STATUTES OF CALIFORNIA

REGULAR SESSION
1967

Began Monday, January 2, 1967, and
Adjourned Friday, September 8, 1967

STATUTES OF CALIFORNIA

PASSED AT THE 1967 REGULAR SESSION OF THE LEGISLATURE

CHAPTER 1

An act to validate, ratify, and confirm the legal existence, composition and organization of county committees on school district organization for the period July 1, 1966 to July 8, 1966, inclusive, and to validate, ratify, and confirm the acts and proceedings undertaken by those bodies during that period, declaring the urgency thereof, to take effect immediately.

[Approved by Governor January 24, 1967. Filed with Secretary of State January 24, 1967.]

The people of the State of California do enact as follows:

SECTION 1. It was the intent and purpose of the Legislature, by the enactment of Chapter 146 of the Statutes of 1966 (First Extraordinary Session) to supersede, beginning July 1, 1966, the provisions of Section 3 of Chapter 1898 of the Statutes of 1965, which repealed the provisions of the Education Code relating to the legal existence, composition, and organization of county committees on school district organization. It was the further intent and purpose of the Legislature, by such 1966 enactment, the same being an urgency measure specifically made operative on July 1, 1966, that county committees on school district organization be continued in legal existence, without interruption, from and after July 1, 1966.

Chapter 146 of the Statutes of 1966 (First Extraordinary Session), which by its own terms is made operative commencing with July 1, 1966, shall, irrespective of its later final enactment on or about July 8, 1966, be given retroactive effect and shall be construed, interpreted and applied, and shall for all purposes be deemed, as having been fully effective and operative on and after July 1, 1966, and to have reenacted and continued in effect, without interruption, the statutory law governing the existence, composition and organization of county committees on school district organization, irrespective of Section 3 of Chapter 1898 of the Statutes of 1965.

SEC. 2. The continued legal existence, organization and composition of county committees on school district organization during the period of July 1, 1966 to July 8, 1966, inclusive, and all acts and proceedings undertaken by such com-

mittees during the said period pursuant to the Education Code or under any law or under color of any law, are hereby validated, ratified, confirmed and declared legally effective for all purposes.

SEC. 3. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

By the enactment of Chapter 1898 of the Statutes of 1965, the Legislature repealed the statutory law providing for the legal existence, composition, and organization of county committees on school district organization, with the repeal to become operative in July 1, 1966. At the 1966 First Extraordinary Session it was determined by the Legislature that the county committees should be continued in existence and that the statutory law governing their legal existence, composition and organization should be continued in effect. To that end Senate Bill No. 105 was enacted into law as Chapter 146 of the Statutes of 1966 (First Extraordinary Session), an urgency statute to reenact the pertinent statutory law, with the same to be operative on and after July 1, 1966. By reason of the time consumed in the bill's course through the legislative process it was not finally enacted into law until on or about July 8, 1966. This delay has given rise to questions concerning the exact legal status of county committees during the period of July 1 to July 8, 1966, and the legal efficacy of acts and proceedings which may have been undertaken by them during that period. In order that any doubts concerning the legal existence of county committees and the validity of acts and proceedings undertaken by them during the period of July 1 to July 8, 1966 can be removed, and to the end that the important school district reorganization proceedings affected thereby may continue without interruption and without legal complications, it is essential that this act take effect at the earliest possible time.

CHAPTER 2

An act to validate the organization, boundaries, acts, proceedings and bonds of public bodies, as herein defined, and to provide limitations of time within which actions may be commenced in connection therewith, declaring the urgency thereof, to take effect immediately.

[Approved by Governor February 9, 1967. Filed with Secretary of State February 9, 1967.]

The people of the State of California do enact as follows:

SECTION 1. The following terms shall have the following meanings herein:

(a) The term "public body" means counties, cities and counties, cities, and the following districts, authorities, agencies, boards, commissions and other entities:

Agencies, boards, commissions or entities constituted or provided for under or pursuant to Chapter 5 (commencing with Section 6500), Division 7, Title 1 of the Government Code.

Air pollution control districts
Airport districts
Assessment districts
Bridge and highway districts
California water district improvement districts
California water districts
Cemetery districts
Citrous pest control districts
City general improvement district improvement districts
City general improvement districts
City maintenance districts
Community service districts
Conservancy districts
County boards of education
County drainage districts
County fire protection districts
County maintenance districts
County power pumping districts
County sanitation districts
County service areas
County sewerage and water districts
County water agencies
County water authorities
County water district improvement districts
County water districts
County waterworks districts
Drainage districts
Fire protection districts
Flood control and water conservation districts
Flood control districts
Garbage and refuse disposal districts
Garbage disposal districts
Harbor districts
Harbor improvement districts
Highway districts
Highway interchange districts
Highway lighting districts
Horticultural protection districts
Horticultural development districts
Housing authorities
Irrigation district distribution districts
Irrigation district improvement districts
Irrigation districts
Joint harbor improvement districts
Joint highway districts

Joint municipal sewage disposal districts
Junior college districts
Levee districts
Library districts
Local health districts
Local hospital districts
Metropolitan water districts
Mosquito abatement districts
Municipal improvement district improvement districts
Municipal improvement districts
Municipal improvement assessment districts
Municipal port districts
Municipal sewer districts
Municipal utility districts
Municipal water district improvement districts
Municipal water districts of any kind
Parking authorities
Parking districts
Park, recreation and parkway districts
Permanent road divisions
Pest abatement districts
Port districts
Protection districts
Public cemetery districts
Public utility district improvement districts
Public utility districts
Rapid transit authorities
Rapid transit districts
Reclamation districts
Recreational harbor districts
Recreation and park districts
Recreation, park and parkway districts
Redevelopment agencies
Regional park districts
Regional planning districts
Resort improvement districts
River port districts
Road districts
Sanitary districts
Sanitary districts annexed areas
School districts of any kind or class
Separation of grade districts
Sewer maintenance districts
Soil conservation districts
Special transit service districts
Storm water districts
Transit districts
Unified air pollution control districts
Unified port districts
Urban renewal agencies
Vehicle parking districts
Veterans' memorial districts
Water agencies

Water authorities
Water conservation districts
Water districts
Water replenishment districts
Water storage district improvement districts
Water storage districts
Weed abatement districts
Zones of flood control districts
Zones of flood control and water conservation districts
Zones of county water agencies
Zones of county water authorities.

The term "public body" and the plural thereof, as used in this act, shall include only those entities which are specifically enumerated in this section.

(b) The term "bonds" means all instruments evidencing an indebtedness of a public body incurred or to be incurred for any public purpose, and all instruments evidencing the borrowing of money in anticipation of taxes, revenues or other income of such body, and all instruments payable from revenues or special funds of such public bodies, and all instruments funding or refunding any thereof or any indebtedness.

SEC. 2. All public bodies heretofore organized or existing under, or under color of, any law are hereby declared to have been legally organized and to be legally functioning as such public body. Every such public body shall have all the rights, powers, and privileges, and be subject to all the duties and obligations of such a public body regularly formed pursuant to law.

SEC. 3. The boundaries of every public body as heretofore established, defined, or recorded, or as heretofore actually shown on maps or plats used by the assessor, are hereby confirmed, validated, and declared legally established.

SEC. 4. All acts and proceedings heretofore taken by any public body or bodies under any law, or under color of any law, for the annexation or inclusion of territory into any such public body or for the annexation of any such public body to any other such public body or for the withdrawal or exclusion of territory from any such public body or for the consolidation, merger or dissolution of any public bodies are hereby confirmed, validated, and declared legally effective. This shall include all acts and proceedings of the governing board of any such public body and of any person, public officer, board or agency heretofore done or taken upon the question of the annexation or inclusion or of the withdrawal or exclusion of such territory or the consolidation, merger or dissolution of such public bodies.

SEC. 5. All acts and proceedings heretofore taken by or on behalf of any public body under any law, or under color of any law, for the authorization, issuance, sale, or exchange of bonds of any such public body for any public purpose are hereby confirmed, validated, and declared legally effective. This shall include all acts and proceedings of the governing

board of such public body and of any person, public officer, board or agency heretofore done or taken upon the question of the authorization, issuance, sale, or exchange of such bonds.

All bonds of any public body heretofore issued shall be, in the form and manner in which issued and delivered, the legal, valid and binding obligations of the public body. All such bonds heretofore authorized to be issued and hereafter issued and delivered in accordance with such authorization shall be the legal, valid and binding obligations of the public body. Whenever an election has heretofore been called for the purpose of submitting to the voters of any public body the question of issuing bonds for any public purpose, such bonds, if hereafter authorized by the required vote and in accordance with the proceedings heretofore taken, and issued and delivered in accordance with such authorization, shall be the legal, valid and binding obligations of the public body.

SEC. 6. (a) The foregoing provisions of this act shall operate to supply such legislative authorization as may be necessary to validate any such acts and proceedings heretofore taken which the Legislature could have supplied or provided for in the law under which such acts or proceedings were taken.

(b) The foregoing provisions of this act shall be limited to the validation of acts and proceedings to the extent to which the same can be effectuated under the State and Federal Constitutions.

(c) The foregoing provisions of this act shall not operate to confirm, validate, or legalize any act, proceeding, or other matter the legality of which is being contested or inquired into in any legal proceeding now pending and undetermined or which may be pending and undetermined during the period of 30 days from and after the effective date of this act, and shall not operate to confirm, validate, or legalize any act, proceeding, or other matter which has heretofore been determined in any legal proceeding to be illegal, void or ineffective.

(d) This act shall not operate to confirm, validate, or legalize a contract between any district and the United States.

SEC. 7. Any action or proceeding contesting the validity of any action or proceeding heretofore taken under any law, or under color of any law, for the formation, organization or incorporation of any public body, or for any annexation thereto, exclusion therefrom or other change of boundaries thereof, or for the consolidation, merger or dissolution of any public bodies, or for the authorization, issuance, sale or exchange of bonds thereof upon any ground involving an alleged defect or illegality not effectively validated by the prior provisions of this act and not otherwise barred by any statute of limitations or by laches must be commenced within six months of the effective date of this act; otherwise each and all of said matters shall be held to be valid and in every respect legal and incontestable. This section shall not extend the period in which any action may be brought beyond the period in which it

would be barred by any presently existing valid statute of limitations

SEC. 8. Nothing contained in this act shall be construed to render the creation of any city or district, or any change in the boundaries of any city or district, effective for purposes of assessment or taxation unless the statement, together with the map or plat, required to be filed under Sections 54900 to 54904, inclusive, of the Government Code, is filed within the time and substantially in the manner required by said sections.

SEC. 9. As used in this act, the word "now" means the date this act takes effect; the word "heretofore" means any time prior to such effective date; and the word "hereafter" means any time subsequent to such effective date.

SEC. 10. This act may be cited as the First Validating Act of 1967.

SEC. 11. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The peace, health and safety of the citizens of the state require the orderly and unhampered functioning of public bodies and such functioning depends upon the validity of the organization, boundaries, and governing officers or boards of public bodies, and upon the validity of acts, proceedings, and bonds of public bodies, and it is therefore imperative and essential that such matters be validated so that during the period before this act would otherwise become effective:

(1) Citizens of the state can be afforded the protection of the police, fire, safety, sanitary, and other regulations and protections provided by public bodies;

(2) Public works and construction by public bodies can be commenced and continued without delay or restriction, to provide sewers, waterworks, schools, storm drains, flood control works, sanitary facilities, electric and other utility works, firehouses and facilities, police stations and facilities, streets, hospitals, and other works, structures, improvements, and facilities required for the public peace, health and safety, and immediately needed to provide for an increased population;

(3) Public bodies can issue and sell bonds heretofore authorized for the purpose of providing sewers, waterworks, schools, storm drains, flood control works, sanitary facilities, electric and other utility works, firehouses and facilities, police stations and facilities, streets, hospitals, and other works, structures, improvements, and facilities required for the public peace, health and safety and immediately needed to provide for an increased population, which cannot now be sold because of defects in the organization or boundaries of some public body or in the authorization of such bonds, which defects will be cured by this act.

CHAPTER 3

An act to amend Section 15601 of the Elections Code, relating to school elections, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor February 10, 1967. Filed with Secretary of State February 10, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 15601 of the Elections Code is amended to read:

15601. An election board may adopt a system provided for in this chapter for any or all precincts within its jurisdiction, and for any portion or all of any elections. Such board may, from time to time, combine, rearrange, or enlarge the precincts for which such system is adopted, provided no precinct shall include more than 1,000 voters, and may abandon such system as to all or any precincts or elections.

The maximum of 1,000 voters for a precinct under this section shall not apply to elections held pursuant to the provisions of the Education Code.

SEC. 2. The provisions of this act shall be operative until April 19, 1967.

SEC. 3. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

School elections which would be affected by this act are scheduled in 1967. In order that it may operate with respect to such elections, it is necessary that the act go into effect immediately.

CHAPTER 4

An act to amend Sections 7.1, 15, and 16 of, and to add Section 12.2 to, the Ventura County Flood Control Act (Chapter 44 of the Statutes of 1944, Second Extraordinary Session), relating to the Ventura County Flood Control District, declaring the urgency thereof, to take effect immediately.

[Approved by Governor February 23, 1967. Filed with Secretary of State February 23, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 7.1 of the Ventura County Flood Control Act (Ch. 44. Stats. 1944 (2nd Ex. Sess.)) is amended to read:

Sec. 7.1. In addition to the powers described in Section 7 of this act, the district shall have the power by ordinance or

resolution to prescribe, revise and collect fees and charges in any zone and in any special zone as a condition of development of land. Land to be developed within a special zone shall be subject both to the fees and charges of the zone in which it is located and the fees and charges of the special zone in which it is located. Development of land for the purposes of this section shall include, but not be limited to, subdivision development as governed by the Subdivision Map Act; construction of new buildings, structures and improvements for residential, commercial or industrial purposes; and any development of land requiring either zone variance or special use permit. The amount of fees and charges levied for each zone and for each special zone shall be determined separately and shall be based upon the need created by development of land for flood control facilities within the zone or special zone. The amount of fees and charges levied for any zone, other than a special zone, shall not exceed four hundred dollars ($400) for each acre or portion thereof of land to be developed. Fees and charges prescribed as a condition of development of land pursuant to this section shall be in addition to any other conditions imposed on such development by any other agency having power to prescribe such other conditions. Except as hereinafter provided, revenues derived from fees and charges prescribed for any zone may be used only for the acquisition, engineering, design, construction, reconstruction, maintenance or operation of flood control or storm drainage facilities within such zone, or within any special zone located in such zone, or used to pay the interest on or reduce the principal of any bonded indebtedness of such zone. At the discretion of the board of supervisors, all or part of fees and charges prescribed for any zone which are collected as a condition of development of land located within a special zone may be used to pay the interest on or reduce the principal of any bonded indebtedness of such special zone. Except as hereinafter provided, revenues derived from fees and charges prescribed for any special zone shall be used only for the acquisition, engineering, design, construction, reconstruction, maintenance or operation of flood control or storm drainage facilities within such special zone or used to pay the interest on or reduce the principal of any bonded indebtedness of such special zone. At the discretion of the board of supervisors, all or part of fees and charges prescribed for any zone or special zone need not be collected as a condition of development of land located within a protection district established under the Protection District Act of 1907 or if collected from such land, all or part of such fees may be remitted to the protection district to be used to pay the interest on or reduce the principal of any bonded indebtedness of such protection district. Whenever the development of land within any zone or within any special zone is made subject to fees or charges by the board of supervisors pursuant to this section, said board of supervisors may allow a credit against such fees for the acquisition, engineering, design, construction, reconstruction,

maintenance or operation costs of any flood control or storm drainage facility within such zone or special zone which has been constructed or paid for in connection with the development of land within such zone or special zone. The board of supervisors may also reduce fees or charges prescribed for any part of the land to be developed within such zone or special zone if they find that because of special circumstances the payment thereof would be inequitable or would cause undue hardship and the reduction of such fees would be in the public interest. No fees or charges shall be levied on the development of land located within the corporate boundaries of a city except upon the consent and approval of the legislative body of the city.

SEC. 2. Section 12.2 is added to the Ventura County Flood Control Act (Ch. 44, Stats. 1944 (2nd Ex. Sess.)), to read:

Sec. 12.2. In order to carry out the objects and purposes of this act, the board of supervisors of said district shall have the power in any year to levy an ad valorem tax or assessment upon all taxable property in Zone 3, according to the benefits derived or to be derived by said zone, to pay the interest on or reduce the principal of any bonded indebtedness of any protection district established under the Protection District Act of 1907 located within said zone; provided, however, that the aggregate taxes or assessments levied pursuant to this section and Section 12 of this act on the taxable property in Zone 3 for any one fiscal year shall not exceed the amount of taxes or assessments which may be levied pursuant to Section 12 of this act on the taxable property in Zone 3 for any one fiscal year. Said tax or assessment shall be levied and collected together with, and not separately from, taxes for county purposes, and the revenues from said taxes shall be paid into the county treasury to the credit of said district, and said board of supervisors shall have the power to control and order the expenditure thereof for said purpose. It is hereby declared that all property within said Zone 3 so taxed or assessed is equally benefited under this act.

SEC. 3. Section 15 of the Ventura County Flood Control Act (Ch. 44, Stats. 1944 (2nd Ex. Sess.)) is amended to read:

Sec. 15. (1) Whenever the board of supervisors shall determine that a bonded indebtedness should be incurred to pay the cost of any work of improvement in any zone, the said board may by resolution, passed by unanimous vote of the entire board, determine and declare the amount of bonds in order to raise the amount of money necessary for such work of improvement and the maximum rate of interest of said bonds. Said work of improvement may be described by reference to the report filed pursuant to Section 10 hereof and no other description shall be necessary. Said board shall cause a copy of said resolution, duly certified by the clerk, to be filed for record in the office of the Recorder of Ventura County within five (5) days after its issuance. From and after said filing the

said board shall be deemed vested with the authority to proceed with said bond election.

(2) After the filing for record of the resolution specified in subdivision (1) of this section, the said board of supervisors may call a special election in said zone at which shall be submitted to the qualified electors of said zone the question whether or not bonds shall be issued in the amount determined in said resolution and for the purposes therein stated. Said bonds and the interest thereon shall be paid from revenue derived from annual taxes or assessments levied upon the property taxable by said district situated within the zone, and all such taxable property shall be and remain liable to be taxed for such payments as provided in this act.

(3) Said board of supervisors shall call such special election by ordinance and not otherwise and submit to the qualified electors of said zone the proposition of incurring a bonded debt in said zone in the amount and for the purposes stated in said resolution and shall recite therein the purposes for which the indebtedness is proposed to be incurred; provided, that it shall be sufficient to describe such purposes, by reference to the resolution adopted by said board of supervisors, and on file for particulars; and said ordinances shall also state the estimated cost of the proposed work of improvement, the amount of the principal of the indebtedness to be incurred therefor, and the maximum rate of interest to be paid on said indebtedness, and shall fix the date on which such special election shall be held, and the form and contents of the ballot to be used. The rate of interest to be paid on such indebtedness shall not exceed six percent (6%) per annum. For the purposes of said election, said board of supervisors shall in said ordinance establish election precincts within the boundaries of the said zone and may form election precincts by consolidating the precincts established for general election precincts in said district to a number not exceeding six general election precincts for each such bond election precinct, and shall designate a polling place and appoint one inspector, one judge and one clerk for each of such precincts As an alternative said ordinance may provide for the consolidation of said election with a statewide or other election in accordance with the provisions of the Elections Code governing consolidated elections.

In all particulars not recited in said ordinance, such election shall be held as nearly as practicable in conformity with the general election laws of the state.

Said board of supervisors shall cause a map or maps to be prepared covering general description of the work to be done, which said map shall show the location of the proposed works and improvements and shall cause the said map to be posted in a prominent place in the county courthouse for public inspection for at least thirty (30) days before the date fixed for such election.

Said ordinance calling for such election shall, prior to the date set for such election, be published pursuant to Section 6062 of the Government Code in a newspaper of general circulation circulated in said zone; the last publication of such ordinance must be at least fourteen (14) days before said election, and if there be no such newspaper, then such ordinance shall be posted in five public places in said zone for at least thirty (30) days before the date fixed for such election. No other notice of such election need be given.

Any defect or irregularity in the proceedings prior to the calling of such election shall not affect the validity of the bonds. If at such election two-thirds ($\frac{2}{3}$) of the votes cast are in favor of incurring such bonded indebtedness, then bonds of said district zone for the amount stated in such proceedings may be issued and sold as in this act provided.

SEC. 4. Section 16 of the Ventura County Flood Control Act (Ch. 44, Stats. 1944 (2nd Ex. Sess.)) is amended to read:

Sec. 16. If the issuance of the bonds is authorized at said election, the said board of supervisors may thereafter adopt a resolution or resolutions providing for the issuance of all or any part of the bonds authorized at said election. Said resolution shall prescribe the form of the bonds and of the interest coupons attached thereto, and shall fix the times of the maturities of the bonds. The board may divide the principal amount of any issue into two or more series and fix different dates for the bonds of each series. The bonds of one series may be made payable at different times from those of any other series; provided, that the earliest maturity of each issue or series thereof, as the case may be, shall not be more than two years from the date of the bond of said issue or series. The final maturity date of any bond shall not exceed 40 years from the date of the bond. Every year beginning with the earliest maturity of each issue or series of bonds, as the case may be, not less than one-fortieth of the whole of the indebtedness evidenced by such issue or such series shall be payable.

The bonds may be issued in such denomination or denominations as the board of supervisors may prescribe, and each bond shall be payable on the day and at the place fixed in said bonds, and with interest at the rate specified in such bond, which rate shall not be in excess of six percent (6%) per annum, and shall be payable annually or semiannually. Said bonds shall be signed by the chairman of the board of supervisors, and countersigned by the auditor of said Ventura County, and the seal of said district shall be affixed thereto. The interest coupons of said bonds shall be numbered consecutively and signed by the Auditor of Ventura County by his engraved or lithographed signature. In case any such officer whose signatures or countersignatures appear on the bonds or coupons shall cease to be such officer before the delivery of such bonds to the purchaser, such signatures or countersignatures shall nevertheless be valid and sufficient for all purposes

the same as if such officer had remained in office until the delivery of the bonds.

SEC. 5. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into effect immediately. The facts constituting such necessity are:

Because of a recent legal interpretation of the Ventura County Flood Control Act and the outcome of a recent bond election, the provisions of this act are urgently needed to permit the Ventura County Flood Control District to take immediate action to call a special bond election to provide funds for work and improvement urgently needed for the preservation of the public health and safety.

CHAPTER 5

An act to amend Sections 427.2 and 427.6 of, to add Sections 427.11, 427.12, and 427.13 to, and to repeal Section 427.11 of, the Health and Safety Code, relating to alcoholism, making an appropriation, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor February 28, 1967. Filed with Secretary of State February 28, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 427.2 of the Health and Safety Code is amended to read:

427.2. The State Department of Public Health, in cooperation with the Department of Rehabilitation, and through the Division of Alcoholism of the State Department of Public Health shall plan, promote, and assist in the support of alcoholism prevention, treatment, and control programs; shall conduct, sponsor, and support investigations and studies, including evaluation, of all phases of alcoholism; shall assist in the development of educational and training programs; and shall carry on programs to assist the public, and technical and professional groups, in becoming fully informed about alcoholism.

The department shall promote, develop, and financially assist, where necessary, alcoholism programs administered by local health departments within a comprehensive local plan, including, but not limited to, the following services as defined by regulations adopted by the State Board of Public Health:

(a) Services for individuals.

(1) Casefinding (including court screening).

(2) Diagnosis-evaluation-referral.

(3) Medical and counseling, both acute and continuing.

(4) Psychiatric.

(5) Vocational rehabilitation and employment.

(b) Services for the community.

(1) Continuing measurement of local problem and resources.

(2) Development and coordination of local program.

(3) Public information and education.

(4) Consultation and guidance to other local agencies and groups.

(5) Evaluation.

The department shall promote, develop, and financially assist such other services as may be required by the State Board of Public Health.

Local health departments conducting such programs shall maintain records and submit periodic reports as required by the State Department of Public Health.

SEC. 2. Section 427.6 of the Health and Safety Code is amended to read:

427.6. In order that maximum utilization be made of federal and other funds made available to the Department of Rehabilitation, the State Department of Public Health shall contract with the Department of Rehabilitation to provide vocational rehabilitation services for clients eligible for these services and may make available for this purpose state funds appropriated for administration of this article. Services provided by the Department of Rehabilitation may include individual rehabilitation services as defined in the statutes governing the Department of Rehabilitation, which will assist in the client's rehabilitation.

SEC. 3. Section 427.11 of the Health and Safety Code is repealed.

SEC. 4. Section 427.11 is added to the Health and Safety Code, to read:

427.11. The Division of Alcoholism of the State Department of Public Health shall formulate a plan for the complete evaluation of alcoholism programs developed under this article and other state and local government programs pertaining to alcoholism. The objective of the plan should be to determine if state and local programs are achieving the goal of this article, which is to lessen the extent and gravity of alcoholism and the misuse of alcoholic beverages in California. The plan shall be put into effect as soon as possible and the division shall submit a report on the plan and its progress in initiating it to the Legislature by January 1, 1968.

SEC. 4.5. Section 427.12 is added to the Health and Safety Code, to read:

427.12. This article shall be known and may be cited as the McAteer Alcoholism Act.

SEC. 4.6. Section 427.13 is added to the Health and Safety Code, to read:

427.13. This article shall terminate on June 30, 1968, unless the Legislature, on the basis of the report submitted under

Section 427.11, acts during the 1968 Regular Session to continue it.

SEC. 5. Any unencumbered balance of the amounts appropriated by Item 175 and Item 348 of the Budget Act of 1966 to the Department of Public Health for alcoholism prevention, treatment and control programs shall remain available for expenditure until July 1, 1967.

The Department of Rehabilitation may expend any federal funds received as a result of its participation in programs for alcoholic rehabilitation established pursuant to Article 10 (commencing with Section 427) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, but not to exceed six hundred seventy-five thousand dollars ($675,000).

SEC. 6. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

Under the present law, the alcoholism program would terminate on March 1, 1967. There continues to be great need for a program for investigation, prevention and control of alcoholism in the state, and it is of great importance that this program continue uninterrupted. It is therefore necessary that this act go into immediate effect.

CHAPTER 6

An act to amend Section 251 of the Revenue and Taxation Code, relating to property taxation, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor March 6, 1967. Filed with Secretary of State March 6, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 251 of the Revenue and Taxation Code is amended to read:

251. The board shall prescribe all procedure and forms required to carry into effect the veteran's, church, cemetery, orphanage, college, exhibition, and immature forest trees, or welfare exemption.

SEC. 2. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

In 1966 legislation was enacted to require the State Board of Equalization to prescribe procedures for claiming the self-executing constitutional exemption from taxes of fruit and nut trees and vines. It is now clear that the assessors can administer the exemption without having a claim form filed be-

cause they have adequate procedures to learn of the new planting. Also the filing of exemption claim forms will be a burden on tree and vine owners and the county assessors without any expectation of additional revenue. Therefore, in order that the requirement can be eliminated for the 1967-68 fiscal year it is necessary that this act take effect immediately.

CHAPTER 7

An act to add Section 268.4 to the Revenue and Taxation Code, relating to the welfare exemption from property taxation, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor March 6, 1967. Filed with Secretary of State March 6, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 268.4 is added to the Revenue and Taxation Code, to read:

268.4. For the purposes of Section 268, "property as to which the welfare exemption was available for any fiscal year commencing during the calendar year 1966" includes property owned by a nonprofit corporation which would otherwise qualify for the welfare exemption, except that at the lien date for that year the articles of incorporation of any such nonprofit corporation provided that the nonprofit corporation contemplated the distribution of gains, profits or dividends to its members only upon dissolution or winding up, if the nonprofit corporation does all of the following:

(1) Files an affidavit with the assessor that the property of the nonprofit corporation was at that time and has been since then irrevocably dedicated to religious, charitable, scientific, or hospital purposes and upon liquidation, dissolution or abandonment of the owner would not inure to the benefit of any private person, except a fund, foundation or corporation organized and operated for religious, hospital, scientific or charitable purposes.

(2) Amended its articles of incorporation during the calendar year 1966 to provide that the property of the nonprofit corporation is irrevocably dedicated to charitable, scientific, or hospital purposes and upon liquidation, dissolution or abandonment of the owner, will not inure to the benefit of any private person, except a fund, foundation or corporation organized and operated for charitable, scientific or hospital purposes.

This section shall remain in effect until one year after the effective date of the enactment of this section at the 1967 Regular Session of the Legislature and shall thereafter be of no force or effect.

SEC. 2. Any organization receiving the exemption under Section 214 of the Revenue and Taxation Code for the fiscal year 1966–67 and which would have been eligible to receive the exemption for fiscal year 1967–68 had Chapter 147, Statutes of 1966, Section 23, not been enacted, shall be eligible to receive the exemption for fiscal year 1967–68.

This section shall remain in effect until the first Monday in March of 1968 and shall thereafter be of no force or effect.

SEC. 3. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

Some organizations have inadvertently failed to amend their articles of incorporation to reflect their actual status, in support of the tax exemption of their property which is granted by the State Constitution, and as a result now are confronted with obligations which, if met, will substantially impair their ability to function effectively. This act will remedy the situation by, in effect, removing the procedural bar to the application of the exemption to such property. In doing so, the public policy of the state as expressed in the Constitution will be entirely fulfilled and the state as a whole will benefit.

SEC. 4. If any provision of this act or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

CHAPTER 8

An act to add Section 1.2 to Chapter 74 of the Statutes of 1966, First Extraordinary Session, and to amend Section 186.95 of the Streets and Highways Code, relating to the repair, restoration, or replacement of public property damaged or destroyed by storm and flood or flood conditions, making an appropriation therefor, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor March 7, 1967. Filed with Secretary of State March 7, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 1.2 is added to Chapter 74, Statutes of 1966, First Extraordinary Session, to read:

Sec. 1.2. The unexpended balance of the appropriation made by Item 446.7, Budget Act of 1958, as amended by Section 12, Budget Act of 1960, and further amended by Chapter 20, Statutes of 1965, and the unexpended balance of the appropriation from the General Fund made by Chapter 20, Statutes

of 1965, shall also be available, without regard to fiscal years, for the purposes provided for in the Emergency Flood Relief Law (Article 6 (commencing with Section 54150), Chapter 5, Part 1, Division 2, Title 5, Government Code) for damage or destruction to public real property, other than the repair, restoration, or replacement of streets, roads, and bridges; provided that the damage or destruction by storm and flood or flood conditions for which these funds shall be available has occurred between December 1, 1966, and June 30, 1967, and the local agency has applied to the Department of Finance for an allocation of funds on or before October 1, 1967.

SEC. 2. The funds made available by Section 1 of this act may also be expended for the purposes described in Section 54155 of the Government Code.

SEC. 3. Section 186.95 of the Streets and Highways Code is amended to read:

186.95. The Street and Highway Disaster Fund is hereby created in the State Treasury, to consist of the moneys referred to in Section 186.9.

The moneys in the Street and Highway Disaster Fund, which are appropriated by Section 186.9, shall be available for expenditure, transfer, and allocation, as follows:

(a) The money transferred to the fund pursuant to subdivision (a) of Section 186.9 shall be available for allocation by the State Allocation Board for the purposes of the Emergency Flood Relief Law (Article 6 (commencing with Section 54150), Chapter 5, Part 1, Division 2, Title 5 of the Government Code), including the purposes provided for in Section 54160 of the Government Code, for damage or destruction to local streets, roads and bridges from storm and flood or flood conditions which have occurred between December 1, 1964, and June 30, 1965. Local agencies shall apply to the State Allocation Board for an allocation of funds on or before April 1, 1966. Notwithstanding any provisions to the contrary in the Emergency Flood Relief Law, the funds allocated pursuant to this subdivision may be used for the purpose of repairing, restoring or replacing such local streets, roads or bridges to present-day standards, such as those referred to in Section 186.8 of this code, and to accommodate present traffic.

(b) The money in the fund including the money received from the federal government as reimbursement to any city or county for the repair or restoration of any street, road or bridge which has been or will be repaired or restored in part or in whole by funds allocated pursuant to this section shall be available for allocation by the State Allocation Board for the purposes of the Emergency Flood Relief Law for the repair or restoration of any local street, road or bridge damaged or destroyed by any disaster to present-day standards such as those referred to in Section 186.8 of this code, and to accommodate present traffic; and the use of such money shall not be limited to the repair or restoration of streets, roads or bridges damaged or destroyed by storm and flood or flood

conditions; provided, that no such money shall be allocated for expenditure in connection with any disaster, except the damage or destruction to local streets, roads or bridges damaged or destroyed by storm and flood or flood conditions which have occurred between December 1, 1964, and June 30, 1965, unless and until specifically authorized by the Legislature.

(c) The money in the fund received from the federal government as reimbursement to the state for the repair or restoration of any state highway which has been or will be repaired or restored in part or in whole by funds transferred to the State Highway Fund pursuant to subdivision (b) of Section 186.9 or by funds expended pursuant to this section shall be available for transfer by the Department of Finance to the State Highway Fund for allocation by the California Highway Commission and expenditure by the Department of Public Works for the repair or restoration of any state highway damaged or destroyed by any disaster to present-day standards and to accommodate present traffic.

(d) Any money in the fund not necessary for immediate use for the purposes otherwise specified in this section shall be available for transfer by the Department of Finance to the State Highway Fund for allocation and expenditure for construction of state highways, but any amount so transferred shall, after receipt by the Department of Public Works of written demand from the Department of Finance, be returned from the State Highway Fund to the Street and Highway Disaster Fund upon determination by the Department of Finance of the necessity of such money for the purposes of this section within a period of not to exceed six months in such installments as may be agreed upon by the Department of Finance and the Department of Public Works.

(e) If the Department of Finance determines the cash balance of the money in the fund under subdivision (b) of this section is temporarily insufficient to make payments for purposes authorized under subdivision (b), and the Department of Public Works determines the cash balance of the money in the fund under subdivision (c) in an amount not to exceed two million dollars ($2,000,000) is not needed for immediate use for the purposes specified therein, the Department of Finance may transfer such amount to subdivision (b) for expenditure pursuant to that subdivision; provided, however, that such transfer shall not be made until the Department of Public Works and the Department of Finance have entered into an agreement providing that the Department of Finance, upon receipt of written demand from the Department of Public Works, shall repay all such amounts by transfer of money in the fund under subdivision (b) to subdivision (c) within a period of not to exceed six months in such installments as may be agreed to by the Department of Public Works and the Department of Finance.

(f) Notwithstanding any other provision of this section, money in the fund under subdivision (b) may be allocated by

the State Allocation Board for expenditure pursuant to Section 54155 of the Government Code.

(g) Income from investment of moneys in the fund and all payments by local agencies in reimbursement of moneys disbursed from the fund, including deferred payments with interest, pursuant to Government Code Sections 54160 and 54161, and all other moneys deposited therein, pursuant to law, shall be available for expenditure, transfer and allocation pursuant to this section.

SEC. 4. The money in the Street and Highway Disaster Fund under subdivision (b) of Section 186.95 of the Streets and Highways Code shall be available for expenditure for allocation by the State Allocation Board for the purposes of the Emergency Flood Relief Law, including the purposes provided for in Section 54160 of the Government Code, for the repair or restoration of any local street, road, or bridge damaged or destroyed by storm and flood or flood conditions occurring between December 1, 1966, and June 30, 1967; provided, that the local agency has applied to the State Allocation Board for an allocation of funds on or before October 1, 1967.

SEC. 5. Whenever the Department of Finance determines that a local agency which would otherwise be eligible for an allocation under the formula of Section 54157 of the Government Code is unable to finance the work due to exhaustion of its financial resources because of disaster expenditures, the State Allocation Board may allocate funds available pursuant to Section 4 of this act to pay such portion of the cost of repairing, restoring, or replacing the streets, roads and bridges of such local agency as the department has determined is necessary to accomplish such work; provided, that the amount contributed by each local agency shall not be reduced to less than an amount of money equal to the amount allocated to such local agency for the 1965–66 fiscal year pursuant to subdivision (b) of Section 2110 of the Streets and Highways Code; and provided, further, that if the local agency is a county, the Department of Finance, in determining whether the county's financial resources are exhausted, shall ascertain whether the county has levied, during the then current year, the maximum property tax for highway purposes authorized by Section 1550 of the Streets and Highways Code in the road district in which the work is proposed, and if such tax is being levied at less than the maximum rate authorized by Section 1550, the amount to be allocated by the State Allocation Board under this section shall be reduced by an amount equivalent to the difference between the revenue derived from the property tax being levied for highway purposes in such road district and the revenue which would have been derived from such tax at the maximum rate authorized by Section 1550. In determining if a county has levied sufficient taxes, amounts to be received from other taxes levied by that county and used for road purposes shall be included.

SEC. 6. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

Annual storms and floods occurring in various counties of the state have caused and are expected to cause severe damage and destruction to essential local streets, roads and bridges, public facilities, and property in said counties, including public facilities supplying domestic water to inhabitants thereof. In order that funds may be made available immediately for the repair, restoration, or replacement of such local streets, roads and bridges, public facilities, and property, it is essential that this act go into immediate effect.

CHAPTER 9

An act to add Section 32516 to, to amend Sections 32907, 34064, 35222, 36634, 38152, 38931, 39471, 62006, 62007, 62301, 62308, and 62581 of, and to repeal Sections 34953 and 34954 of the Agricultural Code, as proposed by Senate Bill No. 1, relating to milk products.

[Approved by Governor March 14, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 32516 is added to the Agricultural Code, as proposed by Senate Bill No. 1, to read:

32516. "Product of milk" means milk product as set forth in Section 32512 of this division.

SEC. 2. Section 32907 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

32907. It is unlawful for any person to sell, give away, deliver, or knowingly purchase or receive any milk or any product of milk which has been produced or handled in or by a dairy farm, milk products plant, carrier, store, or depot, that is in an insanitary condition.

SEC. 3. Section 34064 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

34064. Every person that uses any pasteurizing apparatus within the state shall date, preserve, and keep on file for not less than two months after they are made, all records which have been made by the recording thermometer. Such records shall, at all times, be open to the inspection of the director, and all state, county, and municipal officers who are charged with the enforcement of the laws and ordinances respecting milk products or the public health.

SEC. 3.2. Section 35222 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

35222. The fee for a license for any other product for which a license is required is ten dollars ($10) for the calendar year for which such license is issued. The fee for the renewal of any such license is ten dollars ($10), plus one dollar ($1) for each 100,000 pounds, or part of 100,000 pounds over and above the first 100,000 pounds, of milk fat which was purchased or received during the preceding year, ending the 31st day of December.

SEC. 3.4. Section 36634 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

36634. Any temporary definition or standard shall be such as will insure the quality and wholesomeness of the product.

SEC. 3.6. Section 38152 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

38152. Milk fat or butterfat is the fat of milk. It shall have a Reichert-Meissl number not less than 24 and a specific gravity not less than 905/1000. In determining the specific gravity, milk fat at 40 degrees centigrade shall be compared with water at 40 degrees centigrade

SEC. 4. Section 38931 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

38931. Imitation milk is any substance, mixture, or compound which is made in the imitation of, or which has the appearance or semblance of, milk, condensed milk, condensed skim milk, evaporated milk, evaporated skim milk, dried milk or dried skim milk, and which contains any edible oil or fat other than milk fat. Milk or skim milk when used in combination with chocolate is not imitation milk.

SEC. 4.5. Section 39471 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

39471. The following manufactured substances, mixtures, and compounds, with or without butter, milk, or cream, are "oleomargarine" or "margarine":

(a) All substances known prior to 1953 as oleomargarine, margarine, oleo, oleomargarine oil, butterine, lardine, suine, and neutral.

(b) All mixtures and compounds which contain any edible oils or fats except milk fat, that are made in imitation or semblance of butter, or which are intended to be sold as or for butter or as a butter substitute.

(c) All mixtures and compounds which contain milk fat that do not conform to the standard for butter, and which are made in imitation or semblance of butter, which are intended to be sold as or for butter or as a butter substitute.

SEC. 5. Section 62006 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

62006. If a distributor fails to pay any producer or producers for fluid milk or fluid cream in the manner which is required by this chapter, the director shall proceed forthwith to ascertain the names and addresses of all producers that the distributor has failed to pay for fluid milk or fluid cream, together with the amounts which are due and owing to them and

each of them by such distributor, and shall request all such producers to file a verified statement of their respective claims with the director. The producer need only verify that he is owed an amount by the distributor. The actual amount may be as ascertained pursuant to this article.

SEC. 6. Section 62007 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

62007. After determining the claims of such producers, the director shall bring an action on the bond on behalf of such producers.

SEC. 7. Section 62301 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

62301. Each stabilization and marketing plan may contain provisions which authorize sales stimulation or consumer educational programs to be formulated and administered to increase the consumption of fluid milk and fluid cream, or other dairy products. Such programs shall be carried on without reference to a particular brand or trade name. No such sales stimulation or consumer educational program shall be carried on which makes use of false or unwarranted claims on behalf of such products or which disparages the quality, value, sale, or use of any fluid milk or fluid cream or any other agricultural commodity which it is lawful to market within such marketing area.

SEC. 8. Section 62308 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

62308. If, after public hearing and consideration of the testimony and evidence presented at the hearing, the director finds that a sales stimulation and consumer educational program will tend to effectuate the purposes of this chapter, he shall issue an order making effective such program. The order shall contain all of the following:

(a) The number of months the program shall continue in operation.

(b) The rate of assessment per pound milk fat or per gallon to be paid.

(c) The names, addresses, and business locations of the persons who are appointed to administer the program.

(d) Any other provisions which are necessary and incidental to the operation of the program.

SEC. 9. Section 62581 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

62581 All distributors shall make and file with the director at least once each month such reports as the director may require to enable him to enforce the provisions of this chapter.

SEC. 10. Section 34953 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 11. Section 34954 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 12. This act is intended to implement the recommendations of the Senate Fact Finding Committee on Agriculture

and those of the Industry Advisory Committee on Agricultural Code Revision, as set forth in the third progress report of the Senate Fact Finding Committee on Agriculture to the 1967 California Legislature.

CHAPTER 10

An act to amend Sections 402, 28061, 44791, 45631, 45633, 45663, 47826, 48031, 50631, 50651, 52651, 52681, 52682, 52712, 52742, 52982, 53562, 58654, 58780, 58784 and the heading of Article 2 (commencing with Section 52681) of Chapter 3 of Division 18 of, and to amend and renumber Sections 48055 and 48056 of, and to repeal Sections 41304, 44792, 45632, 48032, 48054, 48057, 50632, and 55842 of, the Agricultural Code, as proposed by Senate Bill No. 1, relating to agriculture.

[Approved by Governor March 14, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 402 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

402. The department shall prevent fraud and deception in any of the following:

(a) Packing or labeling, or in any phase of the marketing, of any agricultural product which is governed by this code.

(b) Labeling and marketing of any commodity that is governed by this code, which is sold to producers for use in the production of crops.

SEC. 2. Section 28061 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

28061. After June 1, 1966, every egg product which is intended for human consumption shall be pasteurized. Pasteurization is a process that shall consist of the uniform heating of egg products to a temperature of not less than 140 degrees Fahrenheit and of holding such products at such a temperature for not less than 3½ minutes. Such pasteurization shall be conducted in properly operated equipment and the product shall be cooled immediately to a temperature of 50 degrees Fahrenheit or below, except egg whites, which shall be cooled immediately to a temperature of 55 degrees Fahrenheit or below.

SEC. 3. Section 44791 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

44791. The standard containers and packs for asparagus, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in Article 5 (commencing with Section 44811) of this chapter.

SEC. 4. Section 41304 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 5. Section 44792 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 6. Section 45631 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

45631. The standard containers and packs for cantaloupes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in Article 3 (commencing with Section 45661) of this chapter.

SEC. 7. Section 45632 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 8. Section 45633 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

45633. The following counts of cantaloupes which are packed, are standard packs for the respective standard containers as follows:

Standard pack counts	Container number	Standard container name
27, 36, or 45	39	Standard cantaloupe crate
45 or 54	40	Pony cantaloupe crate
18, 23, 27, 36, 41, or 45	41	Jumbo cantaloupe crate
18, 23, 27, 36, 41, or 45	42	Cantaloupe crate
12, 15, 18, 24, or 30	43	Cantaloupe container
12, 15, 18, 24, or 30	44	Cantaloupe container
10, 12, 16, or 20	44B	Cantaloupe two compartment container.

SEC. 9. Section 45663 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

45663. All cantaloupes shall be packed in regular compact arrangement in standard container number 39, 40, 41, 42, 43, 44, 44B, or 44D. All such containers shall be closed and, except as otherwise provided in Section 45664, the number of cantaloupes in each container shall be one of the "standard pack counts" which is listed in Section 45633 for each such container.

This section does not apply to any of the following:

(a) Cantaloupes which are in a retail establishment in possession of a retailer for the purpose of resale directly to consumers.

(b) Cantaloupes which are sold by a producer regularly engaged in the production of cantaloupes directly to consumers on the premises where produced or at a retail stand operated by such producer near the point of production, which in no case shall be outside of the county in which the cantaloupes were produced.

SEC. 10. Section 47826 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

47826. Except as otherwise provided in Section 47827, the container number 38K is standard for grapes if the depth is $4\frac{1}{2}$ to $5\frac{3}{4}$ inches, the width is 14 or $14\frac{3}{4}$ inches, and the length is $16\frac{1}{8}$ inches.

This container shall be considered standard with or without a taper (up and in—down and in) at each corner.

SEC. 11. Section 48031 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

48031. The standard containers and packs for lettuce, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported or sold in any container, are as prescribed in Article 3 (commencing with Section 48051) of this chapter.

SEC. 12. Section 48032 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 13. Section 48054 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 14. Section 48055 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended and renumbered to read:

48054. Any head lettuce which is prepared for transportation or sale shall be packed in standard container number 45, 45A, or 45B, which is lidded except any of the following head lettuce:

(a) Head lettuce which is in a retail establishment in the possession of a retailer for the purpose of resale directly to consumers

(b) Head lettuce which is sold by a producer that is regularly engaged in the production of lettuce, directly to consumers on the premises where the lettuce is produced or lettuce at a retail stand which is operated by such producer near the point of production.

(c) Head lettuce which is prepared for transportation, transported, or sold by a producer or jobber of lettuce in containers which contain less than 18 heads of lettuce for sale to retail stores of not more than one such container per sale.

(d) Lettuce which is sold to the armed forces of the United States government or for export markets other than Canada or Mexico.

SEC. 15 Section 48056 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended and renumbered to read:

48055. Head lettuce, which is packed or placed in layers in any container, shall not vary in size in any one container more than 15 percent of heads which would fairly tightly pack a size, larger or smaller, than the size which is marked. It shall be fairly tightly packed with the same numerical count of regularly arranged heads in each layer. None of the heads shall be placed outside of the regular arrangement of three uniform flat layers in standard container number 45 and two uniform flat layers in standard container number 45A or 45B. If, however, 2½ dozen heads of lettuce of the 2½ dozen size when fairly tightly packed in standard container number 45A or 45B are packed in such container six heads of the same size or dimensions as the heads which are contained in the upper and lower layers may be placed between such layers if the upper

and lower layers consist of 12 heads each and the total count in the container is 30 heads.

SEC. 16. Section 48057 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 17. Section 50631 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

50631. The standard container and pack for tomatoes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in Article 3 (commencing with Section 50651) of this chapter.

SEC. 18. Section 50632 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC. 19. Section 50651 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

50651. All green tomatoes which are not wrapped shall be in standard container number 22C, 53, 54, 55, 56, or 57.

SEC. 20. Section 52651 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

52651. The director may maintain seed potato test plots, under such climatic conditions as he may deem necessary, where samples of seed potatoes which are produced within or outside of the state may be grown to determine the amount of virus or other diseases in such seed sources. In order to effectuate the purposes of this section, the director may enter into agreements with any person or agency interested in the production, improvement, or certification of seed potatoes, may acquire land by lease or purchase, and may accept contributions and collect fees for services performed under authority of this section.

SEC. 21. The heading of Article 2 (commencing with Section 52681) of Chapter 3 of Division 18 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

Article 2. Examination and Certification of Seed Potatoes

SEC. 22. Section 52681 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

52681. The director shall promote and protect the potato industry of this state. The director shall establish and enforce such regulations as he deems necessary for the examination and certification of seed potatoes which are grown within the state, to produce improved varieties or a higher quality of seed potatoes.

SEC. 23. Section 52682 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

52682. The director shall issue to each grower a certificate which shows the variety, quality, and freedom from insect pests and diseases of the seed potato crop which is examined. Each certificate shall also show the number of acres of seed potatoes which are so certified.

SEC. 24. Section 52712 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

52712. If the director approves the application of such prospective grower of certified seed potatoes, he shall notify the applicant and also advise the commissioner of the county where the planting is to occur, and he may instruct the commissioner to make the necessary inspections and certification.

SEC. 25. Section 52742 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

52742. Any person that willfully misbrands, adulterates, or otherwise misrepresents or interferes with the grade or quality of certified seed potatoes or that in any way changes the certificates which are issued by the director is guilty of a misdemeanor.

SEC. 26. Section 52982 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

52982. The district attorney of the county in which any such nuisance is found, at the request of the director or the commissioner, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent such nuisance. Upon judgment and by order of the court, such nuisance shall be condemned and destroyed in the manner directed by the court, denatured, or otherwise processed, or released upon such conditions as the court in its discretion may impose to insure that the nuisance will be abated.

SEC. 27. Section 53562 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

53562. The district attorney of the county in which any such nuisance is found, at the request of the director or the commissioner, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent such nuisance. Upon judgment and by order of the court, such nuisance shall be condemned and destroyed in the manner directed by the court, or relabeled, or reconditioned, or released upon such conditions as the court in its discretion may impose to insure the nuisance will be abated.

SEC. 28. Section 55842 of the Agricultural Code, as proposed by Senate Bill No. 1, is repealed.

SEC 29. Section 58654 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

58654. The purposes of this chapter are to do the following:

(a) Enable producers of this state, with the aid of the state, more effectively to correlate the marketing of their commodities with market demands for such commodities.

(b) Establish orderly marketing of commodities.

(c) Provide for uniform grading and proper preparation of commodities for market.

(d) Provide methods and means for the maintenance of present markets, or for the development of new or larger markets, for commodities which are grown within this state or for the prevention, modification, or elimination of trade

barriers which obstruct the free flow of such commodities to market.

(e) Eliminate or reduce economic waste in the marketing of commodities.

(f) Restore and maintain adequate purchasing power for the producers of this state.

SEC. 30. Section 58780 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

58780. In the preparation of the list of producers or handlers to be used in the formulation or amendment of any marketing order or marketing agreement, the director may omit from such list the name of any person that makes only casual sales of the product which is involved, or whose sales or marketings of such product are incidental to urban home ownership, or the result of activity other than a commercial farm or business venture. Any person that is excluded from such lists is not subject to the provisions, including the payment of any assessments, which are applicable upon producers, or handlers, as prescribed in any such marketing order or marketing agreement.

SEC. 31. Section 58784 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

58784. At any public hearing which is held in connection with the formulation or amendment of a marketing order or marketing agreement, the director shall receive testimony with respect to the establishment of the official producer or handler list which is applicable, and may thereafter issue regulations to effectuate the provisions of this section and of this chapter.

SEC. 32. This act is intended to implement the recommendations of the Senate Fact Finding Committee on Agriculture and those of the Industry Advisory Committee on Agricultural Code Revision, as set forth in the third progress report of the Senate Fact Finding Committee on Agriculture to the 1967 California Legislature.

CHAPTER 11

An act to amend Sections 14261, 14506, 14559, 14586, 14902, 14903, 14905, 14931, 14961, 14962, 14964, 14965, 14966, 14981, 14982, 15001, 15021, 15051, 15052, 15057, 15102, 15104, 15105, 15106, 15107, 15110, 15112, 15113, and 15151 of, to amend the title of Chapter 6 (commencing with Section 14901) of Division 7 of, and to add Section 14906 to, the Agricultural Code, as proposed by Senate Bill No. 1, relating to commercial feed and fertilizer.

[Approved by Governor March 14, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 14261 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14261. This chapter does not apply to any of the following:

(a) Any livestock remedy which is sold exclusively to, and used exclusively by, or under the direction of, a licensed veterinarian, nor to any livestock remedy which is compounded by a registered pharmacist upon the prescription of a licensed veterinarian.

(b) Any drug or other preparation which is dispensed or compounded by a registered pharmacist at the request of the purchaser if such drug or preparation is sold at retail.

(c) Any commercial feed which is subject to the provisions of Chapter 6 (commencing with Section 14901) of this division, irrespective of the presence in such commercial feed of any ingredients which otherwise would constitute a livestock remedy.

SEC. 2. Section 14506 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14506. "Commercial fertilizer" means any substance, as defined in Section 14509, which contains 5 percent or more of nitrogen, available phosphorus pentoxide, or soluble potassium oxide, singly, collectively or in combination. It does not include manure, hay, straw, peat, or leaf mold.

SEC. 3. Section 14559 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14559. The chemical analysis of phosphate rock, and every other agricultural mineral the principal constituent of which is calcium phosphate shall state the percentage of available phosphorus pentoxide. If in addition a percentage of total phosphorus pentoxide is stated, the percentage of insoluble phosphorus pentoxide shall also be stated. The term and the percentage of available phosphorus pentoxide shall be shown as prominently as any other terms and percentages on the tag.

SEC. 4. Section 14586 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14586. If the analysis of a sample of commercial fertilizer shows a deficiency of not more than 0.5 percent of nitrogen, or not more than 0.7 percent of available phosphorus pentoxide, or not more than 0.5 percent of soluble potash, the statement of the producer, manufacturer, importer, agent, or dealer, as required pursuant to this chapter, is not false within the meaning of this chapter.

SEC. 5. The title of Chapter 6 (commencing with Section 14901) of Division 7 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

CHAPTER 6. COMMERCIAL FEED

SEC. 6. Section 14902 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14902. "Commercial feed" includes all feed and concentrates which are used for feeding livestock and poultry, except the following:

(a) Whole seeds or grains, if unmixed.

(b) Fresh green roughage and unprocessed liquid milk in all its forms

(c) Whole hays, straws, cottonseed hulls, corn stover, and wet citrus waste residue, if unprocessed and unmixed with other materials.

(d) Wet garbage.

(e) Salt, except in block or chunk form.

(f) Preparations which are sold as or represented to be primarily for the cure or mitigation of disease.

(g) Preparations which are sold for feeding domestic pets, such as dogs, cats, and birds.

SEC. 7. Section 14903 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14903. "Established plant, warehouse, or place of business" means any permanent office headquarters which is maintained by an importer, broker, seller, or authorized manufacturer's agent, or any permanent warehouse, building, or structure in or from which a legitimate permanent business is carried on as such in good faith and not for the purpose of evading this chapter, during the usual and customary business hours, and at which stocks of the commercial feed regulated by this chapter are sold, manufactured, processed, mixed, distributed, stored, or kept in quantities reasonably adequate and usually carried for the requirements of such business, and available for regular inspection by the director or his inspectors. It does not mean temporary residence, tent, temporary stand, itinerant truck or transportation vehicle, or other temporary quarters, occupied pursuant to any temporary arrangement to evade this chapter.

SEC. 8. Section 14905 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14905. "Special mix" means any commercial feed which is manufactured, processed, or mixed pursuant to specifications which are supplied by the purchaser.

SEC. 9. Section 14906 is added to the Agricultural Code, as proposed by Senate Bill No. 1, to read:

14906. "Toll milling" or "custom milling" means the grinding or mixing of commercial feeds for a fee where the only service performed is for the grinding or mixing of the feed.

SEC. 10. Section 14931 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14931. The director shall enforce this chapter and adopt and enforce such regulations relating to the sale of, and to the manner of making inspection tonnage tax payments upon, commercial feed as he deems necessary to carry into effect the full intent and meaning of this chapter.

SEC. 11. Section 14961 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14961. Except as otherwise provided in this chapter or by specific regulations of the director which declare that the state-

ment required pursuant to this article is not applicable to certain products, every lot or parcel of commercial feed which is sold or distributed within this state, shall have affixed to a conspicuous place on the outside of the lot or parcel a tag or label.

SEC. 12. Section 14962 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14962. The tag or label shall contain a legible and plainly printed statement which certifies all of the following:

(a) The net weight of the contents of the lot or parcel.

(b) The name, brand, or trademark.

(c) The name and principal address of the manufacturer or person that is responsible for placing the commodity on the market.

(d) The minimum percent of crude protein.

(e) The minimum percent of crude fat.

(f) The maximum percent of crude fiber.

(g) The maximum percent of ash.

(h) The recognized official name of each ingredient which is used in its manufacture.

(i) The percent of such ingredients as corncobs, oat hulls, barley hulls, rice hulls, ground light rice, or similar materials, if such materials constitute a portion of the lot or parcel.

(j) The maximum percent of mineral matter it contains.

(k) In the case of any mixed feed which contains more than 5 percent of mineral ingredients, the minimum percentage of calcium (Ca), of phosphorus (P), of iodine (I), and the maximum percentage of salt if salt is added.

(*l*) The maximum percentage of salt in any mixed feeds if more than 2 percent of salt is present or added.

(m) In the case of any commercial feed for which any special quality is claimed, such as vitamine potency, amino acid content, or protein quality, a definite guarantee relative to such quality.

(n) If any simple animal protein concentrate is sold or distributed, the quality index of such protein may be certified to in addition to the minimum percent of crude protein.

(o) In the case of any commercial feed which contains a nonnutritive substance which is intended for use in the diagnosis, cure, mitigation, treatment, or prevention of any disease or pest, or which is intended to affect the structure or any function of the animal body, the amount of such substance present, directions for use, and any necessary warnings against misuse.

SEC. 13. Section 14964 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14964. If a manufacturer, processor, or mixer of any commercial feed makes a claim or guarantee relative to the content of the commercial feed on or with the package which contains it, and the claim or guarantee is in addition to those required by law, he is responsible for maintaining the claim

or guarantee, and may be required to submit to the director information and records pertinent to the claim or guarantee.

SEC. 14. Section 14965 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14965. Any commercial feed which contains a substance that is toxic or poisonous if consumed in quantities greater than recommended by the manufacturer shall be so labeled that the user will be warned of the toxic or poisonous effects which result from feeding the excess quantity.

SEC. 15. Section 14966 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14966. Commercial feed is mislabeled if in any respect it is not as represented.

SEC. 16. Section 14981 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14981. The director shall by regulation fix the standards for commercial feed.

SEC. 17. Section 14982 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

14982. The director, by regulation, may establish permissible tolerances for pesticide chemicals, chemical additives, and drugs in or on commercial feed. Tolerances which are so established shall be such as to insure the safety of livestock and poultry and the products of livestock and poultry which are used for human consumption.

SEC. 18. Section 15001 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15001. The director, his agents, and his inspectors shall have free access to all premises or conveyances which are used in the manufacture, transportation, importation, sale, or storage of any commercial feed. They may open any parcel which contains or is supposed to contain any commercial feed, and take samples and analyze them.

SEC. 19. Section 15021 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15021. Each of the following persons shall obtain a license from the director for each plant operated which authorizes him to sell, manufacture, process, mix, or distribute commercial feed before he engages in such activity:

(a) Any person that sells commercial feed except a person that makes only retail sales of commercial feed which bear the tag, stamp, or other approved indication that the commercial feed is from a licensed manufacturer or guarantor that has assumed full tax responsibility for the tonnage tax due under Section 15051.

(b) Any person that manufactures, processes, or mixes, for another, commercial feed.

(c) Any person that distributes commercial feed.

SEC. 20. Section 15051 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15051. Any manufacturer, importer, jobber, firm, association, corporation, or person that sells to the consumer-buyer

any commercial feed shall pay to the director an inspection tonnage tax at the rate of four cents ($0.04) for each ton sold. He shall also affix to each package or container of such commercial feed a tag, stamp, or other approved indication that the inspection tonnage tax specified in this article has been paid.

SEC. 21. Section 15052 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15052. If any commercial feed is sold in bulk, the person that sells it shall report the sale and make payment of the inspection tonnage tax upon such sale pursuant to the regulations of the director.

SEC. 22. Section 15057 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15057. Each tag shall both:

(a) Bear the inscription "California commercial feed tax paid."

(b) Indicate the number of pounds which are to be placed in the container to which the tag is to be attached and for which the tax is paid.

SEC. 23. Section 15102 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15102. It is unlawful for any person to sell or distribute in this state, any commercial feed unless:

(a) There is attached to the commercial feed the labels, tax stamps, tags, or other approved indication of tax payment.

(b) He furnishes to the purchasers of bulk feeds, at time of each delivery, such documents as are required by this chapter and the regulations which are adopted pursuant to it.

SEC. 24. Section 15104 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15104. It is unlawful for any person to sell or distribute in this state any commercial feed without complying with the provision of this chapter and the regulations which are adopted pursuant to it.

SEC. 25. Section 15105 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15105. It is unlawful for any person to sell or distribute in this state any commercial feed which does not conform to the analysis, guarantees, or any other representation made on the tag or label or on the invoice, sales slip, or weight certificate.

SEC. 26. Section 15106 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15106. It is unlawful for any person to fail to properly state the recognized official name of each ingredient used in the manufacture of any commercial feed.

SEC. 27. Section 15107 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15107. It is unlawful for any person to fail to properly state the percent in any commercial feed of such ingredients as corncobs, oat hulls, barley hulls, rice hulls, ground light rice, or similar materials, if such materials constitute a portion of

the package, lot, or parcel or the percent of grit or inert matter.

SEC. 28. Section 15110 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15110. It is unlawful for any person to make any false or fraudulent claim or representation, which relates to any commercial feed, on any label or invoice, or in any advertisement, or in any other manner.

SEC. 29. Section 15112 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15112. It is unlawful for any person to mix or adulterate any commercial feed with any substance injurious to the health of livestock or poultry.

SEC. 30. Section 15113 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15113. In addition to the penalty which is provided in Section 15101, such lot of commercial feed may, upon direction of the court, be seized, condemned, and sold. The court may, in its discretion, release the mixed or adulterated commercial feed so seized when the requirements of this chapter have been complied with, and upon payment of all costs and expenses which are incurred by the state in any proceedings connected with the seizure.

SEC. 31. Section 15151 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

15151. Any lot of commercial feed which is offered for sale in violation of any provision of this chapter shall, pursuant to regulations of the director, be removed from sale by the vendor of the commercial feed upon his receiving notice from the director of the violation. The vendor shall withhold the commercial feed from sale until the violation has been corrected.

SEC. 32. This act is intended to implement the recommendations of the Senate Fact Finding Committee on Agriculture and those of the Industry Advisory Committee on Agricultural Code Revision, as set forth in the third progress report of the Senate Fact Finding Committee on Agriculture to the 1967 California Legislature.

CHAPTER 12

An act to amend Sections 29061, 29063, 29091, 29095, 29097, 29124, 29125, 29126, 29217 and 29218 of the Agricultural Code, as proposed by Senate Bill No. 1, relating to beehives and appliances

[Approved by Governor March 14, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 29061 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29061. The director may establish by regulation and maintain and enforce a quarantine at the boundaries of, or within, the state, to protect the bee industry against the introduction or spread of any bee disease. He may make and enforce such regulations as may be necessary to prevent any bees, comb, used hives, or used appliances from passing over any quarantine line which is established and proclaimed pursuant to this article.

SEC. 2. Section 29063 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29063. If any quarantine is established pursuant to this article, it is unlawful for any person to move any bees, comb, used hive, or used appliance across the lines established by such quarantine, except pursuant to the regulations of the director.

SEC. 3. Section 29091 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29091. Except as otherwise provided in Section 29092, it is unlawful for any person to import or transport into the state any comb, bees on comb, package bees, or any used hive, or used appliance, unless each separate load, lot, or shipment is accompanied by a valid certificate which is as prescribed by this article, and unless such certificate is delivered to the commissioner of the county of destination or to the director, if there is no commissioner in the county, within 72 hours after the arrival of the load, lot, or shipment.

SEC. 3.1. Section 29095 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29095. Any shipment of bees on comb, package bees or queens, used hives, or used appliances arriving in this state which is not accompanied by, where required by Section 29091, a valid certificate and, if required by Section 29094, a declaration, shall be refused entry and returned to the shipper or destroyed, at the option and expense of the owner or person in charge of the shipment.

SEC. 4. Section 29097 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29097. If any bees, comb, used hives, or used appliances entering California are found to be diseased at the time of inspection in this state within 30 days after arrival, the inspector may hold such apiary, lot, or shipment. He shall give notice to the owner or bailee, as prescribed in Section 29064, that the apiary, lot, or shipment is held.

SEC. 5. Section 29124 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29124. It is unlawful for any person to transport any comb which is not occupied by a live bee colony within the state unless such comb is tightly enclosed so as to prevent access to the comb by bees.

SEC. 6. Section 29125 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29125. It is lawful for any person, except when prohibited by other provisions of this chapter, to do any of the following:

(a) Transport any diseased hive, together with its contents, to a suitable place for burning, or to a wax salvage plant licensed under the provisions of Article 7 (commencing with Section 29191) of this chapter, after he has killed the bees in such hive and sealed the hive to prevent the entrance of live bees.

(b) Transport diseased comb, including any frame associated with it, to a suitable place for burning, or to a wax salvage plant, licensed under the provisions of Article 7 (commencing with Section 29191) of this chapter if the comb is tightly enclosed so as to prevent access to the comb by bees.

SEC. 6.1. Section 29126 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29126. It is unlawful for any person to move or transport any bees, comb, used hives and used appliances, or colonies within the state which are diseased, except for abatement pursuant to this chapter, or for research pursuant to Section 29128.

SEC. 7. Section 29217 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29217. It is unlawful for any person to keep any comb which is not occupied by a live bee colony unless such comb is tightly enclosed so as to prevent access to the comb by bees.

SEC. 8. Section 29218 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

29218. Any hive or appliance which contains any comb that is not occupied by a live bee colony and that is accessible to bees constitutes a public nuisance. It shall be subject to abatement in the same manner as is provided in Article 6 (commencing with Section 29151) of this chapter for abatement of disease.

SEC. 9. This act is intended to implement the recommendations of the Senate Fact Finding Committee on Agriculture and those of the Industry Advisory Committee on Agricultural Code Revision, as set forth in the third progress report of the Senate Fact Finding Committee on Agriculture to the 1967 California Legislature.

CHAPTER 13

An act to amend Sections 16461, 16908, 17121, 17954, 20282, 21291, 21566, and 23121 of the Agricultural Code, as proposed by Senate Bill No. 1, relating to livestock and poultry.

[Approved by Governor March 14, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 16461 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

16461. Any money in the Department of Agriculture Fund derived under any of the provisions of this part may be expended for the administration and enforcement of any of the provisions of the following portions of this code, notwithstanding any other provision of law limiting the expenditure of any such money to some specific purpose or to the administration or enforcement of some specific section, article, or chapter of this part:

(a) Part 1 (commencing with Section 16301) and Part 2 (commencing with Section 17401), Division 9.

(b) Division 10 (commencing with Section 20001).

(c) Division 11 (commencing with Section 23001).

SEC. 2. Section 16908 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

16908. It is unlawful for any person that owns or operates any motor truck, or motor truck and trailer, or semitrailer, to confine or permit to be confined, in such vehicle, any animal for a longer period than 28 consecutive hours from the time the animal was last fed and watered. Upon the written request of the owner or person in charge of the animal, the period of confinement may be extended to 36 hours. Before the expiration of the permissible period of confinement, the animal shall be unloaded in a humane manner by means of a chute or tailgate of sufficient size into properly equipped pens for rest, water, and feeding, for a period of at least five consecutive hours.

The failure of a person to feed or water an animal within the time limit prescribed by this section is not a violation of this section if the feeding and watering of the animal is prevented by storm or other accidental or unavoidable causes which could not be anticipated or avoided by the exercise of due diligence and foresight.

SEC. 3. Section 17121 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

17121. A lawful fence is any fence which is good, strong, substantial, and sufficient to prevent the ingress and egress of livestock. No wire fence is a good and substantial fence within the meaning of this article unless it has three tightly stretched barbed wires securely fastened to posts of reasonable strength, firmly set in the ground not more than one rod

apart, one of which wires shall be at least four feet above the surface of the ground. Any kind of wire or other fence of height, strength and capacity equal to or greater than the wire fence herein described is a good and substantial fence within the meaning of this article. The term "lawful fence" includes cattle guards of such width, depth, rail spacing, and construction as will effectively turn livestock.

SEC. 4. Section 17954 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

17954. Any moneys in the Department of Agriculture Fund which were derived under any of the provisions of this chapter may be expended for the administration and enforcement of any of the provisions of this code stated in Section 16461, notwithstanding any other provision of law which limits the expenditure of any such money to some specific purpose or to the administration or enforcement of some specific section of this chapter.

SEC. 5. Section 20282 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

20282. Any money in the Department of Agriculture Fund derived under any of the provisions of this division may be expended for the administration and enforcement of any of the provisions of this code stated in Section 16461, notwithstanding any other provision of law which limits the expenditure of any such money to some specific section, article, or chapter of this division.

SEC. 6. Section 21291 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

21291. The fees which are provided by this article are maximum fees. The director may adopt a schedule of fees which are below the maximum fees which are established in this article and may adjust such schedule from time to time whenever he finds that the cost of administering and enforcing the provisions of this code stated in Section 16461 may be maintained with such below-maximum fees.

SEC. 7. Section 21566 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

21566. The fees which are provided by this article are maximum fees. The director may adopt a schedule of fees which are below the maximum fees that are established in this article and may adjust such schedule from time to time whenever he finds that the cost of administering and enforcing the provisions of this code stated in Section 16461 may be maintained with such below-maximum fees.

SEC. 8. Section 23121 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

23121. Any money in the Department of Agriculture Fund which is derived pursuant to this division may be expended for the administration and enforcement of any of the provisions of this code stated in Section 16461, notwithstanding any other provision of law which limits the expenditure of any such money to some specific purpose or to the administration

or enforcement of some specific section, article, or chapter, of this division.

SEC. 9. This act is intended to implement the recommendations of the Senate Fact Finding Committee on Agriculture and those of the Industry Advisory Committee on Agricultural Code Revision, as set forth in the third progress report of the Senate Fact Finding Committee on Agriculture to the 1967 California Legislature.

CHAPTER 14

An act to amend Section 795.2 of the Agricultural Code, and to amend Section 46983 of, and to add Section 46989 to, the Agricultural Code, as proposed by Senate Bill No. 1, relating to tangerine standards, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor March 14, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. Section 795.2 of the Agricultural Code is amended to read:

795.2. As used in this section, the term "tangerines or mandarins" shall include all varieties and hybrids of the mandarin group (Citrus reticulata) and all varieties of tangelos. Tangarines or mandarins shall be (1) mature, (2) well colored, (3) free from serious damage by freezing or drying due to any cause, and (4) free from serious decay.

The following standards shall be applied in determining whether or not tangerines or mandarins meet the requirements of this section:

(1) Tangarines or mandarins are not mature unless the juice contains soluble solids equal to or in excess of 6½ parts to every part of acid contained in the juice (the acidity of the juice to be calculated as citric acid without water or crystallization).

(2) Tangarines or mandarins are not well-colored unless 90 percent, by count, of the fruits in any lot show a yellow, orange or red color on 75 percent or more of the surface of the fruit.

(3) Damage by freezing or drying due to any cause is serious if 20 percent or more of the pulp or edible portion of the fruit shows evidence of drying, desiccation, or a mushy condition. Evidence of damage shall be determined by as many cuts of each individual fruit as are necessary.

(4) Decay is serious if any part of the fruit is affected with decay.

Not more than 10 percent, by count, of the tangerines or mandarins in any one container or bulk lot may fail to meet

the requirements because of damage by freezing or drying due to any cause.

Not more than 5 percent, by count, of the tangerines or mandarins in any one container or bulk lot may fail to meet the requirements because of serious decay.

No tolerance shall be allowed in determining whether any lot of tangerines or mandarins comply with the maturity requirements set forth in standard (1) of this section.

The diameter in inches of tangerines or mandarins in containers marked with one of the size designations tabulated in Column A, below, shall be between the measurements tabulated in corresponding lines of Column B and Column C; provided, however, that the diameter in inches of not more than 10 percent, by count, of the fruit in the container may measure less than the corresponding measurement in Column B, and not more than 10 percent, by count, of the fruit in the container may measure more than the corresponding measurement in Column C.

Column A	Column B	Column C
Super colossal	3.25	4.00
Colossal	3.00	3.25
Mammoth	2.75	3.00
Jumbo	2.50	2.75
Large	2.25	2.50
Medium	2.00	2.25
Small	1.75	2.00

Containers of tangerines or mandarins which fail to meet the size requirement shall be considered as complying with this section if the container is marked with the words "irregular sizes."

Not more than one of the above size designations shall appear on any container.

SEC. 2. Section 46983 of the Agricultural Code, as proposed by Senate Bill No. 1, is amended to read:

46983. The standards which are prescribed by Sections 46984 to 46989, inclusive, shall be applied in determining whether or not tangarines or mandarins meet the requirements of this article.

SEC. 3. Section 46989 is added to the Agricultural Code, as proposed by Senate Bill No. 1, to read:

46989. Tangerines or mandarins shall be mature. Tangerines or mandarins are not mature unless the juice contains soluble solids equal to or in excess of 6½ parts to every part of acid contained in the juice (the acidity of the juice to be calculated as citric acid without water or crystallization).

No tolerance shall be allowed in determining whether any lot of tangerines or mandarins comply with the maturity requirements set forth in this section.

SEC. 4. Sections 2 and 3 of this act shall become operative only if the Agricultural Code as proposed by Senate Bill No.

1 is enacted by the Legislature at its 1967 Regular Session, at which time Section 795.2 of the Agricultural Code of 1933 as amended by Section 1 of this act is repealed.

SEC. 5. This act is an urgency statute necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

To be assured the consumer will receive mature tangerines, minimum requirements as to soluble solids must be established.

To be assured the producer will have a continuing market for this increasingly important citrus fruit, immature fruit must be kept off the market. If this is not done, consumer satisfaction will not be provided, and developed markets will disappear.

In order to avoid the waste of tangerines, and at the same time properly protect the consuming public during the 1967 tangerine harvesting season, it is necessary that this act be in effect immediately.

CHAPTER 15

An act to repeal and reenact the Agricultural Code, and including therein codification of Chapter 89, Statutes of 1939, and to repeal Chapter 89, Statutes of 1939, relating to agriculture.

[Approved by Governor March 15, 1967. Filed with Secretary of State March 15, 1967.]

The people of the State of California do enact as follows:

SECTION 1. The Agricultural Code is repealed.

SEC. 2. The Agricultural Code is enacted, to read:

GENERAL PROVISIONS AND DEFINITIONS

1. This act shall be known as the "Agricultural Code."

3. It is hereby declared, as a matter of legislative determination, that the provisions of this code are enacted in the exercise of the power of this state for the purposes of promoting and protecting the agricultural industry of the state and for the protection of the public health, safety, and welfare. In all civil actions the provisions of this code shall be liberally construed for the accomplishment of these purposes and for the accomplishment of the purposes of the several divisions of this code, and in criminal actions the rule of construction set forth in Section 4 of the Penal Code shall be the rule of construction for this code.

4. The provisions of this code, insofar as they are substantially the same as existing law, are restatements and continuations of existing law, and not new enactments. The enactment of this code shall not impair any privilege granted or right

acquired under any of the laws of this state prior to the date it takes effect.

5. All persons who, at the time this code goes into effect, hold office under any of the laws that are repealed by this code, which offices are continued by this code, continue to hold the offices according to their former tenure.

6. No action or proceeding which is commenced before this code takes effect, and no right which is accrued, is affected by any provision of this code, but all procedure thereafter taken in such action or proceeding shall conform to the provisions of this code so far as possible.

7. Any person in whom the enforcement of any provision of this code is vested has the power of a peace officer for the purpose of such enforcement.

8. The district attorney of any county in which a violation of any provision of this code occurs shall, upon request of any enforcing officer or other interested person, prosecute such violation. The prosecutor of any municipality has concurrent jurisdiction as to any violation which is committed within his territorial jurisdiction.

9. Unless a different penalty is expressly provided, a violation of any provision of this code is a misdemeanor.

10. Whenever any notice, report, statement, or record is required by this code, it shall be in writing unless it is expressly provided that it may be oral.

11. Whenever any notice, report, statement, or record is required by this code to be kept or made in writing, it shall be in the English language.

12. Unless otherwise specifically provided, whenever any document is required or permitted by this code to be recorded, it shall be recorded in the office of the county recorder of the county in which the property or thing which is affected is situated.

13. Whenever any power or authority is given by this code to any person, it may be exercised by any deputy, inspector, or agent who is duly authorized by him.

14. Wherever, pursuant to this code, any state department, officer, board, committee, or commission is authorized to adopt rules and regulations, such regulations shall be adopted in accordance with Chapter 4.5 (commencing with Section 11371), Part 1, Division 3, Title 2 of the Government Code, to the extent that that chapter is not specifically in conflict with the express terms of the provisions of this code which authorize the adoption of such regulations.

The authority to adopt any rule, regulation, or rule and regulation which is vested in any state department, officer, board, committee, or commission pursuant to this code includes the authority to amend or repeal such rule, regulation, or rule and regulation.

15. Whenever reference is made to any portion of this code or of any other law of this state, the reference applies to all amendments and additions to it.

16. Division, part, chapter, and article headings do not in any manner affect the scope, meaning, or intent of the provisions of this code.

17. If any provision of this code or its application to any person or circumstance is held invalid, the remainder of the code or the application of the provision to any other person or circumstance is not affected.

18. In all matters which arise under this code, the fact of possession by any person engaged in the sale of a commodity is prima facie evidence that the commodity is for sale.

19. Unless the context otherwise requires, the present tense includes the past and future tenses, and the future, the present tense.

20. Unless the context otherwise requires, the masculine gender includes the feminine and neuter.

21. Unless the context otherwise requires, the singular number includes the plural, and the plural the singular.

22. Inasmuch as the planned production of trees is distinguishable from the production of other products of the soil only in relation to the time elapsing before maturity, the production of trees shall be considered a branch of the agricultural industry of the state for the purposes of any law which provides for the benefit or protection of the agricultural industry of the state.

23. Inasmuch as the planned production of trees, vines, rose bushes, ornamental plants and other horticultural crops is distinguishable from the production of other products of the soil only in relation to the time elapsing before maturity, plants which are being produced by nurseries shall be considered to be "growing agricultural crops" for the purpose of any laws which pertain to the agricultural industry of the state.

24. It is hereby declared, as a matter of legislative determination, that the provisions of this section are enacted in the exercise of the power of this state for the purpose of protecting and furthering the public health and welfare. It is further declared that the floriculture and nursery industry of this state is affected with a public interest, in that, among other things:

(a) The production, processing, manufacture, and distribution of floriculture and nursery products constitute a paramount industry of this state which not only provides substantial and required revenues for the state and its political subdivisions by tax revenues and other means, and employment and a means of livelihood for many thousands of its population, but also furnishes substantial employment to related industries that are vital to the public health and welfare.

(b) Basic research and development for floriculture and the nursery industries contributes substantially to food production in this state which is essential to the welfare and health of its citizens.

It is also declared that the elimination of disorderly marketing of California floricultural and nursery products, and the development of new and larger markets through education, promotion and other means for these products, are affected with the public interest.

25. Unless the context otherwise requires, the definitions in the following sections govern the construction of this code.

26. "Commissioner" means any county agricultural commissioner.

29. "County" includes city and county.

32. "Department" means the Department of Agriculture.

35. "Director" means the Director of Agriculture.

38. "Person" includes firm, corporation, company, or association.

41. "Section" means a section of this code, unless some other statute is specifically mentioned.

44. "Sell" includes offer for sale, expose for sale, possess for sale, exchange, barter, or trade.

47. "Shall" is mandatory, and "may" is permissive.

49. "Subdivision" means a subdivision of the section in which that term occurs unless some other section is expressly mentioned.

DIVISION 1. STATE ADMINISTRATION

PART 1. THE DEPARTMENT OF AGRICULTURE

CHAPTER 1. ORGANIZATION

101. There is in the state government the Department of Agriculture.

102 The department is under the control of a civil executive officer known as the Director of Agriculture. He shall be appointed by, and hold office at the pleasure of, the Governor. The director shall execute and deliver, as provided by law, an official bond in the sum of twenty-five thousand dollars ($25,000).

103. Except as is otherwise provided in this chapter, the provisions of Chapter 2 (commencing with Section 11150), Part 1, Division 3, Title 2 of the Government Code govern and apply to the conduct of the department in every respect the same as if such provisions were herein set forth at length in this code, and whenever in that chapter the term "head of the department" or similar designation occurs, for the purpose of this code it means the director.

104. The director may appoint and in accordance with law fix the salaries of such assistants, deputies, agents, experts, and other employees as are necessary for the administration of the department.

105. The chief of the division of the department who has jurisdiction over livestock and poultry disease control, meat inspection and dairy inspection and control shall be a graduate

of a recognized college of veterinary medicine and be licensed to practice in this state.

CHAPTER 2. FISCAL DUTIES AND POWERS

Article 1. General Provisions

201. The department may expend in accordance with law all money which is made available for its use.

Article 2. Department of Agriculture Fund

221. The "Department of Agriculture Fund," which is a special fund, is continued in existence. Any money which is directed by law to be paid into the fund shall be paid into it and, unless otherwise specifically provided, shall be expended solely for the enforcement of the law under which such money was derived. The expenditure from the fund for the enforcement of any law shall not, unless otherwise specifically provided, exceed the amount of money which is credited to the fund pursuant to such law.

222. The director shall keep a separate record of the classes and sources of income which are credited to, and disbursed from, the Department of Agriculture Fund.

223. A sum not to exceed twenty-five thousand dollars ($25,000) may, upon approval of the Department of General Services, be withdrawn from the Department of Agriculture Fund to be used as a revolving fund by the department for the purposes for which the Department of Agriculture Fund may be used.

Article 3. Interdepartmental Expenses

241. The director may charge any bureau, division, board, or other agency of the department which is supported otherwise than by the appropriations from the General Fund its proportionate share of the administrative expense of the department, or a share in an amount which is computed to reasonably compensate the department for the administrative services which are rendered by it.

242. Apportionment of the expenses shall be made and determined by the director, subject to the approval of the Director of General Services. The proportionate or computed share so charged shall not, however, exceed 5 percent of the collections which are made by the department for the bureau, division, board, or other agency.

243. Any money which is charged and received by the department pursuant to this article shall be remitted to the State Treasury for credit to the current appropriation from the General Fund for the support of the department. The sum so remitted shall be available for expenditure for the support of the department.

Article 4. License and Registration

261. Unless otherwise specifically provided in this code, any license or registration which is issued pursuant to this code expires whenever the bond which is required of a licensee or registrant under this code lapses or is canceled. If, however, the bond is canceled as a result of the retirement from business of the bonding company and the director is satisfied that the licensee is solvent, he may continue the license or registration for a period of not to exceed 30 days to enable the licensee or registrant to secure a new bond.

Article 5. Collection

281. The director may direct suit in the name of the people of the state, as plaintiff, to be brought for the recovery of any license or other fee against any person required to take out a license or pay any fee pursuant to this code that fails, neglects, or refuses to take out such license or pay such fee, or that, without such license or payment of such fee, carries on or attempts to carry on the business or do any act for which such license or payment of such fee is required. In such case a writ of attachment may issue. The director may make the necessary affidavit for it. He need not, however, file any written undertaking in connection with the issuance of the writ.

282. In cases where the director may perform sampling, grading, testing, inspection, or certification services in relation to any agricultural product, or identification services in relation to root or top stock of any fruit or nut trees, and fix reasonable fees to pay the costs necessary to perform the services he may collect such fees in advance of performing the services. He need not, however, do so if, in his opinion, the benefit of such services would be lessened by advance payment.

283. In lieu of collecting fees in advance pursuant to Section 282, the director may, if he deems it necessary, accept a bond which guarantees payment of the fees. The bond shall be satisfactory to the director.

284. If the director finds that any amount not in excess of three dollars ($3) which is due pursuant to this code is so small as not to justify the cost of its collection or believes that its collection is improbable, he may remove the amount which is due from the records of the department He shall not, thereafter, be held accountable for its collection.

Article 6. Refunds

301. As used in this article, "fee" includes, but is not limited to, any application fee, license fee, permit fee, inspection fee, certification fee, registration fee, identification fee, analysis fee, or certificate fee.

302. The director may authorize the refund of any money which is received or collected by the department in the payment of any fee, assessment, or tax.

303. A refund may be made in whole or in part in any of the following instances:

(a) The purpose for a fee cannot lawfully be accomplished for the person that paid the fee through no fault of such person.

(b) A refund of a fee is requested by the payer before any examination or inspection has been performed or service rendered by the department for the payer.

(c) The payment of a fee, assessment, or tax represents an overpayment, payment in duplicate, payment in error in law, or payment through error of the payer or the department.

304. The fiscal officer of the department shall make payment of any refund pursuant to this article if the director prepares a voucher which sets forth the facts which pertain to the refund and authorizes its payment.

305. If any money which is to be refunded has been deposited in the State Treasury, the State Controller, upon receipt of a claim which is filed by the department, shall draw his warrant for the payment of the refund from the fund to which the money was credited.

306. If the director finds that the amount of any refund is less than three dollars ($3), he may retain such amount for use for the same purpose for which the original payment was made, unless demand for the payment of such refund is made within six months after the determination that a refund is due. If such demand is made, the refund shall be paid.

CHAPTER 3. OTHER POWERS AND DUTIES

Article 1. General Provisions

401. The department shall promote and protect the agricultural industry of the state.

402. The department shall prevent fraud and deception in any of the following:

(a) Packing or labeling, or in any phase of the marketing, of any agricultural product which is governed by this code.

(b) Labeling and marketing of any commodity that is governed by this code, which is sold to producers for use in the production of crops in accordance with common practices.

403. The department shall prevent the introduction and spread of injurious insect or animal pests, plant diseases, and noxious weeds.

404. The department shall execute the provisions of this code, except as otherwise provided, and of other laws administered by it.

405. The department may distribute such insects as are useful in reducing the cost of crop production.

406. The department shall require reports from commissioners.

407. The director may adopt such regulations as are reasonably necessary to carry out the provisions of this code which he is directed or authorized to administer or enforce.

408. The director may enter upon any premises to inspect the premises or any plant, appliance, or thing which is on such premises.

Article 2. Services

431. The department shall collect and preserve books, pamphlets, periodicals, and other documents which contain information that relates to agriculture.

432. The department shall collect and prepare statistics, charts, films, photographs, and other illustrative or exhibit material and information which shows the actual condition and progress of agriculture in this state and elsewhere.

433. The department shall correspond with agricultural societies, colleges, schools, the commissioners, and with all other persons who are necessary to secure the best results to agriculture in this state.

434. The department shall issue and cause to be printed and distributed to the commissioners, and to such other persons as it may deem proper, bulletins, charts, photographs or other illustrative material or statements which contains all the information which is best adapted to advance the interest, business, and development of agriculture in the state. The department may broadcast by radio such portions of the illustrative material or statements as are adapted to give effect to this code. It may exhibit or display such data and material as have been collected or prepared, and may incur expenses which are necessarily incidental to the exhibit or display of such data and material.

435. The director may establish an identification record service for parent root and top stock of fruit and nut trees. He shall establish a reasonable schedule of fees for such service which is based upon the approximate cost of the service. Upon application of any person and the payment of the proper fees, the director shall assign to parent stock an identifying code number and make an appropriate record of such number.

436. Any money which is received by the department pursuant to Section 435 shall be paid into the State Treasury and be credited to the Department of Agriculture Fund. Any money in the Department of Agriculture Fund which was derived pursuant to such section may be expended for the administration and enforcement of any or all of the following which relate to nursery stock, notwithstanding any other provision of law which limits the expenditure of such money to some specific purpose or to the administration or enforcement of some specific section, article, chapter or law:

(a) Section 435.

(b) Article 7 (commencing with Section 5821), Chapter 8, Part 1 of Division 4.

(c) Chapter 1 (commencing with Section 6701), Part 3 of Division 4.

(d) Any other provision of Division 4, which relates to nursery stock, except any provision of Article 5 (commencing with Section 6001) of Chapter 9 or Chapter 10 (commencing with Section 6101) of Part 1, Part 5 (commencing with Section 8401), or Part 6 (commencing with Section 8801) of Division 4.

(e) Chapter 5 (commencing with Section 53301) of Division 18.

Article 3. Surveys and Investigations

461. The department may conduct surveys or investigations of any nursery, orchard, vineyard, agricultural commodity, agricultural appliance, farm, or other premises within the state liable to be infested or infected with any pest or disease for the purpose of detecting the presence of, or determining the status of, the pest or disease.

462. The department shall conduct a continuing investigation of the practice of artificial insemination of bovine animals in the state. The scope of the investigation shall be such as will, in the opinion of the department, disclose whether there is a need for statutory regulation of such practice. The director shall report the result of the investigation to the Governor and the Legislature at each general session, together with his recommendations as to any legislation on the subject which he deems necessary or desirable The report shall include such matters as the director considers to be relevant and shall include an estimate of the extent of the practice of artificial insemination as compared to natural insemination of bovine animals in this state.

463. The director may investigate the practice of artificial insemination upon animals other than bovine animals and report his findings and recommendations to the Governor and to the Legislature.

464. The director may maintain regional poultry and animal disease diagnostic laboratories for the purpose of making tests and examinations for, and diagnoses of, livestock and poultry diseases.

465. The director with the approval of the Governor, may appoint special committees of qualified persons to study and advise on special problems which affect the agricultural industry of the state and the work of the department.

Members of such special committees shall serve without compensation but are entitled to payment for necessary traveling expenses in the same manner as is provided by the State Board of Control rules for civil service officers and employees. Such expenses shall be paid out of appropriations made to the department.

All meetings of such committees shall be open to the public

Article 4. Intergovernmental Cooperation

481. The department may, with the approval of the Governor, cooperate with officials of the United States Department of Agriculture or with officials of other states in the conduct of pest or disease investigations outside of this state in the interest of the protection of the agricultural industry of this state from any pest or disease which is not generally distributed in this state.

482. The director may enter into cooperative agreements with individuals, associations, boards of supervisors, and with departments, divisions, bureaus, boards, or commissions of this state or of the United States for the purpose of eradicating, controlling, or destroying any infectious disease or pest within this state. He may enter into cooperative agreements with boards of supervisors for the purpose of administering and enforcing this code.

483. The director may arrange for the services of any individual employed by the United States, the state, or a county on a collaborative basis and allow him a reasonable fee and necessary expenses which are incurred when serving the department in a collaborative capacity.

CHAPTER 4. BUILDINGS OF THE DEPARTMENT OF AGRICULTURE

Article 1. Definitions and General Provisions

601. As used in this chapter, "fund" includes any account in a fund which consists of money derived from different sources for different purposes.

602 The department may, with the approval of the Department of General Services, purchase or otherwise acquire real property. It may construct and equip buildings upon such property and make improvements to such property, buildings, and equipment.

603. Any building or improvement which is constructed by the department pursuant to this chapter shall be primarily for the occupancy of commissions, divisions, bureaus, advisory boards, and services which are supported from the funds from which money is expended for the construction of the building or improvement

604. The building or improvement shall be administered and supervised by the department in accordance with rules and regulations which are established by the department and approved by the Department of General Services. Such rules and regulations shall be comparable to those for the administration and supervision of other state-owned buildings.

Article 2. Department of Agriculture Building Fund

621. The Department of Agriculture Building Fund is continued in existence.

622. When there are moneys available in the Department of Agriculture Fund, or in other funds which are subject to the jurisdiction of the director, not required to meet any demand which has accrued or may accrue against such funds, the Controller, upon executive order of the Director of Finance, shall transfer such sum as may be designated by the Director of Agriculture from the funds available in the Department of Agriculture Fund, or in such other funds, to the Department of Agriculture Building Fund.

623. All rentals which are collected pursuant to this chapter shall be deposited in the Department of Agriculture Building Fund.

624. All moneys in the Department of Agriculture Building Fund are appropriated without regard to fiscal years to carry out this chapter, including the costs of operation, maintenance, repairs, and other reasonable and necessary expenses of the buildings or improvements which are constructed or acquired pursuant to this chapter.

625. At least annually and oftener if the amounts collected as rentals should warrant, there shall be returned from the Department of Agriculture Building Fund to the Department of Agriculture Fund and to such other funds from which contributions were made to defray the cost of the buildings, equipment, and facilities which are constructed or acquired pursuant to this chapter, such amounts as are not necessary to meet the financial requirements of the Department of Agriculture Building Fund.

626. No money may be taken from the Department of Agriculture Fund, or other funds under the jurisdiction of the director, for transfer to the Department of Agriculture Building Fund if it will interfere with the administrative purposes for which the money was collected.

627. If any money from the Department of Agriculture Building Fund is used to purchase property or construct buildings and appurtenant facilities for the use of the department, either alone or with any other state agency, or for investment purposes in connection with such purchase or construction, the director may do any and all things which are necessary to protect the investment or use, including the purchase of insurance against the loss of, or damage to, the property, or the loss of its use and occupancy.

Any transaction which is entered into by the director pursuant to this section is subject to the approval of the Department of General Services.

628. Upon the completion of any buildings or improvements and the fulfillment of the obligation to reimburse the Department of Agriculture Fund, or other funds pursuant

to this chapter, any unused balances in the Department of Agriculture Building Fund shall, on order of the Controller and upon request of the director, be transferred to the General Fund.

Article 3. Leases and Rentals

651. Any building or improvement which is provided by the department pursuant to this chapter may contain space in excess of the requirements of the department. Until needed, such excess space may be leased or let by the department at such rental and upon such terms and conditions as are approved by the Department of General Services. The rentals charged shall be sufficient to provide a reasonable return to the Department of Agriculture Fund or other fund that is subject to the jurisdiction of the director for any contributions which are made for the cost of the construction of the building or improvement until the entire amount contributed, together with reasonable interest, has been returned.

652. The department, with the approval of the Department of General Services, shall determine the amounts which are returnable to the respective funds. The amounts shall not exceed the amount of the original contributions from the respective funds. Interest may, however, be paid on any contributions in the manner and amount which the department, with the approval of the Director of General Services, determines.

653. During the period of repayment, the department may contract with the Department of General Services to handle the rentals of any space over and above that which is required for the department and to furnish general supervision and maintenance in any building or improvement which is constructed pursuant to this chapter.

654. The director shall allocate space to the commissions, divisions, bureaus, advisory boards, and services which comprise the department or agencies that are subject to its jurisdiction which are supported from funds from which money is expended for the construction of buildings or improvements. He shall charge a rental for such space until such time as the contributions which are made from the Department of Agriculture Fund, or other funds subject to the jurisdiction of the director, have been repaid pursuant to this chapter.

655. The occupancy of any space which is not required by the department for the commissions, divisions, bureaus, advisory boards, and services which are mentioned in Section 654 shall be confined to that of other functions of the department, of other state agencies, of official agencies cooperating with the department under agreement, or of official agricultural agencies of the state or county. Rentals comparable to the rentals which are required by Section 654 shall be charged for such space.

656. When all funds have been reimbursed for contributions which are made for the construction and equipping

of any building or facility, the Department of General Services shall assume control of the operation and management of the building, improvement or facility. The Department of Agriculture shall have priority to occupy any space within any such building before the space is leased or let to any other agency at rental rates which are comparable to those charged to other state agencies for comparable facilities in other state-owned buildings.

PART 2. THE STATE BOARD OF AGRICULTURE

CHAPTER 1. ORGANIZATION

901. There is in the state government the State Board of Agriculture which consists of 13 members.

902. The members of the board shall be appointed by the Governor as follows:

(a) One from the Agricultural Sciences Division of the University of California.

(b) One from the agricultural department of one of the state colleges offering agriculture as a part of the curriculum.

(c) Two members shall be appointed from the state at large.

(d) Nine members, not more than one of whom shall be appointed from any one congressional district or from any one county.

903. The term of office of the members of the board is four years. The terms expire on January 15 of each year in the rotation which is presently established. Vacancies shall be filled by appointment for the unexpired term. On February 1 of each year the Governor shall designate one of the members of the board to serve as president.

904. The members shall be residents and citizens of the state and shall be specially qualified for this service through actual farm business or economic agricultural training. Except for the university and the state college members, each member of the board shall have a major interest in a separate branch of the agricultural industry.

905. The members shall serve without pay, but shall be allowed necessary traveling and incidental expenses which are incurred in the discharge of their duties. The expenses shall be paid from the appropriation for the support of the department.

CHAPTER 2. POWERS AND DUTIES

951. The board shall inquire into the needs of the agricultural industry of this state and the functions of the department in relation to such needs, and confer and advise with the Governor and the director as to how the agricultural industry may best be served by the department.

952. The board, and any member of it who is authorized by resolution of the board, may make investigations, conduct hearings, and prosecute actions concerning all matters and subjects which are under the jurisdiction of the department. For such purposes, the board and its authorized members shall have all of the powers and authority which are conferred upon a head of a state department by Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

953. The board shall hold meetings at least once a month in the office of the director at Sacramento.

954. Meetings of the board shall be held within the week which precedes the regular monthly meeting of the Governor's Council. Special or adjourned meetings may be held at the place of regular meeting, or at any other place in the state which the president may deem necessary. Special meetings of the board shall also be called by the president at any time upon the written request of four members of the board.

955. All meetings of the board shall be open and public.

PART 3. THE POULTRY IMPROVEMENT COMMISSION

CHAPTER 1 ORGANIZATION

1101. There is in the state government the Poultry Improvement Commission which consists of 10 members.

1102. Three of the members of the commission are ex officio members. They are:

(a) The Chief of the Poultry Division of the University of California.

(b) The Dean of the School of Veterinary Medicine of the University of California.

(c) The director.

1103. Seven of the members of the commission shall be appointed by the Governor for terms of four years.

The terms shall expire in the rotation which is presently established.

1104. Each appointive member shall serve for the term for which he is appointed and until his successor has been appointed and qualifies.

1105. In making appointments, the members shall be chosen so far as possible to give representation to the seven major poultry districts of the state.

1106. The members of the commission shall serve without compensation but may be reimbursed for their necessary traveling and other expenses which are incurred in the performance of their official duties.

CHAPTER 2 POWERS AND DUTIES

1201. The commission shall annually conduct a poultry testing project in the vicinity of Modesto, or at such other

place in the state as the commission may determine has similar qualifications as to central location, mild climate, and freedom from communicable diseases of poultry.

1202. The commission may provide for the collection of fees from exhibitors in such amounts as, in the opinion of the commission, will make the poultry testing projects self-perpetuating and self-supporting.

1203. The commission may do any of the following:

(a) Construct any necessary building.

(b) Employ necessary personnel.

(c) Disburse and receive funds for the purpose of conducting any poultry testing project.

(d) Prescribe regulations.

(e) Do any thing which is necessary for the conduct of any poultry testing project.

1204. Every state agency, service, and facility, including the University of California, the Department of Public Works, the State Printer, and the department, shall cooperate in providing such services in connection with the carrying out of this part as the commission may require.

1205. The poultry testing project fund in the State Treasury is continued in existence. All money which is received by the commission shall be paid into the fund and disbursed from the fund upon order of the commission for the purposes of carrying out this part.

1206. The commission shall make regulations which govern the payment of cash awards or premiums to exhibitors whose entries demonstrate the results of superior breeding. It may make such payments from the poultry testing project fund or any other money which is available for such purpose.

1207. All meetings of the commission shall be open and public.

1208. All records of the commission shall be open to inspection by the public during regular office hours.

DIVISION 2. LOCAL ADMINISTRATION

CHAPTER 1. COUNTY DEPARTMENT OF AGRICULTURE

2001. There is in each county government the county department of agriculture.

2002. The county department of agriculture is under the control of the county agricultural commissioner.

CHAPTER 2. COUNTY AGRICULTURAL COMMISSIONERS AND THEIR EMPLOYEES

Article 1. Qualifications

2101. The director shall examine persons who desire to become commissioners or deputy commissioners. He may prescribe regulations which govern such examinations. Successful

candidates shall be given a certificate of qualification which shall be valid for five years unless revoked.

2102. The director shall pass upon the qualifications of persons who desire to become county agricultural inspectors and shall issue certificates of qualification to successful candidates.

2103. The director shall issue a certificate of qualification, for any county which has a charter that provides for civil service examination of county agricultural inspectors, to any person who presents a certificate which shows that such person has passed the examination.

2104. A commissioner, deputy commissioner, or county agricultural inspector need not be a resident of the county for which he may be chosen.

2105. Prior to entering upon his duties, the commissioner shall file the oath of office which is prescribed for county officers and file an official bond in the sum of one thousand dollars ($1,000).

Article 2. Appointment and Employment

2121. The commissioner shall be appointed by the board of supervisors of the county. Any chartered county may, however, prescribe a different method of appointment.

2122. The term of office of the commissioner shall be four years from and after his appointment and until his successor is appointed. He may, however, be removed pursuant to this chapter.

2123. Except as otherwise provided in this chapter, a person shall not be appointed to the office of commissioner or deputy commissioner unless he has a certificate of qualification from the director. The certificate of any qualified incumbent shall be renewed without further examination.

2124. If the board of supervisors of such adjoining county consents, the board of supervisors of any county in which there is no commissioner may employ a qualified commissioner or a qualified deputy commissioner of the adjoining county to perform the duties of commissioner in the employing county.

A commissioner or deputy commissioner who is so employed shall have such authority and powers as are conferred upon a commissioner by this code. He is not required to comply with residence or other qualifications for office within the employing county.

2125. In any county in which no commissioner has served, the director shall perform the duties of commissioner in the same manner, to the same extent, and with the same authority as if he had been the duly appointed commissioner in such county.

2126. The commissioner may appoint deputy commissioners, inspectors, and clerks who shall serve at his pleasure.

2127. Deputy commissioners and inspectors shall be appointed from a list which is furnished by the director of persons who hold certificates of qualification for such office.

2128. If the position of deputy commissioner cannot be filled from the list, a temporary appointment may be made for a period not exceeding six months upon the written recommendation of the director.

2129. If the position of inspector cannot be filled from the list, a temporary appointment not exceeding six months may be made.

Article 3. Vacancies

2151. If a vacancy in the office of commissioner occurs, the director, upon learning of the vacancy, shall immediately transmit to the board of supervisors or other appointing power a list of persons who are certified by him to be eligible for the position.

2152. If within 30 days after the receipt of the list of persons who are certified, the appointing power fails to appoint a commissioner from the list, the director shall appoint a commissioner from the list.

2153. If there is no qualified person available for the office of commissioner, the appointing power may make a temporary appointment, for a period not exceeding three months, of a person who is recommended in writing by the director.

2154. If the appointing power does not make a temporary appointment of a commissioner and no person can be appointed from the eligible list by the director, the director may make a temporary appointment of a person who is competent to carry on the duties of the office for a period not exceeding three months.

Article 4. Removal

2181. Upon petition of 25 resident freeholders of any county, the principal business of each of whom is the production of agricultural commodities, or upon satisfactory evidence presented to the director that the commissioner of such county is guilty of neglect of duty, incompetence, or misconduct in office, the trial board which is selected, pursuant to this article, shall hold a hearing at such time and place as it shall specify.

2182. The director and the president of the voluntary association of commissioners of the state shall select an impartial third person who, with them, shall compose a county agricultural commissioner's trial board to determine whether the commissioner is guilty of the charges which are presented.

2183. At least 10 days prior to the date of the hearing the director shall give notice in writing to the commissioner of the time and place of the hearing and such information as to the nature of the charges as will enable the commissioner to present a defense to the charges.

2184. At the hearing the trial board shall hear the evidence which is offered.

2185. The trial board shall, within 30 days subsequent to the conclusion of the hearing make an order dismissing the charges or an order disqualifying the commissioner.

2186. If the order disqualifies the commissioner, the director shall revoke the commissioner's certificate of qualification and declare his office vacant. A copy of the order shall be immediately transmitted by the director to the board of supervisors and the auditor of the county in which the commissioner held office.

2187. The certificate of a deputy commissioner may be revoked in the same manner and for the same causes that a certificate of a commissioner may be revoked.

Article 5. Compensation

2201. The compensation provided for a commissioner, deputy commissioner, county agricultural inspector, or clerk who is employed by the year or by the month shall be paid out of the county treasury in equal monthly installments, in the same manner and at the same time as county officers are paid. A commissioner and each deputy commissioner or inspector is entitled to receive his traveling and incidental expenses which are necessarily incurred in the performance of his duty. Such expenses and all compensation which is earned by a commissioner, deputy commissioner, inspector, or clerk who is not employed by the year or by the month are a county charge. The board of supervisors shall allow and pay them in the same manner as other claims are allowed and paid.

2203. The commissioner shall be paid his compensation and traveling and incidental expenses while he is attending the annual meeting of the voluntary association of the commissioners of the state and such other meetings as he is required by the director to attend, or while he is on any service that requires him to go outside the county if the performance of such service has been authorized by the board of supervisors or the director, or is authorized by this code.

2204. The compensation of a commissioner who is appointed by the director shall be paid in the same manner as if he were appointed by the board of supervisors.

2205. The rate and manner of payment of compensation for a commissioner who is employed pursuant to Section 2124 shall be fixed by the board of supervisors of the employing county. He is entitled to receive his traveling and incidental expenses which are necessarily incurred in the performance of his duty.

2206. The board of supervisors of any county in which the director is required by Section 2125 to perform the duties of commissioner shall, upon claim which is duly submitted, reimburse the department for all expenses which are incurred by the director in fulfilling his responsibilities in performing such duties. The amount of reimbursement shall not, however, be in excess of an amount which is established by an agreement between the board of supervisors and the director pursuant to Section 482 of this code or Section 25801 of the Government Code.

Article 6. Cooperative Salary Agreements

2221. For the purpose of this article the base salary of a commissioner is the salary, or if a salary range is established, the lowest step in such range, which was established for the position for the month of January, 1959.

2222. For the purpose of securing more uniform and adequate enforcement of this code throughout the state, the director may enter into cooperative agreements with the board of supervisors of any county which relate to the increase of the compensation of the county agricultural commissioner of the county, or which relate to compensation of the commissioner for services which are performed for the department.

2223. In the agreement the board of supervisors shall agree not to reduce the salary of the commissioner to less than the base salary. The director may agree to pay to the county a sum not to exceed three thousand three hundred dollars ($3,300) per year to be used to increase the salary of the commissioner, or to compensate the commissioner for services which are performed for the department. The amount which is paid to a county shall not, however, exceed two-thirds of the amount of the salary which is paid to its commissioner.

2224. The director may agree with the board of supervisors of any county in which no salary was established for the position of commissioner for January, 1959, that the state will pay not to exceed three thousand three hundred dollars ($3,-300) per year of the amount to be used for payment of the salary of a commissioner for such county, or of a commissioner who is employed pursuant to Section 2124. The amount which is paid the county shall not, however, exceed two-thirds of the amount of the salary which is paid to the commissioner.

Article 7. Offices, Equipment and Supplies

2241. As used in this article "commissioner" includes a commissioner who is employed pursuant to Section 2124.

2242. The board of supervisors shall provide a suitable office for the commissioner, and shall furnish and equip his office with all necessary furniture, supplies, and effects for the proper discharge of his duties.

2243. The board of supervisors may also provide the commissioner with all necessary field equipment for the proper discharge of the duties of his office.

2244. All expenses which are ordered by the board of supervisors for the office, furniture, supplies, effects, and equipment for the commissioner are a county charge. The board of supervisors shall allow and pay such expenses out of the general fund of the county.

Article 8. Powers and Duties

2271. The commissioner shall keep a record of his official acts.

2272. The commissioner shall make an annual report to the director on the condition of the agricultural interests in his county and on what is being done to eradicate, control, or destroy pests or to quarantine against pests. He shall also furnish from time to time to the director such other information as the director may require.

2273. The commissioner shall also make a monthly report to the board of supervisors if and when so required by the board.

2274. The commissioner shall learn about all pests that may exist, or are likely to exist, in his county.

2275. The commissioner, for the purpose of learning the best and most efficacious methods of performing his duties, shall attend the annual meeting of the voluntary association of the commissioners of the state, and such other meetings as the director shall require.

2276. The commissioner shall, for the purpose of becoming informed about new and dangerous agricultural pests, observing and learning new and better methods of pest control, and determining the best and most efficacious methods of conducting the work of his department, consult with staff members of the United States Department of Agriculture, the State Department of Agriculture, the University of California, and with agricultural commissioners of other counties. He shall make such trips outside of the county which are necessary for such purposes, if authorized by the board of supervisors.

2277. The commissioner shall, if directed by the board of supervisors, collect, prepare, and install exhibits for public information which illustrate the work of his department, depict the resources of the county, or display the products of the county.

2278. The commissioner may disseminate information which relates to pests that may exist in his county, or are likely to exist in it. The information may include life histories, habits, methods of detection, and methods of control of such pests.

2279. The commissioner shall compile reports of the condition, acreage, production, and value of the agricultural products in his county. The commissioner may publish such reports, and shall transmit a copy of them to the director.

2280. The director, when acting in person with a commissioner, has all the rights of such commissioner.

CHAPTER 3. COUNTY VETERINARIAN

Article 1. Appointment

2301. A county veterinarian may be appointed by the board of supervisors whenever the public welfare demands the services of such veterinarian.

2302. The veterinarian shall serve at the pleasure of the board of supervisors.

Article 2. Compensation

2321. The veterinarian shall receive a salary which is fixed by the board of supervisors. It shall be payable at the same time, in the same manner, and from the same fund as other county officers are paid.

Article 3. Powers and Duties

2341. The veterinarian shall act under the supervision of the director.

2342. The veterinarian shall enforce throughout the county all of the provisions of this code which relate to the health and sanitary surroundings of livestock, poultry, and rabbits. He shall enforce within unincorporated territory all orders and ordinances of the board of supervisors which relate to such subjects.

2343. The veterinarian may establish such quarantine, sanitary, and other regulations within his jurisdiction as he deems necessary.

2344. The veterinarian shall attend such meetings as are deemed necessary and advisable by the board of supervisors.

DIVISION 3. EXPOSITIONS AND FAIRS

PART 1. GENERAL PROVISIONS

CHAPTER 1. FREE ADMISSIONS

Article 1. Definitions

3001. Unless the context otherwise requires, the definitions in this article govern the construction of the chapter.

3002. "Courtesy pass admission" means any admission, without payment of the admission charge, to any state, county, district, or citrus fruit fair, except any of the following:

(a) Credential admission.

(b) Admission of any child under 12 years of age.

(c) Admission of any military personnel in uniform.

3003. "Credential admission" means any admission which is authorized by the board of directors of a state, district, or citrus fruit fair, or by the board of supervisors of a county for admission to a fair without payment of the admission charge when a service is rendered by the person who is admitted which is necessary for the conduct of the fair.

Article 2. Powers and Duties

3021. Every state, district, county, or citrus fruit fair which receives any money from the State Treasury shall permit the admission without payment of the admission charge of all children 12 years of age or under on at least one day, which is designated by the fair, during each fair period.

3022. If a charge is made for admission to enter a state, district, county, or citrus fruit fair, the following persons may be admitted to such fairgrounds without the payment of the established admission price:

(a) Persons with credential admissions.

(b) Persons with courtesy pass admissions.

(c) Military personnel in uniform.

3023. A credential admission may be issued to any individual, association, or body that does any of the following:

(a) Prepares or services any educational, commercial, industrial, livestock, agricultural, horticultural, or viticultural display or exhibit.

(b) Services, maintains, or operates any concession.

(c) Renders, through agreement with the fair, a service to fair patrons.

(d) Renders a necessary public service.

(e) Safeguards health.

(f) Provides for public safety.

(g) Participates in any parade or event which is necessary for the conduct of the fair.

3024. Credential admissions may, also, be issued to any of the following persons:

(a) Representatives of press, radio, and television personally engaged in obtaining and transmitting public information.

(b) Ambulance drivers.

(c) Firemen on duty.

(d) Repairmen who are necessary to service utilities.

(e) Employees of the fair.

(f) State officials in the performance of their duty.

3025. The words "credential admission" shall be printed on each ticket which is issued as a credential admission.

3026. The percentage of courtesy pass admissions to any state, county, district, or citrus fruit fair shall not exceed 4 percent of the gross paid admission to the fair in the preceding calendar year.

3027. A courtesy pass admission is not transferable.

3028. Each fair shall maintain complete records of the number of credential and courtesy pass admissions which are issued for each fair period.

3029. Each fair shall make an annual report to the department, as prescribed by the department, of the total number of credential and courtesy pass admissions issued and honored at the fair.

Chapter 2. Horserace Meetings at State or District Fairs

3101. The expenditure of funds for insurance which is authorized by this chapter is a public purpose and is in furtherance of the purposes for which state and district fairs are conducted.

3102. If the Board of Directors of the California State Fair and Exposition or the board of directors of any district agricultural association finds that, in order to conduct a successful horserace meeting with adequate competition and a sufficient number of competent jockeys and exercise boys, it is necessary that it purchase suitable accident and disability insurance for the benefit of the jockeys and exercise boys who are participating in the horserace meeting, it may purchase such insurance to protect them from the physical hazards of such participation.

3103. The accident and disability insurance shall be in addition to the workmen's compensation insurance which is required to be carried by licensed horse owners.

PART 2. STATE EXPOSITIONS AND FAIRS

Chapter 1. Definitions

3301. Unless the context otherwise requires, the definitions in this chapter govern the construction of this part.

3302. "Board" means the Board of Directors of the California State Fair and Exposition.

3303. "Committee" means the California State Exposition and Fair Executive Committee.

3304. "Corporation" means a nonprofit corporation organized under the General Nonprofit Corporation Law, Part 1 (commencing with Section 9000), Division 2, of the Corporations Code.

3305. "Exposition" means the California State Exposition and Fair.

3306. "Exposition site" means the exposition site in Sacramento County adjacent to the American River.

3307. "Fair site" means the Stockton Boulevard site of the State Fair in Sacramento.

3308. "State Fair" means the California State Fair and Exposition.

Chapter 2. California State Fair and Exposition

Article 1. Organization

3401. There is in the Department of General Services the California State Fair and Exposition. It is a state institution and consists of a board of directors of 14 members.

3402. Twelve of the members of the board shall be appointed by the Governor for a term of four years from the expiration of the respective terms of the members of the board in office at the time this code becomes effective.

3403. The other two members of the board shall be members of the board of directors of a district agricultural association, or of a county fair board. They shall not, however, be members of the board of directors of the same district agricultural association, or county fair board. These two members shall be appointed annually by the Governor on February 1st of each year.

3404. The president of the board shall be designated annually by the Governor on February 1st from among the members of the board.

3405. If the name State Agricultural Society or Board of Directors of the State Agricultural Society is used in any statute, act, law, appropriation, budget, or other place, or in any section of this code, it means the California State Fair and Exposition or Board of Directors of the California State Fair and Exposition, respectively.

Article 2. Powers and Duties

3431. Except as otherwise provided in Article 3 (commencing with Section 3551) of Chapter 3 of this part, the board has all the rights, powers, and responsibilities of the committee with respect to the management and operation of the annual fair and exposition described in Section 3523 at the fair site until such time as the committee declares by resolution that the exposition at the exposition site is operationable. This section does not, however, impair the power of the committee to exercise any of its rights, powers, and responsibilities with respect to the exposition at the exposition site either before or after adoption of such resolution.

3432. The board may appoint all necessary marshals and police to keep order and preserve peace at the annual fair or exposition. The officers who are so appointed shall be vested with the same authority as peace officers for the preservation of order and peace at the fair or exposition.

3433. The board may pay membership fees, join, and participate in the affairs of associations which have for their purpose the interchange of information which relates to livestock, poultry, and other agricultural animals and products; the conduct and management of fairs; or the conducting of horse-racing meetings or similar associations which deal with subjects which relate to the powers and duties of the State Fair.

3434. All meetings of the board shall be open and public.

3435. All records of the board, except entries in events which are scheduled for future judging or overnight entries in races on which there is parimutuel wagering prior to such

events, judging times, or races, shall be open to inspection by the public during regular office hours.

3436. The state is not liable for any premium which is awarded or any debt which is created by the board.

Article 3. State Fair Fund

3461. The State Fair Fund is continued in existence.

3462. All money which is received by, or appropriated to, the State Fair shall be placed in the State Treasury to the credit of the State Fair Fund.

3463. All money which is received by the board shall be reported at least once a month to the State Controller.

3464. All money in the State Fair Fund is appropriated, without regard to fiscal years, to be expended in accordance with the law for the support of the activities of the board in conducting the State Fair, including construction and improvements and, with the approval of the Department of Finance, the purchase of land in connection with such construction and improvements.

3465. If the name State Agricultural Society Contingent Fund is used in any statute, act, law, appropriation, or other place, it means the State Fair Fund.

Chapter 3. California State Exposition and Fair

Article 1. Organization

3501. There is in the Department of General Services the California Exposition and Fair Executive Committee. It is a state institution.

3502. Three of the members of the committee first appointed shall be appointed by the Governor from the board for a period equal to the remainder of their terms on the board. The Director of Finance, the Director of General Services, the Director of Public Works, the Director of Agriculture, the State Controller and the president of the board shall be the remaining members of the first committee.

Upon the declaration by the committee that the exposition site is operationable, the membership of the committee shall be augmented by 10 additional members by adding the nonmembers of the committee then serving on the board to the committee, whereupon the board shall cease to exist. The members so added shall serve on the committee for the same period they would have been authorized to serve had they remained members of the board.

3503. Two Members of the Senate appointed by the Senate Committee on Rules and two Members of the Assembly appointed by the Speaker shall meet with and, except as otherwise provided by the Constitution, advise with the committee to the extent that such advisory participation is not incompat-

ible with their duties as Members of the Legislature. The members of the committee and the advisory Members of the Legislature serving with them are entitled to be reimbursed from the State Fair Fund for any actual and necessary expenses incurred in connection with the performance of their duties.

3504. All vacancies among the appointees of the Governor, or in the positions representing the 10 additional members added to the committee when the board ceases to exist, shall be filled by the Governor for a term of four years.

3505. The chairman of the committee shall be designated annually on February 1, by the Governor, from among the members of the committee.

Article 2. Powers and Duties

3521. Except as otherwise provided in Section 3431, the committee succeeds to all the rights, powers, and responsibilities of the board.

3522. Upon the declaration by the committee that the exposition site is operationable, the board is abolished.

The abolition of the board in the manner provided for in this section shall not, however, abridge the succession of the committee to the rights, powers, and responsibilities that the board possessed while in existence.

3523. The committee, subject to the approval of the Department of General Services, shall provide for and manage a permanent exposition as provided for in the California State Exposition and Fair Law, Article 3 (commencing with Section 3551) of this chapter, and an annual fair and exposition in one or more seasonal divisions in Sacramento County of the industries and industrial products of this state and commercial products exported and imported through the ports of this state. The exposition and fair shall be designated as the California State Exposition and Fair.

3524. If in any year during which an international exposition is held in this state which is conducted in whole or in part under the auspices of the state and endorsed by the United States government, and the committee deems it inexpedient to hold a State Fair, the funds which are available for the State Fair for that year only may be expended, with the approval of the Director of General Services, in cooperation with the management of the international exposition to provide for a proper exhibition of the industries of California at the international exposition. This section does not impair the power and authority of a nonprofit corporation to provide for and manage such exposition and fair pursuant to the California State Exposition and Fair Law.

3525. The committee, with the approval of the Director of General Services, may lease or license the use of any real or personal property under its jurisdiction and control to any

person or public body for whatever purpose may be approved by such committee and the Director of General Services. Any lease of the exposition site is, however, subject to the California State Exposition and Fair Law, Article 3 (commencing with Section 3551) of this chapter.

Article 3. California State Exposition and Fair Law

3551. This article shall be known as the "California State Exposition and Fair Law."

3552. It is the desire of the Legislature that the plan of organization for the exposition on the exposition site, as now or hereafter constituted, shall be put into effect through the provision of a corporation, subject to such changes, modifications, or augmentations in such plan as may be deemed advisable. It is the view of the Legislature that the implementation of the exposition requires such creative talents and flexibility of operation that it can be adequately and competently performed only through the medium of corporations.

3553. The committee may contract with a corporation for the construction, operation, and maintenance of the exposition on terms and conditions which it determines are in the best interests of the state. The contract between the committee and the corporation shall provide for all of the following:

(a) The lease to the corporation of all or such portion of the exposition site for such period of time as the committee deems advisable.

(b) The operation of a permanent exposition, and annual fair in one or more seasonal divisions.

(c) Construction on the exposition site of such exposition and fair facilities as are approved by the committee.

(d) The operation of such intermittent, seasonal, or continuous activities on the exposition site as the parties deem beneficial to the exposition.

(e) The development and operation of horse racing on the exposition site by the corporation.

(f) The preservation of appropriate records and documents pertaining to activities and expenditures of the corporation and their availability for examination by the committee, and audit by the Director of General Services at the expense of the corporation.

3554. The contract between the committee and the corporation shall also provide for all of the following:

(a) The terminability of the contract by the committee, with the approval of the Director of General Services.

(b) All revenues accruing from the operations of the exposition being deemed to be assets of the corporation to be used solely for the purpose of discharging its duties under the contract, subject to such budgetary controls as are required by this article.

(c) The utilization by the corporation of civil service personnel employed by the committee, who shall remain employees of the state, and the reimbursement to the state by the corporation of all costs connected with their employment by the state.

(d) Employment of personnel of the corporation, except such persons or categories as may be exempted by the committee, in accordance with a merit system embodied in rules and regulations of the corporation which are approved by the committee.

(e) Two members of the committee to serve as members of the board of directors of the corporation.

(f) Such other provisions as in the judgment of the state should be included in the contract, not inconsistent with this article or other provisions of law.

3555. Any contract or lease between the corporation and the committee, including any amendments to it, is subject to the approval of the Director of General Services.

3556. The State Personnel Board may contract with the corporation to furnish services to implement any merit system established by the corporation in a manner not inconsistent with the rules and regulations of the corporation that affect such system. The State Personnel Board shall charge the corporation what it deems is the fair cost of providing such service.

3557. The Director of General Services may lease for such term as he deems advisable, or sell, any portion of the exposition site for commercial or industrial development in areas of the exposition site which are designated in writing by the committee, subject to such consideration and other provisions as the Director of General Services deems will best serve the interests of the state. Any consideration which is received from sale or lease of the property shall be credited to the State Fair Fund, except to the extent any consideration from any such property which is leased is permitted, with the approval of the Director of General Services, to be assigned for value received by the corporation. The Director of General Services may make any conveyance which is necessary to effectuate and implement such sale or lease, including, but not limited to, any easement which is necessary to permit utilization of the property by a lessee or vendee.

3558. The corporation shall be deemed to hold any real or personal property received from the state or other sources, and any proceeds derived therefrom or through the use thereof, directly or indirectly, as trustee solely for the performance of its activities in connection with the exposition. Such real or personal property, and any possessory interest therein on the part of the corporation, is exempt from taxation to the same extent as other real or personal property which is owned and solely occupied by the state for governmental purposes.

3559. Except for any money of the corporation which is placed in demand or time deposits which are insured in full by an agency of the United States Government, all money of the

corporation, whether received from the state, the activities of the exposition, or otherwise, shall, until needed by the corporation, be invested, with the approval of the Director of Finance, only in bonds or other obligations specified in Section 16430 of the Government Code.

3560. Any contract entered into by the corporation for personnel or for the services of independent contractors, or for the hiring of equipment other than from the State Public Works Board, if in excess of, or which may be in excess of, two years, is subject to the written approval of the committee.

3561. The corporation shall not transfer, mortgage, pledge, or dispose of any real property on the exposition site. It may, however, with the written approval of the committee, dispose of surplus fixtures which are to be removed from the exposition site. In addition, it shall not assign, transfer, mortgage, pledge, hypothecate, or dispose of any anticipated assets or revenues, except with the approval of the Director of General Services. The corporation may dispose of personal property with the sole consent of the committee.

3562. The corporation shall submit an annual report to the committee which shall include a statement of its operations, receipts, and disbursements during the last preceding calendar year, within a reasonable period of time, as designated by the committee, after the conclusion of such calendar year. The corporation shall also submit to the committee special reports, analyses, or information requested by the committee.

3563. If state appropriations are disbursed to pay principal or interest on the revenue bonds which are referred to in Section 3574, the corporation may be required by the committee to repay such amounts to the state with such interest as the Director of Finance determines is the average interest which is being received by the state at the time the disbursements are made, as soon as funds above normal operating requirements, as determined by the committee, are available to the corporation.

3564. The persons constituting the board of directors of the corporation shall receive their actual expenses incurred in attending meetings or otherwise performing their duties, but shall receive no compensation or emoluments otherwise from the corporation in any capacity. Neither the directors nor members of the corporation, if any, nor their immediate families, shall have any interest in any contract made with the corporation. This section does not, however, prohibit any interest of a remote nature which is disclosed to the board.

3565. The board of directors of the corporation shall have sole authority to manage and operate the corporation. Neither the members of the corporation, if any, nor the board of directors of the corporation may limit the number of original directors or the terms of office of original directors. The board of directors may, however, remove any director for

good cause and shall have sole authority to fill any vacancy which occurs in the board. The corporation shall not be deemed to be an agency of the state.

3566. No member of the board of directors, officer, or employee of the corporation is liable in his personal capacity for any obligations of the corporation, nor is the state liable for any debts or obligations of the corporation, except as provided in this article.

3567. The corporation shall, at least 60 days prior to any calendar year, submit an annual budget to the committee in the form prescribed by the Director of General Services which shows estimated revenues and proposed expenditures from all sources during the ensuing calendar year for approval in writing by the committee and by the Director of General Services. Failure to obtain both approvals prior to the calendar year for which it is proposed constitutes, effective at the start of such calendar year, a cancellation and termination of all leases and contracts between the corporation and the committee. Expenditures by the corporation for any item or subitem in the budget during the calendar year for which it is approved shall be limited to the amount prescribed therein. Any person who incurs any expenditures in excess of such amount is personally liable for the amount of such excess. The committee and Director of General Services, both concurring, may (a) approve any amendment of the budget at any time, at the request of the corporation, or (b) direct such amendment in accordance with action initiated by either the committee or Director of General Services.

3568. The corporation shall provide such premiums or exhibits at the annual exposition, in amounts, and in accordance with policies, which are indicated in writing by the committee. In this regard, the corporation shall submit its proposals relating to premiums for review by the committee.

3569. The corporation shall provide at its own expense insurance in amounts and for purposes determined by the committee, covering improvements, equipment, and facilities on the site, and protecting the corporation and the state against liability to third parties arising out of the operation and maintenance of the exposition and the grounds of the exposition.

3570. The corporation may, with the approval of the committee, lease property on the exposition grounds proper for such period of time, consideration, and other terms and conditions, as are approved by the Director of General Services

3571 The corporation shall not at any time undertake any construction on the site unless the plans, specifications, and contracts therefor have been approved by the committee. This section does not, however, apply to any construction undertaken by the corporation on any part of the site leased, by virtue of authority given under other provisions of this

article, by the Director of General Services, or by the corporation with the approval of the Director of General Services.

3572. All contracts which are entered into by the corporation shall contain a provision that the successor or assignee of the corporation may enforce them.

3573. The corporation may receive any of the following:

(a) Such grants by the committee, State Public Works Board, and Director of Finance, in such amounts and under such terms and conditions as they deem appropriate, from funds available for use in connection with the exposition, or any activity thereof, which grants are hereby authorized.

(b) Grants and donations from any other source, public or private, not prohibited by law.

The corporation may utilize the grants referred to in subdivision (a) of this section for any purpose, relative to the exposition, for which the grantor could have utilized such grants.

3574. The State Public Works Board may, in lieu of undertaking such construction itself, authorize the corporation to undertake the construction which is provided for in Section 1 of Chapter 1072 of the Statutes of 1957. If it does so, the plans and specifications for the construction shall be subject to the approval of the State Public Works Board as provided in sections of Chapter 1072 of the Statutes of 1957, and to the provisions of Section 3571. In connection with such construction, the State Public Works Board may convey such easements on the exposition site as it deems necessary for the construction.

Notwithstanding any other provision of law, revenue bonds which are authorized to be issued by the State Public Works Board under Section 1 of Chapter 1072 of the Statutes of 1957 may be sold at public or private sale with or without competitive bids. Except as provided in this section, the State Public Works Board shall follow the requirements of such section as if the buildings and facilities had been constructed by it.

Nothing in this chapter shall be construed to impair any of the rights given the holders of bonds sold by the State Public Works Board pursuant to the State Building Construction Act of 1955, Part 10b (commencing with Section 15800), Division 3, Title 2 of the Government Code.

3575. If the corporation's contracts and leases with the committee are cancelled or terminated, or the corporation is dissolved after it has entered into a contract with the committee respecting the operation of the exposition:

(a) The assets of the corporation, of any kind whatever, shall ipso facto become the property of the state under the jurisdiction of the committee, and the corporation shall promptly execute any documents, and do any and all other acts deemed necessary or desirable by the committee, to fa-

cilitate the committee's receipt of such assets and the continuation of operations by the committee.

(b) The committee shall continue the operation of the exposition, in the absence of a further contract between the committee and another corporation therefor.

3576. While the committee is operating the exposition it shall:

(a) Have all rights, privileges, and grants which the corporation would have had if it had continued to operate the exposition and all of the powers respecting the operation of the exposition which the committee would have been authorized to grant pursuant to any contract with a nonprofit corporation.

(b) Assume by operation of law all the lawful obligations incurred by the corporation, including any rental payments which are due or to be due to the State Public Works Board. Such obligations shall, however, be discharged solely from such assets and revenues as would have been available to the corporation for the discharge of the obligations if it had continued to operate the exposition.

3577. If the contract between the committee and a corporation is canceled or terminated, the committee may enter into a contract with another corporation, and the provisions of this article shall apply as if a corporation so contracting had been the original contracting corporation.

3578. Any contracting corporation subsequent to the original contracting corporation shall assume by operation of law all remaining liabilities incurred by previous nonprofit corporations in connection with their operation of the exposition and the committee shall be relieved from such liabilities. The committee shall transfer to any subsequent contracting nonprofit corporation all the assets of the exposition, other than such title to real property of the exposition site and improvements situated on the exposition site as it may possess.

3579. The committee shall submit a report to the Legislature and Governor during the first 30 days of each general session of the State Legislature respecting the financial condition, present operations, and future planned activities of the exposition. It may require the corporation to furnish any information or material which is necessary to make such report.

3580. Section 19482 of the Business and Professions Code does not prevent the California Horse Racing Board from granting a license to a nonprofit corporation or other applicant for the operation of horseracing on the exposition site.

PART 3. DISTRICT AGRICULTURAL ASSOCIATIONS

CHAPTER 1. DEFINITIONS

3801. Unless the context otherwise requires, the definitions in this chapter govern the construction of this part.

3802. "Association" means a district agricultural association which is formed pursuant to this chapter.

3803. "Board" means the board of directors of an association.

3804. "Director" means a member of the board of directors of an association.

3805. "District" means an agricultural district which is formed pursuant to this chapter.

CHAPTER 2. BOUNDARIES

3851. The state is divided into the agricultural districts which are prescribed by this article.

3852. District 1 is the County of Alameda.

3853. District 1a is the City and County of San Francisco and the County of San Mateo.

3854. District 2 is the County of San Joaquin.

3855. District 3 is the County of Butte.

3856. District 4 is the Counties of Sonoma and Marin.

3857. District 6 is all that portion of Los Angeles County which is not included in District 48 and District 50. District 6 shall be known and designated as the California Museum of Science and Industry.

3858. District 7 is the County of Monterey.

3859. District 9 is the County of Humboldt.

3860. District 10 is that portion of the County of Siskiyou which is not included in District 10a.

3861. District 10a is all that portion of Siskiyou and Modoc Counties which is described as follows:

Beginning at the intersection of west longitude 122 degrees 10 minutes with the Oregon-California boundary line, thence southerly along said line of longitude to north latitude 41 degrees 30 minutes, thence easterly along said line of latitude to the point where it intersects west longitude 121 degrees 10 minutes, thence northerly along said line of longitude to the Oregon state line, thence westerly along said state line to the point of beginning.

3862. District 12 is the County of Mendocino.

3863. District 13 is the Counties of Sutter and Yuba.

3864. District 14 is the County of Santa Cruz.

3865. District 15 is the County of Kern.

3866. District 16 is the County of San Luis Obispo.

3867. District 17 is the County of Nevada.

3868. District 18 is the Counties of Mono, Inyo, and Alpine.

3869. District 19 is all that portion of Santa Barbara County which lies east of Gaviota and south of the Santa Ynez Mountains.

3870. District 20 is the County of Placer.

3871 District 21 is the County of Fresno.

3872. District 21a is the County of Madera.

3873. District 22 is the County of San Diego.
3874. District 23 is the County of Contra Costa.
3875. District 24 is the County of Tulare.
3876. District 24a is the County of Kings.
3877. District 25 is the County of Napa.
3878. District 26 is the County of Amador.
3879. District 27 is the County of Shasta.
3880. District 28 is the County of San Bernardino.
3881. District 29 is the County of Tuolumne.
3882. District 30 is the County of Tehama.
3883. District 31 is the County of Ventura.
3884. District 32 is the County of Orange.
3885. District 33 is the County of San Benito.
3886. District 34 is that portion of the County of Modoc which is not included in District 10a.
3887. District 35 is the County of Merced.
3888. District 35a is the County of Mariposa.
3889. District 36 is the County of Solano.
3890. District 37 is all that portion of Santa Barbara County which is not included in District 19.
3891. District 38 is the County of Stanislaus.
3892. District 39 is the County of Calaveras.
3893. District 40 is the County of Yolo.
3894. District 41 is the County of Del Norte.
3895. District 42 is the County of Glenn.
3896. District 44 is the County of Colusa.
3897. District 45 is the County of Imperial.
3898. District 46 is the County of Riverside.
3899. District 48 is all that portion of Los Angeles County which is described as follows:

Beginning at the intersection of a southerly extension of the east line of Atlantic Avenue with the Pacific Ocean, proceed north to the east line of Atlantic Avenue; thence north along the east line of Atlantic Avenue to its intersection with the south line of Anaheim Street; thence west along the south line of Anaheim Street to Alameda Street; thence north along west line of Alameda Street to south line of Palmer Avenue; thence west along south line of Palmer Avenue to east line of Wilmington Avenue; thence north along east line of Wilmington Avenue to north line of Rosecrans Avenue; thence west along north line of Rosecrans Avenue to east line of Avalon Boulevard; thence north along the east line of Avalon Boulevard to its intersection with the south line of Slauson Avenue; thence west along the south line of Slauson Avenue to La Brea Boulevard; thence north along west line of La Brea Boulevard to north line of Exposition Boulevard; thence east along north line of Exposition Boulevard to west line of Crenshaw Boulevard; thence south along the west line of Crenshaw Boulevard to south line of Vernon Avenue; thence east along south line of Vernon Avenue to Main Street; thence north along west line of Main Street to

the north line of Valley Boulevard; thence east along the north line of Valley Boulevard to the east line of State Highway No. 39; thence south along east line of State Highway No. 39 to the Orange county line; thence south along the Orange county line to its intersection with the Pacific Ocean; thence west along the Pacific Coast to point of beginning.

3900. District 49 is the County of Lake.

3901. District 50 is all that portion of Los Angeles County which lies north of the south line of Township 5 North, San Bernardino base.

3902. District 52 is the County of Sacramento.

CHAPTER 3. ORGANIZATION AND ADMINISTRATION

3951. Fifty or more persons, who are residents of a district, may form an association to be known as and designated as the _____ District Agricultural Association, for the following purposes:

(a) Holding fairs, expositions and exhibitions for the purpose of exhibiting all of the industries and industrial enterprises, resources and products of every kind or nature of the state with a view toward improving, exploiting, encouraging, and stimulating them.

(b) Constructing, maintaining, and operating recreational and cultural facilities of general public interest.

3952. Copies of the articles of association shall be filed with the Governor, the Secretary of State, and the department.

3953. Each association is a state institution.

3954. Each association by its name has perpetual succession. It may have a seal. An association may be sued and, with approval of the department, may sue and may do any and all things necessary to carry out the powers and the objects and purposes for which the association is formed.

3955. Claims against an association shall be presented to the State Board of Control in accordance with Part 3 (commencing with Section 900) and Part 4 (commencing with Section 940), Division 3.6, Title 1 of the Government Code

3956. The officers of the association shall consist of a board of directors of nine members The directors shall be citizens and residents of the district.

3957. If two or more counties constitute a district, each county shall be represented on the board by at least two persons who are citizens and residents of such county.

3958. If, by reason of the formation of a new district, a director in one district becomes a resident of another district, his term of office as director expires 60 days after the formation of the new district.

3959. The directors shall be appointed by the Governor.

3960. The term of office of each director, except that of a member of the first board, is four years from the beginning of

the term for which he is appointed. Any vacancy shall be filled for the unexpired term.

3961. The term of office of each member of the first board shall be so fixed by the Governor that the terms of the directors of such board shall expire in three groups of two, and one group of three, on the 15th day of January of each year following the formation of the association.

3962. The directors are state officers.

3963. The directors shall meet at a place within the district and organize by the election of one of their number as president. The term of office of the president shall be one year and until his successor is elected.

3964. The directors shall also elect a secretary and treasurer from among persons who are not members of the board. One person may be both secretary and treasurer.

3965. The board may, with the approval of the department:

(a) Fix the term of office, the amount of bond, salary, and prescribe the duties of the secretary and of the treasurer.

(b) Manage the affairs of the association.

(c) Make all necessary bylaws, rules, and regulations for the government of the association.

(d) With the approval of the Department of General Services, arrange for and conduct, or cause to be conducted, or by contract permit to be conducted, by any other individual, institution, corporation, or association, upon its property at such time as it may deem advisable, any activity, notwithstanding any other provisions of the code.

(e) Delegate, as it may deem advisable, to its officers or employees any of the powers which are vested in the board under subdivisions (b) and (d) of this section. Any such delegation of powers may be revoked at any time.

3966. The board shall annually make to the department such report as such department may direct.

3967. All meetings of the board shall be open and public.

3968. All records of the board, except entries in events which are scheduled for future judging and for overnight entries in races on which there is parimutuel wagering prior to such events, judging times, or races, shall be open to inspection by the public during regular office hours.

CHAPTER 4. FISCAL PROVISIONS

4001. Any money which is received by any association, other than from the sale of real property or pursuant to a lease, easement, or agreement for the extraction of oil or gas from lands owned or controlled by it, shall be retained and used by the association for its:

(a) General use and purposes.

(b) Maintenance.

(c) Membership in livestock registry associations and fair associations.

(d) Support and operation.

(e) Acquisition, installation, maintenance, and operation of recreational and cultural facilities at its fairgrounds.

4002. The proceeds of the sale of any interest in real property which is owned by any association shall be paid into the Fair and Exposition Fund. The amount which is paid into the fund shall be available for expenditure by the association, with the approval of the department and the State Public Works Board, for any of the following purposes:

(a) Permanent improvements for fair purposes on the property of the association.

(b) Purchase of equipment for fair purposes.

(c) Acquisition or purchase of real property, including costs of appraisal or other incidental costs, to be used as sites for the permanent improvements.

The execution of any lease, easement, or agreement for the extraction of any oil or gas from lands owned or controlled by an association is not a sale of an interest in real property within the meaning of this section.

4003. Any money which is not expended within three years after being paid into the Fair and Exposition Fund pursuant to Section 4002 shall be added to and become a part of the amount available pursuant to Section 19630 of the Business and Professions Code for permanent improvements upon the property of the state, citrus, county, or district agricultural associations for fair purposes, or the purchase of equipment for fair purposes, or the acquisition or purchase of real property, including costs of appraisal or other incidental costs, to be used as sites for such permanent improvements, in such amounts as may be allocated by executive order of the Director of Agriculture.

4004. All revenue which is received by any association pursuant to any lease, easement, or agreement for the extraction of oil or gas from any land that is owned or controlled by it shall be paid into the General Fund.

4005. The fiscal year for each association is from January 1 to December 31.

CHAPTER 5. POWERS AND DUTIES GENERALLY

4051. An association, with the approval of both the Department of Agriculture and the Department of General Services, may do any of the following:

(a) Contract.

(b) Purchase, acquire, hold, sell, exchange, or convey any interest in real or personal property and beautify or improve such property. Any acquisition of land or other real property shall be subject to the Property Acquisition Law, Part

11 (commencing with Section 15850), Division 3, Title 2 of the Government Code.

(c) Lease, let, or grant licenses for the use of its real estate or personal property, or any portion of such property to any person or public body for whatever purpose may be approved by the board.

(d) Use or manage its real estate or personal property or any portion of such property for any or all of the purposes of this section jointly with any lessee, sublessee or licensee, or otherwise use or manage the property in connection with such lease, sublease or license which is made or granted.

(e) Lease or let its real property for public park, recreational, or playground purposes.

(f) Rent or permit the use of its premises for any purpose which is beneficial to the agricultural industry, including but not limited to the holding of sales or auctions of cattle or other livestock.

(g) Contract with any county or county fair association for holding a fair jointly with the county or county fair association The joint fair is a district fair of the association.

4052. An association shall not lease its racetrack for running races of horses to any private person, firm, or corporation, except to a national or international exposition or its affiliated corporations or associations for the period of time which is now permitted by law for fairs.

This section does not apply to any existing lease or extension or renewal of any existing lease. This section also does not apply to the negotiating and issuing of a new lease to any private person, firm, or corporation by an association that is leasing its racetrack for running races of horses, on October 1, 1963, if such new lease complies with all of the following requirements:

(a) Contains terms more favorable to the association.

(b) Is approved by the California Horse Racing Board.

(c) Is not to become effective until at least three years after it is signed.

4053. The Director of Agriculture may make available for the use of any association any property of the state which is suitable for the purposes of the association, that has been obtained by the state by gift from any county or city, or otherwise, without cost to the state.

4054. If the board of an association, by resolution adopted by vote of two-thirds of all its members, finds and determines that the public interest and necessity require the acquisition of any building or improvement which is situated on property that is owned by the association, in trust or otherwise, or of any outstanding rights to such property, the association may, with the approval of the department, acquire such building, improvement, or outstanding rights by condemnation.

