for vehicle purchasers.

This bill would require the department to make available on its Internet web site, on or before July 1, 1997, specified information to assist consumers who plan to purchase a vehicle or who have purchased a vehicle.

The bill would specify that, upon appropriation by the Legislature, money from the Consumer Fraud Protection Program Fund shall be available for the consumer protection activities of the department, including, but not limited to, expenditures by the department to finance the requirements of this bill.

Ch. 723 (AB 1626) Alpert. Personal income taxes: military income: exclusion.

The Personal Income Tax Law specifically excludes certain items from gross income.

This bill would provide, except as otherwise specified with respect to wage withholding, that certain amendments to federal income tax law, with respect to an increase in the exclusion from gross income of the combat pay of military officers, shall apply for purposes of California law on and after November 21, 1995.

This bill would also provide, for purposes of applying certain federal tax provisions to state taxes, that a qualified hazardous duty area, as defined, shall be treated in the same manner as a combat zone.

This bill would take effect immediately as a tax levy.

Ch. 724 (AB 1700) McPherson. Elections.

(1) Existing law provides various time limits and deadlines with respect to the election of officers of a newly qualified political party, the filing of a declaration of candidacy, the election of board members for the Los Alisos Water District, and with respect to ballot designations.

This bill would revise these time limits and deadlines.

(2) Existing law provides for an extension of time to file a declaration of intention to become a candidate for office, as specified, when an incumbent fails to file a declaration of intention.

This bill would provide that there shall be no extension if the failure to file by the incumbent is because he or she has served the maximum allowable number of terms, as specified. The bill would impose a state-mandated local program by requiring all filing fees and declarations of intention to be immediately forwarded to the Secretary of State.

(3) Existing law requires, with respect to initiatives and referenda, the filing of a written request must be filed with the Office of the Attorney General for the preparation of a title and summary. Under existing law, this request must include a written statement that no appropriation, as specified, was included within the text, in exchange for a campaign contribution or pledge, as specified.

This bill would delete the requirement for the written statement.

(4) Existing law requires the signed consent of a person, other than the author, whose name appears in a ballot argument or a rebuttal argument, to accompany the argument.

This bill would delete the consent requirement.

(5) Existing law relating to elections contains various incorrect or obsolete statutory references and redundancies.

This bill would correct these incorrect statutory references, delete the obsolete references and redundancies, and would make other clarifying technical changes to existing law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^2/_3$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^2/_3$ vote.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 725 (AB 1703) McPherson. Elections procedures.

(1) Existing law requires county and city elections officials to issue various preelection notices and to perform various acts in relation to these requirements, as specified.

This bill would revise these requirements by repealing and reenacting them, as specified.

(2) Existing law prescribes the duties of county elections officials in connection with the formation of county election precincts, the consolidation of precincts, precinct boundary changes, and the designation of polling places.

This bill would extend these requirements to all jurisdictions of the state. It would revise the precinct formation requirements by repealing and reenacting them, as specified. It would also revise various requirements relating to precinct consolidations and precinct boundary changes, as specified.

(3) Existing law prescribes the duties of precinct board members and county elections officials in connection with their appointment, among other things.

This bill would extend these requirements to all jurisdictions of the state and would revise various provisions by changing and deleting various requirements, as specified.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 726 (AB 2032) Frusetta. Agriculture: California Seafood Marketing, Research, and Development Act.

(1) The existing California Seafood Marketing, Research, and Development Act defines fisherman and fisheries for purposes of the act.

This bill would include in the definition of fisherman the registered owner or lessee of a vessel that is used to land any species of fish or shellfish from a fishery for commercial purposes under certain conditions. The bill would redefine fisheries to include those fisheries added to the fisheries subject to the act pursuant to referendum.

(2) The existing act declares the purposes of the act.

This bill would add to those purposes the education of the public with respect to the nutritional, economic value, and importance of California seafood and the fishing industry.

(3) Under the existing act, the California Seafood Council consists of 11 voting members representing receivers, processors, and fishermen in certain fisheries. The existing act also provides for the addition of fisheries subject to the act and the eligibility of representatives of those additional fisheries for appointment to the voting membership of the council.

This bill, instead, would provide for the addition of representatives of the added fisheries to the voting membership of the council.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) The existing act provides for the selection of a chair and vice chair and for the membership of the executive committee of the council.

This bill, instead, would provide for the selection of a president, vice president, treasurer, and president emeritus of the council and would conform the membership of the executive committee to that change.

(5) Under the existing act, the Secretary of Food and Agriculture is required to conduct, or is authorized to cause the council to conduct, programs of education, research, or public information designed to accomplish any of specified purposes.

This bill would revise and recast those purposes.

(6) The act provides for the payment of fees by fishermen, receivers, and processors subject to the act to the secretary.

This bill would, instead, require the fees to be paid directly to the council on behalf of the secretary.

The bill would exempt from payment of fees a fisherman who is selling to the public who lands, or a receiver who receives, less than 10,000 pounds in the aggregate of fish or shellfish in any year in all fisheries combined subject to the act or whose annual fees are less than $25.

The bill would require any fees payable pursuant to the act to be paid on or before February 28 of the year following the landing or receipt of the fish or shellfish.

The bill would revise the authorization for investment of the fees received pursuant to the act.

The bill would provide for collection of deficiencies and would provide for criminal and civil penalties for violations of the act, thereby imposing a state-mandated local program by creating a new crime.

(7) Existing law authorizes the secretary to destroy the host plant of an oriental fruit fly and to pay the owner the value of the plant.

This bill would repeal those provisions.

(8) Existing law provides for the removal or destruction of Meyer lemon plants in any area where citrus fruit is being produced commercially and in which the secretary determines that the planting, growing, cultivation, or maintenance of Meyer lemon plants is, or is liable to be, dangerous or detrimental to the commercial production of other citrus fruits.

This bill would repeal those provisions.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 727 (AB 2155) Kuehl. Restraining orders: minors.

Existing law requires that when a minor, or a person for whom a conservator is appointed, is a party to an action or proceeding, he or she shall appear by a guardian or conservator of the estate, or by a guardian ad litem, as specified.

This bill would create an exception to this provision to permit a minor who is 12 years of age or older to appear in court, without a guardian, counsel, or guardian ad litem, for the purpose of obtaining a protective order against a person with whom the petitioner is having or has had a dating or engagement relationship, as specified. The bill would also authorize the court to appoint a guardian ad litem to assist the minor in obtaining the restraining order, as specified. The bill would require the court to send a copy of the order to at least one parent or guardian under specified circumstances, thereby imposing a state-mandated local program by requiring increased duties of local officials.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 728 (AB 2193) Rainey. Sacramento-San Joaquin Delta: Egeria densa.

(1) Existing law designates the Department of Boating and Waterways as the lead agency in cooperating with other agencies in controlling water hyacinth in the Sacramento-San Joaquin Delta, its tributaries, and the Suisun Marsh.

This bill also would designate the department as the lead agency in cooperating with other agencies in controlling Egeria densa in those areas. The bill would provide that up to $5,000 per year of the funds available for expenditure by the Department of Fish and Game to implement the bill shall be paid from the Harbors and Watercraft Revolving Fund.

The bill would require the department and the Contra Costa Water District to develop a memorandum of understanding establishing the parameters for any control program proposed to take place in Rock Slough. The bill, thereby, would impose a state-mandated local program.

The bill would provide that it does not apply to any control program proposed for Sand Mound Slough.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 729 (AB 2333) Bates. School bonds.

(1) Existing law authorizes the governing board of a school district or community college district to order the county superintendent of schools to call an election and submit to the electors of the district the question of whether bonds of the district shall be issued and sold for the purpose of raising money for specified purposes.

This bill would authorize the governing board of the Peralta Community College District to order the county superintendent of schools to call an election and submit to the electors of the district the question of whether the proceeds of previously authorized but unissued bonds of the district may be used for a purpose in addition to the purposes for which the previously approved bonds were authorized by the electors, and if the question submitted to the electors is approved by $^2/_3$ of those voting, the bill would authorize the district to use those proceeds for those additional purposes. The bill would impose a state-mandated local program to the extent the county superintendent of schools is required to call an election and an election is conducted.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 730 (AB 2359) Bustamante. Change of names: felons and registered sex offenders.

(1) Existing law recognizes a person's common law right to change his or her name and provides a procedure by which a court will recognize that change.

This bill would provide that no person shall be allowed to file an application for change of name who is under the jurisdiction of the Department of Corrections, except as specified, or a registered sex offender, as specified unless the court determines that it is in the best interests of justice to grant the application. The bill additionally would provide that if the application is granted, the individual required to register shall notify specified law enforcement officials within 10 days. The bill would also impose a state-mandated local program by requiring a court to verify the status of a name-change applicant, and by imposing increased duties on local law enforcement officials as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $500,000 statewide and other procedures for claims whose statewide costs exceed $500,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 731 (AB 2482) Pringle. Amusement rides: park rules.

(1) Existing law authorizes a merchant, theater owner, or library employee to detain a person for a reasonable period of time for specified prohibited conduct. Existing law also makes it a misdemeanor punishable as specified, to intentionally interfere with, or obstruct the operation of, a lawful business.

This bill would authorize a person employed by an amusement park to detain a person for a reasonable time for the purpose of conducting an investigation in a reasonable manner whenever the person employed by the amusement park has probable cause to believe the person to be detained is violating lawful amusement park rules; provide that if any person admitted to an amusement park refuses or fails to follow lawful amusement park rules, after being so informed, then an amusement park employee may request that the person either comply or leave the premises, and if the person refuses to leave the premises or comply with lawful park rules, then the person shall be deemed to be intentionally interfering with and obstructing those attempting to carry on a lawful business, thereby imposing a state-mandated local program by expanding the definition of a crime; and provide that in any civil action brought by any person resulting from a detention or an arrest by a person employed by an amusement park, it shall be a defense to that action that the amusement park employee detaining or arresting the person had probable cause to believe that the person was not following lawful amusement park rules and that the amusement park employee acted reasonably under all the circumstances.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 732 (AB 2558) Alby. Solid waste: unlawful acts.

(1) Existing law, the California Integrated Waste Management Act of 1989, establishes an integrated waste management program administered by the California Integrated Waste Management Board.

The act authorizes the imposition of specified damages or civil penalties for the unauthorized removal of specified recyclable materials. A violation of those provisions is also a misdemeanor, punishable as prescribed.

This bill would also authorize the imposition of those damages or civil penalties for the removal of specified segregated waste materials.

The bill would specify, that, unless otherwise provided by contract, from the time that recyclable materials are placed at the designated recycling location by any commercial or industrial entity, the recyclable materials are the property of the authorized recycling agent.

The bill would authorize a court, in any civil action by a recycling agent against a person alleged to have violated these provisions for a second, or subsequent time, in any 12-month period, to either allow treble damages, as measured by the market value of the recycled material removed, or award a civil penalty of not more than $5,000, whichever is greater, for each unauthorized removal against the unauthorized person removing the recyclable material.

The bill would permit a violation where the value of the stolen material is more than $50, but less than $400, to be charged as either a misdemeanor or an infraction, thereby imposing a state-mandated local program by redefining a crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would authorize the board to award special enforcement grants to cities or counties to support pilot programs designed to develop and evaluate enforcement techniques to reduce the theft of recyclable materials from commercial, industrial, or other nonresidential establishments.

The bill would declare that the enforcement policies of the act shall be applied equally and without distinction to publicly owned or operated, and to privately owned or operated, solid waste facilities.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 733 (AB 2564) Goldsmith. Juveniles: drug or alcohol programs.

Existing law requires a minor who is declared a ward of the juvenile court by reason of certain controlled substance or alcohol violations, in counties providing such programs, to participate in, and successfully complete, an alcohol or drug education program, or both those programs, as designated by the court.

The bill would also authorize an Assessment, Orientation, and Volunteer Mentor Pilot Program in San Diego County, as specified, regarding drug and alcohol use and abuse by minors declared to be wards of the juvenile court in that county. The bill would require an evaluation of the pilot program and submission of the results to the Legislature and state alcohol and drug programs.

Ch. 734 (AB 2645) Morrissey. Security services: firearms.

Existing law requires the licensure of persons acting as private patrol operators and alarm companies. Existing law requires licensees, security guards, and patrol persons, and persons licensed, registered, or designated under the law relating to alarm companies, who carry firearms in the course of business or employment, to complete a course of training and be issued a firearms permit. Existing law requires investigation and screening as a condition of issuance or renewal. Existing law provides that the firearms qualification card issued to these persons expires after one year.

This bill would provide that the firearms qualification card expires after 2 years rather than one year. The bill would increase the firearms qualification and requalification fees to reflect the longer period before the expiration of the qualification card.

The bill would provide that a firearms eligibility determination may include the submission of the applicant's fingerprints to the United States Federal Bureau of Investigation. The bill would also incorporate changes in Section 12001 of the Penal Code made by Chapter 128 of the Statutes of 1996.

Ch. 735 (AB 2788) Baldwin. Vehicles: prisoner-of-war license plates.

Existing law authorizes a person to apply for special prisoner-of-war license plates, as specified, if the person is eligible to apply for vehicle license plates and is a former prisoner of war. The Department of Motor Vehicles is required to charge for those plates the same fees that it charges for environmental license plates, except as specified, including a $25 fee for the retention of those plates when payment of renewal fees is not required.

This bill would exempt special prisoner of war plates from the retention fee specified above.

Ch. 736 (AB 2809) Rainey. Toxic air contaminants: landfill gas control methods.

Existing law required the State Air Resources Board to hold a public hearing by June 30, 1989, to review the potential nature, extent, and severity of public exposure to known and suspected toxic air contaminants emitted by vehicular sources in this state. Following that public hearing, the state board was required to reassess the pollutant review schedule under the toxic air contaminant program and to revise the schedule, as necessary. The state board also was required, by June 30, 1990, to hold a public hearing to consider a plan for reducing public exposure to toxic air contaminants emitted by motor vehicles.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal those provisions.

The bill would require the state board, by January 1, 1998, in consultation with the South Coast Air Quality Management District and other districts, to conduct a study and prepare a report thereon of specified matters pertaining to emissions from landfill gas. The bill would make related legislative findings and declarations and make a conforming change.

Ch. 737 (AB 2830) Bordonaro. Agriculture: grapes: objective measurement survey.

Existing law provides that if the Secretary of Food and Agriculture determines by March 1, of any year, that an objective measurement survey of the grape crop is desired by the processors and producers of grapes for wine, and if the producers and processors of grapes for raisins agree to pay their proportionate share of the cost of the survey, the secretary shall conduct the survey.

This bill would repeal that provision.

Ch. 738 (AB 3042) Takasugi. Controlled substances: Controlled Substance Utilization Review and Evaluation System (CURES): prescription blank fees.

Existing law relating to prescriptions for controlled substances requires the Department of Justice to furnish prescription blanks in triplicate to any practitioner authorized to write a prescription for Schedule II controlled substances and prohibits the transfer or possession of these prescription blanks, except as specified. Existing law further provides that the Department of Justice may charge a fee for these prescription blanks, not to exceed the actual costs of printing and distribution.

This bill would require, contingent upon the availability of adequate funds, the Department of Justice to establish the Controlled Substance Utilization Review and Evaluation System (CURES) for the electronic monitoring of the prescribing and dispensing of Schedule II controlled substances by all practitioners authorized to prescribe or dispense these controlled substances. This bill would require that CURES be implemented as a 3-year pilot project commencing on July 1, 1997, to be administered concurrently with the existing triplicate process to examine the comparative efficiencies between the two systems. This bill would also provide that the Department of Justice may charge a fee for the prescription blanks that is sufficient to reimburse the department for the actual costs associated with the preparation, processing, and filing of specified forms. This bill would require that the Department of Justice, in consultation with the Board of Pharmacy, submit a report to the Legislature by January 1, 1999, on the CURES pilot project.

This bill would appropriate $1,050,000 from the Pharmacy Board Contingent Fund to the Board of Pharmacy for the purpose of entering into an interagency agreement with the Department of Justice for the implementation and operation of CURES.

This bill would provide that these provisions shall become inoperative on July 1, 2000.

Ch. 739 (AB 3073) Granlund. Marriage, family, and child counselors.

Existing law provides for the licensing of marriage, family, and child counselors. The licensing provisions are administered by the Board of Behavioral Science Examiners. Existing law requires that applicants for licensure obtain certain supervised experience as a trainee or intern, including a designated amount of direct supervisor contact applicable to all hours gained on or after January 1, 1995.

This bill would make clarifying changes to the latter provision.

Existing law authorizes the board to issue a license to any person who holds a license issued by a board of marriage counselor examiners or corresponding authority of any state if the requirements for that licensure are, in its opinion, substantially equivalent to the licensing requirements of this state, a specified fee is paid, and the person completes certain coursework or training.

This bill, instead, would authorize the board to issue a license to any person who has held for at least two years a license issued by a board of marriage counselor examiners, marriage therapist examiners, or corresponding authority of any state if the education and supervised experience requirements are substantially equivalent to those of this state. The bill would additionally require that the person successfully complete the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

written and oral licensing examinations administered in this state and pay the applicable fees.

Under existing law, the licensing examination fees for marriage, family, and child counselors are collected by the board and credited to the Behavioral Science Examiners Fund. Existing law continuously appropriates the moneys in the Behavioral Science Examiners Fund.

Since this bill would authorize an increase in the amount of moneys in the fund, this bill would, thereby, make an appropriation.

Ch. 740 (AB 3085) Olberg. Timber operations: licenses.

(1) Existing law, the Z'berg-Nejedly Forest Practice Act of 1973, prohibits any person from engaging in timber operations without a license. The act requires the State Board of Forestry to prescribe the form and content of the application for a timber operator license, establish procedures, and require a reasonable filing fee. The act authorizes the board to deny a license for specified reasons, including if the applicant is not the real person in interest, and to suspend or revoke a license under specified circumstances. The act provides that a license is valid only during the calendar year in which it is issued.

A willful violation of the act, or of the rules and regulations adopted by the board pursuant to the act, is a crime.

This bill would authorize the board to issue a limited timber operator license for the commercial cutting or removal of Christmas trees, tanbark, fuelwood, root crown burls, posts, or split products.

The bill would specifically prohibit the amount of the application filing fee from exceeding the amount necessary to administer timber operator licensing. The bill would, except as specified, require first-time applicants for a license to furnish to the board proof of education and experience, as prescribed, and, except as specified, require all applicants to file with the Director of Forestry and Fire Protection written evidence of insurance policy coverage, as specified.

The bill would define "real person in interest."

The bill would provide that the failure or refusal of the applicant to pay a judgment arising from a violation, to keep current the insurance policy coverage, or to reimburse the Department of Forestry and Fire Protection for certain enforcement costs incurred by the department, are additional grounds for license denial.

The bill would instead require a timber operator license to be valid for a time period not to exceed 2 calendar years, as prescribed by the board.

The bill would authorize the board to issue a temporary license to permit an applicant for the renewal of a license to perform those timber operations that are necessary to correct any violation that has resulted in a denial of license renewal.

The bill would authorize the board to deny an application for license renewal regarding a license first issued on or after January 1, 1997, if the real person in interest has not met certain education and work experience requirements.

The bill, except as specified, would prohibit the real person in interest, during the period in which a license has been suspended or revoked, from having any pecuniary interest in, or any responsibility for the conduct of, the timber operations of any person licensed under the act, thereby imposing a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 741 (AB 3090) Machado. Horseracing: fairs.

Existing law permits the California Horse Racing Board to allocate horseracing days for mixed breed meetings at the California Exposition and State Fair and at district agricultural association racing facilities in the northern zone, subject to the condition that horseracing days may not be allocated for any meeting between July 1 and October 31.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would additionally permit the board to allocate horseracing days for combined fair horseracing meetings, and would permit dates to be allocated for a combined fair horseracing meeting between July 1 and October 31.

Ch. 742 (AB 3095) Villaraigosa. Vehicles: fines: amnesty program.

(1) Existing law authorizes any county to operate an amnesty program for delinquent fines and bail imposed for an infraction or misdemeanor violation of the Vehicle Code, except parking and other specified violations, that were delinquent on or before April 1, 1991.

This bill would authorize a county to operate an amnesty program for fines and bail that have been delinquent for not less than 6 months as of the date upon which the program commences and were imposed for an infraction or misdemeanor violation of the Vehicle Code, except parking violations and other specified violations.

The bill would authorize any person owing a fine or bail that is eligible for amnesty under the program to pay to the municipal or juvenile court specified amounts scheduled by the court in full satisfaction of the delinquent fine or bail, with a specified exception relating to civil assessments.

The bill would require the program to be implemented by the courts of the county on a one-time basis and conducted in accordance with Judicial Council guidelines for a period of not less than 120 days and not longer than 6 months from the date the court initiates the program. The bill would also require the county to file, not later than 6 months after the termination of the program, a written report with the Assembly Committee on Judiciary and the Senate Committee on Judiciary summarizing the program's results, as specified.

The bill would require the total amount of funds collected by the county pursuant to the program to be deposited in the county treasury until 150% of the cost of operating the amnesty program, excluding capital expenditures, have been so deposited. Thereafter, the bill would provide for the distribution of those revenues to other governmental entities and the county in accordance with a schedule.

The bill would make a statement as to legislative intent.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 743 (AB 3098) Campbell. Diversion.

Existing law provides procedures for the diversion of specified controlled substance offenses, specified offenses filed as misdemeanors, specified offenses of a parent or legal guardian with respect to his or her minor child, and offenses committed by developmentally disabled persons. These procedures provide that upon the successful completion of a diversion program, the arrest upon which the diversion was based shall be deemed to have never occurred. The procedures also provide that the divertee may indicate in response to any question concerning his or her prior record that he or she was not arrested or diverted for the offense. Existing law also requires that the divertee be advised that, regardless of his or her successful completion of diversion, the arrest upon which the diversion was based may be disclosed by the Department of Justice in response to any peace officer application request made within 5 years of the arrest, and that completion of the diversion program does not relieve him or her of the obligation to disclose the arrest in response to any direct question contained in any questionnaire or application for a position as a peace officer made within 5 years of the arrest.

This bill would repeal this 5-year limit for offenses which did not result in conviction but for which a postarrest diversion program was completed. The bill would make other conforming and clarifying changes.

This bill would incorporate additional changes in Section 1000.5 of the Penal Code, proposed by SB 1369, to be operative only if SB 1369 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 744 (AB 3277) Setencich. Prisons.

A specified item of the Budget Act of 1996 appropriated $6,512,000 from the Public Safety Bond Act of 1996 to the Department of Corrections for construction of a transportation hub at the Deuel Vocational Institution at Tracy and for minor capital outlay projects.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law establishes the 1990 Prison Construction Fund. Moneys in the fund are required to be used for the acquisition, construction, renovation, remodeling, and deferred maintenance of state youth and adult correctional facilities.

This bill would delete the above appropriation in the Budget Act of 1996 and instead would appropriate $6,512,000 from the 1990 Prison Construction Fund for construction of a transportation hub at the Deuel Vocational Institution at Tracy and for minor capital outlay projects.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 745 (AB 3294) Bordonaro. Juvenile records: civil litigation.

Under existing law, if, after a hearing upon a petition for the sealing of juvenile records, the court finds that since the termination of jurisdiction or action the person has not been convicted of a felony or a misdemeanor involving moral turpitude and that the person has been rehabilitated, the court is required to order all records, papers, and exhibits related to the person's case sealed.

This bill would require the court also to find that the petition indicates that there is no currently pending civil litigation directly relating to, or arising from, the criminal act that caused the records to be created, before sealing the records, and would prohibit the court from sealing the records until the civil case is closed.

Ch. 746 (AB 3462) Takasugi. Emergency telephone users surcharge: equipment bills.

Existing law imposes a surcharge on amounts paid by every person in the state for intrastate telephone communication service. Amounts paid under those provisions are spent solely for specified purposes, including payment of bills submitted to the Department of General Services by service suppliers or communications equipment companies for the installation and ongoing costs of specified services in connection with the "911" emergency telephone number system. Existing law limits the payment amounts to the contract or established tariff rates for the costs of telephone equipment and requires that those amounts not exceed approved incremental costs.

This bill would instead require that the Department of General Services negotiate supplier pricing, that the department review and approve each line item of a request for funding, and that the amounts paid not exceed pricing submitted by the supplier and approved by the department, except under specified circumstances that require preapproval by the department.

Ch. 747 (AB 3475) Committee on Environmental Safety and Toxic Materials. Environmental laboratories.

(1) Existing law authorizes the State Department of Health Services to certify environmental laboratories that perform various analyses. Existing law authorizes the department to adopt specific regulations for this purpose.

This bill, in addition, would require the department to adopt regulations governing the application criteria for the acceptance and approval of 3rd-party laboratory accreditation organizations, for purposes of certifying environmental laboratories. The bill would require the department to adopt regulations that establish fees for laboratories that obtain certification under 3rd-party laboratory accreditation and contain procedures for the inspection and auditing of these laboratories. The bill would require the department to propose the regulations on or before June 30, 1998, and to recognize 3rd-party laboratory accreditation on or before December 31, 1998.

(2) Existing law requires the department to issue a certificate in various fields of testing if the owner of an environmental laboratory files an application for certification and the department finds there is full compliance with the certification provisions and related regulations.

This bill would provide that evidence of the satisfactory completion of accreditation by a 3rd-party laboratory accreditation organization approved by the department pursuant to regulations shall be forwarded to the department for review and approval prior to issuance of a certificate by the department to the owner of a laboratory accredited by a 3rd-party laboratory accreditation organization. The bill would require the automatic revocation by the department of a certificate of a laboratory accredited

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

by a 3rd-party laboratory accreditation organization whenever that laboratory is no longer accredited by the organization and would set forth a process for immediate recertification in this case. It would permit the department to adopt related regulations.

(3) Existing law sets forth notice and hearing procedures that apply whenever an application for certification of an environmental laboratory is denied or a certificate is revoked.

This bill would extend these notice and hearing procedures to apply when the department denies or revokes the approval of a 3rd-party laboratory accreditation organization.

(4) Existing law requires that an environmental laboratory pay an annual certification fee, consisting of a basic nonrefundable fee and an additional fee for certification in each one of certain designated fields of testing for which accreditation is sought.

This bill would require an environmental laboratory that is applying for or has received certification pursuant to provisions authorizing 3rd-party laboratory accreditation to pay an initial fee at the time of application and an annual fee thereafter.

(5) Existing law provides that any person who operates a laboratory that performs work that requires certification under prescribed provisions, who is not certified to do so, may be enjoined from so doing by any court of competent jurisdiction upon suit by the department. Existing law also provides that when the department determines that any person has engaged in, or is engaged in, any act or practice that constitutes a violation of the provisions regulating the certification of environmental laboratories, or any regulation or order adopted thereunder, the state may bring an action in the superior court for an order enjoining these practices or for an order directing compliance and affording any further relief that may be required to ensure compliance with these provisions.

This bill would provide that any organization that represents itself as a state-approved 3rd-party laboratory accreditation organization without being granted approval by the department would be in violation of the provisions regulating the certification of environmental laboratories and could be enjoined from making those representations by any court of competent jurisdiction at the suit of the department. The bill would provide that nothing in this provision would limit the department from exercising any other remedy for a violation of the provisions. The bill also would provide that nothing in this provision would limit the activities of any 3rd-party laboratory accreditation organization within the state, whether or not approved pursuant to these provisions, if the purpose is not to obtain state environmental testing laboratory certification.

Ch. 748 (SB 91) M. Thompson. Local costs: claims.

Existing law requires the state to reimburse local agencies for state-mandated costs.

This bill would appropriate $104,991,498 from the General Fund to the Controller for the payment of claims for reimbursement of state-mandated costs and would appropriate $16,000 from the Restitution Fund to the Controller to cover deficiencies in prior appropriations as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 749 (SB 109) Kopp. Local agencies: finance.

(1) Existing law authorizes the legislative body of a local agency to delegate its authority to invest or reinvest local agency funds or to sell or exchange securities purchased to the treasurer of the local agency.

This bill would limit the authorization to delegate authority to a one-year period, renewable annually subject to review.

(2) Under existing law, the county treasurer is a trustee and fiduciary subject to the prudent investor standard.

This bill would provide that with regard to county funds deposited in the county treasury, the board of supervisors is the agent of the county who serves as a fiduciary and is subject to the prudent investor standard, unless a delegation has occurred, as described in (1) above, in which case the county treasurer would be the agent of the county with respect to these funds, serve as a fiduciary, and be subject to the prudent investor standard rather than the board of supervisors. The bill would also provide that with regard to funds deposited in the county treasury by local agencies other than the county,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the county treasurer would serve as a fiduciary subject to the prudent investor standard. The bill would also provide that with regard to funds invested by a local agency, generally, the governing body of that agency is a trustee and fiduciary subject to the prudent investor standard, except in the case of county funds invested in the county treasury when a delegation has occurred, as described in (1) above.

(3) Existing law regulates various aspects of the financial affairs of local agencies, as defined, including the categories of instruments in which local agency funds may be invested.

This bill would require the making of any decision that involves borrowing of $100,000 or more to be considered as a separate item of business on the agenda of the meeting of the legislative body of the local agency. By requiring this consideration as a separate item of business, this bill would impose a state-mandated local program.

(4) Existing law requires the treasurer or chief fiscal officer to annually render to the legislative body of the local agency a statement of investment policy, which the legislative body is required to consider at a public meeting.

This bill would, in the case of county government, instead require the board of supervisors to review and approve the statement of investment policy at a public meeting.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 750 (SB 207) Polanco. Telecommunications services: rates.

(1) Under existing law, the rates of public utilities, including telephone corporations are established by the Public Utilities Commission. Existing law requires the commission to develop and implement a program to establish a fair and equitable local rate structure designed to reduce any disparity in rates charged by small independent telephone corporations serving rural and small metropolitan areas. The program is required to be aided by transfer payments to those corporations.

This bill would require the commission to maintain this program and would also require the commission, on or before October 1, 1996, to develop and implement a new program to provide for transfer payments to telephone corporations serving areas where the cost of providing services exceeds rates charged by providers, as determined by the commission. The commission would be required to structure the program so that the amount of each transfer payment reasonably equals the value of the benefits to the transferring entities and their subscribers. The provisions would become inoperative on January 1, 2001.

Because violations of the commission's orders, decisions, rules, or other requirements regarding this program would be punishable as misdemeanors, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 751 (SB 217) Beverly. State employees.

(1) Under existing law, legislative employees who had 2 or more years of service, were employed by the Legislature on January 1, 1991, and who resigned or were released from service due to a force reduction before January 1, 1992, are eligible to take promotional civil service examinations for 3 years following their resignation or release.

This bill would instead authorize legislative employees with 2 or more years of service who were employed with the Legislature at any point in time and who resign or are

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

released from service at any point in time to take promotional civil service examinations for one year following their resignation or release. This bill would also specify that a person who establishes eligibility on a promotional civil service list and who has resigned or been released from the office of the Auditor General or the office of the Legislative Analyst, as specified, maintains that eligibility for the duration of the particular list.

(2) Under existing law persons holding, for two or more consecutive years, nonelected exempt positions in the executive branch of government, excluding those positions whose salaries are set by statute, are eligible to apply for promotional civil service examinations, including, but not limited to, examinations for career executive assignments for which they meet the minimum qualifications as prescribed by the class specification. Persons who meet this requirement and resign from exempt employment of the executive branch of government have the same rights and eligibility to take promotional civil service examinations and maintain promotional list eligibility as is provided to permanent civil service employees who resign from civil service.

This bill would instead make persons who meet this requirement and who resign or are released from exempt employment of the executive branch of government, eligible to take promotional civil service examinations for one year following their resignation or release.

This bill would also provide that a person who establishes eligibility on a promotional civil service list, as specified, maintains that eligibility for the duration of that particular list.

(3) Existing civil service law provides that a legislative or nonelected exempt executive branch employee who meets specified requirements, was subsequently employed in a career executive assignment position, and whose career executive assignment appointment was terminated, shall be eligible to take promotional civil service examinations, including examinations for career executive assignments, to the same extent as a legislative or nonelected exempt executive branch employee who had not been employed in the career executive assignment position.

This bill would revise this provision to instead provide that a legislative or nonelected exempt executive branch employee who is appointed to a career executive assignment pursuant to specified provisions, shall be eligible to compete in his or her department's promotional examinations for which he or she meets the minimum qualifications. The bill would provide that when such an employee's career executive assignment is terminated by the appointing power, he or she shall have the right to request a deferred examination for any promotional eligible list for his or her department in existence at the time of the appointment termination if he or she meets the minimum qualifications specified for the promotional examination, and the request is made within a prescribed time. It would also require the department to administer the deferred examination within 30 days of the date of the request.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 752 (SB 828) Alquist. Radionuclide air emissions.

(1) Existing law, the Radiation Control Law, imposes requirements on the management of sources of ionizing radiation and requires the State Department of Health Services to issue licenses. A violation of the act, including a violation of a regulation adopted pursuant to the act, is a crime.

This bill would authorize the department to establish a program to enable the state to receive federal approval to implement and enforce emission standards for radionuclides pursuant to the federal Clean Air Act and would define terms for that purpose. The bill would deem specified current federal regulations to be the regulations of the department and would specify a procedure for the review of amendments to those federal regulations that become effective on or after January 1, 1997. The bill would authorize the department to adopt any other regulation necessary to establish, implement, and enforce a program for the regulation of radionuclide air emissions, consistent with the federal act. The bill would authorize the department to charge a fee to each owner or operator of a facility subject to those federal regulations and would require the fees to be deposited in the Radiation Control Fund, for expenditure, upon appropriation by the Legislature, to implement the bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Since a violation of the regulations adopted by the department would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 753 (SB 893) O'Connell. Parks and recreation: Wilcox property: acquisition.

Existing law establishes the Public Resources Account in the Cigarette and Tobacco Products Surtax Fund to provide funding for, among other things, programs for environmental conservation, protection, restoration, and enhancement, and the enhancement of state and local parks and recreation.

This bill would appropriate the sum of $198,000 from the account to the Department of Parks and Recreation for a grant to a local agency or a nonprofit organization for the acquisition of the Wilcox Property in the City of Santa Barbara.

Ch. 754 (SB 1155) Maddy. Solid waste: rigid plastic packaging containers: cosmetics and food.

Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, requires every rigid plastic packaging container, as defined, which is sold or offered for sale in the state to meet specified criteria, commencing January 1, 1995, except as specified.

Rigid plastic packaging containers that are manufactured for use with cosmetics or food, as defined in specified federal law, are exempt, until January 1, 1997, from meeting those criteria, subject to compliance with specified requirements.

This bill would include cosmetics and food within other provisions that exempt specified rigid plastic packaging containers from meeting those criteria. The bill would specify that, if recycled, the containers would continue to be required to be included in calculating recycling rates.

Ch. 755 (SB 1307) Calderon. Public water systems.

Existing law requires the State Department of Health Services to adopt regulations covering water testing, the monitoring of contaminants, the frequency and method of sampling and testing, the reporting of results, and other matters as may be necessary to determine and assure the quality of domestic water supplies. Existing law in part defines "public water system," for this purpose, to mean a system for the provision of piped water to the public for human consumption which has 5 or more service connections.

Existing law requires the Office of Environmental Health Hazard Assessment to establish recommended public health goals for contaminants in drinking water pursuant to prescribed criteria.

This bill would repeal this provision and would make related conforming changes.

Existing law requires the department to adopt additional primary drinking water standards for contaminants found in drinking water, to review the standards at least every 5 years, and to amend if prescribed conditions occur. Existing law authorizes the department to require a specific treatment in lieu of establishing the maximum contaminant level.

This bill would repeal those provisions, recast them, and reenact them as modified.

Existing law requires the department to develop and publish a list of all existing or proposed maximum contaminant levels that are set at a level substantially less stringent than their corresponding recommended public health goals.

This bill would repeal this provision.

Existing law requires certain public water systems that exceed the contaminant goals to comply with certain requirements related to a water improvement plan, including review and approval of the plan by the department.

This bill would repeal this provision.

Existing law sets forth the various components of the July 1, 1991, California Safe Drinking Water Plan.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, instead, require the submission of a plan once every 5 years.

This bill would require the department to take all reasonable measures to reduce the risk to public health from waterborne illnesses in drinking water caused by certain micro-organisms, to conduct or order comprehensive sanitary surveys to identify related risks, to ensure that its related action plan is comprehensively implemented, and to report to the Legislature on or before January 1, 1998.

This bill would require the department to adopt standards that are not less stringent than the federal Safe Drinking Water Act drinking water standards, and would require related hearings.

This bill would require the office to adopt a public health goal for contaminants in drinking water based exclusively on public health considerations, and would require public water systems to use the federal national maximum contaminant level pending adoption of a public health goal by the office.

This bill would require every public water system to annually prepare a consumer confidence report and to mail or deliver a copy to every consumer as a condition of its operating permit, except as provided.

This bill would require certain public water systems that detect one or more contaminants that exceed a public health goal to prepare a brief written report.

By adding new duties to local agencies operating public water systems, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 756 (SB 1442) Marks. Support enforcement.

Existing law precludes state professional licensing agencies from issuing or renewing a license if the licensee is on a list of persons who have not complied with support orders. The unauthorized use of information received by such an agency is a misdemeanor.

This bill would specifically apply this provision to any commercial fishing license issued by the Department of Fish and Game, and make a clarifying change. The bill would impose a state-mandated local program by adding to the duties of district attorneys and by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 757 (SB 1445) Kelley. Environmental impact reports: pollution control financing.

(1) Under existing law, the California Environmental Quality Act, a lead agency, as defined, is required to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on any project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

This bill would exempt from the act the refinancing or defeasance of existing bond indebtedness of the California Pollution Control Financing Authority Solid Waste

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Revenue Bonds by the County of San Diego or any agency within the county, and would specify related matters.

The bill would impose a state-mandated local program by imposing new duties on local lead agencies with regard to determining the applicability of, and filing and posting notice of, the exemption.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 758 (SB 1454) Kelley. Home economics careers and technology vocational education.

Existing law authorizes the issuance of teaching credentials in home economics. Existing law also requires the Superintendent of Public Instruction to inform county offices of education and school districts of the availability of the consumer and home economics education model performance standards and framework and to provide copies upon request.

This bill would state the Legislature's recognition of the importance of home economics careers and technology to the welfare and economic stability of the state, and would declare the Legislature's intent to provide a comprehensive home economics careers and technology vocational education program within the public school system.

This bill would create within the State Department of Education a Home Economics Careers and Technology Vocational Education Unit to assist school districts in the establishment and maintenance of home economics careers and technology education programs, and would require a staffing level of the unit of at least 3.3 personnel years.

This bill would require the department to accomplish the staffing of the Home Economics Careers and Technology Vocational Education Unit by reassigning priorities in staff assignments within the department in a manner so that there will be no new costs to the state as a consequence.

This bill would authorize the department to adopt rules and regulations to implement the bill, and would prohibit the rules or regulations from creating any new state mandates. The bill would also state the legislative intent that school districts follow the guidelines set forth in the bill.

This bill would require that the curriculum of school districts that choose to participate in the state program of home economics careers and technology vocational education contain specified components. The bill would require that student learning activities developed to supplement these components contribute to the grade of the participating student, as specified.

This bill would require the Superintendent of Public Instruction to establish and convene an advisory committee comprised of representatives from agencies and organizations that serve individuals and families as well as the diverse areas of home economics careers and technology and related industries for the purpose of reviewing the availability of, and to assess the effectiveness of, existing state programs in home economics careers and technology. The bill would require the committee's recommendations be submitted to the Legislature and the State Board of Education. The bill would require the committee be appointed on July 1, 1997, and cease to exist on January 1, 1998, with committee members serving without compensation and travel per diem.

This bill would establish a statewide home economics careers and technology curriculum and professional development project to be established by contract, awarded through a request for proposal procedure, at a university with a program as specified, and be funded by available federal funds. The bill would have the project operate under the direction of the Home Economics Careers and Technology Vocational Education Unit.

Ch. 759 (SB 1885) Costa. Milk production.

(1) Existing law specifies that a dairy farm is not required to have a mechanical sterilizer, mechanical cooler, or milk house or room, if specified conditions are satisfied.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal these provisions. In addition, the bill would prohibit, with certain exceptions, until January 1, 1999, a dairy cow farm that was marketing market milk on August 1, 1996, from marketing manufacturing milk, unless the dairy elects to do so during specified periods.

(2) Existing law governing market milk and cream sets forth provisions relating to degrading and exclusion based upon dairy score.

This bill, instead, would change these provisions to relate to restricted use and exclusion based upon dairy score. The bill also would make related changes.

(3) Existing law governs manufacturing milk and cream.

This bill would add restricted use market milk, as defined, to those provisions.

(4) Existing law includes provisions governing manufacturing cream grades and standards.

This bill would repeal these provisions.

(5) Existing law governing market milk provides for the establishment of minimum prices and stabilization and marketing plans.

This bill would specify that whenever a pooling plan is in effect as provided by specified provisions of law, all market milk received by pool handlers shall be obligated to the pool at the applicable minimum price established in the Stabilization and Marketing Plans based on the classified usage of that milk. In addition, the bill would provide that handlers may pay producers for restricted use market milk at prices that are less than the amount credited to those handlers for restricted use market milk by the pooling plan.

(6) Existing law governing milk provides for equalization pools and milk pooling. With regard to equalization pools, existing law requires a formulation committee to make recommendations to the Secretary of Food and Agriculture for inclusion in the pooling plan and requires the secretary to include in the pooling plans specified provisions.

With regard to equalization pools, this bill also would provide that any governmental agency that produces, processes, and consumes in its own facilities only its own production shall not be a pool plant and shall operate outside the pool for certain purposes unless the plant notifies the secretary of its election to participate in the pool.

(7) Under existing law relating to milk pooling, each producer is required to be paid the highest usage for that amount of his or her fluid milk production which is equal to his or her pool quota, as specified.

The bill would specify, with regard to equalization pools and milk pooling, that in calculating the pool value, the volume of milk that has been classified as restricted use market milk shall be credited to the handler at the class 4a or class 4b price, whichever is lower.

(8) In addition, the bill would include legislative declarations that the changes made to existing law described in (6) and (7) are nonsubstantive changes and shall be incorporated by the secretary into the pooling plan for market milk as nonsubstantive changes.

Ch. 760 (SB 1935) Monteith. Merced Union High School District.

Existing law authorizes a school district to expend funds from its Adult Education Fund only for direct instructional costs, as defined, direct support costs, as defined, and indirect costs, as defined. The definition of direct support costs includes facilities costs for nondistrict-owned facilities that exclusively house adult education programs and facilities costs for the acquisition of facilities originally acquired by adult education programs, or for the restoration of those facilities, including costs for debt service for the acquisition or restoration of the facility. Existing law excludes specified building areas from the area of adequate school construction existing in an applicant school district under the Leroy F. Greene State School Building Lease-Purchase Law of 1976.

This bill would declare the intent of the Legislature to allow the Merced Union High School District greater flexibility in the use of its school facilities. This bill would allow the Merced Union High School District to use money in its Adult Education Fund to purchase up to 20 existing district-owned classrooms for the exclusive use of its adult education program. The bill would require that the Adult Education Fund money used by the school district to purchase those existing district-owned classrooms be placed in a separate account after the purchase is completed to be used by the school district solely

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

for the purpose of purchasing classrooms for use by students in grades 9 to 12, inclusive. The school district would be required to purchase, with the funds in the separate account, an equal number of classrooms for use by students in grades 9 to 12, inclusive, as the number of classrooms purchased for the adult education program. The bill would provide that if the funds in the separate account are insufficient to purchase an equal number of classrooms for use by students in grades 9 to 12, inclusive, then the school district may use district general fund money to complete the purchase of the classrooms. The bill would further provide that if there are funds remaining in the separate account after the purchase of an equal number of classrooms for use by students in grades 9 to 12, inclusive, those funds shall be transferred back to the Adult Education Fund.

The bill would provide that the classrooms purchased pursuant to this provision shall meet certain structural safety standards imposed by law for earthquake safety. This bill also would exclude any adult education classrooms purchased pursuant to this provision from the area of adequate school construction existing in the school district under the Leroy F. Greene State School Building Lease-Purchase Law of 1976. This bill would declare that this provision would not expand the school district's eligibility for funding under the Public Education Facilities Bond Act of 1996.

Ch. 761 (SB 1995) O'Connell. Family law: child custody: mediation: domestic violence.

(1) Under existing law, whenever directed by the court, a prescribed custody investigation is required to be conducted by a court-appointed investigator and a report submitted to the court and to the parties or their attorneys. "Court-appointed investigator" means a probation officer, domestic relations investigator, or court-appointed evaluator, as specified. Existing law permits introduction of the report into evidence upon stipulation of the parties.

This bill, on and after January 1, 1998, would preclude the appointment of a person as a court-appointed investigator unless the person has completed a specified domestic violence training program. This bill would require the Judicial Council to draft a statewide rule of court requiring domestic violence training for all court-appointed persons who evaluate or investigate child custody matters.

The bill would require the Judicial Council to adopt standards for full and partial court-connected evaluations, investigations, and assessments related to child custody, and to adopt procedural guidelines for cross-examination of court-appointed investigators, as specified. It would require the adoption of these standards and guidelines by January 1, 1999. This bill would also make a clarifying change.

(2) Under existing law, a court-appointed investigator is required to be present at trial and may be called to testify as to any matter investigated. Under existing law, the testimony of the court-appointed investigator is subject to proper questioning and is competent evidence.

This bill would delete this provision. This bill would provide that no statement or conduct shall be held to constitute a waiver of the right to cross-examine the court-appointed investigator, except as otherwise provided.

(3) Existing law specifies minimum continuing education requirements for supervising and associate counselors of conciliation in family conciliation courts.

This bill would make these minimum requirements also applicable to any person hired on or after January 1, 1998, who is responsible for clinical supervision of evaluators, investigators, or mediators or for supervising or administering prescribed Family Court Services programs.

(4) Existing law requires the court to set a matter for mediation if it appears from the face of the petition or other application for custody or visitation, or for modification of such an order, that either or both of those issues are contested.

This bill would require Family Court Services to handle domestic violence cases in accordance with a separate written protocol approved by the Judicial Council. This bill would also require the Judicial Council to adopt guidelines for nonmediation services that counties may offer, as specified, to parents who have been unable to resolve their disputes.

(5) Under existing law, a support person may accompany either party to any proceeding to obtain a domestic violence prevention order and may accompany a party

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

protected by a domestic violence prevention order during a mediation session. Under existing law, a support person may also accompany a party in court where there are allegations or threats of domestic violence.

This bill would specify that any individual may be selected to act as a support person, and that no certification, training, or other special qualification is required. The bill would provide that a support person shall be permitted to accompany such a party to the proceedings and sessions described above, and would include mediation orientations and separate mediation sessions within the sessions to which a support person shall be permitted to accompany a party protected by a domestic violence prevention order. The bill would make related changes.

(6) Because the bill would impose increased duties on local officials, it would create a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 762 (SB 2014) Alquist. Unclaimed property.

(1) Under the Unclaimed Property Law, personal property generally escheats to the state after being unclaimed for 3 years, with specified exceptions.

Under provisions of existing law that generally govern the terms and conditions of retail installment sales agreements between buyers and sellers, an outstanding credit balance that remains unrefundable for 7 years from the date it was created in the buyer's account escheats to the state as property described in the Unclaimed Property Law.

Under provisions of existing law that generally govern obligations secured by a mortgage or deed of trust, the sum of any specified balance due which remains due and which is remitted to any issuer of a corporate bond in conjunction with the issuance of the bond escheats to the state after 7 years pursuant to the Unclaimed Property Law.

This bill would revise these provisions to conform to the 3-year escheat period in the Unclaimed Property Law.

(2) The Unclaimed Property Law requires every person holding funds or other property escheated to the state under the Unclaimed Property Law to make a prescribed report to the Controller. Existing law requires this report to include, among other things, the name, if known, and last known address, if any, of each person appearing from the records of the holder to be the owner of any escheated property valued at $25 or more, except as specified.

This bill would revise this requirement to be applicable to ownership of escheated property valued at $50 or more.

(3) Existing law also requires the report specified in (2) to include prescribed information regarding any intangible property, except that items of value under $25 each may be reported in aggregate.

This bill would extend the applicability of this exception for items of value under $50 each.

(4) Existing law requires, within one year after payment or delivery of escheated property, the Controller to cause a notice to be published, as specified, in a newspaper of general circulation that the Controller determines is most likely to give notice to the apparent owner of the property. Existing law requires this notice to have a prescribed title and contain the names as specified.

This bill would revise these provisions to, among other things, delete the requirement that the notice contain the names and revise the title accordingly.

(5) Existing law requires the Controller to mail notice of escheated property valued at $25 or more, within 180 days of payment or delivery thereof to the Controller, to each person listed in a specified annual report to the Controller.

This bill would eliminate this general requirement but would require notice to be sent in specified cases.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) Existing law requires every person who files a report specified in (2) to pay or deliver to the Controller all escheated property specified in the report when the report is filed.

This bill would require, on and after January 1, 1997, a payment of unclaimed cash in an amount of at least $20,000 to be made by electronic funds transfer pursuant to regulations adopted by the Controller. This bill would provide that any person required to pay cash by electronic funds transfer who makes the payment by means other than an authorized electronic funds transfer shall be liable for a prescribed civil penalty, in addition to any other penalty provided by existing law.

(7) Existing law provides that all money received under the Unclaimed Property Law shall be deposited in the Unclaimed Property Fund, which is continuously appropriated for specified purposes.

By increasing the amounts that may be deposited in the fund, this bill would make an appropriation.

(8) Existing law requires certain business associations to make a reasonable effort to notify by mail the apparent owner or owners, if any, of certain financial accounts owing to that person. Existing law also requires the Controller to notify by mail the apparent owner or owners, if any, of property subject to escheat, as specified.

This bill would require specified other persons holding property which is valued at $50 or more and subject to escheat to make reasonable efforts to notify the apparent owner or owners, if any, that the property will escheat, as specified. This bill would delete this mailed notice requirement for the Controller.

(9) The Unclaimed Property Law requires escheated securities listed on an established stock exchange to be sold at the prevailing prices on that exchange within one year following receipt of the securities by the Controller.

This bill would instead require that the sale be made within two years following receipt.

(10) Existing law specifies monetary penalties for the willful failure to render any report or perform other duties pursuant to the law. Existing law specifies monetary penalties or imprisonment for willful refusal to pay or deliver escheated property.

This bill would revise and recast these provisions to, among other things, increase the amounts of the monetary penalties and delete this penalty of imprisonment.

Ch. 763 (SB 2174) Polanco. Air pollution: emission inventory update.

(1) Existing law requires the State Air Resources Board to inventory sources of air pollution within the air basins of the state, as specified.

This bill would require the state board, not later than January 1, 1998, and triennially thereafter, to approve, following a public hearing, an update to the emission inventory, that would include specified information. The bill would make legislative findings and declarations.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 764 (AB 474) Hauser. Commercial fishing: Dungeness crab: pink shrimp: vessel permits.

(1) Existing law regulates the taking, possession, and sale of Dungeness crab for commercial purposes.

AB 2452, if enacted, among other things, would additionally provide that Dungeness crab may be taken in Fish and Game Districts 10, 16, 17, and 18 for commercial purposes only during the period of the day extending from one hour before sunrise to one hour after sunset between November 15 and December 15, inclusive, and, thereafter, until June 30, at any time of day.

This bill would, if AB 2452 is enacted, instead provide that Dungeness crab may be brought aboard a vessel in those districts only during those times.

(2) AB 2452, if enacted, among other things, would prohibit any person from using a vessel for which a Dungeness crab vessel permit has been issued in this state to take,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

possess, or land Dungeness crab for commercial purposes in any zone or area of ocean waters offshore Oregon or Washington if Oregon or Washington has delayed the opening of the commercial Dungeness crab season in that zone or area until after December 1. This prohibition would remain in effect until a date that is after the date to which the opening was delayed in that zone or area.

This bill would, if AB 2452 is enacted, make that prohibition remain in effect until 30 days after the date to which the opening was delayed in that zone or area.

(3) Existing law, operative until January 1, 1997, limits the persons who may obtain a permit to take and land shrimp and prawns with trawl nets to persons who possessed a trawl net shrimp and prawn permit, as specified, in any previous permit year. Existing law also limits the issuance of the permits to operators of vessels used for that purpose. A pink shrimp permit is authorized to be issued only to applicants who possessed a valid pink shrimp permit in the immediately preceding permit year.

This bill would extend the operation of those provisions to April 1, 1999.

(4) Because a violation of the requirements for a vessel permit would be a new crime under other existing provisions of law during the extended period, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) Because existing law would require the revenue from the permits to be deposited in the Fish and Game Preservation Fund, which is continuously appropriated to the department to carry out the Fish and Game Code, the bill would make an appropriation.

Ch. 765 (AB 1487) Pringle. Environmental quality: pipelines.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act.

The act exempts from the act specified projects within a public right-of-way for the installation of a new pipeline, or the maintenance, repair, restoration, reconditioning, relocation, replacement, removal, or demolition of an existing pipeline.

This bill would, additionally, exempt from the act certain projects consisting of the inspection, maintenance, repair, restoration, reconditioning, relocation, replacement, or removal of an existing pipeline, as defined, or equipment directly attached to the pipeline, under certain conditions. The bill would require the person undertaking the project to notify affected public agencies and other specified persons and receive permission for access to private property. The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to determining the applicability of, and filing and posting notice of, the exemption.

(2) This bill would provide that it shall become operative only if Assembly Bill 349 of the 1995–96 Regular Session is enacted and becomes effective on or before January 1, 1997.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 766 (AB 1849) Sher. Air pollution: volatile organic compounds.

Existing law requires the State Air Resources Board to adopt regulations to achieve the maximum feasible reduction in reactive organic compounds emitted by consumer products, if the state board determines that adequate data exists for the state board to adopt the regulations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would apply those provisions to volatile organic compounds instead of reactive organic compounds and would, instead, require the state board to adopt those regulations if the state board determines that adequate data exist to establish that the regulations are necessary to attain state and federal ambient air quality standards and are commercially and technologically feasible and necessary. The bill would prohibit a regulation from being adopted which requires the elimination of a product form.

The bill would limit the adoption or enforcement of regulations relating to emissions from aerosol adhesives by air pollution control districts and air quality management districts, except as specified, and would require the state board to adopt more stringent limits for those emissions if found to be feasible, as prescribed.

The bill would authorize the sale of a previously manufactured consumer product for 3 years from the effective date of any such state board regulation, under specified conditions.

Ch. 767 (AB 2135) Mazzoni. Charter schools.

Existing law establishes a procedure for the establishment of charter schools that receive certain public funding and that are not subject to the laws generally governing school districts. Existing law requires the State Department of Education to review the educational effectiveness of the charter school approach and, by January 1, 1999, report to the Legislature with recommendations to modify, expand, or terminate that approach.

This bill would, in addition, require the Legislative Analyst to contract for an interim evaluation of the effectiveness of the charter school approach and, on or before November 1, 1997, to make the report to the Legislature and the Governor. The bill would require the Legislative Analyst to convene an advisory panel, as specified, to assist the office in the interim evaluation. The bill would require that the evaluation include specified factors. The bill would appropriate $146,000 to the Superintendent of Public Instruction, without regard to fiscal year, for interagency transfer to the Legislative Analyst's office to pay for the contract for the interim evaluation and for the costs associated with convening the advisory panel.

Ch. 768 (AB 2161) Baldwin. Veteran benefits: Filipino veterans.

Existing law defines "veteran" for the purposes of the various programs bestowing benefits upon veterans, including, but not limited to, educational assistance for dependents of veterans, provisions for burial of veterans, the veterans farm and home purchase program, and disabled veterans participation goals for professional bond services and state contracts.

This bill would include within the definition of "veteran" for those purposes certain members of the forces of the Commonwealth of the Philippines. This bill would make other changes of a technical, nonsubstantive nature.

By expanding the scope of the county requirements for burial of veterans who die without adequate resources, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 769 (AB 2238) W. Murray. Private cemeteries: restrictions based on race, ethnicity or gender.

Existing law permits a private cemetery to limit the use of all property within its cemetery.

This bill would provide that nothing in that provision shall be construed to permit a private cemetery to discriminate against any person based on race or gender regarding the use of any property within the cemetery. The bill would provide that this does not preclude the establishment or operation of cemeteries for purposes of furthering

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

interests related to association where the purpose and effect is not to discriminate against persons on the basis of race or gender.

This bill would not apply to Native American tribal burial grounds or cemeteries not subject to state jurisdiction.

Ch. 770 (AB 2461) Takasugi. Harbor districts.

(1) Existing law authorizes a harbor district to acquire, construct, own, operate, control, or develop any harbor works or facilities within the limits of its boundaries.

This bill, in addition, would authorize a harbor district that does not operate on tide and submerged lands that have been granted by legislative enactment, to carry out those activities within or outside the boundaries of the district.

(2) Under existing law, harbor districts may acquire, purchase, take over, construct, maintain, operate, develop, and regulate grain elevators, bunkering facilities, belt or other railroads, floating plants, lighterage, towage facilities, and any other facilities, aids, equipment, or property necessary for, or incident to, the development and operation of a harbor or for the accommodation and promotion of commerce, navigation, or fishery in the harbor district.

This bill, in addition, would authorize the Oxnard Harbor District to acquire, purchase, take over, construct, maintain, operate, develop, and regulate airports and roads, with the prior consent of various entities, as specified.