The use by the association of its property shall be considered a more necessary public use than the use of the property by any grantee, lessee, or licensee for the purposes which are specified in Section 4051 of this chapter.

4055. Associations, by majority vote of their respective boards, may cooperate in the holding of a fair in any of the districts.

4056. An association may pay membership fees, and join and participate in the affairs of any organization which has the following purposes:

(a) Interchange of information that relates to livestock, poultry, and other agricultural animals and products.

(b) Conduct and management of fairs.

(c) Conducting of horseracing meetings.

An association may also pay membership fees, join and participate in affairs of any similar organization that deals with subjects that are related to powers and duties of the association.

4057. The state is not liable for any premium which is offered or award that is made, or on account of any contract which is made, by any association.

CHAPTER 6. PROVISIONS REGARDING PARTICULAR ASSOCIATIONS

Article 1. California Museum of Science and Industry

4101. The Sixth District Agricultural Association shall be known as the California Museum of Science and Industry.

4102. The California Museum of Science and Industry, with the approval of the department, may build, construct, and maintain and operate a stadium or any arena, pavilion, or other building which is to be used for the holding of sports events, athletic contests, contests of skill, exhibitions, spectacles, and other public meetings. It may lease, let, or grant licenses for the use of such stadium, arena, pavilion, or other building.

4103. The California Museum of Science and Industry may establish a space age museum in its building at Exposition Park in the City of Los Angeles

4104. Any money which is collected or received by the California Museum of Science and Industry, shall be remitted monthly to the State Treasurer for credit to the "California Museum of Science and Industry Fund," which fund is continued in existence.

4105. Any money which is appropriated by the Legislature to the California Museum of Science and Industry shall be credited to the California Museum of Science and Industry Fund.

4106. All money in the California Museum of Science and Industry Fund is appropriated and is available for expendi-

ture, in accordance with the provisions of law, for any of the following purposes:

(a) Major and minor construction.

(b) Improvements, equipment, maintenance, and support of the buildings and grounds or other property of the California Museum of Science and Industry.

(c) Purchase of real or personal property.

Article 2. 1-A District Agricultural Association

4131. The City and County of San Francisco may appropriate and pay over to the 1-A District Agricultural Association for the general uses and purposes of the association such sums of money as the city and county may determine.

Article 3. 22nd District Agricultural Association

4151. The 22nd District Agricultural Association, with the approval of the department, may build, construct, and maintain and operate a stadium, arena, pavilion, or other building which is to be used for the holding of sports events, athletic contests, contests of skill, exhibitions, spectacles, and other public meetings. It may lease, let, or grant licenses for the use of such stadium, arena, pavilion, or other building.

4152. None of the funds which are expended by the 22nd District Agricultural Association to carry out the purposes of Section 4151, other than the proceeds of any revenue bonds which are issued for such purposes:

(a) Shall be considered to have been expended for the purpose of determining the need of the association for financial assistance pursuant to Section 19627 of the Business and Professions Code, but shall be considered money which is available to the association, or reserve funds of that association, for the purposes of Section 19627.

(b) Shall be considered to have been expended for the purpose of determining whether an allocation should be made to the association pursuant to Section 19630 of the Business and Professions Code.

4153. In the exercise of its powers pursuant to Section 4151, the 22nd District Agricultural Association shall not construct any facility on any part of that publicly owned park in the City of San Diego, which is commonly known as Balboa Park, unless such use of the park land is approved by the electors of the city at an election held by the city for such purpose. The election may be a special election or may be held in conjunction with any special or general election of the city. Such use shall be approved if a majority of the votes that are cast at the election on the question of such use are in favor of such use.

4154. If any land is acquired by the 22nd District Agricultural Association by eminent domain for use as a site for a

facility authorized to be constructed pursuant to Section 4151, the land shall not be used for any other purpose. If, after the acquisition of such land by eminent domain for such purpose, the land is not used for such purpose, the association shall dispose of such land. In such disposition, the association shall first, for a 30-day period, offer such land to the original owner of the land at the price which the association paid for such land.

Article 4. Former 51st District Agricultural Association

4181. The 51st District Agricultural Association is abolished. All property, both real and personal, of the association is transferred to the Department of General Services to be held by it until the Legislature determines, by appropriate act, that the property should be used to meet the educational needs of San Fernando Valley State College or devoted to some other urgent educational use. Pending the determination by the Legislature pursuant to this section, the Department of General Services may lease or otherwise use such property, on such terms and conditions as the Director of General Services deems are in the best interests of the state.

Article 5. Associations Representing More Than One County

4191. A city may not impose any tax, except a sales or use tax, on any association that represents more than one county and owns land in each of the counties it represents. A city may not, without the consent of the board of such an association, impose any tax, except a sales or use tax, on any of the concessionaires or rental contractors of the association as to events which take place on the property of the association

Chapter 7. War Memorials

4251. Any association and any county may jointly construct a building to constitute a war memorial. The war memorial may be used for any purpose for which real property of an association may be used.

4252. The war memorial may be constructed and managed under such terms and conditions as may be agreed upon by the board of the association, with the approval of the department, and the board of supervisors of the county. It shall be owned and used jointly by the association and county

4253. Any construction work which is done pursuant to an agreement shall be performed in accordance with, and subject to, the provisions of the State Contract Act, Chapter 3 (commencing with Section 14250), Division 3, Part 3, Title 2 of the Government Code.

CHAPTER 8. SALE OF TICKETS ON ASSOCIATION PROPERTY

4301. It is unlawful for any person to sell or engage in the sale, upon any property of an association, of any ticket of admission or any other evidence of the right of entry to a stadium or an arena, pavilion, or other building which is for holding sports arena events, athletic contests, contests of skill, exhibition spectacles, and other public meetings, places of amusement, or entertainment, contests or performances at any premium or price which is in excess of such maximum price that is printed or indorsed upon it, plus lawful taxes, unless he has first procured a written permit which is issued by such association.

PART 4. COUNTY AND DISTRICT AGRICULTURAL FAIRS

CHAPTER 1. STATE MONEY

4401. Subject to the limitations which are specified in Section 19627 of the Business and Professions Code, the department shall apportion any money which is appropriated by the state for the encouragement of county, district agricultural association, or combined county and district agricultural association fairs to the various agricultural fairs on the basis of the amount which each fair actually pays each year in premiums for agricultural, horticultural, mineral, and livestock exhibits, and exhibits of domestic arts, agricultural mechanics, and industrial education that are made or manufactured for other than commercial purposes.

4402. The amount of the premiums used in determining an apportionment shall be the amount of premiums which are paid by a county or district agricultural association in the calendar year which precedes the fiscal year in which the apportionment is made. The amount of any apportionment is, however, subject to the limitations which are specified in Section 19627 of the Business and Professions Code.

4403. Six thousand dollars ($6,000) shall be the maximum base of apportionment paid any fair for its first year of operation. In each subsequent year in which a fair is held, the maximum base of apportionment shall increase by 10 percent over the maximum base for the year in which a fair was last held.

4404. If the premiums which are paid for any year in which a fair is held are less than the maximum base of apportionment for that year, the base of apportionment for that year shall be the premiums which are paid for such year.

4405. For any fair that was operated prior to 1933 which received, or was qualified to receive, money from appropria-

tions for the support of agricultural fairs, the maximum apportionment bases may be increased 10 percent for each year in which a fair was held from the time the fair was first held. If, however, no fair was held by the county or district for a period of five or more years, the percentage of increase shall apply only from the year in which the first fair was held after that period.

4406. A fair which was held in the calendar years 1942 to 1946, inclusive, shall not be considered as a fair held for the purpose of determining the maximum base of apportionment.

4407. Any fair may pay premiums in an amount greater than that which is used as the base of apportionment to it.

4408. The county auditor of any county, or secretary of any association which conducts a fair that is eligible for, and desires an apportionment of, state money shall file with the department on or before December 31st, of each year, a sworn statement which sets forth the actual amount that was paid for premiums by the fair which was held in that year.

4409. If the audited total of the eligible premiums paid by any fair in any year differs from the total that is set forth in the sworn statement which is filed with the department, the amount of the apportionment which is made to the fair on the basis of such year shall be recalculated on the basis of the audited total of eligible premiums which were paid multiplied by the factor that was used in calculating the original apportionment.

4410. If the recalculated apportionment is less than the original apportionment, the amount of the difference shall be returned to the Fair and Exposition Fund and be added to and become a part of the funds which are appropriated for the encouragement of agricultural fairs by Section 19627 of the Business and Professions Code, during the fiscal year in which the difference is returned to the fund.

Chapter 2. Restrictions

4431. Except as otherwise provided in this chapter, on or after January 1, 1943, apportionments shall be made only to counties or district agricultural associations which received apportionments on the basis of the premiums which were paid at fairs held by them during the calendar year 1941.

4432. Merced, Madera, Santa Cruz, and Solano Counties may each receive an apportionment although they held no fairs in the calendar year 1941 and the agricultural associations of the agricultural districts which comprise such counties each received an apportionment during the calendar year 1941.

4433. Marin County may receive an apportionment although that county held no fair in the calendar year 1941 and the agricultural association of the agricultural district

of which Marin County is a part received an apportionment during the calendar year 1941.

4434. A district agricultural association of a district created subsequent to January 1, 1943, may receive an apportionment.

4435. A district agricultural association which did not receive an apportionment on the basis of the premiums which were paid at a fair that was held during the calendar year 1941 may receive an apportionment unless a county whose area lies in whole or in part within the boundaries of the agricultural district received an apportionment on the basis of the premiums which were paid at a fair that was held during the calendar year 1941.

4436. A district agricultural association which did not receive an apportionment on the basis of the premiums which were paid at a fair that was held by it during the calendar year 1941, may receive an apportionment if the board of supervisors of each county which is in whole or in part within the boundaries of the agricultural district in which the association is formed and which received an apportionment on the basis of the premiums which were paid at a fair that was held during the calendar year 1941, by resolution, announces its intention to discontinue permanently the holding of fairs for which the county would be eligible to receive an apportionment.

4437. A certified copy of the resolution shall be filed with the department.

4438. After the board of supervisors adopts and files the resolution, the county is no longer eligible to receive any apportionment and the district agricultural association which thereby becomes eligible to receive an apportionment shall, for the purpose of determining its maximum base of apportionment, be entitled to receive credit for the fairs which were previously held by the county. They shall be considered as fairs which were held by the association in calculating the maximum apportionment base for the association.

4439. Within one year from and after the date the resolution is adopted, the county shall pay to the district agricultural association the unexpended balance of any money which was previously apportioned to the county.

4440. No apportionment shall be made for more than one fair in any one year in any county or district.

4441. A county or district agricultural association may contract with each other or with a county fair association to hold an agricultural fair without loss of any apportionment to which it otherwise is entitled separately. However, no county or district agricultural association may receive an apportionment for a joint or combined fair which is held by them.

4442. No fair for which a separate appropriation is made by the state shall participate in the apportionment of any money appropriated for the encouragement of county and district agricultural association fairs.

4443. If a district agricultural association fair is conducted in any county of the state, no county fair, except a county fair which received apportionments prior to September 9, 1953, shall be paid any apportionment

4444. No apportionment shall be made to any fair held in Sacramento County after January 1, 1948, other than a fair conducted by the California State Fair and Exposition, the California State Exposition and Fair Executive Committee or by a district agricultural association in Agricultural District 52.

CHAPTER 3. PAYMENT

4461. Any funds that are appropriated for the encouragement of county, district agricultural association, or combined county and district agricultural association fairs which, pursuant to law, are apportioned by the department shall be paid monthly to the several eligible counties and district agricultural associations in such amounts as the department determines during the fiscal year in which the apportionment is made. The aggregate of the monthly apportionments to each of the several counties and district agricultural associations shall not exceed the maximum apportionment for the year.

4462. The department, out of any money on hand to be apportioned, may advance to any county or district agricultural association, for the purpose of paying premiums, at any time during the year, any portion of the money to which, in the opinion of the director, the county or district agricultural association shall become entitled for that year.

CHAPTER 4. DEPOSIT AND EXPENDITURE

4481. The county or district agricultural association shall deposit in a bank account that is approved by the Director of General Services in accordance with Section 16506 of the Government Code any state money which is apportioned to it for the encouragement of the fair which it conducts.

The money which is so deposited may be expended for any of the following:

(a) Premiums.

(b) Capital outlay, including purchase of land, construction improvements, and equipment.

(c) Acquisition, installation, maintenance, and operation of recreational and cultural facilities at fairgrounds of the county or district agricultural association.

(d) Support of county or district agricultural association fairs.

4482. Any expenditure shall be made pursuant to a budget which is submitted to the Department of Agriculture and approved by the Department of Finance pursuant to Sections 13320 to 13324, inclusive, of the Government Code.

4483. Any expenditure by a county for construction and improvements is subject to Sections 25450 to 25463, inclusive, of the Government Code.

CHAPTER 5. DEPARTMENT OF AGRICULTURE SUPERVISION

4501. The department shall prescribe regulations for both of the following:

(a) The judging of exhibits.

(b) The maximum amount of premiums which may be offered and paid for all classes, sections, and types of exhibits.

4502. The regulations are exempt from provisions of Section 11380 of the Government Code. They may, however, be filed with the Secretary of State pursuant to Section 11385 of the Government Code.

4503. No fair shall receive any apportionment of funds pursuant to this part unless it complies with the regulations of the department.

4504. The department may at any time examine the books and records of any fair to determine the correctness of any statement or report which is filed with the department.

4505. Every county or district agricultural association that conducts a fair for which any apportionment is sought shall file a detailed statement of its operations in the previous calendar year with the department on or before the 20th day of January in each year. The content and form of the statement shall be prescribed by the department.

4506. The department shall review the statements of operation which are filed by the several fairs pursuant to Section 4505. It shall consider such reports, statistics and other information as to the conduct, operation, management of, and other matters which relate to such fairs.

4507. The department shall, from time to time, classify fairs which are required to file reports pursuant to Section 4505. In making classifications, it shall take into consideration all of the following:

(a) The type and class of agricultural, including livestock, industrial, and natural resources that are exhibited, and the amount of premiums which are paid in accordance with the approved premium list of the fair.

(b) Whether the fair is regional in nature, offers a special feature for agriculture, livestock, or industry, or is a sectional fair limiting exhibits to the region in which the fair is held, and such other characteristics and factors as the department deems necessary.

(c) The ratio of attendance at the fair to the population of the area which is served by it.

(d) The efficiency of management, including operational procedures, revenue from sources other than the state, quality of exhibits, and community interest in the fair.

(e) The extent and nature of interim utilization of fair property as promoted by the fair management.

(f) The need of the fair for money from state sources.

CHAPTER 6. FAIRS ALLOCATION AND CLASSIFICATION COMMITTEE

4531. The Fairs Allocation and Classification Committee is continued in existence. It consists of seven Members of the Senate and seven Members of the Assembly.

4532. To the extent that it is feasible, appointments to the committee shall be so made that there is one Member of the Senate and one Member of the Assembly on the committee from each of the following areas:

Area 1. Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Plumas, and Sierra Counties.

Area 2. Butte, Yuba, Sutter, Glenn, Colusa, Yolo, Sacramento, and Solano Counties.

Area 3. Del Norte, Humboldt, Mendocino, Lake, Sonoma, Napa, and Marin Counties.

Area 4. El Dorado, Amador, Calaveras, Tuolumne, Mariposa, Nevada, and Placer Counties.

Area 5. San Joaquin, Stanislaus, Merced, Madera, Fresno, Kings, Tulare, and Kern Counties.

Area 6. San Francisco, Contra Costa, Alameda, San Mateo, Santa Clara, Santa Cruz, San Benito, Monterey, and San Luis Obispo Counties.

Area 7. Santa Barbara, Ventura, Los Angeles, Orange, San Diego, Imperial, San Bernardino, Inyo, Mono, Alpine, and Riverside Counties.

4533. The committee shall, from time to time, elect its chairman and vice chairman. The committee may meet at any time, whether or not the Legislature is in session, and shall continue in existence until otherwise provided by law.

4534. The committee may investigate, study, and analyze any or all facts and matters relating to the operation and financing of fairs which are subject to Section 4505 and the effect and operation of the laws relating thereto.

4535. The committee shall report to the Legislature at the commencement of each regular session and may report to the Legislature at any time, including in such reports its recommendations, if any, as to necessary or desirable legislative action. The provisions of the Joint Rules of the Senate and Assembly, as they may exist from time to time, which relate to joint investigating committees apply to the committee.

PART 5. CITRUS FRUIT FAIRS

CHAPTER 1. DEFINITIONS

4601. Unless the context otherwise requires, the definitions in this chapter govern the construction of this part.

4602. "Association" means a nonprofit corporation organized and existing under the laws of this state for the purpose

of and which engages in conducting and carrying on a citrus fruit fair.

4603. "Citrus fruit fair" means any citrus fruit fair or citrus fruit fair and exposition which satisfies all of the following requirements:

(a) Has been conducted and carried on by an association for not less than 10 nor more than 15 consecutive days during each calendar year for a period of not less than 20 consecutive years.

(b) Citrus fruits are exhibited for prizes and premiums at the fair. The fair has for its purpose the promotion and encouragement of the citrus fruit industry of this state.

Chapter 2. Benefits and Appropriations

4651. The fair shall be deemed to be a fair and association within the meaning of Chapter 1 (commencing with Section 4401), Part 4 of this division and the association so conducting and holding such citrus fruit fair shall be entitled to participate in the benefits and appropriations provided for in and by Chapter 1 (commencing with Section 4401), Part 4 of this division and shall receive aid, as provided therein and as otherwise provided by law for citrus fruit fairs, in the same manner as if such citrus fruit fair was being conducted and carried on in the manner provided in and under the previous provisions of Chapter 1 (commencing with Section 4401), Part 4 of this division.

4652. An association conducting a citrus fruit fair may receive and use, for the citrus fruit fair, any money which is appropriated for use of a "citrus fruit fair".

Chapter 3. Powers and Duties

4701. An association that conducts and carries on any citrus fruit fair which is eligible to receive apportionments pursuant to Section 19626 of the Business and Professions Code:

(a) Has the same power as a district agricultural association to construct, maintain and operate recreational and cultural facilities of general public interest.

(b) Is an instrumentality of the state for the purposes mentioned in subdivision (a) of this section and in Section 4603.

4702. Upon dissolution of any such association, all of its property, after payment of outstanding debts, shall escheat to the state.

4703. All property of any such association which is used exclusively in conducting citrus fruit fairs, and its recreational and cultural facilities which are of general public interest, are exempt from taxation. No affidavit need be filed to claim this exemption.

4704. An association which conducts and carries on a citrus fruit fair which is eligible to receive apportionments pur-

suant to Section 19626 of the Business and Professions Code shall file a detailed statement of operations in the previous calendar year with the department on or before the 20th day of January in each year. The content and form of such statement shall be prescribed by the department.

DIVISION 4. PLANT QUARANTINE AND PEST CONTROL

PART 1. GENERALLY

CHAPTER 1. DEFINITIONS AND GENERAL PROVISIONS

Article 1. Definitions

5001. Unless the context otherwise requires, the definitions in this article govern the construction of this division.

5002. "Appliance" means any box, tray, container, ladder, tent, vehicle, implement, or any other article which is, or may be, used in connection with the growing, harvesting, handling, or transportation of any agricultural commodity.

5003. "Crop seed" means the seed or seedlike fruit of grain, beans, flax, beets, onions, or any other crop, whether or not it is intended for planting purposes.

5004. "Noxious weed" means any species of plant which is, or is liable to be, detrimental or destructive and difficult to control or eradicate. It includes all species of primary noxious weeds and secondary noxious weeds which are listed in Sections 52257 and 52258, and such other species of plants as the director, after investigation and hearing, determines are noxious weeds.

5005. "Nursery stock" means any plant for planting, propagation, or ornamentation.

5006. "Pest" means any of the following things that is, or is liable to be, dangerous or detrimental to the agricultural industry of the state:

(a) Any infectious, transmissible, or contagious disease of any plant, or any disorder of any plant which manifests symptoms or behavior which the director, after investigation and hearing, finds and determines is characteristic of an infectious, transmissible, or contagious disease.

(b) Any form of animal life.

(c) Any form of vegetable life.

5007. "Plant" includes any part of a plant, tree, plant product, shrub, vine, fruit, vegetable, seed, bulb, stolon, tuber, corm, pip, cutting, scion, bud, graft, or fruit pit.

5008. "Shipment" means any article or thing which is, may be, or has been transported from one place to another place.

Article 2. General Provisions

5021. Unless otherwise provided, any treatment which may be required pursuant to this division is at the risk and at the expense of the owner or person in charge or in possession of the property which is treated at the time of treatment.

5022. This division shall not be construed to conflict with any other law which provides for the extermination or control of ground squirrels or other animal pests. If any proceedings are commenced, however, pursuant to this division, this division and no other law applies to such proceedings.

5023. The commissioner, whenever necessary, may enter and make an inspection of any premises, plant, conveyance, or thing in his jurisdiction.

5024. The director or the commissioner shall, during the maintenance of any quarantine established by the director pursuant to Article 1 (commencing with Section 5301), Chapter 5 of this part, inspect any plant or thing which is, or is liable to be, infested or infected by, or which might act as a carrier of, any pest. The person who conducts the inspection shall not permit any such plant or thing to pass over the quarantine line during the quarantine, except pursuant to a certificate of inspection and release which is signed by him.

5025. The Regents of the University of California may collect and, subject to the provisions of Section 6305, import into this state from foreign countries, parasitic and predaceous insects for use in the control of insect pests of horticultural and agricultural crops and of livestock. The regents may, for this purpose, employ and send abroad experts who shall be allowed, in addition to their compensation, their necessary subsistence, traveling, and other expenses incidental to the performance of their duties.

Chapter 2. County Administration

5101. Each commissioner is an enforcing officer of all laws and regulations which relate to the prevention of the introduction into, or the spread within, the state of pests. He is, as to such activities, under the supervision of the director.

5102. Each commissioner, deputy commissioner, or inspector who holds a valid certificate of qualification for the office to which he has been appointed, is a state plant quarantine officer for the following purposes:

(a) Certifying to the pest condition or pest treatment of shipments, if certification as a condition of movement or entry is officially required.

(b) Enforcing laws and regulations which relate to plant quarantine.

5103. Any interested person that is aggrieved by any action or order of a commissioner may appeal in writing to the director within five days after notice of action or order if no other time limit is prescribed within which to appeal from

such action or order. No appeal may be taken from any authorized summary action of the commissioner.

5104. The director shall hear any appeal from an action or order of a commissioner within 10 days after the receipt of the appeal upon notice to all interested parties. His decision shall be final.

5105. Pending decision after appeal, action by the commissioner on the case under appeal shall be suspended by the director. The refusal of any commissioner to carry out the orders and directions of the director which are issued in connection with any appeal is neglect of duty.

CHAPTER 3. CERTIFICATION OF PLANT SHIPMENTS

5201. As used in this chapter, "certificate" means the certification by a commissioner, deputy commissioner, or inspector of the pest condition or treatment of any shipment of plants.

5202. The board of supervisors of any county may establish a schedule of fees for any or all classes of certificates to be paid by shippers that request such certificates.

5203. No fee shall be charged for certification required by any law, regulation, or requirement of the United States or of this state or by any ordinance, regulation, or requirement of any county of this state.

5204. The schedule of fees for the certificates shall be based upon the approximate cost of the inspection.

5205. A commissioner shall make such inspections as may be necessary to determine the facts which are required by the state or country of intended destination and shall issue a certificate that states the facts which are determined upon receipt of the scheduled fee for a certificate or, if no scheduled fee has been established, upon request of the shipper.

5206. The board of supervisors of any county may designate any place within the county as a fumigation or treatment station for the purpose of enabling the commissioner to inspect plant shipments for certificates, if fumigation or other treatment is required by the state or country of destination as a condition of shipment to such state or country.

5207. If the board of supervisors designates a place as a fumigation or treatment station, the commissioner shall inspect plant shipments at the stations, for shipment to other states or countries which require fumigation or treatment as a condition of shipment.

5208. It is unlawful for any person to alter, deface, or wrongfully use a certificate issued pursuant to any provision of this division.

CHAPTER 4. NEWLY DISCOVERED PESTS

5251. Upon the discovery of any pest, the director shall immediately report the discovery to the commissioner of the county in which the pest is found.

5252. The director shall furnish to the commissioner a statement as to the best known means or methods for eradicating or controlling the discovered pest and advise him of the procedure or treatment to prevent the further spread of the pest.

5253. The commissioner shall disseminate all or any portion of the statement in whatever manner he may deem is best suited to inform persons that own or have charge or possession of any premises or appliances within the county where there is a probability of the presence of the pest.

5254. In any county where there is no commissioner, or if the director finds that the commissioner has failed or neglected to use all reasonable means to effect the control or eradication of any discovered pest, the director may undertake the control or eradication of the pest. He may exercise any power or authority which is conferred on the commissioner by this division.

5255. In any proceeding which is commenced pursuant to Section 5254, any duty, jurisdiction, or authority which is conferred on the commissioner by this division is conferred or imposed upon and transferred to the director.

CHAPTER 5. QUARANTINE REGULATIONS AND INSPECTION STATIONS

Article 1. General Provisions

5301. The director may establish, maintain, and enforce such quarantine regulations as he deems necessary to protect the agricultural industry of this state from pests. The regulations may establish a quarantine at the boundaries of this state or elsewhere within the state.

5302. The director may make and enforce such regulations as he deems necessary to prevent any plant or thing which is, or is liable to be, infested or infected by, or which might act as a carrier of, any pest, from passing over any quarantine line which is established and proclaimed pursuant to this division.

5303. All quarantine regulations which involve another state, territory, district, or foreign country shall be made by the director. The regulations shall be approved and proclaimed by the Governor.

5304. The proclamation shall be signed in duplicate. The original shall be filed in the office of the Secretary of State and a copy in the office of the department before the regulation takes effect.

5305. A quarantine shall not be established by one county, city, district, or other public agency, against another county, city, district, or public agency, on account of the existence of any pest, without the written consent of the director.

5306. It is unlawful for any person to refuse to comply with any quarantine regulation which is established by the director pursuant to this division.

5307. It is unlawful for any person, who is employed by any agency or institution that is supported or financed from public funds, willfully or knowingly to neglect or refuse to make a report to the commissioner of the county or to the director, or such person's immediate superior for the purpose of having such report transmitted to the commissioner of the county or to the director, of the presence in this state of any pest, as defined in Section 5006, which is new to, or not widely distributed in, the area or locality in which the pest exists, if the presence of such pest has been determined as a result of investigation, research, survey, or inspection which is made in behalf of the employing agency or institution.

5308. If there are any authorities or officers of the United States that are authorized to act with respect to any quarantine regulations that are established pursuant to this division, the director shall notify the authorities or officers and seek their cooperation as far as possible.

Article 2. Quarantine and Other Regulations for Pests Within the State

5321. If the director receives information of the existence of any pest which is not generally distributed within this state, he shall thoroughly investigate the existence and probability of its spread, and the feasibility of its control or eradication.

5322. The director may establish, maintain, and enforce quarantine and such other regulations as are in his opinion necessary to circumscribe and exterminate or prevent the spread of any pest which is described in Section 5321.

5323. The regulations which are established pursuant to this article are not valid unless they are clearly consistent with a strict interpretation of this division and are necessary to effectuate the purpose of this division. The adoption of the regulations does not create any presumption of their necessity or validity.

Article 3. Plant Quarantine Inspection Stations

5341. To prevent the introduction into, or the spread within this state, of pests, the director shall maintain at such places within this state as he deems necessary plant quarantine inspection stations for the purpose of inspecting all conveyances which might carry plants or other things which are, or are liable to be, infested or infected with any pest.

5342. Plant quarantine officers at plant quarantine inspection stations may ascertain the origin, quantity, and kinds of meat and meat products, poultry and poultry products, eggs, and livestock transported into or out of this state through the stations. The operator of any vehicle which is transporting any such commodity into or out of the state through any plant quarantine inspection station shall stop and give this information upon request to a plant quarantine officer at the plant quarantine inspection station. Such request may be by a sign which is openly displayed at the station or by any other means which is deemed by the director as effective.

The director may accept, on behalf of the state, donations of money from any person to defray the costs of the department under this section. Any such money shall be paid into the State Treasury and credited to the Department of Agriculture Fund. The director may limit expenditures under this section relating to livestock to the amounts so donated for this purpose, and shall limit expenditures under this section relating to poultry and poultry products and eggs to the amounts so donated for this purpose.

5343. The director shall cause conspicuous signs to be erected at or near each inspection station which disclose the existence of the station.

5344. It is unlawful for the operator of any vehicle to fail to stop the vehicle at an inspection station or upon demand of a uniformed plant quarantine officer for the purpose of determining whether any quarantine which is established pursuant to any provision of this division is being violated.

5345. It is unlawful for any person to operate upon any highway in this state any vehicle which, in violation of Section 5344, was not stopped as required by that section, if the person who is operating such vehicle knows of such violation of Section 5344. The violation of this section continues unless and until one of the following occurs:

(a) A period of 24 hours has elapsed following the violation of Section 5344.

(b) The operator who violated Section 5344 has been apprehended and the vehicle which is involved has been inspected and released from quarantine by any authorized state plant quarantine officer. An operator who is so apprehended does not violate this section by reason of operating the vehicle en route to the closest inspection station immediately following his apprehension for violation of Section 5344, nor does any other person, who operates the vehicle for such purpose, violate this section.

5346. It is unlawful for any person to conceal any plant from any plant quarantine officer or to fail to present it or any quarantined article for inspection at the request of such officer.

CHAPTER 6. ABATEMENT, GENERALLY

Article 1. Authority

5401. Any premises, plants, conveyances or things which are infected or infested with any pest, or premises where any pest is found, are a public nuisance, and shall be prosecuted as such in all actions and proceedings. All remedies which are given by law for the prevention and abatement of a nuisance apply to such a public nuisance.

5402. It is unlawful for any person to maintain such a public nuisance. The remedies which are provided by this article are in addition to any other remedy by way of abatement which is provided in this division.

5403. If, after service of notice pursuant to this chapter a public nuisance is not abated within the time which is specified in the notice, the commissioner shall abate the nuisance by eradicating, controlling, or destroying the pest.

5404. If, after service of the notice pursuant to this chapter, the commissioner determines that the nuisance constitutes an immediate hazard to adjoining or nearby property, and that great or irreparable injury would result from delay until expiration of the time required by law for constructive notice, he may forthwith abate the nuisance by eradicating, controlling, or destroying the pest.

5405. The board of supervisors of any county may authorize the commissioner to contract with any state or federal agency, public corporation for municipal purposes, or person that owns, controls, or administers within the county any property or premises which are infected or infested with any pest, to eradicate, destroy, or control it on such property or premises. The contract shall not impose any cost or obligation on the county, unless the imposition of the cost or obligation upon the county is authorized by the board of supervisors.

Article 2. Notice and Expense of Abatement Generally

5421. If the commissioner finds, after inspection, that any premises, plant, conveyance, or thing in his jurisdiction is infected or infested with any pest, he may in writing notify the record owner or person in charge or possession of the premises, plant, conveyance, or thing, that it is infected or infested with a pest. He may, to his satisfaction, require the person to eradicate, destroy, or control, the pest within the time which is specified in the notice.

5422. The notice may be served upon the record owner or person having charge or possession of the premises, plant, conveyance, or thing infected or infested with the pest or upon the agent of either, in the same manner as a summons in a civil action if such persons can be found within the county.

5423. If no person upon whom service may be had, can, after diligent search be found within the county, the notice may be served by posting copies of it in three conspicuous places upon the infected or infested property or premises, and by mailing a copy of it to the owner at his last known address.

5424. If the address of the owner is not known, and cannot be ascertained by the exercise of reasonable diligence, a copy of the notice shall be mailed to him at the county seat of the county in which the property is situated.

5425. The commissioner may record a copy of any notice that is served and may mail a copy of the notice to the person that appears of record to be the owner of any encumbrance on the property, at his last known address.

5426. If the address of the encumbrancer is unknown to the commissioner, he shall state in the copy of the notice that the address is unknown to him and shall mail the copy, addressed to the encumbrancer at the county seat of the county in which the property is situated.

5427. If the eradication, control, or destruction of the pest is undertaken by the commissioner pursuant to Section 5403, the notice shall be recorded.

5428. The recorded notice is, from the date of recording, a lien against the property which is described in the notice for the expense that is incurred by the county subsequent to the recordation of the notice in the abatement of the nuisance.

5429. The expense of the abatement by the commissioner is a county charge which is payable out of county funds.

5430. If the notice to abate is recorded before the commissioner incurs the expense of abatement, the amount which is incurred or expended by the county in the abatement is a lien on the land against which the expense is chargeable. In a case pursuant to Section 5494, the total expense shall be prorated and chargeable against each parcel of land in proportion to the acreage of such parcel which is served by water from the canal or ditch that is involved.

5431. A notice which sets forth the amount expended shall be recorded within 30 days after the date of payment of the last item of expense of the abatement by the county. The amount is a lien from the date of the recording of the notice of abatement pursuant to Section 5427.

5432. If a copy of the notice to abate a nuisance is recorded and a copy is served upon or mailed to the holder of any encumbrance of record pursuant to this article, the lien is superior to all encumbrances, existing and future, except liens for taxes and assessments.

5433. If the sum which is secured by lien is not repaid to the county within 80 days from the recording of the amount of the lien, there shall be added to the sum a penalty of 15 percent. The penalty shall also be secured by the lien.

5434. Except as provided in Article 3 (commencing with Section 5461) of this chapter, the district attorney of the county which makes payment of the abatement expense shall, within 120 days after the notice which is required by Section 5431 is recorded, commence in the name and for the benefit of such county, an action to foreclose the lien.

5435. (a) If, after foreclosure, the property is sold, enough of the proceeds shall be paid into the treasury of the county which forecloses the lien as shall satisfy the lien, penalty, and costs.

(b) If there is any surplus, it shall be paid to the owner of the property, if he is known. If the owner of the property is not known, the surplus shall be paid into the court for his use at such time as he is ascertained.

5436. If no action to foreclose is commenced within 120 days subsequent to the recordation of the notice which is required by Section 5431, the lien ceases to exist.

Article 3. Notice and Expense of Abatement on Tax-Deeded Property

5461. If any pest is found to exist upon any property which has been deeded to the state for nonpayment of taxes, the notice of abatement shall be served by recording and mailing a copy of the notice to the State Controller, and either by personally serving or by mailing a copy of it, in the manner provided in Sections 5425 to 5428, inclusive, to the last owner of record prior to the deeding of the property to the state.

5462. If the expense of abatement becomes a lien on such property, as provided in Sections 5429 to 5432, inclusive, and the property is redeemed or sold to a private person at a tax sale, the action to foreclose the lien shall be commenced within 120 days after the redemption or sale.

5463. If no action to foreclose is commenced within 120 days subsequent to the redemption or sale of the property, the lien ceases to exist.

5464. If the property is acquired by the state, or by any municipal corporation or political subdivision, and the right of redemption is terminated, the lien terminates at the time the right of redemption is terminated.

Article 4. Notice and Expense of Abatement on Other Public Property

5491. If any pest is found to exist in any public park or along any street, highway, or other property which is subject to the control of a city or county, the notice of abatement shall be served on the chairman of the governing body of the city or county. If the eradication, control, or destruction of the pest is performed by the commissioner, the cost of the eradication, control, or destruction is a city or county charge,

as the case may be, and shall be paid from the general fund of the city or county.

5492. If any pest is found to exist in any park or along any street, highway, right-of-way, or other property which is subject to the control of any agency of the state, the director, upon receiving a report of the existence of the pest from the commissioner, shall notify the agency. He may instruct the commissioner to serve the notice upon the director or other executive officer of the agency. If the eradication, control, or destruction of the pest is performed by the commissioner, the cost of the eradication, control, or destruction is a charge against, and shall be paid from, the maintenance fund or from other funds for the support of the agency.

This section applies to a state highway right-of-way if any pest of the same kind has been, or is being, subjected to control, destruction, or eradication on other private or public property in the immediate vicinity of the right-of-way, either at the direction of the commissioner or voluntarily by the owner of such adjacent property.

5493. If any pest is found to exist upon any property which is subject to the control of any irrigation, drainage, flood control, reclamation, or levee district, or other political subdivision of the state, the notice of abatement shall be served upon the chairman of the governing body of the district or political subdivision. If the chairman is absent from the county, or for any reason cannot be served, the notice shall be served upon some other member of the governing body. If the eradication, control, or destruction of the pests upon the property is performed by the commissioner, the cost of the eradication, control, or destruction is a legal charge and shall be paid from the general maintenance or operating fund, as the case may be, of the district or political subdivision.

5494. If any pest is found to exist in or on any irrigation canal or ditch, including its lateral banks, which is not subject to the control of any district or political subdivision of the state, the notice of abatement shall be served upon all users of water from the irrigation canal or ditch that is described in the notice.

CHAPTER 7. ABATEMENT OF NEGLECTED OR ABANDONED CROPS

Article 1. General Provisions

5551. Any neglected or abandoned plant or crop is a public nuisance in any of the following circumstances:

(a) It is a menace to the agriculture of the county, district, or vicinity because of the existence of any pest, in or on it.

(b) It is a menace to the agriculture of the county, district, or vicinity because of the existence of any other condition than the condition described in subdivision (a).

(c) It is a host plant of, or provides a favorable or likely harbor for, any pest.

5552. Any cotton plant which is uncultivated or that is left from a previous season which is harboring or likely to harbor pests is such a public nuisance. If any such cotton plant is not destroyed to the satisfaction of the commissioner that has jurisdiction, by April 1st of any year, it is subject thereafter to all remedies which are or may be given for the prevention or abatement of nuisances.

5553. It is unlawful for any person to maintain any neglected or abandoned plant or crop which is a public nuisance.

5554. All remedies for the prevention or abatement of nuisances apply to any such nuisance.

Article 2. Institution of Proceedings

5571. If the commissioner of any county determines by inspection that there is a condition which constitutes a nuisance, as defined in Section 5551 or 5552, on any property or premises within his jurisdiction, he shall make a report of his inspection to the district attorney. The commissioner in the report shall do all of the following:

(a) Describe the property upon which the nuisance exists.

(b) Name the pest or other condition which in his opinion is dangerous to the agriculture of the county, district, or vicinity.

(c) State, if his findings justify such a statement, that the removal or destruction of the neglected or abandoned plant or crop will provide the best means for the elimination of the menace to the agriculture of the county, district, or vicinity.

5572. Whenever the district attorney receives a report from the commissioner, he shall, on the basis of the report, prepare a petition to the superior court of the county praying for an order to remove or destroy the neglected or abandoned plant or crop.

5573. The petition shall set forth all of the following:

(a) A description of the property.

(b) The name of the owner or person that is in charge or possession of the property.

(c) The name of the pest, or other condition which is a menace to the agriculture of the county, district, or vicinity.

5574. Upon the filing of the petition, the court shall issue a citation which requires that the owner or person that is in charge or in possession of the property appear at a time and place which is specified to show cause why the neglected or abandoned plant or crop should not be removed or destroyed.

5575. A copy of the citation, together with a copy of the petition, shall be served upon the record owner or upon the

person that is in charge or in possession of the property, or upon an agent of either, not less than 10 days before the date which is specified in the citation.

5576. A copy of the citation, together with a copy of the petition, may also be served upon any person that appears of record to be the owner of any encumbrance upon, or interest in, the property.

5577. If the property upon which the neglected or abandoned plant or crop exists has been deeded to the state for nonpayment of taxes, a copy of the citation, together with a copy of the petition, shall be mailed to the State Controller, and a copy of each shall be served upon the last owner of record prior to the deeding of the property to the state. A notice of the pendency of the action shall be recorded pursuant to Section 409 of the Code of Civil Procedure.

5578. The service of the petition and citation may be personal, by delivery to the party on whom service is required to be made.

5579. If the party upon whom service is required to be made resides within the county, service may be made by leaving a copy of the citation, together with a copy of the petition, at the residence of the party between the hours of eight in the morning and six in the evening, with some person who is not less than 18 years of age. If at the time of attempted service between such hours, no such person can be found at the residence of the party, service may be made by mail.

5580. If the party upon whom service is required to be made does not reside within the county, service of the petition and citation may be made by mail, if he resides or has his office at a place where there is a delivery service by mail. If there is no delivery service by mail, or if his residence is not known, service may be made by posting a copy of the citation, together with a copy of the petition, in a conspicuous place on the property on which the neglected or abandoned plant or crop is situated, at least 20 days before the date specified in the citation.

5581. Service of the petition and citation by mail shall be made pursuant to the Code of Civil Procedure.

Article 3. Hearing and Order

5601. On the day on which the citation is made returnable, the court shall hear the cause and decide whether or not the neglected or abandoned plant or crop shall be destroyed or removed. The hearing shall have precedence over all matters other than injunctions, older matters of the same character, and matters which are otherwise given precedence by law.

5602. If the court is satisfied that the conditions which are set forth in the petition exist on the property and that

the removal or destruction of the neglected or abandoned plant or crop is necessary and essential for the welfare of the agriculture of the county, district, or vicinity, it shall order the removal or destruction, within a certain time, of the neglected or abandoned plant or crop which is located upon the property described in the order.

5603. The order to remove or destroy the neglected or abandoned plant or crop shall be served by the commissioner, or by any person who is deputized by him for that purpose, as follows:

(a) If the owner of the property can, after due diligence, be found within the county, upon the owner.

(b) If the owner cannot, after due diligence, be found within the county, upon the person that is in charge or possession of the property.

(c) If neither the owner or person that is in charge or possession of the property can, after due diligence, be found within the county, by posting in a conspicuous place upon the property.

5604. If the order is not complied with within the time which is specified in the order, the commissioner shall cause the removal or destruction of the neglected or abandoned plant or crop which is mentioned in the order.

5605. Any person that fails to comply with any lawful order of the court which is made and served pursuant to the provisions of this article and Article 2 (commencing with Section 5571) of this chapter is in contempt of court and shall be punished accordingly. The punishment is in addition to any other penalty which is provided for in this code.

Article 4. Expense of Abatement

5631. If the removal or destruction of any neglected or abandoned plant or crop which is a public nuisance as defined in Section 5551 or 5552, is undertaken by the commissioner, he shall cause a notice of lien which describes the land on which it exists to be recorded.

5632. From the date of the recording, the land which is described in the notice is subject to a lien for any expense which is incurred by the county subsequent to the recording of the notice in the abatement of the nuisance which is referred to in the notice.

5633. The commissioner shall keep an account of the cost of the removal or destruction and shall render an itemized report of the cost to the board of supervisors.

5634. The expense of the removal or destruction is a county charge which is payable out of county funds.

5635. If the notice of lien is recorded before the expense of removal or destruction is incurred, the amount which is incurred or expended is a lien on the land against which the expense is chargeable.

5636. A notice which sets forth the amount which has been expended for the removal or destruction of any neglected or abandoned plant or crop which is a public nuisance, as defined in Section 5551 or 5552, shall be recorded within 30 days after the date of payment of the last item of expense incurred by the county, and such amount is a lien from the date of recording of the notice of lien.

5637. The lien is superior to all encumbrances, existing and future, except liens for taxes and assessments, if a copy of the notice of lien is recorded and a copy is served upon or mailed to the holder of any encumbrance of record, at the last known address of the encumbrancer.

5638. If the address of the encumbrancer is unknown to the commissioner, he shall state in the copy of the notice that the address is unknown to him and shall mail the copy addressed to the encumbrancer at the county seat of the county in which the property is situated.

5639. If the sum which is secured by the lien is not repaid to the county within 80 days from the recording of the amount of the lien, there shall be added to it a penalty of 15 percent. The penalties shall also be secured by the lien.

5640. Except as provided in Section 5643, the district attorney of the county which makes the payment for the expense of eradication or destruction shall, within 120 days after the lien is recorded, commence in the name and for the benefit of such county an action to foreclose the lien.

5641. (a) If, after foreclosure the property is sold, enough of the proceeds shall be paid into the treasury of the county which forecloses the lien as shall satisfy the lien, penalty and costs.

(b) If there is any surplus, it shall be paid to the owner of the property, if he is known. If the owner of the property is not known, the surplus shall be paid into the court for his use at such time as he is ascertained.

5642. If no action to foreclose is commenced within 120 days subsequent to the recordation of the notice of lien, the lien ceases to exist.

5643. If the expense of removal or destruction of any abandoned plant or crop becomes a lien on property which has been deeded to the state for nonpayment of taxes, as provided in Sections 5635 to 5637, inclusive, and the property is redeemed or sold to a private person at a tax sale, the action to foreclose the lien shall be commenced within 120 days after the redemption or sale of the property.

5644. If no action to foreclose is commenced within 120 days subsequent to the redemption or sale of the property, the lien ceases to exist.

5645. If the property is acquired by the state, or by any municipal corporation or political subdivision, and the right of redemption is terminated, the lien terminates at the time the right of redemption is terminated.

CHAPTER 8. SPECIAL QUARANTINE, CONTROL, AND ABATEMENT METHODS

Article 1. Hold Notices on Infested Properties

5701. If any pest exists on any premises, the director or the commissioner may hold any plant or other thing which is, or may be, capable of disseminating or carrying such pest. He shall notify the owner of the plant or other thing, or his agent, of such action, and the issuance of any shipping permit, intercounty nursery stock certificate, or certificate of inspection and release with respect to such plant or other thing shall be refused and any such permit or certificate which has been previously issued shall be revoked.

5702. If, in the opinion of the director or commissioner, the plant or other thing has been disinfected or cleaned so as to eradicate or control the pest, he shall in writing release it or issue the shipping permit, intercounty nursery stock certificate, or certificate of inspection and release, as the case may be.

5703. This article does not affect any other authority which is granted to a commissioner by Chapter 3 (commencing with Section 6501), Part 2 of this division.

5704. It is unlawful for any person to move any plant or other thing from the premises where the pest exists, except under the written permission of the director or commissioner and in accordance with the conditions which are stated in the written permission.

Article 2. Standards of Cleanliness

5721. If the director by regulation designates any plant, appliance, or other thing as liable to be infected or infested with any pest, and provides for notifying the commissioner of its arrival as required by Article 1 (commencing with Section 6501), Chapter 3, Part 2 of this division, he may include in the regulations standards of cleanliness for the plant, appliance, or other thing and provide for the certification by the commissioner of the county of origin of shipment that it conforms to the standards of cleanliness. The regulations may provide for the qualification of certain counties or certain areas where in the opinion of the director the standards of cleanliness are maintained in respect to all shipments of the designated plant, appliance, or thing. The regulations may also provide for shipments which originate in areas that are so qualified.

5722. The commissioner of the county of destination may waive the notification and holding for inspection of any shipment which bears a certificate of cleanliness or certificate of origin, issued pursuant to this article.

5723. This article is not applicable to seed which is intended for planting purposes or to other nursery stock.

Article 3. Prevention of Pest Dissemination by Movement of Appliances

5741. To prevent the dissemination of pests through the agency of appliances, the director may from time to time publish a list of such pests which may be carried through such agencies and designate any treatment which in his opinion would prevent their dissemination.

5742. Except as otherwise provided in Section 5744, it is unlawful for any person to ship or move any used appliances unless there is furnished to the commissioner of the county of destination such proof as he may require that the appliances either:

(a) Have not been exposed to infestation or infection by any pests.

(b) Have been treated immediately prior to shipment or movement in the manner which is designated by the director.

5743. The commissioner of the county of destination shall refuse entry of the used appliances until the proof required in Section 5742 is furnished.

5744. The used appliances may be moved to a place which is designated by the commissioner for treatment under his supervision.

Article 4. Eradication Areas

5761. The regulations which are adopted pursuant to Article 2 (commencing with Section 5321) of Chapter 5, Part 1 of this division may proclaim any portion of the state to be an eradication area with respect to the pest, prescribe the boundaries of such area, and name the pest and the hosts of the pest which are known to exist within the area, together with the means or methods which are to be used in the eradication or control of such pest.

5762. Any pest with respect to which an eradication area has been proclaimed, and any stages of the pest, its hosts and carriers, and any premises, plants, and things infested or infected or exposed to infestation or infection with such pest or its hosts or carriers, within such area, are public nuisances, which are subject to all laws and remedies which relate to the prevention and abatement of public nuisances.

5763. The director, or the commissioner acting under the supervision and direction of the director, in a summary manner or otherwise, may disinfect or take such other action, including removal or destruction, with reference to any such public nuisance, which he thinks is necessary.

5764. If an eradication area has been proclaimed with respect to a species of fruit flies and the removal of host plants of such species is involved, the director may enter into an agreement with the owner of such host plants to remove and replace them with suitable nursery stock in lieu of treatment.

Any expenditures for the replacement nursery stock shall not exceed an amount which is budgeted for the purpose or approved by the Director of Finance.

Article 5. Host-Free Periods and Districts

5781. If the director determines that a particular pest, either within the state or from any area which is adjacent to the state, cannot be eradicated or effectively controlled by recognized ordinary means, or that it is impracticable to eradicate or control such pest without the destruction in whole or in part of uninfected or uninfested host plants, he may issue a proclamation which does all of the following:

(a) Declares a host-free period or a host-free district, or both.

(b) Describes any host and the district in which the planting, growing, cultivating, or maintenance in any manner of any plant which is capable of continuing the particular pest is prohibited during a specified period of time and until the menace from it no longer exists.

5782. During the existence of a host-free period or host-free district which is established by the proclamation of the director, any host which is planted, growing, or being cultivated or maintained within such host-free period or district is a public nuisance and is subject to all the laws which relate to the abatement of such nuisance.

5783. It is unlawful for any person to plant, grow, cultivate, or maintain any host which is described in any proclamation of the director that establishes a host-free period or host-free district, within such host-free period or host-free district after notice of the host-free period or host-free district.

Article 6. Grafts and Buds From Plants Generally Infected

5801. If the director, after investigation and hearing, determines that any kind or variety of plant is generally infected with a virus disease that is dangerous or detrimental to the production of fruit, nut, or vine crops in this state, he may adopt regulations which prohibit or restrict the budding, grafting, or otherwise joining of tissue of such kind or variety of plant with any kind or variety of fruit or nut tree or vine that is used in the commercial production of fruits or nuts.

5802. If a source of any prohibited or restricted kind or variety of plant has been demonstrated to be free of dangerous or detrimental viruses, the director shall, in the regulation, permit use of such source.

5803. It is unlawful for any person to bud, graft, or otherwise propagate or grow any fruit or nut tree or vine in violation of any regulations which are adopted pursuant to this article or to sell as nursery stock any plant which is so produced.

Article 7. Registries

5821. The director, for the purpose of promoting and protecting the agricultural industry of the state, may, upon request, inspect plants and the premises upon or near which they are growing and the records of their sources and qualities. He may upon the basis of the information thus determined, maintain registries of the plants which are found not to be infested or infected, or liable to become infested or infected, with pests.

5822. The director may do any of the following:

(a) Certify as to the pest freedom of plants which may have been inspected or registered or may certify as to the true pest condition of the plants.

(b) Issue tags, labels, or certificates in evidence of inspection or registry.

(c) Supervise or conduct any special treatments which may be necessary to insure the pest freedom of plants for propagation or planting purposes.

(d) Fix uniform fees to be charged for inspections, registrations, certifications, and special treatments. The fees shall be based upon the approximate cost of the service which is rendered.

5823. The director may also establish and enforce regulations which are necessary to carry out the purposes of this article.

5824. The cost of any service which is rendered pursuant to this article shall be paid from the Department of Agriculture Fund out of any money which is derived pursuant to this article and shall not be a charge against the General Fund.

5825. The services which are authorized by this article shall not duplicate services which are being rendered by commissioners.

5826. It is unlawful for any person to alter, deface, or misuse any statement of registry, certificate, label, or tag which is issued pursuant to this article.

5827. Any money which is received by the department pursuant to this article shall be paid into the State Treasury and be credited to the Department of Agriculture Fund. Any money in the Department of Agriculture Fund which was derived pursuant to this article may be expended for the administration and enforcement of any or all of the following which relate to nursery stock, notwithstanding any other provision of law which limits the expenditure of such money to some specific purpose or to the administration or enforcement of some specific section, article, chapter or law:

(a) Section 435.

(b) Article 7 (commencing with Section 5821), Chapter 8, Part 1 of Division 4.

(c) Chapter 1 (commencing with Section 6701), Part 3 of Division 4.

(d) Any other provision of Division 4, which relates to nursery stock, except any provision of Article 5 (commencing with Section 6001) of Chapter 9 or Chapter 10 (commencing with Section 6101) of Part 1, Part 5 (commencing with Section 8401), or Part 6 (commencing with Section 8801) of Division 4.

(e) Chapter 5 (commencing with Section 53301) of Division 18.

CHAPTER 9. SPECIFIC PEST CONTROL AND ABATEMENT PROVISIONS

Article 1. Citrus White Fly Districts

5901. To provide for the eradication of the citrus white fly, the director may by proclamation declare any portion of the state where the citrus white fly is known to exist to be a citrus white fly district.

5902. The proclamation shall state both of the following:

(a) The existence of the citrus white fly district.

(b) The description of the boundaries of the district.

5903. The director shall print a copy of the proclamation in one or more papers of general circulation in the infested district.

5904. Every plant within a citrus white fly district which is infested with citrus white fly or with the eggs, larvae, or pupae of the citrus white fly, or which there is reasonable cause to presume may be infested with citrus white fly, is a public nuisance.

5905. The existence of any known host plant of citrus white fly within the boundaries of the district is reasonable cause to presume the host plant is infested with the citrus white fly.

5906. The department and the commissioners may cause the destruction of any host plant of the citrus white fly in a summary manner.

5907. If, in the opinion of the enforcing officer, the host plant may be treated in a manner to destroy all citrus white flies or the eggs, larvae, or pupae of the citrus white fly which are or may be on the plant, the officer may in a summary manner cause such treatment to be given.

Article 2. Oriental Fruit Fly

5931. The prevention of the introduction or the spread within this state of the oriental fruit fly (Dacus dorsalis) is essential to the welfare of the agricultural industry of this state. Once introduced this pest is likely to spread very rapidly and inflict a calamitous loss on agriculture. It is, therefore, essential that all steps possible shall be taken to eradicate this pest before it obtains a foothold by finding and destroy-

ing the plants which are affected as soon as the pest is introduced.

5932. In order to encourage the owners of plants which might be infested with the oriental fruit fly to report the possibility immediately to the appropriate authorities and to minimize resistance to the destruction of plants which are found to be, or to be likely to be, infested, it is the policy of the state to provide for the reimbursement to the owners of plants which it is found necessary to destroy.

5933. Upon the discovery of the oriental fruit fly in any area of the state, and the inclusion of such area in an eradication area which is proclaimed pursuant to Article 4 (commencing with Section 5761) of Chapter 8 of this part, the director may, if he deems it necessary, destroy the host plant of the oriental fruit fly within the area. He may pay to the owner of any plant so destroyed, out of any money which is available for that purpose, the value of the plant as determined pursuant to this article.

5934. The director may establish a table of values for plants which are likely to be infested with the oriental fruit fly which, as to any type of plant, may vary in accordance with its stage of maturity or other conditions. Any value that is so established shall reimburse the owner of any such plant which is destroyed pursuant to this article for the loss.

5935. For the purpose of facilitating payments pursuant to this article, the director may establish as a revolving fund all or any portion of the money which is appropriated to carry out the purposes of this article. He may authorize withdrawals from the revolving fund for payments in accordance with this article.

Article 3. Black Currant

5951. The cultivated black currant (Ribes nigrum) and all other species of the genus Ribes, both wild and cultivated, when growing within any area which is subject to official state or federal quarantine orders or regulations, wherein such Ribes species have been designated as the intermediate host of white pine blister rust, are public nuisances.

5952. The director and the commissioners may abate the nuisance in a summary manner, or otherwise under the provisions of law which relate to public nuisances.

5953 It is unlawful for any person to grow, propagate, or distribute cultivated black currants (Ribes nigrum) or other blister rust host species of Ribes in those portions of this state designated in state or federal quarantine regulations.

Article 4. Meyer-Lemon-Free Districts

5981 As used in this article "Meyer lemon plant" includes each of the following:

(a) Any plant which consists entirely or partly of Meyer lemon plant tissue.

(b) Any plant to which Meyer lemon plant tissue has been joined at any time by any method of grafting.

5982. The prevention of the introduction or the spread within the commercial citrus growing areas of the state of quick decline in citrus is essential to the welfare of the agricultural industry of the state. It is therefore essential that all steps possible shall be taken to prevent the spread of quick decline virus into or within the areas of commercial production where the disease has not as yet appeared. It is the policy and intent of the state to limit the application of this article to the smallest possible areas required for sound and safe protection so that the removal or destruction of Meyer lemon plants can be kept to a minimum and not to require the removal or destruction of plants in home gardens outside the area of commercial citrus production.

5983. To provide for the removal or destruction of Meyer lemon plants in any area where citrus fruit is being produced commercially, and in which the director determines that the planting, growing, cultivation, or maintenance of Meyer lemon plants is, or is liable to be, dangerous or detrimental to the commercial production of other citrus fruits, the director may by proclamation declare the area to be a Meyer-lemon-free district. The proclamation shall prescribe and state the boundaries of the district.

5984. The director shall have printed a copy of the proclamation in one or more papers of general circulation in the Meyer-lemon-free district.

5985. All Meyer lemon plants within the boundaries of a Meyer-lemon-free district are a public nuisance and are subject to all laws and remedies which relate to the prevention and abatement of public nuisances.

5986. The director, or the commissioner acting under the supervision and direction of the director, in a summary manner or otherwise, may take such action, including removal and destruction, with reference to the public nuisance as he thinks is necessary.

Article 5. Cotton Pest Control

6001. It is hereby declared that the cotton industry of this state is threatened with the invasion of cotton boll weevil and pink bollworm of cotton. These two pests, if established in this state, will cause losses of several million dollars per year to this state's number one field crop. The purpose of this article is the prevention of the introduction of these two pests into this state and it is not intended to set a precedent, supersede, or change the normal methods of acting to control or eradicate newly established pests in this state.

6002. The director may contract with the United States Department of Agriculture for the purpose of controlling, suppressing, or eradicating cotton boll weevil or pink bollworm in this state, the State of Arizona, or the Republic of Mexico to prevent the entry and establishment of these pests in this state.

Article 6. Field Rodents

6021. If the director receives a report from the executive officer of the State Department of Public Health which states that field rodents in a certain area carry, or are likely to carry, any disease, insect, or other vector of any disease which is transmissible and injurious to humans, he shall forthwith advise the commissioner of the county in which such rodents exist.

6022. The commissioner shall cooperate in suppressing the rodents.

6023. The director shall cooperate by entering into an agreement pursuant to Section 482 for the purpose of suppressing the rodents on the reported areas and on neighboring areas, to prevent the spread of the rodents

6024. In order to carry out the purposes of this article, the director or commissioner may enter upon any and all premises within any reported area or neighboring area to bait. trap, expose chemically treated baits, or perform any act which he deems necessary for the purpose of suppressing, destroying, or repelling the rodents.

Chapter 10. Caprifigs and Caprifig Trees

Article 1. Definitions

6101. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

6102. "Blanks" means caprifigs which are devoid of Blastophaga insects or galls that contain Blastophaga insects.

6103. "Mamme" crop means the winter crop of caprifigs.

6104. "Matured pollen" means pollen in a powdery condition which can be dusted or shaken out from the anthers in appreciable quantities.

6105. "Profichi crops" means the crop of caprifigs which matures in June and July and is used to caprify or pollinate the main crop of the Smyrna type of figs.

6106. "Spent figs" means caprifigs from which all the female Blastophaga insects have issued.

Article 2. Enforcement

6131. The commissioner shall enforce this chapter.

6132. The commissioner may enter any place where caprifigs are produced, packed, stored, shipped, delivered for ship-

ment, or sold, and inspect them. He may seize and hold for evidence any caprifigs which are packed, shipped, delivered for shipment, or sold in violation of any provision of this chapter, and prosecute actions for any such violation.

6133. The board of supervisors of any county may receive and accept on behalf of the county, any contribution or donation of money from a person or from any agency of this state or of the United States for the purpose of enforcing this chapter. Any money which is so received shall be credited to the budget of the commissioner and shall be expended solely for such enforcement.

6134. It is unlawful for any person to willfully or otherwise interfere with the enforcement of any provision of this chapter.

Article 3. Caprifigs

6151. Caprifigs, unless properly treated, contribute to, and are responsible for, the transmission of endosepsis and other plant diseases by the blastophaga which the figs contain.

6152 Every person who owns, raises, uses, packs, ships, or delivers for shipment or sells any caprifigs of the mamme crop for use within the county, shall treat such figs by a method which is approved by the commissioner for the prevention or elimination of endosepsis or the transmission of endosepsis by the blastophaga in the figs.

6153. If any caprifigs of the mamme crop are to be shipped or used outside the county, the person that owns, raises, uses, packs, ships or delivers them for shipment shall notify the commissioner of the county within which the figs are to be used of all of the following:

(a) The shipment.

(b) The nature of the shipment.

(c) The name and residence of the consignee.

6154. After the notice, the commissioner shall require the consignee to properly treat the figs for the prevention or elimination of endosepsis before using them.

6155 It is unlawful for any person to violate Section 6152, 6153, or 6154.

6156. It is unlawful for any person to pack, ship, deliver for shipment, or sell in any container any caprifigs of the profichi crop which violate any of the following:

(a) Do not contain matured pollen.

(b) Do not contain living Blastophaga insects in the adult stage.

(c) Contain more than 25 percent of spent figs.

(d) Contain more than 10 percent of blanks.

6157. It is unlawful for any person to pack, ship, deliver for shipment or sell in any container any caprifigs of the mamme crop, which contain more than 25 percent of spent figs, or more than 10 percent of blanks.

Article 4. Caprifig Trees

6171. Caprifig trees, unless properly controlled and regulated under supervision, constitute a menace because they are a source of infection and pests.

6172. Except as otherwise provided by Section 6173, in the interest of the public welfare and general prosperity of the state and to provide for the control, eradication, elimination, and prevention of endosepsis and other plant diseases, all caprifig trees used for shade, ornamental, or decorative purposes, and caprifig trees in, or associated with, any fig orchard which produces calimyrna or other Smyrna-type figs that aggregate in number more than one and one-half percent of the fig trees in the orchard, are unlawful and a public nuisance.

6173. Every commercial grower of calimyrna or other Smyrna-type fig may maintain at least one caprifig tree in connection with his planting.

6174. The commissioner shall notify the owner of any fig tree which is a public nuisance under Section 6172 to graft or destroy it within a time which is specified in the notice.

He may furnish to the owner, at the time of serving the notice, instructions for application of methods by the owner which are best designed to accomplish the purposes of the notice.

6175. If the owner does not destroy or graft the fig tree within the time which is specified in the notice, the commissioner shall cause the grafting or destruction of the tree, at the expense of the owner, in a summary manner.

6176. A calimyrna grower, regardless of the size of his holdings, shall follow the standard procedures for cleanup of caprifig trees by picking the mamme caprifigs before the wasps begin to issue. He shall treat the mamme caprifigs which are picked with a fungicide, according to recognized procedures

6177. The presence of both mamme and set profichi figs in the caprifig trees at the same time is a public nuisance. The caprifigs, or the trees, or both, shall be destroyed at the owner's expense by the owner or by the commissioner, pursuant to this article, before the profichi caprifig crop matures

PART 2. SHIPMENTS

CHAPTER 1. GENERALLY

Article 1. General Provisions

6301. If any article is found to have been transported into this state from any other state, territory, or district of the United States, in violation of any provision of a quarantine which is established by the Secretary of Agriculture of the United States, the article is subject to seizure, destruction, or

other disposition to the same extent and in the same manner as if the article had originated in this state and was in violation of a provision of this division.

6302. If any shipment of plants or things which is passing through any portion of the state is, or is liable to be, infested or infected with any pest, and there exists danger of dissemination of the pest while the shipment is in transit in this state, the shipment shall be placed within sealed containers which are composed of metal or other material so constructed that they are not liable to be broken or opened while in transit so as to permit the pest to escape. The containers shall not be opened while within the state.

6303. It is unlawful for any person, except under written permission from a plant quarantine officer or under his specific direction, to move any lot or shipment of plants or other things to which a warning tag or notice has been affixed pursuant to any provision of this division, or to remove, alter, destroy, deface, or mutilate any such warning tag or notice.

6304. It is unlawful for any person to import into the state any English or Australian wild rabbit, flying fox, mongoose, or any other form of animal life which is detrimental to agriculture. Any such animal shall be refused entry and shall be immediately destroyed or shipped out of the state within 48 hours at the option and expense of the owner or bailee of the animal.

6305. It is unlawful for any person to import into or ship or transport within the state, any live insect, except honey bees of the species Apis mellifera, or any pest as such, except weeds for the purpose of identification, unless the shipment or transportation is authorized prior to shipment under written permit and the regulations of the director or the United States Department of Agriculture. Any shipment which is not authorized by this section shall be immediately destroyed unless it is determined by the inspecting officer that the nature of the contents of the shipment is such that no damage can be caused to agriculture in this state through its shipment out of the state or return of the shipment to the point of origin. In such case, the shipment out of the state or the return of the shipment to point of origin shall be allowed at the expense of the owner or bailee of the shipment within the time which is specified by the inspecting officer.

Article 2. Tephritidae Fruit Flies

6321. It is unlawful for any person to import into, or transport thereafter within, the state any plant, fruit, or vegetable which is known to be, or may become, a host of any species of the fruit fly family Tephritidae from any territory, state, or district where such species of Tephritidae is known to exist except under permit and regulation of the director if

the director finds that the species is harmless to agriculture or that an effective treatment of the hosts eliminates fruit fly risk.

6322. Any plant, fruit, or vegetable which is known to be, or which may become, a host of any species of the fruit fly family Tephritidae, together with its containers and packing, shall be refused entry or transportation within the state.

6323. Any plant, fruit, or vegetable which is known to be, or which may become, a host of any species of the fruit fly Tephritidae, which is imported into, or transported thereafter within, this state shall be immediately destroyed at the expense of the owner or bailee unless it is imported or transported under permit and in accordance with regulations of the director.

Article 3. Seed Pests in Shipments

6341. If anything brought into any county or locality of the state from another county or locality within the state, or from any other state or foreign country, is found to be infested with the seed of any pest that is not of common occurrence in the county or locality into which the shipment is brought, the director or the commissioner shall notify the owner or bailee of such shipment to return it to the point from which the shipment was made.

6342. The owner or bailee shall return the shipment to the point from which it was made within 48 hours.

6343. If the director or the commissioner determines that the pest seeds can be destroyed by treatment, the shipment may, at the option and expense of the owner or bailee, be given such treatment under the supervision of the director or the commissioner. After the treatment the shipment may be released.

6344. If the director or the commissioner determines that no adverse effect to agriculture would result from allowing the shipment to be stored in quarantine pending treatment or shipment out of the state, or from procedures incidental thereto, the shipment may be so stored for such a period of time in an approved place under such conditions as the director or commissioner may require.

Chapter 2. Interstate Shipments

Article 1. Notice of Arrival and Hold for Inspection

6401. It is unlawful for any person to transport, receive, or import into the state any plant or any thing against which a quarantine has been established, or any plant, unless he does both of the following:

(a) Notifies the director or the commissioner of the county in which the plant or thing is received, of the arrival of the plant or thing immediately after its arrival.

(b) Holds the plant, or thing for immediate inspection by the director or commissioner, without unnecessarily moving it, or placing it where it may be harmful.

6402. If there is no commissioner in the county where the plant or thing is received, the person that transports, receives, or imports the plant or thing into the state shall notify the director, who shall make immediate arrangements for its inspection.

6403. The officer who makes the inspection may enter at any time into any conveyance or place within the state where the plant or thing is located to ascertain whether it is, or is liable to be, infested or infected with any pest.

Article 2. Markings

6421. Each shipment of plants which is brought into this state shall have legibly marked upon it in a conspicuous manner and place all of the following:

(a) The name and address of the shipper or owner.

(b) The name of the person to whom the shipment is forwarded or shipped or the name of his agent.

(c) The name of the country, state, or territory where the contents were grown.

(d) A statement of its contents.

Article 3. Pest Findings

6441. If, after inspection, any plant or thing is found to be infested or infected, the owner or bailee shall, at his expense, disinfect the conveyance or place where the plant or thing may have been located, in such manner as to destroy all infection or infestation present, or that is liable to be present.

6442. The officer who makes the inspection shall not permit any article to be removed which has come in contact with the infested or infected plant or thing, if such article might convey infection or infestation, until after the infection or infestation is destroyed, except for the purpose of destruction or disinfection under the supervision of the inspecting officer.

Any article which is liable to be infested or infected shall be held until it has been thoroughly disinfected and the pest has been destroyed.

6443. The director may designate certain plants that are not for planting, propagation, or ornamental purposes within this state, which are arriving from certain areas, to be plants that may be released without inspection, if he finds, upon investigation, that such plants from such areas are not liable to cause the introduction of pests into this state.

Article 4. Abatement, Reshipment, or Treatment

6461. Except as otherwise provided in this article, if any shipment of plants, or any other things against which a quar-

antine has been established, is brought into this state and it is found to be infested or infected, or there is reasonable cause to presume that it may be infested or infected, with any pest, the shipment shall be immediately destroyed by, or under the supervision of, the officer who inspects it, at the expense of the owner or bailee of the shipment.

6462. If the nature of the pest is such that no detriment can be caused to agriculture in the state by the shipment of the plant or thing out of the state, the officer who makes the inspection may affix a warning tag or notice to the shipment. The officer shall notify the owner or bailee of the plant or thing to ship it out of the state within 48 hours. The owner or bailee shall ship the plant or thing out of the state within the time which is specified in the notice. The shipment is under the direction and control of the officer who makes the inspection and is at the expense of the owner or bailee.

6463. If the plant or thing is not shipped out of the state within the time which is specified in the notice, the inspecting officer shall immediately after the expiration of the time seize the plant or thing and destroy it at the expense of the owner or bailee.

6464. If the pest may be exterminated by treatment or processing which is prescribed by the director and it is determined by the inspecting officer that the nature of the pest is such that no damage can be caused to agriculture in this state through such treatment or processing or any procedure which is incidental thereto, the shipment may be treated or processed under the supervision of the inspecting officer at the expense of the owner or bailee in the manner, and within the time, which is specified by the inspecting officer.

6465. If, after the treatment or processing, the inspecting officer determines that the pest has been exterminated, the shipment may be released.

CHAPTER 3. INTRASTATE SHIPMENTS

Article 1. Notice of Arrival and Hold for Inspection

6501. Except as otherwise provided in Section 6502, 6503, or 6504, it is unlawful for any person to receive or bring into any county or locality of the state from another county or locality within the state any nursery stock, or any other plant, appliance, or thing which the commissioner or the director considers and designates to be liable to be infected or infested with any pest, unless he does both of the following:

(a) Notifies the commissioner of the arrival of the article immediately after its arrival.

(b) Holds it for immediate inspection by the commissioner, without unnecessarily moving or placing the article where it may be harmful.

6502. Any shipment of less than five pounds of field, vegetable, or flower seed, or comprised of packages of less than three pounds of each kind of such seed, is exempt from the requirements of this article. The shipping permit which would be required by Article 2 (commencing with Section 6921), Chapter 2, Part 3, of this division for such a shipment may be waived by the commissioner.

6503. Any shipment of nursery stock which is moved from one locality to another within the same county which carries a valid certificate of inspection and release or a valid intercounty nursery stock certificate issued by the commissioner of that county is exempt from the requirements of this article.

6504. Any shipment of nursery stock which is moved from one county to another county which carries a valid intercounty nursery stock certificate issued by the commissioner of the county of origin is exempt from the requirements of this article.

Article 2. Abatement, Return, or Treatment

6521. Except as otherwise provided in Sections 6523 and 6524, if any shipment of any nursery stock, plant, or container of any nursery stock or plant, or appliance, or any host or other carrier of any pest which is brought into any county or locality in the state from another county or locality within the state, is found to be infected or infested with a pest, or there is reasonable cause to presume that the shipment may be so infested or infected, the entire shipment shall be refused delivery and may be immediately destroyed by, or under the supervision of the commissioner, unless the nature of the pest is such that no damage or detriment can be caused to agriculture by the return of the shipment to the point of shipment.

6522. The officer who makes the inspection of a shipment which is described in Section 6521 may affix a warning tag or notice to the shipment and shall notify in writing the owner or bailee of the shipment to return the shipment to the point of shipment within 48 hours after such notification. The owner or bailee shall, at his own expense, return the shipment under the direction and control of the commissioner. If the owner or bailee fails to return the shipment within the time which is specified, the commissioner shall destroy it.

6523. If the pest may be exterminated or controlled by treatment or processing which is prescribed by the commissioner, and if the commissioner determines that the nature of the pest is such that no damage can be caused to agriculture through such treatment, processing, or procedure incidental thereto, the shipment may be treated or processed, under the supervision of, and in a manner and within a time satisfactory to, the commissioner. The treatment or processing shall be at the expense of the owner or bailee of the shipment. If

the shipment is so treated or processed, it may be released to the consignee.

6524. If the commissioner determines that only a portion of the shipment is infested or infected with a pest, or that there is reasonable cause to presume that only a portion of the shipment may be so infested or infected, only such portion of the shipment may be destroyed, returned to the point of origin, or treated or processed.

PART 3. NURSERY STOCK

CHAPTER 1. LICENSES

Article 1. General Provisions

6701. The director may publish in pamphlet form, as often as he deems necessary, a list of all persons that are licensed pursuant to this chapter. The pamphlet may also contain such additional information as the director deems advisable concerning the enforcement of laws and regulations which pertain to nursery stock.

Article 2. Issuance and Renewal of Licenses

6721. It is unlawful, for any person, except a person that is expressly exempted pursuant to Section 6742 or 6743, to sell any nursery stock unless such person holds a valid license for the fiscal year which is issued pursuant to this chapter.

6722. The director, upon receipt of the total license fee which is established pursuant to Section 6723, shall issue a license to sell nursery stock for the fiscal year to any person that sells or seeks to sell plants, as defined in Section 5007, for planting, propagation, or ornamentation. The applicant shall satisfy the director of his character and good faith in seeking to carry on the business of selling nursery stock.

6723. The minimum license fee shall be established by the director at an amount not to exceed thirty dollars ($30).

The director may fix the minimum license fee at an amount which is less than thirty dollars ($30) and may adjust the license fee if, after investigation and due notice, he finds that the cost of administering the provisions of this division and Chapter 5 (commencing with Section 53301) of Division 18, which relate to nursery stock can be defrayed from revenues which are derived from such license fee in combination with such sums as are provided by Sections 435 and 5882.

To the amount of the minimum license fee which is established by the director shall be added, as an additional license fee, an equal sum for each branch salesyard, store, or sales location which is owned and operated by the applicant in the state.

6724. The fees for the renewal of the annual license shall be paid between the 1st day of April and the 1st day of July of each year for the fiscal year beginning July 1st of such year. If the renewal license fee is not paid prior to the 11th day of July of each year, for the year ensuing, the license to sell nursery stock is forfeited.

6725. Any person whose license to sell nursery stock has been forfeited shall not be issued a renewal license except upon written application to the department.

6726. Except as otherwise provided in Section 6727, the application for renewal of a license shall be accompanied by the following sums:

(a) If no part of the regular license fee has been paid, a sum which is equal to the regular license fee and a restoration fee in an amount that is equal to the regular license fee.

(b) If a part of the regular license fee has been paid, an amount which is a sum equal to any portion of the regular license fee which is unpaid on the 11th day of July and a restoration fee in an amount which is equal to the unpaid portion of the regular license fee.

6727. No restoration fee is required of any person whose application for renewal of license is accompanied by his signed statement that prior to the date of his application he has not sold any nursery stock during any part of the fiscal year for which he applies for renewal of the license.

Article 3. Exemptions

6741. A person is not required to pay any license fee if all of the following facts exist:

(a) His sales of plants amount to less than five hundred dollars ($500) within any one fiscal year.

(b) He has reported to the commissioner his intention to make such sales.

(c) All plants which are sold by him are of his own production, and are sold for planting within the county in which the plants were grown.

6742. Any person that sells seeds and does not sell or ship any other kinds of nursery stock is exempt from the license requirements of this chapter.

6743. Any retail florist or other person that sells plants at retail for indoor decorative purposes only is exempt as to such plants from the license requirements of this chapter.

Article 4. Revocation and Suspension

6761. The director, after investigation and hearing, may refuse to issue or renew a license, or may suspend or revoke a license, if he determines that the licensee or the applicant has done any of the following:

(a) Has willfully refused to comply with the laws and regulations relative to nursery stock, or to any pest which might be carried by nursery stock.

(b) Was intentionally guilty of fraud or deception in the procurement of the license.

(c) Has been guilty of fraud or misrepresentation in the handling or sale of nursery stock.

(d) Has failed to maintain nursery stock produced or sold by him in accordance with the standards of cleanliness which are prescribed by the director.

(e) Has failed to comply with any lawful order which is issued by the director or commissioner.

6762. Any proceedings shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted in such chapter.

Article 5. Disposition of Fees

6781. Any money which is received by the department pursuant to this chapter shall be paid into the State Treasury and be credited to the Department of Agriculture Fund. Any money in the Department of Agriculture Fund which is derived pursuant to this chapter may be expended for the administration or enforcement of any or all of the provisions of the following portions of this code which relate to nursery stock, notwithstanding any other provision of law which limits the expenditure of such money to some specific purpose or to the administration or enforcement of some specific section, article, chapter, or law:

(a) Section 435.

(b) Article 7 (commencing with Section 5821), Chapter 8, Part 1, of this division.

(c) Chapter 1 (commencing with Section 6701), Part 3, of this division.

(d) Any other provision of this division, which relates to nursery stock, except any provision of Article 5 (commencing with Section 6001) of Chapter 9 or Chapter 10 (commencing with Section 6101) of Part 1, Part 5 (commencing with Section 8401), or Part 6 (commencing with Section 8801) of Division 4.

(e) Chapter 5 (commencing with Section 53301) of Division 18.

Chapter 2. Other Regulations

Article 1. Inspections and Standards of Cleanliness

6901. The director by regulation shall provide for periodic inspections of nurseries and may prescribe standards of cleanliness for nursery stock which is produced or sold within the state.

6902. The standards of cleanliness may:

(a) Provide that all nursery stock shall be kept free from pests of limited distribution or pests which are not known to be established in this state and commercially clean in respect to established pests of general distribution.

(b) Prescribe methods of treatment of various types of nursery stock for control of pests.

(c) Require isolation of infested or infected nursery stock pending treatment or other disposal.

(d) Make such other provisions as are reasonably necessary to insure the relative freedom from pests of all nursery stock which is produced or sold within the state.

6903. The commissioner shall inspect all nurseries within his jurisdiction when and as required by the regulations of the director.

6904. The commissioner shall issue such orders as may reasonably be necessary to insure compliance with the standards of cleanliness.

Any interested person, upon request, is entitled to a hearing before the director to review any order which is issued by a commissioner pursuant to this section.

Article 2. Shipment of Nursery Stock, Generally

6921. It is unlawful for any person to ship, or cause to be shipped, any nursery stock from one county or locality of the state to another county or locality within the state unless he has marked upon such nursery stock in a conspicuous manner and place both of the following:

(a) The name and address of the shipper, owner, or person that is forwarding the nursery stock.

(b) The name of the person, or his agent, to whom the nursery stock is forwarded.

6922. Except as otherwise provided in Section 6502, it is unlawful for any person to sell, deliver, or transport any nursery stock from one county to another county within the state unless he has affixed to such nursery stock in a conspicuous place one of the following which is issued by the commissioner of the county of origin:

(a) A shipping permit that warns that inspection at destination is required.

(b) A valid intercounty nursery stock certificate.

6923. Except as otherwise provided in Section 6502 or 6924, it is unlawful for any person to sell, deliver, or transport any nursery stock from one locality to another locality within the same county unless he has affixed to such nursery stock in a conspicuous place one of the following:

(a) A shipping permit.

(b) A certificate of inspection and release.

(c) An intercounty nursery stock certificate issued by the commissioner of the county which gives notice that inspection at destination is not required.

6924. A shipping permit or certificate of inspection and release need not be affixed to nursery stock if it is sold at retail for planting within the same county and delivered to the purchaser on premises where a certificate of inspection and release of a size which is suitable for display is exhibited in a manner and in such location as may be prescribed by the commissioner.

6925. It is unlawful for any person to sell, deliver, or transport any nursery stock, except nursery stock which is accompanied by a certificate of inspection and release or an intercounty nursery stock certificate, unless such person forwards, at or prior to the time of shipment, to the commissioner who has jurisdiction at the destination, a manifest which states all of the following:

(a) Name and address of the shipper.

(b) Name and address of the person to whom the shipment is being forwarded.

(c) Name and quantity of each kind of plant which is contained in the shipment.

(d) Name of the locality where each kind of nursery stock was grown.

(e) Name of the carrier by which the shipment is being transported, whether by freight, express, mail, truck, boat, airplane, or otherwise.

The requirement for a manifest does not apply to any shipment of seeds.

6926. It is unlawful for any person to alter any shipping permit, certificate of inspection and release, or intercounty nursery stock certificate or to use it in any manner other than as provided in this chapter.

Article 3. Certificates of Inspection and Release

6941. Certificates of inspection and release for shipments of nursery stock which is to be sold, transported, or delivered for planting within the county may be issued by the commissioner after he has determined that there is no likelihood of the dissemination by the shipment into any area of the county of any pest which is not already of general distribution in the area.

6942. The commissioner may issue regulations which govern the issuance or use of certificates of inspection and release. He may require an accounting of any certificate which is issued.

6943. The commissioner may revoke any certificate of inspection and release which is issued to any person that fails to render an accounting of any certificate of inspection and

release, or that fails to observe any of the regulations of the commissioner with respect to such certificate.

6944. A person shall, upon demand, deliver to the commissioner any unused or revoked certificate of inspection and release that may be in his possession.

Article 4. Intercounty Nursery Stock Certificates

6961. A commissioner may, with the approval of the director, enter into an agreement with the commissioner of another county for the purpose of issuing intercounty nursery stock certificates for use on shipments of nursery stock which are sold, transported, or delivered for planting in any other county which is designated in the agreement. He may thereafter, with the approval of the director, issue such certificates.

6962. The commissioner may issue to any nursery which is authorized to use intercounty nursery stock certificates a suitable display placard, in a form which is approved by the director, that indicates that the nursery is authorized to use such certificates.

6963. The commissioner may, with the approval of the director, issue regulations which govern the use within his county of intercounty nursery stock certificates which are issued by him. He may require an accounting of any such certificate which is issued.

6964. The director may issue regulations which regulate the issuance of intercounty nursery stock certificates and the use of such certificates between counties.

6965. The director shall approve the issuance of intercounty nursery stock certificates only if he determines that there is no likelihood of the dissemination by shipments of nursery stock into a designated county of any pest which is not already of general distribution in such county.

6966. The director shall, upon request of the commissioner of any county which is immediately concerned, reconsider any approval previously granted for the issuance and use of intercounty nursery stock certificates as to such county.

6967. The director shall withdraw the approval for the issuance and use of intercounty nursery stock certificates if he makes one of the following findings:

(a) By reason of issuance and use of the certificates there is danger of dissemination into any designated county of any pest which is not already of general distribution in such county.

(b) A commissioner has issued such certificates in disregard of any of the regulations of the director which regulate such issuance and use.

6968. The commissioner may revoke or suspend the right to use any intercounty nursery stock certificate which is issued to any person that fails to render an accounting of the certificate, or fails to observe any of the regulations which

govern the use of the certificates. The commissioner shall revoke the right of any person to use any certificate if he is notified by the director that approval for the issuance and use of the certificates has been withdrawn.

6969. The commissioner of any county, upon receiving notice from the director of withdrawal of approval for the issuance and use of any intercounty nursery stock certificates, shall immediately revoke the right to use any such certificate which was previously issued by him.

6970. It is unlawful for any person, whose right to use any intercounty nursery stock certificate has been revoked or suspended, to refuse to deliver to the commissioner, upon demand, any unused certificate, or to retain or have in his possession any such certificate.

PART 4. WEEDS AND PEST SEEDS

CHAPTER 1. WEEDS

Article 1. Weed-Free Areas

7201. The director, after investigation and practical survey, may by proclamation declare an area within this state to be practically free from any noxious weed, as defined in Section 5004, which is named in the proclamation.

7202. Any area which is declared by proclamation pursuant to this article to be practically free from any noxious weed named in the proclamation shall be known as a weed-free area, as to any noxious weed named in the proclamation. The name of the noxious weed shall be a part of the name of the weed-free area.

7203. The director may by similar proclamation change the boundaries of a weed-free area or declare the weed-free area free from any additional noxious weeds, naming the noxious weed.

7204. A proclamation pursuant to this article shall be under the seal of the department. It shall be published in a newspaper or farm journal of general circulation, published and circulated in the area which is to be affected by the proclamation, at least once a week for two successive weeks. If there is no such newspaper or farm journal, a copy of the proclamation shall be posted in one or more public places in the area.

7205. The director may adopt such regulations as may be necessary to carry out the provisions of this article. He, and the commissioners under the supervision and control of the director, shall enforce such provisions and regulations.

7206. It is unlawful for any person to sell, distribute, or transport into, or within, any weed-free area any seed of any noxious weed of which the area has been declared to be practically free.

7207. It is unlawful for any person that owns or possesses any land within any weed-free area to knowingly permit any noxious weed of which the area has been declared to be practically free, to mature upon his land and disseminate its seed or to propagate itself by other means upon such land, or on the land of another.

Article 2. Austrian Field Cress and Camelthorn

7301. Austrian field cress and camelthorn are public nuisances. They may be abated by summary action or otherwise pursuant to the law which relates to the abatement of public nuisances.

7302. The director shall eradicate Austrian field cress and camelthorn wherever they exist in this state.

7303. The expense incurred by the director in eradicating Austrian field cress or camelthorn shall be borne as follows:

(a) One-third by the state, to be paid out of any sum appropriated for such purpose.

(b) One-third by the county in which the land is located on which such Austrian field cress or camelthorn exists.

(c) One-third by the owner of the land.

7304. The board of supervisors may direct the commissioner to proceed with the abatement of the Austrian field cress or camelthorn pursuant to Chapter 6 (commencing with Section 5401), Part 1 of this division. If the commissioner does so, the board of supervisors shall allow and pay the share of the county and the share of the owner of the land out of the general fund of the county.

7305. The share of the expense of eradication which is required by Section 7303 to be borne by the owner of the land is a lien on the land against which the expense is chargeable. The provisions of Sections 5429 to 5436, inclusive, apply, insofar as possible, to such lien.

Chapter 2. Pest Seeds

Article 1. General Provisions

7501. It is unlawful for any person to disseminate the seed of any pest within this state.

7502. The enforcement of this chapter is under the supervision of the director. He shall make such regulations as he may deem necessary to properly carry out the provisions of this chapter.

7503. The provisions of this chapter are in addition to the requirements which are specified in the following provisions of this code:

(a) Article 1 (commencing with Section 5701), Chapter 8, Part 1 of this division.

(b) Article 2 (commencing with Section 5721), Chapter 8, Part 1 of this division.

(c) Article 3 (commencing with Section 5741), Chapter 8, Part 1 of this division.

(d) Article 3 (commencing with Section 6341), Chapter 1, Part 2 of this division.

(e) Chapter 3 (commencing with Section 6501), Part 2 of this division.

(f) Articles 2 (commencing with Section 6921), 3 (commencing with Section 6941), and 4 (commencing with Section 6961), Chapter 2 of Part 3 of this division.

(g) Chapter 2 (commencing with Section 52251) of Division 18.

Article 2. Certificates

7531. To prevent the dissemination of the seed of any pest through the medium of crop seed for planting, the commissioner of each county may issue certificates which state that the crop seed is free from the seed of any pest.

7532. The commissioner may issue the certificate if all of the following requirements are complied with:

(a) The applicant is the grower of any crop seed within this state.

(b) The applicant notifies the commissioner who has jurisdiction where such crop seed is being grown of his intention to harvest the crop seed for planting purposes not less than 10 days prior to the date of harvest of such crop seed.

(c) The applicant, after notice to him of such requirement, has complied with any requirement of the commissioner with respect to the removal of any pest which is growing in the crop and which may be harvested with the crop seed.

7533. The commissioner, upon receipt of a notice from any person who is the grower of any crop seed within the commissioner's jurisdiction of such person's intention to harvest crop seed not less than 10 days prior to the date of harvest, may cause a field inspection to be made of such crop. If any pest is found growing in such crop, the seed of which may be harvested with such crop seed, the commissioner shall serve a notice which specifies the particular pest that is growing in such crop and the methods to be used in removing the pest which is found in the crop.

7534. It is unlawful for any person to alter, deface, or otherwise misuse a certificate which is issued pursuant to this article.

Article 3. Seed Screenings and Cleanings

7571. Except as otherwise provided in Section 7572, it is unlawful for any person to move any seed screenings or cleanings from crop seed from the place where they may be unless one of the following first has been done:

(a) The seed screenings or cleanings have been inspected by the commissioner and found to be free from the seed of any pest.

(b) The seed screenings or cleanings have been processed under the supervision of, and to the satisfaction of, the commissioner by grinding, or otherwise, to render the seed of any pest incapable of reproduction.

7572. The commissioner may permit the movement of seed screenings or cleanings for the purpose of destruction or processing.

7573. If, upon inspection by the commissioner, any seed screenings or cleanings from crop seed are found to contain the seed of any pest, the commissioner shall give notice in writing of such fact to the person in possession of the screenings or cleanings. The notice shall order that the screenings or cleanings be processed or destroyed, as provided in this article, within 60 days.

7574. If the person that is notified by the commissioner is not the owner of the screenings or cleanings, the person so notified shall forthwith transmit the notice to the owner. He shall cause the screenings or cleanings to be processed or destroyed, as directed by the owner, pursuant to the provisions of this article.

7575. If the owner fails or neglects to direct the disposition of the screenings or cleanings within 10 days after the notice has been transmitted to him, the person in possession of the screenings or cleanings, at his option, may do one of the following:

(a) Cause the screenings or cleanings to be processed and return to the owner the value of the screenings or cleanings less the cost of handling.

(b) Destroy the screenings or cleanings. He is not liable to the owner for the destruction of such screenings or cleanings.

7576. Any lot of seed screenings or cleanings from crop seed which contains the seed of any pest, together with its containers, is a public nuisance. If such lot is not disposed of pursuant to this article, it is subject to seizure on complaint of the director or the commissioner to a court of competent jurisdiction.

7577. The district attorney of the county in which the nuisance is found, on the relation of the director or the commissioner, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent such nuisance.

7578. Upon judgment and by order of the court, the lot which is a nuisance shall be handled in one of the following ways:

(a) Condemned and destroyed in the manner directed by the court.

(b) Denatured or otherwise processed.

(c) Released upon such conditions as the court may impose to insure that the nuisance will be abated.

7579. If the owner fails to comply with the order of the court within the time which is specified in the order, the court may order disposal, or sale, under such terms and conditions as the court may prescribe, by the director or the commissioner, or by the sheriff, marshal, or constable.

7580. If the court orders the sale of any of the seed screenings or cleanings from crop seed, or containers, which can be salvaged, the cost of disposal shall be deducted from the proceeds of sale and the balance paid into court for the owner.

7581. In actions which arise pursuant to this article:

(a) Municipal courts shall have original jurisdiction where the value of the property seized amounts to three thousand dollars ($3,000) or less.

(b) Justice courts shall have original jurisdiction where the value amounts to five hundred dollars ($500) or less.

Article 4. Crop Seed Cleaning Business

7601. Every person, before engaging for hire in the business of cleaning crop seed, shall obtain a permit from the commissioner to operate each separate portable seed cleaner which is being used for the first time in the county.

7602. Upon application by the owner or if the commissioner deems it necessary, the commissioner may cause an inspection to be made of the cleaner of each permittee.

7603. The permit may be suspended or revoked by the commissioner at any time the permittee does not comply with any of the provisions of this division, or any regulations which are adopted pursuant to this division by the director relative to preventing the dissemination of the seed of any noxious weed pest.

PART 5. CITROUS PEST DISTRICT CONTROL LAW

Chapter 1. Definitions and General Provisions

8401. This part shall be known as the Citrous Pest District Control Law.

8402. It is the purpose of this part to make available a procedure for the organization, operation, government, and dissolution of districts for the more effective control and eradication of citrous pests.

8403. Unless the context otherwise requires, the definitions in this chapter govern the construction of this part.

8404. "Board" means the board of directors of a district.

8405. "Citrous acreage" means any parcel, tract, or lot of land with 25 or more citrous trees of any age growing on it, except a parcel, tract, or lot which is used as a nursery.

8406. "Citrous pest" includes any infectious, transmissible, or contagious disease, any form of animal life, or any form of vegetable life infesting citrous trees or citrous fruits.

8407. "District" means a citrous pest control district organized pursuant to this part.

8408. "Number of trees per acre of average planting," for the purpose of assessment pursuant to this part, shall be 100 trees per acre.

8409. "Owner" includes joint owner, coowner, guardian, executor, administrator, or any other person that holds property in a trust capacity under appointment of court.

CHAPTER 2. FORMATION OF DISTRICTS

8451. Proceedings for the formation of a district within any county shall be commenced by a petition which is signed by the owners of 51 percent by area of the land in the proposed district within the county devoted exclusively to the growing of citrous fruits. The petition shall be addressed to and filed with the board of supervisors of the county.

8452. The petition may be filed in sections each of which shall comply with all the requirements for a petition, except that a section need not contain the total number of signatures required for the petition.

8453. Signatures to the petition may be withdrawn at any time before it has been acted upon by filing with the clerk of the board of supervisors a declaration signed by the petitioner which states that it is the intention of the petitioner to withdraw his signature from the petition.

8454. The petition shall state the name of the proposed district and shall set forth its boundaries or describe the lands to be included in it.

It is a sufficient designation of the boundaries of a proposed district to recite that all the citrous acreage in the county is to be included in the district, or that all the citrous acreage in a designated area within the county is to be included in the district.

If either such designation is used, the outside boundary of the area so designated is the boundary of the district and the district shall include all area within the outside boundary, if the district is formed pursuant to this part.

8455. Upon the presentation and filing of a petition, the board of supervisors shall fix a time and place for the hearing of the petition and shall refer the petition to the commissioner for investigation and report.

The hearing shall not be less than 20 days, nor more than 40 days after such presentation and filing.

8456. The board of supervisors shall order the county clerk to give notice of the time and place fixed for the hearing upon the petition.

8457. The notice of hearing shall do all of the following:

(a) State the name of the district and that it is being formed for the eradication and control of citrous pests.

(b) State the petition is available for inspection at the office of the clerk of the board of supervisors.

(c) Designate the boundaries of the proposed district in substantially the same way that they are described in the petition.

(d) State the time and place for the hearing.

(e) State that at such hearing protests will be considered by the board of supervisors.

(f) State that requests in writing for the exclusion from or the inclusion of lands in the proposed district will be heard and considered by the board of supervisors.

8458. Notice of the hearing shall be given by publication in a newspaper of general circulation published and circulated in the district.

8459. The notice shall be published once a week for two successive weeks prior to the date set for the hearing.

8460. At the hearing, the report of the commissioner shall be received and protests may be made orally or in writing by any person interested in the formation of the proposed district. Any protest which pertains to the regularity or sufficiency of the proceedings shall be in writing and shall clearly set forth the irregularities and defects to which objection is made. All written protests shall be filed with the clerk of the board of supervisors on or before the time fixed for the final hearing. The hearing may be continued from time to time not exceeding 60 days.

8461. At the hearing, any owner of citrous acreage in the proposed district may present to the board of supervisors a request in writing for the exclusion of such land or any part of such land, and any owner of citrous acreage outside the proposed district may present to the board of supervisors a request in writing for inclusion of such land in the proposed district.

8462. If the board of supervisors determines that the petition does not comply with the requirements of law, the matter may be dismissed without prejudice to the right to present a new petition covering the same matter. A finding by the board of supervisors in favor of the genuineness and sufficiency of the petition and notice is final and conclusive against all persons except the state in a proceeding brought by the Attorney General within one year of the date of the making of the order establishing and describing the boundaries of the district.

8463. If the board of supervisors determines that the project is feasible and for the interest of the citrous growers of the county, the board of supervisors shall, by order entered in its minutes, declare the district duly organized under the name designated in the petition for the formation of the district.

The order shall describe the territory included in the district and, if the board of supervisors does not exclude or include land pursuant to Section 8465, it is a sufficient description of the territory to describe the boundaries in substantially the same way as they are described in the petition. A copy of the order duly certified by the clerk of the board of supervisors shall be filed for record in the office of the county recorder of the county in which the district is situated.

8464. Any district formed prior to March 2, 1961, in which the order of the board of supervisors adopted the description in general terms as it appears in the petition is hereby validated.

8465. In determining the boundaries of the district, the board of supervisors shall exclude from the district any citrous acreage which it finds will not be benefited by the proposed project, and it may include in the district any lands which it finds will be benefited if it also finds it will be to the interest of the district to include such lands. Such inclusion may be upon application of the owner or, without such application, upon giving him notice of the proposed inclusion and an opportunity for a hearing on it.

Notice of inclusion shall be mailed, postage prepaid, by the clerk of the board of supervisors, to the address of the owner of such land as shown by the last equalized county assessment roll, and to any person that has filed with him his name and address and description of land in which he has either a legal or equitable interest. The notice shall describe the land proposed to be included, and shall state the time and place at which objections to such inclusion will be heard.

Chapter 3. Organization of Districts

8501. Upon the adoption of the order of organization, the board of supervisors shall immediately appoint a board of directors of five members to administer the affairs of the district.

8502. In order to be eligible to hold the office of director of the district, a person shall be a citizen of the United States and of this state, and an owner of lands within the district which are devoted in whole or in part to the growing of citrous fruits.

8503. Upon his appointment, each director shall, in the manner provided by law, give such official bond for the faithful performance of his duties as shall be fixed by the board of supervisors and shall subscribe the oath of office and such bond and oath shall be filed with the county clerk.

8504. From and after the filing for record of the order of the board of supervisors declaring the district organized, and the appointment and qualification of its first board of directors, the organization of the district is complete.

8505. Immediately after the organization of the district, the directors shall meet and organize as a board and shall

elect a chairman, a vice chairman, a secretary, and an assistant secretary, from among their own number.

The chairman shall call and preside at all meetings of the board, sign all warrants drawn on the county treasurer and all contracts and other documents, and the minutes of all meetings at which he is present. In case of his absence from a meeting, the vice chairman shall act as chairman pro tempore for him. The vice chairman has the authority to sign warrants in place of the chairman if the chairman is absent from a meeting or unavailable.

The secretary shall give notice of and keep the minutes of all meetings and prepare and have custody of all records and papers, and have custody of the seal of the district. He or the assistant secretary shall attest all warrants drawn on the county treasurer, all contracts and other documents and shall sign the minutes of all meetings at which he is present. He shall prepare the annual reports and any other reports required by the board and shall prepare all notices and all calls for bids. In case of his absence from a meeting, the assistant secretary shall perform his duties.

8506. The members of the board shall serve for terms of four years and until the appointment and qualification of their successors.

The terms of the members of the first board appointed by the board of supervisors shall divide themselves by lot and one member shall serve for a term of one year, one member shall serve for a term of two years, one member shall serve for a term of three years, and two members shall serve for a term of four years.

8507. Upon the expiration of the term of any member of the board, the board of supervisors shall appoint his successor.

Vacancies shall be filled by the board of supervisors for the unexpired term.

8508. The members of the board are not entitled to any compensation for their services, but may be reimbursed for their actual and necessary expenses, when claims for such expenses have been approved by the board.

CHAPTER 4. POWERS AND DUTIES OF THE DISTRICT

8551. The district shall have perpetual succession and may do all of the following:

(a) Sue and be sued in all actions and proceedings in all courts and tribunals of competent jurisdiction.

(b) Adopt a seal and alter it at pleasure.

(c) Take by grant, purchase, gift, devise, lease, or otherwise, and hold, use and enjoy, and lease, or otherwise dispose of, real and personal property of every kind and description within or without the district necessary to the full and convenient exercise of its powers.

(d) Cause taxes to be levied, as provided in Chapter 5 (commencing with Section 8601) of this part, for the purpose of paying any obligation of the district, and to accomplish the purposes of the district in the manner provided in this part.

(e) Make contracts, and employ, except as otherwise provided in this part, all persons, firms, and corporations necessary to carry out the purposes and the powers of the district, and at such salary, wage, or other compensation as the board of directors shall determine.

(f) Eradicate, remove, or prevent the spread of any and all citrous pests.

(g) Enter into or upon any land included within the boundaries of the district for the purpose of inspecting and treating the citrous trees and other host plants and fruit growing on them.

(h) Perform any and all acts either within or outside the district necessary or proper to fully and completely carry out the purposes for which the district was organized.

8552. Every district formed pursuant to this part has all of the powers prescribed by Section 8551 and other sections of this part, including the power to eradicate, remove, or prevent the spread of each and every citrous pest, regardless of any language in the petition for formation for any district or in any of the proceedings leading to formation which might seem to limit the power of the district to the control or eradication of one or more citrous pests in particular.

8553. A district may pay limited compensation to the owner of any citrus tree infected with quick decline (tristeza) which is removed by the district or by the owner within 60 days after written notice of such infection to the owner by the district, and prior to March 1, 1967. Such limited compensation shall not exceed the following payment schedule with the age of the tree being conclusively established as of the time written notice of such infection is first given to the owner.

The schedule of payments is as follows:

Age of trees	Maximum payment
1 year	$5 per tree
2 years	7.50 per tree
3 years	10 per tree
4 years	14 per tree
5 years	17.50 per tree
6 years	20.75 per tree
7 years or older	25 per tree

For the purposes of this section, the holder of the record title of the real property on which the trees are located shall be considered to be the owner of the citrus trees to whom written notice of infection is given.

The written notice referred to above shall be a written or printed document labeled "Notice of Infection," addressed to the owner and informing the owner of the existence of such infected trees, their location, and that they should be removed forthwith.

For the purposes of determining the age of infected citrus trees under this section, trees shall be considered one year old as of the January 1st succeeding the calendar year in which they are planted, and shall be deemed one year older on the January 1st of each succeeding year.

8554. In order to expedite the elimination of the source of quick decline (tristeza) virus, if it appears to the board that the cost of testing, indexing, or retesting trees to determine infection may exceed the cost of removal, plus the payment of limited compensation, a district may, with the consent of the owner, remove and pay limited compensation pursuant to Section 8553 for trees which have not been determined to be infected with quick decline (tristeza).

8555. Any payment made to the owner or owners of citrous trees removed pursuant to Section 8553 or 8554 shall in no event exceed the sum of three thousand dollars ($3,000) per geographical acre.

8556. The commissioner of the county in which the district is located shall, upon request of the board and without fee or charge, supervise and direct, in accordance with the best known and accepted methods as determined by the board, all activities undertaken by the district for the control or eradication of citrous pests.

8557. The board shall immediately after their qualification formulate an effective plan based on the best known and accepted methods for the control and eradication of the citrous pests within the district.

8558. After the final adoption of the plan, the board shall make or cause to be made an estimate of the cost of operating the plan for the next fiscal year beginning not sooner than 90 days thereafter.

8559. Within 30 days after the receipt of the estimate, the board shall adopt a preliminary budget of expenditures for such fiscal year.

8560. Upon the adoption of the preliminary budget, the board shall fix a time and place for holding a hearing thereon.

The hearing shall not be less than 20 days, nor more than 40 days, after the adoption of the preliminary budget.

8561. The board shall give notice of the time and place fixed for the hearing upon the preliminary budget by publication in a newspaper of general circulation published and circulated in the district.

8562. The notice shall be published once a week for two successive weeks prior to the date set for the hearing.

8563. The notice shall contain all of the following:

(a) A summary of the proposed budget and shall refer to the original on file with the board for further particulars.

(b) State that it is the intention to raise the amount of money required to meet the proposed budget by levying a tax upon the assessed value of the citrous trees within the district in accordance with the provisions of this part.

(c) A statement of the day, hour, and place, when and where any and all persons interested may appear and object to the adoption of the budget or to any item in it.

8564. At any time not later than the hour set for hearing objections to the proposed budget, any owner of citrous acreage in the district may make written protest against the budget or any item in it.

8565. At the time set for hearing protests, the board shall proceed to hear and pass upon all protests so made and its decision on the protests shall be final and conclusive.

8566. At the conclusion of the hearing, the board shall by resolution entered on its minutes make such changes in the proposed budget as it finds are proper and advisable. The tentative budget as so changed or modified shall be the budget of the district for the forthcoming fiscal year.

8567. There may be added to the budget for the first fiscal year of the operation of the district an amount not in excess of 20 percent of the total amount of the budget to cover the preliminary expenses of the district and for the expenses of operation up to the beginning of the first fiscal year.

8568. For each fiscal year subsequent to the first year of operation of the district, the board shall adopt the final budget therefor in the same manner and at the same time that the budget for the first fiscal year was adopted.

CHAPTER 5. LEVYING AND ASSESSING TAXES FOR DISTRICT PURPOSES

8601. The county assessor in making the annual assessment of property in each and every year after the organization of the district, shall assess any parcel of real property with 25 or more citrous trees on it and enter as a separate item on the assessment roll for each such parcel of real property included in the district, the value, as improvements on the parcel, of all citrous trees which are growing on it.

For the purpose of this part, the county assessor shall assess all citrous acreage at a uniform value per acre. Such assessment shall be upon an acreage basis and the number of acres shall be determined conclusively, except as otherwise provided in this section, by the assessor counting such trees and dividing the total number by the number of trees per acre of average planting. The county assessor in counting the citrous trees shall not, however, count any more than 200 trees

on any one acre of land, and for any citrous acreage which has from 70 to 100 trees per acre the number of acres to be determined by the county assessor shall be the actual acreage of the parcel.

Upon completing the assessment roll of the county in each year, the assessor shall separately compute and certify to the board of supervisors, the total assessed value, as shown by the assessment roll, of all such citrous trees in the district.

8602. Whenever acreage within the district is planted with citrous trees in such a fashion as to qualify as citrous acreage, such acreage is subject to taxation as provided in this part.

8603. Whenever any citrous trees have been removed from any parcel of land included in the district, the owner of such parcel of land may file with the board an affidavit particularly describing the parcel of land, and setting forth the fact of the removal therefrom of such trees. Thereupon, the board shall cause an investigation of the parcel of land to be made and, if the board finds the allegations of the affidavit are true, the board shall immediately certify this fact to the county assessor and the amount of citrous acreage removed shall not be assessed on the next assessment roll.

8604. The board shall, on or before the first Monday in July of each year, file with the board of supervisors the final budget which sets forth all estimated expenditures of the district for the fiscal year commencing on the first day of such month of July. A copy of the budget shall also at the same time be filed with the auditor of the county.

The board of supervisors shall annually, at the time of levying other county taxes, levy a tax upon all the citrous trees planted or growing in the district, regardless of age, as assessed by the assessor pursuant to this part. The board of supervisors shall determine the rate of such tax by deducting 10 percent for anticipated delinquencies from the total assessed value of such trees in the district as it appears on the assessment roll of the county, and dividing the sum reported by the board as required to be raised, by the remainder of such total assessed value. If a fraction of a cent occurs on a valuation of one hundred dollars ($100), it shall be taken as a full cent.

8605. The tax authorized to be assessed and levied is hereby declared to be in the nature of a special assessment, and the Legislature hereby finds that the owners of all citrous trees will be benefited by the district to the same extent and in the same manner regardless of the age of the trees. The taxes or special assessments authorized by this chapter to be assessed and levied on such trees shall be assessed and levied on all citrous trees regardless of their age.

8606. The tax so levied shall be computed and entered upon the assessment roll by the county auditor, and if the supervisors fail to levy the tax as required, the auditor shall do so. The tax shall be collected at the same time, and in the same manner as, and together with and not separate from, general

county taxes, and when collected shall be paid into the county treasury for the use of the district.

8607. The general provisions of the laws of this state, prescribing the manner of levying and collecting county taxes and the duties of the several county officers with respect to levying and collecting county taxes, are, so far as they are applicable and not in conflict with the specific provisions of this part, hereby adopted and made a part of this part. The several county officers thus referred to shall be liable upon their several official bonds for the faithful discharge of the duties imposed upon them by this part.

8608. The county treasury shall be the repository of all the moneys of the district. The county treasurer shall receive and receipt for all such moneys, and place the same to the credit of the district. He shall be responsible upon his official bond for the safekeeping and disbursement, in the manner provided in this part, of all moneys of the district so held by him.

8609. If a consolidated district includes parts of two or more counties, the repository of all money of the district shall be the county treasury of the county in which is located the largest area of the district. Money collected for the use of the district in any other county in which a part of the district is located shall be transferred by the county treasurer upon warrant of the county auditor of the county in which the money was collected to the county treasurer of the county serving as repository for the district, in the same manner as prescribed for the disbursement of money held for a local district. Money derived from any county in which the district is located may be expended in any part of the district for the purposes authorized by this part, notwithstanding any other provision of law limiting the expenditure of any such money to a specific area or county.

8610. The county treasurer shall pay out money of the district only upon warrants of the county auditor drawn upon the order of the board of directors of the district signed by the chairman or vice chairman and attested by the secretary or assistant secretary. The county treasurer shall report in writing on the first day of July, October, January, and March of each year, to the board the amount of money he then holds for the districts, the amount of receipts since his last report, and the amounts paid out. Each such report shall be verified and filed with the secretary of the district to whom it is addressed.

Chapter 6. Inclusion of Lands

8651. Lands devoted exclusively to the growing of citrus fruits within a tract of land outside the district but in the county wherein the district is located may be annexed to the district.

CHAPTER 7. CONSOLIDATION

8701. Any two or more districts organized or existing under this part may be consolidated, whether or not the boundaries are coterminous and whether or not the districts are located in the same county.

8702. Proceedings for consolidation may be initiated by the filing of a petition for consolidation with the board of each district to be consolidated. Each petition shall be signed by the owners of 51 percent by area of the citrous land in the district. Upon the filing of such a petition, the board of directors shall adopt a resolution which recites the fact of receipt and the willingness of the district to consolidate, and shall then send copies of the petition and resolution to the board of directors of each of the other districts. The board shall send the original petition and a certified copy of the resolution to the board of supervisors of the county in which is located the largest area of citrous acreage of the proposed consolidated district, and a copy of the petition and resolution to the board of supervisors of each of the other counties in which is located any part of the proposed consolidated district.

8703. Upon presentation and filing of the petitions of two or more districts proposing consolidation, the board of supervisors of the county in which is located the largest area of citrous acreage of the proposed consolidated district shall fix a time and place for hearing the petitions. Notice shall be given and the hearing conducted in the same manner and with the same effect as prescribed for the formation of a district pursuant to Chapter 2 (commencing with Section 8451) of this part.

8704. If the board of supervisors determines that the consolidation is feasible and for the best interests of the citrous growers of the respective districts, it shall by resolution duly adopted declare the districts consolidated into one district, giving the consolidated district a name which name shall include the term "consolidated." Certified copies of the resolution shall be filed with the Secretary of State and, for record, with the county recorder of each county in which is located any part of the consolidated district. Upon such filing, the districts are consolidated into a single consolidated district with all the rights, privileges, and powers of a district The consolidated district shall succeed to all the funds and other property, and is subject to all the indebtedness, bonded and otherwise, of the several districts consolidated. Each district which is included in the consolidated district shall continue in existence for the purpose of representation on the board of the consolidated district, and for the purpose of levying, assessing, and collecting taxes for district purposes The board of the consolidated district is, however, the board of each district which is included in the consolidated district.

8705. Upon the adoption of a resolution consolidating two or more districts, the board of supervisors shall immediately appoint a board of directors of at least five members, including at least one member from each of the districts which are included in the consolidated district. If any of the districts which are included in the consolidated district includes more than 15,000 acres of citrous acreage, the board of directors shall be increased to a number equal to the number of districts which are included in the consolidated district, plus one additional director for each 10,000 acres, or major fraction of 10,000 acres, in any one district which is included in the consolidated district.

8706. The board of a consolidated district has all the duties, powers, purposes, responsibilities, and jurisdiction of the board of any other district. The members of the board shall be appointed in the same manner and serve for the same term as the directors of any other district. If, however, the number of directors is increased to more than five, as provided in Section 8705, the sixth member of the first board shall serve for three years, the seventh for two years, and all in excess of seven for one year each.

8707. Any district which has been included in a consolidated district may withdraw from the consolidated district and be reconstituted as a separate district by filing with the board of directors of the consolidated district a petition for withdrawal which is signed by the owners of 51 percent by area of citrous land in the district The board of directors of the consolidated district shall send the original petition to the board of supervisors of the county in which the withdrawing district is located, and a copy of the petition to the board of supervisors of each of the other counties in which is located any part of the consolidated district. Upon receipt of a petition for withdrawal, the board of supervisors of the county in which the withdrawing district is located shall fix a time and place for hearing the petition. Notice shall be given and the hearing conducted in the same manner and with the same effect as prescribed for the formation of a district under Chapter 2 (commencing with Section 8451) of this part. Upon withdrawal of a district, all moneys collected from such district for the use of the consolidated district and all property purchased with such moneys shall remain the property of the consolidated district. All moneys collected from a district after it withdraws from a consolidated district shall be held for the use of such district.

CHAPTER 8. DISSOLUTION OF DISTRICTS

8751. Upon the filing of a petition with the board of supervisors, signed by the owners of 60 percent by area of the citrous acreage in the district, requesting the dissolution of the district, the board of supervisors shall set a time and place for

hearing on the petition, which shall not be less than 20 days, nor more than 40 days, after the filing of the petition.

8752. The board of supervisors shall give notice of the time and place fixed for the hearing upon the petition for dissolution.

8753. The notice of hearing shall state all of the following:

(a) That a petition has been filed requesting the dissolution of the district.

(b) That the petition is available for inspection at the offices of the board of supervisors.

(c) The time and place for the hearing.

(d) That at such hearing protests against the dissolution of the district shall be considered by the board of supervisors.

8754. Notice of such hearing shall be given by publication in a newspaper of general circulation published and circulated in the district.

8755. The notice shall be published once a week for two successive weeks prior to the date set for the hearing.

8756. If at the hearing a majority of the members of the board of supervisors find that the dissolution of the district will benefit the citrous industry of the county, it shall by resolution dissolve the district.

8757. The board of supervisors shall cause a certified copy of the resolution to be recorded in the office of the county recorder and shall file a certified copy of the same with the Secretary of State. Thereupon, the district is dissolved for all purposes.

8758. Upon dissolution, the right, title, and interest to property owned or controlled by the district which is situated within the corporate limits of any city shall vest absolutely in such city. If such property is situated without the corporate limits of the city, it shall vest in the county in which the property is situated.

8759. The board of supervisors is ex officio the governing body of the dissolved district. It may levy such taxes and assessments and perform such other acts as may be necessary to wind up the affairs of the district and to raise money for the payment of any outstanding indebtedness.

PART 6. PEST CONTROL COMPACT

8801. The Pest Control Compact is hereby enacted into law and entered into with all other jurisdictions legally joining therein in the form substantially as follows:

PEST CONTROL COMPACT

Article I. Findings

The party states find that:

(a) In the absence of the higher degree of cooperation among them possible under this compact, the annual loss of

approximately seven billion dollars from the depredations of pests is virtually certain to continue, if not to increase.

(b) Because of varying climatic, geographic and economic factors, each state may be affected differently by particular species of pests; but all states share the inability to protect themselves fully against those pests which present serious dangers to them.

(c) The migratory character of pest infestations makes it necessary for states both adjacent to and distant from one another, to complement each other's activities when faced with conditions of infestation and reinfestation.

(d) While every state is seriously affected by a substantial number of pests, and every state is susceptible of infestation by many species of pests not now causing damage to its crop and plant life and products, the fact that relatively few species of pests present equal danger to or are of interest to all states makes the establishment and operation of a fund, from which individual states may obtain financial support for pest control programs of benefit to them in other states and to which they may contribute in accordance with their relative interests, the most equitable means of financing cooperative pest eradication and control programs.

Article II Definitions

As used in this compact, unless the context clearly requires a different construction:

(a) "State" means a state, territory or possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

(b) "Requesting state" means a state which invokes the procedures of the compact to secure the undertaking or intensification of measures to control or eradicate one or more pests within one or more other states.

(c) "Responding state" means a state requested to undertake or intensify the measures referred to in subdivision (b) of this article.

(d) "Pests" means any invertebrate animal, pathogen, parasitic plant or similar or allied organism which can cause disease or damage in any crops, trees, shrubs, grasses or other plants of substantial value.

(e) "Fund" means the Pest Control Fund established pursuant to this compact.

(f) "Governing board" means the administrators of this compact representing all of the party states when such administrators are acting as a body in pursuance of authority vested in them by this compact.

(g) "Executive committee" means the committee established pursuant to Article V (e) of this compact.

Article III. The Fund

There is hereby established the Pest Control Fund for the purpose of financing other than normal pest control operations which states may be called upon to engage in pursuant to this compact. The fund shall contain moneys appropriated to it by the party states and any donations and grants accepted by it. All appropriations, except as conditioned by the rights and obligations of party states expressly set forth in this compact, shall be unconditional and may not be restricted by the appropriating state to use in the control of any specified pest or pests. Donations and grants may be conditional or unconditional, provided that the fund shall not accept any donation or grant whose terms are inconsistent with any provision of this compact.

Article IV. The Fund, Internal Operations and Management

(a) The fund shall be administered by a governing board and executive committee as hereinafter provided. The actions of the governing board and executive committee pursuant to this compact shall be deemed the actions of the fund.

(b) The members of the governing board shall be entitled to one vote each on such board. No action of the governing board shall be binding unless taken at a meeting at which a majority of the total number of votes on the governing board are cast in favor thereof. Action of the governing board shall be only at a meeting at which a majority of the members are present.

(c) The fund shall have a seal which may be employed as an official symbol and which may be affixed to documents and otherwise used as the governing board may provide.

(d) The governing board shall elect annually, from among its members, a chairman, a vice chairman, a secretary and a treasurer. The chairman may not succeed himself. The governing board may appoint an executive director and fix his duties and his compensation, if any. Such executive director shall serve at the pleasure of the governing board. The governing board shall make provision for the bonding of such of the officers and employees of the fund as may be appropriate.

(e) Irrespective of the civil service, personnel or other merit system laws of any of the party states, the executive director, or if there be no executive director, the chairman, in accordance with such procedures as the bylaws may provide, shall appoint, remove or discharge such personnel as may be necessary for the performance of the functions of the fund and shall fix the duties and compensation of such personnel. The governing board in its bylaws shall provide for the personnel policies and programs of the fund.

(f) The fund may borrow, accept or contract for the services of personnel from any state, the United States, or any other governmental agency, or from any person, firm, association or corporation.

(g) The fund may accept for any of its purposes and functions under this compact any and all donations, and grants of money, equipment, supplies, materials and services, conditional or otherwise, from any state, the United States, or any other governmental agency, or from any person, firm, association or corporation, and may receive, utilize and dispose of the same. Any donation, gift or grant accepted by the governing board pursuant to this paragraph or services borrowed pursuant to paragraph (f) of this article shall be reported in the annual report of the fund. Such report shall include the nature, amount and conditions, if any, of the donation, gift, grant or services borrowed and the identity of the donor or lender.

(h) The governing board shall adopt bylaws for the conduct of the business of the fund and shall have the power to amend and rescind these bylaws. The fund shall publish its bylaws in convenient form and shall file a copy thereof and a copy of any amendment thereto with the appropriate agency or officer in each of the party states.

(i) The fund annually shall make to the Governor and Legislature of each party state a report covering its activities for the preceding year. The fund may make such additional reports as it may deem desirable.

(j) In addition to the powers and duties specifically authorized and imposed, the fund may do such other things as are necessary and incidental to the conduct of its affairs pursuant to this compact.

Article V. Compact Fund Administration

(a) In each party state there shall be a compact administrator, who shall be selected and serve in such manner as the laws of his state may provide, and who shall:

1. Assist in the coordination of activities pursuant to the compact in his state; and

2. Represent his state on the governing board of the fund.

(b) If the laws of the United States specifically so provide, or if administrative provision is made therefor within the federal government, the United States may be represented on the governing board of the fund by not to exceed three representatives Any such representative or representatives of the United States shall be appointed and serve in such manner as may be provided by or pursuant to federal law, but no such representative shall have a vote on the governing board or on the executive committee thereof.

(c) The governing board shall meet at least once each year for the purpose of determining policies and procedures in the

administration of the fund and, consistent with the provisions of the compact, supervising and giving direction to the expenditure of moneys from the fund. Additional meetings of the governing board shall be held on call of the chairman, the executive committee, or a majority of the membership of the governing board.

(d) At such times as it may be meeting, the governing board shall pass upon applications for assistance from the fund and authorize disbursements therefrom. When the governing board is not in session, the executive committee thereof shall act as agent of the governing board, with full authority to act for it in passing upon such applications.

(e) The executive committee shall be composed of the chairman of the governing board and four additional members of the governing board chosen by it so that there shall be one member representing each of four geographic groupings of party states. The governing board shall make such geographic groupings. If there is representation of the United States on the governing board, one such representative may meet with the executive committee. The chairman of the governing board shall be chairman of the executive committee. No action of the executive committee shall be binding unless taken at a meeting at which at least four members of such committee are present and vote in favor thereof. Necessary expenses of each of the five members of the executive committee incurred in attending meetings of such committee, when not held at the same time and place as a meeting of the governing board, shall be charges against the fund.

Article VI. Assistance and Reimbursement

(a) Each party state pledges to each other party state that it will employ its best efforts to eradicate, or control within the strictest practicable limits, any and all pests. It is recognized that performance of this responsibility involves:

1. The maintenance of pest control and eradication activities of interstate significance by a party state at a level that would be reasonable for its own protection in the absence of this compact.

2. The meeting of emergency outbreaks or infestations of interstate significance to no less an extent than would have been done in the absence of this compact.

(b) Whenever a party state is threatened by a pest not present within its borders but present within another party state, or whenever a party state is undertaking or engaged in activities for the control or eradication of a pest or pests, and finds that such activities are or would be impracticable or substantially more difficult of success by reason of failure of another party state to cope with infestation or threatened infestation, that state may request the governing board to authorize

expenditures from the fund for eradication or control measures to be taken by one or more of such other party states at a level sufficient to prevent, or to reduce to the greatest practicable extent, infestation or reinfestation of the requesting state. Upon such authorization the responding state or states shall take or increase such eradication or control measures as may be warranted. A responding state shall use moneys made available from the fund expeditiously and efficiently to assist in affording the protection requested.

(c) In order to apply for expenditures from the fund, a requesting state shall submit the following in writing:

1. A detailed statement of the circumstances which occasion the request for the invoking of the compact.

2. Evidence that the pest on account of whose eradication or control assistance is requested constitutes a danger to an agricultural or forest crop, product, tree, shrub, grass or other plant having a substantial value to the requesting state.

3. A statement of the extent of the present and projected program of the requesting state and its subdivisions, including full information as to the legal authority for the conduct of such program or programs and the expenditures being made or budgeted therefor, in connection with the eradication, control, or prevention of introduction of the pest concerned.

4. Proof that the expenditures being made or budgeted as detailed in item 3 do not constitute a reduction of the effort for the control or eradication of the pest concerned or, if there is a reduction, the reasons why the level of program detailed in item 3 constitutes a normal level of pest control activity.

5. A declaration as to whether, to the best of its knowledge and belief, the conditions which in its view occasion the invoking of the compact in the particular instance can be abated by a program undertaken with the aid of moneys from the fund in one year or less, or whether the request is for an installment in a program which is likely to continue for a longer period of time.

6. Such other information as the governing board may require consistent with the provisions of this compact.

(d) The governing board or executive committee shall give due notice of any meeting at which an application for assistance from the fund is to be considered. Such notice shall be given to the compact administrator of each party state and to such other officers and agencies as may be designated by the laws of the party states. The requesting state and any other party state shall be entitled to be represented and present evidence and argument at such meeting.

(e) Upon the submission as required by paragraph (c) of this article and such other information as it may have or acquire, and upon determining that an expenditure of funds is within the purposes of this compact and justified thereby, the governing board or executive committee shall authorize support of the program. The governing board or the executive

committee may meet at any time or place for the purpose of receiving and considering an application. Any and all determinations of the governing board or executive committee, with respect to an application, together with the reasons therefor shall be recorded and subscribed in such manner as to show and preserve the votes of the individual members thereof.

(f) A requesting state which is dissatisfied with a determination of the executive committee shall upon notice in writing given within 20 days of the determination with which it is dissatisfied, be entitled to receive a review thereof at the next meeting of the governing board. Determinations of the executive committee shall be reviewable only by the governing board at one of its regular meetings, or at a special meeting held in such manner as the governing board may authorize.

(g) Responding states required to undertake or increase measures pursuant to this compact may receive moneys from the fund, either at the time or times when such state incurs expenditures on account of such measures, or as reimbursement for expenses incurred and chargeable to the fund. The governing board shall adopt and, from time to time, may amend or revise procedures for submission of claims upon it and for payment thereof.

(h) Before authorizing the expenditure of moneys from the fund pursuant to an application of a requesting state, the fund shall ascertain the extent and nature of any timely assistance or participation which may be available from the federal government and shall request the appropriate agency or agencies of the federal government for such assistance and participation.

(i) The fund may negotiate and execute a memorandum of understanding or other appropriate instrument defining the extent and degree of assistance or participation between and among the fund, cooperating federal agencies, states and any other entities concerned.

Article VII. Advisory and Technical Committees

The governing board may establish advisory and technical committees composed of state, local, and federal officials, and private persons to advise it with respect to any one or more of its functions. Any such advisory or technical committee, or any member or members thereof may meet with and participate in its deliberations. Upon request of the governing board or executive committee an advisory or technical committee may furnish information and recommendations with respect to any application for assistance from the fund being considered by such board or committee and the board or committee may receive and consider the same: provided that any participant in a meeting of the governing board or executive committee held pursuant to Article VI(d) of the

compact shall be entitled to know the substance of any such information and recommendations, at the time of the meeting if made prior thereto or as a part thereof or, if made thereafter, no later than the time at which the governing board or executive committee makes its disposition of the application.

Article VIII. Relations With Nonparty Jurisdictions

(a) A party state may make application for assistance from the fund in respect of a pest in a nonparty state. Such application shall be considered and disposed of by the governing board or executive committee in the same manner as an application with respect to a pest within a party state, except as provided in this article.

(b) At or in connection with any meeting of the governing board or executive committee held pursuant to Article VI(d) of this compact a nonparty state shall be entitled to appear, participate, and receive information only to such extent as the governing board or executive committee may provide. A nonparty state shall not be entitled to review of any determination made by the executive committee.

(c) The governing board or executive committee shall authorize expenditures from the fund to be made in a nonparty state only after determining that the conditions in such state and the value of such expenditures to the party states as a whole justify them. The governing board or executive committee may set any conditions which it deems appropriate with respect to the expenditure of moneys from the fund in a nonparty state and may enter into such agreement or agreements with nonparty states and other jurisdictions or entities as it may deem necessary or appropriate to protect the interests of the fund with respect to expenditures and activities outside of party states.

Article IX. Finance

(a) The fund shall submit to the executive head or designated officer or officers of each party state a budget for the fund for such period as may be required by the laws of that party state for presentation to the Legislature thereof.

(b) Each of the budgets shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. The requests for appropriations shall be apportioned among the party states as follows: one-tenth of the total budget in equal shares and the remainder in proportion to the value of agricultural and forest crops and products, excluding animals and animal products, produced in each party state. In determining the value of such crops and products the fund may employ such source or sources of information as in its judgment present the most equitable and accurate comparisons among the party states. Each of the

budgets and requests for appropriations shall indicate the source or sources used in obtaining information concerning value of products.

(c) The financial assets of the fund shall be maintained in two accounts to be designated respectively as the "operating account" and the "claims account." The operating account shall consist only of those assets necessary for the administration of the fund during the next ensuing two-year period. The claims account shall contain all moneys not included in the operating account and shall not exceed the amount reasonably estimated to be sufficient to pay all legitimate claims on the fund for a period of three years. At any time when the claims account has reached its maximum limit or would reach its maximum limit by the addition of moneys requested for appropriation by the party states, the governing board shall reduce its budget requests on a pro rata basis in such manner as to keep the claims account within such maximum limit. Any moneys in the claims account by virtue of conditional donations, grants or gifts shall be included in calculations made pursuant to this paragraph only to the extent that such moneys are available to meet demands arising out of claims.

(d) The fund shall not pledge the credit of any party state. The fund may meet any of its obligations in whole or in part with moneys available to it under Article IV(g) of this compact, provided that the governing board takes specific action setting aside such moneys prior to incurring any obligation to be met in whole or in part in such manner. Except where the fund makes use of moneys available to it under Article IV (g) hereof, the fund shall not incur any obligation prior to the allotment of moneys by the party states adequate to meet the same.

(e) The fund shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the fund shall be subject to the audit and accounting procedures established under its bylaws. However, all receipts and disbursements of funds handled by the fund shall be audited yearly by a certified or licensed public accountant and a report of the audit shall be included in and become part of the annual report of the fund.

(f) The accounts of the fund shall be open at any reasonable time for inspection by duly authorized officers of the party states and by any persons authorized by the fund.

Article X. Entry Into Force and Withdrawal

(a) This compact shall enter into force when enacted into law by any five or more states. Thereafter, this compact shall become effective as to any other state upon its enactment thereof.

(b) Any party state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal

shall take effect until two years after the executive head of the withdrawing state has given notice in writing of the withdrawal to the executive heads of all other party states. No withdrawal shall affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal.

Article XI. Construction and Severability

This compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state participating herein, the compact shall remain in full force and effect as to the remaining party states and in full force and effect as to the state affected as to all severable matters.

8802. Consistent with law and within available appropriations, the departments, agencies, and officers of this state may cooperate with the fund established by the Pest Control Compact.

8803. Pursuant to Article IV(h) of the compact, copies of bylaws and amendments thereto shall be filed with the Office of Administrative Procedure.

8804. The compact administrator for this state is the director.

8805. Within the meaning of Article VI(b) or VIII(a), a request or application for assistance from the fund may be made by the Governor whenever in his judgment the conditions qualifying this state for such assistance exist and it would be in the interest of this state to make such request.

8806. The notice of any meeting at which an application for assistance from the fund is to be considered given pursuant to Article VI (d), shall also be given to the Speaker of the Assembly and the President pro Tempore of the Senate.

8807. The department, agency, or officer expending or becoming liable for an expenditure on account of a control or eradication program undertaken or intensified pursuant to the compact shall have credited to his account in the State Treasury the amount or amounts of any payments made to this state to defray the cost of such program, or any part thereof, or as reimbursement thereof.

8808. As used in the compact, with reference to this state, the term "executive head" means the Governor.

DIVISION 5. ANIMAL AND POULTRY QUARANTINE AND PEST CONTROL

PART 1. DISEASED ANIMALS AND POULTRY

CHAPTER 1. GENERAL PROVISIONS

Article 1. Reports

9101. It is unlawful for any licensed veterinarian or any person that is operating an animal disease diagnostic laboratory that gains information that any animal or poultry is affected with any infectious, contagious, or transmissible disease, which is specified in the regulations of the director, to fail to immediately report, pursuant to the regulations of the director, the location and description of the animal or poultry which is so affected and, if known, the name and address of the owner or person in charge of such animal or poultry.

Article 2. Serum

9121. Any person that is engaged in stockraising may purchase for injection in his stock any serum used for the cure or prevention of animal diseases.

Article 3. Disposal of Carcasses

9141. Any person that has the care or control of any animal that dies from any contagious disease shall immediately cremate or bury the animal.

9142. An animal which has died from any contagious disease shall not be transported, except to the nearest crematory. The transportation of the animal to the crematory shall be pursuant to such regulations as the director may adopt.

9143. An animal which has died from any contagious disease shall not be used for the food of any human being, domestic animal, or fowl.

Article 4. Violations

9161. It is unlawful for any person to bring, cause to be brought, or aid in bringing into the state any domestic animal which such person knows is infected with any contagious disease.

9162. Except as otherwise provided in Section 9571, it is unlawful for any person to knowingly sell, use, expose, or fail to immediately kill, after notification of its condition from a licensed veterinarian or the department, any horse, mule, or other animal which has the disease that is known as dourine, as shown by a complement-fixation test, or which has the disease

known as glanders, or farcy, as shown by a reaction to the mallein test, physical examination, or other test or examination which is recognized by the department.

9163. Any person that owns or has possession or control of any animal which is affected by any contagious or infectious disease, that fails to keep the animal within an inclosure, or herd the animal in a place where it is secure from contact with other animals of like kind that are not so affected, or that permits the infected animal to be driven on any public highway, is guilty of a misdemeanor, which is punishable by a fine of not more than five hundred dollars ($500) for each offense.

9164. In order to prevent the spread of any livestock disease, it is unlawful for any person, that does not have a written permit issued by the director, to remove, or cause to be removed, any livestock from slaughterhouse pens, yards, corrals, or similar holding places where livestock is held for the purpose of immediate slaughter, except directly into the slaughterhouse that controls such pens, yards, corrals, or similar holding places.

CHAPTER 2. SCABIES AND TICKS

Article 1. Treatment

9301. When moved for the purpose of immediate slaughter, cattle which are infected with, or exposed to, the Boophilus annulatus tick shall be dipped or treated in the manner which is prescribed by the department, unless they are to be loaded directly on railroad cars at the point of origin.

9302. If upon examination of any cattle or sheep, the director finds any cattle which are infected with the Boophilus annulatus tick, or sheep or cattle which are infected with, or exposed to, scabies, he shall forthwith notify, in writing, the owner or person that is in control of the cattle or sheep to dip or otherwise treat them as directed for the purpose of eradicating the tick or scabies. The owner or person that is in control of the cattle or sheep shall comply with the notice within 10 days.

9303. If, at the expiration of 10 days from the date on which notice was given, the owner or person in control of the cattle or sheep has failed to dip the cattle or sheep in accordance with the directions of the director, the director shall immediately take possession of the cattle or sheep and dip the sheep as many times as may be necessary, or dip or otherwise treat the cattle.

9304. If upon examination at the end of the 10 days the director finds that the cattle have been dipped or otherwise treated for the extermination of ticks but are still infected, he shall instruct the owner or person in possession of the cattle

to continue the dipping or treatment as the circumstances may demand, and within such time as the department deems advisable.

9305. If upon examination at any time the department finds that the cattle are again infected with the ticks or that the owner or person in control of the cattle has not continued to properly dip or otherwise treat the cattle as instructed, the director shall take possession of the cattle and dip or otherwise treat them.

9306. If the director has reason to believe that the disease known as scabies exists in a flock of sheep or in a herd of cattle, he shall notify the owner or person that is in control of the sheep or cattle to gather all the sheep or cattle in a corral in order that the sheep or cattle may be examined to ascertain if any are so infected.

9307. If the owner or person that is in control of the sheep or cattle does not gather all of the sheep or cattle in a corral for the examination, the director shall gather the sheep or cattle in a corral for the examination. He may hire such necessary help as may be required to gather the sheep or cattle.

Article 2. Civil Liability

9331. All expenses and costs of dipping or treating cattle or sheep and all expenses and costs of gathering sheep or cattle which are incurred by the department pursuant to this chapter are a lien on the cattle or sheep until the lien is paid or foreclosed by law.

9332. If the lien is not paid within 15 days after the expenses and costs were incurred, the department shall, in the name of the people of the State of California, commence an action to foreclose the lien. The action shall be commenced, tried, and determined in all respects as provided by law for the foreclosure of mortgages on personal property.

9333. In any civil proceeding which arises under this chapter, all persons that have an interest in, or control or possession of, the cattle or sheep concerning which the proceeding is had, are liable severally and jointly.

Article 3. Violations

9351. It is unlawful for any person to willfully sell, except for immediate slaughter, or expose in such a manner as may infect other livestock not so infected, any cattle which have or are infected with the Boophilus annulatus tick.

9352. It is unlawful for any person to knowingly sell any sheep or cattle which are infected with scabies, or to expose them in such a manner as may infect other sheep or cattle which are not infected with scabies.

CHAPTER 3. ANIMAL QUARANTINE

Article 1. Definitions

9501. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

9502. "Animal," "livestock," or "domestic animal," includes poultry.

9503. "Poultry" includes all domesticated fowl and any wild fowl or bird which is reduced to captivity.

Article 2. Inspections

9531. If the director receives information of the existence of any contagious, infectious, or transmissible disease which affects domestic animals within this state, he shall thoroughly investigate it In making such an investigation, he may enter any premises and inspect any animal.

9532. This chapter does not deprive the regular inspectors who are employed by any chartered or incorporated city, or city and county, after they have passed a civil service meat, market, and poultry inspection examination, of the powers which are granted them by such city, or city and county, to inspect animals.

Article 3. Establishment of Quarantine

9561. The director may establish such quarantine, sanitary, and police regulations as may be necessary to circumscribe and exterminate any contagious, infectious, or transmissible disease which affects domesticated animals within the state.

9562. If the director discovers any case of contagious or infectious disease which affects any domestic animals in the state, he shall quarantine the diseased animals and, when necessary, other animals which have been in contact with them, upon the land or premises where the animals are located.

9563. It is unlawful for any person to move or allow to be moved any of the animals which are subject to the quarantine established pursuant to Section 9562 across the quarantine line which is established unless such person has first obtained a permit from the director. The director may issue a permit after inspection, if the animals, premises, vehicles of transportation, and equipment which are subject to the quarantine established pursuant to Section 9562 are properly cleaned and disinfected.

9564. If it is necessary to restrict the movements of domestic animals because the animals may transmit an infectious or contagious disease to animals which are not affected with the disease, the director shall fix and proclaim the boundaries of a quarantine district. While the quarantine is in force, it is unlawful for any person to move or allow to be moved any

such animals from or within the boundaries of the quarantine district, unless such person has a permit which is issued by the director after the animals have been inspected and, if necessary, disinfected.

9565. If the director determines that any animals are infected with an infectious or contagious disease, are infested with a vector of such disease, or have been exposed or may have been exposed to such infection or infestation, and that such animals may, therefore, transmit, carry, or disseminate the disease, he may hold the animals on the premises where they are. The director shall give notice to the owner or his agents that he is holding the animals.

9566. It is unlawful for any person to move any animals which are held pursuant to Section 9565 except under written permission of the director and in accordance with the conditions which are stated in the written permission.

9567. The director may release any animals which are held pursuant to Section 9565 in any of the following cases:

(a) The animals, in his opinion, have been tested, cleaned, disinfected, dipped, or otherwise treated in a manner which is satisfactory to him.

(b) He finds, upon inspection, that the animals no longer are liable, or have the capability, to transmit, carry, or disseminate the infectious or contagious disease or a vector of the disease.

9568. If foot and mouth disease, rinderpest, surra, or contagious pleuropneumonia, or any other infectious disease of animals which is considered by the director to be detrimental to the welfare of the animal industry is discovered in the state, the director shall:

(a) Fix and proclaim the boundaries of a quarantine district in which the disease exists or has existed.

(b) Establish, proclaim, and maintain a quarantine of the district and of all animals within it.

(c) Forbid, prevent, or restrict the movement of all animals from or into the district, or from place to place within it, during the existence of the quarantine.

9569. After the quarantine pursuant to Section 9568 is established, the director may:

(a) Regulate, restrict, or restrain the movements of persons, vehicles, farm equipment, farm and dairy products, and other materials from or into the quarantine district, or from place to place within it, during the existence of the quarantine.

(b) Impose, as a condition to travel through or within the quarantine district, that no person or vehicle which is permitted to travel on any road or highway shall depart from the road or highway while within the quarantine district.

(c) Order all animals within the quarantined district to be detained for purposes of examination or inspection at any place which is specified by him in the order.

(d) Cause to be destroyed all animals which may be found within the district that are affected with the disease or which have been so exposed as to be dangerous to themselves or other animals.

(e) Require a proper disposal to be made of the hide and carcass of any animal which is destroyed.

(f) Adopt and enforce all necessary regulations for cleaning and disinfecting any premises or property where the disease exists or has existed by treatment, disposal, or otherwise, and such other regulations as he may deem necessary to eradicate the disease and to prevent its dissemination.

9570. If the director determines that an infectious or contagious disease exists among domestic animals, or that animals have been exposed, or may have been exposed, to the disease, or to the vectors of the disease, in any other state or territory in the United States, or in any foreign country, and the importation of animals, animal products, or refuse animal or vegetable matter from the state, territory, or foreign country may transmit, carry, or disseminate the disease to domestic animals within this state, the director shall notify the Governor who, if he deem it expedient, shall issue his proclamation which shall prescribe the conditions, if any, under which such animals, animal products, or refuse animal or vegetable matter, may be imported into this state from any other state, territory, or foreign country.

9571. Horses, mules, or other animals which are affected with dourine may be held in quarantine under regulations adopted by the director.

9572. Notwithstanding Article 5 (commencing with Section 9641) of this chapter, the Governor may proclaim quarantine regulations which are applicable to any state, territory, or foreign country relative to any animals or disease in such state, territory, or foreign country, or which prescribe the regulations under which animals may be imported into this state from it.

9573. A quarantine shall not be established by one county or city against another county or city on account of the existence of any disease of domestic animals without the written consent of the director.

Article 4. Compensable Destruction of Diseased Animals

9591. If any animal or property is destroyed pursuant to Section 9569, the owner of the animal or property shall be paid an amount of money which shall be determined as provided in Section 9593.

9592. The contribution by the state toward the payment for the animal or property shall be conditioned on the Government of the United States sharing equally in the payment.

9593. The value of the animal or property prior to its destruction shall be determined by two appraisers, one ap-

pointed by the director and one appointed by the Administrator of the Agricultural Research Service of the United States Department of Agriculture.

9594. The department may pay from any money which is available for the support of the department all sums that are due or to become due from the state to owners of livestock or property which is taken, destroyed, or otherwise disposed of pursuant to any provision of this code that relates to the control, prevention, or eradication of disease in livestock.

Article 5. Noncompensable Destruction of Diseased Animals

9621. Except as otherwise provided in Section 9571, every horse, mule, or other animal which is affected with dourine, as shown by a complement-fixation test, is a public nuisance, and shall be immediately destroyed under the direction and supervision of the department. No indemnity shall be paid for such animal.