(3) Existing law authorizes a harbor district to issue revenue bonds for the acquisition and construction, or acquisition or construction, of any improvements of property or facilities within its authority. Existing law also authorizes the district to issue parity revenue bonds if the district determines, among other things, that the net revenues of the district for the prior fiscal year have amounted to at least 125% of the maximum annual debt service in any fiscal year thereafter, including all indebtedness incurred as the result of additional issues of bonds.

This bill would authorize the district, for purposes of calculating the net revenues of the district for the prior fiscal year, to include up to 75% of the district's estimated additional annual revenue to be derived from (a) any additions, improvements, or extensions to the district's properties, works, or facilities which were not in service during the prior fiscal year, and that were, or are to be, made using funds from any source, or (b) any increase in the charges made for the district's services that became effective prior to the authorization of the parity revenue bonds, but which were not in effect during the prior fiscal year.

(4) Existing law authorizes a harbor district board to issue revenue bonds for the acquisition and construction, or acquisition or construction, of any authorized improvements of property or facilities.

This bill also would authorize the district to issue revenue bond anticipation notes, on a negotiated or a competitive bid basis.

Ch. 771 (AB 2525) Miller. Air pollution: offsets: attainment plans: permits.

(1) Under existing law, increases in emissions of air pollutants at a stationary source located in an air pollution control district or air quality management district may be offset by emission reductions credited to a stationary source located in another district, as specified, and any credited offset is required to be approved by a resolution adopted by the governing board of the upwind and downwind districts, after considering the impact of the offset, as prescribed.

This bill would authorize each district governing board to delegate to its air pollution control officer the board's authority to approve credited offsets.

(2) Existing law prescribes various requirements to be met by districts having serious, or severe air pollution.

This bill would delete certain of those requirements and subject others to a demonstration by the state board that they will substantially expedite attainment of air quality standards.

(3) Existing law requires a district with moderate air pollution that has not met specified criteria for a nonattainment-transitional designation by December 31, 1997, to comply with requirements prescribed for districts with serious air pollution.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete that provision and instead require a district with moderate air pollution to comply with those requirements upon a specified demonstration by the state board. The bill would revise the criteria for designation of a district as nonattainment-transitional, as specified. The bill would impose a state-mandated local program by requiring districts so designated to consider additional criteria in reviewing plans for attaining the state ozone ambient air quality standard. The bill would make related changes.

(4) Existing law authorizes the districts to establish a permit system for sources of air pollution, as specified.

This bill would prohibit a district from requiring emission offsets for any emission increase at a source that results from the installation, operation, or other implementation of any emission control device or technique used to comply with a district, state, or federal emission control requirement, except as specified.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 772 (AB 2775) Miller. State civil service: examinations of eligibles.

Existing civil service law provides that eligible employment lists shall be established as a result of free competitive examinations open to all persons who lawfully may be appointed to any position within the class for which these examinations are held and who meet the minimum qualifications requisite to the performance of the duties of that position as prescribed by the specifications for the class or by State Personnel Board rule.

This bill would authorize the board, notwithstanding this provision, to limit the size of candidate groups in entry-level and nonpromotional examinations when doing so would be in the best interest of the state and effective competition can occur among a smaller number of applicants.

Ch. 773 (AB 2902) Vasconcellos. Pupils.

Existing law, the Uniform Supervision of International Student Exchange Visitor Placement Organizations Act of 1994, requires international student exchange visitor placement organizations to register with the Attorney General, as specified, and to provide certain information to participating students, host families, and school districts. Existing law authorizes a school district to require proof of registration with the Attorney General from any organization seeking to place an international student exchange visitor, as defined, in the school district as a condition to agreeing to enroll that student.

This bill would require the Superintendent of Public Instruction to develop and implement a plan to help achieve the objectives in a specified agreement between the United States and Japan providing for the educational exchange of high school pupils. The bill would state the intent of the Legislature that the plan be developed and implemented no later than June 1, 1997. The bill would require costs of the plan to be funded through donations from the private sector. The bill would prohibit the appropriation of state funds to the State Department of Education for the purpose of developing and implementing the plan.

Ch. 774 (AB 2920) Brewer. Vehicles: youth buses.

(1) Existing law defines a "youth bus" as any bus, other than a schoolbus, designed for and when actually carrying not more than 16 persons and the driver, used to transport children at or below the 12th-grade level directly from a public or private school to an organized nonschool-related youth activity within 25 miles of the school or directly from a location which provides the organized nonschool-related youth activity to a public or private school within 25 miles of that location. It is an infraction for any person to drive any youth bus unless there is displayed therein a specified inspection certificate issued by the Department of the California Highway Patrol. It is also an infraction for any person to operate a youth bus without having in possession a valid endorsed driver's license, as specified, and a youth bus driver's certificate issued by the Department of Motor Vehicles.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, additionally, authorize a youth bus to be used to transport children at or below the 12th-grade level to or from their place of residence if the driver has met specified requirements, relating to youth bus certificates, and received additional instruction and training approved by the Department of the California Highway Patrol.

By expanding the provisions regulating youth buses and the requirements for the drivers of youth buses, the bill would subject additional persons and buses to those provisions and requirements, thereby enlarging the scope of certain crimes and imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 775 (AB 2937) Brulte. Minor violations: air pollution: water quality.

(1) Existing law authorizes the State Air Resources Board, air pollution control and air quality management districts, the State Water Resources Control Board, and the California regional water quality control boards to conduct inspections for violations of law.

This bill would require the State Air Resources Board and the air pollution control and air quality management districts to adopt regulations classifying minor violations. The bill would require the State Water Resources Control Board and the regional water quality control boards to determine the types of violations that are minor violations and would require the state water board to adopt regulations or state policy for water quality, as prescribed. The bill would define the term "notice to comply" and would require a representative of those agencies who, in the course of conducting an inspection, detects a minor violation, to issue a notice to comply, as specified. The bill would prescribe related requirements and procedures. These provisions would be repealed on January 1, 2001.

The bill would require the state air board and state water board to report to the Legislature by January 1, 2000, regarding implementation of the bill.

Since the bill would make a false statement of compliance submitted under those procedures a crime pursuant to specified provisions, the bill would impose a state-mandated local program by creating a new crime.

Also, with regard to air pollution control districts and air quality management districts, the bill would impose a state-mandated local program by imposing new requirements upon those local agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 776 (AB 3044) Olberg. Oil spills: repair or maintenance projects: consolidated permits.

(1) Under existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, the administrator for oil spill response exercises authority pertaining to the prevention of, and response to, oil spills in marine waters and pertaining to oil spill contingency planning.

This bill would require the administrator to coordinate all actions required by state or local agencies, as defined, to assess injury to, and provide full mitigation for, or restore, rehabilitate, or replace, natural resources, that are damaged by an oil spill. The bill would require the responsible party to be liable for all coordination costs incurred by the administrator, and would specify related matters.

(2) Various environmental protection laws regulate the condition of facilities and structures to prevent injury to persons or damage to the environment. Existing law, the Environmental Protection Permit Reform Act of 1993, requires the Secretary for Environmental Protection to establish an administrative process which may be used, at the request of a permit applicant for a project, defined as an activity, the conduct of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

which requires an environmental permit from 2 or more environmental agencies, as defined, for the designation of a consolidated permit agency for the project.

This bill would authorize any responsible party, as defined, to request a permit assistance center operated by the office of the secretary to designate a consolidated permit agency, as defined, for a repair or maintenance project, as defined, to administer the processing and issuance of a consolidated permit for the project. The bill would prescribe related procedures, specify related matters, and make related legislative findings and declarations.

Ch. 777 (AB 3048) Olberg. Air pollution.

(1) Existing law authorizes the South Coast Air Quality Management District to require an employer to provide rideshare data bases and other specified programs related to a trip reduction plan, but prohibits the south coast district from requiring employers to submit a trip reduction plan.

This bill would repeal those provisions authorizing the district to require an employer to provide rideshare data bases and other specified programs related to a trip reduction plan.

(2) Existing law authorizes air pollution control districts and air quality management districts to encourage or require the use of ridesharing, vanpooling, flexible work hours, or other measures which reduce the number or length of vehicle trips.

This bill would delete the provisions relative to encouraging or requiring the use of ridesharing, vanpooling, or flexible work hours.

(3) Existing law requires a district that adopts specified rules and regulations relative to mobile source emission reduction to establish a process to approve or disapprove employer programs to produce equivalent emission reductions through other specified means.

This bill would repeal those provisions.

(4) Existing law requires districts to comply with specified requirements when adopting or amending rules or regulations establishing employer-based trip reduction requirements.

This bill would delete those provisions.

(5) Existing law requires district plans to be designed to reduce emissions by 5% per year based on the 1987 level of emissions.

This bill would require that reduction based on the 1990 level of emissions.

(6) Existing law requires the State Air Resources Board to establish a methodology and guidelines for establishing equivalent emission reductions.

This bill would delete those provisions with regard to methodology and, with regard to guidelines, would require guidelines only for equivalent emission reductions for mobile source emission control strategies and transportation control measures.

(7) Existing law prescribes various requirements to be met by districts having moderate, serious, severe, or extreme air pollution.

This bill would delete certain of those requirements, subject other requirements to a demonstration by the state board that they will substantially expedite the attainment of air quality standards, and require district attainment plans to include a specified stationary source control program.

(8) Existing law requires districts, every 3 years, to assess air quality programs, revise attainment plans, and report to the state board.

This bill would revise those requirements, as specified.

(9) Existing law classifies districts as nonattainment-transitional if a state standard is not violated within the air basin, as specified.

This bill would apply that classification instead if a state standard is not violated within the district, as specified, and would make related changes.

(10) Existing law requires the Bay Area Air Quality Management District to allocate certain motor vehicle registration fee revenues for certain trip reduction programs.

This bill would instead require those fees to be used for ridesharing programs.

The bill would delete provisions that prohibit the imposition of a fee on a school district that is required to submit a trip reduction plan to certain districts and that require certain costs to instead be recovered from those motor vehicle registration fee revenues.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(11) The bill would impose new duties on the districts, thereby imposing a state-mandated local program.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 778 (AB 3086) Olberg. Education: American government and civics.

(1) Existing law prohibits a pupil from receiving a high school diploma unless he or she completes coursework that, among other things, includes a one semester course in American government and civics.

The bill would require all high school pupils to read and be taught the Declaration of Independence, the United States Constitution, including the Bill of Rights, the Federalist Papers, the Emancipation Proclamation, the Gettysburg Address, and George Washington's Farewell Address, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 779 (AB 3152) Martinez. Telephones.

Existing law requires the commission to design and implement programs whereby each telephone corporation shall provide a telecommunications device capable of servicing the needs of individuals who are deaf or hearing impaired, as specified, and to establish a rate recovery mechanism through a surcharge to be in effect until January 1, 1997.

This bill would extend the surcharge until January 1, 2001, and require the commission to design and implement a program under which each telephone corporation would be required to provide publicly available telephones equipped with telecommunications devices capable of servicing the needs of the deaf or hearing impaired in existing buildings, structures, facilities, and public accommodations.

The bill would also repeal an obsolete provision of law.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 780 (AB 3153) Aguiar. Electricity rates.

Existing law requires the Public Utilities Commission to direct each public utility electrical corporation to renew its efforts to reduce the rates charged heavy industrial customers to a level competitive with other states, and requires each electrical corporation to report to the commission no later than June 30, 1995, on those measures or practices it has identified that would permit it to reduce its firm service rates for heavy industrial customers to the level of its interruptible or curtailable service rates provided to those customers as of January 30, 1993.

These provisions are to be repealed on January 1, 1999.

This bill would remove the reporting requirement and would extend the operation of these provisions indefinitely.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 781 (AB 3187) Martinez. Sales and use taxes: exemptions: thrift store merchandise.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax.

This bill would additionally exempt from state and local sales and use taxes, until January 1, 2002, used pieces of clothing, household items, or other retail items sold by thrift stores operated by a nonprofit organization, as defined, if the purpose of that thrift store is to obtain funding for medical and social services provided to individuals with a chronic, life-threatening illness, as defined, by the nonprofit organization.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 782 (AB 3223) Brown. Education: schools.

(1) Existing law authorizes the governing board of any school district to admit pupils residing in another school district to attend any school in that district, as specified. Under existing law, the school district of choice is credited, as to pupils admitted to the district under this authority, with a corresponding increase in average daily attendance for state apportionment purposes. Existing law requires that, for any school district of choice that is a basic aid district, as defined, commencing with the 1995–96 fiscal year, the Superintendent of Public Instruction calculate an apportionment of state funds for that basic aid district that provides 70% of the district revenue limit, calculated as specified, that would have been apportioned to the school district of residence for any average daily attendance credited, as specified.

This bill would also require the Superintendent of Public Instruction to calculate this apportionment of state funds with respect to any pupil of a charter school located within a district of choice who attended a public school in a district other than a basic aid district immediately before transferring to a charter school in a school district of choice.

(2) Existing law, the Mello-Roos Community Facilities Act of 1982 (the act), authorizes the formation of community facilities districts and the issuance of bonds and the levying of special taxes thereunder to finance designated public facilities and services. Existing law defines "services" for the purposes of the Mello-Roos Community Facilities Act of 1982.

This bill would add maintenance services for elementary and secondary schoolsites and structures as services that may be financed under the act. The bill would prohibit the issuance of bonds under the act to fund certain services, including, among others, maintenance services for elementary and secondary schoolsites and structures, and would define services for purposes of the act to mean specified categories of services and exclude certain activities or facilities.

Ch. 783 (AB 3228) Campbell. American Indian early childhood education.

The American Indian Early Childhood Education Program, which became inoperative on June 30, 1995, and was repealed by operation of law on January 1, 1996, authorizes the governing board of specified rural school districts to apply to the Superintendent of Public Instruction for a project in American Indian early childhood education.

This bill would reenact the program until December 31, 2001, but would eliminate the requirement that participating school districts be rural school districts.

This bill would require the State Department of Education to prepare a request for proposal in consultation with an advisory committee consisting of a representative from

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

one or more American Indian organizations, the Department of Finance, and the Legislative Analyst's Office, to contract for an independent evaluation of this program to be performed on or before December 31, 2000.

Ch. 784 (AB 3255) Caldera. Redevelopment: disaster relief.

Under existing constitutional law and the Community Redevelopment Law, a redevelopment plan may provide for the allocation of taxes between taxing agencies and the redevelopment agency in order to apportion taxation produced from the total assessed value of taxable property within the redevelopment area as shown upon the assessment roll used in connection with the taxation of the property by the taxing agency, last equalized prior to the effective date of the ordinance approving the redevelopment plan. Under the existing Community Redevelopment Disaster Project Law, a community may, under specified circumstances, establish a redevelopment agency for the purpose of redeveloping property in which a disaster has occurred.

This bill would provide that, notwithstanding existing provisions of the Community Redevelopment Law, with respect to a redevelopment plan within the City of Los Angeles, and any other municipality that has a redevelopment project area affected by the 1994 Northridge earthquake, the definitions of "last equalized assessment roll" and "base-year assessment roll" for purposes of the division of property tax revenues between the affected redevelopment agencies and other jurisdictions would be revised to mean the assessment roll as reduced in accordance with specified provisions of the Revenue and Taxation Code relating to disaster relief.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances relating to redevelopment project areas affected by the Northridge earthquake of January 1994, that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

This bill would state that it is to take effect immediately as an urgency statute.

Ch. 785 (AB 3320) Speier. Telephone, mail order, and catalog sales: Internet.

Existing law regulates the sale, lease, or offering for sale or lease of goods or services by telephone, mail order, or catalog.

This bill would expand those provisions to apply to sales or leases conducted using the Internet. The bill would require a vendor conducting business through the Internet or any other electronic means of communication to make specified disclosures to a buyer. A violation of these provisions would be a misdemeanor, thus the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 786 (AB 3384) Knox. Charter schools.

(1) Existing law permits loans, as specified, to be made to newly organized elementary, high school, and unified school districts from the School District Organization Revolving Fund.

This bill would create the Charter School Revolving Loan Fund in the State Treasury to loan money to school districts for charter schools that are not a conversion of an existing school, as specified, and would provide the fund be comprised of federal funds, as specified, and any other funds appropriated or transferred to the fund. The bill would continuously appropriate funds in the fund, and require the Superintendent of Public Instruction to deposit $114,000 of specified federal funds appropriated in the Budget Act of 1996 into the Charter School Revolving Loan Fund. The bill would also permit the Superintendent of Public Instruction to transfer additional specified federal funds appropriated in the Budget Act of 1996 to the Charter School Revolving Loan Fund upon approval by the Department of Finance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law specifies the elements that must be contained in the charter for a charter school.

This bill would require that the charter for a charter school specify the procedures to be followed by the charter school and the entity granting the charter to resolve disputes relating to provisions of the charter.

(3) Existing law requires charter schools to meet statewide performance standards and conduct pupil assessments pursuant to a statute that has been repealed.

This bill would require charter schools to meet the statewide performance standards and conduct pupil assessments pursuant to the Leroy Greene California Assessment of Academic Achievement Act.

(4) Existing law requires the meetings of the legislative body of a local agency to be open and public, except as specified. Existing law also requires the governing board of a school district to hold a public hearing on the provisions of a charter submitted to the board with a petition requesting approval for a charter school.

This bill would require that all meetings of the governing board of the school district, a specified review panel, and the county board of education at which the granting, revocation, appeal, or renewal of a charter petition is discussed to comply with the Ralph M. Brown Act.

(5) This bill would incorporate additional amendments to Section 47610 of the Education Code proposed by AB 66 to be operative only if AB 66 and this bill are both enacted and become effective as specified and this bill is enacted last.

Ch. 787 (AB 632) Katz. Firearms.

(1) Under existing law, a person who carries a concealed firearm on his or her person, as specified, or within any vehicle, as specified, is guilty of carrying a concealed firearm punishable as a misdemeanor or a felony. This offense is punishable only as a felony where the person previously has been convicted of a felony or a specified firearms offense.

This bill would also make this offense punishable only as a felony in the circumstance where the firearm is stolen and the person knew or had reasonable cause to believe that it was stolen, or the person is an active participant in a criminal street gang, as defined, or the person is not in lawful possession of the firearm, as defined, or is within a class of persons prohibited by specified provisions from possessing or acquiring a firearm. By increasing the punishment of an existing crime, this bill would create a state-mandated local program.

(2) Existing law provides that every person who carries a loaded firearm on his or her person or in a vehicle while in any public place or on any public street, as specified, is guilty of a misdemeanor.

This bill would provide that a person who violates this provision is guilty of carrying a loaded firearm. The bill would make this offense punishable as a felony if the violation involves any circumstance described in (1) above, thereby imposing a state-mandated local program by increasing the punishment of an existing crime.

(3) Under existing law, every person who has been convicted previously of carrying a loaded firearm in violation of (2) and who carries a loaded firearm on his or her person or in a vehicle while in any public place or on any public street, as specified, is guilty of a public offense punishable by imprisonment in the state prison or in a county jail not exceeding one year. Existing law also specifies that, notwithstanding this provision, any person who has been convicted previously of violating (2) and who violates this provision and is actively engaged in, or going to or from, a recreational sport, including competitive shooting that may require the use of a firearm is guilty of a misdemeanor.

This bill would repeal and recast these provisions for purposes of (2) above.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 788 (AB 1205) Morrissey. Crimes against seniors: theft: embezzlement: extortion.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that when a judgment of imprisonment is imposed and the statute specifies 3 possible terms, the court is required to impose a middle term unless there are circumstances in mitigation or aggravation of the crime that permit the imposition of the lower or upper term.

This bill would provide that upon conviction of a felony violation of the laws proscribing theft, embezzlement, or extortion, the fact that the victim was an elder or dependent adult shall be considered a circumstance in aggravation when imposing the term of imprisonment.

Ch. 789 (AB 1490) Caldera. Unlawful sexual intercourse: civil penalties.

Existing law prohibits and prescribes punishments for unlawful sexual intercourse with a minor.

This bill would also make liable for civil penalties an adult who engages in an act of unlawful sexual intercourse with a minor in violation of these provisions.

Ch. 790 (AB 2125) Figueroa. Female genital mutilation.

(1) Existing law requires the State Department of Health Services to maintain a program of maternal and child health.

This bill would require the State Department of Health Services, in consultation with the State Department of Social Services and the appropriate federal agency or department, to establish and implement appropriate education, preventative, and outreach activities, focusing on new immigrant populations that traditionally practice female genital mutilation.

(2) Under existing law, any person who, under circumstances or conditions likely to produce great bodily harm or death, willfully causes or permits a child to suffer, or inflicts on a child unjustifiable physical pain or mental suffering, or having the care or custody of a child, willfully causes or permits the person or health of the child to be injured, or willfully causes or permits the child to be placed in such a situation that its person or health is endangered, shall be punished by imprisonment in a county jail not exceeding one year, or in the state prison for 2, 4, or 6 years.

This bill would provide that a person who commits a felony violation of the above provision by an act of female genital mutilation, as defined, shall be punished by an additional term of imprisonment in the state prison for one year, in addition and consecutive to any punishment prescribed by the above provision.

(3) The bill would make legislative findings and declarations.

Ch. 791 (SB 374) Alquist. Santa Clara County Traffic Authority: termination: taxes.

(1) Existing law creates the Santa Clara County Traffic Authority and authorizes the authority to impose a $^1/_2$ of 1% transactions and use tax throughout the county for highway transportation purposes. The tax may remain in effect for a period of 10 years. Collection of the tax is administered by the State Board of Equalization. The law creating the authority is repealed 12 years from the first day upon which the tax is imposed, and the authority is terminated on that date.

This bill would declare that the repeal of the law creating the authority, and the termination of the authority, do not impair the validity of any transactions and use tax imposed by the authority prior to its termination, or the power or obligation of the State Board of Equalization to administer the collection of the tax. The bill would authorize the authority, upon notice to the State Board of Equalization, to assign and sell to another legal entity the right to receive the revenue derived from the tax. If no assignment is made, that revenue would be transmitted to the Santa Clara County Transit District, which would be the successor of the traffic authority, to be used for the purposes for which the tax was imposed.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 792 (SB 661) Maddy. Health insurance.

Existing law establishes the California Major Risk Medical Insurance Program. Under that program, health benefits are provided by the program or through participating health plans.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes copayments and deductibles.

This bill would increase the maximum authorized copayments and would permit copayments of up to $25 for plans not utilizing deductibles.

Existing law requires program contribution amounts to be established so that the average subscriber contribution is 125% of the standard average individual rates for comparable coverage.

This bill would require program contribution amounts to be established for each participating health plan, and would set forth the method of establishing subscriber contributions.

Ch. 793 (SB 879) Committee on Insurance. Insurance: disaster revenue bonds.

Existing law provides for the establishment of the California Insurance Guarantee Association, consisting generally of California property insurers. Under existing law, the association is formed to pay covered claims of insolvent member insurers. Under existing law, the association is authorized to assess members in order to pay those claims.

This bill would create the Insurance Assessment Bond Fund, which would be a continuously appropriated fund. This bill would authorize the Department of Insurance to issue revenue bonds at the request of the California Insurance Guarantee Association's board of governors made upon a declaration of emergency, and money from the sale of bonds would be deposited into the Insurance Assessment Bond Fund, to provide funds for the payment of covered claims of insolvent insurers or to make loans to the California Insurance Guarantee Association for the payment of those claims. Bonds would be secured by the pledge of revenues from insurance assessments.

The bill would authorize the California Insurance Guarantee Association to increase member premium payments to pay for that obligation.

Ch. 794 (SB 1365) Haynes. Mental health: community treatment facility pilot project.

Existing law requires the State Department of Social Services to adopt regulations by no later than December 31, 1994, for the licensing of community treatment facilities, defined as any residential facility that provides mental health treatment services to children in a group setting and that has the capacity to provide secure containment. Existing law requires the State Department of Mental Health to adopt regulations by no later than December 31, 1994, for program standards and certification of community treatment facilities. Existing law prohibits the State Department of Social Services from issuing a community treatment facility license unless the applicant has obtained certification of compliance from the State Department of Mental Health.

This bill would, notwithstanding these requirements, authorize the establishment of a pilot project community care facility at the Van Horn Regional Treatment Facility in Riverside County. The bill would authorize the program to be established on a voluntary basis by one or more of certain listed counties, and would require the participating counties to establish admissions criteria and program standards. The bill would authorize the facility to seek a license from the State Department of Social Services as a community care facility to be operated by a certain existing community care facility by a contractor selected on a competitive procurement in accordance with specified criteria. The bill would authorize the operator to apply to the department to establish a rate and receive payment as a group home.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which qualified families are provided with cash assistance, and includes the Aid to Families with Dependent Children Foster Care (AFDC-FC) program, through which certain needs of eligible children in foster care are provided. The AFDC program is administered and partially funded by the counties. The AFDC program is partially funded by federal participation and is subject to federal requirements for federal participation.

Existing law provides for the establishment of rates of reimbursement for AFDC-FC program foster care providers.

This bill would provide that any child who is otherwise eligible for AFDC-FC foster care with federal financial participation who is placed in a facility authorized by this bill shall be eligible for AFDC-FC foster care.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal its provisions as of January 1, 2000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 795 (SB 1398) Johnston. Tourism: California Tourism Marketing Act.

(1) Existing law expresses the intent of the Legislature in the enactment of the California Tourism Marketing Act, in the promotion of travel and tourism to and within the state.

This bill would make additional findings and declarations in that regard.

(2) Existing law requires the Director of the Office of Tourism to report annually to the Governor, the Legislature, and the California Tourism Commission, as specified.

This bill would revise the requirements of the report.

(3) Existing law provides procedures for the establishment of a private nonprofit corporation named the California Tourism Marketing Commission whose employees, with a specified exception, are not state employees, and sets forth the duties of the commission. Existing law requires the commissioners of the California Tourism Marketing Commission to comply with the reporting requirements of the Fair Political Practices Commission.

This bill would rename the commission the California Travel and Tourism Commission, and provide that the commission is a separate, independent California nonprofit mutual benefit corporation, whose employees, with that specified exception, are employees solely of the commission. It would revise various duties of the commission and would, among other things, require the commissioners to comply with the requirements of the Political Reform Act of 1974. To the extent that this bill would require compliance with the Political Reform Act of 1974 from persons who are not required to comply with it under existing law, this change would constitute an amendment to that act. This bill would also make findings and declarations with regard to appointed or elected commissioners.

(4) Existing law provides procedures for the establishment of an assessment upon approval of a tourism industry referendum. Existing law requires the Office of Tourism to coordinate the marketing and promotion of an initial tourism industry referendum.

This bill would delete the latter requirement with respect to the Office of Tourism. It would make various revisions in regard to the referendum and the imposition of assessments.

(5) Existing law requires the Office of Tourism to calculate the assessments due by each assessed business. Existing law also requires the Office of Tourism, subject to approval by the California Tourism Marketing Commission, to establish by regulation the procedure for assessment collection.

This bill would remove the former requirement with respect to the Office of Tourism. This bill would require the Office of Tourism, in consultation with the commission, renamed the California Travel and Tourism Commission, to establish by regulation the procedure for assessment collection.

(6) This bill would additionally expand the definition of a crime by requiring that an appeal of an assessment under certain circumstances be supported by evidence submitted under penalty of perjury, thereby imposing a state-mandated local program.

(7) Existing law makes a violation of the Political Reform Act of 1974 subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would also provide that no reimbursement is required by provisions of this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 796 (SB 1420) Kopp. Transportation: High-Speed Rail Act.

Existing law provides for the funding and regulation of rail transportation. An existing Intercity High-Speed Rail Commission was created in 1993 to conduct studies and to prepare a high-speed rail plan for the state.

This bill would create the High-Speed Rail Authority in state government. The bill would prescribe the membership of the authority, and provide for the compensation of members. The bill would require the authority to direct the development and implementation of intercity high-speed rail service that is fully coordinated with other public transportation services. The authority would be required to prepare a plan for the construction and operation of a high-speed train network for the state, consistent with and continuing the work of the Intercity High-Speed Rail Commission, and to submit that plan to the Legislature and the Governor, or to the voters of the state, for approval, except as specified. The bill would terminate the authority on December 31, 2000, unless that plan has been so approved by that date. The bill would prescribe various powers of the authority relative to planning, contracting for the construction of, financing, and operating, a high-speed rail system.

Ch. 797 (SB 1482) Mello. Health insurance counseling.

Existing law requires the Department of Aging to request proposals and select contractors to serve as counseling coordinators and providers of legal representation for the Health Insurance Counseling and Advocacy Program, and specifies that each contract shall define a geographic region to be served by the contractor.

Existing law requires the department to attempt to provide contracted services to as great a number of Medicare beneficiaries in the state as possible.

This bill would revise that requirement to eliminate the reference to the provision of provided services to as great a number of Medicare beneficiaries in the state as possible, and would specify that the department shall ensure that every region of the state is serviced by contractors.

This bill would require the Department of Aging to assess annually a fee of not less than 70¢ but not more than $1, for each person enrolled with the health care service plan as of December 31 of the previous year under a prepaid Medicare program that serves Medicare eligible beneficiaries within the state to offset the cost of counseling seniors on health maintenance organizations, and would transfer the money to the State HICAP Fund created by this bill for implementation of the statewide Health Insurance Counseling and Advocacy Program, upon appropriation.

The bill would provide that specified provisions would not become operative if SB 1895 and AB 2800 are both chaptered during the 1996 portion of the 1995–96 Regular Session of the Legislature.

Ch. 798 (SB 1553) Kelley. Pharmacy: pharmacy technicians.

Existing law provides for the licensure and discipline of pharmacists administered by the California State Board of Pharmacy. Existing law provides that a pharmacy technician is an individual who assists a registered pharmacist in a pharmacy in the performance of his or her related duties. Existing law generally authorizes a pharmacy technician to perform certain duties while assisting, and while under the direct supervision and control of, a registered pharmacist. Under existing law, a person is prohibited from acting as a pharmacy technician without first being registered with the board. The board issues a certificate to an applicant who meets any one of specified requirements. One of the requirements is that the performance of duties by a registered pharmacy technician be under the direct supervision and control of a registered pharmacist. Existing law excepts from these registration requirements persons employed or utilized as a pharmacy technician to assist in the filling of prescriptions for an inpatient of a hospital or for an inmate of a correctional facility. A violation of these provisions is a crime.

This bill would delete the above described exception from the registration requirement with regard to persons employed or utilized as a pharmacy technician to assist in the filling of prescriptions for an inpatient of a hospital or for an inmate of a correctional facility. However, the bill would provide that for purposes of the registration requirement, these persons would not be subject to the specific direct supervision and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

control requirements applied to those required to register. The bill would provide that the general supervision provision described above would still apply to these persons.

The bill would provide that the registration requirements that apply to persons employed or utilized as a pharmacy technician to assist in the filling of prescriptions for an inpatient of a hospital would not become operative until July 1, 1997. The bill would provide that the prohibition against a person acting as a pharmacy technician unless he or she is registered would not apply to persons employed or utilized as a pharmacy technician to assist in the filling of prescriptions for an inmate of a correctional facility for the first year of employment with the correctional facility.

This bill would incorporate additional changes in Section 4008.5 of the Business and Professions Code proposed by AB 2802, to be operative only if both bills are enacted and take effect, and this bill is chaptered last.

Because this bill would expand the scope of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 799 (SB 1748) Committee on Housing and Land Use. Housing and Land Use Omnibus Act of 1996.

Existing law generally regulates, pursuant to separate bodies of law, the areas of land use, housing and redevelopment.

This bill would enact the Housing and Land Use Omnibus Act of 1996 and would state legislative intent to combine several minor statutory changes relating to housing, land use and related topics into a single measure, and would make related findings and declarations.

This bill would designate specified provisions of existing law relating to imposition, adoption, and protest of various fees related to development as the Fee Mitigation Act. The bill would also designate a specific body of existing law as the Permit Streamlining Act.

Existing law relating to local planning provides that any city or county may adopt an ordinance or other regulation governing the issuance of permits for the use of property for occasional commercial filming, as specified.

This bill would specify that the legislative body of the city or county may perform the above function. In addition, the bill would relocate these provisions, to include them among the provisions of existing law relating to zoning.

Under existing law, any action brought in superior court relating to one of several land use related subjects may be subject to a mediation proceeding, as specified.

This bill would add to the potential mediation subjects specified actions relating to the Airport Land Use Commission.

Existing law relating to redevelopment provides that an unblighted noncontiguous area may not be included in a project area, unless the area is being used predominantly for relocation of owners or tenants from other noncontiguous areas in the project area, as specified, or for affordable housing, as specified.

This bill would revise the above criteria, by requiring that an unblighted noncontiguous area in a redevelopment project area be used for relocation purposes, or for the construction or rehabilitation of affordable housing.

Existing law relating to the California Housing and Infrastructure Finance Agency requires the agency to prepare an annual evaluation report, including an audit, on the agency's program of loan and bond insurance, as specified. Existing law further requires the agency to submit the annual report to the Governor and to each Member of the Legislature, no later than March 31 of each year.

This bill would instead require that the agency obtain an annual audit, but submit the above evaluation report biennially. The bill would require that audit and report be submitted to the chair and vice-chair of the Senate and Assembly housing policy committees, the Senate and Assembly budget committees, and the Joint Legislative Budget Committee, rather than to each Member of the Legislature. The bill would also

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

change the date upon which the report and audit shall be submitted to November 1, annually for the audit, and biennially for the report.

Existing law requires a city or county that imposes a building permit requirement as a condition to constructing, altering, improving, demolishing, or repairing any building or structure to print specified declarations upon a building permit, relating to building project identification, licensed contractors, owner-builders, workers' compensation, and the construction lending agency.

This bill would delete the requirement for printing these declarations upon a building permit, and would create a state-mandated local program by instead requiring the city or county to require these declarations upon the issuance of any building permit.

This bill would also make technical changes to various provisions of existing law relating to statutes of limitations for land use related actions, manufactured housing safety, the duties of the Office of Planning and Research with respect to providing planning information to local jurisdictions and the adoption of redevelopment plans. The bill would eliminate a reference to truck campers in existing law provisions relating to the payment of registration fees for manufactured homes, mobilehomes, and commercial coaches. Additionally, the bill would correct or delete obsolete statutory cross-references, and would delete references in existing law to obsolete reports, and state and federal redevelopment programs.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement is required for a specified reason.

Ch. 800 (SB 1836) Committee on Revenue and Taxation. Local government finance.

(1) SB 340 establishes an alternate procedure by which a local agency generally may sell or assign, in a transaction in which bonds will be issued and sold, all of its right, title, and interest in and to any or all accounts, the right to receive any proceeds from accounts, and the right to receive any proceeds of the right to collect.

This bill would make minor clarifying changes to those provisions. Those changes would be operative only if this bill and SB 340 are enacted, SB 340 amends or adds specified sections to the Government Code, and this bill is enacted after SB 340.

(2) Existing law prescribes the types of investments in which a local agency may generally invest its funds for deposit.

This bill would correct a statutory reference in that provision.

(3) Existing law requires that when the tax collector mails a supplemental tax bill to the assessee, certain information must be included either on the bill or in a separate statement accompanying the bill, including information specifying that if the taxpayer and the assessor are unable to agree on the proper assessed value, the taxpayer has the right to file an application for reduction in assessment, as specified, with the county board of equalization.

This bill would provide that if the county has adopted a provision that the appeal be filed within 60 days, that information must be included with the supplemental tax bill.

(4) Existing property tax law requires that delinquent, unsecured taxes on the supplemental property tax roll that remain unpaid at the time of default be transferred to the secured roll. Existing law also requires that portion of a supplemental assessment, that is attributable to an assessee from the date of a change in ownership or completion of new construction to the date of a subsequent change in ownership, to be entered upon the unsecured roll.

This bill would require that portion of a supplemental assessment, that is attributable to an assessee from the date of a change in ownership or completion of new construction to the date of a subsequent change in ownership, to be entered upon either the unsecured roll or on the supplemental roll as an unsecured assessment.

(5) Existing law allows any county department, officer, or employee who is legally responsible for the collection of any amount owing the county to apply to the county

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

board of supervisors for discharge of that responsibility on the grounds that the amount owed is too small to justify the costs of collection.

This bill would additionally allow a county department, officer, or employee who is legally responsible for the collection of any amount owing the county to apply for discharge of that responsibility on the basis that collection enforcement is impractical.

(6) Existing property tax law authorizes a county with a population of 4,000,000 or more to collect property taxes in 4, rather than 2, equal installments.

This bill would repeal that authority.

(7) Existing property tax law authorizes a county tax collector, in the case in which property has been offered at a tax sale at least once and no acceptable bids have been received, and the county board of supervisors approves, to offer that property at the next scheduled tax sale at a price that the tax collector deems appropriate.

This bill would clarify the meaning of an acceptable bid. This bill would also require the tax collector to determine, for purposes of the sale of the property at the same or next tax sale, an appropriate price in light of the most recent assessed value determined for the property or any unique circumstance with respect to that same property.

(8) Existing property tax law requires a county board of supervisors, upon notice of a proposed tax sale from the county tax collector, to approve or disapprove that sale. It also requires the tax collector to forward, as provided, copies of a board resolution approving a tax sale.

This bill would eliminate the requirement for board approval of a tax sale of property, and would instead require a county tax collector to forward, as provided, copies of his or her notice of tax sale.

(9) Existing law requires a tax collector to provide a notice of a tax sale by registered mail to parties of interest, as defined, not less than 45 days nor more than 60 days before the sale. It also requires a tax collector, in the case of the proposed tax sale of property that is the primary residence of the last known assessee, to make a reasonable effort to contact, in person, the owner-occupant of the property to be sold, no more than 60 or less than 10 days prior to the date of the sale.

This bill would modify these notice and contact requirements by increasing the 60-day limit specified in each requirement to 120 days.

(10) Existing property tax law specifies those amounts that must be paid to redeem tax-defaulted property, including redemption penalties calculated in accordance with a specified formula, but does not specify any interest amount that must be paid in redemption.

This bill would specify that redemption penalties constitute interest for purposes of any administrative hearing or claim in bankruptcy with respect to tax-defaulted property.

(11) Existing property tax law requires a county tax collector, in the case in which tax-defaulted property subject to a recorded power of sale notice is redeemed, to collect specified fees in addition to any amount required to be paid in redemption of the property.

This bill would expand this requirement to include an additional fee of $150, to be charged in the case in which tax-defaulted property is redeemed within 90 days of the proposed tax sale of that property, to reimburse the county for the costs of preparing to conduct the tax sale.

(12) Existing law requires the tax collector to transmit a notice to the board of supervisors of the county of his or her intention to sell tax-deeded property, as specified.

This bill would additionally require the board of supervisors by resolution to approve or disapprove of the proposed sale and transmit a certified copy of the resolution within 5 days after that action. By imposing new duties on the board of supervisors, this bill would impose a state-mandated local program.

(13) Existing property tax law authorizes the county auditor or county tax collector to cancel any penalties, costs, or other charges accrued with respect to a tax delinquency where the taxpayer's failure to timely pay was beyond the taxpayer's control and occurred notwithstanding the taxpayer exercising proper care, provided that payment of the principal amount of the delinquent taxes is made not later than June 30 of the fiscal year following the fiscal year in which that amount of taxes became delinquent.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would expand this authorization to allow the payment of the principal amount of delinquent taxes to be made not later than June 30 of the 4th fiscal year following the fiscal year in which the taxes became delinquent.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 801 (SB 2106) Russell. Property taxation: intercounty pipeline rights-of-way: assessment appeals.

Existing property tax law requires each county assessor, commencing with the 1995–96 fiscal year, to determine the assessed value in the county that is attributable to intercounty pipeline rights-of-way on the basis of a single, countywide parcel per taxpayer by combining the assessed values of each separate intercounty pipeline right-of-way interest or segment thereof, but still requires each assessor to maintain a separate property tax base year value for each separate intercounty pipeline right-of-way interest, or segment thereof.

This bill would, as provided, require any assessment appeal with respect to an intercounty pipeline right-of-way, as described, that is authorized to be filed under certain property tax statutes added by Chapter 76 of the Statutes of 1996, to be filed with respect to one or more specified interests in any intercounty pipeline right-of-way, and in no event with respect to an entire, undivided intercounty pipeline right-of-way.

This bill would declare the intent of the Legislature in enacting this requirement.

This bill would also add a provision relating to the assessment of intercounty pipeline rights-of-way, which is identical to a provision added by Chapter 76 of the Statutes of 1996, except for a single technical, clarifying change. This bill would declare the intent of the Legislature to supersede the corresponding provision added by Chapter 76 of the Statutes of 1996.

Existing property tax law requires, as provided, that interest be paid at the greater of 3% per annum or the "county pool apportioned rate" on any amount that is refunded to a property taxpayer.

This bill would modify these provisions by prohibiting any interest from being paid on any refund of property taxes resulting from the granting of property tax relief pursuant to any of certain statutes, provided that the payment of the refund is made within 120 days after the county assessor has sent authorization for the reduction to the county auditor.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 802 (AB 521) Aguiar. Workers' compensation.

Under existing law, a person injured in the course of employment is generally entitled to receive workers' compensation on account of that injury. Existing law provides that, in the case of certain law enforcement officers and firefighters, the term "injury" includes tuberculosis that develops or manifests itself during a period while the member is in the service of the department or office.

This bill would extend those provisions to prison and jail guards and correctional officers employed by a public agency. Since the bill would require the payment of additional benefits by local agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 803 (AB 573) Goldsmith. Restitution: prison damage.

Existing law makes it a crime, punishable as specified, to willfully and intentionally damage any jail or prison, or any jail or prison property.

The bill would provide that upon conviction of a defendant for damage to a jail or prison or jail or prison property, the court may order the defendant to make restitution to the public entity that owns the property damaged by the defendant upon satisfaction of all outstanding fines, penalties, assessments, restitution fines, and restitution orders.

Ch. 804 (AB 1221) Pringle. Animals: equines.

(1) Existing law prohibits cruelty to animals and provides for the care of abandoned animals.

This bill would provide that it shall be the duty of any officer of a pound, humane society, or animal regulation department of a public agency to assist in any case involving the abandonment or voluntary relinquishment of an equine by the equine's owner, and that if a pound, humane society, or animal regulation department sells an abandoned or voluntarily relinquished equine at a private or public auction or sale, it shall set the minimum bid for the sale of the equine at a price above the current slaughter price of the equine.

This bill also would require that a person adopting an equine, as specified, submit a written statement declaring that the person is adopting the equine for personal use and not for purposes of resale, resale for slaughter, or holding or transporting the equine for slaughter.

This bill, by imposing new duties on local animal control officers with respect to abandoned or relinquished equines, would impose a state-mandated local program upon local governments.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 805 (AB 1325) Boland. Prisons: reports to Legislature.

(1) Existing law authorizes the court to order the temporary removal of a prisoner from a jail, prison, or other institution and the prisoner's production before the court, under specified circumstances, in actions or proceedings in which the prisoner's parental or marital rights are subject to adjudication.

This bill instead would provide that a court may not order the removal and production of a prisoner sentenced to death in any action or proceeding in which the prisoner's parental rights are subject to adjudication.

(2) Existing law requires each prison to have a citizens' advisory committee consisting of 9 members appointed by the warden of the prison, as specified.

This bill would require that one committee serve every prison located in the same city or county and would increase the membership of citizens' advisory committees to not more than 15 members, 9 of whom shall be appointed by the warden in accordance with existing law. The bill would further require that where a citizens' advisory committee serves more than one prison, the warden of each prison served by the committee shall collaborate with every other warden of a prison served by the committee for the purpose of appointing committee members.

(3) Existing law provides that, when a person confined in a state institution subject to the jurisdiction of the Director of Corrections dies, and any personal funds or property of that inmate remains in the hands of the Director of Corrections, the funds may be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

applied in an amount not exceeding $300 to the payment of his or her burial expenses and related charges.

This bill instead would provide that, if no demand or claim is made upon the Director of Corrections for the body of the deceased inmate, the director shall dispose of the body by cremation or burial, as provided, and would specify that any personal funds of the deceased inmate shall be applied to the payment of cremation or burial expenses and related charges in an amount not exceeding those expenses and charges.

(4) Existing law requires the Board of Corrections to report on various dates to the Legislature regarding the inspection and status of local and juvenile detention or jail facilities.

This bill would provide a uniform date for the submission of all reports covered by these provisions. The bill would also make conforming changes.

(5) Existing law requires the Inspector General to conduct a management review audit of any warden or superintendent of the state prison who has held his or her position for more than 5 years.

This bill instead would require the Inspector General to conduct a management review audit of any warden of the state prison who has held his or her position for more than 5 years subsequent to confirmation by the Senate and any superintendent of a youth institution who has held his or her classification for more than 5 years.

Ch. 806 (AB 1335) Sweeney. Education.

Existing law, the Budget Act of 1996, appropriates a specified amount for the support of the State Department of Education and a specified amount for local assistance from the Health Education Account in the Cigarette and Tobacco Products Surtax Fund.

This bill would increase the amount appropriated for the support of the State Department of Education and decrease in an equal amount the amount appropriated for local assistance pursuant to those specified items of appropriation in the Budget Act of 1996. This bill would make an appropriation to the extent this bill would authorize the amounts appropriated in those items of appropriation to be expended for a purpose different from the purposes authorized under existing law.

Ch. 807 (AB 1754) Knowles. Insurance: FAIR Plan.

Existing law, for purposes of earthquake coverage, defines "policy of residential property insurance," as specified.

This bill would provide that a policy that does not include any of the perils insured against in a standard fire policy shall not be included in the definition of "policy of residential property insurance."

Under existing law, the California FAIR Plan Association is a joint reinsurance association formed by insurers licensed to write and engaged in writing basic property insurance within this state to assist persons in securing basic property insurance and to formulate and administer a program for the equitable apportionment among insurers of basic property insurance.

The bill would provide that rates for the FAIR Plan shall not be excessive, inadequate, or unfairly discriminatory, as specified. The bill would specify those factors that the association shall consider in adopting rates for earthquake policies.

Existing law provides that reports and communications of the association are not considered public documents.

The bill would provide that all information considered by the association in establishing rates would be public records.

Ch. 808 (AB 1930) Sweeney. Permit streamlining: development projects: environmental quality.

(1) Existing law, commonly known as the Permit Streamlining Act, requires the lead agency for a development project, as defined, to approve or disapprove the project within 6 months from the date of certification of an environmental impact report, or within 3 months from the date of adoption of a negative declaration or the determination by the lead agency that the project is exempt from the California Environmental Quality Act, unless the project proponent requests an extension of time.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the lead agency to approve or disapprove the development project within 180 days from the date of certification of an environmental impact report or 60 days from the date of the adoption of a negative declaration or determination that the project is exempt. The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to approval or disapproval of those projects. The bill would delete the provisions relating to an extension of the time limit for approval or disapproval upon request of the project proponent, and provide instead that the time limit provisions do not preclude a project applicant and a public agency from agreeing to an extension of the time.

(2) Existing law, the California Environmental Quality Act, requires a public lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act. The act requires each state agency to establish, by resolution or order, and each local agency to establish, by ordinance or resolution, time limits not to exceed one year for completing and certifying environmental impact reports and 105 days for completing and approving negative declarations.

This bill would limit the application of the requirement to establish those time limits to projects involving the issuance of specified entitlements by a governmental agency, and would require that the time limits not exceed 180 days for completing and adopting negative declarations. The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to the establishment of those time limits.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 809 (AB 2053) K. Murray. Crimes: money laundering: financial institutions.

(1) Existing law, the Corporate Securities Law of 1968, provides for the issuance of desist and refrain orders under specified circumstances.

This bill would require the Commissioner of Corporations to send a copy of those orders to the district attorney of the county of residence or principal place of business of the subject of the order.

(2) Existing law provides that specified provisions prohibiting disclosure of financial records by financial institutions, prohibiting money laundering, and requiring the maintenance of records and the filing of reports on monetary instrument transactions shall be repealed on January 1, 1997.

This bill would repeal this repeal date, thereby extending the operation of these provisions indefinitely. Because this bill would extend the duration of provisions that establish crimes, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 810 (AB 2149) Kuehl. Marriage: dissolution: default.

Existing law specifies the procedures for obtaining a judgment of dissolution of marriage or legal separation of the parties, including special provisions where the judgment is to be entered upon the default of one of the parties.

This bill would revise these provisions regarding default and, among other things, would require the court clerk to mail specified documents to the spouse who has defaulted, thereby imposing a state-mandated local program; require any affidavit or offer of proof submitted to the court relating to dissolution or legal separation upon the default of a party or upon a referee's findings to include specified information pertaining to income and the value of the community estate; require the signature of a spouse who

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

has defaulted on any marital settlement agreement or on any stipulated judgment to be notarized; and require the court clerk to give notice of entry of judgment of dissolution or nullity of marriage or legal separation to the attorney for each party or to the party, if unrepresented, where the judgment is to be granted upon the default of one of the parties, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 811 (AB 2218) Woods. Alcoholic beverages: retail licenses: undue concentration.

The Alcoholic Beverage Control Act requires the Department of Alcoholic Beverage Control to deny an application for a license if issuance would result in or add to an undue concentration of licenses. Existing law defines undue concentration and provides that, notwithstanding the requirement that the department deny an application that would result in or add to an undue concentration of licenses, a license may be issued if the local governing body of the area in which the applicant premises are located determines that public convenience or necessity would be served by the issuance.

This bill would allow the local governing body of a city, county, or city and county to adopt a resolution declining to make any determination as to public convenience or necessity being served by the issuance of a license. The bill would, in that situation, require the department to determine whether public convenience or necessity would be served by the issuance of a license.

Ch. 812 (AB 2221) K. Murray. Mobilehomes and manufactured housing: consumer protection.

Under existing law, the Real Estate Commissioner may suspend or revoke a real estate license where the licensee, in connection with the sale of a mobilehome, commits certain specified acts, including the violation of prescribed provisions of the Health and Safety Code relating to mobilehomes and manufactured housing, the Revenue and Taxation Code, relating to vehicle license fees, and the Civil Code relating to the Automobile Sales Finance Act.

This bill would delete the references to the above provisions as grounds for the revocation or suspension of a real estate license.

Existing law provides that it is the duty of a real estate broker or salesperson to a prospective purchaser of residential real property comprising 1 to 4 residential dwelling units, including a manufactured home, to make an inspection of, and disclosure regarding, the property.

This bill would revise this provision to instead provide that the real estate broker or salesperson has this duty to a prospective purchaser of residential real property or a manufactured home.

Under existing law it is unlawful to sell, offer for sale, rent, or lease a manufactured home or mobilehome containing specified equipment or systems unless those systems meet requirements established by the Department of Housing and Community Development, with specified exceptions.

This bill would except the sale of used manufactured homes and mobilehomes from these provisions and would make those sales subject to other provisions added by this bill relating to the duty of a dealer of a used manufactured home to inspect and make specified disclosures relating to the condition of the home to a prospective purchaser. It would also make the sale of these homes by a real estate broker or licensed salesperson subject to the inspection and disclosure requirements imposed on the broker or salesperson.

This bill also would define the standard of care owed by a dealer of manufactured homes and mobilehomes to a purchaser to be that which a reasonably prudent dealer

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

would exercise measured by the degree of knowledge through education, experience, and examination required to obtain a license pursuant to existing law.

Because this bill would amend existing law for which criminal penalties are prescribed and would add provisions the violation of which would be subject to criminal penalties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 813 (AB 2286) Boland. Vehicles: report-of-sale forms.

(1) Existing law requires dealers and lessor-retailers to submit completed report-of-sale forms and applications for registration or transfers of registrations to the Department of Motor Vehicles within 20 days from the date of a vehicle's sale. Existing law sets forth other dates within which corrected documents are required to be submitted to the department. Under existing law, an application first received by the department more than 40 days from the date of sale, or 30 days from the date that the application is first returned by the department, is subject to penalties.

This bill would extend each of the above dates by 10 days for used vehicles.

(2) Existing law imposes administrative service fees for late and incomplete filings of the documents described above. In addition, existing law provides that each of these violations is a separate cause for disciplinary action, and provides that the failure to pay an administrative service fee within 30 days after written demand from the department is a separate cause for disciplinary action.

This bill would recast the above to make any violation of the provisions governing application filings subject to the disciplinary action. However, with regard to late filings, the bill would delete the current 30-day provision creating a separate cause for disciplinary action, and would instead provide a cause of action only if a dealer or lessor-retailer fails to submit to the department, 50 days or more for used vehicles, and 40 days or more for new vehicles, following the date of sale of the vehicles, an initial application for registration or transfer of registration.

(3) This bill would incorporate additional changes to Section 4456.1 of the Vehicle Code, proposed by SB 1587, to be operative only if SB 1587 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 814 (AB 2344) Woods. Motor vehicle leases.

Existing law specifies requirements for contracts for leases of motor vehicles, as specified. Among other things, existing law provides that if any solicitation to enter into a lease contract includes a statement of the amount of payment, the number of payments, or that any capitalized cost reduction, any or no downpayment, or other payment is required at the inception of the lease, the solicitation shall also include a specified statement.

This bill would provide that an advertisement to enter into a lease contract made through a radio broadcast shall be deemed to comply with these prescribed disclosure requirements if the advertisement states certain information and either lists a toll-free phone number or refers to a written advertisement in a publication of general circulation, as specified.

Ch. 815 (AB 2343) Richter. Health care service plans: task force.

Existing law provides for the licensure and regulation of health care service plans by the Department of Corporations.

This bill would state legislative findings regarding the growth of health care service plans in California and the need for further data regarding the effect of health care service plans. It would require the Governor to convene a task force on health care service plans to research and report on certain aspects of the effect of health care service plans, by January 1, 1998. It would provide that the task force be appointed by the Senate Committee on Rules, Speaker of the Assembly, and Governor, and be composed of equal representation from health care service plans and at least one disability insurer,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

employers who purchase health care, health care service plan enrollees, providers of health care, and representatives from consumer groups. The bill would prohibit the members from receiving any expense reimbursement.

Ch. 816 (AB 2374) Bates. Alameda County: hospital authority.

Existing law permits the County of Alameda to establish a health authority as a means of establishing the local initiative component of the state-mandated two-plan managed care model for the delivery of Medi-Cal services.

This bill would authorize the Board of Supervisors of the County of Alameda to establish, by ordinance, a hospital authority to manage, administer, and control the Alameda County Medical Center. The bill would set forth certain rights and duties, powers, and requirements of a hospital authority established under its provisions. The bill would require the county to, among other things, establish various baseline data reporting requirements for the medical center and each of the medical center inpatient facilities for purposes of these provisions.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. The reimbursement is based on factors including the cost of eligible capital projects.

Existing law specifies that a disproportionate share hospital that has submitted final plans for an eligible capital project may substitute final plans and shall qualify for supplemental reimbursement for the revised capital project if specified conditions are met, including the requirements that final plans are submitted prior to June 30, 1995, and that the revisions in the substitute plan serve to replace buildings that are not in compliance with current seismic safety standards, and limits the supplemental reimbursement to the supplemental reimbursement for the original capital project, as evidenced by the architect's and engineer's certified cost estimate or the original plan submission and the revised plan submission, and authorizes an alternative reimbursement for eligible disproportionate share providers if the revised plans are submitted prior to December 31, 1996, and the plans are necessary to comply with the current seismic safety standards, and limits the supplemental reimbursement to an amount no greater than the original capital project.

This bill would authorize the Alameda County Medical Center to submit revised plans that meet certain requirements, including the requirement that modifications of the plans do not involve a deviation from the capital project's stated architectural footprint, but would authorize the plan to include a reduction in size and scope of the original project plan, including tenant improvements that were not specified in the original project plan, modifications to the foundation, frame, and building shell, and modifications necessary to comply with current seismic safety standards.

Ch. 817 (AB 2443) Speier. Health care referrals.

Existing law, the Physician Ownership and Referral Act of 1993, prohibits a licensee, that is defined to include, among other things, physicians and surgeons, psychologists, acupuncturists, optometrists, dentists, podiatrists, and chiropractic practitioners, from referring a person for certain health care services if the licensee has a financial interest, as defined, with the person, or entity, that receives the referral.

Existing law provides for exemptions from this prohibition.

This bill would provide that a financial interest shall not include the receipt of capitation payments or other fixed prepaid amounts in exchange for a promise of a licensee to provide specified health care services to specified beneficiaries. The bill would provide that a financial interest shall not include the receipt of remuneration by a medical director of a hospice if the arrangement meets certain criteria.

The bill would provide for an additional exemption from the prohibition for a referral by a licensee to an organization that owns or leases a general acute care, acute psychiatric, or special hospital if certain conditions are met.

Ch. 818 (AB 2458) Figueroa. Reports to the Legislature.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires various reports to be submitted to the Legislature by state and local agencies, and provides that reports by state agencies required to be submitted to the Legislature shall be required to be submitted only to specified offices of the Legislature.

Existing law requires copies of reports that state and local agencies are required or requested by law to prepare and file with the Governor or the Legislature, or both, to also be filed with the Legislative Counsel.

Existing law also requires the Legislative Counsel to make specified information concerning state laws and legislative publications available to the public by means of access by way of a public computer network.