Article 6. Importation

9641. Except as otherwise provided in this article, it is unlawful for any person to bring into this state any dairy cattle, breeding bull, goat, or sheep.

9642. Dairy cattle and breeding bulls which are brought into this state shall be accompanied by one of the following:

(a) A certificate of health and tuberculin test record, which is signed by a qualified veterinarian, that shows that each of the animals is free from tuberculosis and other communicable diseases.

(b) A signed statement issued by the official in charge of livestock sanitary work in the state from which such animals are transported which states that the animals in the shipment originated in herds which are free from tuberculosis and are not affected with any communicable disease.

A copy of the certificate or statement shall be mailed to the department on the day of shipment.

9643. Any person that desires to ship any buck sheep into this state shall notify the department by registered mail before the importation is made. The notice shall give the names and addresses of consignor and consignee, the number of animals shipped, and the origin and destination of the shipment. If the buck sheep are not shipped in crates or in railroad cars which have been cleaned and disinfected prior to loading, or if they have been unloaded in corrals while en route to the destination, they may be dipped one or more times by the department.

9644. Dairy goats which are brought into this state shall be accompanied by one of the following:

(a) A certificate of health and agglutination test record, signed by a qualified veterinarian which shows that each of the

animals is free from brucellosis and other communicable diseases.

(b) A certificate of a qualified veterinarian or a signed statement issued by the official in charge of livestock sanitary work in the state from which the animals are transported, which states that brucellosis is not prevalent in the area from which the animals are transported and that each animal is free from communicable diseases and has not recently been exposed to any communicable diseases.

A copy of the certificate or statement shall be mailed to the department on the day of shipment.

9645. Any person that desires to import any sheep, other than buck sheep, or goats, other than dairy goats, into this state except sheep or goats for immediate slaughter, shall notify the department by registered mail before the importation is made.

9646. A notice pursuant to Section 9645 shall include all of the following:

(a) The name and address of the consignor, consignee, and the owner of the sheep or goats.

(b) Place of entrance into the state.

(c) Such description of the destination as will enable the department to readily locate the sheep or goats upon their arrival.

9647. Any animal which is brought into this state for exhibition or theatrical purposes, is exempt from the inspection and certification provided for in this article. If any dairy or breeding bull which has been brought into this state for exhibition purposes is sold to remain in the state, such animal shall be subjected to the tuberculin test and certified to as free from tuberculosis by the director before it is delivered to the purchaser.

Article 7. Interagency Cooperation

9671. The director shall meet periodically with the livestock sanitary officials or committees of other states, the duly authorized agricultural representatives of other states and of the United States, or any of them, for the purpose of coordinating livestock sanitary activities within this state and among the several states which have common or similar problems in the field of livestock disease and the prevention, quarantine, eradication, or control of livestock disease.

9672. A county may appropriate and expend money from the general fund of the county to carry on investigation, inspection, control, and eradication of disease in domestic animals. For such purposes it may enter into agreements with the department or with any other county and the department.

9673. An agreement which is entered into pursuant to Section 9672 may do all of the following:

(a) Provide that payments from the county treasuries may be made to the department and disbursed only for investigation, inspection, control and eradication of disease in domestic animals within any county which is a party to the agreement.

(b) Provide that the department shall have full control and supervision in carrying on the work which is provided for.

(c) Be continued for a definite term or until rescinded or terminated.

(d) Provide for the method by which it may be rescinded or terminated by any of the parties to the agreement.

9674. An agreement which is entered into pursuant to Section 9672 shall provide for the disposition, division, or distribution of any property which is acquired as the result of the joint exercise of powers, and the return of any surplus moneys, in proportion to the contributions which were made, after the agreement has been completed.

Article 8. Violations

9691. It is unlawful for any person to remove or cause to be removed any animal from any district, area, or premises which is quarantined pursuant to this chapter, except upon the conditions which are prescribed in this chapter.

9692. It is unlawful for any person to bring or cause to be brought any animal into a quarantined district, area, or premises, without authority from the director.

9693. It is unlawful for any person to move or cause to be moved any animal from place to place within any quarantined district, area, or premises, except by the direction and permission of the director.

9694. It is unlawful for any person to resist the destruction of any animal which is suffering from or exposed to any of the diseases that are specified in Section 9568.

9695. It is unlawful for any person to hide, secrete, or fail to disclose any animal which is suffering from, or which has been exposed to, any of the diseases that are specified in Section 9568, or to fail to disclose the whereabouts of any such animal in order to prevent the destruction of the animal.

9696. It is unlawful for any person to fail or refuse to dispose of the hide or carcass of any animal which is destroyed pursuant to Section 9569, when directed or required to do so by the director.

9697. It is unlawful for any person to fail or refuse to clean or disinfect any premises on which any disease that is specified in Section 9568 exists or has existed, when directed to do so by the director.

9698. It is unlawful for any person to violate any quarantine order which regulates, restricts, or restrains the movement of persons, vehicles, farm equipment, farm and dairy

products into, from, or from place to place within a quarantined district, area, or premises.

9699. It is unlawful for any person to violate the conditions of any permit which authorizes the permittee to travel upon any road or highway within a quarantined district, area, or premises.

9700. It is unlawful for any person to violate any other provision of this chapter or any regulation or order which is made pursuant to it.

9701. Any violation of any provision of this chapter is punishable by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500) or by imprisonment in the county jail for not exceeding six months, or both.

PART 2. DISEASED BOVINES

CHAPTER 1. EXCEPTIONS

9801. This part does not apply to animals which are used in research projects of the University of California.

CHAPTER 2. BOVINE TUBERCULOSIS

Article 1. Definitions

9901. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

9902. "Accredited herd" means a herd of cattle for which the owner holds a valid certificate of accreditation issued to him by the United States Department of Agriculture and the department.

9903. "Approved veterinarian" means a veterinarian who has been granted permission by the department to buy, possess, or use tuberculin.

9904. "Bovine animals" means neat cattle.

9905. "Cattle" means neat cattle.

9906. "Grade animal" means an animal which is not identified in the herd book of any breed record association that is recognized by the United States Department of Agriculture.

9907. "Modified accredited area" means an area so declared by the federal and state departments of agriculture.

9908. "Premises" means any place where cattle have been or are kept.

9909. "Purebred animal" means an animal which is identified in the herd book of a breed record association that is recognized by the United States Department of Agriculture.

9910. "Reactor" or "reacting bovine animal" means any bovine animal that reacts positively to a tuberculin test or that is adjudged tuberculous on physical examination by an approved veterinarian.

9911. "Tuberculin" means the product of the growth of the tubercle bacillus from any source, which is used or intended to be used in diagnosing tuberculosis in cattle.

9912. "Tuberculin test" means the use of tuberculin for the purpose of diagnosing tuberculosis in cattle.

9913. "Tuberculosis control area" means an area which is established and delimited as such by proclamation of the department.

Article 2. General Provisions

9931. To carry out the provisions of this chapter, the inspectors or agents of the department or the United States Department of Agriculture, may at any time or place, enter upon any premises, except dwelling houses. No person shall obstruct, hamper, or interfere with the agents or inspectors while they are enforcing the provisions of this chapter.

9932. The director may make such regulations as are reasonably necessary to carry into effect the provisions of this chapter.

Article 3. Sale and Use of Tuberculin

9941. The department may designate veterinarians, as approved veterinarians, to buy, possess, or use tuberculin, and may suspend or revoke such designation.

9942. Any sale, use, or disposition of tuberculin within the state shall be reported to the department within five days after such sale, use, or disposition.

9943. It is a misdemeanor punishable by imprisonment in the county jail for not less than 90 days, without alternative of a fine in any case, for any person who is not an approved veterinarian to buy, possess, or use tuberculin.

9944. It is unlawful for any person to sell or otherwise dispose of any tuberculin in the state that has not been produced under license of the Agricultural Research Service of the United States Department of Agriculture.

Article 4. Tuberculin Tests

9971. Any approved veterinarian may ear tag or otherwise identify any bovine animal to establish the identity of the animal, while applying a tuberculin test to it.

9972. The result of every tuberculin test shall be reported to the department by the veterinarian who conducted the test within five days after the completion of the test.

9973. Every reactor shall, immediately upon the determination of such reaction, be permanently branded on the left jaw by its owner or his agent, under the supervision of the approved veterinarian who conducts the tuberculin test. The brand shall be the letter "T", not less than three inches in length from top to bottom, and two inches wide at the top.

9974. If the director has reason to suspect an irregularity in the application of a tuberculin test or the branding of

reactors, he may enter any premises for the purpose of examining any bovine animals in or on the premises to determine if there has been any abuse or misuse of tuberculin, or any faulty, unskillful, or irregular technic or procedure in the application of the tuberculin test, branding of reactors, or identification of animals under the tuberculin test.

9975. It is unlawful for any person to do any of the following:

(a) Obstruct, attack, or interfere with, or permit to be obstructed, attacked, or interfered with, the department or an approved veterinarian who is conducting a tuberculin test.

(b) Neglect or fail to properly secure and restrain any bovine animal to be tuberculin tested, or under tuberculin test, for examination, injection, observation, or other procedures which pertain to a tuberculin test.

9976. It is a misdemeanor which is punishable by imprisonment in the county jail for not less than 90 days, without the alternative of a fine in any case, for any person to defeat or interfere with or to attempt to defeat or interfere with a tuberculin test by the use of chemicals, biological products, or by any other similar means.

9977. It is a misdemeanor which is punishable by imprisonment in the county jail for not less than 90 days, without the alternative of a fine in any case, for any person to obstruct, defeat, or interfere with or to attempt to obstruct, defeat, or interfere with a tuberculin test by transporting from a premises or by hiding away or sequestering any bovine animal from or by bringing substitute bovine animals onto, such premises after receipt of a notification by the owner or person in charge of such animals on the premises from the department or from an approved veterinarian who is conducting tuberculin tests, stating that the animals or herd on such premises will be tuberculin tested on or before a certain date or will be under tuberculin test for a stated period and that the animals or herd shall be held on the stated premises for a specified period.

9978. Permission in writing may be obtained from the department or the approved veterinarian who is conducting the tuberculin tests to allow any necessary movement of the animals required to be held pursuant to Section 9977. Upon the completion of the tuberculin test which is referred to in the notification, the department or the approved veterinarian shall issue a written release from the holding requirements of the notice.

9979. It is unlawful for any person to apply a tuberculin test to any bovine animal which has at any time been found by an approved veterinarian to be a reactor.

9980. It is unlawful for any person to knowingly inject into any bovine animal any substance, that is purported to be tuberculin, which is not tuberculin.

9981. It is unlawful for any person to have any bovine animal at any livestock fair or show, unless the animal is

free from tuberculosis, as evidenced by a tuberculin test record which is approved by the department.

9982. It is unlawful for any person to knowingly sell, after notification of its condition from the department, any bovine animal which has tuberculosis as shown by a positive reaction to the tuberculin test, physical examination, or other test, or other examination, which is recognized by the department, unless such person has first obtained a permit in writing from the department.

Article 5. Tuberculosis Control Areas

10001. The department may establish and maintain tuberculosis control areas within this state.

10002. A tuberculosis control area shall consist of one or more entire counties.

10003. When the department establishes a tuberculosis control area, it shall issue a proclamation which shall be published for three successive weeks in a newspaper of general circulation that is published in such area.

10004. The department shall examine and tuberculin test all dairy cattle in the tuberculosis control areas, and, with the consent of the owner, such beef cattle as the director may specify, as often as may be deemed necessary, in order to determine which animals are affected with tuberculosis.

10005. The testing of beef cattle shall be compulsory whenever the percentage of reactors among dairy cattle has been reduced to 1 percent or below.

10006. All owners of cattle within a tuberculosis control area which are subject to examination and tuberculin testing shall, upon request of the department, provide necessary facilities for making tuberculin tests, and render such assistance as may be required.

10007. Cattle of the following classes may enter a tuberculosis control area in accordance with the regulations of the department:

(a) Cattle regularly tested and nonreacting in a tuberculosis control area, or from state or federal accredited herds or modified accredited herds or from modified accredited areas.

(b) Cattle of beef breeds.

(c) Cattle which are to be sold and reshipped out of the area.

(d) Cattle that have been tested and found to be reactors and branded which are shipped for immediate slaughter.

10008. Except as otherwise provided in Section 10007, cattle may not enter a tuberculosis control area unless:

(a) Accompanied by a tuberculin test certificate which is acceptable to the department and issued by a duly authorized veterinarian. The certificate shall show the cattle to have negatively passed a tuberculin test within 60 days prior to ship-

ment or movement, if the cattle are from outside the state, or within 30 days, if the cattle are from within the state.

(b) The entire herd from which the animals originated are tuberculin tested and the number of animals reacting does not exceed 10 percent.

10009. All cattle which enter any tuberculosis control area, pursuant to Section 10008, shall be held under supervision and tuberculin retested within 90 days after arrival by an agent of the department or the United States Department of Agriculture. A copy of each tuberculin test certificate which accompanies cattle that enter any tuberculosis control area shall be forwarded to the department on or before the date of shipment or movement. Forms for the certificates, for cattle which originate within the state, shall be obtained from the department.

Article 6. Provisional Tuberculosis Control Areas

10031. The director may withdraw one or more counties within a tuberculosis control area from the area if the funds that are available for indemnity and administration are not sufficient to continue the work under the provisions of this chapter.

10032. If any county is withdrawn from a tuberculosis control area, it shall become a provisional tuberculosis control area in which no indemnity will be paid for reactors to the tuberculin test.

10033. In a provisional tuberculosis control area, the director shall tuberculin test all cattle which the owner of the cattle requests in writing be tuberculin tested.

10034. Any reactor which is found in a provisional tuberculosis control area shall be removed from the area within 30 days after its detection.

Article 7. Slaughter of Reacting Bovine Animals

10061. Any bovine animal, in a tuberculosis control area, reacting positively to a tuberculin test conducted by a representative of the Federal or State Department of Agriculture, or adjudged tuberculous upon physical examination by the representative, shall immediately be segregated from other bovine animals which are not reactors.

10062. The value of the reacting bovine animal shall be determined by appraisement by a representative of the department or a representative of the Agricultural Research Service of the United States Department of Agriculture, and by the owner or his agent. In case of failure to agree on the valuation, the animal shall be appraised by the chief appraiser of the department or his representative. In either event, the value determined shall be final.

10063. Within 30 days after the appraisal of the animal, it shall be slaughtered under the supervision of the director.

10064. No animal shall be tested or slaughtered pursuant to this article unless funds are available from both of the following appropriations:

(a) An appropriation of the United States to assist in the eradication of tuberculosis in cattle in this state.

(b) An appropriation of this state for payment of the indemnity by the state pursuant to this chapter.

10065. The slaughtering of any animal, pursuant to this article, shall be under the supervision of an inspector of the department, or of the Agricultural Research Service of the United States Department of Agriculture. In any chartered or incorporated city or city and county that maintains a regular meat inspection service by persons who have passed the civil service meat or market inspectors' examination, the slaughtering of animals pursuant to this chapter may be under the supervision of the local officers.

10066. The carcasses of the slaughtered animals shall be disposed of pursuant to the regulations of the department or the rules and regulations of the Agricultural Research Service of the United States Department of Agriculture which govern meat inspection.

10067. When an animal is slaughtered pursuant to this article, the owner shall receive all of the following:

(a) The proceeds of the sale of the salvage of the animal.

(b) From the state, one-third of the difference between the appraised value and the proceeds of the sale of the salvage, but in no instance to exceed fifty dollars ($50) for any grade animal or seventy-five dollars ($75) for any purebred animal.

(c) From the United States, any sum which is authorized to be paid to him from any appropriation that is made by the United States to assist in the eradication of tuberculosis in cattle in this state.

10068. Indemnity provided by this article shall not be paid to any person in any of the following cases:

(a) For any steer or grade bull which is determined to be a reactor.

(b) For any bovine animal which is brought into a tuberculosis control area that reacts to a tuberculin test which is applied within 90 days after arrival of the animal in the area, as provided for in this chapter.

(c) For any bovine animal which is brought into a tuberculosis control area in violation of any law, any regulation of the department, or any rule or regulation of the United States Department of Agriculture.

(d) For any reacting bovine animal, until the premises, where the animal had been kept, have been cleaned and disinfected by the owner in a manner which is approved by an agent of the department or of the United States Department of Agriculture.

(e) For any reacting bovine animal which is not slaughtered within 30 days after the animal is appraised.

(f) For any animal which is owned by the United States, this state, or any county or city in the state.

(g) If such person has violated any provision of this chapter which relates to a tuberculosis control area or any regulation which is made by the department that relates to such an area.

10069. A subsequent payment of indemnity shall not be made to any person in any of the following cases:

(a) Unless the provisions of this chapter have been fully complied with for each and every bovine animal added to his herd.

(b) Unless and until the premises are maintained in a sanitary condition which is satisfactory to the department or the United States Department of Agriculture.

10070. The pedigree of any purebred bovine animal shall be proved by a certificate of registry from the herd books where the animal is registered. The registration papers of any purebred bovine animal which is slaughtered because of tuberculosis and for which indemnity is paid shall be marked "canceled" by the department

10071. Each claim against the state for payment for the slaughter of any reacting bovine shall be presented to the State Controller and paid out of appropriations or funds available for that purpose in accordance with law. Every claim shall be paid within 60 days after the date of presentation if the claimant is entitled to payment.

Article 8. Slaughter of Exposed Nonreacting Animals

10081. Notwithstanding any other provision of this chapter, the director may proceed with the branding of nonreacting animals in a herd in the same manner as is provided in Section 9973 and require the slaughter of such animals and the disinfection of the premises where the animals have been kept if all of the following requirements are satisfied:

(a) He determines that bovine tuberculosis cannot be eradicated or effectively controlled in the particular herd by the usual recognized methods.

(b) He determines that slaughter of the remaining exposed nonreacting animals in the herd is the best and most practical method of attaining eradication or control of the bovine tuberculous.

(c) He has entered into a voluntary agreement with the owner of the nonreacting animals to carry out the purposes and conditions of this chapter.

(d) Funds are available to indemnify the owner of the nonreacting animals.

10082. The indemnity which is paid to the owner of any nonreacting animal which is slaughtered pursuant to this

article shall be the difference between the appraised value of the animal as determined by appraisement by a representative of the department, or a representative of the United States Department of Agriculture, and by the owner or his agent, and the proceeds of the sale of the salvage. The indemnity shall not, however, exceed two hundred dollars ($200) for any grade animal, or three hundred dollars ($300) for any purebred animal, less any sum which is authorized to be paid to the owner for indemnity purposes from any appropriation made by the United States to assist in the eradication of tuberculosis in cattle in this state. In case of failure to agree on the valuation, the animal shall be appraised by the chief appraiser of the department or his representative. In either event, the value determined shall be final.

10083. Indemnity provided by this article shall not be paid in any of the following cases:

(a) For any bovine animal which reacts to the tuberculin test or shows lesions of tuberculosis at slaughter. In this case, the indemnity rate which is provided in Section 10067 shall apply.

(b) For any bovine animal, unless all exposed cattle, swine, goats, and poultry on the premises are slaughtered.

(c) For any bovine animal, until the premises where the animal has been kept have been cleaned and disinfected by the owner in a manner which is approved by an agent of the department or of the United States Department of Agriculture.

(d) For any steer or grade bull.

(e) For any animal which is owned by the United States, this state, or any county or city in the state.

(f) If the owner is in violation of any provision of this chapter or any regulation which is made by the department that relates to bovine tuberculosis.

(g) For any animal which is not slaughtered within 30 days after such animal is appraised.

(h) For any bovine animal which originated in another state or country that has not been in this state for at least 90 days.

10084. This article shall remain in effect until October 1, 1967.

Article 9. Tuberculosis-exposed Cattle

10101. As used in this article, "tuberculosis-exposed cattle" means cattle which have been in contact with, or exposed to, any reactor or tuberculosis-infected premises.

10102. In order to prevent the spread of tuberculosis through movement of tuberculosis-exposed cattle, the department, upon determination that any cattle have been so exposed, may in writing notify the owner of exposed cattle that such cattle shall not be moved from the premises where they were found until a release in writing from the department is

given to the owner which permits their movement. The premises, or portion of the premises upon which tuberculosis-exposed cattle are found, shall be identified in the notice. The department shall base its release upon a determination that is made from further tuberculin tests or examinations, or both, and a finding that the danger of the spread of tuberculosis no longer exists.

10103. Notwithstanding the provisions of Section 10102, the department may issue a special permit for the movement of tuberculosis-exposed cattle to any of the following:

(a) An establishment which is operating under state, state approved, or federal meat inspection, or a public stockyards designated by the department to handle reactors and tuberculosis-exposed cattle for slaughter.

(b) Premises where tuberculosis-exposed cattle are kept.

(c) Premises where no spread of tuberculosis to other cattle could occur.

10104. This article does not apply to any salesyard or public stockyard nor to any cattle which are in or moving through any salesyard or public stockyard.

10105. It is unlawful for any person to drive, transport, or otherwise move tuberculosis-exposed cattle from any tuberculosis-infected premises unless such cattle are accompanied by a release in writing or by a special permit which is issued pursuant to this article.

Article 10. Federal-State Cooperation

10131. The department may, in cooperation with the United States Department of Agriculture, declare a county to be a "modified accredited area" when the percentage of tuberculous cattle in the county is reduced to meet the requirements of "modified accredited areas," as adopted by the United States Department of Agriculture.

10132. The department may, in cooperation with the United States Department of Agriculture, undertake tuberculosis control in bovine animals under the accredited herd plan, in accordance with the regulations of the department and the United States Department of Agriculture.

Article 11. Confinement of Cattle Subject to Examination

10151. If the owner or any person that is in charge of cattle, after 10 days' written notice, refuses properly to confine in corrals or stanchions any cattle which are subject to examination, tuberculin testing, branding, or slaughter, the department may employ help and incur such expense as is necessary to properly examine, tuberculin test, brand, or slaughter, the cattle.

10152. Any expense which is incurred by the department pursuant to Section 10151 is a lien upon the cattle. Unless the

amount of the lien is paid within 10 days after written notice of the amount of the lien is given by the department to the owner or person that is in possession of the cattle, the lien shall be enforced pursuant to Section 3052 of the Civil Code.

CHAPTER 3. BOVINE BRUCELLOSIS

Article 1. Definitions

10301. Unless the context otherwise requires, the definitions in this article govern the construction of this division.

10302. "Accredited veterinarian" means a veterinarian who is so designated by the United States Department of Agriculture and the department.

10303. "Bovine animals" means neat cattle.

10304. "Brucellosis" means the disease of cattle which is caused by Brucella microorganisms.

10305. "Brucellosis control area," means any area that has been so established by the department in order to qualify and maintain such area in accordance with certification standards of the bovine brucellosis eradication uniform methods and rules adopted by the United States Department of Agriculture.

10306. "Cattle" means neat cattle.

10307. "Official veterinarian" means a veterinarian who is in the employ of the United States Department of Agriculture or the department.

10308. "Premises" means any place where cattle have been or are kept.

10309. "Reactor" or "reacting bovine animal" means any bovine animal that reacts positively to a test for brucellosis which is approved by the director.

10310. "Vaccinate" or "vaccination" means the use of vaccine in cattle.

10311. "Vaccine" means any vaccine which is produced by a laboratory which is licensed by the Agricultural Research Service of the United States Department of Agriculture and recognized by the department for use in preventing or treating brucellosis in cattle.

Article 2. General Provisions

10321. The department may enter into any cooperative arrangement with the United States Department of Agriculture to undertake brucellosis control pursuant to this chapter.

10322. To carry out the provisions of this chapter, any duly authorized representative of the department or of the United States Department of Agriculture, may enter upon any premises except dwelling houses. No person shall interfere with the representative while he is enforcing the provisions of this chapter.

10323. The department may use the services of official veterinarians or contract with accredited veterinarians to carry out the provisions of this chapter.

10324. The director may make such regulations as are reasonably necessary to carry this chapter into effect. He may require such reports and records as are necessary.

10325. Every accredited veterinarian who is conducting work pursuant to this chapter shall submit reports to the department on forms that are furnished for that purpose.

10326. In addition to any other authority in this part that is available to the director for the purpose of preventing the spread of any disease of livestock, the director may adopt regulations to prevent the spread within this state of bovine brucellosis through limitations on movement of bovine animals or through such tests or vaccinations or other means as he may find and determine to be necessary. If he finds and determines that similar regulations are necessary interstate, he shall notify the Governor in order that the procedure which is set forth in Section 9570 may be followed.

Article 3. Vaccines

10341. Any vaccine which is used pursuant to this chapter shall be procured by the department from a laboratory which is licensed by the Agricultural Research Service of the United States Department of Agriculture. The vaccine, after purchase directly from the laboratory, shall be distributed by the department.

10342. It is unlawful for any person, except a federal, state, county, or municipal officer or employee, in his official capacity, or an accredited veterinarian, to buy, possess or use a vaccine or antigen which contains brucella microorganisms, except pursuant to the regulations of the director.

Article 4. Vaccinations

10351. All female dairy calves shall be vaccinated by an official veterinarian or an accredited veterinarian, who is authorized by the department, at such ages as are designated by the department. Male dairy calves and beef calves may, at the option of the owner, be vaccinated

10352. Each calf which is vaccinated pursuant to this chapter shall have an official tattoo placed in the left ear by the veterinarian who performs the service that shows the period within which the animal was vaccinated, or such other evidence of vaccination or identification as the department may by regulation specify.

10353. The owner of any calf which is to be vaccinated pursuant to this chapter shall, upon request of the department, provide the necessary facilities and assistance for such vaccination.

10354. If the owner or any person that is in charge of any dairy calf, after 10 days' written notice by the department, refuses properly to confine in a corral or stanchions, any calf which is required to be vaccinated and identified pursuant to this chapter, the department may in such case incur such expense as is necessary to properly vaccinate and identify the calf.

10355. Any expense which is incurred by the department pursuant to Section 10354 is a lien upon the calf which is vaccinated and identified. Unless the amount of the lien is paid within 10 days after written notice of the amount of the lien is given by the department to the owner or person that is in possession of the calf, the lien shall be enforced pursuant to Section 3052 of the Civil Code.

10356. An owner or other person that is in charge of any calf is not obligated by this chapter to pay for any vaccination or marking of the calf pursuant to this chapter.

10357. It is unlawful for any person to refuse to submit a dairy calf which is required to be vaccinated and identified pursuant to this chapter to such vaccination.

10358. It is unlawful for any person to remove any official mark which is required by this chapter, or to imitate or simulate such official mark.

10359. It is unlawful for any person, except a federal, state, county, or municipal officer or employee, in his official capacity, or an accredited veterinarian, to buy, possess, or use any device which is designed to produce a mark, stamp, or tattoo that simulates in design the official tattoo, tag, or mark that is adopted by the department and the United States Department of Agriculture for identifying cattle which are officially vaccinated against brucellosis.

Article 5. Brucellosis Control Areas

10381. The department may, after hearing, establish and maintain brucellosis control areas within this state.

10382. The department shall examine and test such cattle for brucellosis in any brucellosis control area as the director may specify, as often as may be deemed necessary to qualify and maintain such area within the standards of certification which are adopted by the United States Department of Agriculture.

10383. All owners of cattle which are subject to examination and testing for brucellosis within a brucellosis control area shall, upon request of the department, provide the necessary facilities for collecting such samples of blood or milk as may be deemed necessary to conduct tests for brucellosis, and shall render such assistance as may be required.

10384. If any owner or person that is in charge of cattle, after 10 days' written notice by the department, refuses properly to confine in corrals, stanchions, or chutes, any cattle

within a brucellosis control area which are required to be tested and identified pursuant to this chapter, the owner is guilty of a misdemeanor and the department may in such case incur such expense as is necessary to properly confine and identify the cattle.

10385. Any expense which is incurred by the department pursuant to Section 10384 is a lien upon the cattle which are tested and identified. Unless the amount of the lien is paid within 10 days after written notice of the amount of the lien has been given by the department to the owner or person that is in possession of the cattle, the lien shall be enforced pursuant to Section 3052 of the Civil Code.

10386. The director shall, by regulation, designate the conditions under which cattle may be moved into a brucellosis control area.

10387. It is unlawful for any person to refuse to submit any cattle which are required to be tested pursuant to this chapter, for the collection of milk or blood samples, or to refuse to submit any milk samples which are necessary for the testing of cattle for brucellosis pursuant to this chapter.

Article 6. Slaughter of Reacting Bovine Animals

10401. Any bovine animal in a brucellosis control area which reacts positively to a test for brucellosis shall immediately be branded and identified pursuant to the regulations of the director. The animal shall be slaughtered within 30 days in accordance with the regulations of the director.

10402. The value of an animal which is slaughtered shall be determined by appraisement by a representative of the department or a representative of the Agricultural Research Service of the United States Department of Agriculture, and by the owner or his agent. If such persons do not agree on the valuation of the animal, the animal shall be appraised by the chief appraiser of the department or his representative. In either event, the value which is determined is final.

10403. Within 30 days after the appraisal of the animal, it shall be slaughtered under the supervision of the director.

10404. Where it is necessary to prevent the spread within this state of bovine brucellosis, the director may provide for the slaughter of animals.

10405. Except as otherwise provided in this article, if an animal in a brucellosis control area is slaughtered pursuant to this article, or under regulations of the director which are made pursuant to this article, the owner shall receive all of the following:

(a) The proceeds of the sale of the salvage of the animal.

(b) From the state, one-third of the difference between the appraised value and the proceeds of the sale of the salvage, but in no instance to exceed seventy-five dollars ($75) for any

grade animal or one hundred dollars ($100) for any purebred animal.

(c) From the United States, any sum which is authorized to be paid to him from any appropriation made by the United States to assist in the eradication of brucellosis.

10406. Indemnity shall not be paid to any person in any of the following cases:

(a) For any steer or grade bull which is determined to be a reactor.

(b) For any bovine animal which is brought into a brucellosis control area, that reacts to a brucellosis test which is applied within 90 days after the arrival of the animal in the area as provided for in this chapter.

(c) For any bovine animal which is brought into a brucellosis control area, in violation of any law, any regulation of the department, or any rule or regulation of the United States Department of Agriculture.

(d) For any reacting bovine animal, until the premises, where the animal had been kept, have been cleaned and disinfected by the owner in a manner which is approved by an agent of the department or of the United States Department of Agriculture.

(e) For any reacting bovine animal which is not slaughtered within 30 days after such animal was appraised.

(f) For any animal which is owned by the United States, this state, or any county or city in the state.

(g) For any bovine animal which was vaccinated for brucellosis after reaching 12 months of age, subsequent to January 1, 1957.

(h) If such person has violated any provision of this chapter which relates to a brucellosis control area, or any regulation which is made by the department that relates to such an area.

10407. A subsequent payment of indemnity shall not be made to any person in any of the following cases:

(a) Unless the provisions of this chapter have been fully complied with for each and every bovine animal that is added to his herd.

(b) Unless and until the premises are maintained in a sanitary condition, which is satisfactory to the department or the United States Department of Agriculture.

Article 7. Slaughter of Exposed Nonreacting Animals

10421. Notwithstanding any other provision of this chapter, the director may proceed with the branding of nonreacting animals in a herd in the same manner as is provided in Section 10401 and require the slaughter of such animals and the disinfection of the premises where the animals have been kept if all of the following requirements are satisfied:

(a) He determines that bovine brucellosis cannot be eradicated or effectively controlled in the particular herd by the usual recognized methods.

(b) He determines that slaughter of the remaining exposed nonreacting animals in the herd is the best and most practical method of attaining eradication or control.

(c) He has entered into a voluntary agreement with the owner of the nonreacting animals to carry out the purposes and conditions of this chapter.

(d) Funds are available to indemnify the owner of the nonreacting animals.

10422. The indemnity which is paid to the owner of any nonreacting animal which is slaughtered pursuant to this article shall be the difference between the appraised value of the animal as determined by appraisement by a representative of the department, or a representative of the United States Department of Agriculture, and by the owner or his agent, and the proceeds of the sale of the salvage. The indemnity shall not, however, exceed two hundred dollars ($200) for any grade animal, or three hundred dollars ($300) for any purebred animal less any sum which is authorized to be paid to the owner for indemnity purposes from any appropriation made by the United States to assist in the eradication of brucellosis in cattle in this state. In case of failure to agree on the valuation, the animal shall be appraised by the chief appraiser of the department or his representative. In either event, the value determined shall be final.

10423. Indemnity provided by this article shall not be paid in any of the following cases:

(a) For any bovine animal which reacts to the brucellosis test or shows active brucellosis prior to or at slaughter. In this case, the indemnity rate which is provided in Section 10405 shall apply.

(b) For any bovine animal, unless all exposed cattle, swine, goats, sheep, and horses on the premises are slaughtered.

(c) For any bovine animal, until the premises where the animal has been kept have been cleaned and disinfected by the owner in a manner which is approved by an agent of the department or of the United States Department of Agriculture.

(d) For any steer or grade bull.

(e) For any animal which is owned by the United States, this state, or any county or city in the state.

(f) If the owner is in violation of any provision of this chapter or any regulation which is made by the department that relates to bovine brucellosis.

(g) For any animal which is not slaughtered within 30 days after such animal is appraised.

(h) For any bovine animal which originated in another state or country that has not been in this state for at least 90 days.

This article shall remain in effect until October 1, 1969.

Article 8. Violations

10491. Any violation of any provision of this chapter is a misdemeanor.

10492. It is unlawful for any person to violate any regulation which is made pursuant to this chapter.

PART 3. DISEASED SWINE

CHAPTER 1. IMPORTATION AND SALE

Article 1. Definitions

10701. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

10702. "Health certificate" means a health certificate from either a veterinary inspector of the United States Department of Agriculture, the state veterinarian or livestock sanitation official of the state of origin, or of a licensed veterinarian approved by the state veterinarian or livestock sanitation official.

10703. "Sales yard" includes any livestock yard, pen, corral, building, premises, or conveyance in which swine are assembled for sale, resale, exchange, or transfer by any owner or his agent. It does not, however, include any ranch premises where swine are assembled for sale, resale, exchange, or transfer by any owner or his agent in ordinary ranch-to-ranch transactions, or where swine are fed and fitted for slaughtering purposes only.

Article 2. Importation

10721. It is unlawful for any person to import any swine into this state, except for immediate slaughter or for exhibition or theatrical purposes, unless such person procures a health certificate prior to the shipment or movement of the swine.

10722. The health certificate shall certify that the swine to which it refers satisfy all of the following requirements:

(a) Have not been exposed to any communicable disease.

(b) Are free from evidence of any communicable disease.

(c) Have been immunized against hog cholera by a method of immunization which is designated by regulations of the director as an effective method of immunization and by the United States Department of Agriculture.

10723. The health certificate shall also show all of the following:

(a) The date of immunization.

(b) The predominating breed of the swine.

(c) Approximate weight of the swine.

(d) Color of the swine.

(e) Markings of the swine.

10724. The original of the health certificate shall be attached to the way bill or shall be in the possession of the truck driver. A duplicate copy shall be sent to the Chief of the Division of Animal Industry of the department, at Sacramento, in time to reach him prior to the arrival of the swine within the state. A duplicate copy shall also be sent to the state veterinarian or livestock sanitary official of the state of origin.

10725. Swine which are imported into this state for purposes other than for immediate slaughter, or for exhibition or theatrical purposes, shall be transported in crates, cars, trucks, or other vehicles which have been cleaned and disinfected in conformity with the standards which are prescribed by the Agricultural Research Service of the United States Department of Agriculture.

10726. Swine which are imported into this state for immediate slaughter shall have as their destination a public stockyard, sales yard, or recognized slaughtering establishment. They shall not be diverted for any other purposes.

Article 3. Sales Yards

10751. Any person that operates a sales yard shall keep records of all swine which pass through the sales yard, including the name and address of every person who offers swine for sale and the name and address of every purchaser of swine from the yard.

10752. The sales yard records shall show definite information relative to description of animals, such as breed, weight, color, and marks. The records shall be kept on file for one year, during which time they shall be at the disposal of the director for inspection.

10753. It is unlawful for any person to knowingly bring into, or cause to be brought into, any sales yard any swine that have been, within 21 days, treated with hog cholera virus, or which are affected with, or have been exposed to hog cholera, anthrax, swine erysipelas, vesicular exanthema, foot-and-mouth disease, or any other infectious disease.

Article 4. Swine Disease Control

10781. The director may adopt regulations to control or eradicate hog cholera, swine brucellosis, and other swine diseases in any of the following ways:

(a) Through limitations on the movement of swine.

(b) Through the use of hog cholera vaccine, or other biologics.

(c) Through tests or vaccinations.

(d) Such other similar means as he finds and determines are necessary.

10782. If the director finds and determines that similar regulations are necessary to control such diseases while hogs or

swine are in interstate movement, he shall notify the Governor so that the Governor may act pursuant to Section 9570.

10783. Any person that willfully and knowingly violates any regulation which is made pursuant to this article is guilty of a misdemeanor.

CHAPTER 2. GARBAGE CONTROL

Article 1. Definitions

10901. As used in this chapter, "garbage" means any waste which consists in whole or in part of any animal waste that results from the handling, preparing, cooking, and consuming of food, including the offal from any animal carcass or from any part of an animal carcass It does not, however, include such waste from ordinary household operations which is fed directly to swine on the premises.

Article 2. General Provisions

10921. The director may make and enforce such regulations as are reasonable and necessary to carry out the provisions of this chapter.

10922. The director may enter any premises where garbage is fed to swine and may examine and test any equipment or facilities for processing and handling garbage. He may in writing order any person that is subject to this chapter to cease the operation of any equipment or facility which he finds is unsuitable or improperly operated or maintained.

10923. Every person that is subject to this chapter shall keep and maintain such records or memoranda and furnish such reports as the director by regulations may require. The records and memoranda shall be open to inspection by the director during usual business hours.

Article 3. Processing

10951. In order to prevent the spread of vesicular exanthema and other contagious and infectious diseases of swine, it is unlawful for any person to feed swine any garbage unless the garbage has been processed in accordance with the provisions of this article and the regulations which are adopted by the director pursuant to it.

10952. All garbage, regardless of previous processing, before being fed to swine, shall be thoroughly heated throughout to boiling or equivalent temperature (usually 212 degrees Fahrenheit at sea level) for 30 minutes, or otherwise treated in a manner which is prescribed in the regulations of the director.

Article 4. Licensing

10981. It is unlawful for any person to feed garbage to swine unless he has a valid annual license issued by the director for each separate premises where garbage is fed to swine.

10982. An application for a license to feed garbage to swine shall be in the form which is prescribed by the director, and shall state all of the following:

(a) The name and address of the applicant.

(b) The location of the premises for which the license is requested.

(c) Such other information which the director may require.

10983. Each application for a license shall be accompanied by a fee of twenty dollars ($20).

10984. An application for renewal of a license, accompanied by the proper fee, shall be made on or before the last day of the calendar year for which the current license was issued.

10985. To any fee which is not paid when due, there shall be added a penalty of twenty dollars ($20).

10986. Each license issued pursuant to this chapter entitles the licensee to feed garbage to swine on the premises that are described in the license, during the period for which the license is issued, in accordance with the provisions of this chapter and the regulations issued under it and in compliance with any local or municipal ordinances which are applicable to the feeding of garbage to swine.

10987. The director may refuse to issue a license or renewal of license, and may revoke or suspend any license, as the case may require, if he finds after hearing, that any of the following exist:

(a) The premises which are described in the application or license are not operated in a clean and sanitary manner so as to prevent the continuation and spread of vesicular exanthema.

(b) The premises which are described in the application or license are not adequately equipped or maintained in a manner required by this chapter and the regulations adopted pursuant to it.

(c) The applicant or licensee has violated any lawful order of the director which is issued pursuant to this chapter.

10988. The proceedings for all hearings pursuant to this chapter shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2, of the Government Code. The director shall have all powers which are granted by such chapter.

10989. Any institution or agency of the state, a county, or any municipal or other public corporation which is feeding garbage to swine is not required to procure a license, but shall comply with all other provisions of this chapter and the regulations which are adopted pursuant to this chapter.

10990. This chapter does not prohibit any city or county from licensing persons that feed garbage to swine.

PART 4. ANIMALS DETRIMENTAL TO AGRICULTURE

CHAPTER 1. IMPORTATION AND TRANSPORTATION

11201. Sections 5025, 6304, and 6305 of this code are applicable to the importation into, or the shipment or transportation within, this state of animals which are detrimental to agriculture.

CHAPTER 2. PREDATORS

Article 1. Hunters and Trappers

11221. The director may employ hunters and trappers throughout the state to control or eradicate coyotes and other harmful predatory animals and to shoot or trap bears which are damaging livestock, agricultural crops, or standing timber.

11222. For the purposes of this article, the director may enter into contracts with the Bureau of Sports Fisheries and Wildlife of the United States Department of the Interior to enlist the support of the federal government. He may prescribe the manner, terms, and conditions of such cooperation.

11223. No iron or steel-jawed trap shall be used by any hunter or trapper who is engaged in controlling or eradicating any bears pursuant to this article.

Article 2. Coyote Guns

11241. As used in this article, "coyote gun" means any device which is placed in the ground, loaded with an explosive charge and a poisonous substance, and so designed that when a coyote takes the bait in its mouth a poisonous substance is discharged into its mouth.

11242. For the purpose of killing coyotes outside of the incorporated area of any city or city and county, any livestock raiser may use a coyote gun upon land upon which he is grazing livestock. Any person that is employed pursuant to Section 11221 may use a coyote gun on any land.

11243. The use of a coyote gun pursuant to this article and other applicable provisions of law is lawful.

Article 3. Donations

11261. The director may accept, on behalf of the state, donations of money from any person, board of supervisors, or other agency interested in the control of coyotes and other predatory animals Any such money shall be paid into the

State Treasury and credited to the Department of Agriculture Fund.

11262. Money which is made available by any board of supervisors that is accepted pursuant to this article shall be expended solely within the boundaries of the county which makes the appropriation, unless otherwise authorized by the board of supervisors. All other donations shall be applied to the particular locality in which the donors are interested, unless they specifically consent to the use of their donations in other localities.

CHAPTER 3. NUTRIA

Article 1. General Provisions

11301. The director and the commissioner of each county under the direction and supervision of the director, shall enforce this chapter.

Article 2. Permits

11321. Every person that possesses any nutria (South American beaver, coypu) shall obtain a permit from the department which authorizes him to possess such animal.

11322. The fee for the permit is ten dollars ($10).

11323. Nutria may be possessed only by a person that holds a valid nutria permit.

11324. At the time of any sale, gift, or exchange, the person that sells, gives, or exchanges any nutria shall issue an original receipt from the receipt and record book, which is supplied by the department, to the person that receives the nutria. The receipt shall show the number of nutria and the name and address and the nutria permit number of the person that receives the nutria. Any nutria may be shipped or transported in this state only when accompanied by the original receipt.

11325. All permits for importing or holding nutria shall be prominently displayed on or near their holding pens. The permits expire on June 30 of the year for which they were issued. The permit may be renewed upon application to the department and payment to the department of the annual permit fee of ten dollars ($10) not later than June 30 of each year, for the fiscal year beginning July 1st of such year. Failure to pay the renewal fee when due increases the permit fee for that year to twenty dollars ($20).

11326. Every person that is issued a permit pursuant to this chapter shall make a written report to the department, in the form of a receipt from a receipt and record book which is supplied by the department, within five days after the sale, gift, or exchange of the nutria.

11327. Every person that is issued a permit pursuant to this chapter shall, on or before June 30th of each year, make

an annual written report to the department on forms which are supplied by the department.

11328. Any nutria permit may be revoked by the director for any violation of any provision of this chapter.

11329. The proceedings to revoke a nutria permit shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code.

Article 3. Pens

11351. Every person that possesses any nutria shall provide for the care of such animal in a pen that shall preclude the escape of the nutria.

11352. The walls and floors of any nutria holding pen shall be constructed of materials that will preclude the escape of the nutria by climbing, gnawing, or burrowing.

11353. The pen shall have perpendicular side walls not less than three feet in height with a smooth surface on the inside of the pen.

11354. Every pen shall be completely surrounded by a wire mesh fence which has a mesh that is not more than one and one-half inches at the bottom with stays that are spaced not less than six inches apart and shall be not less than four feet in height. Posts shall be spaced close enough to prevent the fence from sagging. The type of fencing material which is known as poultry and garden fence is satisfactory.

11355. Nutria pens shall be open to inspection at all times by the department or the commissioner.

Article 4. Unconfined Nutria

11381. Any unconfined nutria which is not under the control of the person that is responsible for its possession is a public nuisance and shall be abated by summary action by any person in whom the enforcement of this code is vested.

Article 5. Violations

11391. It is unlawful for any person to violate any provision of this chapter.

11392. It is unlawful for any person that has possession of, or control over, any nutria to intentionally free, or to knowingly permit the escape of, any nutria.

DIVISION 6. AGRICULTURAL PEST CONTROL BUSINESS

Chapter 1. Definitions

11401. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

11402. "License" means agricultural pest control license.

11403. "Pest control" means the use or application of any pesticide. It also means the use of any substance, method, or device to do any of the following:

(a) Control pests.

(b) Prevent, destroy, repel, mitigate, or correct any pest infestation or disorder of plants.

(c) Inhibit, regulate, stimulate, or otherwise alter plant growth by direct application to plants.

11404. "Pesticide" means any economic poison, as defined in Section 12753.

11405. "Registrant" means any person that registers pursuant to Section 11732.

CHAPTER 2. GENERAL PROVISIONS

11501. The director, and the commissioner of each county under the direction and supervision of the director, shall enforce this division and the regulations which are issued pursuant to it.

11502. The director shall adopt regulations which govern the conduct of the business of pest control.

11503. The commissioner of any county may adopt regulations in addition to those adopted by the director, which govern the application of methods of pest control under local conditions.

11504. Prior to the adoption of regulations by a commissioner, a notice of intention to adopt regulations shall be published in the county, pursuant to Section 6061 of the Goverment Code, at least 10 days in advance of the time the regulations are to be adopted, amended, or repealed.

11505. The notice of intention which is referred to in Section 11504 shall contain a statement of the time, place, and nature of proceedings for the adoption of the regulations, and either the express terms or an informative summary of the proposed regulations.

11506. At least 10 days prior to the date set for the adoption, amendment, or repeal of the regulations, the commissioner shall mail a copy of the notice of intention to every person who has registered with the commissioner in the manner required by Article 2 (commencing with Section 11731), Chapter 4 of this division, and to any other interested person that has filed with the commissioner a request to receive a notice of such proceedings.

11507. On the date and at the time and place designated in the notice of intention, the commissioner shall afford any interested person or his duly authorized representative, or both, the opportunity to present statements, arguments, or contentions in writing, with or without opportunity to present them orally.

11508. The commissioner shall consider all relevant matter which is presented to him before he adopts any regulation.

11509. In any hearing which is conducted pursuant to Section 11507, the commissioner or his duly authorized representative shall have authority to administer oaths or affirmations, and may continue or postpone such hearing, from time to time, to such time and at such place as he shall determine.

11510. The regulations of the commissioner are subject to review and approval by the director as to reasonableness, and if approved they shall be filed with the director. The regulations shall become effective 30 days after they are approved by the director unless they are designated as emergency regulations.

11511. If, in the opinion of the commissioner, the public health, welfare, or safety requires that any regulation take effect immediately he shall designate it as an emergency regulation and specify in writing the facts which constitute the necessity. An emergency regulation shall become effective on the date it is approved by the director.

11512. The proceedings for all hearings pursuant to this division shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all of the powers which are granted in that chapter.

11513. Any money which is derived under the provisions of Article 1 (commencing with Section 11701), Chapter 4 of, and Article 1 (commencing with Section 11901), Chapter 5 of, this division shall be paid into the State Treasury to the credit of the Department of Agriculture Fund. Any money in the Department of Agriculture Fund which is derived under the provisions of this division and Chapter 2 (commencing with Section 12751) and Chapter 5 (commencing with Section 14501) of Division 7 of this code may be expended for the administration and enforcement of this division and Chapter 2 and Chapter 5 of Division 7, notwithstanding any other provision of law which limits the expenditure of any such money to the specific purposes or to the administration or enforcement of each of these portions of this code separately.

CHAPTER 3. EXEMPTIONS

11531. This chapter does not apply to any person while engaged in any of the following:

(a) Any activity that is defined as structural pest control and required to be licensed under Chapter 14 (commencing with Section 8500), Division 3 of the Business and Professions Code.

(b) Preservative treatment of fabrics or structural materials.

(c) Household or industrial sanitation services.

(d) Seed treatment which is incidental to such person's regular business.

CHAPTER 4. REGULATION GENERALLY

Article 1. Licenses and Permits

11701. It is unlawful for any person to engage for hire in the business of pest control, unless such person has an agricultural pest control license for the then current calendar year issued by the director.

11702. Applications for a license shall be in the form which is prescribed by the director, and shall state the name and address of the applicant and the type of pest control in which he intends to engage.

11703. Except as otherwise provided in Section 11707, the application shall be accompanied by a fee of fifty dollars ($50).

11704. Each applicant shall also satisfy the director of his character, qualifications, responsibility, and good faith in seeking to carry on the business of pest control.

11705. The director shall issue to each applicant that satisfies the requirements of this article a license which entitles the applicant to conduct the business described in the application for the calendar year for which the license is issued, unless the license is sooner revoked or suspended.

11706. The license may be renewed annually upon application to the director, accompanied by the proper fee, on or before the first day of January of the calendar year for which the license is issued.

11707. To any fee which is not paid when due, there shall be added a penalty of five dollars ($5).

11708. The director may refuse to grant or renew a license and may revoke or suspend any license, as the case may require, if, after a hearing pursuant to this division, he is satisfied that one or more of the following things are true regarding the applicant or licensee:

(a) He is not qualified to perform the type of pest control under the conditions and in the locality in which he intends to operate.

(b) He has committed any act which is declared by Article 4 (commencing with Section 11791) of this chapter to be a violation of this division.

(c) He has violated any provision of Article 10 (commencing with Section 12971), Chapter 2, Division 7 of this code.

11709. A person not regularly engaged in the business of pest control that operates only in the vicinity of his own property and for the accommodation of his neighbors is not required to procure a license. Such person shall, however, obtain a permit from the director and register with the commissioner as provided in Section 11732, and he is subject to all other provisions of this division. The determination of the director that a person is engaged in the business of pest control beyond the vicinity of his own property or for the accommodation of others than his neighbors is final.

11710. A person that is regularly engaged in the business of tree surgery is not required to procure a license to remove diseased or infested tissues or apply disinfectants to wounds or cavities incidental to tree surgery. If such person desires to engage in any other pest control operation, he shall procure a license from the director, shall register with the commissioner as provided in Section 11732, and is subject to all other provisions of this division.

Article 2. Registration

11731. "Commissioner," as used in this article, includes the director in any county in which there is no commissioner.

11732. It is unlawful for any person to engage for hire in the business of pest control in any county unless such person has registered for the then current calendar year with the commissioner.

The registration shall be in the form which is prescribed by the commissioner and shall show all of the following information:

(a) Name and address of the registrant.

(b) Number and kind of units to be operated in the county.

(c) Type of pests which are intended to be controlled.

(d) Any other information as the commissioner may require.

11733. The registrant shall keep and maintain a record of each property treated that shows all of the following information:

(a) Date of treatment.

(b) Material and dosage used.

(c) Number of units treated.

(d) Any other information which the commissioner may require.

The registrant shall report the information to the commissioner or the director when and as required.

11734. The board of supervisors of any county may establish reasonable fees for the registration.

11735. Registration may be canceled or refused, if the commissioner makes any of the following findings:

(a) That the equipment of the registrant or applicant is unsuitable.

(b) That the operators employed by him are incompetent or unqualified.

(c) That the registrant or the applicant has not complied with any provision of this division, any regulation issued pursuant to it, or of any lawful order of the commissioner.

11736. Any person whose registration has been canceled or refused may appeal to the director, within 10 days, for a hearing.

11737. The commissioner may order any registrant, or any person that is required by this division to be registered, or the

agent or employee of such registrant or person, to cease operation of any equipment which he finds unsuitable, or which he finds being operated in any of the following ways:

(a) By an incompetent or unqualified person.

(b) In violation of this division or any regulation issued pursuant to it.

(c) In a manner or under conditions likely to interfere with proper control of the pest for which treatment is applied.

(d) In a manner or under conditions likely to cause injury to the crop or property being treated, or to persons or property of others.

11738. The regulations of the commissioner may provide for the qualification, by examination or otherwise of the following persons:

(a) Registrants.

(b) Persons in charge of the pest control operations of registrants within the county.

(c) Persons employed by registrants to operate pest control equipment, other than aircraft, within the county.

11739. The regulations of the commissioner may provide that it is a ground for cancellation of registration to operate pest control equipment within the county unless either:

(a) A person qualified pursuant to Section 11738 is in charge of the operations.

(b) Each unit which is operated within the county is under personal direction of a person qualified pursuant to Section 11738.

11740. Any certificate of qualification which is issued pursuant to Section 11738 may be revoked or suspended, or its issuance or renewal refused, if the commissioner finds that the applicant or holder of the certificate is incompetent or has violated any provision of this division, or any regulation which is issued pursuant to it, or has not complied with any lawful order of the commissioner.

11741. Any person whose certificate has been revoked, suspended, or refused may appeal to the director within 10 days for a hearing.

Article 3. Report of Damage From Pesticides

11761. Any person that suffers any loss or damage as a result of the use or application by others of any pesticide, or of any substance, method, or device for pesticidal purposes; or for the purpose of preventing, destroying, repelling, mitigating, or correcting any disorder of plants; or for the purpose of inhibiting, regulating, stimulating, or otherwise altering plant growth by direct application to plants shall, within 60 days from the time that the occurrence of such loss or damage became known to such person, file with the commissioner of the county in which the loss or damage, or some part of the loss or damage, is alleged to have occurred, a verified report of loss.

11762. If a growing crop is alleged to have been damaged as a result of the activities which are described in Section 11761, the verified report of loss shall be filed prior to the time 50 percent of the crop is harvested, unless the loss or damage is not then known.

11763. The verified report of loss shall set forth, so far as known to the claimant, all of the following:

(a) Name and address of the claimant.

(b) Type, kind and location of property which is allegedly injured or damaged.

(c) Date the alleged injury or damage occurred.

(d) Name of pest control operator that is allegedly responsible for the loss or damage.

(e) Name of the owner or occupant of the property for whom the pest control operator was rendering labor or services.

11764. The filing of the verified report, or the failure to file it, need not be alleged in any complaint which may be filed. The failure to file the verified report of loss is not a bar to the maintenance of a civil action for the recovery of damages for the loss or damage.

11765. Proof of failure to file the verified report of loss creates a rebuttable presumption that no loss or damage occurred.

Article 4. Violations

11791. It is unlawful for any person that is subject to this division to do any of the following:

(a) Make any false or fraudulent claim, or misrepresent the effects of material or method to be applied, apply any worthless or improper material, or otherwise engage in any unfair practices.

(b) Operate in a faulty, careless, or negligent manner.

(c) Refuse or neglect to comply with any provision of this division, or any regulation issued pursuant to it, or any lawful order of the commissioner.

(d) Refuse or neglect to keep and maintain the records which are required by this division, or to make reports when and as required.

11792. It is also unlawful for any person that is subject to this division to do any of the following:

(a) Make any false or fraudulent record or report.

(b) Operate in any county without first having registered with the commissioner.

(c) Operate equipment with incompetent or unqualified persons in charge of the equipment.

(d) Use any fraud or misrepresentation in making application for a license or for renewal of a license.

(e) Fail to comply with the provisions of Chapter 3 (commencing with Section 14001), Division 7 of this code.

CHAPTER 5. AIRCRAFT OPERATION REGULATION

Article 1. Generally

11901. It is unlawful for any person to operate any aircraft in the business of pest control unless the pilot operating the aircraft holds one of the following:

(a) A valid certificate of qualification issued by the director.

(b) A valid apprentice certificate issued by the director.

11902. A fee of twenty-five dollars ($25) shall accompany each application for any certificate which is issued pursuant to this chapter.

11903. Before a certificate of qualification may be issued, the applicant shall pass an examination to demonstrate to the director his ability to conduct pest control operations and his knowledge of the nature and effect of materials which are used in pest control.

11904. The certificate of qualification which is issued to a successful candidate shall disclose in which of the following three general classes of pest control operations he is qualified:

(a) The use of herbicides and defoliants.

(b) The use of pesticides other than herbicides and defoliants (dust).

(c) The use of pesticides other than herbicides and defoliants (liquid).

11905. The holder of a certificate of qualification is authorized to conduct only those pest control operations in which he is found qualified.

11906. A certificate of qualification shall not be issued to any applicant, other than the holder of a valid apprentice certificate, who has not had in effect a valid certificate of qualification issued to him by the director within the previous two calendar years.

11907. A certificate of qualification shall not be issued to the holder of an apprentice certificate until he has served as an apprentice under a certificate issued pursuant to this chapter for one year and until he presents to the director satisfactory documentary proof consisting of a certified statement by a licensed agricultural aircraft operator of his completion of not less than 150 hours of operation of fixed-wing aircraft or 50 hours of operation of nonfixed-wing aircraft within the past two calendar years in agricultural pest control activities.

11908. Before an apprentice certificate may be issued, the applicant shall pass an examination to demonstrate to the director his ability to conduct the specific pest control operations which are listed in his application. A successful candidate for an apprentice certificate may conduct only the specific kinds of pest control operations in which he is found qualified. The pest control operations for which an applicant qualifies shall be listed on his apprentice certificate.

11909. The applicant for an apprentice certificate shall also satisfy the director, through documentary evidence or other suitable information, that he shall be both:

(a) Employed by a person that holds a license currently in effect.

(b) Employed under the direct and personal supervision of a person that holds a valid certificate of qualification.

11910. It is unlawful for the holder of an apprentice certificate to conduct pest control operations in accordance with the provisions of his certificate unless he is employed under the direct and personal supervision of a person that holds a valid certificate of qualification.

11911. The director may refuse to issue a certificate to, or renew the certificate of, any pilot, and he may revoke or suspend the certificate of any pilot if, after a hearing, he is satisfied that any of the following is true:

(a) The pilot is not qualified to conduct pest control operations.

(b) The pilot has violated this division, or any regulation issued pursuant to it, or has not complied with any lawful order of the commissioner or the director.

11912. Every certificate shall expire on the last day of the calendar year for which it is issued. A certificate may be renewed upon application to the director, accompanied by a renewal fee of fifteen dollars ($15), within the calendar year next following the date of expiration.

11913. Notwithstanding any other provision of this article, if the holder of a valid certificate of qualification or a valid apprentice certificate shall be called to active duty as a member of the armed forces of the United States of America, the holder, upon the termination of such active duty, is entitled to renewal of such certificate, if he does all of the following:

(a) Makes application to the director.

(b) Pays the renewal fee.

(c) Demonstrates to the director his ability to conduct pest control operations and his knowledge of the nature and effect of materials which are used in pest control.

Article 2. Financial Responsibility

11931. As used in this article:

(a) "Judgment" means a final judgment of any court of competent jurisdiction in this or any other state, or of the United States, against a person as defendant upon a cause of action which arises out of any pest control operation.

(b) "Operator" means any person that is required to be licensed pursuant to this division who is authorized to apply any pest control material or substance by dusting, spraying, or any other manner whereby such material or substance is applied through the medium of aircraft.

(c) "Pest control operation" means the application of any pest control material or substance by an operator.

11932. For the purposes of this article:

(a) A judgment is satisfied when twenty-five thousand dollars ($25,000) has been credited upon any judgment in excess of that amount which arises out of any one accident or occurrence.

(b) A deposit of bond or other obligation for the payment of which the full faith and credit of the United States or of this state is pledged is considered a deposit of money.

11933 The director shall suspend the license of any operator upon receiving a copy of a judgment and a certificate of facts relative to such judgment, upon a form that is provided by the director, which indicate that the operator has not for a period of 30 days satisfied a final judgment rendered against him.

11934. The suspension shall remain in effect and no license shall be issued to the operator unless and until the judgment is satisfied, or the operator submits to the director proof of his financial ability to respond in damages pursuant to the judgment.

11935. Proof of such financial responsibility may be made by furnishing security in an amount not less than twenty-five thousand dollars ($25,000). The security may consist of any of the following:

(a) A deposit of money.

(b) A surety bond in favor of any person that may suffer damage by reason of any pest control operation by the operator which is issued by a corporate surety company that is qualified and authorized to do business in this state.

(c) An insurance policy which insures the operator against liability for damages pursuant to the judgment.

11936. If the security which is required by Section 11934 is diminished in amount by reason of any recovery against it, the security shall be replenished so that it amounts to not less than twenty-five thousand dollars ($25,000).

11937. Upon the expiration of 30 days after any judgment becomes final, which is not stayed or satisfied in any action which results in a judgment for damages, the clerk of a court, or the judge of a court which has no clerk, shall forward to the director a certified copy of the judgment or a certified copy of the docket entries in the action, and a certificate of facts relative to such judgment, on a form which is provided by the director.

11938. Any person whose license has been suspended, is about to be suspended, or becomes subject to suspension pursuant to this article, may relieve himself from the suspension by filing with the director an affidavit which states all of the following:

(a) That at the time of the incident upon which the judgment was rendered he was insured.

(b) That the insurer is liable to pay the judgment.

(c) The reason, if known, why the insurance company has not paid the judgment.

11939. The person that files the affidavit pursuant to Section 11938 shall also file the original policy of insurance or a certified copy of the policy, if available, and such other documents as the director may require to show that the loss, injury, or damage for which the judgment was rendered, was covered by the policy of insurance.

11940. If the director is satisfied from the papers which are filed pursuant to Sections 11938 and 11939 that the insurer was authorized to issue the policy of insurance in this state at the time of issuing the policy and that the insurer is liable to pay the judgment, at least to the extent and for the amounts which are provided in this article, the director shall not suspend the license or, if the license has already been suspended, he shall reinstate it.

DIVISION 7. AGRICULTURAL CHEMICALS, LIVESTOCK REMEDIES, AND COMMERCIAL FEEDS

CHAPTER 1. PRODUCE CARRYING SPRAY RESIDUE

Article 1. Definitions

12501. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

12502. "Food" means any article which is used for food or drink for man or any other animal, or for a component of any such article.

12503. "Pesticide chemical" means any substance that is used in the production, storage, or transportation of produce which is an "economic poison" as defined in Section 12753.

12504. "Produce" means any food in its raw or natural state which is in such form as to indicate that it is intended for consumer use without any or further processing.

12505. "Spray residue" means any pesticide chemical which is added to produce.

Article 2. General Provisions

12531. The director may adopt such regulations as are reasonably necessary to carry out this chapter.

12532. Any money which is received by the director pursuant to this chapter shall be paid into the State Treasury to the credit of the Department of Agriculture Fund to be expended as provided in Section 11513.

12533. Nothing in this chapter repeals or amends any of the provisions of Chapter 3 (commencing with Section 26450), Division 21 of the Health and Safety Code.

Article 3. Permissible Tolerances

12561. The director by regulation may establish permissible tolerances for any pesticide chemical in or on produce if he finds each of the following:

(a) The pesticide chemical is useful for the production and marketing of the produce.

(b) The presence of the pesticide chemical as spray residue in quantities within the tolerances so established is not deleterious to the health of man or animals.

12562. The director may exempt any pesticide chemical from the requirement of a tolerance if he finds that the pesticide chemical may safely be used without a tolerance.

12563. The director may establish the tolerance for any pesticide chemical on produce at zero if he finds that a greater tolerance is not justified.

12564. Until a different permissible tolerance is established by regulation of the director pursuant to this chapter, the permissible tolerances for fresh and dried fruits, vegetables, hay, fodder, or feedstuffs are as follows:

(a) Fluorine, 7 parts per million.

(b) Arsenic, expressed as arsenic trioxide, 3.5 parts per million.

(c) Lead, 7 parts per million.

(d) Dichloro-diphenyl-trichloroethane (DDT), 7 parts per million.

12565. If a tolerance for a pesticide chemical in or on produce is established pursuant to any law of the United States, the director may review the tolerance, and if he finds that it is in accordance with the standards and provisions of this chapter, he may establish a like tolerance pursuant to this chapter.

Article 4. Inspection

12581. The director may enter every place within the state where any produce is grown, processed, packed, stored, shipped, transported, delivered for shipment, or sold, and inspect all produce which is found in such place or which is in transit.

Article 5. Seizure

12601. The director may seize and hold any lot of produce which carries or shows indication of spray residue or other added deleterious ingredients.

12602. If the director seizes any lot of produce, he shall issue to the owner or bailee a hold order or notice. He may affix to the lot a warning tag which states that the lot is so held.

12603. Any lot of produce for which a hold order or notice is issued shall be held by the owner or bailee of the produce

and shall not be disturbed or moved from the place where it is, except under the specific direction of the director, pending final disposition pursuant to this chapter.

This does not prevent the owner or bailee from inspecting any produce so seized, nor from taking therefrom, in the presence of a person designated by the director, a reasonable sample for evidence.

12604. Any lot of produce which is seized and held pursuant to this article, unless previously analyzed by the director, shall be sampled and analyzed within 24 hours after the seizure for the purpose of determining the amount of spray residue on it. The owner or bailee of the produce shall be immediately notified in person or by telegram by the director that the analysis of the sample shows that the lot of produce does or does not carry spray residue or other added deleterious ingredients in excess of the maximum quantity or permissible tolerance which is established pursuant to this chapter.

12605. Upon the demand of the owner or bailee at or prior to the time of the sampling by the director, the sample which is drawn shall be divided into two approximately equal parts, one part of which shall be sealed and left with the owner or bailee and one part taken for analysis by the director.

12606. If the seized and held lot, as determined by the director's chemical analysis, does not carry spray residue in excess of any maximum which is provided by this chapter or in excess of a permissible tolerance, the director shall forthwith release the seized and held lot from the seizure and remove the hold order or tag.

12607. If the seized and held lot of produce is found to carry spray residue in excess of any maximum which is provided by this chapter or in excess of a permissible tolerance, the director shall, upon request of the owner, permit the lot of produce to be reconditioned or disposed of for byproducts purposes.

12608. Upon demand of the owner or bailee for permission to remove the produce for reconditioning or use for byproducts, the director shall release the produce to the custody of the agricultural commissioner of any county which is designated by the owner or bailee if the commissioner advises the director that facilities for reconditioning the produce or for converting it into byproducts are available in the county and that the commissioner will supervise the reconditioning or conversion into byproducts of the lot if it is released.

12609. The produce after reconditioning is subject to all the provisions of this chapter pending its final release by the director pursuant to Section 12606.

12610. If the lot of produce which is seized and held is found to carry excess spray residue, the owner or bailee of the lot may appeal the result of the examination to the director by letter, telegram, or other writing, within three days of the

notice to the owner or bailee which is provided for in Section 12604.

12611. Upon receipt of an appeal by the owner or bailee, the director shall, after reasonable notice to the owner, if known, or, if not known, to the bailee, take a further sample and submit it under an individual lot number to the headquarters laboratory of the department at Sacramento for an appeal chemical analysis.

12612. The director shall permit the owner to be present in person or by his representative at the taking of the sample to be submitted for the appeal chemical analysis. The cost of the sampling and analysis shall be at the expense of the owner or bailee. The findings from the appeal chemical analysis are binding on both parties.

12613. After seizure by the director pursuant to this chapter of any lot of produce upon which an appeal analysis is to be made, the director upon request shall permit the owner or bailee to move the produce to a specified commercial cold storage warehouse which is suited for preserving it against deterioration. The storage is subject, however, to the terms of any hold order or notice issued pursuant to this article.

12614. If the appeal analysis shows that the lot of produce carries spray residue in excess of any maximum which is provided in this chapter or in excess of a permissible tolerance, the lot of produce may be disposed of pursuant to Sections 12607, 12608, and 12609.

12615. If the appeal analysis shows that the lot of produce does not carry spray residue in excess of any maximum which is provided by this chapter, or in excess of a permissible tolerance, the director shall forthwith release the lot from the seizure and remove the hold order or tag.

Article 6. Abatement as Public Nuisance

12641. As used in this article, "nuisance" means the public nuisance which is specified in Section 12642.

12642. Any lot of produce which is found to carry spray residue in excess of any maximum which is provided in this chapter, or in excess of a permissible tolerance, together with its containers, is a public nuisance, and if not disposed of pursuant to Article 5 (commencing with Section 12601) of this chapter, is subject to disposal on complaint of the director to a court of competent jurisdiction.

12643. The district attorney of the county in which the nuisance is found, on the relation of the director, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent the nuisance.

12644. Upon judgment and by order of the court, the nuisance shall be condemned and destroyed in the manner directed by the court, or denatured or otherwise processed, or released upon such conditions as the court in its discretion may impose to insure that the nuisance shall be abated.

12645. If the owner fails to comply with the order of the court within the time which is specified in the order, the court may order the disposal or sale of the produce or containers which are a nuisance, under such terms and conditions as the court may prescribe, by the director, or by the sheriff, marshal, or constable.

12646. If the court orders the sale of any of the produce or containers which can be salvaged, the costs of disposal shall be deducted from the proceeds of sale and the balance paid into court for the owner.

12647. In actions which arise pursuant to this article:

(a) Municipal courts shall have original jurisdiction where the value of the property seized amounts to three thousand dollars ($3,000) or less.

(b) Justice courts shall have original jurisdiction where the value amounts to five hundred dollars ($500) or less.

Article 7. Violations

12671. It is unlawful for any person to pack, ship, or sell any produce that carries spray residue in excess of the permissible tolerance which is established by the director pursuant to this chapter.

Chapter 2. Economic Poisons

Article 1. Definitions

12751. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

12752. "Defoliating" includes killing or artificially accelerating the drying of plant tissues, with or without causing abscission.

12753. "Economic poison" includes any of the following:

(a) Any spray adjuvant.

(b) Any substance, or mixture of substances which is intended to be used for defoliating plants, regulating plant growth, or for preventing, destroying, repelling, or mitigating any and all insects, fungi, bacteria, weeds, rodents, or predatory animals or any other form of plant or animal life which is, or which the director may declare to be, a pest, which may infest or be detrimental to vegetation, man, animals or households, or be present in any environment whatsoever.

12754. "Insect" means any animal within the class of animals which are known as "Insecta" or any similar animal such as a centipede, spider, mite, tick, or louse.

12755 "Registrant" means a person that has registered an economic poison and has obtained a certificate of registration or license from the department.

12756. "Regulating plant growth" includes, but is not limited to, the use of any hormone, auxin, enzyme, or other ma-

terial for reducing preharvest drop of fruit or the use of any material for promoting rooting of cuttings.

12757. "Rodent" means all members of the order Rodentia and all rabbits and hares.

12758. "Spray adjuvant" means any wetting agent, spreading agent, deposit builder, adhesive, emulsifying agent, deflocculating agent, water modifier, or similar agent, with or without toxic properties of its own, which is intended to be used with another economic poison as an aid to the application or effect of the other economic poison, and sold in a package that is separate from that of the economic poison other than a spray adjuvant with which it is to be used.

12759. "Weed" means any plant which grows where not wanted.

Article 2. General Provisions

12781. The director may adopt regulations which are reasonably necessary to carry out this chapter.

12782. A copy of the regulations which are adopted by the director pursuant to this chapter shall be mailed to each registrant promptly upon promulgation of the regulation. The failure to receive such copy is no defense to a violation of any regulation.

12783. Any person that is charged with the enforcement or execution of any of the provisions of this chapter shall not be directly or indirectly interested in the sale, manufacture, or distribution of any economic poison.

12784. Any money which is received by the director pursuant to this chapter shall be paid into the State Treasury to the credit of the Department of Agriculture Fund to be expended as provided in Section 11513.

Article 3. Exemptions

12801. This chapter does not apply to any preparation, drug, or chemical which is intended to be used or sold solely for medicinal use by humans, or for toilet purposes, or to commercial feeding stuffs as defined in Section 14902.

12802. It is not a violation of this chapter for:

(a) A person that is engaged in the business of farming, that does not manufacture or sell economic poisons, to accommodate his neighbors by furnishing and applying any registered economic poison to any tree or plant for them, without having obtained the license or having become a registrant pursuant to this chapter.

(b) A person that holds a valid agricultural pest control license pursuant to Division 6 (commencing with Section 11401) of this code, that does not manufacture, deal in, or sell economic poisons, except for use in connection with his own agricultural pest control service work, to use registered economic poisons in his own business without having obtained the license or having become a registrant pursuant to this chapter.

For the purposes of this section, the manufacturing of, or dealing in, economic poisons does not include the mixing or diluting of any registered economic poison in accordance with directions which are placed upon its container by a registrant or in conformance with established custom or practice.

Article 4. License and Registration

12811. Every manufacturer of, importer of, or dealer in any economic poison, except a person that sells any raw material to a manufacturer of any economic poison or a dealer or agent that sells any economic poison which has been registered by the manufacturer or wholesaler, shall obtain a license from the department before the economic poison is offered for sale.

12812. Except as otherwise provided in Section 12813, the annual fee for a license is one hundred dollars ($100), payable to the director. The payment of the fee shall permit the licensee to manufacture, import, or deal in 10 variously labeled economic poisons of varying name or composition. For each variety over 10, an additional fee of ten dollars ($10) shall be paid.

12813. Any person that manufactures economic poisons which do not exceed a total retail value of five hundred dollars ($500) per year shall pay an annual fee of twenty-five dollars ($25) to the director. The payment of the fee shall permit the licensee to manufacture, import, or deal in two variously labeled economic poisons of varying name or composition. For each variety over two, an additional fee of ten dollars ($10) shall be paid.

12814. Any county, state, or federal officer or employee who sells any economic poison at cost is not required to pay any fee which is imposed by this chapter.

12815. If a manufacturer, importer, or dealer in economic poisons that applies for registration of economic poisons and for a license has complied with this chapter and the regulations which are adopted pursuant to it, the director shall register each economic poison that is sought to be registered and issue a license to the applicant which authorizes the manufacure and sale of the economic poison in this state.

12816. If the director finds that registration cannot be permitted, or that the license cannot be issued, due to noncompliance with this chapter or the regulations which are adopted pursuant to it, he may, after reasonable notice, call a hearing for the purpose of determining whether the application shall be reconsidered or denied.

12817. Every license and registration expires on June 30th of each year and may be renewed after application in the manner which is provided for registration and licensing.

12818. If renewal is not applied for within one calendar month after the expiration of a license or registration, there

shall be added to the fee a penalty of 10 percent and an additional penalty of 5 percent of the original amount due, for each succeeding calendar month. The total penalty shall not, however, exceed 50 percent of the original amount due.

12819. A penalty shall not be collected if the person that makes application for renewal of registration and license makes an affidavit that no business was done during the period of nonregistration.

12820. The payment of any renewal fee or penalty is not a bar to any prosecution for doing business without proper registry.

12821. Each applicant for a license shall also file a statement of every brand, trademark, and kind of economic poison which the applicant intends to manufacture or sell, the correct name and percentage of each active ingredient in it and the total percentage of inert ingredients which are contained in it. The director, whenever he deems it necessary for the effective administration of this chapter, may require the submission of the complete formula for the economic poison.

12822. A supplemental application for registration of any additional economic poison may be submitted at any time without payment of the penalty which is required by Section 12818.

12823. A change in the name or percentage, or both, of an inert ingredient is not a change in composition of the economic poison which requires a new registration unless the change in inert material results in a change in the use or application of the economic poison.

12824. The director may, after hearing, cancel the registration of, or refuse to register, any economic poison:

(a) Which is of little or no value for the purpose for which it is intended, or which is detrimental to vegetation, except weeds, to domestic animals, or to the public health and safety when properly used, and may require such practical demonstration as may be necessary to determine the facts.

(b) Concerning which any false or misleading statement is made or implied by the registrant or his agent, either verbally or in writing or in the form of any advertising literature.

12825. The director may cancel the license of, or, refuse to license any manufacturer, importer, or dealer in any economic poison that repeatedly violates any of the provisions of this chapter or the regulations of the director.

The proceedings shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted therein.

12826. Action by the director pursuant to Sections 12824 and 12825 is not a condition precedent to the institution of any action to prosecute a violation of this chapter.

Article 5. Labeling and Warranty

12851. The registrant of any economic poison shall attach to each separate lot, and each separate, finished, sealed, or closed container or package of economic poison which he intends to sell within this state, a plainly printed label, that states all of the following:

(a) The name, brand, or trademark, if any, under which the economic poison is sold.

(b) The name and address of the registered manufacturer, importer, or vendor.

12852. The registrant of any economic poison which is sold or delivered to a consumer in this state shall furnish printed directions for use, and dilution if any, upon the label, or shall inclose the printed directions in each container or package of the economic poison. The printed directions for use shall not be required if the economic poison, pursuant to established local custom, is to be used in its original form as sold, without dilution or further preparation for use.

12853. A registrant of economic poisons may print upon the label of any sealed or closed container or package of economic poison which he intends to sell within this state, or upon the label of any opened lot from which sales have been authorized by the director, such limitations of warranty with respect to the use of the economic poison, as the registrant may consider proper.

12854. No such limitations of warranty by the seller shall exclude or waive either of the following implied warranties:

(a) That the economic poison corresponds to all claims and descriptions which the registrant has made in respect to it in print.

(b) That the economic poison is reasonably fit for use for any purpose for which it is intended according to any printed statement of the registrant.

12855. Except as otherwise provided in this article, the registrant is not liable for any injury or damage which is suffered solely by reason of any of the following:

(a) The use of the economic poison for a purpose which is not indicated by the label.

(b) The use of the economic poison contrary to the printed directions of the registrant or seller.

(c) The breach of any warranty by the registrant which is not expressly printed on the label.

12856. Except as otherwise provided in Section 12857, an economic poison shall not be sold unless it is in a registrant's sealed or closed container or package

12857. The director may, pursuant to regulations prescribed by him, authorize sales of economic poisons to be made out of a registrant's opened but properly labeled lot, container, or package. The director shall serve notice of his proposed action by depositing a copy of it in a United States post

office, inclosed in a sealed envelope with postage prepaid and addressed to each economic poisons registrant at his last address on file with the Division of Standardization and Inspection of the department. He shall allow 15 days during which time any protest may be filed.

12858. The statement of ingredients in any economic poison which is intended and sold for internal administration to animals may be given in terms of dosage in lieu of percentage by weight as required by Article 4 (commencing with Section 12811) and Article 6 (commencing with Section 12881) of this chapter.

Article 6. Misbranding

12881. An economic poison is misbranded in any of the following cases:

(a) The package or label bears any false or misleading statement, design, or device regarding such article or any ingredient or substance which is contained in it.

(b) The package or label is falsely branded as to the place of manufacture or production of the economic poison.

(c) It is an imitation of, or offered for sale under the name of, another article.

(d) It is labeled or branded so as to deceive or mislead the purchaser.

12882. An economic poison is also misbranded in any of the following cases:

(a) The contents of the package as originally put up have been removed in whole or in part and other contents placed in such package.

(b) The contents of the package are of a quality below that of the guarantee on the label or on the application for registration of the economic poison or of the analysis of the representative sample delivered in connection with the application for registration of the economic poison.

(c) If the contents of any package of an economic poison is stated in terms of weight or measure, and the weight or measure is not plainly and correctly stated on the outside of the package.

(d) The economic poison contains arsenic in any form and the label fails to state, in addition to one of the options required by Section 12883, the percentages of total and water-soluble arsenic, each calculated as elemental arsenic.

(e) The label does not contain a warning or caution statement which may be necessary, and if complied with is adequate, to prevent injury to living man and other vertebrate animals, vegetation, and useful invertebrate animals.

12883. Except as otherwise provided in Section 12884 economic poison is also misbranded when the label fails to state one of the following:

(a) The name and percentage of each active ingredient, together with the total percentage of the inert ingredients, in the economic poison.

(b) The name of each active ingredient, together with the name of each and the total percentage of the inert ingredients, if there are any, in the economic poison.

An economic poison which is sold only as a spray adjuvant is not misbranded if the total percentage of the constituents ineffective as a spray adjuvant is stated on the label without mention of the terms "active ingredient" or "inert ingredient" in lieu of one of the options required by this section.

12884. If the preparation is highly toxic to man, as determined by regulations of the director, an economic poison is misbranded if the label fails to state the name and percentage of each active ingredient together with the total percentage of the inert ingredients in the economic poison.

12885. In addition to the other provisions of this article, a spray adjuvant is misbranded if the label fails to state the type or function and the names of the principal functioning agents. If more than three functioning agents are present, only the three principal ones need be named.

Article 7. Adulteration

12911. An economic poison is adulterated in any of the following cases:

(a) Its strength or purity falls below the standard or quality which it is represented to have.

(b) Any ingredient which is necessary to its effectiveness has been wholly or in part abstracted or omitted in its manufacture, or other materials substituted for such ingredient.

(c) It is intended for use on vegetation and contains any substance which is seriously injurious to vegetation, except weeds, if used according to the directions that are furnished with it.

Article 8. Analysis

12931. The director shall take samples of economic poisons, make analyses or examinations of them, and make such investigations as are necessary for the full enforcement of this chapter.

12932. The director shall periodically, at least annually, print and distribute the results of examinations or chemical analyses of official samples of economic poisons which are taken by him, and such additional information as he deems advisable.

12933. The director may, upon the receipt of a sample of any economic poison, accompanied by the required fee, make an analysis, examination, or test of it. He shall inform the sender of the results of such analysis, examination, or test.

12934. The schedule of fees that are required for analyses, examinations or tests shall be fixed by the director.

Article 9. Seizure

12961. The director may seize and quarantine any economic poison which is adulterated, or misbranded, or detrimental to agriculture or to the public health, or which is otherwise not in conformity with any provision of this chapter.

Article 10. Recommendations and Usage

12971. It is unlawful for any person to make any recommendation regarding the agricultural use of an economic poison, other than the recommendations or directions on the label or in supplementary printed directions, either in connection with a sale of an economic poison or in connection with an advisory service for hire or for a fee, unless such recommendation regarding the use of the economic poison is given in writing to the customer. The written recommendation shall be delivered not later than the time of delivery of the material to the customer, or the time of use by the customer. A copy of the written recommendation shall be retained on file by the party making the recommendation for a period of a year. No written recommendation shall be in conflict with the label or with supplementary printed directions delivered therewith unless authorized by the director or the commissioner.

12972. Unless otherwise expressly authorized by the director or the commissioner, the use of any economic poison by any person in pest control operations shall be in such a manner as to prevent any substantial drift to other crops and shall not conflict with the manufacturer's registered label or with supplementary printed directions which are delivered with the economic poison and any additional limitations applicable to local conditions which are contained in the conditions of any permit or the written recommendations that are issued by the director or commissioner.

Article 11. Violations

12991. It is unlawful for any person, by himself, or through another, in connection with the sale of any substance or mixture of substances included within the scope of this chapter, to do any of the following:

(a) Make any material or substantial misrepresentation.

(b) Make any false promises of a character likely to influence, induce or deceive.

(c) Engage in illegitimate business or dishonest dealing.

(d) Cause to be published or distributed any false or misleading literature, or cause to be displayed any false or misleading advertisement.

12992. It is unlawful for any person to sell any adulterated or misbranded economic poison.

In any prosecution of any agent or dealer under this section it is a complete defense to prove that the adulterated

or misbranded economic poison which is the basis of the prosecution was guaranteed by the party from whom the agent or dealer purchased it to be not adulterated or misbranded.

12993. It is unlawful for any person to manufacture, deliver, or sell any economic poison or any substance or mixture of substances that is represented to be an economic poison, or to retail any formula for an economic poison in conjunction with the sale or gift of materials which are represented to be the essential ingredients necessary to constitute an economic poison, without a license or which is not registered pursuant to this chapter. This section, however, does not apply to any economic poison product of a registrant, which is manufactured solely for export outside this state and which is so exported.

12994. It is unlawful for any person to transport, destroy, or dispose of any quarantined economic poison, unless such person has secured a permit from the director.

CHAPTER 3. INJURIOUS MATERIALS

Article 1. Generally

14001. As used in this article, "injurious material" means any material which the director, pursuant to Section 14005, finds and determines is injurious.

14002. This chapter does not apply to any agency of the United States or of this state, or to any officer, agent, or employee of any such agency who is acting within the scope of his authority, while he is engaged in, conducting, or supervising research on any injurious material.

14003. This article does not relieve any person from liability for any damage to the person or property of another person which is caused by the use of any injurious material.

14004. The director, and the commissioner of each county under the direction and supervision of the director, shall enforce this chapter and the regulations issued pursuant to it.

14005. The director, after investigation and hearing, shall adopt regulations which govern the application, in pest control or other agricultural operations, of any material which he finds and determines is injurious to any person, animal, or crop, except the pest or vegetation which it is intended to destroy.

14006. The regulations shall prescribe the time when, and the conditions under which, an injurious material may be used in different areas of the state. They may provide that an injurious material shall be used only under permit of the commissioner or under the direct supervision of the commissioner, subject to any of the following limitations:

(a) In certain areas.

(b) Under certain conditions.

(c) When used in excess of certain quantities or concentrations.

14007. Every permit which is issued under the regulations adopted pursuant to this chapter is conditioned upon compliance with the regulations and upon such other specified conditions as may be deemed necessary to avoid injury.

14008. Any permit may be refused, revoked, or suspended for violation of any of the conditions of the permit, or of a previous permit, or for violation of any provision of this chapter or of the regulations which are issued pursuant to it.

14009. Any interested person, upon request, is entitled to a hearing before the director to review the action of a commissioner in issuing, refusing, revoking, or suspending a permit, or in imposing any condition which is not expressly specified in the applicable regulations. The proceedings for the hearing shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The provisions of Sections 11505 and 11506 of the Government Code shall not, however, apply to the proceedings, and the statement of issues or accusation, as the case may be, shall be delivered or mailed to the parties as provided in Section 11509 of the Government Code.

14010. It is unlawful for any person to sell or deliver any injurious material to any person that is required by the regulations, which are adopted by the director, to have a permit to use such injurious material unless such person, or his agent to whom delivery is made, signs a written statement, in a form which is prescribed by the department, that the person holds a valid permit to use the kind and quantity of such injurious material which is delivered.

14011. It is unlawful for any person to apply any injurious material for which regulations have been adopted except as provided in the regulations which are adopted by the director.

Article 2. 2,4-D and Other Herbicides

14031. As used in this article, "2,4-D" means any form of 2,4-dichlorophenoxyacetic acid.

14032. Except as otherwise provided in this article and in the regulations which are adopted by the director, it is unlawful for any person to use any form of 2,4-D or any other herbicide which the director finds and determines, after hearing, is injurious to any crop.

14033. The director, after investigation and hearing, shall adopt regulations which govern the use of 2,4-D and any other herbicide which he finds and determines is injurious to any crop that is being grown in any area of the state. The regulations of the director may prescribe the time when, and the conditions under which, an injurious herbicide may be used in different areas of the state. They may provide that an injurious herbicide shall be used only under permit of the commis-

sioner or under the direct supervision of the commissioner, subject to any of the following limitations:

(a) In certain areas.

(b) In excess of certain quantities or concentrations.

14034. This article does not relieve any person from liability for any damage to the property of another person which is caused by the use of any herbicide which is named in the regulations which are adopted by the director.

14035. It is unlawful for any person to sell or deliver any herbicide for which regulations have been adopted by the director to any person that is required by such regulations to have a permit to use such herbicide unless such person, or his agent to whom delivery is made, signs a written statement, in a form which is prescribed by the department, that such person holds a valid permit to use the kind and quantity of the herbicide which is delivered.

Article 3. Compound 1080

14061. As used in this article, "Compound 1080" means sodium fluoroacetate or any preparation of sodium fluoroacetate.

14062. Except as otherwise provided in this article, it is unlawful for any person to sell, use, or possess any Compound 1080.

14063. Subject to regulations of the director, any of the following persons may sell, use, or possess Compound 1080 for the purposes or uses which are specified:

(a) Any federal, state, county, or municipal officer or employee, in his official capacity, or any person under the immediate supervision of such officer or employee, may possess Compound 1080 for use for pest control purposes.

(b) Any research or chemical laboratory may possess Compound 1080 for use for the purposes of such laboratory.

(c) Any person duly licensed as a structural pest control operator under Chapter 14 (commencing with Section 8500), Division 3 of the Business and Professions Code, may possess Compound 1080 for use in his business.

(d) Any wholesaler or jobber of any economic poison may sell Compound 1080 to any person included within the above classifications, or for export.

Article 4. Thallium

14091. As used in this article, "thallium" includes any preparation of thallium or of the salts of thallium.

14092 Except as otherwise provided in this article, it is unlawful for any person to sell, use, or possess thallium.

14093. Any federal, state, county, or municipal officer or employee, in his official capacity, or any person under the im-

mediate supervision of such officer or employee, may possess thallium for use for pest control purposes.

14094. Any licensed physician, surgeon, pharmacist, or veterinarian may possess thallium for use in his profession.

14095. Any metallurgist or manufacturer of any alloy of which thallium is a component part may possess thallium for laboratory use or manufacture of alloys.

14096. Any person that operates a research or chemical laboratory may possess thallium for use for the purposes of such laboratory.

14097. Any registered manufacturer of ant poison may manufacture and sell, and any dealer in ant poison may sell, ant poison which contains not more than 1 percent of thallium, expressed as metallic thallium, prepared, packaged, and sold in accordance with such regulations as the director may deem necessary to protect the public health.

14098. Any wholesaler or jobber of any economic poison may sell thallium to any person that is authorized to possess it pursuant to Sections 14093 to 14097, inclusive, or for export.

CHAPTER 4. LIVESTOCK, POULTRY, AND BEE REMEDIES

Article 1. Definitions

14201. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

14202. "Drug" means any of the following substances:

(a) Any substance which is intended for use in the diagnosis, cure, mitigation, prevention, or treatment of disease.

(b) Any substance, except food and water, which is intended to affect the structure or function of the body of any livestock.

14203. "Hazardous remedy" means any livestock remedy which is sold in such form that it might be administered to humans, or any livestock remedy which, if improperly administered, may be dangerous to the health of livestock or to humans who consume products from such livestock. It includes all of the following:

(a) Arsenic compounds and preparations.

(b) Diethylstilbestrol and other substances which have a hormonelike action.

(c) Sulfanilamide or substitute sulfanilamides, except preparations for topical application.

(d) Antibiotic preparations, excepting those for topical application.

(e) Such other drugs and their preparations which the director determines are hazardous to the health of livestock or the public safety.

14204. "Label" includes written and graphic matter which is imprinted upon, or upon paper or other material affixed to, or accompanying, a container of a livestock remedy.

14205. "Livestock" includes all animals, poultry, and bees which are raised, kept, or used for profit. It does not include those species which are usually kept as pets, such as dogs, cats, and pet birds.

14206. "Livestock remedy" means any drug, combination of drugs, proprietary medicine, or combination of drugs and other ingredients which is prepared for administration to livestock orally, hypodermically, or otherwise.

14207. "Manufacturer" includes any person that is responsible for the placing of a livestock remedy on the market in this state.

14208. "Retailer" means any person that sells any livestock remedy at retail.

Article 2. General Provisions

14231. The director shall enforce this chapter and may make and enforce such regulations which relate to the manufacture and sale of livestock remedies as he may deem necessary to carry out this chapter.

14232. All money which is received under this chapter shall be paid into the Department of Agriculture Fund. Any money in the Department of Agriculture Fund which is derived under this chapter and Chapter 6 (commencing with Section 14901) of this division may be expended for the administration and enforcement of any of the provisions of such chapters, notwithstanding any other provision which limits the expenditure of any such money to the specific purposes or to the administration or enforcement of each of such chapters separately.

14233. The provisions of this chapter shall be controlling over those of any other provisions of law which are in conflict with them. No act or thing which is authorized or permitted by this chapter shall be in violation of any other provisions of law.

Article 3. Exemptions

14261. This chapter does not apply to any of the following:

(a) Any livestock remedy which is sold exclusively to, and used exclusively by, or under the direction of, a licensed veterinarian, nor to any livestock remedy which is compounded by a registered pharmacist upon the prescription of a licensed veterinarian

(b) Any drug or other preparation which is dispensed or compounded by a registered pharmacist at the request of the purchaser if such drug or preparation is sold at retail.

(c) Any commercial feeding stuffs which are subject to the provisions of Chapter 6 (commencing with Section 14901) of this division, irrespective of the presence in such commercial

feeding stuffs of any ingredients which otherwise would constitute a livestock remedy.

14262. This chapter also does not apply to any of the following:

(a) Any livestock remedy which is intended for, and which is used solely for, laboratory or experimental purposes.

(b) Any substance which is intended for, and which is used primarily as, a pesticide and which is registered as an economic poison under Chapter 2 (commencing with Section 12751) of this division.

(c) Any biological product which is manufactured under a license issued by the United States Department of Agriculture or the State Department of Public Health.

(d) Any drug which is required by federal law to be sold on prescription only.

Article 4. Registration

14281. A person shall not sell any livestock remedy in this state which is not registered pursuant to this chapter.

14282. The manufacturer of any livestock remedy shall apply to the director for registration of the livestock remedy.

14283. The application shall be in a form which is supplied by the director. It shall show all of the following:

(a) The name of the applicant and the address of his principal place of business.

(b) The name, brand, or trademark under which the livestock remedy is to be sold.

(c) The minimum net contents of each size and type of container in which the livestock remedy is to be sold at retail.

(d) The name of each active drug ingredient and the quantity or proportion of each such ingredient.

(e) A statement of each purpose for which the livestock remedy is to be used.

(f) A statement of the form in which the livestock remedy is to be administered, the method of administration, and, if the method of administration involves the use of any special device which is supplied with such remedy, a description of such device.

(g) A statement of the amount and frequency of the dosage which is to be recommended.

(h) Such other information and data as the director may require.

14284. The application shall also contain a detailed description, or be accompanied by a copy, of the label of each type and size of container in which the livestock remedy is to be sold at retail.

14285 The label shall contain all of the following:

(a) The name, brand, or trademark of the livestock remedy.

(b) The name of the applicant and his principal address.

(c) The minimum net contents of the container.

(d) A statement of the disease or ailments of livestock which it is claimed that the livestock remedy will alleviate or cure.

(e) Adequate instructions as to use and administration and adequate warnings against improper use and administration of the livestock remedy.

(f) The name of each active drug ingredient.

(g) A statement which clearly indicates that the product is not for human use.

(h) If the livestock remedy is a hazardous remedy, the word "hazardous" in conspicuous letters.

14286. If it is proposed that any instructions for use, other than those on the label, shall accompany containers of the livestock remedy which are sold at retail, a copy of such instructions shall accompany the application for registration of the livestock remedy.

14287. The director shall examine and consider the application together with all material, data, and information which accompanies it.

14288. The director shall refuse to register a livestock remedy if he finds any of the following is true of the remedy:

(a) It is of little or no value for the purpose for which it is intended to be used.

(b) It is dangerous to the health of livestock if used in accordance with the instructions.

(c) The instructions for use do not contain adequate warnings against use in those conditions, whether pathological or normal, under which its use may be dangerous to the health of livestock, or against unsafe dosage, unsafe duration of use, or unsafe methods of administration.

(d) If the application and the accompanying material, data, and information do not comply with the requirements of this chapter or are insufficient to permit the director to make the determinations which are required by this section.

14289. If the livestock remedy is a hazardous remedy, the director shall also refuse registration if he finds that the instructions for use do not contain adequate and satisfactory directions as to the methods of handling, caring for, holding, or otherwise managing the animal or bird to which the remedy is administered so as to eliminate any danger to the health of any person who might consume food products which are derived from such animal or bird.

14290. The registration of a livestock remedy includes all of the following:

(a) Registration of the remedy and its ingredients.

(b) Registration of the label.

(c) Registration of the instructions for use.

(d) Registration of the special device, if any, for the administration of the livestock remedy.

14291. The fee for the registration of a livestock remedy is twenty-five dollars ($25). It shall accompany the application for registration. The fee is not refundable if the registration is refused.

14292. If registration is granted, the original fee covers the registration for the remainder of the then current calendar year in which registration is granted.

14293. The fee for the renewal of registration is fifteen dollars ($15) per year. It is payable on or before January 31st of each year. If it is not so paid, a penalty of five dollars ($5) shall be added to the fee.

14294. The director may quarantine and remove from sale any livestock remedy which is not registered pursuant to this chapter or any livestock remedy which does not conform in all respects with its registration.

14295. The director shall have access at all reasonable hours to all premises which are used in the manufacture, sale, or storage of any livestock remedy, or where livestock remedies are mixed in feed for administering to livestock. He may take samples and make such other investigations as are necessary to carry out this chapter and the regulations which are adopted pursuant to it.

14296. The director may revoke the registration of any livestock remedy if he finds, from representative samples, that the remedy as offered for sale fails to conform to its registration. The director may allow reasonable tolerances within which such samples may vary from the registration.

Article 5. Retail Licenses for Hazardous Remedies

14321. A person shall not sell any hazardous remedy in this state at retail unless he holds a license to do so issued pursuant to this chapter.

14322. Any person may file with the director an application for a license pursuant to this chapter. The application shall be on a form which is supplied by the director and shall contain such information as he may require.

14323. The application shall be accompanied by an application fee of fifteen dollars ($15). The fee is not refundable if the license is refused.

14324. If the license is issued, the application fee covers the license for the remainder of the current calendar year in which it is issued.

14325. The fee for the renewal of a license is fifteen dollars ($15) per year. It is payable on or before January 31st of each year. If it is not so paid, a penalty of five dollars ($5) shall be added to the fee.

14326. A separate license is required for each place of business at which any hazardous remedy is kept for sale, and for each mobile unit in which any such remedy is kept for sale.

14327. The director may make an examination of the facilities which are available to the applicant for the proper handling and storing of hazardous remedies and may limit the kinds or classes of such remedies that may be sold under a license to those which the applicant is equipped properly to handle and store.

14328. Each holder of a license under this chapter shall keep a record, in the manner and form prescribed by the director, of each sale of a hazardous remedy by the licensee.

14329. The record required pursuant to Section 14328 shall include all of the following:

(a) A statement of the kind and quantity of the hazardous remedy sold.

(b) The date of sale.

(c) The address of the purchaser.

(d) The signature of the purchaser.

14330. The director shall revoke a hazardous remedy lisense if he finds that the holder of such license has failed to keep the required record of sales of such remedies, or is not properly handling or storing such remedies.

Article 6. Violations

14351. It is unlawful for any person to sell any livestock remedy which is subject to any provision of this chapter unless the remedy is registered pursuant to this chapter.

14352. It is unlawful for any registrant to sell any livestock remedy which does not conform with its registration.

14353. It is unlawful for any person to administer any registered livestock remedy to any human being.

14354. It is unlawful for any person to sell any hazardous remedy unless such person has a license issued pursuant to this chapter.

14355. It is unlawful for any person to use or administer any registered livestock remedy except in accordance with the instructions for use which are supplied by the registrant.

14356. It is unlawful for the holder of a hazardous remedy license to sell a hazardous remedy without requiring the purchaser of the hazardous remedy to sign his name and write his address in the record of such sales.

14357. It is unlawful for any person to refuse to permit the entry into and inspection of any premises wherein any livestock remedy is manufactured or sold for the taking of samples of such remedy.

14358. It is unlawful for any person to sell any livestock remedy except in the container in which it is packaged by the manufacturer, or to sell any such remedy unless its package bears the label of the manufacturer.

14359. It is unlawful for any person to make any false or misleading representation which relates to any livestock remedy, whether such representation is communicated orally, graphically, pictorially, or otherwise.

Article 7. Penalties

14381. A violation of any provision of this chapter or of any regulation which is adopted by the director pursuant to this chapter is a misdemeanor.

Chapter 5. Fertilizing Materials

Article 1. Definitions

14501. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

14502. "Agricultural mineral" means any mineral substance, mixture of mineral substances, or mixture of mineral and organic substances, which contains less than 5 percent in available form of nitrogen, phosphorus pentoxide, or potassium oxide, singly, collectively, or in combination. It does not include sand and soil.

14503. "Auxiliary soil chemical" means any substance as defined in Section 14509, which comes within any of the following classes:

(a) Synthetic polyelectrolytes.

(b) Biocatalytic soil conditioners.

(c) Lignin or humus preparations.

(d) Wetting agents to promote penetration of irrigation water.

(e) Bacterial inoculants.

(f) Any similar products intended to be used for influencing soils.

14504. "Brand" means the commercial term under which a series of different fertilizing materials may be sold.

14505. "Brand name" means a coined or specific designation which is applied to an individual fertilizing material of a fixed composition and derivation.

14506. "Commercial fertilizer" means any substance, as defined in Section 14509, which contains 5 percent or more of nitrogen, available phosphorus pentoxide, or potassium oxide soluble in distilled water, singly, collectively or in combination. It does not include manure, hay, straw, peat, or leaf mold.

14507. "Manure" means the excreta of any domestic animal or domestic fowl which is not artificially mixed with any material except a material which has been used for bedding, sanitary, or feeding purposes for such an animal or fowl or for the preservation of the manure.

14508. "Soil amendment" means any substance, as defined in Section 14509, except a substance which is otherwise defined in this article. It includes all of the following:

(a) Hay.

(b) Straw.

(c) Peat.

(d) Leaf mold.

(e) Sand.

(f) Any mixture which is intended for use solely as a potting medium.

(g) Any mineral substance such as diatomite, vermiculite, perlite, pumice, or clay which is intended for use solely because of its physical nature and with no claim for chemical constituents.

14509. "Substance" means any material or mixture of materials which is intended to be used for promoting or stimulating the growth of plants, increasing the productiveness of plants, improving the quality of crops, or producing any chemical or physical change in the soil.

Article 2. General Provisions

14531. The director may adopt such regulations as are reasonably necessary to effectuate the purposes of this chapter. A copy of such regulations shall be mailed promptly upon adoption to each person that is registered pursuant to this chapter. The failure to receive the copy is no defense to a violation of the regulations.

Article 3. Exemptions

14541. Except as provided in Section 14566, this chapter does not apply to any of the following:

(a) Sales for export outside the state.

(b) Sales of agricultural minerals to any registered producer, manufacturer, importer, agent, or dealer in agricultural minerals.

(c) Sales of fertilizing materials to any registered producer, manufacturer, importer, agent, or dealer in commercial fertilizers.

The exemptions which are provided by this section do not relieve any registered person from the tax which is provided for in Article 7 (commencing with Section 14681) of this chapter if purchased fertilizing materials are used upon his own lands within this state.

Article 4. Labels

14551. Every lot, parcel, or package of commercial fertilizer and agricultural mineral which is sold within this state

shall have attached to it so as to be visible a plainly printed label or descriptive tag, which states all of the following:

(a) The name, brand, and trademark, if any, under which the commercial fertilizer or agricultural mineral is sold.

(b) The name and address of the registered producer, manufacturer, importer, or dealer.

(c) The place of manufacture or production.

(d) A chemical analysis, which states the percentages of every constituent of agricultural value claimed to be in the commercial fertilizer or agricultural mineral, and the materials from which all of the constituents are derived.

14552. The chemical analysis regarding any commercial fertilizer shall state the percentages which are represented to be in the commercial fertilizer of all of the following:

(a) Nitrogen, specifying each form in which it is present and the percentage of each form.

(b) Available phosphoric acid, expressed in terms of phosphorus pentoxide.

(c) Soluble potash, expressed in terms of postassium oxide.

14553. The chemical analysis of limestone, limerock, chalk, dolomite, marl, oyster shells, shells, and every other agricultural mineral the principal constituent of which is calcium carbonate shall state the percentage of calcium carbonate.

14554. The chemical analysis of burnt lime, quicklime, and every agricultural mineral the principal constituent of which is calcium oxide shall state the percentage of calcium oxide.

14555. The chemical analysis of hydrated lime, slaked lime, and every agricultural mineral the principal constituent of which is calcium hydroxide shall state the percentage of calcium hydroxide.

14556. The chemical analysis of any byproduct in the manufacture of sugar or acetylene, and every other agricultural mineral which is obtained as a byproduct, the principal constituent of which is a compound of calcium shall state the percentage of calcium in terms of calcium carbonate, calcium hydroxide, or of calcium oxide.

14557. The chemical analysis of gypsum, land plaster, plaster, and every agricultural mineral the principal constituent of which is calcium sulfate shall state the percentage of calcium sulfate. Calcium sulfate present in the form of gypsum may, however, be stated in terms of gypsum.

14558. The chemical analysis of sulfur, brimstone, and every agricultural mineral the principal ingredient of which is sulfur shall state the percentage of sulfur.

14559. The chemical analysis of phosphate rock, and every other agricultural mineral the principal constituent of which is calcium phosphate shall state the percentage of available phosphoric acid. If in addition a percentage of total phosphoric acid is stated, the percentage of insoluble phosphoric acid shall also be stated. The term and the percentage of available phosphoric acid shall be shown as prominently as any other terms and percentages on the tag.

14560. The chemical analysis regarding any mixture of two or more agricultural minerals shall state the percentage of each principal constituent in the manner prescribed by Sections 14553 to 14559, inclusive.

14561. The chemical analysis regarding any agricultural mineral which is not specifically mentioned in Sections 14553 to 14559, inclusive, shall state the percentage of every constituent which is claimed to be in the agricultural mineral in terms or equivalents which are prescribed by the director.

14562. A person shall not sell as a commercial fertilizer, or as an ingredient of a commercial fertilizer, any leather, hair, hoofs, horns, or wool waste, unless it is so treated as to make the nitrogen content available as plant food.

14563. A person shall not sell as a commercial fertilizer, or as an ingredient of a commercial fertilizer, any street sweepings, unless there is affixed to every lot, parcel, or package a label which states that it contains such substance.

14564. A person shall not sell any manure to which water or any material or substance has been artificially added, unless there is affixed to every lot or container which is delivered to any purchaser a statement of the fact that such artificial addition has been made.

14565. It is unlawful for any person to sell any commercial fertilizer or any agricultural mineral except in a lot which is properly labeled by, or in a package which is filled and labeled by, a registrant pursuant to this chapter.

14566. Any label or descriptive tag that is attached to a lot, parcel, or package of commercial fertilizer or agricultural mineral which states any of the things mentioned in Section 14551 is a warranty by the seller that attaches it, as to the things which are stated on it, in favor of the buyer and of each successive buyer that purchases the goods relying on it.

14567. Every registered producer, manufacturer, importer, agent, or dealer, that makes or sells any commercial fertilizer or agricultural mineral under a brand or a brand name, shall file a statement with the director, prior to issuance of registration in each year which states the brand or the brand name. He shall also file for the substance which is to be sold or manufactured under each brand name, or which is to be sold as an agricultural mineral, a statement of all of the following:

(a) The percentage of every constituent of agricultural value which is claimed to be in the commercial fertilizer or agricultural mineral.

(b) The materials from which each of the constituents is derived.

14568. Each applicant for a certificate of registration to sell any auxiliary soil chemical shall file a statement with the director, prior to issuance of registration in each year which states both:

(a) The brand, brand name, or name under which the auxiliary soil chemical is to be sold or manufactured.

(b) The percentage of every constituent of agricultural value which is claimed to be in the auxiliary soil chemical.

A proper statement of ingredients and directions for use shall be given on the label.

14569. The sale of any auxiliary soil chemical in any container or package except the registrant's sealed or closed container or package is prohibited.

Article 5. Analysis

14581. In determining the percentage of component parts of any substance for the purpose of proper labeling, registration, or determining compliance with representations, all analyses shall be made according to such method as may be determined by the director. The method determined by the director shall conform to the method, if any, agreed upon by the American Association of Official Analytical Chemists.

14582. The director shall at such times and to such extent as necessary for the full enforcement of this chapter, do all of the following:

(a) Take samples of any substance.

(b) Make analyses or examinations of any substance.

(c) Make investigations concerning the use, sale, adulteration, or misbranding of any substance.

14583. The director shall publish, at least annually, the results of examinations or chemical analyses of official samples of commercial fertilizers and agricultural minerals, and such additional information as may seem advisable to him.

14584. The director may take a sample for analysis from any lot of commercial fertilizer, agricultural mineral, auxiliary soil chemical, or soil amendment which may be in possession of any producer, manufacturer, importer, agent, dealer, or user. The sample shall be taken pursuant to any regulations which the director has adopted regarding the taking of such samples.

14585. (a) Any method for drawing samples which is established by regulations of the director, shall conform as closely as possible to a method for drawing samples which is established by the American Association of Official Analytical Chemists.

(b) If the material which is to be sampled is packaged in containers of less than 10 pounds, one package of the material may be taken as a sample to represent the lot of which it is a part.

14586. If the analysis of a sample of commercial fertilizer shows a deficiency of not more than 0.5 percent of nitrogen, or not more than 0.7 percent of available phosphoric acid, or not more than 0.5 percent of soluble potash, the statement of the producer, manufacturer, importer, agent, or dealer, as required pursuant to this chapter, is not false within the meaning of this chapter.

14587. If the analysis of a sample of agricultural mineral shows a deficiency in any constituent of not more than 5 percent of the guaranteed total percentage of such constituent, the statement of the producer, manufacturer, importer, agent, or dealer, as required pursuant to this chapter, is not false within the meaning of this chapter.

14588. In any action, civil or criminal, in any court in this state, a certificate of the director which states the results of any analysis, purported to have been made pursuant to this chapter, shall be prima facie evidence of all of the following:

(a) That every sample which is mentioned in the analysis or certificate was properly analyzed.

(b) That such samples were taken pursuant to this chapter.

(c) That the substances analyzed contained the component parts which are stated in such certificate and analysis.

(d) That the samples were taken from the lots, parcels, or packages which are mentioned in the certificate.

Article 6. Registration

14621. Every producer of, manufacturer of, importer of, or dealer in, any commercial fertilizer, except a dealer or agent that sells commercial fertilizer in packages filled and labeled by a registrant, shall obtain from the director a certificate of registration which authorizes the registrant to sell commercial fertilizers before the commercial fertilizer is offered for sale.

14622. Every producer of, manufacturer of, or dealer in, any agricultural mineral, except a dealer or agent that sells agricultural minerals in packages which are filled and labeled by a registrant, shall obtain from the director a certificate of registration which authorizes the registrant to sell agricultural minerals before the agricultural mineral is offered for sale.

14623. Every producer of, manufacturer of, importer of, or dealer in any auxiliary soil chemical, shall obtain from the director a certificate of registration which authorizes the registrant to sell auxiliary soil chemicals before the auxiliary soil chemical is offered for sale.

14624. A person may obtain both a certificate for the sale of commercial fertilizers and a certificate for the sale of agricultural minerals, but for each certificate a separate application shall be filed and a separate fee paid.

14625. Any person that purchases any commercial fertilizer or agricultural mineral for resale to registrants only may obtain from the director, in lieu of a certificate issued pursuant to Section 14621 or 14622, a jobber certificate of registration, which authorizes such person to sell commercial fertilizers or agricultural minerals to commercial fertilizers registrants only and to sell agricultural minerals to agricultural minerals registrants only.

14626. Each application for a certificate of registration shall be accompanied by the proper fee, as follows:

(a) For a certificate of registration for the sale of commercial fertilizers, fifty dollars ($50).

(b) For a certificate of registration for the sale of agricultural minerals, fifty dollars ($50).

(c) For a jobber certificate of registration, twenty-five dollars ($25).

(d) For a certificate of registration for the sale of auxiliary soil chemicals, no fee.

14627. All certificates of registration shall expire on the 30th day of June of the fiscal year for which they are issued.

14628. If reregistration is not obtained within one calendar month after the expiration of a certificate of registration there shall be added to the fee a penalty of 10 percent, to which shall be added an additional penalty of 5 percent of the original amount due, for each succeeding calendar month. The total penalty shall not, however, exceed 50 percent of the original amount due.

14629. A penalty shall not be collected if the person reregistered makes an affidavit that no business was done during the period of nonregistration. The payment of the renewal fee or penalty is not a bar to any prosecution for doing business without proper registration.

14630. The director, after hearing, may cancel the registration of, or refuse to register, any person that sells or proposes to sell any commercial fertilizer, agricultural mineral, or auxiliary soil chemical which is detrimental or injurious to plants if it is applied as directed, or which is known to be of little or no value for the purpose for which it is intended, or as to which any false or misleading claim is made or implied. He may cancel the registration of any person that repeatedly violates the provisions of this chapter.

14631. The proceedings to cancel or refuse registration shall be conducted pursuant to Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted in such chapter.

Article 7. Tonnage License Tax

14681. As used in this article, "tonnage license tax" means the tax which is imposed by Section 14682.

14682. A registered person shall, if the sale is not exempt from the provisions of this chapter, pay:

(a) Fourteen cents ($0.14) per ton or fraction of a ton upon any sale of any commercial fertilizer.

(b) Five cents ($0.05) per ton or fraction of a ton upon any sale of any agricultural mineral, unless the agricultural mineral is sold to be used and is used in the manufacture of commercial fertilizer.

14683. A commercial fertilizer registrant that sells any agricultural mineral to an unregistered person in the original and properly labeled lot or package of an agricultural mineral registrant shall pay the tonnage license tax which is imposed upon the sale of agricultural minerals.

14684. Each registered person shall keep an accurate account of every sale of any commercial fertilizer, agricultural mineral, or both. The account shall be open at all times to inspection by the director. A statement of sales shall be rendered to the director quarterly within one calendar month after March 31st, June 30th, September 30th, and December 31st, of each year.

14685. The statement shall be accompanied by the amount of tonnage license tax which is required by this article.

14686. Any delinquency in making a statement and return, or any deficiency in any return, shall subject the registrant to the payment of a penalty of 10 percent of the amount which is due.

14687. If a registered person has paid the tonnage license tax which is required by this article, any person that is acting as his selling agent is not required to pay the tonnage license tax.

Article 8. Public Nuisance

14701. As used in this article, "nuisance" means the public nuisance which is defined in Section 14702.

14702. Any substance which is adulterated, mislabeled, injurious, or detrimental to plants if applied as directed, or otherwise not in conformity with the provisions of this chapter, together with any container which contains any of the substance, is a public nuisance.

14703. The director may quarantine any substance or container which is a nuisance, and may affix a warning tag or notice to it. It is unlawful for any person to remove, deface, or destroy any tag or notice which is affixed by the director, prior to the release of the substance or container from quarantine.

14704. The director may notify the owner or person that is in possession of any substance or container which is a nuisance that the nuisance exists, and may require him to abate the nuisance within a reasonable time which is specified in the notice.

14705. The person that has possession of a substance or a container which is a nuisance shall, upon notice by the director, hold any substance or container which is quarantined until it is released by the director upon compliance with this chapter.

14706. It is unlawful for any person to move or otherwise dispose of any substance or container which is quarantined, or to which a warning tag or notice has been affixed pursuant

to this article, except with the permission of the director and for the purposes which are specified by him.

14707. Any substance or container which is a nuisance, if not abated or disposed of pursuant to the notice of the director, shall be subject to disposal on complaint of the director to a court of competent jurisdiction.

14708. The district attorney of the county in which the nuisance is found, on the relation of the director, shall maintain in the name of the people of the State of California a civil action to abate and prevent the nuisance.

14709. Upon judgment and by order of the court a substance or container which is a nuisance shall be condemned and destroyed in the manner directed by the court, or relabeled, or denatured or otherwise processed, or released upon such conditions as the court in its discretion may impose to insure that the nuisance shall be abated.

14710. If the owner fails to comply with the order of the court within the time specified, the court may order disposal or sale, under such terms and conditions as the court may prescribe, by the director, or by the sheriff, marshal, or constable.

14711. In the event of sale, the costs of disposal shall be deducted from the proceeds of sale and the balance paid into court for the owner.

14712. In actions arising, pursuant to this article, the following courts shall have original jurisdiction:

(a) Municipal courts, where the value of the property seized amounts to three thousand dollars ($3,000) or less.

(b) Justice courts, where the value amounts to five hundred dollars ($500) or less.

Article 9. Violations

14751. Any person that sells any commercial fertilizer, agricultural mineral, or auxiliary soil chemical without the statement which is required by this chapter or with a label which states that the commercial fertilizer, agricultural mineral, or auxiliary soil chemical contains a larger percentage of any one or more of the constituents than is actually contained in it, or fails to comply with any of the provisions of this chapter is guilty of a misdemeanor. Upon conviction such person shall be fined in a sum of not less than fifty dollars ($50) and costs for the first offense, and not less than one hundred dollars ($100) and costs for each subsequent offense. The fines shall be paid into the school fund of the county in which conviction is had.

14752. It is unlawful for any person, by himself, or through another person, in connection with the sale of any substance to do any of the following:

(a) Make any material or substantial misrepresentation.

(b) Make any false promises of a character likely to influence, induce or deceive.

(c) Engage in illegitimate business or dishonest dealing.

(d) Cause to be published or distributed false or misleading literature, or cause to be displayed false or misleading advertisements.

CHAPTER 6. COMMERCIAL FEEDING STUFFS

Article 1. Definitions

14901. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

14902. "Commercial feeding stuffs" includes all feeding stuffs and concentrates which are used for feeding livestock and poultry, except the following:

(a) Whole seeds or grains, if unmixed.

(b) Fresh green roughage or unprocessed liquid milk in any form.

(c) Whole hays, straws, cottonseed hulls, corn stover, and wet citrus waste residue, if unprocessed and unmixed with other materials.

(d) Wet garbage.

(e) Salt, except in block or chunk form.

(f) Preparations which are sold as or represented to be primarily for the cure or mitigation of disease.

(g) Preparations which are sold for feeding domestic pets, such as dogs, cats, and birds.

14903. "Established plant, warehouse, or place of business" means any permanent office headquarters which is maintained by an importer, broker, seller, or authorized manufacturer's agent, or any permanent warehouse, building, or structure in or from which a legitimate permanent business is carried on as such in good faith and not for the purpose of evading this chapter, during the usual and customary business hours, and at which stocks of the commercial feeding stuffs regulated by this chapter are sold, manufactured, processed, mixed, distributed, stored, or kept in quantities reasonably adequate and usually carried for the requirements of such business, and available for regular inspection by the director or his inspectors. It does not mean temporary residence, tent, temporary stand, itinerant truck or transportation vehicle, or other temporary quarters, occupied pursuant to any temporary arrangement to evade this chapter.

14904. "Licensee" means a person that has obtained a license pursuant to Article 7 (commencing with Section 15021) of this chapter.

14905. "Special mix" means any commercial feeding stuffs which are manufactured, processed, or mixed pursuant to specifications which are supplied by the purchaser.

Article 2. General Provisions

14931. The director shall enforce this chapter and adopt and enforce such regulations relating to the sale of, and to the manner of making inspection tonnage tax payments upon, commercial feeding stuffs as he deems necessary to carry into effect the full intent and meaning of this chapter.

14932. All money which is received under this chapter shall be paid monthly into the State Treasury and placed to the credit of the Department of Agriculture Fund. It shall be expended as provided in Section 14232.

14933. The director shall, within 30 days prior to each general session of the Legislature, submit to the Governor a full and true report of transactions under this chapter during the current biennium, including a statement of receipts and expenditures during that period.

Article 3. Exemptions

14951. This chapter does not apply to any commodity which results from services which are classed as "toll milling" or "custom milling." The processing of any such exempt commodity by the person that negotiates the sale is not "toll milling" or "custom milling."

Article 4. Labels

14961. Except as otherwise provided in this chapter or by specific regulations of the director which declare that the statement required pursuant to this article is not applicable to certain products, every lot or parcel of commercial feeding stuffs which is sold or distributed within this state, shall have affixed to a conspicuous place on the outside of the lot or parcel a tag or label.

14962. The tag or label shall contain a legible and plainly printed statement which certifies all of the following:

(a) The net weight of the contents of the lot or parcel.

(b) The name, brand, or trademark.

(c) The name and principal address of the manufacturer or person that is responsible for placing the commodity on the market.

(d) The minimum percent of crude protein.

(e) The minimum percent of crude fat.

(f) The maximum percent of crude fiber.

(g) The maximum percent of ash.

(h) The recognized official name of each ingredient which is used in its manufacture.

(i) The percent of such ingredients as corncobs, oat hulls, barley hulls, rice hulls, ground light rice, or similar materials, if such materials constitute a portion of the lot or parcel.

(j) The maximum percent of mineral matter it contains.

(k) In the case of any mixed feed which contains more than 5 percent of mineral ingredients, the minimum percentage of calcium (Ca), of phosphorus (P), of iodine (I), and the maximum percentage of salt if salt is added.

(*l*) The maximum percentage of salt in any mixed feeds if more than 2 percent of salt is present or added.

(m) In the case of any commercial feeding stuffs for which any special quality is claimed, such as vitamin potency, amino acid content, or protein quality, a definite guarantee relative to such quality.

(n) If any simple animal protein concentrate is sold or distributed, the quality index of such protein may be certified to in addition to the minimum percent of crude protein.

(o) In the case of any commercial feeding stuffs which contains a nonnutritive substance which is intended for use in the diagnosis, cure, mitigation, treatment, or prevention of any disease or pest, or which is intended to affect the structure or any function of the animal body, the amount of such substance present, directions for use, and any necessary warnings against misuse.

14964. If a manufacturer, processor, or mixer of any commercial feeding stuffs makes a claim or guarantee relative to the content of the commercial feeding stuffs on or with the package which contains it, and the claim or guarantee is in addition to those required by law, he is responsible for maintaining the claim or guarantee, and may be required to submit to the director information and records pertinent to the claim or guarantee.

14965. Any commercial feeding stuff which contains a substance that is toxic or poisonous if consumed in quantities greater than recommended by the manufacturer shall be so labeled that the user will be warned of the toxic or poisonous effects which result from feeding the excess quantity.

14966. Commercial feeding stuffs are mislabeled if in any respect they are not as represented.

Article 5. Standards and Tolerances

14981. The director shall by regulation fix the standards for commercial feeding stuffs.

14982. The director, by regulation, may establish permissible tolerances for pesticide chemicals, chemical additives, and drugs in or on commercial feeding stuffs. Tolerances which are so established shall be such as to insure the safety of livestock and poultry and the products of livestock and poultry which are used for human consumption.

Article 6. Inspection and Analysis

15001. The director, his agents, and his inspectors shall have free access to all premises or conveyances which are used

in the manufacture, transportation, importation, sale, or storage of any commercial feeding stuffs. They may open any parcel which contains or is supposed to contain any commercial feeding stuffs, and take samples and analyze them.

Article 7. Licenses

15021. Each of the following persons shall obtain a license from the director for each plant operated which authorizes him to sell, manufacture, process, mix, or distribute commercial feeding stuffs before he engages in such activity:

(a) Any person that sells commercial feeding stuffs except a person that makes only retail sales of commercial feeding stuffs which bear the tag, stamp, or other approved indication that the commercial feeding stuffs are from a licensed manufacturer or guarantor that has assumed full tax responsibility for the tonnage tax due under Section 15051.

(b) Any person that manufactures, processes, or mixes, for another, commercial feeding stuffs.

(c) Any person that distributes commercial feeding stuffs.

15022. A person is not entitled to a license unless he has an established plant, warehouse, or place of business.

15023. Each application for a license shall be accompanied by a fee of five dollars ($5) for each plant for each fiscal year or portion of a fiscal year beginning July 1st.

15024. Each license shall be renewed annually. Each application for renewal shall be accompanied by a fee of five dollars ($5) for each plant operated.

15025. If a license is not renewed within one calendar month after the beginning of the fiscal year, a penalty of five dollars ($5) shall be added to the fee. A penalty shall not, however, be collected if the person that is relicensed presents evidence satisfactory to the director that no business was done during the period when he did not have a license.

15026. The payment of the renewal fee and penalty is not a bar to any prosecution for doing business without a license.

Article 8. Inspection Tonnage Tax

15051. Any manufacturer, importer, jobber, firm, association, corporation, or person that sells to the consumer-buyer any commercial feeding stuffs shall pay to the director an inspection tonnage tax at the rate of four cents ($0.04) for each ton sold. He shall also affix to each package or container of such commercial feeding stuffs a tag, stamp, or other approved indication that the inspection tonnage tax specified in this article has been paid.

15052. If any commercial feeding stuffs are sold in bulk, the person that sells them shall report the sales and make payment of the inspection tonnage tax upon such sales pursuant to the regulations of the director.

15053. The licensee may make direct payment of the inspection tonnage tax to the director after the director approves the application of the licensee to pay in such manner. The payment shall be made pursuant to the regulations of the director.

15054. A licensee that makes direct payment of the inspection tonnage tax shall render to the director quarterly, within one calendar month after March 31st, June 30th, September 30th, and December 31st of each year, a statement of the tonnage sold subject to the tax accompanied by payment of the amount of inspection tonnage tax required by this article. To any amount which is not paid when due, or which is not accompanied by the proper return, a penalty shall be added of 10 percent of the amount which is due.

15055. The tags which are referred to in Section 15051 may be purchased from a commercial printer if the printer does all of the following:

(a) Posts with the director a bond in the sum of one thousand dollars ($1,000) which guarantees collection of the inspection tonnage tax prior to printing the tags.

(b) Agrees in writing to abide by the regulations of the director.

15056. The printer upon receipt of the inspection tonnage tax from the purchaser of the tags shall immediately remit it to the director together with a copy of the purchaser's order for the tags.

15057. Each tag shall both:

(a) Bear the inscription "California feeding stuffs tax paid".

(b) Indicate the number of pounds which are to be placed in the container to which the tag is to be attached and for which the tax is paid.

Article 9. Special Mixes

15071. Any person that manufactures, processes, or mixes any special mix for another person, shall furnish to the person for whom such special mix is manufactured, processed, or mixed, a numbered invoice which has written or printed on it the date of sale and the name and the number of pounds of each ingredient which is in the special mix.

15072. The net weight of any special mix which is sold in bulk shall be affirmed by public weighmaster's certificate.

15073. If packaged, each package of any special mix shall have attached to it, in lieu of the tag or label which is required pursuant to Article 4 (commencing with Section 14961) of this chapter, a written or printed tag upon which shall be stated all of the following:

(a) That the product in the container or package is a special mix.

(b) The number and date of the invoice.

(c) The name of the mixer, processor, or manufacturer.

(d) The net weight of the contents.

15074. Copies of all invoices which are required by Section 15071 shall remain on file in the place of business of the person that furnishes them for six months, subject to inspection by the director. No two invoices issued in one calendar year shall bear the same number.

15075. The licensee shall attach to the packages or containers of the special mixes tags, stamps, or other approved indication of the payment of the inspection tonnage tax which is required by Article 8 (commencing with Section 15051) of this chapter.

15076. A special mix shall not be resold.

Article 10. Violations

15101. (a) Any violation of any provision of this article is a misdemeanor which is punishable by a fine of not more than one hundred dollars ($100) for the first violation and not less than one hundred dollars ($100) for each subsequent violation.

(b) Upon a second conviction, if ordered by the court, the license of the person may be suspended or revoked.

15102. It is unlawful for any person to sell or distribute in this state, any commercial feeding stuffs unless:

(a) There is attached to the commercial feeding stuffs the labels, tax stamps, tags, or other approved indication of tax payment.

(b) He furnishes to the purchasers of bulk feeds, at time of each delivery, such documents as are required by this chapter and the regulations which are adopted pursuant to it.

15103. It is unlawful for any person to obstruct, prevent, or attempt to prevent the department or its authorized agent in the performance of any duty of the department pursuant to any provision of this chapter.

15104. It is unlawful for any person to sell or distribute in this state any commercial feeding stuffs without complying with the provisions of this chapter and the regulations which are adopted pursuant to it.

15105. It is unlawful for any person to sell or distribute in this state any commercial feeding stuffs which do not conform to the analysis, guarantees, or any other representation made on the tag or label or on the invoice, sales slip, or weight certificate.

15106. It is unlawful for any person to fail to properly state the recognized official name of each ingredient used in the manufacture of any commercial feeding stuffs.

15107. It is unlawful for any person to fail to properly state the percent in any commercial feeding stuffs of such ingredients as corncobs, oat hulls, barley hulls, rice hulls, ground light rice, or similar materials, if such materials con-

stitute a portion of the package, lot, or parcel or the percent of grit or inert matter.

15108. It is unlawful for any person to use, for the purpose of evading payment of the inspection tonnage tax, any package, container, or tag which bears the tax-paid insignia or stamp or other approved indication of tax payment which has been used previously.

15109. It is unlawful for any person to use, without proper authority and for the purpose of misleading or defrauding, any package, container, or tag of another dealer or manufacturer.

15110. It is unlawful for any person to make any false or fraudulent claim or representation, which relates to any commercial feeding stuffs, on any label or invoice, or in any advertisement, or in any other manner.

15111. It is unlawful for any person to render any false statement in connection with the payment of the inspection tonnage tax or to fail to pay the inspection tax and any penalty which is due because of any delinquency in the payment of the inspection tax.

15112. It is unlawful for any person to mix or adulterate any commercial feeding stuffs with any substance injurious to the health of livestock or poultry.

15113. In addition to the penalty which is provided in Section 15101, such lot of commercial feeding stuffs may, upon direction of the court, be seized, condemned, and sold. The court may, in its discretion, release the mixed or adulterated commercial feeding stuffs so seized when the requirements of this chapter have been complied with, and upon payment of all costs and expenses which are incurred by the state in any proceedings connected with the seizure.

Article 11. Procedure for Prosecution

15131. If it appears that any provision of this chapter or any regulation which is adopted pursuant to it has been violated, the director shall notify the manufacturer or dealer. The director shall afford any party so notified an opportunity to be heard.

15132. After a hearing, the director shall dismiss the charges or shall certify the facts to the proper district attorney, who shall forthwith institute proper proceedings.

Article 12. Civil Penalties

15151. Any lot of commercial feeding stuffs which is offered for sale in violation of any provision of this chapter shall, pursuant to regulations of the director, be removed from sale by the vendor of the commercial feeding stuffs upon his receiving notice from the director of the violation. The vendor

shall withhold the commercial feeding stuffs from sale until the violation has been corrected.

DIVISION 8. VESSEL AND AIRCRAFT GARBAGE

CHAPTER 1. DEFINITIONS

16001. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

16002. "Aircraft" means every description of craft or other contrivance which is used, or capable of being used, as a means of transportation through the air from origins in other states or territories or in foreign countries.

16003. "Food stores" mean fruits, vegetables, or animal products which are carried as stores of vessels and aircraft and includes fruits, vegetables, or animal products which are carried in passengers' and crews' quarters.

16004. "Garbage" means waste material, such as food scraps, table refuse, galley refuse, and refuse from stores of vessels and aircraft, including such waste material in passengers' and crews' quarters, which is derived, in whole or in part, from fruits, vegetables, or animal products.

16005. "Territorial waters of California" means all navigable waters of this state including all portions of the sea within its jurisdiction which are used by vessels or aircraft.

16006. "Vessel" means every description of craft or other contrivance which is used, or capable of being used, as a means of transportation in or on coastal, intercoastal, or foreign waters.

CHAPTER 2. GENERAL PROVISIONS

16051. Regulations which are adopted by the director pursuant to this division shall not conflict with Agricultural Research Service of the United States Department of Agriculture orders or regulations which pertain to garbage that is derived from meats or meat products which originate in any country which is listed as a country in which there are animals which are infected with the disease known as rinderpest or with foot-and-mouth disease.

CHAPTER 3. CONTAINERS AND RECEPTACLES

16101. If means of incineration of, or other approved processing for, garbage are not available aboard any vessel or aircraft in the state, the master or other person that is in charge of such vessel or aircraft shall provide containers or receptacles with tight-fitting covers in which the garbage shall be retained while within the territorial waters of, or on the land in, California pending incineration or approved treatment under the supervision and pursuant to the regulations of the director.

CHAPTER 4. VIOLATIONS

16151. It is unlawful for any person to throw, discharge, deposit, remove, or carry garbage, or cause, suffer, or procure garbage to be thrown, discharged, deposited, removed, or carried, from any vessel, aircraft, or any other vehicle into any territorial waters, or onto land within the state, except for any of the following:

(a) Immediate burning in incinerators.

(b) Approved treatment or approved disposal under the supervision and pursuant to the regulations of the director.

(c) Delivery to a garbage collector that, for the purpose of accepting garbage, is licensed by the director or by the federal government.

16152. It is unlawful for any person to retain or maintain garbage on any vessel, aircraft, or other vehicle within the state, except in tightly closed containers or receptacles and under such treatment as may be prescribed by the director.

16153. It is unlawful for any person to remove food stores from any vessel, aircraft, or other vehicle except under a permit issued by the director.

16154. It is unlawful for any person to violate, or to aid, abet, authorize, or instigate a violation of, this division.

DIVISION 9. ANIMALS GENERALLY

PART 1. ANIMALS AT LARGE

CHAPTER 1. DEFINITIONS

16301. Unless the context otherwise requires, the definitions in this chapter govern the construction of this part.

16302. "Animal" includes any domestic bovine animal, horse, mule, burro, sheep, goat, or swine, or the hide, carcass, or portion of a carcass of any such animal.

16303. "Inspector" means a hide and brand inspector. It includes the persons who are specified in Section 20010.

CHAPTER 2. GENERAL PROVISIONS

Article 1. Application

16401. This part, including the provisions regarding payment of fees, is applicable to all state and county institutions engaging in livestock operations.

Article 2. Investigation

16411. The director may make any and all necessary investigations relative to reported violations of this part pur-

suant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

16412. Copies of records, audits, and reports of audits, inspection certificates, certified reports, findings and all papers on file in the office of the director shall be prima facie evidence of the matter contained in them, and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

Article 3. Criminal Penalty

16421. Except as otherwise provided in this part, every person that violates any provision of this part is guilty of a misdemeanor and upon conviction shall be punished by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500), or by imprisonment of not less than 10 days nor more than six months or by both such fine and imprisonment. Each violation during any day shall constitute a separate offense.

Article 4. Civil Penalties and Remedies

16441. Any person that violates any provision of this part or any regulations issued pursuant to it is liable civilly for a penalty in an amount not to exceed a sum of five hundred dollars ($500) for each violation. Any money recovered under this section shall be paid into the Department of Agriculture Fund.

16442. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring action for civil penalties in the name of the people of this state in any court of competent jurisdiction in this state against any person violating any provision of this part.

16443. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this part or any regulation which is duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

Article 5. Funds.

16461. Any money in the Department of Agriculture Fund derived under any of the provisions of this part may be expended for the administration and enforcement of any of the provisions of the following portions of this code, notwithstanding any other provision of law limiting the expenditure of any such money to some specific purpose or to the administration or enforcement of some specific section, article, or chapter of this part:

(a) Part 1 (commencing with Section 16301), Division 9.

(b) Chapter 1 (commencing with Section 17401), Part 2, Division 9.

(c) Chapter 4 (commencing with Section 17951), Part 2, Division 9.

(d) Chapter 1 (commencing with Section 18201), Part 3, Division 9.

(e) Division 10 (commencing with Section 20001).

(f) Division 11 (commencing with Section 23001).

(g) Chapter 1 (commencing with Section 24501), Part 1, Division 12.

(h) Chapter 1 (commencing with Section 26401), Part 3, Division 12.

CHAPTER 3. PEDIGREE AND PROOF OF OWNERSHIP

Article 1. Pedigree

16501. It is unlawful for any person by any false or fraudulent pretense to do any of the following:

(a) Obtain from any association organized for the purpose of improving the breed of domestic animals a certificate of registration of any animal in the herd register, or other register of such association or a transfer of any such registration.

(b) Give, for a valuable consideration, a false pedigree of any animal, with intent to mislead.

Article 2. Proof of Ownership

16521. An inspector shall seize any bovine animal, horse, mule, or burro, or the hide or carcass of any such animal, which is within any of the following classes:

(a) Found in the possession of a person that cannot prove ownership.

(b) Presented for inspection and which is not claimed by the consignor or consignee.

16522. Evidence of ownership of an animal or hide may include any of the following:

(a) A recorded brand registered in the name of the person in possession of the animal or hide.

(b) A brand inspection certificate.

(c) A bill of sale from the owner of the brand on the animal or hide.

(d) In the case of an unbranded animal or hide, a bill of sale which gives a description of the breed, sex, color, and natural markings, if any.

16523. Evidence of ownership of a carcass may include a bill of sale, sales tag, or sales memorandum which shows all of the following:

(a) The names of the seller and buyer.

(b) The date of sale.

(c) The quantity sold.

16524. It is unlawful for any person to refuse to turn over to an inspector any animal, hide, or carcass which is seized pursuant to any provision of this part.

CHAPTER 4. REGULATION OF MALE ANIMALS

16701. A person shall not let to mares or jennies any stallion or jack within the limits of any city, town, or village, or within 400 yards of it, except in an inclosure which is sufficient to obstruct the view of all the inhabitants within such limits.

16702. A person in charge of any stallion, bull, boar, ram, or male goat shall not turn out or permit such animal to be turned out or to run at large.

16703. A violation of any provision of this chapter is a misdemeanor punishable by a fine of not less than five dollars ($5) or more than twenty dollars ($20), or by imprisonment in the county jail not less than 30 days, or by both such fine and imprisonment.

CHAPTER 5. OPEN RANGE GRAZING

16801. As used in this chapter:

(a) "Purebred bull" means a bull bred in a herd of one of the recognized beef breeds, the ancestral sires of which shall have been registered bulls of the same breed for at least four generations, and the dams of which shall have been cows of the same breed of good quality.

(b) "Open range" means all uninclosed lands outside of cities, towns, and villages, upon which by custom, license, or otherwise, cattle are kept or permitted to roam.

16802. A person shall not permit any bull over eight months of age which is not a purebred bull to run upon any range of this state.

16803. A person shall not cause or permit his cows to graze upon the open range without running with the cows one bull for every 30 head of cows or for every fractional part of the 30 cows, except when the fractional part is less than 10.

16804. Any person that violates any provision of this chapter is, in addition to any penalty imposed by this part, liable for all actual damage caused thereby.

CHAPTER 6. TRANSPORTATION OF ANIMALS

16901. It is unlawful for any person to do any of the following:

(a) Lead, drive, or conduct any animal along the track of a railroad, unless the railroad is built within the limits of a public highway or public place.

(b) Permit any animal to be placed within the fences of a railroad for grazing or other purposes if he has the right to prevent it.

16902. A person that owns or controls the possession of any livestock shall not willfully or negligently permit any of the livestock to stray upon, or remain unaccompanied by a person in charge or control of the livestock upon, a public highway, if both sides of the highway are adjoined by property which is separated from the highway by a fence, wall, hedge, sidewalk, curb, lawn, or building.

16903. It is unlawful for any person to drive any livestock upon, over, or across any public highway between the hours of sunset and sunrise unless he keeps a sufficient number of herders on continual duty to open the road so as to permit the passage of vehicles.

16904. In any civil action which is brought by the owner, driver, or occupant of a motor vehicle, or by their personal representatives or assignees, or by the owner of livestock, for damages which are caused by collision between any motor vehicle and any domestic animal on a highway, there is no presumption or inference that the collision was due to negligence on behalf of the owner or the person in possession of the animal.

16905. It is unlawful for any officer, agent, or conductor of any railroad in this state, to confine any animals in cars for a longer period than 36 consecutive hours if the animals are being carried or transported by the railroad in carloads. At least every 36 hours the animals shall be unloaded for rest, water, and feeding, into properly equipped pens for a period of not less than five consecutive hours.

16906. In estimating the time of confinement pursuant to Section 16905, the period during which animals have been confined without such rest on connecting roads from which they are received, shall be included.

16907. If the owner or person in charge of the animals refuses or neglects to pay for the care and feed of the animals so rested, the company or person operating the railroad may charge the expense of the care and feeding to the owner or consignee and retain a lien upon the animals until the amount of expense is paid.

16908. It is unlawful for any person, that owns or operates any motor truck, or motor truck and trailer, or semitrailer which is attached to a motor truck, to confine or permit to be confined, in such vehicle, any animal for a longer period than 28 consecutive hours from the time the animal was last fed and watered. Upon the written request of the owner or person in charge of the animal, the period of confinement may be extended to 36 hours. Before the expiration of the permissible period of confinement, the animal shall be unloaded in a humane manner by means of a chute or tailgate of sufficient size into properly equipped pens for rest, water, and feeding, for a period of at least five consecutive hours.

The failure of a person to feed or water an animal within the time limit prescribed by this section is not a violation of this section if the feeding and watering of the animal is prevented by storm or other accidental or unavoidable causes which could not be anticipated or avoided by the exercise of due diligence and foresight.

16909. In estimating the period of confinement, the time consumed in loading and unloading the animal shall not be considered, but the time during which the animal has been confined without rest, food, or water on any other or connecting vehicle, or outside of the state, shall be included.

CHAPTER 7. ESTRAYS

Article 1. Definitions and General Provisions

17001. As used in this chapter, "taker-up" means any person that takes up an estray animal pursuant to Section 17041.

17002. Any animal which is seized by, or comes into the possession of, an inspector pursuant to this part shall be disposed of pursuant to this chapter.

17003. Except for the provisions of the section, this chapter does not affect any law or regulation which is in force or which may be in force regarding estrays, the poundkeeper, or other pound officer within the limits of any city or county where laws regarding estrays are in force.

If no person appears and claims any impounded bovine animal, horse, mule, or burro within five days, the poundkeeper or other pound officer shall so notify the director. Upon receipt of such notice, the director shall take possession of the animal and shall dispose of it pursuant to this chapter.

This section does not authorize any act which violates Section 597 of the Penal Code.

Article 2. Taker-Up of Estrays

17041. Except as provided in Article 5 (commencing with Section 17121) of this chapter, any person that finds any

estray domestic animal upon his premises, or upon premises to which he has the right of possession, or upon any highway which is adjacent to such premises, may take up the animal and have a lien for all expenses which are incurred in taking up, keeping, and caring for it.

17042. Any person that takes up an estray animal shall confine it in a secure place, and within five days file with the director a notice which contains all of the following:

(a) A description of the animal seized.

(b) The marks and brands, if any.

(c) The probable value of the animal.

(d) A statement of the date and place where it was taken up and confined

17043. The taker-up of an estray animal shall use reasonable care to preserve it from injury. If it dies or escapes from the taker-up at any time while he is holding it pursuant to this chapter, the taker-up shall not be held liable in any manner therefor.

17044. The taker-up is entitled to the sum prescribed by Section 17095 for the keeping and care of the estray animal.

17045. Except as otherwise provided in this chapter, it is unlawful for any person to remove any animal from the possession of the taker-up.