This bill would provide that any report required or requested by law to be submitted to the members of either house of the Legislature, generally, shall instead be submitted to the Legislative Counsel, the Secretary of the Senate, and the Chief Clerk of the Assembly. The bill would require that each report include a summary of its contents, a copy of which would be provided to each member of the appropriate house or houses of the Legislature by the Legislative Counsel, and would require that notice of receipt of the report be recorded in the journal of the appropriate house or houses of the Legislature. It would require the Legislative Counsel, in addition to, and as part of, the information made available to the public in electronic form, as part of a public computer network, to make available a list of the reports submitted, and would specify that no report shall be distributed to a Member of the Legislature unless specifically requested by that Member.

Ch. 819 (AB 2487) Firestone. Vehicles: driver's licenses.

Existing law requires the Department of Motor Vehicles to require any applicant for a driver's license to submit to an examination appropriate to the type of motor vehicle or combination of vehicles the applicant desires a license to drive, in accordance with specified classifications. A class C driver's license authorizes the driving of, among others, any two-axle vehicle with a gross vehicle weight rating of 26,000 pounds or less, including when the vehicle is towing a trailer or semitrailer with a gross vehicle weight rating of 10,000 pounds or less.

This bill would create 2 new classifications of vehicles or combination of vehicles that a driver holding a class C license may operate, and would delete, as to these new classifications, the limitation specified above that the vehicle have 2 axles. The bill would limit the first new classification to vehicles or combination of vehicles of 26,000 pounds or less which is operated by a farmer or an employee of a farmer under specified conditions. The second new classification would include a combination of vehicles subject to the 26,000 pound weight limitations when towing a boat trailer, as specified.

These provisions would be repealed on January 1, 2001.

Ch. 820 (AB 2538) Miller. Insurance: holding companies.

Under the Insurance Holding Company System Regulatory Act, the Department of Insurance regulates certain transactions involving two or more affiliated persons, at least one of which is an insurer.

This bill would revise provisions of the act to bring it into compliance with the National Association of Insurance Commissioners Model Holding Company Act. The revised provisions relate to registration procedures, reporting requirements, and transaction requirements. The revisions would require that the Insurance Commissioner be notified in advance of certain transactions involving a domestic insurer or commercially domiciled insurer, as defined, and a person in the insurer's holding company system. Transactions entered into for the purpose of avoiding the notice requirement would be prohibited. The bill would also specify standards of review to be used by the commissioner in approving transactions after receiving the required notice. A fee would be charged for each transaction subject to advance notice to the commissioner.

Existing law provides that a foreign insurer authorized to do business in California is considered "commercially domiciled" in this state if, among other things, gross premiums written in California during a specified time period constitute 20% of the insurer's total gross premiums written everywhere in the United States.

This bill would increase that amount to 33%.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would make other related changes.

Ch. 821 (AB 2612) Baugh. Habilitation services.

Existing law contains various provisions relating to the Habilitation Services Program, administered by the Department of Rehabilitation, under which supported employment and other services are provided to persons with developmental disabilities.

Under existing law, provisions relating to the submission and approval of proposals for funding supported employment programs and components under the Habilitation Services Program would be repealed on January 1, 1997.

This bill would extend these provisions to January 1, 1999, and make changes in Habilitation Services Program definitions and ratesetting and funding provisions.

Existing law until January 1, 1997, permits supported employment and other related services to be provided either under the Habilitation Services Program or as a part of vocational rehabilitation services.

The bill would extend that authorization indefinitely and would also provide that if a consumer is placed upon a waiting list for vocational rehabilitation as a result of the Department of Rehabilitation's order of selection regulations, the Habilitation Services Program may pay for those supported employment services leading to job development.

Ch. 822 (AB 2615) Morrissey. Veterans benefits: dependents.

Existing law establishes various state benefits for veterans, including, but not limited to, programs providing educational assistance.

Existing law entitles a dependent of a veteran, who attained eligibility for benefits while under 21 years of age, to receive certain educational benefits until he or she attains the age of 27 years or until the training is no longer needed, whatever occurs first. Existing law excludes dependent widows from this limitation.

This bill, until January 1, 2000, would include the veteran's spouse within this exclusion. The bill would require the Department of Veterans Affairs to prepare and submit to the Legislature, on or before January 1, 1999, a report regarding the number of spouses who receive these benefits and the total costs incurred annually. The bill would make other technical, conforming, and nonsubstantive changes.

Ch. 823 (AB 2779) Knox. State highways: Route 2: relinquishment to city or cities.

Existing law requires the California Transportation Commission to relinquish to any county or city any portion of any state highway within the county or city that has been deleted from the state highway system by legislative enactment.

This bill would require the commission, if it determines that it is in the best interests of the state to do so, to relinquish that portion or portions of State Highway Route 2 located within the City of West Hollywood or the City of Santa Monica, or both, to that city or cities that agree to accept it. The bill would delete the relinquished portion or portions from the state highway system. If the city or cities accept that relinquished portion or portions of the highway, they would be required to maintain signs directing motorists to the continuation of State Highway Route 2, and the portion or portions would be prohibited from being considered for future adoption in accordance with specified provisions.

Ch. 824 (AB 2894) Aguiar. Children's hospitals.

Existing law uses the term children's hospital for certain health-related program purposes.

This bill would, except as otherwise specified by law, define the term children's hospital, after June 1, 1996, for purposes of both the Health and Safety Code and the Welfare and Institutions Code as referring to specified hospitals.

Ch. 825 (AB 2963) Firestone. Environmental quality.

(1) Existing law requires a governmental agency or public utility to submit prescribed plans and other information to the Department of Fish and Game and requires those entities and other persons, as defined, to follow prescribed procedures concerning a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

project that will affect a river, stream, or lake, except certain emergency work. Violation is a misdemeanor.

Existing law, the California Environmental Quality Act, requires a lead agency to prepare an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, unless the project is exempt from the act. Other provisions require the lead agency to consult with the Department of Fish and Game in prescribed instances relative to endangered or threatened species.

Existing law requires a permit to be obtained from the San Francisco Bay Conservation and Development Commission in prescribed instances.

Existing law requires a coastal development permit to be obtained for any development in the coastal zone.

Existing law requires specified persons to file a report with the appropriate California regional water quality control board in prescribed instances relating to the discharge of waste, requires the regional board to take prescribed action, and prohibits specified conduct respecting those discharges.

This bill would exempt from all of those requirements specified emergency projects undertaken, carried out, or approved by a public agency to maintain, repair, or restore an existing highway which is damaged by fire, flood, storm, earthquake, land subsidence, gradual earth movement, or landslide, and would exempt certain other emergency activities from certain of those requirements. The bill would create a state-mandated local program by imposing new duties on local agencies with regard to determining the applicability of, and filing and posting notice of, the exemption, and by creating new crimes.

(2) This bill would make additional changes in Sections 1601 and 1603 of the Fish and Game Code proposed by SB 12 of the 1995–96 First Extraordinary Session, to be operative only if that SB 12 and this bill are both chaptered and this bill is chaptered last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 826 (AB 3141) Gallegos. Health facilities: clinical psychologists.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. Existing law authorizes a health facility to establish rules and regulations in order to enable the appointment of clinical psychologists, and authorizes the clinical psychologists to hold membership and serve on committees of the medical staff and to carry professional responsibilities consistent with their scope of practice and subject to the rules of the facility.

This bill would, instead, require a health facility owned or operated by the state that offers care or services within the scope of practice of psychologists to establish rules, regulations, and procedures for consideration of an application for medical staff membership and clinical privileges submitted by clinical psychologists.

The bill would also require the State Department of Mental Health, the State Department of Developmental Services, and the Department of Corrections to report to the Legislature, no later than January 1, 2001, on the impact of medical staff membership and privileges for clinical psychologists on the issues of quality of care and cost effectiveness. The bill would also provide for the repeal of its provisions on January 1, 2002.

This bill would declare that these provisions are not intended to expand the scope of licensure of clinical psychologists.

The Ralph C. Dills Act contains provisions governing the relationship between the state and public employee organizations with respect to wages, hours, and other terms and conditions of employment. The act also requires the Public Employment Relations Board to establish reasonable procedures for petitions and for holding elections and determining appropriate bargaining units in accordance with specified criteria.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would prohibit the board from creating any additional bargaining units for the exclusive representation of state psychologist employees that might result because of changes in medical staff membership, privilege, or both for psychologists due to this bill.

Ch. 827 (AB 3145) Granlund. Coroner's inquests: anatomical gifts.

Existing law requires the coroner of each county to conduct an inquest of deaths that occur under specified circumstances. Existing law, known as the Uniform Anatomical Gift Act, permits persons, under specified conditions, to donate all or parts of their body for specified purposes after their death. Existing law authorizes a coroner to, among other things, assist in the implementation of the Uniform Anatomical Gift Act.

This bill would authorize a coroner to enter into agreements with one or more procurement organizations to coordinate organ recovery procedures and to contract with, or receive assistance of any kind from, any public or private entity in order to provide prescribed types of education and training for the coroner's personnel.

Existing law requires each general acute care hospital to develop a protocol for identifying potential organ and tissue donors that requires certain inquiries to be made or that provides for the hospital to contact an organ and tissue procurement organization at the time a potential donor is identified and for the procurement organization to make those inquiries.

This bill would require, for any agreement between a coroner or medical examiner and a procurement organization for the release and removal of organs of bodies within his or her custody, the procurement organization to develop a protocol for organ recovery that is approved by the coroner or medical examiner prior to release or removal of any organs from bodies and that contains certain procedures and requirements.

This bill would permit a health care provider to release relevant information of the deceased to the procurement organization, the coroner, or the medical examiner.

Ch. 828 (AB 3238) Gallegos. Adult residential care facilities.

Existing law provides for the licensure and regulation by the State Department of Social Services of community care facilities, that include residential care facilities. Existing law requires the Director of Social Services, in consultation with the Director of Mental Health and the Director of Developmental Services, to establish a training program to ensure that operators and staffs of adult residential care facilities have appropriate training to provide the care and services for which a license or certificate is issued. A violation of the law regulating community care facilities is a crime.

Existing law requires the training to include successful completion of a 35-hour department-approved certification program.

This bill would require that the program include training in nonviolent crisis intervention, would require licensees to complete the continuing education requirement, and would make other changes of a technical, nonsubstantive nature.

This bill would require the administrator of an adult residential care facility that provides services for residents who have mental illness to ensure that a written intake assessment is prepared by a licensed mental health professional prior to acceptance of the client. The bill would permit utilization of placement agencies for referrals and assessments.

This bill would require the department to provide the licensee with a copy of the licensing report within 30 days after an inspection.

This bill would preclude the report from including any confidential client information, and would require copies of reports within the preceeding 24 months to be provided by the facility to the public upon request.

By expanding the scope of existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 829 (AB 3473) Committee on Consumer Protection, Governmental Efficiency, and Economic Development. Businesses and professions.

(1) Existing law prohibits the Department of Consumer Affairs from having possession and control of examination questions prior to submission to applicants at scheduled examinations.

This bill would create an exception to the prohibition if authorized by one of the boards within the department.

(2) Under existing law, the practice of podiatric medicine is regulated by the California Board of Podiatric Medicine, which is required to convene its annual meetings in or near either Sacramento, Los Angeles, or San Francisco, but is otherwise permitted to hold meetings at places and times the board deems necessary.

This bill would permit the board to convene any of its meetings at times it deems necessary.

Existing law places limitations on the frequency with which an applicant for a certificate to practice podiatric medicine who fails to pass the oral and practical examination after two examinations may be eligible for reexamination.

This bill would repeal that provision.

(3) Under existing law, known as the Physical Therapy Practice Act, the Physical Therapy Examination Committee of California regulates the licensure and practice of physical therapy.

This bill would change the name of the Physical Therapy Examination Committee of California to the Physical Therapy Board of California and make technical, conforming changes to the Physical Therapy Practice Act so that specific terms used in the act are consistent throughout.

(4) Under existing law, the Hearing Aid Dispensers Examining Committee oversees the licensing, and administers the regulation, of individuals who engage in the practice of fitting and selling hearing aids. Under existing law, the committee is required to administer both a written and practical examination of persons who apply for a license to fit or sell hearing aids and is required to hold examinations at least twice a year. In addition, the committee is authorized to issue temporary licenses to persons who are licensed in other states when the persons supply specified information. These persons are required to take the first licensing examination offered by the committee after they have held the license for 90 days.

This bill would require that the committee hold a practical examination twice a year.

The bill would require that persons who hold a temporary license on the basis of being licensed in another state take a written examination within 90 days after the date the temporary license is issued.

The bill would authorize the committee to deny, issue subject to terms and conditions, suspend, or revoke a license, or impose conditions of probation upon a licensee, for violation of any regulation adopted pursuant to the law regulating hearing aid dispensers.

(5) Under existing law, the State Board of Nursing Home Administrators administers the provisions of the Nursing Home Administrator's Licensing Act. Existing law provides that it is a misdemeanor for any person to act or serve in the capacity of nursing home administrator without a license. Existing law requires a holder of a license to reregister biennially. Under the act, the board is required, among other things, to establish standards for the operation of nursing homes, as defined, issue and revoke licenses for the administration of nursing homes, and submit reports to the Legislature concerning the administration of nursing homes. The act has required the board in the past to submit specified reports and studies to the Legislature by specified dates. The act also prohibits nursing home administrators whose licenses have been suspended from being employed as administrators of long term health care facilities.

This bill would change the name of the act to the Nursing Home Administrator's Act.

The bill would change the definition of "nursing home" for purposes of the act. By changing the definition of a crime, the bill would impose a state-mandated local program.

The bill would require license renewal instead of reregistration and would require the renewal application to contain a statement specifying whether the licensee was convicted of a crime during the preceding renewal period and a statement as to the veracity of the representations made in the renewal application.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would repeal provisions of the act that require the board to submit reports to the Legislature that have since been submitted.

The bill would delete the provisions of the act that prohibit nursing home administrators whose licenses have been suspended from being employed as administrators of long term health care facilities and instead prohibit these persons from being employed as administrators of nursing homes.

(6) Under existing law, the Acupuncture Committee, which exists within the Division of Licensing of the Medical Board of California, administers the Acupuncture Licensing Act. Among other things, the Acupuncture Committee is required to conduct evaluations of acupuncture tutorial programs and to conduct evaluations and develop regulations that specify the requirements that must be met by foreign-trained applicants for licensure as acupuncturists.

This bill would repeal the provision that requires the Acupuncture Committee to conduct these evaluations and develop these regulations.

(7) Existing law establishes the Board of Behavioral Science Examiners and the Behavioral Science Examiners Fund.

This bill would change the names to the Board of Behavioral Sciences and the Behavioral Sciences Fund.

Existing law authorizes the board, in any order issued in resolution of a disciplinary proceeding before the board, to request the administrative law judge to direct any registrant or licensee found to have violated or to be in violation of certain charges to pay to the board a sum not to exceed the actual and reasonable costs of the investigation and prosecution, as prescribed, and specifies procedures to enforce an order for payment. Existing law prohibits the board from renewing or reinstating the license or registration of, or from accepting any petition for reinstatement or modification of probation from, any licensee or registrant who has failed to pay all of the costs ordered, except under prescribed conditions where a financial hardship has been demonstrated. Existing law requires all costs recovered to be deposited into the Behavioral Science Examiners Fund, which is continuously appropriated to the board.

This bill would repeal these provisions.

(8) Under existing law, the State Board of Registration for Professional Engineers and Land Surveyors is required to send a second notice by certified or registered mail to a registrant's or authority holder's address if there is no response to the first notice regarding expiration of a certificate of registration or certificate of authority.

This bill would delete the requirement that the second notice be by certified or registered mail.

(9) Under existing law, persons who engage in various facets of structural pest control are required to be licensed and their activities in the area of structural pest control are regulated. Existing law provides that violation of the law governing structural pest control is subject to specified criminal penalties.

Among the persons licensed and regulated are applicators of specified types of chemical fumigants used in pest control. Under existing law, applicators, once licensed, are permitted to apply specified chemical fumigants for a period of 3 years, after which they are required to apply for renewal of their license and pass a written examination.

Existing law permits specified governmental agencies to levy fines for violations of the restrictions on structural pest control activities.

This bill would clarify that it is unlawful for an applicator to act in that capacity without being licensed and delete the requirement that applicators apply to renew their licenses and pass a written examination every 3 years.

The bill would place restrictions, as specified, on persons who fail to pay fines levied for violation of these provisions.

The bill would provide that it is unlawful for any licensee to recommend or perform any pest control corrective work under any contract or agreement that the licensee knows or has reason to know is in excess of that required to eliminate the condition for which the licensee was employed.

The bill would make technical, conforming changes to the structural pest control laws.

The bill would impose a state-mandated local program by imposing criminal penalties on certain persons who violate the provisions of the bill.

(10) This bill would make other technical changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(11) This bill would incorporate additional changes to Section 8516 of the Business and Professions Code proposed by SB 1546, contingent upon the prior enactment of that bill.

The bill would incorporate additional changes in certain sections of the Business and Professions Code, proposed by SB 1962, to be operative only if SB 1962 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 830 (SB 1962) O'Connell. Physical and respiratory therapy.

Existing law provides for the licensure and regulation of physical therapists by the Physical Therapy Examining Committee of California and provides that a violation of the provisions governing physical therapy is subject to criminal sanction.

This bill would require a physical therapist to provide patient record documentation and would prescribe minimum time periods during which patient records are required to be maintained.

Existing law provides that an applicant may be issued a license without a written examination if he or she meets certain prescribed requirements. Existing law authorizes an applicant for licensure who has filed an application to perform as a physical therapist under the direct and immediate supervision of a licensed physical therapist until the date of receipt of his or her license, and to identify himself or herself as a physical therapist license applicant. Existing law authorizes any graduate of an approved physical therapist education program or an approved physical therapist assistant education program who has filed an application for licensure to perform as a physical therapist license applicant or a physical therapist assistant applicant until the date of receipt of his or her license.

This bill would require a physical therapist assistant applicant to be subject to approval instead of licensure. The bill would amend these provisions to authorize the graduate to perform as a physical therapist license applicant pending the result of the licensing examination or as a physical therapist assistant applicant pending the results of the examination, and would amend the above-described provisions to provide that an applicant may only qualify once to perform as a physical therapist license applicant or a physical therapist assistant applicant.

The bill would set forth a separate procedure if the committee uses computer administered testing.

Existing law provides that no person shall receive approval as a physical therapist assistant without first passing an examination.

This bill would require applicants for approval as a physical therapist assistant to demonstrate knowledge of the laws and regulations governing the practice of physical therapy by passing an examination that reasonably tests the applicant's knowledge of these laws and regulations.

This bill would authorize a person holding an approval as a physical therapist assistant to use the title "physical therapist assistant," "physical therapy assistant" or the letters "P.T.A." or any other words, letters, or figures that indicate the person is an approved physical therapy assistant.

Existing law establishes certain provisions governing the denial, revocation, or suspension of licenses.

This bill would provide that a person whose license or approval has been revoked or suspended or who has been placed on probation, may petition the committee for reinstatement, or modification of the penalty, after prescribed minimum periods of time have elapsed from the decision ordering the disciplinary action.

Existing law establishes the fees in connection with licenses or approvals for the practice of physical therapy, and provides that the examination and reexamination fees for the physical therapist examination and the physical therapist assistant examination shall be the actual cost to the committee of the purchase, grading, and administering of each written examination. Existing law authorizes the committee to establish certain 340

NOTE: Superior numbers appear as a separate section at the end of the digests.

application, licensure, and approval fees for physical therapists and physical therapist assistants at a lower fee than prescribed by statute.

This bill would apply this provision to the examination to demonstrate knowledge of the rules and regulations related to the practice of physical therapy, and would provide that the fees be the actual cost to the committee of the development and writing of, or purchase of the examination, the grading of each written examination, and the actual cost of administering each examination. The bill would increase certain application, licensure, and approval fees for physical therapists and physical therapist assistants and would permit the committee to establish a lower fee than the prescribed fees in these cases after these provisions become operative. The bill would repeal these provisions on January 1, 1999. The bill would provide similar provisions, operative on January 1, 1999, except that these provisions would authorize the committee to establish certain application, licensure, and approval fees for physical therapists and physical therapist assistants at increased maximum amounts.

Under existing law, provisions regulating respiratory care practitioners require that the renewal fee for a license to practice respiratory care be established by the Respiratory Care Board of California at not more than $200, and in no case shall the fee in any year be more than 10% greater than the amount of the fee in the preceding year. Existing law provides for an inactive license for a respiratory care practitioner and requires the board to establish the application and renewal fee for an inactive license in an amount not to exceed $150.

This bill would require instead that the fee for an inactive license be the same as the renewal fee for the license for the practice of respiratory care.

By increasing the amount of fees to be paid to continuously appropriated funds, the Physical Therapy Fund and the Respiratory Care Fund, this bill would make an appropriation.

By changing the definition of a crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in certain sections of the Business and Professions Code proposed by AB 3473, to be operative only if AB 3473 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 831 (AB 2599) B. Thompson. California Debt Limit Allocation Committee: housing allocation.

Under existing law, the California Debt Limit Allocation Committee allocates to authorized state and local agency applicants the volume ceiling for private activity bonds, as defined, that can be issued in California, in accordance with federal law.

This bill would add a nonvoting representative from local government to the committee .

Ch. 832 (SB 322) Costa. California Debt Limit Allocation Committee.

Under existing law, the California Debt Limit Allocation Committee allocates to authorized state and local agency applicants the volume ceiling for private activity bonds, as defined, that can be issued in California, in accordance with federal law.

This bill would add the Director of Housing and Community Development and the Executive Director of the California Housing Finance Agency, as nonvoting members, to the committee.

The bill would incorporate additional changes in Section 8869.83 of the Government Code made by AB 2599 only if both bills are chaptered and this bill is chaptered last.

Ch. 833 (AB 1197) Takasugi. State finance.

(1) Under the Marks-Roos Local Bond Pooling Act of 1985, a joint exercise of powers authority may issue bonds to assist local agencies in financing public capital improvements, working capital, liability, or other insurance needs, or projects whenever

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

there are significant public benefits for taking that action. Existing law requires fees for administrative costs and expenses charged and apportioned by an authority to local agencies that benefit from its services to be set at a rate sufficient to recover, but not to exceed, those costs.

This bill would add legislative findings that it would not be lawful for an authority or any of its member agencies to charge fees to local agencies or receive payments from the proceeds of the sale of bonds issued or acquired by the authority, except for fees charged pursuant to the provisions stated above to recover the authority's costs of issuance and administration. The bill also would provide that prior to issuing bonds for the purpose of paying the costs of public capital improvements, the public agency that will own or operate those public facilities shall be identified and shall become a member of the authority.

(2) Existing law establishes the California Debt Advisory Commission and prescribes its duties. Existing law requires agencies and nonprofit corporations that issue mortgage revenue bonds to file specified reports with the commission. Existing law also requires the commission to comprehensively review the financing of capital improvements by all agencies of local government and to study the comparative debt of local governmental agencies.

This bill would rename the commission as the California Debt and Investment Advisory Commission. The bill would require the commission to establish a continuing education program for local officials having direct or supervisory responsibility over municipal investments, as specified, and would repeal the requirement for the comprehensive review of local agencies by the commission.

(3) Existing law creates the Local Agency Indebtedness Fund and authorizes the Pooled Money Investment Board to make loans and transfers to certain types of funds or accounts, and to make loans to local agencies from the fund to make payments due on bonds during the 1978, 1979, and 1980 fiscal years in order to prevent a default.

This bill would repeal the provisions relating to loans to local agencies. It would additionally prohibit moneys placed with the Treasurer for deposit in the fund by specified entities from being subject to transfer or loan to specified funds by the board.

(4) Existing law relating to the transfer of special funds in the General Fund to the General Fund when the General Fund is or will be exhausted, requires that if the total money so transferred exceeds an amount equal to 10% of the total additions to surplus available for appropriation as shown in the statement of operations of the preceding fiscal year as set forth in the most recent published annual report of the Controller, interest shall be paid on the excess.

This bill would, instead, require that interest shall be paid on the excess when the total moneys transferred exceed an amount equal to 10% of the total additions to surplus available for appropriation as shown in the statement of operations of a prior fiscal year as set forth in the most recent published annual report of the Controller.

(5) Existing law sets forth various powers and duties of the California Housing Finance Agency in conjunction with the financing of housing. Existing law established the Housing Bond Credit Committee, consisting of the Governor, the Controller, the Treasurer, the Director of Finance, and the Executive Director of the California Housing Finance Agency, with duties relating to the issuance of housing bonds.

This bill would terminate the existence of the Housing Bond Credit Committee, and make related changes, and would transfer specified duties of the committee to the California Housing Finance Agency.

Ch. 834 (SB 1865) Craven. Bonds: local agencies.

The Marks-Roos Local Bond Pooling Act of 1985 permits a joint exercise of powers authority to issue bonds to assist local agencies in financing public capital improvements, working capital, liability, or other insurance needs, or projects whenever there are significant public benefits for taking that action.

This bill would make a technical, nonsubstantive change to these provisions.

Ch. 835 (AB 2474) Kuehl. Child custody.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the court, in making a determination of the best interest of the child in a proceeding involving child custody, to consider specified factors, including any history of abuse by one parent against the child or against the other parent.

This bill would require the court to consider any history of abuse by one parent or any other person seeking custody against specified persons. The bill would make a related change.

This bill would incorporate additional changes to Section 3011 of the Family Code proposed by SB 384, to become operative only if SB 384 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 836 (SB 384) Haynes. Children: custody.

Existing law requires the court to consider certain specified factors in determining the best interests of a child in specified family law proceedings. Existing law provides that among those factors, the court shall consider a history of abuse by one parent against the other or against the child.

This bill would provide that the court shall also consider the habitual or continual illegal use of controlled substances or the habitual or continual alcohol abuse by either parent.

This bill would incorporate additional changes to Section 3011 of the Family Code proposed by AB 2474, to become operative only if AB 2474 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 837 (AB 2565) Goldsmith. Medi-Cal.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law makes any person receiving health care services for which he or she was not eligible on the basis of false declarations as to his or her eligibility or any person making false declarations as to eligibility on behalf of any other person receiving health care services for which the other person was not eligible liable for repayment and makes that person guilty of a misdemeanor or felony, depending on the amount paid on that person's behalf for which that person was not eligible.

The bill would make any person who willfully and knowingly counsels or encourages any individual to make false statements or otherwise causes false statements to be made on an application, in order to receive health care services to which the applicant is not entitled, liable for repayment for the cost of services rendered to the applicant.

Existing law requires each provider of health care services rendered to any beneficiary under the Medi-Cal program to keep and maintain records of each service rendered, the beneficiary to whom rendered, the date, and any additional information as the department may by regulation require.

Existing law authorizes the State Department of Health Services to make any examination of the books and records pertaining to any services provided to recipients of Medi-Cal services.

This bill would, for purposes of these provisions, also include within the definition of the term provider any person or entity under contract with the provider of health care services to assist in the application process or eligibility determination.

This bill would incorporate additional changes in Section 14124.2 of the Welfare and Institutions Code, proposed by AB 2568, to be operative only if AB 2568 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

Ch. 838 (AB 2568) Woods. Medi-Cal: dental providers.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services, including dental services.

Existing law contains specified grounds upon which the Director of Health Services may suspend a health care provider from participation in the Medi-Cal program.

This bill would, in addition, permit suspension by the director of a provider of dental services for the provision of services which are below or less than the standard of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

acceptable quality established by the California Dental Association Guidelines for the Assessment of Clinical Quality and Professional Performance.

This bill would incorporate additional changes in Section 14124.2 of the Welfare and Institutions Code, proposed by AB 2565, to be operative only if AB 2565 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

Ch. 839 (SB 1638) Johnson. Deeds of trust: trustee substitution.

Existing law sets forth the procedures for the substitution of trustees under a deed of trust upon real property or an estate for years therein.

This bill would, as an alternative procedure, set forth the procedures for the substitution of trustees under a deed of trust upon real property or an estate for years, given to secure an obligation to pay money, by the beneficiary or beneficiaries under the trust deed who hold more than 50% of the record beneficial interest of a series of notes secured by the same real property or of undivided interests in a note secured by real property equivalent to a series transaction. The bill would also establish a process through which all of the beneficiaries under a trust deed can agree to be governed by beneficiaries holding more than 50% of the record beneficial interest of a series of notes in real property or interests in a note equivalent to a series transaction, as specified. In order to substitute trustees or agree to be governed by the majority interest holders, all parties to the transaction would be required to sign and record a document containing specified information.

Ch. 840 (SB 1485) Lewis. Insurance: financial statements.

Existing law prohibits certain deductions or credits in any accounting or financial statements of a ceding insurer in respect to any so-called reinsurance contract unless, in the contract, the reinsurer undertakes to indemnify the ceding insurer, not only in form but in fact, against all or a part of the loss or liability arising out of the original insurance.

The bill would revise and recast various provisions as respects credit in accounting and financial statements of insurers for reinsurance, either as an asset or deduction from liability, and related matters, including funds required to be held in trust by reinsurers, as specified.

The bill would state legislative intent.

Ch. 841 (AB 3220) Archie-Hudson. California Science Center.

(1) Existing law provides for the Sixth District Agricultural Association, which is known as the California Museum of Science and Industry.

This bill would rename the California Museum of Science and Industry as the California Science Center and specify that it is deemed to be a tax-exempt organization as an instrumentality of the state.

The bill also would state that no state entity, including the California Science Center, shall incur any costs to reflect the changes made by this bill in renaming the California Museum of Science and Industry the California Science Center.

In addition, the bill would prohibit the City of Los Angeles and the County of Los Angeles from imposing any tax upon tickets purchased authorizing the use of parking facilities owned by the California Science Center.

(2) This bill would incorporate additional changes in Section 4108 of the Food and Agricultural Code, proposed by SB 1205, to be operative only if SB 1205 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(3) This bill would incorporate additional changes to Section 830.3 of the Penal Code proposed by SB 357, to be operative only if SB 357 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 842 (AB 3296) Brewer. Local agency procedures: real property: document recordation: planning and zoning hearings.

(1) Under existing law, certain documents and written instruments, including those transferring title, to, or giving a lien on, real property, or giving right to a debt or duty, may be submitted for recordation to the county recorder, as specified.

This bill would authorize the county recorders in the Counties of San Bernardino and Orange to accept for recording, in lieu of a written paper document, a digitized image

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of a recordable instrument, as specified. The bill would state that these provisions shall remain in effect only until January 1, 1999, unless a later enacted statute, enacted before January 1, 1999, deletes or extends that date.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

The bill would declare that, because of the unique circumstances applicable to the specified counties, a statute of general applicability cannot be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution.

(2) Existing law specifies the procedures that govern city and county zoning hearings. These procedures require, among other things, that city and county zoning agencies develop and publish procedural rules for conduct of their hearings so that all interested parties have advance knowledge of the procedures to be followed.

This bill, by requiring that zoning agency procedural rules incorporate specified notice and hearing requirements, would impose a state-mandated local program.

This bill would state legislative findings and declarations that the right of property owners to public notice regarding proposals affecting the permitted use of property, including proposals to adopt or amend zoning ordinances, is an issue of statewide concern, and not a municipal affair. It would further state the intent of the Legislature to establish clear and uniform standards for local officials to give notice of proposed zoning decisions that affect the permitted use of property.

(3) This bill would incorporate additional changes in Section 65804 of the Government Code, proposed by SB 1628, to be operative only if SB 1628 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 843 (SB 2165) Mountjoy. Juveniles: temporary custody.

(1) Existing law authorizes a peace officer to take a minor into temporary custody, without a warrant, when the officer has reasonable cause for believing that the minor has committed a crime.

This bill would provide that a minor who is 14 years of age or older who is taken into custody by a peace officer for the personal use of a firearm, as specified, shall not be released until that minor is brought before a judicial officer.

(2) Under existing law, if an officer who takes a minor into temporary custody, as specified, determines that the minor should be brought to the attention of the juvenile court, he or she is required to either prepare and deliver a written notice to appear before the probation officer, or deliver the minor to the probation officer without unnecessary delay, as provided.

This bill would provide that any peace officer who takes a minor who is 14 years of age or older into temporary custody pursuant to the provision of the bill described in (1) above shall deliver the minor to the probation officer without unnecessary delay, as provided.

(3) Under existing law, upon delivery to the probation officer of a minor who has been taken into temporary custody, as specified, the probation officer is required to immediately investigate the circumstances and release the minor to the custody of his or her parent, guardian, or responsible relative unless one or more specified conditions exist.

This bill would provide that whenever a minor who is 14 years of age or older is delivered to the custody of the probation officer pursuant to the provision of the bill described in (2) above, the probation officer shall retain the minor in custody until the minor is brought before a judicial officer of the juvenile court for a detention hearing.

(4) By requiring increased duties of local officials, the bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 844 (SB 1992) Calderon. Criminal gang activity: forfeiture.

Existing law, known as the California Control of Profits of Organized Crime Act, provides for the forfeiture of assets of any person convicted of engaging in a pattern of criminal profiteering activity, as defined. This act provides for the distribution of any money forfeited, or the proceeds of sale of any assets forfeited, to specified persons, to state and local entities for specified reimbursement purposes, or to the county's children's trust fund.

This bill would revise the definition of criminal profiteering activity so as to include in that definition any person convicted of engaging in a pattern of criminal gang activity, as defined, thereby making that person's assets also subject to forfeiture under the above act. By increasing the amount of money and assets subject to forfeiture and distribution under that act, the bill would make an appropriation.

Ch. 845 (AB 3136) Miller. Firearms: minors.

Existing law prohibits licensed firearm dealers from supplying, selling, delivering, or giving possession or control of a pistol, revolver, or firearm capable of being concealed upon the person to any person under the age of 21 years or any other firearm to a person under the age of 18 years. A violation of this prohibition is a misdemeanor unless the violation involves the delivery of a pistol, revolver, or other firearm capable of being concealed upon the person, in which case the violation is punishable as a misdemeanor or a felony.

This bill would make a violation of this prohibition a felony where the violation involves the delivery of any firearm to a person who the dealer knows, or should know, is a minor. By increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

The bill would also provide that, in the case of any violation of the prohibition against selling, supplying, delivering, or giving possession or control of a firearm to a specified person who is prohibited from possessing a firearm, or in the case of a violation by a licensed firearms dealer of the prohibition against supplying, selling, delivering, or giving possession or control of any firearm to a person under 21 or 18 years of age, as specified, and where the firearm is subsequently used in the commission of a felony for which a conviction is obtained and the prescribed sentence is imposed, an additional term of imprisonment in the state prison for one, 2, or 3 years shall be imposed in addition and consecutive to the sentence prescribed.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate some of the changes in Section 12072 of the Penal Code enacted by SB 671 (Chapter 128 of the Statutes of 1996).

Ch. 846 (SB 2164) Hayden. Controlled substances: flunitrazepam.

Existing law categorizes controlled substances into 5 schedules and places the greatest restrictions on those contained in Schedule I.

This bill would include in Schedule IV the depressant flunitrazepam. This bill would impose a state-mandated local program upon local governments by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 847 (AB 2433) Harvey. Graffiti: freeways: penalties.

(1) Under existing law, it is an infraction punishable by a fine not to exceed $500 and the performance of community service to deface with graffiti or other inscribed material, as defined, certain real or personal property or the interior or exterior of facilities or vehicles of a governmental entity. For second violations of this graffiti provision, existing law makes it a misdemeanor punishable by county jail time, a fine, or the performance of community service. For the third or subsequent violations of this provision, existing law makes it a misdemeanor punishable by imprisonment in a county jail not exceeding one year or the performance of community service.

This bill would provide that, with respect to the first and 2nd violations, the maximum fine and community service time be doubled. The bill would also provide that, for the 3rd or subsequent violation, the maximum community service time be doubled and a fine not to exceed $3,000 be imposed. The bill would make corresponding increases in the time allotted for completion of the performance of community service time.

(2) Existing law provides that any person who violates certain provisions regarding vandalism and graffiti offenses on or within 100 feet of a highway, or its appurtenances, as specified, is guilty of a misdemeanor, punishable as specified.

This bill additionally would provide that any person who violates those provisions on a freeway or its appurtenances, as specified, is guilty of a misdemeanor punishable by imprisonment in a county jail not to exceed one year, by a fine not to exceed $5,000, or by both the imprisonment and fine. The bill would authorize the court to order, as a condition of probation, the defendant to perform community service not to exceed 480 hours over a period not to exceed 420 days during a time other than during his or her hours of school attendance or employment.

Because this bill would increase the punishments for existing crimes, it would impose a state-mandated local program.

(3) This bill would incorporate additional changes to Sections 640.5 and 640.6 of the Penal Code proposed by AB 2295, to be operative only if AB 2295 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 848 (AB 2589) Battin. Public utilities: baseline rates.

Existing law requires the Public Utilities Commission to designate a baseline quantity of electricity and gas, as defined, necessary for a significant portion of the reasonable energy needs of the average residential customer.

Existing law requires that the commission retain an appropriate inverted rate structure in establishing residential rates, and requires that if the commission increases baseline rates, revenues resulting from those increases be used exclusively to reduce nonbaseline residential rates.

This bill would provide for a test of noninverted rate design or other rate structure changes on an experimental basis in Climatic Zone 15.

Ch. 849 (SB 1883) Hayden. Charter schools.

The Charter Schools Act of 1992 provides a procedure for the establishment of not more than 100 charter schools, with no more than 10 charter schools in any single school district, that receive public funding but are not subject to the laws generally governing school districts.

This bill would authorize school districts that maintain an enrollment of more than 600,000 pupils to operate 12 charter schools in addition to the 100 charter schools that school districts may operate in this state and the 10 charter schools that a single school district may operate. To the extent that a school district would be required to review and respond to any additional petitions to establish charter schools that are filed in any school district that maintains an enrollment of more than 600,000 pupils, it would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 850 (AB 1820) McPherson. Redevelopment: replacement dwelling units.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas of those communities known as project areas. Existing provisions of the Community Redevelopment Law require that, whenever dwelling units housing persons and families of low or moderate income are destroyed or removed from the low- and moderate-income housing market as part of a redevelopment project, the redevelopment agency shall, within 4 years of the destruction or removal, provide an equal number of replacement dwelling units that have an equal or greater number of bedrooms as those destroyed or removed units, as specified. Existing provisions of the Community Redevelopment Law require that the redevelopment agency prepare a feasible method or plan for relocation of families and persons to be temporarily or permanently displaced from housing facilities, or nonprofit local community institutions to be temporarily or permanently displaced from facilities actually used, in the project area, and require the legislative body of the community to ensure that the method or plan for relocation shall provide that no persons or families of low or moderate income shall be displaced unless and until there is a suitable housing unit available and ready for occupancy.

Existing law also requires public entities, as defined, to give relocation advisory assistance and provide payments to specified recipients in connection with acquisition of real property for public use or the rehabilitation or demolition of property or other displacing activity of the public entity.

This bill would, if the City of Marina or the Redevelopment Agency of the City of Marina leases from the United States Department of the Army, either or both of the housing units known as the Preston Park and Abrams Park Units, and subleases all or some of the dwelling units in those housing units to low- or moderate-income persons, with respect to those dwelling units, exempt the redevelopment agency from the replacement housing requirements of these provisions, and exempt the City of Marina and the redevelopment agency from the relocation requirements of these provisions, as a consequence of the redevelopment agency subleasing property to persons of low and moderate income during the term of the lease with the United States Department of the Army.

This bill would make findings and declarations of the Legislature regarding the necessity to enact a special statute.

This bill would further provide that, if either the City of Marina or the Redevelopment Agency of the City of Marina, or both, become exempt from the replacement housing requirements and the relocation requirements of existing law, as a consequence of actions taken pursuant to this bill, the City of Marina, without reimbursement from the state, shall conduct a study of the implementation of the provisions of this bill and would require the mayor, on or before January 1, 2000, to submit a report to the Legislature, as specified.

Ch. 851 (AB 2170) Knox. Domestic violence: arrest.

(1) Existing law provides that, in a case in which a person is arrested for a misdemeanor violation of a protective order, the person shall be taken before a magistrate instead of being released from custody pursuant to specified procedures, except as provided.

This bill additionally would provide that, in a case in which a person is arrested pursuant to specified law enforcement policies that encourage the arrest of domestic violence offenders, the person shall be taken before a magistrate instead of being

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

released, except as provided. Because this bill would impose increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, it would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 852 (AB 881) Rogan. Prisoners: vexatious litigants.

Existing law specifies circumstances under which a prisoner may be denied or lose work time credit because of the commission of new crimes or misconduct.

This bill would require the Department of Corrections to deny or take away 30 days of work time credit if a prisoner is found by a court to be a vexatious litigant, as defined.

Ch. 853 (AB 2501) Kuykendall. Public utilities: exempt wholesale generators.

Existing state law defines "public utility" for purposes of state regulation. Existing state law authorizes the Public Utilities Commission to supervise and regulate every public utility in the state, and to do all things necessary and convenient in the exercise of its power and jurisdiction. Existing federal law defines an "exempt wholesale generator" as any person determined by the Federal Energy Regulatory Commission to be engaged in the business of owning and operating one or more eligible facilities and selling electric energy at wholesale, as specified.

This bill would define an "exempt wholesale generator" for purposes of state law, as it is defined in specified federal law. The bill would provide that the ownership or operation of an exempt wholesale generator, as specified, does not make a person or corporation a public utility, or subject to the general jurisdiction of the commission, solely due to the ownership or operation of that facility.

Ch. 854 (AB 1890) Brulte. Public utilities: electrical restructuring.

Existing law provides for the furnishing of utility services, including residential electrical, gas, heat, and water services, by privately owned public utilities subject to the jurisdiction and control of the Public Utilities Commission and similar services by publicly owned public utilities including municipal corporations subject to their governing bodies and municipal utility districts and public utility districts subject to their boards and directors.

The bill would amend the Public Utilities Act to require that the commission undertake various actions, including the facilitation of the efforts of the state's electrical corporations to develop and obtain authorization of the Federal Energy Regulatory Commission for the creation and operation of an Independent System Operator and an Independent Power Exchange, and the authorization of direct transactions between electricity suppliers and end use customers, subject to implementation of a nonbypassable charge.

This bill would prohibit any person, corporation, electrical corporation, or local publicly owned electric utility or other governmental entity other than a retail customer's existing electric service provider as of December 20, 1995, from providing electric service to a retail customer of a publicly owned electric utility unless the customer pays to the utility currently providing electric service, a nonbypassable generation-related severance fee or transition charge, as defined, established by the regulatory body for that utility.

The bill would prohibit a local publicly owned electric utility or other governmental entity from providing electrical service to a retail customer of an electrical corporation unless that customer pays a nonbypassable transition charge to the electrical corporation.

The bill would require the local regulatory body of each local publicly owned electric utility to determine whether it will authorize direct transactions between electricity suppliers and end use customers, subject to implementation of the nonbypassable severance fee or transition charge, and provide for procedures to implement the direct transactions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide for the issuance of rate reduction bonds for the recovery of transition costs, as defined, by electrical corporations, pursuant to the restructuring of the electrical services industry.

Under the Bergeson-Peace Infrastructure and Economic Development Bank Act, the California Infrastructure and Economic Development Bank is authorized to, among other things, issue and sell or purchase bonds, as defined, make loans, and provide for other types of financing for qualifying projects for public improvements by specified public agencies, known as sponsors, and to execute any instrument necessary, convenient, or appropriate to carry out any power expressly given to the bank by the act. The act also establishes and makes available to the bank the California Infrastructure Bank Fund, a special fund continuously appropriated for these purposes.

By providing for the financing of transition costs under the act which is a new use of continuously appropriated funds, this bill would make an appropriation.

The bill would also incorporate changes to Section 216 of the Public Utilities Code proposed by AB 2501, to take effect if both bills are chaptered and this bill is chaptered last.

Since a violation of the Public Utilities Act is a misdemeanor, the bill would impose additional duties upon local law enforcement agencies, and the bill would also impose additional duties on local agencies, thereby constituting a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 855 (SB 1322) Calderon. Public Utilities Commission: judicial review.

Existing law provides for judicial review of decisions and findings of the Public Utilities Commission, as specified. Existing law requires that the Supreme Court is the exclusive forum for judicial review of commission proceedings.

This bill would express legislative intent to establish the manner and scope of review of commission decisions and to overrule a specified decision of the Supreme Court of California relating to judicial review of Public Utilities Commission matters. The bill would require the Supreme Court to grant expedited consideration to commission petitions on specified matters. The bill would generally revise provisions relating to the judicial review of decisions and findings of the Public Utilities Commission. The bill would generally authorize judicial review of commission proceedings to take place in either the Supreme Court or the court of appeal.

Ch. 856 (SB 960) Leonard. Public Utilities Commission: administrative procedures.

Under existing law, the Public Utilities Commission is responsible for the regulation of public utilities within the state.

This bill would state the intent of the Legislature regarding the commission's decisionmaking process.

Existing law requires the commission to create a consumer advocacy division.

This bill would establish an advocacy division with a director appointed by and serving at the pleasure of the Governor, subject to Senate confirmation and would require the division's annual budget to be separately identified.

Existing law requires the Public Utilities Commission, upon scheduling hearings and specifying the scope of issues to be heard in any proceeding involving specified public utilities, to assign an administrative law judge to preside over the hearings, either sitting alone or assisting the commissioners who will hear the case.

This bill would authorize the commission to determine whether a proceeding requires a hearing, would authorize the commission to assign one or more commissioners and administrative law judges to oversee cases, and would prescribe separate procedures for proceedings that the commission determines are either quasi-legislative, adjudication, or ratesetting cases. The bill would require the commission to submit a report to the Legislature on or before March 31, 1997, regarding the categorization of cases.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the commission on or before June 30, 1997, to submit a report to the Legislature on needed revisions of law. The bill would require the commission, on and after January 1, 1999, to annually submit a report to the Legislature regarding case management matters.

The bill would require the commission on or before March 31, 1997, to submit a report to the Legislature concerning regulations and statutes affected by specified matters.

The bill would provide that specified provisions become operative on January 1, 1998, and would be repealed on January 1, 2002, unless later enacted statutes extend or delete that date.

Ch. 857 (AB 1987) Miller. Athlete agents: contracts.

Under existing law, no person may engage in or carry on the occupation as an athlete agent without first registering with the Labor Commissioner.

This bill would repeal specified provisions of the Labor Code dealing with athlete agents including the requirement that an athlete agent must register with the Labor Commissioner. This bill would make inoperative, as of July 1, 1997, additional provisions dealing with athlete agents, and would repeal those provisions on January 1, 1998. This bill would enact the Miller-Ayala Athlete Agents Act to regulate the activities of athlete agents, as specified. The bill would provide for civil and criminal penalties against any athlete agent who violates specified provisions of the act. By imposing criminal penalties for these violations, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 858 (SB 1401) Ayala. Athlete agents.

Existing law regulates athlete agents, as defined, and prohibits any person from engaging in the occupation of an athlete agent without first registering with the Labor Commissioner and paying a filing fee.

This bill would provide that an attorney may be disciplined for violation of specified provisions of law governing athlete agents. The bill would prohibit an athlete agent from having certain financial interests in any entity in the same sport as a person with whom the athlete agent has entered into an agent contract or is representing, as specified. The bill would render an agent contract void and unenforceable, and any money or other consideration received by the athlete agent refundable, if the athlete agent fails to comply with specified provisions of law. The bill would give any professional athlete or student athlete, an elementary or secondary school, college, university, other educational institution, or group of these institutions the right to bring a civil action to recover damages from an athlete agent if that person or institution is adversely affected by the acts of the agent in providing benefits to a student athlete, as specified. The bill would create a presumption that an educational institution has been adversely affected if an athlete agent has contact with a student athlete or person connected with the student athlete, as specified.

This bill would become operative only if AB 1987 of the 1995–1996 Regular Session is enacted and takes effect on or before January 1, 1997.

Ch. 859 (AB 3260) Richter. Travelers checks and payment instruments.

Existing law, for purposes of the Travelers Checks Act and the Payment Instrument Law, defines the term "United States currency eligible security," and "value."

This bill would revise and expand the definition of "United States currency eligible security," as specified, to include, among other things, shares in an investment company that meet specified requirements. It would also revise the definition of value.

Existing law provides that the Superintendent of Banks may find that an account due to any licensee from any agent of the licensee is an eligible security, under specified circumstances.

This bill would delete that provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would incorporate additional changes in Sections 1876.1, 1876.9, 33560, and 33568 of the Financial Code, proposed by AB 3351, to be operative only if AB 3351 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last. These changes would become operative on the operative date of AB 3351.

Ch. 860 (AB 2260) Kuykendall. Treasurer: securities.

(1) Existing law authorizes a corporation being dissolved under the General Corporation Law, the Nonprofit Public Benefit Corporation Law, the Nonprofit Mutual Benefit Corporation Law, or the Consumer Cooperative Corporation Law under specified conditions to deposit the payment, dividend, distribution, or the maximum amount of the claim with the Treasurer or with a bank or trust company in this state in trust for the benefit of those lawfully entitled to it.

This bill would transfer the responsibilities of the Treasurer in this regard to the Controller.

(2) Existing law authorizes the superior court of the county in which liquidation proceedings of a bank or trust company are pending or in which the head office of the bank or trust company is situated to designate the Treasurer to act as a new or substituted trustee or bailee under specified circumstances.

This bill would repeal this provision.

(3) Existing law requires a court in making its order approving the Commissioner of Corporations' final statement of the liquidation of an escrow agent to direct the commissioner to deposit with the Treasurer the amounts of the liquidating dividends to which claimants and investors are entitled but that remain unpaid or unclaimed in the hands of the commissioner.

This bill would delete the requirement the liquidating dividends be deposited with the Treasurer and, instead, require that they be deposited with the Controller.

(4) Existing law requires the Treasurer and Office of Small and Minority Business to report to the Governor and the Legislature on the level of participation by disabled veteran business enterprises in contracts for professional bond services.

This bill would delete the reference to the Treasurer and instead require each awarding department to make this report.

(5) Existing law provides that if the Public Utilities Commission makes specified findings the commission shall make and issue an order limiting the area or areas served or defining the area or areas not to be served by a utility with respect to the sale or distribution of electric power or energy. Existing law provides that an order containing limitations on a utility district is not effective until the Treasurer has issued its order limiting the area to be served or defining the area not to be served by the irrigation district and approving the contract or conditions.

This bill would repeal the latter provision.

(6) Existing law authorizes the Treasurer to issue an order limiting the areas within which a petitioning irrigation district may sell or distribute electric power or energy or define the areas within which a petitioning irrigation district shall not sell or distribute electric power or energy.

This bill would repeal this authority of the Treasurer.

(7) Existing law authorizes the Controller in the case of the motor vehicle fuel license tax, and the State Board of Equalization in the case of sales and use taxes, the use fuel tax, the alcoholic beverage tax, the timber yield tax, the hazardous substance tax, the waste management fee, the underground storage tank fee, the oil spill fee, general fee collection procedures, and the diesel fuel tax, to seize and sell real and personal property at a public auction to pay the amount of taxes or fees due, together with any interest or penalties. If upon the sale of the property the moneys received exceed the total of all amounts due the state, the Controller or State Board of Equalization is required to return the excess to a specified party. However, if the party is not available, the Controller or State Board of Equalization is required to deposit the excess moneys with the Treasurer, as trustee for the owner.

This bill would, instead, require the Controller to deposit the excess moneys in an unclaimed property account in trust for the owner in the case of the motor vehicle fuel license tax, and in the case of the other taxes specified above would require the State

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Board of Equalization to deposit the excess moneys with the Controller in trust for the owner, rather than with the Treasurer.

(8) Existing law makes references to the responsibilities of the Treasurer that were deleted by the repeal of the Districts Securities Law.

This bill would repeal those obsolete references.

Ch. 861 (SB 1558) Marks. Crimes.

Existing law prohibits, without the consent of the registrant, the willful manufacture, intentional sale, or knowing possession for sale at the point of sale of any counterfeit of a mark registered with the Secretary of State or registered on the Principal Register of the United States Patent and Trademark Office, and provides for the forfeiture and destruction of those marks and of all goods, articles, or other matter bearing the marks. Existing law also prohibits the unauthorized access to computers, computer systems, and computer data and provides for the forfeiture of any property of the defendant used in committing that unauthorized access.

Existing law, known as the California Control of Profits of Organized Crime Act, provides for the forfeiture of assets of any person convicted of engaging in a pattern of "criminal profiteering activity," which is defined as any act committed or attempted or any threat made for financial gain or advantage, which act or threat may be charged as one of a specified list of crimes. Existing law provides for the disposition of money forfeited or sale proceeds of items forfeited to, among others, state and local government, as specified. This act provides for the distribution of any money forfeited, or the proceeds of sale of any assets forfeited, to specified persons, to state and local entities for specified reimbursement purposes, or to the county's children's trust fund.

This bill would revise the definition of criminal profiteering activity so as to include in that definition any person convicted of offenses relating to the counterfeit of a registered mark and offenses relating to the unauthorized access to computers, computer systems, and computer data, thereby making that person's assets also subject to forfeiture under the above act. By increasing the amount of money and assets subject to forfeiture and distribution under that act, the bill would make an appropriation.

This bill would define the terms "article," "loss," and "value" as those terms relate to counterfeited but unassembled components of computer software packages and as they relate to counterfeit items of computer software manufactured or possessed for sale.

This bill would incorporate additional changes to Section 186.2 of the Penal Code proposed by SB 1992, to be operative only if SB 1992 and this bill are both enacted and become operative on or before January 1, 1997, and this bill is enacted last.

Ch. 862 (AB 2751) Kaloogian. Estates and trusts.

Existing law governs civil actions regarding the administration of a decedents' estate, the determination that a person is of unsound mind or lacks capacity, as specified, guardianships and conservatorships, transfers of custodial property, the administration of trusts, and fiduciary relationships.

This bill would revise and recast these provisions to, among other things, specify procedures that become operative July 1, 1997, to administer accounts rendered under the Probate Code; specify that a guardianship of a ward terminates upon the emancipation of the ward, as specified; and require the order appointing a guardian or conservator to have a specified notice on the first page of the order. This bill would provide that certain of the changes that would be made by this bill shall become operative on July 1, 1997.

Ch. 863 (AB 2513) Speier. Physicians and surgeons: assisted reproduction: consent.

Existing law provides that it is unprofessional conduct for a physician and surgeon to fail to comply with prescribed informed consent requirements relating to sterilization procedures, treatment of breast cancer, silicon implants, and collagen injections. Existing law provides that any person who violates the law relating to enforcement of the Medical Practices Act is guilty of a misdemeanor.

This bill would require a physician and surgeon who removes sperm or ova from a patient to obtain a prescribed written consent from the patient before the sperm or ova

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

are used for a purpose other than reimplantation in the same patient or implantation in the spouse of the patient. The bill would provide that violation of the requirement constitutes unprofessional conduct. The bill would provide that the misdemeanor provision does not apply to a person who violates the requirement. This bill would require a physician and surgeon who fails to obtain the required consent a 2nd time to be assessed a civil penalty of not less than $1,000 and not more than $5,000, plus court costs, to be paid to the individual whose required consent was not obtained.

Ch. 864 (SB 1665) M. Thompson. Medicine: telemedicine.

Existing law provides that the Medical Practice Act does not apply to any practitioner when in actual consultation with a licensed practitioner of this state, and would prohibit the practitioner from opening an office, a place to meet patients, and from receiving calls from patients within the limits of this state.

This bill would instead provide that the act does not apply to any practitioner located outside the state when in actual consultation either within this state or across state lines with a licensed practitioner of this state, and would also prohibit the out-of-state practitioner from having ultimate authority over the care or primary diagnosis of a patient who is located within this state.

Existing law provides for the licensure and regulation of physicians and surgeons and other health care professionals and provides that various actions constitute unprofessional conduct. Existing law also regulates health care service plans, disability insurers, and nonprofit hospital service plans and requires each of them to provide certain prescribed benefits. Existing law provides that a violation of the provisions governing health care service plans is subject to criminal sanction. Existing law establishes the Medi-Cal program which provides for health care services for individuals who meet certain financial eligibility criteria.

This bill would enact the "Telemedicine Development Act of 1996" by imposing several requirements governing the delivery of health care services through telemedicine, as defined. It would require a health care practitioner, as defined, prior to providing health care services through telemedicine, as defined, to obtain the verbal and written consent of the patient, and would provide that the failure to do so would constitute unprofessional conduct. This requirement would not apply when the patient is not directly involved in the telemedicine interaction, with a specified exception. The bill would impose various requirements in regard to the provision of, or payment for, telemedicine services by health care service plans, disability insurers, and, until January 1, 2001, the Medi-Cal program.

Existing law establishes procedures regarding the maintenance of a patient's medical records and for the patient's access to medical records.

This bill would state that it is the intent of the Legislature that all medical information transmitted through telemedicine be maintained as a part of the patient's medical record. The bill would also provide that it should not be construed to alter the scope of practice of any health care provider or to authorize the delivery of health care services in a setting or in a manner not otherwise authorized by law.

By changing the definition of a crime applicable to health care service plans, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 10123.13 of the Insurance Code, proposed by SB 1478, to be operative only if SB 1478 and this bill are both chaptered and become effective on January 1, 1997, and this bill is chaptered last.

Ch. 865 (SB 1555) Hayden. Sperm, ova, or embryos: use and implantation without authorization.

Existing law generally prohibits the transfer of any human organ for purposes of transplantation for valuable consideration.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make it a felony for anyone to knowingly use sperm, ova, or embryos in assisted reproduction technology, for any purpose other than that indicated by the sperm, ova, or embryo provider's signature on a written consent form, or to implant sperm, ova, or embryos, through the use of assisted reproduction technology, into a recipient who is not the sperm, ova, or embryo provider, without the signed written consent of the sperm, ova, or embryo provider and recipient. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 866 (SB 1321) Calderon. Legal services.

The State Bar Act regulates the practice of law in this state and controls the admission of attorneys to the State Bar. The act provides for the creation of an examining committee within the State Bar, and regulates the requirements for eligibility to practice law in this state.

This bill would revise provisions relating to the appointment of examining committee members, delete obsolete provisions, revise provisions relating to undergraduate study or its equivalent, provide that an applicant can graduate from a law school accredited either by the examining committee or the American Bar Association, revise provisions governing legal study or apprenticeship, require passage of a professional responsibility examination as a condition of admission to the bar, revise and add new provisions relating to applications and filing fees for the bar examination, revise and add new provisions related to the admission of out-of-state or foreign attorneys, and revise provisions governing the law students' examination applicable to students attending a nonaccredited law school.

Ch. 867 (SB 1754) Calderon. Controlled substances: liability.

Existing law, the Uniform Controlled Substances Act, prohibits the sale, use, or possession of controlled substances, except as specified.

This bill would enact the Drug Dealer Liability Act, establishing a cause of action for the illegal sale, use, or possession of an illegal controlled substance, as specified, and regulating various aspects of such actions. The bill would provide that its provisions are severable.

Ch. 868 (AB 2284) Boland. Parole.

Under existing law, a sentence or imprisonment imposed on a criminal defendant includes a period of parole. If an inmate was sentenced pursuant to an indeterminate sentencing scheme, he or she is eligible for parole after serving 3 years of the sentence. If the inmate was given a determinate sentence, he or she generally is eligible for parole at the expiration of a term of incarceration of one year and one day, or at the expiration of a term reduced for good time or work credits.

This bill would require any inmate who is eligible for release on parole for an offense committed on or after January 1, 1997, to agree in writing to be subject to search or seizure by a peace officer or a parole officer at any time of the day or night, with or without a search warrant and with or without cause. The bill would state that it is not the intent of the Legislature to authorize law enforcement officers to conduct searches for the sole purpose of harassment.

This bill would incorporate additional changes to Section 2933 of the Penal Code, proposed by SB 1231, to be operative only if both this bill and SB 1231 are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 869 (AB 2841) Hoge. Alcoholic beverages: retail licenses: undue concentration.

The Alcoholic Beverage Control Act requires the Department of Alcoholic Beverage Control to deny an application for a license if issuance would result in or add to an undue concentration of licenses. Existing law defines undue concentration and provides that,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

notwithstanding the requirement that the department deny an application that would result in or add to an undue concentration of licenses, certain licenses may be issued if the local governing body of the area in which the applicant premises are located determines that public convenience or necessity would be served by the issuance.

This bill would instead allow that determination to be made by the local governing body or its designated subordinate officer or body. The bill would require that determination to be made within 90 days of notification of a completed application, as specified, except that if the local governing body, or its designated subordinate officer or body, did not make a determination within 90 days, the department would be authorized to issue a license if the applicant shows that public convenience or necessity would be served by the issuance. The bill would make related changes.

Ch. 870 (AB 3245) Bordonaro. Fish and game.

(1) Under existing law, the Fish and Game Commission is authorized to adopt regulations to conform California laws relating to the taking or possession of Pacific halibut and migratory birds to specified federal laws, and the Director of Fish and Game is authorized to adopt regulations suspending California laws relating to commercial fishing for one year to conform them to certain federal fishery management plans.

This bill would authorize the commission to adopt regulations to conform California laws relating to the taking or possession of salmon to federal law, and would delete the one-year limitation on those regulations relating to commercial fishing adopted by the director. The bill would exempt the regulations adopted by the director from the Administrative Procedure Act.

(2) Under existing law, the commission is authorized to adopt regulations governing the areas, seasons, and other matters relating to the taking of antelope. Existing law also authorizes the commission, until January 1, 1997, to annually direct the Department of Fish and Game to authorize not less than one antelope tag or more than 1% of the total number of tags to be sold at auction for programs and projects to raise funds for programs and projects to benefit antelope.

This bill would extend that authorization to sell those tags to raise funds indefinitely.

(3) Under existing law, transferring any license, license tag, license stamp, permit, application, or reservation or predating and postdating any license, license tag, or permit is a misdemeanor. Existing law also provides the valid period for certain commercial fishing licenses and permits and commercial boat registration.

This bill would prohibit postdating the date of application or the date of issuance of a license, license tag, or permit and would declare that this prohibition does not apply to the date that a license, license tag, or permit is valid.

The bill would exclude the single-day fishing licenses from the requirement for an ocean enhancement stamp to take fish from ocean waters south of Point Arguello for purposes other than for profit and would make technical changes to those provisions. This bill would make commercial licenses and permits to take, possess, or land fish for commercial purposes, except certain commercial fish business licenses, valid from April 1 to March 30 of the next following year and would limit the requirements relating to possession of fish for commercial purposes to possession aboard a boat. The bill would provide, effective April 1, 1997, for an upgrade stamp to upgrade a commercial crewmember fishing license to a commercial operator fishing license, and would establish a fee of $125 for a lobster crewmember permit. The bill would also provide other general conditions applicable to commercial licenses and permits, other than fish business licenses, including conditions prohibiting the transfer and providing for the revocation of the commercial license or permit. The bill would make other conforming changes to existing law relating to the revocation of commercial fishing licenses and permits.

Because existing law would make a violation of the conditions a crime, the bill would thereby impose a state-mandated local program by creating and changing the definition of a crime.

(4) Under existing law, the hunting license fee for a resident of this state under the age of 16 years is $4, as adjusted, and the fee for a hunting license for any nonresident is $59, as adjusted.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, commencing July 1, 1997, would make the fee for a hunting license for a nonresident under the age of 16 years $4, as adjusted, and would authorize the issuance of a hunting license for a nonresident 16 years of age or older, valid for 2 consecutive days and for taking only resident and migratory game birds, resident small game mammals, fur-bearing mammals, and nongame mammals, upon payment of a fee of $25, as adjusted. This bill would also permit the department to waive the permit fee for certain contests, tournaments, and derbies.

(5) Under existing law, groups of mentally or physically handicapped persons under the care of a licensed care center may be issued a free sportfishing permit.

This bill would also permit such a permit to be issued to those groups under the care of a tax-exempt organization, school, or school district.

(6) Under existing law, it is a misdemeanor to possess more than one daily bag limit of any fish taken under a license to take fish for purposes other than for profit, as specified.

This bill would specify the licenses subject to that law and would exempt possession authorized by certain regulations adopted by the commission.

(7) Under existing law, the owner of a vessel is defined for purposes of certain commercial fishing laws.

This bill would define "owner" and "vessel owner" for purposes of commercial fishing laws generally.

(8) Under existing law, the owner or operator of a vessel or aircraft used for commercial fishing is required to obtain a commercial boat registration for that vessel.

This bill would separately provide for the department to issue to the owner or operator of an aircraft used in connection with commercial fishing operations an aircraft registration for the aircraft for a fee of $200 that would be required to be carried aboard the aircraft at all times when the aircraft is used in connection with commercial fishing operations.

(9) Under existing law, a landing receipt is required to be prepared for all fish landed for commercial purposes. The original signed copy of the landing receipt is required to be delivered to the department on or before the 1st and 16th day of each month.

This bill would, instead, require that copy of the landing receipt to be delivered to the department on or before the 16th or last day of the month in which the fish are landed, whichever date occurs first after the fish are landed.

(10) Under existing law, the owner of a commercial fishing vessel used to take salmon for commercial purposes is required to obtain a commercial fishing vessel salmon permit and authorizes the owner or the owner's agent to renew the permit. If the department does not receive an application to renew the permit for any vessel for which a vessel permit has been issued the department is required to notify the owner of the vessel by certified mail.

This bill would, instead, require the notice to be sent by 1st-class mail.

(11) Under existing law, abalone diving permits that authorize the taking of abalone for commercial purposes are required to be issued to prior permittees who landed specified quantities of abalone in the preceding calendar year. Existing law provides for appeals to the commission for nonuse of a permit for reasons beyond the control of an applicant. Existing law also makes it unlawful, until January 1, 1997, to take abalone for commercial purposes in the mainland coastal waters from Palos Verdes Point to Dana Point.

This bill would delete that landing requirement and appeals process for failure to meet the landing requirement and, instead, would require those permits to be issued to persons who held a valid abalone diving permit in the immediately preceding permit year that has not been suspended or revoked. This bill would extend to January 1, 2002, the ban on taking abalone for commercial purposes in the coastal waters from Palos Verdes Point to Dana Point, thereby imposing a state-mandated local program by continuing in effect a crime that would otherwise be repealed.

(12) Until January 1, 1997, existing law prohibits the holder of an abalone diving permit to possess, transport, control, or land more than 180 each of red, green, pink, or black abalone on any day or possess more than 360 total of any one species of abalone on a vessel at any time. Thereafter, that prohibition applies only to black abalone. Until January 1, 1997, existing law requires a court to order the department to permanently revoke the commercial fishing license and any commercial fishing permits of a person

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

convicted of possession, transportation, or control limits on abalone for commercial purposes under certain conditions.

This bill would extend those provisions to January 1, 2002, thereby imposing a state-mandated local program by extending the operation of a crime.

(13) Existing law imposes special fines and license revocation requirements for conviction of possession of sevenfold excesses over the bag limit of abalone taken under a sportfishing or a sport ocean fishing license until January 1, 1997.

This bill would extend those special fines and license revocation requirements to January 1, 2002, thereby imposing a state-mandated local program by extending the operation of a crime.

(14) Under existing law, until January 1, 1997, a person who is required to pay a landing tax for abalone brought ashore for commercial purposes is required to pay an additional tax of $19^1/_2¢$ in addition to each pound or fraction thereof to be deposited in the Fish and Game Preservation Fund and used for the Abalone Resources Restoration and Enhancement Program.

This bill would extend the collection of the additional tax until January 1, 2002, and would make an appropriation by authorizing the use of the revenues from the tax which are deposited in a continuously appropriated fund for the purposes of the program until January 1, 2003.

(15) Existing law authorizes not more than 15% of the revenues from the additional landing tax for abalone to be used for administration by the department.

This bill would make an appropriation by authorizing the use of those revenues for administration until January 1, 2003, in an amount equal to the regularly approved departmental indirect overhead rate.

(16) Existing law prohibits taking or possessing certain fish for commercial purposes, including brown smoothhound sharks.

This bill would limit that prohibition to brown smoothhound sharks that are less than 18 inches in a whole condition or dressed with head and tail removed, and would extend the prohibition to landing of those fish.

(17) Existing law, until January 1, 1997, limits the persons to whom permits to take pink shrimp may be issued.

This bill would extend that limitation to April 1, 1999.

(18) Existing law generally authorizes taking of finfish for commercial purposes with traps pursuant to a finfish trap permit south of Point Arguello. Existing law authorizes taking of hagfish for commercial purposes under a hagfish permit, limits that taking to taking with traps, and excludes the taking of hagfish from the general trap permit.

This bill would limit the use of Korean traps, as defined, or bucket traps, as described, to the taking of hagfish. Because existing law would make a violation of the trap limitation a crime, the bill would impose a state-mandated local program.

(19) Existing law authorizes double bags or cod-ends in nets to be used or possessed for commercial fishing in accordance with federal groundfish regulations.

This bill would delete that authorization.

(20) Under existing law, the Governor has executed an interstate compact on behalf of the state forming the Pacific Marine Fisheries Commission that has been approved by Congress. Congress has redesignated that commission to be the Pacific States Marine Fisheries Commission.

This bill would conform state law to that redesignation.

(21) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the Department of Fish and Game and the commission to carry out the Fish and Game Code.

Because this bill would provide for additional fees to be deposited in the Fish and Game Preservation Fund and would impose new duties on the department and the commission, the bill would make an appropriation.

(22) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 871 (AB 3392) Weggeland. Controlled substances.

Existing law prohibits the manufacture of controlled substances and the possession of certain precursors of controlled substances with the intent to manufacture those controlled substances.

This bill would provide that any person convicted of violating these provisions, or of an attempt to violate these provisions, as the provisions relate to methamphetamine or phencyclidine, when the crime occurs in a structure where any child under 16 years of age is present or causes a child under 16 years of age to suffer great bodily injury or death, shall be punished by an additional term of imprisonment in the state prison, as specified.

Ch. 872 (AB 3472) Committee on Local Government. Local government.

Existing law provides that, after making a survey in conformity with the practice of land surveying, the surveyor or civil engineer may file with the county surveyor in the county in which the survey was made, a record of the survey and, requires that a record of the survey relating to land boundaries or property lines shall be filed if the survey discloses any of specified conditions.

This bill would instead make these provisions applicable to field surveys, as specified.

Existing law relating to the practice of land surveying specifies standards for the use of monuments in surveys.

This bill would revise those standards as specified.

Under existing law, the office of constable has been largely eliminated.

This bill would delete references to constable in various provisions and would make other related changes.

Existing law requires a school district, upon the approval by its governing board to proceed with the issuance of certificates of participation revenue bonds, to notify the county superintendent of schools and the county auditor.

This bill would delete the requirement of notification of the county auditor and would make related changes.

Existing law, relating to bonds for public officials, authorizes the use of a master official bond to provide coverage on more than one officer, employee, or agent. Existing law specifically permits a county board of supervisors to authorize a master official bond for more than one officer, employee, or agent of any special purpose assessing or taxing district whose principal office lies within the county.

This bill would, instead of the latter provision, authorize the use of a master official bond by a local public agency, as defined, for more than one officer, employee, or agent of the local public agency, and would make a related change.

Existing law designates the Office of Intergovernmental Management as the clearinghouse for specified information from the Federal Bureau of the Budget, requires that office to be the clearinghouse for requests from cities and counties, that appropriate state agencies evaluate the environmental impact of any proposed subdivision or land project, and requires the office, upon request by a city or county, to arrange for technical assistance from state agencies in connection with the evaluation of proposed subdivision maps.

This bill would rename the office the State Clearinghouse and delete the duties relating to the evaluation of the environmental impact of proposed subdivisions and land projects and to the evaluation of subdivision map acts, as described above.

Existing law provides that the county auditor may destroy certain claims, warrants, and vouchers that are more than 5 years old or at any time after the document has been recorded or reproduced if the copy is maintained for 5 years from the date of the document. The auditor may destroy an index or warrant register that is over 15 years old without reproducing it.

This bill would permit the auditor to destroy an index or warrant register that is over 5 years old without reproducing it.

Under existing law, various special districts may elect to have the county collect district assessments with the collection of county taxes by county officers.

This bill would provide that when a special district has elected to have its assessments collected by the county on the property tax roll, the district shall transmit to the county auditor, no later than August 10 of each year, a statement of the rates fixed for assessments.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the county recorder, upon the payment of proper fees and taxes to accept for recordation any instrument, paper, or notice that is authorized or required by law to be recorded if the instrument, paper, or notice meets specified requirements. Existing law defines "instrument" for these laws relating to recordation.

This bill would authorize the county recorder to accept, in lieu of a written paper, for recording digitized images of recordable instruments if specified requirements are met.

Existing law relating to local planning and land use requires the legislative body of each county and city to prepare and adopt a comprehensive, long-term general plan for the physical development of the county or city. The Director of Planning and Research may grant a reasonable extension of time not to exceed 2 years for the preparation and adoption of the general plan if the legislative body makes any of specified findings. During the period of the extension the city or county is not subject to certain requirements, including requirements of state law that its decisions be consistent with those portions of the general plan for which an extension has been granted.

This bill would delete the exemption from those state requirements during the extension.

The Subdivision Map Act, which generally regulates the division of land for purposes of sale, lease, or finance, defines city engineer and county surveyor, which includes a county engineer, for purposes of the act.

This bill would provide that a city engineer or county engineer registered as a civil engineer after January 1, 1982, shall not be authorized to prepare, examine, or approve surveying maps and documents but would specify that those acts shall only be performed by a person licensed as a professional land surveyor or registered prior to January 1, 1982, as a civil engineer.

Under the Subdivision Map Act, a filed tentative map may be submitted to the Office of Intergovernmental Management for an evaluation of the environmental impact of the proposed subdivision.

This bill would delete that provision.

Existing law provides that the treasury of the Bay Area Air Quality Management District shall be in the custody of a county treasurer of a county included entirely within the bay district and that this treasurer shall be the bay district treasurer.

This bill would delete the requirement that the county of that treasurer be included entirely within the district.

Existing law specifies that the boundaries of the Mojave Desert Air Quality Management District include all of San Bernardino County not within the south coast district.

This bill would specify that the district also includes all of Riverside County not within the south coast district and would require the appointment of an additional public member to the district governing board, thereby imposing a state-mandated local program.

Existing law provides for the establishment of park and open-space districts including the Sonoma County Agricultural Preservation and Open Space District.

This bill would delete the requirement that Sonoma County officers and employees act, ex officio, as officers and employees of that district and would permit the district, by resolution, to eliminate the requirement that demands against the district which are paid without prior specific board approval be presented at the next board meeting for review and approval.

Under existing law, the Urban American River Parkway Preservation Act, the state has adopted the American River Parkway Plan consisting of the revised, updated management plans for the lower American River adopted by the County of Sacramento on December 11, 1985, by a specified resolution, and by the City of Sacramento on March 25, 1986, by a specified resolution.

The act requires that actions of state and local agencies taken with regard to land use decisions be generally consistent with the plan.

This bill would redefine the plan to include the management plans adopted by the County of Sacramento on December 11, 1985, as amended on December 20, 1995, by a specified county resolution.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Since actions of local agencies with regard to land use decisions would be required to be generally consistent with the revised, updated plans, the bill would impose a state-mandated local program.

Existing law provides that the system of plane coordinates which has been established by the United States Coast and Geodetic Survey for defining and stating the positions or locations on points of the surface of the earth within the State of California is the California Coordinate System.

This bill would make certain technical revisions in provisions concerning that system.

Existing law requires that the ballots for reclamation district elections be forwarded to the clerk of the board of supervisors.

This bill would require that those ballots be forwarded to the county clerk instead.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 873 (SB 318) Solis. Street terrorism.

Under existing law, the California Street Terrorism Enforcement and Prevention Act, which prohibits any person from, among other things, actively participating in any criminal street gang with knowledge that its members engage in or have engaged in a pattern of criminal gang activity, is repealed as of January 1, 1997.

This bill would repeal this repeal date, thereby extending the operation of the provisions of the act indefinitely. Because this bill would extend the duration of provisions that establish crimes, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would provide that it shall become operative only if AB 2035 is enacted and becomes effective on or before January 1, 1997.

Ch. 874 (SB 1851) Kelley. Public water systems.

Existing law, the California Uniform Retail Food Facilities Law establishes sanitation standards for retail food facilities and requires local agencies to enforce its provisions. Existing law, the California Safe Drinking Water Act, establishes certain prescribed drinking water standards, as defined.

This bill would amend the California Uniform Retail Food Facilities Law to define "potable water" for purposes of that law, and would amend the California Safe Drinking Water Law to provide that it applies to a food facility only if the human consumption at the food facility includes the drinking of water. This bill would also amend the California Safe Drinking Water Act to revise certain definitions in the act and to define a "nontransient noncommunity water system" and a "transient noncommunity water system".

The California Uniform Retail Food Facilities Law generally requires that certain activities, including, but not limited to, thawing potentially hazardous frozen food with running water, using water in vending machines, and using water to wash and clean food intended for sampling at a certified farmers' market be performed using potable water.

This bill would authorize the department and all local health agencies to monitor and enforce the potable drinking water standards provided in the California Safe Drinking Water Act for purposes of enforcing the California Uniform Retail Food Facilities Law.

Ch. 875 (AB 2727) House. Drinking water.

Existing law, the California Uniform Retail Food Facilities Law establishes sanitation standards for retail food facilities and requires local agencies to enforce its provisions. Existing law, the California Safe Drinking Water Act, establishes certain prescribed drinking water standards, as defined.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would amend the California Uniform Retail Food Facilities Law to define "potable water" for purposes of that law, and would amend the California Safe Drinking Water Law to provide that it applies to a food facility only if the human consumption at the food facility includes the drinking of water. This bill would also amend the California Safe Drinking Water Act to revise certain definitions in the act and to define a "nontransient noncommunity water system" and a "transient noncommunity water system".

The California Uniform Retail Food Facilities Law generally requires that certain activities, including, but not limited to, thawing potentially hazardous frozen food with running water, using water in vending machines, and using water to wash and clean food intended for sampling at a certified farmers' market be performed using potable water.

This bill would authorize the department and all local health agencies to monitor and enforce the potable drinking water standards provided in the California Safe Drinking Water Act for purposes of enforcing the California Uniform Retail Food Facilities Law.

Ch. 876 (AB 1191) Takasugi. Local government finance: sales and use tax revenues: allocation.

Existing law continuously appropriates state sales and use tax revenues deposited in the Local Public Safety Fund to the Controller for allocation, as provided, to each qualified county, as defined. It generally requires the auditor of each qualified county, in each fiscal year, to allocate that county's share of those revenues to each city located therein that provides public safety services in accordance with an apportionment factor, calculated as provided, and to allocate all of the revenues remaining thereafter to the county.

This bill would, commencing with the 1996–97 fiscal year, modify these allocation provisions to require the auditor to allocate those revenues on a monthly basis, to establish a new general apportionment factor calculation for monthly allocations to cities. By imposing new allocation duties on county auditors, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill incorporates specified changes proposed by this bill and SB 8 with respect to the allocation of sales and use tax revenues to counties and cities for public safety services, if both bills are chaptered and this bill is chaptered last.

Ch. 877 (AB 1467) Kaloogian. Family law: spousal legal capacity.

(1) Existing law defining community property for purposes of the management and disposition of community property where a spouse lacks legal capacity excludes community property in a revocable trust.

This bill would delete that exclusion.

(2) Existing law authorizes a court to authorize proposed transactions involving community property if one or both spouses lack legal capacity.

This bill would expand these provisions to include separate property, if the court finds good cause therefor, and provide that if a proposed transaction affects estate planning of the spouse alleged to lack capacity the court may authorize the transaction only under specified circumstances. The bill would also make related changes.

Ch. 878 (AB 1720) Hannigan. Passenger rail service.

(1) A recently enacted law, Chapter 263 of the Statutes of 1996, an urgency statute, among other things, authorizes the Department of Transportation and certain joint powers entities, through a competitive bid process, to contract with, among others, other organizations authorized under state or federal law to provide rail service and provides for the expansion of the membership of the Southern California Regional Rail Authority.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the above described agreements through a competitive solicitation process, rather than competitive bid process, and would allow the other party to be any other organization that is not precluded by state or federal law, rather than authorized by state and federal law, to provide passenger services.

This bill would make technical changes in Chapter 263.

The bill would also set forth legislative findings and declarations.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 879 (AB 1721) Ducheny. Student and consumer records.

(1) Existing law authorizes any consumer whose personal records are sought by a subpoena duces tecum to quash or modify it by a motion filed with the court prior to the date specified for production on the subpoena.

This bill, operative as specified, would limit the applicability of this authorization to a consumer who is a party to the civil action in which the subpoena duces tecum is served and would authorize other consumers to serve on the requesting party and witness a written objection to the subpoena duces tecum. The bill would authorize the requesting party to bring a motion to enforce the subpoena within 20 days of the service of the written objection, as specified.

(2) Existing law provides that no witness shall be required to produce personal records after receipt of notice that this motion has been brought, except as specified.

This bill, operative as specified, would provide that no witness shall be required, except as specified, to produce personal records after receipt of this notice or service of the written objection described in (1).

(3) Existing law requires school districts and community college districts to make a reasonable effort to notify students prior to complying with a court order requesting information concerning the student.

This bill would provide that information concerning a student shall be furnished in compliance with a court order, or pursuant to any lawfully issued subpoena, upon the condition that, in the case of school districts, the school district makes a reasonable effort to notify the parent or legal guardian and the pupil and, in the case of community college districts, the community college district makes a reasonable effort to notify the student, of a lawfully issued subpoena and, in the case of compliance with a court order, if lawfully possible within the requirements of the order, in advance of compliance therewith by the school district or community college district. Because this requirement would impose additional duties and responsibilities upon local school districts and community college districts, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 880 (AB 1941) Bordonaro. Vehicle registration: confidential records.

Under existing law, the home addresses of specified public officials, including various officers of the Parole Hearings Division of the Department of Corrections, as contained in records of the Department of Motor Vehicles, are confidential.

This bill would delete the officers of the Parole Hearings Division specified above from the list of public officials whose home addresses are confidential.

The bill would authorize the Department of Motor Vehicles to require a person whose home address in the records of that department is confidential under existing law to demonstrate his or her continued eligibility for that confidentiality upon renewal of a driver's license or identification card issued by the department, except as specified. The bill would require the department to notify the person within a specified period prior to the expiration of the driver's license or identification card of any requirement to demonstrate continued eligibility for confidentiality.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 881 (AB 1980) Figueroa. Child day care facilities: inspection reports.

Under existing law, the California Child Day Care Facilities Act, the State Department of Social Services is responsible for the licensure and regulation of child day care facilities, including child day care centers and family day care homes, and is required to perform site visitations to all licensed day care centers and family day care homes. Existing law provides that violation of the provisions regulating child day care facilities is subject to criminal sanction. Existing law also requires each child day care facility to post a notice, accessible to parents and guardians, of the right to make an inspection of the facility without advance notice and of the prohibition against retaliation and the right to file a complaint.

This bill would require the department to make this notice available to child day care facility licensees and to also include on this notice a statement of the right of the parents and guardians to review licensing reports of facility visits and substantiated complaints against the facility on the site of the facility.

This bill would require that each licensed day care facility make accessible to the public a copy of any licensing report pertaining to the facility that documents a facility visit or a substantiated complaint investigation. The bill would prohibit requiring an inspection report to be maintained for more than 3 years from the date of its issuance, and would prohibit the report from containing any information that would not be accessible to the public through the department. By changing the definition of a crime, this bill would impose a state-mandated local program. The bill would further require the department, within 30 days after the date specified by the department for a licensee to correct a deficiency, to provide the licensee with a licensing report or other appropriate document verifying compliance or noncompliance, and would authorize the department to provide the licensee with an alternate timeframe.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 882 (AB 2153) Kuehl. Harmful matter: photographs of minors.

Existing law requires the clerk of the court to retain all exhibits that have been introduced or filed in a criminal proceeding and to establish a procedure to account for the exhibits properly until the final determination of the proceeding.

Existing law also defines harmful matter as matter which, taken as a whole, to the average person, applying contemporary statewide standards, appeals to the prurient interest, and which, taken as a whole, depicts or describes in a patently offensive way sexual conduct and lacks serious literary, artistic, political, or scientific value for minors.

This bill would provide that a photograph of a minor that is harmful matter introduced or filed as an exhibit in specified criminal proceedings shall be available only to the parties or to a person named in a court order to receive it prior to the final determination of the proceeding. The bill would provide that after the final determination of the proceeding, the photograph shall be preserved with the permanent record maintained by the court, that no person shall have access to the photograph without a court order, and that any copy, negative, reprint, or other duplication of the photograph shall be delivered to the clerk for disposal. By increasing the duties of court personnel, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 883 (AB 2177) Miller. Insurance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, limited liability companies are prohibited from engaging in the insurance business. Existing law authorizes individuals, partnerships, associations, or corporations to be insurance agents or brokers.

This bill would authorize limited liability companies to be insurance agents, brokers, or surplus line brokers. The bill would require an application by a limited liability company for a license as an insurance agent or broker to contain specified information, including information that may be required by the Insurance Commissioner, and would require licensed limited liability companies to maintain insurance or specified security for claims against it. The bill would make related changes.

Ch. 884 (AB 2288) Aguiar. Motor vehicle speed contest: motor vehicle removal.

(1) Existing law prohibits any person from engaging in a motor vehicle speed contest on a highway. If a person is convicted of a violation of this offense, and the vehicle used in the violation is registered to that person, the vehicle may be impounded at the registered owner's expense for one to 30 days.

This bill would specifically allow a peace officer to arrest and take into custody any person that a peace officer determines was engaged in a motor vehicle speed contest. Under these circumstances, the bill would specifically allow the removal and seizure of the motor vehicle used in the contest, as specified, in accordance with an existing statutory procedure. The bill would require the impounding agency to release the vehicle to the registered owner prior to the conclusion of the impoundment period (a) if the vehicle was stolen, (b) was driven without the authorization of the registered owner, as specified, (c) the legal or registered owner of the vehicle is a rental car agency, or (d) the criminal matter is dismissed or charges are not filed because of a lack of evidence prior to the conclusion of the impoundment period, as described. The bill would make the registered owner or his or her agent responsible for all towing and storage charges related to the impoundment, and any administrative charges incurred by the local authority, except in cases described in (d), and would specify that the impounding agency is responsible for the actual costs incurred as a result of impoundment of the registered owner is absolved of liability, as specified.

The bill would require the release of the vehicle to the legal owner of the vehicle, or that owner's agent, on or before the 30th day of impoundment if all of specified conditions are met.

If the person convicted of the speeding offense was not authorized to operate the motor vehicle, the bill would require the court to order the person to reimburse the registered owner for the above described charges, thereby imposing a state-mandated local program by increasing the duties of the courts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 885 (AB 2328) Hoge. Parole: violent offenders: notification of release.

Under existing law, when notice is sent to local law enforcement authorities that a violent felon is scheduled to be released on parole, the paroling authority is also required to send a notice of the inmate's release to all persons who have requested that notice, including victims of, and certain witnesses to, the violent crime for which the inmate was incarcerated.

This bill would require the department to supply a form to designated agencies for use by victims and witnesses to request notification of the release, escape, or death of the violent offender. The bill would require those agencies to give the form to those persons and to forward the completed forms to the department. Because the bill would require local agencies to provide and process notice forms, the bill would impose a state-mandated local program. The bill would provide that all information relating to any

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

person receiving notice pursuant to these provisions is confidential and is not subject to disclosure pursuant to the California Public Records Act.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 886 (AB 2563) Goldsmith. Inmate litigants.

(1) Existing law requires the Judicial Council to formulate and adopt uniform forms and rules of court for litigants proceeding in forma pauperis.

This bill would provide that a person sentenced to imprisonment in a state prison or confined in a county jail who, during that period of imprisonment or confinement, applies to proceed in forma pauperis in a civil action or appeal of a civil judgment shall pay the full amount of the filing fee, as specified. This bill would require the Department of Corrections to certify a statement of account for any sums due to the inmate for a prescribed period.

(2) Existing law provides that a person sentenced to imprisonment in a state prison has the right to initiate civil actions, subject to a $3 filing fee to be collected by the Department of Corrections.

This bill would provide that this $3 filing fee is in addition to payment of any other authorized court filing fee.

(3) This bill would incorporate additional changes in Section 68511.3 of the Government Code proposed by AB 2667, to be operative only if AB 2667 and this bill are both chaptered and become effective on January 1, 1997, and this bill is chaptered last.

(4) This bill would incorporate additional changes in Section 2601 of the Penal Code proposed by SB 1221 to be operative only if this bill is chaptered and both bills become effective on or before January 1, 1997.

Ch. 887 (AB 2618) Committee on Banking and Finance. Financial institutions.

(1) Existing law requires the Superintendent of Banks to annually collect pro rata from the banks and trust companies under the supervision of the Department of State Banking assessments in an amount sufficient to meet the expenses of the department, based on a specified formula.

This bill would make changes to that formula and other related changes to the assessment process.

(2) Existing law requires state banks and foreign banks to post a notice in each bank office notifying the public that a copy of a report on the bank's financial condition is available, as specified.

This bill would instead require banks to make available a specified financial report.

(3) Existing law defines depository corporations to include state banks, state savings associations, industrial loan companies, national banking associations and federal savings associations, as specified. Existing law provides that no sale, merger, or conversion of a depository institution that has the approval of the Superintendent of Banks, the Savings and Loan Commissioner, or the Corporations Commissioner, as specified, is prohibited or restricted by other laws regulating depository institutions. Existing law also provides that a sale, merger, or conversion approved by one of these 3 regulators does not require the approval, consent, or other authorization of the other regulators.

This bill would provide that a sale, merger, or conversion of a depository institution is subject to certain other laws, as specified.

(4) Existing law provides that a depositor of an uninsured deposit in a depository institution is required to be notified and may withdraw the deposit on demand if the institution is sold, as specified, subject to applicable federal laws and regulations.

This bill would repeal these provisions.

(5) Existing law contains various other provisions regulating the operation of banks and providing for interstate banking.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill makes a number of technical changes to these provisions.

(6) Existing law authorizes California industrial loan companies, with the prior approval of the Corporations Commissioner, to have an insured depository institution affiliate engage in authorized agency activities as the agent of the industrial loan company. Existing law also authorizes a California industrial loan company, with the prior approval of the commissioner, to engage in authorized agency activities as agent for an insured depository affiliate.

This bill would instead refer to "insured depository institution" rather than "insured depository institution affiliate" for these purposes.

(7) The bill would enact other related provisions, including provisions relating to the sale of specified business units to uninsured (other state) depository corporations, specified mergers, and the regulation of industrial loan companies, as specified.

(8) This bill would incorporate additional changes to certain of its provisions proposed by AB 3351 of the 1995–96 Regular Session, contingent upon the prior enactment of AB 3351. These changes would become operative on the operative date of AB 3351.

(9) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 888 (AB 2667) Davis. Indigent litigants.

Existing law directs the Judicial Council to formulate and adopt uniform forms and rules of court for litigants proceeding in forma pauperis. Existing law requires that these rules provide that permission to proceed in forma pauperis be granted to litigants who declare under penalty of perjury that they are receiving specified federal benefits or that their monthly income is 125% or less of the current monthly poverty line annually established by the Secretary of Health and Human Services, as specified, and who submit a financial statement in support of the averment, or in other instances in the court's discretion, as specified. Existing law also requires that the forms and rules shall provide for the disclosure of the current address and the date of birth of the litigant.

Existing law further provides that at any time within 3 years after the court has granted a litigant permission to proceed in forma pauperis, the clerk of the court, county financial officer, or other appropriate county officer may notify the court of any changed financial circumstances which may enable the litigant to pay all or a portion of the fees and costs which had been waived. Existing law provides that the court may authorize the clerk of the court, county financial officer, or other appropriate county officer to require the litigant to appear before and be examined by the court, no more than once in any 4-month period. The court may then order the litigant to pay to the county an amount the court believes is compatible with the litigant's financial ability, as specified.

Existing law also authorizes the clerk of the court to dispose of applications for in forma pauperis status 3 years after the date of filing without the need for microfilming, or to dispose of applications immediately upon their being microfilmed.

This bill would revise those provisions to require that applicants for permission to proceed in forma pauperis who are receiving specified federal benefits declare under penalty of perjury that they are receiving those benefits and to authorize these applicants to voluntarily provide their social security number for verification purposes. The bill would authorize the court to require an applicant who chooses not to disclose his or her social security number to attach documentation to the application to support that claim, except as provided. Applicants whose monthly income is 125% or less of the current monthly poverty line, as specified, or who apply for permission to proceed in forma pauperis to be granted in the court's discretion, would be required to file a financial statement under oath on a form promulgated by the Judicial Council.

The bill would also require that the forms and rules adopted by the Judicial Council provide for the disclosure of additional information about the litigant, including the litigant's occupation and employer and the address and value of any real property owned directly or beneficially by the litigant. The bill would authorize a review of the financial status of the litigant at any time prior to final disposition of the case, rather than at any time within 3 years, after the court has granted a litigant permission to proceed in forma pauperis, as specified. The bill would require a litigant proceeding in forma pauperis to notify the court within 5 days of any settlement or monetary consideration received in settlement of the litigation and of any other change in financial circumstances affecting the litigant's ability to pay court fees and costs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would delete the provision authorizing the clerk of the court to dispose of applications for in forma pauperis status 3 years after the date of filing without the need for microfilming, or to dispose of applications immediately upon their being microfilmed.

By imposing new duties on court clerks, the bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 68511.3 of the Government Code proposed by AB 2563, to be operative only if AB 2563 and this bill are both chaptered and become effective on January 1, 1997, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 889 (AB 2755) Napolitano. Vital statistics.

Existing law requires each live birth, fetal death, death, and marriage be registered in accordance with prescribed procedures.

Existing law specifies the form and content of a certificate of death, including, but not limited to, the signatures of embalmer, attending physician and surgeon, coroner, or local registrar.

This bill would, notwithstanding contrary provisions of law, permit use of an electronic signature substitute, or other indicator of authenticity, approved by the State Registrar in lieu of a signature, and would specify that the person completing the cause of death portion of the certificate attest to its accuracy.

Existing law requires certain fees to be charged for certified copies of certain vital records. Existing law requires certain additional fees to be charged, and permits the local official collecting the additional fee to establish a vital and health statistics trust fund. The law requires allocation of the additional fees according to a prescribed schedule. Existing law requires each county to submit an annual report to the State Registrar regarding these revenues.

This bill would require the State Registrar to annually prepare a designated summary report of all statewide activities related to the revenues.

This bill would make other changes of a technical, nonsubstantive nature.

Ch. 890 (AB 2802) Granlund. Pharmacy.

Existing law, the Pharmacy Law, provides for the licensing and regulation of the practice of pharmacy, under the jurisdiction of the California State Board of Pharmacy.

This bill would repeal the existing pharmacy law and would reenact it as revised and reorganized. The bill would state that it is the intent of the Legislature that these revised provisions be construed as a continuation of the prior law.

By changing the definition of existing crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in specified provisions of the Business and Professions Code proposed by various other bills, to be operative only if this bill and any of the other bills are both enacted and take effect, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 891 (AB 3077) Baldwin. County community schools.

(1) Existing law authorizes a county board of education to enroll in community schools, (a) expelled pupils, (b) pupils who have been referred by a school district as a result of the recommendation by a school attendance review board, (c) pupils whose

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

school district of attendance has, at the request of the pupil's parent or guardian, approved the pupil's enrollment in a county community school, (d) pupils who are probation-referred or on probation or parole and not in attendance at any school, and (e) homeless children. Existing law authorizes claims for community school apportionments to be made for pupils enrolled in kindergarten and grades 1 to 6, inclusive, who have been expelled from a school district, and for pupils in grades 7 to 12, inclusive.

This bill would delete the provision that identifies the enrolled county community school pupils for whom a claim may be made.

(2) Under existing law, for certain fiscal purposes, the county community school attendance generated by certain expelled pupils and pupils in categories (b), (c), and (e) above is credited to the school district of residence which pays the entire revenue limit received for these pupils to the county for the purposes of community schools.

This bill would include within the attendance credited to the school district of residence the attendance generated by pupils in county community schools in kindergarten or any of grades 1 to 6, inclusive, who are in category (d) above.

(3) Under existing law, for purposes of making apportionments from the State School Fund, pupils enrolled in county community schools who are either expelled for certain reasons or in category (d) above are deemed to be enrolled in county juvenile hall or camp.

This bill would also deem pupils who are in kindergarten or any of grades 1 to 6, inclusive, and are expelled for certain reasons to be enrolled in county juvenile hall or camp.

(4) Existing law provides that units of average daily attendance for pupils enrolled in county community schools who are either expelled for certain reasons or in category (d) above in excess of the number claimed by a county office of education in the 1991–92 fiscal year are funded at the statewide average revenue limit per unit of average daily attendance for that category of enrollment.

This bill would exclude from this provision pupils enrolled in county community schools in kindergarten or any of grades 1 to 6, inclusive, who are in category (d) above.

Ch. 892 (AB 3278) Kaloogian. Political Reform Act of 1974: slate mailer organizations.

Existing provisions of the Political Reform Act of 1974 require each slate mailer organization, as defined, to file a statement of organization with the Secretary of State containing specified information concerning the organization and to periodically file reports with specified public agencies showing, among other things, payments made to and expenditures made by the organization.

This bill would require slate mailer organizations to include in their statement of organization the name by which the person or entity who operates the organization is identified for legal purposes and that that name be used by the organization whenever the organization is required to be identified by the act.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^2/_3$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^2/_3$ vote.

Ch. 893 (AB 3481) Burton. Political Reform Act of 1974: slate mailers.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing provisions of the Political Reform Act of 1974 provide that no slate mailer, as defined, shall be mailed unless, among other things, it identifies the slate mailer organization or ballot measure committee in specified places on the mailer, it states that the mailer was not prepared by an official political party organization, it identifies the candidates and measures who paid to appear in the mailer, and it identifies the political party of candidates appearing in the mailer who are not from the same political party that the mailer appears to represent.

This bill would add the requirement that a slate mailer state, as to any candidate endorsed in the mailer who is not from the same political party that the mailer appears to represent, that the endorsement is not the official position of the political party that the mailer appears to represent. This bill would require that this information appear in the mailer in a specified location and in a specified type size.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^2/_3$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^2/_3$ vote.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 894 (SB 560) Haynes. Final and parcel maps: amendment and correction: expiration.

(1) The existing Subdivision Map Act generally regulates the division of land for purposes of sale, lease, and financing. Under the act, persons proposing to subdivide land for these purposes are required to prepare and file final or parcel maps, under appropriate circumstances, before commencing development of the property in question. Existing law provides that these maps may be amended or corrected in a specified manner, and includes several purposes for which a map may be amended by a certificate of correction or an amending map.

This bill would add to the purposes for which a map may be amended the correction or modification of any change in the information filed as part of a final or parcel map, or recorded simultaneously with a final parcel map, as specified.

(2) Under the existing Subdivision Map Act, an approved or conditionally approved tentative map expires 24 months after its approval or conditional approval, or after any additional period of time as may be prescribed by local ordinance, not to exceed an additional 12 months. In addition, an extension or extensions may be granted, under specified circumstances. Under existing law, these extensions do not extend the tentative map more than 10 years from its approval or conditional approval. The Subdivision Map Act further authorizes a legislative body or appropriate advisory body to, upon application of the subdivider, extend an approved or conditionally approved tentative map, prior to its expiration, for a period or periods not to exceed 3 years.

This bill would authorize a legislative body or appropriate advisory body to extend an approved or conditionally approved tentative map upon application of a subdivider, for a period or periods not to exceed 5 years.

Ch. 895 (SB 795) Beverly. Shorthand reporters: Transcript Reimbursement Fund.

(1) Existing law established a Transcript Reimbursement Fund, administered by the Court Reporters Board, for the purpose of reimbursing the costs incurred by indigent and low-income persons relating to shorthand reporting services, as specified. The fund

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

was continuously appropriated for that purpose. These provisions were repealed on June 30, 1996.

This bill would reenact these provisions, would make these provisions inoperative on July 1, 1999, and would repeal them as of January 1, 2000. Because the Transcript Reimbursement Fund would be a continuously appropriated fund, the bill would make an appropriation.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 896 (SB 1613) O'Connell. Bonds: higher education facilities.

The Higher Education Facilities Bond Act of 1988, the Higher Education Facilities Bond Act of June 1990, and the Higher Education Facilities Bond Act of June 1992 provide for the issuance, pursuant to the State General Obligation Bond Law, of bonds in specified amounts, respectively, and the expenditure of proceeds therefrom to aid the University of California, the California State University, including the California Maritime Academy, and the California Community Colleges for, among other things, the construction and equipping of educational facilities, as specified. Existing law also appropriates up to $75,000,000 of any funds in the capital outlay funds established pursuant to those bond acts, for allocation by the Department of Finance, to the University of California, the California State University, and the California Community Colleges, as specified, to meet the timely allocation of matching funds to repair, replace, reconstruct, renovate, or retrofit on-campus buildings or facilities, including utilities, and streets and roads that were damaged in the 1994 Northridge earthquake.

This bill would recast and codify these provisions, thereby making an appropriation.

Ch. 897 (SB 1692) Petris. Property taxation.

(1) Existing law permits persons over 55 years of age and persons who are severely and permanently disabled, as specified, to transfer the base year value of their home to a replacement home in the same county, and until January 1, 1999, authorizes the transfer of the base year value of a person's home in another county in certain circumstances. Existing law limits this property tax relief to a claimant who has not previously been granted, as a claimant, the property tax relief granted by those provisions.

This bill would make an exception to that limitation for any person who becomes severely and permanently disabled subsequent to being granted, as a claimant, that property tax relief provided to persons over the age of 55 years. The bill would also define "area of reasonable size that is used as a site for a residence" with respect to a replacement dwelling and an original property for purposes of those base year value transfer provisions.

(2) Existing property tax law establishes a welfare exemption under which property is exempt from taxation if, among other things, that property is used exclusively for religious, hospital, scientific, or charitable purposes and is owned and operated by an entity, as provided, that is itself organized and operated for those purposes. Existing law also provides that property used exclusively for the charitable purposes of museums and owned and operated by a religious, hospital, scientific, or charitable fund, foundation, or corporation meeting specified requirements shall be deemed to be within the welfare exemption.

This bill would further provide that property used exclusively for the charitable purposes of museums shall include property owned by a nonprofit association or organization performing auxiliary services to any city or county museum in the state and used for the storage of items donated for an annual rummage sale, the proceeds of which, after taking into account the expenses of the nonprofit association or organization, are used to provide support to those museums.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 898 (SB 1841) Mello. Political Reform Act of 1974: contributions.

Existing provisions of the Political Reform Act of 1974 provide that campaign contributions of $100 or more shall be made by written instrument containing the name of the donor and the name of the payee.

This bill would add the requirement that the written instrument used in making a campaign contribution of $100 or more must also be drawn from the account of the donor, or the intermediary as defined pursuant to existing law.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^2/_3$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^2/_3$ vote.

Ch. 899 (SB 1846) Leslie. Human services: Placer County: pilot program.

Existing law provides for various health and social services for eligible individuals.

This bill would require Placer County, with the assistance of the appropriate state departments, to implement a pilot program in Placer County, upon approval by that county, for the funding and delivery of services and benefits through an integrated and comprehensive county health and human services system.

This bill would make its provisions inoperative on July 1, 2001, and would repeal them as of January 1, 2002.

Ch. 900 (SB 1923) M. Thompson. Alcoholic beverages: licenses.

The Alcoholic Beverage Control Act prohibits applications for and the issuance of original retail off-sale beer and wine licenses in certain cities and counties where the number of licenses exceeds certain limits, except as provided. This restriction remains in effect until January 1, 1998.

This bill would permit the application for and the issuance of a retail off-sale beer and wine license to a licensed beer and wine wholesaler, even though the number of licenses exceeds the specified limits, if certain conditions are met. This provision would remain in effect only until January 1, 1998.

The Alcoholic Beverage Control Act makes it a misdemeanor for any person to sell or otherwise dispose of, except for export, any draught or bottled beer containing more than 4% of alcohol by weight. This provision does not apply to the sale of bottled or draught ale, porter, brown, malt liquor, and stout bearing certain labels or a notice describing the contents under any licenses, other than on-sale beer licenses.

This bill would revise that provision to refer to bottled or draught beer containing more than 5.7% of alcohol by volume and would repeal that provision, effective July 1, 1997. This bill would require, effective July 1, 1997, that any beer container sold within this state bear a label that conforms with specified federal regulatory requirements adopted pursuant to the Federal Alcohol Administration Act and, if that beer container contains more than 5.7% alcohol by volume, that it include a statement of alcoholic content.

The Alcoholic Beverage Control Act authorizes the issuance of a special temporary on-sale or off-sale wine license to a nonprofit corporation, as specified, in accordance with, among other things, a requirement that this license shall only entitle the licensee to sell wine bought by, or donated to, the licensee. Existing law also requires that this license shall be issued for a period not exceeding 2 days.

This bill would expand the definition of a nonprofit corporation, as specified, and would provide that the license shall only entitle the licensee to sell wine bought by, or donated to, the licensee to a consumer and to any person holding a license to sell wine,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

as provided. This bill would also extend the authorized period for issuance to 15 days and provide that in the event the license is issued for a period exceeding 2 days, it shall be used solely for retail sales in conjunction with an identifiable fundraising event, as provided.

The Alcoholic Beverage Control Act prohibits any on-sale licensee, or any officer, director, employee, or agent of the licensee from holding any ownership or other interest, directly or indirectly, in any manufacturer's, winegrower's, rectifier's, importer's, or wholesaler's license, the business conducted under that license, or the property used in the business, except as provided.

This bill would provide an additional exception for a winegrower whose principal place of business is located in Napa County and who meets certain other requirements. This bill would make legislative findings as to the necessity for a special statute with respect to this provision.

Ch. 901 (SB 1979) O'Connell. Used oil recycling.

(1) Existing law requires used oil, as defined, to be managed as a hazardous waste until it has been shown to meet specified purity standards or is excluded from regulation as a hazardous waste because it is a recyclable material. For purposes of the provisions regulating the management of used oil, used oil does not include oil that contains more than 1,000 ppm halogens and oil is presumed to be a hazardous waste if it has been mixed with halogenated hazardous waste. A person may rebut the presumption by demonstrating that the used oil does not contain hazardous waste, including if the used oil does not contain more than 3000 ppm total halogens and meets other requirements. A violation of laws regulating used oil is a crime.

This bill would revise the definition of used oil to delete the requirement that the used oil does not contain more than 3000 ppm halogens, for purposes of that presumption, and would instead allow the presumption to be rebutted if it is demonstrated that the used oil that is the source of the total halogens solely meets those other requirements. The bill would thereby impose a state-mandated local program by revising the definition of a crime.

(2) Existing law, the California Integrated Waste Management Act of 1989, requires the Director of Transportation, upon consultation with the California Integrated Waste Management Board, to review and modify all bid specifications relating to the purchase of specified paving materials and backfill materials using certain recycled materials.

This bill would additionally include, as a recycled material, asphalt flux produced from the reprocessing or re-refining of used oil.

(3) Existing law, the California Oil Recycling Enhancement Act, requires every oil manufacturer, as defined, to pay a specified charge to the board. Those payments are deposited in the California Used Oil Recycling Fund, and the money in the fund is continuously appropriated to the board for specified purposes, including the issuance of grants or loans for research, testing, and demonstration projects to develop , among other things, uses for recycled or used oil.

This bill would instead authorize the board to issue those grants or loans for projects to develop uses for products resulting from the recycling of used oil. The bill would require at least 10%, but not more than 15%, of the balance remaining in the fund, after specified expenditures are made, to be expended for that purpose, thereby making an appropriation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 902 (SB 2098) Kopp. Medicine.

Existing law requires every entry of judgment, settlement agreement, or arbitration award over $30,000 of a claim or action for damages for death or personal injury caused by the negligence, error, or omission in practice, or the unauthorized rendering of professional services, by a physician and surgeon or doctor of podiatric medicine or osteopath, when that judgment, settlement agreement, or arbitration award is entered

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

against, or paid by, the employer of that licensee and not the licensee himself or herself, to be reported to the appropriate board, by prescribed persons or entities.

This bill would include awards in any claim or action alleging the negligence, error, omission, or unauthorized practice within this requirement. By requiring court clerks to make these reports, this bill would impose a state-mandated local program.

Existing law, the Medical Practice Act, provides for the licensure and regulation of the practice of medicine and podiatric medicine. Existing law requires any person who practices medicine or podiatric medicine to obtain a license from the Medical Board of California. Existing law authorizes the board to take action against any licensee who is charged with unprofessional conduct, and prescribes acts that constitute unprofessional conduct.

This bill would authorize the board to develop a proposed registration program that would, if implemented, permit a physician and surgeon or doctor of podiatric medicine located outside this state to practice medicine or podiatric medicine across state lines. It would require the board to include prescribed requirements and procedures in the proposed registration program, and would authorize the board to include other prescribed requirements and procedures in the proposed program.

The bill would provide that upon the implementation of the proposed registration program discussed above, the practice of medicine or podiatric medicine from this state into another state or country without meeting the legal requirements of that state or country for the practice of medicine constitutes unprofessional conduct.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 903 (SB 2137) Johannessen. Community services districts.

Existing law prescribes the purposes and powers of community services districts.

This bill would additionally grant community services districts the power to construct, maintain, and operate flood protection works and facilities, subject to specified conditions.

Ch. 904 (AB 2224) Kuehl. Domestic violence.

(1) Under existing law relating to the prevention of domestic violence, the court may issue an ex parte order enjoining a party from contacting, molesting, attacking, striking, stalking, threatening, sexually assaulting, battering, harassing, telephoning, contacting repeatedly by mail with the intent to annoy or harass, destroying personal property, or disturbing the peace of the other party, and in the discretion of the court, other named family or household members, as provided.

This bill instead would authorize the court to issue an ex parte order enjoining a party from molesting, attacking, striking, stalking, threatening, sexually assaulting, battering, harassing, telephoning, destroying personal property, contacting, either directly or indirectly, by mail or otherwise, coming within a specified distance of, or disturbing the peace of, the other party, and in the discretion of the court, other named family or household members, as provided.

(2) Under existing law, upon a good cause belief that intimidation or dissuasion of a victim or witness has occurred or is reasonably likely to occur, any court with jurisdiction over a criminal matter is authorized to issue specified orders. Existing law provides that any person violating any of these orders may be punished for an offense or for a contempt of court, as specified.

This bill instead would provide that upon a good cause belief that harm to, or intimidation or dissuasion of, a victim or witness has occurred or is reasonably likely to occur, any court with jurisdiction over a criminal matter is authorized to issue specified orders. The bill would include among the orders the court is expressly authorized to make, an order enjoining a party from molesting, attacking, striking, stalking,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

threatening, sexually assaulting, battering, harassing, telephoning, as provided, destroying personal property, contacting, either directly or indirectly, by mail or otherwise, coming within a specified distance of, or disturbing the peace of, the other party or other named family or household members. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(3) Under existing law, any willful and knowing violation of any protective order or stay away court order issued relating to the intimidation or dissuasion of a victim or witness in a pending criminal proceeding involving domestic violence, or issued as a condition of probation after a conviction in a criminal proceeding involving domestic violence, as specified, constitutes contempt of court, a misdemeanor, punishable as provided. Under existing law, if such a violation results in a physical injury, the person is required to be imprisoned in a county jail for at least 48 hours. Existing law specifies the court orders to which these provisions apply, including an order enjoining any party from molesting, attacking, striking, threatening, sexually assaulting, battering, harassing, contacting repeatedly by mail with the intent to harass, or disturbing the peace of, the other party or other named family and household members.

This bill would revise the description of the latter court order to include an order enjoining any party from molesting, attacking, striking, stalking, threatening, sexually assaulting, battering, harassing, telephoning, as provided, destroying personal property, contacting, either directly or indirectly, by mail or otherwise, coming within a specified distance of, or disturbing the peace of, the other party or other named family or household members. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(4) Existing law provides that the crime of battery is punishable by a fine or by imprisonment in a county jail not exceeding 6 months, or by both the fine and imprisonment. A battery that is committed against a noncohabiting former spouse, fiancé, fiancée, or person with whom the defendant has or has had a dating relationship is punishable by a fine or by imprisonment in a county jail not exceeding one year, or by both the fine and imprisonment. If probation is granted or the sentence is suspended in such a case, the defendant is required to complete a batterer's treatment program as a condition thereof.

This bill additionally would provide that a battery that is committed against a spouse, person with whom the defendant is cohabiting, or person who is the parent of the defendant's child is punishable by a fine or by imprisonment in a county jail not exceeding one year, or by both the fine and imprisonment. The bill also would require in such a case that, if probation is granted or the sentence is suspended, the defendant complete a batterer's treatment program as a condition thereof. By increasing the time of imprisonment in a county jail for these offenses, the bill would impose a state-mandated local program.

(5) Existing law prescribes penalties for the violation of specified protective orders, including an order enjoining a party from molesting, attacking, striking, threatening, sexually assaulting, battering, harassing, contacting repeatedly by mail with the intent to harass, or disturbing the peace of the other party or other named family and household members.

This bill instead would prescribe those penalties for the violation of specified protective orders, including an order enjoining a party from molesting, attacking, striking, stalking, threatening, sexually assaulting, battering, harassing, telephoning, as provided, destroying personal property, contacting, either directly or indirectly, by mail or otherwise, coming within a specified distance of, or disturbing the peace of, the other party or other named family and household members. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(6) This bill would incorporate additional changes in Section 136.2 of the Penal Code, proposed by AB 720, to be operative only if AB 720 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(7) This bill would incorporate additional changes in Section 166 of the Penal Code, proposed by AB 2898 and AB 3246, to be operative only if this bill and one or both of the other bills are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(8) This bill would incorporate additional changes in Section 243 of the Penal Code, proposed by AB 2898, to be operative only if AB 2898 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(9) This bill would incorporate additional changes in Section 273.6 of the Penal Code, proposed by AB 2898 and AB 3246, to be operative only if this bill and one or both of the other bills are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 905 (AB 2869) Brewer. Insurance.

Under existing law, a person may not transact insurance with nonadmitted insurers except by and through a surplus line broker, subject to various exceptions. Under existing law, a surplus line broker may issue a certificate evidencing the placement of insurance with a nonadmitted insurer.

This bill would provide that a licensed surplus line broker may issue a certificate of insurance evidencing placement of insurance with a nonadmitted insurer only if the broker meets specified requirements. In addition, the bill would permit a licensed surplus line broker to issue policies of insurance with prior written authorization from an insurer, if the policies contain specified information and are countersigned by the broker.