Article 3. Possession by Inspector

17061. Upon demand of any authorized inspector, the taker-up shall deliver possession of the animal to the inspector.

17062. Except as otherwise provided in this chapter, it is unlawful for any person to remove from the possession of an inspector any animal so delivered to him.

17063. If the animal which is seized or otherwise in the possession of the inspector is branded, the director shall cause a search to be made of the brand records to ascertain the owner.

17064. If the brands or marks are recorded, the director shall immediately, by letter, notify the person in whose name the brands or marks are recorded.

17065 If the owner is not found, and the estimated value of the animal exceeds forty dollars ($40), the director shall cause a notice of the taking up of the animal to remain posted for a period of three weeks on a bulletin board in each office of the Bureau of Livestock Identification. In addition to posting the notice, the director shall cause the notice to be published once each week for three successive weeks in a local paper in the vicinity in which the estray animal is known to have originated, or if such origin is not known, then in the locality in which the animal was found.

17066 If the estimated value of the animal is less than forty dollars ($40) and a notice is posted for five days on a bulletin board in each office of the Bureau of Livestock Identi-

fication, the director may cause the sale of the animal at a public sale and hold the proceeds as provided in Article 4 (commencing with Section 17091) of this chapter.

17067. The notice of the taking up of an animal shall describe the weight, sex, breed, color, marks, and brands, if any, of the animal and shall state the time and place of its proposed sale.

17068. Any person that claims ownership in the animal may, at any time, but not later than 30 days after the first posting of notice, file his proofs of ownership with the director and the director shall proceed to hear and determine the claim of ownership.

17069. If ownership is proved to the satisfaction of the director, the animal shall be turned over to the owner upon payment by the owner of all expenses which were incurred in the handling of the animal.

Article 4. Disposal and Sale

17091. If the animal at any time while in the possession of an inspector is in a condition which requires immediate disposal, the animal may be disposed of by the director. The proceeds from the salvage, if any, in excess of expenses which were incurred in the handling of the animal shall be paid to the person proving ownership pursuant to Section 17068.

17092. If after 30 days from the date of the first posting of notice no satisfactory proof of ownership of the animal has been made, or if the owner fails or refuses to pay all expenses which were incurred, the director shall sell the animal at public sale.

All sales which are made pursuant to this chapter convey a good and valid title to the purchaser. The former owner of the animal so sold is thereafter barred from all right to recover it.

17093. In lieu of public sale, the director may sell the animal at private sale at a price not less than the appraised value of the animal. The appraisal shall be made by a board of three stockmen who are qualified to make the appraisal, to be selected as follows:

(a) One to be named by the director.

(b) One by the person from whose possession the estray animal was taken.

(c) One selected jointly by the stockmen who are selected pursuant to subdivisions (a) and (b) of this section.

17094. Any carcass or portion of a carcass may be sold by the director at any time at the market price which prevails at the time of sale.

17095. The proceeds from the sale of any animal shall be paid into, and the expenses of holding, advertising, sale and other incidental expenses shall be paid from, the Department of Agriculture Fund. For the keeping and care of the estray animal, the taker-up is entitled to the following:

(a) A sum not to exceed fifty cents ($0.50) per day for each bovine animal, horse, mule, or burro.

(b) A sum not to exceed fifteen cents ($0.15) per day for each sheep, goat, or swine.

In no event shall the taker-up be paid for feed and care for more than five days prior to the date the notice which is required by Section 17042 is made to the director.

17096. If any person shall, within one year after the date of the sale, prove to the satisfaction of the director his ownership of an animal which was sold pursuant to this article, the director shall order the net proceeds of the sale of the animal to be paid to such person.

Article 5. Grazing Counties

17121. A lawful fence is any fence which by reliable evidence is good, strong, substantial, and sufficient to prevent the ingress and egress of livestock. No wire fence is a good and substantial fence within the meaning of this article unless it has three tightly stretched barbed wires securely fastened to posts of reasonable strength, firmly set in the ground not more than one rod apart, one of which wires shall be at least four feet above the surface of the ground. Any kind of wire or other fence of height, strength, and capacity equal to or greater than the wire fence herein described is a good and substantial fence within the meaning of this article. The term "lawful fence" includes cattle guards of such width, depth, rail spacing, and construction as will, by reliable evidence, effectively turn livestock.

17122. In any county or part of a county devoted chiefly to grazing and so declared pursuant to this article, a person shall not have the right to take up any estray animal found upon his premises, or upon premises to which he has the right of possession, nor shall he have a lien thereon, unless the premises are entirely enclosed with a good and substantial fence.

17123 The following counties or parts of counties are declared to be devoted chiefly to grazing:

(a) That portion of Trinity which is outside of the area described in Section 17125.

(b) That portion of Shasta outside of the area which is described in Section 17126.

(c) Siskiyou, Lassen, and Modoc.

(d) Any county or part of a county which is declared to be devoted chiefly to grazing pursuant to Section 17124.

17124 The board of supervisors of any county may by ordinance declare that such county, or part of such county, is devoted chiefly to grazing.

17125 The following portions of Trinity County are declared not to be devoted chiefly to grazing:

(a) All of Sections 1, 2, 3, 10, 11, 12, 13, 14, 15, T. 31 N., R. 12 W.; Section 7 and the north ½ of Section 18, T. 31 N., R. 11 W., M D M.

(b) Beginning at the section corner common to Sections 7 and 18, T. 33 N., R. 9 W. and Sections 12 and 13, T. 33 N., R. 10 W., thence west 20 chains; then north 20 chains; thence west 20 chains; thence north 50 chains; thence east 17 09 chains; then south 32° west, 5.41 chains; thence south 59° east, 13.12 chains; thence south 42° 30′ east, 4 80 chains; thence north 22° east, 5.41 chains; thence north 22° west, 4.90 chains; thence north 75° west, 3.40 chains; thence north 33° west, 2.45 chains; thence north 58° west, 4.47 chains; thence east 15.02 chains; thence south 10° west, 4 66 chains; thence south 22° east, 3.75 chains; thence north 12° east, 8.04 chains; thence east 2.00 chains; thence north 9.36½ chains; thence north 14° 30′ east, 10.58 chains; thence north 20° 30′ west, 0.42 chains; thence east 17 59 chains; thence south 30.00 chains; thence east 20.00 chains; thence south 40.00 chains; thence west 10.00 chains; thence south 20.00 chains; thence west 30.00 chains, to and closing on the starting corner.

(c) Beginning at the northeast corner of the southwest quarter of Section 17; thence south along the east line of said quarter section and the east line of the northwest quarter of Section 20, to the southeast corner of said quarter section; thence west along the south line of said quarter section and the south line of the northeast quarter of Section 19 to the southwest corner of said quarter section; thence north along the west line of said quarter section and the west line of the southeast quarter of Section 18 to the northwest corner of said quarter section; and thence east along the north line of said quarter section and the north line of the southwest quarter of Section 17 to the northeast corner of said quarter section and the point of beginning; being the southwest quarter of Section 17, the southeast quarter of Section 18, the northeast quarter of Section 19, and the northwest quarter of Section 20, T. 33 N., R. 8 W., Mount Diablo base and meridian.

(d) Highway U.S 299 and all land within 500 feet of each side of the centerline of the highway.

(e) All of Section 5, T. 33 N., R. 9 W., M.D.M.

17126. The portion of Shasta County within the following metes and bounds is declared not to be devoted chiefly to grazing:

Beginning at the intersection of the Reading Grant line and the northwest corner of the Anderson-Cottonwood Irrigation District, thence southerly along said Reading Grant line to the first intersection with the boundary of the dissolved Happy Valley Irrigation District; thence counterclockwise around the boundaries of said dissolved Happy Valley Irrigation District to the southeast corner of Section 20, T. 30 N., R. 4 W., M.D.B. and M.; thence directly east along section lines to the westerly

boundary line of the Anderson-Cottonwood Irrigation District; thence counterclockwise around the boundaries of said district to Cottonwood Creek; thence down Cottonwood Creek to its confluence with the Sacramento River; thence counterclockwise along the most easterly and northerly boundary lines of said Anderson-Cottonwood Irrigation District, including a crossing of the Sacramento River, to the point of beginning.

17127 The board of supervisors of the County of Shasta may, if it determines that all or any part of the county has ceased to be devoted chiefly to grazing, provide by ordinance that estray animals may thereafter be taken up on unenclosed property in the county or part of county. It is the intent and purpose of this section that the provisions of law which are generally applicable throughout the state shall be extended to all of the county when the conditions upon which the exceptions were based have ceased to exist.

17128. The act entitled "An act concerning lawful fences, and animals, trespassing upon lawfully enclosed lands," passed March 30, 1850 (Ch. 49, Stats. 1850), and an act entitled "An act concerning lawful fences in the Counties of San Bernardino, Colusa, Shasta, Tehama and Placer," approved April 18, 1859 (Ch. 266, Stats 1859), insofar as the provisions of each of the acts apply to or affect the Counties of Trinity, Shasta, except that portion described in Section 17126, and Siskiyou, are continued in force, except as to goats, swine, or hogs, which may be taken up in the counties when the goats, swine or hogs estray or trespass on lands of others. The provisions of this chapter apply to goats, swine, or hogs in such counties, but in all other respects the acts specified in this section are continued in full force therein, it being determined that the conditions prevailing in the Counties of Trinity, Shasta, except that portion described in Section 17126, and Siskiyou demand the continued application of the acts in the counties until such time as action is taken pursuant to Section 17124.

PART 2. UNLAWFUL MARKING AND BRANDING

CHAPTER 1. GENERAL PROVISIONS

17401. The director may make any and all necessary investigations relative to reported violations of this part pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

17402. Copies of records, audits, and reports of audits, inspection certificates, certified reports, findings and all papers on file in the office of the director shall be prima facie evidence of all matters contained in them, and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

CHAPTER 2. VIOLATIONS

17551. It is unlawful for any person with the intent to steal any horse, colt, jack, jenny, mule, ox, steer, cow, or calf which belongs to another person, or prevent its identification by the true owner to do any of the following:

(a) Mark or brand any such animal with any brand or mark except the recorded brand or brand and mark of the owner of the animal.

(b) Alter or deface a brand or mark on such an animal.

17552. It is unlawful for any person, with the intent to steal any sheep, goat, hog, shoat, or pig, or prevent its identification by the true owner, to do any of the following:

(a) Mark or brand such an animal with any brand or mark except the recorded brand or brand and mark of the owner of the animal.

(b) Alter or deface a brand or mark on such an animal.

17553. It is unlawful for any person to mark any bovine animal by cutting off more than one-half of an ear of the animal.

CHAPTER 3. CRIMINAL PENALTIES

17701. A violation of Section 17551 shall be punished by imprisonment in the state prison for not less than one year nor more than five years.

17702. Except as otherwise provided in Section 17701, any violation of any provision of this part is a misdemeanor.

CHAPTER 4. CIVIL PENALTIES AND REMEDIES

17951. Any person that violates any provision of this part or the regulations which are issued pursuant to it is liable civilly for a penalty in an amount not to exceed a sum of five hundred dollars ($500) for each violation. Any money which is recovered under this section shall be paid into the Department of Agriculture Fund.

17952. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring action for civil penalties in the name of the people of this state in any court of competent jurisdiction in this state against any person violating any provision of this part.

17953. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this part or any regulation which is duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

17954. Any moneys in the Department of Agriculture Fund which were derived under any of the provisions of this chapter may be expended for the administration and enforcement of any of the provisions of the following portions of this code, notwithstanding any other provision of law which limits the expenditure of any such money to some specific purpose or to the administration or enforcement of some specific section of this chapter:

(a) Part 1 (commencing with Section 16301), Division 9.

(b) Chapter 1 (commencing with Section 17401), Part 2, Division 9.

(c) Chapter 4 (commencing with Section 17951), Part 2, Division 9.

(d) Chapter 1 (commencing with Section 18201), Part 3, Division 9.

(e) Division 10 (commencing with Section 20001).

(f) Division 11 (commencing with Section 23001).

(g) Chapter 1 (commencing with Section 24501), Part 1, Division 12.

(h) Chapter 1 (commencing with Section 26401), Part 3, Division 12.

PART 3. SLAUGHTERED ANIMALS

CHAPTER 1. GENERAL PROVISIONS

Article 1. Investigation

18201. The director may make any and all necessary investigations relative to reported violations of this part pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code

18202. Copies of records, audits, and reports of audits, inspection certificates, certified reports, findings and all papers on file in the office of the director shall be prima facie evidence of the matter contained in them and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

Article 2. Civil Remedies

18221. The Attorney General shall upon complaint by the director or may upon his own initiative, if after examination of the complaint and evidence he believes a violation to have

occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this part or any regulation which is duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

CHAPTER 2. PACKERS AND STOCKYARDS

Article 1. Definitions

18351. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

18352. "Packer" means any person that is engaged in any of the following businesses:

(a) Buying livestock in commerce for purposes of slaughter.

(b) Manufacturing or preparing any meat or meat food product for sale or shipment in commerce.

(c) Manufacturing or preparing any livestock product for sale or shipment in commerce.

18353. "Stockyard" means any place, establishment, or facility commonly known as stockyards, conducted, or operated for compensation or profit as a public market, consisting of pens, or other inclosures, and their appurtenances, in which live cattle, sheep, swine, horses, mules, or goats, are received, held, or kept for sale or shipment in commerce.

Article 2. Ownership Against Public Policy

18381. No packer shall own or control, directly or indirectly, through stock ownership or control or otherwise, by himself or through his agents or employees, any interest in a stockyard.

18382. Such ownership or control is hereby declared to be contrary to public policy, as tending to create a monopoly and to interfere with trade and commerce.

CHAPTER 3. WARRANTIES

18501. In the absence of an express warranty, the mere sale of livestock shall not be construed to imply a warranty of such livestock for any particular purpose.

18502. In the absence of any express warranty, the sale of livestock for slaughter, whether the slaughter will be immediate or otherwise, shall not imply a warranty of fitness for any particular purpose or warranty of merchantable quality, notwithstanding the provisions of subdivisions (1), (2), and (5) of Section 1735 of the Civil Code.

CHAPTER 4. MEAT INSPECTION AND SANITATION

Article 1. Definitions

18651. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

18652. "Animals" mean cattle, swine, sheep, goats, and other large domesticated mammals. It does not include small species such as dogs, cats, and rabbits.

18653. "Establishment" includes any premises where any animal is slaughtered or otherwise prepared for food purposes and includes, but is not limited to, any meat cannery, sausage factory, curing or smokehouse, or similar place.

18654. "Federal inspection" means the meat inspection maintained by the Consumer and Marketing Service of the United States Department of Agriculture.

18655. "Health authority" means the health officer, the chief of meat inspection, or other official who is designated by the health officer of any city or county of the state.

18656. "Horse meat" means the meat of, or any meat product which is derived from, any horse, mule, or burro.

18657. "Meat inspector" means a person employed or utilized by the United States Department of Agriculture, the State Department of Agriculture, or a county or city to inspect meat.

18658. "Municipal inspection" means the meat inspection department of each county or each chartered or incorporated city, whose inspection is performed by persons who have passed a regular civil service meat or market inspector's examination or who have been continuously employed since January 1, 1929, and who hold license from the state to practice veterinary science and whose inspection is performed according to meat inspection regulations equivalent, in health value and protection to the public, to those adopted by the Consumer and Marketing Service of the United States Department of Agriculture.

18659. "Slaughter" means kill and prepare for human consumption.

18660. "State inspection" means the meat inspection maintained by the department.

Article 2. General Provisions

18681. The director shall make regulations which are necessary for the execution of this chapter. The regulations adopted pursuant to this chapter may include standards for meat products.

18682. The regulations which are adopted pursuant to this chapter shall conform, so far as possible, to the rules, regulations and standards of the United States Department of Agriculture which govern the inspection, preparation, and processing of meat and meat food products.

18683. It is unlawful for any person to prepare, process, manufacture, or sell any meat or meat food product which fails to conform to the regulations or standards which are applicable to such product.

18684. For the purpose of this chapter, the director may do all of the following:

(a) Employ persons who have passed a civil service meat or market inspector's examination and are skilled in the inspection of meats and meat food products for wholesomeness and healthfulness.

(b) Employ necessary additional employees.

(c) Utilize in the enforcement of this chapter any employee, agent, or equipment of the department.

18685. If slaughtering or carcass preparation or processing of meats and meat products is conducted in an establishment where state inspection is maintained, at hours considered overtime for state employees, or on legal holidays, the owner or operator of the establishment shall, by contract or agreement with the department, make arrangement to defray the additional cost for salaries and expenses for persons employed by the department to conduct the necessary meat inspection work during the overtime periods.

Moneys collected pursuant to this section shall be deposited in the State Treasury to augment the then current appropriation from the General Fund for carrying out this part.

18686. The director in his supervision of approved municipal inspection departments, or establishments, shall transmit all orders to such establishments through local health authorities.

Article 3. Exemptions

18711. This chapter does not restrict or prohibit a livestock producer from slaughtering on his own premises animals which are a part of his own herd for his own consumption or from disposing of the carcasses and products of the slaughtered animals if they satisfy all of the following requirements:

(a) Can be identified as part of his own herd.

(b) Are sound, healthful, wholesome, and fit for human food.

(c) Are disposed of in his locality.

18712. If cattle, sheep swine, or goats slaughtered pursuant to Section 18711 are sold by the producer in the vicinity where produced and slaughtered, he shall attach to the meat or meat products a statement which gives substantially the following:

I hereby certify that the uninspected meat (or meat products as the case may be) to which this certificate is attached is from animals slaughtered by the undersigned, a farmer, on his farm and that at this date it is sound, healthful, wholesome, and fit for human food.

18713. This chapter does not restrict or prohibit the slaughter of animals of the bovine species that are under the age of eight months in establishments which meet the sanitary requirements of the department that are located in counties where meat inspection is not mandatory and the shipment of such slaughtered animals to counties where state inspection or approved municipal or county inspection is maintained, if the animals so slaughtered are inspected and the carcasses are stamped at the county to which shipment is made.

18714. This chapter does not restrict or prohibit the producer or owner of any meat from rendering, curing, or smoking or having rendered, cured, or smoked in his behalf such meat or any portion of it if such meat is for use for purposes other than sale Any such meat or portion of any such meat which has originated from any carcass that has not been officially inspected shall not, however, be rendered, cured, or smoked in an establishment in which federal, state, or municipal meat inspection is maintained.

18715. This chapter does not prohibit or restrict a retail meat market as a part and consequence of, or as an incident to, its retail meat business, from making or preparing or selling any prepared meat, or meat food product that is made or prepared on its own premises from meat which bears the inspected and passed stamp of federal inspection, state inspection, or approved municipal inspection if all of the following requirements are satisfied regarding the prepared meat or meat food product:

(a) It is sold on the premises of the retail meat market.

(b) It is not made or prepared by cooking, curing, drying, smoking, or rendering.

(c) It is not made, prepared, or packaged at any place except the immediate premises where it is sold, unless such place is operated under federal inspection, state inspection, or approved municipal inspection.

18716. An application is not required of any retail meat market which is referred to in Section 18715, or the owner or operator of any such meat market, for the inspection service which is provided for in this chapter. An inspection service is not required before the market or the owner or operator of the market may make, prepare, or sell any prepared meat or meat food product which satisfies the requirements which are prescribed by Section 18715.

18717. This chapter does not prohibit a retail meat market from selling or offering for sale any meat, prepared meat, meat product, or meat food product which bears the inspected and passed stamp of federal inspection, state inspection, or approved municipal inspection.

18718 This chapter does not restrict or prohibit a butcher who is located in a remote section of a county in which the inspection provisions of this chapter are mandatory from

slaughtering animals for sale in the immediate vicinity where they are slaughtered if the butcher is granted an exemption certificate to slaughter animals pursuant to the regulations of the director.

18719. The exemption certificate shall be renewed the first day of January of each year.

18720. If facilities for inspection become available at any time, the director may withdraw the exemption certificate The director may also withdraw such exemption certificate if, in his opinion, the person to whom it is issued has not complied with the regulations which pertain to the slaughtering of animals pursuant to the certificate.

Article 4. General Requirements

18751. An establishment may not be operated in the state for the purpose of slaughtering animals, or for the manufacture of meat food products, unless it is operated pursuant to federal inspection, state inspection or approved municipal inspection.

This section is effective only in counties which have a population of 28,000 or more people.

18752. Recognition is extended to the various municipal inspection departments now existing or which may hereafter be inaugurated in the state.

18753. The requirements which establishments shall meet under municipal inspection shall not be higher than the general average which is actually in force in establishments that have state inspection.

18754. In counties where inspection is not mandatory state inspection may be conducted by the department if requested.

18755. If inspection is requested by the governing body of any county or city and the inspection is inaugurated this chapter shall apply throughout such county or city, as the case may be.

18756. An animal shall not be slaughtered for food purposes in the state except between the hours of seven o'clock a.m. and eight o'clock p.m. of any one weekday.

18757. A person shall not slaughter any animal on any Sunday or legal holiday, unless the director or a local health authority issues a special permit in writing to do so.

18758. It is unlawful for any person to slaughter any horse, mule, or burro in any establishment where cattle, calves, sheep, swine, or goats are slaughtered for human consumption.

18759. It is unlawful for any person to bring horse meat into any establishment where any meat or meat food product is prepared for human consumption from the meat of cattle, calves, sheep, swine, or goats.

18760. It is unlawful for any person to add horse meat to any meat or meat food product which is prepared from the

meat of cattle, calves, sheep, swine, or goats for human consumption in any establishment.

18761. It is unlawful for any person to bring into any establishment, or to use in the preparation of any meat or product in any establishment, any preservative, chemical, or other substance which is not permitted by the California Meat Inspection Regulations.

Article 5. Ante Mortem Inspection

18781. As used in this article, "inspection" means ante mortem inspection.

18782. The director, if he deems it necessary in order to safeguard the public health, shall cause to be made an inspection of any animals before they are slaughtered for food purposes.

18783. Satisfactory facilities shall be provided for conducting the inspection and for separating from the passed animals those which are deemed unfit for immediate slaughter.

18784. If any owner or person that is in charge is about to slaughter for food purposes any animal which the department believes may be affected with disease, the director shall notify the owner or person that is in charge not to slaughter it for food purposes until the inspection is completed.

18785. It is unlawful for any person to slaughter any animal for food purposes after the director notifies such person not to slaughter it. A person is not required to refrain from slaughtering any animal for a period longer than 72 hours.

Article 6. Post Mortem Inspection

18811. As used in this article, "inspection" means post mortem inspection.

18812. The director may provide inspection of all animals which are slaughtered for food purposes in any establishments in the state.

18813. The head, tongue, tail, thymus glands, viscera, and other parts and blood used in the preparation of meat food, meat food products, or medicinal products shall be retained in such a manner as to preserve their identity until after the inspection has been completed. Carcasses and parts of carcasses which are found to be sound, healthful, and wholesome after inspection and otherwise fit for human food shall be passed and may be marked in one of the following ways:

(a) "Cal. inspected and passed".

(b) With the inspection legend of an approved municipal inspection department, to which has been added the words "Cal. approved".

The mark may also include any number which is given the establishment.

18814. Each carcass or part of a carcass which is found on inspection to be unsound, unhealthful, unwholesome, or otherwise unfit for human food, shall be marked conspicuously by the inspector at the time of inspection with one of the following:

(a) The words "Cal. inspected and condemned".

(b) The condemned brand of an approved municipal inspection department.

18815. Every carcass, or part of a carcass, which is condemned pursuant to this article shall, under the supervision of the meat inspector, be rendered unfit for human consumption in a manner which is approved by the director.

Article 7. Request for State Inspection

18841. As used in this article:

(a) "City" means any city which requests inspection services pursuant to Section 18755.

(b) "County" means any county that has a population of 28,000 or more persons or which requests inspection services pursuant to Section 18755.

18842. Any person that desires to engage in slaughtering animals or manufacturing meat food products for human consumption in any county or city, shall apply to the director or the local health authority for the inauguration of an inspection service in the establishment where the animals are to be slaughtered or meat food products manufactured.

18843. The application shall be in writing and addressed to the director or local inspection department. In the application, the applicant for inspection shall agree to comply with this chapter and to maintain the establishment in a clean and sanitary manner.

18844. The director or local health authority, upon receipt of the application, shall make an inspection of the establishment.

18845. If the establishment, after inspection, is found clean and sanitary, and properly equipped to conduct its business pursuant to the regulations of the department, the director or local health authority shall inaugurate an inspection service in it, and shall give it an official number, to be used to mark the meat and meat food products of the establishment.

18846. An establishment which is given an official number shall be known as "official establishment No. _____," and no fees, except for overtime work or for work on legal holidays by the meat inspector, shall be collected by the state for the purpose of carrying out Sections 18751, 18754, 18844, 18845, and 18903.

Article 8. Sanitation

18871. Each establishment where animals are slaughtered, or where meat or meat food products are prepared or proc-

essed for human consumption, shall be maintained and operated in a clean and sanitary manner and inspection conducted pursuant to this chapter and the regulations of the director.

18872. If an establishment which has state inspection or municipal inspection is not maintained and operated, or the inspection is not conducted, in the manner prescribed by Section 18871, the director may suspend inspection in the establishment.

18873. Every vehicle which is used by any establishment which operates under federal, state, or municipal inspection for transporting the dressed carcasses of animals intended for human consumption, parts of such carcasses, meats, or meat products, inspected and marked pursuant to this chapter shall be maintained in a clean and sanitary condition and shall be regularly inspected by a meat inspector stationed at the establishment pursuant to the regulations of the agency that conducts the inspection in the establishment.

18874. It is unlawful for any person to maintain a slaughterhouse that is unclean or insanitary.

Article 9. Identification Devices

18901. As used in this article, "identification device" means any of the following:

(a) Any of the marks, stamps, tags, labels, or other identifying devices which are provided for in this chapter, or by the regulations which are adopted pursuant to this chapter by the director, or any carcass, any part of a carcass, or any food product, or container of any food product.

(b) Any certificate which is authorized or required by this chapter, or by the regulations of the director.

18902. The label on any meat or any meat product which is sold in this state shall conform to the requirements which are prescribed by the laws of this state, and the regulations which are adopted pursuant to the laws of this state, which relate to the labeling of meat or meat products.

18903. A person shall not sell any dressed carcass of any animal which is intended for food purposes, or any prepared meat or meat food product within the state unless it bears the "inspected and passed" stamp of federal inspection, state inspection, or approved municipal inspection, applied at the establishment where the animal was slaughtered and at the establishment where the meat or meat food product was prepared or manufactured.

This section is effective only in counties which have a population of 28,000 or more people.

18904. Upon the approval by the director of an establishment which is operating under municipal inspection, the words "Cal. approved" may be added to the stamp in use in such

establishment. The stamp shall be accorded the same recognition as "Cal. inspected and passed".

18905 If any meat or meat food product that has been inspected pursuant to this chapter and marked "Inspected and Passed," is placed or packed in any can, pot, tin, canvas, or other receptacle or covering in any establishment where inspection is maintained, the person that prepares the meat or meat food product shall cause a label to be attached to the receptacle or covering under the supervision of a meat inspector. The label shall state that the contents have been "Inspected and Passed" pursuant to this chapter.

18906. An inspection of any meat or meat food product which is deposited or enclosed in a can, pot, tin, canvas, or other receptacle or covering in any establishment where inspection is maintained pursuant to this chapter is not complete until the meat or meat food product has been sealed or enclosed in such receptacle or covering under supervision of a meat inspector.

18907. Any meat or meat food product which is deposited or enclosed as provided in Section 18906 shall not be sold by any person in this state under any false or deceptive name. Established trade names that are approved by the director may be used if they are both:

(a) Usual to such products

(b) Not false or deceptive.

18908. The director shall confiscate and cause to be destroyed every label which is found to be false or deceptive.

18909. The dressed carcass of any animal which is intended for human consumption, any part of such a carcass, meat, or meat food product, which is inspected and marked pursuant to this chapter, may be transported or sold anywhere in the state without restriction, except that which is imposed upon meat or meat food products which bear the inspection stamp of the United States Department of Agriculture.

18910. It is unlawful for any person, except an employee of the United States Department of Agriculture, the department, or a municipal inspection department, to do any of the following:

(a) Possess, keep, or use any mark, stamp, or brand which is provided or used for marking, stamping, or branding the carcass of any animal, any part of such a carcass, any meat or any meat food product.

(b) Possess, keep, or use any mark, stamp, or brand which has upon it a device or words the same or similar in character or import to any mark, stamp, or brand which is provided or used by the United States Department of Agriculture, the department, or of any municipal inspection department for marking, stamping, or branding the carcass of any animal, or any part of such a carcass, which is intended for food purposes, meats, or meat food products.

18911. It is unlawful for any person to forge, counterfeit, simulate, or falsely represent any identification device.

18912. It is unlawful for any person, without proper authority, to use, fail to use, detach, or fail to detach any identification device.

18913. It is unlawful for any person to knowingly or wrongfully alter any identification device.

18914. It is unlawful for any person to deface or destroy, or fail to deface or destroy, any identification device.

18915. It is unlawful for any person to prepare, process, manufacture, or sell any meat or meat food product which is mislabeled.

Article 10. Dyes, Artificial Colors, and Adulteration

18941. This article does not prevent the use of any casing which contains harmless dye on any meat product that is not comminuted. Any such transparent or semitransparent casing shall not, however, have an amber or smoked color of such shade, degree, or intensity as to give a false impression with respect to smoking or degree of smoking of the meat or meat product.

18942. For the purpose of this chapter, any meat, meat product, sausage casing, or other casing that contains any dye or artificial coloring shall be deemed adulterated and the director shall render it unfit for human consumption with a suitable denaturing agent.

18943. It is unlawful for any person to sell any meat or meat product, sausage casing or other casing that contains dye or artificial coloring.

18944. It is unlawful for any person to prepare, process, manufacture, or sell any meat or meat food product which is adulterated.

18945. Notwithstanding the provisions of this article, domestic animal fats may be used in the manufacture of margarine or shortening which contains harmless coloring.

Article 11. Seizure of Meat or Meat Food Products

18971. The director may seize and retain any meat or meat food product that is slaughtered or manufactured in violation of this chapter. The meat or meat food product shall be held under retained tags until released by the director or by a court of competent jurisdiction.

18972. It is unlawful for any person to remove retained tags or dispose of any product which is retained and held until authorized to do so by the director or by a court of competent jurisdiction.

18973. The director may seize and destroy for food purposes any meat or meat product wherever found to which any

preservative, chemical, or other substance not permitted by the California Meat Inspection Regulations has been added.

18974. The director may seize and destroy for food purposes any meat or meat food product which is prepared for human consumption from the meat of cattle, calves, sheep, swine, or goats, wherever found, to which horsemeat has been added.

18975. Since it cannot be determined for certain, by any present known method of inspection, whether meat is unwholesome unless the organs and other tissues of an animal are inspected when slaughtered, and as meat and meat products which are derived from uninspected animals may be unfit for human food, the director, except as otherwise provided in Section 18976, shall seize and destroy for human food purposes any meat or meat food product that does not bear the "Inspected and Passed" stamp, brand, mark, or label which is required by this chapter.

18976. Section 18975 does not affect any of the following:

(a) The transportation of any dead and condemned carcass of any animal to a rendering plant.

(b) The transportation of any meat or meat product to which a statement is attached in accordance with the provisions of Section 18712.

Article 12. Rendered, Cured, or Smoked Meat Records

19001. As used in this article, "records" mean the rendered, cured, or smoked meat records which are required to be kept by Section 19002.

19002. The operator of an establishment who renders, cures, or smokes meat for a producer or owner of meat shall keep accurate and sufficient records of the amount and kind of meat rendered, cured, or smoked for each producer or owner.

19003. The records shall be available for inspection at all times by the director or his authorized representative.

19004. The records shall give the name and address of each person for whom meat is rendered, cured, or smoked.

Article 13. Horsemeat Records

19031. As used in this article, "horsemeat records" mean the records which are required to be kept by Section 19033.

19032. This article does not apply to any of the following:

(a) Retail sales of any fresh or processed meat or meat product in a quantity of five pounds or less to any one person.

(b) Any canned or prepackaged meat or meat product in any package of five pounds or less which is conspicuously labeled to show the percentage by weight of horse, mule, or burro meat that is contained in the package.

19033. Any person that slaughters any horse, mule, or burro, or who by purchase or otherwise acquires possession of the meat of any horse, mule, or burro, and that sells or otherwise disposes of such meat, shall make and keep for one year a correct record, separate from all other business, of each such transaction, recorded at the time of the transaction, which shows all of the following:

(a) The quantity of meat acquired or disposed of.

(b) The names and addresses of the parties to the transaction.

(c) The date.

(d) The place to which such meat was shipped or delivered.

(e) The name of the person that made the shipment or delivery.

19034. All horsemeat records shall be open at all times during business hours to the inspection of the director, any health officer or sanitation inspector, or any peace officer.

19035. It is unlawful for any person that is required to keep horsemeat records to fail to keep such records, or to fail or refuse to permit an authorized inspection of the horsemeat records.

19036. Any violation of any provision of this article is a misdemeanor.

CHAPTER 5. FOREIGN COLD STORAGE MEAT

Article 1. Definitions

19201. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

19202. "Foreign cold storage meat" means any cold storage meat that has been imported into this state from without the United States. It does not include cold storage meat which is produced in the Dominion of Canada and imported from the Dominion of Canada pursuant to the laws of the United States.

19203. "Meat" includes dressed rabbits and dressed poultry.

Article 2. General Provisions

19231. The director may make such regulations as are reasonably necessary to enforce this chapter.

19232. Any money which is collected under the provisions of this chapter shall be paid into the State Treasury to the credit of the General Fund.

Article 3. Licenses

19261. The director, upon application of any person importing or selling at wholesale foreign cold storage meat,

shall issue a license to such applicant upon the payment of an annual fee of twenty-five dollars ($25).

19262. All licenses shall expire on June 30th of each year.

19263. A license shall not be issued for a period of less than one year.

19264. It is unlawful for any person to import or sell at wholesale any foreign cold storage meat unless he has a license to do so issued by the director.

Article 4. Inspection

19291. The director shall cause all foreign cold storage meat to be inspected upon arrival.

19292. The director shall establish such bacteriological or chemical standards as he deems proper to determine the wholesomeness and fitness of foreign cold storage meat for human consumption.

19293. The director may do all of the following:

(a) Prescribe such inspection fees as may be necessary to defray the actual cost of inspection.

(b) Enter upon any premises to make inspections and investigations or examinations of books, papers, or documents.

19294. All foreign cold storage meat which is inspected and passed for food shall be marked with a tag or brand of such size and design as the director shall establish in the regulations which are adopted pursuant to this chapter.

19295. The tag or brand shall bear the words "foreign cold storage meat inspected and passed by the State Department of Agriculture." The tag or brand shall not be removed until such meat is cut for retail. Foreign cold storage meat which is inspected and passed for food and so tagged or branded is at all times subject to reinspection by the director.

Any foreign cold storage meat which is found unfit for human consumption shall be marked conspicuously with the words "unfit for human consumption."

19296. A person shall not sell for human food any foreign cold storage meat which has been found to be unfit for human consumption and is so marked pursuant to Section 19295.

19297. It is unlawful for any person to import or sell at wholesale any foreign cold storage meat without first submitting it to inspection and examination at the port of entry.

Article 5. Reports and Accounts

19321. Every wholesaler, dealer, or importer that sells, handles, or furnishes any foreign cold storage meat shall forward by registered mail to the director a certified statement on the first day of July, October, January, and April of all sales of such meat, except sales to retailers, hotels, restaurants, lunchrooms, dining cars, or boardinghouses, made by him during the last preceding three months and in each case shall

state the name and address of the purchaser and the amount of each sale.

19322. If rabbits and poultry are shipped or handled together, all accounts thereof shall be segregated as to each such item.

DIVISION 10. CATTLE PROTECTION

CHAPTER 1. DEFINITIONS

20001. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

20002. "Animal," "calf," and "cattle" mean only bovine animals.

20003. "Brand" means a design which is permanently impressed on the hide of an animal by burning with acid, a chemical compound, or a hot iron.

20004. "Brand" includes "brand and mark" if a mark is recorded or used with a brand.

20005. "Bureau" means the Bureau of Livestock Identification.

20006. "Carcass" means the carcass of an animal.

20007. "Cattle record brand" means a brand used to classify an animal for the purpose of keeping records which relate to the animal.

20008. "Chief" means the Chief of the Bureau of Livestock Identification.

20009. "Hide" means the hide of an animal.

20010. "Inspector" means a hide and brand inspector. It includes the chief, field coordinator, supervising hide and brand inspectors, investigators, and persons employed on a collaborative basis pursuant to Section 483 to carry out the provisions of this division.

20011. "Mark" means a design which is cut into or from the ear, dewlap, or other part of an animal.

20012. "Vent" means a design which is permanently impressed on the hide of a branded animal for the purpose of voiding the prior brand.

CHAPTER 2. GENERAL PROVISIONS

Article 1. Application

20151. The provisions of this division, including the payment of fees, are applicable to all state and county institutions which are engaging in livestock operations.

Article 2. Regulation

20171. The director may make such regulations as may be reasonably necessary to carry out this division and to protect the cattle of this state from theft and misappropriation.

20172. The regulations shall be published in one or more stock journals of general circulation in the state before they become effective.

Article 3. Investigations

20201. The director may make any necessary investigations relative to reported violations of this division, pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

20202. Copies of records, audits and reports of audits, inspection certificates, certified reports, findings and all papers on file in the office of the director are prima facie evidence of the matters which are contained in them, and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

Article 4. Criminal Penalties

20221. Every person that violates any provision of this division is guilty of a misdemeanor and upon conviction shall be punished by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500), or by imprisonment of not less than 10 days nor more than 6 months, or by both such fine and imprisonment. Each violation during any day constitutes a separate offense.

20222. Any person that uses an unrecorded, forfeited, canceled or suspended brand shall pay a penalty of twenty-five dollars ($25) which is in addition to any other penalty which is provided by law.

Article 5. Civil Penalties and Remedies

20251. Any person that violates any provision of this division, or any regulation which is issued pursuant to it, is liable civilly for a penalty in an amount not to exceed a sum of five hundred dollars ($500) for each violation. Any money which is recovered under this section shall be paid into the Department of Agriculture Fund.

20252. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring an action for civil penalties in the name of the people of this state in any court of competent jurisdiction in this state against any person violating any provision of this division.

20253. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this division or any regulation which is duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

Article 6. Collection and Disposition of Money

20281. The department shall, at least once a month, report to the State Controller the total amount of money collected for fees, penalties, judgments, or otherwise. It shall, at the same time, pay into the State Treasury the entire amount of such receipts. The receipts shall be credited to the Department of Agriculture Fund.

20282. Any money in the Department of Agriculture Fund derived under any of the provisions of this division may be expended for the administration and enforcement of any of the provisions of the following portions of this code, notwithstanding any other provision of law which limits the expenditure of any such money to some specific section, article, or chapter of this division:

(a) Part 1 (commencing with Section 16301), Division 9.

(b) Chapter 1 (commencing with Section 17401), Part 2, Division 9.

(c) Chapter 4 (commencing with Section 17951), Part 2, Division 9.

(d) Chapter 1 (commencing with Section 18201), Part 3, Division 9.

(e) Division 10 (commencing with Section 20001).

(f) Division 11 (commencing with Section 23001).

(g) Chapter 1 (commencing with Section 24501), Part 1, Division 12.

(h) Chapter 1 (commencing with Section 26401), Part 3, Division 12.

20283. A civil action may be brought by the department to recover any fee, penalty, or other money that becomes due pursuant to this division.

Chapter 3. Enforcement

Article 1. Bureau of Livestock Identification

20401. There is in the department the Bureau of Livestock Identification.

20402. The bureau is administered by a chief who is appointed by the director pursuant to the State Civil Service Act, Part 2 (commencing with Section 18500), Division 5, Title 2 of the Government Code.

20403. The chief shall administer and enforce this division and shall perform such other duties within the scope of his employment as the director may require.

20404. The chief is responsible to the director for the proper administration and enforcement of this division.

20405. The chief shall assist in the prosecution of persons charged with violation of any provision of this division.

20406. Subject to the approval of the director, the chief shall appoint such inspectors and other assistants as may be necessary to carry out this division.

20407. Subject to the approval of the director, the chief may employ investigators to investigate reported thefts or losses of cattle.

20408. All money which is received by any inspector or other employee pursuant to this division shall be forwarded to the department at least biweekly.

Article 2. Inspectors and Other Peace Officers

20431. Each inspector has the power of a peace officer in carrying out this division.

20432. Each inspector may enforce the provisions of Chapter 5 (commencing with Section 484), Title 13, Part 1 of the Penal Code, with reference to theft of any animal or carcass.

20433. Each sheriff, member of the California Highway Patrol, and other peace officer shall cooperate and assist in enforcing this division.

20434. Each sheriff or other officer to whom a complaint which relates to the loss or theft of cattle is made shall forthwith transmit to the bureau a report which shows all of the following:

(a) The number of animals that are involved.

(b) A description of the animals, including any marks and brands on them.

(c) The date of the loss or theft.

(d) Any other information which the chief may by regulation require.

20435. If an inspector or other peace officer finds any animal, hide, carcass, or portion of a carcass in the possession of any person that he has reason to believe is not the legal owner or entitled to the possession of it, he shall take possession of it or notify the person in possession where to leave it pending investigation.

20436. A person shall not, without a release from the inspector or peace officer, dispose of the animal, hide, carcass, or portion of a carcass within 30 days after receiving the notice

pursuant to Section 20435 or until it is released by the inspector or peace officer.

20437. A hide or carcass shall not be held pursuant to Section 20435 for more than 30 consecutive days, unless the notice of seizure is renewed by the inspector or peace officer.

20438. Any inspector or peace officer may stop any conveyance which is transporting any animal, hide, carcass, or portion of a carcass on any public thoroughfare for the purpose of making an investigation and may take possession of the animal, hide, carcass, or portion of a carcass and hold it for not to exceed 30 days pending an investigation.

20439. Any expense which is incurred in caring for any property which is seized pursuant to this article shall be paid by the owner of the property. The cost of caring for the property so held is a lien upon the property. The lien may be enforced in the manner which is prescribed in Section 3052 of the Civil Code.

20440. Any animal which is seized by or comes into the possession of an inspector pursuant to this division shall be disposed of as provided in Chapter 7 (commencing with Section 17001), Part 1, Division 9 of this code.

Article 3. Livestock Identification Advisory Board

20461. As used in this article, "board" means the Livestock Identification Advisory Board.

20462. There is in the department the Livestock Identification Advisory Board, which consists of five members.

20463. The director shall appoint the members to the board as follows:

(a) Two shall be engaged in the beef cattle industry.

(b) Two shall be engaged in the dairy industry.

(c) One shall be engaged in the livestock marketing business.

20464. In making his selection of the membership of the board, the director shall take into consideration the recommendations of organizations and associations of cattlemen, dairymen, livestock marketing agencies, and general farm organizations.

20465. The term of office of the members of the board is four years. Any vacancy which occurs during an unexpired term shall be filled by appointment for the unexpired term.

20466. The members of the board shall serve without compensation but are entitled to their traveling expenses in the same amount as is provided for other nonsalaried board and commission members who serve the state.

20467. The board shall be advisory to the chiefs of the Division of Compliance and of the Bureau of Livestock Identification in the department.

20468. The members of the board shall confer with all of the following regarding matters which are involved in the

administration of the enforcement functions of the Bureau of Livestock Identification:

(a) The chiefs of the Division of Compliance and of the Bureau of Livestock Identification.

(b) Livestock producers and marketers.

(c) Farm and livestock organizations.

(d) Other cooperating agencies.

20469. The board shall make recommendations to the chiefs of the Division of Compliance and of the Bureau of Livestock Identification relative to all of the following:

(a) Improvements and changes in the administration and enforcement of the hide and brand laws and regulations which are adopted pursuant to such laws.

(b) Procedures which are followed by the Bureau of Livestock Identification.

(c) Curbing of livestock thefts.

(d) Legislation which is designed to improve the functioning of the bureau.

20470. The board shall meet at the call of its chairman. It shall meet at least once in every three months.

20471. The meetings of the board shall be held in the offices of the department at Sacramento, or elsewhere within the state, if necessary for the proper performance of its duties.

20472. All meetings of the board shall be open and public.

20473. All records of the board shall be open to inspection by the public during regular office hours.

CHAPTER 4. BRANDS AND BRAND RECORDS GENERALLY

Article 1. Requirements

20601. It is the ultimate object of this division to provide for statewide recordation of brands with the entire state as one branding district.

20602. Brands for the purpose of establishing or indicating ownership of cattle may be recorded pursuant to this chapter. Brands for other purposes shall not be recorded.

20603. The chief shall, by regulation, prescribe the location on the animal where different types of brands, including recorded brands and cattle record brands, may be applied.

20604. It is unlawful for any person to brand any animal except in accordance with the provisions of this chapter.

20605. It is unlawful for any person to use an unrecorded, forfeited, or canceled brand.

20606. It is unlawful for any person to apply a recorded brand in any location on the animal except that which is specified on the brand registration certificate.

The use of a brand on any location except that which is specified on the brand registration certificate is the same as the use of an unrecorded brand.

20607. It is unlawful for any person to use a brand on cattle indicating ownership unless the cattle are owned by him or he has been authorized by the owner of the cattle and the brand is recorded under the owner's name and is on file with the Bureau of Livestock Identification.

20608. Possession or ownership of cattle with an unrecorded, forfeited, or canceled brand is prima facie evidence that the person in possession or the owner of the cattle has branded them with such brand.

20609. In every suit at law or in equity, if the title to any animal is involved, the brand of the animal is prima facie evidence that the owner of the brand was the owner of the animal at all times during which the brand was duly recorded as provided in this code.

The right of any person to use such brand may be established by a certified copy of the brand records on file in the bureau.

Article 2. Venting Brand Requirements

20631. Venting a brand consists of rebranding a branded animal, by the owner of the animal, for the purpose of voiding his prior brand.

20632. A vent brand may be applied on the loin of an animal which corresponds to the side of the owner's registered brand.

20633. Only the owner's recorded brand may be used as a vent. Recordings shall not be issued which allow the use of any other brand as a vent.

20634. A recording shall not be granted for a V brand on the left shoulder of an animal.

Article 3. Applications

20661. Any person that desires to use a brand in this state may acquire the right to do so pursuant to this chapter. Application forms for this purpose shall be furnished by the bureau upon request.

20662. To conform to the objective of this chapter, all applications for the recordation of a brand shall be accepted by the chief only if they are not in conflict with any other recorded brand in this state.

20663. An application for the recordation of a brand shall be filed with the bureau.

20664. The application shall contain all of the following:

(a) A facsimile of the brand which is sought to be recorded.

(b) A statement of the location on the animal where the brand is to be applied.

(c) The name and address of the applicant.

(d) The signature of a parent or guardian if the applicant is under 21 years of age.

20665. A mark may be recorded only with a brand. If a mark is sought to be recorded with a brand, the application shall also contain a diagram which shows the manner of marking.

20666. Upon receipt of an application, the bureau shall examine the application and compare the design applied for with brands that are already of record.

20667. An application shall not be accepted for the recordation of a brand which consists only of a mark.

20668. An application shall not be accepted for the recordation of a brand if the brand is to be applied to any of the following:

(a) Either jaw.
(b) The face.
(c) The nose.
(d) Either loin.
(e) The breeching of an animal.

20669. An application shall not be accepted for the recordation of a brand which is accompanied by a mark if the use of the mark involves cutting off more than one-half of an ear.

20670. An application shall not be accepted for the recordation of a brand except upon the payment of the fee for the recordation of the brand.

20671. If the application does not conform to the requirements of, or cannot be accepted pursuant to, this chapter, a statement of the reason why it cannot be accepted shall be transmitted to the applicant.

Article 4. Recordation

20691. The bureau shall maintain a record of all brands that are recorded, except forfeited or canceled brands which are subject to Section 20701.

20692. Any person, upon request to the bureau, shall be furnished information as to any recorded brand.

20693. A brand shall not be recorded if it consists of any letters or characters which are applied in more than one branding location on the animal.

20694. A brand shall not be recorded for any person under 21 years of age unless the application is countersigned by his parent or guardian.

20695. Recordation of a brand consists of entering in the brand records the matters which are contained in the application, together with the date of recordation, and the execution by the bureau of a cattle brand registration certificate.

20696. The original cattle brand registration certificate shall be kept on file in the bureau. A duplicate certificate shall be issued to the person in whose name the brand is recorded.

20697. The issuance to a person of a cattle brand registration certificate confers upon the person to whom it is issued both of the following:

(a) The right to use the brand until the right to use it is forfeited or the record of the brand is canceled pursuant to this chapter.

(b) The right to use the same brand on the same location on horses, mules, burros, sheep, and swine if not in conflict with a previously recorded brand.

20698. The right to use a brand is a property right and may be sold or otherwise transferred.

20699. A transferee of a brand shall not use the brand until the transfer has been recorded by the bureau.

20700. The record of any brand may be canceled at any time upon the written request of the person in whose name it is recorded.

20701. The records of brands which have been forfeited or canceled for more than five years may be removed from the files and destroyed.

Article 5. Suspension and Forfeiture

20721. The right to use a recorded brand is lost by the failure to pay the fees which are required by Article 6 (commencing with Section 20751) of this chapter.

20722. If the renewal fee which is required by Article 6 (commencing with Section 20751) of this chapter is not paid by January 30th of the year after the recordation of the brand, or by January 30th of the year which follows the last year for which renewal fee has been paid, the right to use the brand is suspended as of January 1st of such year.

20723. If the right to use a brand is suspended for more than one year, it becomes forfeited on January 1st following the year of suspension. The brand may, thereafter, be re-recorded by the former owner or it may be applied for by any other person pursuant to this chapter.

20724. The right to use any brand which conflicts with any brand which has a prior cattle brand registration certificate number pursuant to this chapter is forfeited. All recordations shall be on a statewide basis.

Article 6. Fees and Penalties

20751. The fee for each application for recording a brand is five dollars ($5).

20752. The fee entitles the applicant to the recordation of one brand and one duplicate brand registration certificate. The fee for each additional duplicate is two dollars ($2).

20753. The payment of the fee for recording a brand confers upon the owner of the brand the right to use it until the end of the calendar year in which the brand is recorded

20754 Except as otherwise provided in Section 20755, the owner of a brand shall, on or before January 30th of

each year after its recordation, pay to the bureau an annual renewal fee of three dollars ($3) for the right to continue to use the brand.

20755. The owner of a recorded brand may, on or before January 30th of any year, pay in advance to the bureau a sum which is a multiple of three dollars ($3). The payment entitles him to use the brand for any number of years, but not to exceed 10 years, at the rate of three dollars ($3) per year from and after January 1st of such year. If such advance payment is made, annual renewals for each of the years within the period for which advance payment has been made are not required.

20756. If the right to use a brand is suspended for failure to pay the renewal fee, it may be reinstated within the calendar year in which the suspension occurs upon the payment of a reinstatement fee of six dollars ($6).

20757. A person may not re-record a forfeited brand unless he makes an affidavit of nonuse during the period of suspension and forfeiture or unless his application for re-recording the forfeited brand is accompanied by a penalty of twenty-five dollars ($25) for using a forfeited brand. The fee for re-recording a forfeited brand is five dollars ($5).

20758. The fee for recording the transfer of a brand, including a new certificate, is five dollars ($5).

20759. If the applicant fails to submit within 60 days of the date of receipt by the department of application for recording or re-recording a brand, or for recording the transfer of a brand, any information or document which is required by this chapter, the application lapses. The applicant is not entitled to the recording or re-recording of the brand, or the recording of the transfer of the brand, unless and until he submits a new application and another fee for it.

Article 7. Similar Brands

20791. If the brand records on file with the bureau disclose that two or more brands have been recorded which appear to be so similar as to be misleading or conflicting, the chief may, and upon request of the owner of one of such brands he shall, cause an investigation to be made and a hearing held upon the matter.

20792. Notice of the hearing shall be given to each interested person at least 10 days prior to the hearing.

20793. At the hearing, the chief shall first determine if the brands are so similar as to be misleading or conflicting. The chief shall dismiss the proceedings as to any brands which he finds are not so similar as to be misleading or conflicting.

20794. If, at the hearing, the chief finds that two or more brands have been recorded which are so similar as to be misleading or conflicting, he shall determine which of the conflicting brands has been of record for the longest consecutive

period of time. The owner of such brand has the right to continue to use his brand. The conflicting brand shall be canceled.

20795. The owner of a recorded brand may request the chief to make an investigation if there are cattle other than his own which bear a brand so similar to such owner's brand as to be misleading or conflicting.

20796. If, after the investigation, the chief finds sufficient cause for such action, he may require that the cattle, other than those of the owner of the brand which is recorded, be branded with some other brand which is approved by the chief and recorded pursuant to this chapter.

20797. Any person that is aggrieved at any determination of the chief pursuant to this article may appeal to the director within 15 days. The director may affirm, reverse, or modify the determination of the chief.

CHAPTER 5. CATTLE RECORD BRANDS

20901. Notwithstanding any other provision of this division, cattle may be branded pursuant to this chapter.

20902. A cattle record brand shall be used only for purposes of identification. It is not evidence of ownership.

20903. A cattle record brand shall not be recorded.

20904. A cattle record brand may be placed upon either loin in front of the hip and behind the ribs or on the right jaw of the animal.

20905. A cattle record brand for dairy cattle of the Holstein, Jersey, Guernsey, Ayrshire, Brown Swiss, Dutch Belted, and Milking Shorthorn breeds may be placed upon the right hip rather than upon the loin.

20906. A cattle record brand consists of:

(a) Consecutive numerals, letters, or combination of numerals or letters if placed upon the loin or right jaw of an animal.

(b) At least three consecutive numerals which constitute a number greater than 200 if placed upon the right hip of an animal.

CHAPTER 6. INSPECTION OF CATTLE

Article 1. Requirements, Generally

21051. Except as otherwise provided in this chapter, cattle shall be inspected prior to any of the following:

(a) Transportation out of an area which has full point of origin inspection.

(b) Transportation out of the state.

(c) Transportation across an established cattle movement zone line or boundary.

(d) Transportation by or to a new purchaser.

(e) Slaughter.

(f) Release or sale from a public stockyard, public saleyard, or public or private cattle sales market.

(g) Release from a posted stockyard or posted saleyard.

21052. It is unlawful for any person that owns or has custody of cattle to transport such cattle or to slaughter, release, or sell such cattle without the inspection which is required by Section 21051.

For the purposes of this section, a common carrier which transports cattle does not have custody of the cattle.

21053. Inspection is not required in any of the following cases where sale is not made and cattle are shipped by the owner for purposes other than marketing or slaughter:

(a) The cattle are accompanied by a certificate of ownership and are moved only between points in the same county or to a point in a county the boundary line of which passes through the ranch to or from which the animals are removed by the owner for transportation

(b) The cattle are moved only between points in a cattle movement zone which is established by the director pursuant to Article 3 (commencing with Section 21111) of this chapter. Inspection may, however, be required pursuant to Article 4 (commencing with Section 21141) of this chapter.

21054. Inspection is not required in cases where cattle are being transported to or from a fair or livestock exhibit if the shipment is accompanied by a certificate of the manager or an official of the fair or exhibit, which shows all of the following:

(a) Any brands and marks.

(b) The names of the shipper and consignee.

(c) The point of origin and destination of the shipment.

21055. Inspection is not required prior to slaughter by licensed slaughterers at slaughterhouses where the chief determines it is impossible or impractical to have inspection prior to slaughter. The chief shall, from time to time, designate which slaughterhouses are within this category. Slaughterers at such slaughterhouses shall keep the records which are required by Section 22045. They shall also keep the hides of animals which are so slaughtered until the hides are inspected or released.

21056. Inspection is not required prior to slaughter of an animal by the producer of the animal pursuant to Section 22002. The hides of such animals shall, however, be retained as provided in Section 21455 and records shall be kept as provided in Section 22008.

21057. Inspection is not required prior to slaughter of any calf which is under the age of eight months by the producer of the calf. If, however, it is transported, the carcass of such animal with the hide on it shall be inspected en route or at point of destination.

21058. Inspection is not required prior to transportation to a point and from an area designated by the chief

pursuant to Section 21081 as one in which inspection may be made en route or at destination.

21059. Any person that receives cattle from any cattle sale market, either public or private, including public stockyards other than posted stockyards where sales of cattle are held, may, upon request and upon payment of a fee of five cents ($0.05) per head before accepting delivery of any cattle from such market or stockyard, have a reinspection of brands made.

Article 2. En Route or Destination Inspection

21081. If the chief determines that in any particular area in which there is operating a licensed slaughterhouse, public salesyard, or stockyard, or other cattle sales market, the volume of shipments or other factors render it impossible or impractical to have inspection prior to shipment, he may, by order, authorize inspection en route or at the point of destination.

21082. The chief shall transmit copies of the order to the peace officers in the area which is affected by the order and to the California Highway Patrol.

21083. The order shall specify the point to which and the area from which the shipments may be made.

21084. All cattle which are shipped pursuant to this article shall be accompanied by a certificate of ownership or certificate of consignment The original certificate shall be surrendered to the inspector prior to the inspection of the cattle.

21085. The certificate of consignment or certificate of ownership shall show all of the following:

(a) The date

(b) The loading point.

(c) The address of the owner

(d) The destination of the shipment.

(e) The number and description of the cattle including their brands if any.

(f) The motor vehicle license number of the vehicle which transports the cattle.

21086. A copy of the certificate shall be kept on file in the office of the seller for a period of one year after the sale.

21087. The certificate of consignment may be attached to and become a part of the brand certificate which is issued by the inspector, in lieu of the information which is required by Section 21203.

Article 3. Cattle Movement Zones

21111. The director shall, by regulation, establish cattle movement zones.

21112. In formulating a cattle movement zone, the director shall consult with the Livestock Identification Advisory

Board. He may consult with interested parties in each proposed zone.

21113. A cattle movement zone may consist of one or more counties or geographical areas.

Article 4. Point of Origin Inspection Area

21141. The director shall, by regulation, provide that full point of origin inspection shall be maintained in any county or geographical area which is described within the regulation if at least 65 percent of the persons that own cattle within the county or geographical area are present at a public hearing which is called by the director for the consideration of the regulation and vote in favor of full point of origin inspection.

21142. At the public hearing, before the cattle owners vote on whether or not they desire full point of origin inspection, the director shall inform them of all relevant facts and of the cost of full point of origin inspection.

21143. Notwithstanding any other provision of this article, the director, under cooperative agreement with any individual, association, or board of supervisors, may provide full point of origin inspection in any county or geographical area.

Article 5. Procedure

21171. Inspection of cattle consists of the examination of the cattle for all brands and marks, and, in the case of unbranded cattle, for natural marks, sex, and breed. It also includes the issuance of a certificate of inspection.

21172. If inspection is required, the person that requests the inspection shall notify the inspector. The inspector shall make his inspection as soon as practicable after he is notified.

21173. If requested to do so, the person in charge of the animals shall furnish the inspector with a list of the brands and marks on them to the best of his ability.

21174. If, upon inspection, there is found any animal which does not bear the recorded brand of the person that presents the animal for inspection, such person shall show the inspector a bill of sale, certificate of inspection, or other proof of ownership of such animal.

Article 6. Certificate of Inspection

21201. It is unlawful for any inspector to issue a certificate of inspection unless he personally made the inspection between sunrise and sunset.

21202. If satisfied that the person that offers the cattle for inspection is in lawful possession of them, the inspector shall issue a certificate of inspection.

21203. The certificate of inspection shall be signed by the inspector and shall show all of the following:

(a) The place and date of inspection and the number of animals inspected.

(b) The sex, the brand, if any, on each branded animal recorded in the name of the owner of the animal, or the marks and brands under which the animal was offered for inspection, and such additional marks and brands as may be required by the chief.

(c) The sex, natural marks, and breed of unbranded animals.

(d) If the animals are to be transported, the names of the shipper and of the consignee and the origin and destination of the shipment.

(e) The number of beef cattle and the number of dairy cattle insofar as these matters may be determined.

21204. One copy of the certificate of inspection shall accompany the shipment and another copy shall be sent to the consignee forthwith.

21205. Unless the inspector who issued the certificate is notified and approves, it is unlawful for any person to remove any animal and substitute another for it, or to add other animals or take animals away from any lot of cattle for which a certificate has been issued until after the shipment or slaughter is completed.

21206. Cattle which are shipped for slaughter that have been inspected prior to shipment shall be given a brand inspection at destination. A charge shall not be made for such inspection if the duplicate copy of a certificate of inspection or a salesyard bill of sale is produced and either:

(a) The certificate or salesyard bill of sale was issued within five days prior to slaughter.

(b) The cattle, which are owned by the slaughterer, are held in enclosures that are used exclusively by the slaughterer, which are located within one mile of the slaughterhouse, and the cattle are driven, not transported, from the enclosure to the slaughterhouse

Article 7. Duplicate Brand Inspection Certificates

21231. Unless the shipment is released pursuant to Section 21233 or 21744, no common carrier, or owner or driver of any conveyance shall receive for transportation or transport any cattle until they have been inspected, and the carrier, owner, or driver has been furnished with duplicate brand inspection certificates that are signed by an inspector, which show all of the following:

(a) Any brands and marks.

(b) The names of the shipper and consignee.

(c) The origin and destination of the shipment.

21232. The duplicate brand inspection certificate shall accompany to destination any cattle which are transported over a public thoroughfare.

21233. The chief may release, or provide for the release of, cattle without the inspection which is required by Section 21231, but inspection shall be made en route or at the point of destination. The owner shall keep such cattle segregated until they are inspected.

21234. The director may authorize the inspection of cattle upon their release from a stockyard, salesyard, or cattle sales market.

The director may contract with individual yards or markets for the performing of such inspection on the basis of a return to the department of all costs which are involved in performing the inspection.

21235. When cattle are shipped from a public stockyard or from a public salesyard to another public stockyard or public salesyard:

(a) If the shipment is accompanied by a duplicate California brand inspection certificate which releases the shipment from the stockyard or salesyard of origin to another stockyard or salesyard which is designated in the certificate, the cattle shall be inspected before being offered for sale at the stockyard or salesyard of destination, and a brand inspection certificate issued.

(b) If a duplicate certificate does not accompany the shipment, on presentation of proof of ownership which is satisfactory to the bureau, the cattle shall be inspected prior to being offered for sale at the stockyard or salesyard of destination, and a brand inspection certificate issued.

21236. Any brand inspection certificate which has been altered, defaced, or changed is void. An inspector may, however, draw a line through an error on a certificate without voiding the certificate, if he initials and dates such alteration.

21237. Except as otherwise provided in Section 21236, it is unlawful for any person to alter, deface, or change any brand inspection certificate.

Article 8. Shipping Permits

21261. The chief may provide for the issuance of shipping permits for inspected cattle which are shipped by railroad, or for cattle that are covered by one certificate of inspection, which are transported in more than one conveyance.

Article 9. Fees

21281. All brand inspection fees are due and payable at the time of the inspection. The amount which is due for all inspections that are made shall be paid to the inspector within 15 days after the issuance of the brand inspection certificates

for the cattle which were inspected, unless there is on deposit with the bureau a bond in an amount and form which is approved by the chief or a cash deposit to cover the payment of such fees.

21282. Any fees which are due and payable for brand inspections which are not paid as required by this article may be recovered by the director pursuant to Section 281. Inspection services may be refused for nonpayment of prior services which have been rendered.

21283. Except as otherwise provided in this article, the fee shall be paid at the point of inspection and is thirteen cents ($0.13) for each animal which is inspected.

21284. A charge shall not be made for the inspection of suckling calves which are accompanying their mothers if they are transported for purposes other than for sale or slaughter and without a change in ownership.

21285. The fee is thirteen cents ($0.13) for the inspection before sale of each animal at a public salesyard which is posted by the Secretary of Agriculture of the United States or at a public salesyard if the animal originated in another state and it was shipped to this state, consigned to such public stockyard or public salesyard.

21286. The fee is thirteen cents ($0.13) for the inspection of each animal which originated in another state and was shipped to this state for slaughter, if such animal is unloaded in an enclosure which is used exclusively by the slaughterer that is located within one mile of the slaughterhouse and the cattle are driven, not transported, from the enclosure to the slaughterhouse.

21287. (a) The fee is eight cents ($0.08) for each animal which is inspected pursuant to subdivision (a) of Section 21235

(b) The fee, except as provided in Section 21289, is thirteen cents ($0 13) for each animal which is inspected pursuant to subdivision (b) of Section 21235.

The fees which are required by this section shall be paid by the person or his agent that consigned the cattle to the market.

21288 The fee for the inspection of cattle, other than suckling calves which are accompanying their mothers, is ten cents ($0.10) if the cattle are transported for purposes other than sale or slaughter and no change of ownership is involved. The fee which is prescribed by this section applies to pasture cattle which are transported out of a point-of-origin area or out of this state.

21289. The fee for the inspection of cattle is twenty cents ($0.20) for each animal which originated in any county or geographical area where a full point of origin inspection is maintained pursuant to Article 4 (commencing with Section 21141) of this chapter. A fee shall not be charged for any suckling calves which are accompanying their mothers if they are not shipped for sale or slaughter and no change of ownership is involved.

21290. The total of all fees which are collected upon the same cattle that are moving from points within this state through one public stockyard which is posted by the Secretary of Agriculture of the United States, or through one public salesyard, shall not exceed twenty-five cents ($0.25) per animal for all inspection including inspection at point of shipment, en route, or at first destination, inspection upon release from a public stockyard or a public salesyard, and inspection at place of slaughter.

21291. The fees which are provided by this article are maximum fees. The director may adopt a schedule of fees which are below the maximum fees which are established in this article and may adjust such schedule from time to time whenever he finds that the cost of administering and enforcing the following portions of this code may be maintained with such below-maximum fees:

(a) Part 1 (commencing with Section 16301), Division 9.

(b) Part 2 (commencing with Section 17401), Division 9.

(c) Chapter 1 (commencing with Section 18201), Part 3, Division 9.

(d) Division 10 (commencing with Section 20001).

(e) Division 11 (commencing with Section 23001).

(f) Chapter 1 (commencing with Section 24501), Part 1, Division 12.

(g) Chapter 1 (commencing with Section 26401), Part 3, Division 12.

Article 10. Records and Memorandums

21321. The inspector shall make a memorandum which shows the number, sex, brands, or marks on each animal which is inspected, and the names of the owner or claimant, consignor, and consignee.

21322. The memorandum of the inspection shall be retained for record purposes by the inspector for at least two years after the date of the inspection.

21323. The bureau shall maintain for a period of five years a file of brand inspection certificates in such manner as to disclose the number of cattle which have been inspected.

21324. Any person is entitled to examine any inspection certificates on file with the bureau.

Chapter 7. Inspection of Hides and Carcasses

Article 1. Requirements

21451. Except as otherwise provided in this chapter, inspection of carcasses with the hide on and of hides shall be made in the same manner as inspection of cattle pursuant to Chapter 6 (commencing with Section 21051) of this division.

21452. The chief may provide for the release of hides or carcasses from inspection in cases in which inspection would serve no useful purpose.

21453. A new inspection need not be made of the hide or carcass of an animal which was inspected at the place of shipping or of slaughter within 15 days prior to slaughter.

21454. A new inspection need not be made of the hide or carcass of an animal which is owned by a slaughterer if the animal is both:

(a) Held in an enclosure which is used exclusively by the slaughterer that is located within one mile of the slaughterhouse.

(b) Driven, not transported, from the enclosure to the slaughterhouse.

21455. Every person not a licensed slaughterer that slaughters any cattle or calves, except calves which are marketed with the hides on, shall do all of the following:

(a) Keep in his possession the hide, with the brands attached to it, without any alteration or disfiguration, until the hide is inspected or released.

(b) Exhibit the hide to any inspector or peace officer on demand.

21456. A person shall not have in his possession a carcass or any meat from a carcass which was not slaughtered by a licensed slaughterer, unless he has in his possession and exhibits to any inspector or peace officer on demand one of the following:

(a) The hide of the animal from which the meat was obtained, with the ears and the brands attached to it, without alteration or disfiguration.

(b) A certificate of inspection or release of the hide or of the carcass with the hide on it, which was issued pursuant to this article.

(c) A bill of sale, memorandum of sale, or other written instrument, which is signed by the seller or donor of the meat, that shows the name and address of the seller or donor.

21457. A person shall not remove any evidence of inspection from a hide until after it has been partially tanned.

21458. A person shall not sell, give away, deliver, transport, buy, accept, or receive the hide of any animal unless the hide has been inspected or released.

21459. A person shall not obliterate, alter, or remove a brand which is on a hide, or burn or in any manner destroy the hide until it has been inspected or released.

Article 2. Procedure

21481 The director shall, by regulation, prescribe the method by which hides and carcasses which have been inspected may be identified.

21482. If, upon inspection, there is found any carcass or hide which does not bear the recorded brand of the person

that presents the carcass or hide for inspection, such person shall show the inspector a bill of sale, certificate of inspection, or other proof of ownership of such carcass or hide.

Article 3. Certificates of Inspection

21511. Each inspector, prior to issuing a certificate of inspection for a hide, or carcass with the hide on it, shall identify the hide or carcass by the method which is prescribed by the chief.

Article 4. Duplicate Brand Inspection Certificates

21531. Unless the shipment is released pursuant to Section 21532, no common carrier, or owner or driver of any conveyance shall receive for transportation or transport any hide or carcass until it has been inspected and the carrier, owner, or driver has been furnished with duplicate brand inspection certificates that are signed by an inspector which show all of the following:

(a) Any brands and marks.

(b) The names of the shipper and consignee.

(c) The origin and destination of the shipment.

21532. The chief may release, or provide for the release of, any carcass or hide without the inspection which is required by Section 21531. Inspection shall, however, be made en route or at point of destination.

Article 5. Fees

21561. All brand inspection fees are due and payable at the time of the inspection. The amount which is due for all inspections that are made shall be paid to the inspector within 15 days after the issuance of the brand inspection certificates for the hides or carcasses which were inspected unless there is on deposit with the bureau a bond in an amount and form which is approved by the chief or a cash deposit to cover the payment of such fees.

21562. Any fees which are due and payable for brand inspections that are made which remain unpaid or are not paid as required by this article may be recovered by the director pursuant to Section 281. Inspection services may be refused for nonpayment of prior services which have been rendered.

21563. Except as otherwise provided in this article, the fee shall be paid at the point of inspection and is thirteen cents ($0.13) for each carcass or hide which is inspected.

21564. The fee is eight cents ($0.08) for the inspection of any cattle hide or calfskin which is classified as reduction hide or skin.

21565. A charge shall not be made for the inspection of any hide which has been previously inspected pursuant to this chapter.

21566. The fees which are provided by this article are maximum fees. The director may adopt a schedule of fees which are below the maximum fees that are established in this article and may adjust such schedule from time to time whenever he finds that the cost of administering and enforcing the following portions of this code may be maintained with such below-maximum fees:

(a) Part 1 (commencing with Section 16301), Division 9.

(b) Part 2 (commencing with Section 17401), Division 9.

(c) Chapter 1 (commencing with Section 18201), Part 3, Division 9.

(d) Division 10 (commencing with Section 20001).

(e) Division 11 (commencing with Section 23001).

(f) Chapter 1 (commencing with Section 24501), Part 1, Division 12.

(g) Chapter 1 (commencing with Section 26401), Part 3, Division 12.

Article 6. Reports

21591. The bureau shall maintain for a period of five years a file of brand inspection certificates in such manner as to disclose the number of carcasses or hides which have been inspected.

21592. Any person is entitled to examine any inspection certificates on file with the bureau.

Chapter 8. Sale and Gift of Cattle, Their Carcasses and Hides

Article 1. Bills of Sale

21701. As used in this article, "animal" includes:

(a) A bovine animal.

(b) The carcass of a bovine animal from which the hide has not been removed.

(c) The hide of a bovine animal.

21702. A person shall not buy, sell, or accept any animal, unless the seller or donor gives, and the buyer or donee receives, at the time of the delivery of the animal, a written bill of sale or written instrument from the owner or his agent which gives the number, kind, breed, and sex, and, if branded, the brand and location of the brand on each animal.

21703. The bill of sale or other instrument shall be signed by the seller or his agent, and shall show all of the following:

(a) The date of delivery.

(b) The name and address of the seller or his agent.

(c) The name and address of the buyer or donee.

21704. The failure of the seller or donor to give a written bill of sale or written instrument to the buyer or donee has no effect upon the validity of any sale or contract of sale or

gift of an animal nor upon the rights of either the buyer, donee, seller, or donor.

21705. If by any provision of this division a certificate, bill of sale, or other document is required to accompany any shipment of animals, nothing in this division shall be construed to make the carrier, driver, or any person other than the shipper responsible for the form or accuracy of the document.

21706. Any invoice of sale or bill of sale which has been altered, defaced or changed is void. An inspector may, however, indicate on a bill of sale any number of cattle which are sold by the holder of the bill of sale, if he initials and dates such alterations on the bill of sale.

21707. Except as otherwise provided in Section 21706, it is unlawful for any person to alter, deface or change any invoice of sale or bill of sale.

21708. An auctioneer shall not offer any milking cow for sale at any auction sale of cattle unless the milking cow has been milked out and stripped within 12 hours of the time such offer to sell the cow takes place.

Article 2. Public Salesyards

21731. Stockyards which are posted by the United States Department of Agriculture under the Packers and Stockyards Act (7 U.S.C., Sec. 181 et seq.), agricultural fairs, 4-H Clubs, Future Farmers, Junior Farmers, and associations which sponsor purebred cattle sales for their members are exempt from the license provisions of this article.

21732. The license and bond provisions of this article do not apply to the sale by an auctioneer of cattle on the premises of the owner of the cattle whether or not such a sale includes the sale of cattle of other livestock owners in the vicinity of such premises. If, however, an animal which does not belong to the owner of the premises is auctioned, the auctioneer shall specifically designate the person that is the owner of the animal.

21733. A person shall not engage in the business of selling cattle at a public salesyard unless he has done all of the following:

(a) Obtained a license from the bureau to carry on such business at each such salesyard.

(b) Executed for each such salesyard a bond to the state in the sum of one thousand dollars ($1,000).

21734. The bond required pursuant to Section 21733 is subject to the approval of the director and shall be conditioned as follows:

(a) That the person shall not sell any cattle unless he is the owner of the cattle or is authorized to sell them by the owner.

(b) That, if he does sell any cattle which he does not own without authorization from the owner, he shall, in addition to all other statutory penalties, pay the value of the animals.

21735. Any amount which is recovered upon the bond shall be paid to the owner of the animal.

21736. The bureau shall grant to every applicant that complies with this article and the regulations which are adopted pursuant to it, a separate license to operate each salesyard for the balance of the current calendar year upon the payment of a fee of one hundred dollars ($100) for each salesyard.

21737. A permit shall be granted by the bureau to change the address or location of a previously licensed salesyard. No additional license fee or bond shall be collected for issuing a permit to change the address or location.

21738. Each such license shall be renewed on or before the first day of each succeeding calendar year. The renewal fee is one hundred dollars ($100) for each salesyard.

21739. The director may, after notice and hearing, revoke a license which is issued to a person that is engaging in the business of selling cattle at public salesyards or that operates such public salesyard for the sale of livestock, for any willful violation of any provision of this division or the regulations which are issued pursuant to it.

21740. Any proceeding which is held pursuant to Section 21739 shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all of the powers which are granted in that chapter.

21741. Any person that delivers any cattle to a public stockyard or public salesyard shall furnish to the inspector, before the inspector inspects the cattle for reforwarding, one of the following:

(a) If the cattle originate in this state, a certificate of consignment or brand inspection certificate.

(b) If the cattle do not originate in this state, proof of ownership of the cattle.

21742. The certificate of consignment shall be signed by the owner of the cattle or his agent. It shall show all of the following:

(a) The consignee.

(b) The number, kind, and brand of the cattle.

(c) In the case of unbranded cattle, the breed of the cattle.

21743. Any person that is engaged in the business of selling cattle on consignment at any public stockyard, public salesyard, or public cattle sales market shall prepare prior to inspection and keep after each sale a certificate of consignment which contains all of the following:

(a) The name and address of the owner.

(b) The name and address of the consignee.

(c) A description of each animal which shall indicate the sex, the breed and. in the case of branded animals, the brand and brand location.

(d) Signature of the owner or his agent.

The certificate of consignment shall be kept by the seller for a period of one year after the date of sale. Any such certifi-

cate shall be exhibited on the demand of any peace officer or any agent of the department.

21744. Cattle shall not be released from a public stockyard, public salesyard, public cattle sales market, or any other public consignment sale unless they are accompanied by a brand inspection certificate or by a bill of sale or certificate of sale which is issued and signed by a representative of the salesyard, as agents for the consignor.

21745. The bill of sale or certificate of sale which is required pursuant to Section 21744 shall contain all of the following information on a form that is approved by the chief:

(a) Date of sale.

(b) Name and address of the buyer.

(c) Description of each animal that is sold which includes its brands and brand location, sex and breed of unbranded animals.

(d) Origin and destination of the animals.

21746. The director may make regulations which govern the brand inspection of cattle at public salesyards and at public stockyards.

21747. It is unlawful for any person to sell cattle at a public salesyard unless an inspector has done one of the following:

(a) Checked the brand inspection certificates of cattle which are being offered for sale.

(b) Made a brand inspection of animals which are consigned or shipped to such yard which have not previously been inspected.

21748. It is unlawful for any person to release any cattle which are sold at a public salesyard unless the required brand inspection certificate has been prepared by the inspector in advance of the release of the cattle from the salesyard.

21749. Except as otherwise provided in Section 21750, any person that engages as a business in the sale of cattle at a public salesyard without a license is, in addition to all other penalties, liable to a penalty of twenty-five dollars ($25) and an additional penalty of one dollar ($1) per day for every day he has operated a public salesyard without a license.

21750. Any public cattle salesyard operator that has had a previous license and continues to operate a public salesyard after the expiration of his license is not required to pay penalties pursuant to Section 21749 if he applies for a new license within 30 days after the expiration of his license.

CHAPTER 9. INJURY TO, OR THEFT OF, CATTLE

Article 1. Driving Cattle From Their Range

21851. As used in this article, "range" means the enclosed or unenclosed lands outside of cities, towns, and villages in this state, whether of the public domain or in private owner-

ship, upon which by custom, license, or otherwise, cattle are kept or permitted to roam and feed.

21852. Any person that is not the owner or does not have the right of possession of any cattle, that is found driving such cattle off its usual range, without the consent of the owner, is guilty of grand theft.

Article 2. Livestock Killed or Injured on Railroads

21881. If any animal is killed or injured upon the right-of-way of any railroad in this state, the owner or operator of the railroad equipment injuring or killing the animal shall report it as soon as possible, but in no event later than 96 hours after the collision.

21882. The report shall contain all of the following:

(a) A description of the animal.

(b) The brands and marks and the position of the brands and marks, if any, upon the animal.

(c) The location of the animal.

(d) The location of the point of collision, listing the county, the nearest post office, and milepost.

21883. The report shall be given by telephone, telegraph, or mail to the owner of the animal if known. If the owner of such animal is unknown, the report shall be given to the office of the sheriff, constable, or brand inspector whose office or established headquarters is, to the knowledge of the railroad employee who makes the report, the nearest to the place of the collision.

21884. Reports by telephone shall be confirmed within 24 hours by telegraph or mail to the office of the sheriff. A copy shall be sent to the bureau.

21885. Upon receiving the report the officer or brand inspector shall attempt to ascertain the ownership of the dead or injured animal and notify the owner of the death or injury of the animal.

21886. It is unlawful for any person to bury, conceal, or destroy any animal, or do anything to the carcass of any animal, which will tend to make ascertainment of its ownership more difficult until the owner has been notified or the officer or brand inspector has identified the brands and marks, if any, and their position upon the animal.

Chapter 10. Slaughter of Cattle

Article 1. Generally

22001. Except as otherwise provided in this chapter, a person shall not, unless he has a slaughterer's license, slaughter, or request or hire any person that is not a licensed slaughterer to slaughter, an animal and offer the meat for sale.

22002. Any producer of cattle may slaughter or have slaughtered for him on his own premises, for his own consumption and in small numbers cattle of his own production. He may sell or give away a portion of the meat of such cattle, except to a peddler, retailer, hotel, restaurant, or any person offering the meat for public consumption.

22003. If a producer of cattle sells any meat of the cattle pursuant to Section 22002, he shall give to the buyer, and the buyer shall receive, a sales tag or sales memorandum, which shows the names of the seller and buyer, the date of the sale, and the quantity which is sold. The buyer shall retain the tag or memorandum for 30 days and exhibit it upon request of any inspector or any peace officer.

22004. Cattle which are slaughtered by or for the producer of the cattle at his premises and for his own consumption may be transported with the hide on, after complete removal of the viscera, head, and feet, to any licensed frozen food locker plant to be skinned, split, and quartered by the operator of the plant.

22005. The skinning, splitting, and quartering of the cattle at the licensed frozen food locker plant does not require a slaughterer's license, and the frozen food locker plant is not subject to the inspection service which is required by Chapter 4 (commencing with Section 18651), Part 3, Division 9 of this code in the skinning, splitting, and quartering of the cattle.

22006. The licensed frozen food locker plant operator shall maintain a record of every transaction which involves uninspected meat for a period of five years. The record shall show the name of the producer of the cattle and the number of carcasses which were delivered by the producer.

22007. Any owner or producer of livestock may have them inspected and slaughtered by a licensed slaughterer. He may, thereafter, sell the meat from such livestock.

22008. Every person that is not a licensed slaughterer that slaughters cattle shall do all of the following:

(a) Keep a record in a book which he keeps for that purpose of all cattle which are slaughtered by him, with a description of the cattle, including the brands and marks, and the date of slaughter.

(b) Exhibit the record book on demand of any inspector or peace officer.

Article 2. Licensed Slaughterers

22031. A person shall not engage in the business of slaughtering cattle unless he first procures a license and executes a bond pursuant to this article for each slaughterhouse in which he operates

22032. Each applicant for a slaughterer's license shall file an application with the bureau.

22033. The application shall be in a form which is prescribed by the director and shall contain all of the following:

(a) The name and address of the applicant.

(b) Where each slaughterhouse in which he is to operate is located and to whom it belongs.

(c) Such other information as the director may, by regulation, require.

22034. The bureau, after notice and hearing before the director, shall refuse to issue a license to any applicant unless the chief finds that he is both:

(a) Qualified to operate pursuant to this division.

(b) Properly equipped to engage in the business of slaughtering in a clean and sanitary manner.

22035. A previous violation of any provision of this division is good and sufficient ground for denial of a license.

22036. The bureau shall issue to every applicant, that complies with this article, a license to slaughter cattle and sell the meat of such cattle for the unexpired quarter by periods of the current calendar year.

22037. The applicant shall pay the following annual fees in advance to the bureau:

(a) For each slaughterhouse at which he slaughters less than 51 animals per month, twenty dollars ($20).

(b) For each slaughterhouse at which he slaughters 51 or more and less than 101 animals per month, fifty dollars ($50).

(c) For each slaughterhouse at which he slaughters 101 or more animals per month, one hundred dollars ($100).

The annual fee shall be reduced one-fourth for each quarter of the current calendar year which has expired prior to the effective date of such license. No license shall be issued for a quarter of a year unless it is the only remaining unexpired quarter of the current calendar year on the effective date of the license.

22038. Before beginning business, the applicant shall execute a bond to the state in the sum of one thousand dollars ($1,000) approved by the director, conditioned as follows:

(a) That he shall not slaughter, or sell any cattle or the meat of any cattle, unless he is the owner of the cattle or meat, or is authorized to slaughter or sell the cattle or meat by the owner of the cattle or meat.

(b) That if he slaughters any cattle which he does not own without authorization from the owner, he shall, in addition to all other statutory penalties, pay the value of such animal.

22039. All amounts which are recovered on the bond shall be paid to the owner of the animal.

22040. The director may, after notice and hearing, revoke a slaughterer's license for any violation of any provision of this division.

22041. The director may, after notice and hearing, revoke the license of any slaughterer that is operating a slaughterhouse in an unclean or insanitary manner.

22042. A proceeding for refusal or revocation of license shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1. Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted in that chapter.

22043. A license which is revoked shall not be reissued except upon payment of an additional reinstatement fee of twenty-five dollars ($25).

22044. Every licensed slaughterer of cattle shall have on file in his office prior to slaughter and shall keep for one year after slaughter, the original bill of sale of cattle which are purchased by him or a consignment slip on cattle which are consigned to him or the certificate of inspection of all cattle which are slaughtered by him.

22045. Every licensed slaughterer that slaughters cattle where inspection prior to slaughter is impossible or impractical shall keep a record which sets forth the name of the person from whom the cattle were purchased and identifies them as to color, age, weight, sex, and brand, if any. The record shall be open to inspection by any agent of the department or peace officer.

22046. Every licensed slaughterer that does not have brand inspection prior to slaughter on each day on which he slaughters, and whose hides are not inspected during the month, shall on or before the 15th day of each month mail to the bureau a written report which shows in separate columns all of the following:

(a) The number of calves, cows, steers, stags, and bulls which were slaughtered during the preceding calendar month.

(b) The number which he slaughtered on each date.

(c) From whom the animals were purchased.

(d) The date of purchase.

(e) The brands on branded cattle and the sex and breed of unbranded cattle.

22047. It is unlawful for a licensed slaughterer to allow anyone to slaughter cattle at the licensee's plant, except a person that is licensed to slaughter there or an employee of such person.

22048. If a licensed slaughterer desires to change to another location, he shall apply to the bureau to have his license transferred. The bureau may transfer the license without additional cost.

22049. It is unlawful for a licensed slaughterer to slaughter cattle at any place other than a slaughterhouse at which he is licensed to slaughter.

22050. It is unlawful for a licensed slaughterer to slaughter cattle unless his bond is in force and valid at the time of slaughter.

22051. Except as otherwise provided in Section 22052, any person that slaughters cattle unlawfully and without a license

is, in addition to all other penalties, civilly liable to the director for all of the following:

(a) The amount of the annual fee due under the provisions of Section 22037 for the entire period during which he operated without such license.

(b) A penalty of twenty-five dollars ($25).

(c) A penalty of fifty cents ($0.50) per day for every day he slaughtered cattle unlawfully and without a license.

22052. Any slaughterer that has had a previous license and continues to slaughter cattle after the expiration of his license is not required to pay the penalty pursuant to Section 22051 if he applies for a new license within 30 days after the expiration of his license.

Article 3. Purchase and Sale of Meat

22081. A wholesaler of meat shall not purchase the meat of any animal except from any of the following:

(a) A licensed slaughterer.

(b) Another wholesaler having an established place of business.

(c) An owner or producer of livestock which are slaughtered pursuant to Section 22007.

22082. A peddler or retailer of meat shall not purchase the meat of an animal from any person not known to him to be a licensed slaughterer, or a regular wholesale dealer in meat that has an established place of business, except that he may purchase from the owner or producer of an animal the meat of the animal if it was inspected and slaughtered pursuant to Section 22007.

22083. Every peddler or retailer of meat that purchases the meat of any animal shall enter all of the following in a book which he keeps for that purpose and exhibit it on demand to any agent of the department or any peace officer:

(a) The name and address of the person from whom the meat was purchased or obtained.

(b) The date of purchase and the price which was paid.

(c) An itemized description of the weight and quantity which was purchased.

(d) The time and place of the delivery of the meat.

22084. A person, other than a regular wholesaler of meat that has an established place of business or a licensed slaughterer, shall not give, sell, or deliver to any peddler of meat any part of the carcass of an animal.

This section does not apply to the meat of an animal inspected and slaughtered pursuant to Section 22007.

22085. It is unlawful for any person that is not the keeper of a shop or meat market, to sell the meat of any animal unless he possesses the hide, with ears attached and brands untampered with, of the animal from which the meat was ob-

tained and unless he exhibits it to any inspector or peace officer upon demand.

22086. It is unlawful for any person to misrepresent the type, kind, or quality of a dressed carcass of any animal or part of such carcass, or the sex, age, or quality of any animal the meat of which is sold.

DIVISION 11. HORSES, MULES, BURROS, SHEEP, AND SWINE

CHAPTER 1. GENERAL PROVISIONS

Article 1. Application

23001. The provisions of this division, including the payment of fees, are applicable to all state and county institutions which are engaging in livestock operations.

Article 2. Regulations

23021. The director shall enforce this division. He may make such regulations as are reasonably necessary for such enforcement.

Article 3. Investigations and Seizures

23041. The director may make any necessary investigations relative to reported violations of this division, pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

23042. Copies of records, audits and reports of audits, inspection certificates, certified reports, findings and all papers which are on file in the office of the director are prima facie evidence of the matters which are contained in them, and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

23043. Any agent of the department or any peace officer may, for the purpose of making an investigation, do any of the following:

(a) Stop any conveyance which is transporting on any public thoroughfare any horse, mule, burro, or sheep, the carcass of any such animal which has the skin on it, or the hide or skin of any such animal.

(b) Take possession of any horse, mule, burro, or sheep, the carcass of any such animal which has the hide or skin on it, or the hide or skin of any such animal and hold it for 30 days pending an investigation.

23044. Any expense which is incurred pursuant to Section 23043 shall be paid by the owner. The cost of caring for the property which is held pursuant to Section 23043 is a lien

upon the property. The lien may be enforced in the manner which is prescribed in Section 3052 of the Civil Code.

23045. Any animal which is seized by, or comes into the possession of an inspector pursuant to this division shall be disposed of pursuant to Chapter 7 (commencing with Section 17001), Part 1, Division 9 of this code.

Article 4. Criminal Penalties

23071. Every person that violates any provision of this division is guilty of a misdemeanor and, upon conviction, shall be punished by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500), or by imprisonment of not less than 10 days nor more than 6 months, or by both such fine and imprisonment. Each violation during any day constitutes a separate offense.

Article 5. Civil Penalties and Remedies

23091. Any person that violates any provision of this division or any regulation which is issued pursuant to it is liable civilly for a penalty in an amount not to exceed a sum of five hundred dollars ($500) for each violation. Any money which is recovered pursuant to this section shall be paid into the Department of Agriculture Fund.

23092. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring an action for civil penalties in the name of the people of this state in any court of competent jurisdiction in this state against any person violating any provision of this division.

23093. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation has occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this division or any regulation duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

Article 6. Collection and Disposition of Money

23121. Any money in the Department of Agriculture Fund which is derived pursuant to this division may be expended for the administration and enforcement of any of the provisions of the following portions of this code, notwithstand-

ing any other provision of law which limits the expenditure of any such money to some specific purpose or to the administration or enforcement of some specific section, article, or chapter, of this division:

(a) Part 1 (commencing with Section 16301), Division 9.

(b) Chapter 1 (commencing with Section 17401), Part 2, Division 9.

(c) Chapter 4 (commencing with Section 17951), Part 2, Division 9.

(d) Chapter 1 (commencing with Section 18201), Part 3, Division 9.

(e) Division 10 (commencing with Section 20001).

(f) Division 11 (commencing with Section 23001).

(g) Chapter 1 (commencing with Section 24501), Part 1, Division 12.

(h) Chapter 1 (commencing with Section 26401), Part 3, Division 12.

23122. The director shall, at least once each month, report to the State Controller the total amount of any money which is collected for fees, penalties, judgments or otherwise. He shall, at the same time, pay into the State Treasury the entire amount of the receipts. The receipts shall be credited to the Department of Agriculture Fund.

23123. A civil action may be brought by the director to recover any fee, penalty, or other money that may become due pursuant to this division.

23124. The director shall, within 30 days prior to the general session of the Legislature, submit to the Governor a full and true report of transactions pursuant to this division during the preceding biennium, including a complete statement of receipts and expenditures during the period.

Chapter 2. Brands and Brand Records

Article 1. Horses, Mules, Burros, or Sheep

23251. Any person that desires to use a brand on horses, mules, burros, or sheep shall be governed by the same provisions and procedures with reference to such animals as are made applicable to the branding of cattle in Chapter 4 (commencing with Section 20601) of Division 10 of this code, except Section 20668.

23252. Any person that owns a registered cattle brand may use the same brand on the same location on horses, mules, burros, sheep, or swine if it is not in conflict with a previously registered brand.

Article 2. Swine

23281. Brands for swine may be recorded pursuant to the same provisions and procedures as are made applicable to the recording of brands for cattle in Chapter 4 (commencing with

Section 20601) of Division 10 of this code, except Section 20668. Such recording, however, is not mandatory.

CHAPTER 3. INSPECTION OF ANIMALS

Article 1. Horses, Mules, and Burros

23401. Inspection of horses, mules, and burros for shipment out of the state may be made at the request of the owner in the same manner and for the same fees as are provided for bovine animals pursuant to Chapter 6 (commencing with Section 21051) of Division 10 of this code.

23402. The fee for an inspection prior to slaughter shall be the same as is charged for the inspection of cattle pursuant to Chapter 6 (commencing with Section 21051) of Division 10 of this code.

23403. Inspection of horses, mules, or burros prior to slaughter consists of the examination of such animals for brands and, in the case of unbranded horses, mules or burros, for natural marks. It also includes the issuance of a certificate which shows the brands or natural marks on the animals.

23404. A certificate of inspection shall not be issued unless a bill of sale or other proof of ownership is exhibited at the time of the inspection.

CHAPTER 4. INSPECTION OF HIDES

Article 1. Horses, Mules, and Burros

23551. A person shall not sell, give away, deliver, transport, buy, accept, or receive the hide of any horse, mule, or burro unless the hide has been inspected and a brand inspection certificate issued or it has been released by the director, subject to inspection en route or at destination.

CHAPTER 5. SLAUGHTER

Article 1. Horses, Mules, and Burros

23651. A person shall not operate an establishment in this state for the purpose of slaughtering horses, mules, or burros unless he has done all of the following:

(a) Obtained a license from the director to carry on such business.

(b) Executed a bond to the state in the sum of one thousand dollars ($1,000).

23652. The bond which is required pursuant to Section 23651 is subject to the approval of the director and shall be conditioned as follows:

(a) That such person shall not slaughter or sell any horse, mule, or burro, or the meat of any such animal, unless he is

the owner of the animal, or is authorized to do so by the owner.

(b) That if he shall slaughter any horse, mule, or burro which he does not own without authorization from the owner, he shall, in addition to all other statutory penalties, pay double the value of such animal.

23653. Any amount which is recovered on the bond shall be paid as follows:

(a) One-half to the owner of such animal.

(b) One-half to the Department of Agriculture Fund to be used for the purpose of carrying out this division.

23654. The director shall grant to every applicant that complies with this division and the regulations which are adopted pursuant to it, a license to operate an establishment for the balance of the current calendar year.

23655. The applicant shall pay to the director the following annual fees in advance:

(a) For each slaughterhouse at which he slaughters less than 51 animals per month, twenty dollars ($20).

(b) For each slaughterhouse at which he slaughters 51 or more and less than 101 animals per month, fifty dollars ($50).

(c) For each slaughterhouse at which he slaughters 101 or more animals per month, one hundred dollars ($100).

23656. The annual fee shall be reduced one-fourth for each quarter of the current calendar year which has expired prior to the effective date of such license. No license shall be issued for a quarter of a year unless it is the only remaining unexpired quarter of the current calendar year at the effective date of the license.

23657. The director, after notice to the interested party and a hearing, may refuse to grant a license or renewal of a license and may revoke or suspend any license for a willful violation of any provision of this division.

23658. A license which is refused or revoked by the director shall not be reissued except upon the payment of a renewal fee of twenty-five dollars ($25).

23659. Any proceeding which is held pursuant to Section 23657, shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted in that chapter.

23660. Any previous violation by the applicant or by any person connected with the applicant, of any of the provisions of Part 1 (commencing with Section 16301) of Division 9, Division 10 (commencing with Section 20001), or Division 11 (commencing with Section 23001) is good and sufficient grounds for denial of a license.

23661. Every licensed slaughterer of horses, mules, or burros shall have on file in his office for a period of one year after slaughter the brand inspection certificate and the original bill of sale of the animals purchased and slaughtered by him.

23662. It is unlawful for a slaughterer of horses, mules, or burros to slaughter any such animals unless the horses, mules, or burros have been inspected by the director prior to slaughter.

CHAPTER 6. SALE OR GIFT

Article 1. Horses, Mules, Burros, and Sheep

23801. A person shall not buy, sell, or accept a horse, mule, burro, or sheep, the carcass of any such animal from which the hide or skin has not been removed, or the hide or skin of such animal, unless the seller or donor gives, and the buyer or donee receives, at the time of delivery of the animal, carcass, or hide, a written bill of sale or written instrument, which states the number, kind, and brand or brand and marks of each such hide, skin, carcass, or animal, that is signed by the party that gives it.

23802. The failure of the seller or donor to give a written bill of sale or written instrument to the buyer or donee pursuant to Section 23801 does not have any effect upon either of the following:

(a) The validity of any sale or contract of sale of any horse, mule, burro, or sheep.

(b) The rights of either the buyer or donee or seller or donor of the horse, mule, burro, or sheep.

Article 2. Horses, Mules, and Burros

23831. Any person that is engaged in the business of selling horses, mules, burros, or the hides of any such animals, on consignment at any public or private salesyard shall prepare prior to inspection, and keep after each such sale, a certificate of consignment which contains all of the following information:

(a) The name and address of the consignor.

(b) A description of each animal which is sold that includes its sex, breed, color, approximate weight, approximate age, natural marks, and a description of each brand and its location.

(c) Reasonable proof of the ownership of the animal.

(d) The license number of any vehicle which transports the animal to the salesyard. If the animal is transported in a trailer, the license number of both the trailer and the vehicle which pulls it shall be given.

(e) The signature of the consignor.

23832. The certificate of consignment shall be kept on file in the office of the seller for a period of at least one year after the sale. All certificates of consignment shall be exhibited on the demand of any peace officer or any agent of the department.

CHAPTER 7. TRANSPORTATION

Article 1. Horses, Mules, and Burros

23951. This article does not make it unlawful for any farmer that does not have a license issued pursuant to the article to operate his own truck to transport his own livestock or the livestock of his neighbors.

23952. It is unlawful for any person, or the agent of any person, that buys any horse, mule, or burro for transportation in his own or any borrowed conveyance, for sale or slaughter, to receive such animal for transportation or to transport it, unless such person or agent has a license from the director which authorizes such person or agent to do so.

23953. Each applicant for a license shall file with the director a written application which states all of the following:

(a) His name.

(b) His present address and his addresses for the preceding three years.

(c) Every county in which he proposes to carry on the business.

23954. Each applicant shall pay to the director in advance an annual fee of twelve dollars ($12).

23955. The annual fee shall be reduced one-fourth for each quarter of the current calendar year which has expired prior to the date of the filing of the application for such license.

23956. A license shall not be issued for a quarter of a year unless the quarter is the only remaining unexpired quarter of the current calendar year on the date of the filing of the application for the license.

23957. Each person, or agent of any person, that violates Section 23952 and thereafter applies for a license shall pay twelve dollars ($12) in addition to the fee which is otherwise required by this article, unless he:

(a) Has had a previous license.

(b) Has continued to operate after the expiration of his license and obtains a new license within 30 days after the expiration of his previous license.

Article 2. Sheep

23981. A person shall not transport any sheep, unless the sheep are accompanied by a bill of lading which shows all of the following:

(a) The name of the owner of the sheep.

(b) The destination of the sheep.

DIVISION 12. POULTRY, RABBITS, EGGS, AND EGG PRODUCTS

PART 1. POULTRY AND RABBITS

CHAPTER 1. GENERAL PROVISION

Article 1. Application

24501. The provisions of this part, including the payment of fees, are applicable to all state and county institutions which are engaging in livestock operations.

Article 2. Investigations

24521. The director may make any necessary investigations relative to reported violations of this part, pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

24522. Copies of records, audits and reports of audits, inspection certificates, certified reports, findings and all papers on file in the office of the director are prima facie evidence of the matters which are contained in them, and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

Article 3. Civil Remedies

24541. The Attorney General shall, upon complaint by the director, or may upon his own initiative, if after examination of the complaint and evidence he believes a violation of any provision of this part has occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this part or regulation which is duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

CHAPTER 2. PLANT SANITATION

Article 1. Definitions

24651. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

24652. "Fowl" includes chickens, turkeys, ducks, geese, and other domesticated birds.

24653. "Growing poultry" means feeding and caring for poultry.

24654. "Marked" means plainly, legibly, and conspicuously labeled, stamped, tagged, stenciled, or branded to show the name and address of the poultry plant where, or the name and address of the distributor in California for whom, the poultry meat was slaughtered, prepared, packed, or repacked, cut up or recut, or handled.

24655. "Mislabel" means the placing, or presence of any false, deceptive, or misleading mark, tag, brand, design, inscription, statement, billing, invoice, placard, sign, or other descriptive designation.

24656. "New York dressed fowl" means fowl from which the feathers have been removed and the blood drawn and which is offered for sale as a whole fowl, with the head, feet, and entrails intact.

24657. "Poultry" means domesticated fowl and domesticated rabbit which are intended for use for human food.

24658. "Poultry meat" means the carcass of poultry or any part of such carcass.

24659. "Poultry plant" means any of the following:

(a) Any place where poultry is slaughtered, dressed, or drawn.

(b) Any place, except a retail store or eating place, where poultry meat or poultry meat food products are cooked, cured, smoked, cut up, recut, packed, or repacked, or otherwise prepared for human food.

24660. "Producer" means any person that is engaged in the business of growing any poultry, which is marketed as poultry meat, for a period of three weeks or more for the purpose of increasing the size and weight of such poultry.

24661. "Sanitary" means free from unnecessary dirt, filth, and contamination and free from any other substance or organism which is known to be injurious to human health.

Article 2. General Provisions

24681. The director shall adopt regulations for carrying out this chapter.

24682. No regulation which requires alterations in poultry plants or changes in equipment shall be effective until six months after the date on which the director gives notice to the persons that are licensed pursuant to this chapter.

24683. The director shall furnish to each person that holds a license, or makes application for a license, a copy of the regulations which are adopted pursuant to this chapter.

24684. The director may bring an action to enjoin the violation or threatened violation of this chapter or any regulation which is adopted pursuant to it in the superior court in and for the county in which the violation occurred or is about to occur.

24685. Any proceeding pursuant to Section 24684 shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

Article 3. Exemptions

24711. This chapter does not apply to a poultry plant which is operated under the sanitary regulations of the Consumer and Marketing Service of the United States Department of Agriculture.

24712. This chapter does not apply to poultry meat which bears the official mark of a city, county, or state poultry plant inspection service for sanitation outside of the state which has requirements equal to those which are provided for by this chapter if such out-of-state requirements have been approved by the director. If, however, any packing, repacking, or cutting up or recutting is done, except in a retail store or public eating house, in this state it shall be done in a poultry plant which is licensed pursuant to this chapter.

24713. This chapter does not apply to a poultry plant where poultry which was produced on the premises is slaughtered if the poultry meat which is derived from the poultry is sold by the producer in any of the following ways:

(a) At retail upon such premises.

(b) At retail off of such premises, either direct to consumers at their homes or at a retail stand which is operated by the producer in a farmers' market.

(c) On or off the premises where it was produced, to retail stores or public eating houses.

As used in this section, "producer" includes only an individual producer who does not employ, except in unforeseeable exigencies, any person except members of his immediate family.

24714. This chapter does not apply to a poultry plant where poultry is slaughtered, dressed, and sold upon the premises where it was produced for purposes other than resale, if the entire poultry meat output of the producer is so sold.

Article 4. Licenses

24741. A person shall not operate a poultry plant unless he has obtained a license pursuant to this chapter.

24742. Each person shall, before operating a poultry plant, file an application with the director for a license to operate the poultry plant. The application shall be in such form as the director may prescribe.

24743. The application for a license shall be accompanied by the license application fee.

24744. The application fee is forty dollars ($40) for a license for one year for each poultry plant which the applicant desires to operate.

24745. The license application fee shall be paid to the director with each application for a license or for the renewal of a license.

24746. A license or a license renewal shall be issued by the director for a period of one year from the last day of the month in which it is issued.

24747. Each person that holds a license for a poultry plant shall file an application for the renewal of the license on or before the date of the expiration of the license.

24748. A penalty fee of ten dollars ($10) shall be assessed upon all renewal applications that are not received by the department on or before the expiration date of the license for which the renewal is required.

24749 Plans and specifications for any intended construction or major reconstruction of a poultry plant shall be submitted to the director. The director shall approve or disapprove the plans and specifications within 30 days.

24750. The director may, after hearing, refuse to issue a license or renew a license and may revoke or suspend any license for any violation of, or failure to comply with, any provision of this chapter or any regulation which is adopted pursuant to it, or for any violation of, or failure to comply with, Section 25091.

24751. Any proceedings pursuant to Section 24750 shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3 of Title 2 of the Government Code. The director shall have all the powers which are granted in that chapter.

Article 5. Sanitation

24771. A person shall not do any of the following:

(a) Operate a poultry plant which is not sanitary.

(b) Operate a poultry plant in a manner or under conditions which are not sanitary.

24772. After each day's operation, a poultry plant and its outer premises shall be promptly cleaned in the manner which is prescribed by the regulations.

Article 6. Marks and Labels

24801. This article does not apply to New York dressed fowl until November 1, 1967.

24802. Poultry meat shall not be packed, repacked, cut up, recut, or sold unless each container or each carcass is marked in the manner which is required by this chapter and the regulations which are adopted pursuant to it.

Article 7. Violations

24831. It is unlawful for any person to do any of the following:

(a) Violate any provision of this chapter or any regulation which is adopted pursuant to it.

(b) Operate a poultry plant without a license.

(c) Mislabel poultry meat.

CHAPTER 3. POULTRY MEAT INSPECTION FOR WHOLESOMENESS

Article 1. Definitions

24951. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

24952. "Fowl" includes chickens, turkeys, ducks, geese, and other domesticated birds.

24953. "Growing poultry" means feeding and caring for poultry.

24954. "Marked" means plainly, legibly, and conspicuously labeled, tagged, stenciled, or branded pursuant to this chapter and any regulations which are adopted pursuant to it.

24955. "Mislabel" means the placing, or presence of any false, deceptive, or misleading mark, tag, brand, design, inscription, statement, billing, invoice, placard, sign, or other descriptive designation.

24956. "New York dressed fowl" means fowl from which the feathers have been removed and the blood drawn and which is offered for sale as a whole fowl with the head, feet, and entrails intact.

24957. "Poultry" means domesticated fowl or domesticated rabbit which is intended for use for human food.

24958. "Poultry meat" means the carcass of poultry or any part of such carcass.

24959. "Poultry meat inspector" means a person who after examination and demonstration has been issued a license by the director to inspect poultry meat for wholesomeness.

24960. "Poultry plant" means any of the following:

(a) Any place where poultry is slaughtered, dressed, or drawn.

(b) Any place, except a retail store or eating place, where poultry meat or poultry meat food products are cooked, cured, smoked, cut up, recut, packed, or repacked, or otherwise prepared for human food.

24961. "Producer" means a person that is engaged in the business of growing any poultry, which is marketed as poultry meat, for a period of three weeks or more for the purpose of increasing the size and weight of such poultry.

24962. "Regulations" means regulations which are adopted by the director to carry out the provisions of this chapter.

24963. "Wholesome" means that the poultry or poultry meat is free from all of the following:

(a) Physical evidence of any disease which is injurious to human health.

(b) Diseases or conditions which have rendered or would render the poultry meat unsuited for human food.

(c) Serious destruction of the flesh by disease or injury.

(d) Contamination by any substance which is injurious to human health.

Article 2. General Provisions

24991. The director shall adopt regulations for carrying out this chapter.

24992. The regulations may include standards for poultry meat food products. The standards shall conform, so far as possible, to the standards which are adopted by the United States Department of Agriculture that pertain to the preparation and processing of poultry meat food products and the poultry meat which is used in such products.

24993. The director shall furnish to each person that holds a license which is issued pursuant to this chapter, or that makes an application for a license, a copy of the regulations.

24994. The director may bring an action to enjoin the violation or threatened violation of any provision of this chapter or the regulations which are adopted pursuant to it in the superior court in and for the county in which the violation occurred or is about to occur.

24995. Any proceeding pursuant to Section 24994 shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

24996. The director may inspect, reinspect, or order the reinspection of any poultry meat or poultry meat food product which is being processed or stored in a plant that is licensed under this part. He shall condemn or order the condemnation of any such poultry meat or poultry meat product and poultry meat food product which is found to be unwholesome.

24997. If an action of an inspector in condemning any poultry meat or poultry meat product is questioned, appeal by the licensed plant operator may be made to the immediate supervisor of the inspector, and from his decision appeal may be made to the Chief of the Bureau of Poultry Inspection whose decision is final.

Article 3. Exemptions

25021. This chapter, except Section 25128, does not apply to poultry meat which has been inspected and passed for wholesomeness by the United States Department of Agricul-

ture if the immediate container or carcass of the poultry meat bears the official wholesomeness inspection mark of such department at the time of sale. If, however, any cooking, curing, smoking, packing, repacking, cutting up or recutting is done in this state, except in a retail store or public eating house, it shall be done in a poultry plant under federal or state inspection.

25022. This chapter, except Section 25128, does not apply to poultry meat which bears the official mark of a city, county, or state poultry meat inspection service for wholesomeness in another state which has requirements equal to those provided for in this chapter, if such out-of-state requirements have been approved by the director.

25023. This chapter does not apply to poultry meat which is derived from poultry which is produced upon the premises where it is slaughtered if the poultry meat is sold by the producer in any of the following ways:

(a) At retail on the premises.

(b) At retail by the producer of the poultry meat off of the premises, either direct to consumers at their homes or at a retail stand which is operated by such producer in a farmers' market.

(c) On or off the premises where it was produced, to retail stores or public eating houses.

As used in this section, "producer" includes only an individual producer who does not employ, except in unforeseeable exigencies, any person except members of his immediate family.

25024. This chapter does not apply to poultry meat which is derived from poultry which is slaughtered, dressed, and sold on the premises where it is produced for purposes other than resale, if the entire poultry meat output of the producer of such poultry is so sold.

Article 4. Meat Inspector Licenses

25051. A person shall not act as a poultry meat inspector unless he has a license which is issued pursuant to this chapter.

25052. Each person before acting as a poultry meat inspector shall apply to and receive from the director a license to inspect poultry meat.

25053. The application fee for a license is ten dollars ($10).

25054. Every license shall expire on the last day of the calendar year for which it is issued.

25055. Application for renewal of a license accompanied by a fee of five dollars ($5) shall be made on or before the last day of the calendar year for which the license was issued.

25056. To any fee which is not paid when due, there shall be added a penalty of five dollars ($5).

25057. If a license lapses for two calendar years, it is not subject to renewal. Any application for the renewal of such license shall be considered a new application.

25058. The director shall, after the written and oral examination and demonstration which are prescribed by Section 25059, issue to any person who passes the examination and is otherwise qualified a license to inspect poultry meat for wholesomeness. If an applicant for a license to inspect poultry meat does not take such examination within one year after the date of the receipt of his application by the director, his application expires.

25059. The written and oral examination and demonstration which are required by Section 25058 shall show the applicant's ability to understand laws and regulations which pertain to poultry meat inspection and his knowledge of all of the following:

(a) Conditions which affect wholesomeness in poultry meat and poultry meat products.

(b) The anatomy of poultry.

(c) Routine processing techniques and equipment which are used in poultry processing plants, and poultry plant sanitation.

25060 The director shall, from time to time, arrange for the conducting of schools of instruction for poultry meat inspectors.

25061. The director may, after hearing, refuse to issue a license or renew a license and he may suspend or revoke any license for any violation of, or failure to comply with, any provision of this chapter or the regulations which are adopted pursuant to it. The director may suspend temporarily, pending hearing, any license for any willful or deliberate violation.

25062. Any proceedings under Section 25061 shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3 of Title 2 of the Government Code. The director shall have all the powers which are granted in that chapter.

Article 5. Requirements for Inspection

25091. A person shall not operate a poultry plant unless all the poultry meat in the poultry plant is inspected by a poultry meat inspector pursuant to the regulations.

25092. The poultry meat inspector shall inspect, pursuant to the regulations, and classify any poultry meat, poultry meat product, or poultry meat food product which is presented for inspection into one of the following classes:

(a) Wholesome.

(b) Retained for further inspection.

(c) Condemned for human food.

25093. The poultry meat inspector shall apply or direct the application of the proper marks, as determined by regulation.

25094. All poultry meat which is condemned for human food shall be disposed of pursuant to the regulations.

25095. Poultry meat may be passed for further processing in a plant which is licensed pursuant to this part.

25096. Notwithstanding any other provision of this chapter, any inspection which is required by this chapter does not require the evisceration, cutting, or any internal examination of any New York dressed fowl.

Article 6. Marks and Labels

25121. This article does not apply to New York dressed fowl until November 1, 1967.

25122. Poultry meat shall not be packed, repacked, cut up, recut, or sold unless each container or each carcass is marked in the manner which is required by this chapter and the regulations which are adopted pursuant to it

25123. A poultry meat inspector shall place or cause to be placed a mark on each carcass or container of poultry meat before the poultry meat is removed from a poultry plant.

25124. The marks which are required by this article are in addition to those required by Section 24802 but may be in combination with such marks.

25125. The director shall determine by regulation the official design of the marks which are required by this article.

25126. Each poultry plant shall submit samples of the proposed method of use of the design of a mark to the director. The method shall be approved by the director before it is used.

25127. It is unlawful for any person to sell or mark as inspected for wholesomeness any poultry meat that has not been inspected and passed for wholesomeness pursuant to this chapter and regulations which are adopted pursuant to it.

25128. It is unlawful for any person, other than the consumer of poultry meat, to remove from any whole carcass of poultry meat, or from any part of a dismembered carcass of poultry meat, any official wholesomeness inspection mark of the United States Department of Agriculture, or of any city, county, or state poultry meat inspection service. As used in this section, "consumer" includes a restaurant or other place where such poultry meat is cooked and sold for consumption on or off the premises.

Article 7. Violations

25151. It is unlawful for any person to violate any provision of this chapter, or any regulations which are adopted by the director pursuant to this chapter.

PART 2. CLASSIFICATION OF POULTRY AND RABBIT MEAT

CHAPTER 1. DEFINITIONS

25401. Unless the context otherwise requires, the definitions in this chapter govern the construction of this part.

25402. "Class" means a division of poultry meat which is based on essential physical characteristics which with the weights differentiate between uses of the meat.

25403. "Fowl" includes chickens, turkeys, ducks, geese, and other domesticated birds.

25404. "Growing poultry" means feeding and caring for poultry.

25405. "Marked" means plainly, legibly, and conspicuously labeled, stamped, tagged, stenciled, or branded, in the manner which is prescribed by regulations of the director, to show the class of poultry meat.

25406. "Mislabel" means the placing, or presence of any false, deceptive, or misleading mark, tag, brand, design, inscription, statement, billing, invoice, placard, sign or other descriptive designation.

25407. "New York dressed fowl" means fowl from which the feathers have been removed and the blood drawn and which is offered for sale as a whole fowl with the head, feet, and entrails intact.

25408. "Poultry" means domesticated fowl and domesticated rabbit which is intended for use for human food.

25409. "Poultry meat" means the carcass of poultry or any part of the carcass, except the giblets. It does not include live poultry or processed poultry meat.

25410. "Poultry plant" means any of the following:

(a) Any place where poultry is slaughtered, dressed, or drawn.

(b) Any place where poultry meat is cut up, recut, packed or repacked, or otherwise prepared for human food.

25411. "Processing" means the commercial manufacturing of products of poultry meat by any method of cooking. It also includes all of the following:

(a) Cutting up into pieces smaller than the customary parts such as, in the case of poultry, necks, breasts, wings, backs, legs, thighs, or similar and identifiable portions of the carcass.

(b) Complete deboning of poultry meat.

25412. "Producer" means any person that is engaged in the business of growing any poultry, which is marketed as poultry meat, for a period of three weeks or more for the purpose of increasing the size and weight of such poultry.

CHAPTER 2. GENERAL PROVISIONS

25551. The director shall adopt regulations for carrying out this part.

25552. The director shall enforce this part where any poultry meat is packed, repacked, cut up, or recut.

25553. The director and the commissioners of each county, under the supervision of the director, shall enforce this part where any poultry meat is offered for sale or sold.

25554. An enforcing officer may do all of the following:

(a) Enter and inspect any place or conveyance where any poultry or poultry meat is produced, prepared, packed, repacked, cut up, recut, stored, delivered for shipment, loaded, shipped, transported, or sold.

(b) Inspect all poultry and poultry meat and any container of poultry or poultry meat which is found at the place or conveyance which is entered and inspected.

(c) Take for inspection such representative samples of the poultry, poultry meat, or containers as may be necessary to determine whether or not this part has been violated.

25555. Any enforcing officer may, while enforcing this part, seize or hold as evidence all or any part of any lot of poultry meat which is found to be in violation of this part as may in his judgment be necessary to obtain the conviction of the party he knows or believes has violated or is violating any provision of this part.

25556. Any lot of poultry meat which does not comply in all respects with the provisions of this part and the regulations which are adopted pursuant to it is a public nuisance.

25557. Any enforcing officer who has reason to believe that any lot of poultry meat does not comply in all respects with this part, may hold the lot pending proceedings to condemn and abate it as a public nuisance pursuant to this chapter.

25558. The officer may affix to any lot which is held pursuant to Section 25557 a tag or notice which warns that the lot is held and states the reasons for which it is held. It is unlawful for any person, except an authorized enforcing officer, to detach, alter, deface, or destroy any such tag or notice which is affixed to any such lot, or remove or dispose of such lot in any manner or under conditions other than as prescribed by such tag or notice, except upon written permission of an authorized enforcing officer or by the order of a court.

25559. The officer by whom any lot of poultry meat is held shall cause a notice of noncompliance to be served upon the person in possession of the lot. The notice of noncompliance shall include a description of the lot, the place where and the reasons for which it is held, and shall give notice that the lot is a public nuisance and subject to disposal pursuant to this chapter, unless within a specified time the lot is reconditioned or the deficiency otherwise corrected so as to bring it into compliance.

25560. If the person served is not the sole owner of the lot of poultry meat, or does not have authority as agent for the owner to bring the lot into compliance, such person shall notify the officer by whom such lot is held, in writing, of the names and addresses of the owner and every other person that is known to him to claim an interest in the lot. Any person

served is liable for any loss sustained by such owner or other person whose name and address he has knowingly concealed from such officer.

25561. If the lot of poultry meat is not reconditioned or the deficiency otherwise corrected so as to bring it into compliance within the time which is specified in the notice, the enforcing officer shall cause a copy of the notice of noncompliance to be served upon every person that is designated in writing by the person in possession of the lot to be the owner or to claim an interest in it.

25562. Any notice which is required by this chapter may be served personally or by mail addressed to the person to be served at his last known address.

25563. The enforcing officer, with the written consent of every person that is served, may destroy the lot of poultry meat or otherwise abate the nuisance. If any such person fails or refuses to give such consent, the enforcing officer shall proceed as provided in Sections 25564 and 25565.

25564. If the lot of poultry meat which is held is perishable or subject to rapid deterioration, the enforcing officer may file a verified petition in any superior or inferior court of the state to destroy such lot or otherwise abate the nuisance. The petition shall show the condition of the lot, that the lot is situated within the county, that the lot is held, and that notice of noncompliance has been served pursuant to this chapter The court may thereupon order that such lot be forthwith destroyed or the nuisance otherwise abated as set forth in such order.

25565. If the lot of poultry meat which is held is not perishable or subject to rapid deterioration, the enforcing officer shall immediately report the condition of the lot to the director. Within five days from the receipt of such report, the director may file a petition in the superior court in the county where the lot is situated for an order to show cause, returnable in five days, why the lot should not be abated.

The owner or person in possession of the lot of poultry meat, on his own motion within five days from the expiration of the time specified in the notice of noncompliance may file a petition in such court for an order to show cause, returnable in five days, why the lot should not be released to petitioner and any warning tags previously affixed removed from it.

Final determination by court in either case shall be within a period of not to exceed 20 days from the date the petition is filed.

25566. The court may enter judgment ordering that the lot of poultry meat be condemned and destroyed in the manner directed by the court or relabeled, denatured, or otherwise processed, or sold or released upon such conditions as the court in its discretion may impose to insure that the nuisance will be abated. If the poultry meat is sold by order of court, the costs of storage, handling, and reconditioning or disposal

shall be deducted from the proceeds of sale and the balance, if any, paid into court for the owner.

CHAPTER 3. EXEMPTIONS

25701. This part, except Section 26008, does not apply to poultry meat or a container of poultry meat which is marked with the official class as prescribed by the Consumer and Marketing Service of the United States Department of Agriculture; if such official class marking meets the requirements of this part

25702. This part, except Section 26008, does not apply to poultry meat which is marked as to a class that is officially approved by another inspection service whose requirements for class markings meet the requirements of this part.

25703. This part does not apply to poultry meat which is derived from poultry which is produced upon the premises where it is slaughtered if the poultry meat is sold by the producer in any of the following ways:

(a) At retail upon such premises.

(b) At retail off of such premises, either direct to consumers at their homes or at a retail stand which is operated by the producer in a farmers' market.

(c) On or off the premises where it was produced, to retail stores or public eating houses.

As used in this section, "producer" includes only an individual producer who does not employ, except in unforeseeable exigencies, any person except members of his immediate family.

25704 This part does not apply to poultry meat which is derived from poultry which is slaughtered, dressed, and sold on the premises where it is produced for purposes other than resale, if the entire poultry meat output of the producer of such poultry is so sold

CHAPTER 4. POULTRY AND RABBIT MEAT CLASSES

25851. The classes of the kinds of poultry meat are as established in this chapter and any regulations which are adopted by the director pursuant to Section 25857.

25852. The classes of chicken meat, as determined by inspection of appearance and other physical characteristics, are as follows:

(a) "Rock Cornish game hen" or "Cornish game hen" means a young immature chicken of either sex (usually five to six weeks of age) which weighs not more than two pounds ready-to-cook weight that was prepared from a Cornish chicken of the progeny of a Cornish chicken crossed with another breed of chicken.

(b) "Broiler" or "fryer" means a young chicken (usually under 16 weeks of age) of either sex, that is tender-meated,

with soft, pliable, smooth-textured skin, and flexible breastbone cartilage

(c) "Roaster" means a young chicken (usually under eight months of age) of either sex, that is tender-meated, with soft, pliable, smooth-textured skin, and breastbone cartilage that is somewhat less flexible than that of a broiler or fryer.

(d) "Caponette," "caponette fryer," or "caponette roaster" means a young chicken with the general characteristics of either a fryer or roaster which has been treated with the hormone stilbestrol or its equivalent.

(e) "Capon" means an unsexed male chicken (usually under 10 months of age), that is tender-meated with soft pliable, smooth-textured skin.

(f) "Hen" or "stewing chicken" or "fowl" means a mature female chicken (usually more than 10 months old) with meat less tender than that of a roaster, and nonflexible breastbone.

(g) "Stag" means a male chicken (usually under 10 months of age) with coarse skin, somewhat toughened and darkened flesh, and considerable hardening of the breastbone cartilage. Stags show a condition of fleshing and a degree of maturity intermediate between that of a roaster and a cock or old rooster.

(h) "Cock" or "old rooster" means a mature male chicken with coarse skin, toughened and darkened meat, and hardened breastbone.

25853. The classes of turkey meat as determined by appearance are as follows:

(a) "Fryer" or "roaster" means a young, immature turkey (usually under 16 weeks of age) of either sex, that is tender meated with soft, pliable, smooth-textured skin, and flexible breastbone.

(b) "Young turkey" means a turkey (usually under eight months of age) that is tender meated with soft, pliable, smooth-textured skin, and breastbone cartilage that is somewhat less flexible than in a turkey fryer or roaster. For labeling purposes, the designation of sex within the class name is optional.

(c) "Yearling hen turkey" means a fully matured female turkey (usually under 15 months of age) that is reasonably tender meated and with reasonably smooth-textured skin.

(d) "Yearling tom turkey" means a fully matured male turkey (usually under 15 months of age) that is reasonably tender meated and with reasonably smooth-textured skin.

(e) "Mature turkey" or "old turkey (hen or tom)" means an old turkey of either sex (usually in excess of 15 months of age) with coarse skin and toughened flesh.

25854. The classes of rabbit meat as determined by appearance and weight are as follows:

(a) "Rabbit fryer" means a young, domestic rabbit (usually under 12 weeks of age) with tender, fine-grained, and bright pearly white color which may be properly cooked by

broiling or frying and which weighs not less than 1½ pounds or over 3½ pounds ready-to-cook weight.

(b) "Rabbit roaster" means a domestic rabbit (over 12 weeks of age) which may be properly cooked by roasting, and which weighs 3½ to 5 pounds ready-to-cook weight.

(c) "Stewing rabbit" means a mature domestic rabbit of either sex (over six months of age) which may be properly cooked by stewing at any ready-to-cook weight.

25855. The following are the various classes of ducks:

(a) "Duckling" means a young duck of either sex (usually under 10 weeks of age) that is tender meated and has a bill that is not completely hardened and windpipe that is easily dented. This classification may include broilers, fryers, or roasters.

(b) "Duck" means a mature duck or an old duck (usually over 10 weeks of age) of either sex with toughened flesh, hardened bill, and a hardened windpipe.

25856. The following are the various classes of geese:

(a) "Young goose" means a goose of either sex which is tender meated, and has a windpipe that is easily dented.

(b) "Mature goose" or "old goose" means a goose of either sex which has toughened flesh and a hardened windpipe.

25857. The director may, by regulation, adopt any necessary new class designations and class specifications or modifications of existing class designations and class specifications. He shall, in exercising such authority, take into consideration the standard class designations and class specifications promulgated by the United States Department of Agriculture.

CHAPTER 5. REQUIREMENTS

26001. A person shall not pack, repack, cut up, recut, or sell poultry meat unless all carcasses and the parts of carcasses are placed in classes established pursuant to this part

The provisions of this section, except those which require that poultry, poultry meat, or carcasses be placed in classes and marked to show the class of poultry meat, do not apply to New York dressed fowl until November 1, 1967.

26002. Except as otherwise provided in Sections 26003, 26004, 26005, and 26006, a person shall not pack, repack, cut up, recut, or sell poultry meat unless each carcass or its wrapper or, in the case of cut-up poultry or poultry parts, the container is marked, in the manner which is prescribed by regulations of the director, to show the class of poultry meat.

26003. The provisions of Section 26002, except those which require that poultry, poultry meat, or carcasses be placed in classes and marked to show the class of poultry meat, do not apply to New York dressed fowl until November 1, 1967.

26004. Individual carcasses of poultry meat or packages of cut-up poultry or poultry parts need not be marked with class designation in any of the following cases:

(a) If they are prepared for use by institutions or public eating houses.

(b) If they are prepared for use for processing.

(c) If they are prepared for transportation or being transported to a plant for further preparation or packaging, and packaged in shipping containers which hold several carcasses or packages of such poultry.

Each shipping container shall be clearly and conspicuously marked with the proper designation of class, and of the intended use, in letters at least one-half of an inch in height, on a surface which is readily visible to the purchaser.

26005. Poultry parts which are displayed for sale to consumers in bulk without being packaged or wrapped, shall be segregated as to class of poultry meat. The class or classes shall be designated upon a placard which clearly identifies the poultry parts which are designated by the placard in a clear and conspicuous manner that is readily visible to the purchaser.

26006. Cut-up poultry meat which consists of all of the parts of a carcass, prepared, packaged, and offered for sale shall be from only one class of poultry meat. Containers of poultry parts of different classes, shall be marked to indicate the classes and the quantity of each.

26007. If a class of any kind of poultry meat contains two or more designations, any combination of the designations may appear in the class marking which is required by this chapter.

26008. (a) It is unlawful for any person to sell any whole carcass of chicken poultry meat unless such carcass, or the immediate package or other container in which it is sold, is plainly, legibly, and conspicuously labeled, stamped, tagged, or branded to show the name and address of the poultry plant where the chicken was slaughtered or the name of the state in which the chicken was grown or raised.

(b) Chicken poultry meat which is sold to institutions, to restaurants, or to processors for processing, may bear the label which is required in subdivision (a) of this section on each shipping container in lieu of individual carcass labeling

CHAPTER 6. VIOLATIONS

26151. It is unlawful for any person to violate any provision of this part or any regulation which is adopted pursuant to it.

PART 3. POULTRY

CHAPTER 1. GENERAL PROVISIONS

Article 1. Application

26401. The provisions of this part, including the payment of fees, are applicable to all state and county institutions which are engaging in livestock operations.

Article 2. Investigations

26421. The director may make any necessary investigations relative to reported violations of this part pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

26422. Copies of records, audits and reports of audits, inspection certificates, certified reports, findings, and all papers on file in the office of the director are prima facie evidence of the matters contained in them, and may be admitted into evidence in any hearing pursuant to Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code.

Article 3. Civil Remedies

26441. The Attorney General shall, upon complaint by the director, or may upon his own initiative if after examination of the complaint and evidence he believes a violation of any provision of this part has occurred, bring an action in the name of the people of this state in the superior court for an injunction against any person violating any provision of this part or any regulation duly issued by the director pursuant to it.

Any proceedings pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director is not, however, required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

Chapter 2. Sale, Possession, and Transportation

Article 1. Definitions

26551. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

26552. "Dealer" includes any person that is operating as a poultry retailer, poultry wholesaler, butcher, slaughterer, poultry packer, poultry buyer, or poultry commission merchant.

26553. "Place of business" includes any place or building in which, or at which, the business of a poultry dealer is conducted. Any group of buildings used as an integral part of one business shall be considered as one place of business.

26554. "Poultry" includes chickens, ducks, geese, turkeys, and all other fowls or birds which are used for food or production purposes.

Article 2. General Provisions

26581. This chapter only applies to the sale, purchase, or marketing of poultry in any county of this state and to the transportation of poultry in, through, or between any county or counties of this state.

Article 3. Transportation

26601. Any person that offers poultry for shipment shall furnish a statement of ownership or right of possession of such poultry to the person, carrier, or transportation company which is to transport such shipment. The statement shall be kept as part of the record of the person, carrier, or transportation company that transports such shipment.

26602. Any person, carrier, or transportation company which receives for transportation or transports any poultry shall at all times keep a correct record which shows all of the following:

(a) The point of origin and destination of any shipment of poultry.

(b) The names and addresses of the shipper and consignee.

(c) The kind and quantity of poultry transported.

26603. All peace officers, sheriffs or deputy sheriffs, members or officers of the California Highway Patrol and traffic officers may arrest, without warrant, any person that is found moving poultry in any manner which is not prescribed by this chapter, and may seize the poultry.

26604. The carrier from whom the poultry is seized pursuant to Section 26603 is not liable or responsible to the owner, shipper, or consignee for the seizure.

Article 4. Resale

26631. Any dealer or person that handles poultry for resale shall make and retain a record which shows all of the following:

(a) The origin, ownership, and right of possession of the poultry.

(b) The name and address of the seller or shipper of the poultry.

Article 5. Brands

26651. It is unlawful for any person to brand, or to alter or deface the brand on, any poultry with intent to steal it or to prevent identification of the poultry by the true owner.

26652. It is unlawful for any person to have in his possession any poultry the brand on which has been altered or defaced unless he received it from the true owner of the poultry.

Article 6. Violations

26681. Any person that violates any provision of this chapter is guilty of a misdemeanor. Upon conviction, such person shall be punished by a fine not exceeding one hundred dollars ($100), or by imprisonment not exceeding six months in the county jail, or by both such fine and imprisonment.

CHAPTER 3. POULTRY MEAT CONTAINING SPOILAGE RETARDANT COMPOUND

Article 1. Definitions

26801. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

26802. "Poultry" means domesticated fowl which is intended for use for human food It includes chickens, turkeys, ducks, geese, and other domesticated birds.

26803. "Spoilage retardant compound" means any compound, drug, or antibiotic which is added to poultry meat which retards or limits spoilage. Seasonings, spices, or flavorings, such as salt or smoke, are not chemical preservatives

Article 2. General Provisions

26831. The director shall adopt regulations for carrying out this chapter.

26832. The director shall enforce this chapter where any poultry meat is packed, repacked, cut up, or recut. The director and the commissioners of each county, under the supervision of the director, shall enforce this chapter where any poultry meat is sold.

Article 3. Regulations

26861. Before being offered for either wholesale or retail sale, any whole carcass of poultry meat to which a spoilage retardant compound has been added shall be marked to indicate the retardant which was used. Such marking shall be affixed to the whole carcass of poultry meat or on the package in which it is offered for sale

26862. No whole carcass of poultry meat shall be sold unless it is conspicuously and accurately marked in accordance with the requirements of this chapter.

Article 4. Violations

26981. Any person that violates any provision of this chapter or any regulation which is adopted pursuant to this chapter is guilty of a misdemeanor.

CHAPTER 4. IMMERSION OF RABBIT CARCASSES

26991. It is unlawful for any person to immerse or soak the carcass of any slaughtered rabbit in water for a period longer than necessary to eliminate the natural animal heat in the carcass and in no event for a period longer than 2½ hours.

CHAPTER 5. MOISTURE CONTENT OF POULTRY MEAT

Article 1. Definitions

27001. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

27002. "Poultry" means domesticated fowl which is intended for use for human food. It includes chickens, turkeys, ducks, geese, and other domesticated birds.

27003. "Poultry meat" means the carcass of poultry or any part of the carcass in the raw state. It does not include poultry meat food products.

Article 2. General Provisions

27031. The director shall enforce this chapter.

27032. The director may adopt such regulations as are reasonably necessary for carrying out this chapter.

27033. The regulations which are adopted by the director shall be, insofar as possible, similar to and consistent with regulations which are adopted by the United States Department of Agriculture.

27034. An enforcing officer may do all of the following:

(a) Enter and inspect any place or conveyance where any poultry or poultry meat is produced, prepared, packed, repacked, cut up, recut, stored, delivered for shipment, loaded, shipped, transported, or sold.

(b) Inspect all poultry and poultry meat and any container of poultry or poultry meat which is found at the place or conveyance which is entered and inspected.

(c) Take for inspection such representative samples of the poultry or poultry meat and the poultry and poultry meat containers as may be necessary to determine by laboratory analysis or other tests whether or not this chapter has been violated.

Article 3. Limitations

27061. It is unlawful for any person to sell poultry meat which contains added moisture in excess of 4 percent by weight, or in excess of any greater amount that may be established by regulations of the director as necessary in good commercial processing techniques consistent with protection of the interests of the consuming public.

Article 4. Violations

27081. It is unlawful for any person to violate any provision of this chapter or any regulation which is adopted pursuant to it.

CHAPTER 6. CALIFORNIA GROWN POULTRY

Article 1. Definitions

27201. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

27202. "Chicken poultry meat" means the carcass of chicken poultry or any part of the carcass. It does not include live chicken poultry or manufactured products in which chicken is not the main ingredient.

Article 2. Marks and Labels

27231. Before being offered for retail sale in this state, chicken poultry meat of chicken poultry which was grown or raised in this state may be marked, or the package in which it is to be offered for retail sale may be marked, with the words "California grown."

27232. Chicken poultry meat of chicken poultry which was not grown or raised in this state and packages of such meat shall not be sold in this state marked "California grown," or marked in any way as to imply that such meat is from California grown or raised chicken poultry.

PART 4. EGGS AND EGG PRODUCTS

CHAPTER 1. EGGS

Article 1. Definitions

27501. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

27502. "Addled" means a putrid or rotten egg.

27503. "Adherent yolk" means the yolk of the egg has become fastened to the shell.

27504. "Agent" includes bailee, broker, commission merchant, factor, auctioneer, solicitor, consignee, and any other person that is acting upon the express or implied authority of another.

27505. "Black spot" or "black rot" means moldy as defined in Section 27523.

27506. "Blood" means the presence in an egg of blood rings or blood veins due to embryo development, or blood diffused into the white of an egg.

27507. "Candling" means the examination of the interior of eggs by the use of transmitted light.

27508. "Checks" means eggs with shells which are not sound as determined by candling, appearance, or other means. It does not include any egg from which any exudation is present.

27509. "Clean" means that no dirt or foreign substance adheres to the surface of the eggshell and no stain or discoloration other than that which is caused by processing oil exceeds an aggregate area of one-quarter inch in diameter.

27510. "Clear white" means that the white of the egg is free from discoloration or foreign bodies.

27511. "Consumer" means a person that buys eggs for use as food and not for resale in any form.

27512. "Container" means any box, case, basket, carton, sack, bag, or other receptacle.

27513. "Dealer" means any person that contracts for or obtains from the producer of eggs or from any other dealer, possession or control of any eggs for the purpose of sale to another dealer or retailer.

27514. "Deceptive" means any arrangement of the contents of any container, or subcontainer, or of any lot, load, or display, in which the eggs in the outer layer or in any portion which is exposed to view are in quality, size, condition, or in any other respect so superior to those in the interior or unexposed portion as to materially misrepresent the contents or any part of the contents as to size, quality, condition, or any other respects.

27515. "Denatured" means any of the following:

(a) Eggs which are made unfit for human food by treatment or the addition of a foreign substance.

(b) Eggs with one-half or more of the shell's surface covered by a permanent black, dark purple or dark blue dye.

27516. "Dirties" are eggs with shells which are not reasonably clean as determined by appearance.

27517. "Eggs" means eggs in the shell from chickens, turkeys, ducks, geese, or any other species of fowl.

27518. "Firm white" means that the white of the egg is sufficiently thick or viscous to permit but little movement of the yolk from the center of the egg.

27519. "Incubator rejected eggs" or "incubator reject eggs" means eggs which have been placed in an incubator and thereafter have been removed from the incubator.

27520. "Inedible eggs" means eggs which, as determined by candling or any other means, contain black spot, black rot, white rot, mixed rot (addled), adherent yolks, bloody or green white, blood, embryo chicks, sour eggs, musty eggs, or which are moldy, filthy, decomposed, putrid, incubator rejected, or otherwise unfit for human consumption in whole or in part. It includes eggs with the shell cracked to the extent that the contents of the egg exude to the outside surface of the shell.

It does not include blood eggs which are intended for use for breaking out purposes, if such eggs are prepared, loaded,

shipped, or sold to, or in the possession of, a licensed egg-breaking plant.

27521. "Marked" means plainly, legibly, and conspicuously labeled, stamped, stenciled, printed, or branded.

27522. "Mislabel" means the placing or presence of any false, deceptive, or misleading mark, term, statement, design, devise, inscription, or any other designation, upon any of the following:

(a) Eggs.

(b) The container or subcontainer of eggs.

(c) The label, lining, or wrapper of any container or subcontainer of eggs.

(d) The placard or sign which is used in connection with a container or subcontainer of eggs or in connection with any bulk lot or display which has reference to eggs.

27523. "Moldy" means the presence of mold or bacteria inside the shell.

27524. "Processed" means that the shell of the egg has been treated with oil or other preservative preparation.

27525 "Reasonably clean" means that no dirt or foreign substance may be adhering to the surface of the eggshell and no stain or discoloration other than that caused by processing oil shall exceed an aggregate area of one-half inch in diameter.

27526. "Retailer" means any person that sells eggs to a consumer.

27527. "Sound" means that the shell is free from cracks.

27528. "Subcontainer" means any container which is being used within another container.

27529. "Uniform in size" means that the eggs in any one container do not vary more than three-eighths of an ounce in weight.

27530. "Visible germ development" means that there has been some development of the germ which is slightly visible as a deeper colored area on the yolk as shown by candling the egg.

27531. "White rot" means "addled," as defined in Section 27502.

Article 2. General Provisions

27551. The director and the commissioners of each county, their deputies and inspectors, under the supervision and control of the director shall, and the State Department of Public Health, the other city, county and state officers may, enforce this chapter pursuant to regulations which are adopted by the director.

27552. The refusal of any officer who is authorized pursuant to this chapter to carry out the orders and directions of the director in the enforcement of this chapter or prosecutions pursuant to it is neglect of duty.

27553. The director shall make and enforce such regulations as may be necessary to carry out this chapter.

27554. Any enforcement officer may do any of the following.

(a) Enter and inspect any place or conveyance within the county or district over which he has supervision, where any eggs are produced, candled, incubated, stored, packed, delivered for shipment, loaded, shipped, transported, or sold.

(b) Inspect the eggs and the egg containers and equipment which are found in any place or conveyance which he is authorized to enter and inspect.

(c) Take for inspection representative samples of the eggs and egg containers, for the purpose of determining whether or not any provision of this chapter has been violated.

27555. Any enforcement officer may also, while enforcing this chapter, seize and hold as evidence any container of eggs, or all or any part of any pack, load, lot, consignment, or shipment of eggs which are packed, stored, delivered for shipment, loaded, shipped, transported, or sold in violation of any provision of this chapter.

27556. The director, by regulation, shall prescribe methods of selecting samples of lots or containers of eggs which shall be reasonably calculated to produce by such sampling fair representations of the entire lots or containers which are sampled

Any sample which is taken pursuant to this section is prima facie evidence, in any court in this state, of the true condition of the entire lot in the examination of which the sample was taken.

27557. The director may bring an action to enjoin any violation or any threatened violation of any provision of this chapter in the superior court in and for the county in which the violation occurred or is about to occur. Any proceeding pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2, of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

27558. Any person, forwarding company, or common carrier may decline to ship or transport any eggs if it is notified by an enforcement officer that the eggs are found to be not in conformity with any provision of this chapter.

27559. Any person, forwarding company, or common carrier may reserve the right, in any receipt, bill of lading or other writing given to the shipper of any eggs, to reject for shipment and to return to, or hold at the expense and risk of, such shipper, all eggs which, upon inspection, are found to be not in conformity with any provision of this chapter.

27560. A person, forwarding company, or common carrier that transports any eggs at the request of the shipper or owner of the eggs does not violate any provision of this chapter, unless such person, forwarding company, or common carrier willfully fails or refuses to stop the transportation of the

eggs with reasonable dispatch after being notified in writing by any enforcing officer of this chapter that such eggs are found to be delivered for shipment in violation of this chapter.

Article 3. Chicken Egg Size Standards and Tolerances

27581. The standards of size, as determined by weight, of chicken eggs are established by this article.

27582. "Jumbo" means eggs which are uniform in size, weigh not less than $2\frac{5}{12}$ ounces each, and average not less than 30 ounces per dozen.