Existing law provides that in order for a surplus line broker to place insurance with a nonadmitted insurer, certain requirements must be met, including having the insurer provide certain documents to the Insurance Commissioner.

This bill would, in addition, require a nonadmitted insurer to provide the commissioner with a current list of all California surplus line brokers authorized by the insurer to issue policies on its behalf.

The bill would, in addition, provide that placement activities of a surplus line broker shall not be deemed to be business done by the insurer in this state.

Ch. 906 (SB 1859) Alquist. Public employees: retirement.

The Public Employees' Retirement Law was reorganized and renumbered by Chapter 379 of the Statutes of 1995.

This bill would make technical, nonsubstantive, related changes by renumbering, deleting, and revising other provisions of law.

Ch. 907 (SB 2039) Committee on Public Employment and Retirement. Public employees: retirement.

The Public Employees' Retirement Law prescribes retirement benefits for persons included in the state peace officer/firefighter membership category.

The bill would update and revise the lists of persons included in that category of membership.

Ch. 908 (AB 1562) Alby. Sex offenders: disclosure by law enforcement officers.

(1) Existing law imposes registration requirements on specified sex offenders.

This bill would authorize law enforcement officers to disclose information regarding these offenders that is necessary to protect the public, which may include the identities and locations of these offenders, under specified circumstances.

(2) Existing law requires the Department of Justice to continually compile specified information regarding persons required to register as sex offenders.

Among other things, this bill would require the department, on or before July 1, 1997, to provide a CD-ROM or other electronic medium containing this information to specified law enforcement agencies. These law enforcement agencies would be required to make the CD-ROM or other electronic medium available for public viewing. Unauthorized removal or destruction of the CD-ROM or other electronic medium would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

be a misdemeanor. By increasing the duties of local officials and creating a new crime, this bill would impose a state-mandated local program.

(3) Existing law requires the Department of Justice to operate a "900" telephone number that members of the public may call to inquire whether a named individual is included among those described by the above provision.

This bill would revise these provisions and would require the Department of Justice to report to the Legislature, on or before July 1, 2000, concerning the effects of these changes to the "900" telephone number system made by this bill.

(4) This bill would also incorporate additional changes to Section 290 of the Penal Code proposed by AB 401, to be operative if AB 401 and this bill are both enacted on or before January 1, 1997, and this bill is enacted last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 909 (SB 1378) Peace. Sex offenders.

(1) Existing law generally requires specified sex offenders to register with local law enforcement officials within 14 days of coming into a city, county, or city and county in which the offender temporarily resides or is domiciled for that length of time. Specified juvenile sex offenders who have been discharged or paroled from the Department of the Youth Authority, or its equivalent in another state, are required to register under these provisions. Failure to register results in the imposition of criminal penalties.

This bill would reduce the registration period from 14 days to 5 working days of the offender's coming into a city, county, or city and county and would reduce the annual updating period from 10 days to 5 working days of his or her birthday. This bill, in addition, would make these provisions applicable to name changes. This bill would impose a state-mandated local program by expanding the scope of an existing crime and increasing the duties of local agencies relating to forwarding name changes to the Department of Justice.

(2) Existing law requires the registering agencies to notify persons subject to this requirement that previous amendments to these provisions reduced the registration period.

This bill would require the registering agencies to notify persons subject to registration prior to January 1, 1997, of the reduction of the registration period from 14 to 5 working days. By requiring local agencies to give this notice, this bill would impose a state-mandated local program.

(3) The bill would also incorporate amendments to Section 290 of the Penal Code proposed by AB 1562 to become operative only if both bills are enacted and become effective on or before January 1, 1997, each bill amends Section 290 of the Penal Code, and this bill is enacted after AB 1562.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 910 (SB 1481) Mello. Conservatorships: dementia.

Existing law provides for the establishment and regulation of conservatorships.

This bill would authorize, upon a court's findings that a conservatee has dementia and a functional impairment, a conservator to place the conservatee in a prescribed secured facility and authorize the administration of prescribed medication. This bill would require a court investigator to include a determination in a report required to be made to the court under existing law as to whether these powers granted to the conservator are warranted. The bill also would require the court investigator to advise the conservatee of his or her right to object to the conservator's powers under these provisions. By increasing the duties of court investigators, the bill would establish a state-mandated local program.

This bill would specify the application of its provisions to conservatorships established before or after specified dates.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 911 (AB 857) Woods. In-home supportive service providers: criminal record checks.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law provides that the Department of Justice shall secure any criminal record of a person to determine whether the person has been convicted within the last 10 years of any felony or of specified offenses if an employer of the person requests the determination and submits fingerprints of the person to the Department of Justice.

This bill would include a recipient of in-home supportive services within the definition of employer for those purposes, and would specify that any local law enforcement agency or officer may take fingerprints for that purpose.

This bill would impose a state-mandated local program by requiring counties to notify IHSS recipients and applicants upon application or the annual redetermination, or upon the changing of providers, of the availability of the criminal record check, and that it can be performed by the Department of Justice.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 912 (AB 1751) Knowles. Support enforcement.

(1) Existing law provides that certain public retirement benefits, which are generally exempt from the enforcement of a money judgment, may become payable to satisfy a judgment for child, family, or spousal support, as specified. Existing law authorizes the paying entity to deduct an administrative fee of up to $2 from each payment made pursuant to the order for support.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would instead authorize this fee to be deducted from the payment being made to the judgment debtor, rather than from the payment made pursuant to the order for support.

(2) Existing law permits certain payments which are made by the federal government for the support of a child, because of the retirement or disability of a noncustodial parent of that child, and transmitted to the custodial parent, to be credited toward the child support paid by that parent.

This bill would revise that provision to apply where those benefits are transmitted to the custodial parent or other child support obligee. The bill would also specify the credit to be given when a lump-sum payment, which represents payments for more than one month, is transmitted to the custodial parent or other child support obligee.

(3) Existing law, the Uniform Reciprocal Enforcement of Support Act, authorizes a district attorney who is enforcing a support obligation, as provided, to register a support order made or registered in another county by utilizing specified procedures, or by filing certain items in the superior court, including a statement prepared by the district attorney showing the last business or residence address given by the obligor on any document filed in the previous county and served on the obligee or district attorney of that county.

This bill would instead require this statement to include the most recent address of the obligor set forth in the licensing records of the Department of Motor Vehicles, if known.

Ch. 913 (AB 2881) Woods. Elder abuse.

Existing law requires certain health practitioners and employees of law enforcement agencies to report known or suspected instances of abuse, as defined, of elders or dependent adults.

Existing law provides procedures for the involuntary taking into civil protective custody of a person who is a danger to others or to himself or herself or who is gravely disabled as a result of mental disorder, inebriation, by a peace officer, members of the attending staff of an evaluation facility, or other persons, as designated by the county, upon reasonable cause.

This bill would authorize law enforcement officers or other designated persons, to take an endangered adult, as defined, into emergency protective custody, or whether or not medical treatment is required, any physician treating the endangered adult may request the law enforcement agency to take that endangered adult into emergency protective custody, if the circumstances or condition of the adult indicates that continuing at his or her place of residence or in the care or custody of a parent, guardian, or other person responsible for the adult's care presents imminent danger to the health and safety, as defined, or that the endangered adult lacks the capacity to comprehend or appreciate the nature and consequences of remaining in a situation that presents imminent danger to his or her health and safety.

This bill also would require persons taking an endangered adult into custody pursuant to this provision to take the endangered adult to a hospital to determine the endangered adult's health status, when appropriate. This bill would allow that when an endangered adult is taken from a licensed care facility, the State Department of Social Services be contacted and that the department thereupon contact the applicable licensing agency that would, in turn, be required to make specified determinations regarding the facility. The bill would, however, not apply to state-licensed facilities.

Ch. 914 (SB 2151) Hughes. Public employees: retirement benefits.

The Public Employees' Retirement Law authorizes members to receive service credit for various leaves of absence upon payment of contributions.

This bill would permit members to receive service credit for maternity/paternity leaves of absence upon payment of contributions.

Ch. 915 (AB 692) Kuehl. Pupils: expulsion: sexual assault.

(1) Existing law permits a pupil to be suspended from school or recommended for expulsion for causing, attempting to cause, or threatening to cause physical injury to another person, for sexual harassment, as defined, and for intentionally engaging in harassment, threats, or intimidation as specified. Existing law mandates that a pupil be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

expelled for possessing, selling, or otherwise furnishing a firearm, as specified, brandishing a knife at another person, and unlawfully selling a controlled substance, as specified. Existing law provides specified procedures relating to a hearing for expulsion of a pupil. Existing law provides restrictions and special procedures for expelling pupils with exceptional needs, as defined, unless the reason for expulsion is possessing a firearm, knife, explosive, or other dangerous object of no reasonable use to the pupil and federal law permits not applying the restrictions and special procedures. Existing law permits the governing board of a school district to determine if the testimony of a witness to an expulsion hearing would subject the witness to an unreasonable risk of harm, in which case the witness's testimony may be presented at the hearing in the form of sworn declarations.

This bill would mandate the expulsion of a pupil found to have committed or attempted to commit specified acts of sexual assault or committed sexual battery at school or at a school activity. The bill would require school districts to establish specified procedures relating to the testimony of a complaining witness in an expulsion hearing where there is a charge of committing or attempting to commit a sexual assault or committing a sexual battery. To the extent the bill would thereby impose new duties upon local education entities, those duties would be a state-mandated local program.

This bill would exempt, to the extent permitted by federal law, the application of restrictions and special procedures for pupils with exceptional needs when the reason for expulsion is the pupil committed or attempted to commit a sexual assault or sexual battery, as defined. The bill would also permit the governing board of a school district in determining if the testimony of a witness to an expulsion hearing would subject the witness to an unreasonable risk of harm to include psychological as well as physical harm.

(2) This bill would incorporate additional changes in Section 48900 of the Education Code, proposed by AB 246, to be operative only if AB 246 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(3) This bill would incorporate additional changes in Section 48915 of the Education Code, proposed by AB 2040, AB 2720, and AB 2834, to be operative only if any one of AB 2040, AB 2720, and AB 2834 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last. The bill would also incorporate additional changes in Section 48915 of the Education Code, proposed by any 2 of AB 2040, AB 2720, and AB 2834 to be operative only if those 2 bills and this bill are each chaptered and become effective January 1, 1997, and this bill is chaptered last. The bill would also incorporate additional changes in Section 48915 of the Education Code, proposed by AB 2040, AB 2720, and AB 2834, to be operative only if AB 2040, AB 2720, AB 2834 and this bill are each chaptered and become effective January 1, 1997, and this bill is chaptered last.

(4) This bill would incorporate additional changes in Section 48918 of the Education Code, proposed by AB 246, to be operative only if AB 246 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 916 (SB 1559) Peace. Health insurance.

Existing law provides for the provision of health insurance coverage and similar health benefit coverage through carriers such as disability insurers, nonprofit hospital service plans, and health care service plans, and provides for the regulation of insurers by the Insurance Commissioner, and for the regulation of health care service plans by the Department of Corporations.

Existing law provides for the marketing of health insurance in various ways, including by insurance agents and brokers. Existing law specifically regulates the health coverage provided by carriers to small employers, and requires the filing of various information with regulatory authorities, and the offering of plan designs to all small employers.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the formation of purchasing alliances, to be formed by individuals, partnerships, corporations, or trusts for the purpose of providing health benefits to employers, small employers, and their employees. The bill would authorize the purchasing alliances to offer various forms of coverage.

The bill would require purchasing alliances to meet certain criteria and to be certified by the Insurance Commissioner. The bill would provide that participating carriers that provide coverage through purchasing alliances would be subject to all laws that regulate health care coverage or medical benefits provided to employers, as specified.

The bill would provide that the violation of specified orders of the Insurance Commissioner would be a misdemeanor and thus the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would require specified reports by the Bureau of State Audits.

Ch. 917 (AB 2127) Alby. Sex offenders: registration.

(1) Existing law provides that upon conviction of a felony for the commission or attempted commission of sexual battery, the court may enter an order requiring that the defendant register as a sex offender, as specified.

This bill would require the court to enter an order requiring that the defendant register as a sex offender.

(2) Existing law requires any person who is required to register as a sex offender, or who is convicted of murder, or who is convicted of a felony or assault or battery, as specified, and who is discharged or paroled from the state prison, a county jail, or any Youth Authority institution, or is granted probation, or is released from a state hospital where he or she was committed as a mentally disordered sex offender, prior to discharge, parole, the granting of probation, or release, to provide blood specimens and a saliva sample for analysis of deoxyribonucleic acid (DNA) and other genetic typing analysis at the Department of Justice's DNA laboratory and to provide a right thumbprint and a full palm print impression of each hand.

This bill would require these persons to provide these blood specimens, saliva samples, thumbprints, and palm prints regardless of the time of discharge, parole, granting of probation, or release.

Ch. 918 (AB 2331) Goldsmith. Crime: graffiti.

Existing law authorizes a court to suspend for one year the driving privilege of a person convicted of violating the above graffiti provision.

This bill would instead require the court to suspend for one year the driving privilege of a person convicted of violating the above graffiti provision, except when a personal or family hardship exists.

This bill would incorporate additional changes in Section 13202.6 of the Vehicle Code, proposed by AB 2295, to be operative only if AB 2295 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 919 (AB 1178) Cunneen. Teacher credentialing: inservice training for reading instruction.

Existing law authorizes the Commission on Teacher Credentialing to authorize or adopt examinations authorizing advanced or specialist teaching or service credentials, as specified.

This bill would require the commission to develop, adopt, and administer a reading instruction competence assessment to measure an individual's knowledge, skill, and ability relative to effective reading instruction. The commission would be required to perform certain duties with respect to that assessment, including, among other duties, developing and administering the assessment and initially and periodically analyzing the assessment content. The commission would be required to include among the requirements for issuance of the preliminary multiple subject teaching credential,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

successful passage of one of two specified components of the reading instruction competence assessment.

This bill would reappropriate a specified $1,000,000 appropriation to the State Department of Education from funds received by the state pursuant to the federal Goals 2000: Educate America Act (P.L. 103-227) for reimbursement of costs incurred by the commission to develop a "Reading Instruction Skill Assessment" to the department for transfer to the commission for the 1996-97 fiscal year for the development of the assessment program set forth in the bill. The bill would require the department and the commission to execute an interagency agreement that includes a transfer of the appropriated funds from the department to the commission for the implementation of the assessment program.

Ch. 920 (AB 2105) Baldwin. Pupil assessments: Commission for the Establishment of Academic Content Standards.

Under existing law, the Leroy Greene California Assessment of Academic Achievement Act (Assessment Act), the State Board of Education is required to adopt statewide academically rigorous content and performance standards pursuant to the recommendations of the Commission for the Establishment of Academic Content and Performance Standards, as specified, in all core curriculum areas to serve as the basis for assessing the academic achievement of individual pupils and of schools, school districts, and the California education system.

The bill would provide that the academic content and performance standards adopted by the State Board of Education, while used as standards for purposes of the Assessment Act, are to be considered model standards for any other purpose. The bill would permit school districts to use these model standards as a guideline in developing district standards.

Existing law established the Commission for the Establishment of Academic Content and Performance Standards. The commission is required to develop academically rigorous content standards and performance standards to be used in public schools maintaining kindergarten and grades 1 to 12, inclusive, after holding 6 public hearings throughout the state. Existing law requires that on or before July 1, 1997, the commission shall develop and submit the academically rigorous content standards and performance standards for all core curriculum areas and for all grade levels to the State Board of Education for approval by the board. These standards must comply with specified requirements including the requirement that the standards be aligned with the knowledge and skills called for under the curriculum frameworks. Under existing law, the provisions relating to the commission are repealed on January 1, 1998.

This bill would require the commission instead to hold a sufficient number of hearings to allow input from specified persons in all geographic regions of the state, but no fewer than 6 public hearings. The bill would extend the repeal of the provisions relating to the commission from January 1, 1998, to July 1, 1998.

Ch. 921 (AB 3075) Baldwin. Teacher credentialing.

Existing law requires that each program of professional preparation of multiple or single subject teaching include not more than one year of professional preparation. Existing law also sets forth the minimum requirements for a preliminary multiple or single subject teaching credential, including, among others, a baccalaureate degree or higher degree and passage of the state basic skills examination.

This bill, in addition, as to any person who enters a program of professional preparation on or after January 1, 1997, would require that the minimum requirements for a multiple subject teaching credential or a single subject teaching credential also include satisfactory completion of a comprehensive reading instruction that is research-based and that includes, among other things, the study of direct, systematic, explicit phonics, as defined.

This bill would appropriate $100,000 from the General Fund to the Commission on Teacher Credentialing for the initial and ongoing personnel and operational costs of implementing that additional requirement for those teaching credentials.

Ch. 922 (AB 3003) Pringle. Driver's license test: pilot program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under an existing pilot program in effect only until January 1, 1998, the behind-the-wheel driving test portion of the examination for a provisional driver's license is permitted to be administered by a driving school, under a specified agreement with the Department of Motor Vehicles, to persons 16 years of age or older, but less than 18 years of age, under specified conditions.

The bill would extend that pilot program to January 1, 1999.

The bill would, as to that pilot program, delete a provision requiring a departmental hearing for a cancelation, suspension, or revocation of the authorization for a driving school to conduct the behind-the-wheel driving test. The bill would also delete a provision specifying that an action to appeal or review the department's action to cancel, suspend, or repeal the specified authorization is required to be brought in a court of competent jurisdiction within a specified period.

Ch. 923 (AB 2759) Burton. Tangible personal property.

Existing law provides a comprehensive scheme relative to regulation of tangible personal property in the possession of a pawnbroker, secondhand dealer, or coin dealer.

This bill would, among other things, do all of the following:

(1) Specify that tangible personal property received in pledge as security for a loan by a pawnbroker includes motor vehicles.

(2) Delete requirement of a transaction report where acquisition of the same property from the same customer has been submitted within the preceding 12 months.

(3) Provide that it is unlawful to act as, or represent oneself as a pawnbroker unless licensed, as specified.

(4) Provide that it is unlawful for any person to advertise services as a pawnbroker unless a license number is clearly displayed in the advertisement. A violation of this provision would be a misdemeanor. In creating a new crime the bill would thus impose a state-mandated local program.

(5) Specify alternatives to the posting of a surety bond as a condition precedent to licensure as a pawnbroker.

(6) Provide that any violation of provisions relating to licensure of pawnbrokers under circumstances where the person knows or should have known that a violation was being committed is a misdemeanor. In creating new crimes this bill would impose a state-mandated local program.

(7) Provide that upon the setting of a court hearing date for sentencing of a person convicted of specified crimes the probation officer, if one is assigned, must notify the pawnbroker or secondhand dealer or coin dealer of the time and place of the hearing. In enacting this requirement the bill would impose a new duty upon a local government official and create a state-mandated local program.

(8) This bill would incorporate additional changes in Section 21641 of the Business and Professions Code, proposed by SB 1374, to be operative only if SB 1374 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(9) This bill would incorporate additional changes in Section 484.1 of the Penal Code, proposed by AB 2898, to be operative only if AB 2898 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 924 (SB 1374) Peace. Firearms.

(1) Existing law requires the chief of police, the sheriff, or the police commission to accept an application for and grant a license permitting the licensee to engage in the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

business of secondhand dealer, as defined, to an applicant who has not been convicted of an attempt to receive stolen property or any other offense involving stolen property.

This bill would authorize a licensed firearms dealer who is conducting business at gun shows or events, and who has a valid secondhand dealer license granted by the appropriate local authorities in the jurisdiction where the firearms dealer license has been granted, to conduct business as a secondhand dealer at any gun show or event without regard to the jurisdiction within this state that issued the secondhand dealer license. The bill also would provide that no additional fees or separate secondhand dealer license shall be required by any agency having jurisdiction over the locality where the gun show or event is conducted. The bill would expressly exclude from the definition of "secondhand dealer" participants at gun shows or events who are not required to be licensed as firearms dealers, as specified.

(2) Existing law requires every secondhand dealer or coin dealer to report acquisitions of certain identifiable tangible personal property to local law enforcement authorities.

This bill would provide that any person who conducts business as a secondhand dealer at any gun show or event outside the jurisdiction that issued the secondhand dealer license may be required to submit a duplicate of the transaction report prepared pursuant to this provision to the local law enforcement agency where the gun show or event is conducted.

(3) Existing law requires every secondhand dealer and coin dealer to retain for 30 days all tangible personal property reported pursuant to the provision described in (2), and to produce that property for inspection by any peace officer or employee designated by the chief of police or sheriff.

This bill would provide that any person who conducts business as a secondhand dealer at any gun show or event outside the jurisdiction that issued the secondhand dealer license may be required to submit for inspection pursuant to this provision any firearm acquired at a gun show or event within 48 hours of the request of the local law enforcement agency in the jurisdiction where the gun show or event was conducted at a location specified by the local law enforcement agency.

(4) Existing federal statutory law generally makes it unlawful for anyone, except a licensed importer, licensed manufacturer, licensed dealer, or licensed collector, to transport into or receive in the state where the person resides any firearm purchased by the person outside of the state. Existing state statutory law imposes various requirements upon a licensed dealer with respect to the sale, delivery, or transfer of firearms.

This bill would require the Attorney General, subject to the availability of adequate funds, to prepare and submit to the Legislature, on or before June 1, 1997, a report concerning the effects of these requirements upon persons, depending upon their residence status.

(5) Existing law requires the Attorney General to maintain a registry of information reported to the Department of Justice regarding the licensing of firearms dealers and including various transactions involving pistols, revolvers, or other firearms capable of being concealed upon the person. Existing law also requires that the registry include, among other information, the name and address of, and other information about, the person from whom the owner acquired, or the person being loaned, the pistol, revolver, or other firearm capable of being concealed upon the person.

This bill would additionally require this registry to include when the firearm was acquired or loaned.

(6) This bill would incorporate additional changes in Section 21641 of the Business and Professions Code, proposed by AB 2759, to be operative only if AB 2759 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(7) This bill would incorporate additional changes in Section 11106 of the Penal Code, proposed by SB 671, to be operative only if SB 671 and this bill are both chaptered and become effective on January 1, 1997, and this bill is chaptered last.

Ch. 925 (AB 3305) Setencich. Housing.

(1) Existing law requires a seller of residential property to make disclosures upon the transfer of that property, and sets forth the content and form of these disclosures.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, commencing July 1, 1997, add to the listing of required disclosures certain prescribed security safeguards, including, among other things, the presence or absence of security bars for windows, with, or without, quick-release mechanisms on bedroom windows, an anchored, bolted, or strapped water heater, a child-resistant barrier, as prescribed, for a pool, and a locking safety cover for a spa, or a hot tub, and would make other technical, nonsubstantive changes.

(2) Existing law makes certain safety and sanitation requirements applicable to public swimming pools, including, but not limited to, the requirement that every person operating or maintaining a public swimming pool do so in a sanitary, healthful, and safe manner.

Existing law designates the State Department of Health Services as having supervision over these requirements, and requires every health officer, within his or her jurisdiction, to enforce building standards relating to swimming pools, as defined.

This bill would, in addition, enact the Swimming Pool Safety Act to establish certain safety standards requiring swimming pool enclosures, safety pool covers, or exit alarms, as defined, or certain other means of protection, and would require each swimming pool for which a construction permit is issued on or after January 1, 1998, and that is located at a private, single-family home to meet at least one of these safety standards. In this regard, the bill would provide that any ordinance governing child access to pools adopted by a political subdivision on or before January 1, 1997, is presumed to afford protection that is equal to or greater than the safety standards prescribed by the act. This bill would make these standards applicable commencing January 1, 1998, to a private, single-family home for which a construction permit for a new swimming pool has been issued on or after January 1, 1998. This bill would also require any person entering into an agreement to build a swimming pool to give the consumer notice of the requirements of this bill. By increasing the enforcement duties of local health and safety officers, this bill would impose a state-mandated local program.

This bill would exclude hot tubs with certain safety covers, public swimming pools, as defined, and any pool within the jurisdiction of a political subdivision that adopts an ordinance with requirements at least as stringent as the requirements of this bill.

This bill would exclude facilities regulated by the State Department of Social Services from requirements of this bill.

This bill would provide that these provisions are not subject to further modification or interpretation by any regulatory agency of the state and that this authority is reserved exclusively to local jurisdictions, as specified.

Existing law, the State Building Standards Law, requires the State Building Standards Commission to approve any state building standards and to publish a State Building Standards Code.

This bill would require the commission to publish the pool safety provisions of this bill in the State Building Standards Code with a note indicating that the provisions are subject to local government modification.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 926 (AB 3026) Bates. Housing.

(1) Existing law requires a seller of residential property to make disclosures upon the transfer of that property, and sets forth the content and form of these disclosures.

This bill would, commencing July 1, 1997, add to the listing of required disclosures certain prescribed security safeguards; including, among other things, the presence or absence of security bars for windows, with, or without, quick-release mechanisms on bedroom windows; an anchored, bolted, or strapped water heater; a child-resistant barrier, as prescribed, for a pool, and a locking safety cover for a spa or a hot tub.

(2) Existing law, which is administered by the Department of Housing and Community Development, generally regulates the construction, use, maintenance, and occupancy of buildings used for human habitation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize any city, county, or city and county to establish a date by which all residential real property with security window bars on bedroom windows shall meet current state and local requirements for safety release mechanisms on security window bars consistent with applicable standards set forth in existing law. The bill also would provide that disclosures of safety release mechanisms on security window bars shall be made in writing and be included in existing transactional documents, as specified, in accordance with specified provisions of the Civil Code and that enforcement of an ordinance adopted pursuant to these provisions shall not apply as a condition of occupancy or at the time of any transfer that is subject to the Documentary Transfer Tax Act.

This bill would incorporate additional changes in Section 1102.6 of the Civil Code, proposed by AB 3305, to be operative only if AB 3305 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 927 (SB 468) Mello. Support enforcement.

(1) Under existing law, rights and benefits under a public retirement system are exempt from procedures for the enforcement of a money judgment. However, existing law provides an exception where benefits become payable and are sought to be applied to the satisfaction of a support judgment. Under existing law, if the amount is payable periodically, the amount is subject to an earnings assignment order for support or any other applicable enforcement procedure, as specified. Existing law also provides for the discharge of the Public Employees' Retirement System from adverse claims against a payment or refund made by the system, as specified.

This bill would enact procedures for the enforcement of support obligations, whereby the State Department of Social Services would provide to the Public Employees' Retirement System information on support judgments and orders being enforced by district attorneys. The bill would require the Public Employees' Retirement System to withhold amounts certified as overdue support from benefits and refunds, as provided. The bill would revise the provisions described above to provide a limitation on the amount to be withheld if this intercept procedure is used for benefits that are payable periodically, and to provide that amounts payable under a public retirement system for the satisfaction of a support judgment are subject to this intercept procedure and any other applicable enforcement procedure if they are payable as a lump-sum distribution. The bill would specifically provide that payments made to the State Department of Social Services pursuant to these provisions shall discharge the Public Employees' Retirement System from all adverse claims, as specified. The bill would impose a state-mandated local program by adding to the duties of district attorneys.

(2) Under existing law, data filed by any member or beneficiary with the Board of Administration of the Public Employees' Retirement System is confidential, but the gross amount of any benefit is not confidential and may be released upon request to the Board of Administration.

This bill would additionally provide that the gross amount of any refund of a PERS contribution due to a member or beneficiary is not confidential and may be released upon request to the Board of Administration.

(3) This bill would incorporate additional changes to Section 704.110 of the Code of Civil Procedure, proposed by AB 1751, to become operative only if AB 1751 and this bill are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 928 (SB 1507) Petris. Legislature: public records: retention.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that the public may inspect legislative records, as defined, but does not require the disclosure of preliminary drafts, notes, legislative memoranda, or specified correspondence.

This bill would require each committee of each house of the Legislature, as specified, and each joint committee to maintain legislative records, as defined, relating to legislation assigned to the committee in official committee files. The bill would require each committee to preserve those records that are in its custody or to lodge the records with the State Archives. The bill would require the Rules Committees of the Assembly and Senate, or the Joint Rules Committee, to provide for storage of official committee files that are not maintained by the committee or lodged with the State Archives. The bill would require each committee, having custody thereof, to adopt written procedures for public access to official committee files not lodged with the State Archives. Records in official committee files, including preliminary drafts, notes, legislative memoranda, or specified correspondence would be open to inspection by the public, other than certain confidential communications.

Existing law requires every agency of the state to maintain a file with specified documents related to the adoption, amendment, or repeal of a regulation, and requires that the rulemaking file be available to the public.

This bill would prohibit an agency from removing, altering, destroying, or otherwise disposing of any item contained in a rulemaking file, as specified, and would require the agency to maintain any rulemaking file not sent to the State Archives. The bill would provide that a state agency may transmit the rulemaking file to the State Archives, together with instructions to the Secretary of State not to remove, alter, or destroy or otherwise dispose of any item contained in the file. The bill would permit the Secretary of State to designate a time for the delivery of the rulemaking file to the State Archives in consideration of document processing or storage limitations.

The bill would specify that certain of its changes relating to preservation of, and public access to, rulemaking files are declaratory of existing law.

Ch. 929 (AB 1089) Olberg. Redevelopment.

Under existing constitutional law and the Community Redevelopment Law, a redevelopment plan may provide for the allocation of taxes between taxing agencies and the redevelopment agency in order to apportion taxation produced from the total assessed value of taxable property within the redevelopment area as shown upon the assessment roll used in connection with the taxation of the property by the taxing agency, last equalized prior to the effective date of the ordinance approving the redevelopment plan.

Existing law also authorizes the legislative bodies of communities as defined under the Community Redevelopment Law to form a joint powers authority for the purpose of the redevelopment of a project area containing privately owned land adjacent, or in close proximity, to Norton or George Air Force Bases proposed to be closed by the federal government pursuant to federal law. It requires that the redevelopment plan address specified requirements.

This bill would authorize any such redevelopment plan, or any amendment thereto adopted on or after July 1, 1993, to utilize as the base year either the year it was adopted or the 1994–95 fiscal year, by ordinance of the governing board, and would require that a selected base year remain in effect, as specified. The bill also would provide that, to the extent any adjustment in the base year pursuant to these provisions creates a negative fiscal impact on the state, the governing board shall, on or before the expiration of 5 years from the date of the adjustment of the base year, remit to the State Controller the total amount of increased state school aid resulting from the adjustment as determined by the Department of Finance in consultation with the governing board.

Ch. 930 (AB 2235) Sweeney. Regional occupational centers: finance.

(1) Existing law requires the Superintendent of Public Instruction to calculate a revenue limit for each regional occupational center or program (ROC/P). As part of that calculation, existing law requires the Superintendent of Public Instruction to calculate a base revenue limit per unit of average daily attendance for the current fiscal year. Existing law requires the Superintendent of Public Instruction to deduct from the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

revenue limit for each ROC/P any local revenue that would otherwise be deemed restricted and not available for expenditure in the current fiscal year, as specified.

This bill would require that any state funds made available as a result of local property tax revenues deducted pursuant to the above provision shall be allocated to all ROC/Ps in an equal amount per unit of funded average daily attendance and would require that these funds shall not be included in the calculation of the base revenue limit for the subsequent fiscal year.

(2) Under existing law, the Budget Act of 1996, funding is provided for the support of ROC/Ps. Under existing law, the Budget Act of 1996, $10,000,000 is made available to the State Department of Education to increase revenue limits of ROC/Ps to the statewide average revenue limit for the 1995–96 fiscal year. Existing law provides that the Department of Finance shall approve the methodology used by the State Department of Education to allocate the $10,000,000.

This bill would require the Superintendent of Public Instruction to recalculate the base revenue limit for each ROC/P for the 1996–97 fiscal year to reflect the actual amount received by each ROC/P in the 1995–96 fiscal year, including funding provided in the Budget Act of 1996, as specified, but excluding state funds made available as a result of local property tax revenues deducted from the revenue limits of ROC/Ps and funding provided pursuant to the $10,000,000 available to increase revenue limits of ROC/Ps to the statewide average revenue limit for the 1995–96 fiscal year.

This bill would require the Superintendent of Public Instruction to allocate the $10,000,000 available to increase revenue limits of ROC/Ps to the statewide average revenue limit for the 1995–96 fiscal year on a pro rata basis, as specified.

Ch. 931 (AB 2265) Villaraigosa. Back to Basics Summer School Reading Program of 1996.

Existing law limits a school district's maximum reimbursement for pupil attendance in summer school programs. These programs include mandatory summer school for graduating seniors and pupils in grade 11 who would otherwise not graduate with their class and pupils in grades 7 to 12, inclusive, who do not meet the school district's adopted proficiency standards; core academic area programs; general vocational work experience education; voluntary Saturday school; and voluntary after-school programs in multitrack year-round schools. Existing law, which is currently sunsetted, sets forth a method for allocating economic impact aid to school districts to replace funds previously authorized for the support of educationally disadvantaged youth programs and for bilingual education so that the needs of the pupils served by those programs may continue to be met.

This bill would enact the Back to Basics Summer School Reading Program of 1996 and authorize a school district to expend amounts received for the purposes of economic impact aid for that program if all of the following conditions are met:

(1) The English reading ability of more than 10% of pupils enrolled in the school district in any of grades 1 to 3, inclusive, is more than one grade level below the grade level the pupils will be leaving at the end of the school year.

(2) The summer school program is provided solely to pupils who will be leaving any of grades 1 to 3, inclusive, at the end of the school year.

(3) The summer school program is designed solely to increase a pupil's ability to read English.

(4) The school district administers specified standardized reading tests in determining eligibility for enrollment and for continued funding.

(5) The summer school program provided by the school district uses instruction based only on phonics, except as specified.

This bill would require the Superintendent of Public Instruction to evaluate, based on data provided by participating school districts, the Back to Basics Summer School Reading Program of 1996, statewide, and present to the Legislature its findings and recommendations, as specified, on or before January 1, 2000.

This bill would provide for the repeal of the Back to Basics Summer School Reading Program of 1996, as added by this bill, on January 1, 2001.

Ch. 932 (AB 2291) Knox. Real property.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that an owner of any estate or any other interest in real property owes no duty of care to keep the premises safe for entry or use by others for any recreational purpose, as defined, or to give any prescribed warning, except as specified.

Existing law provides that a public entity, as defined, is not liable to any person who participates in a hazardous recreational activity, as defined, for any damage or injury to property or persons arising out of that hazardous recreational activity.

This bill would require the State Board of Control to allow a claim for reasonable attorney's fees incurred by an owner of any interest in real property or a public entity in a specified civil action if the owner gives permission to the public to enter or use the property pursuant to a specified agreement or if a public entity gives permission to the public to enter or use the property for recreational purposes, the owner or this public entity was a defendant in this civil action, and a specified act occurs.

Ch. 933 (AB 2466) Goldsmith. Gift certificates.

Existing law regulates the issuance and redemption of trading stamps and premium coupons, but does not regulate the issuance and redemption of gift certificates.

This bill would provide, on or after January 1, 1997, that it is unlawful for any person or entity to sell a gift certificate containing an expiration date. The bill would also provide for redemption in cash or replacement of a gift certificate sold after that date, as specified. This bill would also provide that it does not apply to gift certificates distributed to a consumer for promotional purposes without any money or other thing of value being given in exchange for the gift certificate by the consumer.

Existing law provides for escheat to the state of certain personal property that is held or owing in the ordinary course of the holder's business, as specified.

This bill would provide that this provision does not apply to gift certificates subject to the above provisions.

Ch. 934 (AB 2613) Aguiar. California State University: direct vendor payments.

Existing law requires the Trustees of the California State University, in conjunction with the Controller, among other things, to implement a pilot project on 3 campuses to reduce the time required for California State University vendors to receive payment by authorizing the university to make payments directly to vendors from its revolving fund.

This bill would delete that provision. The bill would require the trustees, in conjunction with the Controller, to implement a process that allows any campus or other unit of the university to make payments of obligations of the university from its revolving fund directly to all of its vendors, subject to the approval of the Director of Finance if the amount used as a revolving fund is more than 10% of the total appropriation to the university for any fiscal year. The bill would, prior to January 1, 2002, authorize the trustees to draw from funds appropriated to the university, for use as a revolving fund, amounts necessary to make payments of obligations of the university directly to vendors. The bill would require the trustees to maintain payment records for 3 years and make those records available to the Controller for postaudit review, as needed. The bill would require the trustees to contract with one or more public accounting firms to conduct systemwide and individual campus financial statement and compliance audits, as specified. The bill would require the internal and independent financial statement audits of the trustees to test compliance with procurement procedures and the integrity of payments made, and would require the results of these audits to be included in a biennial report required by the Financial Integrity and State Manager's Accountability Act of 1983.

The bill would require the Bureau of State Audits to evaluate the system of direct payments to vendors authorized by the bill and to submit a written report thereon to the Legislature on or before January 1, 2001.

The bill would require the Director of Finance, after receiving certification from the Controller of the audit costs incurred by the Controller's office pursuant to the bill, to transfer to the Controller, for reimbursement of those costs, up to $125,000 for the 1996–97 fiscal year and up to $250,000 for the 1997–98 fiscal year, thereby making an appropriation.

Ch. 935 (AB 2772) Cortese. Administrative regulations: State Personnel Board.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law generally requires state agencies to adopt regulations pursuant to procedures set forth in the Administrative Procedure Act.

This bill would exempt State Personnel Board regulations, as defined, from the Administrative Procedure Act, except as specified.

Ch. 936 (AB 2823) Harvey. Business licenses.

Existing law authorizes the legislative body of an incorporated city and the county board of supervisors to license businesses carried on within their respective jurisdictions and to set license fees as specified.

This bill would require a city or county, before it issues a business license to a person to conduct business as a contractor, to verify that the person is licensed by the Contractors' State License Board.

Ch. 937 (AB 2834) Friedman. Pupils: expulsion: alternative placement.

(1) Existing law prohibits community day schools from being situated on a comprehensive schoolsite unless the county superintendent of schools certifies that no alternative program of study is available at a site away from a comprehensive schoolsite. Existing law generally prohibits the governing board of a school district from referring an expelled pupil to a program of study that is situated on specified comprehensive schoolsites.

This bill would repeal the siting provision and instead prohibit a community day school from being situated on the same site as an elementary, middle, junior high, comprehensive senior high, opportunity, or continuation school, except when the governing board of specified school districts certifies by a $^{2}/_{3}$ vote of its membership that no satisfactory alternative facilities are available for a community day school. The bill would also permit the governing board to refer expelled students to that community day school if specified conditions are met.

(2) Existing law provides a procedure to be followed when an individual who has been expelled from a school district for causing serious physical injury to another person, possessing a knife, explosive or certain other dangerous objects, unlawfully possessing a controlled substance, or committing robbery or extortion, requests enrollment in another school district.

This bill would apply those procedures also to an individual who is expelled for possessing, selling, or otherwise furnishing a firearm, brandishing a knife at another person, and unlawfully selling a controlled substance.

(3) Existing law requires the governing board of a school district to maintain outcome data on those pupils who are expelled for any reason and who are enrolled in education programs operated by the school district, the county superintendent of schools, or as otherwise authorized, and to report the data, upon request, to the State Department of Education.

This bill would prohibit the Superintendent of Public Instruction from apportioning specified funds to a district that does not report the data, as specified, until the district complies with the above-referenced requirements. The bill would require the Superintendent of Public Instruction to provide written notice, as specified, before withholding the apportionment of funds.

(4) Existing law requires the governing board of a school district, at the time a pupil is expelled, to ensure an education program is provided to the expelled pupil, and provides that the program may include independent study. Existing law limits the governing board's duty to the extent funds are appropriated for this purpose in the annual Budget Act or other legislation, or both.

This bill would repeal the authority to offer independent study in the above-referenced circumstances, and would require, irrespective of the extent of funding, that the governing board of a school district for specified pupils at the time of their expulsion ensure an education program is provided for them. To the extent the bill would thereby impose new duties upon local education entities, this bill would impose a state-mandated local program.

(5) Existing law, which is uncodified, delays the implementation of the provisions of Chapter 974 of the Statutes of 1995, except for specified expelled pupils, to the extent funds are appropriated for its purpose in the annual Budget Act, or other legislation, or

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

both. Existing law also specifies a similar condition in specific codified sections of law relating to community day schools and other programs for expelled students.

This bill would repeal the uncodified provision.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 938 (AB 3132) Firestone. Postsecondary education: California State University and the University of California.

(1) Existing law establishes the California State University and provides for its administration by the Trustees of the California State University.

This bill would enact the California State University Management Efficiency Act of 1996, with provisions as specified.

(2) Existing law defines the powers and duties of the trustees with respect to the administration of the university.

This bill would express the intent of the Legislature that, before legislation that, by its terms, applies to the state or its agencies, departments, or boards, may apply to the California State University, that legislation should be compatible with the mission and functions of the California State University in its provisions. The bill would also express legislative intent that the California State University not be governed by any statute enacted after January 1, 1997, that does not amend a previously applicable act and that applies generally to the state or to state agencies, departments, or boards, unless the statute expressly provides that the California State University is to be governed by that statute.

(3) Existing law requires the trustees to adopt rules and regulations not inconsistent with the laws of this state for the government of the trustees, their appointees and employees, and the California State University.

This bill, until January 1, 2002, would require the trustees to adopt, amend, or repeal regulations pursuant to the bill, as specified, rather than pursuant to the general provisions of law governing the adoption, amendment, and repeal of administrative regulations.

(4) Existing law, known as the Administrative Procedures Act, generally governs the adoption of administrative regulations by state agencies.

This bill would provide that the adoption of rules and regulations by the trustees for the government of trustees, their appointees and employees, and the California State University shall not be subject to the general provisions of law governing administrative regulations and rulemaking.

(5) Existing law permits a joint powers agency, the members of which may conduct agricultural, livestock, industrial, cultural, or other types of fairs and exhibitions, or educational programs and activities, to establish and administer risk pooling arrangements for the payment of general liability losses incurred by nonprofit corporations conducting or benefiting agricultural, livestock, industrial, cultural, or other types of fairs and exhibitions, and by nonprofit organizations or auxiliary organizations operating facilities, programs, or events at public schools, the California Community Colleges, the California State University, or the University of California.

This bill, instead, would authorize a joint powers agency, or an entity provided for by a joint powers agreement, conducting these activities, to establish and administer risk pooling arrangements for the payment of any liability losses, rather than general liability losses, for these purposes.

In addition, the bill would authorize entities provided for by a joint powers agreement, conducting these activities, to establish and administer these risk pooling arrangements for the payment of liability losses incurred by members of the entity.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill, under these provisions, also would authorize risk pooling arrangements to be established and administered for the payment of educational programs and activities.

The bill would specify that, for these purposes, one or more public agencies and one or more nonprofit corporations or auxiliary organizations operating facilities, programs, or events at public schools, the California Community Colleges, the California State University, or the University of California may enter into a joint powers agreement.

(6) For the purposes specified in (5) above, existing law authorizes a joint powers agency to provide the nonprofit corporations with any services provided to the agency's members.

This bill, instead, would authorize the joint powers agency or entity to provide the nonprofit corporations with any services or nonrisk pooling programs provided to the agency's or entity's members.

The bill would make other related changes.

(7) Existing law defines "state agency," for the purposes of numerous statutes in the Government Code, to include every state office, officer, department, division, bureau, board, and commission.

This bill would amend that definition to specify that "state agency" for these purposes does not include the California State University, with respect to specified statutes that are added or amended effective on or after January 1, 1997, unless a statute explicitly provides that it applies to the university.

(8) Existing law, known as the California State University Contract Law, defines a "project" to include the erection, construction, alteration, painting, repair, or improvement of any state structure, building, road, or other state improvement of any kind which will exceed in cost a total of $10,000, and requires that a project be under the sole and direct control of the trustees.

This bill, for the purposes of the California State University Contract Law, would change the definition of "project" to delete the requirement that the total cost of the project must exceed a minimum amount of $10,000. The bill would also change the definition of "trustees" under the law so that it includes the trustees and their designees.

(9) Existing law authorizes the Regents of the University of California to perform projects with university employees if the regents deem that the award of a contract, the acceptance of bids, or the acceptance of further bids is not in the best interest of the university, provided that (a) the estimated value of work to be so performed shall not exceed $20,000, or (b) the project is for the erection, construction, alteration, repair, or improvement of experimental or diagnostic equipment, except as specified.

This bill would additionally authorize the regents to perform projects with university employees if the regents deem that the award of a contract, the acceptance of bids, or the acceptance of further bids is not in the best interest of the university, provided that the work is to be performed at a research facility located in a remote and sparsely populated area and the estimated cost does not exceed $50,000.

(10) The existing California State University Contract Law authorizes the trustees, where the nature of the work, in their opinion, is such that the application of all of the provisions of the California State University Contract Law is not required and with the approval of the Department of Finance, to carry out the project if the estimated cost does not exceed $100,000. Existing law requires the trustees, in this instance, if the estimated cost of any construction project or work exceeds $5,000, to solicit bids in writing and award the work to the lowest responsible bidder or reject all bids. Existing law further authorizes the trustees to carry out work in excess of $5,000, but not exceeding $20,000, by day labor.

This bill would delete the requirement that the trustees obtain the approval of the Department of Finance in this regard and would increase the limit to $250,000.

In addition, the bill would add provisions authorizing the trustees to award annual contracts that do not exceed $1,000,000 for repair or other repetitive work to be done according to unit prices, and to award these contracts to the lowest responsible bidder, as specified.

Ch. 939 (AB 3155) Martinez. Public utilities: rights.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, public utilities and other service suppliers are required to bill their customers for various taxes imposed by public entities and remit the revenues from those taxes that are collected to the public entity.

This bill would provide that the public utility or other service supplier shall not be liable to any customer as a result of collecting the tax, and would grant various rights to, and impose various requirements on, public utilities and other service suppliers and impose new duties on local agencies with respect to the imposition, repeal, or collection of those taxes. The imposition of the new duties on local agencies would constitute a state-mandated local program.

Since existing law makes any public utility, as defined, and any corporation other than a public utility, that violates the Public Utilities Act guilty of a misdemeanor, and the provisions of the bill would be within the act, this bill would also impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions, but no other reimbursement is required by this act for a specified reason.

Ch. 940 (AB 3407) Knowles. Sales and use taxes: transient occupancy taxes: food products.

(1) The Bradley-Burns Uniform Local Sales and Use Tax Law requires each city, county, or city and county to contract with the State Board of Equalization to perform all functions incident to the administration or operation of the sales and use tax ordinance of that city, county, or city and county. Existing law requires the board to terminate its contract with a city, county, or city and county if that city, county, or city and county imposes a similar sales or use tax in addition to that authorized by and conforming to state law.

This bill would require the board to terminate its contract for administration with a city, county, or city and county that imposes a tax on the privilege of occupying a room or rooms in a hotel, motel, bed and breakfast inn, or similar transient lodging establishment, if the tax is imposed when the establishment provides food products to guests and that portion of the price for the transient occupancy accommodation that is allocable to the food products is subject to sales or use tax and local tax upon occupancy, as specified, and the operator of the establishment provides a specified allocation of the value of the food products.

(2) Under existing law, the legislative body of any city or county may levy a tax on the privilege of occupying a room or rooms or other living space in a hotel, inn, tourist home or house, motel, or other lodging, unless the occupancy is for any period of more than 30 days.

This bill would prohibit any city, county, or city and county, including any charter city, from levying a tax under those provisions on any amount subject to tax under the Sales and Use Tax Law with respect to the sale of food products, as defined.

(3) This bill would state the Legislature's intent in enacting the bill.

(4) This bill would provide that the provisions of the bill described in paragraph (1) above, concerning the termination of a board contract for the administration of a sales and use tax ordinance, shall become operative only if the provisions described in paragraph (2) above are held inapplicable to charter cities.

Ch. 941 (AB 1368) Knowles. Claims against the state: payments or refunds.

Existing law provides that a state agency that fails to make any payment for goods and services to certain entities pursuant to contract shall be subject to an interest penalty fee, according to specified criteria.

This bill would , unless otherwise provided for by statute, and with specified exceptions, provide that any state agency that fails to pay a person any undisputed

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

payment or refund due to that person shall be liable for interest on the undisputed amount, as specified.

Ch. 942 (AB 2953) Villaraigosa. Dispute resolution: fees.

Existing law prescribes the amount of the total fee for filing the first paper in a civil action or proceeding in the municipal and superior courts. Existing law provides that the total fee includes, among other things, any dispute resolution fee imposed for the support of dispute resolution programs.

This bill would revise these provisions to provide that the board of supervisors of a county may exclude any portion of the fee imposed for the support of dispute resolution programs from the amount of the total fee for filing that first paper.

Existing law encourages the use of alternative dispute resolution.

This bill would state the intent of the Legislature to support the Dispute Resolution Program Act, as specified.

The bill would incorporate additional changes to Section 72055 of the Government Code, proposed by AB 2553, to become operative only if AB 2553 and this bill are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 943 (AB 3099) Campbell. Community colleges: health insurance for part-time faculty and their dependents.

(1) Existing law does not establish a statewide program for health insurance for part-time community college faculty.

This bill would establish the Part-Time Community College Faculty Health Insurance Program for the purpose of providing a state incentive program to encourage community college districts to offer health insurance, as defined to include medical benefits, but not vision or dental benefits, for part-time faculty and their eligible dependents. The bill would authorize the governing board of any community college district to provide a program of health insurance for part-time faculty, as defined, and their dependents.

The bill would provide that a part-time faculty member is eligible to participate in the program at the commencement of his or her 3rd consecutive semester of teaching or 4th consecutive quarter of teaching where the quarter system is used. The bill would exclude from participation in the program any part-time faculty member whose premiums for health insurance are paid by an employer other than a community college district.

The bill would require the governing board of each community college district that establishes a program pursuant to this bill to negotiate with the exclusive representative as to the payment of the portion of the health insurance premium that is not funded by the state and to send verification, by June 1 of each year, to the Chancellor of the California Community Colleges as to the number of participants in the program.

The bill would require the Chancellor of the California Community Colleges to apportion to each participating community college district an amount that equals up to $^1/_2$ of the total cost of the individual enrollment premiums required to be paid for the health insurance coverage of participating part-time faculty and their dependents in the district.

(2) The bill would appropriate $500,000 to the Chancellor of the California Community Colleges for the program established by the bill. The bill would state the legislative intent that ongoing funding for purposes of the program be subject to annual Budget Act appropriations.

Ch. 944 (SB 989) Polanco. Special education: nonpublic school agencies.

(1) Existing law sets forth a method for providing special education and related services to pupils with exceptional needs. Existing law also permits, under certain circumstances, contracts to be entered for the provision of those services by nonpublic, nonsectarian schools or agencies, as defined. Existing law authorizes a master contract for special education and related services provided by a nonpublic, nonsectarian school or agency only if the school or agency has been certified as meeting specified standards. The master contract for nonpublic, nonsectarian schools or agencies is required to be developed in accordance with specified requirements, including, among other

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

requirements, that general administrative and financial agreements and an individual services agreement for each pupil be specified on forms provided by the Superintendent of Public Instruction in January of each year for the following fiscal year.

This bill would eliminate the requirement that the services be specified on forms provided by the Superintendent of Public Instruction in January of each year for the following fiscal year. The bill would require the superintendent to develop, in consultation with statewide organizations representing providers of special education and designated instruction and services, the procedures, methods, and regulation for the purposes of contracting for nonpublic, nonsectarian services and for their reimbursement.

(2) Existing law requires the State Board of Education to issue rules and regulations that establish the procedures, methods, and areas of certification for nonpublic, nonsectarian schools and agencies.

This bill would in addition require the Superintendent of Public Instruction to develop those procedures, methods, and areas of certification, as specified, in consultation with statewide organizations representing providers of special education and designated instruction and services.

(3) Existing law requires a nonpublic, nonsectarian school or agency to meet all applicable standards relating to fire, health, sanitation, and building safety.

This bill would instead require a nonpublic, nonsectarian school or agency to provide written assurances that it meets these standards.

(4) Existing law requires a nonpublic, nonsectarian school or agency to file an application for certification between January 1 and March 31, unless a waiver is granted and except as specified.

This bill would extend the application period to June 30.

(5) Existing law requires a nonpublic, nonsectarian school or agency to provide specified notification if the school or agency intends to initiate or expand services to pupils who are currently educated or who were educated in the immediate prior fiscal year in a juvenile court program or community school, operate any other nonspecial education program, or operate a special education program previously provided by a school district, special education local plan area, or county office of education.

This bill would instead require that notification if the nonpublic, nonsectarian school or agency proposes to initiate or expand services to pupils currently educated in the immediate prior fiscal year in a juvenile court program, community school or other nonspecial education program, including independent study or adult school, or both. The bill would also require the notification to include the number of staff that will provide special education and designated instruction and services and hold a current valid California credential or license in the service rendered or certificate of registration to provide occupational therapy.

(6) Existing law provides that only nonpublic, nonsectarian schools and agencies that provide special education and designated instruction and services utilizing staff who hold or are receiving training under the supervision of staff who hold a current valid California credential or license in the service rendered are eligible to receive certification and does not restrict student teachers, interns, or other staff who are enrolled in specified training programs if they are under the direct supervision of a staff member who holds a current valid California credential, license, or certificate of registration document.

This bill would provide that not later than August 1, 1997, the State Board of Education shall issue emergency regulations, to be developed in collaboration with specified organizations including the Commission on Teacher Credentialing. The bill would provide that the emergency regulations include requirements for minimum personnel qualifications for credentials to provide special education to individuals with exceptional needs, requirements for minimum personnel qualifications for licenses or certifications of registrations to provide designated instruction and services to individuals with exceptional needs, requirements for personnel who are not licensed or credentialed who are under the supervision of a credentialed or licensed professional, and requirements for the certification of nonpublic, nonsectarian schools and agencies.

(7) Under existing law, costs of contracts with nonpublic, nonsectarian schools and agencies that a school district or county office of education reports with respect to special education services are prohibited from including specified costs that may be incurred,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

including the costs for services provided by personnel who do not meet certain requirements.

This bill would make technical cross-reference changes in these provisions.

Ch. 945 (SB 1811) Polanco. Juveniles: juvenile court officers.

Existing law provides for the adjudication of minors as dependent children of the juvenile court. Existing law authorizes the juvenile court to appoint referees and commissioners to hear matters in the juvenile court.

This bill would direct the Judicial Council to develop and implement standards for the education and training of all judges who conduct juvenile court dependency hearings, on or before July 31, 1997, as specified. The bill would require that any commissioner or referee who is assigned to conduct those hearings meet those standards by July 31, 1998.

The bill would also require the Judicial Council to submit an annual report on compliance with these provisions, as specified.

Ch. 946 (SB 1946) Leslie. Public employees: health benefits.

The Public Employees' Medical and Hospital Care Act provides that state employees entitlement to employee's contributions for health care plan payments is dependent upon their completed years of credited state service at retirement.

This bill would permit the Calaveras County Water District under specified conditions to amend its contract to provide that its employees' entitlement to those contributions also be based upon their credited service.

Ch. 947 (AB 2895) Bordonaro. Education: at-risk pupils.

(1) Existing law establishes and authorizes programs for pupils who are at risk of dropping out of school, including the school-based pupil motivation and maintenance program and dropout recovery act, partnership academies, and the Elementary and Secondary School Dropout Prevention Act of 1969. Existing law authorizes the governing board of a school district to establish one or more community day schools for pupils who are expelled, probation referred, or referred by a school attendance review board.

This bill would appropriate $2,250,000 from the General Fund to the Superintendent of Public Instruction for the 1996–97 fiscal year only, for allocation to the Los Angeles Unified School District for the purpose of providing an early intervention program for at-risk pupils in grades 6 to 8, inclusive, who are otherwise eligible to be served by community day schools. The early intervention program would be required to include specified components and the State Department of Education would be required to conduct a review of the program and report its findings to the Legislature on or before January 31, 1997. The bill would require that the appropriation be included in the amount appropriated by the state for the 1995–96 fiscal year for the purpose of meeting the state's minimum funding obligation under Section 8 of Article XVI of the California Constitution for that fiscal year.

(2) This bill would declare that it would become operative only if Assembly Bill 2460 is enacted and becomes effective on or before January 1, 1997.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 948 (AB 1068) Mazzoni. Education: teachers.

(1) Under existing law, a member retired for service may earn compensation for creditable service in any one school year up to $15,000, as adjusted, without a reduction in his or her retirement allowance. If a member retired for service earns compensation for creditable service in excess of that amount, his or her retirement allowance is reduced by the amount of the excess compensation.

This bill would provide that until July 1, 1999, the earnings paid to a member who retired for service with an effective date on or before July 1, 1996, and who is employed by a school district to provide direct instruction to pupils in grades kindergarten through 12 is exempt from the above provisions if specified conditions are met, including, among others, the condition that the employment is necessary to meet the objectives of the Class Size Reduction Program.

(2) Existing law requires that a person holding a valid California credential who has not been employed in a position requiring certification in any school district within 39

NOTE: Superior numbers appear as a separate section at the end of the digests.

months prior to employment and who has not taken the state basic skills proficiency test but who has passed a basic skills proficiency examination which has been developed and administered by the school district offering that person employment, may be employed by the governing board of that school district on a temporary basis on the condition that he or she will take the state basic skills proficiency test within one year of the date of his or her employment.

This bill would provide a similar requirement with respect to a person holding a valid California credential who is employed for purposes of the Class Size Reduction Program, but would not require that the person has passed a basic skills proficiency examination developed and administered by the school district offering that person employment.

(3) Existing law authorizes the governing board of any school district that maintains kindergarten or grades 1 to 12, inclusive, or that maintains classes in bilingual education, or, in the case of special education programs for pupils with mild and moderate disabilities, the Los Angeles Unified School District, to employ district interns to provide instruction to pupils in those grades or classes as a classroom teacher. Prior to employing those district interns, existing law requires the governing board to certify to the Commission on Teacher Credentialing that an insufficient number of fully credentialed teachers are available.

This bill would delete the requirement that the governing board certify to the Commission on Teacher Credentialing that an insufficient number of fully credentialed teachers are available. The bill would require that any district interns be hired in consultation with an accredited institution of higher education offering an approved program of pedagogical teacher preparation.

(4) This bill would reappropriate $4,500,000 from the Proposition 98 Reversion Account of the General Fund to the Commission on Teacher Credentialing in augmentation of Item 6360-101-0001 of the Budget Act of 1996 for the incentive grant funding to school districts and county offices of education participating in the alternative teacher certification program.

(5) This bill would appropriate $100,000 from the General Fund to the Commission on Teacher Credentialing for the administration of the incentive grant program for alternative teacher certification in augmentation of Item 6360-001-0001 of the Budget Act of 1996.

(6) To the extent the funds appropriated by this bill are allocated to a school district, as defined by existing law for purposes of Section 8 of Article XVI of the California Constitution, those funds may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(7) This bill would not become operative unless and until AB 2460 is chaptered.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 949 (SB 1233) Costa. California Community Colleges. [4]

(1) Existing law appropriates $60,000,000 from the General Fund to the Chancellor of the California Community Colleges for the purpose of allocating funds to community college districts for one-time deferred maintenance projects for the 1996–97 fiscal year. Existing law provides that, to be eligible to receive such an allocation, the community college district must pay for a percentage of the cost of the deferred maintenance project, calculated as specified.

This bill would provide, instead, that to be eligible to receive such an allocation, the community college districts shall make a matching payment equivalent to $1 for every $3.50 of state funds provided.

(2) The Budget Act of 1996 appropriated $37,904,000 for growth for apportionments for local assistance to the Board of Governors of the California Community Colleges.

This bill, in addition, would appropriate $25,646,000 from the General Fund in augmentation of, and for the purposes of, that appropriation. To the extent that the funds appropriated by this bill are allocated to community college districts for purposes of the bill, the funds may be applied toward the minimum funding requirements imposed by Section 8 of Article XVI of the California Constitution.

(3) This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 950 (AB 574) Villaraigosa. Peace officers: training.[5]

(1) Under existing law, any sheriff, undersheriff, or deputy sheriff, employed in that capacity, of a county, is a peace officer whose authority extends to any place in the state, as specified.

This bill would provide that any deputy sheriff of a county of the first class who is employed to perform duties exclusively or initially relating to custodial assignments with responsibilities for maintaining the operations of county custodial facilities, including the custody, care, supervision, security, movement, and transportation of inmates, is a peace officer whose authority extends to any place in the state only while engaged in the performance of the duties of his or her respective employment and for the purpose of carrying out the primary function of employment relating to his or her custodial assignments, or when performing other law enforcement duties directed by his or her employing agency during a local state-of-emergency.

(2) Existing law requires any sheriff, undersheriff, or deputy sheriff of a county, who is first employed after January 1, 1975, to successfully complete a course of training prescribed by the Commission on Peace Officer Standards and Training before exercising the powers of a peace officer, except as specified. Existing law additionally requires specified peace officers, including, but not limited to, deputy sheriffs, to obtain the basic certificate issued by the Commission on Peace Officer Standards and Training upon completion of probation, but in no case later than 24 months after employment, in order to continue to exercise the powers of a peace officer after the expiration of the 24-month period.

This bill would exempt any deputy sheriff described in (1) above from these training requirements so long as his or her assignments remain custodial related, and would prescribe other training requirements.

(3) Existing law requires the Commission on Peace Officer Standards and Training to adopt rules establishing minimum standards relating to physical, mental, and moral fitness that shall govern the recruitment of any of specified groups of peace officers. The commission is also required to adopt rules establishing minimum standards for training specified groups of peace officers.

This bill would additionally include safety police officers and park rangers of the County of Los Angeles among these groups of peace officers.

(4) Existing law provides that no allocation shall be made from the Peace Officers' Training Fund to a local governmental agency if the agency was not entitled to receive funding under any of certain specified provisions regulating the allocation of funds from the Peace Officers' Training Fund for training expenses, as those provisions read on December 31, 1989.

This bill would provide that the safety police officers and park rangers of the County of Los Angeles, if total revenues to the Peace Officers' Training Fund in the 1996–97 State Budget or the 1997–98 State Budget exceed total revenues budgeted in the 1995–96 State Budget by a specified amount, shall be entitled to receive the above funding up to the specified amount during the respective fiscal year notwithstanding the 1989 provisions. Because this bill would make additional entities eligible to receive state funds payable from the Peace Officers' Training Fund, which is a continuously appropriated fund, it would make an appropriation.

Ch. 951 (AB 3194) Vasconcellos. Personal income and bank and corporation taxes: stock options.

The Personal Income Tax Law and the Bank and Corporation Tax Law, in conformity with federal income tax laws, provide for the postponement of gain from the exercise of specified types of stock options until the sale of the stock.

This bill would establish a California qualified stock option that would also allow the specified postponement of taxes upon the exercise of any other type of stock option, if the stock option is limited to a specified number of shares and value, and is exercised by individuals who are employees with earned income below a specified amount and who meet other specified conditions. This bill would apply only to stock options issued and exercised on or after January 1, 1997, and before January 1, 2002. This bill would make related technical and conforming changes to specified provisions of the alternative minimum tax.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would take effect immediately as a tax levy.

Ch. 952 (SB 715) Committee on Revenue and Taxation. Income and bank and corporation taxes.

(1) Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code as enacted as of a specified date are referenced in various sections of the Revenue and Taxation Code. Those tax laws also provide that, when applying the Internal Revenue Code, federal regulations in effect as of the specified effective date of the Internal Revenue Code sections referenced shall be applicable to the extent that they do not conflict with any Franchise Tax Board regulations.

This bill would instead provide that federal regulations promulgated in final form or issued as temporary regulations shall be applicable as regulations to the extent they do not conflict with board regulations.

(2) The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits and deductions against the taxes imposed by those laws with respect to certain activities conducted within a program area, an enterprise zone, the Los Angeles Revitalization Zone (LARZ), or a local agency military base recovery area (LAMBRA).

This bill would specify program area, enterprise zone, LARZ, and LAMBRA tax credits that offset only the tax which is attributable to program area, enterprise zone, LARZ, and LAMBRA generated income and would modify the provisions allowing for the carryover of excess credit, as specified.

This bill would make legislative findings and declarations that the changes made by this bill are consistent with the intent of the Enterprise Zone Act, the Employment and Economic Incentive Act, the Los Angeles Revitalization Zone Act, and the Local Military Base Recovery Area Act, and the changes made by this bill shall apply from the original effective dates of those acts.

This bill would also make technical clarifying changes to these provisions.

(3) Existing law imposes a tax on limited partnerships, limited liability companies, and limited liability partnerships. Existing law imposes a specified minimum tax on limited partnerships.

This bill would revise and recast those provisions and make technical and clarifying changes to related partnership provisions. This bill would exempt limited partnerships qualified to do business in this state that are not doing business in, or receiving income from sources in, this state from the minimum tax for a period of $^1/_2$ month.

(4) The Personal Income Tax Law authorizes various credits against the taxes imposed by that law, and provides that only certain of those credits may be applied, as specified, to reduce certain amounts of tax imposed under that law below the amount of the tentative minimum tax, as defined by a specified statute. That law also provides that gross income shall not include a specified amount of gain from the sale or exchange of qualified small business stock, as specified. Existing law also provides for the commencement in specified counties of certain actions under the Personal Income Tax Law.

This bill would make nonsubstantive, technical changes to, and correct erroneous references in, those provisions.

(5) The Personal Income Tax Law and the Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of disaster.

This bill would make technical and clarifying changes to those provisions, as provided.

(6) Existing law with respect to the filing of tax returns pursuant to the Personal Income Tax Law requires that an extension of time for the filing of a return be granted to a taxpayer pursuant to a specified statute if that taxpayer qualified for an extension of time for the filing of a federal income tax return.

This bill would eliminate this provision.

(7) Existing law relating to the administration of the Personal Income Tax Law and the Bank and Corporation Tax Law provides, among other things, that specified amounts collected shall be deposited, as provided.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would correct erroneous references and make clarifying changes to those provisions.

(8) The Bank and Corporation Tax Law uses the term "corporations" when referring to tax-exempt entities that are subject to the alternative minimum tax with respect to their unrelated business income.

This bill would make a clarifying change to those provisions by substituting "organizations or trusts" for "corporations."

(9) The Bank and Corporation Tax Law prescribes specified rules applicable to "S corporations."

This bill would correct an erroneous reference in those provisions and would delete obsolete language relating thereto.

(10) The Bank and Corporation Tax Law allows various exclusions from income in computing the income that is subject to the taxes imposed by that law.

This bill would authorize an exclusion under that law, by reference to a specified federal statute, for the income of foreign governments from investments in the United States in securities or other financial investments or from interest on deposits in banks in the United States.

(11) The Bank and Corporation Tax Law requires, in the case of a taxpayer who reports income from installment sales and who ceases to be subject to tax under that law, that the taxpayer include all unreported income from those installment sales in the last year that the taxpayer is subject to tax under that law.

This bill would make technical, nonsubstantive changes to those provisions.

(12) The Bank and Corporation Tax Law imposes taxes measured by income and, in the case of a business with income derived from or attributable to sources both within and without this state, the income is apportioned between this state and other states and foreign countries for tax purposes in accordance with a specified 4-factor formula based on the property, payroll, and sales within and without this state, except as specified. Existing law requires those multistate and multinational businesses to maintain certain records and, in the absence of the maintenance of those records, imposes a penalty on the taxpayer and permits the Franchise Tax Board to make certain determinations that affect the apportionment of income in the board's sole discretion. Existing law also provides that in the case of a qualified business, as defined, that business income be apportioned in accordance with a specified 3-factor formula. Existing law provides that if a business is engaged in both a qualified activity and a general business activity, a gross business receipts test shall be used to determine the weighting formula to be used.

This bill would provide that those determinations made in the sole discretion of the Franchise Tax Board may be appealed to the State Board of Equalization or to a court, as specified. The bill would, for purposes of the gross business receipts test, substitute "apportioning trade or business" for "taxpayer." The bill would also revise the definition of "gross business receipts" with respect to sales and other transactions between members of a group of corporations included in a combined report, and would correct a statutory reference. The bill would make legislative findings and declarations that these changes are declaratory of existing law.

Ch. 953 (AB 296) Knight. Economic development.

(1) The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment.

The Employment and Economic Incentive Act establishes the Employment and Economic Incentive Program, pursuant to which targeted economic development areas, neighborhood economic development areas, or program areas are designated by the Trade and Commerce Agency, according to specified criteria, for the provision of tax incentives, special assistance, startup capital, and other incentives for private investment and employment.

This bill would repeal these provisions. It would enact the Enterprise Zone Act, to provide for the designation of zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities within each zone may receive

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

regulatory, tax, and other incentives for economic and employment development and private investment.

This bill would specify that any enterprise zone designated, or program area or part of a program area deemed designated as an enterprise zone, under the Enterprise Zone Act, or any targeted economic development area, neighborhood economic development area, or program area designated under the Employment and Economic Incentive Act, shall be deemed designated as an enterprise zone pursuant to these provisions.

(2) Existing law sets forth the procedures pursuant to which a local agency formation commission may develop and determine the sphere of influence for each governmental agency within the county, and the expenditure of certain funds by each agency in that respect.

This bill would, until January 1, 2000, declare the intent of the Legislature to expand the City of Lancaster's sphere of influence to include Edwards Air Force Base and adjacent territory, and to allow the city to expend specified funds outside the city limits but within its temporary sphere of influence to promote commercial space efforts, to retain and create commercial space jobs, and to develop commercial space infrastructure on and around the base. It would, until that date, specify that the Legislature deems the City of Lancaster's sphere of influence to include designated territory, and prohibit the Los Angeles County Local Agency Formation Commission from disapproving the city's expenditures for improvements and services as specified. It would declare the intent of the Legislature that the commission, on or before December 31, 1999, amend or revise the City of Lancaster's sphere of influence in a manner that will facilitate the establishment and operation of a specified launch site on the base.

(3) This bill would also provide that changes made to specified sections of the Revenue and Taxation Code by SB 715 shall apply in the computation of taxes for taxable or income years before December 31, 1996.

(4) This bill would declare that its provisions would only become operative if SB 2023 of the 1995–96 Regular Session is enacted and becomes operative on or before January 1, 1997.

(5) This bill would incorporate the changes to Section 17039 and 23036 of the Revenue and Taxation Code proposed by both this bill and SB 715, to become operative only if this bill and SB 715 are both chaptered and this bill is chaptered last.

Ch. 954 (SB 38) Lockyer. Taxation.

(1) Existing law authorizes the California Tax Credit Allocation Committee to administer the low-income housing tax credit program.

This bill would enact the Farmworker Housing Assistance Program and would express findings and declarations of the Legislature with respect to the supply of affordable housing for transient and resident farmworkers.

Under the bill, the recipient of a tax credit pursuant to the program or the owner of the assisted farmworker housing would be required to enter into an agreement required by the committee to further the purposes of the program, wherein the owner would agree, among other things, that the farmworker housing units assisted with the farmworker housing tax credits would be utilized, maintained, and operated pursuant to these provisions for the compliance term specified by the applicable farmworker housing tax credit statute. The bill also would restrict the availability, occupancy, and use of the assisted farmworker housing, as specified. By requiring that the agreement be recorded in the official records of the county, this bill would impose a state-mandated local program.

The bill also would require the committee to allocate farmworker housing credits on a regular basis in each calendar year during which applications may be filed and considered. The committee would be required to establish application procedures, as specified. The bill also would authorize the committee to charge a fee of tax credit applicants as a condition of submitting an application, or receiving an allocation or reservation of tax credits, to defray the committee's costs in administering the program.

(2) The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property and provides various exemptions from the taxes imposed by that law. That law

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provides an exemption from those taxes for the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property, as defined, purchased for use by a qualified person, as defined, primarily in any stage of manufacturing, processing, refining, fabricating, or recycling of property, and introduced into the process, as specified. That law also provides that if a purchaser who gives a resale certificate or purchases property for the purpose of reselling it makes any storage or use of the property, except as provided, the storage and use is taxable, and, with respect to specified property for which the use is limited to leasing, the purchaser is allowed to pay the use tax measured by the fair rental value, as defined.

This bill would provide under that law that a lessor of property that is the subject of that exemption, who is a manufacturer of that property, and who leases that property in a specified form, may, in lieu of reporting use tax measured by the rentals payable, elect to pay tax measured by his or her cost price, as defined, of that property if the election is made, as provided.

(3) The Sales and Use Tax Law also provides an exemption for drugs or medicines administered to animal life as an additive to feed or drinking water, the primary purpose of which is the prevention and control of disease of food animals, or of nonfood animals which are to be sold in the regular course of business.

This bill would additionally provide an exemption from those taxes for drugs or medicines, the primary purpose of which is the prevention or control of disease, that are administered to animal life of a kind the products of which ordinarily constitute food for human consumption.

(4) The Sales and Use Tax Law also provides an exemption for aircraft used as a common carrier, as specified, or sold to any person who is not a resident of this state and who will not use the aircraft in this state.

This bill would additionally exempt tangible personal property purchased on or after October 1, 1996, that becomes a component part of those aircraft as a result of the maintenance, repair, overhaul, or improvement of an aircraft, in compliance with federal requirements, and any charges made for labor and services rendered with respect thereto, as provided.

(5) The Sales and Use Tax Law also provides an exemption for tangible personal property, as defined, purchased for use by a qualified person, as defined, primarily in any stage of manufacturing, processing, refining, fabricating, or recycling of property, and introduced into the process, as specified.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow to qualified taxpayers, as defined, a credit against taxes imposed by those laws in an amount equal to 6% of the amount paid or incurred during the taxable or income year for qualified property, as defined, that is placed in service in this state. Existing law provides that qualified property includes tangible personal property for use by a qualified taxpayer, as defined, primarily for the manufacturing, processing, refining, fabricating, or recycling of property, and introduced into the process, as specified.

This bill would define the term "process" for purposes of those provisions of sales and use taxes, personal income taxes, and bank and corporation taxes relating to the introduction of property into the process, and would apply the above sales and use tax exemption to leases of tangible personal property, as specified.

This bill would also expand the definition of qualified property under the Personal Income Tax Law and the Bank and Corporation Tax Law to include specified property related to certain activities in connection with space vehicles, parts, and satellites or semiconductor manufacturing equipment, as specified. The bill would require that, in the case of any partnership or S corporation, the qualification for the credit shall be determined at the entity level, and the credit passed through to the partner or shareholder. The bill would also authorize the Franchise Tax Board to issue specified regulations in connection with the credit.

The Personal Income Tax Law and the Bank and Corporation Tax Law permit any qualified taxpayer to carry over any unused portion of the above credit for the following 8 taxable or income years and permits any small business, as defined, to carry over any unused portion of that credit for the following 10 taxable or income years.

This bill would include any qualified taxpayer engaged in biopharmaceutical activities, as defined, or engaged in biotechnology activities, as defined, that has not received

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

federal regulatory approval for any product, as specified, within the definition of "small business," thereby allowing those qualified taxpayers a longer carryover period for the credit.

(6) The Personal Income Tax Law and the Bank and Corporation Tax Law authorize a specified net operating loss deduction against the taxes imposed by those laws, including provisions that permit those losses to be carried forward 5 taxable or income years, as specified, or in the case of a new business, as defined, for an additional one to 3 taxable or income years, as specified.

This bill would include any qualified taxpayer engaged in biopharmaceutical activities, as defined, or engaged in other biotechnology activity, as defined, that has not received federal regulatory approval for any product, as specified, within the definition of "new business," thereby allowing those qualified taxpayers those additional carryover periods for losses, as specified.

(7) The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws.

This bill would provide, under both laws, a credit equal to $^1/_3$ of the enhanced oil recovery credit allowed under a certain federal statute, as specified.

This bill would authorize a credit under both laws for each taxable or income year beginning on or after January 1, 1997, and before January 1, 2008, in an amount equal to $15 for each ton of rice straw, as defined, grown within California and purchased during the taxable or income year by the taxpayer. This bill would provide that the aggregate amount of credits granted to all taxpayers under both laws shall not exceed a specified amount. This bill would require the Department of Food and Agriculture to certify that the taxpayer has purchased the rice straw and to perform other specified duties in connection with the credit.

(8) The Personal Income Tax Law and the Bank and Corporation Tax Law provide, by reference to a specified federal statute, a credit for increasing research expenses, as defined. In general, the amount of the credit under both laws is equal to 8% of the excess of the qualified research expenses, as defined, for the taxable or income year over the base amount and, in addition, for purposes of the Bank and Corporation Tax Law, 12% of the basic research payments, as defined.

This bill would, for each taxable or income year beginning on or after January 1, 1997, increase the credit to 11% for the excess of the qualified research expenses, and to 24% with respect to basic research payments. This bill would also expand the scope of activities with respect to which the credit is allowed, as provided, to expressly include certain biopharmaceutical research activities or any other biotechnology research and development activities, as specified.

(9) The Personal Income Tax Law and the Bank and Corporation Tax Law authorize a credit in an amount equal to a specified percentage of qualified wages paid to a qualified disadvantaged individual, as defined, employed in an enterprise zone.

This bill would modify certain limitations in the definition of qualified wages with respect to wages paid to a qualified employee employed in the Long Beach Enterprise Zone in aircraft manufacturing activities, as provided.

This bill would provide that specified provisions relating to this hiring credit would become operative only if both this bill and SB 2023 are both enacted and become operative, as specified.

(10) This bill would authorize under the Personal Income Tax Law and the Bank and Corporation Tax Law, for taxable or income years beginning on or after January 1, 1997, specified credits relating to qualified amounts paid or incurred by a taxpayer to construct or rehabilitate farmworker housing to meet the requirements of the Employee Housing Act, and specified credits relating to interest income received on loans made to finance qualified expenditures to construct, rehabilitate, or reconstruct seasonal or year-round farmworker housing, as defined.

(11) The bill would require the Franchise Tax Board and the California Tax Credit Allocation Committee, on or before July 1, 1997, to enter into an agreement to work cooperatively with one another to administer the farmworker housing credits. The bill would require the board and the committee to report jointly, on or before January 1, 1999, to the Legislature regarding the operation of the program, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(12) This bill would allow under the Personal Income Tax Law and the Bank and Corporation Tax Law, for taxable or income years beginning on or after January 1, 1996, a credit for specified expenditures to provide access to disabled individuals in accordance with federal law, modified as provided.

(13) This bill would authorize a credit under the Personal Income Tax Law and the Bank and Corporation Tax Law for each taxable and income year beginning on or after January 1, 1996, in an amount equal to 50% of the transportation costs paid or incurred in connection with donated agricultural products, as specified, by the taxpayer.

(14) The Personal Income Tax Law and the Bank and Corporation Tax Law provide for the levy of an alternative minimum tax in partial conformity with federal law, subject to certain modifications that include a tentative minimum tax. The tentative minimum tax is imposed on specified items of income and items of tax preference.

This bill would provide that alternative minimum taxable income shall not include income, adjustments, and items of tax preference attributable to the trade or business of a qualified taxpayer, as defined.

(15) The Personal Income Tax Law and the Bank and Corporation Tax Law allow various deductions in computing taxable income under those laws.

This bill would allow, subject to certain deduction limitations contained in specified proposed provisions of federal income tax law, a deduction of the amount deposited in any taxable year by an individual in a medical savings account, as defined, and would, for taxable years commencing on or after January 1, 1997, exclude from gross income any interest or dividends earned on the moneys deposited in a medical savings account. The bill would require the trustee or custodian of a medical savings account to make annual reports, as specified, and provide disclosure statements, as specified, to the individual for whom the account is established. The bill would make related changes.

(16) The Personal Income Tax Law, by reference to specified federal statutes, allows a deduction for contributions to an individual retirement account, as specified, and allows an individual married to a nonworking spouse to make deductible contributions of up to $250 annually to a spousal account.

This bill would, for each taxable year beginning on or after January 1, 1997, allow a deduction for a contribution by or on behalf of a nonworking spouse in an amount not to exceed $2,000 annually, as specified.

(17) The Personal Income Tax Law, by reference to specified federal statutes, conforms to various provisions of federal income tax law. Those provisions allow a deduction for the cost of certain tangible property that would otherwise be required to be capitalized and depreciated. Those provisions provide that the aggregate amount that may be deducted at various aggregate amounts, while the state provisions set the aggregate amount at $10,000.

This bill would, for purposes of incorporation into the Personal Income Tax Law, modify those provisions for taxable years beginning on or after January 1, 1997, by increasing the aggregate amount that may be deducted under the state provisions to $12,500 with respect to property placed in service on or after January 1, 1997, and before January 1, 1998, and $15,000 with respect to property placed in service on or after January 1, 1998.

(18) The Personal Income Tax Law, by reference to specified federal statutes, allows a deduction for expenses paid during the taxable year for medical care not compensated for by insurance or otherwise, which includes amounts paid for medical insurance.

This bill would modify those provisions to include amounts paid for qualified long-term medical care services, as specified, and any qualified long-term care insurance contract.

(19) This bill would, under the Personal Income Tax Law and the Bank and Corporation Tax Law, provide specified additional conformity to federal income tax laws relating to moving expenses, modifications of income from the discharge of indebtedness, the modification of the limitation on the deduction for certain interest, the limitation on travel expenses for spouses, dependents, and other individuals, the deductibility of interest in connection with a life insurance policy of an employer, employee stock option plans, and the mark to market accounting method for securities dealers.

This bill would also, under the Personal Income Tax Law, provide specified additional conformity to federal income tax laws relating to increases in the recovery period for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

nonresidential real property under the accelerated cost recovery system and the treatment of certain payments to retired or deceased partners.

(20) The Personal Income Tax Law, by reference to a specified federal statute, provides for an exclusion from the gross income of an employee with respect to the taxes imposed by that law for amounts paid or expenses incurred by an employer for educational assistance to the employee, as specified, up to $5,250 during a calendar year. However, the exclusion is not available for state income tax purposes in any taxable year in which the federal exclusion is not available for federal income tax purposes. By its own terms, the federal statute is not applicable to taxable years beginning after December 31, 1994.

This bill would continue the exclusion for state income tax purposes by incorporating the substantive provisions of the expired federal exclusion, thereby making the exclusion applicable to taxable years beginning on or after January 1, 1995. This bill would provide, however, that educational assistance does not include any course or education taken at the graduate level beginning after June 30, 1996, of a kind normally taken by an individual pursuing a program leading to a law, business, medical, or other advanced academic or professional degree.

(21) Existing laws relating to the administration of income and bank and corporation tax laws provide, among other things, for the payment of additional amounts in the case of specified underpayments of tax, as provided.

This bill would, for purposes of bank and corporation taxes, modify a calculation used in determining the amount of the underpayment, as specified.

(22) Existing law authorizes the Franchise Tax Board to enter into a voluntary disclosure agreement with a qualified business entity, as defined, that is binding upon both the board and the business entity.

This bill would similarly authorize the Franchise Tax Board to enter into a voluntary disclosure agreement with a qualified shareholder, as defined.

(23) The Bank and Corporation Tax Law provides that a corporation that incorporates under the laws of this state or qualifies to transact interstate business in this state shall prepay a specified minimum franchise tax of $800, except as provided.

This bill would provide that, for income years commencing on or after January 1, 1997, the amount of the prepaid minimum franchise tax for a qualified new corporation, as defined, shall be $600, unless its gross receipts, as specified, or its tax liability exceeds specified amounts.

(24) The Bank and Corporation Tax Law provides that specified organizations are exempt from the taxes imposed by that law.

This bill would, in addition, exempt from taxes imposed by that law an organization established pursuant to the Nonprofit Corporation Law by 3 or more corporations as an arrangement for the pooling of self-insurance claims or losses of those corporations.

(25) Existing law requires each employer to file certain information with respect to new employees with the Employment Development Department, and authorizes the department to use this information for specified purposes.

This bill would additionally authorize the Employment Development Department (1) to provide this information to the Franchise Tax Board for purposes of tax enforcement, (2) to use this information for identification and collection of delinquent liabilities, and (3) to assist the department in determining the effectiveness of its job placement services. The bill would also provide that certain information may be released to the Franchise Tax Board for tax collection purposes.

(26) Existing law requires the department to provide written notice to an employer for the employer's first failure to report the hiring of employees. A subsequent failure to report subjects an employer to a $250 penalty.

This bill would provide that an employer is subject to the penalty unless the failure to report is due to good cause.

(27) The Bank and Corporation Tax Law imposes taxes measured by income and, in the case of a business with income derived from or attributable to sources both within and without this state, the income is generally apportioned between this state and the other states and foreign countries for tax purposes in accordance with a specified formula based on the property, payroll, and sales within and without this state. Existing law permits a qualified taxpayer, as defined, to elect to determine its income under a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

water's-edge election and permits those taxpayers to exclude, as specified, from income 100% or 75% of qualifying foreign dividends, or 75% of partially excluded qualifying dividends.

This bill would permit those taxpayers to exclude only 75% of qualifying foreign dividends from income, except that taxpayers would be allowed to exclude 100% of dividends derived from construction projects, as provided. This bill would eliminate the calculations relating to the determination of the amount of that exclusion.

(28) The Bank and Corporation Tax Law provides that specified interest expense that is incurred for purposes of foreign investments may be offset against deductible qualifying dividends.

This bill would, for income years beginning on or after January 1, 1997, modify those provisions to require the offset amount otherwise computed to be multiplied by a specified percentage.

(29) Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

(30) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(31) This bill would take effect immediately as a tax levy, however its provisions would become operative as specified.

Ch. 955 (SB 2023) Costa. Enterprise zones.

The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment.

The Employment and Economic Incentive Act establishes the Employment and Economic Incentive Program, pursuant to which targeted economic development areas, neighborhood economic development areas, or program areas are designated by the Trade and Commerce Agency, according to specified criteria, for the provision of tax incentives, special assistance, startup capital, and other incentives for private investment and employment.

This bill would repeal these provisions. It would enact the Enterprise Zone Act, to provide for the designation of zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities within each zone may receive regulatory, tax, and other incentives for economic and employment development and private investment.

This bill would specify that any enterprise zone designated, or program area or part of a program area deemed designated as an enterprise zone, under the Enterprise Zone Act, or any targeted economic development area, neighborhood economic development area, or program area designated under the Employment and Economic Incentive Act, shall be deemed designated as an enterprise zone pursuant to these provisions.

This bill would also provide that changes made to specified sections of the Revenue and Taxation Code by SB 715 shall apply in the computation of taxes for taxable or income years before December 31, 1996.

This bill would incorporate the changes to Section 17039 and 23036 of the Revenue and Taxation Code proposed by both this bill and SB 715, to become operative only if this bill and SB 715 are both chaptered and this bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would incorporate the changes to Sections 17053.8 and 23622 of the Revenue and Taxation Code proposed by SB 38, to become operative only if this bill and SB 38 are both chaptered and this bill is chaptered last.

This bill would declare that its provisions would only become operative if AB 296 of the 1995–96 Regular Session is enacted.

Ch. 956 (AB 95) Bowler. Vehicles: driver's license suspension: driving under the influence.

(1) Until November 30, 1995, the Department of Motor Vehicles, with specified exceptions, was required to immediately suspend or delay the privilege of any person to drive a motor vehicle for 6 months upon receipt of a duly certified abstract of the record of any court showing that the person had been convicted of any specified controlled substance offense. The department was also required, for each successive offense, to suspend or delay the privilege for an additional 6 months.

Until November 30, 1995, a court that convicted a person of any specified controlled substance offense was required to require all driver's licenses held by the person to be surrendered to the court. The court was also required to transmit a certified abstract of the conviction, together with any driver's license surrendered, to the department not later than 10 days after the conviction.

Until November 30, 1995, the payment of a $24 fee was required to be made to the department before a driver's license could be issued, reissued, or returned to a person after the suspension or delay of a person's privilege to operate a motor vehicle pursuant to the above provisions.

This bill would reenact those provisions and would repeal them as of March 1, 1997, thereby imposing a state-mandated local program by imposing requirements on the courts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 957 (AB 1058) Speier. Family law: support.

(1) Existing law requires all applications filed by the district attorney or by another party, as provided, for an order to establish or enforce child support, including actions to establish paternity, to be referred for hearing to a commissioner or a referee to the extent required by federal law, except as provided.

This bill would repeal this provision and instead require all actions filed by the district attorney or by another party, as provided, for an order to establish, modify, or enforce child or spousal support, including actions to establish paternity, to be referred for hearing to a child support commissioner, except as provided. The bill would require each superior court to provide sufficient child support commissioners to hear these cases, as specified, thereby imposing a state-mandated local program. The bill would prescribe specified duties of the Judicial Council with regard to child support commissioners.

(2) Existing law specifies procedures for the enforcement of money judgments, including provisions for wage garnishment. Under the Wage Garnishment Law, a withholding order for support has priority over any other earnings withholding order.

This bill would enact special provisions for the enforcement of support judgments, and would authorize the district attorney to use any of the existing remedies available to a judgment creditor and to act as a levying officer when enforcing a support obligation pursuant to a writ of execution, as provided. The bill would authorize the district attorney to issue a warrant to levy on and sell vehicles or vessels, as defined, or aircraft, for the collection of support arrearages, as specified.

(3) Existing law provides for the modification and termination of support orders.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would state the intent of the Legislature that the Judicial Council adopt rules of court and forms for a simplified method to modify support orders, for use by parents who are not represented by counsel.

(4) Under existing law, when a court orders a party to pay an amount for support or orders a modification of support, the court is required to include in the order an earnings assignment order for support that orders the employer of the obligor to pay to the obligee a portion of future earnings.

This bill would provide that in cases in which support enforcement services are being provided by the district attorney, and after a court has ordered an earnings assignment for support, the district attorney may serve on the employer a notice of assignment prescribed by the Judicial Council, containing specified information, in lieu of the earnings assignment order, in the manner specified. The bill would impose a state-mandated local program by requiring new duties of district attorneys and court clerks. The bill would require the employer to deliver specified documents and information to the obligor, and would specify procedures under which the obligor may obtain a court hearing.

(5) Existing law specifies that the superior court has jurisdiction in proceedings under the Family Code.

This bill would require each superior court to maintain an office of the family law facilitator, to be staffed by an attorney. The family law facilitator would provide specified services to parties at no cost, and to other entities, as provided. The bill would require the Judicial Council to adopt minimum standards for the office and to adopt any forms or rules of court necessary to implement these provisions. The bill would require the Director of the State Department of Social Services to seek federal approval to utilize specified federal funds for the services of the office, as provided. The bill would impose a state-mandated local program by requiring new services by local officials.

(6) Under existing law, in any action brought by the district attorney for the support of a minor child or children, the action may be prosecuted in the name of the county on behalf of the child, children, or parent, and the parent is not a necessary party to the action. In such an action, joinder of actions, or coordination of actions, or cross-complaints, are prohibited and the issues are limited to the question of paternity and child support.

This bill would provide that after a support order has been entered in such an action, the parent who has requested or is receiving support enforcement services of the district attorney shall become a party to the action for the purposes of child support, custody, and visitation, and restraining orders, as provided, and would make related changes. The bill would impose a state-mandated local program by requiring the district attorney to provide specified notice.

(7) Existing law requires the district attorney to establish, modify, and enforce child support and, when appropriate, enforce spousal support orders, and establish paternity in the case of a child born out of wedlock, when the child is receiving public assistance, and is authorized to take the same actions on behalf of a child who is not receiving public assistance.

This bill would provide that in any action or proceeding brought by the district attorney to establish parentage pursuant to the above provision, the court shall enter a judgment establishing parentage upon the filing of a written stipulation between the parties, as provided.

(8) Existing law specifies the procedures under which judgment may be had if the defendant fails to answer the complaint.

This bill would require the court to enter a judgment in any support or paternity action filed by the district attorney pursuant to specified provisions of law, if the defendant fails to file an answer or otherwise appear in the action within 30 days of service of process, as specified.

(9) Under existing law, the court may relieve a party or his or her legal representative from a judgment, dismissal, order, or other proceeding taken against him or her through his or her mistake, inadvertence, surprise, or excusable neglect, if application is made within a reasonable time, in no case exceeding 6 months after the action was taken.

This bill would provide that in any support or paternity action filed by the district attorney pursuant to specified provisions of law, the court may relieve the defendant

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

from that part of the judgment or order concerning the amount of child support to be paid, after the 6-month time limit described above has elapsed, if the judgment or order was based upon presumed income as described in (10) below and was entered after the entry of the default of the defendant, as specified.

(10) Existing law requires the Judicial Council, in consultation with certain organizations, to develop simplified complaint and answer forms for any action for support brought by the district attorney, as specified. Under existing law, the simplified complaint form is required to provide the defendant with notice of the amount of child support that is sought by stating the possible amount of an order in terms of a percentage of the defendant's income for the number of children specified in the order.

This bill would require the Judicial Council to develop simplified summons, complaint, and answer forms and would delete reference to the organizations the Judicial Council is required to consult with regarding development of the simplified forms. The bill would revise the latter provision described above to instead require the simplified complaint form to provide the defendant with notice of the amount of child support that is sought based upon the income or income history of the defendant as known to the district attorney. The bill would provide that if the defendant's income or income history is unknown to the district attorney, the simplified complaint shall inform the defendant that income shall be presumed, as provided. The bill would make related and conforming changes.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 958 (SB 506) Calderon. Family law: friend of the court.

Existing law, the Family Code, sets forth provisions governing the custody of children, the establishment and enforcement of support, and the parent and child relationship.

This bill would state the intent of the Legislature to create in each superior court of this state an office of the friend of the court for the purpose of enforcement of child custody and visitation, similar to the program in effect in the State of Michigan. The bill would express the intention of the Legislature to provide that the office is to be created in consultation with specified entities, and that its establishment would be contingent on federal funding. The bill would require the State Department of Social Services to submit an application for federal funding under specified circumstances.

Ch. 959 (SB 98) Sher. Certificated school employees.

(1) Existing law requires the governing board of a school district to adopt and cause to be printed and made available to each certificated employee a schedule of salaries to be paid. Existing law requires each person employed by a school district in a position requiring certification qualifications, except as specified, to be classified on the salary schedule on the basis of uniform allowance for years of training and years of experience. Existing law prohibits placing employees in different classifications on the schedule or paying different salaries solely on the basis of the respective grade levels in which the employee serves.

This bill would require a public school employer and the exclusive representative, upon the request of either party, to negotiate and mutually agree to a salary schedule based on criteria other than a uniform allowance for years of training and years of experience.

(2) Under existing decisional law, a school district employer may impose its last, best offer after bargaining in good faith to impasse. However, existing law also provides that if a public school employer and the exclusive representative do not reach mutual agreement regarding the payment of additional compensation, other than compensation based on years of training and years of experience, the uniform salary schedule applies.

This bill would provide that if a public school employer and the exclusive representative do not reach mutual agreement on a salary schedule based on criteria other than a uniform allowance for years of training and years of experience, the uniform salary schedule applies.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 960 (AB 2955) Knight. Income taxes: designations: administration: Veterans Memorial Account.

Under the Personal Income Tax Law, taxpayers are allowed to contribute amounts in excess of their tax liability for the support of various funds or accounts to be expended for specified purposes. Existing law specifically allows taxpayers, for taxable years beginning before January 1, 1996, to contribute amounts in excess of their tax liability for the support of the Veterans Memorial Account in the General Fund.

This bill would extend the operation of those particular provisions to taxable years beginning before January 1, 1997. This bill would generally require any specified taxpayer contribution fund or account to be reflected on personal income tax return forms through the taxable year immediately preceding the year in which the authority for that contribution fund or account is to be repealed. This bill would also generally require any specified taxpayer contribution fund or account to remain in effect until December 31 of the year in which the authorization for that fund or account is otherwise repealed, and would require any contribution amount designated for that fund or account in a timely filed tax return for the taxable year immediately preceding the year of repeal to be transferred and administered as required by the otherwise repealed article.

Ch. 961 (AB 3133) Firestone. Student Aid Commission.

Existing law establishes the Student Aid Commission as the primary state agency for the administration of state-authorized student financial aid programs available to students attending all segments of postsecondary education. Existing law authorizes California to participate in the Federal Family Education Loan Program and requires the commission to administer the program in this state. Existing law establishes the State Guaranteed Loan Reserve Fund and requires the deposit therein of all money received from federal, state, or local governments, or from other private or public sources, for the purposes of the Federal Family Education Loan Program.

This bill would authorize the commission to establish an auxiliary organization as a nonprofit public benefit corporation for the purpose of providing operational and administrative services for the commission's participation in the Federal Family Education Loan Program.

The bill would authorize employees of the commission to be assigned to work for the auxiliary organization to provide services pursuant to the bill. The bill would require that while they are assigned to work for the auxiliary organization, these employees shall remain employees of the commission and the status, rights, and benefits of these employees shall be based on their employment as civil service employees of the commission. The bill would provide that employees of the auxiliary organization shall not be employees of the State of California, not be subject to specified statutes related to state employer-employee relations, and not be subject to the Bill of Rights for State Excluded Employees. The bill would specify that these employees would have the right to representation consistent with the National Labor Relations Act.

The bill would require the operations of the auxiliary organization to be conducted in conformity with an operating agreement approved annually by the commission. The bill would authorize the agreement to include provisions requiring the board of directors of the auxiliary organization to provide salaries, working conditions, and benefits for the full-time employees of the auxiliary organization that are comparable to those provided commission employees performing similar services.

The bill would authorize retirement benefits for employees of the auxiliary organization to be provided under contract with the Public Employees' Retirement System or otherwise.

The bill would require the auxiliary organization to be governed by a board of directors nominated and appointed by the commission, as specified.

The bill would prohibit any member of the board of directors from being financially interested in any contract or other transaction entered into by the board of which he or she is a member. The bill would provide that any contract or transaction entered into in violation of that prohibition is void, except as specified. The bill would require the board of directors to conduct its business in accordance with the Bagley-Keene Open Meeting Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the board of directors to approve all expenditures and fund authorizations of the auxiliary organization.

The bill would require the commission, in consultation with the board of directors and the Department of Finance, to institute a standard accounting and reporting system for the management and operations of the auxiliary organization, implement financial standards that will ensure the fiscal viability of the auxiliary organization, institute procedures to ensure that transactions of the auxiliary organization are consistent with the mission of the commission, and develop policies for the expenditure of specified funds.

The bill would require the auxiliary organization to select a certified public accountant to audit all funds of the auxiliary organization.

The bill would authorize the Department of Finance to review the performance and operation of the auxiliary organization.

The bill would authorize the auxiliary organization to contract with the commission for the provision of support services.

The bill would require the commission to report specified information to the Legislature on January 1, 1998, and January 1 of each year thereafter.

The bill would continuously appropriate the moneys in the State Guaranteed Loan Reserve Fund and would authorize the expenditure of these moneys for the purposes of the auxiliary organization established by the bill, as specified. The bill would prohibit the deposit of moneys from the General Fund into the State Guaranteed Loan Reserve Fund.

Existing law requires that state agencies secure at least 3 competitive bids or proposals for each contract when procuring materials, supplies, equipment, or services, except under certain conditions.

This bill would make that requirement inapplicable if the contract is with an auxiliary organization of the commission.

Ch. 962 (SB 1706) Wright. Hazardous waste: ash and residues: interim status facilities: environmental data.

(1) Under existing law, the Department of Toxic Substances Control is authorized to grant a variance from the requirements regulating the management of hazardous waste, if the hazardous waste is solely a non-RCRA waste or the requirements from which the variance is being granted is not a requirement of the federal Resource Conservation and Recovery Act of 1976 (RCRA) and the department makes specified findings.

This bill would additionally authorize the department to grant a variance for a commodity-like material that has been reclaimed and is to be further reclaimed pursuant to specified criteria, if the department makes specified findings and the Environmental Protection Agency has authorized the department to implement certain federal regulations.

(2) Existing law requires the department to classify as nonhazardous waste any fly ash, bottom ash, and flue gas emission control residues, generated from a biomass combustion process, if the combustion process will be adequately monitored and controlled, as specified, unless the department determines that the ash or residue is hazardous, by testing a representative sample of the ash or residue pursuant to criteria adopted by the department.

This bill would prohibit a specified corrosivity test from being applied to ash generated from a biomass combustion process, if the ash is managed in accordance with specified regulations administered by the California regional water quality control boards and meets specified requirements.

(3) Existing law requires hazardous waste facilities, including, but not limited to, storage facilities, to operate under hazardous waste facilities permits issued by the department. Existing law specifies a procedure for the granting of interim status to specified hazardous waste facilities, pending the review and decision of the department regarding the permit application. The department is directed to require any offsite facility which was granted interim status prior to January 1, 1992, to perform a phase I environmental assessment. The department is prohibited from issuing a hazardous waste facilities permit unless the owner or operator establishes and maintains specified financial assurances. A violation of the hazardous waste control laws is a crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would terminate the grant of interim status of a facility which, as of July 1, 1997, has not complied with specified requirements concerning the performance of an environmental assessment. The bill would require the department to review, by July 1, 1997, the basis for the granting of any facility operating under interim status made before July 1, 1997, based on operations conducted on November 19, 1980, and to prepare status reports concerning the results of that review, except as specified. The department would be required to take immediate action to correct any errors caused by intentional or negligent false statements which are discovered in the grant of interim status.

The bill would terminate, as of July 1, 1997, the grant of interim status of specified facilities operating under interim status, unless the facility certifies on or before that date that the facility is in compliance with the financial assurance requirements for the facility.

Since a violation of the requirement to operate under a hazardous waste facilities permit or other grant of authorization is a crime, the bill would impose a state-mandated local program by creating new crimes.

(4) Existing law requires the Secretary for Environmental Protection to examine and adopt information technology standards by which public agencies and the regulated community may use computers and other information technology to comply with environmental data reporting requirements, and to establish a standardized electronic format and protocol for the exchange of electronic data for the purpose of meeting the environmental data reporting requirements of specified laws. Existing law establishes a pilot program to test the format and protocol and alternative signature techniques, and establishes the Environmental Data Management Advisory Committee.

This bill would require the secretary to adopt the electronic format and protocol and alternative signature technique which the advisory committee finds satisfactory, after the completion of a demonstration of the format and protocol and technique. The bill would allow a local agency to petition the secretary to include an element in the data dictionary maintained by the secretary. The bill would provide that the submission of environmental data to a state or local agency in accordance with the standards adopted by the secretary constitutes compliance with specified environmental laws. The bill would prohibit a person or a state or local agency from being required to submit or receive environmental data electronically, but would require every state or local agency that elects to engage in electronic data management to employ the standards adopted by the secretary.

(5) The bill would incorporate changes to Section 25143 of the Health and Safety Code proposed by this bill and AB 2776, and would make additional conforming changes, which would become operative only if both bills are enacted and this bill is chaptered last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 963 (SB 1567) Kelley. Coachella Valley Mountains Conservancy.

(1) Existing law authorizes the Coachella Valley Mountains Conservancy to acquire and hold, in open space, mountainous lands surrounding the Coachella Valley, and specifies that the membership of the governing board of the conservancy consists of 19 voting members, as prescribed. That conservancy act requires that the voting membership of the governing board be expanded from time to time as additional cities, lying within the territory of the conservancy, are incorporated, and requires 10 members of the governing board to constitute a quorum and to approve any action relating to the acquisition of any interest in real property.

This bill would increase to 20 the voting membership of the governing board by requiring the inclusion of the Secretary of the Resources Agency, and would provide that a majority of the members appointed to the governing board shall constitute a quorum. The bill would also eliminate those provisions requiring the expansion of the governing board as additional cities are incorporated within the territory of the conservancy.

(2) Under the conservancy act, the conservancy may employ an executive director and other necessary staff.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the conservancy to provide for the position of executive director and would specify related powers of the conservancy.

(3) Under the conservancy act, with specified exceptions, the conservancy is authorized to acquire any property, and any interest in property, on behalf of itself or a state agency represented on the governing board, within its territory by any means if acquisition of the property is in furtherance of the conservancy's purposes.

This bill would, under specified circumstances, exempt from the Property Acquisition Law, the conservancy's acquisition of real property or any interest in real property.

(4) Under existing law, unless the Legislature specifically provides that approval by the Director of General Services is not required, every conveyance, contract, or agreement, whereby an interest of the state in any real property is conveyed, demised, or let to any person, is required, before the conveyance, contract, or agreement, is executed or entered into, to be approved by the Director of General Services.

This bill would authorize the conservancy to transfer, pursuant to those provisions, any mountainous lands to another public agency or to any nonprofit organization, as prescribed. The bill would eliminate the requirement that the Director of General Services approve the transfer.

The bill would specify that a gift of personal property otherwise required to be approved by the Director of Finance is deemed approved, unless it is disapproved within 60 days of receipt of a request from the executive director of the conservancy to approve the gift.

(5) Under the conservancy act, the conservancy is authorized to acquire any uninhabited real property within its territory containing mountainous lands by eminent domain, as specified.

This bill would, instead, prohibit the conservancy from exercising the power of eminent domain and authorize the conservancy to request the State Public Works Board to exercise the power of eminent domain on behalf of the conservancy pursuant to the Property Acquisition Law for specified purposes.

(6) Under the conservancy act, the conservancy is authorized to borrow money and incur indebtedness pursuant to specified provisions pertaining to temporary borrowing by local agencies and is deemed to be a local agency for the purposes of those provisions.

This bill would delete those provisions and authorize the conservancy to incur debt only for the purpose of acquiring real property. To acquire that property, the conservancy would be authorized to only borrow money from, and incur a debt to, an entity that is represented on the conservancy's governing board if the debt instrument pertaining to the acquisition of the property states that the security for the debt created therein is limited to the value of the real property to be acquired, and includes an acknowledgment that no state funds or state credit will be obligated or committed to repay the debt. The bill would make null and void any debt instrument that is entered into by the conservancy after January 1, 1997, except for a debt instrument that is approved by the Department of Finance, if it does not comply with these provisions.

(7) The bill would create the Coachella Valley Mountains Conservancy Fund in the State Treasury and would require the money in the fund be made available for expenditure by the conservancy, upon appropriation by the Legislature, for purposes related to the preservation of land in the Coachella Valley.

(8) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 964 (AB 2234) W. Murray. Cemeteries.

Existing law provides that the Department of Consumer Affairs succeeds to, and is vested with, all the duties, powers, purposes, responsibilities, and jurisdiction of the Cemetery Board as of January 1, 1996, in the absence of a consolidation of this board with the Funeral Directors and Embalmers Board or other restructuring of the boards.

The Cemetery Act provides for the regulation of certain private cemeteries and provides for reports and examinations of endowment care funds established by those cemeteries. Fees are established under the act for various cemetery licensees.

This bill would authorize the imposition of a fine of up to $400, rather than $200, for late endowment care reports, and would increase fees for each burial, entombment, inurnment, and cremation performed by a crematory licensee or cemetery authority, as

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified. The increase in fees would remain in effect until specified loans are repaid, but no later than April 1, 2003.

The Cemetery Act requires persons who apply for specified cemetery licenses to pass a written examination given by the board, as specified.

This bill would exempt an applicant for a cemetery salesperson's license from the written examination requirement. The exemption would be repealed on January 1, 1998.

Ch. 965 (SB 1099) Alquist. Public utilities: water corporations.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities.

This bill would require the commission to apply specified provisions of law relating to the sale of real property by a water corporation, to any proceeding pending after January 1, 1996, concerning the sale by a water corporation of real property that is not necessary or useful in the provision of water utility service.

Since existing law makes any public utility that violates specified provisions regulating public utilities guilty of a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 966 (SB 1864) Alquist. Seismic safety.

Existing law requires the Seismic Safety Commission to contract with a consortium of public and private institutions of higher education to establish the California Center for Earthquake Engineering with several duties relating to earthquake engineering and research.

This bill would delete these provisions relating to the commission and instead request that the University of California establish the California Center for Earthquake Engineering Research in this state. The bill would authorize the commission, in consultation with specified state agencies, to monitor the work of the center and to produce an annual evaluation of the work conducted at the center. The bill would state that the center's objective would be to reduce casualties, property losses, and economic or other disruptive consequences of earthquakes in areas of high seismicity through the advancement of knowledge and technology in the earthquake engineering field.

The bill would establish the Earthquake Risk Reduction Fund of 1996 in the State Treasury, transfer $1,500,000 to that fund, and appropriate that amount to the Regents of the University of California for the 1996–97 fiscal year if the Director of Finance determines that federal matching funds are available for support of the center.

The bill would also prohibit any of the above provisions from applying to the Regents of the University of California, unless the regents adopt a resolution making that provision applicable.

The bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 967 (SB 1993) Calderon. Earthquake insurance: California Earthquake Authority.

(1) Under existing law, a policy of residential property insurance may not be issued or delivered or, under certain circumstances, initially renewed by any insurer unless the named insured is offered coverage for loss or damage caused by an earthquake, as specified. If an offer of earthquake coverage is accepted, the coverage must be continued at the applicable rates and conditions for the policy term, if the residential property insurance policy is not terminated by the named insured or the insurer. At any renewal, an insurer may modify the terms and conditions of an existing policy to provide only the minimum coverage required by law as a result of the enactment of Chapter 939 of the Statutes of 1995, as specified, but must disclose the modification to the insured. This bill would require a specified disclosure to be provided to an insured if earthquake coverage is provided by a policy issued by the California Earthquake Authority.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law creates the California Earthquake Authority, which is authorized to become operational and issue policies of basic residential earthquake insurance, as defined, under certain conditions. These conditions include a determination by the Internal Revenue Service that the authority is exempt from federal income tax, a requirement for certain commitments from insurers and reinsurers, and enactment of a subsequent statute that expressly authorizes the authority to issue policies of earthquake insurance.

This bill would authorize the authority to become operational and issue policies of basic residential earthquake insurance as soon as the Insurance Commissioner certifies that the first 2 conditions in paragraph (2) above have been met.

This bill would also:

(A) Change the definition of "available capital" relative to the authority, and the definition of basic residential earthquake insurance, as specified.

(B) Limit investments of the authority to certain securities, as specified, and limit operating expenses of the authority.

(C) Provide that the duties and liabilities of the authority to its insureds shall be the same as those an insurer owes its insureds under common law and statutes.

(D) Specify that the authority is subject to the Political Reform Act of 1974.

(E) Declare that the authority is a public instrumentality of the state, exercising an essential state function.

(F) Prohibit the authority from becoming a debtor under the United States bankruptcy laws and provide that claims against the authority are not to be governed under existing provisions of the Government Code.

(G) Continuously appropriate funds in the California Earthquake Authority Fund for the purposes of the authority, thereby making an appropriation.

(H) Delete existing provisions that would have provided for the reduction and eventual elimination of assessments by the authority of participating insurers, and instead provide for the reallocation of the assessments, and the reduction of the aggregate assessment to zero dollars in specified circumstances after a specified period of time.

(I) Provide for the authority to issue loss assessment policies for individual condominium units, as specified.

(J) Require an insurer that withdraws from the authority under certain circumstances to impose a premium surcharge on earthquake policies to be used by the authority to repay debt.

(K) Provide that if legislation is enacted that causes the authority to cease operations while debt of the authority is outstanding, participating insurers would be required to impose a premium surcharge on earthquake policies to be used by the authority to repay debt.

Because the bill would provide for premium surcharges on earthquake policies that were not issued by the authority, the bill would impose a tax.

Since the bill would result in a change in state taxes for the purpose of increasing state revenues within the meaning of Section 3 of Article XIII A of the California Constitution, it thus would require the approval of $^2/_3$ of the membership of each house of the Legislature for passage.

The bill would also enact other related provisions.

(3) The bill would also provide for a loan of $1,300,000 to the California Earthquake Authority from the California Residential Earthquake Recovery Fund, to be repaid with interest, as specified.

(4) The bill would become operative only if AB 2086 is also enacted.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 968 (AB 2086) Knowles. Earthquake insurance: California Earthquake Authority.

Existing law creates the California Earthquake Authority, which is authorized to become operational and issue policies of basic residential earthquake insurance, as defined, under certain conditions. These conditions include a determination by the Internal Revenue Service that the authority is exempt from federal income tax, a requirement for certain commitments from insurers and reinsurers, and enactment of

NOTE: Superior numbers appear as a separate section at the end of the digests.

a subsequent statute that expressly authorizes the authority to issue policies of earthquake insurance.

This bill would:

(1) Revise the membership of the authority's advisory panel, and, in general, provide for its appointment by the Governor rather than the Insurance Commissioner and provide for 4-year terms.

(2) Provide that there shall be a limited civil immunity on account of any act performed or omitted or obligation entered into on the part of the authority's governing board, advisory panel, or any member of either. It would also revise conflict of interest provisions relating to the authority.

(3) Provide for claims against the authority and indemnification by the authority of participating insurers, as specified.

(4) Revise provisions relating to initial operating capital to permit certain small insurers to make installment payments and provide for associate participating insurers.

(5) Revise provisions relating to revenue bonds.

(6) Revise provisions relating to insurer assessments.

(7) Make related changes.

The bill would declare that it is to take effect immediately as an urgency statute.

The bill would become operative only if SB 1993 is also enacted.

Ch. 969 (AB 3232) Knowles. Earthquake insurance: California Earthquake Authority.

Existing law creates the California Earthquake Authority, which is authorized to become operational and issue policies of basic residential earthquake insurance, as defined, under certain conditions.

This bill would:

(1) Revise the amount of the aggregate assessment of participating insurers authorized under existing law, as specified.

(2) Require a notice to policyholders of the right to cancel or nonrenew an earthquake policy if a policy issued by the authority includes a premium surcharge.

(3) Provide that scientific information shall be used by the authority to set earthquake insurance rates only if the information, assumptions, and methodology used are consistent with the available geophysical data and the state of the art of scientific knowledge within the scientific community, as specified, and would further provide that this information shall not be conclusive to support the establishment of different rates between the most populous rating territories in the state unless there is a clear showing of higher risk of earthquake frequency, severity, or loss between those most populous rating territories to support those differences, as specified.

(4) Require the authority to cease writing new earthquake insurance policies 180 days after implementation by both the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Association ("Freddie Mac") of policies to require earthquake insurance for any single-family residential structure, other than a condominium unit or townhome, as a condition of purchasing a mortgage or trust deed secured by that structure, except as specified.

The bill would also provide that it shall not become operative unless AB 2086 and SB 1993 are also enacted and become operative. It would declare the intent of the Legislature that certain provisions in this bill shall supersede and prevail over conflicting provisions in those other bills.

Ch. 970 (AB 116) Speier. Legislative oversight: reports.

Existing law requires or requests state and local agencies to prepare and submit reports to the Governor or the Legislature, or both.