27583. "Extra large" means eggs which are uniform in size, weigh not less than $2\frac{1}{6}$ ounces each, and average not less than 27 ounces per dozen.

27584. "Large" means eggs which are uniform in size, weigh not less than $1\frac{11}{12}$ ounces each, and average not less than 24 ounces per dozen.

27585. "Medium" means eggs which are uniform in size, weigh not less than $1\frac{2}{3}$ ounces each, and average not less than 21 ounces per dozen.

27586. "Small" means eggs which are uniform in size, weigh not less than $1\frac{5}{12}$ ounces each, and average not less than 18 ounces per dozen.

27587. "Peewee" means eggs which weigh less than $1\frac{5}{12}$ ounces each.

27588. The tolerances for jumbo, extra large, large, medium, and small size standards of chicken eggs are as follows:

(a) Five percent, by count, of eggs in any container or bulk lot may be eggs of the next lower size than that which is specified.

(b) Eggs of the quality grade C need not be graded and marked as to size.

27589. If eggs are in cases, either in fillers or cartons, or in cartons not in cases, the tolerances for eggs which fail to comply with the individual weight requirements apply as follows:

(a) If the eggs are in containers which hold more than one dozen eggs, the tolerances shall apply to all of the eggs in the container.

(b) If the eggs are in containers which hold one dozen or less eggs, the tolerances shall apply to all of the eggs in a lot of containers of eggs of one size which are from one packer, one producer, or any one source

Article 4. Chicken Egg Quality Standards and Tolerances

27611. The standards of quality of chicken eggs, as determined by candling, are as established by this chapter.

27612. "Grade AA" means eggs which satisfy all of the following requirements:

(a) Are clean.

(b) Are sound.

(c) Have air cells which are localized and not over three-sixteenths of an inch in depth.

(d) Have whites that are clear and firm.

(e) Have no visible germ development present.

27613. "Grade A" means eggs which satisfy all of the following requirements:

(a) Are reasonably clean.

(b) Are sound.

(c) Have air cells which are not over one-fourth of an inch in depth.

(d) Have whites which are clear and firm.

(e) Have no visible germ development present. Checks or dirties may be present in eggs which are marked "grade A," if the eggs are marked to indicate that they are present.

27614. "Grade B" means eggs which satisfy all of the following requirements:

(a) Are reasonably clean.

(b) Are sound.

(c) Have air cells which are not over three-eighths of an inch in depth.

Visible germ development may be present in eggs which are marked "grade B." Checks or dirties may be present in eggs which are marked "grade B," if the eggs are marked to indicate that they are present.

27615. "Grade C" means eggs which in quality are below the requirements of "grade B" and which are not inedibles.

27616. The tolerances for eggs in any container or bulk lot, as determined by count, shall be as follows:

(a) "Grade AA" eggs may contain 5 percent of eggs which are not sound, and 10 percent of the eggs may be of the quality "grade A."

(b) "Grade A" eggs may contain 5 percent of eggs which are not reasonably clean or sound, and 10 percent of the eggs may be of the quality "grade B."

(c) "Grade B" eggs may contain 15 percent of eggs which are not reasonably clean or sound or of "grade C." The total percentage of "grade C" eggs shall not, however, exceed 5 percent.

No part of the tolerances for eggs which are provided in this section shall be allowed for any egg which has a shell that is cracked to the extent that the contents of the egg exude to the outside surface of the shell.

27617. If eggs are in cases, either in fillers or cartons or in cartons not in cases, the tolerances for eggs which fail to comply with the quality requirements apply as follows:

(a) If the eggs are in containers which hold more than one dozen eggs, the tolerances shall apply to all of the eggs in the container.

(b) If the eggs are in containers which hold one dozen or less eggs, the tolerances shall apply to all of the eggs in a lot

of containers of eggs of one grade which are from one packer, one producer, or any one source.

Article 5. Regulation

27671. Except as otherwise provided in Section 27672, every person that sells eggs to a retailer or manufacturer shall furnish an invoice which shows the exact size and quality of such eggs according to the standards which are prescribed by this chapter, together with the name and address of the person by whom the eggs are sold.

27672. An invoice is not required on any of the following:

(a) Eggs which are sold or delivered by a producer to a dealer or retailer for candling and grading.

(b) Eggs which are packed for sale to the United States Navy or Army if the eggs are labeled with the United States Department of Agriculture grades.

(c) Containers and subcontainers of eggs which are packed and certified pursuant to the standards of grade and quality and the grading rules which are promulgated by the United States Department of Agriculture.

27673. It is unlawful for any person to render any invoice, statement, or bill which shows any standard of size, standard of quality, representation of freshness, or any other description of eggs, which is false, deceptive, or misleading in any particular.

27674. It is unlawful for any person to sell eggs of the quality grade of "grade C" to retailers, consumers, restaurants, institutions, or labor camps except as provided in the tolerance for "grade B" eggs pursuant to subdivision (c) of Section 27616.

27675. It is unlawful for any person to sell as "fresh eggs," "ranch eggs," or "farm eggs," or to represent as being fresh, any eggs which are below the quality of grade A or which have been held in cold storage over 30 days.

27676. It is unlawful for any person to make any statement, representation, or assertion orally, by public outcry, or proclamation, or in writing, or by any other manner or means whatever concerning the quality, size, weight, condition, source, origin, or any other matter relating to eggs, which is false, deceptive, or misleading in any particular.

27677. It is unlawful for any person to advertise by sign, placard, or otherwise, the price at which chicken eggs are offered for sale without marking the full, correct, and unabbreviated designation of size and quality of such eggs, according to the standards which are prescribed by this chapter, on such advertisement, together with the price.

The designations of size and quality or other descriptive terms which are used in the advertisement shall be in bold face type or other conspicuous letters and at least one-half the size of the letters or figures which are used to designate the price of such eggs.

27678. It is unlawful for any person to sell to retailers or consumers, eggs which are ungraded as to quality or size, except that the director, upon the written application of any producer, may find and proclaim that an emergency exists which prevents the normal marketing of eggs by the applicant and other producers in the same area.

27679. During an emergency which is proclaimed pursuant to Section 27678, producers in the area in which the emergency has been proclaimed to exist may sell to retailers or consumers eggs which were produced upon the premises of the producers which are ungraded as to size and quality, and retailers may sell such eggs to consumers. Each container of eggs which are so sold and all invoices which relate to the eggs shall both:

(a) Be clearly marked "emergency, ungraded".

(b) Bear the name and address of the producer.

27680. It is unlawful for any person to fail to comply with any lawful order of an enforcement officer, or of any court, in any proceeding pursuant to this chapter.

27681. It is unlawful for any person to do any of the following:

(a) Refuse to submit any eggs or any container, subcontainer, lot, load, or display of eggs to the inspection of any enforcement officer.

(b) Refuse to stop, at the request of any enforcement officer, any vehicle which is transporting eggs.

Article 6. Marks and Labels

27701. If eggs are labeled pursuant to this chapter no other markings are required.

27702. Markings are not required on containers or subcontainers of eggs in any of the following cases:

(a) If they are sold at retail from a properly marked bulk display and packaged in the presence of the purchaser for the immediate purpose of the sale.

(b) If they are packed for sale to the United States Navy or Army and are labeled with United States Department of Agriculture grades.

(c) If they are packed for shipment or being shipped to points outside of this state.

(d) If the sale is an occasional sale, made without advertising, by the producer, from eggs produced on his own premises.

(e) If the containers or subcontainers are packed and certified pursuant to the standards of grade and quality and the grading rules which are promulgated by the United States Department of Agriculture.

(f) If they are being delivered from outside of the state to dealers in the state for candling and grading.

(g) If they are being delivered to, or are in possession of, a dealer for candling and grading, or are being delivered to cold

storage, are in cold storage, or are being removed from cold storage, unless they are eggs which have been in an incubator. Eggs which have been in an incubator shall be marked "hatchery test" together with the name and address of the hatchery of origin.

27703. Eggs which are marked with the United States Department of Agriculture grades such as referred to in subdivisions (b) and (e) of Section 27702 shall be considered as complying with this chapter if such eggs meet the requirements of the comparable quality grade and size designation defined in this chapter. In no case may eggs which are marked with the United States grade designations be of a lower quality or size than comparable grades which are defined in this chapter.

27704. Markings are not required on containers of 15 dozen or more eggs which contain properly marked subcontainers.

27705. It is unlawful for any person to sell or represent as chicken eggs, eggs from any other species of fowl, or mixed eggs from more than one species of fowl, or eggs from ducks, turkeys, geese, or any species of fowl other than chickens, unless the containers and subcontainers of the eggs are marked with, or a sign, placard, or other inscription otherwise indicates fully, the species of fowl from which the eggs were produced.

27706. It is unlawful for any person to sell to consumers, chicken eggs from bulk lots unless a plainly legible sign or placard that is marked with the full, correct and unabbreviated designation of size and quality of the eggs in boldface type letters which are not less than one-half of an inch in height, pursuant to the standards as prescribed in this chapter is conspicuously placed and posted in such a position as to clearly and accurately identify the eggs which it designates.

27707. It is unlawful for any person to place or pack eggs in any container or subcontainer which bears any name, markings, or any designation of brand, quality, grade, or other matter, unless all of such markings which do not properly and accurately apply to the eggs that are placed or packed in the container or subcontainer have been removed, erased, or obliterated.

27708. Except as otherwise provided in Section 27710, it is unlawful for any person to prepare, pack, place, deliver for shipment, deliver for sale, load, ship, transport or sell in bulk, in containers, or in subcontainers any of the following:

(a) Chicken eggs unless each container and subcontainer of such eggs is marked with the full, correct, and unabbreviated designation of size and quality of the eggs which it contains pursuant to the standards which are prescribed in this chapter together with the name and address of the producer, dealer, retailer, or agent by or for whom the eggs were graded or marked.

(b) Eggs which are mislabeled.

(c) Eggs which are deceptive.

(d) Eggs that are, or contain, inedibles which are not denatured, except not to exceed 5 percent by count of inedibles, other than incubator reject eggs, is permitted if eggs are going to a dealer for candling and grading, or to a breaking plant for breaking purposes.

(e) Eggs that are, or contain, inedibles which are denatured if the eggs are going to a dealer for candling and grading or to a breaking plant for breaking purposes.

27709. Designations of size and quality which are required by Section 27708 to be marked upon containers of eggs shall be plainly and conspicuously marked in boldface type letters as follows:

(a) Not less than one-fourth of an inch in height on the outside top face of each container which holds less than 15 dozen eggs.

(b) Not less than one-half of an inch in height on one outside end of any oblong container which holds 15 dozen or more eggs and on one outside side of any other container which holds 15 dozen or more eggs.

27710. Eggs which violate subdivision (b) or (d) of Section 27708 may be possessed by the owner or any other person, except a person that operates a breaking plant, in any of the following cases:

(a) The eggs are in cold storage.

(b) The eggs are being transported from cold storage for candling and grading.

(c) The eggs have been in cold storage and are in the possession of a dealer for candling and grading.

The eggs to which this section refers are, however, subject to the provisions of Article 9 (commencing with Section 27801) of this chapter.

27711. It is unlawful for any person that is operating a licensed breaking plant to have in his possession, for breaking-out purposes, eggs which do not meet the requirements of subdivision (d) of Section 27708. Such eggs are subject to rejection pursuant to Article 9 (commencing with Section 27801) of this chapter and shall not be broken out in a breaking plant unless the excessive percentage of inedibles has first been removed.

27712. It is unlawful for any person to sell or use any container or subcontainer of eggs which bears a name, a trademark, or a trade name unless the name, trademark, or trade name is obliterated or effaced, except where the seller or user is entitled to use the name, trademark, or trade name.

27713. Only one description of the size and quality of eggs shall appear upon a container, subcontainer, or placard which is required by this chapter The markings of eggs which are placed in containers may, however, show different size and quality descriptions for specified quantities of eggs in the container.

Article 7. California-Produced Eggs

27741. No eggs, in containers or otherwise, shall be sold in this state as a product of this state, whether or not such eggs are processed or packed in this state, unless the eggs, or all eggs in such containers, have actually been produced in this state.

27742. The container of eggs which were produced in this state may be labeled "Produced in California."

27743. It is unlawful for any person to label any eggs which were not produced in this state with the label "Produced in California" or any label which is designed to represent that such eggs were produced in this state.

Article 8. Criminal Punishment and Procedure

27771. Any person that violates any provision of this chapter is guilty of a misdemeanor which is punishable as follows:

(a) In cases of willful or intentional violation, by imprisonment in the county jail not exceeding six months, or by fine not exceeding five hundred dollars ($500), or by both.

(b) In cases which do not involve willful or intentional violation, by fine not exceeding five hundred dollars ($500).

27772. Any prosecution for a violation of any provision of this chapter may be instituted in any county where any part of the offense occurred. Any evidence which is taken by any enforcement officer in any county may be admitted in evidence in any prosecution in any other county.

27773. Unless a person that is arrested for the transportation of eggs in violation of any provision of this chapter demands the right to an immediate appearance before a magistrate, the arresting officer shall, upon production of satisfactory evidence of the identity of the person arrested, do all of the following:

(a) Take the name and address of the arrested person, the license number of his motor vehicle, and such other information as may be necessary.

(b) Notify the arrested person, in writing, to appear at a time and place which is specified in the notice.

27774. The time which is specified in the notice to appear shall be at least five days after the arrest.

27775. The place which is specified in the notice to appear shall be one of the following:

(a) Before a magistrate of the district in which the offense with which the arrested person is charged is alleged to have been committed.

(b) Upon the demand of the arrested person, before a magistrate of the district in which is located the county seat of the county in which the offense is alleged to have been committed.

(c) In any county in which there is established a municipal court at the county seat of the county, the notice to appear may specify that the place shall be before any judge of such municipal court.

27776. If the arrested person gives his written promise to appear at the time and place specified in the notice to appear, the arresting officer shall forthwith release him from custody.

27777. If any arrested person refuses to give his written promise to appear or demands an immediate appearance before a magistrate, he shall be taken forthwith before a magistrate of the district in which the offense with which he is charged is alleged to have been committed. He shall then be entitled to at least five days continuance of his case in which to prepare to plead or to prepare for trial unless he waives such time in writing or in open court and either:

(a) Gives his written promise to appear at such time and place as the court may fix for his further appearance.

(b) If he refuses to give his promise to appear, upon such bail as the court may fix.

He shall thereupon be released from custody.

27778. It is unlawful for any person to fail to appear in court at the time and place designated in any written promise to appear given after arrest pursuant to this chapter, regardless of the disposition of the offense originally charged.

Article 9. Public Nuisances

27801. Any eggs which are prepared, packed, stored, delivered for shipment, delivered for sale, loaded, shipped, transported, or sold in violation of any provision of this chapter, together with their containers, are a public nuisance.

The eggs shall be held by the person in whose possession they may be and shall not be moved from the place where they may be, except upon the written permission or upon the specific direction of an enforcement officer.

27802. The enforcement officer may affix a warning tag or notice to the eggs and their containers which are a public nuisance and may give notice of such violation to the producer, packer or owner, or any person in possession of the eggs.

27803. It is unlawful for any person to move any eggs or their containers to which any warning tag or notice has been affixed or to remove the warning tag or notice from the place where it may be affixed, except upon written permission, or upon the specific direction of an enforcement officer.

27804. If the person, notified pursuant to Section 27802, refuses or fails within 72 hours to commence and proceed with due diligence to recondition or re-mark the eggs and their containers so as to comply with this chapter, the eggs and their containers may be seized by any enforcement officer.

If the eggs are in cold storage, the 72-hour period does not commence to run until they are removed from cold storage and delivered to a dealer.

27805 The district attorney of the county in which the eggs and their containers which are a public nuisance are found, on the relation of the director or of any enforce-

ment officer, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent the public nuisance.

27806. Upon judgment and by order of the court, the eggs and their containers which are a public nuisance shall be condemned and destroyed in the manner which is directed by the court, or reconditioned, re-marked, denatured, or otherwise processed, or released upon such conditions as the court in its discretion may impose to insure that the nuisance shall be abated.

27807. If the owner fails to comply with the order of the court within the time which is specified in the order, the court may order disposal of the eggs and their containers or their sale, under such terms and conditions as the court may prescribe, by the enforcement officer, or by the sheriff, marshal, or constable.

27808. If the court orders the sale of any of the eggs and their containers which can be salvaged, the costs of disposal shall be deducted from the proceeds of sale and the balance paid into court for the owner.

27809. In actions arising pursuant to this chapter:

(a) Municipal courts shall have original jurisdiction where the value of the property seized amounts to three thousand dollars ($3,000) or less.

(b) Justice courts shall have original jurisdiction where the value amounts to five hundred dollars ($500) or less.

CHAPTER 2. EGG CONTAINERS

Article 1. General Provisions

27851. The director shall enforce this chapter.

27852. Any money which is collected under this chapter shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

Article 2. Brand Registration

27871. Any person or association that is engaged in receiving, manufacturing, packing, handling, or selling eggs in containers, except in corrugated fiber containers, which contain four dozen or more shell eggs, marked or otherwise identified with the name of such person or association or with any fictitious or other name or word or with any mark or device whatsoever, and any association or corporation, the members or directors of which are so engaged, may file with the department a description of the name or word, mark, or device which is so used, and an application for registration of it as a brand. The application shall be accompanied by a fee of one hundred dollars ($100) for each separate brand.

27872. There shall be included as a part of each brand the words "Registered in California" or the abbreviation "Reg. Cal."

27873. The applicant shall also cause such description to be printed once a week for three successive weeks in a newspaper of general circulation which is published in the locality in which the principal place of business of the applicant is situated.

27874. The department may refuse to register a brand if it appears that the same or a similar brand has been previously registered by another person or association unless the prior registrant gives his written consent to the subsequent registration.

27875. If it appears that two or more applicants have applied for the registration of the same or similar brands, the director may after hearing determine the right of prior ownership in such brand. When such right of prior ownership is determined the director shall refuse to register, or shall cancel the registration of, any duplicate or similar brand.

27876. Any certificate of registration which is granted expires on the 30th day of June in each year and may be renewed by payment of a renewal fee of one hundred dollars ($100). The renewal shall be made on forms which are supplied by the director.

27877. If renewal of the certificate is not made within 60 days after the expiration of the certificate, such certificate becomes null and void.

Article 3. Branded Containers

27891. Except as otherwise provided in this article, every person engaged in a business that finds or receives any container in connection with such business, which is marked with a brand that is registered pursuant to this chapter shall, within 14 days, notify the owner of the container or his agent. If the finder is unable to locate the owner or his agent, he shall, within seven days, notify the director in writing that he has in his possession such container and particularly describe in such notice the trademark or brand which is upon the container.

27892 Any person that acquires any container which is marked with a brand that is registered pursuant to this chapter, by purchase or by other lawful means, and that has the written consent of the registrant of such brand to use it on the particular container which is acquired or to use such brand on containers generally, shall so notify the department. He shall not thereafter be required again to file and publish the description, but shall acquire as a part of the purchase all such benefit as the vendor had under this code as to the particular containers so acquired or as to containers generally, dependent on the form of such written consent.

27893. Any person that purchases any container which is marked with a brand that is registered pursuant to this chapter shall submit to the director a copy of the bill of sale or other documentary evidence which supports such purchase.

27894. If the owner of any container which is marked or branded or any other person that is lawfully entitled to use the container requires a deposit for security for the safekeeping and return of such container, it does not constitute a sale of such container.

27895. Upon the representation of any interested party, the director may institute proceedings in any court of competent jurisdiction to recover for the owner any container which is marked with a brand that is registered pursuant to this chapter. The expense of such proceedings shall be paid by the interested party on whose representation such proceedings were instituted, and shall be a lien on such container.

Article 4. Violations

27911. It is unlawful for any person to use the words "Registered in California" or the abbreviation "Reg. Cal." on any container unless the brand which appears upon it is registered pursuant to this chapter.

27912. It is unlawful for any person that is engaged in a business which involves the use of any container that is marked with a brand which is registered pursuant to this chapter without the written consent which is provided for in Section 27892, except the registrant of the brand and the members of any association which is the registrant, to use or fill with eggs, any container which is marked or distinguished with a brand, of which a description has been filed and published.

27913. It is unlawful for any person to do any of the following:

(a) Erase, obliterate, cover up, or conceal any brand without first notifying the director and receiving his approval.

(b) Sell, buy, give, take, or otherwise traffic in containers that are marked with a brand which is registered pursuant to this chapter, except as provided in Section 27892.

27914. It is unlawful for any common carrier or private carrier for hire, except those which are engaged in transporting eggs and containers of eggs to and from farms where eggs are produced, to receive or transport any container which is marked with a brand that is registered pursuant to this chapter unless such carrier has in its possession a bill of lading or invoice which shows all of the following:

(a) The name and address of the consignor.

(b) The name and address of the consignee.

(c) The number of containers.

(d) The brand which appears on the container.

27915. A consignee shall not accept or receive any empty container which he is not authorized to use. Nothing herein shall be construed to derogate from any powers or authority of the Public Utilities Commission of this state.

CHAPTER 3. EGG PRODUCTS

Article 1. Definitions

27951. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

27952. "Egg products" mean "liquid eggs," "frozen eggs," "egg solids," or other egg products which are intended for human consumption.

Article 2. Administration

27971. The State Department of Public Health shall enforce this chapter and shall make and enforce all necessary regulations in relation to it.

Article 3. Licenses and Registration

27991. It is unlawful for any person to do any of the following, unless he has a license issued by the State Department of Public Health:

(a) Engage in egg breaking, liquefying, or dehydration of egg products.

(b) Bring, or cause to be brought, into this state from other states, or from outside the United States, for the purpose of resale any egg product.

This section does not apply to any bakery or restaurant, or any employee of a bakery or restaurant, in which eggs are broken for immediate use upon the premises.

27992. The State Department of Public Health shall issue to any person an annual nontransferable license upon the receipt of one hundred dollars ($100) for each such license and such evidence as the department may require to show that the applicant is properly equipped to operate such an establishment at each location where the applicant conducts operations which are required to be licensed pursuant to Section 27991.

27993. Annual license fees payable pursuant to Section 27992 shall become due and payable by each person approved by the State Department of Public Health on or before January 1st in each year. The fees shall be paid by the department into the General Fund in the State Treasury.

Article 4. Requirements for Egg-Breaking Establishments

28021. All egg-breaking establishments which are required to be licensed pursuant to this chapter shall consist of at least the following and distinctly separate rooms or areas:

(a) Candling room.

(b) Breaking room.

(c) Washing and sterilizing area.

(d) Chilling and freezing rooms.

28022. The candling room shall be separate from the breaking room, but may join it, if such room is provided with a tightly fitted door or similar opening.

28023. In the candling room:

(a) There shall be provided ample receptacles to hold all rejected eggs.

(b) Any egg product which is not fit for human food shall be placed in a conspicuously marked container which contains a denaturant of such character as will prevent such product from being used as human food. The denaturant need not, however, make such product unacceptable as an animal food or animal food product.

(c) All candled eggs shall be placed in clean and sanitary containers before they are sent to the breaking room.

(d) All eggs shall be candled with care using every precaution to keep every egg which is classed as unfit for human food out of the breaking room.

28024. The breaking room shall satisfy all of the following requirements:

(a) The walls and ceiling shall be of white enamel, tile, paint, or other waterproof covering.

(b) The floor shall be impervious to water and supplied with ample drains.

(c) The intersections of the wall and the floor shall be finished in the so-called sanitary or cove finish.

(d) Every window or other exterior opening shall be adequately covered to keep out flies, dust, and dirt.

(e) Every table shall be made of metal, porcelain, or other impervious material, or covered with a similar material.

28025. The activities which are carried on in the breaking room shall satisfy all of the following requirements:

(a) All eggs shall be broken on detachable metal knives. The contents of the shell shall be emptied into a glass, metal, or other approved cup.

(b) A careful examination for appearance and odor shall be made of all eggs in the approved cup before they are poured into the packing container.

(c) If any eggs in the approved cup are not of the classes which are permitted for human food, the cup and contents and knives shall be removed to the washing area and properly sterilized apparatus shall be substituted.

(d) Before the clean equipment is received, the hands of the egg breaker shall be washed clean in a wash basin which shall be provided for that purpose in the breaking room, and shall be properly dried on a fresh, clean towel or by some other sanitary device.

(e) The separating of yolks and whites "by hand" is strictly prohibited. Each separation shall be effected by a sanitary mechanical device.

28026. Every employee in the breaking room shall wear a clean white cap and outer garments of washable material.

28027. The washing and sterilizing areas shall satisfy all of the following requirements:

(a) Be separate and apart.

(b) Have a waterproof floor.

(c) Have ample daylight.

(d) Have hot and cold running water. The hot water to be not less than 160 degrees Fahrenheit.

(e) There shall be adequate facilities for the washing, rinsing, and sterilizing of all utensils, containers, vats, receptacles, implements, et cetera.

28028. Every utensil, container, vat, receptacle, implement, et cetera, shall be thoroughly washed and sterilized before it is used.

28029. Every floor and table shall be scrubbed at least once daily or oftener if needed.

28030. Every chilling and freezing room shall have ample facilities for the prompt cooling or freezing of liquid egg products. Liquid eggs intended for immediate sale or use shall be properly cooled and delivery made within 24 hours after cracking.

28031. The freezing room shall have a waterproof floor, adequately cleaned.

Article 5. Standards of Sanitation

28051. For the purpose of this article, the following eggs are inedible or unfit for human consumption:

(a) Any egg which contains black spot, black rot, white rot, mixed rot (addled), adherent yolks, bloody or green white, blood, or an embryo chick.

(b) Any sour egg, musty egg, or egg which consists in whole or in part of a moldy, filthy, decomposed, or putrid substance.

(c) Any egg with adhering dirt or fecal matter, unless the egg is washed prior to breaking.

(d) Any egg which is cracked to the extent that the contents of the egg exudes to the outside surface of the shell. Notwithstanding the provisions of this subdivision or of Section 27520, any such egg may be used in any egg product if (1) it became a leaker after its receipt at the breaking plant, (2) it is placed on a tray of such material and design as to be easily cleaned and sanitized which has not more than one egg per cell, and (3) it is transferred promptly to the breaking room to be broken by specially trained personnel

(e) Any incubator reject egg. Any egg which is intended for use in any animal food or animal food product shall not, however, be considered to be inedible for the purposes of this article.

(f) Any egg that is adulterated within the meaning of the California Pure Foods Act, Chapter 3 (commencing with Section 26450), Division 21 of the Health and Safety Code

28052. Every egg product shall be prepared only from eggs that are fit for human consumption, under sanitary conditions that meet the approval of all state regulations pre-

scribed pursuant to the California Pure Foods Act, Chapter 3 (commencing with Section 26450), Division 21 of the Health and Safety Code and Chapter 7 (commencing with Section 28280), Division 21 of the Health and Safety Code.

28053. Any egg product which is prepared outside of the state but within the United States shall bear a certificate of an authorized representative of any federal, state, county, or city department that is authorized to inspect food products which certified that the egg product has been prepared as follows:

(a) Only from eggs that are fit for human consumption.

(b) Under sanitary conditions.

28054. Certificates issued pursuant to Section 28053 shall be submitted to the State Department of Public Health prior to the sale of egg products covered by the certificate in interstate commerce.

28055. Any egg product which is packed in tin containers that hold 30 pounds or less and sold in this state shall be sold only in new containers. Plastic containers or bags may be used if the plastic is of a type which is approved by the Department of Public Health for food contact purpose and if the closure is adequate to properly seal the package from contamination of any type.

Article 6. Pasteurization or Other Treatment of Egg Products

28061. On or before June 1, 1966, every egg product which is intended for human consumption shall be pasteurized. Pasteurization is a process that shall consist of the uniform heating of egg products to a temperature of not less than 140 degrees Fahrenheit and of holding such products at such a temperature for not less than 3½ minutes. Such pasteurization shall be conducted in properly operated equipment and the product shall be cooled immediately to a temperature of 50 degrees Fahrenheit or below, except egg whites, which shall be cooled immediately to a temperature of 55 degrees Fahrenheit or below.

28062. In addition to the procedure which is authorized by Section 28061, the State Department of Public Health may adopt regulations which provide procedures for treatment of egg products to make such products equally as safe for human consumption as treatment by the procedure which is provided in Section 28061.

Article 7. Labeling of Egg Products Generally

28071. Every egg product shall bear a label which complies with the label requirements as stated in Article 3 (commencing with Section 26490), Chapter 3, Division 21 of the Health and Safety Code.

28072. The labeling shall appear on the main body of the container, except that returnable containers over 30-pound

capacity may bear a label in tag form which is affixed to the closure so as to be destroyed upon opening.

28073. The use of any word or symbol which implies that the egg product was processed under health department inspection or supervision shall be considered false and misleading.

Article 8. Foreign Importation

28081. As used in this article, "imported egg product" means any egg product which is imported into this state from without the United States

28082. A person shall not sell for human consumption in the state any imported egg product until it has been inspected by the State Department of Public Health, found to be fit for human consumption, and a permit authorizing the sale has been issued.

28083. The State Department of Public Health shall cause an inspection to be made of all imported egg products.

28084. If, after inspection, the imported egg product is found by the State Department of Public Health to be in fit condition for human consumption, the department shall issue to the importer or consignee a permit which authorizes the sale of the imported egg product for such purpose, together with certificates of inspection equal in number to the number of containers in which the imported egg product is packed.

28085. The importer or consignee shall pay for the inspection an inspection fee to be fixed by the State Department of Public Health for each certificate of inspection.

28086. The certificate of inspection shall be in such form as the State Department of Public Health deems appropriate. They shall have printed upon a white background in plain black letters, not less than one inch high, "frozen eggs (or, as the case may be, liquid eggs, dried eggs or egg products) imported into the State of California from without the United States, inspected (inserting the date) by California Department of Public Health."

28087. The certificates of inspection shall be printed upon gummed, adhesive labels. The importer or consignee shall affix or cause to be affixed one such certificate to each of the containers in such manner that the inspection certificate shall be plainly visible to the buyer.

28088. An imported egg product shall be sold only from the original containers.

28089. A certificate of inspection shall not be removed from the container or defaced, and a container upon which such inspection certificate has been affixed shall not be used as a receptacle for any imported egg product which has not been so inspected and pronounced fit for human consumption.

28090 Every public warehouse, including a cold storage warehouse, shall keep a record of, and furnish to the State Department of Public Health at the end of each month a statement of, every imported egg product received by it

during the month. The statement shall show all of the following:

(a) The name of the depositor.

(b) The quantity of the imported egg product warehoused.

(c) The type of container in which the imported egg product is packed.

28091. A public warehouse, including a cold storage warehouse, shall not permit the removal from it of any imported egg product for sale or distribution in this state unless the imported egg product has been inspected by the State Department of Public Health and an inspection permit has been affixed to the container of the imported egg product which shows the inspection.

28092. It is unlawful for any person to withhold from any officer information where any imported egg product is kept or stored, or to refuse to permit an inspection of the imported egg product and of the premises where it is kept, stored, or processed.

28093. Every importer and wholesale distributor of any imported egg product shall furnish the State Department of Public Health both of the following:

(a) Within five days after the receipt of any imported egg product, a statement which shows the quantity and kind of imported egg product received and the type of container in which it is packed and the place where it is stored.

(b) Within five days after any sale, a statement which shows the person, firm, or corporation to whom the imported egg product was sold and the quantity and kind of the imported egg product.

28094. The container in which any imported egg product is sold in the state shall both:

(a) Have the words "frozen eggs (or liquid eggs, dried eggs, or egg products, as the case may be) imported from without the United States" and the name of the country of origin displayed on the case or container in letters not less than two inches high.

(b) Bear the name of the manufacturer by whom the imported egg product was prepared or manufactured and the country in which the imported egg product was prepared or manufactured.

28095. Every retailer of any imported egg product shall sell the imported egg product from the container in which the retailer received it and he shall inform each purchaser of the origin of the imported egg product.

28096. Every restaurant, hotel, cafe, bakery, or confectionery which uses or serves any imported egg product shall place a sign in letters not less than four inches high in some conspicuous place in their places of business so that the customer entering their places of business can see it. The sign shall read "frozen eggs (or dried eggs, or liquid eggs, or egg products, as the case may be) imported from without the United States used here."

28097. Every food product, including any bakery product or confectionery product, which contains any imported egg product, shall have stamped on the outside of each individual package or container of such food product, in plain view and in conspicuous letters not less than one-quarter of an inch in height, the words "made with imported egg products."

28098. Every person that sells any food product, in the manufacture of which any imported egg product is used, shall, if such food product is not packed in individual packages or containers, and marked as provided in this article, display in a conspicuous place in the place of business where such food product is sold so that a customer entering such place of business can see it, a sign in letters not less than four inches in height reading "Imported egg products are used in the manufacture of food products sold here."

Article 9. Public Nuisance

28121. Any food product in the manufacture of which any imported egg product is used, or any egg product packed, stored, delivered, shipped, or being transported or sold, in violation of this part and its containers are public nuisances and shall not be moved from the place where they may be, except under the specific direction of a proper enforcing officer. The food product or egg product may be seized by any enforcing officer and by order of the justice, municipal, or superior court of the judicial district, city, or county within which it may be, shall be condemned or destroyed.

Article 10. Criminal Penalties

28141 Any violation of any provision of this chapter or any regulation which is made by the State Department of Public Health pursuant to it is punishable for the first offense by a fine not exceeding five hundred dollars ($500) and for the second offense by a fine not exceeding one thousand dollars ($1,000) or by imprisonment for not more than 90 days, or both.

DIVISION 13. BEE MANAGEMENT AND HONEY PRODUCTION

Chapter 1. Bees

Article 1. Definitions

29001. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

29002. "Apiary" includes bees, comb, hives, appliances, or colonies, wherever they are kept, located, or found.

29003 "Appliance" means any implement or other device which is used in handling and manipulating bees or

comb, any container of bees or comb, or any other equipment which is used in the practice of apiculture.

29004. "Bees" means honey-producing insects of the genus Apis. It includes all life stages of such insects.

29005. "Colony" means one hive and its contents, including bees, comb, and appliances.

29006. "Comb" includes all materials which are normally deposited into hives by bees. It does not include extracted honey or royal jelly, trapped pollen, and processed beeswax.

29007. "Disease" means American foulbrood or any other infectious disease, parasite, or pest that affects bees which the director by regulations declares is detrimental to the welfare of the bee industry.

29008. "Diseased" means that disease can be demonstrated to exist in the thing which is described as diseased, or in any part of such thing.

29009. "Hive" means any receptacle or container, or part of any receptacle or container, which is made or prepared for the use of bees, or which is inhabited by bees.

29010. "Inspector" means any person who is authorized to enforce this chapter.

29011. "Location" means any premises upon which an apiary is located.

Article 2. Administration

29031. The director, and the commissioner of each county under the direction and supervision of the director, shall enforce this chapter.

29032. The director may make such regulations as are reasonable and necessary to carry out this chapter.

29033. It is unlawful for any person to fail to comply with any notice or order which is issued pursuant to this chapter.

29034. The director may appoint a supervisor of apiary inspection and such qualified state apiary inspectors as may be necessary.

29035. Each commissioner is an ex officio state apiary inspector and may appoint one or more inspectors, qualified pursuant to the regulations of the director, to be county apiary inspectors.

29036. The director may assign one or more qualified state apiary inspectors to perform the duties of a county apiary inspector in any county for such time and at such rate of compensation as may be determined by agreement with the board of supervisors pursuant to Section 482. The state apiary inspector shall be under the direction and supervision of the commissioner, if there be such officer, in the county to which he is assigned.

Article 3. Quarantine

29061. The director may establish by regulation and maintain and enforce a quarantine at the boundaries of, or within, the state, to protect the bee industry against the introduction or spread of any bee disease. He may make and enforce such regulations as may be necessary to prevent any bees, comb, used hives or appliances from passing over any quarantine line which is established and proclaimed pursuant to this article.

29062. No quarantine regulation, except an emergency quarantine regulation, shall take effect until it is approved by the Governor and is signed by him in duplicate and one copy of the regulation is filed in the office of the Secretary of State and the other copy in the office of the director.

An emergency quarantine regulation shall take effect as prescribed in Section 11422 of the Government Code.

29063. If any quarantine is established pursuant to this article, it is unlawful for any person to move any bees, comb, hive or appliance across the lines established by such quarantine, except pursuant to the regulations of the director.

29064. If an inspector finds any disease which is known to be contagious in any apiary, he may hold such apiary and may require that abatement be performed under his direct supervision. He shall give notice that the apiary is held to the owner or bailee and post a copy of the notice in a conspicuous place in the apiary.

29065. If a notice that an apiary is held has been given pursuant to Section 29064, it is unlawful for any person to move the apiary, or any part of the apiary, or any other bee equipment from the location, unless he is authorized by an inspector, until the hold order is released.

29066. Upon request of the owner of any apiary which is held pursuant to an order by an inspector, the inspector shall release the hold order by issuing a permit to move such apiary if he determines that the disease has been abated pursuant to Section 29158. The permit shall state on it that the apiary had been under a hold order at the point of origin, was released from the hold order, and the date of release.

Article 4. Interstate Movement

29091. Except as otherwise provided in Section 29092, it is unlawful for any person to import or transport into the state any comb, bees on comb, package bees, or any used hive or appliance, unless each separate load, lot, or shipment is accompanied by a valid certificate which is as prescribed by this article, and unless such certificate is delivered to the commissioner of the county of destination or to the director, if there is no commissioner in the county, within 72 hours after the arrival of the load, lot, or shipment.

29092. A person may import or transport any of the following into the state without complying with the requirements which are prescribed by Section 29091:

(a) Queen bees.

(b) Packaged comb honey.

(c) Empty package bee cages.

(d) Moving screens.

(e) Bee smokers.

(f) Bee veils.

(g) Hive tools.

29093. The certificate required by Section 29091 shall be signed by the State Entomologist, State Apiary Inspector, or comparable officer in charge of apiary inspection for the state of origin and shall certify to all of the following facts:

(a) The name and address of the owner or shipper and the place of destination in this state.

(b) The number of hives, nuclei, or packages which contain bees, the number of used hives either empty or containing comb, and a complete list of any other used bee-keeping equipment in the shipment.

(c) The county and state of origin.

(d) The date on which inspection was last made of the apiary in which the bees, comb, used hives, and appliances originated.

(e) The total number of colonies in the apiary at the time of inspection, and the number of colonies found diseased.

(f) That all diseased colonies of bees found upon the inspection were destroyed, removed to a quarantine apiary, or removed to wax salvage prior to the issuance of the certificates.

29094. It is unlawful for any person to import or transport into the state any package bees or queens unless each shipment is accompanied by a declaration, signed by the shipper, that only sucrose or manufactured invert sugar is used as food for the package bees or queens in transit.

29095. Any shipment of bees on comb, package bees or queens, used hives or appliances arriving in this state which is not accompanied by, where required by Section 29091, a valid certificate and, if required by Section 29094, a declaration, shall be refused entry and returned to the shipper or destroyed, at the option and expense of the owner or person in charge of the shipment.

29096. The certificates required by Section 29091 are valid only during the inspection season in which they were issued, except that a certificate that covers a shipment arriving prior to April 1st from a locality which has severe winters shall be valid if it shows the last inspection of the apiary was made on or after August 15th of the preceding year.

29097. If any bees, comb, used hives, or appliances entering California are found to be diseased at the time of inspection in this state within 30 days after arrival, the inspector may hold such apiary, lot, or shipment. He shall give notice to the

owner or bailee, as prescribed in Section 29064, that the apiary, lot, or shipment is held.

29098. The disease shall be abated pursuant to Article 6 (commencing with Section 29151) of this chapter.

29099. After the disease has been abated, the inspector may release the hold order, if the release can be made without menace or harm from disease to the bee industry of this state. If the release cannot be so made, after the disease has been abated, the remaining bees, comb, used hives, and appliances shall be destroyed or shipped out of this state within 72 hours after the expiration of the abatement notice, at the option and expense of the owner or bailee.

Article 5. Intrastate Movement

29121. It is unlawful for any person that has relocated any colony of bees within the state to fail to send a notice within five days of such relocation to the commissioner of the county in which the movement originated, and a second notice to the commissioner of the county of destination if the bees are moved from one county to another. The notice shall include a statement of all of the following:

(a) The number of colonies of bees moved.

(b) The number of colonies of bees left at the point of origin.

(c) The location of the point of origin and the point of destination.

(d) The name and address of the apiary operator.

29122. It is unlawful for any person to ship any package bees, except queens, within the state unless the shipment is accompanied by a certificate of inspection issued by an inspector in the county of origin which shows that the apiary from which such package bees were taken was inspected during the current inspection season and that any disease found was abated, pursuant to Section 29158, prior to the issuance of the certificate.

29123. It is unlawful for any person to place in any combless package of bees or queens offered for sale or shipment, any food which contains honey.

29124. It is unlawful for any person to transport any comb which is attractive to bees within the state unless such comb is tightly enclosed so as to prevent its exposure to bees.

29125. It is lawful for any person, except when prohibited by other provisions of this chapter, to do any of the following:

(a) Transport any diseased hive, together with its contents, to a suitable place for burning, or to a wax salvage plant licensed under the provisions of Article 7 (commencing with Section 29191) of this chapter, after he has killed the bees in such hive and sealed the hive to prevent the entrance of live bees.

(b) Transport diseased comb, including any frame associated with it, to a suitable place for burning, or to a wax sal-

vage plant, licensed under the provisions of Article 7 (commencing with Section 29191) of this chapter if the comb is tightly enclosed so as to prevent its exposure to bees.

29126. It is unlawful for any person to move or transport any bees, comb, used hives and appliances, or colonies within the state which are diseased, except for abatement pursuant to this chapter, or for research pursuant to Section 29128.

29127. The inspector, in a summary manner, may destroy any and all diseased bees, combs, used hives, or colonies which are unlawfully moved within the state wherever they may be found.

29128. The director by written permit, subject to such conditions as he may determine are necessary to protect the beekeeping industry of this state, may authorize federal and state research agencies to transport and maintain within the state diseased bees, comb, hives, appliances, or colonies for the purpose of studying methods of eradicating and controlling bee diseases.

Article 6. Apiary Inspection

29151. All beekeepers shall provide movable frames in the brood areas of all hives which they use to contain bees, and shall make provisions so the bees in such hives shall construct combs in the frames in such a way that these combs may be removed from the hives for inspection without injuring other combs in the hives.

29152. It is unlawful for any person to keep bees in any box or other unmovable or stationary comb hives.

29153. The inspector shall order the owner or person in charge of the bees which are kept in such a box or other unmovable or stationary comb hive to transfer the bees to a movable frame hive within a reasonable time, to be specified in such order. In default of the transfer by the owner or person in charge of such bees, the inspector may destroy such hive and its contents.

29154. The inspector, if he deems it necessary, may enter any premises and make an inspection of any apiary within his jurisdiction. He shall report his inspection and findings to the beekeeper in person or by mail within five days. If any disease is found in the apiary, the inspector making the inspection shall plainly mark the hives or combs which contain evidence of disease.

29155. If disease is found in any apiary, the inspector shall notify the owner or person in charge or in possession of such apiary in writing. The notice shall state the nature of the disease found and the manner in which the inspector has marked the hives or combs which contain evidence of disease and shall order the abatement of such disease within a specified time.

29156. If the disease found in an apiary is American foulbrood, the time specified in the notice shall not be less than 24 hours nor more than 48 hours from the time the

notice is served, except that the inspector may extend the time limit if necessary to prevent hardship and it can be done without undue danger of spreading disease.

29157. The notice may be served upon the person that has possession or that owns the diseased apiary, personally or by registered mail to his last-known address. If the owner or person in charge or possession of any apiary is not known, the notice shall be served by posting it in a conspicuous place in the apiary.

29158. Every diseased apiary is a public nuisance. The owner or person in charge or possession of any apiary, upon finding disease to be present, or upon receiving notice that disease exists, in such apiary, shall abate such disease without undue delay.

29159. If the disease which is found in an apiary is American foulbrood, the abatement shall be by killing the bees in the diseased colonies and disposing of the hives and their contents, together with any other diseased comb, hives, and associated appliances which are found in the apiary, in one of the following ways:

(a) By delivery to a licensed wax salvage plant pursuant to this chapter.

(b) By burning the contents of the diseased colonies, including the bees, comb, and associated frames, together with any other diseased comb, and associated frames, which are found in the apiary in one of the following ways and disinfecting by scorching the hive bodies, covers, bottom boards, supers, and appliances associated with them:

(1) Burning in a pit and burying the ashes not less than two feet below the surface of the ground.

(2) Burning in an incinerator approved by the director.

This section does not prevent federal and state research agencies from securing, transporting, and maintaining diseased bees, comb, hives, appliances, or colonies pursuant to Section 29128.

29160. If the owner or person in charge or possession of an apiary in which disease is found to exist cannot be located after diligent search by the inspector, or if notice has been served pursuant to this article and the owner or person in charge or possession of the apiary refuses or neglects to abate the disease within the time which is specified in the notice, the inspector shall abate the disease within 72 hours after expiration of the time which is specified in the notice.

29161. If an abatement notice, which is required by this article, has been served upon the owner or bailee of an apiary, the owner or bailee, before the expiration of the time specified in the notice, may appeal from the inspector's field determination of the disease named in such notice by sending a written appeal to the director with a specimen of the diseased material chosen and sealed for transportation jointly by the owner or bailee and the inspector, which is accompanied by a statement signed by the owner or bailee and the inspector, attesting to the fact that such specimen was ob-

tained from the portion of the apiary described in the abatement notice.

29162. The specimen shall be subjected to a laboratory diagnosis by the director, or at his direction. The written determination which sets forth the findings of such diagnosis is final proof of the nature of the disease which exists in the apiary.

29163. The disease which is named by the director in a written response to the appeal may be abated pursuant to this chapter. Pending the determination of the director, the time which is specified in the abatement notice shall be extended by the number of hours between the forwarding of the representative specimen and the receipt of the written determination from the director by the inspector, and the service of a copy of such written determination upon the owner or bailee that made the written appeal.

If the owner or bailee cannot after due diligence be found, then the extended time expires when a copy of the director's determination is served by posting it in the apiary.

Article 7. Wax Salvage

29191. It is unlawful for any person to remove, salvage, or attempt to salvage, any bees, comb, honey, royal jelly, pollen, beeswax, or frames from any diseased colony, except pursuant to this article or Section 29128.

29192. All wax salvage operations with respect to diseased colonies shall be performed in an enclosure which is constructed in accordance with specifications, and in such manner as is set forth, in regulations of the director.

29193. The director shall prepare and furnish to interested parties upon request uniform specifications for the construction of wax salvage plants, and regulations for the operation of the plants in such manner as to prevent the spread of disease from such plants.

29194. Any person that desires to maintain and operate a plant for the salvaging of wax, hives, and appliances from diseased apiaries shall apply to the director for an annual license for each separate wax salvage plant.

29195. The director shall make such investigation as he may deem necessary and shall issue the license without fee if he is satisfied that the plant is constructed in accordance with specifications in, and that the plant will be operated pursuant to, the regulations, which are adopted pursuant to this article.

29196. A license is good for the calendar year within which it is issued and shall expire on December 31 of such year, unless it is sooner revoked or suspended.

29197. Any license which is issued pursuant to this article may be revoked or suspended or renewal of such license may be refused by the director, after hearing, if he finds that the licensee has not complied with all the provisions of this article

and the regulations and specifications which are adopted pursuant to it.

29198. The proceedings for all hearings under this article shall be conducted pursuant to Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted by such chapter.

Article 8. Sanitation

29211. It is unlawful for any person to maintain or operate a diseased colony of bees, except pursuant to Section 29128.

29212. It is unlawful for any person to conceal or attempt to conceal the fact that disease exists within an apiary.

29213. It is unlawful for any person to sell any diseased bees, comb, hive, appliance, or colony.

29214. It is unlawful for any person to abandon any diseased apiary.

29215 It is unlawful for any person to expose to bees any comb or honey from a diseased colony of bees, except pursuant to Section 29128.

29216 It is unlawful for any person to extract or render any honey, pollen, or wax from comb except in a building or enclosure which is so constructed as to prevent access by bees.

29217. It is unlawful for any person to keep any comb which is attractive to bees unless such comb is tightly enclosed so as to prevent its exposure to bees.

29218. Any neglected or abandoned hive or appliance which contains any comb that is attractive to bees and that is exposed to robbing by bees constitutes a public nuisance. It shall be subject to abatement in the same manner as is provided in Article 6 (commencing with Section 29151) of this chapter for abatement of disease.

29219. It is unlawful for any person to make honey available to bees by means of open air feeding.

Article 9. Registration and Identification of Apiaries

29241. Every person that is the owner or in possession of an apiary which is located within the state, on the first day of November of each year, or within 30 days thereafter, shall register the number of colonies in each apiary which is owned by him, and the location of the apiary.

29242. Every person that moves bees into the state or that otherwise comes into possession of an apiary which is located within the state after the first day of November shall register the number of colonies so acquired within 30 days after coming into possession of the apiary

29243 Registration of an apiary shall be filed with the commissioner of the county in which the apiary is located, or with the director if there is no commissioner in the county.

29244. It is unlawful for any person to maintain any apiary which has not been registered pursuant to this article. Each

registration is valid until October 31 of the following year or until the next registration period, whichever comes first.

29245. It is unlawful for any person to maintain an apiary on premises other than that of his residence unless the apiary is identified as follows:

(a) By a sign which is prominently displayed on the entrance side of the apiary, that states in black letters not less than one inch in height on a background of contrasting color either:

(1) The name of the owner or person in possession of the apiary, his address and telephone number, or if he has no telephone a statement to that effect.

(2) The current active registered brand number of the owner or person in possession of the apiary, or the identification number which is assigned to him by the director pursuant to this article.

(b) If the governing body of the county or city in which the apiary is located has provided by ordinance for the identification of apiaries, in the manner which is prescribed in the ordinance.

29246. Any person that owns or is in possession of an apiary and fails to register it, or changes the location of an apiary in violation of Section 29121, or fails to provide a sign as required by Section 29245, is not entitled to recover damages for any injury to such apiary by reason of any pest control operation.

29247. The director shall issue an apiary identification number upon the request of any person which is accompanied by a fee of one dollar ($1). Identification numbers which are assigned by the director are not transferable.

29248. The owner of any apiary equipment may apply to the director for a serial number brand for use on apiary equipment which he owns. The application shall contain the name and address of the applicant and shall be accompanied by a fee of two dollars ($2).

29249. Upon receipt of the application and fee, the director shall register a serial number brand to the applicant. The serial number shall include a county number followed by an individual number The county number shall be and remain the same as the number of the class of the county in the classification which was adopted by the Legislature in 1931. As to counties with classification numbers 1 to 9, inclusive, the county number shall be preceded by a dash (—). The county number shall be followed by a dash (—) and the individual number.

29250. If a serial number brand is used on wooden equipment, it shall be burned into the wood in numbers which are one-half inch in height. Hive bodies shall be branded on the upper left-hand corner. Frames shall be branded on top bars. Other wooden equipment may be branded in any place desired. Equipment which is not wooden may be branded in any manner desired.

29251. Serial number brands are transferable.

29252. (a) If the purchaser does not have a registered brand number, he may use a brand acquired by purchase, if a bill of sale on such purchased brand number is forwarded by registered mail to the director accompanied by a transfer fee of two dollars ($2).

(b) If the purchaser has a previously registered brand number, he may have other brand numbers transferred to his name, without charge, but he shall destroy any and all branding irons or branding devices acquired by such transfer and notify the director of such destruction.

29253. If ownership of branded equipment is transferred, the original brand shall not be defaced or obliterated. The brand, if any, of the new owner shall be placed below the original brand and as near it as possible.

29254. It is unlawful for any person to have in his possession any apiary equipment which is branded with any serial number brand other than his own unless he has a bill of sale which he obtained from the registered owner of such serial brand number.

29255. It is unlawful for any person to do any of the following:

(a) Use any serial number brand unless it is registered pursuant to this article.

(b) Alter, deface, remove, or obliterate the brand on any apiary equipment to prevent the identification of the equipment.

(c) Be in possession of any such apiary equipment upon which the brand has been altered, defaced, obliterated or removed.

CHAPTER 2. HONEY

Article 1. Definitions

29401. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

29402. "Adulterated honey" means any honey to which has been added honeydew, glucose, dextrose, molasses, sugar, sugar sirup, invert sugar, or any other similar product except the nectar of floral exudations of plants gathered and stored in the comb by honeybees.

29403. "Agent" includes broker, commission merchant, auctioneer, solicitor, seller on consignment, and any other person that is acting upon the actual or implied authority of another.

29404. "Clean and sound containers" means containers which are virtually free from rust, stains, or leaks.

29405. "Comb honey" means honey which is in the comb.

29406. "Container" means any box, crate, chest, carton, barrel, keg, or other receptacle which contains honey.

29407. "Crystallized honey" means honey which has assumed a solid form due to the crystallization of one or more of the natural sugars in it.

29408. "Deceptive arrangement" or "deceptive display" means any lot, load, arrangement, or display of honey which has in any exposed surface, honey which is so superior in quality, appearance, or condition, or in any other respects, to any of the honey which is concealed or unexposed as to materially misrepresent any part of the lot, load, arrangement, or display.

29409. "Deceptive pack" means any container or subcontainer of honey which has, in any exposed surface, honey or honeycomb, so superior in quality, appearance, condition, or in any other respect to the honey in the interior of the container or subcontainer, or the unexposed portion, as to materially misrepresent the contents. It includes any pack:

(a) Even though the honey in a container is virtually uniform in quality as defined in this chapter, if the outer or exposed surface is composed of honey which is not an accurate representation of the variation in quality of the honey in the entire container.

(b) Which is slack-filled, unless the container is so marked, even though such container is marked with the proper net weight of the honey which it contains.

29410. "Extracted honey" means honey which has been removed from the comb.

29411. "Foreign honey" means any honey which was not produced within this state.

29412. "Foreign material" means wax particles, insects, or other materials which were not deposited by bees. It does not, however, include decorative artificial leaves or blossoms.

29413. "Honey" means the nectar of floral exudations of plants gathered and stored in the comb by honeybees. It is a levorotatory, contains not more than 20 percent of water, not more than 25 one hundredths of 1 percent of ash, not more than 8 percent of sucrose, its specific gravity is not less than 1.412, its weight not less than 11 pounds, 12 ounces per standard gallon of 231 cubic inches at 68 degrees Fahrenheit.

29414. "Honeybees" means honey-producing insects of the genus Apis mellifica.

29415. "Honeydew" means the dextrorotatory saccharine exudation of plants or insects, except nectareous exudations, which is gathered and stored in the comb by honeybees.

29416. "Mislabeled" means the placing or presence of any false or misleading statement, design, or device upon, or in connection with, any container or lot of honey, or upon the label, lining, or wrapper of any such container, or any placard used in connection with any container or lot of honey, which has reference to such honey. A statement, design, or device is false and misleading, if the honey to which it apparently or actually refers does not conform in every respect to such statement.

29417. "Pack," or "packing" or "packed," means the arrangement of all or a part of the subcontainers in any container.

29418. "Placard" means any sign, label, or designation, except an oral designation, which is used in connection with any honey as a description or identification of it.

29419. "Section box" means the wood or other frame in which bees have built a small comb of honey.

29420. "Slack-filled" means that the contents of any container occupy less than 85 percent of the volume of the closed container.

29421. "Subcontainer" means any section box or other receptacle which is used within a container.

Article 2. General Provisions

29441. The director and the commissioners of each county of the state, their deputies and inspectors, under the supervision and control of the director shall enforce this chapter.

29442. The refusal of any officer who is authorized pursuant to this chapter to carry out the orders and directions of the director in the enforcement of this chapter is neglect of duty.

29443. The director may do all of the following:

(a) Prescribe by regulation methods of selecting samples of lots or containers of honey, which shall be reasonably calculated to produce by such sampling fair representations of the entire lots or containers sampled.

(b) Establish by regulation and issue official color charts which depict the color standards and requirements established in this chapter.

(c) Make such other regulations as are reasonably necessary to secure uniformity in the enforcement of this chapter.

29444. Any sample which is taken pursuant to this chapter is prima facie evidence, in any court in this state, of the true condition of the entire lot in the examination of which the sample was taken.

29445. An enforcing officer may do all of the following:

(a) Enter and inspect any place or conveyance within the county or district over which he has jurisdiction, where any honey is produced, stored, packed, delivered for shipment, loaded, shipped, being transported, or sold.

(b) Inspect all honey and the containers of honey and equipment which is found in any place or conveyance which he is authorized to enter and inspect.

(c) Take for inspection, such representative samples of the honey and such containers, as may be necessary to determine whether or not this chapter has been violated.

29446. An enforcing officer shall cause the prosecution of any person whom he knows or has reason to believe is guilty of violating any provision of this chapter.

29447. Any enforcement officer may, while enforcing this chapter, seize and hold as evidence all or any part of any

pack, load, bulk lot, consignment, or shipment of honey packed, delivered for shipment, loaded, shipped, or being transported, or sold in violation of this chapter, or any container of such product, as may in his judgment be necessary to secure the conviction of the party he knows or believes has violated or is violating any provision of this chapter.

29448. If any markings are used or required to be used by this chapter on any container of honey to identify the container or describe its contents, the markings shall be plainly and conspicuously marked, stamped, stenciled, printed, labeled, or branded in the English language, unless the container is intended for and is shipped outside of the United States, in letters which are large enough to be readily discernible by any person, upon the top, front, or side of the container. If the marking is on a placard which is used in a display, the placard shall be placed or posted in such a position that there is no doubt as to the product which it is to identify.

29449. Any person, forwarding company, or common carrier may decline to ship or transport any honey if notified by any enforcing officer of this chapter, that the honey is found to be delivered for shipment in violation of this chapter.

29450. Any person, forwarding company, or common carrier may reserve the right, in any receipt, bill of lading or other writing which is given to the consignor of any honey, to reject for shipment and to return to the consignor or hold at his expense and risk all honey, which, upon inspection, is found to be delivered for shipment in violation of this chapter.

Article 3. Exemptions

29471. If the requirements prescribed by this article are satisfied, all of the following ungraded honey is exempt from the remaining provisions of this chapter:

(a) Honey which is intended to be used in commercial processing, as for clarifying and packing in retail or wholesale containers.

(b) Honey which is intended for the manufacture of honey products for resale.

(c) Honey which is being delivered to any person for grading, packing, processing, or reconditioning.

29472. The containers of the ungraded honey shall not bear any false or misleading statements or be deceptively packed

29473. The owner or person in possession of the ungraded honey shall, on demand of any enforcing officer under this chapter, give to the officer a sworn statement in writing, which was made before a notary public, that specifies all of the following:

(a) That the honey will be disposed of or used pursuant to this article.

(b) The name and address of the person to whom such honey is to be delivered.

(c) An accurate identification of the honey.

29474. A person who makes a sworn statement pursuant to Section 29473 shall, within a reasonable time after the demand and receipt by the officer of the statement, present a written receipt to the commissioner of the county which is specified in the statement as the destination of the honey.

The receipt shall contain a signed statement by the person receiving such honey, that the honey, giving an accurate description of it, has been received.

Article 4. Standard Honey Containers

29501. The standard units of net weight of honey in containers are as established by this article.

29502 Containers which hold the following units of weight of honey are standard containers:

60	pounds	2	pounds
12	pounds	1½	pounds
10	pounds	1	pound
6	pounds	12	ounces avoirdupois
5	pounds	8	ounces avoirdupois
3	pounds	5	ounces avoirdupois
2½	pounds		

Article 5. California Color Standards

29531 The classes as to color comprising the California standards shall conform to the United States color standards, using the readings on the Pfund honey scale.

Article 6. Emergency Standards, Containers, Color Classifications, and Markings

29551. As used in this article, "emergency standard" means any emergency standard for honey, standard units of weight, type of container, color classifications, or markings required upon containers which is established by the director pursuant to Section 29552.

29552. The director, upon petition of persons that are interested in the production or handling of honey, or upon his own motion, may establish emergency standards for honey, standard units of net weight, type of container, color classifications, or marking upon any container, if he makes any of the following findings regarding any provision of this chapter which relates to any of such subjects:

(a) It is difficult or impossible of performance by reason of laws or orders promulgated by authority of the government of the United States, or the standard weights are not

appropriate for the country of destination as to honey intended to be shipped outside the United States, or because of scarcity of materials, labor, or equipment used in the production or marketing of honey regulated by this chapter.

(b) It results in a serious waste of honey otherwise available for human consumption, or in serious waste of other resources.

(c) It prevents the utilization of new technological developments to the serious disadvantage of producers or handlers of honey in this state.

29553. Emergency standards shall apply in lieu of the standards for honey, standard units of net weight, type of container, color classifications, or markings required upon any container set forth in this chapter.

29554. Every emergency standard which is established pursuant to this article shall be reasonably calculated to effectuate the purposes of the standard which it supersedes. No emergency standard shall be established which tends to lower any standard which relates to carrying or keeping quality of honey.

29555. No emergency standard shall be construed to modify in any respect any provision of this chapter which is designed to prevent deception or mislabeling, or which is designed to prevent the marketing of honey which is unwholesome or which would fail to give consumer satisfaction.

29556. Every emergency standard which is issued pursuant to this article, before it may become effective, shall be published in one or more newspapers, trade papers, or industry publications which are deemed best adapted to give notice to interested persons, together with a notice of the time and place for hearing objections.

29557. The hearing shall be not less than 10 nor more than 20 days from the date of publication.

29558. Notice of hearing shall be mailed not less than 10 days prior to the date of the hearing to all persons that have filed with the director a request for notice of such hearings.

29559. At the hearing, interested parties shall be heard and a record kept of the proceedings for determination by the director of the facts which are shown at the hearing. If it is developed by competent testimony that additional time will be required to produce further essential evidence, the director shall continue the hearing to a date which will allow sufficient time for the production of such evidence.

29560. The director, upon his findings on the facts shown at the hearing, shall rescind, modify, or affirm the emergency standard as published. The action of the director in rescinding, modifying, or affirming any emergency standard shall take effect on the day appointed therefor, and the emergency standard, as modified or affirmed, shall continue in effect until it is suspended or rescinded by the director, or until the 91st day after adjournment of the next regular session of the Legislature, whichever first occurs.

29561. Any emergency standard may be amended, suspended, or rescinded upon notice and hearing pursuant to the

same procedure as is provided for the establishment of such standard.

Article 7. Comb Honey

29581 All comb honey shall be conspicuously marked, either on the section or on its individual container, with all of the following:

(a) The name and address of the producer or distributor of the comb honey.

(b) The net weight of the comb section, stated in terms of whole ounces.

(c) One of the United States grades which are established for honey by the United States Department of Agriculture.

29582. All comb honey shall meet the requirements of the color classification and grades as defined in United States grades, color standards, and packing requirements for honey by the United States Department of Agriculture, according to the color classification and grade as marked.

29583. Any container of comb honey which is marked as to color shall be considered as properly marked if the color of the honey in the container is equal to or lighter than the description as marked.

29584. Opaque containers of bulk or chunk comb honey shall be marked with the color the honey would be if extracted, unless it is in the unclassified grade.

29585. If comb honey is in crystallized form, a sample of the honey shall be liquefied and the honey graded on the liquid basis

29586. In order to allow for variations which are incident to proper grading and handling, not more than 5 percent, by count, of the containers or of the subcontainers in any lot of honey may be below the requirements for the grade.

29587. Comb honey which has crystallized shall be conspicuously marked with the word "crystallized" on a placard which is used in connection with such honey that has reference to it.

Article 8. Extracted Honey

29611. Every container or subcontainer of extracted honey shall be conspicuously marked with all of the following:

(a) The name and address of the producer or distributor of the extracted honey.

(b) The net weight of the honey in the container.

(c) One of the United States grades which are established for honey by the United States Department of Agriculture. This subdivision does not, however, apply to honey to which pollen has been added, if the amount of pollen added is visible and each such container is plainly and conspicuously labeled with the words "pollen added".

(d) In the case of any opaque container, with the color of the honey.

29612. All extracted honey shall meet the requirements of the color classifications and grades as defined in United States grades, color standards, and packing requirements for honey by the United States Department of Agriculture, according to the color classification and grade as marked.

29613. Any container of extracted honey which is marked as to color shall be considered as properly marked if the color of the honey in the container is equal to or lighter than the description as marked.

29614. If extracted honey is in crystallized form, a sample of the honey shall be liquefied and the honey graded on the liquid basis.

29615. All extracted honey regardless of grade term as marked, shall be free from serious damage and at least as free from excessive foreign material as honey that has been strained through standard bolting cloth of 23 meshes per inch. Serious damage means any injury or defect that seriously affects the appearance or edibility of the honey such as any of the following:

(a) Overheating, which destroys both natural color and flavor.

(b) Fermentation, which causes either foam or sourness, or both.

(c) Objectionable flavor from any substance or thing other than floral source.

29616. In order to allow for variations which are incident to proper grading and handling, not more than 5 percent, by count, of the containers or of the subcontainers in any lot of honey may be below the requirements for the grade, but no part of this tolerance is allowed for defects which cause serious damage, as defined in Section 29615.

29617. If the color of extracted honey is designated on the container or subcontainer, or upon a placard which has reference to such honey, it shall conform to the color definitions provided in this chapter.

29618. Any honey which is a blend of two or more floral types of honey shall not be labeled as honey from any one particular floral source alone unless one floral type is predominant. If one floral type is predominant, such honey may be labeled as to the predominant floral type, as determined by flavor.

29619. Any slack-filled container shall be conspicuously marked "slack-filled."

29620. Extracted honey in containers which hold five ounces or more, shall be packed in standard containers and sold in the exact units of weight as set forth in the table of standard weights of honey in containers provided for in Section 29502.

If the combined net weight of the extracted honey in all subcontainers contained in one master container is equal to one of the units of weight specified in Section 29502, the unit

is a standard unit of weight if sold as a unit directly to the consumer.

Article 9. Labeling of Honey as to Origin and Flavor

29641. Any container or subcontainer of extracted honey which is produced entirely within this state may be conspicuously marked with the name "California."

29642. A container or subcontainer of comb or extracted honey shall not be marked or labeled with the name "California" unless the honey in the container or subcontainer was produced entirely within this state

29643. Any container or subcontainer of comb or extracted honey which is imported from any territory or foreign country shall be labeled with the name of the territory or country of origin.

29644. If the floral flavor of comb or extracted honey is stated on the container the honey contained in the container or subcontainer shall be true to such flavor, unless the honey is a blend of two or more floral types and one floral type is predominant. If the honey is such a blend, it may be labeled as to the predominant floral type as determined by flavor.

Article 10. Violations

29671. It is unlawful for any person to prepare, pack, place, deliver for shipment, deliver for sale, load, ship, transport, or sell any honey, adulterated honey or any product which is marked, labeled, or designated as honey, in bulk or in any container or subcontainer which does not conform to the provisions of this chapter.

29672. It is unlawful for any person to prepare, pack, place, deliver for shipment, load, ship, transport, or sell a deceptive pack, lot, load, arrangement, or display of honey.

29673. It is unlawful for any person to mislabel any container or subcontainer of honey or place any false or misleading statement on any wrapper, label, or lining of any container of honey, or on any placard which is used in connection with or which has reference to any honey.

29674. It is unlawful for any person to place or pack any honey in any container or subcontainer which bears any markings, or any designation of brand, quality, grade, or other matter, unless all of such markings which do not properly and accurately apply to the product placed or packed in the container or subcontainer have been removed, erased, or obliterated.

29675. It is unlawful for any person to move any honey, or any container of honey, to which any warning tag or notice has been affixed, except under written permit from an enforcing officer or under his specific direction.

29676. It is unlawful for any person to do either of the following:

(a) Refuse to submit any container, subcontainer, load, or display of honey to the inspection of any enforcing officer.

(b) Refuse to stop any vehicle which contains any honey, for the purpose of inspection by an enforcing officer.

29677. It is unlawful for any person to prepare, pack, place, deliver for shipment, load, ship, transport, or sell, any of the following:

(a) Adulterated honey, unless the container is conspicuously marked, in letters or type of like size and character, which clearly and plainly indicate the contents.

(b) Any product which is labeled or marked with the designation "honey" alone, if the contents consist of part or all of products other than the nectar of floral exudations of plants which is gathered and stored in the comb by honeybees.

Article 11. Criminal Punishment and Procedure

29701. Any violation of any provision of this chapter is a misdemeanor and punishable by a fine of not less than ten dollars ($10) nor more than five hundred dollars ($500), or by imprisonment in the county jail for not more than six months, or by both.

29702. Any prosecution for the violation of any provision of this chapter may be made in any county where any part of the offense occurred.

29703. Any evidence which is taken by any enforcing officer in any county may be admitted in evidence in any prosecution in any other county.

29704. Unless a person that is arrested for the transportation of honey in violation of this chapter demands the right to an immediate appearance before a magistrate, the arresting officer shall, upon production of satisfactory evidence of the identity of the person arrested, do all of the following:

(a) Take the name and address of the arrested person, the license number of his motor vehicle, and such other information as may be necessary.

(b) Notify the arrested person in writing to appear at a time and place which is specified in the notice.

29705. The time which is specified in the notice to appear shall be at least five days after the arrest.

29706. The place which is specified in the notice to appear shall be one of the following:

(a) Before a magistrate of the district in which the offense with which the arrested person is charged is alleged to have been committed.

(b) Upon the demand of the arrested person, before a magistrate of the district in which is located the county seat of the county in which the offense is alleged to have been committed.

(c) In any county in which there is established a municipal court at the county seat of the county, the notice to appear may

specify that the place shall be before any magistrate in the county.

29707. If the arrested person gives his written promise to appear at the time and place specified in the notice to appear, the arresting officer shall forthwith release him from custody.

29708. If any arrested person refuses to give his written promise to appear or demands an immediate appearance before a magistrate, he shall be taken forthwith before a magistrate of the district in which the offense with which he is charged is alleged to have been committed. He shall then be entitled to at least five days continuance of his case in which to prepare to plead or to prepare for trial unless he waives such time in writing or in open court and either:

(a) Gives his written promise to appear at such time and place as the court may fix for his further appearance.

(b) If he refuses to give his promise to appear, upon such bail as the court may fix.

He shall then be released from custody.

29709. Any person that willfully violates his promise which is given pursuant to this article is guilty of a misdemeanor regardless of the disposition of the charge upon which he was originally arrested. A promise to appear may be complied with by an appearance by counsel.

Article 12. Public Nuisances

29731. Any honey which is packed, stored, delivered for shipment, loaded, shipped, or being transported or sold in violation of any provision of this chapter, together with its containers, is a public nuisance. The honey shall be held by the person in whose possession it may be and shall not be moved from the place where it may be, except under the specific direction of an enforcement officer.

29732. The enforcement officer may affix a warning tag or notice to the honey and its containers which are a public nuisance.

29733. If a packer or owner of honey, or the agent of either, after notification to him that the honey and its containers are a public nuisance, refuses, or fails within a reasonable time, to recondition or remark the honey so as to comply with all requirements of this chapter, the honey and its containers:

(a) May be seized by the director or any enforcement officer.

(b) By order of the justice, municipal, or superior court of the county or city within which the honey and its containers may be, shall be condemned and destroyed, or released upon such conditions as the court, in its discretion, may impose to insure that it will not be packed, delivered for shipment, shipped, transported, or sold in violation of this chapter.

29734. If an agent is found in posssession of any honey which is a public nuisance, notice of rejection or any order of the court concerning the honey may be served on such agent and need not be served on the packer or owner.

29735. It is unlawful for any person to fail to comply with the directions of any officer relating to the disposition of any honey which is a public nuisance, or with any order of court respecting it.

DIVISION 14. REGULATION AND LICENSING OF DOGS

CHAPTER 1. GENERAL PROVISIONS

30501. If the provisions of Sections 30801, 30802, 30803, 30804, 30805, 30952, 31105, 31106, 31107, 31108, 31152, 31153, 31251, 31252, and 31254 have been adopted by the board of supervisors of any county, and the governing body of any city which is located within the county requests, by ordinance, the application of the provisions within the confines of such city such sections shall also apply within the city.

30502. Any dog license tag which is issued by any city and county or city constitutes compliance with this division if it is issued pursuant to an ordinance which does all of the following:

(a) Substantially complies with this division.

(b) Provides for the wearing of the license tag upon the collar of the dog.

(c) Provides for the keeping of a record which shall establish the identity of the person that owns or harbors the dog.

CHAPTER 2. DISPOSITION OF FUNDS

30651. As used in this chapter, "livestock" includes domestic fowls and rabbits.

30652. All fees for the issuance of dog license tags and all fines collected pursuant to this division shall be paid into the county treasury and shall be used:

(a) First, to pay fees for the issuance of dog license tags.

(b) Second, to pay fees, salaries, costs, expenses, or any or all of them for the enforcement of this division and all ordinances which are made pursuant to this division.

(c) Third, to pay damages to owners of livestock which are killed by dogs.

30653. Each such claim for damages is governed by Part 3 (commencing with Section 900) and Part 4 (commencing with Section 940), Division 3.6, Title 1 of the Government Code, except that the claim, as presented, shall be accompanied by the affidavits of two disinterested witnesses executed within four days after the finding of the carcass of the animal.

30654. The affidavits shall fix the value of the livestock and establish the fact beyond reasonable doubt that the animal was killed by a dog.

30655. If a claim is allowed, it shall be paid from the fund which is provided for in this chapter in the same manner as other claims against the county are paid.

CHAPTER 3. DOG TAGS

30801. If 25 electors whose names appear upon the last preceding assessment roll of the county as owners of domestic livestock file a petition with the board of supervisors of the county which requests the board to do so, the board of supervisors shall provide for the annual issuance of serially numbered metallic dog license tags. The dog license tags shall be:

(a) Stamped with the name of the county and the year of issue.

(b) Issued by the county clerk directly or through judges of justice or municipal courts, to owners of dogs, that make application.

30802. Each application for a dog license tag shall state the age, sex, color, and breed of the dog for which the license is desired and the address of the owner.

30803. The county clerk shall endorse upon the application for a dog license tag the number of the license tag issued.

All applications which have been endorsed shall be kept on file in the office of the county clerk open to public inspection.

30804. The fee for the issuance of the dog license tag is fifty cents ($0.50). The board of supervisors may, however, increase the fee.

30805. The board of supervisors shall fix the compensation of the county clerk for issuing dog license tags.

CHAPTER 4. REGULATION

30951. It is unlawful for any person to own, harbor, or keep any dog over the age of three months, or to permit such a dog which is owned, harbored, or controlled by him to run at large, unless the dog has attached to its neck or leg a substantial collar on which one of the following is fastened:

(a) A metallic tag which gives the name and post office address of the owner.

(b) A metal license tag which is issued by the authority of a county, city and county, or any municipal corporation for the purpose of identifying the dog and designating the owner.

30952 It is unlawful for any person to attach a license tag to the collar of any dog except the dog which is described in the application for such license tag

30953. Except as otherwise provided in this division, it is unlawful for any person to kill, injure, or impound any dog, if the owner of the dog has complied with the provisions of this division.

30954. It is unlawful for any person to permit any female dog which is owned, harbored, or controlled by him, to run at large at any time during the period when the dog is in heat or breeding condition.

30955. It is unlawful for any person to permit any dog which is owned, harbored, or controlled by him to run at large on any farm on which livestock or domestic fowls are kept, without the consent of the owner of the farm, except for herding livestock, hunting or sporting purposes, or any competitive trials when the dog is within reasonable control or call of his owner or the agent of his owner.

CHAPTER 5. KILLING AND SEIZURE

Article 1. Generally

31101. Any dog which is found running at large without the identification tag or dog license tag which is required pursuant to Section 30951 may be seized and impounded by any peace officer.

31102. Except in an area in which the provisions of Article 2 (commencing with Section 31151) of this chapter apply or as otherwise provided in Section 31104, any person may kill any dog in any of the following cases:

(a) The dog is found in the act of killing, wounding, or persistently pursuing or worrying livestock or poultry on land or premises which are not owned or possessed by the owner of the dog.

(b) The person has such proof as conclusively shows that the dog has been recently engaged in killing or wounding livestock or poultry on land or premises which are not owned or possessed by the dog's owner.

No action, civil or criminal, shall be maintained for the killing of any such dog.

31103. Except in an area in which the provisions of Article 2 (commencing with Section 31151) of this chapter apply or as otherwise provided in Section 31104, any dog entering any enclosed or unenclosed property upon which livestock or poultry are confined may be seized or killed by the owner or tenant of the property or by any employee of the owner or tenant. No action, civil or criminal, shall be maintained against the owner, tenant, or employee for the seizure or killing of any such dog.

31104. The provisions of Sections 31102 and 31103 shall not apply to any dog which is inside the corporate limits of any city, or city and county, or to any dog which is under the reasonable control of his owner or keeper, unless the dog is actually caught in the act or worrying, wounding, chasing, or killing any livestock or poultry.

31105. The board of supervisors shall provide for both of the following:

(a) The taking up and impounding of all dogs which are found running at large in violation of any provision of this division

(b) The killing in some humane manner or other disposition of any dog which is impounded.

31106. The board of supervisors may appoint proper persons to take up, impound, and kill dogs pursuant to this division or it may enter into a contract with any humane society or other organization or association which will do both of the following:

(a) Undertake to carry out the provisions of this division regarding the taking up, impounding, and killing of dogs.

(b) Give a proper bond in whatever amount may be fixed by the board of supervisors for the faithful performance of the contract.

31107. No dog which is impounded pursuant to this division shall be killed or otherwise disposed of without notice to the owner, if he is known.

31108. No dog which is impounded pursuant to this division shall be killed before 72 hours have elapsed from the time of the taking up of the dog.

31109. Any dog which is found straying on any farm where livestock are kept, which has attached to its collar the identification tag or dog license tag prescribed by Section 30951, may be taken up, impounded, and detained in the same manner as described in this division. The person taking up the dog may recover from the owner, in any court having jurisdiction, the fees fixed by the board of supervisors for taking up and keeping unlicensed and unidentified dogs, together with costs.

Article 2. Optional Provisions

31151. The provisions of Sections 31102 and 31103 shall not apply in any area of a county in which the board of supervisors has provided, by resolution, that the provisions of this article apply.

31152. Any person may kill any dog in any area of a county in which the provisions of this article apply in any of the following cases:

(a) The dog is found in the act of killing, wounding, or persistently pursuing livestock or poultry on land or premises not owned or possessed by the owner of the dog.

(b) The dog has no readily visible identification tag or license tag prescribed by Section 30951 and is worrying livestock or poultry on land or premises not owned or possessed by the owner of the dog. If the dog has on him any readily visible identification tag or license tag prescribed by Section 30951, and the dog is found in the act of worrying livestock or poultry on land or premises not owned or possessed by the owner of the dog, the dog may only be killed if the dog has, and the owner has been notified that the dog has, previously so worried livestock or poultry.

(c) The person has such proof as conclusively shows that the dog has been recently engaged in killing or wounding livestock or poultry on land or premises not owned or possessed by the dog's owner.

No action, civil or criminal, shall be maintained for killing a dog as authorized by this section.

31153. Any dog entering any enclosed or unenclosed property upon which livestock or poultry are confined may be seized by the owner or tenant of the property or any employee of the owner or tenant. No action, civil or criminal, shall be maintained against the owner, tenant, or employee for the seizure of any such dog.

CHAPTER 6. FEES FOR IMPOUNDING

31251. The board of supervisors of each county shall fix the fee for impounding any dog and the amount which is to be paid for keeping the dog.

31252. If the impounding of a dog is done by an appointee of the board of supervisors or by a humane society or other organization or association which has entered into a contract for impounding dogs, the fees for taking up, impounding, and keeping the dog shall be a charge upon the county treasury, to be paid as other claims against the county are paid.

31253. If a dog which has been impounded is claimed by the owner, the fee for impounding and keeping the dog, as fixed by the board of supervisors, shall be paid by the owner to the person, organization, or association which has custody of the dog, to be retained by him or them. No charge for fees pertaining to the dog shall be paid by the board of supervisors.

31254. The refusal or failure of the owner of any such dog to pay the fee and charges after due notification shall be held to be an abandonment of the dog by the owner.

CHAPTER 7. VIOLATIONS

31401. Violation of any provision of this division is a misdemeanor punishable by a fine of not less than twenty-five dollars ($25) for the first offense, and for the second offense a fine of not less than fifty dollars ($50) and imprisonment in the county jail for 10 days, or both.

CHAPTER 8. CIVIL LIABILITY

31501. The owner of any livestock or poultry which is injured or killed by any dog may recover as liquidated damages from the owner of the dog twice the actual value of the animals killed or twice the value of the damages sustained by reason of the injuries, as the case may be.

31502. If two or more dogs kept by two or more owners or keepers injure or kill any livestock or poultry at the same

time, the owners or keepers of the dogs are jointly and severally liable for the damage.

31503. If any person sustains any loss or damage to any livestock or poultry which is caused by a dog, or if any livestock of any person is necessarily destroyed because of having been bitten by a dog, the person may file a complaint with any judge of the justice or municipal court of the county within which the damage occurred.

31504. The complaint shall satisfy all of the following requirements:

(a) Be in writing.

(b) Signed by the person that makes it.

(c) State when, where, what, and how much damage was done.

(d) State, if known, the name of the person that owns the dog or was in charge of it when the loss or damage was sustained.

31505. If the person that owns the dog or was in charge of it when the damage or loss was sustained appears from the complaint, the judge shall forthwith issue a summons against such person commanding him to appear before the judge and show cause why the dog should not be killed.

31506. The summons shall be made returnable not less than two nor more than six days from the date of issue and shall be served at least two days before the time of appearance ordered.

31507. The service of the summons may be made by any person over the age of 18 years or by registered mail to the last known address of the owner or person in charge. Any expense connected with the summons shall be borne by the owner of the livestock or poultry which was injured or the party that makes the complaint.

31508 Upon the return day fixed in the summons, the judge shall proceed to determine whether the loss or damage to the livestock was caused by the dog. If he finds that it was caused by the dog, he shall notify the person that owns the dog or was in charge of it when the loss or damage was sustained to kill the dog. Failure of such person to kill the dog as directed renders the owner subject to the penalties which are prescribed in this division.

DIVISION 15. MILK AND MILK PRODUCTS ACT OF 1947

PART 1. GENERALLY

Chapter 1. Short Title and Definitions

32501. This division shall be known as the Milk and Milk Products Act of 1947.

32502. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

32503. "Approved milk inspection service" means a milk inspection unit and laboratory which are maintained in connection with a county or city or any combination of cities or counties, or both cities and counties, for the purpose of grading market milk and inspecting dairy farms which are producing market milk, or milk products plants which are processing or handling market milk and related products within an area which is designated and assigned by the director, conformable to the provisions of this division and the regulations established by the director, which inspection service has been approved in writing by the director.

32504. "Cream" means that portion of milk, rich in milk fat, which rises to the surface of milk that is left standing or which is separated from milk by centrifugal force.

32505. "Dairy farm" means any place or premises upon which milk is produced for sale or other distribution and where more than two cows or six goats are in lactation.

32506. "Dairy farm scorecard" means the card which is adopted by the director pursuant to Section 32791 for the official scoring of dairy farms.

32507. "Imitation milk product" means any substance, mixture, or compound, except milk or any milk product, which is intended for human food that is made in imitation of milk or any milk product.

32508. "Manufacturing cream" means cream which does not conform to the requirements of market cream.

32509. "Manufacturing milk" means milk which does not conform to the requirements of market milk.

32510. "Market milk" means milk which is supplied to the consumer in the natural fluid state, or which is prepared for human consumption without being converted into any other form or product. It shall conform to the standards which are provided in Chapter 2 (commencing with Section 35751), Part 2, of this division. Except as otherwise specifically provided in Section 35811, "market milk" includes "market cream."

32511. "Milk" means the unadulterated lacteal secretion which is obtained from the udder of a cow or goat.

32512. "Milk product" includes milk, cream, sour cream, half-and-half, ice cream, ice milk, butter, cheese, milk fat or butterfat, skim milk or nonfat milk, evaporated milk, evaporated cream, sterilized flavored drink, sterilized flavored milk, sterilized cream, sterilized milk, nonfat dry milk, dried milk, milk drink mix, milk drink, buttermilk, cultured buttermilk, modified milk, concentrated milk, concentrated skim milk, sour cream dressing, yogurt, whipped cream or cream topping, eggnog, ice cream mix, ice milk mix, dietetic or low fat yogurt, low fat milk, evaporated or condensed skim milk, sweetened condensed milk, renovated butter, whipped cream mix or cream topping mix, fruit yogurt, sterilized flavored cream, dried whey, sherbet, yogurt sherbet, quiescently frozen confections, and any other product which is prepared or manu-

factured from milk or cream for which a standard of composition is established by or pursuant to this division.

32513. "Milk products plant" means any place in which a milk product, except raw milk, is produced. It does not, however, include a room in which cheese and cheese products are cut, wrapped, and packaged into individual consumer packages.

32514. "Milk products plant scorecard" means the card which is adopted by the director pursuant to Section 32791 for the official scoring of milk products plants.

32515. "Pasteurized" means that the milk or milk product has been subjected to a process which is described in Chapter 8 (commencing with Section 34001) of this part, or other process which has been demonstrated to be equally efficient and has been approved by the director.

CHAPTER 2. POWERS OF DIRECTOR

Article 1. Enforcement

32701. The director shall, and representatives of approved milk inspection services under his general supervision may, enforce this division.

32702. The director may bring an action to enjoin any violation or threatened violation of any provision of this division, in the superior court in and for the county in which the violation occurred or is about to occur.

32703. Any proceeding pursuant to this article shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director shall not, however, be required to allege facts necessary to show or tending to show lack of adequate remedy at law or to show or tending to show irreparable damage or loss.

32704. Any money in the Department of Agriculture Fund which is derived under this division may be expended for the enforcement of any or all of the provisions of this division, notwithstanding any other provision of law, except Section 35252, which limits the expenditure of any such money to some specific purpose or to the enforcement of some specific section, article, or chapter of this division.

Article 2. Inspection and Samples

32731. The director may do all of the following:

(a) Enter and inspect any premises or conveyance where any provision of this division is applicable.

(b) Take a sample of any milk, cream, product of milk or cream, or imitation milk product.

(c) Impound and hold for analysis or as evidence any milk, cream, product of milk or cream, or imitation milk product.

(d) Impound and hold for analysis or as evidence any container of milk, cream, or product of milk or cream.

(e) Examine, inspect, test or by other means determine the health of any cow or goat.

(f) Exclude from the herd any animal which produces milk that is unfit for human consumption.

32732. No prosecution which is based upon a sample of milk, cream, or a product of milk or cream, shall be had unless a duplicate of the sample is left with the accused.

Samples which are taken in connection with the establishment of proof of fraudulent manipulation of the tests for the basis of payment for milk or cream, need not, however, be given to the accused.

Article 3 Animals Carrying Pesticide Residues

32741. If the director determines that any female dairy animal, including any goat, is carrying pesticide residues in its body or has been fed any feed which contains an amount of pesticide residues which will cause the milk produced from the animal to be adulterated with pesticide residues, he may order the animal to be held on the premises where it is found until he has determined that milk produced by the animal is not adulterated with pesticide residues.

32742. It is unlawful for any person to move any such animal except under written permission of the director and in accordance with the conditions stated in such written permission, or until the hold order has been revoked.

32743. The director shall notify the owner or agent of any animal which is ordered held, or for which he has specified conditions for moving, pursuant to this article.

Article 4. Condemnation

32761. The director may condemn any of the following:

(a) Milk or cream which is found to be impure, tainted, unclean, adulterated, or unwholesome.

(b) Milk or cream that is produced, handled, or kept in an insanitary place.

32762. The director may mark any condemned milk or cream for identification.

32763. The director shall prescribe the method of marking condemned milk or cream for identification but shall not, in marking condemned milk or cream, add any substance to it which shall render the condemned milk or cream unsuitable for a use or purpose except human consumption.

32764. Condemned milk or cream which has been marked for identification shall be returned to the producer of the milk or cream, if requested by the producer, or shall be used in the manufacture of products other than products which are used for human consumption, or shall be destroyed Such condemned milk or cream which has been marked for identification shall not be destroyed until the producer of the milk or cream has been notified. Upon such notification the producer

shall immediately request the milk or cream be returned to him at his expense or request that it be destroyed.

32765. The director may condemn any product of milk or cream or imitation milk product which is within any of the following classes:

(a) Impure, unclean, unwholesome, or stale.

(b) Produced or manufactured, handled, or kept in an insanitary place.

(c) Adulterated or mislabeled.

32766. The director may destroy or mark for identification with a nontoxic substance, any condemned product of milk or cream or imitation milk product.

32767. No manufactured product of milk or cream or imitation milk product may be destroyed by the director without due notice to the owner of the product, and a hearing before the director or an officer designated by him.

Article 5. Reports, Scorecards and Statistics

32791. The director shall adopt a dairy farm scorecard and a milk products plant scorecard for the official scoring of dairies and milk products plants. The director shall, either directly or indirectly through his authorized agents or those of an approved milk inspection service, do all of the following:

(a) Inspect dairy farms and milk products plants.

(b) Conduct or supervise milk scoring or other contests if deemed advisable by the director.

32792. The director shall do all of the following:

(a) Compile and publish statistics relative to the dairy industry, oleomargarine, and imitation milk products.

(b) Disseminate the statistics and other information useful to the general good and development of the dairy industry of the state.

32793. The director shall provide blanks for reporting milk and milk products statistics. He shall, on or before the first of each month, cause to be mailed to each person that is engaged in operating any milk products plant and to each market milk distributor such number of the blanks as may be necessary. Each person that is engaged in operating any milk products plant or that is a market milk distributor shall, within 30 days after the blank is mailed to him, transmit to the director a full and accurate report of the amount of milk and milk products which he produced, purchased, manufactured or distributed during the preceding month.

32794. In addition to the monthly report, the director may require annual, semiannual, or quarterly reports of the same general character as the monthly report.

Article 6. Suspension or Revocation of Licenses or Permits

32811. Any license or permit which is issued pursuant to this division, may be suspended or revoked by the director, after a hearing before the director if, within 30 days after

written notice, the licensee or permittee fails to comply with the laws and regulations under which the license or permit was granted. The licensee or permittee shall have written notice of the time and place of the hearing and the charges which are made against him.

32812. Thirty days' notice is not required before a license or permit may be suspended or revoked by the director where the premises or appurtenances of the licensee or permittee are in a manifestly insanitary condition nor in cases of manipulation by the licensee or permittee of measures, weights, samples, or tests for milk fat content or bacterial counts of milk or cream upon which payment is based, or the record of such tests.

32813. The proceedings for the suspension or revocation of a license or permit shall be conducted pursuant to Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers granted in such chapter.

CHAPTER 3. GENERAL REQUIREMENTS

32901. It is unlawful for any person to sell, give away, deliver, or knowingly purchase or receive any milk, cream, product of milk or cream, imitation milk, imitation cream, imitation milk product, or any substitute for any milk product which does not conform to the standards which are established by this division. It is unlawful for any person to sell, give away, deliver, or knowingly purchase or receive as, or for, milk or cream any product which is prepared or manufactured by the mixing or blending of milk, skim milk, or any of the derivatives of milk or skim milk, with butter.

32902. It is unlawful for any person to sell, for human consumption as cow's milk, any goat's milk or any mixture of cow's milk and goat's milk. It is unlawful for any person to sell for human consumption as goat's milk, any cow's milk or any mixture of goat's milk and cow's milk.

32903. Except as otherwise provided in Section 32905 it is unlawful for any person to sell any milk, or any product of milk from cows or goats that have not negatively passed a tuberculin test applied regularly in accordance with regulations of the department by one of the following:

(a) A veterinarian in the employ of the department.

(b) A veterinarian of the Agricultural Research Service of the United States Department of Agriculture.

(c) A veterinarian approved by the department and accredited by the Agricultural Research Service of the United States Department of Agriculture.

In the case of cows or goats which are producing milk that is to be used as raw market milk, "tuberculin test applied regularly" means at least once annually.

32904. If reacting animals are found they shall be removed from the herd immediately by the owner and kept separate

and apart from other cattle and disposed of in accordance with the provisions of Chapter 2 (commencing with Section 9901), Part 1, Division 5 of this code.

32905. Milk or any milk product which does not satisfy the requirements prescribed by Section 32903 may be sold in this state in the following cases:

(a) If such milk or milk product was produced in a modified accredited area within the United States.

(b) If, in the case of any milk product which was produced in a foreign country, satisfactory evidence is presented which indicates its origin from nonreacting tuberculin tested animals.

32906. It is unlawful for any person to sell, give away, or deliver, or to knowingly purchase or receive any impure, polluted, tainted, unclean, unwholesome, stale or adulterated milk or cream, or any product which is manufactured wholly or in part from such milk or cream.

32907. It is unlawful for any person to sell, give away, deliver, or knowingly purchase or receive any milk or any product of milk which is within any of the following classes:

(a) Has been produced in or by a dairy farm or milk products plant in an insanitary condition.

(b) Is handled by any carrier of milk or any product of milk that is in an insanitary condition.

(c) Is in any store or depot that is in an insanitary condition.

32908. It is unlawful for any person to sell, give away, deliver, or to knowingly purchase or receive any imitation milk product which has been produced in a plant that is in an insanitary condition, or that is handled by any carrier or any store or depot that is in an insanitary condition.

32909. It is unlawful for any person to produce, manufacture, prepare for sale, or sell any of the following:

(a) Any milk, cream, or other product of milk to which has been added, or that contains, any compound of boron, salicylic acid, formaldehyde, or other preservative.

(b) Any milk or product of milk, except as otherwise provided in this division, to which has been added any coloring matter or any gelatin or other substance.

This section does not prohibit the use of harmless coloring matter and common salt (chloride of sodium) in butter and cheese, the use of gelatin, sweetening, eggs or egg products, harmless coloring or flavoring, or edible stabilizer in the manufacture of ice cream, ice milk, sherbet, or edible stabilizer or citric acid in the creaming mixture for cottage cheese, or the use of alkalies approved by the director, in the manufacture of butter, or the adjustment of the acidity of ice cream mix within limits designated by the director.

32910. Except as otherwise provided in this division, it is unlawful for any person to manufacture or sell any milk, cream, skim milk, buttermilk, condensed or evaporated milk, powdered milk, condensed skim milk, or any of the fluid derivatives of any of them or any ice cream, ice milk, cheese, or any

other milk product to which has been added any fat or oil, except milk fat, or the fat naturally contained in chocolate and not separated from it, either under the name of such products, articles, or the derivatives of them, or under any fictitious or trade name. The addition, however, to the products which are commonly known as condensed skim milk, condensed buttermilk, or semisolid buttermilk of not more than 5 percent of pure cod liver oil is not a violation of this section, if the product is sold for poultry or stock feed.

32911. A person shall not efface, erase, cancel, or remove any mark, statement, or label which is required by this division, with intent to mislead, deceive, or to violate any provision of this division.

32912. Every milk product or imitation of a milk product at the time of sale to the retail trade shall be labeled and billed with the correct name of the product and shall conform to all other requirements for special labeling of the product which are provided in this division and the regulations for its enforcement.

32913. A person shall not use the name of any such product, orally, printed, or written, in connection with the sale of any product or substance unless such product or substance conforms to the definitions and standards which are prescribed by this division.

32914. A person shall not make or cause to be made any statement, oral, written, or printed, or make or print, or cause to be made or printed, any design, symbol, picture, or illustration in connection with the advertising or sale of any product, article, or compound which is defined in this division, which statement, design, symbol, picture, or illustration is false, deceptive, or misleading in any manner.

32915. The labeling requirements of Sections 32912, 32913, and 32914 also apply to milk and cream which is sold in bulk to the wholesale trade and to milk and cream which is sold by any milk products plant for processing purposes.

32916. All cream, skim milk, buttermilk, ice cream, butter, cheese, or other milk product which is sold, designated, or advertised as certified shall be conspicuously marked with the name of the commission which certifies it and certifies the milk from which such cream, skim milk, buttermilk, ice cream, butter, cheese and other milk product was obtained.

32917. A person shall not render any statement or bill which shows the weight, grade, percentage of fat, amount of fat, solids not fat, bacteria count, price, or total amount paid, for milk or any milk product which is false, deceptive, or misleading in any particular.

32918. Every vehicle from which any milk or milk product is regularly sold and marketed or peddled shall have the name of the distributor plainly lettered upon it in letters at least 3 inches high on both sides of such vehicle.

32919. The director may by regulation require every distributor that delivers any packaged milk in fluid state to any

agency of the United States government for resale for off-premises consumption to label the containers of such packaged milk, if practicable, with a conspicuous notice that the milk has been procured for use by such agency. The director may also require such additional notice regarding prohibition against resale of such packaged milk as he, under the circumstances, deems proper.

CHAPTER 4. INSPECTION SERVICES

Article 1. Definitions

33051. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

33052. "Eligible list" means the list established by the State Personnel Board pursuant to Section 33111 of persons who are qualified to be employed by the department in the enforcement of this division and the regulations of the director.

33053. "Established milk inspection area" means an area in which the inspection or grading service is established and conducted by the director and wherein such service is not conducted under an approved milk inspection service.

Article 2. General Provisions

33081. The director may authorize as many approved milk inspection services as may be necessary to properly carry out the provisions of this division and the regulations for its enforcement.

33082. The director shall supervise the operation of all approved milk inspection services in the enforcement of this division and the regulations which are adopted by him.

33083. The director may adopt regulations for the proper enforcement of this chapter.

33084. The director, at least once each month, shall report to the State Controller the total amount of money which is collected under Section 33294. He shall, at the same time, pay into the State Treasury the entire amount of such receipts which shall be credited to the Department of Agriculture Fund and expended as provided in Section 32704.

33085. The director shall, within 30 days prior to each general session of the Legislature, submit to the Governor a full and true report of all transactions under this chapter during the current biennium, including a complete statement of receipts and expenditures during the period.

Article 3. Employees

33111. The State Personnel Board shall hold examinations in various parts of the state for the purpose of determining the qualifications of persons who desire to become employed

by the department in the enforcement of this division and the regulations of the director, and shall establish an eligible list of persons who are qualified for such employment.

33112. Any person who is employed by the state or any county or city in this state may be eligible for employment by any county or city without being on the eligible list if such person was employed by the state or any county or city in this state, and while so employed, enforced laws, rules, regulations, and ordinances which pertain to milk and milk products within four years immediately preceding the date his present employment commenced.

33113. A person is not eligible to take the examination unless he possesses one of the following qualifications:

(a) Graduation from a four-year college with specialization in studies which related to dairy farms or milk and milk products.

(b) Graduation from a veterinary college of recognized standing at the time of graduation and at least one year of experience in the production, processing, or inspection of milk or milk products.

(c) At least three years of experience in this state with an approved milk inspection service, or with the Bureau of Dairy Service of the department, in inspection and enforcement work which pertains to dairy farms or milk and milk products.

33114. The State Personnel Board shall, upon the written request of any county or city, certify to it a complete list of all persons upon the eligible list.

33115. No person shall be hereafter employed by the department or any county or city for the purpose of the enforcement of this division, the regulations of the director, or any ordinance of a county or city which relates to the inspection of dairy farms, milk products plants, or milk products, unless he was at the time of such employment on the eligible list or was previously employed as provided for in this article.

33116. If the employees of any county or city who inspect dairy farms, milk products plants, or milk products are subject to qualification by a civil service board or commission, a person may not take an examination for such a position which is given by the civil service board or commission unless he is upon the eligible list or has been previously employed as provided for in this article.

33117. If a county or city charter requires local residence as a prerequisite to employment, and the number of persons upon the eligible list who can meet such residence requirement is less than three, or if there are less than three persons upon such eligible list, the State Personnel Board shall prepare and certify to each county and city which requests it, a list of persons who are eligible for temporary appointment pending the establishment of a suitable eligible list.

33118. The director shall, from time to time, conduct special refresher courses which shall not exceed five days, at various convenient places in the state for the purpose of training persons who are employed by the department and by each county and city in the enforcement of this division, regulations of the director, or the ordinances of any county or city which relate to the inspection of dairy farms, milk products plants, or milk products, in all of the following:

(a) Dairy science.

(b) Uniform methods of enforcement of this division.

(c) The regulations of the director.

(d) Ordinances of counties and cities which concern dairy farms, milk products plants, and milk products.

(e) Other pertinent information which concerns dairy farms, milk products plants, and milk products.

33119. Attendance at such a refresher course shall be mandatory, in the discretion of the director, upon any or all persons who are employed by the department and each county and city in the inspection of dairy farms, milk products plants, and milk products.

33120. Any person who is employed by the department or any county or city shall be paid his salary or compensation while he is attending such a special refresher course.

33121. This article does not apply to any clerical employee, or to any person who is employed in a laboratory.

Article 4. Designation and Assignment

33141. If a producer or distributor delivers or sells market milk within the jurisdiction of an approved milk inspection service, the director, after an investigation and consultation with the health officer of each county and city which is involved, shall do all of the following:

(a) Designate and assign the county or city approved milk inspection service which shall conduct the milk products plant inspection or the dairy farm inspection, or both.

(b) Define the district or area in which each county or city shall conduct milk products plant inspection or dairy farm inspection, or both.

33142. The director, in making the designation and assignment, shall take into consideration, in addition to other matters which are considered by him, the geographical convenience of each county and city approved milk inspection service which renders such inspection, and the percentage of market milk and related products which are sold or delivered within each.

33143. No more than one approved milk inspection service may be designated by the director for any single dairy farm which produces market milk, or for any single milk products plant which processes or handles market milk and related products.

33144. Any market milk or related product which is inspected by any approved milk inspection service may be sold and delivered within the jurisdiction of any county or city.

33145. The county or city approved milk inspection service which is designated by the director to render the inspection service shall enforce all applicable local sanitary ordinances which pertain to dairy products, dairy farm sanitation, or milk products plant sanitation of each county and city into which such market milk or related product is sold or delivered, or in which the dairy farm or milk products plant is located.

33146. Any producer, distributor, or approved milk inspection service may file with the director a written protest regarding any designation which is made pursuant to Section 33141. It shall state in the written protest all the reasons for the protest.

33147. The director may, within 30 days after the receipt of the protest and after at least five days written notice to any approved milk inspection service which is concerned, hold a hearing on the protest.

33149. The director upon his own motion, after giving at least 10 days written notice to any approved milk inspection service which is concerned, may hold a hearing on any designation which is made pursuant to Section 33141 if it appears that a change in such designation may result in greater uniformity in inspection areas and eliminate duplication of effort and traveling.

33150 Upon the completion of the hearing, the director may revoke or amend such designation, or designate another approved milk inspection service to perform the inspection as provided in this article.

33151. Upon the approval in writing of a milk inspection service by the director, the approved milk inspection service shall do all of the following:

(a) Grade market milk as produced or sold under its jurisdiction.

(b) Require the use of the respective grade designations as prescribed in this division.

(c) Enforce this division in accordance with the regulations which are adopted by the director that pertain to market milk.

Article 5. Establishment of Inspection Service by Director

33171. If applications for permits to be issued by the director pursuant to Section 33222 are received from applicants that total 51 percent or more in number of the persons that desire to engage in the business of producing, processing, selling, or distributing any grade of market milk in an area in which no inspection service has been established by the director, the director shall establish and conduct a milk inspection service unless the funds which are derived under Article 9 (commencing with Section 33291) of this chapter are inade-

quate to maintain the milk inspection service subject to establishment by the director. If they are inadequate, the establishment of such milk inspection service is not required.

33172. If the funds derived from an area wherein a milk inspection service has been established by the director are insufficient to defray the added cost of inspection for a graded milk supply, the director, on 30 days notice, may withdraw such graded inspection service. The producers and distributors of market milk in that area are thereafter required to pay only the inspection fee or fees which are specified in subdivisions (c) and (d) of Section 33294.

33173. If within the 30-day period prior to the withdrawal of the graded inspection service, petitions are filed with the director by 51 percent or more of the persons that are engaged in the business of producing, processing, selling, or distributing graded market milk within the area, which request that the graded inspection service be continued and which agree to pay the added cost of maintaining such service within the area, the director shall, after hearing, establish the amount which is necessary for augmentation of the inspection fees for producers and distributors within the area.

Such fees shall be reasonably calculated to defray the additional cost of maintaining such graded inspection service. The director shall continue such service so long as the funds which are derived from the area are sufficient to defray the cost of such inspection.

Article 6. Interagency Contracts

33201. Counties and cities may, subject to the approval of the director, contract, one with the other, for the maintenance by one, or some of them, of such approved milk inspection service within the limits of the other as will best carry out this division and avoid duplication.

Article 7. Permits

33221. As used in this article, "permit" means a permit which is issued pursuant to Section 33222.

33222. Every person, before engaging in the business of producing, processing, selling, or distributing market milk, shall obtain a permit from the director or from the approved milk inspection service which is maintained by the city or county which is designated by the director pursuant to this chapter for each dairy farm, milk products plant, or place of business, whichever is applicable.

33223. If a permit is issued by an approved milk inspection service designated by the director to a producer of market milk or to a milk products plant, no other permit shall be required of such producer or milk products plant by any other approved milk inspection service, except that where an approved milk inspection service has regularly required the is-

suance of permits to milk products plants, upon the registration and notice in Section 33226, such permits may be issued and may be revoked for cause.

33224. Upon receipt of an application for a permit, the director or approved milk inspection service shall cause an investigation to be made of the dairy, milk products plant, or place of business where milk is produced, sold, or distributed and, in the case of a dairy, of the herd which produces the milk.

33225. If this division and the standards which are established by or adopted pursuant to the authority which is granted in this division are complied with and the applicant's milk is to be sold or distributed within a city or county or combination of either or both which maintain an approved milk inspection service, a permit shall be issued by the director or the approved milk inspection service, to such dairy farm, milk products plant, or place of business. Such permit shall be issued for a period not to exceed one year.

33226. No distributor that holds a permit from the director or from an approved milk inspection service shall sell or distribute any market milk within the jurisdiction of any other approved milk inspection service unless, at least 48 hours prior to any sale or distribution, he has first registered with and furnished to such other approved milk inspection service evidence that his permit is in full force and effect

33227. A person that is authorized to sell market milk within the jurisdiction of a milk inspection service may sell market milk from the same supply, of the same quality, in similar containers, and under the same label in any of the following:

(a) Territory outside the jurisdiction of any milk inspection service, if local ordinances, not in conflict with any provision of this division, are not thereby violated.

(b) Territory within the jurisdiction of any other milk inspection service if a permit pursuant to this article has been previously obtained.

Article 8. Fees Payable to a City or County

33251. The city or county, or group of either or both, which maintains an approved milk inspection service where an inspection fee is levied and collected shall determine the actual cost of making an inspection of a dairy farm which produces market milk, or a milk products plant which processes or handles market milk and related products, or both such farm and plant, within the area which is designated and assigned to such service by the director

33252 For the purpose of maintaining an approved milk inspection service, the city or county, or group of either or both, may, but is not required to, levy and collect an inspection fee or fees from distributors of market milk which is produced at dairy farms, or processed and handled at milk

products plants, or both, within the area which is designated and assigned to such service by the director.

33253. The dairy farm inspection fee shall not exceed the actual cost to the city or county of making the dairy farm inspection.

33254. No approved milk inspection service and no distributor shall charge any portion of such fees to any producer.

33255 The milk products plant inspection fee shall not exceed the actual cost of making the milk products plant inspection.

33256. The cost of such inspections, dairy and plant, may include all directly related costs.

33257. If an approved milk inspection service inspects a dairy farm, the dairy farm inspection fee, if levied, shall be collected from the distributors of market milk which is produced on the dairy farm, whether or not the milk products plants of the distributors are located within the area designated and assigned to such service by the director.

33258. If an approved milk inspection service inspects a milk products plant, the milk products plant inspection fee, if levied, shall be collected from the distributor that maintains the milk products plant.

33259. This article does not require any city or county to levy and collect an inspection fee for either dairy farm inspection or milk products plant inspection, or both, if such fee is not presently levied or collected.

33260. If market milk which is produced at a dairy farm is delivered to more than one milk products plant, any inspection fee which is levied for the cost of the dairy farm inspection service shall be proportioned upon an equitable basis between distributors that receive the market milk at their milk products plants and shall be paid for in such proportions by each such distributor to the approved milk inspection service which renders the inspection service.

33261. Charges which are made by any approved milk inspection service for inspection fees are subject to audit by the director, and for this purpose the director shall have access to all books, papers, records, or documents which pertain to any and all transactions of any approved milk inspection service and may inspect and copy them in any place within the state.

33262. Any distributor may file with the director a written protest as to the reasonableness of any inspection fee which is levied and collected from the distributor pursuant to Section 33252.

33263. The director may, within 30 days after the receipt of such protest, and after at least five days written notice to any approved milk inspection service which is concerned, hold a hearing on the protest.

33264. Upon the completion of hearing, the director may establish a reasonable fee for the inspection which is the subject of the protest. Thereafter until such order of the director

is revoked, suspended, or amended, such distributor, notwithstanding any other provision of this article, is not required to pay to the approved milk inspection service any inspection fee in excess of the fee which is designated as reasonable by the director.

33265. A city or county shall not, through an approved milk inspection service or otherwise, levy or collect any fee or tax from or against any producer or distributor for the purpose of inspecting any milk or dairy product on any truck or other vehicle or during transportation of such milk or dairy product. Any inspection of any milk or dairy product on any truck or other vehicle shall be a part of the dairy farm or milk products plant inspection which is provided for in this article.

Article 9. Fees Payable to the Director

33291. Every person that is engaged in the production, sale, or distribution of market milk, outside the jurisdiction of any approved milk inspection service, shall pay an inspection fee to the director

33292. Every distributor that is subject to this article shall deduct from payments which are due producers for market milk, and shall pay to the director, the fee required to be paid by such producer.

33293. The inspection fee is payable during the first week of January, April, July, and October of each year.

33294. The director shall fix the fee from time to time whenever he finds that the cost of administering this chapter can be defrayed from revenue derived from lower fees but in no case shall the inspection fee exceed the following:

(a) For producers that sell market milk at wholesale which is to be sold as graded market milk, three mills ($0.003) for each gallon of graded market milk which was sold during the quarter-year period preceding the date such inspection fee becomes due and payable.

(b) For distributors that purchase market milk from producers or from other distributors which is to be sold as graded market milk or that distribute their own graded market milk, three mills ($0.003) for each gallon of graded market milk which was received or so produced during the quarter-year period preceding the date such inspection fee becomes due and payable

(c) For producers that sell market milk at wholesale, two mills ($0.002) for each gallon of ungraded market milk which was sold during the quarter-year period preceding the date such inspection fee becomes due and payable.

(d) For distributors that purchase market milk from producers or that distribute their own market milk, two mills ($0 002) for each gallon of ungraded market milk which was received or so produced during the quarter-year period preceding the date such inspection fee becomes due and payable.

Article 10. Violations

33321. It is unlawful for any person to do any of the following:

(a) Prevent, interfere with, or attempt to nullify in any way the work of any duly authorized representative of the department or of an approved milk inspection service in the enforcement of any provision of this division.

(b) Interfere with or prevent any such representative from examining any records or books in the conduct of his official duty.

(c) Prevent or interfere with any such representative if he deems it advisable to secure samples of milk or any product of milk, imitation milk, imitation butter, or oleomargarine, or any substance which is designed to be used as a substitute for milk or any product of milk.

Chapter 5. Dairy Farms

Article 1. General Provisions

33451. A dairy farm which is insanitary, deficient, or unsatisfactory is subject to the action provided in this chapter.

33452 A dairy farm is not required to have a mechanical sterilizer, mechanical cooler, or milk house or room, if all of the following conditions are satisfied:

(a) It produces milk for manufacturing purposes only.

(b) It has not more than 6 cows or 18 goats.

(c) Regular daily deliveries are made of all of the milk produced for sale on the dairy.

33453. This chapter does not prohibit the immediate degrading or exclusion from the market or the immediate condemnation by the director or an approved milk inspection service of any milk or cream which is contaminated or which is produced in a dairy barn or held in a milk house which is in such an insanitary condition that the milk or cream will be contaminated by direct contact with filth.

Article 2. New Construction or Repairs

33481. The director shall establish regulations and provide plans and specifications at cost for the construction of sanitary milk barns and milk houses which are used in the production of market milk. The regulations, plans, and specifications shall provide that the buildings shall be sound, readily cleanable, and of sanitary construction and that the buildings shall afford the proper working space and be constructed to admit sufficient light and ventilation.

33482. The regulations, plans, and specifications may be varied to suit the climatic and other differences in the various sections of the state. If regulations, plans, and specifications have been adopted or established by the director, they are the standard building requirements of all market milk dairy farms

which are operating in the same geographical area of the state.

33483. Minimum construction standards for new market milk dairy farms and extensive repairs to existing market milk dairy farms shall not be less than those which are established by the director pursuant to the authority which is conferred upon him by this article.

33484. Any dairy farm building heretofore or hereafter constructed in accordance with the regulations, plans, and specifications heretofore or hereafter adopted by the director is not, however, required to be rebuilt to conform to any future change in the regulations, plans, or specifications.

33485. No authority is conferred by this article upon the director or any approved milk inspection service to require the rebuilding of any existing dairy farm building unless the owner of the building is making repairs to it to the extent of at least 75 percent of the value of such building.

33486. All existing structures which are used in the production of market milk shall be kept in repair in accordance with the sanitary requirements and standards which are established by this division.

Article 3. Dairy Farm Sanitation

33511. If any provision of this article is violated by any dairy farm, the dairy farm is insanitary, deficient, and unsatisfactory.

33512. An open cesspool, pigpen, stagnant water, accumulation of manure or other filth shall not be permitted within 100 feet of the milk house or room, or within 50 feet of any milking barn, stanchions, or other place where milking is done.

33513. Human excreta or other human wastes shall be properly disposed of by the use of flush toilets and septic tanks, approved pits, or chemical toilets. Such toilets shall be conveniently located and properly constructed, operated, and maintained, so that the waste is inaccessible to flies and does not pollute the surface soil or contaminate any water supply. No approved pit or chemical toilet, however, shall be permitted within 100 feet of the milk house or room or within 50 feet of any milking barn, stanchions, or other place where milking is done.

33514. The buildings, yards, or enclosures shall not be filthy or insanitary, nor shall any part of such yards or enclosures, except pastures, be made the depositories of manure in heaps or otherwise, where it is allowed to ferment and decay.

33515. The water supply for the milk house or room and dairy barn shall be properly located, constructed, and operated, easily accessible, adequate, protected against contamination, and of safe and sanitary quality. The bacterial quality shall conform to the standards of the State Board of Health for public supplies of drinking water.

33516. The water supply for drinking by livestock shall not be stagnant, polluted with manure, urine drainage, decaying vegetable or animal matter, or pathogenic bacteria of any source.

33517. No person who is connected with or employed on a dairy farm and liable to come in contact with the milk or cream of the dairy farm or the dairy farm operations shall be afflicted with any communicable disease or in a condition to disseminate the germs of any communicable disease.

33518. A suitable milk house or room, which is properly screened to exclude flies or insects shall be provided and maintained for the separating, cooling, mixing, canning, and keeping, or otherwise caring for, the milk and cream. The milk house or room shall not be used for any other purpose. It shall not be located in, or be a part of, any building in which fowls or animals, except milking cows, are housed, or be a part of any room where milking cows are held, or a part of, or communicate with, any room or place which is used by any person for sleeping or living accommodations.

33519. The pails, cans, bottles, or other containers for milk or its products, or the strainers, coolers or other utensils, appliances, apparatus, or equipment which come in contact with the milk or its products shall be thoroughly washed and afterwards sterilized each time they are used by exposing them to water or water vapor at a temperature above 200 degrees Fahrenheit, or by boiling water or by superheated steam, or by a chemical or other sterilization process which has been approved by the director and which is used in the manner which is established by regulation of the director.

33520. Milking machine rubber parts, however, may be sterilized after each use by immersion for a period of at least 15 minutes in water which has a temperature of not less than 170 degrees Fahrenheit or by a chemical process.

33521. The containers, appliances, or equipment, after sterilization, shall be adequately dried and protected from flies, dust, and other contamination.

33522. No container, utensil, appliance, or equipment shall be used for any purpose except the handling of milk or products of milk.

33523. The udders, flanks, hind legs, and tails of cows or goats shall be reasonably clean during milking.

33524. The milk or cream shall be protected from contamination by dust and flies.

33525. The person or wearing apparel of the dairyman, his employees, or other persons who handle the milk or its products and containers or equipment of the milk or its products shall not be soiled and shall be washed with reasonable frequency.

33526. The hands of milkers shall be clean and dry during the entire period of milking.

33527. The milk or cream shall be cooled to a temperature within four degrees Fahrenheit of the temperature of the cold-

est water which is available on the premises within one hour after it is drawn from the cows or goats and kept as cool as conditions will permit until delivery to a milk products plant.

33528. The interior of the milking barn or milk house or room shall be kept clean and free from accumulated dust and cobwebs.

33529. The walls of the milking barn shall not become soiled with manure, urine, or other filth.

33530. The feed shall not be spoiled or otherwise unfit for feeding cows or goats and the production of milk.

Article 4. Violations

33551. For any violation of any provision of this chapter a dairy farm shall be degraded or the milk or cream from it shall be excluded from the market. No dairy farm, however, shall be degraded or the milk or cream from it excluded from the market, unless the exclusion is made pursuant to Section 33453, for a violation of any provision of this chapter, which, upon written notice from a qualified inspector, can be corrected and is corrected within 72 hours of the issuance of the notice.

The notice shall be served personally on the owner or operator of the dairy farm. A copy of it shall be immediately delivered or mailed to the distributors that purchase the milk or cream produced on the dairy farm.

33552. No notice for a subsequent violation of any provision of this chapter, for which a notice, as herein provided, has been issued is required if such subsequent violation occurs during the three-month period following issuance of the original notice.

Article 5. Reinstatement

33581. Application for the reinstatement at its previous standing of a dairy farm which has been degraded or the milk of which has been excluded from the market, pursuant to this chapter, shall be acted upon by the director or the approved milk inspection service which has jurisdiction, within three days after the receipt of the application by the director or approved milk inspection service.

Chapter 6. Milk Products Plants

Article 1. General Provisions

33701. It is unlawful for any person to operate a milk products plant unless such plant scores a minimum of 80 percent on the official scorecard for milk products plants which is established by regulation of the director. None of the provisions for scoring as set forth herein shall be applied to a dairy farm.

33702. The provisions of Sections 33701, 33762, 33763, 33764, and 33765 do not apply to any milk products plant, its

utensils, apparatus, and equipment which are used for the processing, manufacturing, handling, and storing of milk, or any products of milk if such milk products plant and its equipment are devoted exclusively to the preparation of products for animal and poultry feeds.

33703. Notwithstanding any provision of Section 33522, 33764, or 33765, containers, utensils, appliances, and equipment used for handling or bottling milk or milk products may be used for handling and bottling fruit juices or fruit juice base beverages pursuant to regulations of the director.

33704. The provisions of Sections 33701, 33731, 33732, 33733, 33734, 33767, 33768, 33770, 33771, 33776, and 34593 do not apply to the manufacture of a milk drink if such product is manufactured from milk drink mix or sterilized milk drink mix, or to ice cream which is manufactured from ice cream mix, or to ice milk which is manufactured from ice milk mix, if such products are manufactured in a freezing device from which such products are served directly in a semi-frozen state, without packaging of any type, for consumption on the premises in or from rooms where food is served to the public.

All such mixes so used shall be secured from a licensed manufacturer of milk products.

33705. Notwithstanding any other provisions of this division, any wholesome agricultural food product which does not affect the flavor or quality of milk products may be manufactured in any milk products plant subject to conditions which are prescribed by the director, and upon obtaining a special permit which is issued by the director after proper investigation.

Article 2. New Construction and Repairs

33731. No new milk products plant shall be constructed nor shall extensive repairs be made to any existing milk products plant unless plans or specifications which show in detail the nature of such construction or alteration have been submitted to the director and to the approved milk inspection service within whose jurisdiction the milk products plant will be, or is located and unless the plans and specifications have received the director's approval in writing.

33732. Except as otherwise provided in Section 33733, minimum construction standards for new milk products plants shall include a separate room for each of the following operations:

(a) Receiving and weighing of milk or cream, and washing and sterilizing of containers in which milk or cream is received

(b) Pasteurization, processing, cooling, and manufacturing

(c) Washing and sterilizing bottles or cans which are used in the delivery of milk or cream to the wholesale or retail trade.

(d) Bacteriological and chemical analyses.

(e) Adequate and efficient cold storage room or rooms mechanically equipped and operated.

(f) Boiler, compressor, and other machinery.
(g) Storing of supplies.
(h) Toilets, lavoratories, and lockers.

33733. A separate room is required for conducting each of the operations which is listed in Section 33732, except that, if any of the functions which are specified in subdivisions (a) to (g), inclusive, of that section are not performed at a milk products plant, there need not be a separate room provided for such function.

33734. Whenever and wherever the functions which are specified in Section 33732 are performed, such performance shall be with equipment which is determined by the director to be stationary by nature and permanently located.

Article 3. Milk Products Plant Sanitation

33761. If any provision of this article is violated by any milk products plant, the milk products plant is insanitary.

33762. Milk or cream, or any product of milk or cream, shall not be received, by a milk products plant if such milk or cream, or product of milk or cream, comes within any of the following classes:

(a) Is impure, tainted, unclean, adulterated, or unwholesome.
(b) Has reached an advanced stage of fermentation.
(c) Shows a state of putrefactive fermentation.
(d) Contains foreign substances which are detrimental to the quality of the product manufactured from the milk or cream or the product of milk or cream.

33763. The utensils and apparatus that come in contact with milk or its products shall be thoroughly washed and afterwards sterilized each time they are used by heating them to a temperature above 200 degrees Fahrenheit, or by a chemical or other sterilization process which has been approved by the director and which is used in the manner established by regulation of the director.

33764. The cans or other containers in which the milk or milk products are received, transported, or delivered shall be thoroughly washed, sterilized, and dried after emptying and before being sent out to be used again.

33765. No container, utensil, apparatus, or equipment, except as otherwise provided, shall be used for any purpose other than that of handling milk and the products of milk.

33766. The inside surfaces of any equipment, apparatus, or container, which comes in contact with milk or its products, shall be smooth and readily cleanable and free of open seams, cracks, or crevices.

33767. The floor shall be constructed of concrete or other impervious material which is acceptable to the director. It shall be so constructed as to be watertight and so sloped that all drainage will flow to one or more points of drainage. The floors shall be readily cleanable.

33768. Floor drains shall be provided which are properly trapped to exclude odors and connected to a sewer line that will convey refuse milk, water, and sewage away to a point at least 100 feet distant from the milk products plant.

33769. No milk, its products, or any filth shall be allowed to accumulate, ferment, or decay upon the floor or walls.

33770. No species of animal life other than man shall be permitted in any building which is used in connection with any milk products plant.

33771. No building which is used in connection with any milk products plant shall be used for any purpose except the handling of milk and milk products, equipment, apparatus, or containers of milk or milk products.

33772. The water supply shall be properly located and constructed so as to be easily accessible, adequately operated, and protected against contamination. The bacterial quality shall conform to standards of the State Board of Public Health for public supplies of drinking water.

33773. A cesspool, privy vault, hog yard, slaughterhouse, manure, or any decaying vegetable or animal matter shall not be so located as to become a nuisance or to permit foul odors to reach such milk products plant.

33774. All openings into any milk products plant shall be effectively protected against flies and insects and doors shall be self-closing.

33775. There shall be sufficient light in each room equivalent to not less than one 50-watt electric light per 100 square feet of floor area, reasonably and efficiently distributed. All rooms shall be adequately ventilated.

33776. Tight, sound, and cleanable walls and ceilings shall be provided. The walls shall be constructed of nonabsorbent material, acceptable to the director, sufficiently above the floor to take care of any splash and to prevent the flowing or seepage of water or other fluids underneath or between the wall and the floor or supporting members.

33777. A suitable toilet, with self-closing door, and lavatory facilities, soap, and clean towels shall be provided for employees. A toilet shall not communicate directly with any room which is used for handling milk or its products or with any room which is used for the washing, sterilizing, and storage of containers and supplies.

33778. The bodies or wearing apparel of persons who are employed or come in contact with any milk or its products shall be kept clean and shall be washed from time to time with reasonable frequency.

33779. No person who is connected with, or employed in, a milk products plant and liable to come in contact with milk or milk products or the milk plant operations, shall be afflicted with any communicable disease or in a condition to disseminate the germs of any communicable disease.

33780. No equipment or apparatus shall be installed or maintained in such manner so as to prevent thorough and adequate cleaning of walls and floors.

CHAPTER 7. CHEESE PACKAGING ROOMS AND IMITATION MILK PRODUCTS PLANTS

Article 1. Cheese Packaging Rooms

33901. A room wherein cheese and cheese products are cut, wrapped, and packaged into individual consumer packages shall be maintained in accordance with the sanitary requirements of Chapter 6 (commencing with Section 33701) of this division, except that foods which do not affect the flavor or quality of such cheese and cheese products may be handled in such a room.

Article 2. Imitation Milk Products Plants

33921. All of the provisions of Chapter 6 (commencing with Section 33701) of this division, apply to any building or structure in which any imitation milk product is manufactured, processed, or compounded, except that food which does not affect the flavor or quality of such imitation milk products may be handled in such building or structure.

CHAPTER 8. PASTEURIZATION

Article 1. Standards

34001. Pasteurization of milk or a milk product is a process which consists of one of the following:

(a) Uniformly heating milk or a milk product to a temperature of not less than 145 degrees Fahrenheit and of holding it at such temperature for at least 30 minutes.

(b) Uniformly heating milk or a milk product to a temperature of at least 161 degrees Fahrenheit and holding it at such temperature for at least 15 seconds.

Each such type of heating shall be conducted in approved and properly operated equipment. The milk or milk product shall be immediately cooled to a temperature of not above 50 degrees Fahrenheit after the completion of either of such heatings.

Nothing contained in this chapter shall be construed as prohibiting any other process which has been demonstrated to be equally efficient and is approved by the director.

34002. If the process of ripening or starting is to be commenced immediately, each of the following shall be cooled to a degree no lower than necessary for such ripening or starting:

(a) Cream which is pasteurized for use and which is used in the manufacture of butter.

(b) Milk which is pasteurized for use and which is used in the manufacture of cheese.

34003. In the process of producing cream from market milk which is to be used as market cream or for the standardization of market milk, such cream may be heated to a tempera-

ture of not to exceed 165 degrees Fahrenheit and immediately cooled to a temperature of 50 degrees Fahrenheit or less. Such heat treatment shall not prevent the subsequent pasteurization of such cream.

34004. Pasteurized skim milk, which is derived from market milk and which is used for standardizing pasteurized market milk, may be repasteurized once.

34005. Market cream which has not been packaged for distribution to consumers may be repasteurized once.

34006. Every person that operates any place where milk is received and byproducts are distributed shall pasteurize any skim milk, whey, or other milk byproduct which is to be used for feeding purposes for farm animals before delivering it. Such pasteurization may be accomplished by heating the byproduct to a temperature of 145 degrees Fahrenheit and holding it at that temperature for not less than 30 minutes, or by heating it to 185 degrees Fahrenheit without holding.

Article 2. Sanitation

34031. Any apparatus which is used for the pasteurization of milk or any milk product shall be kept in strictly clean and sanitary condition.

34032. Any vat, tank, or container which is used to store a milk byproduct shall be kept in a clean and sanitary condition.

Article 3. Thermometers and Temperature Records

34061. Each vat, tank, or other receptacle in which milk or any milk product is pasteurized shall be equipped with a recording thermometer device to accurately record the temperature to which, and the length of time for which, the pasteurized product has been heated.

34062. Each vat, tank, or other receptacle in which milk or any milk product is pasteurized shall also be equipped with an indicating thermometer.

34063. Any recording thermometer device and any indicating thermometer which is used in pasteurization shall be of a type which is approved by, and its use is at all times subject to the approval of, the director.

34064. Every person that uses any pasteurizing apparatus within the state shall date, preserve, and keep on file for not less than two months after they are made, all records which have been made by such thermometer. Such records shall, at all times, be open to the inspection of the director, and all state, county, and municipal officers who are charged with the enforcement of the laws and ordinances respecting milk products or the public health.

Article 4. Misrepresentation

34091. It is unlawful for any person to sell any milk or product of milk as and for pasteurized milk or a product of pasteurized milk, or to use the word "pasteurized" or any of its derivatives in connection with the sale, designation, advertising, labeling, or billing of any milk or product of milk, unless the milk and all products of milk which are contained in the milk or the product of milk, or used in its manufacture, consist exclusively of milk, skim milk, or cream which has been pasteurized.

CHAPTER 9. WEIGHING, MEASURING, AND TESTING OF MILK AND BASIS FOR PAYMENT

Article 1. General Provisions

34201. A person shall not do any of the following:

(a) Fraudulently manipulate the measure, weight, or test which is used for determining the grade or quality of milk, cream or any fluid derivative of milk or cream.

(b) Fraudulently manipulate the test which is used for determining the percentage of milk fat in milk, cream, or any fluid derivative of milk or cream.

(c) Overread or underread any such test.

(d) Take an unfair sample of milk, cream, or any fluid derivative of milk or cream on which the grade, quality, or amount of milk fat in it is to be determined.

(e) Fraudulently manipulate any such sample, or the record of any measurement, weight, test, or combination of them.

34202. No tolerance in weights, measures, percentages of milk fat, moisture, or any other measure or standard is permitted, except where specific provisions are made for such a tolerance.

Article 2. Basis for Payment

34231. Payment for milk, cream, or any fluid derivative of milk or cream shall be made on the basis of weight or measure and percentage of the milk fat contained in it, as determined by samples taken from each lot of the milk, cream, or fluid derivative of milk or cream upon delivery.

34232. If the director finds, after investigation by him, that facilities are not available for weighing and testing, upon request of the parties he may issue a written permit which authorizes the purchase and sale of milk, cream, or any fluid derivative of milk or cream upon a gallonage basis.

34233. This article does not prohibit weighing and sampling on a route, or the use of composite samples of milk, or the purchase and sale of market milk which is obtained from goats on a gallonage basis without the permit provided for in Section 34232.

Article 3. Milk Fat Tests

34261. A permanent record in duplicate of every test of milk, cream, or any fluid derivative of milk or cream which is purchased, received, or sold on the basis of the amount of milk fat that is contained in it, shall be made by a licensed tester on a standard form which is supplied by, or in accordance with the specifications for such record which are adopted by, the department.

34262. Each test shall be legibly recorded with indelible pencil or ink in such a manner as to correctly identify the test obtained upon the milk, cream, or fluid derivative of milk or cream.

34263. Each sheet or page shall be authenticated by the signature of the licensed tester. A duplicate record shall be deposited by the licensed tester immediately after completing the test on the day's samples, in a box which is provided by the purchaser, receiver, or seller of milk, cream, or fluid derivative of milk or cream, as the case may be. The box shall be constructed, sealed, and maintained in accordance with the regulations of the director.

34264. The original record of each test shall be immediately delivered to the purchaser, receiver, or seller of the milk, cream, or fluid derivative of milk or cream, and shall be retained by him for at least three months.

34265. The licensed tester shall retain an unmodified sample of any milk, cream, or fluid derivative of milk or cream which is tested by him for a period of time which is specified in regulations adopted by the director after tests of milk or cream have been made. The purchaser, receiver, or seller of milk or cream or fluid derivative of milk or cream shall provide a suitable place where the samples which are retained by the tester may be kept. Such place shall be acceptable to the department.

34266. In conducting the Babcock test, the milk fat column in tests on milk, in milk test bottles, shall be read from the extreme bottom of the fat column to the top of the top meniscus. In tests in cream test bottles, the meniscus at the top of the milk fat column shall be destroyed by the use of an overlying foreign oil approved by the department, and the milk fat column shall be read from the extreme bottom of the fat column to the plane of separation between the fat column and the overlying foreign oil. The reading of the test shall be made when the temperature of the milk fat is between 130 and 140 degrees Fahrenheit.

Article 4. Nonfat Milk Solids Tests

34291. The director shall, by regulation, adopt methods and procedures for the testing, weighing, and measuring of nonfat milk solids, and for the recording and reporting of such testing.

34292. Any such methods and procedures shall be based upon any or all or a combination of any of the following methods and procedures for testing, weighing, and measuring nonfat milk solids:

(a) The gravimetric method and procedure in which nonfat milk solids in milk samples are weighed after such milk has been subjected to a drying process.

(b) The specific gravity method in which nonfat milk solids are tested by specially calibrated hydrometers or other acceptable devices in milk samples in which the milk fat content has been previously ascertained.

(c) Any other method which is found by the director to achieve accuracy comparable to or greater than that which is achieved by the gravimetric or specific gravity methods.

Article 5. Equipment

34321. All measuring glassware, weights, or scales used by any licensed tester or licensed technician shall be accurate.

34322. All glassware shall be examined by the director and, if it is found to be accurate, each piece shall have a legible or indelible distinguishing mark placed upon it by the department.

34323. Every Babcock milk test bottle shall comply with all of the following specifications:

(a) The total percent graduation shall be 8.

(b) The graduated portion of the neck shall have a length of not less than 63.5 millimeters and the graduation shall represent whole percent, five-tenths percent, and tenths percent.

(c) The error in the total graduation or in any part of the total graduation shall not exceed one-tenth of 1 percent.

(d) The neck shall be cylindrical for at least five millimeters below the lowest and above the highest graduation mark.

34324. Every Babcock 50-percent nine-gram long-neck cream test bottle shall comply with all of the following specifications:

(a) The total percent graduation shall be 50.

(b) The graduated portion of the neck shall have a length of not less than 120 millimeters.

(c) The graduation shall represent 5 percent, 1 percent, and 0.5 percent.

(d) The cylindrical part of the neck shall extend at least five millimeters below the lowest and above the highest graduation mark.

(e) Each bottle shall bear at the top of the neck above the graduation, in plain legible characters, a mark which defines the weight of the charge to be used—nine grams.

(f) The error in the total graduation, or in any part of the graduation, shall not exceed twenty-five hundredths of 1 percent.

34325. Every Babcock 50-percent 18-gram long-neck cream test bottle shall comply with all of the following specifications:

(a) The total percent graduation shall be 50. The graduated portion of the neck shall have a length of not less than 120 millimeters.

(b) The graduation shall represent 5 percent, 1 percent, and five-tenths of a percent.

(c) The cylindrical part of the neck shall extend at least five millimeters below the lowest and above the highest graduation mark.

(d) Each bottle shall bear at the top of the neck above the graduation, in plain legible characters, a mark which defines the weight of the charge to be used—18 grams.

(e) The error in the total graduation, or in any part of the total graduation, shall not exceed twenty-five hundredths of 1 percent.

34326. Every Babcock 17.6-milliliter pipette shall comply with all of the following specifications:

(a) The delivery tube shall have a length of 100 to 120 millimeters, an outside diameter between 4.5 and 5.5 millimeters, and a straight nozzle.

(b) The pipette shall contain 17.6 milliliters of water at 20 degrees centigrade when the bottom of the meniscus coincides with the mark on the suction tube.

(c) The error in the graduation shall not exceed five one-hundredths of a milliliter

34327. Every Babcock scale or balance which is used in weighing cream samples into the test bottles shall have a sensibility of not more than 30 milligrams.

Article 6. Fees

34351. A fee of two dollars ($2) shall be paid by the owner of Babcock glassware to the department for every dozen pieces of such glassware which are examined.

34352. The department shall charge fees for examining glassware and apparatus which is used in methods of testing other than the Babcock test, which are sufficient to cover the actual cost of such examination.

34353. Any money which is received under this article shall be paid into the Department of Agriculture Fund.

Chapter 10. Containers

Article 1. Definitions and General Provisions

34501. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

34502. "Association" includes nonstock corporations.

34503 "Single service container" means a container which is used only once and is not refilled.

34504. This chapter applies to all brands which have been registered with the department.

Article 2. Brand Registration

34531. Any person or association that is engaged in receiving, producing, manufacturing, packing, canning, bottling, handling, or selling milk or any product of milk in containers, cabinets, or other dairy equipment which is marked or otherwise identified with the name of such person or association or with any fictitious or other name or word or with any mark or device whatsoever, and any association or corporation, the members or directors of which are so engaged, may file with the department a description of the name or word, mark, or device which is so used, and an application for registration of it as a brand. The application shall be accompanied by a fee of five dollars ($5) for each separate brand.

34532. There shall be included as a part of each brand the words, "Registered in California" or the abbreviation "Reg. Cal."

34533. The applicant shall also cause such description to be printed once a week for three successive weeks in a newspaper of general circulation which is published in the locality in which the principal place of business of the applicant is situated.

34534. The department may refuse to register a brand if it appears that the same or a similar brand has been previously registered by another person or association unless the prior registrant gives his written consent to the subsequent registration.

34535. If it appears that two or more applicants have applied for the registration of the same or similar brands, the director may, after hearing, determine the right of prior ownership in such brand. When such right of prior ownership is determined, the director shall refuse to register, or shall cancel the registration of, any duplicate or similar brand.

34536. Any certificate of registration which is granted expires on the 30th day of June in each even-numbered year and may be renewed by payment of a renewal fee of one dollar ($1). The renewal shall be made on forms which are supplied by the director.

34537. If renewal of any certificate is not made within 60 days after the expiration of the certificate, such certificate becomes null and void.

Article 3. Branded Containers

34561. Except as otherwise provided in this article, every person that finds or receives any container, cabinet, or other dairy equipment which is marked with a brand which is registered pursuant to this chapter shall, within seven days, return it to the owner or his agent. If the finder is unable to locate the owner or his agent, he shall, within seven days, notify the director in writing that he has in his possession such container, cabinet, or other dairy equipment and particularly describe in such notice the trademark or brand which is upon the container, cabinet, or other dairy equipment.

34562. Any person that acquires any container, cabinet, or other dairy equipment which is marked with a brand that is registered pursuant to this chapter, by purchase or by other lawful means, and that has the written consent of the registrant of such brand to use it on the particular container, cabinet, or other dairy equipment which is acquired, or to use such brand on containers generally, shall so notify the department. He shall not thereafter be required again to file and publish the description but shall acquire as a part of such purchase all such benefit as the vendor had under this code as to the particular containers, cabinets, or other dairy equipment so acquired or as to containers generally, dependent on the form of such written consent.

34563. Any person that purchases any container, cabinet, or other dairy equipment which is marked with a brand registered pursuant to this chapter shall submit to the director a copy of the bill of sale or other documentary evidence which supports such purchase.

34564. The use of any container, cabinet, or other dairy equipment by any person, except the person or association whose name, mark, or device is upon it, or the members of any association which registered it, without the written consent provided for in Section 34562, or the possession by any junk dealer or dealer in secondhand articles of any such container, cabinet, or other dairy equipment, the description of the name, mark, or device of which has been so filed and published as provided in Sections 34531, 34532, and 34533 is presumptive evidence of unlawful use of or traffic in such container, cabinet, or other dairy equipment.

34565. If the owner of any container, cabinet, or other dairy equipment which is marked or branded, or any other person that is lawfully entitled to use the container, cabinet, or other dairy equipment, requires a deposit for security for its safekeeping and return, it does not constitute a sale, optional or otherwise, of the container, cabinet, or other dairy equipment.

34566. If any person mentioned in Section 34531 makes oath before any magistrate that he has reason to believe and does believe, that any registered container, cabinet, or other dairy equipment is being unlawfully sold, filled, or used, or is secreted in any place, the magistrate shall issue a search warrant to discover and obtain it.

34567. The magistrate may also cause to be brought before him the person in whose possession the container, cabinet, or other dairy equipment may be found. If the magistrate finds that such person has been guilty of a violation of this chapter, he shall impose the punishment which is prescribed in Section 35281, and also award the possession of the container, cabinet, or other dairy equipment taken upon such search warrant to the owner of it.

34568. Upon the representation of any interested party, the director may institute a proceeding in any court of com-

petent jurisdiction to recover for the owner any container which is marked with a brand registered pursuant to this chapter. The expense of such proceedings shall be paid by the interested party on whose representation such proceedings were instituted, and shall be a lien on such container.

Article 4. Containers for Particular Products

34591. Except as otherwise provided in this article, it is unlawful for any person to sell or otherwise dispose of any market milk, skim milk, buttermilk, or cultured buttermilk to the retail trade, unless such product is contained in a standard milk bottle or in a single service container which has been mechanically filled and capped or sealed in a milk room which is properly designed and equipped as approved by the director.

34592. Market milk which is served by any school, hospital, hotel, boardinghouse, restaurant, soda fountain, lunch counter, or other places where food or drink is served to the public, shall be served in the individual service bottle or container which has been filled and capped or sealed in a milk room, properly designed and equipped as approved by the director, the cap or seal of which shall not be removed except in the presence of the consumer or patron. This section does not:

(a) Apply to market cream or half-and-half.

(b) Prohibit the serving of homogenized market milk from a milk dispensing device which has been approved for such use by the director pursuant to Section 34594.

(c) Apply to any private boarding school which is licensed pursuant to Chapter 1 (commencing with Section 16000), Part 4, Division 9 of the Welfare and Institutions Code which is also a private full-time day school within the meaning of Section 12154 of the Education Code.

(d) Apply to any fraternity, sorority, dormitory or eating club, the existence of which is authorized or approved by the board of trustees or other governing agency of a college or university.

34593. Market milk or the fluid derivative of market milk which is used in the preparation of milk shakes or other mixed milk drinks shall be dispensed or poured from standard milk bottles or single service containers which have been filled and sealed or capped in a milk products plant.

This section does not prohibit the use of homogenized market milk drawn from a milk dispensing device that is approved pursuant to Section 34594 in the preparation of milk shakes or other mixed milk drinks.

34594. Homogenized market milk may be sold and served from and by the use of a milk-dispensing device which has been approved for such use by the director. Any such milk-dispensing device shall be installed and located in a place and manner which are acceptable to the local health authority.

34595. Homogenized market milk, which is served from a milk-dispensing device that has been approved for such use by the director, shall be dispensed directly from such dispensing device into the glass or other container from which the customer drinks the milk. It shall be served in minimum quantities of 8 ounces in each such glass or container.