This bill would provide that no state or local agency would be required to prepare and submit any written report to the Legislature or the Governor until October 1, 1999, unless it is among a list of specified reports or certain circumstances exist. The act would become inoperative on October 1, 1999, and would be repealed on January 1, 2000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 971 (AB 122) Rainey. Vessels: Harbors and Watercraft Revolving Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Under existing law, the Boating and Waterways Commission is composed of 7 members appointed by the Governor, with the advice and consent of the Senate. At least one of the members is required to be a member of a recognized statewide organization representing recreational boaters and one member of the commission is required to be a private small craft harbor owner and operator.

This bill would require one member of the commission to be an officer or employee of a law enforcement agency responsible for enforcing boating laws.

(2) Existing law requires undocumented watercraft to have a current registration, renewed annually, imposes a $5 fee for the renewal, and requires those fees to be deposited in the Harbors and Watercraft Revolving Fund.

This bill would change the registration renewal period to 2 years, would change the fee to $10 for renewal, commencing January 1, 1998, and would require all existing certificates of number to expire on December 31, 1997, and, thereafter on December 31 of every odd-numbered year.

(3) Existing law imposes a tax on fuel used in vessels in California and requires the revenues from the tax, after deductions of costs of collection and refunds, to be deposited in the fund.

Existing law generally makes a portion of any vessel registration fees deposited in the fund, in excess of the amount necessary for administration of the registration program, available, upon appropriation, for expenditure by the Department of Boating and Waterways for boating facilities' development, boating safety, and boating regulation programs, a public information and research program relating to boating safety, and construction of small craft harbor and boating facilities planned, designed, and constructed by the department at sites owned or controlled by the state. Existing law also makes that portion of the money in the fund and other money not continuously appropriated in the fund, available, upon appropriation, to the Department of Parks and Recreation for the operation and maintenance of units of the state park system that have boating related activities. Existing law continuously appropriates a portion of the vessel registration fees deposited in the fund to the department for allocation to counties and the Department of Parks and Recreation for boating safety and enforcement programs on waters under their jurisdiction.

This bill would continuously appropriate all of those vessel registration fees deposited in the fund, in excess of the amount necessary for expenditure for administration of the registration program, to the Department of Boating and Waterways for allocation to counties and the Department of Parks and Recreation for boating safety and enforcement programs on waters under their jurisdiction and would authorize all funds appropriated to the Department of Parks and Recreation from the fund to be used for those boating safety and enforcement programs.

The bill would require the Department of Boating and Waterways to allocate the funds appropriated for boating safety programs to counties from which the department receives a resolution adopted by the county board of supervisors authorizing the county to participate in the program and that certifies that the county will expend for boating safety programs during that year not less than an amount equal to 100% of personal property taxes on vessels for specified purposes.

The bill would require a county receiving funds to use the funds only for boating safety and enforcement programs in that county and to submit a specified report to the Department of Boating and Waterways relating to boating safety within 60 days of the end of the fiscal year of the county, thereby imposing a state-mandated local program.

The bill would require the Department of Boating and Waterways to provide a summary of all boating safety activities undertaken by the counties in the preceding 2 fiscal years and other specified information in its biennial report to the Legislature.

(4) This bill would provide that if SB 1968 is enacted and amends Section 85.2 of the Harbors and Navigation Code and this bill is enacted last, the amendments to that section proposed by SB 1968 would prevail over and supersede that section as amended by this bill.

Ch. 972 (AB 137) Olberg. Candidate, endangered, and threatened species.

(1) Existing law establishes the California Endangered Species Act for the protection of various species.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the Governor to establish a commission composed of persons with specified qualifications to study the economic impact of protecting candidate, threatened, and endangered species under the act. The study would be required to include, but not be limited to, an examination of the public and private cost of regulatory activities, the cost of taking private property, and the cost of species and habitat decline or loss and the value and economic benefit or cost of species protection, as described. The bill would require the commission to prepare majority and, if necessary, minority reports of the study and would require those reports to be submitted to the Legislature by December 31, 1997. The bill would also require the California Research Bureau of the California State Library to provide staffing for the commission.

(2) Existing law requires the Department of Fish and Game to pay the cost of administration of the act from the Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account in the Fish and Game Preservation Fund, a continuously appropriated fund.

Because this bill would impose new administrative duties under the act, the bill would make an appropriation.

Ch. 973 (AB 349) Escutia. Hazardous liquid pipelines: pipeline assessment: centralized data base.

(1) Existing law requires the State Fire Marshal to establish and maintain a centralized data base on specified intrastate hazardous liquid pipelines. An operator of a pipeline used for the transportation of hazardous liquid substances is required to conform the pipeline with specified federal regulations adopted pursuant to the federal Hazardous Liquid Pipeline Safety Act with regard to installing cathodic protection. A knowing and willful violation of the state provisions governing hazardous liquid pipelines is a crime.

This bill would make a statement of legislative intent concerning the report by the State Fire Marshal on hazardous liquid pipeline risk assessment. The bill would require every operator of a pipeline to file with the State Fire Marshal, on or before July 1, 2000, an inspection, maintenance, improvement, or replacement assessment for any pipeline or pipeline segments built before January 1, 1960, and any pipeline installed on or after January 1, 1960, for which regular internal inspections cannot be conducted, or which shows diminished integrity. The bill would require the State Fire Marshal, in consultation with the Pipeline Safety Advisory Committee and pipeline operators, to establish, by January 1, 1998, evaluation criteria for use by a pipeline operator when conducting an assessment.

Since a violation of the requirement to submit an assessment would be a crime, the bill would impose a state-mandated local program.

The bill would require the State Fire Marshal, in coordination with specified state agencies, to develop a plan for developing a comprehensive data base of pipeline information that would be available on compatible, interactive computer formats, and for centralizing that data base in the Office of the State Fire Marshal. The State Fire Marshal would be required to report to the Legislature by September 1, 1997, concerning implementation of the data base.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would provide that it shall become operative only if AB 1487 of the 1995–96 Regular Session is enacted and becomes effective on or before January 1, 1997.

Ch. 974 (AB 350) Bustamante. Endangered and threatened species.

(1) Existing law does not provide for a recovery strategy program relating to threatened or endangered species.

This bill would require the Department of Fish and Game to develop and implement a recovery strategy pilot program until January 1, 2004. The bill would require the Fish and Game Commission to identify 5 species on either the list of threatened or endangered species for which recovery strategies are to be developed and would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

authorize the commission to identify one or more species added to those lists after January 1, 1995, based on specified factors. The bill would require the department to assemble a recovery strategy team for each species identified to aid in the development of the recovery strategy for that species. The bill would require the recovery strategy to be approved by the commission at a noticed hearing. The bill would require the department to adopt rules and guidelines to implement the policies of the department in implementing the recovery strategies. The bill would require the department to report annually on the status and progress of the implementation of the recovery strategies.

(2) Existing law requires the department to pay the costs of administration of the California Endangered Species Act from the continuously appropriated Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account in the Fish and Game Preservation Fund.

This bill would provide that the provisions described in (1) would become operative only if funds are appropriated by the annual Budget Bill or another statute to fund the cost of implementing the bill and that the continuous appropriation to pay the costs of the administration of the California Endangered Species Act does not apply to any costs relating to those provisions of the bill.

The bill would repeal the provisions described in (1) on January 1, 2004, except that the repeal would not apply to any recovery strategy approved or implemented on or before that date.

Ch. 975 (AB 616) Morrow. Fire Behavior and Fire Spread Study Matching Fund.

Existing law, known as the State Housing Law, generally regulates the construction, maintenance, occupancy, and use of buildings used for human habitation, including regulation of fire safety by the State Fire Marshal.

This bill would create in the State Treasury the Fire Behavior and Fire Spread Study Matching Fund, to provide specified funds to the State Fire Marshal in an amount not to exceed $250,000, for the purpose of conducting studies and tests to redefine the elements of fire behavior and fire spread in residential and commercial occupancies.

This bill would appropriate from the General Fund to the Fire Behavior and Fire Spread Study Matching Fund, for purposes of this bill, a sum, not to exceed $125,000, equal to the amount of grant moneys received by the State Fire Marshal for the purposes specified in the bill.

Ch. 976 (AB 1145) Morrissey. California Conservation Corps: funding.

Existing law creates the Collins-Dugan California Conservation Corps Fund in the State Treasury, for support of the California Conservation Corps, authorizes the deposit in the fund of money from various sources, including money received in payment for reimbursable work projects, available special funds, donations, and any other available money, except General Fund money, and continuously appropriates the money in the fund to the corps for specified program activities.

This bill would terminate existence of the fund and replace it with the California Conservation Corps Reimbursement Account which would be created in the General Fund for support of the corps. The bill would limit the funds available for deposit in the account to money received in payment for reimbursable work projects, excluding General Fund money. The money in the account would be continuously appropriated to the corps for the specified program activities.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 977 (AB 1431) Firestone. Ocean resources: counties and cities: financial assistance.

(1) Under existing law, the Coastal Resources and Energy Assistance Act, the Secretary of the Resources Agency, in cooperation with the California Coastal Commission, was required, on or before July 1, 1992, to develop and implement a competitive application process to award coastal counties and cities financial and technical assistance pursuant to specified provisions governing coastal county and city offshore energy assistance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revive that requirement by extending to April 15, 1997, the date on or before which the secretary is required to develop and implement that application process, and would require the secretary to review that process by April 15 of each year in which funds are appropriated pursuant to provisions relating to coastal county and city offshore energy assistance.

(2) The act further requires the secretary to award grants to coastal counties and cities, as specified, for activities related to offshore energy development, but prohibits any financial assistance provided to local governments pursuant to those provisions from exceeding 50% of the cost of carrying out the project. Not more than $100,000 of funds annually appropriated pursuant to the act may be used by the secretary to defray administrative costs.

This bill would instead prohibit any financial assistance provided to local governments pursuant to those provisions from exceeding 90% of the cost of carrying out the project.

The bill would, commencing in 1997, make 50% of the amount of funds received by the state pursuant to Section 8(g) of the Outer Continental Shelf Lands Act over the amount of funds so received in 1996 available, on an annual basis, for appropriation to the secretary for grants to coastal counties and cities pursuant to those provisions.

The bill would prohibit more than $50,000 of the $100,000 for administrative costs from being used to cover costs incurred by the commission in the review of grant applications.

The bill would also make various technical clarifying changes.

Ch. 978 (AB 1647) Bustamante. Solid waste landfills: alternative daily cover: diversion.

Existing law, the California Integrated Waste Management Act of 1989, establishes an integrated waste management program administered by the California Integrated Waste Management Board and defines the terms "solid waste," "solid waste disposal," and "recycle" for purposes of the act. The act provides for the permitting of solid waste disposal facilities, including solid waste landfills, as defined.

The act requires each city, county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan that includes a prescribed implementation schedule showing how the city, county, or regional agency will divert materials from solid waste disposal through source reduction, recycling, and composting activities.

Materials are applied at, and in the operation of, solid waste landfills as alternative daily cover for health and safety purposes.

This bill would define "diversion" for purposes of the act and declare that beneficial reuse in the construction and operation of a solid waste landfill, including use of alternative daily cover, constitutes diversion through recycling. The bill would specify that, pursuant to the board's general regulatory authority, the board shall adopt rules and regulations prior to December 31, 1997, that establish conditions for the use of alternative daily cover.

The bill would make clarifying changes in provisions pertaining to local agency diversion requirements.

The bill would also make related legislative findings and declarations.

Ch. 979 (AB 1663) Friedman. Health insurance.

Existing law requires every health care service plan and disability insurer that denies coverage for an experimental medical procedure or plan of treatment for a claimant with a terminal illness to provide written notice of the medical and scientific reason for denial, a description of alternative medical treatments, and information about the review process or grievance procedure, as applicable.

This bill would require every health care service plan and disability insurer to establish a reasonable external, independent review process, which would be required on and after July 1, 1998, to examine coverage decisions regarding experimental or investigational therapies for individual enrollees or insureds who meet certain specified criteria. The bill would require the independent review entities to be accredited by a private, nonprofit accrediting organization under contract with the Commissioner of Corporations, in consultation with the Insurance Commissioner. This bill would authorize the accrediting organization to grant and revoke accreditation, and to develop,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

apply, and enforce accreditation standards, as specified, that ensure the independence of the independent review entity, the confidentiality of medical records, and the qualifications and independence of health care professionals acting as medical experts.

Since a violation of this provision by a health care service plan would be a crime, the bill would impose a state-mandated local program by expanding the scope of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would state legislative intent.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 980 (AB 1947) Battin. Acutely hazardous materials: local regulation.

(1) Existing law requires the Secretary for Environmental Protection to implement a unified hazardous waste and hazardous materials management regulatory program, in accordance with prescribed procedures and requirements, to consolidate the administration of specified statutory requirements for the regulation of hazardous wastes and materials. A local agency which meets specified requirements is authorized to apply to the secretary to implement the unified program and every county is required to apply to the secretary to be certified to implement the unified program.

This bill would require a city or county which adopts or amends an ordinance related to acutely hazardous materials to do so at a public meeting for which notice has been given in a newspaper of general circulation that is published and circulated in the affected city or county, and would require the city or county to state the reasons for adopting or amending the ordinance in the ordinance, thereby imposing a state-mandated local program by imposing new duties on local agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 981 (AB 2017) Escutia. Criminal offenders: rehabilitation.

Existing law permits any person who is convicted of a felony or a misdemeanor violation of any of specified sex offenses, the accusatory pleading of which has been dismissed, to file a petition for a certificate of rehabilitation and pardon if the person has not been incarcerated since that dismissal, is not on probation for the commission of any other felony, and presents satisfactory evidence of a 3-year residence in California. Existing law authorizes the court to grant the certificate of rehabilitation if it finds that the petitioner has demonstrated his or her rehabilitation.

This bill would extend the rehabilitation period to 5 years, and would require the court to rescind the certificate upon petition by a district attorney in either the county in which the conviction was obtained or in which the person resides, and a showing by a preponderance of the evidence that the person presents a continuing threat to minors. The bill would also provide that the court may grant the certificate if it finds that the petitioner has been rehabilitated.

Ch. 982 (AB 2035) Frusetta. Street terrorism.

The California Street Terrorism Enforcement and Prevention Act defines "pattern of criminal gang activity" as the commission of, attempted commission of, or solicitation of 2 or more specified offenses if at least one of these offenses occurred after the effective date of the act, the last of these offenses occurred within 3 years after a prior offense, and the offenses were committed on separate occasions, or by 2 or more persons.

This bill would include in this definition a sustained juvenile petition for, or conviction of, 2 or more of these offenses.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the California Street Terrorism Enforcement and Prevention Act is repealed as of January 1, 1997.

This bill would repeal this date, thereby extending the operation of the provisions of the act indefinitely. Because this bill would extend the duration of provisions that establish crimes, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 983 (AB 2353) Alpert. Domestic violence: parole conditions.

Existing law authorizes the Board of Prison Terms to establish and enforce rules and regulations under which prisoners committed to state prisons may be allowed to go upon parole and provides that, upon granting parole to a prisoner, the board may impose on the parole any conditions that it deems proper.

This bill would authorize the parole authority to impose specified conditions on the parole of a person released from prison for a domestic violence offense, including participation in or successful completion of a batterer's program, and, upon request of the victim, the issuance of protective orders. The bill would require the parole agent or officer to conduct an assessment of the parolee and would authorize the agent or officer to require the parolee to participate in additional sessions of the program under certain conditions. Because the bill would impose additional duties on local law enforcement officials, the bill would create a state-mandated local program.

The bill would also require the Department of Corrections to submit specified reports to the Legislature in the implementation of this provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 984 (AB 2369) Takasugi. Air pollution: Title V permits.

(1) Existing law requires a permit system or permit provision established by an air pollution control district or air quality management district to meet the requirements of Title V of the federal Clean Air Act to, among other things, identify in the permit, to the greatest extent feasible, permit terms and conditions which are, and those which are not, federally enforceable, so that requirements imposed only by the state are not made federally enforceable solely as a result of inclusion in the permit.

This bill would also require the districts to identify those terms and conditions which are federally enforceable because they have been requested by the source in a permit application. By imposing new duties on the districts, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 985 (AB 2396) Archie-Hudson. Contractors: home improvement contracts.

Existing law provides that no extra or change-order work shall be required to be performed with respect to a home improvement or swimming pool construction contract unless the person contracting for the work has given written authorization for the additional work.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would additionally specify that a change-order shall not be enforceable against the person contracting for the work unless it clearly sets forth the scope of work encompassed by the change-order and the price to be charged for the changes.

Ch. 986 (AB 2581) Baca. Business development.

Existing law authorizes the formation of small business development corporations, which make loans and loan guarantees to small businesses. Those loans and guarantees may be made or guaranteed using funds in the Small Business Expansion Fund. That law is administered by the Small Business Development Board and the Office of Small Business.

Existing law establishes the expansion fund, to pay for defaulted loan guarantees and administrative costs of corporations. Existing law establishes the loan account in the expansion fund, and provides for the transfer of funds from the loan account to a small business development corporation corporate fund. However, under existing law, funds appropriated to the expansion fund are to remain in the expansion fund and may not be transferred to any loan accounts or corporate funds.

This bill would provide that the loan account is allocated to a corporation's loan guarantee fund, rather than its corporate fund. It would eliminate the requirement that funds in the expansion fund remain in the expansion fund. It would provide that accounts within the expansion fund for loan guarantees and surety bond guarantees shall be transferred to the small business development loan guarantee fund in the corporate fund of those corporations previously using those funds in the expansion fund to guarantee loans and surety bonds, in accordance with criteria adopted by the office. Since the expansion fund is continuously appropriated, this would result in an appropriation. The bill would provide for a reallocation of funds if a corporation has failed to effectively use its guarantee funds.

Ch. 987 (AB 2681) Bustamante. Agriculture: navel and Valencia oranges: kiwifruit.

(1) Existing law provides for a Navel and Valencia Orange Advisory Committee in the Department of Food and Agriculture for the purpose of, among other things, overseeing the implementation of an inspection program pertaining to standards for orange maturity and freeze damage as provided by statute or regulation. Existing law requires producers of navel and Valencia oranges grown in this state and that are prepared for fresh market in certain counties of the state to pay an assessment based upon the number of cartons shipped. The assessment is for the purpose of conducting an inspection program in certain counties in the state. Existing law provides, however, that county agricultural commissioners are not required to provide an inspection program. Under existing law, the assessment for the 1996 marketing season may not exceed 7 mills per carton for navel oranges, and 2 1/2 mills per carton for Valencia oranges. These provisions are to be repealed as of January 1, 1998.

This bill would continue that existing law beyond January 1, 1998, by extending that repeal date to January 1, 2003. The bill would require the county agricultural commissioners in the specified counties to conduct an inspection program if the expenses of the program are reimbursed. The bill would provide that the current assessment rate is for the 1996 calendar year instead of for the 1996 marketing season. The bill would also require the establishment of a reserve to fund the frost inspection program.

Because a violation of certain provisions of that existing law relating to the collection and remitting of assessments is a misdemeanor, the bill, by extending those provisions until January 1, 2003, would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(2) Existing law requires the California Kiwifruit Commission to establish an assessment on kiwifruit for the purposes of carrying out its activities. Existing law prohibits the combined assessment of the commission and any other state authorized kiwifruit production research and market program from exceeding 5% of the average f.o.b. (free on board) gross dollar value of kiwifruit marketed by or on behalf of producers during the previous 3 marketing years, or 25¢ per 7-pound tray of kiwifruit, whichever is less.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require that any assessment under federally authorized kiwifruit production research and market programs be included when calculating the combined assessment under the above provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 988 (AB 2936) Cunneen. Child abduction.

(1) Existing law makes each of the following a crime:

(a) A person who has a right to physical custody of, or visitation with, a child pursuant to a court order, judgment, or decree that grants another person, guardian, or public agency the same right, detains, conceals, takes, or entices away the child with the intent to deprive the other person of that right.

(b) A person who, in the absence of such a court order, has a right to custody of a child maliciously detains, conceals, takes, or entices away the child, without good cause, and with the intent to deprive the custody right of another person or public agency.

(c) A person who does not have a right to custody of a child maliciously detains, conceals, takes, or entices away the child, with the intent to detain or conceal the child from a person, guardian, or public agency having the lawful charge of the child.

This bill instead would make each of the following a crime:

(A) A person who does not have a right to custody of a child maliciously takes, entices away, keeps, withholds, or conceals a child with the intent to detain or conceal the child from a lawful custodian.

(B) A person takes, entices away, keeps, withholds, or conceals a child and maliciously deprives a lawful custodian of a right to custody, or a person of a right to visitation. By changing the definition of a crime, the bill would impose a state-mandated local program.

(2) Existing law authorizes a peace officer to take a child into protective custody if it appears that a person unlawfully will flee the jurisdiction with the child. A child who has been detained or concealed must be returned to the person, guardian, or public agency having lawful charge of the child, to the court, or to the probation department, as appropriate.

This bill additionally would authorize a peace officer to take a child into protective custody if it appears that a person will conceal the child or, by flight or concealment, evade the authority of the court, if there is no lawful custodian available to take custody of the child, if there are conflicting custody orders or claims regarding the child, or if the child is an abducted child. The bill also would authorize a peace officer who takes a child into protective custody to obtain an emergency protective order ordering placement of the child with an interim custodian, to release the child to a social services agency, or to return the child pursuant to a court order, and would provide that the officer may release the child to the lawful custodian, unless it appears that this release would cause the child to be endangered, abducted, or removed from the jurisdiction.

(3) Existing law authorizes a court to issue emergency protective orders in specified situations.

This bill additionally would permit a court to issue an emergency protective order if a child is in danger of being abducted by a parent or relative and would authorize a court to issue a protective custody warrant to secure the recovery, or appearance in court, of an unlawfully detained or concealed child.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 989 (AB 3037) Cannella. Places of employment: smoking.

Existing law, with delineated exceptions, prohibits smoking of tobacco products in enclosed spaces at places of employment. Among the exceptions in existing law are specified bars and taverns and gaming clubs, but these exceptions are suspended on

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

January 1, 1997, unless and until the Occupational Safety and Health Standards Board or the Environmental Protection Agency adopts prescribed standards for reducing employee exposure to environmental tobacco smoke. Under existing law, once those standards have been adopted, a condition to continuance of the exemption is conformity with the standards within 2 years following their adoption.

This bill would extend from January 1, 1997, to January 1, 1998, the date by which the standards board or Environmental Protection Agency must adopt those standards for employee exposure to environmental tobacco smoke in order to permit continuance of the exemption for bars and taverns and gaming clubs. However, in order to qualify for this exemption in 1997, the bill would require that, if practicable, the gaming club, bar, or tavern establish a designated nonsmoking area and that, if feasible, not require any employee, in the performance of ordinary work responsibilities, to enter any area in which smoking is permitted.

Ch. 990 (AB 3263) Ackerman. Plastic waste: containers: plastic ring devices.

(1) Existing law prohibits the sale of beverages in beverage containers that are connected to each other with plastic rings or similar plastic devices that are not classified as degradable, as defined, subject to degradable plastic connectors being commercially available, as specified. A violation by a wholesaler or distributor is an infraction, as specified.

This bill would revise that prohibition to instead prohibit the sale of containers that are connected to each other with plastic rings or similar plastic devices that are not degradable, as defined, when disposed of as litter, except as specified, and would make those provisions a part of the California Integrated Waste Management Act of 1989.

Since a violation of that prohibition would be an infraction, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 991 (AB 3345) Bustamante. Agricultural waste and forest waste.

Existing law, the California Integrated Waste Management Act of 1989, regulates the management and handling of solid waste and is administered by the California Integrated Waste Management Board.

This bill would require the board to conduct, by December 31, 1998, a feasibility study on expanding the use of agricultural waste and forest waste in the production of commercial products, as prescribed. The board would be required to transmit the study to the Governor and to the Legislature. The provisions of the bill would be repealed as of January 1, 2000, unless a later enacted statute deletes or extends that date.

Ch. 992 (SB 1070) Calderon. Rental cars.

Existing law relating to the rental of passenger vehicles provides that a rental company shall only advertise, quote, and charge a rental rate that includes the entire amount except taxes and a mileage charge, if any, that a renter must pay to hire or lease the vehicle for the period of time to which the rental rate applies. Existing law does not define "taxes" for these purposes.

This bill would define taxes for these purposes to mean sales and use taxes imposed directly upon individual rental transactions, vehicle license fees, as specified, and local taxes on individual rental transactions imposed directly on the renter or specifically permitted to be charged to the renter, as specified. The bill would also provide that where a rental company advertises or quotes a rental rate, as specified, it shall clearly disclose that taxes shall be added and the average dollar amount or range of dollar amounts of vehicle license fees for each full or partial 24-hour rental day.

The bill would provide that this provision shall be repealed on January 1, 2002, at which time presently existing law will be reinstated.

Ch. 993 (SB 836) Lewis. Air pollution: south coast district: rules and regulations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law, the Lewis-Presley Air Quality Management Act, establishes the South Coast Air Quality Management District with specified powers and duties relating to the control of air pollution.

This bill would declare specified existing rules of the south coast district void and require the district to amend another specified rule in a prescribed manner relative to the use of voluntary rideshare and other replacement measures to achieve emission reductions, thereby creating a state-mandated local program by imposing new duties on the south coast district.

The bill would require the south coast district to provide $1,500,000 annually to the Regional Transportation Agencies Coalition or its successor for allocation to regional or county rideshare agencies, as prescribed.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 994 (SB 1268) Costa. Resource conservation districts.

(1) Under existing law, a resource conservation district may be formed for the control of runoff, the prevention or control of soil erosion, the development and distribution of water, and the improvement of land capabilities.

This bill would make legislative findings and declarations that resource conservation districts are legal subdivisions of the state, and would state that those districts shall be considered agencies of the state only when contracting with state agencies. The bill would delete obsolete provisions pertaining to elected resource conservation district directors.

(2) Existing law authorizes the making of grants to resource conservation districts.

This bill would repeal those provisions and add similar provisions authorizing the Department of Conservation to provide grants to resource conservation districts .

The bill would authorize, until January 1, 2000, and require, on and after January 1, 2000, resource conservation districts, in order to qualify for a grant, to, among other things, prepare a specified annual and long-range work plan and secure sources of local support funding, as prescribed, for the purpose of assisting the districts in carrying out any work that they are authorized to undertake. The bill would also authorize, until January 1, 2000, and require, on and after January 1, 2000, a district seeking a grant to submit a grant proposal to the department containing specified information and to provide an informal accounting summary to the department that describes how the grant money was spent in accordance with the purposes or conditions of the grant. Prior to January 1, 2000, the department would be authorized to take into consideration, in making a grant, whether, and to what extent, the district has chosen to exercise that authority.

The bill would express the Legislature's intent with regard to the operation and continuity of the grant program and make various technical changes .

Ch. 995 (SB 1416) M. Thompson. Aquatic weeds: boating.

Under existing law, the Department of Boating and Waterways is authorized to cooperate with agencies of the United States and other public agencies in controlling water hyacinth in the Sacramento-San Joaquin Delta, its tributaries, and the Suisun Marsh. The department, other state agencies, cities, counties, and districts are authorized to cooperate with each other in controlling water hyacinth in the Sacramento-San Joaquin Delta, its tributaries, and the Suisun Marsh and may furnish money, services, equipment, and other property to that end. Existing law also authorizes the Department of Food and Agriculture to develop and implement biological control methods to eradicate or control the aquatic weed pest hydrilla.

This bill would require the Department of Boating and Waterways to make a grant of funds to Lake County to conduct a pilot project of aquatic weed control on Clear Lake in Lake County under specified conditions.

The bill would appropriate $147,000 from the Harbors and Watercraft Revolving Fund for allocation to the department for a grant to Lake County of not more than $49,000 in

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

each of the 1996–97, 1997–98, and 1998–99 fiscal years for the purposes of the aquatic weed control pilot project, less an amount of not more than $5,000 allocated in each of those fiscal years to the Department of Fish and Game to pay the costs it incurs in the conduct of the pilot project. However, if funds are appropriated in the Budget Act of 1996 to pay for the aquatic weed control project, the appropriation for the 1996–97 fiscal year in this bill would revert to the fund.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 996 (SB 1502) Kopp. Income and bank and corporation tax laws: bad checks.

(1) Existing law establishes a bad check diversion program that may be created within the office of the district attorney in a county that adopts the program. Existing law authorizes the district attorney to collect a fee of up to $25, in addition to the actual amount of any bank charges incurred by the victim, if his or her office collects and processes a bad check. Under existing law, if a bad check case is not referred to a diversion program, the court is authorized to impose a fee for the collection and processing of a bad check by the district attorney of not more than $25 in addition to the actual amount of any bank charges incurred by the victim, not to exceed $1,000.

This bill would increase the maximum $25 fee to $35, and would provide that the latter provision applies when a criminal complaint is filed in a bad check case after conviction if the maker of the check fails to comply with the terms of the bad check diversion program. The bill would require the Judicial Council to prepare and submit a report on the effect of this provision, as specified. These provisions would be operative until January 1, 1999, at which time existing law would be restored.

(2) The law governing the administration of personal income taxes and bank and corporation taxes specifies certain violations that constitute a felony and provide for the punishment of these violations, including payment of the costs of prosecution.

This bill would add to that punishment payment of the costs of investigation and increase the amounts of fines that can be imposed, as provided.

(3) Existing law also specifies the punishment for a willful failure to file any return or supply information, or to file false or fraudulent returns by any person or any officer or employee of a bank or corporation.

This bill would add to that punishment the payment of the costs of investigation and prosecution.

(4) Existing law provides that, in any civil proceeding in connection with the determination, collection, or refund of any tax, interest, or penalty under the personal income tax law, a judgment for reasonable litigation costs shall not be awarded unless the court determines that the prevailing party has exhausted the administrative remedies available to that party.

This bill would include, as an administrative remedy, the filing of an appeal with the Board of Equalization, as specified.

(5) Existing law makes it a misdemeanor for any person, with intent to defraud, to willfully procure or counsel any individual to procure a state-issued income tax refund warrant through the filing of a return knowing that the recipient is not entitled to the refund. Upon conviction of this offense a person is punishable by a fine not to exceed $20,000, or by imprisonment not to exceed one year, or by both that fine and imprisonment.

This bill would instead provide that any person convicted of this offense is punishable by imprisonment in a county jail not to exceed one year or in the state prison, or by a fine not to exceed $50,000, or by both that fine and imprisonment.

(6) By changing the penalty of the crime described in (5) above from a misdemeanor to either a misdemeanor or a felony, this bill would create a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 997 (SB 1804) Monteith. Property taxation: agricultural land: valuation: wildlife and endangered species restrictions.

Existing property tax law generally requires, pursuant to the authorization of the California Constitution, that open-space land that is enforceably restricted, as defined, be valued for purposes of taxation in a manner consistent with those restrictions in accordance with a specified procedure. Existing law also establishes criteria for the valuation of enforceably restricted land generally.

This bill would, as provided, require open-space land that has been restricted under state or federal law for the benefit of wildlife, certain classes of species, and their habitats, upon the request of the owner of the land, to be enrolled in a wildlife habitat contract with the restricting governmental entity in the case of a state-imposed habitat restriction, or with the county or city in the case of a federally imposed habitat restriction. This bill would, as provided, also require any already enforceably restricted open-space land, eligible for valuation under any of certain specified provisions, that becomes subject to a wildlife habitat contract pursuant to this requirement to be valued for taxation in accordance with either (1) those specified provisions or (2) the general valuation procedure for enforceably restricted open-space land. This bill would, for purposes of its requirements, also expand the definition of the term "wildlife" to include a reptile, amphibian, insect, or plant. This bill would declare the intent of the Legislature in enacting these provisions, and would, as provided, limit the construction and application of these provisions and a specified statute. By imposing additional contract and valuation duties on local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would take immediate effect as a tax levy, but its provisions would become operative commencing with those taxes levied with respect to the first property tax lien date following the effective date of this bill.

Ch. 998 (SB 1880) Lewis. Air pollution: portable internal combustion engines.

(1) Existing law requires the State Air Resources Board to establish emission limits, emission control requirements, and an optional registration program for portable internal combustion engines, as defined. Existing law requires air pollution control districts and air quality management districts to enforce those provisions.

This bill would revise the definition of "portable internal combustion engine," as specified, and would define the term "portable equipment." The bill would create a state-mandated local program by imposing new duties on the districts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 999 (AB 2776) Miller. Hazardous waste: storage: variances: permits.

(1) Existing law requires hazardous waste facilities, including, but not limited to, storage facilities, to operate under hazardous waste facilities permits issued by the Department of Toxic Substances Control. The term "storage facility" is defined as excluding a generator of hazardous waste that accumulates hazardous waste onsite pursuant to specified requirements.

A violation of the provisions regulating hazardous waste, including a regulation adopted pursuant to those laws, is a crime.

This bill would revise the definition of the term "storage facility" with regard to the requirements for the exemption of a generator of hazardous waste from that definition and would revise the definition of the term "treatment" to exclude those methods,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

techniques, or processes that are otherwise excluded pursuant to the hazardous waste control laws.

The bill would impose a state-mandated local program by revising the definition of a crime.

(2) Under existing law, the department is authorized to grant a variance from the requirements regulating the management of hazardous waste, if the department makes specified findings, only upon receipt of a variance application for a site owned or operated by an individual or business. The department is authorized to waive the fee for an application for a variance under specified conditions.

This bill would allow the department to additionally grant a variance, on its own initiative, until January 1, 2002, with a time period of not more than one year, and an additional one year renewal, upon making specified findings. The bill would delete the conditions for a waiver of the fees for an application for a variance and would authorize the department to charge a fee equal to the department's cost of issuing a variance upon mutual agreement with the applicant.

The department would also be authorized to grant a variance from certain requirements of the federal Resource Conservation and Recovery Act of 1976.

The bill would authorize the department to exempt, until January 1, 2002, by regulation, a hazardous waste management activity from requirements of the hazardous waste control laws, subject to specified conditions. The department would be required to prepare a specified evaluation of the activity and make a specified demonstration when adopting such a regulation to exempt a hazardous waste management activity.

Since a violation of the regulations authorized by this bill would be a crime, the bill would impose a state-mandated local program.

(3) Existing law authorizes the department to establish an administrative process to certify hazardous waste environmental technologies if the department determines that those technologies, among other things, can be operated without specialized training and with minimal maintenance.

This bill would delete the requirement that those technologies be operated without specialized training and minimal maintenance.

(4) Existing law exempts certain recycle-only household hazardous waste facilities from the requirements of obtaining a hazardous waste facilities permit if the facility, among other things, accepts only specified types of household hazardous waste.

This bill would additionally include, as materials that may be accepted, intact spent florescent and high intensity lamps.

(5) Existing law requires specified generators of hazardous waste to maintain certain reports and summaries with regard to hazardous waste management practices. If a generator fails to respond to a request for a copy of those reports and summaries, the department is required, if appropriate, to assess a civil penalty.

This bill would additionally require a unified program agency to assess such a civil penalty if the generator fails to respond to a request for a copy of those reports and summaries, thereby creating a state-mandated local program by imposing a new duty upon local agencies.

(6) The bill would also make various technical changes and delete obsolete provisions.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 1000 (AB 2643) Bordonaro. Commercial paper: insufficient funds.

Existing law creates a cause of action for the amount of a check passed on insufficient funds minus any partial payment made within 30 days of a specified written demand for payment, damages equal to treble that amount, as specified, plus the costs of mailing the written demand for payment only if the person who passed the check failed to pay either the amount of the check or the amount of the bad check fee charged to the payee by his or her financial institution within a prescribed period, except as specified.

This bill would revise and recast these provisions to create a cause of action for the amount of the check and a specified service charge, payable to the payee. The bill would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provide that the person shall have 30 days from the date a prescribed written demand was mailed to pay the amount of the check, the service charge, and the cost to mail the demand. If the person fails to pay this amount in full, this person shall instead be liable for specified amounts, including treble damages. The bill would make conforming changes.

The bill would, among other things, provide that for purposes of the above provisions, the term "payee" includes an assignee or holder of the check.

Ch. 1001 (AB 255) Speier. Student Aid Commission: collection of accounts receivable.

The Accounts Receivable Management Act, until January 1, 1999, imposes various requirements on participants, which includes state agencies, with respect to the participants' accounts receivable collection systems and authorizes participants to take certain actions regarding the collection of these accounts receivable.

This bill would eliminate the January 1, 1999, repeal date of the act thereby extending its provisions indefinitely. The bill would also require the Student Aid Commission to enter into an interagency agreement, as specified, with the Franchise Tax Board to collect all or part of the commission's outstanding accounts receivable in any manner authorized by law for the collection of a delinquent personal income tax liability, and would require the commission to develop criteria and policy that would define when an account receivable is delinquent and thereby subject to collection by the board.

The bill would require, upon concurrence of the Controller, that amounts collected by the board be deposited in accordance with the interagency agreement.

This bill would also specify that the provisions relating to the commission's delinquency referral program would be repealed on January 1, 2002.

Existing law also permits a participant to elect to assign or sell part or all of its accounts receivable to a private debt collector or private persons or entities if certain conditions are met.

This bill would require that any assignment or sale of an account receivable by a state agency be subject to provisions governing contracts for services by state agencies.

The bill would appropriate $798,000 from the State Guaranteed Loan Reserve Fund to the Student Aid Commission for allocation to the Franchise Tax Board for expenditure during the 1996–97 fiscal year for purposes of implementing the above provisions. It would also declare that this act would only be implemented if federal law and regulations permit this appropriation.

The bill would also make various technical, nonsubstantive changes.

Ch. 1002 (AB 582) Hoge. Insurance.

Existing law authorizes insurers to use insurance policy or bond forms and manuals produced by insurer advisory organizations, but provides that insurers shall not agree with each other to adhere to those forms or manuals. Existing law provides that consistent or intermittent use by 2 or more insurers of the forms or manuals is insufficient by itself to support a finding that an agreement to adhere to those forms or manuals exists.

This bill would additionally provide that insurers shall not agree with each other to violate the antitrust or unfair business practice laws, as specified. The bill would also provide that certain acts, agreements, or practices are not unfair or unreasonable, as specified, unless proven by a preponderance of the evidence to be in violation of the antitrust or unfair business practice laws.

Under existing law, all insurance policy or bond forms or manuals, as specified, of an advisory organization are required, prior to being used by insurers, to be submitted in writing to the Insurance Commissioner for his or her consideration and approval, together with any information the commissioner may reasonably require. Under existing law, the commissioner may, for good cause and after a hearing, revoke approval of previously approved policy or bond forms or manuals.

This bill would provide that the commissioner may only revoke approval of policy or bond forms or manuals under specified conditions. The bill would also revise and recast related provisions.

Since Proposition 103 repealed provisions authorizing advisory organizations, and since this bill would amend provisions enacted after Proposition 103 that authorize

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

certain activities by advisory organizations, this bill would have the effect of amending Proposition 103, and would require a $^2/_3$ vote for enactment.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 1003 (AB 583) Sher. Uniform Partnership Act of 1994.

Under existing law, partnerships are governed by the Uniform Partnership Act.

This bill would enact the Uniform Partnership Act of 1994, as specified, that would apply to partnerships formed on or after January 1, 1997.

This bill would provide that partnerships formed before January 1, 1997, are governed by the Uniform Partnership Act until January 1, 1999, except as specified. This bill would make certain conforming changes.

Ch. 1004 (AB 926) Rainey. State boards and commissions: members: salaries.

Existing law establishes the salaries of nonelected members of various state boards and commissions, and requires that this salary be increased in any fiscal year in which a general salary increase is provided for state employees, except that the amount of the increase shall not exceed the percentage of the general salary increases provided for state employees during that fiscal year.

This bill would provide, notwithstanding the above provisions, with respect to any salary increase made after January 1, 1997, for specified nonelected members of state boards and commissions, that the annual compensation provided by these provisions shall not automatically increase but may be increased in any fiscal year in which there is a general increase in the salary rates and ranges for state civil service classifications, except that the amount of the increase, as determined by the Department of Personnel Administration and subject to the appropriation of funds by the Legislature in the annual Budget Act, would not exceed the percentage of the general increase in the salary rates and ranges for classifications provided during that fiscal year for state employees designated as managerial. The bill would also delete obsolete provisions of law.

Ch. 1005 (AB 1650) Morrissey. Workers' compensation.

Existing law makes it unlawful to make any knowingly false or fraudulent material statement for the purpose of obtaining workers' compensation.

This bill would provide that an insurer or self-insured employer may provide a specified notice to an injured worker on or with a check for temporary disability benefits. The notice would state that the acceptance of employment with a different employer that requires the performance of activities that the worker has stated that he or she cannot perform because of an injury could constitute fraud and result in criminal prosecution.

Ch. 1006 (AB 2267) Harvey. Satellite wagering.

Existing law divides the state into 3 geographical zones for the purpose of the Horse Racing Law. Existing law authorizes racing associations and fairs to conduct satellite wagering facilities, but with specified exceptions, generally restricts the facility to conducting wagering on races conducted in the same zone as the facility. Under existing law, satellite wagering facilities operated by a county fair, district agricultural association, or citrus fruit fair in the County of Kern are considered northern zone facilities and receive their audiovisual signal from the association or fair conducting a racing meeting in the northern zone that is authorized to distribute the signal and accept wagers on central and southern zone races.

This bill would require a fair conducting satellite wagering in Kern County to be solely reimbursed specified amounts of funds by the racing associations located in the northern zone, unless otherwise agreed to in writing by each association.

Ch. 1007 (AB 2322) Bates. Children with special health care needs.

Existing law provides for the delivery of specified services to persons with developmental disabilities through regional centers.

Existing law requires the State Department of Social Services to develop a program to establish specialized foster care homes for children with special health care needs and authorizes counties and regional centers to place these children. Existing law defines

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

"child with special health care needs" to include, among others, a child who has a developmental disability and is receiving services and case management from a regional center.

This bill would revise this definition to include a person who is 22 years of age or younger who has a developmental disability and is receiving services and case management from a regional center.

This bill would permit a child with special health care needs to remain in a licensed foster family home or licensed small family home operating as a specialized foster care home, as defined, after the age of 18 years, if certain conditions are met.

Ch. 1008 (AB 2367) Morrow. Vehicles: dealers and managerial employees: examinations and continuing education courses: licenses.

(1) Existing law requires motor vehicle dealers, manufacturers, and transporters to apply for and obtain a license from the Department of Motor Vehicles.

This bill, except as specified, would require every applicant for a dealer's license, commencing January 1, 1998, to take and complete a written examination prepared by the department concerning specified matters before a license may be issued. Since, under other provisions, a violation of this requirement would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

The bill would require applicants to pay a $16 fee to the department.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1009 (AB 2434) Knight. Medi-Cal providers.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. Among those services provided under the Medi-Cal program are orthotic and prosthetic services.

This bill would require that an orthotist or prosthetist who provides Medi-Cal services be certified in orthotics or prosthetics either by the Board for Orthotist Certification or the American Board of Certification in Orthotics and Prosthetics.

This bill would provide for the repeal of this provision on the date that the Director of Health Services executes a declaration, that shall be retained by the director, stating that the department has adopted regulations requiring an orthotist or prosthetist to be certified in orthotics or prosthetics by either the Board for Orthotist Certification or the American Board of Certification in Orthotics and Prosthetics, as a condition of providing orthotist or prosthetic services under the Medi-Cal program.

Ch. 1010 (AB 2436) Boland. Escrow Agents Fidelity Corporation.

Existing law provides that Fidelity Corporation shall bill and collect from each member an annual premium.

This bill would require every member as of March 31, to pay the assessment, without pro rata adjustment, notwithstanding that the member may have surrendered a license or had a license revoked prior to the date that the assessment is mailed.

Existing law provides that Escrow Agents' Fidelity Corporation Certificates shall be held by a member for the benefit of an employee, but not issued personally to the employee, and returned to the corporation by the member upon termination of an employee or upon demand by the corporation.

This bill would delete those requirements.

Existing law requires the certificate form to contain a provision for arbitration for any appeal or dispute as to any decision by the corporation concerning the certificate, as specified.

This bill would delete that requirement. It would also revise and recast certain notification requirements as to the certificate, as specified.

Ch. 1011 (AB 2475) Bates. Youth pilot program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes counties participating in the Youth Pilot Program to transfer funds, to the extent possible, into a county child and family services fund, for 5 years, some or all funds for specified services for children and families, and authorizes counties selected by the department to participate on January 1, 1995, July 1, 1995, or January 1, 1996.

This bill would create the Youth Pilot Program Fund in the State Treasury, and would specify that moneys in the fund are continuously appropriated to the State Department of Social Services to be allocated to counties for implementation of county strategic plans to use blended funding for various child welfare services under the Youth Pilot Program, would make moneys in the fund available for encumbrance until July 1, 2004, would require the reversion of unencumbered moneys in the fund on July 1, 2004, to the General Fund, and would repeal those provisions July 1, 2004.

The bill would authorize the Director of Finance to transfer certain funds from state agencies appropriated in the Budget Act to implement the bill, and, by changing the uses of those appropriated funds, this bill would result in an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1012 (AB 2577) Bordonaro. County health services.

Existing law provides for the continuous appropriation of money from the state Local Revenue Fund for allocation to local entities for the provision of social and health benefits.

Existing law allocates a portion of the money in the Local Revenue Fund to the Hospital Services Account of that fund for local funding of emergency health services provided by county and noncounty hospitals.

Existing law provides that in any county that comprises not more than $1/2$ of the total state population and in which there are a county hospital and a noncounty hospital with emergency rooms located within 2 miles of each other, the county hospital may surrender its emergency room permit without penalties in specified circumstances.

This bill would revise the circumstances in which the county hospital may surrender its emergency room permit without penalties to include a county of the 24th class.

Ch. 1013 (AB 2585) Kuykendall. Guarantors.

Existing law provides that any guarantor, including a guarantor of an obligation secured by real property or any interest therein, may waive the guarantor's rights of subrogation and reimbursement and any other rights and defenses available to the guarantor by reason of specified provisions of existing law.

Existing law provides that specified waivers shall not apply to a guaranty of a loan to an individual primarily for personal, family, or household purposes, secured by a deed of trust or mortgage or a specified dwelling occupied by the borrower.

This bill would revise and recast these provisions to provide that a guarantor or other surety, including a guarantor of a note or other obligation secured by real property or an estate for years, may waive any or all of specified rights and defenses, as specified. It would also provide that specified waivers shall not apply to a guaranty or other type of suretyship obligation made in respect of a loan secured by deed of trust or mortgage on a specified dwelling if the loan was used to pay all or part of the purchase price of the dwelling. The bill also would state legislative intent in this regard.

Ch. 1014 (AB 2649) B. Thompson. Health care coverage: provider incentives: capitation.

(1) Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a misdemeanor.

This bill would prohibit a contract between a health care service plan and a physician and surgeon, physician and surgeon group, or other licensed health care practitioner from containing any incentive plan that includes specific payment made directly, in any type or form, to a physician and surgeon, physician and surgeon group, or other licensed health care practitioner as an inducement to deny, reduce, limit, or delay specific, medically necessary, and appropriate services. The bill would impose similar restrictions on a subcontract between a physician and surgeon, physician and surgeon group, or other

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

licensed health care practitioner who contracts with a health care service plan or health insurance carrier, and another physician and surgeon, physician and surgeon group, or other licensed health care practitioner.

(2) Existing law requires certain health care service plans to disclose how participation in the plan may affect the choice of physician, hospital, or other health care providers.

This bill would also require these plans to disclose the basic method of reimbursement and whether financial bonuses or incentives are used.

(3) Existing law provides for the regulation of life and disability coverage, and specifies the contract contents.

This bill would, with certain exceptions, prohibit any disability insurance contract with a physician and surgeon, a physician and surgeon group, or other licensed health care practitioner from containing any incentive plan that includes specific payment as an inducement to deny, reduce, limit, or delay services.

(4) This bill would incorporate additional changes in Section 1367.10 of the Health and Safety Code proposed by SB 1547, to be operative only if SB 1547 and this bill are both chaptered and become effective January 1, 1997, and this bill is chaptered last.

(5) By changing the definition of a crime applicable to the law regulating health care service plans, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1015 (AB 2985) Woods. Aid to Families with Dependent Children–Foster Care.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which each county makes payments to individuals and facilities, including group homes, which provide foster care to eligible children. AFDC-FC program payments are made through a combination of federal, state, and county funds.

Under existing state and federal regulations, only certain costs are deemed allowable costs for purposes of expenditures by group homes.

This bill would require, for purposes of administering AFDC-FC provisions, including the setting of group home rates, that the State Department of Social Services deem affiliate leases for shelter care for foster children to be allowable costs, as long as specified conditions are met.

The bill would require, commencing July 1, 1998, an approval letter from the Charitable Trust Section of the Department of Justice for approval of shelter costs that result from self-dealing transactions.

Ch. 1016 (AB 3062) Friedman. Community care facilities: foster family homes.

Existing law regulates foster family homes and provides for their licensure by certified foster family agencies, the county, or the State Department of Social Services. Existing law requires a foster family agency to issue a certificate of approval to the certified family home upon determining that it has met the standards established by the department prior to placing any child in the home. Existing law establishes the Foster Children and Parent Training Fund and provides that the moneys be expended exclusively for foster parent training.

This bill would require every licensed foster parent to complete a minimum of 12 hours of training as a condition to the placement of any foster children with the foster parent, and an additional minimum of 8 hours of training annually. The bill would provide that no child shall be placed in a foster family home unless the foster parents in the home meet the training requirements, and would authorize the waiver or deadline extension of postplacement requirements in certain circumstances.

Ch. 1017 (AB 3199) Harvey. Medi-Cal: Tulare County.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the Board of Supervisors of the Counties of Tulare and San Joaquin to establish a special commission to contract for the provision of medical care in the county.

This bill would, until July 1, 1999, require that the State Department of Health Services approve, implement, and evaluate a pilot project in Tulare County, if requested by Tulare County, in which children who are eligible for Medi-Cal benefits and benefits under the California Children's Services program shall be required to enroll as members of the local health initiative and would authorize the County of Tulare to negotiate with the State Department of Health Services, in lieu of establishing a special commission, for the purpose of arranging for the provision of Medi-Cal services as well as for implementation of the pilot project established by the bill. The bill would also require the Tulare County Board of Supervisors to establish and maintain an advisory commission, thus imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1018 (AB 3452) Brown. Housing: regional housing needs: Napa County.

Existing law requires each city, county, and city and county to adopt for its jurisdiction, according to specified deadlines, a general plan that includes certain mandatory elements, including a housing element.

Existing law requires that the housing element include, among other things, an identification and analysis of existing and projected housing needs and a statement of goals, policies, quantified objectives, financial resources, and scheduled programs for the preservation, improvement, and development of housing. Existing law provides that the share of a city or county of the regional housing needs includes that share of the housing need of persons at all income levels within the area significantly affected by a general plan of the city or county, and further provides that the distribution of regional housing needs shall take into consideration specified factors.

This bill would authorize the County of Napa, if certain conditions are met, and during its current housing element planning period, to meet up to 15% of its existing share of the regional housing need for lower income households by committing funds collected by the county for the purpose of constructing affordable housing units, and constructing those units in one or more cities within the county, as specified. The bill would require the council of governments and the Department of Housing and Community Development to approve a transfer agreement executed pursuant to this section, upon the request of one of the parties to the agreement. The bill would deem the transfer agreement approved if the council of governments or the department fails to respond within 30 days of the request, as specified. In addition, the bill would authorize Napa County to meet a percentage of its share of the regional share housing needs allocation in this manner only until June 30, 2004, unless a later enacted statute, that is enacted before June 30, 2004, deletes or extends that date.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

The bill would declare that, because of the unique circumstances applicable to housing in Napa County, a statute of general applicability cannot be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution.

Ch. 1019 (AB 2949) Harvey. Prostitution.

(1) Existing law makes it a misdemeanor to solicit or agree to engage in or to engage in any act of prostitution, which includes any lewd act between persons for money or other consideration. Existing law provides that no agreement to engage in prostitution shall violate this provision unless the person does some act in furtherance of the agreement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would enact the Prostitution Abatement and Neighborhood Protection Act of 1996.

This bill would authorize the judge to suspend the driving privilege of a person convicted of prostitution, for not to exceed 30 days, for any violation committed within 1,000 feet of a private residence and with the use of a vehicle, in addition to other punishment.

By increasing the penalty for an existing crime, the bill would impose a state-mandated local program.

(2) Existing law authorizes, until January 1, 1999, specified cities, counties, and portions of cities to adopt an ordinance establishing a pilot program implementing procedures for declaring any motor vehicle a public nuisance when used in the commission of an act of prostitution, and there is a conviction of the underlying offense, except in specified circumstances. Existing law authorizes the ordinance to include procedures, as prescribed, to enjoin and abate the declared nuisance.

This bill would add the County of Kern and any city in that county to the list of cities and counties authorized to adopt this ordinance.

The bill would also make conforming changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would incorporate additional changes to Section 647 of the Penal Code proposed by AB 2051, to be operative only if this bill and AB 2051 are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 1020 (AB 2051) Alpert. Crimes: disorderly conduct.

(1) Existing law provides that anyone who looks through a hole into a bathroom with the intent to invade the privacy of persons therein is guilty of disorderly conduct, a misdemeanor.

This bill would create new crimes by expanding the scope of this provision to provide that anyone who looks through a hole or opening, into, or otherwise views, by means of any instrumentality, including, but not limited to, a periscope, telescope, binoculars, camera, or camcorder, the interior of a bathroom, changing room, fitting room, dressing room, or tanning booth, or the interior of any other area in which the occupant has a reasonable expectation of privacy, with the intent to invade the privacy of a person or persons therein, is guilty of disorderly conduct, a misdemeanor. The bill would specify that this provision shall not apply to those areas of a private business used to count currency or other negotiable instruments. This bill would impose a state-mandated local program upon local governments by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would incorporate additional changes to Section 647 of the Penal Code, proposed by AB 2949, to be operative only if this bill and AB 2949 are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 1021 (SB 8) Peace. Sales and use taxes: revenue allocation: local public safety services.

Existing law requires that revenues derived from the imposition of a portion of the state sales and use taxes be apportioned to certain counties to be allocated to cities within those counties for the funding of local public safety services, as defined.

This bill would require, for the 1997–98 fiscal year and each fiscal year thereafter, that these sales and use tax revenues be allocated to eligible cities within the County of San Diego that provide public safety services in accordance with an allocation factor from each city within the county, as provided. By imposing new duties with respect to the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

allocation of sales and use tax revenues within the County of San Diego for the 1997–98 fiscal year, this bill would impose a state-mandated local program.

This bill would provide that if this bill and AB 1191 are both chaptered, the provisions of this bill shall supersede the provisions of AB 1191, as specified.

This bill would contain legislative findings and declarations as to the necessity of a special statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1022 (SB 39) M. Thompson. South Spit of Humboldt Bay: acquisition.

Under existing law, the Wildlife Conservation Board is required to authorize the acquisition of land, rights in land, water, and water rights necessary to carry out that law and may authorize that acquisition by the Department of Fish and Game. Existing law provides that the State Coastal Conservancy is the repository of lands pursuant to the California Coastal Act of 1976 and authorizes the conservancy to acquire real property or interests in real property for purposes of that act.

This bill would authorize the board and the conservancy to acquire the South Spit of Humboldt Bay, as described in the bill, after an illegal encampment, debris, and other environmental hazards are removed by the current property owners. The bill would permit the conservancy, in consultation with the Department of Parks and Recreation, the Attorney General, the State Lands Commission, and Humboldt County to prepare a management plan for that area and to submit the plan to the Legislature on or before June 30, 1997.

The bill would appropriate $100,000 from the Public Resources Account in the Cigarette and Tobacco Products Surtax Fund to the conservancy for the acquisition of, and planning for, the South Spit of Humboldt Bay.

Ch. 1023 (SB 1497) Committee on Health and Human Services. Reorganization of the Health and Safety Code: public health.

Existing law requires the State Director of Health Services to conduct a comprehensive review of the statutes governing the protection of the public health as principally embodied in the Health and Safety Code. Existing law requires the director to conduct that review in cooperation with county and city representatives and the California Conference of Local Health Officers and to produce, among other things, a reorganization by chapter and section for all public health laws.

Existing law, Chapter 415 of the Statutes of 1995, which took effect on January 1, 1996, repeals and reorganizes the public health portion of the Health and Safety Code into 7 new divisions. Existing law states the intent of the Legislature that the purpose of the reorganization is to facilitate the administration of those public health provisions and that the reorganization is to have only technical and nonsubstantive effect. Existing law prohibits the provisions of Chapter 415 of the Statutes of 1995 from creating or terminating rights, duties, or obligations. However, under existing law, Chapter 415 of the Statutes of 1995 repeals provisions of public health law and does not reorganize those provisions into the new divisions.

In order to conform to the reorganized divisions, this bill would make cross-reference changes throughout the codes, including the Health and Safety Code, and would renumber provisions in the Health and Safety Code that were enacted in 1995. This bill would also reenact those provisions repealed by Chapter 415 of the Statutes of 1995 that were not reorganized into the new divisions. Because of this reenactment, the bill would technically make an appropriation and impose a state-mandated local program.

This bill would declare the intent of the Legislature that any substantive changes made by Chapter 415 of the Statutes of 1995 were unintended and that, when construing the effect of the reorganized provisions of Chapter 415 of the Statutes of 1995 from January

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

1, 1996, to the date that this measure takes effect, a court apply the provisions in a manner consistent with this bill. The bill would declare the intent of the Legislature to make substantive changes to the law solely to ensure that Chapter 415 of the Statutes of 1995 has only technical and nonsubstantive effect.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, for certain costs, no reimbursement is required by this act for specified reasons.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would provide that any section of any act, other than the code maintenance act, enacted in 1996 that takes effect on or before January 1, 1997, and that amends, amends and renumbers, amends and repeals, amends, repeals, and adds, repeals, or repeals and adds a section that is amended, or amended and renumbered, by this act, shall prevail over the amendment, or amendment and renumbering, of that section by this act. The bill would provide that certain sections proposed to be added by other acts would prevail over sections proposed to be added by this act whether this bill is enacted before or after the other acts.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1024 (SB 1547) Peace. Health insurance: disclosure of substituted care.

Existing law provides for the regulation of health care service plans, pursuant to the Knox-Keene Health Care Service Plan Act of 1975, by the Commissioner of Corporations; and provides for the regulation of disability insurers by the Department of Insurance.

This bill would, with respect to health care service plans and disability insurers, extend various disclosure requirements to coverage for subacute care, transitional inpatient care, or care in a skilled nursing facility, including any limitations or exclusions, and the general circumstances under which subacute care is used.

This bill would incorporate additional changes in Section 1367.10 of the Health and Safety Code proposed by AB 2649, to be operative only if AB 2649 and this bill are both chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

Since a willful violation of this requirement by a health care service plan is a misdemeanor, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1025 (SB 1659) Peace. Personal rights: privacy.

(1) Existing law, the California Constitution, provides that all people have certain inalienable rights, including the right to privacy.

This bill would create the Joint Task Force on Personal Information and Privacy to make recommendations as to what changes to existing laws relating to the use or distribution of personal information about individuals by public and private entities are necessary to ensure that state law adequately protects the right of privacy and addresses the issues raised by the rapidly changing nature of information technology and systems. The bill would require the Legislative Analyst to compile the task force findings and recommendations on or before March 1, 1998. The bill would include a statement of legislative findings concerning the right to privacy. This bill would repeal these provisions as of January 1, 1999.

(2) Existing law requires every organization that operates, conducts, or maintains a health facility, and the officers of the organization, to make and file specified reports with the Office of Statewide Health Planning and Development.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would state the intent of the Legislature that the patient's rights of confidentiality shall not be violated in any manner, and would exempt patient social security numbers and other specified information from the disclosure requirements of the California Public Records Act.

Ch. 1026 (AB 2104) Machado. Mentally disordered persons: commitment to facilities: sex offenders.

(1) Under existing law, if a defendant is found mentally incompetent because of a mental disorder, the criminal trial or judgment shall be suspended until the person becomes mentally competent. The court is required, in the meantime, to order that the defendant be delivered to a state hospital for the care and treatment of the mentally disordered, or to any other available public or private treatment facility approved by the community program director, or be placed on outpatient status.

Existing law also provides that if the defendant is found mentally incompetent and is developmentally disabled, the criminal trial or judgment shall be suspended until the defendant becomes mentally competent. The court is required, in the meantime, to order that the defendant be delivered to a state hospital for the care and treatment of the developmentally disabled, or to any other available residential facility, as specified, or be placed on outpatient status.

This bill would require the prosecutor in a proceeding to determine mental competence, if the action is on a complaint charging a specified felony sex offense, to determine (a) whether the defendant previously has been found mentally incompetent to stand trial on a complaint charging any specified felony sex offense, or (b) whether the defendant is currently the subject of a pending proceeding to determine whether the defendant is mentally competent to stand trial on a charge of any specified felony sex offense. If either determination is made, the bill would require the prosecutor to so notify the court and defendant. After notification and opportunity for hearing, the bill would require the court to order that the defendant be delivered to a state hospital or other secure treatment facility for the care and treatment of the mentally disordered or the developmentally disabled unless the court makes specific findings on the record.

The bill also would require the court, if the action is on a complaint charging a specified felony sex offense, and the defendant has been denied bail based on the court finding a substantial likelihood that the person's release would result in great bodily harm to others, to order that the defendant be delivered to a state hospital for the care and treatment of the mentally disordered or developmentally disabled unless the court makes specific findings on the record.

This bill also would require the clerk of the court to notify the Department of Justice in writing of any finding of mental incompetence with respect to a defendant adjudicated pursuant to the above provisions for inclusion in his or her state summary criminal history information.

(2) Existing law requires the court to provide copies of specified documents to be taken with the defendant to the state hospital or other treatment facility where the defendant is to be confined, including, among other things, his or her state summary criminal history information and any arrest reports.

This bill additionally would require the court to provide records of any finding of mental incompetence arising out of a complaint charging any specified felony sex offense or of any pending proceeding to determine whether the defendant is mentally competent to stand trial on a complaint charging any specified felony sex offense. The bill also would require the court, when the defendant is committed to a facility other than the state hospital or other secure treatment facility, to order that notice be given to the appropriate law enforcement agency or agencies having local jurisdiction at the site of the placement facility of any finding of mental incompetence arising out of a complaint charging any specified felony sex offense. The bill would impose additional notification requirements on any facility that transfers a defendant initially committed to a state hospital or other secure treatment facility pursuant to the provisions in (1) above to any other facility.

(3) Existing law requires the Department of Justice to maintain state summary criminal history information.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the state summary criminal history information to include any finding of mental incompetence to stand trial arising out of a complaint charging any specified felony sex offense.

(4) Under existing law, if a mentally retarded person is found to be a danger to himself or herself, which includes a finding of mental incompetence to stand trial, the court is authorized to order the person committed to the State Department of Developmental Services for suitable treatment and rehabilitation services, including placement in any state hospital, any licensed community care facility, or any health facility.

This bill would require the court to order the State Department of Developmental Services to give notice of any finding of mental incompetence arising out of a complaint charging any specified felony sex offense to the designated placement facility and the appropriate law enforcement agency or agencies having local jurisdiction at the site of the placement facility.

(5) Existing law provides that any officer or employee of a state developmental center, a state hospital under the jurisdiction of the State Department of Mental Health, a facility operated by or under the federal Veterans' Administration, or a mental health facility designated by a county, shall provide to any peace officer notification, in writing, concerning any patient who escapes from the hospital or facility, in order to assist with the apprehension and return of the patient. One of the elements required to be included in this notification is information about the patient's degree of dangerousness.

This bill would require that information about the degree of dangerousness include specific information about the patient if he or she is deemed likely to cause harm to himself or herself or to others.

This bill would also provide that, if the escapee has been charged with any crime involving physical harm to children, the notice shall be provided by the law enforcement agency to school districts in the vicinity of the hospital or other facility in which the escapee is being held, in the area the escapee is known or is likely to frequent, and in the area where the escapee resided immediately prior to his or her confinement.

The bill would provide that no entity or employee would be liable for damages caused, or alleged to be caused, by the release of, or the failure to release, information pursuant to these provisions.

(6) The bill would impose a state-mandated local program by imposing new duties on prosecutors and court personnel.

(7) This bill would incorporate additional changes in Sections 1370 and 1370.1 of the Penal Code, and Section 6509 of the Welfare and Institutions Code, proposed by SB 1391, to be operative only if SB 1391 and this bill are both enacted and become effective on or before January 1, 1997, and this bill is enacted last.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1027 (AB 2071) Miller. Medi-Cal: drug abuse services.

Existing law establishes the method of reimbursing providers for drug abuse services and alcohol program services under the Medi-Cal program.

Existing law permits the State Department of Alcohol and Drug Programs to enter into a Medi-Cal Drug Treatment Program contract with each county to fund alcohol and drug abuse program services in accordance with prescribed procedures.

This bill would define the services reimbursable under this program, and establish contracting, billing, and reimbursement procedures governing this program.

The bill would permit the department to adopt regulations, including emergency regulations, for implementation of the bill.

Ch. 1028 (AB 3088) Machado. Dependent children.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that if a dependent child of the juvenile court is not returned to the custody of a parent or guardian at the review hearing held 6 months after the initial dispositional hearing, the court must determine whether reasonable services have been provided or offered to the parent or guardian which were designed to aid the parent or guardian in overcoming the problems which led to the initial removal and continued custody of the minor. In addition, if the dependent child is not returned to the custody of a parent or guardian at subsequent review hearings, held 12 and 18 months after the initial dispositional hearing, the court is required to take specified action, which may include ordering that a hearing be held within 120 days in which parental rights may be terminated if there is clear and convincing evidence that reasonable family reunification services have been provided or offered to the parents.

This bill would provide that evidence that the minor has been placed with a foster family that is eligible to adopt a minor, or has been placed in a preadoptive home, in and of itself, shall not be deemed a failure to provide or offer reasonable services for purposes of those provisions.

Ch. 1029 (AB 3109) Margett. Clinical laboratories.

Existing law provides for the licensure and regulation of clinical laboratories and various clinical laboratory health care professionals by the State Department of Health Services. These provisions prohibit a person from performing a clinical laboratory test or examination classified as of moderate complexity under the federal Clinical Laboratory Improvement Amendments of 1988 (CLIA; 42 U.S.C. 263a; P.L. 100-578) unless the test or examination is performed under the overall operation and administration of the laboratory director and the test is performed by specified persons, including certain health care personnel who provide direct patient care when the person meets the minimum clinical laboratory education, training, and experience requirements set forth in regulations adopted by the department.

This bill would additionally require that the person performing the test or examination under this provision perform the test as an adjunct to providing direct patient care, utilize a point-of-care laboratory testing device, as defined, at a site for which the laboratory license or registration has been issued, and have demonstrated to the satisfaction of the laboratory director that he or she is competent in the operation of the point-of-care laboratory testing device for each analyte, as defined, to be reported. The bill would require that these persons participate in a preceptor program, as defined, prior to being authorized by the laboratory director to perform laboratory tests or examinations. The bill would add to the persons able to perform these laboratory tests or examinations under this provision a person certified as an "Emergency Medical Technician II" or paramedic while providing prehospital emergency medical care.

The bill also, among other things, would authorize testing personnel to perform and report the results of certain tests where the person has been found competent to test for a particular analyte. This bill would incorporate changes to Section 1206.5 of the Business and Professions Code made by SB 1537 (Ch. 113, Stats. 1996).

Ch. 1030 (AB 3111) Margett. Physician assistants.

Existing law, the Physician Assistant Practice Act, provides for the licensure of physician assistants by the Physician Assistant Examining Committee which is established within the Medical Board of California, and requires the committee to establish standards for training and education programs for physician assistants, and to make certain recommendations to the board. Existing law, the Medical Practice Act, provides for the licensure and regulation of physicians and surgeons and prohibits the practice of medicine, as described, without a valid physician and surgeon's certificate, or other authorization.

This bill would authorize a physician and surgeon to delegate various orthopaedic medical tasks to individuals who have completed certain prescribed training as orthopaedic physician assistants and who are working under the supervision and direction of a physician and surgeon, and would provide that those individuals would not be required to be licensed as physician assistants if they perform only those tasks that may under existing law be delegated for them to perform.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1031 (AB 3244) Hawkins. Real property: rent control.

Existing law, known as the Costa-Hawkins Rental Housing Act, provides that, where a residential rent control ordinance applies, an owner of residential real property may establish the initial rental rate for a dwelling unit, except where specified conditions exist. It also permits the owner to increase the rent by any amount allowed by a specified provision of law where the rental agreement prohibits subletting or assignment without the owner's consent and the original occupants no longer permanently reside at the dwelling or unit. This authorization to increase the rent does not apply where partial changes in occupancy of a dwelling or unit are made with the consent of the owner, as specified.

This bill would delete the provisions permitting the owner to increase the rent under the above circumstances, and would instead permit the owner to increase the rent by any amount allowed by a specified provision of law to a lawful sublessee or assigneee who did not reside at the dwelling or unit prior to January 1, 1996, if the original occupants no longer reside at the dwelling or unit. This authorization would not apply to partial changes in occupancy made with the consent of the owner, as specified, or to a lawful sublessee or assignee who resided at the dwelling or unit prior to January 1, 1996.

This bill would impose new duties on local agencies that administer existing ordinances that set maximum rents for the hiring of residential real property by requiring local agencies to apply different standards in administrative proceedings, and would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 1032 (AB 3280) Cunneen. Health and Welfare Agency Data Center.

Existing law authorizes the Director of General Services to hire, lease, lease-purchase, or lease with the option to purchase real or personal property for the use of any state agency, but prohibits the director from entering into a lease-purchase agreement, or a lease with an option to purchase involving office space without specific legislative authorization.

This bill would authorize the Director of General Services, as agent for the Health and Welfare Agency Data Center, to acquire specified facilities currently leased and occupied by the Health and Welfare Agency Data Center in the City of Sacramento, together with any other equipment, improvements, betterments, and facilities related to those facilities and to enter into an option, purchase, lease-purchase, or lease with an option to purchase agreement upon the terms and conditions that are necessary and determined to be in the best interest of the state in connection with the acquisition. This bill would authorize the director to enter into agreements for the financing of this acquisition by a joint powers authority or agency, a local or other governmental entity, private nonprofit business entity, or other business entity through various forms of indebtedness lawfully issued within the power of the agency or entity.

This bill would require the facilities to be acquired by the Director of General Services under these provisions to be and remain under the jurisdiction and control of, and be maintained and occupied by, the Health and Welfare Agency Data Center during the term of any lease executed, as specified, and be transferred to the Director of the Health and Welfare Agency Data Center upon payment in full of any bonds used to finance the acquisition.

This bill would authorize the State Public Works Board to issue revenue bonds, negotiable notes, and negotiable bond anticipation notes pursuant to the State Building Construction Act of 1955 to finance the acquisition of facilities and any other equipment, improvements, betterments, and facilities related to the acquisition pursuant to these provisions, subject to specified conditions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1033 (SB 1498) Kopp. Vehicles: disabled person: parking privileges.

Under existing law, the Department of Motor Vehicles may require a person applying for a disability placard for parking purposes to submit a certificate from specified medical professionals substantiating the person's disability.

This bill would require, rather than authorize, the department to require the applicant to submit such a certificate, prior to the issuance of an original distinguishing placard, and would require the certifying medical professionals to provide a full description of the illness or disability, except as specified. The bill would require the department to maintain this information in its records and make it available to eligible law enforcement or public parking control agencies, upon request. The bill would prohibit the department from providing that information to any private or other 3rd-party parking citation processing agency.

The bill would authorize local authorities to establish a review board or panel that includes a qualified physician or medical authority, to review information contained in applications for special parking privileges.

Ch. 1034 (SB 1906) Johnston. Insurance: surplus lines.

(1) Existing law provides that no surplus line broker may place coverage with a nonadmitted insurer unless the insurer is domiciled in Mexico, for specified purposes, or unless at the time of placement the insurer has established its financial stability, reputation, and integrity, as defined, and complies with certain capital, surplus, and other financial requirements, as specified. Existing law exempts a group of incorporated insurers, or a group of incorporated and unincorporated insurers, from the capital and surplus requirements if the group maintains a trust fund of not less than $100,000,000 as security for the United States surplus lines policyholders and claimants of the group, as specified.

This bill would recast these provisions to provide that the exemption applies to a syndicate that is part of a group consisting of those insurers, as specified.

(2) Existing law requires the nonadmitted insurer to provide specified documents to the Insurance Commissioner in order for coverage to be placed with that insurer.

This bill would additionally require these nonadmitted insurers to submit a certified copy of the most recent report of examination or an explanation if the report is not available. It would authorize the commissioner, in the case of a syndicate seeking an exemption provided by paragraph (1), to rely on or accept analyses, findings, or conclusions of any other state, as specified.

(3) Existing law requires the nonadmitted insurer to establish that it has actively transacted insurance for 3 years immediately preceding a specified filing.

This bill would exclude from the definition of "insurer" for these purposes a syndicate of underwriting entities.

(4) Existing law provides that a violation of specified provisions, including the above provisions, is a crime. This bill would impose a state-mandated local program by expanding the scope of an existing crime.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1035 (AB 2588) Morrow. Clinical laboratory services.

Under existing law, the practices of chiropractic, clinical laboratory technology, dentistry, medicine, research psychoanalysis, speech pathology and audiology, optometry, occupational therapy, dietetics, physical therapy, nursing, vocational nursing, psychology, hearing aid dispensing, physician assisting, osteopathy, respiratory therapy, nursing home administration, pharmacy, psychiatric technology, veterinary medicine, acupuncture, marriage, family and child counseling, and social work are subject to licensure and regulation by the state.

Existing law prohibits any person licensed for one of those practices to charge, bill, or otherwise solicit payment from any patient, client, or customer, for any clinical laboratory service if the service was not actually rendered by that person or under his

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

or her direct supervision, unless the patient, client, or customer is apprised at the first, and any subsequent, solicitation for payment of the name, address, and charges of the clinical laboratory performing the service.

The bill would provide that the requirement for disclosure would be satisfied if the required disclosure is made to a 3rd-party payer of the patient, client, or customer, unless the patient is responsible for submitting the bill to the 3rd-party payer.

Existing law provides that violation of those provisions is a public offense punishable upon a first conviction by imprisonment in the county jail of not more than one year, or by imprisonment in the state prison, or by a fine not exceeding $10,000, or by both imprisonment and fine. Existing law provides that a 2nd or subsequent conviction is punishable by imprisonment in the state prison.

This bill would instead provide that a violation of these provisions by a physician and surgeon for a first offense would be subject to the exclusive remedy of reprimand by the Medical Board of California if the charge for a clinical laboratory service is less than the charge would have been if a clinical laboratory billed the patient, client, or customer directly for the service, and if the clinical laboratory charge is less than the charge listed in the clinical laboratory's schedule of fees.

Ch. 1036 (SB 1641) Marks. Pilotage.

(1) Existing law makes it a misdemeanor for a person to pilot a vessel into, or out of, any harbor or port of the Bays of San Francisco, San Pablo, and Suisun, or to act as a pilot for ship movements or special operations in any of those bays if the person does not hold a license as a pilot or an inland pilot, as specified, or the person is not the master or owner of the vessel. Existing law excepts from that prohibition, among others, a person piloting vessels when a state-licensed pilot is prevented from joining or refuses to join the vessel under certain circumstances.

This bill would delete from that provision the exception for the master or owner of the vessel and, instead, would except from that provision the master of a vessel who has relieved the pilot to ensure the safe operation of the vessel. The bill would also revise and recast the exception for persons piloting vessels when a state-licensed pilot is prevented from joining or refuses to join the vessel under certain circumstances and would provide that no pilotage fees are required to be paid if a state-licensed pilot refuses to join the vessel under the circumstances as recast. Because the bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) Existing law exempts every vessel sailing under a coastwise license or appropriately endorsed registry and engaged in the coasting trade between any port of the Bays of San Francisco, San Pablo, and Suisun and any other port of the United States from all pilotage charges unless a pilot, as defined, is actually employed. Existing law also makes every foreign vessel and every vessel bound to or from a foreign port, and every vessel sailing under a register between any port of the Bays of San Francisco, San Pablo, and Suisun and any other port of the United States liable for pilotage.

This bill would include inland pilots, as defined in existing law, in those provisions. The bill would also require that every foreign vessel and every vessel bound between a foreign port and any port of the Bays of San Francisco, San Pablo, and Suisun, and every vessel sailing under a register between any port of the Bays of San Francisco, San Pablo, and Suisun and any other port of the United States, use a pilot or inland pilot, except as otherwise provided by law. The bill would also make those provisions inapplicable to a vessel that is less than 300 gross tons and manufactured and used for private recreation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1037 (SB 1662) Kelley. Public utilities: carriers.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities including highway carriers, household goods carriers, and charter-party carriers. The Federal Aviation Administration Authorization Act of 1994 (P.L. 103-305) preempts state regulation of prices, routes, and services of motor carriers.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, until January 1, 1997, provides that if any provision of the Public Utilities Act or the Highway Carriers' Act, as applied to specified carriers, is invalid, the application of the other valid provisions of those acts shall not be affected.

This bill would extend these provisions until January 1, 1998.

The bill would not become operative if AB 1683 is enacted.

Ch. 1038 (AB 626) Sher. Integrated waste management: advisory committee: reports: solid waste disposal: financial assurances.

(1) Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, establishes an integrated waste management program, including the regulation of solid waste disposal.

This bill would, at the request of a county with a population of less than 250,000, authorize the board and the State Water Resources Control Board to meet with the county to prioritize, through development and joint adoption of a 5-year plan, state environmental concerns with regard to solid waste management in relation to the fiscal and staffing constraints on the county.

(2) The act provides for the Local Government Technical Advisory Committee in the board, with a specified composition.

This bill would permit a representative of the Regional Council of Rural Counties Environmental Services Joint Powers Authority to serve on the advisory committee, and would make related changes.

(3) The act requires that the evidence of financial ability for a solid waste landfill be sufficient to meet the closure and postclosure maintenance costs when needed.

This bill would authorize the landfill owner or operator to request disbursement, for expenditures to conduct closure, postclosure maintenance, or corrective actions, from the financial assurance mechanism established for that activity and would prescribe related matters.

(4) Under the act, until an integrated waste management plan has been approved by the board, no person may establish a new solid waste facility or transformation facility or expand an existing solid waste facility or transformation facility that will result in a significant increase in the amount of solid waste handled at the facility without a specified certification by the local enforcement agency that one of specified circumstances has occurred.

This bill would include as a permitted circumstance for certification that the facility is identified and described in the countywide siting element which has been approved as prescribed.

(5) The act declares, among other things, that the responsibility for solid waste management is a shared responsibility between state and local governments.

This bill would state the intent of the Legislature that local governments and state agencies that own or operate real property in this state should work cooperatively to meet the requirements of the act.

(6) The act requires the board to file an annual report, on or before March 31 of each year, of specified content regarding the administration of the act with the Legislature.

This bill would revise and recast those reporting provisions and require that report to be submitted on or before March 1 of each year, and would delete obsolete provisions in those provisions.

(7) The act requires each city, county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan that includes a prescribed implementation schedule showing how the city, county, or regional agency will divert materials from solid waste disposal through source reduction, recycling, and composting activities. The act requires each city, county, and regional agency to submit a report to the board summarizing its progress in achieving those diversion requirements, and requires the report to be submitted with the source reduction and recycling element, on or before October 1, 1994, except as specified.

This bill would instead require that report to be submitted on or before March 1 of each year, and would delete obsolete provisions in that regard.

By additionally requiring the report to be submitted on an annual basis, the bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(8) The act creates the Solid Waste Disposal Site Cleanup Trust Fund, and continuously appropriates money in the trust fund for specified purposes.

This bill would make legislative findings and declarations regarding the need for adequate funds in the trust fund.

(9) Under existing law, no person may operate a solid waste facility without a solid waste facilities permit if the facility is required to have a permit. If the enforcement agency determines that a person is so operating a solid waste facility, the enforcement agency is required to immediately issue a cease and desist order ordering the facility to immediately cease operations, and directing the owner or operator of the facility to obtain a solid waste facilities permit in order to resume operation of the facility.

This bill would, until January 1, 1999, authorize the enforcement agency to stay the issuance of a cease and desist order issued pursuant to those provisions if the solid waste facility meets specified conditions. The bill would specify related matters.

(10) Existing law, until January 1, 2000, the State Assistance for Recycling (STAR) Markets Act of 1989, requires a state agency or contractor supplying materials, goods, or services to the state or the Legislature, if a recycled product, as defined, costs more than the same product made with virgin material, to purchase fewer of those more costly products, if feasible, or to apply cost savings, if any, gained from buying other recycled products toward the purchase of those products.

This bill would extend those provisions indefinitely.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(12) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1039 (AB 1812) Knox. New Business Incubator Enterprise Programs.

Existing law provides for the New Business Incubator Enterprise Program to be administered by the Small Business Development Board and the Office of Small Business within the Trade and Commerce Agency, pursuant to specified criteria.

This bill would delete these provisions and instead require the Office of Small Business to administer grants to California nonprofit corporations or public agencies, pursuant to specified criteria.

Ch. 1040 (AB 2660) Aguiar. Infrastructure financing.

Under the State Contract Act, the erection, construction, alteration, repair, or improvement of any state structure, building, road, or other state improvement of any kind that will exceed $100,000, as specified, is accomplished by awarding a contract to the lowest responsible bidder. Similar provisions exist for local agency contract projects.

This bill would authorize local governmental agencies to enter into an agreement with a private entity for the study, planning, design, developing, financing, construction, maintenance, rebuilding, improvement, repair, or operation, or any combination thereof, by, and lease to or ownership by, that entity of a revenue-generating infrastructure project, as specified. An agreement entered into under these provisions would include adequate financial resources for the project and extend for a term of up to 35 years after which the project would revert to the local governmental agency.

Ch. 1041 (AB 3358) Ackerman. Solid waste management.

(1) Existing law, the California Finance Lenders Law, regulates consumer and commercial loans.

This bill would exempt the California Integrated Waste Management Board from the application of that law.

(2) Existing law requires that all meetings of a state body be open and public, except as specified.

This bill would specify that those provisions requiring open and public meetings do not prevent the board or its auxiliary committees from holding closed sessions for the purpose of discussing confidential tax returns, discussing trade secrets or confidential or proprietary information in its possession, or discussing other data the public disclosure

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of which is prohibited by law. The bill would make technical and clarifying changes in related provisions.

(3) Existing law, the California Integrated Waste Management Act of 1989, establishes an integrated waste management program administered by the board.

The act defines "solid waste disposal" or "disposal" to mean the final deposition of solid wastes onto land, into the atmosphere, or into the waters of the state.

This bill would limit that definition for specified purposes of the act to the final deposition of solid wastes onto land.

The bill would make various technical and clarifying changes in the act.

(4) This bill would incorporate changes in Section 11126 of the Government Code proposed by SB 1803, to be operative only if SB 1803 and this bill are both chaptered and this bill becomes effective on or before January 1, 1997, and this bill is chaptered last.

Ch. 1042 (AB 1683) Conroy. Public utilities: carriers.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities including highway carriers, household goods carriers, and charter-party carriers. The Federal Aviation Administration Authorization Act of 1994 (P.L. 103-305) preempts state regulation of prices, routes, and services of motor carriers.

This bill would revise various provisions of state law to reflect the federal preemption.

The bill would also require that all moneys paid into the Transportation Rate Fund by highway common carriers, cement carriers, integrated intermodal small package carriers and highway permit carriers, except for moneys paid by household goods carriers, be used by the Public Utilities Commission solely for the purposes permitted by state and federal law, among which are the regulation of the safety and financial responsibility of carriers. This provision would remain operative only so long as the federal law relating to the preemption provisions relating to carriers is operative or until January 1, 1997.

This bill would transfer authority for the regulation of safety with respect to motor carriers of property, as defined by the bill, excepting household goods carriers, from the Public Utilities Commission to the Department of Motor Vehicles and the Department of the California Highway Patrol, as of January 1, 1997. The bill would make related and conforming changes.

This bill would, as of January 1, 1997, impose a permit fee on motor carriers of property to be deposited in the Motor Carriers Fund in the State Treasury which is created by the bill.

The bill would provide that the permit fee would be comprised of a safety fee and a cargo theft interdiction fee, that would be available for appropriation for the purposes of the bill, and a business license tax fee, that would replace the present business license tax on highway carriers, the revenues of which would not exceed the revenues derived from the present business license tax, and would be required to be transferred to the General Fund.

The bill would, on January 1, 1997, transfer $7,300,000 from the Transportation Rate Fund to the Motor Carriers Permit Fund, that would be appropriated to the Department of Motor Vehicles and the Department of the Highway Patrol for purposes of the bill.

The bill would amend Items 8660-001-0412 and 8660-001-0462 of the Budget Act of 1996 by revising specified amounts payable for the support of the Public Utilities Commission from the Transportation Rate Fund.

Existing law states legislative findings and the purposes for the Passenger Charter-Party Carriers' Act.

This bill would add to those purposes the promotion of carrier and public safety through transportation agencies' safety enforcement regulations.

This bill would impose a state-mandated local program by making it a crime to violate specified provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1043 (AB 2352) Speier. Vehicles: driver's licenses: expiration: fees.

(1) Under existing law, certificates to operate various specified motor vehicles are valid for a maximum of 4 years and expire on the same date as the applicant's driver's license.

This bill would increase the period of validity of these certificates to a maximum of 5 years.

(2) Under existing law, every original driver's license and every renewed driver's license expires on the 4th birthday of the applicant following the date of the application for the license or renewal, except as specified.

This bill would provide for the expiration of a driver's license on the 5th birthday, rather than the 4th birthday, of the applicant following the date of the application for the license or renewal.

(3) Existing law prohibits the Department of Motor Vehicles from renewing a driver's license by mail, under a program allowing for renewal by mail, if the license has been previously renewed by mail 2 consecutive times for 4-year periods.

This bill would prohibit that renewal if the license has been previously renewed by mail 2 consecutive times for 5-year periods, rather than 4-year periods, and would make a related, conforming change.

(4) Existing law prescribes various fees, depending upon the type or class of driver's license, that are required to be paid to the department upon the issuance of an original, renewal, or duplicate licenses.

This bill would increase those fees and would specify that the licenses expire on the 4th or 5th birthday of the applicant, depending upon the license, following the date of the application. The bill would also make technical changes in these provisions.

Ch. 1044 (AB 3183) Isenberg. Gaming clubs: report of cash transactions.

(1) Existing law requires a financial institution to make and keep a record of each transaction by, through, or to, the financial institution that involves currency of more than $10,000, and to file a report of the transaction with the Department of Justice in a form and at the time that the department, by regulation, requires. A violation of this provision is a crime, punishable by imprisonment in a county jail for not more than one year or in the state prison, by a specified fine, or both.

This bill would include any person or business engaged in legal gambling or gaming, as specified, within the definition of "financial institution" for purposes of those provisions. Thus, by expanding the scope of an existing crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1045 (AB 1088) Morrow. Schools: driver training instruction.

(1) Under existing law, school districts, county superintendents of schools, the California Youth Authority, and the State Department of Education, in applying for state reimbursement for driver training expenses, are required to certify, among other things, that all teachers used in the driver education or driver training programs are qualified instructors. Qualified instructors are persons who have passed an approved driver's instruction examination and hold a designated subjects credential or hold a valid prior credential authorizing instruction in automobile driver education and driver training.

In addition, under existing law, the Commission on Teacher Credentialing is authorized to waive provisions relating to teacher credentialing or provisions governing the preparation or licensing of educators.

This bill would specify that any waiver granted by the Commission on Teacher Credentialing of the credentialing requirements for qualified instructors for driver education or driver training programs shall not extend beyond one year unless the individual to whom the waiver was granted demonstrates substantial progress toward meeting the credentialing requirements. The bill would further provide that this provision shall only be implemented upon certification by the commission that it has

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

developed alternative routes to coursework requirements and that reasonable opportunities exist for prospective credentialholders to receive this coursework. The bill would also make a technical change.

(2) Existing law sets forth the requirements for a course of instruction in automobile driver education. In addition, existing law sets forth various plans that meet the requirements for a course of instruction in the laboratory phase of driver education, including a competency-based driver training program based on assessed individual needs. Existing law authorizes the Department of Motor Vehicles to issue a driver's license to any person between the ages of 16 and 18 years if that person has passed the requisite examination and has complied with one of the 2 alternative driver education and driver training requirements.

This bill would, operative July 1, 1996, change the competency-based driver training program to require that each student receives a minimum of 3 hours of on-street behind-the-wheel practice driving instruction, a minimum of one hour of behind-the-wheel pretesting, and a minimum of one hour of behind-the-wheel posttesting, as specified. The bill would also require at least one additional hour of either behind-the-wheel practice driving instruction or observation time under the competency-based driver training program. The bill would require the Superintendent of Public Instruction to adopt rules, regulations, and basic skill requirements for public school programs pursuant to the competency-based driver training program. Local district superintendents offering this program would be required to annually report to the Superintendent of Public Instruction, on a form developed by the State Department of Education, on student completion of instruction pursuant to this program.

The bill would revise the fourth plan to require that the plan include 3 hours of on-street behind-the-wheel practice driving instruction and 3 hours in a dual-control automobile with a qualified instructor. The bill would specify that nothing in the provisions setting forth the plans that meet the requirements for a course of instruction in the laboratory phase of driver education shall be construed to direct or restrict those courses of instruction or courses of instruction in the classroom phase offered by private elementary and secondary schools, to require the use of credentialed or certified instructors for those courses offered by private elementary or secondary schools, except that students shall complete a minimum of 6 hours of on-street behind-the-wheel driving instruction. This bill would provide that the provisions also shall not be construed to limit eligibility for a provisional driver's license for pupils who have completed those courses in private elementary or secondary schools.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1046 (AB 1684) Alby. Financial development: corporations.

Under existing law, there are small business development corporations, a Small Business Development Corporation Loan Guarantee Fund, a Small Business Development Loan Guarantee Account, an Office of Small Business, and a Small Business Development Board, as specified.

This bill would change the names of these entities and funds, as specified. The bill would reduce the membership of the renamed California Small Business Board to 11 members, as specified. The bill would also transfer responsibility for certain duties from the board to the Executive Director of the California Office of Small Business and eliminate other duties of the board. The board would also be authorized to consider appeals of certain decisions of the director, as specified.

Under existing law, there is in the State Treasury the Small Business Expansion Fund. The moneys in this fund may be paid out, with the approval of the Department of Finance, to lending institutions or financial companies to be used to pay for defaulted loan guarantees issued, as specified, and for administrative costs of corporations.

This bill would provide that these funds may also be used for those costs necessary to protect a real property interest in a defaulted loan or guarantee. Since the expansion fund is continuously appropriated, this would result in an appropriation.

Existing law provides for the composition of the board of directors of these development corporations, as specified.

This bill would provide that not more than one employee of the corporation may serve on the board of directors at any one time.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also provide that a person who has a financial interest related to a matter over which the board has authority may not make, participate in making, or in any way attempt to influence that matter.

Existing law requires that a corporation establish one or more loan committees, as specified. The loan committee is required to review applications to the corporation for a loan or guarantee and determine the feasibility of the proposed transaction, as specified. On the basis of this determination, the loan committee is required to recommend to the board of directors any action that the loan committee deems appropriate under the circumstances.

This bill would provide that in the event that approval authority has been delegated to the loan committee by the board of directors, the loan committee may approve or disapprove the loan application.

This bill would also provide that a person who has a financial interest related to a matter over which the loan committee has authority may not make, participate in making, or in any way attempt to influence that matter.

This bill would further provide that state funds may not be used to finance an expense incurred by a corporation in a location not approved pursuant to a statewide plan and that the prohibition against the use of state funds also applies to the location of satellite offices, and the area served from a corporation office.

Existing law provides that it is unlawful for certain persons to have financial relationships with a small business development corporation, as specified.

This bill would delete the applicability of these prohibitions to members of the California Small Business Board.

This bill would incorporate additional changes to certain of its provisions proposed by other bills if those bills and this bill are enacted and become effective as specified, and this bill is enacted last.

Ch. 1047 (AB 2255) Cunneen. Education.

Existing law provides for specified apportionments for average daily attendance generated by elementary and secondary school pupils in a voluntary Saturday school program, if the program meets specified conditions. Existing law becomes inoperative on June 30, 1996, and is repealed as of January 1, 1997.

This bill would extend the date of inoperation to June 30, 2000, and the repeal to January 1, 2001, and expresses the Legislature's intent that apportionments for the program will be for the entire 1996–97 fiscal year.

Existing law establishes a program under which school districts operate adult schools and evening high schools that consist of classes for adults and that receive state funding for the operation of those schools. Under existing law, the provisions establishing the adult education program are scheduled to sunset on June 30, 1997.

This bill would repeal the provision that would sunset the adult education program on June 30, 1997. The bill would also require the State Department of Education every 5 years, commencing in 2002, to review the effectiveness of the program. To the extent the adult education program imposes certain obligations on school districts, this bill, by extending the date on which the program would become inoperative, would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1048 (AB 2349) Harvey. Food facilities.

Existing law, the California Uniform Retail Food Facilities Law, establishes uniform health and sanitation standards for retail food facilities, as defined. The law requires the State Department of Health Services to adopt regulations to implement and administer

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

those provisions, and delegate primary enforcement duties to local health agencies. Violations of related provisions is a crime.

Existing law defines "potentially hazardous foods" for this purpose and excludes, among others, certain foods that are in containers processed to prevent spoilage.

This bill would, instead, define "potentially hazardous food" to exclude, among others, certain foods that are in containers processed to be commercially sterile as defined in federal law. The bill would require certain potentially hazardous foods packed by the food facility to be plainly date-coded.

Existing law establishes certain plumbing standards for food establishments, as defined, including, but not limited to, storage of clean and soiled linens and the requirement for indirect plumbing in prescribed settings.

This bill would, in addition, establish standards regarding the use of cleaning cloths.

This bill would exclude washing sinks from the indirect plumbing requirement when the local building official determines that the sink should be directly plumbed.

Existing law requires food establishments, as defined, to meet prescribed sanitation requirements, including, but not limited to, the cleansing of utensils and equipment. Existing law requires food establishments in which multiservice consumer utensils are used to clean the utensils in one of 3 alternative ways, including machine washing that meets certain requirements.

This bill would revise the machine washing requirements.

Existing law prescribes storage requirements for potentially hazardous food, including that pasteurized milk not be held at an ambient temperature above 45 degrees Fahrenheit and that an accurate thermometer be visibly provided for each refrigeration or freezer unit to indicate the air temperature in the warmest part of the unit.

This bill would delete the reference to ambient temperature and the reference to freezer unit.

Existing law defines food facility to include, but not be limited to, any food establishment or any mobile food preparation unit, stationary mobile food preparation unit, or vehicle, as defined, and establishes standards for these facilities.

This bill would delete provisions relating to vehicles, and would, instead, establish standards for a mobile food facility, as defined, and would make conforming and other changes of a technical, nonsubstantive nature.

This bill would establish sanitation requirements for mobile food facilities formerly operating as approved vehicles immediately preceding January 1, 1997.

Existing law establishes certain employee sanitation requirements for food facilities.

This bill would repeal, recast, and reenact those provisions with additional specific handwashing and food-handling standards.

This bill would permit satellite food distribution facilities, as defined, to hold, portion, dispense, and prepare certain foods under specified conditions and controls, and would specify certain duties of the enforcement agency. By expanding the duties of enforcement agencies, this bill would impose a state-mandated local program. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 1049 (AB 2447) K. Murray. Repeat offender prevention project.

Existing law establishes a 3-year demonstration project, known as the "Repeat Offender Prevention Project," which is designed to provide a comprehensive intervention program, administered by the Department of the Youth Authority, to reduce recidivism among juvenile offenders. Existing law requires that the project operate in the 3 counties or regions selected for participation, and establishes criteria for the selection of minors to participate in, and standards for the implementation, operation, and evaluation of, the program. The Department of the Youth Authority is required to adopt written standards for project implementation, operation, and evaluation to include a written commitment by a county or region to specified objectives,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

including the creation of a multiagency, multidisciplinary team to provide the program with expertise in various areas. In addition, each county or region is required to provide intervention strategies to ensure adequate levels of supervision, structure, and support to minors and their families in order to accomplish specified goals, including protection of the community, the minor, and his or her family.

This bill would revise and recast those provisions. Among other things, the bill would permit the expansion of the program to include more than 3 counties. The bill would expand the selection criteria for the participation of minors to include minors who match a specified profile. The bill would require that each county or region provide intervention strategies to ensure adequate levels of supervision, structure, and support to minors and their families in order to facilitate the development of enhanced parenting skills and parent-child relationships. The bill would also require each county or region participating in the program to promote partnerships between public and private agencies to develop individualized intervention strategies.

The bill would appropriate funds for purposes of the bill from a specified provision of the 1996–97 Budget Act appropriating funds to the Department of Corrections for defined Repeat Offender Prevention Projects and direct the Board of Corrections to employ the goals and criteria of the Repeat Offender Prevention Project in implementing that funding.

Ch. 1050 (AB 2596) Woods. School finance.

Existing law requires a county superintendent of schools who operates juvenile court schools, county group home and institutions schools, or community schools to maintain a juvenile court and community school account in the general fund, limits expenditures from that account to defined direct costs of instructional programs, defined documented support costs, defined allocated direct support costs, and other support and indirect charges, and further limits those other support and indirect charges to 10% of the sum of the defined direct costs of instructional programs, defined documented support costs, and defined allocated direct support costs.

This bill would require certain facility costs to be allowed as instructional costs.

Ch. 1051 (AB 2678) Figueroa. False claims actions: privileged publication or broadcast.

Existing law authorizes the Attorney General to bring a civil action for false claims made against a state or political subdivision if any portion of the money, property, or services issued from or was provided by the state, subject to specified requirements.

Existing law specifies, with certain exceptions, that a publication or broadcast made in a legislative or judicial proceeding, any other official proceeding authorized by law, or in the initiation or course of any other proceeding authorized by law and reviewable under the provisions of law relating to writs of mandate, is privileged for purposes of certain types of proceedings.

This bill would provide that the provision of law relating to a privileged publication or broadcast is not applicable to a claim subject to this civil action.

Ch. 1052 (AB 2720) Sweeney. Expulsion.

(1) Existing law requires a recommendation of expulsion for public school pupils who commit specified acts, unless expulsion is inappropriate due to the particular circumstances involved.

This bill would add assault or battery upon any school employee to the above referenced specific acts.

(2) Existing law authorizes, upon the recommendation by a principal or other specified persons, the governing board of a school district to order the expulsion of a pupil whom it finds committed certain listed acts, including among others, committing an obscene act, using tobacco, disrupting school activities, participating in an act of hate violence, and committing sexual harassment.

This bill would clarify that acts of intentional harassment, threat, or intimidation, directed against a pupil or group of pupils, that is sufficiently severe or pervasive to have the actual and reasonably expected effect of materially disrupting classwork, creating substantial disorder, and invading the rights of that pupil or group of pupils by creating

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

an intimidating or hostile educational environment, which are presently grounds for suspension or expulsion, are included in the listed acts that permit a governing board to expel a pupil upon the recommendation of a principal or other specified persons.

(3) This bill would incorporate additional changes in Section 48915 of the Education Code, proposed by AB 692 and AB 2834, to be operative only if either AB 692 or AB 2834 and this bill are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last. The bill would also incorporate additional changes in Section 48915 of the Education Code, proposed by AB 692 and AB 2834, to be operative only if both of those bills and this bill are chaptered and become effective on or before January 1, 1997, and this bill is chaptered last.

(4) Because this bill would impose a higher level of service on school districts by increasing the number of acts requiring expulsion-related actions within school districts, it would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1053 (AB 3241) Conroy. Adoption.

Existing law relating to adoption requires a written report on the child's medical background and, if available, the medical background of the child's biological parents, so far as ascertainable, to be submitted to the prospective adoptive parents.

This bill would authorize the biological parents to provide a blood sample, to be stored at an approved laboratory for a period of 30 years following the adoption, and to be used for DNA testing at a later date after entry of the adoption order at the request of the adoptive parents or the adopted child. The bill would provide for a separate fee, in addition to existing statutory fees pertaining to adoptions, to pay for the cost of drawing and storing the blood samples, as specified. The bill would provide for access to the blood sample and for the confidentiality of the blood sample and any DNA test results related to the blood sample, as specified.

Ch. 1054 (AB 3314) Baldwin. Weapons: switchblade knives.

Existing law defines switchblade knife, for purposes of prohibiting the possession, sale, or other transfer of a switchblade knife, as a knife having the appearance of a pocketknife and including a spring-blade knife, snap-blade knife, gravity knife or any other similar type of knife, the blade or blades of which are 2 or more inches long and which can be released automatically by the flick of a button, pressure on the handle, flip of the wrist or other mechanical device, or is released by the weight of the blade or by any type of mechanism whatsoever.

This bill would provide that a switchblade knife does not include a knife that is designed to open with one hand utilizing thumb pressure applied solely to the blade of the knife or a thumb stud attached to the blade.

Ch. 1055 (SB 1540) Calderon. Defamation.

Existing law relating to defamation, generally, provides that libel is a false and unprivileged written publication that injures the reputation, and slander is a false and unprivileged publication, orally uttered, that injures the reputation, as provided. Existing law makes privileged any publication or broadcast made by a fair and true report in a public journal of a judicial, legislative, or other public official proceeding, or of anything said in the course thereof, or of a verified charge or complaint made by any person to a public official, as specified.

This bill would also make privileged any communication to a public journal of a legislative, judicial, or other official proceeding, except as specified. The bill would also state the intent of the Legislature in this regard.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1056 (SB 1697) Kopp. Political Reform Act of 1974.

Existing provisions of the Political Reform Act of 1974 prohibit a candidate for elective state office or for elective local office, among other public officials, from accepting any honorarium.

This bill would include a person who is a candidate for judicial office after December 31, 1996, within this prohibition.

Existing provisions of the act prohibit a candidate for elective state office or for elective local office, among other public officials, from accepting gifts with a total value of more than $250 from any single source in a calendar year. The act requires that this amount be adjusted biennially by the Fair Political Practices Commission to reflect changes in the Consumer Price Index. The current amount, pursuant to this adjustment requirement, is $280, by regulation of the commission.

This bill would include a person who is a candidate for judicial office after December 31, 1996, within this prohibition.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974, would therefore require a $^{2}/_{3}$ vote.

Ch. 1057 (SB 1809) Polanco. Postsecondary education: community colleges: California Community Colleges Economic Development Program.

Under existing law, the Board of Governors of the California Community Colleges is created to administer and supervise the statewide system of community colleges known as the California Community Colleges. Existing law establishes the California Community Colleges Economic Development Program, one of the purposes of which is the awarding of grants to community college districts for leadership in the advancement of the economic development goals of the program, as specified. Existing law requires the Legislative Analyst to conduct a review of the effectiveness of this program as part of the analysis of the Budget Bill to be issued in February 1998. The law establishing the program becomes inoperative on June 30, 1998, and is repealed on January 1, 1999.

This bill would express legislative findings and declarations with respect to regional coordination within the California Community Colleges. The bill would express legislative intent to facilitate and enhance the capacity of the California Community Colleges Economic Development Program to effectively deliver work force development and training resources, as specified. The bill would add to the list of primary missions of the California Community Colleges a role in advancing California's growth and global competitiveness through education and training.

This bill, among other things, would define, for the purposes of the California Community Colleges Economic Development Program, regions within the California Community Colleges. The bill would authorize the Board of Governors and the Chancellor of the California Community Colleges to award grants to the regions defined in the bill for the purposes of meeting regional economic development and training needs, as specified. The bill would also require the board of governors and the chancellor's office to establish administrative controls, as specified, pursuant to their responsibility for the California Community Colleges Economic Development Program.

The bill would require the chancellor's office to oversee auditing and provide systemwide oversight for the California Community Colleges Economic Development Program. The bill would require, as a condition of receiving economic development funds, each community college or community college district receiving funds to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

complete, in accordance with specified goals and procedures, an audit of the funds received. The bill would make an appropriation by authorizing the Director of Finance to increase the reimbursement authority contained in a specified item of the Budget Act of 1996 by up to $250,000 to allow the chancellor's office to contract with community colleges or community college districts for the performance of audits pursuant to the bill. The bill would provide that audits may not be conducted nor staff hired by the chancellor's office pursuant to the bill unless and until the Director of Finance certifies that a sufficient number of community colleges or community college districts have entered into service agreements with the chancellor's office to fully offset the estimated cost of conducting audits pursuant to the bill.

The bill would require the Legislative Analyst to conduct its review of the effectiveness of this program in conjunction with the Bureau of State Audits and would further require this review to include consideration of the extent of the implementation of specified recommendations of the Bureau of State Audits.

Ch. 1058 (SB 1845) Leslie. Local government finance: property tax revenue allocations: Teeter Plan credit.

Existing property tax law requires that, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education. Existing law modifies these reductions and transfer provisions by decreasing a county's reduction and transfer amount, attributable in the 1994–95 fiscal year to the reduction determined for that county for the 1993–94 fiscal year, by the amount of increased allocations made in the 1994–95 fiscal year to certain educational entities as a result of the county's adoption for that fiscal year of a specified alternative method for the distribution of ad valorem property tax revenues.

This bill would expand this modification to also decrease a county's reduction and transfer amount, attributable in any fiscal year subsequent to the 1993–94 fiscal year to the reduction determined for that county in the 1993–94 fiscal year, by the amount of increased allocations made in that subsequent fiscal year to certain educational entities as a result of the county having first adopted for that subsequent fiscal year that same specified alternative method for the distribution of ad valorem property tax revenues. By imposing new duties upon county auditors in the annual allocation of ad valorem property tax revenues, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1059 (SB 1872) Greene. School facilities: community schools.

(1) Existing law authorizes the county board of education to operate and enroll in community schools, among others, pupils who have been expelled from a school district, as specified. If a county superintendent of schools elects to operate a community school, existing law requires the superintendent to utilize available school facilities that conform to certain building code qualifications, apply for emergency portable classrooms pursuant to the requirements of the State Relocatable Classroom Law of 1979, or enter into lease agreements provided that the facilities are limited to a single story, wood-framed structure, light steel frame structure, or a structure determined by a structural engineer not to have any substantial structural hazards.

This bill additionally would authorize the leasing of portable classrooms under a program applicable only to county community schools but would prohibit a relocatable facility from being made available to a county superintendent of schools for a community school unless the superintendent furnishes evidence that there are no other facilities

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

available for rental, lease, or purchase in the geographic service area that are economically or otherwise feasible. The bill would authorize the State Allocation Board to establish procedures and policies to administer this program and to establish qualifications to determine the eligibility of a county superintendent of schools to lease relocatable facilities, as specified. The bill would provide that this program does not limit the authority of a county superintendent of schools to provide facilities without assistance from the board for pupils who are enrolled in a county community school.

(2) Existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereafter Greene Act), the State Allocation Board is required to provide for the manner of determining the area of adequate school construction in a school district at the time the district is applying for funding under the Greene Act. Existing law excludes from the area of adequate school construction certain portable classrooms and other specified building areas. Existing law authorizes a school district to establish a community day school for pupils who are expelled, probation referred, or referred by a school attendance review board, as specified.

This bill would also exclude from the area of adequate school construction any classroom acquired or constructed for the purpose of operating a community day school, if the classroom is not located on a regular elementary, middle, junior high, or senior high school site.

Ch. 1060 (SB 1983) Haynes. Victim notification program.

Under existing law, notice of any hearing to review or consider the parole suitability or the setting of a parole date for any prisoner in a state prison shall be sent, upon request, by the Board of Prison Terms at least 30 days before the hearing to any victim of a crime committed by the prisoner, or to the next of kin of the victim if the victim has died.

This bill would authorize the board of supervisors of each county, with the prior concurrence of the county sheriff, and the city council of each city, with the prior concurrence of the chief of police, to establish a notification procedure to provide notice of the release of any person incarcerated at, or arrested and released on bail from, a local detention facility under its jurisdiction to those victims of crime who have requested to be so notified. The bill would authorize a county or city and 2 or more counties or cities to contract with a private entity to implement this procedure.

This bill would appropriate $100,000 from the General Fund to the Board of Corrections for the purpose of providing grants to counties and cities to implement a victim notification program pursuant to this act.

Ch. 1061 (SB 1033) Committee on Judiciary. Family law.

(1) Existing law specifies a procedure for the establishment of a change of name.

This bill would authorize a court to deny a petition for the change of name of a minor, under specified circumstances, where the court finds the name change is not in the minor's best interest.

(2) Existing law contains references to employee pension benefit plans.

This bill would revise those provisions to instead refer to employee benefit plans.

(3) Existing law provides that in a proceeding for dissolution or nullity of marriage, the court, upon request of the wife, shall restore her birth or former name, as specified, and that this request shall not be denied on the basis that she has custody of a minor child bearing a different name or any other reason other than fraud.

This bill would apply these provisions to both parties to a proceeding for dissolution or nullity of marriage.

(4) Existing law requires that the parties in a procedure for the dissolution of marriage file a final declaration of disclosure of specified financial information on each other, as specified.

This bill would specifically authorize the attorneys for the parties to file the declaration.

Ch. 1062 (AB 1832) Speier. Family law: support: paternity.

(1) Existing law authorizes the court to require health care coverage payments in child support proceedings. Existing law requires the district attorney, the State Department of Health Services, or a party with custody of a child to enforce an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

outstanding support order that requires that health care coverage be provided to the child, and requires support obligors and their employers and health care insurers, as defined, to comply with these provisions, in the case of a child eligible for federal medicaid services.

This bill would require support obligors and their employers and health care insurers to comply with certain provisions relative to a support order requiring health care coverage to be provided to any child. These children would be included within the health care coverage provided by employers or other providers, as specified. The changes made by this bill to Section 11516.1 of the Insurance Code would not become operative if SB 1866, which would repeal that section, is enacted.

(2) Existing law also requires employers and labor organizations to cooperate with and provide relevant employment and income information, upon request, to a district attorney enforcing child support obligations. An employer or labor organization may be assessed a civil penalty of a maximum of $500 for failure to provide that information within 30 days of receiving a request, as specified.

This bill would increase the maximum civil penalties that may be imposed upon an employer or labor organization for failing to provide relevant employment information to the district attorney regarding the enforcement of a support obligation, as specified. The bill would also define "employer" for purposes of these provisions, and would require employees to provide information about earnings, as defined, to a district attorney enforcing child support obligations, on request.

(3) Existing law specifies procedures for the establishment of paternity by voluntary declaration. Under these provisions, the child of a woman and a man executing a declaration of paternity is conclusively presumed to be the man's child. This presumption may be rebutted by way of blood or genetic tests within 3 years of the date of execution of the declaration, as provided. Existing law specifies the contents of the declaration, and requires each district attorney to pay $10 to a hospital, clinic, or other place of live birth for each declaration filed.

This bill would revise and recast these provisions and would, among other things, delete the requirement that clinics and birthing centers provide a voluntary declaration of paternity upon the event of a live birth; authorize prenatal clinics to file voluntary declarations of paternity; make special provision for minors who sign a declaration; provide that a completed voluntary declaration of paternity that has been filed with the State Office of Vital Records establishes the paternity of the child and has the same force and effect as a judgment for paternity issued by a court of competent jurisdiction; revise the contents of the declaration; provide a 60-day period in which a parent may rescind the voluntary declaration of paternity, except as provided; authorize a court to set aside a voluntary declaration of paternity under certain conditions; and make special provision for declarations signed on or before December 31, 1996. By requiring increased duties of local officials, the bill would impose a state-mandated local program.

(4) Existing law requires a certificate of live birth to contain specified information, including the full name, birthplace, and date of birth of the father.

This bill would provide that if the parents are not married to each other, the father's name shall not be listed on the birth certificate unless the father and mother sign a voluntary declaration of paternity at the hospital before the birth certificate is prepared, as specified. This bill would also establish a procedure for the establishment of a new birth certificate when a voluntary declaration of paternity is filed with the State Registrar, and would make related changes.

(5) Existing law requires the district attorney, in specified actions filed by the district attorney, to provide the mother and the alleged father the opportunity to voluntarily acknowledge paternity by signing a voluntary declaration of paternity prior to a hearing or trial where the paternity of a minor child is at issue.

This bill would authorize the district attorney, for the purpose of meeting this requirement, to afford the defendant an opportunity to enter into a stipulation for judgment of paternity.

(6) Existing law, operative July 1, 1997, appropriates federal incentive funds out of any money in the State Treasury not otherwise appropriated, from which the State Department of Social Services shall make payments to each county (a) on any support payments collected or distributed, or both, and (b) on any interstate support collections

NOTE: Superior numbers appear as a separate section at the end of the digests.

collected or distributed, or both, and provides for the payment to counties of state incentive funds.

This bill would change the operative date of these provisions to July 1, 1998.

(7) Existing law, operative July 1, 1997, appropriates out of any money in the General Fund not otherwise appropriated, amounts from which the State Department of Social Services shall make federal incentive payments to each county on nonfederally funded foster care support payments collected or distributed, and provides for the payment to counties of state incentive funds.

This bill would change the operative date of this provision to July 1, 1998.

(8) Existing law, operative July 1, 1997, annually appropriates from the General Fund to the State Department of Social Services beginning in fiscal year 1997–98, a sum equal to 50% of the state's share of increased AFDC child support collections, as specified.

This bill would change the operative date of this provision to July 1, 1998.

(9) Existing law, operative until June 30, 1997, requires the State Department of Social Services to establish a performance-based incentive system which will provide federal and state incentive funds to counties based on standards of performance in the child support program, as provided. Existing law, operative until June 30, 1997, appropriates from the State Treasury sufficient funds, including federal incentives, from which the department shall pay (a) to each county a base rate of 10% on any support collections distributed, and (b) to certain counties a performance rate, and requires the department to pay to certain counties a specified compliance incentive rate.

This bill would extend the operative date of these provisions to June 30, 1998.

(10) Existing law, operative until June 30, 1997, provides for county and state responsibility for each counties' share of administrative expenditures for administering the child support program, and revises these provisions, operative July 1, 1997.

This bill would revise these operative dates to June 30, 1998, and July 1, 1998, respectively.

(11) This bill would incorporate additional changes in Section 1357 of the Health and Safety Code, proposed by AB 8 and SB 371, to be operative only if AB 8, SB 371, or both, and this bill are chaptered, either bill or both of those bills and this bill become effective on or before January 1, 1997, and this bill is chaptered last.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 1063 (AB 3012) Kuykendall. Financial institutions.

Existing law authorizes title insurers to engage in the trust business.

This bill would delete that authority.