34596. The gift, sale, loan, or furnishing in any manner of any milk-dispensing device is subject to Article 4 (commencing with Section 61371) of Chapter 1 of, and Article 9 (commencing with Section 62041) of Chapter 2 of, Part 3, Division 20 of this code.

Article 5. Sanitation

34621. Every restaurant, school, hospital, soda fountain, or other place where food or drink is served to the public, which sells milk, cream, ice cream, ice milk, buttermilk, or any combination of them for consumption on the premises, upon emptying any container of such a product, which container is to be returned to the milk distributor or manufacturer, shall rinse and drain the container, unless it is a glass container.

34622. Every container of milk, cream, or any product of milk or cream which is delivered to the consumer by any retailer or distributor and which is to be returned to such retailer or distributor shall be rinsed and drained before it is returned.

34623. Every container, except a single service container, of any kind in which milk or any product of milk is kept, stored, transported, or delivered, shall be sound, smooth, free from rust or open seams, and at all times kept in a condition which shall permit thorough cleansing of all surfaces with which the milk or its products come in contact.

34624. Any container, including any ice cream cabinet, which is commonly used or intended for the reception, storage, or delivery of milk, cream, or any product of milk or cream shall be used exclusively for the storage and use of milk and milk products. It shall not be used for any other purpose.

34625. Any empty container which is delivered to any producer, manufacturer, retailer, or distributor for the reception of milk or any product of milk shall be kept in a clean, sanitary, and sterile condition. It shall not be used for any other purpose.

34626. Every receptacle, except a single service container, which is used to contain market milk, skim milk, buttermilk, or cultured buttermilk for sale or disposal to the retail trade, shall be properly washed and sterilized on the premises where it is filled, in a separate room which is designed and equipped for such washing and sterilizing.

34627. A single service container shall be made of sanitary material, in a sanitary manner, and shall be kept in a sanitary

condition free from contamination until it is actually filled with milk, skim milk, buttermilk, or cultured buttermilk.

34628 Market milk, skim milk, buttermilk, or cultured buttermilk for sale or disposal to the retail trade shall not be transferred from one receptacle to another upon any highway, any street or sidewalk, or upon any vehicle or in any place except a milk room as specified in Section 34591 or in a place where such product is served for consumption on the premises.

Article 6. Violations

34651. It is unlawful for any person to use the words "Registered in California" or the abbreviation "Reg. Cal." on any container, cabinet, or other equipment unless the brand which appears upon it is registered pursuant to this chapter.

34652. It is unlawful for any person without the written consent which is provided for in Section 34562, except the registrant of the brand and the members of any association which is the registrant, to use or fill with milk or any product of milk, any container, cabinet, or other dairy equipment, which is marked or distinguished with a brand, of which a description has been filed and published.

34653. It is unlawful for any person to do any of the following:

(a) Erase, obliterate, cover up, or conceal any brand without first notifying the director and receiving his approval.

(b) Sell, buy, give, take, or otherwise traffic in such containers, cabinets, or other dairy equipment, except as provided in Section 34562.

34654. It is unlawful for any common carrier or private carrier for hire, except those which are engaged in transporting milk, cream, and containers of milk and cream to and from dairy farms, to receive or transport any empty container, cabinet, or other equipment which is marked with a brand registered pursuant to this chapter unless such carrier has in its possession a bill of lading or invoice which shows all of the following:

(a) The name and address of the consignor.

(b) The name and address of the consignee

(c) The number of containers, cabinets, or other equipment and the brand which appears upon them.

34655. A consignee shall not accept or receive any empty container, cabinet, or other equipment which he is not authorized to use. Nothing herein shall be construed to derogate from any powers or authority of the Public Utilities Commission of this state.

Article 7. Condemnation

34681. Any container which is found to have been used in violation of the requirements of this code shall be condemned and marked with the word "condemned" in any appropriate manner. Such a container shall not be used again in connection

with the handling of milk or any product of milk for human consumption, until it has been cleaned or repaired in a manner which is acceptable to the director.

CHAPTER 11. TRANSPORTATION

34801. Every carrier of milk, cream, or any product of milk, whether a producer, gratuitous private carrier, private carrier for hire, or common carrier, shall maintain every conveyance which it uses in transporting milk and cream in a clean and sanitary condition.

34802. Every conveyance, while transporting milk or cream or any clean empty container which is intended for milk or cream, and any shipping platform or premises where any such container is held while waiting shipment, shall either be enclosed or provided with a canvas covering or otherwise afforded protection from the direct rays of the sun, from warm air, dust, mud, rain, and other sources of contamination.

34803. Milk, cream, or any product of milk or cream shall not be transported in connection with, or close to, any other commodity from which it may absorb any foreign flavor or which may contaminate it. Milk, cream, or any empty container which is used for milk or cream shall not be hauled in any vehicle which is used for hauling manure or garbage or in any other unclean conveyance.

34804. Every milk or cream can or other shipping container for any product of milk shall be handled carefully and, while it contains milk, cream, or other product of milk, shall be kept right end up.

34805. Nothing herein shall be construed to derogate from any powers or authority of the Public Utilities Commission of the state.

34806. A carrier of milk, cream, or any product of milk, whether a gratuitous private carrier, private carrier for hire, or common carrier, shall not receive or transport any milk, cream, or product of milk after notification by the director or an approved milk inspection service that such product is unclean, polluted, tainted, unwholesome, stale, impure, or adulterated, or has been produced in violation of any provision of this code, except as provided for in Section 32764.

CHAPTER 12. LICENSES, RECORDS, AND REPORTS

Article 1. Definitions

34951. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

34952. "Milk products plant license" means a license which is issued by the director pursuant to Section 35015 for a milk products plant or other place of business to a person that is engaged in the business of dealing in, receiving, manufacturing, freezing, or processing milk, or any product of milk, or

that is engaged in the business of manufacturing, freezing, or processing imitation ice cream or imitation ice milk.

34953. "Retail dealer" means any person that sells imitation milk, imitation cream, or any imitation milk product in a quantity which is smaller than the quantity which is necessary to constitute a seller a wholesale dealer.

34954. "Wholesale dealer" means all of the following:

(a) Any person that sells imitation milk, imitation cream, or any imitation milk product, except imitation ice cream or imitation ice milk, in quantities of one full case or more at a time or in the same transaction.

(b) Any person that sells oleomargarine or margarine, renovated butter, or any substitute for butter in quantities of 10 pounds or more at a time or in the same transaction.

(c) Any person that sells imitation ice cream or imitation ice milk in quantities of two gallons or more at a time or in the same transaction.

Article 2. General Provisions

34981. Every license which is issued pursuant to this chapter, while in force, shall be kept conspicuously displayed in the place of business of the party to whom it has been issued.

34982. The director shall, within 30 days prior to each general session of the Legislature, submit to the Governor a full and true report of transactions under this division during the current biennium, including a complete statement of receipts and expenditures during the period.

34983. The director shall, within 30 days prior to each general session of the Legislature, submit to the Governor a full and true report of the transactions under this division during the preceding biennium, including a complete statement of expenditures.

Article 3. Licensing of Milk Products Plants and Other Places of Business

35011. A person shall not engage in any of the following businesses unless he has obtained a license from the director for each separate milk products plant or place of business:

(a) Dealing in, receiving, manufacturing, freezing, or processing milk, or any product of milk.

(b) Manufacturing, freezing, or processing imitation ice cream or imitation ice milk.

35012. An application for a milk products plant license shall be made on a form which is prescribed by the director. It shall state all of the following:

(a) The name and address of the applicant.

(b) The address of the milk products plant.

(c) Such other information as to the nature of the applicant's business as the director may require.

35013. Each application shall be accompanied by a fee in an amount which is established for the particular license by Section 35221 or 35222.

35014. Upon receipt of an application for a milk products plant license, the director shall investigate the equipment and the sanitary condition of the milk products plant for which the application for a license has been made.

35015. If the condition of the milk products plant is found to be satisfactory, a milk products plant license shall be issued by the director to the applicant.

35016. Any hotel, restaurant, boardinghouse, hospital, or other concern or agency which manufactures a product of milk for the use of any patron, guest, patient, or employee shall obtain a milk products plant license.

35017. This article does not apply to any of the following:

(a) Any private home that is manufacturing for its own use.

(b) Any retailer that is dealing in finished products which are received from a distributor or producer in final form.

(c) Any producer that is selling milk and cream exclusively at wholesale for manufacturing, freezing, or processing milk and milk products.

(d) Any producer whose business consists exclusively of producing and distributing raw market milk produced by such producer.

35018. Every milk products plant license expires at the end of each calendar year, but shall remain in force during the month of January of the next succeeding year or such part of the month as may be necessary for the renewal of such license by the director.

35019. Any license may be renewed each successive year, if the plant for which a previous license was issued and the business of such plant has been conducted in accordance with the requirements of this division during the year next preceding that for which the renewal is requested. The correct amount of the fee for the renewal of the license shall be forwarded with the application for renewal.

Article 4. Diabetic and Dietetic Frozen Milk Products Licenses

35041. A person shall not engage in the business of manufacturing any diabetic or dietetic frozen milk product or mix unless, in addition to a milk products license, such person has obtained and holds a diabetic or dietetic frozen milk products license from the director.

35042. Each application for a license to engage in the business of manufacturing any diabetic or dietetic frozen milk product or mix shall be accompanied by a statement which describes the method and manner by which the product is made.

Article 5. Modified Milk, Modified Sterilized Milk, and Modified Sterilized Cream Licenses

35071. A person shall not engage in the business of manufacturing, preparing, or processing modified sterilized milk, modified sterilized cream or modified milk unless, in addition to the milk products plant license, such person has obtained and holds a modified milk license, modified sterilized milk license, or a modified sterilized cream license, as the case may be, from the director.

Separate licenses are required for modified milk, modified sterilized milk, and modified sterilized cream.

35072. Upon receipt of application for a modified milk license, modified sterilized milk license, or modified sterilized cream license, the director shall investigate the equipment and sanitary conditions of the place where the modified milk, modified sterilized milk, or modified sterilized cream is to be manufactured or prepared, and provide the applicant with a copy of the laws of the state which pertain to such product. If the condition of the place is found to be satisfactory, and the special fee for the license which is prescribed by Section 35225 is paid by the applicant, the license shall be issued. A modified milk license, modified sterilized milk license, or modified sterilized cream license shall normally expire on the 31st day of December of each year.

Article 6. Imitation Milk Product Licenses

35101. It is unlawful for any person, unless he has a license to do so, to engage in the business of manufacturing, freezing, or processing; or to sell, deal in, or furnish as a keeper of any hotel, restaurant, boardinghouse, or other place where meals are served and payment is received for the meals, any of the following:

(a) Imitation milk.

(b) Oleomargarine, or margarine, colored oleomargarine or colored margarine, renovated butter, or a substitute for butter.

(c) Imitation cheese or substitute for cheese.

(d) Imitation ice cream or imitation ice milk.

(e) Imitation cream.

(f) Any other imitation milk product.

35102. A person shall first apply each year to the director for a license to engage in any business or occupation for which a license is required by Section 35101. Upon payment of the license fee which is prescribed in Section 35226, the director shall issue a license to engage in the business for which the license is issued. Separate licenses are required for each such business or occupation.

35103. Every license which is issued pursuant to Section 35102 expires on June 30th of each year, and may be issued in periods of one year.

Article 7. Butter Permits and Licenses

35131. A person shall not engage in the business of cutting and wrapping butter unless such person, in addition to the milk products plant license, has a butter cutting and wrapping permit.

35132. Every person that distributes butter which is received in packaged form direct from out-of-state points shall obtain a butter distributor's permit from the director for each plant or place of business.

35133. Every butter cutting and wrapping permit and butter distributor's permit expires at the end of each calendar year. A permit may be renewed each successive year, if the plant for which the previous permit was issued and the business has been conducted in accordance with the requirements of this division during the year next preceding that for which renewal is requested.

35134. Every person who is in charge of cutting, wrapping, packaging, or distributing butter, or any supervisor of any such person who is responsible for the grading of butter, shall obtain and hold a butter grader's license.

35135. Application for such license shall be made to the director who shall examine each applicant as to his qualifications and knowledge of butter grades and of the law applicable to him. The fee for a butter grader's license shall accompany the application.

35136. Every butter grader's license expires on the 31st day of December. It may be renewed by payment of the renewal fee for a butter grader's license.

35137. The licensing provisions of this article also apply to butter which is received in package form from out-of-state points.

Article 8. Licensing of Testers, Samplers and Weighers, Technicians, and Pasteurizers

35161. Every person who tests milk, cream, or any fluid derivative of milk or cream, which is purchased, received, or sold on the basis of milk fat which is contained in it, shall hold a tester's license

35162. Methods or processes of testing shall be approved by the director. A separate license is required for each of the methods or processes of testing.

35163. Every person, except a licensed tester, who takes any sample of milk, cream, or any fluid derivative of milk or cream, which is purchased, received, or sold on the basis of milk fat which is contained in it, on which sample tests are to be made as a basis of payment, and every person who weighs or measures milk, cream, or any fluid derivative of milk or cream, shall hold a sampler's and weigher's license if the weight or measure is to be used as the basis of payment.

35164. If one person does both sampling and weighing or measuring, only one license is required.

35165. In cases of emergency, a person may weigh, measure, or sample, for a period not exceeding one week, without a license.

35166. Any person who takes any sample of milk, cream, or any fluid derivative of milk or cream for testing shall hold the sample in an unchanged condition until it is delivered to a licensed tester.

35167. Every person who makes any bacteriological determination of milk or cream which is to be used as a basis of payment or determining value shall hold a technician's license.

35168. Every person who operates any equipment wherein milk or any product of milk is pasteurized shall hold a pasteurizer's license. The pasteurizer's licenses shall be known as general and limited licenses. The general license shall apply to pasteurization by all of the approved methods or processes of pasteurization, and the limited license shall apply only to the pasteurization by the process or method known as the holding or vat method.

35169. Every person who tests any milk or cream purchased, received, or sold on the basis of the nonfat milk solids contained in it shall hold a nonfat milk solids tester's license

35170. An application for a tester's, sampler's and weigher's, technician's, pasteurizer's, or nonfat milk solids tester's license shall be made to the director. The director shall examine each applicant for the license that is applied for as to the applicant's qualifications and knowledge of the law applicable to him. Each application shall be accompanied by the fee which is prescribed for the license by Section 35231.

35171. Every license which is issued pursuant to this article expires on the 31st day of each December. It may be renewed upon payment of fee which is prescribed by Section 35231 for the renewal of the license if the licensee has complied with all the requirements of the law and regulations applicable to him.

Article 9. Reports and Records

35191. Every person that manufactures, wholesales, or imports any oleomargarine or margarine, or any substance designed as a substitute for butter, or that resembles butter, which is not made wholly from pure milk or cream, or any imitation milk product, shall keep a record, which gives the quantity that is sold or purchased, the name and location of the seller and purchaser, the date, and the place to which it was shipped or delivered.

35192. Every person that is engaged in the warehouse, cold storage, or transportation business shall keep a correct record of all oleomargarine or margarine, renovated butter, substitute for butter, substitute for cheese, or other imitation milk product, which at any time may be in his possession, or which is transported or stored by him, which shows:

(a) In the case of a warehouse or cold storage company business, the owner, the quantity and kind of goods, the date when stored, and when removed.

(b) In the case of a boat, railroad, or other transportation business, the character of goods billed, the quantity, the name and address of consignor and consignee, and the date of transportation.

35193. All records which are required to be kept by Sections 35191 and 35192 shall, at all times during business hours, be open to the inspection of the director, any officer of any city or county board of health, and any peace officer of any city or county of the state. A failure to keep any of the records which are required to be kept or a failure to permit any authorized inspection of such records is a misdemeanor.

35194. Every manufacturer of any imitation milk product, except oleomargarine, shall submit to the director at the end of each month a report of the quantity which was sold or purchased, the names and addresses of the buyers, the dates and the places to which the product was shipped or delivered, and the names and specific locations of all persons that purchase or receive the imitation milk product for the purpose of selling it to the public in any form.

35195. Every manufacturer of oleomargarine shall submit to the director at the end of each month a report of the amount of oleomargarine which such person sold or distributed.

35196. Every person that holds a butter cutting and wrapping permit or a butter distributor's permit shall, on or before the fifth day of those months in which a fee is due pursuant to Section 35227 or 35228, file with the director a statement which shows the exact number of pounds of butter cut, wrapped, packaged, or distributed by such person during the preceding three months.

Article 10. Fees

35221. Every person, except a hospital or sanitarium, that is engaged in the business of dealing in, receiving, manufacturing, freezing, or processing ice cream, ice milk, sherbet, or any similar frozen product, or that is engaged in the business of manufacturing, freezing, or processing imitation ice cream, imitation ice milk, or any similar frozen product, shall pay the following fees:

(a) A license fee of thirty-five dollars ($35), for the calendar year for which such license is issued.

(b) A fee for the renewal of a license of thirty-five dollars ($35), plus three dollars ($3) for each additional 10,000 gallons or fraction of 10,000 gallons over and above 20,000 gallons which were manufactured during the preceding year, ending the 31st day of December.

35222. The fee for a license for any other product for which a license is required is ten dollars ($10) for the calendar year for which such license is issued. The fee for the renewal of any

such license is ten dollars ($10), plus one dollar ($1) for each 100,000 pounds, or part of 10,000, over and above the first 100,000 pounds of milk fat which was purchased or received during the preceding year, ending the 31st day of December.

35223. Every person, except a hospital or sanitarium, that is engaged in the business of manufacturing any diabetic or dietetic frozen milk product or mix, shall pay a license fee of twenty-five dollars ($25) for the calendar year for which a diabetic or dietetic frozen milk products license is issued. The fee for the renewal of such a license is twenty-five dollars ($25).

35224. The license fees which are required by Sections 35221, 35222, and 35223 shall be prorated on a quarterly basis for any licensee that commences operations after the first quarter in any calendar year whether or not such milk products plant was licensed during the preceding calendar year.

35225. The special fee for a modified milk license, modified sterilized milk license, or modified sterilized cream license is one hundred dollars ($100).

35226. The fees for issuing the licenses required by Section 35101, for each establishment annually, are as follows:

(a) Any manufacturer or processor within this state, one hundred dollars ($100).

(b) The keeper of any hotel, restaurant, boardinghouse, or other place where meals are served and payment is received for the meals, two dollars ($2).

35227. Every permittee that is engaging in the business of cutting and wrapping butter shall pay a fee of one dollar ($1), plus twenty cents ($0.20) for each 1,000 pounds, or part of 1,000 pounds, over and above the first 5,000 pounds of butter which such person cut and wrapped during each of the three-month periods ending February 28th, May 31st, August 31st, and November 30th. Such fees shall be paid to the director during the first week of March, June, September, and December, respectively.

35228. Every person that has a permit to engage in the business of distributing butter shall pay a fee of one dollar ($1), plus twenty cents ($0.20) for each 1,000 pounds, or part of 1,000 pounds, over and above the first 5,000 pounds of butter which such person distributed during each of the three-month periods ending February 28th, May 31st, August 31st, and November 30th. Such fees shall be paid to the director during the first week of March, June, September, and December, respectively.

35229. The fees which are required by Sections 35227 and 35228 do not apply to United States government owned butter which is cut and wrapped in this state or to butter which is cut and wrapped in this state for export to points outside the continental United States.

35230. The fee for a butter grader's license or the renewal of a butter grader's license is one dollar ($1).

35231. The fees for tester's, sampler's and weigher's, technician's, and pasteurizer's licenses are as follows:

(a) For a tester's license, five dollars ($5).

(b) For a sampler's and weigher's license, one dollar ($1).

(c) For a technician's license, five dollars ($5).

(d) For a pasteurizer's license, one dollar ($1).

(e) For a nonfat milk solids tester's license, five dollars ($5).

(f) For the renewal of any such license, one dollar ($1).

Article 11. Disposition of Funds

35251. The director, at least once each month, shall report to the State Controller the total amount of any money which is collected under Section 35221. He shall, at the same time, pay into the State Treasury the entire amount of such receipts which shall be credited to the Department of Agriculture Fund and expended as provided in Section 32704.

35252 The director shall, at least once each month, report to the State Controller the total amount of any money which is collected for fees under Sections 35227 and 35228. He shall, at the same time, pay into the State Treasury the entire amount of such receipts which shall be credited to the Department of Agriculture Fund and expended in carrying out the provisions of this division relating to butter.

Chapter 13. Penalties

Article 1. Criminal Penalties

35281. Any violation of any provision of this division, or the regulations for its enforcement, is a misdemeanor. Unless a different penalty is specifically prescribed, it is punishable by a fine of not less than twenty-five dollars ($25) nor more than five hundred dollars ($500), or by imprisonment in the county jail not less than 10 days nor more than 90 days, or by both.

35282. Offering physical resistance or bodily attack on authorized representatives of the department or of an approved milk inspection service, who are engaged in the proper conduct of their official duties, is a misdemeanor, punishable by imprisonment in the county jail for not less than 10 days, without the alternative of a fine in any case.

Article 2. Civil Penalties

35311. Except as otherwise provided in this section, a penalty of 25 percent or five dollars ($5), whichever is greater, shall be added to any portion of the fee for renewal of any license which is required by this division which is not paid by the last day of the month following that in which the preexisting license expired.

A penalty shall not accrue if the licensee operates only seasonally and he has not engaged in the activities for which the license is required between the time his preexisting license expired and the date of the renewal of his license.

35312. To the amount of any fee, except a license fee, which is required by this division, that is not paid by the last day of the month following that in which due, there shall be added a penalty of 25 percent of the unpaid amount of such fee, or five dollars ($5), whichever is greater, for each month or fraction of a month until the entire fee and penalty are paid.

PART 2. MILK AND CREAM

CHAPTER 1. GENERAL PROVISIONS

Article 1. Milk

35601. Milk shall be produced from nonreacting tuberculin-tested cows or goats and shall conform to the regulations adopted by the director.

35602. Milk shall be obtained by the complete milking of healthy cows or goats which are properly fed and kept. Milk shall not be obtained or used for human consumption within 15 days prior to or 5 days after parturition.

35603. Milk which has been produced or handled in an insanitary dairy farm or milk products plant or other insanitary place or which has been handled in an insanitary manner is unfit for human consumption.

Article 2. Cream

35631. Cream shall be fresh and clean. It shall contain not less than 20 percent of milk fat.

CHAPTER 2. MARKET MILK AND CREAM

Article 1. General Provisions

35751. This division does not prohibit the addition of vitamins to market milk or the sale of market milk to which any vitamins have been added if such milk is labeled to show the addition of the vitamins and the amounts of vitamins which have been added.

A statement of the method and manner of adding vitamins shall be filed with and approved by the director, and, when offered for sale, such vitamin milk shall not be of a standard which is below the legal requirements of market milk.

35752 This division does not prohibit the freezing and holding in cold storage of market cream or concentrated market cream, its subsequent standardization with market milk or skim milk produced from market milk, and its sale as market cream if the standardized product otherwise conforms to

all the standards and requirements in this division for market cream. Payment procedure for market cream so frozen or stored shall be pursuant to Article 22 (commencing with Section 62441), Chapter 2, Part 3, Division 21 of this code.

35753 This division does not prohibit the freezing and holding in cold storage of market goat milk and its subsequent sale as market milk if at the time of sale it meets all the standards and requirements which are specified in this division for market milk.

35754. This division does not prohibit the sterilization of market goat milk by subjecting it to a temperature which is high enough to sterilize it, holding it in storage, and subsequently selling it as market milk if at the time of sale the market goat milk meets all standards and requirements which are specified in this division for market milk.

35755. It is unlawful for any person to sell any market milk other than graded milk as provided in this division in any city or county or any combination of cities and counties in which a milk inspection service has been established, either by or with the approval of the director.

35756. This division, and the regulations of the director are not a limitation on the power of a municipality or county, by ordinance or regulation, to establish compulsory pasteurization of market milk or reasonable higher standards for milk fat and solids-not-fat than those which are established in this division, but such standards shall apply only to market milk after standardization by a milk distributor.

Article 2. Market Milk Standards and Grades

35781. Except as otherwise provided in this article, market milk shall not contain:

(a) More than 15,000 bacteria per milliliter if raw.

(b) More than 75,000 bacteria per milliliter before pasteurization.

(c) More than 15,000 bacteria per milliliter at time of delivery to the consumer, if pasteurized.

35782. Market milk shall be cooled to 50 degrees Fahrenheit or below, whether it is raw or pasteurized, and, except as otherwise provided in Section 35783, shall be so maintained until it is delivered to the consumer.

35783. Market milk for pasteurization shall be cooled to 50 degrees Fahrenheit or below and shall be maintained in transit at not to exceed 52 degrees Fahrenheit.

35784. Market milk, at the time of delivery to the consumer, shall contain not less than 3.5 percent of milk fat and not less than 8.5 percent solids not fat. Market milk may be standardized to a milk fat content of not less than 3.5 percent.

35785. Market milk which is produced for sale under the supervision of an approved milk inspection service, or a milk inspection service which is established and conducted by the

director, shall be in conformity with the provisions for the respective grades as defined in this chapter.

35786. Market goat milk may be standardized to a milk fat content of not less than 3 3 percent. Market goat milk at the time of delivery to the consumer shall contain not less than 8.15 percent of solids not fat.

35787. Where a milk inspection service has been approved or established pursuant to this code, market milk shall be graded and designated into one of the following classes:

(a) "Certified milk."

(b) "Guaranteed milk."

(c) "Grade A milk."

35788. It is unlawful for any person to sell any milk as, or under the representation of, guaranteed or grade A milk, except under the supervision of a milk inspection service which is approved by the director or which is established and conducted by the director.

Article 3. Market Cream Standards

35811. Market cream shall conform to all of the standards which are set for market milk of the same grade except those which relate to milk fat and solids not fat, and except that the maximum bacterial count for market cream shall be not more than twice as great as that for the corresponding grade of market milk.

Article 4. Pasteurized and Raw Market Milk

35831. Pasteurized market milk shall be cooled to a temperature of 50 degrees Fahrenheit or below immediately after pasteurization and shall be so maintained until it is delivered to the consumer.

35832. Repasteurized milk shall not be sold as market milk.

35833. Pasteurized market milk shall be bottled or canned only in the plant where it is pasteurized.

This section does not apply to market cream.

35834. Raw market milk and pasteurized market milk shall not be bottled in the same milk products plant for sale and distribution within a city or county which maintains an approved milk inspection service, except where an official representative of such approved milk inspection service is present during the period of handling, processing, or bottling such market milk, or except in those milk products plants where all market milk which is received meets the requirements for grade A raw milk.

This section does not apply to market cream

Article 5. Guaranteed Market Milk

35861. Guaranteed raw milk is market milk which conforms to all of the following minimum requirements:

(a) The health of the cows and goats shall be determined at least once each month by an official representative of an approved milk inspection service, or a milk inspection service which is established by the director.

(b) It shall be produced on dairy farms which score not less than 90 percent on the dairy farm scorecard.

(c) It shall be bottled on the premises where produced and delivered in containers which have the pouring lip completely protected from contamination.

(d) It shall be cooled immediately after being drawn from the cow or goat to 50 degrees Fahrenheit or less, and so maintained until it is delivered to the consumer, at which time it shall contain not more than 10,000 bacteria per milliliter.

(e) It shall be sold to the consumer within 30 hours after production and labeled to indicate the date of sale to the consumer.

35862. All persons who come in contact with guaranteed raw milk shall exercise scrupulous cleanliness and shall not be afflicted with any communicable disease or in a condition to disseminate the germs of any communicable disease which is liable to be conveyed by milk The absence of such germs in all such persons shall be determined by bacteriological and physical examination by a health department which maintains an approved milk inspection service, or other person or laboratory which is approved in writing by the department, conducted at the time of employment and every six months thereafter in a manner which is approved by the director.

35863. Guaranteed pasteurized milk shall conform to all the requirements for guaranteed raw milk, except that it shall contain not more than 3,000 bacteria per milliliter at the time of delivery to the consumer.

Article 6. Grade A Market Milk

35891. Grade A raw milk is market milk which conforms to all the following minimum requirements:

(a) The health of the cows and goats shall be determined at least once in two months by an official representative of an approved milk inspection service, or a milk inspection service which is established by the director.

(b) It shall be produced on dairy farms that score not less than 80 percent on the dairy farm scorecard.

(c) It shall be cooled immediately after being drawn from the cow or goat to 50 degrees Fahrenheit or less, and so maintained until delivered to the consumer, at which time it shall contain not more than 15,000 bacteria per milliliter.

35892. All persons who come in contact with grade A raw milk shall exercise scrupulous cleanliness and shall not be afflicted with any communicable disease or be in a condition to disseminate the germs of any communicable disease which is liable to be conveyed by milk. The absence of such germs in all such persons may at the discretion of an approved or estab-

lished milk inspection service be determined by bacteriological and physical examination in such manner as may be prescribed by the director and by such person or laboratory which is approved in writing by the department, conducted at the time of employment and every six months thereafter in a manner which is approved by the director.

35893. Milk for grade A pasteurized milk is market milk which conforms to all the following minimum requirements:

(a) The health of the cows or goats shall be determined at least once in six months by an official representative of an approved milk inspection service, or a milk inspection service which is established by the director.

(b) The milk shall be cooled immediately after being drawn from the cow or goat to 50 degrees Fahrenheit or less and maintained in transit at not to exceed 52 degrees Fahrenheit.

(c) It shall be produced on dairy farms that score not less than 70 percent on the dairy farm scorecard which is adopted by the department.

(d) It shall contain not more than 75,000 bacteria per milliliter before pasteurization.

Article 7. Certified Milk

35921. Certified milk is market milk which conforms to the rules, regulations, methods, and standards for the production and distribution of certified milk adopted by the American Association of Medical Milk Commissions.

35922. Certified milk shall bear the certification of a milk commission which is appointed by a county medical association, organized under and approved by the Medical Society of the State of California. The commission shall make fair and uniform rules which pertain to certified milk, and shall certify milk for any applicant that complies with such rules and the standards which are prescribed in this code.

Article 8. Homogenized Market Milk and Cream

35941. Homogenized market milk is market milk which has been subjected to a process or treatment in such manner as to insure the breakup of the fat globules to such an extent that no visible cream separation will occur on the milk after 48 hours storage at a temperature of between 40 and 50 degrees Fahrenheit and the fat percentage of the top 100 cc. of milk in a quart bottle, or proportionate volumes in containers of other sizes, does not differ by more than 10 percent of itself from the milk fat percentage of the remaining milk as determined after thorough mixing. In removing the top 100 cc. of milk, it shall be siphoned off Homogenized market milk shall otherwise conform to all requirements for market milk.

35942. Homogenized market milk shall be bottled in the plant where it is pasteurized.

35943. Homogenized market cream is market cream which has been subjected to a process or treatment in such manner as to insure breakage of the fat globules to such an extent that no visible cream separation will occur after 48 hours. Homogenized market cream shall otherwise conform with all other requirements for market cream.

35944. Homogenized market milk or homogenized market cream shall not be mixed with market milk or market cream which has not been homogenized.

35945. Homogenized milk and homogenized cream shall be so labeled.

Article 9. Half-and-Half

35971. Half-and-half is a market milk product. It shall contain not less than 11.7 percent of milk fat and it shall contain not more than 25,000 bacteria per milliliter at the time of delivery to the consumer.

35972. Half-and-half shall be homogenized and shall otherwise meet all standards and requirements which are specified in this division for market milk, except that it may contain less than 8.35 percent milk solids-not-fat.

Article 10. Labeling and Advertising

36001. The following information shall at all times appear plainly and in a conspicuous place on, or be securely attached to, every cap, bottle, can, or other container of all market milk which is sold:

(a) The class or grade of the market milk, unless the market milk is being sold in bulk to a distributor.

(b) The word "raw," if the market milk has not been pasteurized.

(c) The word "pasteurized" if the market milk has been pasteurized.

(d) The name and address of the distributor or original bottler.

If the name and address of the distributor is used, the milk products plant license number of the original bottler, as assigned annually by the director, may be used in lieu of the name and address of the original bottler.

36002. All labels which are required by Section 36001 shall be in capital letters of a size and boldness as to be legible by the purchaser or consumer. If the available space on any cap, bottle, or container for such labeling is not sufficient for the full name of the distributor, then a sufficient portion of the distributor's name which clearly identifies such distributor may be used in lieu of the entire distributor's name.

36003. In the labeling, advertising, and sale of market cream only the following designations may be used:

(a) Whipping cream which shall have a milk fat content of not less than 35 percent.

(b) Pastry cream or all purpose cream which shall have a milk fat content of not less than 30 percent.

(c) Table cream which shall have a milk fat content of not less than 20 percent.

Article 11. Bottle Caps and Labels

36031. It is unlawful for any person that sells or handles market milk, except the original bottler of the market milk, to have in his possession, or under his control, any milk bottle cap or label, except the caps or labels that are affixed to the filled containers at the time of delivery to the seller or handler.

36032. It is unlawful for any person that sells or handles market milk to remove any cap or label from any milk container and attach such cap or label to another milk container.

36033. It is unlawful for any person to sell or use any milk bottle caps which are not packed by the manufacturer in single column in unopened, dustproof tubular packages.

Article 12. Misrepresentation

36061. No false, misleading, or deceptive name, picture, symbol, mark, word, or other representation shall appear on any milk bottle, bottle cap, can, or other container, nor on any advertisement for market milk.

36062. A label or advertisement of market milk is false, misleading, or deceptive if in any particular it is untrue, or by ambiguity or inference creates a misleading or deceptive impression regarding the production, handling, processing, quality, composition, merits, or value of such market milk.

36063. It is unlawful for any person to sell, purchase, use, or represent as market milk or market cream any milk or cream which does not meet the requirements and standards of market milk or market cream.

36064. Except as otherwise provided in this division, it is unlawful for any person to sell, purchase, use, or represent as market milk or market cream any milk or cream which is combined with any other substance or compound.

36065. It is unlawful for any person to serve to any customer for consumption on the premises milk or cream which is combined with any other substance or compound and represented as a substitute for or to take the place of market milk or market cream.

Article 13. Degrading and Exclusion Based Upon Dairy Score

36091. Milk which is delivered by the producer of the milk, to be sold as any grade of market milk, shall not be degraded or excluded from the market if a score of the dairy farm on which the milk is produced is below the specified minimum legal requirements unless both:

(a) A copy of the score is promptly given to the proprietor or operator of the dairy farm and, if milk is sold in bulk to a distributor or processor, a copy of the notice is also given or mailed to the distributor or processor.

(b) A rescore, after 10 days, shows the score of the dairy farm to be still or again below the specified minimum legal requirements and a copy of the rescore is promptly given to the proprietor or operator of the dairy farm and the purchaser of the milk produced by the dairy farm and until 60 hours has elapsed after the rescore.

36092. If, during the 60 hours following the rescoring of a dairy farm, a protest is filed with the head of the milk inspection service under whose jurisdiction the milk of the dairy farm is sold, the milk which is produced on such dairy farm shall not be degraded or excluded from the market until after a third score has been made and concurred in by the representative of the milk inspection service and the director.

Article 14. Degrading or Exclusion Based Upon Excess Bacteria

36121. No milk or cream which is delivered by the producer of the milk or cream in bulk to a distributor and no milk or cream which is sold by a distributor as any grade of market milk, shall be degraded or excluded from the market as market milk if such milk or cream is found to contain bacteria in excess of the legal requirements for the milk or cream unless both:

(a) The producer or distributor, as the case may be, is immediately notified in writing of such excessive count by the approved or established milk inspection service which has jurisdiction of the producer or distributor.

(b) At least three recounts are made by such approved or established milk inspection service within a period of three weeks in addition to the count which is made on milk or cream for routine examination

36122. Samples for the purpose of making recounts pursuant to Section 36121 shall be taken, in the case of a producer that sells milk in bulk, at the producer's dairy farm or at the milk products plant to which the milk is sold. In the case of a distributor, samples shall be taken at his milk products plant or from delivery vehicles which are owned and operated by the distributor.

36123. The first sample for a recount shall not be taken until 72 hours have elapsed after the mailing of the notice which is specified in subdivision (a) of Section 36121.

36124. If the last recount is high and the average of the recounts which were obtained during the three weeks period based on the logarithmic average exceeds that which is established by this division for that particular grade of market milk, such milk or cream shall be degraded or excluded from the market as market milk.

Article 15. Reestablishment

36151. If milk or cream has been degraded or excluded from the market as provided in Article 14 (commencing with Section 36121) of this chapter, such milk or cream shall not be reestablished at its previous grade until a legal count has been obtained which indicates that the product is again in conformity with legal standards.

36152. The samples for the first count which is taken for the purpose of reestablishing milk or cream which has been degraded or excluded from the market shall be taken within three days of such degrading or exclusion. Additional samples for counts if necessary shall be taken at the rate of two per week for the following two weeks.

Chapter 3. Manufacturing Milk and Cream

Article 1. General Provisions

36301. Manufacturing milk or manufacturing cream shall be sold only for manufacturing purposes and to be converted into some other form or product.

36302. Manufacturing milk or manufacturing cream shall not be sold for human consumption in a fluid state.

36303. Manufacturing milk or manufacturing cream shall not be sold in quantities of less than three gallons nor in containers of less than three gallons capacity.

36304. The provisions of Sections 36301, 36302, and 36303 do not apply to milk or cream which is sold by a producer to a milk products plant or to milk or cream which is sold after pasteurization, by a milk products plant to producers from whom such plant purchases milk or cream.

36305. Manufacturing cream, when pasteurized, may be sold by a milk products plant to persons from whom the milk products plant purchases cream, and the cream, so sold, shall not be considered market cream. The manufacturing cream shall not be resold by the purchasers.

36306. Manufacturing milk or manufacturing cream may be repasteurized once.

Article 2. Manufacturing Milk Standards

36331. Manufacturing milk shall comply with all of the following requirements:

(a) It shall be free from foreign substances.

(b) It shall not contain any undesirable flavors or odors.

(c) It shall not contain more than 2,000,000 individual bacteria per milliliter as found by direct microscopic count.

Article 3. Manufacturing Cream Grades and Standards

36351. Manufacturing cream is classified as follows:

(a) First grade.

(b) Second grade.

(c) Third grade.

36352. First grade manufacturing cream is cream which is clean, smooth, free from undesirable flavors or odors, sweet or acid not more than three-tenths of 1 percent acid (figured as lactic acid), and which contains at least 30 percent of milk fat.

36353. Second grade manufacturing cream is cream which has begun to ferment, has developed slightly undesirable flavors or odors, or which contains more than three-tenths and not more than six-tenths of 1 percent acid (figured as lactic acid).

36354. Third grade manufacturing cream is cream which may be slightly foamy or curdy, has a distinct off-flavor, is old, or contains more than six-tenths of 1 percent acid (figured as lactic acid).

36355. Manufacturing cream which does not conform to the minimum requirements for third grade cream is not fit for human consumption.

PART 3. MANUFACTURED PRODUCTS

CHAPTER 1. GENERALLY

Article 1. Quality Standards

36601. The director, after public hearing, shall adopt by regulation such quality standards as are necessary for any product which is defined in this division. These quality standards which are adopted by the director shall be no lower than those which are in effect under regulations of the United States Department of Agriculture, but may be higher if found by the director to effectuate the purposes of this part, and of this section, which are, among others, to provide dairy products to the consumers of this state of the highest possible quality.

36602. The director, in determining the quality of any product which is sold, but not produced and processed in this state, shall ascertain that such product will meet the minimum quality requirements which are applicable to such product by the standards which are contained in, or established by, regulations which are adopted pursuant to this division.

36603. Any standard which is established pursuant to this article shall expire on the 91st day after the final adjournment of the general session of the Legislature which next convenes after the adoption of the standard.

36604. No product for which standards are required to be established pursuant to Section 36601 is required to meet any quality standards which are in excess of those that are in effect under regulations of the United States Department of Agriculture, unless a like product is processed in this state

and the processors of such like product in this state are also required to meet such higher standards.

36605. Except as otherwise provided in Section 36604 and notwithstanding any other provisions of this part, no dairy products, as such products are defined in this division, shall be sold within this state unless they are of a quality which is comparable to that of the same product which is manufactured or processed pursuant to this division.

Article 2. New Milk Products

36631. Upon the request of any interested person, the director may, by regulation, establish a temporary definition and standard for a new milk product pursuant to this article if all of the following conditions exist:

(a) Research in the uses of milk and the products or by-products of milk has developed a new milk product for which no definition or standard is prescribed.

(b) The new product cannot be produced or marketed because no definition or standard is prescribed for it.

(c) It appears to the satisfaction of the director that the public interest would be served by permitting the new product to be produced and marketed.

(d) The request to establish the temporary definition and standard is presented to the director after final adjournment of a regular session, and prior to the convening of the next ensuing regular session, of the Legislature.

(e) Proposed legislation which embodied a permanent definition and standard for such new milk product has not failed of enactment into law at the immediately preceding session of the Legislature.

36632. The director shall hold a hearing on the establishment of the temporary definition and standard. He shall give notice of the hearing to such persons as he considers may be affected by the establishment of the temporary definition and standard.

36633. If, at the hearing, it appears that all of the prerequisite conditions exist for the establishment of a temporary definition and standard for a new milk product and that the public interest would be served by the establishment of a temporary definition or standard for the product, the director may establish a temporary definition and standard for the new milk product.

36634. Any temporary definition or standard shall be as such as will insure the quality and wholesomeness of the product.

36635. In establishing a temporary definition or standard, the director shall take into consideration existing definitions and standards which are established for comparable products.

36636 Every manufacturer of any product for which a temporary definition and standard is established shall obtain

a special permit for the production of the product from the director Such a manufacturer shall be subject to all the provisions of this division which are applicable to milk products plants and milk products.

36637. Every definition, standard, and permit which is established or issued pursuant to this article expires on the 91st day after the final adjournment of the next regular session of the Legislature.

Article 3. Combination Milk and Food Products

36661. In addition to the standards for milk and milk products which are adopted pursuant to this division, the director may, after hearing, adopt separate standards and labeling requirements for any milk or milk product to which is added a food product of a kind which is not derived from milk and for which combination of such food product with milk or milk products no standard has been established or otherwise provided for in this division.

36662. Every definition, standard, and labeling requirement which is adopted pursuant to this article expires on the 91st day after the final adjournment of the next general session of the Legislature.

Chapter 2. Frozen Dairy Products

Article 1. General Provisions

36801. Pasteurized cream which is sold or used for ice cream, ice milk, or sherbet manufacture shall be clean, sweet, and free from undesirable flavors and odors. It shall contain not more than 75,000 bacteria per milliliter, official plate count.

36802. Milk and any milk product which is used in the manufacture of ice cream, ice milk, or sherbet shall be pasteurized.

36803. Sweet butter which is used in ice cream and ice milk shall be unsalted butter made from sweet cream which is free from undesirable flavor or odors. It shall have a rating of not less than 92 in accordance with the standards for quality of creamery butter which are established in Article 2 (commencing with Section 37131) of Chapter 3 of this part. Cream to which has been added ripener or starter, or cream which has been neutralized, is not sweet cream within the meaning of this section.

36804. Every product which is defined in this chapter shall be advertised and labeled in accordance with regulations which are adopted by the director.

36805. Ice cream or ice milk which is sold in package form shall be labeled with the name and address of the manufacturer, the wholesale distributor, or the retailer. The following words shall appear above the name:

(a) The words "manufactured by" if the name of the manufacturer is given.

(b) The words "distributed by" if the name of the wholesale distributor is given.

(c) The words "put up for" or "put up by," as the case may be, if the name of the retailer is given.

36806. Ice cream mix and ice milk mix are unfrozen products which are used in the manufacture of ice cream or ice milk. They shall comply with all the requirements for ice cream or ice milk, respectively.

Article 2. Ice Cream

36861. Ice cream is a frozen product. It shall be made with pure, sweet milk, cream, skim milk, evaporated or condensed milk, evaporated or condensed skim milk, dry milk, nonfat dry milk solids, dried buttermilk, extra grade edible dried whey, milk fat, or wholesome sweet butter which is made from sweet cream, or any combination of any such products. It may contain sweetening which is approved by the director, clean wholesome eggs or egg products, and harmless flavoring and coloring which is approved by the director.

36862. Ice cream, except chocolate, fruit, nut, or candy ice cream, shall comply with all of the following requirements:

(a) Contain not less than 10 percent milk fat.

(b) Contain not less than 20 percent total milk solids.

(c) Contain not less than 6 percent milk solids not fat.

36863. Ice cream at the time of sale by the manufacturer or retailer shall contain not more than 75,000 bacteria per gram.

36864. Ice cream shall contain not more than 0.5 percent stabilizer nor more than 0.2 percent emulsifier approved by the director.

36865. Ice cream shall weigh not less than 4.5 pounds per gallon and contain not less than 1.6 pounds of food solids per gallon.

Article 3. Standards for Special Varieties of Ice Cream

36891. French ice cream, custard ice cream, and all similar frozen products are varieties of ice cream. Such products shall contain not less than 10 percent of milk fat, and, for each 90 pounds of ice cream mix, shall contain any one of the following:

(a) Not less than five dozen of clean, wholesome egg yolks.

(b) One and five-tenths pounds of wholesome dry egg yolk which contain not to exceed 7 percent of moisture.

(c) Three pounds of wholesome, frozen egg yolk which contain not to exceed 55 percent of moisture.

(d) The equivalent of egg yolk in other form.

French ice cream, custard ice cream, and similar products shall otherwise conform to the regulations of the director.

36892. Fruit ice cream is ice cream which contains not less than 3 percent by weight of clean, mature, sound fruit, or its equivalent in other forms.

The milk fat and total milk solids content of fruit ice cream may be reduced by the addition of sweetened or unsweetened fruit which is approved by the director but in no case shall the milk fat be less than 8 percent or the total milk solids be less than 16 percent.

36893. Nut or candy ice cream is ice cream which contains not less than 1 percent by weight of sound and nonrancid nut meats or candy.

The milk fat and total milk solids content of nut or candy ice cream may be reduced by the addition of nuts or candy but in no case shall the milk fat be less than 8 percent or the total milk solids be less than 16 percent. As used in this section, "candy" includes candies, cakes, cookies, glacéed fruits, prepared cereals, and similar products.

36894. "Chocolate ice cream" is ice cream which is flavored with chocolate or cocoa. It shall contain not less than 8 percent of milk fat and not less than 16 percent of total milk solids.

36895. The chocolate or cocoa which is used to flavor chocolate ice cream may be sweetened and may be added as such or as a suspension in syrup

36896. Diabetic and dietetic ice cream is a frozen milk product which purports to be, or is represented, for special dietary use by man as the means of regulating intake of protein, fat, carbohydrate, or calories for dietary management in the control of disease. It shall not contain any added sugar, but shall otherwise conform to all applicable provisions of this division which relate to ice cream. It shall be advertised, labeled, and sold pursuant to regulations which are adopted by the director.

Article 4. Ice Milk

36921. Ice milk is a frozen product. It shall be made with pure, sweet milk, cream, skim milk, evaporated or condensed milk, evaporated or condensed skim milk, dry milk, nonfat dry milk solids, dried buttermilk, extra grade edible dried whey, milk fat or wholesome sweet butter made from sweet cream, or any combination of any such products It may contain sweetening which is approved by the director, clean wholesome eggs or egg products, and harmless flavoring and coloring which is approved by the director.

36922. Ice milk shall contain not less than 2 percent, nor more than 7 percent, milk fat and not less than 11 percent total milk solids.

36923. Ice milk shall contain not more than 0.5 percent stabilizer and not more than 0.2 percent emulsifier approved by the director.

36924. Ice milk shall weigh not less than 4.5 pounds per gallon and shall contain not less than 1.3 pounds food solids per gallon.

36925. Ice milk, at the time of sale by the manufacturer or retailer, shall contain not more than 75,000 bacteria per gram.

36926. Diabetic and dietetic ice milk is a frozen milk product which purports to be, or is represented, for special dietary use by man as the means of regulating intake of protein, fat, carbohydrate, or calories for dietary management in the control of disease. It shall not contain any added sugar, but shall otherwise conform to all applicable provisions of this division which relate to ice milk. It shall be advertised, labeled, and sold pursuant to regulations which are adopted by the director.

36927. Every container of ice milk shall be conspicuously so labeled.

36928. Every place where ice milk is sold at retail shall display a conspicuous, legible sign which contains the words "Ice milk sold here," in plain, block letters, which are not less than six inches high. The sign display requirements of this section do not apply to any place where ice milk is sold in properly labeled consumer packages or containers for off-premise consumption.

36929. Every manufacturer of ice milk shall, upon request of the department, submit the names and specific location of every dealer or other person that receives ice milk for the purpose of selling or otherwise dispensing it to the public.

Article 5. Sherbet

36951. Sherbet is a frozen product which contains milk or products of milk. It may contain sweetening, harmless flavoring, and coloring which are approved by the director.

36952. Sherbet shall contain not less than 1 percent, nor more than 2 percent, milk fat and not more than 5 percent total milk solids. It shall contain not more than five-tenths of 1 percent harmless stabilizer or more than two-tenths of 1 percent emulsifier which is approved by the director.

36953. Sherbet shall have an acidity of not less than the amount which is specified in the regulations adopted by the director.

36954. Sherbet, except citrus or berry sherbet, shall contain not less than 10 percent by weight of clean, mature, sound fruit or the juice of such fruit, or its equivalent in other form. Citrus sherbets may contain not less than 2 percent fruit, and berry sherbets may contain not less than 6 percent fruit or its equivalent in other forms.

36955. Sherbet at the time of sale by the manufacturer or retailer shall not contain more than 75,000 bacteria per gram.

36956. Sherbet shall weigh not less than six pounds per gallon.

36957. Yogurt sherbet is a product which meets all the requirements and standards prescribed for sherbet, except as follows:

(a) It shall have an acidity of not less than six-tenths of 1 percent calculated as lactic acid.

(b) Bacteria standards which are specified for sherbet do not apply to yogurt sherbet.

(c) It shall have a yogurt content of not less than 40 percent.

Article 6. Quiescently Frozen Confections

36981. Quiescently frozen confections means a clean and wholesome frozen, sweetened, flavored product in the manufacture of which freezing, which is not accompanied with stirring or agitation (generally known as quiescent freezing), has been used. This confection may be acidulated with harmless organic acid, may contain milk solids, may be made with or without added harmless pure or imitation flavoring, and with or without added harmless coloring approved by the director. The finished product may contain not more than one-half of 1 percent by weight of stabilizer composed of wholesome edible material. The finished product shall contain not less than 17 percent by weight of total food solids.

36982. Quiescently frozen confections may be sold under trade names which are not misleading or deceptive.

36983 A quiescently frozen confection shall be manufactured in the form of servings, individually packaged, bagged, or otherwise wrapped, properly labeled, and purveyed to the consumer in their original factory-filled package.

36984. In the production of a quiescently frozen confection, no processing or mixing prior to the quiescent freezing shall be used that develops in the finished confection mix any physical expansion in excess of 10 percent.

Chapter 3. Butter

Article 1. General Provisions

37101. As used in this chapter:

(a) "Package" includes cartons, wrappers, or other containers which are used for the sale of butter to the retail trade.

(b) When "numerals" appear following words which relate to scoring, the numerals represent the score of the butter, 100 being a perfect score.

37102. All scoring of butter shall be in the manner which is specified in the regulations which are adopted by the director.

37103. Quality designations shall be affixed on the package in a manner and fashion which is prescribed in the regulations which are adopted by the director.

Article 2. Butter Grades

37131. All butter which is sold or distributed in package form, including such butter which is received from out-of-state points, shall be classified into grades which indicate its quality and shall be labeled and advertised by the use of one of the following designations:

(a) First quality.

(b) Second quality.

37132. First quality butter is butter which scores not less than 92. The minimum requirements for first quality butter are as follows:

(a) It shall be fresh, sweet and clean in flavor if of fresh make, or sweet and clean if storage.

(b) The body shall be firm.

(c) The color shall be either light or medium and shall be uniform, except that it may show small curd specks or slight waviness.

(d) The salt shall be either light or medium, and free from grittiness.

(e) The package shall be clean, uniform, and sound.

(f) The defects in body, color, salt, and package shall not total over one point.

37133. Second quality butter is butter which scores below 92, but not less than 90. The minimum requirements for second quality butter are as follows:

(a) It shall be fresh and fairly sweet and fairly clean in flavor if of fresh make or fairly sweet and fairly clean if storage.

(b) It may also be flat or lacking in flavor.

(c) The body shall be fairly firm, but may show slight defects in grain and texture.

(d) The color may be either light or medium and shall be fairly uniform, but may be wavy.

(e) The salt may be either light, medium or high, and shall be fairly uniform, but may be slightly gritty.

(f) The package shall be clean, uniform, and sound.

37134. Butter which scores less than 90 shall not be sold or served to consumers. Such butter when sold shall be in bulk packages which contain not less than 30 pounds, and are labeled "for cooking and baking purposes only."

Article 3. Butter Standards

37161. Butter is the product made by gathering the fat of fresh or ripened milk or cream into a mass, which also contains a small portion of other milk constituents.

37162. Butter shall be clean and nonrancid and shall contain not less than 80 percent of milk fat.

37163. Butter may contain salt or a harmless coloring matter.

Article 4. Retail Packages

37191. Butter which is sold to the retail trade shall be labeled with the name and address of the manufacturer, the wholesale distributor, or the retailer. The following words shall appear above the name:

(a) The words "manufactured by" if the name of the manfacturer is given.

(b) The words "distributed by," if the name of the wholesale distributor is given.

(c) The words "put up for" or "put up by," as the case may be, if the name of the retailer is given.

Article 5. Bulk Packages

37221. Butter which is received in this state by brokers, jobbers, and other persons that receive butter in cubes, tubs, firkins, or other bulk packages shall be labeled with all of the following:

(a) The name and address of the manufacturer.

(b) The date on which the butter was manufactured.

(c) The original lot or churn number.

37222. The markings shall remain on the packages until the butter which is contained in the packages is cut and wrapped for the retail trade.

37223. The name of any city, county, or other geographical designation, or any word which may be pronounced the same as any city, county, or other geographical designation, except the address of the manufacturer, wholesale distributor, or retailer, whose name is printed on any package or wrapper, shall not appear upon any package or wrapper.

37224. This article does not prohibit the use of a trademark or brand which has a geographical name if it was copyrighted or registered in the office of the Secretary of State of this state prior to January 1, 1923.

Article 6. Imported Butter

37261. Every person that sells, consigns, ships, or presents to any other person any butter that has been shipped or imported into this state from any place outside of the United States shall, before he does so, do all of the following:

(a) Cause to be stamped, marked, or printed upon the wrapper, or other container in blackface letters which are not less than one-eighth of an inch in height the word "imported"

(b) Display in a conspicuous place in his public salesroom a sign, which shall be not less than one foot in height and two feet in length, which bears the words "imported butter sold here" in blackface letters not less than three inches in height and one-half inch in width upon a white ground.

37262. Violation of this article is punishable by imprisonment in the county jail for not more than six months, or by a fine of not more than two hundred fifty dollars ($250), or by both.

Article 7. Renovated Butter

37291. Renovated butter is the product made from impure or rancid butter reduced, for the purpose of cleansing and renovating, to a liquid state by melting and draining off the liquid milk fat and afterwards churning or otherwise manipulating it in connection with milk or any product of milk.

37292. It is unlawful for any person to sell any renovated butter unless there is printed upon the label of each and every package, or other container in which such renovated butter is put up for sale or sold at retail, all of the following:

(a) The words "renovated butter" in letters which are at least as large as any other type or lettering on such label.

(b) The name and address of the manufacturer or distributor.

(c) The net weight of the contents of the package.

(d) A full and accurate statement of all the ingredients which are contained in the renovated butter.

Chapter 4. Cheese

Article 1. General Provisions

37401. Established varieties of cheese are described in Articles 4 (commencing with Section 37491) to 11 (commencing with Section 37671), inclusive, of this chapter.

37402. All varieties of cheese, except the varieties which are established in this chapter, are special varieties and shall conform to the standards of composition and labeling requirements which are adopted by the director.

37403. Milk, skim milk, or cream which is to be made into cheese shall conform to at least the minimum requirements for milk, skim milk, or cream as the case may be.

Article 2. Cheese Standards Generally

37431. Except as otherwise provided in Section 37433, cheese is the solid or semisolid product which is made from milk, skim milk, or cream by coagulating the casein of the milk, skim milk, or cream.

37432. The coagulating of the casein for cheese shall be with rennet, pepsin, lactic acid, or such other coagulating agents as may be approved in writing by the director, with or without the addition of ripening ferments, seasoning, salt (sodium chloride), or harmless coloring matter.

37433. Evaporated or condensed skim milk or nonfat dry milk solids may be used in the manufacture of cheese. If nonfat dry milk is used in the manufacture of cottage cheese,

such nonfat dry milk shall be of extra grade spray process.

37434. Except as otherwise provided in this division, whole milk cheese shall contain not less than 50 percent of pure milk fat in its water-free substance.

37435. Part skim cheese shall contain not less than 30 percent of pure milk fat in its water-free substance.

37436. Skim cheese is cheese that contains less than 30 percent of pure milk fat in its water-free substance.

Article 3. Standards for Cheese of the Cheddar, Granular, and Stirred-Curd Types

37461. Cheese of the cheddar, granular, and stirred-curd types shall conform to the standards which are prescribed by this article.

37462. Cheese equivalent to U.S. grade A shall conform to all of the following standards:

(a) It shall be free of objectionable flavors and odors, but may have slight feed flavors and a flavor typical of the variety of cheese being examined It may have a slightly acid flavor if minimum cured plus a slightly bitter flavor if aged.

(b) It shall have a reasonably firm, smooth, and waxy body and texture characteristic of the type of cheese being examined. It may, however, be slightly curdy, slightly short, mealy, or weak and be slightly pasty in aged cheese. It shall be free from yeast holes and other gas holes.

(c) It may be uncolored or minimum colored and slightly seamy. Aged or cured cheese may also have tiny white specks.

(d) It shall have a finish and appearance if bandaged and paraffin dipped so as to be free from surface defects, including, but not being limited to, cracks in the rind, soft spots, rind rot, and scaly paraffin, which may cause deterioration of the cheese It shall not be huffed, shall have a coating of paraffin that adheres to the surface of the cheese but may be slightly lopsided and may have slightly high edges. The bandage may be slightly uneven, overlapped, or wrinkled, but may not be burst or torn.

(e) If rindless, the cheese may not be huffed but may be slightly lopsided, and the wrapper may be slightly wrinkled but unbroken.

37463 Cheese equivalent to U.S. grade B shall conform to all of the following standards:

(a) It may possess definite off-flavors and odors such as acid, bitter, feed, fruity, metallic, whey taint, and yeasty.

(b) The body and texture may have a weak, pasty body, but not extremely soft and smeary, and may have a firm, short, mealy body.

(c) It shall be uncolored, minimum colored, or high colored, may be seamy, slightly acid cut or slightly wavy and slightly mottled. Aged or cured cheese may have tiny white specks.

(d) If bandaged and paraffin dipped, it may have a rough or unattractive appearance, have scaly paraffin, be slightly huffed, and be lopsided, but not to the extent that the lid will not fit squarely on the box. It shall be solid, free from soft spots, rind rot, cracks, and openings of any kind. The bandage may be uneven, overlapped, or wrinkled, but shall not be burst or torn. There shall be no indication that any mold has entered the cheese.

(e) If rindless, the cheese may be slightly huffed and slightly lopsided, and the wrapper may be slightly wrinkled but unbroken.

37464. Variation in flavor or texture which is due to the characteristic or type of cheese involved and differences in age of cheese that is current, minimum, or aged will be considered in the final grading of the cheese.

Article 4. Cheddar or American Cheese

37491. Except as otherwise provided in Article 5 (commencing with Section 37521) of this chapter, all varieties of cheese which are made by the so-called cheddar process which consists, in part, of subjecting the curd to a matting and milling process and molded under pressure, into characteristic forms approved by the director, with or without bandage, are classified as cheddar or American cheese.

37492. Cheddar or American cheese shall contain not more than 39 percent of moisture and shall contain not less than 50 percent milk fat in its water-free substance.

Article 5. Washed-Curd Cheese

37521. Washed-curd cheese may be manufactured by the so-called cheddar process if the curd, after milling, is cooled and soaked in water until the whey is partly extracted and water is absorbed.

37522. Washed-curd cheese shall contain not more than 42 percent of moisture and not less than 50 percent of milk fat in its water-free substance.

Article 6. Granular or Colby Cheese

37551. Granular or Colby cheese is made by the so-called stirred curd or granular process and molded, under pressure, into characteristic forms similar to those for cheddar or American cheese. It shall contain not more than 42 percent of moisture and not less than 50 percent milk fat in its water-free substance.

Article 7. Monterey Cheese or Monterey Jack Cheese

37571. Monterey cheese or Monterey jack cheese is made by the so-called stirred curd or granular process, without

added color, and molded, under pressure, into characteristic forms. Except as otherwise provided in Section 37572, it shall contain not more than 44 percent of moisture and not less than 50 percent of milk fat in its water-free substance.

37572. Monterey cheese or Monterey jack cheese for drying purposes may contain less than 50 percent milk fat in its water-free substance, but in no event shall such dry cheese contain less than 46 percent of milk fat in its water-free substance.

Article 8. High Moisture Jack Cheese

37601. High moisture jack cheese is made by the so-called stirred curd or granular process, without added coloring, and molded in bags under pressure into a characteristic form or shape. It shall contain not more than 50 percent of moisture and not less than 50 percent of milk fat in its water-free substance.

Article 9. Cream Cheese

37621. Cream cheese is the soft uncured cheese which is prepared by the mixing of cream with milk or skim milk, or both. The milk shall be pasteurized and may be homogenized. It is coagulated by the addition of harmless lactic acid producing bacteria with or without rennet. The curd may be pressed, chilled, worked, and seasoned. It shall contain not less than 33 percent of milk fat and not more than 55 percent of moisture.

Article 10. Uncreamed Cottage Cheese or Cottage Cheese

37641. As used in this article:

(a) "Concentrated skim milk" means skim milk from which a portion of the water has been removed by evaporation.

(b) "Dairy ingredients" mean sweet skim milk, concentrated skim milk, and nonfat dry milk solids.

(c) "Skim milk" means the milk of cows from which the milk fat has been separated.

37642. For the purposes of this article, cottage cheese made from goat milk is a special variety of cheese.

37643. Uncreamed cottage cheese or cottage cheese is the soft uncured cheese prepared by the procedure which is prescribed in this article or by any other comparable procedure which is approved by the director. The finished cottage cheese shall contain not more than 80 percent of moisture and not more than 0.5 percent fat.

37644. Uncreamed cottage cheese or cottage cheese may be prepared by adding harmless lactic acid-producing bacteria, with or without rennet, to any dairy ingredients. The dairy ingredients shall be pasteurized. If concentrated skim milk or nonfat dry milk solids is used, water may be added in a quan-

tity not in excess of that removed when such milk was concentrated or dried.

Calcium chloride may be added in a quantity of not more than 0.02 percent (calculated as anhydrous calcium chloride) of the weight of the mix. Harmless artificial coloring may also be added.

The resultant mixture is held until it becomes coagulated. The coagulated mass may be cut; it may be warmed; it may be stirred; it is then drained.

The curd may be washed with water and further drained; it may be pressed, chilled, worked, or seasoned with salt.

37645. The packaging of uncreamed cottage cheese or cottage cheese shall take place only in a licensed milk products plant.

Article 11. Creamed Cottage Cheese

37671. As used in this article:

(a) "Milk" means sweet milk of cows.

(b) "Skim milk" means milk from which the milk fat has been separated.

37672. For the purposes of this article, creamed cottage cheese which is made from goat milk is a special variety of cheese.

37673. Creamed cottage cheese is the soft uncured cheese which is prepared by mixing cottage cheese with one or more of the following pasteurized products or a pasteurized mixture of two or more of them: cream, milk, skim milk, concentrated milk, dried milk, concentrated skim milk, nonfat dry milk solids, or other constituents derived from milk, water.

The pasteurized product or mixture shall be used in such quantity that the milk fat which is added to the finished creamed cottage cheese is not less than 4 percent by weight of the finished creamed cottage cheese. The finished creamed cottage cheese shall contain not more than 80 percent of moisture.

37674. The addition of milk products to cottage cheese in the preparation of creamed cottage cheese shall take place only in a licensed milk products plant.

37675. Creamed cottage cheese to which any chives, fruits, or vegetables are added shall contain not less than 4 percent of milk fat and not more than 80 percent of moisture at the time of sale to the consumer.

37676. If chives are added to creamed cottage cheese, it shall contain a sufficient amount of properly cleaned fresh or frozen chives to impart the characteristic flavor of chives to the finished product.

37677. If fruit is added to creamed cottage cheese, whether the fruit is a single variety or a combination of two or more varieties, the amount which is added shall not be less than 10 percent and not more than 25 percent by weight of the finished product.

37678. If vegetables are added to creamed cottage cheese, whether the vegetables are a single variety or combination of

two or more varieties, the amount which is added shall not be less than 5 percent and not more than 20 percent by weight of the finished product.

37679. Any fruit or vegetable which is added to creamed cottage cheese shall be clean and sound It shall be frozen, canned, or dried, or have been heated to a pasteurization temperature as specified in Section 34001.

37680. In addition to the labeling provision of Article 21 (commencing with Section 37971) of this chapter, any chives, fruits, or vegetables which are added to creamed cottage cheese shall be shown on the label of each package in the order of predominance by weight.

Article 12. Homogenized Creamed Cottage Cheese Spread

37701. Homogenized creamed cottage cheese spread is creamed cottage cheese which has been subjected to a mechanical process or treatment in such manner as to insure the breakup of all curd particles It shall contain not less than 4 percent milk fat by weight of the product or more than 80 percent of moisture.

Article 13. Partially Creamed Cottage Cheese

37721. As used in this article:

(a) "Milk" means sweet milk of cows.

(b) "Skim milk" means milk from which the milk fat has been separated.

37722. For the purposes of this article, partially creamed cottage cheese which is made from goat milk is a special variety of cheese.

37723. Partially creamed cottage cheese is the soft uncured cheese which is prepared by mixing cottage cheese with one or more of the following pasteurized products or a pasteurized mixture of two or more of them: cream, milk, skim milk, concentrated milk, dried milk, concentrated skim milk, nonfat dry milk solids, or other constituents derived from milk, water. The pasteurized product or mixture shall be used in such quantity that the milk fat which is added thereby is not less than 0.5 percent, nor more than 2 percent by weight of the finished partially creamed cottage cheese. The finished partially creamed cottage cheese shall contain not more than 80 percent of moisture.

37724. The addition of milk products to cottage cheese in the preparation of partially creamed cottage cheese shall take place only in a licensed milk products plant.

37725. Partially creamed cottage cheese to which chives, fruits, or vegetables are added shall contain not more than 2 percent and not less than 0.5 percent milk fat and not more than 80 percent of moisture at time of sale to consumer.

37726. If any chives are added to partially creamed cottage cheese, it shall contain a sufficient amount of properly cleaned fresh, frozen, or dehydrated chives to impart the characteristic flavor of chives to the finished product.

37727. If any fruit is added to partially creamed cottage cheese, whether the fruit is a single variety or a combination of two or more varieties, the amount which is added shall not be less than 10 percent and not more than 25 percent by weight of the finished product.

37728. If vegetables are added to partially creamed cottage cheese, whether the vegetables are a single variety or combination of two or more varieties, the amount which is added shall not be less than 5 percent and not more than 20 percent by weight of the finished product.

37729. Any fruit or vegetable which is added to partially creamed cottage cheese shall be clean and sound. It shall be frozen, canned, or dried, or have been heated to a pasteurization temperature as specified in Section 34001.

37730. In addition to the labeling requirements of Article 21 (commencing with Section 37971) of this chapter, the chives, fruits, or vegetables which have been added to partially creamed cottage cheese shall be shown on the label of each package in the order of predominance by weight.

Article 14. Cream Cheese With Other Foods

37751. "Cream cheese with other foods" is a class of food products which is prepared by mixing, with or without the aid of heat, cream cheese and any properly prepared food, or a mixture of two or more properly prepared foods, other than cheeses. The following are foods which may be mixed with cream cheese in preparing such food product:

(a) Fresh, cooked, canned, or dried fruits or vegetables.

(b) Cooked or canned meats.

(c) Relishes or pickles.

(d) Any other foods which are suitable for blending with cream cheese.

37752. The amount of the added food shall be sufficient to so differentiate the mixture that it does not simulate cream cheese.

37753. Any of the following ingredients may also be used in the food product:

(a) One or any mixture of two or more of the following optional ingredients: gum karaya, gum tragacanth, carob bean gum, gelatin, guar gum, carboxymethyl cellulose, carrageen, oat gum, algin (sodium alginate), algin derivative (propylene glycol ester of alginic acid). The total quantity of any such substances, including that which is contained in the cream cheese, shall not be more than 0.8 percent by weight of the finished food product.

(b) Artificial coloring, unless such addition conceals damage or inferiority or makes the finished food product appear better or of greater value.

37754. No water except that which is contained in the added food ingredient shall be used, but the moisture content of the finished food product in no case shall be more than 60 percent.

37755. The milk fat shall be not less than 33 percent of the percent by weight of the cream cheese which is used, but in no case shall it be less than 27 percent of the finished food product.

37756. The name of the food product is "cream cheese with _____" or "cream cheese and _____," the blank being filled with the common names of the foods added, in order of predominance by weight.

37757. The label of any such food product shall bear the name of the optional water-retaining ingredients which were used, except that carob bean gum, gum karaya, gum tragacanth, guar gum, and oat gum, or any mixture of them, may be named as "vegetable gum" or "vegetable gums," as the case may be.

37758. If artificial coloring is used, the label shall bear the statement "artificially colored" unless the food which is added to the cream cheese is the only portion artificially colored. If the food which is added is the only portion artificially colored, the label shall bear the statement "_____ artificially colored," the blank being filled in with the name of any food so colored.

37759. The name of the food shall appear on the label so conspicuously as to be easily seen under customary conditions of purchase. The words and statements of the optional ingredients used which are required by this article to be shown, shall immediately and conspicuously precede or follow such name, without any intervening written, printed, or graphic matter.

Article 15. Pasteurized Neufchâtel Cheese Spread With Other Foods

37781. "Pasteurized Neufchâtel cheese spread with other foods" is a class of food products which is prepared by mixing, with aid of heat, Neufchâtel cheese and any properly prepared food, or a mixture of two or more properly prepared foods, other than cheese The following are foods which may be mixed with Neufchâtel cheese in preparing such food product:

(a) Fresh, cooked, canned, or dried fruits or vegetables.

(b) Cooked or canned meats.

(c) Relishes or pickles.

(d) Any other foods which are suitable for blending with Neufchâtel cheese.

37782. The amount of the added food shall be sufficient to so differentiate the blend that it does not simulate Neufchâtel cheese. It shall be spreadable at 70 degrees Fahrenheit.

37783. Any of the following ingredients may also be used in the food product:

(a) One or any mixture of two or more of the following: gum karaya, gum tragacanth, carob bean gum, gelatin, algin (sodium alginate), algin derivative (propylene glycol ester of

alginic acid), guar gum, carboxymethyl cellulose, carrageen, and oat gum. The total quantity of any such substances, including that contained in the Neufchâtel cheese, shall be not more than 0.8 percent by weight of the finished food product.

(b) Artificial coloring, unless such addition conceals damage or inferiority or makes the finished food appear better or of greater value.

(c) An acidifying agent which consists of one or a mixture of two or more of the following: an edible grade of a vinegar, acetic acid, lactic acid, citric acid, or phosphoric acid.

(d) A sweetening agent which consists of one or a mixture of two or more of the following: sugar, dextrose, maltose, corn syrup, corn syrup solids, malt syrup, or hydrolized lactose.

(e) Cream, milk, skim milk, cheese whey, or any mixture of two or more of them.

(f) Cream, milk, skim milk, cheese whey, or any mixture of two or more of them, from which part of the water has been removed.

(g) Albumin from cheese whey.

37784. During its preparation the mixture shall be heated for not less than 30 seconds at a temperature of not less than 150 degrees Fahrenheit.

37785. No water except that which is contained in the ingredients which are used shall be added to this food product, but the moisture content of the finished food product in no case shall be more than 65 percent.

37786. The milk fat shall be not less than 20 percent by weight of the finished food product.

37787. The name of the food shall be "pasteurized Neufchâtel cheese spread with _____" or "pasteurized Neufchâtel cheese spread and _____," the blank being filled with the common names of the foods added, in order of predominance by weight.

37788. The label of any "pasteurized Neufchâtel cheese spread with other foods" shall bear the names of any of the optional ingredients which were used, except carob bean gum, gum karaya, tragacanth, gum guar, and the oat gum, or any mixture of them, may be referred to as "vegetable gum" or "vegetable gums," as the case may be.

37789. If artificial coloring is used, the label shall bear the statement "artificially colored," unless the food added to the Neufchâtel cheese is the only portion artificially colored. If the food which is added to the Neufchâtel cheese is the only portion that is artificially colored, the label shall bear the statement "_____ artificially colored," the blank being filled in with the name of any food so colored.

37790. If an optional acidifying agent is used so that the pH of the finished food product is less than 4.2, there shall appear after its name the words "chemical preservative."

37791. If vinegar is the only acidifying agent which is added, it shall be considered to be acetic acid if the pH of the finished food product is less than 4.2.

37792. If vinegar and any other acidifying agent is used and the pH of the finished food product is less than 4.2, only the name of the acidifying agent other than vinegar shall be followed by the statement "a chemical preservative."

37793. The name of the food shall appear on the label so conspicuously as to be easily seen under customary conditions of purchase. The words and statements of the optional ingredients used which are required by this article to be shown, shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter.

Article 16. Pasteurized Process Cheese

37821. Pasteurized process cheese is the pasteurized product which is prepared by comminuting and mixing any lot or variety, or two or more lots or varieties, of cheese into a homogeneous plastic mass with the aid of heat, with or without addition of water and with the incorporation of not more than 3 percent of a suitable emulsifying agent.

37822. The standard of composition for any pasteurized process cheese shall be fixed by the director by regulation. It shall conform as nearly as possible to the standard proclaimed and established by the United States Department of Health, Education, and Welfare or any duly constituted successor of such department.

37823. The labeling and the advertising of any pasteurized process cheese shall be in accordance with this division and the regulations which are adopted by the director.

Article 17. Pasteurized Process Cheese Food

37851. Pasteurized process cheese food is the pasteurized product which is prepared by comminuting and mixing any lot or variety, or two or more lots or varieties, of cheese into a homogeneous plastic mass with the aid of heat. It may contain any of the following:

(a) Added water.

(b) Added solids which are derived from milk.

(c) Approved acids, sugars, seasoning, and emulsifying agents in amounts which are specified in the regulations adopted by the director.

37852. The standard of composition for any pasteurized process cheese food shall be fixed by the director by regulation. It shall conform as nearly as possible to the standard which is proclaimed and established by the United States Department of Health, Education, and Welfare or any duly constituted successor of such department.

37853. Pasteurized process cheese food shall be sold to the consumer in the original unopened package which shall contain not more than two pounds in weight.

37854. The labeling and the advertising of any pasteurized process cheese food shall be in accordance with this division and the regulations which are adopted by the director.

Article 18. Pasteurized Cheese Spread

37881. Pasteurized cheese spread is a product prepared by mixing with the aid of heat into a homogeneous plastic mass any lot or variety, or two or more lots or varieties, of cheese. It may contain any of the following:

(a) Added solids which are derived from milk, water, and spices.

(b) Added sugar, acids, emulsifiers, flavoring, and seasoning in amounts specified in the regulations adopted by the director.

37882. The standard of composition for any pasteurized cheese spread shall be fixed by the director by regulation. It shall conform as nearly as possible to the standard which is proclaimed and established by the United States Department of Health, Education, and Welfare or any duly constituted successor of such department.

37883. Pasteurized cheese spreads shall be packaged in size not to exceed two pounds in weight and shall be sold to the consumer in the original unopened package.

37884. The labeling and the advertising of any pasteurized cheese spread shall be in accordance with this division and the regulations which are adopted by the director.

Article 19. Cold Pack Cheese

37911. Cold pack cheese is the product which is prepared by comminuting any lot, or two or more lots, of cheese, which have been made from pasteurized milk or from cheese which has been held for a period of at least 60 days from date of manufacture, and mixing such cheese, with or without the addition of water or cream and without the aid of heat, to form a homogeneous mass.

37912. The standard of composition for any cold pack cheese shall be fixed by the director by regulation. It shall conform as nearly as possible to the standard which is proclaimed and established by the United States Department of Health, Education, and Welfare or any duly constituted successor of such department.

37913 The labeling and the advertising of any cold pack cheese shall be in accordance with this division and the regulations which are adopted by the director.

Article 20. Cold Pack Cheese Food

37941. Cold pack cheese food is the product which is prepared by comminuting and mixing any lot or variety, or two or more lots or varieties, of cheese which have been made from pasteurized milk or from cheese which has been held for a period of at least 60 days from date of manufacture, without the aid of heat, into a homogeneous mass. It may contain added solids derived from milk, approved acids, sugar, emulsifiers, water, flavoring, and spices in the amount specified in the regulations adopted by the director.

37942. The standard of composition for any cold pack cheese food shall be fixed by the director by regulation. It shall conform as nearly as possible to the standard which is proclaimed and established by the United States Department of Health, Education, and Welfare or any duly constituted successor of such department.

37943. Cold pack cheese food shall be sold to the consumer in the original unopened package which shall contain not more than two pounds in weight.

37944. The labeling and the advertising of any cold pack cheese food shall be in accordance with this division and the regulations which are adopted by the director.

Article 21. Labeling of Cheese

37971. Any cheese which is sold in this state, except that which is cut and wrapped into individual consumer packages or that which is defined in Articles 10 (commencing with Section 37641) to 20 (commencing with Section 37941), inclusive, of this chapter shall be labeled at the milk products plant where manufactured to indicate all of the following:

(a) The variety.

(b) The milk products plant number unless the cheese is manufactured in a state where milk products plant numbers are not assigned.

(c) State of origin.

(d) Date upon which the cheese was manufactured, if the cheese is made from raw milk.

(e) With the words "part skim" or "skim," as the case may be, if the cheese is made from part skim milk or from skim milk.

37972. Pasteurized cheese or cheese which is made from pasteurized milk or pasteurized products of milk shall be labeled to indicate that it is pasteurized or made from pasteurized products

37973 Cheese which is manufactured in any state where milk products plant numbers are not assigned shall be labeled with the name and address of the milk products plant where it was manufactured.

37974. Any cheese which has been coated or treated in such a manner as to cover or conceal the original label shall,

before being offered for sale to retail establishments, be relabeled in a legible manner to indicate all of the following:

(a) The milk products plant number or the name and address of the manufacturer or distributor.

(b) State of origin.

(c) The variety.

(d) The words "part skim" or "skim," as the case may be, if the cheese is made from part skim milk or from skim milk.

37975. Any cheese which is cut and wrapped or packaged into individual consumer packages shall be labeled to indicate all of the following:

(a) That it is pasteurized or made from pasteurized products or that it has been cured for at least 60 days.

(b) The variety.

(c) The name and address of the manufacturer or distributor.

All cheese which is sold in such individual consumer packages, except cottage cheese, shall be labeled with the words "part skim" or "skim," as the case may be, if the cheese is made from part skim milk or from skim milk.

37976. Any cheese which is cut and wrapped or packaged into individual consumer packages for sale on the premises where it is cut, wrapped, or packaged shall be labeled to indicate the variety of cheese in the package. This section does not apply to cheese which is cut, wrapped, or packaged in retail establishments at the request, or in the presence, of the consumer.

Article 22. Violations

38001. It is unlawful for any person to have in his possession any cheese, except cheese which has been allowed to ripen or cure for at least 60 days from the date of manufacture, which is not pasteurized or was not manufactured from milk or milk products which were pasteurized, unless the person has such cheese in his possession for one of the following purposes:

(a) Curing, aging, or processing by a manufacturer, broker, or wholesale handler.

(b) Transportation, in the case of boats, railroads, or other carriers.

(c) Storage, in the case of a warehouse or cold storage company.

38002. It is unlawful for any person to sell to the consumer any part skim cheese or skim cheese which contains more than 32 percent of moisture, except cottage cheese and special varieties of cheese for which moisture standards are established by the director.

CHAPTER 5. MISCELLANEOUS DAIRY PRODUCTS

Article 1. Milk Fat or Butter Fat

38151. As used in this article, "Reichert-Meissl number" means the number of milliliters of decinormal alkali which are required to neutralize the acidity of the distillate from five grams of fat treated in the manner specified in the regulations adopted by the director. Such regulations shall conform as closely as possible to the methods which are described in the book, entitled "Official and Tentative Methods of Analysis of the Association of Official Analytical Chemists," published from time to time by that association.

38152 Milk fat or butter fat is the fat of milk. It shall have a Reichert Meissl number not less than 24 and a specific gravity not less than 905/1000. In determining the specific gravity milk fat at 40 degrees centigrade shall be compared with water at 40 degrees centigrade.

Article 2. Skim Milk or Nonfat Milk

38181. Skim milk or nonfat milk is the product which results from the complete or partial removal of milk fat from milk. It shall contain not more than twenty-five hundredths of 1 percent of milk fat and not less than 8.5 percent of milk solids not fat.

38182. Skim milk or nonfat milk shall conform to the bacterial standards of the grade or class of milk from which such skim milk is derived.

38183. All fluid skim milk which is sold for human consumption as such shall be derived from market milk.

38184. Every container in which skim milk or nonfat milk is sold shall be plainly and conspicuously labeled with all of the following:

(a) The words "skim milk" or "nonfat milk."

(b) The word "raw" or "pasteurized," as the case may be.

(c) The grade or class of the milk.

(d) The name and address of the distributor.

38185. Every label which is required by this article shall be in capital letters of a size or boldness as to be legible by the purchaser or consumer. If the available space on any cap, bottle, or container for such labeling is not sufficient for the full name of the distributor, a sufficient portion of the distributor's name which clearly identifies such distributor may be used in lieu of the entire distributor's name.

38186. Every container of skim or nonfat milk, except a glass container, shall be labeled, if sufficient space is available on the container, with the words "skim milk" or "nonfat milk" in capital letters not less than one-quarter inch in height and one-eighth inch in width.

Article 3. Low-Fat Milk

38211. Low-fat milk is a market milk product. It shall contain not less than 1.9 percent milk fat, not more than 2.1 percent milk fat, and not less than 10 percent of milk solids not fat.

38212. Low-fat milk may contain added vitamins and minerals if it is labeled to indicate such additions and the amount of the vitamins or minerals which are added.

38213 Except as otherwise provided in this article, low-fat milk shall meet all standards and requirements which are specified in this division for market milk. It shall be labeled "low-fat milk."

Article 4. Evaporated Milk

38231. Evaporated milk is milk from which a considerable portion of moisture has been evaporated. The standard of composition for evaporated milk, whether sweetened or unsweetened, shall be fixed by the director and shall conform as nearly as possible to that proclaimed and established by the United States Department of Health, Education, and Welfare or any duly constituted successor of such department.

Article 5. Evaporated Cream or Clotted Cream

38241. Evaporated cream or clotted cream is cream from which a considerable portion of moisture has been evaporated.

Article 6. Evaporated Skim Milk or Condensed Skim Milk

38261. Evaporated skim milk or condensed skim milk is skim milk from which a considerable portion of moisture has been evaporated. It shall contain not less than 18 percent milk solids and not more than 75,000 bacteria per gram.

38262. It is unlawful for any person to sell at retail for consumption within this state any evaporated skim milk or condensed skim milk in any container which is smaller than a "number 10 can," except that which is sold exclusively by druggists, orphan asylums, child welfare associations, hospitals, and similar institutions upon prescription of a regularly licensed physician.

38263. Every hermetically sealed container which contains evaporated skim milk or condensed skim milk shall distinctly bear the name and address of the manufacturer of such milk, together with the words "condensed skim milk" in roman letters of a size at least as large as the largest of any other words or letters which appear on the brand, indention, or label upon the container.

Article 7. Sterilized Flavored Drink

38291. Sterilized flavored drink is milk or skim milk, evaporated, condensed, or dried milk, or nonfat milk solids, or any combination of them, which contains harmless sweetening, chocolate, chocolate syrup, or other harmless syrup or flavoring or combinations of such syrups or flavorings, and harmless edible stabilizer which does not exceed five-tenths of 1 percent or seasoning. It may be homogenized, packed in hermetically sealed containers, and so processed by heat as to prevent spoilage.

Article 8. Sterilized Flavored Milk

38311. Sterilized flavored milk is milk, evaporated or condensed milk, or dried milk, or any combination of them, which contains harmless sweetening, chocolate, chocolate syrup, or other harmless syrup or flavoring, or combinations of such syrups or flavorings, and harmless edible stabilizer which does not exceed five-tenths of 1 percent or seasoning. It is homogenized, packed in hermetically sealed containers, and so processed by heat as to prevent spoilage.

38312. Sterilized flavored milk shall contain not less than 3 percent milk fat and not less than 16½ percent total solids.

Article 9. Sterilized Flavored Cream

38321. Sterilized flavored cream is cream to which nonfat dry milk solids have been added, which contains harmless flavoring or syrup, or combinations of harmless flavorings or syrups, and harmless edible stabilizer which does not exceed five-tenths of 1 percent or seasoning and harmless stabilizing salts. It is homogenized, packed in hermetically sealed containers, and so processed by heat as to prevent spoilage.

38322. Sterilized flavored cream shall contain not less than 20 percent milk fat.

Article 10. Sterilized Milk and Sterilized Cream

38341. Sterilized milk and sterilized cream is milk or cream which has been subjected to a temperature which is high enough to sterilize the product. An edible stabilizer not to exceed five-tenths of 1 percent may be added to sterilized milk or sterilized cream.

38342. Sterilized milk or sterilized cream shall be made from milk or cream which meets all the requirements of this division for the respective class or grade of milk and cream which is used; except that such milk or cream need not be cooled if it has been demonstrated to the satisfaction of the director that such cooling is not required for the proper processing of the product.

38343. Sterilized milk or sterilized cream shall be packed in sterile containers and hermetically sealed.

38344. Sterilized milk shall contain not less than 3.25 percent milk fat and not less than 8.25 percent milk solids not fat.

38345. Sterilized cream shall contain not less than 18 percent milk fat.

38346. In an area in which a price stabilization and marketing plan is in effect, sterilized milk or sterilized cream shall be sold at not less than the minimum wholesale or minimum retail prices which are established for fluid milk or fluid cream in that area.

38347. Sterilized milk or sterilized cream which has been altered in composition to conform to special nutritional requirements or special dietary purposes, shall be labeled "modified sterilized milk" or "modified sterilized cream" as the case may be. If such alteration is due to the use of additives, such additives shall be approved by the director, and shall be declared on the label.

Article 11. Dried Milk

38361. Dried milk is the product which results from the removal of water from milk It shall otherwise conform to the definition, standards, and requirements which are prescribed in this article.

38362. Dried milk or dry whole milk standards shall apply to bulk, spray process and bulk, roller process.

38363. Dried milk or dry whole milk shall be classified into the following grades:

(a) "Extra grade."

(b) "Standard grade."

38364. "Extra grade" dried milk or dry whole milk shall meet the following specifications:

	Spray process	Roller process
(a) Milk fat__Not less than	26 00 percent	26 00 percent
(b) Moisture_Not more than	2.50 percent	3.00 percent
(c) Titratable acidity__Not more than	0.15 percent	0 15 percent
(d) Bacterial estimate. Not more than	50,000 per gm.	50,000 per gm.
(e) Solubility index___Not more than	0.50 ml.	15 00 ml.
(f) Scorched particle content _Not more than	15 0 mg.	22 5 mg.

38365. Extra grade dried milk or dry whole milk shall be free from lumps except those that break up readily under slight pressure The reliquefied product shall have a sweet and desirable flavor but may possess the following flavor to a slight degree: chalky, cooked, and feed. In the case of roller

process dried milk or dry whole milk, a slight scorched flavor is also permitted.

38366. Standard grade dried milk or dry whole milk shall meet the following specifications:

	Spray process	Roller process
(a) Milk fat. Not less than	26.00 percent	26.00 percent
(b) Moisture Not more than	3 00 percent	4.00 percent
(c) Titratable acidity__Not more than	0.17 percent	0.17 percent
(d) Bacterial estimate_Not more than	100,000 per gm.	100,000 per gm.
(e) Solubility index___Not more than	1.00 ml.	15.00 ml.
(f) Scorched particle content__Not more than	22.5 mg.	32.5 mg.

38367. Standard grade dried milk or dry whole milk shall be free from lumps except those that break up readily under slight pressure. The reliquefied product shall possess a fairly desirable flavor, but may possess a bitter, oxidized, storage, utensil, and scorched flavor to a slight degree and a chalky and feed flavor to a definite degree. In the case of roller process dried milk or dry whole milk, a definite scorched flavor is also permitted.

Article 12. Extra Grade Edible Dry Whey

38391. Extra grade edible dry whey is the product which results by spray drying sweet, fresh cheese whey which has been pasteurized, either before or during the process of manufacture at a temperature of 145° F. for 30 minutes or its equivalent in bacterial destruction, and to which no alkali or other chemical has been added.

38392. Extra grade edible dry whey and its reliquefied form shall have a clean whey flavor, free from objectional and nonwhey flavors and odors.

38393. Extra grade edible dry whey shall contain not more than 50,000 bacteria per gram, not more than 1.25 percent of milk fat, not more than 5.00 percent of moisture, and not more than 0.16 percent of titratable acidity.

38394. The alkalinity of ash which is contained in extra grade edible dry whey shall not exceed 225 ml. 0.1 normal hydrochloric acid (0.1 N HCl) per 100 grams. The scorched particle content shall be not more than 15.0 mg. and the solubility index shall be not more than 1 25 ml.

38395. Extra grade edible dry whey shall have a uniform light color, free from lumps that do not break up under moderate pressure, and practically free from brown and black scorched particles.

Article 13. Nonfat Dry Milk

38421. Nonfat dry milk is the product which results from the removal of fat and water from milk. It shall contain the lactose, milk proteins, and milk minerals in the same relative proportions as in the fresh milk from which it is made. It shall otherwise conform to the standards and requirements which are prescribed in this article.

38422. Nonfat dry milk shall contain not more than 5 percent by weight of moisture and not more than 1.5 percent by weight of milk fat.

38423. Nonfat dry milk shall be classified into the following grades:

(a) "Extra grade."

(b) "Standard grade."

38424. "Extra grade" nonfat dry milk shall meet the following specifications:

	Spray process not more than	Roller process not more than
(a) Milk fat	1 25 percent	1.25 percent
(b) Moisture	4.00 percent	4.00 percent
(c) Titratable acidity	0.15 percent	0.15 percent
(d) Solubility index	1.25 ml.	15.0 ml.
(e) Bacterial estimate	50.000 per gm.	50,000 per gm.
(f) Scorched particles	15.0 mg.	22.5 mg.

38425. Extra grade nonfat dry milk shall possess a uniform white to light cream natural color, free from lumps except those that break up readily with very slight pressure and practically free from visible dark particles. The reliquefied product shall be free from graininess and shall have a sweet and desirable flavor, but in the case of the spray process product it may possess the following flavors to a slight degree: chalky, cooked, feed, and flat. In the case of the roller process product, a slightly scorched flavor is permitted in addition to the flavors listed in this section.

38426 "Standard grade" nonfat dry milk shall meet the following specifications:

	Spray process not more than	Roller process not more than
(a) Milk fat	1 50 percent	1.50 percent
(b) Moisture	5.00 percent	5.00 percent
(c) Titratable acidity	0 17 percent	0.17 percent
(d) Solubility index	2 00 ml.	15.0 ml.
(e) Bacterial estimate	100.000 per gm.	100,000 per gm.
(f) Scorched particles	22.5 mg.	32.5 mg.

38427. "Standard grade" nonfat dry milk may possess a slight unnatural color. It shall be free from lumps, except those that break up readily under slight pressure and be reasonably free from visible dark particles. The reliquefied product shall be reasonably free from graininess and shall have a

fairly pleasing flavor but may possess the following flavors to a slight degree: bitter, oxidized, storage, utensil, and the following to a definite degree: chalky, feed, flat, and scorched.

38428. Nonfat dry milk which fails to meet the requirements for standard grade or shows a direct microscopic clump count exceeding 250 million per gram shall be deemed unfit for human consumption.

Article 14. Milk Drink Mix

38451. Milk drink mix is a market milk product. It shall contain not less than 12 percent total milk solids, not less than 4 percent butterfat, and not more than one-half of 1 percent of pure and harmless edible stabilizer.

38452. Milk drink mix shall contain no milk or milk products except market milk and milk products which are derived from market milk.

38453. Milk drink mix may contain sweetening and harmless flavoring and coloring.

38454. Milk drink mix shall be pasteurized.

38455. Each manufacturer of milk drink mix shall, upon request of the department, submit the names and delivery locations of all persons that receive milk drink mix from such manufacturer.

Article 15. Sterilized Milk Drink Mix

38481. Sterilized milk drink mix is a milk product which has been subjected to a temperature which is high enough to sterilize the product. It shall contain not less than 12 percent total milk solids, not less than 4 percent butterfat, and not more than one-half of 1 percent of pure and harmless edible stabilizer. It may contain sweetening and harmless coloring and flavoring.

38482. Sterilized milk drink mix shall be packaged by the manufacturer in sterile hermetically sealed metal containers.

38483. Each manufacturer of sterilized milk drink mix shall, upon the request of the department, submit the names and delivery locations of all persons that receive sterilized milk drink mix from such manufacturer.

Article 16. Milk Drink

38511. Milk drink is the product which is made from milk drink mix or sterilized milk drink mix and which contains not less than 3.5 percent of milk fat nor more than 75,000 bacteria per gram.

38512. No milk or milk products except market milk, market skim milk, or market cream shall be combined with, or added to, milk drink mix or sterilized milk drink mix in the freezing device in the making of milk drinks.

Article 17. Acidophilus Milk

38521. Acidophilus milk is market milk, skim milk that is derived from market milk, or a combination of market milk and skim milk that is derived from market milk, which has been pasteurized and afterward fermented by a pure culture of a strain, or strains, of Lactobacillus acidophilus.

38522. The manufacture, labeling, and sale of acidophilus milk shall be in accordance with regulations adopted by the director after a hearing which is duly called. Interested parties shall be notified of the hearing.

Article 18. Modified Milk

38531. Modified milk is market milk, evaporated milk, or powdered milk which has been altered in composition to conform to special nutritional requirements and which contains no fat or oil except milk fat.

Article 19. Buttermilk

38541. Buttermilk is that portion of sweet or ripened milk or cream which remains after the separation and complete or partial removal from such milk or cream of milk fat in the process of butter manufacture.

38542. Buttermilk at the time of sale for human consumption is adulterated if water is added to it.

38543. Every container in which buttermilk is sold shall be labeled with the name and address of the distributor.

Article 20. Cultured Buttermilk

38571. Cultured buttermilk is pasteurized milk, pasteurized skim milk, nonfat dry milk solids, condensed skim milk, or a combination of them, with or without an admixture of butter or buttermilk, which has been treated with special cultures of lactic acid bacteria so that the product resembles buttermilk in appearance, composition, and flavor. It shall contain not less than 8 percent milk solids.

38572. Every container in which cultured buttermilk is sold shall be labeled with the name and address of the distributor.

Article 21. Pasteurized Concentrated Milk

38601. Pasteurized concentrated milk is market milk which has been reduced to a semiliquid state by the removal of a portion of its water content by the aid of heat or the product derived from combining concentrated skim milk derived from market milk with market cream. It shall contain not less than 9.9 percent of milk fat and not less than 24 percent of milk solids not fat. It shall otherwise meet and be subject to

all the requirements and standards for market milk, except as follows:

(a) It may be pasteurized before concentration but shall be pasteurized after concentration.

(b) It shall contain not more than 20,000 bacteria per gram.

38602. Pasteurized concentrated milk shall be packaged in containers other than hermetically sealed containers.

Article 22. Concentrated Skim Milk

38631. Concentrated skim milk is skim milk which is derived from market milk that has been reduced to a semi-liquid state by the removal of a portion of its water content by the aid of heat.

38632. Concentrated skim milk shall contain not less than 24 percent of milk solids not fat.

Article 23. Flavored Milk

38651. Flavored milk is pasteurized, homogenized market milk which conforms to the requirements which are prescribed in Section 35941, to which has been added a stabilizer, sugar, syrup, or flavor made from wholesome ingredients.

38652. Flavored milk shall meet all standards and requirements which are specified in this division for pasteurized, homogenized market milk, and shall otherwise be subject to all provisions of this code that are applicable to pasteurized, homogenized market milk. In addition, flavored milk shall be labeled with the name of the product. The principal flavor may be substituted for the word "flavored" in the name of the product.

38653. Flavored milk shall be so colored or contain ingredients that cause it to distinctly differ from milk in appearance and other characteristics.

Article 24. Flavored Dairy Drink

38661. Flavored dairy drink is a pasteurized market milk product to which has been added a stabilizer, sugar, syrup, or flavor which is made from wholesome ingredients.

38662. Flavored dairy drink shall contain not more than 1.8 percent milk fat and not more than 15,000 bacteria per milliliter at the time of delivery of the product to the consumer.

38663. Flavored dairy drink shall be labeled with the name and address of the distributor or original bottler, and with the class or grade and the name of the product. In such labeling, the principal flavor may be substituted for the word "flavored" or the words "flavored dairy" in the name of the product.

38664. Flavored dairy drink shall be so colored or contain ingredients as to cause it distinctly to differ from milk in appearance and other characteristics.

Article 25. Sour Cream

38671. Sour cream is pasteurized market cream which has been fermented by the addition of pure cultures of one or more strains of lactic acid bacteria so that the product contains certain acidity. It may contain added milk solids which are derived from market milk and a harmless edible stabilizer not to exceed six-tenths of 1 percent by weight. Sour cream shall otherwise conform to all requirements for market cream, except those which pertain to bacteria count.

38672. Sour cream shall be labeled with the name and address of the distributor and may be labeled "sour cream", "sour market cream", or "cultured market cream".

Article 26. Sour Cream Dressing

38701. Sour cream dressing is a product which is made from pasteurized cream with added milk solids to which any strain, or two or more strains, of lactic acid producing organisms has been added to give it a distinct lactic acid flavor. It shall contain not less than 16 percent of milk fat and not less than 24 percent of total milk solids. It may contain seasoning and a harmless edible stabilizer not to exceed six-tenths of 1 percent.

38702. Sour cream dressing shall be labeled with the term "sour cream dressing" and with the name and address of the distributor.

38703. At the time of sale to consumers, sour cream dressing shall be in containers of at least one-half gallon capacity, except that sour cream dressing to which has been added a distinctive flavoring of onion, cheese, salmon, anchovy, or pickle which imparts a distinctive flavor to the dressing may be sold to consumers in containers of any size. If sour cream dressing contains any such distinctive flavoring the label shall clearly identify the flavoring.

Article 27. Yogurt

38731. Market milk or market milk combined with nonfat milk from market milk, with or without added market milk solids, flavoring, or seasoning, which has been pasteurized and afterwards fermented by one or more strains of Lactobacillus bulgaricus (including yogurt strains), Streptococcus thermophilus and Lactobacillus acidophilus may be sold as yogurt, dietetic yogurt, mazun, or such names as may be characteristic for the product and approved by the director. Such product may contain harmless edible stabilizer not to exceed 0.6 percent. It shall be free of molds, yeasts, and other fungi, as well as coliform, and other objectional bacteria which may impair the quality of the product.

38732. When offered for sale, it shall be labeled with its name and with the name and address of the manufacturer or

distributor and shall, unless it is dietetic yogurt, contain not less than 3.5 percent of milk fat. Dietetic yogurt shall contain not less than 2 percent of milk fat.

38733. Dietetic yogurt shall be labeled either "Dietetic yogurt" or "Low fat yogurt" in lettering which is at least as large as any other lettering on the label.

Article 28. Fruit Yogurt

38741. Fruit yogurt is yogurt which contains not less than 8 percent by weight of clean, mature, sound fruit or its equivalent in other forms. Its milk fat content may be reduced to not less than 2.8 percent, and it may contain a harmless edible stabilizer not to exceed 0.6 percent.

Article 29. Whipped Cream or Cream Topping

38761. Whipped cream or cream topping is a product which is packaged and dispensed from a pressurized hermetically sealed container. It shall be made from cream which contains not more than 150,000 bacteria per milliliter. It may contain added nonfat milk solids, sweetening, and harmless edible stabilizer not exceeding one-half of 1 percent.

38762. Whipped cream or cream topping shall contain not less than 20 percent of milk fat and shall contain not more than 30,000 bacteria per milliliter after pasteurization.

38763. Whipped cream or cream topping shall be charged with nitrous oxide or other inert harmless gas which is approved by the director.

38764. Harmless flavoring or coloring may be added to whipped cream or cream topping.

38765. Whipped cream or cream topping shall be manufactured and processed in a milk products plant which is licensed by the department.

38766. Whipped cream or cream topping shall be labeled with the term "whipped cream" or "cream topping" and with the name and address of the manufacturer.

38767. Milk or any milk product which is used in the manufacture of whipped cream or cream topping shall be pasteurized.

Article 30. Whipped Cream Mix or Cream Topping Mix

38781. Whipped cream mix or cream topping mix is a milk product which contains not less than 20 percent of milk fat, not more than 30,000 bacteria per milliliter, after pasteurization, and which contains one or more of the following ingredients:

(a) Sweetening.

(b) Harmless flavoring or coloring.

(c) Harmless edible stabilizer not exceeding one-half of 1 percent.

38782. Whipped cream mix or cream topping mix may contain added nonfat milk solids. It shall be made from cream which contains not more than 150,000 bacteria per milliliter. It shall be manufactured and processed in a licensed milk products plant.

38783. Whipped cream mix or cream topping mix shall be served only from a pressurized container which is charged with nitrous oxide or other approved inert harmless gas. The charging of containers with the gas shall be done either in a licensed milk products plant or in premises where food and drink is served to the public.

38784. Whipped cream mix or cream topping mix shall be labeled with the name of the product and the name and address of the manufacturer.

Article 31. Eggnog

38791. Eggnog is an unfrozen product which is made with milk, cream, evaporated or condensed milk, evaporated or condensed skim milk, dry milk solids, nonfat dry milk solids, or any combinations of them, egg yolk or whole eggs, sweetening, and harmless flavoring with or without harmless coloring.

38792. Eggnog may contain edible stabilizer in an amount not to exceed six-tenths of 1 percent. It shall contain not less than one-half of 1 percent by weight of wholesome fresh egg yolk solids or the equivalent amount of egg yolk solids obtained from wholesome frozen egg yolks or from wholesome dried egg yolks or the equivalent amount in other approved form.

38793. Eggnog shall contain not less than 6 percent of milk fat and not more than 75,000 bacteria per gram.

38794. All ingredients, except flavors, which are to be used in the manufacture of eggnog shall be pasteurized.

38795. Eggnog shall be labeled with its name and with the name and address of the manufacturer or distributor.

Chapter 6. Imitation Milk, Imitation Cream, and Imitation Milk Products Generally

Article 1. General Provisions

38901. This chapter does not prohibit the use of imitation milk or imitation cream or imitation milk product for cooking purposes, or the serving of oleomargarine, margarine, or other substitute for butter which has been specifically requested by a patron and which otherwise complies with the requirements of Sections 39461 and 39493.

38902. Except as otherwise provided in this section, no imitation milk product shall be used in any of the charitable or penal institutions that receive assistance from the state. If the state is informed in writing that government holdings of butter cannot be purchased or acquired by the state, the

Department of General Services may purchase for use in state institutions colored oleomargarine if requested to do so by the director of the department which has control of any state institutions for which such product is intended.

38903. Proof that any fat or oil except milk fat has been combined with any milk product and that the resulting substance, mixture, or compound has the outward appearance and semblance in taste and otherwise of a milk product and is sold for use without further processing shall be prima facie proof that such substance, mixture, or compound is an imitation milk product. This section does not apply to any substance, mixture, or compound in which the presence of oil or fat except milk fat is expressly permitted and provided for in this division.

Article 2. Imitation Milk and Imitation Cream Standards

38931. Imitation milk is any substance, mixture, or compound which is made in the imitation of, or which has the appearance or semblance of, milk, condensed milk, condensed skim milk, evaporated milk, evaporated skim milk, dried milk or dried skim milk, and which contains any edible oil or fat other than milk fat. Chocolate when used in combination with either whole or skim milk and sweetened is not imitation milk.

38932. Imitation milk shall contain not less than 3 percent of edible oils or fats and, if it is evaporated or condensed, shall contain not less than 7.8 percent of edible oils or fats.

38933. Imitation cream is any substance, mixture, or compound which contains any edible oil or fat other than milk fat and which is made in imitation of, or has the appearance or semblance of, cream, condensed cream, evaporated cream, frozen cream, or dried cream.

Article 3. Adulterated Imitation Milk or Imitation Cream

38951. Imitation milk which is not condensed or evaporated is adulterated if it contains less than 3 percent of edible fats or oils. Imitation milk which is evaporated is adulterated if it contains less than 7.8 percent of edible fats or oils.

38952. Imitation cream is adulterated if it contains less than 20 percent of edible fats or oils.

Article 4. Labels and Statements

38981. Each person that manufactures any imitation milk, imitation cream, or imitation milk product, or any substitute that may be used as and substituted for milk, cream, or evaporated milk, shall comply with the requirements prescribed by this article.

38982. Except as otherwise provided in Section 38986, there shall be printed, stamped, or stenciled in a clear manner upon the top, if the top is of sufficient size, and the sides of each

package, in which containers of the article or substance are kept, and in which they may be removed from the place where the article or substance is produced or put up, the words "imitation milk", "imitation cream", or "imitation milk product", as the case may require, in plain roman type, the letters of which are not less than one inch in height and one-half inch in width.

38983. A statement shall be prepared, printed in plain roman type of a size not smaller than pica, which states in the English language all of the following:

(a) The name of the product.

(b) The name and address of the manufacturer.

(c) The name of the place where the product is manufactured or put up.

(d) The names of the various ingredients and the percentages of fat which are contained in the imitation milk, imitation cream, or imitation milk product and the percentage of milk fat, if any.

38984. A copy of the statement described in Section 38983 shall be placed within and upon the contents of each package, and next to that portion of each package which is commonly and most conveniently opened.

38985. Except as otherwise provided in Section 38986, each container, within the outer package, which contains any imitation milk, imitation cream, or imitation milk product shall be labeled with the words "imitation milk", "imitation cream", or "imitation milk product", as the case may require, which are printed in blackface plain roman capital letters of a size not less than 12-point. Such words shall appear upon the main or principal label of the containers.

38986. The provisions of Sections 38982 and 38985 do not apply to a distinctive proprietary food compound which complies with all of the following requirements:

(a) Not readily mistaken in taste for milk, or for evaporated, skim, condensed, or dried milk.

(b) Prepared and designed for feeding infants and young children.

(c) Sold exclusively by druggists, orphan asylums, child welfare associations, hospitals, and similar institutions, or for shipment outside of this state.

A product described in, and complying with the requirements of, this section may be labeled as modified milk.

Article 5. Sign Requirements

39011. The following persons shall not place before any patron or employee for use as food, any imitation milk, imitation cream, or imitation milk product, unless there is displayed in a prominent place in each room where meals are served, a sign which bears the words: "Imitation milk used and served here", "Imitation cream used and served here", or "Imitation milk product used and served here", as the case may require,

in blackfaced letters which are not less than four inches in height upon a white background:

(a) The keeper or proprietor, person in charge, or an employee of any bakery, hotel, boardinghouse, restaurant, lunch counter, or other place where food or drink is served to the public.

(b) An employer that furnishes board as compensation, or part of the compensation of any employee.

CHAPTER 7. IMITATION ICE CREAM AND ICE MILK

Article 1. General Provisions

39151. The ingredients, except fruits, nuts, and flavors, which are used in the manufacture of imitation ice cream or imitation ice milk, shall be pasteurized.

39152. Imitation ice cream and imitation ice milk shall otherwise be manufactured, advertised, and sold pursuant to regulations which are adopted by the director.

39153. It is unlawful for any person to sell imitation ice cream or imitation ice milk in bulk for purpose of resale.

Article 2. Imitation Ice Cream and Ice Milk Standards

39181. Imitation ice cream and imitation ice milk are substances, mixtures, or compounds which are made in the imitation of, or which have the appearance of, ice cream or ice milk, and which contain any edible oil or fat, except milk fat, or which contain solids other than milk solids not fat except stabilizer, fruits, nuts, chocolate syrup, or sweetening.

39182. Imitation ice cream shall contain not less than 10 percent of edible oil or fat.

39183. Imitation ice milk shall contain not less than 2 percent of edible oil or fat, nor more than six-tenths of 1 percent of pure and harmless edible stabilizer which is approved by the director.

39184. Imitation ice cream or imitation ice milk, at the time of sale by the manufacturer or retailer, shall not contain more than 75,000 bacteria per gram. Imitation ice cream and imitation ice milk shall otherwise conform to the composition and weight requirements which are specified in regulations of the director.

Article 3. Labels and Signs

39211. Every container of imitation ice cream or imitation ice milk shall be conspicuously so labeled, and every place where imitation ice cream or imitation ice milk is sold, shall display a conspicuous, legible sign which contains the words "imitation ice cream sold here" or "imitation ice milk sold here", as the case may be, in plain, block letters that are not less than six inches high. The sign display requirements

of this section shall not apply to any place, except any vending machine whether mobile or otherwise, where imitation ice cream or imitation ice milk is sold in properly labeled consumer packages or containers for off-premises consumption.

39212. If a trade name is used on any vehicle which conveys, or any place where imitation ice cream or imitation ice milk is sold, the words "imitation ice cream" or "imitation ice milk", shall be the same size as the largest letters used in the trade name and as conspicuously placed. In no case shall the letters in the words "imitation ice cream" or "imitation ice milk" be less than six inches high.

39213. A person shall not use the name "creamy," "creamery," or "dairy," or the representation of a cow or any breed of dairy cattle, or any combination of such words, symbols, marks, designs, or representations commonly used in the sale, advertising, or distribution of ice cream.

39214. Milk shakes, malted milks, or malts, as such terms are commonly used in the restaurant, confectionary, or soft drink trade shall not be made from imitation ice cream or imitation ice milk or served to any customer for consumption upon the premises where they are made unless there is displayed upon such premises and visible to all customers a sign, which, as the case may require, shall read: "Imitation ice cream used in the milk drinks served here" or "Imitation ice milk used in the milk drinks served here."

Each such sign shall be printed in plain block letters not less than six inches high.

CHAPTER 8. OLEOMARGARINE AND IMITATION CHEESE

Article 1. General Provisions

39351. Except as otherwise provided, the provisions of this code which relate to oleomargarine or margarine are likewise applicable to colored oleomargarine or colored margarine.

39352. It is unlawful for any person knowingly to ship, or for any carrier for hire knowingly to receive for shipment, any oleomargarine or margarine, substitute for butter, or substitute for cheese, unless it is labeled in conformity with this chapter and shipped and receipted for in its true name, or unless it is in transit between foreign states.

39353. It is unlawful for any person knowingly to possess or have under his control any oleomargarine or margarine, substitute for butter, or substitute for cheese, except for actual consumption by himself or his family, unless it is labeled in conformity with this chapter.

Article 2. Labeling of Shipping Containers

39381. Each person that manufactures any oleomargarine or margarine, any substitute for butter, or any substitute for

cheese shall comply with the requirements prescribed by this article.

39382. There shall be printed, stamped, or stenciled in a clear and durable manner upon one side of each tub, firkin, box, or other outer package in which oleomargarine, margarine, substitute for butter, or substitute for cheese is removed from the place where it is produced or put up, as distinguished from the package in which it is to be put up for sale or sold at retail, all of the following:

(a) The words "oleomargarine", "margarine", "substitute for butter", or "substitute for cheese", as the case may be, in plain roman letters of not less than 36-point type.

(b) A statement, which is printed in plain roman type, of a size not smaller than pica, which states the name and address of the manufacturer or of the distributor.

39383. The absence of the markings and the labelings which are specified in this article is a representation that the package does not contain oleomargarine or margarine, or a substitute for butter, or substitute for cheese.

Article 3. Labeling of Retail Packages

39411. It is unlawful for any person to sell any colored oleomargarine or colored margarine, or any oleomargarine or margarine, unless there is printed upon the label of each and every package, or other container in which such oleomargarine or margarine, or colored oleomargarine, or colored margarine is put up for sale or sold at retail all of the following:

(a) The words "oleomargarine", or "margarine", as the case may be, in letters which are at least as large as any other type or lettering on such label. The word "oleomargarine" or "margarine" shall be of a color in strong contrast to the color of the container.

(b) The name and address of the manufacturer or distributor.

(c) The net weight of the contents.

(d) A full and accurate statement of all the ingredients which are contained in the substance in the package.

Article 4. Misrepresentation

39431. A person shall not sell or take orders for the future delivery of any oleomargarine or margarine, or any substance which is designed to be used as a substitute for butter or substitute for cheese, under the name of butter or cheese, or under the pretense that the substance is butter or cheese.

39432. A person shall not, in connection or association with the sale or advertisement of any oleomargarine or margarine or any substance which is designed to be used as a substitute for butter or as a substitute for cheese, represent or suggest by any means whatsoever that such substance is a

dairy product. Nothing contained in this section shall, however, prevent an accurate and full statement of all of the ingredients which are contained in such substance.

Article 5. Sign or Notice Requirements

39461. The following persons shall not place before any patron or employee, for use as food, any oleomargarine or margarine or any substitute for butter or substitute for cheese, unless there is displayed in a prominent place in each room where the meals are served, a sign which bears the words: "oleomargarine served here", "margarine served here", "substitute for butter served here", or "substitute for cheese served here", as the case may be, in blackfaced letters of not less than four inches in height upon a white background, or unless such words are printed on a menu which is furnished to such patrons or employees, in legible type, no smaller than that which is used to describe other food items on the menu, and upon the same portion of the menu where other food items are described:

(a) The keeper or proprietor, person in charge, or employee of any bakery, hotel, boardinghouse, restaurant, lunch counter, or any other place where food or drink is served to the public.

(b) A person who furnishes board for others than members of his own family, or any employee where such board is furnished as compensation or as a part of the compensation of any employee.

Article 6. Oleomargarine or Margarine

39471. The following manufactured substances, mixtures, and compounds, with or without butter, milk, or cream, are "oleomargarine" or "margarine":

(a) All substances known prior to 1953 as oleomargarine, margarine, oleo, oleomargarine oil, butterine, lardine, suine, and neutral.

(b) All mixtures and compounds which contain any edible oils or fats except milk fat.

(c) All mixtures and compounds which contain milk fat that do not conform to the standard for butter, and which are made in imitation or semblance of butter or, when so made, which are intended to be sold as or for butter or butter substitute.

Article 7. Colored Oleomargarine or Colored Margarine

39491. Colored oleomargarine or colored margarine is oleomargarine or margarine which has a tint or shade that contains more than 1.6 degrees of yellow, or of yellow and red collectively, but with an excess of yellow over red, measured in terms of the Lovibond tintometer scale or its equivalent.

39492. Colored oleomargarine or colored margarine may be sold at retail for consumption off the premises but shall not be sold except in a package or container which contains one pound or less.

39493. Colored oleomargarine or colored margarine shall not be served to any patron in any restaurant or any other place where food is served to the public for consumption on the premises of sale unless both of the following requirements are satisfied:

(a) The patron has specifically requested such colored oleomargarine or colored margarine.

(b) The colored oleomargarine or colored margarine is served to the patron in chips or patties which are triangular in shape or which have stamped upon them the words "oleomargarine" or "margarine".

Article 8. Substitutes or Imitations of Cheese

39521. Every article, substance, or compound, other than that produced from cream, milk or skim milk, evaporated or condensed skim milk, or nonfat dry milk solids, which is made in the semblance of cheese, and which is designed to be used as a substitute for cheese, is imitation cheese. The use of salt, rennet, or harmless coloring matter for coloring the cheese made from cream, milk or skim milk, evaporated or condensed skim milk, or nonfat dry milk solids, does not, however, render such product an imitation.

39522. Except as otherwise provided in this article, it is unlawful for any person to manufacture, sell, use, or to serve to patrons, guests, boarders, or inmates in any hotel, eating house, restaurant, public conveyance, boardinghouse, public or private hospital, asylum, or eleemosynary or penal institution, any imitation cheese which is colored in imitation of cheese by whatever means the coloring is accomplished.

39523. Substitutes for cheese which do not resemble cheese may be sold under regulations of the director in such manner as will advise the purchaser of the real character of the product.

39524. Any substitute or imitation of cheese, which is colored in imitation of cheese, may be manufactured, sold, or possessed in this state only for export to points outside of all of the following:

(a) The United States

(b) The territories of the United States.

(c) The territorial possessions of the United States.

DIVISION 16. CERTIFICATION, PROCESSING AND CANNING, AND CANNED FOODS

CHAPTER 1. CERTIFICATION OF AGRICULTURAL PRODUCTS

Article 1. General Provisions

40501. This chapter does not apply to any investigation which is made or any certificate which is issued by any of the following:

(a) Any person, firm, or corporation in respect to canned or dried fruit which is shipped, packed, or stored by it.

(b) Any bona fide chamber of commerce, board of trade, or other bona fide nonprofit association of producers or merchants in respect to canned or dried fruit which is sold, shipped, packed, or stored by any of its members or other persons for whom it may make any such inspection or issue any such certificate.

40502. The director may cooperate with the United States Department of Agriculture in carrying out this chapter.

Article 2. Investigation and Certification

40531. The director may investigate and certify to shippers or other financially interested parties the analysis, classification, grade, quality, or condition of any fruit, vegetable, or other agricultural product, either raw or processed, under such regulations as he may prescribe, including the payment of reasonable fees.

40532. Every certificate which relates to the analysis, classification, condition, grade, or quality of any agricultural product, either raw or processed, and every duly certified copy of such certificate, shall be received in all courts of the State of California as prima facie evidence of the truth of the statements which are contained in it, if duly issued in accordance with any of the following:

(a) By the director under authority of this code.

(b) In cooperation between federal and state agencies, authorities, or organizations under authority of an act of Congress and an act of the legislature of any state.

(c) Under authority of a federal statute.

40533. Any certificate which is issued by the state pursuant to this chapter or by any person shall truly state the grade, quality, and condition of the product which is certified. A true copy of any such certificate shall be furnished to the director or to the commissioner of the county where the shipment originated, on demand which is made in writing.

Article 3. Funds

40561. Any money which is collected pursuant to this chapter shall be paid into the Department of Agriculture Fund.

40562. Within 90 days after the end of each fiscal year, the director shall prepare a statement which shows the receipt and expenditure during the fiscal year of funds provided for in this chapter. He shall, upon written request, forward a copy of this report to any party that is financially interested in the inspection work which is conducted pursuant to this chapter.

CHAPTER 2. STANDARDS FOR TOMATOES FOR CANNING OR DEHYDRATION

Article 1. Definitions

40701. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

40702. "Canning purposes" means the packing of commercially canned tomatoes, the manufacture of tomato paste, tomato puree, tomato pulp, tomato catsup, tomato sauce, tomato juice, and similar manufactured tomato products wherein the contents of the product is all, or practically all, made up of tomatoes.

40703. "Fairly well colored" means that the average color of the tomato flesh is two-thirds good red tomato color.

40704. "Well colored" means that the average color of the tomato flesh is 90 percent good red tomato color.

Article 2. General Provisions

40731. The official standards which are established by this chapter are the only standards of quality for canning tomatoes. The provisions of any contract to sell canning tomatoes or to deliver them on consignment, which prescribe other or different standards, are ineffective, and in such contracts the standards which are prescribed by this chapter shall be implied by law.

40732. The standards which are established by this chapter shall be considered as a grade under Chapter 1 (commencing with Section 40501) of this division. If a marketing order is issued pursuant to Chapter 1 (commencing with Section 58601), Part 2, Division 20 of this code, which establishes uniform grading and inspection for canning tomatoes, then and so long as it is effective the provisions of such marketing order shall control and the provisions of Sections 40841 to 40848, inclusive, are ineffective as to tomatoes which are covered by such marketing order.

40733. The provisions of this chapter which apply to tomatoes for canning purposes apply with like force and effect to tomatoes for dehydration, except as to requirements for minimum color or unless otherwise expressly distinguished.

Article 3. Regulations

40761. The director by regulation may do all of the following:

(a) Prescribe methods of selecting samples of lots, loads, or containers of tomatoes for canning purposes which shall be reasonably calculated to produce by such sampling fair representations of the entire lot, load, or container sampled.

(b) Establish and issue official color charts which depict the color standards and requirements which are established in this chapter, which shall be as near as possible in color to the standards and requirements which are shown on the "California Standard Color Chart for Canning Tomatoes" which was issued by the California State Department of Agriculture, Bureau of Fruit and Vegetable Standardization in 1942.

(c) Adopt and enforce such other regulations as are reasonably necessary for the enforcement of this chapter.

Article 4. Powers of the Director

40781. The director may, for the purpose of inspection, enter any place where tomatoes for canning purposes may be found and take for inspection such representative samples as may be necessary to determine whether or not any uncertified lot or load of tomatoes complies with the standards which are established by this chapter, and the percentage of tomatoes which are not suitable for canning purposes. He may subject such samples of tomatoes to any method of inspection or testing.

40782. The director may cause the prosecution of any person violating any provision of this chapter, and may seize and hold such portion of any lot or load of tomatoes for canning purposes involved in such a violation, as may in his judgment be necessary as evidence.

Article 5. Inspection and Certification by the Director

40811. The director shall inspect all deliveries of tomatoes for canning purposes, except those which are accompanied by a certificate that is issued in accordance with Chapter 1 (commencing with Section 40501) of this division.

40812. If the director finds that the tomatoes which are being delivered conform with the standards of Article 6 (commencing with Section 40841) of this chapter as being suitable for canning purposes, he shall issue a certificate which shows all of the following:

(a) The percentage of tomatoes that are suitable for canning purposes for each delivery.

(b) Separately, the percentage of tomatoes in each delivery which are not suitable for canning under subdivision (a), under subdivision (b), and under subdivisions (c) to (f), inclusive, of Section 40844.

(c) The percentage of tomatoes that are suitable for canning purposes which are well-colored and fairly well-colored.

40813. If the director finds that any delivery of tomatoes is not suitable for canning purposes, he shall issue a rejec-

tion order pursuant to Sections 40845 to 40847, inclusive. Except as otherwise provided in Sections 40814 to 40816, inclusive, inspection shall be performed at the cannery or at a receiving station which is established or designated by the canner.

40814. The director may review the operation of any inspection station which is not located at a cannery during a period beginning November 1st of any year and ending not less then 30 days before the date inspection began at such station in the preceding year and, if the director determines that the interest and economy and efficient operation of the inspection service would be served, he may, with the consent of each canner that is involved, terminate inspection at such place.

40815. If the canners fail to consent to such termination prior to the date which is set forth in Section 40814, the director may hold a hearing to consider the termination of inspection at such place. At the hearing testimony of the canners and growers that use such station shall be heard.

40816. The director may announce to all of the parties of record, that will be affected by such action, that inspection is terminated for the ensuing season at an inspection station which is not located at a cannery if he makes all of the fol lowing findings:

(a) Termination of inspection at such station will satisfactorily accomplish the objectives of the inspection service and tend to provide economical and efficient operation.

(b) No unreasonable burden will be imposed upon canners or growers.

(c) Tomatoes which are normally inspected at such station will not have to be hauled an unreasonable distance to be inspected at another point.

40817. The director is not required to perform inspection at any place where adequate inspection facilities are not provided.

40818. The inspection certificate which is issued pursuant to this chapter is prima facie evidence of the percentage of defects according to the definition of such defects as defined in this chapter.

Article 6. Standards

40841. Tomatoes for canning purposes, except hard green tomatoes for use in the manufacture of green tomato products, shall conform to the standards which are prescribed in this article.

40842. Tomatoes for canning purposes, except pear or plum types, shall be vine-ripened.

40843. Tomatoes shall not be regarded as suitable for canning purposes if the delivery contains spray residue which cannot be removed by washing in plain water in order to meet the tolerances which are permitted by Section 12671 of this code.

40844. A tomato shall not be regarded as suitable for canning purposes if, as established by inspection of a representative sample, it has any of the following defects:

(a) Any worm or worm damage is present which has penetrated the flesh of the tomato.

(b) In excess of 10 percent of the weight of the tomato cannot be used for canning purposes due to the presence of mold.

(c) In excess of 20 percent of the weight of the tomato cannot be used for canning purposes due to the presence of rot.

(d) In excess of 25 percent of the weight of the tomato cannot be used for canning purposes due to the presence of sunburn, sunscald, growth cracks, insect bites, pest infections, hail damage, green or yellow color at the stem end, or other imperfections which are not specified in this article.

(e) The tomato is sufficiently overripe to make it useless for canning purposes.

(f) The tomato is shriveled, frozen, or frosted.

(g) The tomato is not well colored or fairly well colored.

40845. Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if in excess of 10 percent of the delivery, by weight, does not comply with subdivisions (a) and (b) of Section 40844.

40846. Any load of tomatoes which is offered for delivery to a cannery shall be rejected and turned back to the grower if in excess of 15 percent of the delivery, by weight, does not comply with subdivisions (a) to (g), inclusive, of Section 40844.

40847. Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if less than 5 percent of the delivery by weight is well colored. The enforcing officer may affix a warning tag or notice to such rejected load.

40848. The size of tomatoes shall be determined by contract between buyer and seller, but in no event shall the minimum contract size be more than two inches in diameter, if the tomatoes are measured through the widest portion of the cross-section. There shall, however, be no minimum size on pear or plum types of tomatoes.

Article 7. Contract Inspection

40871. Each load of tomatoes which is offered for delivery by a grower to a canner in accordance with the terms of a contract between them shall be given such inspection as may be required without undue delay and within a reasonable time after such load arrives at the cannery or other point which is specified for such inspection.

40872. Any load of tomatoes which is so offered for inspection and delivery that is rendered unsuitable for canning purposes as a direct result of unwarranted delay in inspection, willfully or negligently caused or permitted by the canner, shall be paid for by the canner at the full price that is agreed

upon for tomatoes suitable for canning purposes and on the basis that such tomatoes were of the grade, quality, and condition which is stipulated in the contract.

If no price is stipulated in the contract, payment shall be made by the canner to the grower on the basis of the then prevailing market price for tomatoes of the grade, quality, and condition which is specified in the contract.

40873. In addition to any other remedy, the grower so offering for inspection and delivery any load of tomatoes that has incurred any added handling costs as a direct result of the unwarranted delay in inspection and delivery, willfully or negligently caused or permitted by a canner, may recover the amount of such added handling costs by an action at law against such canner.

40874. Delay in such inspection and acceptance for delivery for a period of six hours or more after a load of tomatoes is offered for inspection and delivery in accordance with the terms of a contract between the grower and the canner, except during 15 24-hour peak periods in any canning season, shall be prima facie evidence that such delay was unwarranted and caused by willfulness or negligence on the part of the canner.

During 15 24-hour peak periods in any tomato canning season, delay in such inspection and acceptance of delivery shall not be prima facie evidence that such delay was caused by willfulness or negligence on the part of the canner unless such delay covered a period of more than 12 hours. Such peak periods are the periods of maximum delivery as shown by the records of the canner and shall be designated by the canners for each cannery or other specified inspection point promptly after the close of each tomato canning season by posting a notice of the peak periods for each cannery or inspection point in a conspicuous place at such cannery or inspection point.

40875. No grower shall have any rights under this article unless he shall register each load of tomatoes with the canner at the time he offers such load for inspection and delivery. Such registration shall be made by obtaining from the canner a certificate, which such canner is, by this provision, required to furnish, that states the time of arrival of the load at the cannery or other specified inspection point.

Article 8. Discrimination by Canner in Furnishing Picking Boxes

40901. The failure of a canner willfully and without due cause to furnish vegetable or deciduous fruit picking boxes to a grower as agreed upon, or any willful discrimination against any grower in this regard, shall subject such canner to an action for all damages which are sustained by the grower as a direct result of such failure or discrimination, and judgment against any such canner may be entered in the dis-

cretion of the court either for the amount of the damages sustained or for three times such amount. Treble damages may, however, only be awarded if the grower has furnished the canner written notice of the claimed failure or discrimination within 48 hours after the claimed failure or discrimination.

40902. This article does not affect existing remedies for the violation of a contract but is in addition to such existing remedies.

Article 9. Fees

40931. The director shall adopt a schedule of uniform fees to defray the cost of the inspection and of the certification which are required by Article 5 (commencing with Section 40811 of this chapter).

40932. Each canner that receives deliveries of tomatoes for canning purposes is hereby designated as the authorized agent of the director to collect the inspection and certification fees which are chargeable to such canner and to each producer that delivers such tomatoes.

40933. The cost of such inspection shall be borne equally by both the canner and the producer, but the total cost of such inspection shall in no event exceed forty cents ($0.40) per ton.

40934. Any money which is collected pursuant to the provisions of this article shall be remitted to the director weekly during the tomato canning season for deposit into the Department of Agriculture Fund to be used in carrying out the purposes of this chapter.

40935. Except as otherwise provided in this article, any money which is so collected and not used for the purposes of this chapter shall be returned to the canners from whom it was received for distribution to the canners and producers from whom the money was originally collected, in proportion to their several interests.

40936. If the director determines, as to any such money heretofore or hereafter collected as inspection and certification fees, that the return of the money with respect to any canning season is impracticable because of the smallness of the amounts returnable, or for any other reason, the money so collected shall not be so returned but shall remain in the Department of Agriculture Fund and be available for expenditure for the purposes of this chapter in any subsequent year.

Article 10. Violations

40961. It is unlawful for any person to make delivery or for any person to accept delivery of tomatoes for canning purposes, or to can or to process any tomatoes, which have not first been inspected and certified as provided in Article 5 (commencing with Section 40811) of this chapter, or which have been rejected as provided in Sections 40845 to 40847, inclusive.

40962. It is unlawful for any person to deliver to a canner or for any canner to accept delivery of any load of tomatoes which has been rejected for failing to comply with the standards which are established by this chapter until such load has been reconditioned to comply with the standards, reinspected, and a certificate issued by the proper enforcing officer.

40963. It is unlawful for any person to remove, deface, or destroy, any warning tag or notice which has been placed by a proper enforcing officer upon a rejected lot or load of tomatoes for canning purposes

CHAPTER 3. GRAPES FOR BYPRODUCTS

Article 1. General Provisions

41101. The director shall have supervision and control over the commissioners and their deputies or inspectors in the performance of their duties under this chapter.

41102. The certificates which are provided for in this chapter are prima facie evidence before any court in this state of the true average soluble solids test of all of the grapes in the lot or load under consideration.

Article 2. Exceptions

41131. This chapter does not apply to grapes which are marketed by or through a nonprofit cooperative marketing association unless the board of directors of the association elects to have the soluble solid determination of the grapes of its members determined as provided in this chapter and notifies the agricultural commissioner of each county in which the association operates any winery of such election.

41132. This chapter does not affect the right of a purchaser of grapes for byproducts purposes to specify a minimum percentage of soluble solids as a definition of maturity of the grapes if the price which is to be paid is to be determined other than on the basis of the soluble solid contents of the grapes.

Article 3. Determination of Soluble Solids Generally

41161. In order to prevent fraud and deception in any transaction which involves fresh grapes for byproducts purposes, that requires the extraction or pressing out of the juice, in which the average percentage of soluble solids in the juice of such grapes is the basis for the amount of the purchase price, the determination of such average percentage of soluble solids shall be made by the commissioner or his deputies or his inspectors.

41162. Each lot or load of such grapes which is delivered shall be tested at or immediately after the time of delivery and the average soluble solids test of the juice of such grapes shall

be certified to by such officer, in accordance with regulations which are prescribed by the director.

41163. Each commissioner shall provide for the taking of samples, making tests, and issuing the certificates which are required in this chapter.

41164. The board of supervisors of the county shall establish a scale and method of collection of fees, to be paid for each such certificate which is provided for in this chapter. The scale of fees which are established for such certificates shall be based upon the approximate cost of the inspection, sampling, and testing which is necessary to the certification of the percentage of the soluble solids in each lot or load of grapes. Such certification fee shall be paid by the person that accepts delivery of such grapes.

Article 4. Determination of Soluble Solids by the Director

41191. Notwithstanding any other provisions which are contained in this chapter and in lieu of such determinations by the commissioner, the director may make determinations of the average percentage of soluble solids in the juice of fresh grapes and certify, by the issuance of a certificate, to marketing order advisory boards, handlers, associations, or financially interested persons the determinations and findings which are so made if both of the following conditions are satisfied:

(a) A marketing order is made effective or the director is requested to determine the average percentage of soluble solids as required by this chapter by any person that is engaged in the business of purchasing fresh grapes for byproducts or processing purposes which require the extraction or pressing out of the juice of the grapes.

(b) The director and the commissioner determine that such determinations can be more effectively made by the director.

41192. For the purpose of carrying out this article, the director may establish necessary regulations, including reasonable fees which are to be charged for such services and for the acceptance of advance fees to effectuate such determination. Any fees which are so established shall be based upon the approximate cost of the service which is rendered.

41193. Any money which is received pursuant to this article shall be paid into the Department of Agriculture Fund to be expended in carrying out this article.

Chapter 4. Canned Foods

Article 1. General Provisions

41301. This chapter provides certain standards of quality, condition, or fill of container and requirements for marking of fruits and vegetables, including olives, which are packed in tin or glass containers.

41302. Any act which is made unlawful by any provisions of Chapter 3 (commencing with Section 26450), Division 21 of the Health and Safety Code is not made lawful by reason of any provision of this part. This part does not limit the powers of the State Board of Health.

41303. Any person or any common carrier may refuse to accept for shipment or transportation, and may refuse to ship or to transport, any canned fruit, including olives, which upon inspection are found to be, or to be packed, in violation of this chapter. Any such person or common carrier may reserve the right in any receipt, bill of lading, or other writing which is given to the consignor, to reject for shipment or transportation and to return to such consignor, or to hold at the expense and risk of the consignor, all canned fruit, including olives, which upon inspection are found to be, or to be packed, in violation of this chapter.

41304. This chapter does not apply to olives which were packed prior to October 1, 1931, or to other fruit which was packed prior to January 1, 1930.

Article 2. Enforcement

41331. The Director of Public Health shall be charged with the enforcement of this chapter and for that purpose he shall have all the powers heretofore conferred upon the Director of Agriculture.

41332. The Director of Public Health, for the purpose of enforcing this chapter, may do all of the following:

(a) Enter and inspect every place within the state where canned fruits or vegetables, including olives, are canned, stored, shipped, delivered for shipment, or sold, and inspect all fruits or vegetables, including olives, and containers which are found in any such place.

(b) Seize and retain possession of any canned olives or canned fruits or vegetables which are packed, shipped, delivered for shipment, or sold in violation of any provision of this chapter, and hold them pending the order of the court.

(c) Cause to be instituted and to be prosecuted in the superior court of any county of the state in which may be found canned olives or canned fruits or vegetables which are packed, shipped, delivered for shipment, or sold, in violation of any provision of this chapter, an action for the condemnation of canned olives or canned fruits or vegetables as provided by Chapter 3 (commencing with Section 26450), Division 21 of the Health and Safety Code.

Article 3. Standards Generally

41361. The following fruits and vegetables shall not be canned, packed, shipped, or sold within this state:

(a) Fruits or vegetables which are unclean, immature, mouldy, overripe, infested with brown rot, scab, shothole

fungus, or other defects to the extent of rendering the product unwholesome.

(b) Olives which are unclean, immature, mouldy, overripe, infested with fungus, rot, or other defects to the extent of rendering the product unwholesome.

(c) Olives which are processed or artificially colored to the extent that the meat has been turned black, or the flavor has been impaired.

41362. In addition to the standards and requirements which are prescribed by Section 41361, the standard of quality, condition, and fill of container and requirements for marking of canned fruits and vegetables, including olives, are those which are promulgated or to be promulgated by the Secretary of the United States Department of Agriculture.

The markings for canned ripe olives which are prescribed by this chapter shall be enforced until such time as requirements for markings for canned ripe olives shall be promulgated by the United States Department of Agriculture, at which time the above markings for canned ripe olives shall be changed to comply with the regulations of the United States Department of Agriculture.

Article 4. Grades of Canned Olives

41391. Canned olives are seconds if they have any of the following defects:

(a) The fruit is not of firm texture.

(b) The fruit is not reasonably free from woody, spotted, shriveled, misshapen, or otherwise defective olives serious for the grade.

(c) The fruit is not reasonably uniform in size for the variety which conforms to the size as marked.

(d) The fruit is not reasonably free from mixed varieties.

(e) The fruit has any foreign disagreeable flavor.

The specifications as to quality and uniformity of size of olives shall apply to olives which are packed in tin or glass containers of all sizes whether or not such sizes are specifically designated in this chapter.

41392. Ripe olives of better grade are, in the rising order of grade and quality, "choice" and "fancy."

Article 5. Size Standards Generally for Canned Ripe Olives

41421. Except as otherwise provided in Section 41423, if the following size names are used for canned ripe olives, the count per pound, as determined by the examination of a representative sample of the olives which are taken at random from the container, shall be as follows:

(a) "Small," "select," or "standard(s)" shall average 135 to the pound.

(b) "Medium" shall average 113 to the pound.

(c) "Large" shall average 98 to the pound.

(d) "Extra large" or "picnic" shall average 82 to the pound.

(e) "Mammoth" or "gem" shall average 70 to the pound.

(f) "Giant" shall average 53 to 60 to the pound.

(g) "Jumbo" shall average 46 to 50 to the pound.

(h) "Colossal" shall average 36 to 40 to the pound.

(i) "Supercolossal" shall not exceed 32 to the pound.

41422. In determining the count per pound of the olives, the sample shall be weighed so as to determine its weight by pounds, ounces, and fractions of an ounce.

41423. A tolerance of 7½ percent by count, above or below the count per pound which is prescribed, shall be allowed if any of the size names which are described in subdivisions (a) to (e), inclusive, of Section 41421 is used. "Small," "select," or "standard(s)" shall not, however, count less than an average of 128 or more than an average of 140 to the pound. No tolerance shall be allowed if any of the size names which are described in subdivisions (f) to (i), inclusive, of Section 41421 are used.

Article 6. Size Standards for Blended Sizes of Canned Ripe Olives

41451. If any of the following size names are used for blended sizes of canned ripe olives, the count per pound, as determined by a representative sample of the olives which are taken at random from the container, shall be as follows:

(a) "Family" shall average not less than 91 nor more than 105 to the pound, the blend to contain not more than 15 percent by count of the standard size grade.

(b) "King" shall average not less than 45 nor more than 53 to the pound, the blend to contain not more than 15 percent by count of the mammoth size grade.

(c) "Royal" shall not exceed 34 to the pound.

In determining compliance with these size designations of blended olives, there shall be no tolerance from the maximum and minimum counts of each blended size.

Article 7. Disposition of Ripe Olives Which Are Below Specified Sizes

41471. The following varieties of ripe olives which are below the specified sizes shall not be packed, shipped, delivered for shipment, or sold within this state, as whole or pitted or broken pitted canned ripe olives:

(a) Mission and Manzanillo varieties under standard size.

(b) Obliza variety under medium size.

(c) Ascolano, St. Agostino, and Barouni varieties under extra large size. Any of such varieties which are packed in the extra large size shall be designated and labeled "picnic" size only and no other varieties nor sizes of such variety shall be so labeled or designated.

(d) Sevillano variety under mammoth size. Any of such variety which are packed in the mammoth size shall be designated and labeled "gem" size only, and no other varieties nor sizes of such variety shall be so labeled or designated.

(e) All other varieties under mammoth size.

Article 8. Standard Cans for Ripe Olives

41501. The standard size of cans for canned ripe olives which are packed, shipped, delivered for shipment, or sold in the state are as follows:

(a) Buffet can, which is a cylindrical can $2\frac{11}{16}$ inches in diameter by 3 or $3\frac{1}{4}$ inches in altitude.

(b) Six-ounce, which is a cylindrical can $2\frac{11}{16}$ inches in diameter and 4 inches in altitude.

(c) No. 1 tall, which is a cylindrical can 3 inches in diameter and $4\frac{21}{32}$ inches in altitude.

(d) Cylinder pint, which is a cylindrical can $2\frac{11}{16}$ inches in diameter and 6 inches in altitude.

(e) Cylinder quart, which is a cylindrical can $3\frac{3}{8}$ inches in diameter and $7\frac{1}{4}$ inches in altitude.

(f) No. $2\frac{1}{2}$, which is a cylindrical can 4 inches in diameter and $4\frac{11}{16}$ inches in altitude.

(g) No. 10, which is a cylindrical can $6\frac{1}{8}$ inches in diameter and $6\frac{15}{16}$ inches in altitude.

Article 9. Markings on Containers

41521. There shall be no false or misleading marking or designation on any container of canned fruit, vegetables, or ripe olives.

41522. In addition to any other marking or wording on the label, the label which covers the walls of a container of olives, except olives which are packed in clear glass, shall show a cut or imprint which represents the approximate size of the fruit, followed by a statement of the approximate number of olives which are contained in the can.

41523. If blended sizes of olives are packed, the approximate size of the blended olives in the container shall be shown by one of the following:

(a) A cut or imprint which represents a size that is no larger than the average size in the container.

(b) By cuts or imprints, which appear in combination or in close proximity on the label, of the smallest and largest sizes in the container, with a declaration that the olives in the container range in size between the two sizes which are shown.

41524. Except as otherwise provided in Section 41525, all canned olives which are shipped, delivered for shipment, or sold in the state of the grade of "seconds" shall be clearly, indelibly, and permanently marked "seconds" in letters not less than one-fourth of an inch high, embossed or lithographed in

the tin of the top or cover of the can unless the space of the lid is insufficient. If the space of the lid is insufficient, the letters shall be as large as practicable for the space on the lid.

41525. All canned ripe olives of the grade of "seconds" shall, in lieu of the marking requirements which are prescribed by Section 41524, be prominently marked "seconds" on the label in conjunction with the name of the contents if such name appears in 14-point Cheltenham bold type surrounded by a 10-point border on a contrasting solid background.

Article 10. Violations

41551. Except as otherwise provided in Section 41552, any person, firm, company, or corporation that violates any provision of this chapter is guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than five dollars ($5) nor more than five hundred dollars ($500), or shall be imprisoned in the county jail for a term not exceeding six months, or by both such fine and imprisonment.

41552. A person shall not be convicted of a violation of any provision of this chapter if such person establishes a guaranty, which is signed by the person that resides or is lawfully engaged in business in the state, by or for whom the canned fruit, including olives, in question were originally packed, to the effect that the product in question complies in all respects with the provisions of this chapter. Such guaranty, to afford protection, shall contain the name and address of the party that made such guaranty. Such guarantor shall be amenable to all of the prosecutions, fines, and penalties which are provided for by this chapter.

41553. One-half of all fines which are collected by any court or judge, for the violations of the provisions of this chapter shall be paid to the State Treasurer for credit to the General Fund.

Article 11. Abatement

41581. If the Director of Public Health finds, after investigation and examination, that any canned fruits or vegetables, including olives, which are found in the possession of any person, firm, company, or corporation are misbranded or mislabeled within the meaning of this chapter, he may seize such canned fruits or vegetables, including olives, and tag them "quarantined". Such canned fruits or vegetables, including olives, shall not thereafter be sold, removed, or otherwise disposed of pending a hearing and final disposition as provided by Chapter 3 (commencing with Section 26450), Division 21 of the Health and Safety Code.

41582. Canned fruits or vegetables, including olives, which are found to be mislabeled or misbranded within the meaning of this chapter may, by order of any court or judge, be seized and destroyed.

DIVISION 17. FRUIT, NUT, AND VEGETABLE STANDARDS

CHAPTER 1. DEFINITIONS

42501. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

42502. "Agent" means broker, commission merchant, auctioneer, solicitor, seller on consignment, and any other person that is acting upon the actual or implied authority of another.

42503. "Bulk lot" or "bulk load" of any fresh or dried fruit, nut, or vegetable means any one group of specimens of such product which is not in a container and which is set apart or is separate from any other group.

42504. "Byproduct" means any product which is commercially processed, preserved, or manufactured from fruits, nuts, or vegetables, except fresh citrus fruit juices, with or without the addition of other ingredients.

42505. "Closed container" means lidded container, as defined in Section 42511.

42506. "Container" means any box, crate, lug, chest, basket, carton, barrel, keg, drum, sack, or other receptacle.

42507. "Cross section" means the section of the fruit or vegetable that is taken at a right angle to a straight line which is drawn from the stem end to the distal end of the fruit or vegetable.

42508. "Deceptive arrangement" or "deceptive display" of fresh or dried fruits, nuts, or vegetables means any bulk lot or load, arrangement, or display of such products which has in the exposed surface, fresh or dried fruits, nuts, or vegetables which are so superior in quality, size, condition, or in any other respect so superior to those which are concealed, or the unexposed portion, as to materially misrepresent any part of the bulk lot or load.

42509. "Deceptive pack" means any container or subcontainer which has in the outer layer or any exposed surface, fruits, nuts, or vegetables which are in quality, size, condition, or in any other respect so superior to those in the interior of the container or subcontainer or in the unexposed portion as to materially misrepresent the contents. Such pack is deceptive if the outer or exposed surface is composed of products whose size is not an accurate representation of the variation of size of the products in the entire container, even though the fruits, nuts, or vegetables in the container are virtually uniform in size or comply with the specific commodity size variation requirements of this part.

42510. "Fruits, nuts, or vegetables" means the food product of any tree, vine, or plant.

42511. "Lidded container" and "closed container" are synonymous and, unless otherwise specifically defined in

this part, mean any container of which 40 percent or more of the opening is covered by any material in the form of a lid, cover, or wrapping of any kind.

42512. "Manufacturing" means processing, as defined in Section 42519.

42513. "Mature," except when otherwise specifically defined, means having reached that stage of ripeness which will insure the completion of the ripening process to a degree which will insure palatability, after the removal of the product from the tree, plant, or vine.

42514. "Mislabel" means the placing or presence of any false or misleading statement, design, or device, upon any of the following:

(a) Any container.

(b) The label or lining of any container.

(c) The wrapper of any fresh or dried fruit, nut, or vegetable.

(d) Any fruit, nut, or vegetable.

(e) Any placard which is used in connection with, and which has reference to, any fresh or dried fruits, nuts, or vegetables.

A statement, design or device is false or misleading, if the fresh or dried fruit, nut, or vegetable, or container to which it apparently or actually refers, does not conform in every respect to such statement, design, or device.

42515. "Overripe" means having reached an advanced state of maturity which causes the product to be undesirable for human consumption in a fresh state.

42516. "Pack," "packing," or "packed" means the regular compact arrangement of all or part of the fruit or vegetables in any container or subcontainer.

42517. "Placard" means any sign, label, or designation, except an oral designation, which is used in connection with any fresh or dried fruit, nut, or vegetable as a description or identification of it.

42518. "Preserving" means processing, as defined in Section 42519.

42519. "Processing" means canning, preserving, or fermenting, which materially alters the flavor, keeping quality, or any other property, the extracting of juices or other substances, or the making of any substantial change of form. It does not include refrigeration at temperatures which are above the freezing point nor any other treatment which merely retards or accelerates the natural processes of ripening or decomposition.

42520. "Subcontainer" means any container which is being used within another container.

CHAPTER 2. GENERAL PROVISIONS

Article 1. Enforcement

42651. The director and the commissioners of each county of the state, their deputies and inspectors, under the supervision and control of the director shall enforce this division.

42652. The refusal of any officer who is authorized under this division to carry out the orders and directions of the director in the enforcement of this division is neglect of duty.

42653. The director, through the chief of the branch of the department which has jurisdiction over the enforcement of this division, or any deputy, inspector, or agent of the department, may enforce and make inspections of grade, standard of quality, and other provisions of any fruit, nut, or vegetable marketing program which is adopted under the authority of the United States or of this state.

42654. The director may maintain state inspection stations at such places within this state as he deems necessary for the purpose of enforcing the standardization provisions of this code.

Article 2 Regulations

42681. The director by regulation may do all of the following:

(a) Prescribe methods of selecting samples of lots or containers of fruits, nuts, and vegetables on a basis of size or other specific classification, which are reasonably calculated to produce by such sampling fair representations of the entire lots or containers which are sampled.

(b) Establish and issue official color charts which depict the color standards and requirements which are established in this division.

(c) Make such other regulations as are reasonably necessary to secure uniformity in the enforcement of this division.

Article 3. Emergency Standards

42701. The director may, upon petition of persons that are interested in the growing or handling of fruits, nuts, or vegetables, or upon his own motion, establish emergency standards for any commodity or container, the marking of containers, or the arrangement of produce within the container if he makes any of the following findings regarding any provision of this division which relates to standards for such commodity or type of container, the markings which are required on any container, or the arrangement of the produce within a container:

(a) It is difficult or impossible of performance by reason of laws or orders which are promulgated by authority of the government of the United States.

(b) It is difficult or impossible of performance because of a scarcity of materials, labor, or equipment that is used in the production or marketing of any commodity which is regulated by this division.

(c) It results in serious waste of useful produce otherwise available for human consumption or in serious waste of other resources.

(d) It prevents utilization of new technological developments, to the serious disadvantage of producers in this state.

42702. Notwithstanding any other provision of this division, emergency standards shall be in full force and effect, until their expiration as provided in this division. Every provision of this division which applies to standards shall apply to such emergency standards in lieu of the standards which are set forth in this division.

42703. All emergency standards which are established pursuant to this article shall be reasonably calculated to effectuate the purposes of the standards which they supersede.

42704. No emergency standards shall be established which tend to raise or lower any standards which relate to the maturity or to the carrying or keeping quality of any commodity.

42705. Emergency standards shall not be construed to modify in any respect any provision of this division which is designed to prevent deception or mislabeling, or which is designed to prevent the marketing of produce which is unwholesome or which would fail to give consumer satisfaction.

42706. All emergency standards which are issued pursuant to this article shall, before they may become effective, be published in one or more newspapers, trade papers, or industry publications which are deemed best adapted to give notice to interested persons, together with a notice of the time and place for hearing objections to the emergency regulations. The hearing upon the emergency standards shall be not less than 10 nor more than 20 days from the date of publication.

42707. Notice of hearing shall be mailed not less than 10 days prior to the date of the hearing to all persons that have filed with the director a request for notice of such hearings.

42708. If, at the hearing, it is developed by competent testimony that additional time will be required to produce further essential evidence, the director shall continue the hearing to a date which will allow sufficient time for the production of such evidence.

42709. At the hearing, interested parties shall be heard and a record kept of the proceedings for determination by the director of the facts which are shown at the hearing.

42710. The director, upon his findings on the facts which are shown at the hearing, shall rescind, modify, or affirm the emergency standards as published

42711. The emergency standards, as modified or affirmed, shall take effect on the day which is appointed for them to

take effect, and shall continue in effect until suspended or rescinded by the director, or until the 91st day after adjournment of the next regular session of the Legislature, whichever first occurs.

42712. Emergency standards may be amended, suspended, or rescinded upon notice and hearing in the same manner as is provided for the establishment of such standards.

Article 4. Experimental Packs

42731. This division does not prohibit the preparation, packing, shipment, or sale under permit of the director, of fruits, nuts, or vegetables which do not conform to the count, arrangement, or packing requirements of the standards which are prescribed in this division, if each container of such fruits, nuts, or vegetables is conspicuously marked in letters which are not less than one-half inch in height, "Experimental Pack."

42732. Application for a permit shall be made to the director at least 15 days before shipment. The application shall state all of the following:

(a) The name of the product.

(b) The quantity intended to be shipped.

(c) The description of the count, arrangement, or method of packing which is to be used.

(d) The quantity of such product, if any, which was shipped by the applicant during the preceding year.

(e) If no shipments of such product were made by the applicant during the preceding year, an estimate of the total quantity which such applicant will ship during the current year.

42733. If the director finds that the count, arrangement, or pack is not deceptive or misleading in any manner, he may issue to the applicant a permit for the shipment, within a specified period which shall not exceed one year, of a specified quantity of the product which is packed as described in the permit. The permit is subject to renewal for an additional year upon a proper showing to the director, without a formal hearing, that the experiment has not been completed.

42734. If the applicant has shipped products of the kind which is specified in the application during the preceding year, a permit shall not be issued for the shipment of experimental packs of more than 5 percent of the quantity of any of such product which was shipped by such person in the preceding calendar year.

42735. Any type of pack for which a permit has been issued, which is in containers that are uniformly marked as provided in this article, and which is not in excess of the quantities that are specified in the permit, is an experimental pack within the meaning of this article.

Article 5. Inspection and Certification by the Director

42761. The director may inspect and certify to any marketing order advisory board, handler, association, or financially interested person the analysis, classification, quality, or condition of any fruits, nuts, vegetables, or other agricultural commodities. The director may adopt necessary regulations for the purpose of carrying out this article.

42762. The regulations may include reasonable fees which are to be charged for such services and for the acceptance of advance fees to effectuate such inspection. Any fees so established shall be based upon the approximate cost of the service to be rendered.

42763. Any money which is received pursuant to this article shall be paid into the Department of Agriculture Fund to be expended in carrying out this article.

Article 6. Inspection and Certification by a County Commissioner

42791. The commissioner of each county and any of his deputies who holds a valid certificate of qualification for the office to which such deputy has been appointed or any of his inspectors who holds a valid standardization certificate, may upon request, issue certificates which state that the fruits, nuts, or vegetables which have been inspected meet all the requirements of this division or the requirements of the state or country of intended destination.

42792. The certificate shall contain a description of the fruits, nuts, or vegetables which were inspected, including quantity, identifying marks on containers, identification of location or vehicle, and any other facts which are necessary to readily identify such lot.

42793. The board of supervisors of the county may establish a schedule of fees for the certificates to be paid by owners, shippers, or other interested parties that request such certificates The schedule of fees which is established for such certificates shall be based upon the approximate cost of the inspection which is necessary to determine that the fruits, nuts, or vegetables have met the requirements of this division or the requirements of the state or country of intended destination.

42794. Any lot of fruits, nuts, or vegetables which bears or is accompanied by a certificate of inspection that readily identifies such lot which was issued by any commissioner, deputy, or inspector who holds a valid standardization certificate, shall not be rejected from transportation or sale within this state for the purported violation of any provision of this division.

Such certified lot of fruits, nuts, or vegetables may, however, be held for inspection at any time by any enforcing officer who holds a valid standardization certificate. If such

enforcing officer shall find that the certified lot of fruits, nuts, or vegetables is in violation of any provision of this division he may appeal to the director who shall within 24 hours cause a reinspection to be made of the certified lot of fruits, nuts, or vegetables. The lot of certified fruits, nuts, or vegetables shall be released or rejected in accordance with the findings upon such reinspection.

Article 7. Powers of Enforcing Officers

42821. An enforcing officer may enter and inspect any place or conveyance within the county or district over which he has jurisdiction, where any fresh or dried fruits, nuts, or vegetables are produced, stored, packed, delivered for shipment, loaded, shipped, being transported, or sold.

He may inspect all fresh or dried fruits, nuts, and vegetables and their containers and equipment found in any such place or conveyance. He may also take for inspection, such representative samples of the produce and such containers, as may be necessary to determine whether or not this division has been violated and may subject such samples of produce to any method of inspection or testing.

42822. An enforcing officer shall cause the prosecution of any person whom he knows or has reason to believe is guilty of violating any provision of this division.

42823. Any enforcing officer may, while enforcing this division, seize and hold as evidence all or any part of any pack, load, bulk lot, consignment or shipment of fresh or dried fruits, nuts, or vegetables which is packed, delivered for shipment, loaded, shipped, or being transported, or sold in violation of this division, or any container of such product, as may in his judgment be necessary to secure the conviction of the party he knows or believes has violated or is violating any provision of this division.

42824. Any prosecution for the violation of any provision of this division may be made in any county where any part of the offense occurred.

42825. Any evidence which is taken by an enforcing officer in any county may be admitted in evidence in any prosecution in any other county.

Article 8. Samples

42851. Any sample which is taken pursuant to this division is prima facie evidence, in any court in this state, of the true conditions of the entire lot in the examination of which the sample was taken.

42852. A written notice of violation, which is issued by a duly qualified representative of the director or by any commissioner, or by any of their deputies and inspectors who holds a valid standardization certificate of qualification as an enforcing officer of this division, which states that a certain lot of

produce violates any provision of this division and based upon the examination of such sample, is prima facie evidence, in any court in this state, of the true condition of the entire lot.

Article 9. Warning Notices and Disposal Orders

42881. The enforcing officer may, and if requested by an enforcing officer of the county of destination shall, affix a warning notice to any vehicle or other means of transportation, or to any load or lot. of fruits, nuts, or vegetables which do not conform to the standards which are established by this division, whether or not the fruits, nuts, or vegetables are exempt from such standards, and serve a disposal order upon the owner or person that has custody or possession of any such load or lot.

42882. The warning notice, the disposal order which directs the proper disposition of such products, and the disposal order receipt to be signed by an enforcing officer at destination which confirms such disposition, shall be in the form which is specified by, and provided by, the director.

42883. The enforcing officer at the point of destination of such load or lot shall determine that the load or lot has been delivered to the consignee at the destination which is specified in the order and shall then release the load or lot and countersign the disposal order receipt so given to him. He shall immediately forward the receipt to the enforcing officer who served the disposal order.

42884. It is unlawful for any person to deliver any load or lot of fruits, nuts, or vegetables which is subject to a disposal order to any person or destination except the person or destination which is shown on the disposal order, unless he is specifically authorized in writing to do so by an enforcing officer.

42885. It is unlawful for any person to dispose of any load or lot of fruits, nuts, or vegetables which is subject to a disposal order prior to the release in writing of the load or lot by the enforcing officer at the point of destination. This section does not, however, make it unlawful for any person to unload and store any load or lot of fruits, nuts, or vegetables which is subject to a disposal order.

42886. It is unlawful for any person to use or dispose of any fruits, nuts, or vegetables, for which a disposal order has been issued, in any manner or for any purpose except the manner or purpose for which such disposal order was issued, unless such person is specifically authorized in writing to do so by an enforcing officer.

Article 10. Shippers and Transporters

42911. Any person, forwarding company, or common carrier may decline to ship or transport any fruits, nuts, or vege-

tables if it is notified by any enforcing officer of this division, that such products are found to be delivered for shipment in violation of this division.

Any such person, forwarding company, or common carrier may reserve the right, in any receipt, bill of lading, or other writing which is given to the consignor, to reject for shipment and to return to the consignor or hold at the expense and risk of the consignor all fruits, nuts, or vegetables, which upon inspection are found to be delivered for shipment in violation of this division.

42912. A carrier which is subject to the jurisdiction of the Public Utilities Commission that transports any fruits, nuts, or vegetables in the ordinary course of its business as a carrier shall not be deemed to be in violation of any provision of this division, unless such carrier shall willfully fail or refuse to stop the transportation of any fruits, nuts, or vegetables with reasonable dispatch after being notified in writing by any enforcing officer of this division that such products are found to be delivered for shipment in violation of this division.

Article 11. Violations

42941. It is unlawful for any person to prepare, pack, place, deliver for shipment, deliver for sale, load, ship, transport, cause to be transported, or sell any fruits, nuts, or vegetables in bulk, or in any container or subcontainer, unless such fruits, nuts, and vegetables, and their containers, conform to the provisions of this division.

42942. It is unlawful for any person to prepare, pack, place, deliver for shipment, load, ship, transport, or sell a deceptive pack, bulk lot, bulk load, load, arrangement, or display of fresh or dried fruits, nuts, or vegetables.

42943. It is unlawful for any person to mislabel any fruit, nut, or vegetable, or place or have any false or misleading statement or designation of quality, grade, trademark, or trade name, on any wrapper or container, or on the label or lining of any container of any fresh or dried fruit, nut, or vegetable, or on any placard which is used in connection with, or which has reference to, any fresh or dried fruit, nut, or vegetable or container, bulk lot, bulk load, load, arrangement, or display of fresh or dried fruits, nuts, or vegetables

This section does not require the obliteration of old markings or labels on any of the following containers:

(a) Used containers which are not closed if such markings or labels are clearly inapplicable to the contents.

(b) Unlidded containers in which the product is not packed, unless there is deception as to the contents, quality, or area of production.

42944. It is unlawful for any person to make any statement, representation, or assertion orally, by public outcry, or proclamation, or in writing, or by any other manner or

means whatever, which concerns the quality, size, maturity, condition of, or any other matter which relates to fruits, nuts, or vegetables, which is false, deceptive, or misleading in any particular.

42945. It is unlawful for any person to remove or dispose of any fruits, nuts, or vegetables, or their containers to which any warning tag or notice has been affixed, or to remove such warning tag or notice from the place where it is affixed, except under a written permit to do so from an enforcing officer or under his specific direction.

42946. Except as otherwise provided, it is unlawful for any person to pack any fruits, nuts, or vegetables in layers in any container which has straight sides, unless there is approximately the same numerical count in each layer.

All packed fruits, nuts, or vegetables shall be so packed that they will not move in the container. Fruits or vegetables which, after having been in storage or after having been shipped, fail to meet this requirement due to unavoidable natural shrinkage which occurs after packing, do not violate this section.

42947. It is unlawful for any person to pack any mixture of fresh or dried fruits, with or without nuts, glazed fruits, or confections, unless the contents of the lower layers or unexposed portion are of the same kind and quality, and in the same proportion, as to count, volume, and weight. as the contents of the top layer or the exposed portions.

A consumer type package, also known as "gift pack," need not, however, comply with such requirement if it complies with all of the following requirements:

(a) The package is sold in its unbroken form and is clearly and conspicuously marked "consumer package" or "gift pack".

(b) The package is clearly and conspicuously marked to indicate the contents of the unexposed portion.

(c) The contents of the lower layers or the unexposed portion are of the same size and quality as the top layer or the exposed portion.

42948. It is unlawful for any person to refuse to submit any container, subcontainer, load, or display of fruits, nuts, or vegetables to the inspection of any enforcing officer, or to refuse to stop any vehicle which contains any fruits, nuts, or vegetables, for the purpose of inspection by an enforcing officer.

42949. It is unlawful for any person to alter in any respect any certificate of inspection, notice of violation, report, statement, or other document that is referred to in this division, which is issued by an enforcing officer.

42950. It is unlawful for any person to prepare, pack, place, deliver for shipment, deliver for sale, load, ship, transport, or sell any nuts, fresh fruits, or vegetables in bulk, or in any container or subcontainer, unless 90 percent by weight or more of such fruits, nuts, or vegetables in bulk, or

in any container or subcontainer, as established by the inspection of a representative sample, are free from insect injury which has penetrated or damaged the edible portion, worms, mold, or decay.

This section applies only to those fruits, nuts, or vegetables for which specific quality standards are not otherwise established in this division.

Article 12. Criminal Penalties and Procedures

42971. Any violation of any provision of this division is a misdemeanor which is punishable by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500), or by imprisonment in the county jail for not more than six months, or by both.

42972. If any person is arrested for the transportation of fruits, nuts, or vegetables in violation of this division, unless he demands the right to an immediate appearance before a magistrate, the arresting officer shall, upon production of satisfactory evidence of the identity of the person arrested, do all of the following:

(a) Take the name and address of the arrested person, the number of his motor vehicle, and such other information as may be necessary.

(b) Notify him in writing to appear at a time and place which is specified in such notice.

42973. The time which is specified in the notice shall be at least five days after the arrest. The place which is specified in the notice shall be one of the following:

(a) Before a magistrate of the judicial district in which the offense with which the arrested person is charged is alleged to have been committed.

(b) Upon the demand of the person arrested, before a magistrate of the judicial district in which is located the county seat of the county in which the offense is alleged to have been committed.

(c) In any county in which there is established a municipal court at the county seat, the notice may specify the appearance of the person arrested before any magistrate in the county.

42974. If the arrested person gives his written promise to appear at the time and place which are specified in the notice, the arresting officer shall forthwith release him from custody.

42975. If the arrested person refuses to give his written promise to appear or demands an immediate appearance before a magistrate, he shall be taken forthwith before a magistrate of the judicial district in which the offense with which he is charged is alleged to have been committed. He shall then be entitled to at least five days continuance of his case in which to prepare to plead or to prepare for trial unless he waives such time in writing or in open court and gives his written promise to appear at such time and place as the court may

fix for his further appearance or, if he refuses to give such promise, upon such bail as the court may fix. He shall thereupon be released from custody.

42976. Any person who willfully violates his promise which is given in accordance with this article is guilty of a misdemeanor regardless of the disposition of the charge upon which he was originally arrested. A promise to appear may be complied with by an appearance by counsel.

Article 13. Civil Penalties and Remedies

43001. Any person that violates any provision of this division shall, in addition to any penalty which is otherwise provided, be liable civilly, in an action brought by the director, for a penalty in an amount which is equal to the value which the fruits, nuts, or vegetables involved in the violation would have if they conformed to the requirements of this division.

The value of such noncomplying fruits, nuts, and vegetables shall be the current market value of the lowest priced grade of a marketable commodity of like kind and nature at the time and place of the violation. Any money which is recovered under this section shall be paid into the Department of Agriculture Fund.

43002. The director may bring an action to enjoin the second or other repeated violation, or threatened second or other repeated violation, of any provision of this division in the superior court in and for the county in which the violation occurred or is about to occur.

Any proceeding pursuant to this section shall conform to the requirements of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure. The director is not, however, required to allege facts necessary to show or which tend to show lack of adequate remedy at law or which show or tend to show irreparable damage or loss.

Article 14. Abatement

43031. Any lot of fruits, nuts, or vegetables, including its containers, which is not in compliance in all respects with this division and the regulations which are issued pursuant to it, is a public nuisance.

43032. Any enforcing officer, if he has reason to believe that any lot of fruits, nuts, or vegetables is not in compliance with this division or such regulations, may hold such lot pending proceedings to condemn and abate such nuisance, as provided in this article.

43033. The officer may affix to any lot so held a tag or notice which warns that the lot is held and states the reason why it is held. It is unlawful for any person except an authorized enforcing officer to detach, alter, deface, or destroy any such tag or notice which is affixed to any such lot, or to remove or dispose of such lot in any manner or under condi-

tions other than as prescribed in such tag or notice, except upon written permission of an authorized enforcing officer or by the order of a court.

43034. The officer by whom any lot of fruits, nuts, or vegetables is held shall cause notice of noncompliance to be served upon the person in possession of the lot. The notice of noncompliance shall comply with all of the following requirements:

(a) Include a description of the lot.

(b) State the place where, and the reasons for which, the lot is held.

(c) Give notice that the lot is a public nuisance and subject to disposal as provided in this article, unless within a specified time it is reconditioned or the deficiency otherwise corrected so as to bring it into compliance.

43035. If the person served is not the sole owner of the lot, or does not have authority as agent for the owner to bring the lot into compliance, such person shall, in writing, notify the officer by whom such lot is held of the name and address of the owner and all other persons that are known to him to claim an interest in the lot. Any person that is served with such a notice of noncompliance is liable for any loss which is sustained by such owner or other person whose name and address he has knowingly concealed from such officer.

43036. If the lot has not been reconditioned or the deficiency otherwise corrected so as to bring it into compliance within the time specified in the notice, the enforcing officer shall cause a copy of the notice to be served upon all persons that are designated in writing by the person in possession of the lot to be the owner or to claim an interest in it.

43037. Any notice which is required by this article may be served personally or by mail which is addressed to the person to be served at his last known address.

43038. The enforcing officer, with the written consent of all such persons served, may destroy such lot or otherwise abate the nuisance. If any such person fails or refuses to give such consent, the enforcing officer shall proceed as provided in Section 43039 or 43040.

43039. If the lot which is held is perishable or subject to rapid deterioration, the enforcing officer may file a verified petition in any superior or inferior court of the state to destroy the lot or otherwise abate the nuisance. The petition shall show the condition of the lot, that the lot is situated within the county, that the lot is held, and that notice of noncompliance has been served as provided in this article. The court may thereupon order that the lot be forthwith destroyed or the nuisance otherwise abated as set forth in the order.

43040. If the lot which is held is not perishable or subject to rapid deterioration, the enforcing officer shall immediately report the condition of the lot to the director. Within five days from the receipt of such report, the director may file a peti-

tion in the superior court in the county where the lot is situated for an order to show cause, returnable in five days, why the lot should not be abated.

The owner or person in possession on his own motion within five days from the expiration of the time specified in the notice of noncompliance may file a petition in such court for an order to show cause, returnable in five days, why the lot should not be released to petitioner and any warning tags previously affixed removed from it. Final determination by the court in either case shall be within a period of not to exceed 20 days from the date such petition was filed.

43041. The court may enter judgment ordering that the lot be condemned and destroyed in the manner which is directed by the court or relabeled, denatured, or otherwise processed, or sold or released upon such conditions as the court in its discretion may impose to insure that the nuisance will be abated. If the lot is sold by order of the court, the costs of storage, handling, and reconditioning or disposal shall be deducted from the proceeds of sale and the balance, if any paid into court for the owner.

CHAPTER 3. EXEMPT FRUITS, NUTS, AND VEGETABLES

Article 1. Fruits, Nuts, and Vegetables Which Are Exempt

43251. Except as otherwise provided in Section 44008, fruits, nuts, and vegetables of the kinds which are specified in this division, if they are not wrapped or packed, are exempt from the standards which are established in this division when being transported or delivered to the destinations and for the purposes herein set forth, or when prepared, loaded, shipped, or sold under any of the following conditions:

(a) From a packing plant which does not have proper or adequate facilities for processing, grading, packing, or reconditioning, to another packing plant within the state which has such facilities.

(b) To a byproduct plant within the state for commercial processing, preserving, or manufacture of byproducts for resale. Dates, however, are not exempt from the standards which are established by Chapter 20 (commencing with Section 47401) of this division, except while they are being transported or delivered to a distillery for the manufacture of brandy or alcohol or to any person for the production of any product which is not for human consumption.

(c) To a feed yard within the state for livestock feeding purposes.

(d) To a dumping ground or waste disposal plant within the state for disposal.

(e) From the orchard or field where they were produced to a packing plant within the state for first processing, grading, or packing.

Article 2. Permits for Exempt Fruits, Nuts, or Vegetables

43281. Except as otherwise provided in Section 43282 or 43283, any commissioner may issue a permit to any person that resides or maintains a principal place of business in his county to sell, buy, receive, transport, deliver, or cause to be transported any fruits, nuts, or vegetables which are exempt from the standards established in this division, for any one or more of the purposes which are prescribed in Article 1 (commencing with Section 43251) of this chapter.

43282. A permit shall not be issued which authorizes, nor does any permit authorize, any person to sell, buy, receive, transport, deliver, or cause to be transported fruits, nuts, or vegetables which are in conflict with orders or regulations which are issued by the director pursuant to the California Marketing Act of 1937, Chapter 1 (commencing with Section 58601), Part 2, Division 21 of this code, or a marketing program issued pursuant to the Agricultural Producers Marketing Law, Chapter 2 (commencing with Section 59501), Part 2, Division 21 of this code.

43283. A permit shall not be issued for the purpose set forth in subdivision (a) of Section 43251 unless and until the commissioner has found and determined both that:

(a) The packing plant from which the fruits, nuts, or vegetables are to be transported or delivered does not have proper and adequate facilities for processing, grading, packing, or reconditioning the particular lot of fruits, nuts, or vegetables.

(b) The packing plant to which the fruits, nuts, or vegetables are to be transported has such facilities.

43284. Permits may be issued for a period not exceeding 36 months.

43285. A permit which is issued pursuant to this chapter, except to the seller and the receiver, is not valid in any county except in the county where it is issued unless the permit, or a rider which is securely attached to it, carries the endorsement of the commissioner of both the county:

(a) To which the fruits, nuts, or vegetables are to be transported or delivered.

(b) From which such products are to be transported or delivered.

43286. A permittee shall, upon request of any commissioner, furnish such affidavits, receipts and other evidence as the commissioner reasonably may require as proof that the commodities have been disposed of in accordance with the provisions of this division and the terms of the permit.

43287. Any commissioner may refuse to issue or to endorse a permit, or may revoke or suspend any permit or endorsement which is issued by him, if after investigation and in his judgment the permittee or applicant for permit comes within any of the following classes:

(a) Does not have available proper and adequate facilities with which to pack, process, or otherwise dispose of the commodities which are described in Article 1 (commencing with Section 43251) of this chapter in accordance with the provisions of this division.

(b) Has previously violated any of the provisions of this division or the terms of any permit which is issued pursuant to this chapter.

(c) Has failed or refused to furnish the evidence required by the commissioner.

43288. Any order of the commissioner refusing to endorse or issue a permit, or suspending or revoking a permit, shall be in writing

43289. Any person may appeal to the director, within 10 days, for a hearing upon a written order of the commissioner refusing to endorse or issue a permit, or suspending or revoking a permit.

The proceedings for such hearing shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. However, the provisions of Sections 11505 and 11506 of such code shall not apply and the statement of issues or accusation, as the case may be, shall be delivered or mailed to the parties as provided in Section 11509 of such code.

43290. This article does not allow a permittee or applicant to operate pending the disposition of his application or petition.

43291. This article does not prevent the commissioner from suspending or revoking a permit forthwith, and without notice or hearing. Such peremptory action shall, however, be supported by previous investigation, the results of which reasonably indicate to the commissioner that to allow an existing permit to remain in use pending a hearing would encourage, allow, or permit additional or other violations of any provision of this division.

43292. A permit shall be submitted for inspection upon demand of any enforcing officer.

Article 3. Records

43311. Every person that sells, delivers, or receives any fruits, nuts, or vegetables which do not conform to the standards which are prescribed by this division shall keep an accurate record of all such transactions in such form as the commissioner shall require. All such records shall be kept for at least one year and shall be delivered to the commissioner for his inspection on demand at any time within that period.

Article 4. Violations

43331. It is unlawful for any person to use or dispose of any fruits, nuts, or vegetables for which a permit has been is-

sued, in any manner or for any purpose except the manner or purpose for which such permit was issued, unless he is specifically authorized in writing to do so by an enforcing officer.

43332. It is unlawful for any person that does not have a valid permit which is issued pursuant to Section 43281 to sell, buy, receive, transport, deliver, or cause to be transported, or for any person to transport unless such a permit accompanies the vehicle which is transporting, any fruits, nuts, or vegetables, which are exempt from the standards which are established in this chapter, except a person that comes within one of the following classes:

(a) A common carrier which operates over a regular route or between fixed termini and transports any such fruits, nuts, or vegetables, in good faith and in accordance with its duties as a common carrier.

(b) A person that is transporting fruits, nuts, or vegetables from the orchard or field where they were produced to a packing plant within the state for first processing, grading, or packing.

(c) A person that is transporting fruits, nuts, or vegetables in accordance with the terms of a disposal order which is duly issued pursuant to Section 42881.

43333. It is unlawful for any person to sell or offer for transportation or delivery any fruits, nuts, or vegetables which fail to conform to the standards of this division to any person that is required to have a permit pursuant to Section 43332 unless such person has such permit.

CHAPTER 4. CONTAINERS

Article 1. General Provisions

43451. This chapter, among other things, establishes standard containers for the fruits, nuts, and vegetables for which standard packs are established by this division, when such fruits, nuts, and vegetables are being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container.

43452. The standard containers which are established by this chapter are permissive unless otherwise provided in this division.

43453. The words "standard" or "standard container" shall not be placed on any container unless such container conforms to the requirements which are specified for the standard containers of such fruit, nut, or vegetable.

43454. Only if any fruit, nut, or vegetable is packed in a standard container and in conformity to the standard pack which is established for such product may the container be marked with the words "standard pack" or "standard container and pack."

Article 2. Experimental Containers

43481. This chapter does not prohibit the preparation, packing, shipment, or sale under permit of the director of fruits, nuts, or vegetables in any experimental type of container which does not conform to the standards which are prescribed in this chapter, if each such container is conspicuously labeled on one outside surface which bears marks which are intended to describe the contents of such container, in letters and figures which are not less than one-half inch in height, "Experimental container," followed by the permit number that is assigned to the applicant by the director preceded by the designation "Permit No."

43482. Application for the permit and permit number shall be made to the director at least 15 days before shipment. The application shall state all of the following:

(a) The name of the product.

(b) The quantity intended to be shipped.

(c) The description and inside dimensions of the container, expressed in inches.

(d) The name of the person from whom the experimental containers are to be obtained.

(e) The reason for the contemplated experiment.

(f) The quantity of such product, if any, shipped by the applicant in all types of containers during the preceding year. If no shipments of such product were made by the applicant during the preceding year, an estimate of the total quantity which such applicant will ship in all types of containers during the current year.

43483. The director may issue to the applicant a permit and a permit number for the shipment of a specified quantity of the product in the containers within a specified period, which shall not exceed one year, if he makes all of the following findings:

(a) The container is not deceptive in shape, design, or capacity.

(b) The applicant has complied with the permit application requirements and has established the proper reasons for the experiment.

(c) The proposed shipments are only for experimental purposes.

43484. A permit is subject to renewal for an additional year upon a proper showing to the director, without a formal hearing, that the experiment has not been completed.

43485. If the applicant has shipped products of the kind specified in the application during the preceding year, a permit shall not be issued for the shipment in experimental containers of more than 5 percent of the quantity of any such product which was shipped in all types of containers by such person in the preceding calendar year. A permit may not, however, be issued, except for citrus fruit, for more than 10,000 such containers.

43486. If no shipments of such products were made by the applicant during the preceding year, a permit shall not be issued for the shipment in experimental containers of more than 5 percent of the quantity which such applicant estimates he will ship in all types of containers during the current year. A permit may not, however, be issued, except for citrus fruit, for more than 10,000 such containers.

43487. Any type of container for which a permit has been issued, which is uniformly marked as provided in this article, and which is not used for shipping fruits, nuts, and vegetables in excess of the quantities which are specified in the permit, is an experimental type of container within the meaning of this article.

43488. It is unlawful for any person to prepare, pack, transport, deliver, or sell commodities in experimental containers, or to mark such containers with the permittee's assigned permit number, in excess of the quantities which are specified in the permit.

43489. Every person to whom an experimental container permit has been issued shall keep an accurate record of all shipments of such experimental containers including the place from which such shipments are made, the date of shipment, and the number of containers in each shipment. All such records shall be kept for at least one year and shall be delivered to the director or the commissioner for inspection on demand at any time within that period.

Article 3. Consumer Packages of Fresh Fruits, Nuts, or Vegetables

43511. Except for containers which are filled entirely with dates or berries, any fresh fruits, nuts, or vegetables which are prepared, packed, shipped, or sold in unbroken consumer-type containers, that have a volume not greater than 85 percent of the smallest size standard container which is provided in this division for the specific commodity, are exempt from the standard container provisions in this division. Such exempt containers shall not, however, be of a size that will hold more than 15 pounds net when full. The 85 percent volume requirements shall not apply to unbroken consumer-type containers filled entirely with apricots, cherries, grapes, nectarines, peaches, pears, or plums.

43512. This article does not modify any provision of this division which relates to deception or mislabeling, nor any provision in a specific commodity section in this division which has requirements that pertain to consumer-type packages.

43513. Marking requirements which are prescribed in this division need not be placed on any of the following containers:

(a) Containers which are exempted from the standard container requirements by this division.

(b) Containers which are holding commodities for which no standard containers are provided in this division if the net contents when full do not exceed 15 pounds.

Article 4. Imported Fruits, Nuts, or Vegetables

43561. This division shall not be construed to do any of the following:

(a) Conflict with any laws or regulations of this state or the United States regarding net weight or other markings on containers or subcontainers.

(b) Prohibit the shipment, transportation, delivery for sale, or sale of fruits, nuts, or vegetables which are imported into this state in containers which are established as standard by the applicable laws or regulations of the United States.

43562. In addition to other exceptions which pertain to the use of standard containers, this division does not prohibit the shipment, transportation, delivery for sale, or sale of any fruits, nuts, or vegetables, imported into this state in containers which do not conform to the container requirements which are prescribed in this division if such containers comply with all of the following requirements:

(a) Are lawful for use in the state of origin and in interstate commerce.

(b) Are plainly marked with the name of the state of origin.

(c) If the shape and design of such containers are not such as to misrepresent their capacity and the dimensions are not so similar to those of any standard container in California for the commodity as to be deceptive.

Article 5. Standard Containers

43591. The numbers, names, and dimensions of standard containers are set forth in this article. All measurements, unless otherwise specified, are measurements inside in inches, and reading from left to right are measurements of depth, width, and length, respectively.

43592. Standard containers numbers 1 to 1C, inclusive, are as follows:

Number	Name	Dimensions in inches
1	Standard basket	Approximately 8 inches square on top, $6\frac{1}{2}$ inches square on bottom, and 4 inches to 5 inches deep, inside measurements.
1B	Standard basket	Approximately $5\frac{1}{2}$ inches square on top, $4\frac{1}{4}$ inches square on bottom, and 3 inches deep, inside measurements.
1C	Standard basket	Approximately $6\frac{1}{2}$ inches square on top, $5\frac{3}{8}$ inches square on bottom, and $3\frac{3}{4}$ inches deep, inside measurements.

43593. Standard containers numbers 3A to 3C, inclusive, are as follows:

Number	Name	Dimensions in inches
3A	Standard berry basket	Dry pint which contains an interior capacity of approximately 33.6 cubic inches.
3B	Standard berry basket	Dry one-half pint which contains an interior capacity of approximately 16.8 cubic inches.
3C	Standard berry basket	Dry quart which contains an interior capacity of approximately 67.2 cubic inches.

43594. Standard containers numbers 4 to 9C, inclusive, are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
4	Standard 12-basket crate	$2\frac{7}{8}$ to $3\frac{7}{8}$	$12\frac{3}{8}$ to $13\frac{1}{2}$	18 to $18\frac{1}{2}$
5	Standard crate	4 to $7\frac{1}{8}$	16	$16\frac{1}{8}$
9B	Special crate	4 to $7\frac{1}{8}$	$14\frac{1}{2}$	$14\frac{1}{2}$
9C	Special plum box	7	$12\frac{1}{2}$	$12\frac{1}{2}$

43595. Standard containers numbers 9D and 9E are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
9D	Avocado flat	$3\frac{3}{8}$ to 4	13 to $13\frac{3}{4}$	16 to $16\frac{3}{4}$
9E	Avocado lug	$5\frac{3}{4}$ to 8	13 to $13\frac{3}{4}$	16 to $16\frac{3}{4}$

43596. Standard container number 10A is as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
10A	Standard fruit box	5 to 10	$10\frac{1}{8}$	$16\frac{3}{4}$

43597. Standard container number 12A is as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
12A	Standard cherry lug	$3\frac{3}{4}$ to 5	$11\frac{1}{2}$	$14\frac{1}{8}$

43598. Standard container number 12B is as follows:

Number	Name	Dimensions in inches Depth	Width	Length
12B	California fruit box	$2\frac{3}{8}$ to $7\frac{1}{8}$	$11\frac{1}{2}$	$16\frac{1}{8}$

43599. Standard containers numbers 19 and 20 are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
19	Special pear box	$5\frac{1}{2}$	$11\frac{1}{2}$	18
20	Standard pear box	$8\frac{1}{2}$	$11\frac{1}{2}$	18

43600. Standard containers numbers 21 to 22, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
21	Standard artichoke box	$9\frac{3}{4}$	11	$20\frac{5}{8}$
21A	Special artichoke box	7	11	$20\frac{5}{8}$
22	Half artichoke box	$4\frac{7}{8}$	11	$20\frac{5}{8}$

43601. Standard containers numbers 22A to 27C, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
22A	Special lug box	$3\frac{5}{8}$ to $4\frac{3}{8}$	11	$14\frac{5}{8}$
22B	Special lug box	4 to $7\frac{1}{8}$	$12\frac{1}{2}$	$16\frac{1}{8}$
22C	Standard lug box	$3\frac{3}{4}$ to $7\frac{1}{8}$	$13\frac{1}{2}$	$16\frac{1}{8}$
22D	Standard lug box	$2\frac{7}{8}$ to $7\frac{1}{8}$	$13\frac{1}{2}$	$16\frac{1}{8}$
23	Standard lug box	4	$13\frac{1}{2}$	$16\frac{1}{8}$
24	Standard lug box	$3\frac{3}{4}$ to $7\frac{1}{8}$	$13\frac{1}{2}$	$16\frac{1}{8}$
25	Standard lug box	$4\frac{3}{4}$	$13\frac{1}{2}$	$16\frac{1}{8}$
27	Standard lug box	$5\frac{3}{4}$	$13\frac{1}{2}$	$16\frac{1}{8}$
27A	Bay City lug	$7\frac{3}{4}$	$13\frac{1}{2}$	$16\frac{1}{8}$
27B	Standard lug box	$6\frac{3}{4}$	$13\frac{1}{2}$	$16\frac{1}{8}$
27C	Standard lug box	$6\frac{1}{4}$	$13\frac{1}{2}$	$16\frac{1}{8}$

43602. Standard containers numbers 28 to 31, inclusive, are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
28	Special sawdust pack chest	$7\frac{3}{4}$	$14\frac{15}{16}$	$18\frac{5}{8}$
29A	Special lug box	$6\frac{1}{2}$ to $7\frac{3}{16}$	$13\frac{1}{2}$	$20\frac{5}{8}$
29B	Special lug box	$8\frac{3}{4}$	11	$17\frac{1}{4}$
30	Special lug box	$8\frac{1}{2}$	14	$22\frac{3}{4}$
30A	Special lug box	$4\frac{7}{8}$	15	$22\frac{1}{8}$
31	Special box	$4\frac{3}{4}$ to $5\frac{1}{4}$	12	$19\frac{3}{4}$

43603. Standard containers numbers 32 and 34 are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
32	Standard persimmon box	$3\frac{3}{4}$	$11\frac{1}{2}$	$24\frac{5}{8}$
34	Standard pomegranate box	$6\frac{1}{2}$	$11\frac{1}{2}$	$24\frac{5}{8}$

43604. Standard containers numbers 38I to 38Q, inclusive, are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
38I	Standard grape lug	$4\frac{3}{4}$ to $6\frac{7}{16}$	At top $14\frac{1}{2}$ to $14\frac{7}{8}$ At bottom $9\frac{1}{2}$ to $11\frac{1}{2}$	$16\frac{1}{8}$
38J	Standard grape lug	$4\frac{1}{2}$ to $5\frac{1}{2}$	$14\frac{1}{2}$	$16\frac{1}{8}$
38K	Standard grape lug	$4\frac{1}{2}$ to $5\frac{3}{4}$	14 or $14\frac{3}{4}$	$16\frac{1}{8}$
38L	Grape lug	$4\frac{7}{16}$ to $6\frac{7}{16}$	$13\frac{1}{2}$	$16\frac{1}{8}$
38M	California grape lug	$6\frac{1}{4}$	$14\frac{3}{4}$	$18\frac{1}{8}$
38N	California grape lug	$7\frac{7}{8}$	$12\frac{5}{8}$	$15\frac{3}{16}$
38P	California grape lug	$6\frac{1}{2}$	17	21 to $22\frac{1}{2}$
38Q	Grape lug	$5\frac{1}{2}$	$11\frac{1}{2}$	$16\frac{1}{8}$

Standard containers numbers 38J and 38K may have a taper (up and in—down and in) at each corner.

43605. Standard containers numbers 39 to 44D, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
39	Standard cantaloupe crate	12	12	$21\frac{7}{8}$ or $22\frac{1}{8}$
40	Pony cantaloupe crate	11	11	$21\frac{7}{8}$ or $22\frac{1}{8}$
41	Jumbo cantaloupe crate	13 or $13\frac{1}{2}$	13	$21\frac{7}{8}$ or $22\frac{1}{8}$
42	Cantaloupe crate	$13\frac{1}{2}$	13	$22\frac{1}{2}$
43	Cantaloupe container	9 or $9\frac{1}{2}$	13	$21\frac{7}{8}$ or 22
44	Cantaloupe container	9 or 10	13	22 or $22\frac{3}{8}$
44B	Cantaloupe—2 compartment container	$5\frac{1}{2}$	$9\frac{1}{8}$	$21\frac{3}{8}$ or $21\frac{5}{8}$
44D	Cantaloupe container	$9\frac{3}{4}$ to 10	$12\frac{3}{4}$ to 13	$16\frac{3}{4}$ to 17

Container number 41, which has a depth of $13\frac{1}{2}$ inches, shall be standard only if the maximum bulge of the lid, when tightly nailed in place, does not exceed $\frac{25}{32}$ of an inch measured from the top of the lid slat to the high point of the outside top of the bulge, which is normally at the center of the lid. Not more than 10 percent, by count, of such containers in any lot may, however, have a bulge which exceeds the $\frac{25}{32}$ of an inch bulge which is described in this paragraph.

Container number 44B shall be standard only if it complies with all of the following requirements:

(a) It is made as one container.

(b) Each container has two compartments.

(c) Each compartment has the dimensions which are specified as standard for container 44B in this section.

(d) The maximum inside width of the combined two compartments, including the center divider, does not exceed $19\frac{1}{8}$ inches.

The depth shall be measured from the bottom floor of the compartment to the underside of the overflap. The width shall be measured across the approximate geometrical center, with the inside drape pieces pressed firmly in place as though cantaloupes were tightly packed in the compartment.

Container 44B shall be considered standard if used without being closed.

Only the following numbers of cantaloupes shall be packed in cantaloupe container number 44B: 10, 12, 16, or 20.

43606. Standard containers numbers 44H to 44K, inclusive, are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
44H	Melon crate	$6\frac{3}{4}$ to $8\frac{3}{4}$	16	$22\frac{1}{8}$
44I	Melon crate	$7\frac{3}{4}$	14	$22\frac{1}{8}$
44J	Melon crate	$5\frac{3}{4}$	$14\frac{1}{2}$	$22\frac{1}{8}$
44K	Melon carton	$6\frac{1}{2}$ to $7\frac{1}{2}$	$15\frac{1}{4}$	17

43607. Standard containers numbers 45 to 45B, inclusive, are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
45	Standard crate	$14\frac{1}{4}$	$18\frac{1}{4}$	$20\frac{1}{2}$ or $21\frac{3}{4}$
45A	Lettuce crate	$9\frac{3}{4}$	14	21
45B	Nonbulge lettuce crate	$10\frac{3}{4}$	$16\frac{1}{8}$	$21\frac{1}{2}$

Standard container number 45, if it is lidded, shall have a lid which is not over $23\frac{3}{8}$ inches in length if it is constructed with the $20\frac{1}{2}$ inch inside length and which is not over $24\frac{5}{8}$ inches in length if it is constructed with the $21\frac{3}{4}$ inch inside length.

The nonbulge lettuce crate number 45B may have a bulge, when the lettuce is first placed or packed in it, of not more than $\frac{1}{4}$ of an inch on each side, each end, the top, and the bottom. Not more than 5 percent, by count, of containers number 45B in any lot may exceed the $\frac{1}{4}$ of an inch bulge.

Standard container 45B shall comply with the Mullen bursting test of not less than 300 pounds, and shall be plainly marked with the statement "Container material complies with the Mullen bursting test of not less than 300 pounds," or a similar statement which indicates not less than the same bursting standard.

43608. Standard containers numbers 45E to 45K, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
45E	Celery container	$9\frac{3}{4}$	16	$19\frac{1}{4}$
45F	Celery container	$9\frac{3}{4}$	16	20 to $20\frac{1}{4}$
45G	Celery container	10	11	$15\frac{3}{4}$ to 16
45H	Celery container	$9\frac{1}{2}$	$10\frac{1}{2}$	$15\frac{3}{4}$
45I	Celery container	$8\frac{1}{4}$	9	$17\frac{1}{4}$
45J	Celery container	$8\frac{1}{4}$	11	15
45K	Celery container	$9\frac{3}{4}$	$11\frac{1}{2}$	$19\frac{1}{4}$

43609. Standard containers numbers 45N to 45T, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
45N	Carrot container	$14\frac{1}{4}$	$18\frac{1}{4}$	$20\frac{1}{2}$ or $21\frac{3}{4}$
45O	Carrot container	$9\frac{3}{4}$	$18\frac{1}{4}$	$20\frac{1}{2}$ or $21\frac{3}{4}$
45P	Carrot container	9	$14\frac{1}{4}$	$21\frac{1}{4}$ or $21\frac{1}{2}$
45Q	Carrot container	$9\frac{3}{4}$	9	$17\frac{1}{2}$
45R	Carrot container	13	13	25
45T	Carrot container	$11\frac{15}{16}$	$11\frac{15}{16}$	$18\frac{3}{4}$

43610. Standard containers numbers 46 to 46C, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
46	Standard cauliflower crate	$8\frac{1}{2}$	18	$21\frac{5}{8}$
46A	Standard cauliflower crate	$5\frac{1}{2}$ to 6	$17\frac{1}{2}$	$21\frac{7}{8}$ or 22
46B	Standard cauliflower crate	$10\frac{1}{2}$ to $11\frac{1}{2}$	$12\frac{1}{4}$	$18\frac{1}{4}$
46C	Standard cauliflower crate	$14\frac{1}{4}$	$18\frac{1}{4}$	$20\frac{1}{2}$

The inside length which is shown for standard container number 46 shall be a minimum length, with maximum outside length of $24\frac{1}{2}$ inches. The inside length shall be measured between the end slats, except that if flat end posts which are wider than $1\frac{1}{2}$ inches are used, the inside length shall be measured between the posts.

43611. Standard containers numbers 47 to 48B, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
47	Sweet potato container	$11\frac{1}{2}$	$10\frac{11}{16}$	$16\frac{3}{8}$
48	Sweet potato container	10	11	$16\frac{3}{4}$
48A	Sweet potato box	$10\frac{1}{2}$	$11\frac{1}{2}$	18
48B	Three-fourths sweet potato container	$7\frac{1}{4}$	11	$16\frac{3}{4}$

43612. Standard container number 50A is as follows:

Number	Name	Dimensions
50A	Standard bushel basket	Contains 2150.42 cubic inches

43613. Standard containers numbers 51 and 52 are as follows:

Number	Name	Dimensions
51	Standard pyramid asparagus crate	Maximum depth inside, 11 inches; length inside, 18 inches; width at the bottom inside, 11 inches; maximum width at the top inside, 10 inches; minimum width at the top inside, 9 inches.
52	Standard pyramid asparagus crate	Maximum depth inside, 10 inches; length inside, 18 inches; width at the bottom inside, $11\frac{1}{2}$ inches; maximum width at the top inside, 10 inches; minimum width at the top inside, 9 inches.

43614. Standard containers numbers 53 to 57, inclusive, are as follows:

Number	Name	Dimensions in inches Depth	Width	Length
53	Tomato lug	$11\frac{15}{16}$	$11\frac{15}{16}$	$18\frac{3}{4}$
54	Tomato lug	$10\frac{5}{8}$	$10\frac{5}{8}$	$16\frac{13}{16}$ to $17\frac{3}{16}$
55	Tomato lug	10 to 11	$11\frac{3}{8}$	$18\frac{1}{2}$
56	Tomato lug	$9\frac{1}{8}$ to 10	$11\frac{3}{8}$	18 to $18\frac{1}{2}$
57	Tomato lug	$10\frac{1}{4}$ to $11\frac{1}{4}$	$10\frac{11}{16}$	$16\frac{3}{8}$

Standard tomato lugs 55 and 56 which are used with an "H" divider may measure $\frac{3}{8}$ of an inch less in width and $\frac{3}{8}$ of an inch less in length if the side pieces of the "H" divider

completely cover the entire area of both sides of the container and the center divider extends the full depth of the container.

43615. Standard containers numbers 58 to 63, inclusive, are as follows:

		Dimensions in inches		
Number	Name	Depth	Width	Length
58	Standard orange or lemon container	$10\frac{1}{4}$	$10\frac{11}{16}$	$16\frac{3}{8}$
59	Standard grapefruit container	$9\frac{3}{4}$	$10\frac{11}{16}$	$16\frac{3}{8}$
62	Standard grapefruit master container	$12\frac{1}{2}$ to $13\frac{1}{2}$	$12\frac{3}{4}$ to $13\frac{3}{4}$	19 to 21
63	Standard tangerine or mandarin container	$7\frac{1}{2}$ to $8\frac{1}{2}$	$10\frac{11}{16}$	$16\frac{3}{8}$

Standard container number 62 shall comply with the Mullen bursting test of not less than 250 pounds and shall be plainly marked with the statement "Container material complies with the Mullen bursting test of not less than 250 pounds," or a similar statement which indicates not less than the same bursting standard

To allow for reasonable variations in the size of containers numbers 58, 59, 62, and 63 by reason of manufacturing variations, a variation of plus or minus one-eighth of an inch in each of the dimensions of height, width, or length is permitted. Notwithstanding this tolerance the net cubical contents of container number 58 shall not be less than 1,737 cubic inches; container number 59 shall not be less than 1,652 cubic inches; and container number 63 shall not be less than 1,265 cubic inches.

Article 6. Citrus Field Picking Box

43641. Except as otherwise permitted by the tolerance which is provided in Section 43643, the standard citrus field picking box shall have a cubic content of 3,115 cubic inches and shall not have cleats over one inch high. The volume which is added to such box by the cleats shall not be considered in computing the cubic content.

43642. It is unlawful for any person to load, ship, transport, or deliver citrus fruits from the orchard where they were produced or elsewhere within the state in any citrus field picking box that is not standard unless such box is conspicuously marked on an outside end with the word "irregular" and with the cubic content in cubic inches, in letters and figures which are not less than one inch in height. The provisions of this section do not, however, apply to any citrus field picking box which is designed to hold more than 500 pounds.

43643. In order to provide for reasonable variation in the cubic content of standard citrus field picking boxes because of atmospheric changes, normal use, and normal manufacturing

variations, a tolerance of 4 percent either above or below the standard cubic content is permissible. An equal tolerance is permissible in the case of irregular citrus field picking boxes above or below the cubic content as marked upon such picking boxes.

43644. All contracts which are entered into, and all settlements which are made with growers on the basis of citrus field picking boxes shall be on the basis of the standard box unless such contract or settlement is in writing and expressly provides in type as conspicuous as the balance of the type that the box which is involved is irregular and states its actual cubic content.

Article 7. Markings on Containers

43671. If any markings are used, or required to be used by this division, on any container of any fruits, nuts, and vegetables to describe the contents of the container, such markings, with the exception of net weight, shall be plainly and conspicuously marked, stamped, stenciled, printed, labeled, or branded on one end of each box, lug, or carton, and either on one side or the top cover of each basket, barrel, or other similar container.

The designation of grade shall be stated in letters which are not less than one-quarter of an inch in height. If the marking is on a placard which is used in display, the placard shall be placed or posted in such a position that there is no doubt as to the product it is to identify.

43672. Notwithstanding the provisions of this division, no markings are required, nor are old markings required to be obliterated, on any container of fruits, nuts, or vegetables which is not closed if it contains subcontainers which bear all of the markings which are required by this division to be placed on containers.

43673. If the name and address of any person is required by any of the specific commodity standards of this division to be placed on any container, the address shall be a California address, unless the fruits, nuts, or vegetables are packed or placed in such containers outside of this state.

Chapter 5. Apples

Article 1. Definitions

43801. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

43802. "Clean" means free from dust or dirt and free from visible spray residue.

43803. "Consumer type package" means any container or package which has a capacity which is equal to, or less than, one-half of the capacity of the standard half wooden apple box which is described in Section 44081.

43804. "Cross section" means that section of the apple which is taken at a right angle to a straight line that is drawn from the stem end to the blossom end of the apple.

43805. "Flagged" means incompletely covered by the use of wrappers which are not closed.

43806. "Hand picked" means apples which do not show evidence of having been on the ground.

43807. "Insect pests" include San Jose scale, codlin moth, and other insects, or the larvae, nymphs, or pupae of them, and any apple which has been infested with codlin moth and bears evidence of such infestation, with the exception of superficial well-healed codlin moth stings.

43808. "Place packed" means that the apples are not wrapped and are arranged compactly in layers throughout the container. Such apples need not be uniform in size or in count between the layers.

43809. "Properly matured" means that the apple to which it refers, at the time it was taken or fell from the tree, had reached that stage of minimum maturity, based upon the known factors of maturity, which will insure palatibility and the proper completion of the ripening process.

43810. "Uniform in size" means:

(a) If the apples are in boxes which contain 125 apples, or less, a variation of not more than one-half of one inch in diameter, if the apples are measured through the widest portion of the cross section between the fruits in any one container.

(b) If the apples are in boxes which contain 138 apples, or more, a variation of not more than three-eighths of one inch if the apples are so measured.

43811. "Well packed" means packed in regular, compact, diagonal arrangement of all of the fruit in any container, the fruit being compacted, at the time of packing, with sufficient solidity so that it will not move in the container when lidded, the top and bottom of the standard wooden box, when lidded, having a bulge of not less than one-half inch, and, where wrappers are used, all of the apples in the box are properly wrapped, with the exception of the bottom layer, which may be flagged.

Article 2. General Provisions

43831. If any lot of apples has been inspected and passed by an enforcing officer of this division as conforming to the requirements of this code, and has thereafter been sold, and placed in cold storage or shipped to a purchaser, the person that was owner, packer, or shipper of the lot at the time of such inspection, shall not be prosecuted pursuant to this division by reason of any failure of any of such fruit to conform to the provisions of this division as a result of deterioration subsequent to the original inspection. Any such stored lot of nonconforming apples may be sold to a purchaser that shall immediately recondition the apples upon their removal from storage so that they conform to the provisions of this division.

43832. If any lot of apples of the Newtown Pippin or Bellefleur variety has been inspected and certified by an enforcing officer as conforming to a specified grade or combination of grades and the identity of the lot is established to the satisfaction of the enforcing officer who then has jurisdiction of the lot, such lot shall not, at any time within 10 days after the date of such certification, be deemed to be in violation of any provision of this division because of an excess of damage which is caused by Baldwin spot or by internal browning.

Article 3. Exceptions for Apples for Byproduct Use

43861. This division does not prohibit any person, under a permit which is issued pursuant to this article, from transporting out of the state, apples which fail to comply with the packing, container, marking, or quality requirements of this division if both of the following requirements are complied with:

(a) Such permit is issued for, and is attached to, each load or lot which is transported.

(b) The apples are loose in containers which are not closed or are in a bulk load.

43862. A permit may be issued by the commissioner of the county from which the apples are to be transported only if he has verification by an official of the destination state, satisfactory to the commissioner, that the apples are to be delivered to a purchaser in such state for the manufacture of byproducts on the premises of the purchaser.

The verification shall include a statement by the official making it that, if the apples are so delivered, such official will report to the commissioner who issued the permit as to the byproducts use to which the apples which were transported under the permit were actually put by the purchaser of the apples.

Article 4. Exceptions for Gift Pack Apples

43871. Apples which are in containers that are labeled with the term "gift pack" shall conform to the "extra fancy grade" for apples, except that russeting on the Newtown Pippin variety shall not be considered damage unless it would be "appreciable damage" for russeting in the fancy grade.

43872. The containers of apples which are labeled "gift pack" shall be of rigid construction, may contain mixed varieties of apples, and at least 75 percent of the contents of each such container shall be apples.

43873. The containers of apples which are labeled "gift pack" shall also be conspicuously marked on one outside surface, excluding the bottom surface, with all of the following information:

(a) The name of the person that first packed or authorized the packing of such gift pack apples together with a sufficiently explicit address to permit ready location of such packer.

(b) The net weight or count of the apples in the container.

(c) The words "gift pack" in letters not less than one inch in height.

43874. Containers of apples labeled "gift pack" as provided in this article are exempt from other container, packing, and marking requirements in this chapter.

43875. Nothing in this article shall be construed to modify provisions of this division which relate to deception or mislabeling.

Article 5. Exceptions for Apples of the Lady Variety

43891. Apples of the Lady variety of a size that will pass through a ring 2¼ inches in diameter are not required to meet the minimum size and packing requirements of this chapter, and the containers need not be marked with the grade of apples which they contain. Such Lady apples shall, however, comply with the provisions of the "C" grade, and shall not be deceptively packed.

Article 6. Standard Apple Grades

43911. As used in this article, "appreciable damage" means any injury or defect which appreciably affects the appearance or quality of the apple. The following defects are not appreciable damage:

(a) Limb rubs which are not soft and which affect not to exceed an aggregate area of three-fourths of an inch in diameter.

(b) Sun scald and spray burn if the normal color of the skin is but slightly changed, and there is no blistering or cracking of the skin, and no discoloration of the flesh.

(c) Russeting which is not excessively rough, and which does not appear on more than 25 percent of the surface of any one apple in the aggregate, except in the case of Newtown Pippins, on which it does not appear on more than 33 percent of the surface of any one apple in the aggregate.

(d) Drought spots where the surface of the apple is only slightly discolored and depressed.

(e) Hail marks if such marks do not exceed two in number on any one apple and the injury is superficial and the skin has not been broken.

(f) Frost injury which is not more than skin deep and affects an aggregate area that does not exceed one-half of an inch in diameter.

(g) Internal browning which shows not more than a trace of discoloration in the flesh.

(h) Scab spots on any one apple which in the aggregate do not exceed one-fourth of an inch in diameter.

(i) Slight flyspeck fungus.

(j) Two well-healed case bearer, codlin moth, or aphid stings on an apple, neither of which shall exceed one-eighth

of an inch in diameter exclusive of any encircling green ring.

(k) Slight sunspots.

43912. As used in this article, "serious damage" means any injury or defect which seriously detracts from the appearance or quality of the apple. The following defects are not serious damage:

(a) Stem punctures, affecting apples of the Newtown Pippin and Bellefleur varieties, if the punctures are slight and if such punctures affect less than 50 percent, by count, of such apples in any one container or bulk lot. Stem punctures to any extent are serious when affecting any other variety of apples.

(b) Jonathan spot or Baldwin spot, which affects apples of the Newtown Pippin and Bellefleur varieties if no more than 25 percent, by count, of such apples in any one container or bulk lot are affected by no more than three spots each of either or both of such defects. Jonathan spot or visible Baldwin spot in any extent is serious in all other varieties of apples.

(c) Sun scald and spray burn, if there is no blistering or cracking of the skin or where the flesh is not seriously discolored or injured.

(d) Hail marks or frost injury, where such defects do not cover more than an aggregate area of one-tenth of the surface of the apple or materially deform or disfigure the fruit.

(e) Internal browning, which cannot be detected by external examination or pressure.

(f) Scab spots on any one apple which in the aggregate do not exceed one-half of an inch in diameter.

(g) Five well-healed case bearer, codlin moth, or aphid stings on an apple, none of which may exceed one-eighth of an inch in diameter exclusive of any encircling green ring.

(h) Slight blossom-end cracks.

(i) Jonathan freckle on any one apple which in the aggregate does not exceed one half of an inch in diameter.

43913. Except as otherwise provided in this chapter, apples shall conform to the standards which are prescribed in this article.

43914. The grades which are established by this article are the standard grades for apples. The "extra fancy" is the highest, "fancy" the next highest, and "C" grade the lowest of such grades.

43915 The "extra fancy" grade consists of well grown, properly matured apples of one variety which are clean, well colored, normally shaped for the locality where they are produced, free from decay, visible Baldwin spot, Jonathan spot, scald, internal breakdown, visible watercore, bruises (except such bruises as are necessarily caused in proper sorting or packing), broken skin, insect pests, limb rub, spray burn, sun scald, russeting except within the basin of the stem, drought spot, hail mark, frost injury, internal browning, apple scab, and other diseases, insect bites, and other defects.

43916. The "fancy" grade consists of well grown, properly matured apples of one variety which are clean, normally

shaped for the locality where they are produced, free from decay, visible Baldwin spot, Jonathan spot, soft scald, internal breakdown, visible watercore, bruises (except such bruises as are necessarily caused in proper sorting or packing), broken skin, and insect pests; and free from appreciable damage caused by limb rub, spray burn, sun scald, russeting, drought spot, hail mark, frost injury, internal browning, apple scab, flyspeck fungus and other diseases, insect pests, sun spots, and other defects.

43917. The "C" grade consists of properly matured apples of one variety which are virtually clean, free from decay, soft scald, internal breakdown, visible watercore, bruises (except such bruises as are necessarily caused in proper sorting or packing), broken skin, and insect pests; and free from serious damage caused by stem punctures, visible Baldwin spot, Jonathan spot, sun scald, spray burn, hail marks, frost injury, internal browning, apple scab, insect pests, blossom end cracks, storage scald, Jonathan freckle, and other diseases and defects.

43918. Apples of the varieties Alexander, Red Astrachan, White Astrachan, Beitigheimer, White Winter Pearmain, Greening, and Fall Pippin need not be properly matured in order to meet the requirements of any grade except extra fancy.

43919. Apples of the Bellefleur variety, which are of a size that will not pass through a ring 2¾ inches in diameter, need not be properly matured to meet the requirements of "C" grade if the apples are place packed or loose. Apples of the Bellefleur variety shall, however, be properly matured to meet the requirements of the "C" grade if they are in combination grades

Article 7. Emergency Commercial Grade

43941. An emergency grade to be known as the "commercial" grade may be declared in effect by the director pursuant to this article.

43942. The "commercial" grade shall apply only to Bellefleur apples and Newtown Pippin apples, or either, and shall conform to the standards which are required for a combination of fancy and "C" grade except that Baldwin spot and internal browning shall be permitted without limitation as to tolerance.

43943. The "commercial" grade shall be used only for apples which comply with all of the following requirements:

(a) Have been held in cold storage for a period of at least 15 consecutive days.

(b) Have been removed from cold storage not earlier than December 15th of the current cold storage season.

(c) Are loose in containers or in bulk.

43944. Apples of the "commercial" grade shall not be in combination with apples of any of the standard grades.

43945. A petition for a declaration by the director that an emergency exists and that the "commercial" grade is in effect may be filed by either of the following:

(a) Seventy-five percent or more by number of the persons that control the sale of the Bellefleur or Newtown Pippin apples, or the Bellefleur and Newtown Pippin apples, as the case may be, which are then held in cold storage.

(b) The persons that control the sale of 60 percent or more of such apples which are then so held.

43946. The petition shall contain all of the following:

(a) A statement whether the declarations are sought as to Bellefleur apples, Newtown Pippin apples, or both.

(b) A statement of the facts which constitute the petitioners the persons or number of persons that are qualified under Section 43945 to file the petition.

(c) A statement that an abnormal amount of Baldwin spot or internal browning has developed in the apples as to which the declarations are sought.

(d) A statement that there is imminent danger of great loss to the owners of the apples as to which the declarations are sought unless the "commercial" grade is declared in effect as to such apples.

(e) A request that the director declare the existence of an emergency and the "commercial" grade in effect as to the apples for which the declarations are sought.

43947. If the director, by investigation or otherwise, determines that the petition has been signed by persons that are qualified to file it and that the matters which are stated in the petition are true, he shall, at a time not less than 15 days after the filing of the petition, declare that, as to the apples as to which the declarations are sought, an emergency exists and the "commercial" grade shall be in effect for a period which is designated by him but not to extend beyond the 30th day of June of the then current cold storage season.

Article 8. Standards Generally

43971. Except as otherwise provided in Section 43972, apples may conform to any of the standard grades or to any combination of such grades.

43972. Notwithstanding the provisions of Sections 43801 to 43974, inclusive, and 44081 to 44168, inclusive, of this chapter and in addition to such requirements:

(a) All varieties of Gravenstein apples which are intended for shipment to, or sale within, the North American continent shall conform to the "extra fancy" or "fancy" grades.

(b) All apples which are in consumer type packages shall conform to the combination "fancy and C grade" or a higher grade, as defined in Article 6 (commencing with Section 43911) of this chapter.

43973. Apples of a standard grade or combination of such grades shall be of such size that the apple will not pass through a ring 2¼ inches in diameter. This size requirement does not

apply to apples which are well packed, nor to apples of "C" grade which are loose in the container or in bulk and not in combination with any other grade.

43974. Apples shall be hand picked, except apples of "C" grade which are loose in containers or in bulk, or apples of "C" grade which are in combination with any other grade if the apples in the combination are loose in containers or in bulk.

Article 9. Maturity Standards Generally

44001. This article is effective only in the counties, or districts within a county, where the apples are produced.

44002. The provisions of this article shall not be made effective with respect to varieties of apples which are regulated as to maturity by specific standards elsewhere in this code, or to the Gravenstein varieties.

44003. The provisions of this article do not apply to apples which are shipped into this state from outside of the state. Such apples shall, however, be properly matured as required in Article 6 (commencing with Section 43911) of this chapter or shall be accompanied by an official certificate which states that such apples, at the time of harvest, met the maturity requirements of the state of origin.

44004. As to apples which are produced in this state, the commissioners, under the supervision of the director, may determine, prior to the harvesting season, that apples of designated varieties in any area, county, or district within a county are, or will be, considered to be properly matured on a specified date, which date shall be announced by the commissioners. Designation of varieties shall be on the basis of availability of adequate data covering the known factors which determine maturity. The determination as to maturity shall be based upon known factors of maturity, including soluble solids content of the juice, pressure test, size, color, condition of the flesh, or other recognized methods of measuring the maturity of apples.

44005. The director may adopt regulations to establish minimum maturity standards for apples of designated varieties in any area, county, or district within a county.

44006. Dates of maturity shall be established by the commissioners, under the supervision of the director, for areas, counties, or districts within counties, taking into consideration location, climatic conditions, or other factors, which are known to produce apples which vary as to the dates of maturity. Such date of maturity shall be based upon an investigation which includes the testing of the apples from representative orchards in each area and shall be set when such tests generally indicate that the apples in each such area are, or will be, properly matured. The commissioners shall prepare records, based on the factors of maturity which are used each year, and submit them to the director

44007. If the enforcing officers find that apples in certain orchards in an area, a county, or a district within a county, do

not meet the minimum standards of maturity as prescribed by the director, the apples in such orchards shall not be harvested until such orchards are released by the enforcing officer.

44008. Notwithstanding the provisions of Article 1 (commencing with Section 43251) of Chapter 3 of this division, apples which are being transported to another county or district within a county for grading or packing shall be properly matured before such movement.

44009. It is unlawful for any person to cause to be transported for grading or packing apples which are grown in this state to another county or district within a county unless an enforcing officer has issued a disposal order to such person. The requirement that each load of such apples be accompanied by a disposal order does not, however, apply if all districts have been released.

Article 10. Maturity Standards for Gravenstein Apples

44031. The director may adopt such regulations as are reasonably necessary to establish minimum maturity standards for Gravenstein varieties of apples. Such standards shall be based upon the known factors of maturity, including soluble solids content of the juice, pressure tests, sizes, color, condition of the flesh, or other recognized methods of measuring the maturity of apples, which will insure that such apples are properly matured.

Article 11. Controlled Atmosphere Apples

44051. The director shall adopt regulations, as necessary, to properly establish and maintain the identity of controlled atmosphere apples by storage operators and others that are engaged in the preparation and sale of such apples.

44052. It is unlawful for any person to prepare, pack, sell, or transport for sale any apples which are represented as having been exposed to "controlled atmosphere," or so use any such term or form of words or symbols of similar import on any container or lot of apples within this state, unless both of the following requirements have been complied with:

(a) Such apples have been kept in a room or storage building with not more than 5 percent oxygen for a minimum of 90 days.

(b) The oxygen level was reduced to 5 percent within 20 days after the date of the sealing of the apples in the storage room.

Article 12. Apple Containers

44081. Except as otherwise provided in Sections 43874, 44083, 44084, 44085, or 44086, all wrapped apples shall be in one of the following containers:

(a) Standard wooden apple box, depth inside, 10½ inches; width inside, 11½ inches; length inside, 18 inches.

(b) Standard fiberboard apple box, depth inside, $11\frac{3}{8}$ inches; width inside, $11\frac{1}{2}$ inches; length inside, 18 inches, with a tolerance of one-fourth inch in all dimensions.

(c) Half wooden apple box, depth inside, $5\frac{1}{4}$ inches; width inside, $11\frac{1}{2}$ inches; length inside, 18 inches.

(d) Half fiberboard apple box, depth inside, $5\frac{11}{16}$ inches; width inside, $11\frac{1}{2}$ inches; length inside, 18 inches, with a tolerance of one-fourth inch in all dimensions.

44082. Except as otherwise provided in Sections 43874, 44083, 44084, 44085, or 44086, apples which are not wrapped shall be in one of the standard containers which are defined in Section 44081, or in one of the standard apple lugs of the following dimensions:

(a) Depth inside, $7\frac{1}{2}$ inches, width inside, $13\frac{1}{2}$ inches; length inside, $21\frac{1}{4}$ inches.

(b) Depth inside, $7\frac{3}{4}$ inches; width inside, 14 inches; length inside, $22\frac{5}{8}$ inches.

(c) Depth inside, $6\frac{1}{2}$ inches; width inside, $13\frac{1}{2}$ inches; length inside, $20\frac{5}{8}$ inches.

(d) Depth inside, $9\frac{3}{4}$ inches; width inside, 11 inches; length inside, $20\frac{5}{8}$ inches.

Containers which are described in subdivisions (a), (b), and (c) are standard whether used with or without cleats.

44083 Apples which are not wrapped may be in other size containers, and wrapped apples may be in containers smaller than the half apple box, if these are conspicuously marked, in letters which are not less than one-half inch in height, "irregular container" Such marking, however, is not required on open containers of apples which are not place packed or well packed.

44084 Apples which are not well packed or place packed may be in a standard fiberboard apple box of the following dimensions: depth inside, $10\frac{3}{4}$ inches; width inside, $11\frac{1}{2}$ inches; length inside, 18 inches, with a tolerance of one-fourth inch in all dimensions.

44085. Apples of the Lady variety, regardless of the method of packing, may be placed in containers with a depth of $8\frac{3}{4}$ inches, width 10 inches, and length 16 inches, all inside measurements

44086. Notwithstanding any other provision of this article, apples which are placed in layers between not less than four nor more than six trays or pads may be in the special apple box of the following dimension: depth inside, $11\frac{3}{4}$ inches; width inside, $12\frac{1}{8}$ inches; length inside, $19\frac{7}{8}$ inches; with a tolerance of one-quarter of an inch in all dimensions. The special apple box may be constructed with a full depth collar or liner if the inside measurements affected by such collar conform to the requirements of this section.

Article 13. Packing Requirements

44101. Apples which are of a standard grade or combination of such grades shall be well packed, place packed, placed

in layers between trays or pads, "face and fill packed," loose in containers, or in bulk.

44102. Apples which are well packed shall be uniform in size and shall be in clean, standard boxes. Apples which are place packed shall be in clean boxes.

44103. If apples are in combination of two grades, all of the apples in the container or bulk lot shall meet the requirements of the lower grade and at least 50 percent, by count, shall conform to the requirements of the higher grade.

44104. If apples are in combination of three grades, all of the apples in the container or bulk lot shall meet the requirements of the lowest grade, at least 25 percent, by count, shall conform to the requirements of the highest grade, and at least an additional 25 percent, by count, shall conform to the requirements of the next highest grade.

Article 14. Tolerances

44131. The tolerance, if apples in a container or bulk lot are of one grade, is as follows:

At least 90 percent of the apples in the container or bulk lot shall at least comply with the requirements of the grade. Not more than one-half of the tolerance shall, however, be allowed for any one cause.

44132. Tolerances, if apples are in a combination of two or more grades, are as follows:

(a) At least 90 percent of the apples in any container or bulk lot shall at least comply with the requirements of the lowest grade in the combination. Not more than one-half of the tolerance shall be allowed for any one cause.

(b) If in a combination of any two grades, at least 50 percent of the apples shall comply with the requirements of the higher grade.

(c) If in a combination of three grades, at least 25 percent shall comply with the requirements of the highest and at least an additional 25 percent shall comply with the requirements of the next highest grade.

44133. Tolerances, if apples are in consumer-type packages, are as follows:

(a) If the tolerance for defects allowed is 5 percent, individual packages in any lot may have double this amount.

(b) If the tolerance for defects allowed is 10 percent, individual packages in any lot may exceed this amount by one-half of the tolerance.

(c) The entire lot shall, however, average within the established tolerances.

44134. If a lot of apples is in containers other than consumer-type packages, the apples in each of such containers, not to exceed one-fourth, in number of the containers, may exceed, by not more than 50 percent, the tolerance which is provided. The entire lot shall, however, average within the

established tolerance and the apples in no container shall have more insect pests or decay than the amount which is permitted by such established tolerance.

Article 15. Markings on Containers

44161. Except as otherwise provided in Sections 43874, 44165, 44166, 44167, and 44168 every container of apples shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the apples or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) The name of variety of the apples which are in the container, if known, or if not known the words "unknown variety."

(c) The grade of such apples.

(d) The minimum net weight of the apples which are in the container, or the cubical contents of the package.

(e) In the case of wrapped packed apples, the numerical count.

44162. If apples are in a combination of grades, the grade markings shall be preceded by either "combination" or "comb."

44163. Grade terms which are used to designate apples which are place packed shall not be followed by the term "loose."

44164. A variation of five apples, more or less, than the number stated shall be allowed, unless the apples are placed in molded forms. If the apples are placed in molded forms, the exact count shall be marked on the container.

44165. Containers of apples which are place packed are required to show only the following information:

(a) The name and address of the person that first packed or authorized the packing of the apples.

(b) The variety of the apples.

(c) The designation of grade.

44166. Open containers of apples which are not packed are required to show only the name and address of the person that first packed or authorized the packing of the apples, and the designation of grade.

44167. Consumer-type packages are required to show only the name and address of the person that first packed or authorized the packing of the apples, and the designation of grade which shall comply with the requirements of Combination Fancy and C grade, or a higher grade.

44168. In lieu of the standard grade markings which are required by this article, any container of apples may be marked with the grades which are established in the official United States standards for apples, if the apples conform to such grades and the grades are approved by the director.

CHAPTER 6. APRICOTS

Article 1. Exceptions

44301. This division does not prohibit any person, under a permit issued pursuant to this article, from transporting out of the state apricots which fail to comply with the packing, container, or marking requirements of this division, if both of the following requirements are satisfied:

(a) The permit is issued for, and is attached to, each load or lot which is transported.

(b) The apricots are loose in containers which are not closed, or in bins each holding 200 pounds or more of the apricots.

44302. The permit may be issued by the commissioner of the county from which the apricots are to be transported if such commissioner has satisfactory verification by a like officer of the state of destination that the apricots are to be transported to a purchaser for commercial processing, preserving, or manufacturing on the premises of the purchaser. Such verification shall include a statement that such official will report to the commissioner who issued the permit as to the commercial processing, preserving, or manufacturing use to which the apricots so transported under the permit were actually put by the purchaser of the apricots.

Article 2. Standards

44321. Fresh apricots shall be mature but not overripe and free from any of the following defects:

(a) Insect injury which has penetrated or damaged the flesh.

(b) Mold, brown rot, and decay.

(c) Serious damage caused by cuts, bruises, cracks, shot hole fungus, growth cracks, scab, hail, or other causes.

44322. With the exception of shot hole fungus, damage to any one apricot is not serious unless it causes a waste of 10 percent, by weight, of the individual apricot. Damage to any one apricot caused by shot hole fungus is not serious unless the spots cover an aggregate area of more than one-half of an inch in diameter.

44323. Not more than 10 percent, by count, of the apricots in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause

Article 3. Packing Requirements

44361. Apricots shall be in standard container number 1, 5, 22a, 22b, or 24.

44362. The depth dimension of containers which are designated for apricots shall include in the measurement of the specified depth any cleats used, if any are used.

44363. Packed apricots shall not vary in size between the fruits in any one container, more than one-fourth of an inch in diameter, if measured through the widest portion of the cross section of the fruit.

Article 4. Marking on Containers

44391. Every container of apricots shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the apricots or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) The name of the variety, if known, or if not known, the words "unknown variety" or "seedlings."

(c) The size description or the row count, if the apricots are packed in any style container.

44392. In the case of the four-basket crate, the numerical description of the pack in the top layer of the basket shall be used to designate size.

44393. If the numerical description is used to designate size on a lug of loose or packed apricots, it means that all the apricots would tightly pack that size on the top layer of the standard container number 1 as used in the four-basket crate. Such size description shall be directly followed by the word "size."

44394. If row count is used to designate the size on any lug of packed apricots, the lug shall be marked with the number of rows of apricots packed laterally across the end of the container, directly followed by the word "row" or "rows."

Chapter 7. Artichokes

Article 1. Standards

44501. Globe artichokes shall be free from any of the following defects:

(a) Mold, decay, and insect injury or insect larvae.

(b) Serious damage which is due to freezing or other causes. Damage to any one artichoke from freezing is not serious if the stem discoloration which is due to freezing does not extend beyond the area of attachment of the stem to the base of the artichoke. Damage from other causes is not serious unless it causes a waste of 10 percent, by weight, of the edible portion of the artichoke.

44502. Not more than 10 percent, by count, of the globe artichokes in any one container or bulk lot may be below the requirements which are prescribed by this article but not to exceed one-half of this tolerance shall be allowed for decay.

Article 2 Standard Containers and Packs

44531. The standard containers and packs for globe artichokes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as specified in this article.

44532. The standard containers for globe artichokes are standard containers numbers 21, 21A, and 22.

44533. Globe artichokes which are packed as a standard pack in any standard container shall be tightly packed and if in standard container number 21 or 22 with a bulge.

44534. If globe artichokes are packed as a standard pack in standard container number 21, they shall have a minimum net weight of 35 pounds.

44535. The following sizes may be put up as standard packs in the standard container number 21:

(a) Size 1. Packed with not more than 60 artichokes.
(b) Size 2. More than 60 but not more than 75 artichokes.
(c) Size 3. More than 75 but not more than 96 artichokes.
(d) Size 4. More than 96 but not more than 125 artichokes.

44536. Size 5 artichokes may be packed as a standard pack in standard container number 22 and not more than 125 artichokes shall be packed in such container.

Article 3. Packing Requirements

44561. Artichokes shall be in standard container number 21, 21A, or 22.

44562. Globe artichokes which are packed shall not vary in size, in any one container, more than one-half of an inch in diameter if measured through the widest portion of the cross section of the artichokes.

Article 4. Markings on Containers

44581. Every container of artichokes shall bear upon it, in plain sight and in plain letters on one outside end the name of the person that first packed or authorized the packing of the artichokes, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer

44582. In the case of standard container number 21A, if any marking which is intended to describe the container is placed upon such container, the designation which is used shall contain the term "special."

CHAPTER 8. ASPARAGUS

Article 1. Standards

44701. Fresh asparagus shall comply with all of the following requirements:

(a) It shall not be wilted or crushed, except such injuries as are necessarily caused in proper sorting or packing.

(b) Stalks shall not have badly broken, badly spreading, or badly seeded tips and shall be free from decay and from damage which is caused by dirt, disease, insects, mechanical injury, or other causes. "Damage" means any injury from any cause which is mentioned in this subdivision that materially affects the quality.

(c) Stalks of asparagus shall not be badly crooked.

44702. Not more than 10 percent, by count, of the asparagus stalks in any one container or bulk lot may be below the requirements which are prescribed by Section 44701, but not to exceed one-half of this tolerance shall be allowed for any one cause.

44703. Asparagus which fails to meet the requirements which are prescribed by Section 44701 only because of being "badly crooked" shall be considered as complying with this standard if the container in which it is packed is plainly marked on the outside of the end which bears other markings required by this section, in letters which are not less than one-half inch in height, with the word "crooks."

44704. In view of differences in climatic and other natural conditions that prevail south and east of San Gorgonio Pass, which cause fresh asparagus that is grown in that area to be satisfactory in quality only if a large portion of the stalk is green or colored, and therefore makes it necessary that such fresh asparagus be cut at a shorter length, as compared to asparagus grown in the area north and west of the San Gorgonio Pass, stalks of asparagus which are produced in the area south and east of San Gorgonio Pass shall have not more than two inches of white on the butt. Not more than 20 percent of the stalks in any bunch, or if the stalks are not packed in bunches, 20 percent of the stalks in any container, may, however, have not to exceed 2½ inches of white.

Article 2. Size Designations

44731. As used in this article, "diameter" means the measurement of the widest portion of the cross section which is measured at the largest point on the stalk.

44732. Asparagus which is classified according to the following size designations shall be graded to comply with the following individual stalk size requirements:

(a) "Jumbo" means stalks which are not less than thirteen-sixteenths of an inch in diameter.

(b) "Large" means stalks which are not less than seven-sixteenths of an inch in diameter.

(c) "Standard" means stalks which are not less than six-sixteenths of an inch in diameter.

(d) "Small" means asparagus in which more than 10 percent of the stalks are less than six-sixteenths of an inch in diameter.

44733. The size designation requirements which are established by this article shall apply to all stalks of asparagus in each container, except that in the case of the Jumbo, Large, and Standard sizes 10 percent, by count, of the stalks in any container may be smaller than the size designation which is specified.

Article 3. Bunch Designations

44761. Bunches of asparagus which are classified according to the following designated grades shall contain the number of stalks which are indicated in each classification and shall weigh not less than two pounds net weight when packed. Not less than 12 bunches of asparagus which are so classified may be packed in standard container number 51 or 52.

(a) "Colossal" means not more than 14 stalks to a bunch.

(b) "Jumbo" means 15 to 20 stalks to a bunch.

(c) "Extra select" means 21 to 28 stalks to a bunch.

(d) "Select" means 29 to 42 stalks to a bunch.

(e) "Extra fancy" means 43 to 67 stalks to a bunch.

(f) "Fancy" means 68 to 100 stalks to a bunch.

44762. For the reasons which are stated in Section 44704, stalks of asparagus that are produced in the area south and east of San Gorgonio Pass which are less than 7¼ inches in length shall, if marked with grade classification, be classified according to the following designated grades:

(a) "Mammoth" means not more than 17 stalks to a bunch.

(b) "Giant" means 18 to 24 stalks to a bunch.

(c) "Fancy regal" means 25 to 34 stalks to a bunch.

(d) "Regal" means 35 to 52 stalks to a bunch.

(e) "Fancy standard" means 53 to 78 stalks to a bunch.

(f) "Standard" means 79 to 115 stalks to a bunch.

44763. "Crooks" which are packed in bunches shall have no more than 67 stalks to a bunch.

44764. The number of stalks of asparagus which are packed in bunches shall not vary more than 10 percent from the count of the grade classification as marked, except that one bunch in standard container number 51 or standard container number 52, or 10 percent, by count, of the bunches in any other container or bulk lot, may exceed this tolerance.

Article 4. Standard Containers and Packs

44791. The standard containers and packs for asparagus, when being packed or placed in any container, or after pack-

ing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

44792. The standard containers for asparagus are standard containers numbers 51 and 52.

Article 5. Packing Requirements

44811. Except as otherwise provided in Section 44812, asparagus which is packed in bunches that weigh not less than two pounds per bunch shall be in the following standard containers:

(a) Bunches in which the stalks are 7¼ inches or longer in length shall be in standard container number 51.

(b) Bunches in which the stalks are less than 7¼ inches in length shall be in standard container number 52.

44812. Other size containers may be used if they are conspicuously marked on the outside of the end which bears any marks which are intended to describe the contents of such container, in letters which are not less than one-half of an inch in height with the words "irregular container."

Article 6. Markings on Containers

44841. Every container of asparagus shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first packed or authorized the packing of the asparagus, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) Except as otherwise provided in Section 44842, one of the size designations which are defined in Section 44732 that is shown in letters which are not less than one-half inch in height.

44842. Asparagus which is packed in bunches that weigh not less than two pounds each may be marked with one of the grade classifications defined in Article 3 (commencing with Section 44761) of this chapter in lieu of the size designations in Section 44732. Crates of such bunch packed asparagus which is badly crooked and so marked with the designation "crooks" need not bear any grade classification or size designation terms.

44843. If bunches of different grades of asparagus are packed in one container, the markings on each container shall clearly show the number of bunches of each grade classification or size designation.

44844. If 90 percent, by count, of the stalks of asparagus in any container have less than 50 percent of the length of the stalk white, the containers may be marked with the term "green."

44845. All markings which are required by this article, which are on containers less than one-half the size of standard containers numbers 51 and 52 may be in letters which are smaller than one-half of an inch in height, if such markings are in plain sight and in plain letters.

CHAPTER 9. AVOCADOS

Article 1. Standards

44951. As used in this article, "defect" includes damage which is due to insect injuries, freezing injury, decay, rancidity or other causes.

44952. Avocados shall be free from all defects, including, but not restricted to, those that are mentioned in Section 44951, which singly or in the aggregate cause a waste of 10 percent or more, by weight, of the entire avocado, including the skin and seed. Not more than 5 percent, by count, of the avocados in any one container or bulk lot may be below the requirement which is prescribed by this section.

44953. Avocados, at the time of picking, and at all times thereafter, shall contain not less than 8 percent of oil, by weight of the avocado excluding the skin and seed.

Article 2. Packing Requirements

44971. Avocados which are packed in rows and layers shall be fairly tightly packed, fairly uniform in size, and in standard containers numbers 9D and 9E. Each such standard container shall be clearly and plainly marked in letters at least one-fourth of an inch in height with the count of avocados in the container, and with the variety name if the containers are packed with avocados of the Fuerte or Hass varieties.

44972. Standard container number 9D, if packed to contain 41 or less of larger size avocados, shall contain a net weight of 12½ pounds. Standard container number 9E, if packed to contain 83 or less of larger size avocados, shall contain a net weight of 25 pounds.

Standard container number 9D, if packed to contain 42 or more of smaller size avocados, shall contain 11 pounds net weight. Standard container number 9E, if packed to contain 84 or more of smaller size avocados, shall contain a net weight of 22 pounds.

44973. Standard containers numbers 9D and 9E may be used for avocados which are placed loose, if 9D contains a net weight of 12½ pounds and 9E contains a net weight of 25 pounds.

44974. The net weight requirement specified in this chapter shall apply only on the day when the avocados are first placed or packed in the standard container.

44975. In lots of 10 or less containers of avocados, the net weight of each container shall be determined by the average net weight of the lot. In lots which are composed of 11 containers to 100 containers, 10 containers selected at random shall comprise a sample for determining the average net weight of each container in the lot represented by the sample.

Only one variety and one count size in standard container number 9D or in standard container number 9E shall be included in determining the average net weight of a lot inspected.

44976. If avocados are placed loose in containers other than standard containers for avocados, such containers shall be plainly and conspicuously marked in letters at least one-half of an inch in height with the words "irregular container."

44977. If avocados are packed or placed loose in any consumer-type container which does not exceed 60 percent of the size of the smallest standard container for avocados, such container need not comply with standard container size or with marking requirements.

CHAPTER 10. BERRIES

Article 1. Standards

45101. Strawberries, red and black cap raspberries, and blackberries, including the hybrid derivatives of such berries, shall be mature but not overripe and shall be free from any of the following defects:

(a) Insect injury which has penetrated or damaged the flesh.

(b) Mold, decay, and damage which is due to sun, frost, bruise, disease, or other cause.

45102. Not more than 10 percent, by weight, of the berries in any one container or bulk lot may be below the requirements which are prescribed by Section 45101, but not to exceed one-half of this tolerance shall be allowed for any one cause.

45103. Any strawberry which has two-thirds of the surface showing a pink or red color, shall be considered mature.

Article 2. Packing Requirements

45151. All strawberries shall be in standard container number 3A or 3C. All other berries shall be in standard container number 3A or 3B.

CHAPTER 11. BROCCOLI

Article 1. Standards

45301. Italian sprouting broccoli shall be free from any of the following defects:

(a) Mold, decay, and worm or other insect injury.

(b) Damage which is due to overmaturity.

45302. A stalk of Italian sprouting broccoli shall be considered as being damaged due to overmaturity if more than three

of the flower buds are opened to the extent that the normal flower color is readily visible.

45303. Not more than 10 percent, by count, of the individual specimens of Italian sprouting broccoli may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

Article 2. Markings on Containers

45331. Every container of Italian sprouting broccoli shall bear upon it in plain sight and in plain letters on one outside end, the name of the person that first packed or authorized the packing of the broccoli, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such person.

Chapter 12. Brussels Sprouts

Article 1. Standards

45451. Brussels sprouts shall be free from any of the following defects:

(a) Mold, decay, burst heads, and insect larvae.

(b) Serious damage which is due to insects. Damage which is due to insects is not serious unless 50 percent, by weight, of the individual sprout is affected by insect injury or by the presence of insects.

45452. Brussels sprouts shall not be soft or spongy.

45453. Not more than 10 percent, by weight, of the sprouts in any one container or bulk lot shall be below these requirements, and not to exceed one-half of this tolerance shall be allowed for any one cause, with the exception of serious damage which is due to insects for which not more than 10 percent tolerance shall be allowed.

Article 2. Markings on Containers

45481. All containers of Brussels sprouts shall bear upon them, in plain sight and in plain letters, on one side or one end, the name of the person that first placed or authorized the placing of the Brussels sprouts in the containers, or the name under which such person is engaged in business, together with a sufficiently explicit address as to permit ready location of such person.

Chapter 13. Cantaloupes

Article 1. Standards

45601. Cantaloupes shall be mature but not overripe, not poorly netted, and free from any of the following defects:

(a) Mold, decay, and insect injury which has penetrated or damaged the edible portion of the cantaloupe.

(b) Serious damage which is due to bruises, sunburn, growth cracks, cuts, sponginess, flabbiness, wilting, or other causes. Damage to any one cantaloupe is not serious unless it affects the edible portion of the individual cantaloupe.

45602. "Mature" in the case of a cantaloupe means that the cantaloupe complies with all of the following requirements:

(a) The appearance of the outside indicates maturity.

(b) The arils which surround the seed during the development of maturity have been absorbed.

(c) The juice of the edible portion contains not less than 8 percent soluble solids as determined by the standard hand refractometer.

45603. The soluble solids content of the edible portion of cantaloupes shall be determined by extracting the juice from two plugs of the flesh, one from each of opposite sides of the melons, and taken at approximately one-half of the distance between the stem and blossom ends. The plugs shall be approximately one-half of an inch in diameter. The portion of the plug three-eighths of an inch from the outside edge of the rind shall not be included as the edible portion of the plug of flesh.

45604. Not more than 10 percent, by count, of the cantaloupes in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

Article 2. Standard Containers and Packs

45631. The standard containers and packs for cantaloupes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

45632. The standard containers for cantaloupes are standard containers numbers 39, 40, 41, 42, 43, 44, and 44A.

45633. The following counts of cantaloupes which are packed, are standard packs for the respective standard containers as follows:

Standard pack counts	Container number	Standard container name
27, 36, or 45	39	Standard cantaloupe crate
45 or 54	40	Pony cantaloupe crate
18, 23, 27, 36, 41, or 45	41	Jumbo cantaloupe crate
18, 23, 27, 36, 41, or 45	42	Cantaloupe crate
12, 15, 18, 24, or 30	43	Cantaloupe container
12, 15, 18, 24, or 30	44	Cantaloupe container
18, 23, 27, 36, 41, or 45	44A	Special cantaloupe crate

Article 3. Packing Requirements

45661. As used in this article, "closed" as applied to containers of cantaloupes means:

(a) In the case of fiberboard containers, that the opening is completely covered, except for necessary ventilation openings, with material of similar quality and strength to the adjoining portion of the container.

(b) In the case of nailed wooden, wirebound, or other containers, that 40 percent or more of the opening is covered with material similar to that used in the construction of the sides and bottom of the containers, securely attached to the top.

45662. As used in this article, "consumer" means a person that buys cantaloupes for use as food and not for resale.

45663. All cantaloupes shall be packed in regular compact arrangement in standard container number 39, 40, 41, 42, 43, 44, 44A, or 44B. All such containers shall be closed and, except as otherwise provided in Section 45664, the number of cantaloupes in each container shall be one of the "standard pack counts" which is listed in Section 45633 for each such container.

This section does not apply to any of the following:

(a) Cantaloupes which are in a retail establishment in possession of a retailer for the purpose of resale directly to consumers.

(b) Cantaloupes which are sold by a producer regularly engaged in the production of cantaloupes directly to consumers on the premises where produced or at a retail stand operated by such producer near the point of production, which in no case shall be outside of the county in which the cantaloupes were produced.

45664. Notwithstanding the provisions of Sections 45633 and 45663, a smaller number of larger uniformly sized cantaloupes may be packed in standard container number 41 or 42 if the container is marked with the exact count of cantaloupes which it contains.

45665. Cantaloupes which are packed shall be virtually uniform in size and there shall be approximately the same numerical count of uniformly sized cantaloupes in each layer throughout the container.

Article 4. Markings on Containers

45691. Every container of cantaloupes shall bear upon it in plain sight and in plain letters on one outside end, the name of the person that first packed or authorized the packing of the cantaloupes, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

CHAPTER 14. CARROTS

Article 1. Definitions and General Provisions

45801. As used in this chapter, "bunched carrots" means carrots with tops that are attached which are tied together in a group. It does not include carrots with tops removed.

45802. In the case of bunched carrots, the term "prepare," as used in this division, includes the act or process of grading, counting, and tying of the carrots into bunches.

Article 2. Standards

45831. As used in this article:

(a) Two or more galls constitute a group.

(b) A rootlet is secondary if it is one-sixteenth of an inch or more in diameter at the widest portion of the cross section.

45832. Carrots shall be free from any of the following defects:

(a) Decay.

(b) Serious damage which is due to insects or to insect larvae, growth cracks, sunburn, doubles, mechanical injury, excessive roughness, disease, green discoloration, dirt, root galls, secondary rootlets, or objectionable flavor or odor from oil or other causes.

45833. Except in case of dirt, injury which is due to insects or insect larvae, root galls, secondary rootlets, objectionable flavor or odor from oil or green discoloration, damage to any one carrot is not serious unless it causes a waste of 5 percent, by weight, of the individual carrot.

45834. Damage to any one carrot which is due to dirt is not serious unless the dirt adheres to more than one-fourth of the surface and cannot readily be removed in the normal preparation for use.

45835. Damage to any one carrot which is due to green discoloration is not serious unless the discoloration on any portion of the carrot extends to 15 percent or more of the length of the carrot.

45836. Damage to any one carrot which is due to objectionable flavor or odor from oil is serious if the carrot is affected to the extent that such flavor or odor is noticeable in any part of the carrot, exclusive of the tops.

45837. Damage to any one carrot which is due to insects or to insect larvae is not serious unless the damage penetrates or affects the flesh to a depth of one-eighth of an inch or more or it causes a waste of 5 percent, by weight, of the individual carrot.

45838. Damage to any one carrot which is due to root galls or secondary rootlets is not serious in any of the following cases:

(a) If it is in bulk or in any container which is not closed unless such defects singly or in the aggregate cause a waste of 10 percent, by weight, of the individual carrot.

(b) If it is in any closed container unless the individual carrot has more than five groups of root galls on the carrot or on the secondary rootlets, or more than five secondary rootlets or unless such defects singly or in the aggregate cause a waste of 5 percent, by weight, of the individual carrot.

In no case shall any one carrot which is in any closed container have more than five groups of galls or five secondary rootlets or more than a total of five of both such defects.

45839. Not more than 10 percent of the carrots in any one container or bulk lot may be below the requirements which are prescribed by this article. This percentage shall be determined as follows:

(a) As to carrots with tops removed, by weight.

(b) As to carrots with tops attached, by count.

Article 3. Bunched Carrots Requirements

45861. Bunched carrots shall conform to all of the following requirements:

(a) The carrots in any one bunch shall not vary more than three-eighths of an inch in diameter measured at the greatest dimension at right angles to the longitudinal axis.

(b) Regardless of size of the carrots, each bunch shall consist of no less than four carrots and shall weigh not less than one pound including tops.

Twenty percent of the bunches in any one container or bulk lot may vary from one or all of the bunching, sizing, and weight requirements of this section but in no case shall a combination of such variances exceed 20 percent.

45862. Not more than 15 percent of the bunches of carrots with tops attached shall have tops which are seriously damaged by decay or blight or the presence of leaves or leaf stems which are both dried and discolored.

45863. Damage to the tops of any one bunch of carrots due to decay or blight, or the presence of leaves or leaf stems which are both dried and discolored, is serious if it affects the leaves, branches, or any part of more than 25 percent of the leaf stems.

Article 4. Standard Containers and Packs

45891. The standard containers and packs for carrots, when being packed or placed in any container, or after packing or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

45892. The standard containers for carrots are standard containers numbers 45N, 45O, 45P, 45Q, 45R, and 45T.

Article 5. Packing Requirements

45911. Bunched carrots and carrots with tops removed, whether in consumer packages or not, which are in closed wooden, fiberboard, or wirebound containers shall be in standard container number 45N, 45O, 45P, 45Q, 45R, or 45T.

45912. At least 90 percent of the carrots in any closed container shall be of the same varietal type. Varietal types of carrots are the short, blunt type and the long, slender, pointed type.

Article 6. Markings on Containers

45941. All closed containers of bunched carrots and carrots with tops removed shall bear upon them in plain sight and in plain letters and numbers on one outside end all of the following information:

(a) The name of the person that first packed or authorized the packing or the name under which such person is engaged in business and an address sufficiently explicit to permit ready location of such person. The name and address of such person need not, however, be placed upon burlap bags which contain carrots with tops removed if such carrots are not in consumer packages.

(b) In the case of bunched carrots or carrots with tops removed and placed in consumer packages, the exact number of dozens of bunches or consumer packages in the container in letters and figures at least one inch in height followed by the term "doz." or "dozen."

CHAPTER 15. CAULIFLOWER

Article 1. Standards

46051. Cauliflower shall be free from any of the following defects:

(a) Rots and worm or other insect injury which has penetrated or damaged the curd.

(b) Serious damage which is due to freezing, sunburn, or other causes. Damage which is due to freezing, sunburn, or other causes is not serious unless it causes a waste of 20 percent or more of the edible portion of the individual cauliflower.

46052. Not more than 5 percent, by count, of the heads in any one lot of containers or bulk lot may be below the requirements which are prescribed by this article, but no container or bulk lot of less than 10 heads shall have more than 20 percent, by count, of the heads which are below these requirements.

Article 2. Standard Containers and Packs

46081. The standard containers and packs for cauliflower, when being packed or placed in any container, or after pack-

ing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

46082. The standard containers for cauliflower are standard containers numbers 46, 46A, 46B, and 46C.

Article 3. Packing Requirements

46101. Except as otherwise provided in this article, all cauliflower which is packed shall be in standard container number 46, 46A, 46B, or 46C. Other size containers may be used if such containers are conspicuously marked on the outside of the end or side which bears any marks intended to describe the contents of such container, in letters not less than one-half inch in height, "irregular container."

46102. Except as otherwise provided in this section, heads or curds of cauliflower when wrapped shall be individually wrapped and fairly tightly packed in standard container number 46, 46A, or 46B and contain one of the following standard pack and counts of the designated size and diameter:

Standard pack and count	Curd size in inches
12	5 and over
14, 15, and 16	under $5\frac{1}{2}$
20	under $4\frac{1}{2}$

Curds too large to pack as a 12 count in one of the standard containers which are specified for wrapped and packed cauliflower may be wrapped and packed with a lesser count.

46103. Curds shall be measured across the center face of the curd at the widest dimension, not including wrapper leaves.

46104. Containers of wrapped cauliflower, except individually wrapped heads or consumer packages, shall be marked, in letters one-half of an inch in height, with the exact number of heads or curds in the container.

46105. One container, in any lot of containers of cauliflower which are packed with 12 heads or less in each container may have not more than three heads which have a smaller minimum diameter than the minimum diameter which is specified in Section 46102. Any of the remaining containers in the lot may have not more than two heads which have a smaller than the minimum diameter which is specified in Section 46102.

46106. One container, in any lot of containers of cauliflower which are packed with 14 heads or more in each container, may have not more than three heads which have a greater diameter than the maximum diameter which is specified in Section 46102 for the count of heads in the container. Any of the remaining containers in the lot may have not more

than two heads which have a greater diameter than the maximum diameter which is specified in Section 46102 for the count of heads in the container.

46107. Cauliflower which is packed in any container shall be properly trimmed.

As used in this section, "properly trimmed" means that the number of jacket leaves is limited to those which are necessary to protect the head of the cauliflower.

CHAPTER 16. CELERY

Article 1. Definitions

46251. As used in this chapter, "stalks" means the individual celery plant.

Article 2. Standards

46271 As used in this article, "pithy condition" means that the branches of the celery have a distinctly open texture with air spaces in the central portion.

46272. Celery shall be free from pink rot or any other decay and free from serious damage caused by blackheart, insects, seed stem, and pithy condition from any cause.

46273. Serious damage in celery means injury which is due to any of the following:

(a) Blackheart, which is decayed or wet, and which affects one or more branches which compose the heart of the stalk.

(b) Insects, if more than four branches are each affected by more than an aggregate area of one square inch.

(c) Seed stem, the length of which is more than four times the diameter of the stalk measured at a point two inches above the point of attachment of the outer branches to the root.

(d) A pithy condition from freezing or any cause if more than four branches are each affected by a pithy condition, which affects more than two-thirds of the distance between the base of the branch and the point where the leaf branches are attached.

46274. Except as otherwise provided in Section 46275, not more than 10 percent, by count, of the stalks of celery in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance, shall be allowed for any one cause.

46275 An additional tolerance of 10 percent by count of the celery in any one container or bulk lot shall be permitted for stalks of celery which are damaged by a pithy condition from freezing or any cause.

46276. Celery, which fails to comply with the requirements of this article only because of serious damage which is due to seed stems, shall be considered as complying with this standard if the containers in which the celery is packed or

placed is plainly marked on the outside end or side of the container which bears other markings that are required by this chapter, in letters which are not less than one-half of an inch in height, with the words "seed stems."

Article 3. Standard Containers and Packs

46301. The standard containers and packs for celery, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

46302. The standard containers for celery are standard containers numbers 45E, 45F, 45G, 45H, 45I, 45J, and 45K.

Article 4. Packing Requirements

46321. As used in this article, "closed" or "lidded," as applied to containers of celery, means:

(a) In the case of any fiberboard container, that the opening is completely covered, except for necessary ventilation openings, with material of similar quality and strength to the adjoining portion of the container.

(b) In the case of any nailed wooden, wirebound, or other container, that 40 percent or more of the opening is covered with material that is similar to that used in the construction of the sides and bottom of such container, which is securely attached to the top.

46322. As used in this article, "consumer" means a person that buys celery for use as food and not for resale.

46323. The container requirements of this article do not apply to any of the following:

(a) Celery which is in a retail establishment in the possession of a retailer for the purpose of resale directly to consumers, or celery which is sold by a producer that is regularly engaged in the production of celery directly to consumers on the premises where it is produced or at a retail stand which is operated by such producer near the point of production, which in no case shall be outside of the county in which the celery was produced.

(b) Celery which is prepared or packed for shipment to another packing plant which is located in this state for the purpose of further grading and packing into consumer packages, subject to the provisions of Sections 42881, 42882, 42883, 42884, and 42885 of this code which relate to the control of such shipments.

(c) Celery which is being transported out of the state for prepackaging if a permit has first been obtained from an enforcing officer.

An enforcing officer may issue a permit if he determines that the celery complies with the requirements of this chapter, ex-

cept as to containers, and is to be delivered pursuant to a bona fide contract of sale direct to a purchaser for further grading and packing into consumer packages.

46324. Except as otherwise provided in Section 46325, all celery shall be placed in standard containers numbers 45E, 45F, 45G, 45H, 45I, 45J, or 45K and such containers shall be closed and lidded. Standard container number 45E shall be closed with a lid which is not over 22 inches in length.

46325. Containers of celery which are conspicuously marked on the outside of the end which bears any marks which are intended to describe the contents of such containers, in letters not less than one inch in height, with the designation "Irregular container," need not comply with the provisions of this article which relate to containers.

46326. Celery which is packed in any container shall be so tightly packed that it is not possible, without damaging or injuring the celery, to place additional stalks in the container and shall be uniform in size, which means that the stalks of celery:

(a) If packed three and one-half dozen or less to the crate, do not vary in size more than would tightly pack a one-half dozen size larger or smaller than the size count as marked.

(b) If packed with more than three and one-half dozen to the crate, do not vary in size more than would tightly pack a one dozen size larger or smaller than the size count as marked.

46327. Not more than a total of 10 percent, by count, of the stalks of celery in any one container may vary from the uniform in size requirements of Section 46326.

46328. Celery which fails to meet the uniform in size requirement which is prescribed by Section 46326 shall be considered as complying with such requirement, if the container in which it is packed is plainly and conspicuously marked, on the outside of the end or side which bears any other markings required by this section, in letters not less than one-half of an inch in height, with the words "irregular sizes."

Article 5. Markings on Containers

46351. Every container of celery shall bear upon it in plain sight and in plain letters on one outside end or side all of the following information:

(a) The name of the person that first packed or authorized the packing of the celery, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer

(b) The number of stalks in the container in figures not less than three-fourths of an inch in height.

46352. The number of stalks in the container may be expressed in numerical count, or in dozens and one-half dozens. If it is expressed in dozens and one-half dozens, the number shall be followed by the term "doz." or "dozen," in like size letters or type

46353. If containers of celery are marked as containing less than 36 stalks, the actual number of stalks in 95 percent of the containers in any lot, shall not vary more than two under or two over the count as marked. If containers are marked as containing 36 or more stalks the actual number of stalks in 95 percent of the containers in any lot, shall not vary more than three under or three over the count as marked.

46354. Every container of celery with hearts removed from more than 10 percent of the stalks shall bear upon it in plain sight and in plain letters, which are at least one-half of an inch in height, on the outside end or side of the container which bears other markings which are required by this article, the designation "hearts removed."

CHAPTER 17. CHERRIES

Article 1. General Provisions

46501. Compliance with the requirements of this chapter may be determined by the examination of a representative sample of the cherries in any container or bulk lot.

Article 2. Exceptions

46521. This division does not prohibit any person, under a permit issued pursuant to this article, from transporting out of the state cherries which fail to comply with the packing, container, or marking requirements of this division, if both of the following requirements are satisfied:

(a) The permit is issued for and is attached to each load or lot which is transported.

(b) The cherries are loose in containers which are not closed, or in bins each holding 200 pounds or more of the cherries.

46522. The permit may be issued by the commissioner of the county from which the cherries are to be transported if such commissioner has satisfactory verification by a like officer of the state of destination that the cherries are to be transported to a purchaser for commercial processing, preserving, or manufacturing on the premises of the purchaser. Such verification shall include a statement that such official will report to the commissioner who issued the permit as to the commercial processing, preserving, or manufacturing use to which the cherries so transported under the permit were actually put by the purchaser of the cherries.

Article 3. Standards

46551. Cherries shall be mature but not overripe and free from any of the following defects:

(a) Insect injury or bird pecks which have penetrated or damaged the flesh, unsealed skin breaks, mold, brown rot, and decay.

(b) Growth cracks or cracks or splits over three-eighths of an inch in length even though well healed. Well healed shoulder cracks shall, however, be allowed regardless of length.

(c) Serious damage due to sunburn, shriveling, sponginess, abnormal softening, or other causes.

46552. No red or black variety of cherries shall be considered mature unless at the time of picking the entire surface of the cherries has attained at least a solid light red color.

46553. Not more than 10 percent, by count, of the cherries in any one container or bulk lot, may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause. In addition, 5 percent of the cherries in any one container or bulk lot may be slightly below the maturity requirements which are prescribed by this article. In no case, however, may such cherries show any green areas, except cherries of the Bing variety which test not less than 16 percent, or cherries of the Tartarian variety, which test not less than 14 percent, soluble solids in a composite sample of the juice from not less than 10 representative cherries as shown by a standard refractometer instrument.

Article 4. Packing Requirements

46571. Cherries shall be in standard container number 4, 12A, 22B, or 22C.

46572. The depth dimensions of containers which are designated for cherries shall include in the measurement of the specified depth any cleats used, if any are used.

46573. If cherries are packed in containers by the "face and fill" method, the average size of the cherries which are used in the fill shall not be smaller than would pack one "row size" more than the cherries in the packed face. None of the cherries in the fill shall, however, be of a size that would pack more than two sizes smaller, except that 10 percent, by count, of the cherries in any one container may be below this minimum size requirement.

46574. Cherries which meet all other requirements of this chapter shall in addition be free from doubles except as follows:

(a) A tolerance of 10 percent, by count, shall be allowed for doubles with both halves well developed uniform in size and mature.

(b) A tolerance of 2½ percent, by count, shall be allowed for doubles which have one portion that is not well developed. Any amount of such doubles shall, however, be allowed if the container in which they are placed or packed is plainly and

conspicuously marked on the outside end of the container, which bears other markings required by this chapter, with the designation "Exceeds tolerance for doubles" in letters which are at least three-eighths of an inch in height.

46575. If any container of loose cherries is marked with a row size designation, all of the following requirements shall be satisfied:

(a) The words "and larger" or similar words shall not be used unless at least 90 percent of the cherries in the container are of a size no smaller than the row size number which is marked on the container.

(b) At least 50 percent of the cherries in the container shall be of a size no smaller than the row size number which is marked on the container. None of the cherries in such container shall, however, be more than two row sizes smaller than the row size which is marked on the container, except that 10 percent, by count, of the cherries in any one container may be below this minimum size requirement.

The row size number is that number of cherries of uniform size whose aggregate width will equal 11½ inches.

46576. If any container of loose cherries is marked with the minimum diameter of the cherries in the container, none of the cherries in such container shall be smaller in diameter than the size which is marked on the container, except that 10 percent by count, of the cherries in any one container may be below the size which is marked In addition, the cherries in any container which is so marked with the minimum diameter, shall not vary in diameter between the fruits in the container more than one-fourth of an inch. The "diameter" means the diameter measured through the widest portion of the cross section of the cherry at a right angle to a straight line drawn from the stem end to the distal end of it.

Article 5. Markings on Containers

46601. Every container of cherries shall bear upon it in plain sight, and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the cherries or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) The name of the variety, if known, or if it is not known the words "unknown variety."

46602 If two or more varieties are placed in the same container, it shall be marked "mixed varieties."

46603. Every container of row-packed cherries shall be marked with the number of rows of cherries which are packed laterally across the end of the container, directly followed by the word "row" or "rows" or the letter "R" in like size letters. No row size marking is, however, permitted for containers of 16-row size and smaller in the Tartarian variety of

cherries and 15-row size and smaller in the Bing variety of cherries.

46604. Except as otherwise provided in this section, every closed container of loose cherries shall be marked in numbers and letters at least three-eighths of an inch in height with one of the following:

(a) The row size of the cherries in the container followed by the term "row size." No row size marking is, however, permitted for containers of 16-row size and smaller in the Tartarian variety of cherries and 15-row size and smaller in the Bing variety of cherries.

(b) The "minimum diameter" of the cherries in the container expressed in inches or fractions of an inch, followed by the term "inch minimum diameter," "inches minimum diameter," or a proper abbreviation or variation of such designation. No inch minimum diameter marking is, however, permitted for containers of 46/64 inch minimum diameter cherries and smaller in the Tartarian variety of cherries and 49/64 inch minimum diameter cherries and smaller in the Bing variety of cherries.

Chapter 18. Citrus Fruit

Article 1. Definitions

46801. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

46802. "Closed," as applied to standard container number 58, 59, or 63, means that the container is completely closed by material of a similar quality to the adjoining portion of the box. "Closed," as applied to standard container number 62, means that the container has top flaps so constructed that any opening on the top of the container does not exceed 5¾ inches in width nor 13 inches in length and such flaps are material of a similar quality to the adjoining portion of the container.

This does not prevent the use of ventilation openings and handhold openings in standard containers numbers 58, 59, 62, and 63 which are so constructed that they are not large enough for the removal of any part of the contents of such containers.

46803. "Diameter," as applied to oranges, lemons, and grapefruit, means the diameter measurement taken at the widest portion of cross section, at a right angle to a straight line drawn from the stem end to the distal end of such citrus fruit.

46804. "Uniform in size," as applied to oranges, lemons, and grapefruit, means that none of the fruit in any one container may be more than 15 percent larger or smaller in diameter than the average diameter of the fruit in the container.

46805. "Packed," as applied to oranges, lemons, grapefruit, and tangerines, means a compact arrangement in the container either with or without straight rows or layers.

Article 2. General Provisions

46831. Any citrus fruit which has been in storage or after being shipped which fails to meet the requirements of the standards for citrus fruits that are established in this chapter only by reason of brown rot, blue mold, or green mold which has occurred after it was packed, or placed loose in a container, shall not be held for violation of any provision of this division on account of such deterioration.

46832. It is unlawful for any person to mix or blend citrus fruits which do not conform to the requirements of this division with other citrus fruits which conform to such requirements for the purpose of selling, marketing, or transporting the fruit which does not conform to the requirements of this division.

Article 3. Grapefruit

46861. As used in this article, "desert areas" mean Imperial County, the portions of Riverside and San Diego Counties which are located east of a line extending north and south through White Water, and that portion of San Bernardino County which is located east of the 115 meridian.

46862. Owing to climatic and other conditions, grapefruit which is produced in this state south and east of San Gorgonio Pass varies in quality and other particulars from grapefruit produced elsewhere in the state.

46863. The area south and east from San Gorgonio Pass to the north end of the Salton Sea and known as Coachella Valley is the Coachella Valley Citrus District. The area comprising Imperial County is the Imperial Citrus District.

Grapefruit produced in any citrus district may be labeled with the name of the citrus district in which produced. It is unlawful for any person to label any grapefruit with the name of any citrus district unless the grapefruit was produced in such citrus district.

46864. Grapefruit shall meet the requirements which are prescribed by this article.

46865. The standards which are prescribed by Sections 46866 to 46882, inclusive, shall be applied in determining whether or not grapefruit meet the requirements of this article.

46866. Grapefruit shall be mature. Grapefruit, except grapefruit which are produced in the desert areas or in other states under climatic conditions similar to those prevailing in the desert areas, are not mature unless they meet both of the following requirements:

(a) At the time of picking and at all times thereafter the juice contains soluble solids, as determined by a Brix scale hydrometer, equal to or in excess of five and one-half parts to every part of acid which is contained in the juice. The acidity of the juice shall be calculated as citric acid without water of crystallization.

(b) 90 percent or more of the grapefruit, by count, at the time of picking and at all times thereafter have attained, on at least two-thirds of the fruit surface, at least a minimum characteristic yellow or grapefruit color, as indicated by Color Plate No. 19 L3 in "Dictionary of Color," Maerz and Paul, first edition, 1930.

46867. Grapefruit which are produced in the desert areas are not mature unless they meet both of the following requirements:

(a) In view of differences in climatic conditions that prevail in the desert areas, which result in the grapefruit grown in those areas having, at maturity, a higher percentage of soluble solids to acid than the mature grapefruit which are grown in other areas of the state, grapefruit which are produced in the desert areas are considered mature if at the time of picking and at all times thereafter the juice contains soluble solids, as determined by a Brix scale hydrometer, equal to or in excess of six parts to every part of acid which is contained in the juice. The acidity of the juice shall be calculated as citric acid without water of crystallization.

(b) 90 percent or more of the grapefruit, by count, at the time of picking and at all times thereafter have attained, on at least two-thirds of the fruit surface, at least a minimum characteristic yellow or grapefruit color, as indicated by Color Plate No 19 L3 in "Dictionary of Color," Maerz and Paul, first edition, 1930.

46868. Grapefruit that are produced outside of this state under climatic conditions which are similar to those prevailing in the desert areas and offered for sale in this state shall meet the same maturity standard as that which is prescribed for grapefruit which are produced in the desert areas.

46869. Grapefruit shall be free from serious decay. Decay is serious if any part of the grapefruit is affected with decay.

46870. Grapefruit shall be free from serious damage which is caused by freezing or drying that is due to any cause. Damage which is caused by freezing or drying that is due to any cause is serious if 20 percent or more of the pulp or edible portion of the grapefruit shows evidence of drying or a mushy condition. Evidence of damage shall be determined by as many cuts of each individual grapefruit as are necessary.

46871. Grapefruit shall be free from serious injury due to any cause. Injury which is due to any cause is serious if the skin (rind) is broken and the injury is not healed.

46872. Grapefruit shall be free from serious scars, including scars which are caused by insects. Scars, including those which are caused by insects, are serious if they are dark, rough, or deep and if they aggregate 25 percent or more of the fruit surface.

46873. Grapefruit shall be free from serious scale. Scale is serious if 50 percent or more of the fruit surface shows scale infestation in excess of 50 scales per square inch.

46874. Grapefruit shall be free from serious dirt, smudge stain, sooty mold, rot residues, or other foreign material. Dirt, smudge stain, sooty mold, rot residues, or other foreign material are serious if an aggregate area of 25 percent or more of the fruit surface is affected.

46875. Grapefruit shall be free from serious staining. Staining of the skin (rind) is serious if 50 percent or more of the fruit surface is affected with a pronounced discoloration.

46876. Grapefruit shall be free from serious greenish or brownish rind oil spots Greenish or brownish rind oil spots are serious if they cover an aggregate area of 25 percent or more of the fruit surface.

46877. Grapefruit shall be free from serious spotting or pitting. Spotting or pitting is serious if the spots or pits are sunken and cover an aggregate area of 10 percent or more of the fruit surface.

46878. Grapefruit shall be free from serious roughness. Roughness is serious if 90 percent or more of the fruit surface is rough and coarse, or lumpy

46879. Grapefruit shall be free from serious aging. Aging is serious if one-third or more of the surface of the grapefruit is dried and hard.

46880. Grapefruit shall be free from serious softness. Softness is serious if the grapefruit is flabby.

46881. Grapefruit shall be free from serious sunburn. Sunburn is serious if it causes decided flattening of the fruit and drying and discoloration of the skin (rind) which affects more than one-third of the fruit surface.

46882. Grapefruit shall be free from serious sheepnose. Sheepnose is serious if the stem end of the grapefruit protrudes decidedly.

46883. The compliance or noncompliance with the standards for grapefruit which are prescribed in this article, except as to maturity, may be determined from a representative sample which is taken as follows.

(a) If in containers, the sample shall consist of not less than 10 percent, by count, of the grapefruit in each of the containers which are selected as the sample.

(b) If in bulk, the sample shall consist of not less than 100 grapefruit, except that if the total number of grapefruit in the bulk lot is less than 1,000 grapefruit a representative sample shall consist of 10 percent of the grapefruit.

46884. Each individual grapefruit may be examined for one or all of the defects, except as to maturity, but only one defect shall be counted or scored against any individual grapefruit.

46885. The official sample for testing for maturity of grapefruit shall consist of not less than 30 grapefruit.

46886. Any such sample which is taken as prescribed in this article shall constitute prima facie evidence of the character of the entire lot from which such sample was taken, as provided in Section 42851 of this code.

46887. The following tolerances which are to be applied to certain of the standards that are prescribed by this article are established by this section:

(a) The grapefruit in any one container or bulk lot, as a whole, meet the requirements which are prescribed by Section 46869 and Sections 46871 to 46882, inclusive, if not over 10 percent, by count, of the individual grapefruit in such container or bulk lot are below such standards, and if not over 5 percent, by count, of such grapefruit are below any one of such standards.

(b) The grapefruit in any one container or bulk lot, as a whole, meet the requirements which are prescribed by Section 46870 if not more than 15 percent, by count, of the individual grapefruit in such container or bulk lot are seriously damaged by freezing or drying due to any cause, but not to exceed one-third of this tolerance shall be allowed for very serious damage which is by freezing or drying due to any cause. Damage by freezing or drying due to any cause is very serious if 40 percent or more of the pulp or edible portion of the grapefruit shows evidence of drying or a mushy condition. Evidence of damage shall be determined by as many cuts of each individual grapefruit as are necessary.

Article 4. Lemons

46911. Lemons shall meet the requirements which are prescribed by this article.

46912. The standards which are prescribed by Sections 46913 to 46928, inclusive, shall be applied in determining whether or not lemons meet the requirements of this article.

46913. Lemons shall be mature. Lemons are mature if they have a juice content of 30 percent or more by volume, except that lemons which are packed for export to markets other than Canada are not required to meet this standard.

46914. Determination of maturity shall be made as follows:

(a) The volume of a representative sample of at least 25 lemons from the containers or bulk lot shall be measured by water displacement in a graduate.

(b) The juice is then extracted from the sample by reaming, screened by pressing through cheesecloth, and its volume measured in a graduate.

(c) The percent of juice by volume is found by dividing the juice volume by the fruit volume and multiplying by 100.

46915. Lemons shall be free from serious decay. Decay is serious if any part of the lemon is affected with decay.

46916. Lemons shall be free from serious damage which is caused by freezing, internal decline, sunburn, or drying that is due to any cause. Damage which is caused by freezing, or internal decline, or sunburn, or drying that is due to any cause is serious if 20 percent or more of the pulp or edible portion of the lemon shows evidence of drying, or staining (ex-

cept membranous stain), or a mushy condition. Damage by internal decline is also serious if the core shows gumming for its entire length. Evidence of damage shall be determined by as many cuts of each individual lemon as are necessary.

46917. Lemons shall be free from serious injury which is due to any cause. Injury which is due to any cause is serious if the skin (rind) is broken and the injury is not healed.

46918. Lemons shall be free from serious scars, including scars which are caused by insects. Scars, including those which are caused by insects, are serious if they are dark, rough, or deep and if they aggregate 25 percent or more of the fruit surface.

46919. Lemons shall be free from serious scale. Scale is serious on the individual lemon if each of three circular areas one inch in diameter, selected as the worst infested areas, each has 15 or more scales.

46920. Lemons shall be free from serious dirt, sooty mold, rot residues, or other foreign material. Dirt, sooty mold, rot residues, or other foreign material are serious if an aggregate area of 10 percent or more of the fruit surface is affected by one or more of the defects which are mentioned in this section.

46921. Lemons shall be free from serious staining, including smudge stain. Staining of the skin (rind), including smudge stain, is serious if one-third or more of the fruit surface is affected with a pronounced discoloration.

46922. Lemons shall be free from serious red blotch. Red blotch is serious if the affected area or areas aggregate 10 percent or more of the fruit surface.

46923. Lemons shall be free from serious greenish or brownish rind oil spots. Greenish or brownish rind oil spots are serious if they cover an aggregate area of 25 percent or more of the fruit surface.

46924. Lemons shall be free from serious peteca. Peteca is serious if the spots or pits cover an aggregate area of 10 percent or more of the fruit surface.

46925. Lemons shall be free from serious spotting and pitting, other than peteca, including black pit, septoria, anthracnose, and cold storage injury. Spotting and pitting, other than peteca, are serious if the spots or pits are sunken and cover in the aggregate an area more than one-half an inch in diameter.

46926. Lemons shall be free from serious deformities. Deformities, except from bud mite damage, are serious if one-third or more of the individual fruit surface is malformed, ridgy, or lumpy.

46927 Lemons shall be free from serious bud mite damage Bud mite damage is serious if 20 percent or more of the individual fruit surface is malformed, or the stylar end shows a definite division, or is open.

46928 Lemons shall be free from serious aging. Aging is serious if 25 percent or more of the surface of the lemon is shriveled or hard.

46929. The compliance or noncompliance with the standards for lemons which are prescribed in this article, except as to maturity, may be determined from a representative sample which is taken as follows:

(a) If in containers, the sample shall consist of not less than 5 percent, by count, of the lemons in each of the containers which are selected as the sample.

(b) If in bulk, the sample shall consist of not less than 100 lemons, except that if the total number of lemons in the bulk lot is less than 1,000 lemons a representative sample shall consist of 10 percent of the lemons.

46930. Each individual lemon may be examined for one or all of the defects, except as to maturity, but only one defect shall be counted or scored against any individual lemon.

46931. The following tolerances which are to be applied to the standards that are prescribed by this article are established by this section:

(a) There is no tolerance for failure to meet the maturity requirements which are prescribed for lemons.

(b) Not more than 5 percent, by count, of the lemons in any one container or bulk lot may fail to meet the requirements which are prescribed by Section 46916 because of damage by internal decline, sunburn, or drying for any cause except freezing. Not more than 10 percent, by count, of the lemons in any one container or bulk lot may fail to meet the requirements which are prescribed by Section 46916 because of damage by freezing, but not to exceed one-half of this tolerance, or 5 percent, shall be allowed for lemons which show damage by freezing in 40 percent or more of the pulp or edible portion of the lemon. In no case, however, may the total tolerance for such serious defects exceed 10 percent.

(c) Not more than 5 percent, by count, of the lemons in any one container or bulk lot may fail to meet the requirements of any one or a combination of the standards which are prescribed by Section 46915 and Sections 46917 to 46928, inclusive.

(d) In no case, however, may the total tolerance for the serious defects which are prescribed by Sections 46915 to 46928, inclusive, exceed 15 percent.

Article 5. Oranges and Limes Generally

46951. As used in this article, "damage on the segment walls" means a water-soaked appearance, evidence of previous water-soaking, or the presence of crystals or crystalline deposit, on the two surface membranes of each of two or more segments as shown on the separation of two or more segments of a section. The section shall not be less than one inch or more than one and one-half inches in thickness, and shall be obtained from the central portion of the fruit by cutting off a portion of each end. Such evidence of freezing injury shall

show for the entire length but not necessarily the entire area of the surface membranes.

46952. Oranges and limes shall meet the requirements which are prescribed by this article.

46953. Oranges and limes shall be mature. Oranges, except bloods, tangerines, and mandarins, shall not be considered mature unless they comply with one of the following requirements:

(a) The juice contains soluble solids which are equal to or in excess of eight parts to every part of acid which is contained in the juice (the acidity of the juice to be calculated as citric acid without water of crystallization), and 90 percent or more of the oranges in any lot, by count, before picking have attained, on at least one-fourth of the fruit surface, at least a minimum characteristic orange color, as indicated by Color Plate No. 13-L-2 in "Dictionary of Color," Maerz and Paul, first edition, 1930.

(b) The juice contains soluble solids which are equal to or in excess of 10 parts to every part of acid which is contained in the juice (the acidity of the juice to be calculated as citric acid without water of crystallization), and the average hue of the surface of 95 percent or more of the oranges before picking have attained a minimum characteristic orange color, as indicated by Color Plate No. 21-L-6 in "Dictionary of Color," Maerz and Paul, first edition, 1930.

No oranges may be accelerated in color unless the juice contains soluble solids equal to, or in excess of, eight parts to every part of acid which is contained in the juice (the acidity of the juice to be calculated as citric acid without water of crystallization).

The tolerances which are allowed by Section 46961 do not apply to the provisions of this section when determining whether any lot of oranges complies with the maturity standard

46954. Oranges and limes shall be free from decay.

46955. Oranges and limes shall be free from serious damage due to freezing. Damage from freezing to any one fruit is serious if it causes any of the following conditions:

(a) Damage on the segment walls, as defined in Section 46951.

(b) Drying or desiccation in 20 percent or more of the exposed pulp as shown on a transverse cut through the center.

46956. Oranges and limes shall be free from serious damage which is due to drying at the stem or stylar end which results from causes other than freezing. Damage by drying at the stem or stylar end of all oranges and limes which results from causes other than freezing, is not serious unless 20 percent or more of the pulp shows staining, drying, or desiccation.

46957. Oranges and limes shall be free from damage which is caused by splits, bruises, or punctures. Damage which is

caused by splits, bruises, or punctures in oranges and limes is not serious if the injury is well healed and free from mold or decay.

46958. In any season in which freezing damage to oranges which are produced in this state has occurred, the extent of damage by freezing to such oranges shall be determined as follows:

(a) By examination for damage on the segment walls from and after the time when the oranges were first exposed to freezing temperatures to the date, herein designated as date A, when the director, after survey, shall make a determination in writing that the drying process has developed to such extent as to furnish additional evidence of the extent of actual damage to the fruit.

(b) By examination of the exposed pulp on a transverse cut through the center, from and after the date, herein designated as date B, when the director, after survey, shall make a determination in writing that the drying process has developed to such extent as to permit reasonably accurate determination of the full extent of freezing damage by such examination, without regard to damage on the segment walls.

(c) Either by examination for damage on the segment walls or by examination of the exposed pulp on a transverse cut through the center, or by both such examinations, during the period from date A to date B. In no event shall the interval from date A to date B exceed three weeks.

46959. The extent of damage by freezing of oranges which were produced outside of this state that are offered for distribution and sale in this state shall be determined by the same methods and procedures as required for oranges produced in this state unless it is not practicable to obtain sufficient accurate information upon which to establish dates A and B as required by this article for such oranges. In such case the extent of damage by freezing in any lot of such oranges shall be determined as follows:

(a) By examination of the exposed pulp on a transverse cut through the center if examination of a representative sample of the oranges in the lot shows that the drying process has developed to such an extent as to permit reasonably accurate determination of the full extent of freezing damage.

(b) In any other case, by damage on the segment walls.

46960. The percentage of serious damage to oranges and limes in containers, or in bulk, may be established by inspection of a representative sample which shall consist of not less than 100 fruits.

46961. The following tolerances which are to be applied to the standards that are prescribed by this article are established by this section:

(a) With the exception of serious damage which is caused by freezing, not more than 10 percent, by count, of the oranges and limes in any one container or bulk lot may be below the requirements, but with the exception of serious damage by

drying at the stem or stylar end of oranges and limes which results from causes other than freezing. Not to exceed one-half of this tolerance shall be allowed for any one cause.

(b) In the case of serious damage by freezing injury, not more than 15 percent, by count, of the oranges and limes in any one container or bulk lot may be below the requirements, but not to exceed one-third of this tolerance shall be allowed for oranges and limes which show a drying or desiccation in 40 percent or more of the exposed pulp, as shown on a transverse cut through the center.

(c) The total tolerance for a combination of defects shall not exceed the tolerance permitted for any one cause by more than 5 percent, by count.

Article 6. Tangerines or Mandarins

46981. As used in this article, "tangerines or mandarins" means all varieties and hybrids of the mandarin group (Citrus reticulata) and all varieties of tangelos.

46982. Tangerines or mandarins shall meet the requirements which are prescribed by this article.

46983. The standards which are prescribed by Sections 46984 to 46988, inclusive, shall be applied in determining whether or not tangerines or mandarins meet the requirements of this article.

46984. Tangerines or mandarins shall be well colored. Tangerines or mandarins are not well colored unless 90 percent, by count, of the fruits in any lot show a yellow, orange, or red color on 75 percent or more of the surface of the fruit.

46985. Tangerines or mandarins shall be free from serious damage which is caused by freezing or drying that is due to any cause. Damage by freezing or drying due to any cause is serious if 20 percent or more of the pulp or edible portion of the fruit shows evidence of drying, desiccation, or a mushy condition. Evidence of damage shall be determined by as many cuts of each individual fruit as are necessary.

46986. Tangerines or mandarins shall be free from serious decay. Decay is serious if any part of the fruit is affected with decay.

46987. Not more than 10 percent, by count, of the tangerines or mandarins in any one container or bulk lot may fail to meet the requirements because of damage by freezing or drying which is due to any cause.

46988. Not more than 5 percent, by count, of the tangerines or mandarins in any one container or bulk lot may fail to meet the requirements because of serious decay.

Article 7. Count and Size Requirements

47031. The compliance or noncompliance with the provisions of Sections 47032 to 47035, inclusive, may be determined by a representative sample which shall consist of not less than

10 percent, by count, of the grapefruit, lemons, or oranges in the container.

47032. The count of grapefruit which are packed in standard container number 59 and the number which is marked on the container as required in Section 47091 shall be one of the numbers tabulated in Column A, below, and the average diameter which is marked on the containers shall be the corresponding measurement tabulated in Column B, below.

The average diameter in inches of the grapefruit in the container, as determined by inspection of a representative sample, shall be not less than the corresponding measurement tabulated in Column B for such fruit.

Grapefruit

Column A Count	Column B Av. dia.
9	6.200
12	5.640
14	5.350
16	5.120
18	4.920
23	4.540
27	4.270
32	4.030
36	3.880
40	3.740
48	3.530
56	3.350
64	3.170
80	2.900
88	2.840

47033. The count of lemons which are packed in standard container number 58 and the number which is marked on the container as required in Section 47091 shall be one of the numbers tabulated in Column A, below, and the average diameter which is marked on the containers shall be the corresponding measurement tabulated in Column B, below.

The average diameter in inches of the lemons in the container, as determined by inspection of a representative sample, shall not be less than the corresponding measurement tabulated in Column B for such fruit.

Lemons

Column A Count	Column B Av. dia.
63	2.925
75	2.775
95	2.570
115	2.410

Lemons

Column A Count	Column B Av. dia.
140	2.240
165	2.130
200	2.010
235	1.880
285	1.770
319	1.685
343	1.640

47034. The count of oranges which are packed in standard container number 58 and the number which is marked on the container as required in Section 47091 shall be one of the numbers tabulated in Column A, below, and the average diameter which is marked on the containers shall be the corresponding measurement tabulated in Column B, below.

The average diameter in inches of the oranges in the container, as determined by inspection of a representative sample, shall not be less than the corresponding measurement tabulated in Column B for such fruit.

Oranges

Column A Count	Column B Av. dia.
24	4.370
32	3.970
36	3.820
40	3.680
48	3.470
56	3.300
72	3.040
88	2.840
113	2.600
138	2.420
163	2.290
180	2.220
210	2.070
245	1.980
270	1.920

47035. Oranges, grapefruit, and lemons which are in standard container number 58 or 59 shall comply with all of the following requirements:

(a) Be packed in the container so compactly that they will not readily move in the container.

(b) The container shall be level full of fruit.

(c) The count of fruit in each container shall be not less than the count which is marked with a permissible count in excess not exceeding 8 percent.

47036. The diameter in inches of tangerines or mandarins which are in containers that are marked with one of the size designations tabulated in Column A, below, shall be between the measurements tabulated in corresponding lines of Column B and Column C. The diameter in inches of not more than 10 percent, by count, of the fruit in the container may, however, measure less than the corresponding measurement in Column B. Not more than 10 percent, by count, of the fruit in the container may measure more than the corresponding measurement in Column C.

Tangerines and Mandarins

Column A	Column B	Column C
Super colossal	3.25	4.00
Colossal	3.00	3.25
Mammoth	2.75	3.00
Jumbo	2.50	2.75
Large	2.25	2.50
Medium	2.00	2.25
Small	1.75	2.00

47037. Any container of tangerines or mandarins which fails to meet the size requirements which are prescribed by Section 47036 shall be considered as complying with that section if the container is marked with the words "irregular sizes."

47038. Not more than one of the size designations which are prescribed by Section 47036 shall appear on any container of tangerines or mandarins.

Article 8. Packing Requirements

47061. As used in this article, "consumer" means a person that buys oranges, grapefruit, lemons, or tangerines or mandarins for use as a food and not for resale.

47062. This article does not apply to the sale, marketing, or transportation for sale or marketing of any of the following:

(a) Oranges, grapefruit, lemons, or tangerines or mandarins for charitable purposes, unemployment relief, or for use by the United States government or its agencies for relief distribution.

(b) Tangerines or mandarins which are in closed containers that are intended for sale to the consumer in their unbroken form and the net contents of which do not exceed 12 pounds.

(c) Oranges, grapefruit, or lemons, except as otherwise provided in Section 47064, which are in closed containers that are intended for sale to the consumer in their un-

broken form and the net contents of which do not exceed 25 pounds.

(d) Oranges, grapefruit, lemons, or tangerines or mandarins, which are not in standard containers, that are transported directly from this state to the State of Baja California, Republic of Mexico.

47063. This article also does not apply to any of the following:

(a) Oranges, grapefruit, lemons, or tangerines or mandarins which are in a retail establishment in possession of a retailer for the purpose of resale directly to consumers.

(b) Oranges, grapefruit, lemons, or tangerines or mandarins which are sold by a grower or packer that is regularly engaged in the growing or packing of these fruits directly to consumers on the premises where such fruits are produced or packed or at a retail stand which is operated by such grower or packer near the point of production, which in no case shall be outside of the county in which the fruit was produced.

(c) Citrus fruit which is exempted from the packing requirements of this article by Section 47122.

47064. Except as otherwise provided in Section 47065 or Section 47068, all grapefruit which is offered for distribution or sale, before being so offered, shall be packed in closed standard container number 59 and shall be uniform in size.

47065. Grapefruit which is in bags, if the net contents of each bag does not exceed 25 pounds, shall be placed in closed standard container number 62. A bag of grapefruit is, however, exempt from the requirements of this section if it is the only bag of grapefruit which is mailed, delivered, or sold directly to a consumer.

47066. Except as otherwise provided in Section 47068, all oranges or lemons which are offered for distribution or sale, before being so offered, shall be packed in closed standard container number 58 and shall be uniform in size.

47067. Except as otherwise provided in Section 47068, all tangerines or mandarins which are offered for distribution or sale, before being so offered, shall be packed in closed standard container number 63.

47068. Citrus fruit which is imported into this state from another state need not be in standard containers as specified in this code for such fruit if it is packed in containers which conform to the applicable laws or regulations of the state of origin or of the United States.

47069. The compliance or noncompliance with the provisions of this article, may be determined from a representative sample which shall consist of not less than 10 percent, by count, of the grapefruit, lemons, or oranges in a container.

Article 9. Markings on Containers

47091. Every container of oranges, lemons and grapefruit which holds more than 25 pounds and every container of tangerines or mandarins which holds more than 12 pounds, except a container of any such citrus fruit which is intended for shipment directly from this state to the State of Baja, California, Republic of Mexico, or a container which is exempted from the requirements of this section pursuant to Section 47122, shall bear upon it in plain sight and in plainly legible letters on one outside end the following information:

(a) The name of the packer of the citrus fruit together with a sufficiently explicit address to permit ready location of such packer.

(b) In the case of oranges, grapefruit, and lemons, the number and average diameter of the citrus fruit in the container. In the case of tangerines and mandarins, the size of the tangerines or mandarins which are contained in the container in accordance with size specifications in Column A of Section 47036. The average diameter and size designation of citrus fruit which is imported from another state need not, however, be shown.

(c) In the case of oranges, grapefruit, and tangerines or mandarins, the name of the variety, if known, and not known, the words "unknown variety" or "seedlings." With respect to all varieties of navel oranges, the varietal designation shall be "Navel"; for all varieties of valencia oranges, "Valencia"; for all varieties of white grapefruit, "Marsh White"; and for all varieties of pink grapefruit, "Marsh Ruby."

Article 10. Exceptions to Marking and Packing Requirements

47121. As used in this article:

(a) "Consumer-size packages" means those which when full contain 25 pounds or less of fruit.

(b) "Repackaging plant" means any location that has commercial equipment which is normally used for packaging citrus fruits in consumer-size packages.

47122. The packing requirements of Article 8 (commencing with Section 47061) of this chapter and the marking requirements of Section 47091 do not apply to any citrus fruit which is being transported within the state if all of the following requirements are complied with:

(a) The citrus fruit is being transported in containers which hold more than 500 pounds.

(b) It is being transported to a repackaging plant within the state for further packing.

(c) The packer has made application to, and a permit has been issued by, an enforcing officer.

47123. A permit shall be issued in writing in a form which is provided by the director and shall be valid for one year from the date of issuance, unless revoked or suspended.

47124. The permit shall bear a permit number and show the name of the packer together with a sufficiently explicit address to permit ready location of such packer.

47125. A manifest or other shipping document shall accompany each load which is sold, transported, or received pursuant to this article, shall be plainly and conspicuously marked with the permit number issued to the packer, and shall show the name of the person operating a repackaging plant to whom the load is being transported together with a sufficiently explicit address of the repackaging plant to which the load is destined to permit ready location of such person and such repackaging plant.

47126. It is unlawful for any person to ship, transport, or receive citrus fruits pursuant to this article unless the permit number issued pursuant to this article appears on the manifest or other shipping document.

47127. A permittee shall, upon request of any enforcing officer, furnish such affidavits, receipts, and other evidence as the enforcing officer reasonably may require as proof that the citrus fruits have been disposed of in accordance with the provisions of this division and the terms of the permit.

47128. Any enforcing officer may refuse to issue a permit pursuant to this article, or may revoke or suspend any permit, if the permittee or applicant for permit has previously violated any of the provisions of this article or the terms of any permit which is issued pursuant to this article, or has failed or refused to furnish the evidence which is required by the enforcing officer.

47129. Any order of the enforcing officer refusing to issue a permit, or suspending or revoking a permit, shall be in writing.

47130. Any person may appeal to the director, within 10 days, for a hearing upon a written order of the enforcing officer refusing to issue a permit, or suspending or revoking the same. The proceedings for such hearing shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The provisions of Sections 11505 and 11506 shall not, however, apply, and the statement of issues or accusation, as the case may be, shall be delivered or mailed to the parties as provided in Section 11509 of such code.

47131. This article does not allow a permittee or applicant to operate pending the disposition of his application or petition.

47132 This article does not prevent the enforcing officer from suspending or revoking a permit forthwith, and without notice or hearing. Such peremptory action shall, however, be supported by previous investigation, the results of which reasonably indicate to the enforcing officer that to allow an

existing permit to remain in use pending a hearing would encourage, allow, or permit any additional or other violation of any provision of this article.

CHAPTER 19. CORN

47251. Ears of green corn shall be free from serious damage which is caused by smut or other diseases, mold, decay, or fermentation, insects, or other causes. Damage from any cause is serious if it affects any of the kernels below a distance from the tip of more than 25 percent of the length of the cob. In addition, the kernels on at least one-half of the length of the cob shall be plump, milky, and well developed and shall not be shriveled.

47252. Not more than 10 percent, by count, of the ears in any one lot of containers or bulk lot may be below the requirements which are prescribed by this chapter, but no container shall have more than 20 percent, by count, of ears which are below such requirements.

CHAPTER 20. DATES

Article 1. Exempt Dates

47401. Unpacked dates, prior to final grading, are exempt from the standards which are prescribed by this chapter at any of the following times:

(a) While being transported or delivered to a licensed cold storage warehouse for storage.

(b) While in a licensed cold storage warehouse for storage.

(c) While being removed from a licensed cold storage warehouse and being transported or delivered to a packing plant for grading or reconditioning and until the completion of the first grading or reconditioning after removal from such warehouse.

Article 2. Standards

47421. Dates, including dates for use in products or byproducts, except alcohol, brandy, and products which are not intended for human consumption, shall be free from any of the following defects:

(a) Live insects, whether larva, pupa, or adult.

(b) Decay.

(c) Mold, except visible colonies of yeast.

(d) Fermentation or souring.

(e) Dead insects, insect parts or excreta.

(f) Dirt or other foreign matter.

(g) Black scald.

(h) Side spots which are more than three-sixteenths of an inch in length or width.

(i) Damage by improper ripening.

47422. In the interpretation of the standards which are prescribed by this article, the director shall take into consideration the quality standards for dates which are prescribed from time to time pursuant to federal law.

47423. Not more than 10 percent, by count, or in the case of dates which are packed in blocks, by weight, of the dates in any one container or lot may be below the requirements which are prescribed by this article, but of this amount not more than one-half, or 5 percent, shall be allowed for defects which are prescribed by subdivision (b), (c), (d), (e), or (f) of Section 47421, or any combination of these defects, and not more than one-fifth, or 2 percent, shall be allowed for the defect which is prescribed by subdivision (b) of Section 47421. No tolerance shall be allowed for the defect which is prescribed by subdivision (a) of Section 47421.

Article 3. Markings on Containers and Signs

47451. Except as otherwise provided in Section 47453, every container or subcontainer of dates shall bear, in plain sight on the outside of it, in letters which are not less than one-half of an inch in height, the name of the state or the foreign country where the dates were produced, directly preceded by the words "grown in" in like size type.

47452. Except as otherwise provided in Section 46253, all dates which are displayed for sale in bulk shall bear upon them in plain sight on the outside of them, or upon a placard which is so placed as to have reference to such dates, in letters which are not less than one-half of an inch in height, the name of the state or the foreign country where the dates were produced, directly preceded by the words "grown in" in like size type.

47453. In the case of any container or subcontainer which has a contents of not more than three pounds net weight, the markings which are required by this article shall be in letters of not less than one-eighth of an inch in height.

Chapter 21. Grapes and Raisins

Article 1. Definitions

47601. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

47602. "Raisined berries" means grape berries which are fully cured, resembling raisins, which do not contain sufficient juice to drop from the berry under ordinary pressure between the thumb and forefinger.

47603. "Redberry" means a condition which closely resembles waterberry that is generally found in black varieties of grapes. Such grapes show a red or brownish red color in addition to the general characteristics of waterberry.

47604. "Severe freezing injury" means damage which affects the pulp of the berries.

47605. "Sunburned or dried berries" means grapes which show complete drying out, from any cause, of part or all of any individual berries.

47606. "Waterberry" means a disease which is characterized by a watery, soft, or flabby condition of the berries. Such affected berries are low in sugar content, have tender skins, and are very easily crushed.

Article 2. Exceptions for Grapes for Byproduct Use

47631. This division does not prohibit any person, under permit from an enforcing officer of this division, from transporting out of the state to another state or country grapes which comply with the quality requirements of this chapter in unlidded containers, whether standard or not, or in bulk loads, if both of the following requirements are complied with:

(a) Such grapes are to be used for commercial processing, preserving, or manufacture of byproducts for resale, on the premises of the purchaser.

(b) The permit is issued for and is attached to each load or lot of grapes which is transported.

47632. A permit may be issued by the commissioner of the county from which the grapes are to be transported if all of the following requirements are complied with:

(a) The commissioner determines that the grapes comply with the requirements of this chapter except as to containers.

(b) He determines that the grapes are to be delivered pursuant to a written contract of sale that bears the signature of the purchaser in another state or country which stipulates that the grapes will be used for commercial processing, preserving, or manufacture of byproducts for resale, on the premises of the purchaser.

(c) A copy of the contract is furnished to the commissioner.

(d) The commissioner is satisfied that such grapes will be used only for such byproduct purposes.

47633. Every container of grapes which is to be transported out of this state under a permit which is issued pursuant to this article shall bear upon it in plain sight in letters which are not less than one-half inch in height "For Manufacturing Purposes Only."

Article 3. Standards Generally

47661. There are two standards for grapes. All grapes of the varieties in Group A shall be considered table grapes and all other varieties juice grapes. Except as otherwise provided

in Article 7 (commencing with Section 47781) of this chapter, grapes of all varieties shall at least meet the standard for juice grapes.

47662. The following varieties of white grapes and other similar varieties are in Group A:

Almeria
Aspiran Blanc
Bicane
Chasselas de Fontainebleau
Chasselas Napoleon
Cornichon Blanc
Crystal
Dattier de Beyrouth
Delight
Dizmar
Golden Queen
Italia (Italian Muscat)
Khalili
Khandahar
Ladyfinger
Malaga
Ohanez
Olivette Blanche
Olivette de Vendemain
Perlette
Persian 23
Pizzutello di Roma
Rish Baba
Rosaki
Thompson Seedless

47663. The following varieties of red grapes and other similar varieties are in Group A:

Angelino
Cardinal
Catawba
Flame Tokay
Hunisa
Chasselas Rose
Emperor
Red Malaga
Rose de Falloux
Maraville de Malaga
Molinera Gorda
Pink Thompson Seedless
Piment
Queen
Sultanina Rose
Tokay
Zabalkanski
Zabalkanskoi

47664. The following varieties of black grapes and other similar varieties are in Group A:

Black Corinth
Black Ferrara
Black Hamburg
Blackrose
Black Zante
Bleu Grau
Exotic
Frankenthal
Fresno Beauty
Gros Colman
Gros Guillaume
Isabella
Isabella Regia
Black Monukka
Black Morocco
Muscat Albardient's
Black Prince
Muscat Hamburg
California Concord
Concord
Corinthe Noir
Cornichon
Danugue
Drodelabi
Olivette Noir
Panariti
Pierce
Pierce Isabella
Pizzutello Nero
Prune de Cazouls
Purple Damascus
Rose of Peru
Ribier
Servian Blue
Snow's Muscat Hamburg
Zante Currant

Article 4. Maturity Standards

47691. Except as otherwise provided in Sections 47692 and 47693, "mature" means that a variety of grapes tests not less than 17 percent soluble solids in juice, as determined by the Balling or Brix scale hydrometer or standard hand refractometer.

47692. The following varieties of grapes shall be considered mature if they test not less than that percent of soluble solids which is specified below:

Percent of soluble solids	Variety	
18	All white varieties of Muscat type	
	Malaga grown north and west of San Gorgonio Pass	
17½	Thompson Seedless grown north and west of San Gorgonio Pass	
16	Beauty Seedless grown south and east of San Gorgonio Pass	
	Cardinal grown north and west of San Gorgonio Pass	
	Burger	Concord
	Emperor	Dattier de Beyrouth
	Gros Colman	Red Malaga
	Bleu Grau	Khalili
	Drodelabi	Persian 23
	Fresno Beauty	Dizmar
	Servian Blue	Ribier
	Pierce	Delight
	Pierce Isabella	Perlette
	Isabella Regia	Queen
	California Concord	Blackrose
15	Cardinal grown south and east of San Gorgonio Pass	
	Ladyfinger	Olivette Blanche
	Rish Baba	Exotic
	Khandahar	

It is hereby declared that the differences in climatic condition that exist north and west of San Gorgonio Pass cause Malaga, Thompson Seedless, Beauty Seedless, and Cardinal varieties of grapes which are grown there to have, at maturity, a higher percentage of soluble solids than mature grapes of these varieties which are grown south and east of San Gorgonio Pass.

47693. Any variety of grapes which are in Group A, as defined in Article 3 (commencing with Section 47661) of this chapter, shall also be considered mature if the juice contains soluble solids equal to or in excess of 20 parts to every part of acid contained in the juice (the acidity of the juice to be calculated as tartaric acid without water of crystallization).

47694. Any variety of grapes which is included in Group A may be placed in the standard for juice grapes and any

other variety may be placed in the standard which is established for table grapes, but regardless of standard, the maturity of varieties included in Group A shall be determined by testing the juice from entire bunches representative of the least mature grapes in any container and which constitute not less than 10 percent, by weight, of the contents of the container.

47695. The maturity of every variety which is not included in Group A shall be determined by testing the juice from a composite sample which is representative of the average of the grapes in any container or bulk lot.

47696. The standards which are provided by this article are minimum standards, and the tolerances allowed by Sections 47723 and 47752 shall not be applied to any test which is made in accordance with this article for the purpose of determining whether any lot of grapes complies with the maturity standard for the variety.

Article 5. Standards for Table Grapes

47721. Table grapes shall consist of bunches of grapes which are mature and free from serious damage which is caused by any of the following defects:

(a) Mildew and insect injury which has penetrated or damaged the flesh of the berry.

(b) Mold, decay, severe freezing injury, raisined berries, sunburned or dried berries.

(c) Waterberry or redberry.

47722. Damage to any one bunch is not serious unless more than 5 percent, by count, of the berries on any one bunch are affected by one or more of the defects.

47723. Not more than 10 percent by weight, of the bunches of grapes in any one container or bulk lot may be below the requirements which are prescribed by this article.

Article 6. Standards for Juice Grapes

47751. Juice grapes shall be mature and free from mold, decay, waterberry, redberry, and severe freezing injury.

47752. Not more than 15 percent, by weight, of the berries in any one container or bulk lot may be below requirements which are prescribed by this article.

Article 7. Grapes Which Fail to Meet Juice Grape Standards

47781. Any grapes which fail to meet the standard for juice grapes may be disposed of only as provided in Article 1 (commencing with Section 43251) of Chapter 3 of this division, but a grower of grapes may sell part or all of his crop, which fails to meet the standard for juice grapes, to a purchaser for the sole and express purpose of being used by

such purchaser for the manufacture of a byproduct in the state.

Each such sale shall be made only under written permit of an enforcing officer of this division, who may require from the grower or purchaser of such grapes such proof as he deems necessary that they will be used only as provided in this section.

Article 8. Packing Requirements

47821 Subject to the restrictions and additions which are specified in this division, all grapes shall be placed in standard container number 5, 28, 30A, 38I, 38J, 38K, 38L, 38M, 38N, 38P, or 38Q.

47822. Except as otherwise designated, all containers which are specified in Section 47821 shall be considered as standard for grapes whether such containers are packed with or without pads, inner liners, or any other device which does not reduce the inside volume of the container by more than 10 percent. The vacant spaces, if any, which result from the use of such device shall, however, be readily visible.

47823. The depth dimension of containers which are designated for grapes in this article shall include in the measurement of the specified depth any cleats used, if any are used.

47824. Container number 28 is standard for grapes only if both of the following requirements are satisfied·

(a) It contains grapes which are packed in sawdust, cork, or similar packing material in sufficient amount to completely surround and cover the grapes.

(b) It is used without cleats.

47825. Container number 30A is standard for grapes only if it contains bunches which are individually wrapped in paper or other protective wrapping material and which are packed in excelsior or other similar packing material.

47826. Except as otherwise provided in Section 47827, the container number 38K is standard for grapes if the depth is $4\frac{1}{2}$ to $5\frac{3}{4}$ inches, the width is $14\frac{1}{2}$ to $14\frac{3}{4}$ inches, and the length is $16\frac{1}{2}$ inches.

This container shall be considered standard with or without a taper (up and in—down and in) at each corner.

47827. Container numbers 38K and 38L, when $5\frac{3}{4}$ inches deep, shall be standard for grapes only when containing bunches which are not wrapped, and one outside end of the container is plainly marked, with not less than $\frac{1}{4}$ inch letters, with the words "Net Weight 26 lbs." or "Net Wt. 26 lbs." Such marking is not, however, required if the bunches of grapes are completely surrounded by sawdust, paper wraps or other similar packing material.

47828. Container number 38M, 38N, or 38P is standard for grapes only if transported or sold within this state, and

then only if plainly marked with letters not less than one-half of an inch in height "California Sale Only," or "Calif. Sale Only."

47829. Container number 38Q is standard for grapes only if it is lined, all inside surfaces covered, with excelsior or other similar packing material.

Article 9. Markings on Containers

47851. Every container of grapes, shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized packing of the grapes or the name under which such person is engaged in business.

(b) A sufficiently explicit address to permit ready location of such person.

(c) The name of the variety of grapes, if known, or if not known, the words "unknown variety". If two or more varieties are placed in the same container, the words "mixed varieties." In lieu of the term "mixed varieties," a mixture of white grapes may be marked "mixed white varieties" and a mixture of black grapes may be marked "mixed black varieties."

This section does not apply to containers numbers 38M, 38N, or 38P which are not closed.

47852. If the grapes meet the requirements of the standard for table grapes the containers of such grapes may be marked with the term "table grade" or "table grapes."

47853. The term "girdled" or any designation which implies that grapes have come from vines or members thereof which have been girdled shall not appear on any container of grapes unless it is a correct and true statement.

"Girdled" or "girdling" means the removal of a ring of bark from entirely around the trunk or some member of the vine, during the early development of the grapes.

Article 10. Raisin Containers

47881. It is unlawful for any person to sell any box, package, or carton that contains seeded raisins, which has indicated upon it the fact that it contains raisins, unless it shall in addition to such indication have plainly and conspicuously marked upon it the variety of grape from which the raisins which are contained in such box, package, or carton were manufactured or produced.

47882. Any violation of this article is a misdemeanor, punishable by a fine of not more than two hundred dollars ($200), or by imprisonment in the county jail for not more than 60 days, or by both.

CHAPTER 22. LETTUCE

Article 1. Standards

48001. Head lettuce shall not be leafy without head formation, shall be fairly well trimmed, and shall be free from any of the following defects:

(a) Insect injury, slime, decay, or rot which affects leaves within the head.

(b) Seed stems which have so developed that they are apparent upon external examination.

(c) Serious damage which is caused by broken midribs, bursting, tip burn, or freezing. Damage which is caused by freezing or tip burn is not serious unless it affects any portion of the head inside of the six outer head leaves.

48002. Not more than 15 percent, by count, of the heads of lettuce in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed 5 percent, shall be allowed for decay or slime. Individual containers in any lot may, however, contain not more than 1½ times the tolerance which is specified, if the percentage of defects in the entire lot averages within the tolerance specified, as determined by inspection of a representative sample.

Article 2. Standard Containers and Packs

48031. The standard containers and packs for lettuce, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported or sold in any container, are as prescribed in this article.

48032. The standard containers for lettuce are standard containers numbers 45 and 45A.

Article 3. Packing Requirements

48051. As used in this article, "closed" or "lidded" means the following:

(a) In the case of fiberboard containers, that the opening is completely covered, except for necessary ventilation openings, with material of similar quality and strength to the adjoining portion of the container and as required in Section 48053.

(b) In the case of nailed wooden, wirebound, or other containers, that 40 percent or more of the opening is covered with material which is similar to that used in the construction of the sides of such container, which is securely attached to the top.

48052. As used in this article:

(a) "Consumer" means a person that buys lettuce for use as food, and not for commercial distribution, or for resale.

(b) "Inner and outer flaps" means the parts of the container that are attached to the top of the sides and ends which are used to form the cover or lid of the container.

(c) "Retail establishment" includes a retailer's warehouse from which the lettuce is distributed by such retailer to his individual retail outlets or stores.

48053. Standard containers for lettuce which are made of fiberboard shall be constructed with inner and outer side flaps which are attached to each end and side. The total width of the two side flaps shall not exceed the inside width of the container and, if closed after packing, shall be closed by folding the inner and outer flaps inward at the manufacturer's score lines which shall be above the inside bottom surface of the container at a point equal to the inside depth of the container. If they are fastened in a closed position, the opening between the outer side flaps shall not average more than two inches for the entire length of the container, allowing a 10 percent tolerance for the containers in any one lot.

48054. All head lettuce which is packed, except head lettuce which is sold to the armed forces of the United States government or for export markets other than Canada, shall be in standard container number 45, 45A, or 45B.

48055. Head lettuce which is prepared for transportation or sale in this state shall be packed in standard containers which are lidded.

This section, however, does not apply to any of the following:

(a) Lettuce which is in a retail establishment in the possession of a retailer for the purpose of resale directly to consumers.

(b) Lettuce which is sold by a producer that is regularly engaged in the production of lettuce, directly to consumers on the premises where the lettuce is produced or lettuce at a retail stand which is operated by such producer near the point of production.

(c) The transportation by a producer or jobber of lettuce in containers which contain less than 18 heads for sales to retail stores of not more than one such container per sale.

48056. Head lettuce, which is packed or placed in layers in any container, shall not vary in size in any one container more than 15 percent of heads which would fairly tightly pack a size, larger or smaller, than the size which is marked. It shall be fairly tightly packed with the same numerical count of regularly arranged heads in each layer. None of the heads shall be placed outside of the regular arrangement of three uniform flat layers in standard container number 45 and two uniform flat layers in standard container number 45A. If, however, 2½ dozen heads of lettuce of the 2½ dozen size when fairly tightly packed in standard container number 45A are packed in such container, six heads of the same size or dimensions as the heads which are contained in the upper and lower layers may be placed between such layers if the upper and lower layers con-

sist of 12 heads each and the total count in the container is 30 heads.

48057. Head lettuce for shipment out of this state shall be packed in standard containers which are lidded.

48058. In addition to other packing requirements in this division, head lettuce which is packed or placed in layers shall contain either 1½ dozen, two dozen, 2½ dozen, three dozen, 3½ dozen, four dozen, five dozen, 75, or 90 heads of lettuce per standard container.

Article 4. Markings on Containers

48081. Every container of packed lettuce shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first packed or authorized the packing of the lettuce, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) In figures which are not less than one-half of an inch in height the exact number of heads contained therein. In the case of lettuce which is packed in lidded or closed containers without ice, the exact number of heads may, however, be marked on the lid of the container.

In the case of 10 percent of the crates in any lots, the contents may vary not more than three heads over the count as marked.

Chapter 23. Melons, Other Than Cantaloupes

Article 1. Standards

48201. As used in this article, "full slip" means that the fruit has separated from the stem leaving a clean, natural scar, with no portion of the stem remaining attached, and no torn or broken skin on the fruit.

48202. Persian melons, casabas, honeydew and honeyball melons, and watermelons shall be mature but not overripe and shall be free from any of the following defects:

(a) Mold, decay, and insect injury which has penetrated or damaged the edible portion of the melon.

(b) Serious damage, due to growth cracks, cuts, bruises, sunburn, softness, or other causes. Damage to any melon which is mentioned in this section is not serious unless it affects the edible portion of the melon.

48203. "Mature," in the case of casabas, honeydew and honeyball melons, and watermelons, means that the appearance from the outside of the melon indicates maturity and that the arils which surround the seeds have been absorbed and also the following:

(a) In the case of watermelons, that the flesh of the watermelons has not less than 75 percent red color.

(b) In the case of honeyball and honeydew melons, that the juice of the edible portion contains not less than 10 percent soluble solids as determined by the standard hand refractometer, or that the fruit has been separated from the vine by a full slip which indicates actual maturity.

48204. The soluble solids content of the edible portion of honeyball and honeydew melons shall be determined by extracting the juice from two plugs of the flesh, one from each of opposite sides of the melons, and taken at approximately one-half the distance between the stem and blossom ends. The plugs shall be approximately one-half of an inch in diameter. That portion of the plug three-eighths of an inch from the outside edge of the rind shall not be included as the edible portion of the plug of flesh.

48205. Not more than 10 percent, by count, of the melons in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance, shall be allowed for any one cause.

Article 2. Packing Requirements

48211. As used in this article, "closed" or "lidded" means the following:

(a) In the case of fiberboard containers, that the opening is completely covered, except for necessary ventilation openings, with material of similar quality and strength to the adjoining portion of the container.

(b) In the case of nailed wooden, wirebound, or other containers, that 40 percent or more of the opening is covered with material similar to that used in the construction of the sides and bottom of such containers, which is securely attached to the top.

48212. As used in this article, "consumer" means a person that buys melons for use as food and not for resale.

48213. Except as otherwise provided in this section, all melons shall be packed in standard container number 44H, 44I, 44J, or 44K and the container shall be closed or lidded.

This section does not apply to any of the following:

(a) Cantaloupes.

(b) Casabas which are shipped intrastate.

(c) Watermelons.

(d) Melons which are in a retail establishment in possession of a retailer for the purpose of resale directly to consumers.

(e) Melons which are sold by a producer regularly engaged in the production of melons directly to consumers on the premises where the melons are produced or at a retail stand which is operated by such producer near the point of production. Such retail stand shall not be outside of the county in which the melons were produced.

Article 3. Markings on Containers

48231. Every closed container of packed melons shall bear upon it in plain sight and in plain letters on one outside end, the name of the person that first packed or authorized the packing of the melons, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

Chapter 24. Nectarines

Article 1. Standards

48351. Nectarines shall be mature, but not overripe, and free from any of the following defects:

(a) Insect injury which has penetrated or damaged the flesh.

(b) Split pits which are open at the stem end.

(c) Mold, brown rot, and decay which has affected the edible portion.

(d) Serious damage which is due to skin breaks or cuts, growth cracks, bruises, or other causes.

Damage to any one nectarine is not serious unless it causes a waste of 10 percent, by weight, of the individual nectarine.

48352. Nectarines shall not be considered mature unless at the time of picking they comply with one of the following:

(a) An aggregate area of at least one inch in diameter of the surface of the individual fruit has broken from green or dark green to a distinct flecking of light green or a light green which indicates equivalent maturity.

(b) The shoulders and suture are well developed and filled out.

48353. Except in the case of nectarines which are affected by split pits that are visible, not more than 10 percent, by count, of the nectarines in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

In the case of nectarines which are affected by split pits that are visible, an additional tolerance of not more than 10 percent, by count, of the nectarines in any one container or bulk lot shall be allowed.

Article 2. Packing Requirements

48411. Except as otherwise provided in Section 48412, nectarines shall be in standard container number 5, 9B, 10A, 12B, 22B, or 22D.

48412. Nectarines which are placed in molded forms may be packed in standard container number 31 if the container is marked with the exact number of nectarines in it.

48413 The depth dimensions of containers which are designated for nectarines shall include in the measurement of the specified depth any cleats used, if any are used.

48414. Packed nectarines shall not vary in size between the fruits, in any one container, more than three-eighths of an inch in diameter, if measured through the widest portion of the cross section of the fruit.

Article 3. Markings on Containers

48441. Every container of fresh nectarines shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the nectarines or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) The name of the variety, if known, or if not known the words "unknown variety."

(c) The size description, if the nectarines are packed in the four-basket crate, or the count, if wrapped and packed throughout, in straight-side containers in uniform layers and rows

48442. In the case of the four-basket crate, the numerical description of the pack in the top layer of the basket shall be used to designate size.

48443. If the count is used to designate the contents of the container, a variation of four nectarines more or less than the number stated shall be allowed.

Chapter 25. Onions

Article 1. Standards

48551. Onions shall be free from any of the following defects:

(a) Insect injury which has penetrated or damaged the edible portion of the onion.

(b) Mold and decay.

(c) Serious damage which is due to sunscald, heat, freezing, sprouting, or other causes.

48552. Except for sprouting, damage to any one onion is not serious unless it causes a waste of 20 percent, by weight, of the individual onion.

48553. Damage to any one onion which is affected by sprouting is not serious unless a sprout is more than one inch in length, measured from the neck of the onion where the sprout emerges to the tip of such sprout, or the onion has become soft or spongy.

48554. Not more than 5 percent, by weight, of the onions in any one container or bulk lot may be below the requirements which are prescribed by this article.

Article 2. Markings on Containers

48581. Every container of onions which contains more than 15 pounds shall be clearly and distinctly labeled with name of the packer or person that authorized the packing, and the correct address of such person.

CHAPTER 26. PEACHES

Article 1. Exceptions for Peaches for Manufacturing Use

48701. This chapter does not prohibit any person, under a permit which is issued pursuant to this article, from transporting out of the state, peaches which fail to comply with the packing, container, or marking requirements of this chapter, if both of the following requirements are complied with:

(a) Such permit is issued for, and is attached to, each load or lot transported.

(b) The peaches are loose in containers which are not closed.

48702. A permit may be issued by the commissioner of the county from which the peaches are to be transported if such commissioner has satisfactory verification by a like officer of the state of destination that the peaches are to be transported to a purchaser for commercial processing, preserving, or manufacturing on the premises of the purchaser.

48703. The verification shall include a statement that such official will report to the commissioner who issued the permit as to the commercial processing, preserving, or manufacturing use to which the peaches transported under the permit were actually put by the purchaser of the peaches.

Article 2. Standards

48731. Fresh peaches shall be mature, but not overripe, and free from any of the following defects:

(a) Insect injury which has penetrated or damaged the flesh.

(b) Split pits which are open at the stem end.

(c) Mold, brown rot, and decay.

(d) Serious damage, due to cuts or skin breaks, growth cracks, bruises, scab, rust, blight, disease, hail, or other causes.

Damage to any one peach is not serious unless it causes a waste of 10 percent, by weight, of the individual peach.

48732. Peaches of the freestone variety shall not be considered mature unless, at the time of picking, the flesh breaks free from the pit. In addition, the flesh of peaches of the Elberta variety shall be a yellowish color.

48733. Not more than 10 percent, by count, of the peaches in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

Individual containers in any lot may, however, contain not more than 1½ times the tolerances specified if the percentage of defects of the entire lot averages within the tolerances.

Article 3. Packing Requirements

48791. Except as otherwise provided in Section 48792, peaches shall be in standard container number 5, 9B, 10A, 12B, or 22D.

48792. Peaches which are placed in molded forms may be packed in standard container number 31 if the container is marked with the exact number of peaches placed in it.

48793. The depth dimensions of containers which are designated for peaches shall include in the measurement of the specified depth any cleats used, if any are used.

48794. Packed peaches shall not vary in size between the fruits, in any one container, more than three-eighths of an inch in diameter, if measured through the widest portion of the cross section of the fruit.

Article 4. Markings on Containers

48821. Every container of fresh peaches shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the peaches or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) The name of the variety, if known, or if not known the words "unknown variety".

(c) The size description, if the peaches are packed in the four-basket crate, or the count if wrapped and packed throughout, in straight side containers in uniform layers and rows.

48822. In the case of the four-basket crate, the numerical description of the pack in the top layer of the baskets shall be used to designate size.

48823. If the count is used to designate the contents of the container, a variation of four peaches more or less than the number stated shall be allowed.

Chapter 27. Pears

Article 1. Exceptions for Pears for Manufacturing Use

48951. This chapter does not prohibit any person from transporting out of the state pears which fail to comply with the packing, container, marking, or quality requirements of this chapter which are applicable to pears that are shipped for consumption as fresh pears. All such noncomplying pears which are so transported outside the state shall be used only

for the processing, preserving, or manufacturing purposes for which such pears could be used within the state.

48952. The director may adopt such regulations as may be necessary to insure that all such pears which are transported out of the state for the processing, preserving, or manufacturing purposes will be used only for such purposes.

48953. If there are no grade, quality, size, maturity, or utilization regulations or requirements for pears for processing established pursuant to a marketing program or marketing order in this state, the director may adopt such regulations or requirements for such pears to be transported outside the state. Such standards shall not be lower than any official standards for pears for such purposes which are established in the state of destination.

Article 2. Standards Generally

48981. Fresh pears shall be mature, but not overripe, and free from any of the following defects:

(a) Codlin moth larvae, mold, decay, black end, unsealed cuts, and skin breaks.

(b) Serious damage which is due to hail, scab or other diseases, hard end, bruises, limb rubs, frost, codlin moth larvae, or other insects.

48982. Damage to any one pear is not serious if it is caused by:

(a) Scab, unless the spots cover an aggregate area of more than one-half of an inch in diameter.

(b) Hail, unless the damage affects an aggregate area of more than one-half of an inch in diameter or is more than one-fourth of an inch in depth.

(c) Codlin moth larvae, unless it causes unhealed stings or holes in any part of the pear. Superficial, well-healed codlin moth stings are not serious.

(d) Thrip mark, blister mite, or other superficial blemishes caused by insects, unless more than 10 percent of the surface of the fruit is affected or they cause a depression of more than one-fourth of an inch in depth in the pear.

(e) Limb rub, unless it affects an aggregate area of more than three-fourths of an inch in diameter.

(f) Frost, unless the constriction which results from frost damage affects the shape of the pear and extends around the fruit more than one-half of the circumference.

(g) Other diseases, bruises, or hard end, unless such defects cause a waste of more than 10 percent, by weight, of the individual pear.

48983. Not more than 10 percent, by count, of the pears in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

48984. Pears which fail to meet the requirements of this article only because of the presence of codlin moth larvae, or because of serious damage caused by codlin moth larvae, which cannot be detected by external examination of the pears, shall be considered as complying with such standard, if the pears have been treated at point of origin during preparation and loading and before actual shipment to any market or storage plant, under the supervision of an enforcing officer, according to formulae and under conditions approved by the director and which is known to completely destroy codlin moth in any stage of development in such pears. The continued identity of the lot shall, however, be maintained.

48985. Pears which fail to meet the requirements of this article only because of serious damage caused by hail, shall be considered as complying with such standard, if the container in which they are packed or placed is plainly marked, on the outside of one end of the container, in letters which are not less than one-half of an inch in height, with the words "hail marked."

Article 3. Maturity Standards for Bartlett Pears

49001. Bartlett pears shall be considered mature if they comply with one of the following:

(a) The average pressure test of not less than 10 representative pears of each commercial size of pears in any lot does not exceed 23 pounds.

(b) The soluble solids in a sample of juice from not less than 10 representative pears of each commercial size of pears in any lot is not less than 13 percent.

(c) The pears show a yellowish-green color, as indicated by the color chart prepared by the department.

49002. The pressure test of Bartlett pears shall be determined by means of a fruit pressure tester which measures in pounds the force that is required to push a rounded plunger five-sixteenths of an inch in diameter into the flesh of the fruit to a depth of five-sixteenths of an inch, after the skin from the areas tested, but little of the underlying flesh, has been removed. Two such determinations shall be made on each specimen which is selected as a sample and the average of all individual readings from the sample shall be considered as the pressure test of the lot. Pressure test readings shall be made on opposite sides, and approximately at the widest portion of the cross section of the fruit at right angles to the core. Sunburned or very highly colored areas shall be avoided in making pressure tests.

49003. The soluble solids of a sample of juice from Bartlett pears shall be the percentage reading as shown by a standard refractometer instrument on a composite sample of a small amount of juice which is obtained from each of the pears in

the representative sample that is selected if such pears are subjected to the method for determining maturity which is described in Section 49002.

Article 4. Packing Requirements

49041. Except as otherwise provided in Section 49091 pears shall be in standard container number 12B, 19, 20, 24, 29A, or 29B.

Container number 29B, if made of fiberboard or corrugated paper, shall be standard for pears with a tolerance of $\frac{1}{8}$ inch in each of the three dimensions.

49042. The depth dimensions of containers which are designated for pears shall include in the measurement of the specified depth any cleats used, if any are used.

49043. Packed pears in any container shall be uniform in size, which means:

(a) In the case of pears which are $2\frac{3}{4}$ inches in diameter or larger, a variation of not more than one-half of one inch in diameter, if measured through the widest portion of the cross section, between the fruits in any one container.

(b) In the case of pears which are smaller than $2\frac{3}{4}$ inches in diameter, a variation of not more than three-eighths of one inch if measured through the widest portion of the cross-section, between the fruits in any one container.

Article 5. Markings on Containers

49061. Except as otherwise provided in Section 49091, every container of pears shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the pears, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

(b) The name of the variety, if known, or if not known the words "unknown variety".

(c) The count if wrapped and packed throughout, in straight side containers in uniform layers and rows.

49062. If the count is used to designate the contents of the container, a variation of four pears more or less than the number stated shall be allowed.

Article 6. Exceptions to the Marking and Packing Requirements

49091. Notwithstanding any provisions of Articles 4 (commencing with Section 49041) and 5 (commencing with Section 49061) of this chapter, (a) when pears are wrapped and packed throughout in uniform layers and rows in straight side containers, other than standard containers number 19 and

number 20, the containers need not be marked with the count of the pears in the containers and (b) nonstandard containers of packed pears need not be marked with the designation "irregular container" or with name, address, or variety designations when being transported out of the state for further packing; provided, a permit has first been obtained from an enforcing officer.

49092. An enforcing officer may issue the permit if he determines that the pears comply with the requirements of this chapter except as to containers and markings and are to be delivered pursuant to a bona fide contract of sale direct to a purchaser for further packing on the premises of the purchaser.

CHAPTER 28. PEAS

49201. As used in this chapter, "overmature" means that more than one-third of the surface of the pea pod is wrinkled, shriveled, or yellow.

49202. Pods of peas shall not be poorly filled or overmature and shall be free from insect larvae and from serious damage which is due to insects, freezing, mildew, decay, or other causes.

49203. Pods of peas are not poorly filled if one-half or more of the pod is filled with fairly well developed peas.

49204. Damage to any one pod is not serious unless 20 percent or more of the peas in the pod are affected.

49205 Not more than 10 percent, by weight, of the pods in any one container or bulk lot, as established by inspection of a representative sample, may be below the requirements which are prescribed by this chapter, but not to exceed one-half of this tolerance shall be allowed for any one cause.

CHAPTER 29. PERSIMMONS

Article 1. Standards

49401. Oriental persimmons shall be mature, but not overripe, and shall be free from any of the following defects:

(a) Mold and decay.

(b) Serious damage, due to cuts, bruises, breaking of the skin, growth cracks, hail, or other causes. Damage to any one persimmon is not serious unless it causes a waste of 10 percent, by weight, of the individual persimmon.

49402. No oriental persimmon of the Hachiya variety shall be considered mature unless at the time of picking 90 percent of the surface has attained an orange or reddish color. No oriental persimmon of other varieties shall be considered mature unless at the time of picking at least 75 percent of the surface has attained an orange or reddish color and the remaining percent of the surface has attained a yellowish green color.

49403 Not more than 10 percent, by count, of the oriental persimmons in any one container or bulk lot, may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance, shall be allowed for any one cause.

Article 2. Packing Requirements

49451. Packed oriental persimmons shall not vary in any one container more than one-half of one inch in diameter, if measured through the widest portion of the cross-section of the oriental persimmons.

Chapter 30. Plums and Fresh Prunes

Article 1. Exceptions

49551. This division does not prohibit any person, under a permit issued pursuant to this article, from transporting out of the state plums and fresh prunes which fail to comply with the packing, container, or marking requirements of this division, if both of the following requirements are satisfied.

(a) The permit is issued for and is attached to each load or lot transported

(b) The plums and fresh prunes are loose in containers which are not closed, or in bins each holding 200 pounds or more of the plums and fresh prunes.

49552. The permit may be issued by the commissioner of the county from which the plums and fresh prunes are to be transported if such commissioner has satisfactory verification by a like officer of the state of destination that the plums and fresh prunes are to be transported to a purchaser for commercial processing, preserving, or manufacturing on the premises of the purchaser. Such verification shall include a statement that such official will report to the commissioner who issued the permit as to the commercial processing, preserving, or manufacturing use to which the plums and fresh prunes so transported under the permit were actually put by the purchaser of the plums and fresh prunes.

Article 2. Standards

49571. Plums and fresh prunes shall be mature, but not overripe, and shall be free from any of the following defects:

(a) Insect injury which has penetrated or damaged the flesh.

(b) Unsealed skin breaks or cuts, mold, brown rot, or decay.

(c) Serious damage which is due to bruises, growth cracks, sunburn, hail, doubles, insects, internal growth cracks, cavities, gum spots, or other causes.

49572. Damage to any one plum or fresh prune is serious if it is caused by any of the following:

(a) Bruises which affect the flesh more than three-sixteenths of an inch in depth or more than an aggregate surface area of one-half of an inch in diameter.

(b) Growth cracks over one-half of an inch in length or over three-sixteenths of an inch in depth.

(c) Sunburn which affects the flesh.

(d) Hail which results in one or more depressions over three-sixteenths of an inch in depth or which affects more than an aggregate surface area of one-half of an inch in diameter.

(e) Doubles, if one portion is one-fourth or less in size than the other portion of the plum or fresh prune.

(f) Thrip marks or other similar insect injury if 15 percent or more of the surface of the plum or fresh prune is affected or which causes one or more depressions or raised portions (bumps or welts) one-fourth of an inch or more in depth or height.

(g) Internal growth cracks, cavities, or gum spots if they cause the plum to be seriously malformed.

49573. Not more than 10 percent, by count, of the plums or fresh prunes in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause. Individual containers in any lot may, however, contain not more than $1\frac{1}{2}$ times the tolerances which are specified if the percentage of defects of the entire lot averages within the tolerances.

49574. An additional tolerance of 10 percent, by count, of the plums or fresh prunes in any one container or bulk lot shall be permitted for plums or fresh prunes damaged by hail, if:

(a) In the case of plums or fresh prunes which have a minimum diameter of $1\frac{7}{16}$ inches or larger, the hail damage on each individual plum or fresh prune, permitted in such additional tolerance, does not exceed a depth which is three-sixteenths of the minimum diameter of the plum or fresh prune, or an aggregate surface area with a diameter equal to one-half of the minimum diameter of the plum or fresh prune.

(b) In the case of plums or fresh prunes which have a minimum diameter of less than $1\frac{7}{16}$ inches, the hail damage on each individual plum or fresh prune, permitted in such additional tolerance, does not exceed a depth of one-quarter of an inch or an aggregate surface area of eleven-sixteenths of an inch in diameter.

(c) The containers in which such plums or fresh prunes are placed or packed are plainly and conspicuously marked, on the outside end of each container on which appears the other required markings, in letters not less than one-half of an inch in height, with the words "Hail Marked" or, if in bulk lots, they are conspicuously placarded "Hail Marked."

Article 3. Packing Requirements

49601. Plums and fresh prunes shall be in standard container number 5, 9C, 10A, 12A, 12B, 22B, or 22D.

49602. The depth dimension of containers which are designated for plums and fresh prunes shall include the measurement of the specified depth of any cleats used, if any are used.

49603. Plums and fresh prunes shall not vary in size between the fruits. in any one container, more than one-fourth of an inch in diameter if measured through the widest portion of cross section of the fruit.

49604. If plums or fresh prunes are packed in standard container number 9C, the bottom layer or layers may contain a fewer number of plums or fresh prunes than in the top layer if both of the following requirements are complied with:

(a) The plums or fresh prunes in each such bottom layer are placed so that they are not compact within the layer.

(b) All of the plums or fresh prunes in the container are uniform in size as required in Section 49603.

49605. If the numerical description is used to designate the contents of a container, the plums or fresh prunes in the container shall conform to the minimum diameter requirements for the numerical description marked on the container.

49606. If the actual count is used to designate the contents of the container, a variation of four plums or fresh prunes more or less than the number which is stated shall be allowed.

Article 4. Markings on Containers

49641. As used in this article:

(a) "Minimum diameter" means the smallest diameter measured through the center of the plum or fresh prune at a right angle to a straight line that is drawn from the stem end to the distal end of the fruit.

(b) "Numerical description" means the numerical arrangement which the plums and fresh prunes would pack in the top layer of a basket if packed in the standard four-basket crate.

(c) "Row count" means the number of rows of plums or fresh prunes which are packed laterally across the end of the container.

(d) "Row size" means that number of plums or fresh prunes, representative of the variations in size of the plums in the container, which would tightly pack laterally across the side of a tray which is used to hold the top layer, which distance shall not be less than 12 inches or the number of plums or fresh prunes whose aggregate width will equal 12 inches. The row size measurements of plums or fresh prunes shall be established with the stem end downward and utilizing the widest portion of cross section at a right angle to a straight line drawn from stem end to the distal end of the fruit.

49642. Every container of plums or fresh prunes, shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that authorized the packing of the plums or fresh prunes or the name under which such person is engaged in business.

(b) A sufficiently explicit address to permit ready location of such person.

(c) The name of the variety of plums or fresh prunes, if known, or if not known, the words "unknown variety."

(d) Except as otherwise provided in Section 49645, a designation which indicates the size of the plums or fresh prunes in the container.

49643. The following designations shall be used to indicate the size of the plums or fresh prunes in a container:

(a) If they are packed in the four-basket crate, the description of the arrangement of the pack in the top layer of the baskets.

(b) If they are wrapped and packed throughout in a straight side container, the count; or if they are packed without wrappers, in molded forms, cups, or similar packing devices, the count.

(c) If they are packed without wrappers throughout the container, or by the "face and fill" method, in any container, except the four-basket crate or the "round stave" basket, the "row count" directly followed by the word "row," "rows," or the letter "R" all in like size type, or the numerical description.

(d) If they are loose in any closed container except the "round stave" basket, the numerical description.

49644. The designations of the numerical descriptions of the plums or fresh prunes in a container shall indicate the minimum diameters of the fruit as follows:

(a) "4 x 4 size" means $1\frac{11}{16}$ inches minimum diameter.

(b) "4 x 5 size" means $1\frac{9}{16}$ inches minimum diameter.

(c) "5 x 5 size" means $1\frac{7}{16}$ inches minimum diameter.

(d) "5 x 6 size" means $1\frac{5}{16}$ inches minimum diameter.

(e) "6 x 6 size" means $1\frac{3}{16}$ inches minimum diameter.

(f) Other sizes, larger or smaller than the numerical descriptions which are defined in this section, shall have proportionate minimum diameter requirements.

49645. In lieu of the size designations which are required by Section 49642 to be marked on containers of plums or fresh prunes, standard container number 9C may be marked with the row size of the plums or fresh prunes in the container followed by the term "row size," all in like-size type.

CHAPTER 31. POMEGRANATES

Article 1. Standards

49751. Pomegranates shall be mature and free from any of the following defects:

(a) Rot and decay.

(b) Serious damage which is due to sunburn, growth cracks, cuts or bruises, or other causes.

49752. Damage to any one pomegranate, except damage caused by sunburn, is not serious unless it causes a waste of 10 percent, by weight, of the fruit. Damage caused by sunburn is not serious unless 20 percent of the seed arils of the fruit fail to show the characteristic reddish color of normal matured fruit.

49753. Not more than 10 percent, by count, of the pomegranates in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

49754. Pomegranates shall not be considered mature unless both of the following requirements are satisfied:

(a) The juice from a composite sample of at least 10 percent of the fruit in any container contains not to exceed 1.85 percent of acid.

(b) The juice is at least as dark in color as the shade of red shown by the Lovibond tintometer scale, red 20 plus yellow 1, which is measured in a $\frac{1}{4}$-inch cell

No lot of pomegranates shall, however, be considered as failing to meet the maturity requirements of this section because the sample from one container fails to meet the required test.

Article 2. Packing Requirements

49801. Packed pomegranates shall not vary in any one container more than one-half of an inch in diameter, when measured through the widest portion of the cross section.

49802. Every container of pomegranates shall bear upon it in plain sight and in plain letters on one outside end all of the following information:

(a) The name of the person that first authorized the packing of the pomegranates, or the name under which such packer is engaged in business, together with sufficiently explicit address to permit ready location of such packer.

(b) The name of the variety, if known, or if not known, the words "Unknown Variety".

(c) The count when packed.

CHAPTER 32. POTATOES

Article 1. Standards Generally

50001. As used in this article, "cuts" means that a portion of the potato has been removed by cutting, breaking, or mechanical injury or any other cause.

50002. Potatoes shall be free from any of the following defects:

(a) Mold, decay, soft and wet rots, black heart, and live insect larvae which have penetrated the flesh.

(b) Serious damage which is due to hollow heart, insect injury, freezing, sunscald, dry rots, scab, growth cracks, sunburn, greening, second growth, cuts, bruises, grass roots, nematodes, net necrosis, or other internal discoloration, or other causes.

50003. Damage to any one potato is not serious if it is caused by:

(a) Hollow heart, unless the cracks or cavities, singly or in combination, are greater in length or width than one-third of the diameter of the tuber which is measured at the widest portion of cross section, at a right angle to a straight line that is drawn from the stem end to the distal end of the tuber.

(b) Greening, unless the affected portion has at least a greenish tinge of color and causes a waste of 10 percent, by weight, of the individual potato. Light tan or cream colored flesh shall not be considered as damage.

(c) Net necrosis or other internal discoloration, unless the affected portion has dark brown or black areas in the flesh and causes a waste of 10 percent, by weight, of the individual potato.

(d) Insect injury, freezing, sunscald, dry rots, scab, growth cracks, sunburn, second growth, bruises, grass roots, nematodes, or other causes unless such defects cause a waste of 10 percent, by weight, of the individual potato.

50004. Damage to any one potato is not serious if it is caused by cuts unless the potato is within any of the following classes:

(a) In the case of long varieties, both ends of the potato have been removed.

(b) More than one-fourth of any portion of the potato has been removed, as indicated by the contour of the remaining portion of the potato.

(c) In the case of long varieties, one end is removed and the remaining portion of the potato weighs less than six ounces.

(d) In the case of long varieties, the cuts are on the sides and the total length of any one such cut is more than one-half the length of the potato.

50005. Not more than 5 percent, by weight, of the potatoes in any one container or bulk lot may contain internal defects, including those which are caused by hollow heart, net necrosis, or any other type of necrosis, stem end browning, internal brown spots, or other similar types of discoloration not visible externally, but excluding black heart.

50006. Not more than 6 percent, by weight, of the potatoes in any one container or bulk lot may be below the other requirements which are prescribed by this article, including freedom from black heart, but not to exceed one-sixth of this tolerance shall be allowed for soft or wet rots.

50007. The tolerances which are prescribed by Sections 50005 and 50006 are on a container basis. Individual containers in any lot may, however, with respect to the 6 percent tolerance and the 5 percent tolerance, separately, contain not more than double the tolerance which is specified if the averages for the entire lot based on sample inspection are within the tolerances specified, except that:

(a) In case of potatoes which are affected by soft rot or wet breakdown, not more than one-tenth of the containers may contain not more than four times the tolerance specified.

(b) At least one defective specimen shall be permitted in a container.

Article 2. Potatoes for Seed Purposes

50031. Potatoes for seed purposes, unless certified pursuant to Chapter 3 (commencing with Section 52651), Division 18 of this code, shall comply with all of the requirements of this division which relate to potatoes.

50032. Potatoes for use within this state for seed purposes, that fail to conform to the standards which are prescribed by Article 1 (commencing with Section 50001) of this chapter only by reason of serious damage which is due to greening and green ends, are as to such damage exempt from such standard if they are conspicuously marked and identified for seed purposes, or if they bear a notice which is accompanied by an order which directs the disposition of the potatoes for seed purposes only.

50033. The notice and order shall have the same force and effect as the warning notice and disposal order provided in Section 42881, and shall be subject to all the provisions of this division which relate to the warning notice and disposal order.

Article 3. California Standard Grade Potatoes

50061. A "California Standard" grade of potatoes is hereby established. A container of potatoes may not be so labeled unless the potatoes which are contained in the container meet the requirements which are prescribed by this article. Such potatoes shall meet the requirements for U.S. No. 1 grade

which is established for potatoes by the United States Department of Agriculture, except that they need only be free from serious damage by dirt, as defined in the U.S. grades for potatoes, but the tolerances for defects which are specified in Sections 50064 and 50065 shall be allowed.

50062. The diameter of each potato shall be not less than 1⅞ inches unless the container in which the potato is packed is clearly and conspicuously marked near the term "California Standard," or other terms for such grade which are permitted by this article, with one of the size classifications or methods of indicating size which are designated in the U.S. grades for potatoes and the potatoes in the container conform with such size as marked.

50063. Containers of potatoes which are not marked as to size and required to be 1⅞ inches in diameter, and those which are marked with one of the size classifications or methods of indicating size which are designated in the U.S. grades for potatoes, shall be subject to the tolerances as to size as set forth in the U.S. grades for potatoes.

50064. Except as to tolerances for size and sprouting, 15 percent of the potatoes in any lot may be below the requirements which are prescribed by this article, but not more than 5 percent may be seriously damaged by hollow heart and internal discoloration as defined in the U.S. grades for "serious damage" due to these two causes. Not more than 6 percent may fail to meet the remaining requirements of the U.S. No. 2 grade, but not more than one-half of this amount (3 percent) may be affected by southern bacterial wilt, ring rot, or late blight, including not more than 1 percent for frost, soft rot, or wet breakdown.

The tolerances for the standards are on a container basis. Individual packages in any lot may, however, vary from the specified tolerances in the amounts indicated in the U.S. standards for potatoes relating to lot tolerances if the averages for the entire lot, based on sample inspection, are within the tolerances which are specified in this section.

50065. In addition, not more than 10 percent of such potatoes may have sprouts over three-fourths of an inch long if the potatoes are free from serious damage by shriveling as defined in the U.S. grades for potatoes, except that if the 15 percent tolerance which is specified in Section 50064 is not used entirely for other defects, the unused portion of the tolerance may be used for potatoes which have sprouts over three-fourths of an inch long but which are not damaged seriously by shriveling.

50066. "California Standard" potatoes may also be labeled or designated as "Standard" or "Calif. Standard" and if so labeled shall meet the requirements of this article.

Article 4. Markings on Containers

50091. Containers of potatoes shall not bear any marking, brand, or designation of quality such as "extra selected," "selected," "select," "extra fancy," "fancy," "choice," "No. 1," or other similar superlative designations which imply a reasonably high quality, unless the contents of the container conform at least to the requirements of the U.S. No. 1 grade which is established for potatoes by the United States Department of Agriculture.

Chapter 33. Quinces

Article 1. Standards

50201. Quinces shall be mature, but not overripe, and shall be free from any of the following defects:

(a) Insect injury which has penetrated or damaged the flesh.

(b) Mold and decay.

(c) Serious damage which is due to cuts or skin breaks, bruises, cracks, scab, disease, hail, or other causes. Damage to any one quince is not serious unless it causes a waste of 10 percent, by weight, of the individual quince.

50202. Not more than 10 percent, by count, of the quinces in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

Article 2. Packing Requirements

50231. Packed quinces shall not vary in size in any one container more than one-half of an inch in diameter if they are measured through the widest portion of the cross section of the quinces.

Chapter 34. Sweet Potatoes

Article 1. General Provisions

50351. The director may adopt such regulations as are reasonably necessary to implement the provisions of Article 2 (commencing with Section 50381) of this chapter and to establish grades and grade marking requirements for sweet potatoes.

50352. In adopting regulations which establish grades for sweet potatoes, the director shall take into consideration the quality, size, and other specifications of the grades for sweet potatoes which are promulgated by the United States Department of Agriculture.

Article 2. Standards

50381. Sweet potatoes shall be free from any of the following defects:

(a) Mold, decay, and soft and wet rots.

(b) Serious damage which is due to a corky condition in the flesh, insect injury, bruises, growth cracks, or other disease, freezing, grass roots, or other causes. Damage to any one sweet potato is not serious unless it causes a waste of 10 percent, by weight, of the individual potato.

50382. Not more than 10 percent, by weight, of the sweet potatoes in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause and not to exceed 2 percent shall be allowed for sweet potatoes affected by soft and wet rots.

Article 3. Standard Containers and Packs

50411. The standard containers and packs for sweet potatoes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

50412. The standard containers for sweet potatoes are standard containers numbers 27, 47, 48, 48A, 48B, and 50A.

Article 4. Packing Requirements

50431. All sweet potatoes which are in containers that are closed shall be in standard container number 27, 47, 48, 48A, 48B, or 50A. The container requirements of this section do not apply to sweet potatoes that are in containers which are not closed or in sacks.

Article 5. Markings on Containers

50451. Every container of sweet potatoes, except a consumer size unit which holds 10 pounds or less, shall bear upon it in plain sight and in plain letters on one outside end if it is a box, lug, or carton, or either on one side or the top cover if it is a basket or other similar container, the name of the person that first packed or authorized the packing of the sweet potatoes, or the name under which such packer is engaged in business, together with a sufficiently explicit address to permit ready location of such packer.

50452. It is unlawful for any person to label any containers of sweet potatoes with any one of the designations of grade which is established by the director unless the sweet potatoes which are contained in such container meet all of the requirements of the grade as marked.

CHAPTER 35. TOMATOES

Article 1. Standards

50601. Tomatoes shall be mature, but not overripe, and shall be free from any of the following defects:

(a) Pinworm damage which has penetrated beyond the tissue making up the base of the core of the tomato, other insect injury which has penetrated or damaged the flesh, and mold, decay, and wet or soft rots.

(b) Serious damage due to freezing, blossom end rot, mosaic, alkali spot, sunscald, bruises, catfaces, growth cracks, or other causes. Damage to any one tomato is not serious unless it causes a waste of 10 percent, by weight, of the individual tomato.

50602. Not more than 10 percent, by weight, of the tomatoes in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

Article 2. Standard Container and Pack

50631. The standard container and pack for tomatoes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in this article.

50632. The standard container for tomatoes is standard container number 27.

Article 3. Packing Requirements

50651. All tomatoes, except tomatoes which are green and wrapped or tomatoes which are vine-ripened, shall be in standard container number 22C, 53, 54, 55, 56, or 57. Tomatoes which are green and wrapped or tomatoes which are vine-ripened may be in other size containers.

50652. Packed tomatoes shall not vary in size, in any one container, more than one-half of an inch in diameter if they are measured through the widest portion of cross section of the tomatoes.

50653. Except as otherwise provided in Section 50654 or 50655, if tomatoes are packed in containers which have straight sides, each layer shall consist of the same number of tomatoes except as follows:

(a) If the tomatoes in any layer, except the top layer, are placed on edge and the tomatoes in the top layer are placed flat, the top layer may consist of one row less in width than such other layer.

(b) If the tomatoes are packed in standard container number 27 with wide cleats on each end which extend one-half of an inch or more over the inside edge of the end piece, and such cleats interfere with the packing of the top layer, the top layer may consist of one row less in length than any other layer.

In no case, however, may the count of any other layer be less than the top layer.

50654. Tomatoes which are packed by the double-wrap method, which means that all of the tomatoes in a container, except in the top layer, are packed with two tomatoes in each individual wrapper, need not conform with the requirements of this article as to the arrangement of the individual tomatoes in the container or the count of tomatoes in layers or in the containers if all of the following requirements are satisfied:

(a) The tomatoes are fairly tightly packed and do not vary in size in any one container or layer, more than three-eighths of an inch in diameter if they are measured through the widest portion of cross section of the tomatoes.

(b) Each container is marked in plain sight and in plain letters on the outside end of the container which bears other markings which are required by this chapter with the numerical description of the pack in the top layer followed by the term "double-wrapped" or "double-wrap," all in figures and letters which are at least three-eighths of an inch in height.

50655. Tomatoes which are packed in any container that has straight sides need not conform with the requirements of this article which relate to the count of tomatoes in the various layers if each of the layers, except the top layer, is packed by the "offset" or diagonal arrangement method. There shall, however, be approximately the same numerical count in each layer.

50656. In the case of wrapped and packed tomatoes, a "bridge" of a number of tomatoes which consists of less than a complete layer packed between any two layers in any container shall be permitted if the container is marked as provided in Section 50682.

Article 4. Markings on Containers

50681. Every container of tomatoes shall bear upon it in plain sight and in plain letters, all of the following information:

(a) On one outside end, side, or top, the name of the person that authorized the packing of the tomatoes together with a sufficiently explicit address to permit ready location of such person.

(b) On one outside end, if wrapped and packed, a numerical description of the pack in the top layer.

50682. If a bridge pack is used, the designation "bridge pack" shall be imprinted in plain letters one inch in height and in plain sight on the lid of the container, unless the tomatoes are packed by the double-wrap method.

CHAPTER 36. WALNUTS

Article 1. Exceptions

50801. Notwithstanding any provision of this chapter, walnuts which fail to comply with the size, quality, or marking requirements of this chapter may be transported to an adjoining state from the orchard or field where they were produced, or from a packing plant which does not have proper or adequate facilities for processing, grading, packing, or reconditioning such walnuts, if both of the following requirements are complied with:

(a) They are transported under a permit which is issued pursuant to this chapter.

(b) The permit is attached to each load or lot so transported.

50802. A permit may be issued by the commissioner of the county from which the walnuts are to be transported if such commissioner has satisfactory verification by a like officer of the state of destination that the walnuts are to be transported to a purchaser for processing, grading, packing, or reconditioning on the premises of the purchaser. Such verification shall include a statement that such official will report to the commissioner who issued the permit as to the processing, grading, packing, or reconditioning use to which the walnuts transported under the permit were actually put by the purchaser of the walnuts.

Article 2. Standards

50831. Unshelled walnuts shall be well dried to the extent that the kernels in not less than 90 percent, by count, of the walnuts, based on the examination of a representative sample of any one lot, are firm and crisp.

50832. Walnuts shall contain not less than 90 percent, by count, based on examination of a representative sample of any one lot, of walnuts free from the following defects:

(a) Blanks (walnuts without kernels).

(b) Walnuts which contain insects, insect excreta, or webbing or which show damage to kernel by insects.

(c) Rancid kernels.

(d) Kernels which are affected by green or yellow mold.

(e) Kernels which are affected by white or gray mold which covers 25 percent or more of the entire surface of the kernel.

(f) Kernels which are affected by shriveling to the extent that 50 percent or more of the entire kernel is unpalatable or inedible.

50833. Walnuts shall contain not less than 90 percent, by count, based on a representative sample of any one lot of walnuts free from the following external defects:

(a) Shells with adhering hull.

(b) Shells which show perforations which affect more than one-eighth of the surface.

Article 3. Packing Requirements

50861. Walnuts which are in containers that are marked "mammoth" size shall be of such size that not over 12 percent, by count, of a representative sample of any one lot, pass through a round opening which is $^{9}/_{64}$ inches in diameter.

50862. Walnuts which are in containers that are marked "jumbo" size shall be of such size that not over 12 percent, by count, of a representative sample of any one lot, pass through a round opening which is $^{8}/_{64}$ inches in diameter.

50863. Walnuts which are in containers that are marked "large" size shall be of such size that not over 12 percent, by count, of a representative sample of any one lot, except a lot of walnuts of the Eureka variety and type, pass through a round opening which is $^{7}/_{64}$ inches in diameter. In the case of walnuts of the Eureka variety and type, the round opening shall be $^{7}/_{64}$ inches in diameter.

50864. Walnuts which are in containers that are marked "medium" size or "standard size" shall be of such size that not over 12 percent by count, of a representative sample of any one lot, pass through a round opening which is $^{7}/_{64}$ inches in diameter.

50865. Walnuts which are in containers that are marked "baby" size shall be of such size that not over 12 percent, by count, of a representative sample of any one lot, shall pass through a round opening which is $^{6}/_{64}$ of an inch in diameter.

Article 4. Markings on Containers

50891. Every container and subcontainer of walnuts shall bear upon it in plain sight and in plain letters the name of the state or foreign country where the walnuts were produced and the size of the walnuts which are contained in it, in accordance with the size specifications defined in Article 3 (commencing with Section 50861) of this chapter. In the case of any container or subcontainer which has a content of more than one pound net weight, such markings shall be in letters which are not less than one-twentieth the height of the filled container or subcontainer. In the case of any container or subcontainer which has a content of one pound or less net weight, such

markings shall be in letters which are not less than one-fourth of an inch in height.

DIVISION 18. FIELD CROPS, SEEDS, SEED POTATOES, ONE-VARIETY COTTON DISTRICTS, AND NURSERY STOCK GRADES AND STANDARDS

CHAPTER 1. FIELD CROPS

Article 1. Definitions and General Provisions

52001. As used in this chapter, "field crop products" includes grain crops, dry bean crops, seeds, forage crops, fiber crops, and other field crops and the manufactured products and byproducts of such field crops.

52002. The director shall do all of the following:

(a) Establish, by regulation, uniform standards for field crop products which shall conform as closely as possible to those which are established by the Secretary of the United States Department of Agriculture.

(b) Establish inspection districts within the state. If such a district is established, inspection service may be rendered in it in accordance with regulations which are adopted by the director.

(c) Establish, upon request, inspection stations at warehouses, docks, or industrial plants, which are within or without an established inspection district. The director may make special regulations which are applicable to each specific inspection station and the conditions under which it shall be established and maintained.

(d) Provide through the regularly established inspection district and stations, sampling, grading, inspection, and certification service for field crop products within the state or which are shipped into or through the state.

(e) Issue certificates as to quality and condition of field crop or other agricultural products in accordance with standards which are established pursuant to this chapter, or any other standards which may be fixed by trade or contract and which do not conflict with official standards.

(f) Adopt regulations for sampling, grading, inspection, and certification for the purposes of carrying out this chapter.

(g) Fix fees for sampling, grading, inspection, and certification of field crop products, which fees in the aggregate shall pay the cost of services necessary to perform such sampling, grading, inspection, and certification. The director may collect such fees in advance of performing the services, but is not required to do so if in his opinion the benefits of such services would be lessened by such advance payments

52003. The director may enter any place where field crop products are stored, shipped, or sold, for the purpose of carrying out the provisions of this chapter.

52004. The director may, for the purpose of inspection and examination, break the seals of cars and after such inspection has been made shall securely close and reseal such doors as were broken open using a special seal which is provided by the department for the purpose. A record of all original seals broken, the date when broken, a record of all seals which were substituted thereafter, and the date and number of such seals shall be made.

52005. Any railroad which delivers field crop products in cars at any place which is provided with inspection service pursuant to this chapter shall provide convenient and suitable sidetracks at such place as the director may designate, on which every car of field crop products which is delivered by them shall, upon arrival, be set and conveniently arranged for inspection, if such car of field crop products is to be inspected.

Article 2. Employees

52031. The director shall issue to each employee who is authorized to grade and inspect the products which are included under this chapter a certificate which shows such authority. The certificate shall be posted in a permanent and conspicuous place at the official station of such employee.

52032. The director shall require from each employee who is responsible for the sampling, grading, inspection, and certification of any product which is covered by this chapter a bond in an amount to be determined by the director. The costs of such bond shall be borne by the department.

Article 3. Inspection, Grading, and Certification

52061. The director shall inspect and grade upon request and certify to any interested party the quality and condition of any field crop or other agricultural product under such regulations as he may prescribe. Certificates which are issued by authorized agents of the director shall be received in the courts in the state as prima facie evidence of the truth of the statements which are contained in them.

Such inspection shall not be made or such certificates issued by any person not specifically authorized by the director in reference to any field crop product for which state standards have been established. Any person so authorized shall comply with the regulations adopted by the director relative to the certification of field crop products.

52062. The director may investigate and certify to shippers or other financially interested parties the grade, quality, and condition of barley. Such certificates shall be based upon the United States standards for barley and shall be prima facie evidence of the truth of the statements which are contained in them.

52063. Any person that is aggrieved by the grading by any authorized inspector of any of the products for which standards have been established pursuant to this chapter may appeal to the director in accordance with such regulations as he may establish. If the appeal pertains to a commodity which is moving in intrastate commerce but for which standards have been established under the provisions of a compulsory United States act, the appellant may, with the approval of the Secretary of the United States Department of Agriculture, appeal to the federal grain supervisor of the supervision district in which the product was located when it was inspected and certified.

Article 4. Disposition of Funds

52091. Any money which is received under this chapter shall be paid monthly into the State Treasury and placed to the credit of the Department of Agriculture Fund.

Chapter 2. California Seed Law

Article 1. Short Title and Definitions

52251. This chapter shall be known as the "California Seed Law."

52252. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

52253. "Advertisement" means representations, except those on the label, which are disseminated in any manner or by any means, that relate to seed which is subject to this chapter.

52254. "Agricultural seed" means the seed of any domesticated grass or cereal, and of any legume or other plant which is grown as turf, cover crop, forage crop, fiber crop, or field crop, and mixtures of such seeds. It does not, however, include any variety which is generally known and sold as flower seed or vegetable seed.

52255. "Labeling" means all labels, and other written, printed, or graphic representations, in any form whatsoever, which accompany and pertain to any seed whether the seed is in bulk or in containers, and it includes invoices.

52256. "Noxious weed" means any species of plant which is, or is liable to be, detrimental or destructive and difficult to control or eradicate. Noxious weeds are of two classes, primary noxious weeds and secondary noxious weeds, which are defined in Sections 52257 and 52258, respectively.

52257. "Primary noxious weeds" means perennial noxious weeds such as not only reproduce by seed, but also spread by underground roots or stems, and which, when established, are highly destructive and difficult to control in this state by ordinary good cultural practice. Exception is made for certain of such species which because of wide distribution in the state are classified in Section 52258 as secondary noxious weeds.

Primary noxious weeds include all of the following:

(a) Austrian fieldcrest (Rorippa austriaca).

(b) Blueweed (Helianthus ciliaris).

(c) Camelthorn (Alhagi camelorum).

(d) Canada thistle (Cirsium arvense).

(e) Horsenettle, meaning Carolina horsenettle (Solanum carolinense), and white horsenettle (Solanum elaeagnifolium).

(f) Leafy spurge (Euphorbia esula).

(g) Perennial gaura, meaning hairy gaura (Gaura villosa), scarlet gaura (Gaura coccinea), scented gaura (Gaura odorata), and wavy-leaf gaura (Gaura sinuata).

(h) Perennial peppercress (Lepidium latifolium).

(i) Perennial sowthistle (Sonchus arvensis).

(j) Quackgrass (Agropyron repens).

(k) Russian knapweed (Centaurea repens).

(*l*) Whitetop or hoary cress (Cardaria spp.), including heart-podded hoary cress (Cardaria draba), lens-podded hoary cress (Cardaria chalepensis), and globe-podded hoary cress (Cardaria pubescens).

(m) Any other species which the director, as provided in Section 52332, finds and declares to be a primary noxious weed.

52258. "Secondary noxious weeds" means all species of noxious weeds not classified as primary noxious weeds.

Secondary noxious weeds include all of the following:

(a) Alkali mallow (Sida hederacea).

(b) Dodder (Cuscuta spp.).

(c) Field bindweed (Convolvulus arvensis).

(d) Halogeton (Halogeton glomeratus).

(e) Italian thistle (Carduus pycnocephalus).

(f) Italian thistle (Carduus tenuiflorus).

(g) Johnson grass (Sorghum halepense) and other perennial Sorghum spp., including but not limited to Sorghum almum and perennial sweet Sudan grass.

(h) Klamath weed (Hypericum perforatum).

(i) Mediterranean sage (Salvia aethiopis).

(j) Nutgrass, meaning yellow nutgrass (Cyperus esculentus) and purple nutgrass (Cyperus rotundus).

(k) Poverty weed (Iva axillaris).

(*l*) Puncture vine (Tribulus terrestris).

(m) Sandbur grass (Cenchrus spp.).

(n) Yellow star thistle (Centaurea solstitialis)

(o) Any other species which the director, as provided in Section 52332, finds and declares to be a secondary noxious weed.

52259. "Vegetable seed" means the seed of any crop which is or may be grown in gardens or on truck farms and which is generally known and sold under the name of vegetable seed.

52260. "Weed seed" means any noxious weed seed, and any seed which is not included in the definitions of agricultural or vegetable seeds, if it occurs incidentally in agricultural or vegetable seed.

Article 2. General Provisions

52281. This chapter and the terms which are used in it shall be construed so as to conform insofar as possible with the construction which is placed upon the Federal Seed Act (7 U.S.C., Sec. 1551, et seq.) and regulations which are issued pursuant to that act, and to effectuate its purpose to make uniform the laws of the states adopting it.

52282. The director and, under the supervision and direction of the director, the commissioner of each county and such of the commissioner's deputies and inspectors as the director has found to be duly qualified as seed inspectors, shall enforce this chapter and carry out its provisions and requirements.

52283. The director may cooperate with the United States Department of Agriculture and other agencies in the enforcement of this chapter.

52284. The director may issue such orders, circulars, and announcements as he may deem necessary to further the purposes of this chapter.

52285. If the director or the commissioner finds that any person has violated any provision of this chapter, he may institute proceedings in the court of competent jurisdiction in the area in which the violation occurred, to have such person convicted of the violation, or he may file with the district attorney with the view of prosecution such evidence as may be deemed necessary.

52286. The director shall maintain a properly equipped laboratory for examining and testing seeds.

52287. All primary and secondary noxious weeds which are enumerated in this chapter or in any regulation which is adopted by the director pursuant to this chapter are hereby recognized as noxious within the meaning of the Federal Seed Act (7 U.S.C., Sec. 1551, et seq.).

Article 3. Exceptions

52311. A person is not subject to the penalties which are prescribed by this chapter in any of the following cases:

(a) For selling in this state any agricultural or vegetable seed which is incorrectly labeled or represented as to kind, variety, or type, which seed cannot be identified by examination of it, unless he has failed to obtain an invoice or grower's declaration which gives the commonly accepted name of the kind, kind and variety, or kind and type, and to take such other precautions as may be necessary to insure the identity to be that which is stated.

(b) As to any matter which is required by Article 8 (commencing with Section 52451) of this chapter, for selling such seed in original unopened sealed packages which are fully labeled by another dealer, unless he has failed to have such seed retested and relabeled as to the percentage of germination

within the period which is prescribed by Section 52481, or unless he has failed to correct the label after notice that such label has been found to be incorrect.

(c) For shipping, delivering, transporting, or selling within this state any agricultural or vegetable seed which has a false labeling as to percentage of germination or hard seeds, unless he has first been given an opportunity by the director to appear at a hearing to introduce evidence, either in person or by agent or attorney, and unless the director, after such hearing, or upon failure or refusal of such person to appear, finds that such person has failed to show that, at the time which is stated on the label, a sample representative of the lot of seed was tested by a competent seed analyst in accordance with the methods prescribed pursuant to this chapter and found to germinate as represented on the label This exemption does not, however, relieve any person from the obligation, upon order of an enforcement official, to stop further sale of any seed which is found to be incorrectly labeled as to germination, nor does it exempt such seed from seizure pur suant to this chapter.

Article 4. Regulations

52331. The director, by regulations, shall do all of the following:

(a) Adopt germination standards for vegetable seed.

(b) Adopt tolerances to be applied in all enforcement procedure required by this chapter.

(c) Prescribe methods of procedure in the examination of lots of any agricultural or vegetable seed, and in securing samples of such lots.

(d) Establish a reasonable schedule of fees for tests, examinations, and services except those which are required for enforcement or for quarantine purposes, which schedule shall be based upon the approximate cost of the service rendered. The director may, however, provide for the examination of seeds for identification purposes without charge.

(e) Adopt such other regulations as will assist in carrying out the purposes of this chapter.

Every standard or tolerance which is adopted pursuant to this chapter shall be as nearly as practicable like that which is established under the Federal Seed Act (7 U.S.C., Sec. 1551, et seq).

52332. The director may, by regulation, adopt all of the following:

(a) A list of the plants and crops which he finds are or may be grown in this state from agricultural or vegetable seed.

(b) A list of the plants and crops which he finds are detrimental to agriculture if they occur incidentally in other crops, and which, therefore, are classed as weed seed except if sold alone or as a specific constituent of a definite seed mixture

(c) A list of noxious weeds which he finds are primary noxious weeds, as defined in this chapter.

(d) A list of those noxious weeds which are not classified as primary noxious weeds, and which, therefore, are classed by this chapter as secondary noxious weeds.

(e) A list of seed-certifying agencies which he finds qualified to certify as to the variety, purity, quality, or other matter of agricultural or vegetable seed. The director shall consult with the director of the University of California Agricultural Experiment Station before approving the qualifications of any agency to certify as to variety, type, strain, or other genetic character of agricultural or vegetable seed.

(f) A list of substances, which are likely to be used for treating grain or other crop seed, that he finds and determines are toxic to human beings or animals if so used, together with an appropriate warning or caution statement for each such substance.

Article 5. Powers of Enforcing Officers

52361. The director, each commissioner, and each of the commissioner's deputies and inspectors as the director has found to be duly qualified as a seed inspector, shall sample and inspect any agricultural or vegetable seed which is subject to this chapter at such time and place and to such extent as he may deem necessary to determine whether such agricultural or vegetable seed is in compliance with the provisions of this chapter, and notify promptly the person that is in possession or control of the seed of any violation.

52362. For the purpose of carrying out the provisions of this chapter, any officer who is required to enforce this chapter may enter upon any public or private premises during regular business hours in order to have access to any seed which is subject to this chapter and the regulations which are adopted pursuant to it.

52363. Any sample which is taken by an enforcement officer in accordance with the regulations which are adopted pursuant to this chapter for the taking of official samples is prima facie evidence, in any court in this state, of the true condition of the entire lot from which the sample was taken. A written report which is issued by the State Seed Laboratory that shows the analysis of any such sample is prima facie evidence, in any court in this state, of the true analysis of the entire lot from which the sample was taken.

Article 6. Stop-Sale Orders

52391. The director or the commissioner and such of his deputies and inspectors as are found by the director to be duly qualified as seed inspectors, as enforcing officers of this chapter, may issue and enforce a written or printed "stop-sale" order to the owner or custodian of any lot of agricultural or

vegetable seed which he finds is in violation of any provision of this chapter, which shall prohibit further sale of such seed until the officer has evidence that the law has been complied with. Upon compliance, such order shall be removed.

52392. It is unlawful for any person to move or otherwise dispose of any lot of seed which is held under a "stop-sale" order except under written permission of an enforcing officer or under his specific direction and for the purposes which are specified.

52393. The owner or custodian of seed which is held under a "stop-sale" order shall, upon demand, have the right to a hearing before the director or the commissioner as to the justification of any such order, and may appeal to the director from any order of the commissioner made under the provisions of this article.

52394. This article does not limit the right of the enforcement officer to proceed as authorized by other sections of this chapter.

52395. Any decision of the director pursuant to this article is subject to review by any court of competent jurisdiction.

Article 7. Services

52421. The director and the commissioner of each county acting under the supervision of the director may do all of the following:

(a) Cooperate with seed-certifying agencies which are officially recognized under the provisions of this chapter.

(b) Supervise the harvesting, cleaning, and packaging of any seed which is eligible for certification, and the affixing of legal certificates to it.

(c) Examine, sample and test such seeds.

(d) Perform such other services as may be necessary to maintain the identity and quality of certified seed.

52422. The director shall, or any commissioner with the approval of the director may, establish a reasonable schedule of fees for the services which they are authorized to perform, based upon the approximate cost of the services. Upon the request of a recognized seed certifying agency, the director, through his agents or through the commissioners, may perform the services authorized by this article. The fees for services performed by a commissioner shall be transmitted to the commissioner for such disposition as may be directed by the board of supervisors. Fees for services which are performed by the director shall be paid into the Department of Agriculture Fund.

Article 8. Labeling of Seeds

52451. This article does not apply to any of the following:

(a) Seed or grain which is not intended for sowing purposes.

(b) Seed which is in storage in, or consigned to, a seed cleaning or processing establishment for cleaning or processing.

(c) Seed or grain which is transported without transfer of title for sowing on land which is owned by the person by whom the seed or grain was produced.

(d) Seed which is weighed and packaged in the presence of the purchaser from a bulk container, if such container is properly and conspicuously labeled as provided by this chapter.

(e) Seed or grain which is transported from one warehouse to another without transfer of title or in storage in a warehouse, if each container is plainly marked or identified with a lot number or other lot identification and the label information which is required by this article is available at the request of an enforcing officer.

52452. Except as otherwise provided in Section 52454, each container of agricultural seed which is for sale or sold within this state for sowing purposes, unless the sale is an occasional sale of seed grain by the producer of the seed grain to his neighbor for use by the purchaser within the county of production, shall bear upon it or have attached to it in a conspicuous place a plainly written or printed label or tag in the English language, which gives all of the following information:

(a) Commonly accepted name of the kind, kind and variety, or kind and type of each agricultural seed component in excess of 5 percent of the whole, and the percentage by weight of each. If the aggregate of agricultural seed components, each present in an amount not exceeding 5 percent of the whole, exceeds 10 percent of the whole, each component in excess of 1 percent of the whole shall be named together with the percentage by weight of each. If more than one component is required to be named, the names of all components shall be shown in letters of the same type and size.

(b) Lot number or other lot identification.

(c) Percentage by weight of all weed seeds.

(d) The name and approximate number of each kind of secondary noxious weed seed per pound.

(e) Percentage by weight of any agricultural seed except that which is required to be named on the label.

(f) Percentage by weight of inert matter. If a percentage by weight is required to be shown by any provision of this section such percentage shall be exclusive of any substance which is added to the seed as a coating and shown on the label as such.

(g) For each agricultural seed, in excess of 5 percent of the whole, stated in accordance with subdivision (a) of this section, the percentage of germination, exclusive of hard seed; the percentage of hard seed, if present; and the calendar month and year the test was completed to determine such percentages. Following the statement of such percentages, the ad-

ditional statement "total germination and hard seed" may be stated as such, if desired.

(h) Name and address of the person that labeled the seed, or of the person that sells the seed within this state.

All determinations of noxious weed seeds are subject to tolerances and methods of determination which are prescribed in the regulations which are adopted pursuant to this chapter.

52453. Except as otherwise provided in Section 52454, each container of vegetable seed which is for sale or sold within this state for sowing purposes shall bear upon it, or have attached to it, in a conspicuous place a plainly written or printed label or tag in the English language, which gives all of the following information:

(a) Name of kind and variety of seed.

(b) For any seed which germinates less than the standard last established by the director under this chapter, the percentage of germination, exclusive of hard seed; the percentage of hard seed, if present; the calendar month and year the test was completed to determine such percentages; and the words "Below Standard" in not less than eight-point type.

(c) Name and address of the person that labeled the seed, or of the person that sells the seed within this state.

(d) In addition to the information required above, on each container of more than one-half pound the label shall include both the lot number or other lot identification and the calendar month and year the germination test was completed.

52454. Any lot of more than one container of seed which is transported to a dealer for resale, or any lot of more than five containers of seed which is sold to a consumer, is exempt from the requirements which are prescribed by Section 52452 or 52453 if both of the following requirements are complied with:

(a) Each container is plainly marked or identified with a lot number or other lot identification.

(b) The invoice and one or more of the containers bears the tag or label which is required by such sections.

Article 9. Violations

52481. Except as otherwise provided in Section 52486, it is unlawful for any person to ship, deliver, transport, or sell any agricultural or vegetable seed within this state, other than the seed which is described in Section 52451, unless the test to determine the percentage of germination which is required by Article 8 (commencing with Section 52451) of this chapter has been completed within the following period, exclusive of the calendar month in which the test is completed, immediately prior to shipment, delivery, transportation, or sale:

(a) In the case of any agricultural or vegetable seed which is shipped, delivered, transported, or sold to a dealer for resale, eight months.

(b) In the case of any agricultural or vegetable seed which is sold at retail, 15 months.

(c) In the case of any agricultural or vegetable seed which is packaged under conditions which the director finds and determines will prolong the viability of such seed, the director may designate, in regulations which are adopted pursuant to this chapter, a longer period than otherwise specified in this section, and may require such additional labeling as may be necessary to maintain identification of such seed which is packaged under such conditions

52482. Except as otherwise provided in Section 52486, it is unlawful for any person to ship, deliver, transport, or sell any agricultural or vegetable seed within this state which is within any of the following classes

(a) Is not labeled in accordance with the provisions of this chapter. This subdivision does not, however, apply to any seed which is described in Section 52451.

(b) Contains primary noxious weed seed, subject to tolerances and methods of determination prescribed in the regulations which are adopted pursuant to this chapter. This subdivision does not, however, apply to any of the seed which is described in subdivisions (a) or (b) of Section 52451.

(c) Has a false or misleading labeling, or pertaining to which there has been a false or misleading advertisement

(d) Is represented to be certified seed or registered seed, unless it has been produced and labeled in accordance with the procedures and in compliance with the rules and regulations of a seed-certifying agency which is officially recognized under the provisions of this chapter, if produced in this state, or under the provisions of the Federal Seed Act (7 U.S.C., Sec 1551, et seq) and rules and regulations which are adopted pursuant to such act, if produced outside of this state

(e) Contains more than 1½ percent by weight of all weed seeds. This subdivision does not, however, apply to any seed which is described in subdivision (a), (b), or (c) of Section 52451.

52483 It is unlawful for any person to do any of the following:

(a) Detach, alter, deface, or destroy any label, warning tag, or notice which is provided for in this chapter or in the regulations which are adopted pursuant to it, or alter or substitute seed, in a manner that may defeat the purposes of this chapter

(b) Disseminate any false or misleading advertisement concerning agricultural or vegetable seed in any manner or by any means

(c) Hinder or obstruct in any way any authorized person in the performance of his duties under this chapter.

(d) Fail to comply with a "stop-sale" order

52484. Except as otherwise provided in Section 52486, it is unlawful for any person to ship, deliver, transport, or sell

grain or other crop seed which is treated after harvest with any substance that is likely to be poisonous or toxic to human beings or animals unless there is conspicuously shown on the analysis tag or label, or on a separate tag or label attached to each container, or plainly stenciled upon each container, the words "treated seed" or other appropriate warning, together with the common name of the substance. In addition, if the substance is highly toxic as determined by the regulations of the director, the word "poison" and any other warning or caution statement which is required by such regulations shall also be shown in the manner and place which is prescribed by such regulations.

52485. Except as otherwise provided in Section 52486, it is unlawful for any person to sell or divert for use or for processing, either for human or animal consumption, any grain or other crop seed which is treated after harvest with any substance that is likely to be poisonous or toxic to human beings or animals, unless there is an established state or federal pesticide residue tolerance for such poisonous or toxic substance on the specific grain or crop seed, and such pesticide residue tolerance is not exceeded.

52486. Sections 52481, 52482, 52484, and 52485 of this article do not apply to any common carrier in respect to any seed which is transported or delivered for transportation in the ordinary course of its business as a carrier if such carrier is not engaged in processing or merchandising seed which is subject to the provisions of this chapter.

52487. A violation of this chapter for having shipped, delivered, transported, or sold agricultural or vegetable seed which has a false or misleading labeling shall be construed to have been committed at the time of discovery of such violation, and a complaint charging such violation shall be filed within one year from the time of such discovery. No complaint which charges such a violation shall, however, be filed after two years from the date of sale.

Article 10. Abatement

52511. Any lot of agricultural or vegetable seed which does not comply with this chapter is a public nuisance and is subject to seizure on complaint of the director or the commissioner or any enforcing officer of this chapter to a court of competent jurisdiction in the area in which the seed is located.

52512. The district attorney of the county in which any such nuisance is found, on the relation of the director or the commissioner or any enforcing officer of this chapter, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent such nuisance. Upon judgment and by order of the court, such nuisance shall be condemned and destroyed in the manner directed by the court, or relabeled, denatured, or otherwise processed, or released

upon such conditions as the court in its discretion may impose to insure that the nuisance will be abated.

52513. If the owner fails to comply with the order of the court within the time which is specified in the order, the court may order disposal of the seed and containers, or their sale, under such terms and conditions as the court may prescribe, by the director or the commissioner or any enforcing officer of this chapter, or by the sheriff, marshal, or constable. If the court orders the sale of any of the seed and containers which can be salvaged, the costs of disposal shall be deducted from the proceeds of sale and the balance paid into court for the owner.

52514. In actions arising pursuant to this article, the following courts shall have original jurisdiction:

(a) Municipal courts shall have original jurisdiction where the value of the property seized amounts to three thousand dollars ($3,000) or less

(b) Justice courts shall have original jurisdiction where the value amounts to five hundred dollars ($500) or less.

CHAPTER 3. SEED POTATO CERTIFICATION

Article 1. General Provisions

52651. The director may maintain potato seed test plats, under such climatic conditions as he may deem necessary, where samples of potato seed which are produced within or outside of the state may be grown to determine the amount of virus or other diseases in such seed sources. In order to effectuate the purposes of this section, the director may enter into agreements with any person or agency interested in the production, improvement, or certification of seed potatoes, may acquire land by lease or purchase, and may accept contributions and collect fees for services performed under authority of this section.

52652. Out of any money in the Department of Agriculture Fund there is hereby appropriated twenty thousand dollars ($20,000) which shall be used as a revolving fund to carry out the provisions of this chapter. All money which is collected pursuant to this chapter shall be paid into the Department of Agriculture Fund for use in carrying out the provisions of this chapter.

Article 2. Examination and Certification of Potatoes

52681. The director shall promote and protect the potato industry of this state. The director shall establish and enforce such regulations as he deems necessary for the examination and certification of potatoes which are grown within the state, to produce improved varieties or a higher quality of seed potatoes.

52682. The director shall issue to each grower a certificate which shows the variety, quality, and freedom from insect pests and diseases of the seed crop which is examined. Each certificate shall also show the number of acres of seed potatoes which are so certified.

52683. All such certified seed potatoes shall be labeled with a tag that is attached to each container which indicates compliance with the requirements of this article.

52684. The director shall establish a reasonable schedule of fees for the services which are provided pursuant to this article, which schedule shall be based upon the approximate cost of the service rendered.

52685. The director shall compile a list of all growers of certified seed potatoes and shall furnish copies of the list upon request.

Article 3. Requirements for Prospective Growers

52711. Any person that desires to engage in the growing of certified seed potatoes within this state shall make application to the director and shall establish to the satisfaction of the director the fact that the initial planting of such seed potatoes will be made from fields where masking of the mosaic diseases has not occurred and that such intended planting will be located where masking of mosaic or other disease is not likely to occur.

52712. If the director approves the application of such prospective grower of certified potatoes, he shall notify the applicant and also advise the commissioner of the county where the planting is to occur, and he may instruct the commissioner to make the necessary inspections and certification.

Article 4. Violations

52741. It is unlawful for any person to sell potatoes which are grown in this state as certified seed potatoes unless such potatoes have been inspected and certified by the director as provided in this chapter.

52742. Any person that willfully misbrands, adulterates, or otherwise misrepresents or interferes with the grade or quality of certified seed, or that in any way changes the certificates which are issued by the director is guilty of a misdemeanor.

Chapter 4. One-Variety Cotton Districts

Article 1. General Provisions

52851. The Legislature hereby declares that the purposes of this chapter are to promote, encourage, aid, and protect the planting and growing of cotton in the State of California; that it believes that these purposes can best be accomplished

by restricting within certain areas the planting and growing of but one variety or species of cotton, which is "Acala", that by this means alone it is possible to bring the cotton growing industry in the state to its highest possible development and to insure the growing of the most superior and economically most profitable variety or species of cotton, that the planting of pure seed is essential to the production of a more merchantable and better grade of cotton and cottonseed and for the production of a grade of fiber best suited for manufacturing purposes; and that the planting of impure seed or plants other than that permitted in these areas is an economical harm and loss to the planter thereof and an irreparable injury to the adjoining or neighboring growers

52852. The Legislature also declares that the restriction of the use to which cotton lands may be used, as provided in this chapter, is essential to the highest development of the cotton-growing industry and of benefit even to one who would violate this chapter; that it is essential that but one variety of cotton should be ginned in the districts which are established in this chapter, otherwise the gin will mix the different kinds of seed, crossing takes place in the fields, the varieties are mongrelized, and cease to be uniform, the fibre deteriorates in quality, and the seed rendered unfit for planting; that solely by restricting the growing of one variety or species of cotton in certain areas can the fibre be grown of uniform length and quality, and the highest price paid for the cotton thus obtained, and the production of fibre of different lengths or grades be prevented, and that fibres of different lengths and grades are commercially inferior and when assembled in one lot or grade are classed and given the value of the lowest grade in the lot or sample

52853. The Legislature further declares that Acala cotton is now the variety or species of cotton that has been most highly developed and improved and most suited commercially for growing in the districts which are established in this chapter; that if future experiments should develop an improved variety or species of cotton, this chapter can be amended to designate it; and that the districts which are established in this chapter can be altered, restricted, or extended.

52854. The Legislature further declares the improvement of planting cottonseed and cotton has been developed successfully through a coordinated program by federal, state, and county cooperation in breeding and in research in cooperation with the cotton industry in the San Joaquin Valley at the United States Cotton Research Station near Shafter, in Kern County, California, where Acala cottonseed and cotton has been under development for use and has been used in that valley.

Article 2. Exceptions

52881. This chapter does not apply to the planting, possessing for planting, growing, picking, harvesting, or ginning of

cotton by the United States Department of Agriculture or by the department, nor to the transportation of cottonseed through any district which is established by this chapter from a point outside of the district to a destination outside of the district.

52882. The department may plant, grow, harvest, or gin cotton within any district which is established by this chapter and designate any other person or agency to do so for experimental purposes under the direct supervision of the department.

Article 3. Enforcement

52901. The director, and the commissioner of each county acting under the supervision and direction of the director, shall enforce this chapter and carry out its provisions and requirements.

Article 4. Districts

52921. The following one-variety cotton districts are hereby established:

(a) District No. 2 consists of the County of Kern.
(b) District No. 3 consists of the County of Madera.
(c) District No. 4 consists of the County of Fresno.
(d) District No. 5 consists of the County of Kings.
(e) District No. 6 consists of the County of Tulare.
(f) District No. 7 consists of the County of Merced.
(g) District No. 8 consists of the County of Stanislaus.
(h) District No. 9 consists of the County of San Joaquin.

Article 5. Violations

52941. Except as otherwise provided in Article 2 (commencing with Section 52881), of this chapter, in the districts which are established in this chapter, it is unlawful for any person to plant, possess for planting, pick, harvest, or gin any variety or species of cotton except the variety or species which is known as "Acala," which consists of the seeds or plants that are derived from the common seed stocks under the one-variety breeding program at the United States Cotton Research Station, Shafter, California.

Article 6. Penalties

52961. Any person who violates any provision of this chapter is guilty of a misdemeanor, and, in addition thereto, is liable in a civil action for all damages that may be occasioned or caused by a violation of this chapter.

Article 7. Abatement

52981. Any seed cotton, cotton plant, or cottonseed which does not comply with the provisions of this chapter is a public

nuisance and is subject to seizure on complaint of the director or the commissioner to a court of competent jurisdiction in the area in which the seed cotton, cotton plant, or cottonseed is located.

52982. The district attorney of the county in which any such nuisance is found, on the relation of the director or the commissioner, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent such nuisance Upon judgment and by order of the court, such nuisance shall be condemned and destroyed in the manner directed by the court, denatured, or otherwise processed, or released upon such conditions as the court in its discretion may impose to insure that the nuisance will be abated

52983. If the owner fails to comply with the order of the court within the time which is specified in the order, the court shall order disposal of the seed cotton, cotton plant, or cottonseed and containers, or the sale of them, under such terms and conditions as the court may prescribe, by the director or the commissioner, or by the sheriff, marshal, or constable.

If the court orders the sale of any of the seed cotton, cotton plants, or cottonseed and containers which can be salvaged, the costs of disposal shall be deducted from the proceeds of sale and the balance paid into court for the owner.

Chapter 5. Nursery Stock Grades and Standards

Article 1. Definitions

53301. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

53302. "Advertisement" means any representation which relates to nursery stock, that is disseminated in any manner or by any means, except a representation which is on the label.

53303. "Decorative plants" means indoor plants which are commonly grown and sold in movable containers, and which are not adapted for cultivation out of doors because of climatic conditions and natural peculiarities of habit or growth and because of the purpose of their cultivation.

53304. "Grade size" means the designation relating to nursery stock which denotes the height, spread, caliper, dimension, condition, quality, age, methods of propagation, or means of growth.

53305. "Labeling" means all labels, and other written, printed, or graphic representations, in any form whatsoever, which accompanies and pertains to any nursery stock.

53306. "Nursery stock" means all kinds of nursery stock except decorative plants and seeds.

53307. "Ornamental" means any plant which is grown for ornamental purposes, except decorative plants, dormant bulbs, tubers, roots, corms, rhizomes, and pips.

Article 2. General Provisions

53331. The Legislature hereby declares that by making any additions to or amendments of this chapter it intends to formulate a system of grades and standards and minimum requirements for nursery stock to the end that purchasers of nursery stock may have adequate knowledge concerning the name and the grade size of nursery stock with relation to established standards. If, however, any provisions of, or amendment or addition to, this chapter, either as originally enacted or as amended or added to, should be held to be unconstitutional, the unconstitutionality of such provision shall not affect any other provision of this chapter.

53332. The Legislature hereby declares that it would have enacted each section, subdivision, sentence, clause, or phrase of this chapter irrespective of the fact that one or more other sections, subdivisions, sentences, clauses, or phrases be declared unconstitutional.

Article 3. Enforcement

53361. The director and the commissioners of each county of the state, their deputies and inspectors, under the supervision and control of the director, shall enforce this chapter.

53362. For the purpose of carrying out the provisions of this chapter, all enforcing officers may enter upon any public or private premises in order to have access to nursery stock subject to this chapter and the regulations which are adopted pursuant to it.

53363. If the director or the commissioner shall find that any person has violated any provision of this chapter, he may institute proceedings in a court of competent jurisdiction in the area in which the violation occurred, to have such person convicted of the violation, or he may file with the district attorney such evidence that may be deemed necessary.

Article 4. Regulations

53391. The director may adopt regulations which may be necessary to carry into effect the purposes of this chapter and each section of it, and may issue in relation to this chapter explanatory data and charts.

53392. The director by regulations may provide for grade sizes of the different kinds of nursery stock, and may provide that nursery stock shall be labeled with grade sizes which are established by such regulations The director may make such other regulations as are necessary to carry out the provisions of this chapter.

Article 5. Warning Tags or Notices

53421. The director or the commissioner may issue and enforce a written or printed warning tag or notice to the owner

or custodian of any lot of nursery stock which he finds is in violation of any provision of this chapter, which shall prohibit movement of such nursery stock until such officer has evidence that the law has been complied with. Upon compliance such order shall be removed.

53422. It is unlawful for any person to move or otherwise dispose of any lot of nursery stock which is held under a warning tag or notice except with the permission of the director or the commissioner and for the purpose specified.

53423. The owner or custodian of nursery stock which is held under a warning tag or notice shall, upon demand, have the right of a hearing before the director or the commissioner as to the justification of any such order, and may appeal to the director from any order of the commissioner which is made pursuant to this article.

53424. This article shall not be construed as limiting the right of the enforcement officer to proceed as authorized by other provisions of this chapter.

53425. Any decision of the director pursuant to this article is subject to review by any court of competent jurisdiction.

Article 6. Standards

53451. Nursery stock which is sold shall comply with all of the following requirements:

(a) It shall be living stock and shall not be dead, or in a dying condition.

(b) It shall not be seriously broken, frozen, or damaged.

(c) It shall not be abnormally potbound.

53452. Deciduous fruit and nut trees which are sold shall be free from any of the following defects:

(a) Twisted, crossed, frosted, broken, or other defective roots.

(b) Broken grafts.

(c) Other deformations and defects which would interfere with the normal and proper development of such trees after planting.

Article 7. Labeling

53481. When nursery stock is sold, it shall be labeled plainly and legibly as to the correct name, and also as to the grade size if so required by regulations.

53482. Nursery stock on display for sale may be labeled by a sign on any block of stock of the same kind and species.

53483. Ornamentals, except roses and annual or herbaceous perennial ornamental plants, shall be labeled with the botanical name.

Roses, annual or herbaceous perennial ornamental plants, and other kinds of nursery stock shall be labeled with the recognized common name and variety, except that the variety name is not required for dormant bulbs, tubers, roots, corms, rhizomes, and pips.

Article 8. Violations

53511. It is unlawful for any person to sell, ship, deliver, or transport to any purchaser any nursery stock which is within any of the following:

(a) Is not labeled in accordance with the provisions of this chapter or the regulations of the director.

(b) Has false or misleading labeling, or pertaining to which there has been a false or misleading advertisement.

(c) Is represented to be certified or registered nursery stock unless it has been produced and labeled in accordance with the procedures and in compliance with the rules and regulations of an official agency.

This section does not apply to any common carrier in respect to any nursery stock which is transported or delivered for transportation in the ordinary course of its business as a carrier.

53512. It is unlawful for any person to do any of the following:

(a) Detach, alter, deface, or destroy any label, warning tag, or notice which is provided for in this chapter or in the regulations which are adopted pursuant to it, or alter or substitute nursery stock, in a manner that may defeat the purpose of this chapter.

(b) Disseminate any false or misleading advertisement concerning nursery stock in any manner or by any means.

(c) Hinder or obstruct in any way any authorized person in the performance of his duties under this chapter.

(d) Fail to comply with a warning tag or notice.

Article 9. Penalties

53541. The violation of any provision of this chapter is a misdemeanor and punishable by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500), or by imprisonment in the county jail for not more than six months, or by both fine and imprisonment.

Article 10. Abatement

53561. Any lot of nursery stock which does not comply with the provisions of this chapter is a public nuisance and shall be subject to seizure on complaint of the director or the commissioner to a court of competent jurisdiction in the area in which the nursery stock is located.

53562. The district attorney of the county in which any such nuisance is found, on the relation of the director or the commissioner, shall maintain, in the name of the people of the State of California, a civil action to abate and prevent such nuisance. Upon judgment and by order of the court, such nuisance shall be condemned and destroyed in the manner directed by the court, or relabeled, or reconditioned, or released

upon such conditions as the court in its discretion may impose to insure the nuisance will be abated.

53563. If the owner fails to comply with the order of the court within the time specified in the order, the court may order that such nursery stock be forthwith destroyed or the nuisance otherwise abated as set forth in such order.

53564. In actions arising pursuant to this article, the following courts shall have original jurisdiction.

(a) Municipal courts shall have original jurisdiction where the value of the property is three thousand dollars ($3,000) or less.

(b) Justice court shall have original jurisdiction where the value of the property is five hundred dollars ($500) or less.

DIVISION 20. PROCESSORS, STORERS, DEALERS, AND DISTRIBUTORS OF AGRICULTURAL PRODUCTS

CHAPTER 1. NONPROFIT COOPERATIVE ASSOCIATIONS

Article 1. Definitions

54001. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

54002. "Association" means any corporation which is organized pursuant to this chapter. An association shall be deemed incorporated pursuant to this chapter, or organized pursuant to this chapter and shall be deemed a producer of a product within the meaning of this chapter, if it is functioning under, or is subject to, the provisions of this chapter, irrespective of whether it was originally incorporated pursuant to such provisions or was incorporated under other provisions.

54003. "Member" includes members of associations without capital stock and holders of common stock in associations which are organized with shares of stock.

54004. "Product" includes any horticultural, viticultural, forestry, dairy, livestock, poultry, bee, or farm product.

Article 2. General Provisions

54031. The purpose of this chapter is to do all of the following:

(a) Promote, foster, and encourage the intelligent and orderly marketing of agricultural products through cooperation.

(b) Eliminate speculation and waste.

(c) Make the distribution of agricultural products between producer and consumer as direct as can be efficiently done.

(d) Stabilize the marketing of agricultural products.

54032. The following are all here recognized:

(a) Agriculture is characterized by individual production in contrast to the group or factory system that characterizes other forms of individual production.

(b) The ordinary form of corporate organization permits industrial groups to combine for the purpose of group production and the ensuing group marketing, and the public has an interest in permitting farmers to bring their industry to the high degree of efficiency and merchandising skill evidenced in the manufacturing industries.

(c) The public interest urgently needs to prevent the migration from the farm to the city in order to keep up farm production and to preserve the agricultural supply of the nation.

(d) The public interest demands that the farmer be encouraged to attain a superior and more direct system of marketing in the substitution of merchandising for the blind, unscientific, and speculative selling of crops.

54033. Associations which are organized pursuant to this chapter are "nonprofit," since they are not organized to make profit for themselves, as such, or for their members, as such, but only for their members as producers.

54034. Any provisions of law which are in conflict with this chapter do not apply to any association which is provided for in this chapter.

54035. Any exemption under any existing law which applies to any agricultural product in the possession, or under the control, of the individual producer, shall apply similarly and completely to such product which is delivered by its farmer members that are in the possession, or under the control, of the association.

54036. A person, firm, corporation, or association, that is hereafter organized or doing business in this state, may not use the word "cooperative" as part of its corporate name or other business name or title for producers' cooperative marketing activities, unless it has complied with this chapter.

54037. Any corporation or association which is organized pursuant to previously existing statutes for the purpose of cooperatively marketing products as defined in this chapter or under Title 23 (commencing with Section 653aa), Part 4, Division 1 of the Civil Code shall be deemed to be organized and existing pursuant to, and by virtue of, this chapter, and all of the provisions of this chapter, and any of the restrictions and benefits of such provisions, shall apply to such corporation.

54038. Any association which is organized pursuant to this chapter is not any of the following:

(a) A conspiracy, a combination in restraint of trade, or an illegal monopoly.

(b) An attempt to lessen competition, to fix prices arbitrarily, or to create a combination or pool in violation of any law of this state.

54039. The marketing contracts and agreements between an association which is organized pursuant to this chapter and its members and any agreements authorized in this chapter are not illegal, in restraint of trade, or contrary to any statute which is enacted against pooling or combinations.

54040. The general corporation laws of this state and all powers and rights under such laws, apply to each association which is organized pursuant to this chapter, except where such provisions are in conflict with or inconsistent with the express provisions of this chapter.

Article 3. Purposes

54061. Three or more natural persons, a majority of whom are residents of this state, who are engaged in the production of any product, may form an association pursuant to this chapter for the purpose of engaging in any activity in connection with any of the following:

(a) The production, marketing, or selling of the products of its members.

(b) The harvesting, preserving, drying, processing, canning, packing, grading, storing, handling, shipping, or utilization of any product of its members, or the manufacturing or making of the byproducts of any product of its members.

(c) The manufacturing, selling, or supplying to its members of machinery, equipment or supplies.

(d) The financing of the activities which are specified by this section.

(e) Any one or more of the activities which are specified in this section.

Article 4. Articles of Incorporation

54081. The articles of incorporation of the association shall show that the signers of the articles of incorporation are engaged in the production of products, and that they propose to incorporate an association pursuant to this chapter, and shall state all of the following:

(a) The name of the association.

(b) The purposes for which it is formed.

(c) The county where the principal office for the transaction of business of the association is to be located.

(d) The number of directors of the association, which shall not be less than three, and the names and addresses of the persons who are to serve as first directors. If it is desired that the first directors shall serve for terms of different length, the term for which each person so named shall serve shall also be stated.

(e) If organized without shares of stock, whether the voting power and the property rights and interest of each member are equal or unequal. If voting power and property rights and interest of each member are unequal, the general rule or rules which are applicable to all members by which the voting power and the property rights and interests, respectively, of each member may be and are determined and fixed shall also be stated.

(f) If organized with shares of stock, the number of shares which may be issued and if the shares are to have a par value, the par value of each share, and the aggregate par value of all shares. If the shares are to be without par value it shall be so stated.

If the shares of stock are to be classified, a description of the classes of shares and a statement of the number of shares of each kind or class and the nature and extent of the preferences, rights, privileges, and restrictions which are granted to or imposed upon the holders of the respective classes of stock.

Except as to the matters and things so stated, no distinction shall exist between the classes of stock or the holders of them. One class of stock shall always be known as common stock and voting power may be restricted to holders of common stock.

54082. Articles of incorporation shall be signed, acknowledged, and filed in the manner which is prescribed by the general laws of this state for domestic corporations.

54083. The articles of incorporation of any association may be amended in the manner and for the purposes which are authorized by the General Corporation Law, Division 1 (commencing with Section 100), Title 1 of the Corporations Code.

Article 5. Bylaws

54111. Each association shall, within 30 days after its incorporation, adopt for its government and management, a code of bylaws, not inconsistent with this chapter. The vote or written assent of shareholders or members that hold at least a majority of the voting power is necessary to adopt such bylaws and is effectual to repeal or amend any bylaws, or to adopt additional bylaws.

The power to repeal and amend the bylaws, and adopt new bylaws, may, by a similar vote, or similar written assent, be delegated to the board of directors, which authority may, by a similar vote, or similar written assent, be revoked.

54112. The bylaws may prescribe the time, place, and manner of calling and conducting its meetings. Meetings of members or stockholders shall be held at the place as provided in the bylaws; and if no provision be made, then in the city where the principal place of business is located at a place designated by the board of directors Meetings of the board of directors may be held at any place within or without the state which is fixed by a quorum of the board of directors unless otherwise provided in the articles of incorporation or bylaws.

54113. The bylaws may prescribe the number of stockholders or members which constitutes a quorum.

54114. The bylaws may prescribe the right of members or stockholders to vote by proxy or by mail or both, and the conditions, manner, form, and effects of such votes; the right of

members or stockholders to cumulate their votes and the prohibition, if desired, of cumulative voting.

54115. The bylaws may prescribe the number of directors which constitutes a quorum.

54116. The bylaws may prescribe the number of directors and the qualifications, compensation, duties, and term of office of directors and officers and the time of their election. Subject to the provisions of the General Corporation Law, Division 1 (commencing with Section 100), Title 1 of the Corporations Code, the number of directors may be changed by a bylaw which is duly adopted by the shareholders or members

54117. The bylaws may prescribe penalties for violations of the bylaws.

54118. The bylaws may prescribe the amount of entrance, organization, and membership fees, if any; the manner and method of collection of such fees; and the purposes for which they may be used.

54119. The bylaws may prescribe the amount which each member or stockholder shall be required to pay annually, or from time to time, if at all, to carry on the business of the association; the charge, if any, to be paid by each member or stockholder for services which are rendered by the association to him and the time of payment and the manner of collection; and the marketing contract between the association and its members or stockholders which every member or stockholder may be required to sign.

54120. The bylaws may prescribe the amount of any dividends which may be declared on the stock or membership capital, which shall not exceed eight percent per annum, shall be in the nature of interest, and shall not affect the nonprofit character of any association which is organized pursuant to this chapter.

54121. The bylaws may prescribe the number and qualification of members or stockholders of the association and the conditions precedent to membership or ownership of common stock; the method, time, and manner of permitting members to withdraw or the holders of common stock to transfer their stock; the manner of assignment and transfer of the interest of members, and of the shares of common stock; the conditions upon which, and time when, membership of any member shall cease; the automatic suspension of the rights of a member when he ceases to be eligible to membership in the association; and the mode, manner, and effect of the expulsion of a member.

54122. The bylaws may prescribe the manner of determining the value of a member's interest and provision for its purchase by the association upon the death or withdrawal of a member or upon the expulsion of a member or forfeiture of his membership, or at the option of the association, the purchase at a price fixed by conclusive appraisal by the board of directors; and the conditions and terms for the repurchase by

the association from its stockholders of their stock upon their disqualification as stockholders. In case of the expulsion of a member, and where the bylaws do not provide any procedure or penalty, the board of directors shall equitably and conclusively appraise his property interest in the association and shall fix the amount of his property interest in money, which shall be paid to him within one year after such expulsion.

Article 6. Directors and Management

54141. The affairs of the association shall be managed by a board of not less than three directors who are elected by the members or stockholders.

54142. The bylaws may provide that the territory in which the association has members shall be divided into districts and that directors shall be elected from the several districts. In any such case, the bylaws shall specify the number of directors to be elected by each district, the manner and method of reapportioning the directors and of redistricting the territory covered by the association.

54143. The bylaws may provide that primary elections shall be held to nominate directors. If the bylaws provide that the territory in which the association has members shall be divided into districts, the bylaws may also provide that the results of the primary elections in the various districts shall be final and shall be ratified at the annual meeting of the association.

54144. The bylaws may provide that the territory in which the association has members shall be divided into districts, and that the directors shall be elected by representatives or advisers, who themselves have been elected by the members or stockholders from the several territorial districts. In any such case, the bylaws shall specify the number of representatives or advisers to be elected by each district, the manner and method of reapportioning the representatives or advisers and of redistricting the territory which is covered by the association.

54145. The bylaws may provide that one or more directors may be chosen by any public official or commission or by the other directors selected by the members. Such director shall represent primarily the interest of the general public in such associations. The directors so chosen shall have the same powers and rights as other directors. Such directors shall not number more than one-fifth of the entire number of directors.

54146. The bylaws may provide for an executive committee and may allot to such committee all the functions and powers of the board of directors, subject to the general direction and control of the board.

54147. An association may provide a fair remuneration for the time which is actually spent by its officers and directors in its service and for the service of the members of its executive committee.

54148. If a vacancy on the board of directors occurs except by expiration of term, the remaining members of the board, by a majority vote, shall fill the vacancy unless the bylaws provide for an election of directors by districts. If the bylaws provide for an election of directors by districts, the vacancy shall be filled by the election of a director from the district in which the vacancy occurs or the board of directors may call a special meeting of the members or stockholders in that district to fill the vacancy.

54149. The directors shall elect from their number a president and one or more vice presidents. If the corporation employs a manager who is not a director, the directors may also elect him vice president. They shall also elect a secretary and a treasurer, who need not be directors or members of the association, or may combine such offices and designate the combined office as secretary-treasurer or unite both functions and titles in one person.

The treasurer may be a bank or any depository and as such, shall not be considered as an officer, but as a function of the board of directors. In such case, the secretary shall perform the usual accounting duties of the treasurer, except that the funds shall be deposited only as and where authorized by the board of directors.

54150. Any member may bring charges against an officer or director by filing them in writing with the secretary of the association, together with a petition which is signed by five percent of the members, which requests the removal of the officer or director in question. The removal shall be voted upon at the next regular or special meeting of the association and, by a vote of a majority of the members, the association may remove the officer or director and fill the vacancy. The director or officer, against whom such charges have been brought, shall be informed in writing of the charges previous to the meeting and shall have an opportunity at the meeting to be heard in person or by counsel and to present witnesses. The person bringing the charges against him shall have the same opportunity.

If the bylaws provide for election of directors by districts with primary elections in each district, the petition for removal of a director shall be signed by 20 percent of the members that reside in the district from which such director was elected. The board of directors shall call a special meeting of the members that reside in that district to consider the removal of the director; and by a vote of the majority of the members of that district, the director in question shall be removed from office.

Article 7. Powers

54171. An association may engage in any activity in connection with the marketing, selling, preserving, harvesting, drying, processing, manufacturing, canning, packing, grading, storing, handling, or utilization of any product which is pro-

duced or delivered to it by its members; or the manufacturing or marketing of the byproducts of any such product; or any activity in connection with the purchase, hiring, or use by its members of supplies, machinery, or equipment, or in the financing of any such activities, or in any one or more of the activities which are specified in this section

54172. An association may borrow without limitation as to amount of corporate indebtedness or liability and may make advances to members.

54173. An association may act as the agent or representative of any member or members in any of the activities which are mentioned in Section 54171 or 54172.

54174. An association may purchase or otherwise acquire, hold, own, and exercise all rights of ownership in, sell, transfer, pledge, or guarantee the payment of dividends or interest on, or the retirement or redemption of, shares of the capital stock or bonds of any corporation or association which is engaged in any related activity or in the warehousing, handling, marketing, packing, manufacturing, processing, or preparing for market of any product which is handled by the association.

54175. An association may establish reserves and invest the funds of the reserves in bonds or in such other property as may be provided in the bylaws.

54176. An association may buy, hold, and exercise all privileges of ownership, over such real or personal property as may be necessary or convenient for the conduct and operation of, or incidental to, any of the business of the association.

54177. An association may levy assessments in the manner and in the amount as may be provided in its bylaws.

54178. An association may do each and every thing which is necessary, suitable, or proper for the accomplishment of any one of the purposes, or the attainment of any one or more of the objects, which are enumerated in this article; or conducive to or expedient for the interest or benefit of the association; and contract accordingly; exercise and possess all powers, rights, and privileges which are necessary or incidental to the purposes for which the association is organized or to the activities in which it is engaged; and, in addition, any other rights, powers, and privileges which are granted by the laws of this state to ordinary corporations, except such as are inconsistent with the express provisions of this chapter; and do any such thing anywhere.

54179. An association may use or employ any of its facilities for any purpose, provided the proceeds which arise from such use and employment shall go to reduce the cost of operation for its members. The products which are handled for, or the services, machinery, equipment, or supplies or facilities which are furnished to, nonmembers shall not, however, exceed in value the products which are handled for, or the services, merchandise, or facilities which are supplied to, members during the same period.

54180. An association may organize, form, operate, own, control, have an interest in, own stock of, or be a member of any other corporation, with or without capital stock, which is engaged in preserving, drying, processing, canning, packing, storing, handling, shipping, utilizing, manufacturing, marketing, or selling of any product which is handled by the association, or the byproducts of any such product.

If such corporations are warehousing corporations, they may issue legal warehouse receipts to the association against the commodities which are delivered by it, or to any other person and such legal warehouse receipts shall be considered as adequate collateral to the extent of the usual and current value of the commodity which they represent. If such warehouse is licensed or licensed and bonded pursuant to the laws of this state or the United States, its warehouse receipt which is delivered to the association on any commodity of the association or its members, or delivered by the association or its members, shall not be challenged or discriminated against because of ownership or control, wholly or in part, by the association.

Any two or more corporations which are organized pursuant to this section may be merged into one such constituent corporation or consolidated into a new corporation, such merger or consolidation to be made in the manner that is prescribed by the general laws of the state which cover domestic corporations.

54181. Any association may, upon resolution adopted by its board of directors, enter into all necessary and proper contracts and agreements and make all necessary and proper stipulations, agreements and contracts and arrangements with any other cooperative or other corporation, or association, which is formed in this or in any other state, for the cooperative and more economical carrying on of its business or any part of its business.

Any two or more associations may, by agreement between them, unite in employing and using, or may separately employ and use, the same personnel, methods, means, and agencies for carrying on and conducting their respective business.

Article 8. Financial Provisions

54201. An association is not subject in any manner to the terms of the Corporate Securities Law, Division 1 (commencing with Section 25000), Title 4 of the Corporations Code, and any association may and shall issue its membership certificates or stock or other securities as provided in this chapter without the necessity of any permit from the commissioner of corporations.

54202. If an association issues nonpar value stock, the issuance of such stock shall be governed by the terms of all general laws which cover the issuance of nonpar value stock in domestic corporations.

54203. If an association with preferred shares of stock purchases the stock or any property, or any interest in any property of any person, it may discharge the obligations which are so incurred, wholly or in part, by exchanging for the acquired interest, shares of its preferred stock to an amount which at par value would equal the fair market value of the stock or interest so purchased, as determined by the board of directors. In that case the transfer to the association of the stock or interest which is purchased is equivalent to payment in cash for the shares of stock which are issued.

54204. The board of directors of every association shall cause to be sent to the members of the association not later than 120 days after the close of the fiscal or calendar year an annual report of the operations of the association, unless such report is expressly dispensed with in the bylaws.

Such annual report shall include a balance sheet as of such closing date. Such financial statement shall be prepared from, and be in accordance with, the books. It shall be prepared in a form which is sanctioned by sound accounting practice for the association or approved by a duly certified public accountant or a public accountant.

Article 9. Members

54231. Under the terms and conditions which are prescribed in the bylaws adopted by it, an association may admit as members or issue common stock to only such persons as are engaged in the production of any product which is to be handled by or through the association, or that use or employ any service or facility offered by the association on, or in connection with, land which is used for the production of any product, including the lessees and tenants of land which is used for the production of such product and any lessors and landlords that receive as rent all or part of the crop which is raised on the leased premises.

54232. If a member of a nonstock association is other than a natural person, such member may be represented by any individual, associate, officer, or manager or member of it, who is duly authorized in writing.

54233. Any association may become a member or stockholder of any other association.

54234. If a member of an association which is established without shares of stock has paid his membership fee in full, he shall receive a certificate of membership.

54235. An association shall not issue a certificate for stock to a member until it has been fully paid for. The promissory notes of the members may be accepted by the association as full or partial payment. The association shall hold the stock as security for the payment of the note, but such retention as security does not affect the member's right to vote.

54236. An association, in its bylaws, may limit the amount of common stock which any member may own.

54237. The bylaws shall prohibit the transfer of the common stock or membership certificates of the associations to any person that is not qualified to be a shareholder or member as specified in this chapter. Such restrictions shall be printed upon every certificate of stock or membership which is subject to them.

54238. The association may, at any time, as specified in the bylaws, except when the debts of the association exceed 50 percent of its assets, buy in or purchase its common stock at the book value of the common stock, as conclusively determined by the board of directors, and pay for it in cash within one year thereafter.

54239. A member or stockholder is not liable for the debts of the association to an amount which exceeds the sum which remains unpaid on his membership fee or his subscription to the capital stock, including any unpaid balance on any promissory note which is given in payment of the membership fee or the subscription to the capital stock.

Article 10. Marketing Contracts

54261. The association and its members may make and execute marketing contracts which require the members to sell, for any period of time, but not over 15 years, all or any specified part of any product or specified commodity exclusively to or through the association, or any facilities which are created by the association. If they contract a sale to the association, title to the product passes absolutely and unreservedly, except for recorded liens, to the association upon delivery or at any other specified time which is expressly and definitely agreed in the contract.

54262. The contract may provide that the association may sell or resell any product which is delivered by its members, with or without taking title to such product, and pay over to its members, the resale price, after deducting all of the following:

(a) Necessary selling, overhead, and other costs and expenses, including interest on preferred stock, not exceeding 8 percent per annum, and reserves for retiring the stock, if any.

(b) Other proper reserves.

(c) Interest not exceeding 8 percent per annum upon common stock.

54263. Notwithstanding any provisions of the Civil Code, a contract which is entered into by a member or stockholder of an association which provides for the delivery to such association of any product which is produced or acquired by the member or stockholder, may be specifically enforced by the association to secure the delivery to it of such product.

54264. The bylaws or the marketing contract may fix, as liquidated damages, specific sums to be paid by the member or stockholder to the association upon the breach by him of any provision of the marketing contract regarding the sale or delivery or withholding of any product and may provide that the member will pay all costs, premiums for bonds, expenses, and fees, if any action is brought upon the contract by the association. Such provisions are valid and enforceable in the courts of this state. The clauses which provide for liquidated damages are enforceable as such and shall not be regarded as penalties.

54265. If there is a breach or threatened breach of such marketing contract by a member, the association shall be entitled to an injunction to prevent the further breach of the contract and to a decree of specific performance of the contract. Pending the adjudication of such an action and upon filing a verified complaint which shows the breach or threatened breach, and upon filing a sufficient bond, the association shall be entitled to a temporary restraining order and preliminary injunction against the member.

54266. In any action upon such marketing agreements, it shall be conclusively presumed that a landowner or landlord or lessor is able to control the delivery of any product which is produced on his land by tenants or others, whose tenancy or possession or work on such land, or the terms of whose tenancy or possession or labor on such land, were created or changed after execution by the landowner, landlord, or lessor of such a marketing agreement. In such actions, the remedies for nondelivery or breach which are provided by this article shall lie and be enforceable against such landowner, landlord, or lessor.

Article 11. Reorganization of Corporations Organized Pursuant to Other Laws

54291. Any corporation which is organized or existing pursuant to any law, except Title 23 (commencing with Section 653aa), Part 4, Division 1 of the Civil Code, may be brought under the provisions of this chapter by amending its articles of incorporation, in the manner which is prescribed by the general corporation laws, to conform to this chapter. If any corporation amends its articles of incorporation to conform to this chapter, it shall be deemed to be organized and existing pursuant to, and entitled to the benefit of, and subject to this chapter for all purposes and as fully as though it had been originally organized pursuant to this chapter.

54292. Articles of incorporation shall be deemed to conform to this chapter within the meaning of Section 54291 in both of the following cases:

(a) It is provided or declared in the articles of incorporation, in substance, regardless of form, that the corporation is organized and exists as a nonprofit cooperative corporation for the purposes which are provided for in, or permitted by, this chapter, or one or more of such purposes.

(b) It clearly appears from the articles of incorporation that the corporation desires to be subject to, and to be organized, exist, and function pursuant to this chapter.

54293. If the amended articles conform, as provided in Section 54292, provisions in the articles of incorporation that appeared in the original articles or some previous amended articles, are ineffective if, and to the extent that, they are inapplicable to, or inconsistent with, this chapter.

54294. This article applies retrospectively as well as prospectively, and may be availed of by a corporation regardless of the time of incorporation, whether prior or subsequent to the adoption of this article, and shall apply to amendments to articles of incorporation whether made prior or subsequent to the adoption of this article, and all amendments made prior to the adoption of this article shall be effective and valid to the same extent as though made subsequent to the adoption of this article.

CHAPTER 2. COOPERATIVE BARGAINING ASSOCIATIONS

Article 1. Definitions and General Provisions

54401. As used in this chapter, "cooperative bargaining association" means a farmer association which is organized and functioning pursuant to Chapter 1 (commencing with Section 54001) of this division, for the purpose of group bargaining between its producer members and the first handler or processor, with respect to the sale of any agricultural commodity except milk, cotton, or cottonseed.

54402. It is the public policy of the State of California to establish and support the right of any farmer to join voluntarily and belong to cooperative bargaining associations.

54403. The director may exercise any or all of the powers which are conferred by Article 2 (commencing with Section 11180), Chapter 2, Part 1, Division 3, Title 2 of the Government Code upon the head of a department of the state with respect to hearings and investigations pursuant to this chapter.

54404. For the purpose of enforcing this chapter, the director may receive complaints from producers against any processor, handler, distributor, or any agent of such persons, or any other person, with respect to violations of the unfair trade practices which are specified in Section 54431.

Upon verification of the complaint, the director shall, or upon his own motion may, make any and all necessary investigations, examinations or inspections of any transaction

which involves a suspected violation of any provision of this chapter.

54405. The director may bring an action to enjoin the violation or threatened violation of any provision of this chapter in the superior court of the county in which such violation occurred or is about to occur. Actions against different defendants may be consolidated, in the discretion of the court, if the alleged violations are of the same provision, have occurred in the same or an adjoining county, relate to the same agricultural commodity, occurred in the same production season, and such consolidation can be done without prejudice to a substantial right of any defendant. Any proceedings which are brought pursuant to this section shall be governed in all other respects by Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure.

Article 2. Unfair Trade Practices

54431. It is an unfair trade practice, and unlawful, for any processor, handler, distributor, or agent of any such person, or for any other person to do any of the following:

(a) Interfere with, restrain, coerce, or boycott producers in the exercise of the rights which are guaranteed pursuant to Section 54402.

(b) Discriminate against any producer with respect to price or other terms of purchase of any raw agricultural commodity, by reason of the producer's membership in, or contract with, any cooperative bargaining association.

(c) Pay or loan money, or give any other thing of value, to a producer as an inducement or reward for refusing to, or ceasing to, belong to a cooperative bargaining association.

(d) Maliciously or knowingly give false reports about the finances, management, or activities of a cooperative bargaining association.

Article 3. Penalties

54461. The willful violation of any provision of this chapter is a misdemeanor punishable by a fine of not less than fifty dollars ($50) nor more than five hundred dollars ($500) for each and every such violation.

54462. In addition to the penalty which is provided by Section 54461, any person that violates any provision of this chapter is liable civilly for a penalty in an amount not to exceed a sum of five hundred dollars ($500) for each and every violation.

CHAPTER 3. AGRICULTURAL WAREHOUSES GENERALLY

Article 1. Definitions

54601. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

54602. "Fungible product" means grain, rice, beans, or any other product which is handled in bulk. It does not, however, include any such product which is handled in sacks.

54603. "Product" means cotton, wool, hay, fertilizer, grain products, grains, tobacco, rice, beans, and flaxseed, or any by-product of such products, and any other agricultural product which is customarily handled in warehouses.

54604. "Receipt" means a warehouse receipt.

54605. "Warehouse" means every elevator, building, structure, or other protected enclosure within the state, in which any agricultural product is or may be stored.

54606. "Warehouseman" means a person that is lawfully engaged in the business of storing products.

Article 2. General Provisions

54631. The director may investigate the storage, warehousing, classifying according to grade and otherwise, weighing, and certification of any product.

54632. The director may, upon application to him by any person that applies for a license to conduct a warehouse pursuant to this chapter, inspect such warehouse or cause it to be inspected.

54633. The director may at any time, with or without application to him, inspect or cause to be inspected any warehouse which is licensed pursuant to this chapter.

54634. The director may determine whether any warehouse for which a license is applied for, or has been issued, pursuant to this chapter is suitable for the proper storage of any product.

54635. The director may, by regulation, classify warehouses which are licensed or applying for a license in accordance with their ownership, location, surroundings, capacity, conditions, and other qualities, and as to the kinds of licenses which are issued, or that may be issued, for them pursuant to this chapter.

54636. The director may, by regulation, prescribe, within the limitations of this chapter, the duties of the warehousemen that conduct warehouses which are licensed pursuant to this chapter with respect to their care of, and responsibility for, any product which is stored in such warehouses.

54637. The director, from time to time, may publish the results of any investigations which are made pursuant to Sections 54631 to 54635, inclusive, and he shall distribute to interested parties a list of the names and addresses of persons and warehouses which are licensed pursuant to this chapter and lists of all licenses which have been terminated pursuant to this chapter and the causes for the termination of the licenses

54638. The director may examine any product which is stored in any warehouse. If, after an opportunity for hearing is given to the warehouseman, it is determined that he is

not performing fully the duties which are imposed on the warehouseman by this chapter and regulations which are adopted pursuant to it, the director may publish his findings.

54639. The director shall adopt such regulations as he may deem necessary for the efficient execution of this chapter.

54640. The director, by regulation, may adopt standards for any product by which its quality or value may be judged or determined. Federal standards for grain which are established under authority of the United States Grain Standards Act (7 U.S.C., Sec. 71, et seq.) shall be followed as closely as possible by the director.

54641. The director may examine all books, records, papers, and accounts of any licensed warehouse and of the warehouseman that conducts such warehouse which relate to the warehouse.

54642. Each license which is issued pursuant to this chapter shall terminate as provided in such license or in accordance with the terms of this chapter and the regulations which are adopted pursuant to it, and may from time to time be modified or extended by a written instrument.

Article 3. Warehouseman's License

54661. The director may, upon application to him, issue to any warehouseman a license to conduct a warehouse in accordance with this chapter and such regulations as may be adopted pursuant to this chapter.

Each such warehouse shall be suitable for the proper storage of the particular product for which a license is applied for, and each warehouseman shall agree, as a condition to the granting of the license, to comply with and abide by this chapter and the regulations which are adopted pursuant to it.

54662. Each warehouseman that applies for a license to conduct a warehouse in accordance with this chapter shall also, as a condition to the granting of the license, execute and file with the director a bond to the state to secure the faithful performance of his obligations as a warehouseman under the laws of the state and the regulations which are adopted pursuant to this chapter, and of such additional obligations as a warehouseman as may be assumed by him under contracts with the respective depositors of products in such warehouse. The bond shall be in such form and amount, and shall contain such terms and conditions as the director may prescribe.

54663. If the director determines that a bond which has been approved by him is, or for any cause has become, insufficient, he may require an additional bond to be given by the warehouseman that is concerned, which conforms with the requirements of Section 54662. Unless the additional bond is given within the time which is fixed by a written demand

for it, the license of such warehouseman may be suspended or revoked.

54664. Any person that is injured by the breach of any obligation secured by a bond which has been given pursuant to this chapter, may sue on the bond in his own name in any court of competent jurisdiction to recover the damages he may have sustained by such breach.

54665. Upon the filing with, and approval by, the director of a bond for the conduct of a warehouse, such warehouse shall be designated as "California bonded" pursuant to this chapter. A warehouse shall not be designated as bonded pursuant to this chapter, and no name or description which conveys the impression that it is so bonded, shall be used unless both:

(a) A bond such as is provided for in this chapter has been filed with and approved by the director.

(b) The license which is issued pursuant to this chapter for the conduct of such warehouse remains unsuspended and unrevoked.

Article 4. Publicly Owned Warehouse, Warehouseman's License

54691. The director may issue a license to any person to accept the custody of any product and to store it in a warehouse which is owned, operated, or leased by the state or any municipality, upon condition that such person agree to comply with and abide by this chapter and the regulations which are adopted pursuant to it.

54692. Each person that is licensed pursuant to this article shall issue receipts for the products which are placed in his custody, and shall give bond, in accordance with this chapter, and the regulations which affect warehousemen that are licensed pursuant to this chapter, and shall otherwise be subject to this chapter and such regulations to the same extent as is provided for warehousemen that are licensed pursuant to this chapter.

Article 5. License to Classify Products

54721. The director may, upon presentation of satisfactory proof of competency, issue to any person a license to classify any product which is stored or to be stored in a warehouse which is licensed pursuant to this chapter, according to grade or otherwise and to certificate the grade or other class of the product, or to weigh it and certificate the weight of the product, or both to classify and weigh it and to certificate the grade or other class and the weight of the product, upon condition that such person agrees to comply with and abide by this chapter and the regulations adopted pursuant to it.

Article 6. Warehouse Receipts

54741. Every receipt that is issued for any product which is stored in a warehouse shall embody within its written or printed terms all of the things which are required by this article.

54742. The receipt shall state the location of the warehouse in which the product is stored.

54743. The receipt shall state the date of issue of the receipt.

54744. The receipt shall state the consecutive number of the receipt.

54745. The receipt shall contain a statement whether the product which is received will be delivered to the bearer, to a specified person, or to a specified person or his order.

54746. The receipt shall state the rate of storage charges.

54747. The receipt shall contain a description of the product which is received, that shows the quantity, or, in case of any product which is customarily put up in bales or packages, the marks, numbers, or other means of identification and the weight of such bales or packages.

54748. The receipt shall state the grade or other class of the product which is received and the standard or description in accordance with which such classification has been made. Such grade or other class shall be stated according to the standard of the state which is applicable to such product as such standard may be fixed and promulgated under authority of law.

Until official standards of the state for any product have been fixed and promulgated, the grade or other class of the product may be stated in accordance with any recognized standard or in accordance with such regulations which are not inconsistent with this subdivision as may be prescribed by the director.

Unless otherwise required by law, if a statement of the grade is not requested by the depositor of other than a fungible product, a receipt which does not comply with this subdivision may be issued, without reference on the receipt as to why the grade of the product has been omitted from the receipt.

54749. The receipt shall contain a statement that the receipt is issued subject to this chapter and the regulations which are adopted pursuant to it.

The receipt shall state the fact of ownership of the product by the warehouseman, solely, jointly, or in common with others, if such is the fact.

54750. The receipt shall contain a statement of the amount of advances which are made and of liabilities which are incurred for which the warehouseman claims a lien. If the precise amount of such advances which are made or of such liabilities which are incurred is at the time of the issue of the receipt unknown to the warehouseman or his agent who issues it, a statement of the fact that advances have been made or liabilities incurred and the purpose of such advances or liabilities is sufficient.

54751. The receipt shall contain such other terms and conditions within the limitations of this chapter as may be required by the director.

54752. The receipt shall contain the signature of the warehouseman, or his authorized agent.

Article 7. Duties of Warehouseman

54771. Every warehouseman that conducts a licensed warehouse shall receive for storage in such warehouse, so far as its capacity permits, any product of the kind which is customarily stored in the warehouse by him which is tendered to him in a suitable condition for warehousing in the usual manner in the ordinary and usual course of business, without making any discrimination between persons that desire to avail themselves of warehouse facilities.

54772. Any person that deposits any product for storage in a licensed warehouse deposits it subject to this chapter and the regulations which are adopted pursuant to it.

54773. Every fungible product which is stored in intrastate commerce in a warehouse which is licensed pursuant to this chapter shall, unless the identity of such product is preserved, be inspected and graded by a person duly licensed to grade it.

54774. Except as otherwise provided in Section 54775, every warehouseman that conducts a licensed warehouse shall keep any product which is in the warehouse of one depositor so far separate from any product of any other depositor, and from any other product of the same depositor for which a separate receipt has been issued, as to permit at all times the identification and redelivery of each product which is deposited.

54775. If authorized by agreement or by custom, a warehouseman may mingle any fungible product with any other product of the same kind and grade. He is severally liable to each depositor for the care and redelivery of his share of such mass to the same extent and under the same circumstances as if the products had been kept separate. He shall not mix fungible products of different grades, except upon written order of the owner or his agent and the surrender of the warehouse receipts.

54776 An original receipt shall be issued by the warehouseman that conducts the warehouse for every product which is stored in a licensed warehouse for intrastate, interstate, or foreign commerce. A receipt shall not, however, be issued for any product which is not actually stored in the warehouse at the time of the issuance of the receipt.

54777. While an original receipt is outstanding and uncanceled by the warehouseman that issued it, no other or further receipt shall be issued for the product which is covered by such receipt or for any part of such product. If, however,

a receipt is lost or destroyed, a new receipt, upon the same terms and subject to the same conditions and bearing on its face the number and date of the receipt in lieu of which it is issued, may be issued upon compliance with the statutes of the state.

54778. A warehouseman that conducts a warehouse shall, without unnecessary delay, in the absence of some lawful excuse, deliver any product which is stored in the warehouse upon a demand which is made either by the holder of a receipt for such product or by the depositor of it if such demand is accompanied by offers to do all of the following:

(a) Satisfy the warehouseman's lien.

(b) Surrender the receipt, if negotiable, with indorsements which are necessary for the negotiation of the receipt.

(c) Sign, when the product is delivered, an acknowledgment that it has been delivered.

54779. Each receipt which is returned to a warehouseman shall be plainly canceled on its face by him upon the delivery by him of the product for which the receipt was issued.

54780. Every warehouseman that conducts a warehouse shall safely keep complete and correct records of every product which is stored in the warehouse and withdrawn from the warehouse, every warehouse receipt which is issued by him, and each receipt which is returned to, and canceled by, him.

He shall report to the director concerning such warehouse and the condition, contents, operation, and business of the warehouse in such form and at such times as the director may require.

Article 8. Suspension and Revocation of Licenses

54801. The director may suspend or revoke any license which is issued pursuant to this chapter, for any violation of, or failure to comply with any provision of, this chapter, or the regulations which are adopted pursuant to it, or upon the ground that unreasonable or exorbitant charges have been made for services rendered. Pending investigation, the director, if he deems it necessary, may suspend a license temporarily without hearing. Except as provided in this section, the proceedings pursuant to this section shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted in such chapter.

54802. Any license which is issued to any person to classify or to weigh any product pursuant to this chapter may be suspended or revoked by the director if he is satisfied, after opportunity afforded to the licensee concerned for a hearing, that such licensee has failed to classify or to weigh any agricultural product correctly.

The proceedings shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. The director shall have all the powers which are granted in such chapter.

Article 9. Fees

54831. The director shall collect a reasonable fee for every examination or inspection of a warehouse if such examination or inspection is made upon the application of a warehouseman and an annual fee based upon the capacity of the warehouse and the character of the commodity or commodities stored in it for each license or renewal of a license which is issued to a warehouseman.

54832. The fee shall be based upon the following schedule:

(a) Grain and hay warehouses, one cent ($0.01) per ton, with a minimum of twenty-five dollars ($25) and a maximum of one hundred dollars ($100).

(b) Cannery warehouses, fifty cents ($0.50) per 1,000 cases, with a minimum of fifty dollars ($50) and a maximum of two hundred dollars ($200).

(c) Dried fruit warehouses, two cents ($0.02) per ton, with a minimum of fifty dollars ($50) and a maximum of two hundred dollars ($200).

(d) Miscellaneous agricultural warehouses other than those listed, twenty-five dollars ($25).

54833. All such fees shall be reported monthly by the director to the State Controller and such fees shall be deposited monthly in the State Treasury to the credit of the Department of Agriculture Fund.

Article 10. Violations

54861. Every person that does any of the following is guilty of a felony:

(a) Forges, alters, counterfeits, simulates, falsely represents, or, without proper authority, uses any license which is issued by the director pursuant to this chapter.

(b) Violates any provision of Section 54665.

(c) Issues or utters a false or fraudulent receipt or certificate.

Chapter 4. Grain Warehouses

Article 1. Definitions

55001. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

55002. "Grain" means any cereal grain which is customarily handled in warehouses, either in bulk or sacks.

55003. "Receipt" means a warehouse receipt.

55004. "Warehouse" means every elevator, building, structure, or other protected enclosure within the state, in which any grain is, or is to be, regularly stored for the public.

55005. "Warehouseman" means a person that is lawfully engaged in the business of storing grain for compensation.

Article 2. General Provisions

55031. The director, and the commissioner of each county of the state, his deputies and inspectors, under the supervision and control of the director, shall enforce this chapter.

55032. For the purpose of controlling insect pests of grain in public warehouses, the director may do all of the following:

(a) Investigate and regulate the storage and warehousing of grain.

(b) At any time, with or without application to him, and in order to determine its condition, examine or cause to be examined any warehouse or any grain which is stored in any warehouse.

(c) If the extent of the infestation is such as to be a menace to other grain, order the treatment of an infested warehouse or the disposal of infested grain which is in such warehouse.

(d) By regulation, prescribe, within the limitations of this chapter, the duties of warehousemen with respect to the care of grain which is stored in their warehouses.

(e) Enforce such regulations pursuant to this chapter as are necessary.

55033. At least once each year, the director shall make or cause to be made an inspection of each warehouse which is registered pursuant to this chapter for the purpose of determining the extent, if any, of insect infestations which exist in each warehouse or in any of the grain which is stored in it. A written record of the results of all such inspections shall be kept in the department and shall be available to all interested parties upon application

55034. The director, at least once each month, shall report to the State Controller the total amount of moneys which are collected pursuant to this chapter for fees, penalties, judgments, or otherwise, and at the same time shall pay into the State Treasury the entire amount of such moneys, which shall be credited to the Department of Agriculture Fund and expended in carrying out this chapter.

55035. If any clause, sentence, paragraph, or part of this chapter shall for any reason, be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

Article 3. Registration of Warehouses

55061. It is unlawful for any person to operate, conduct, or maintain a public warehouse for grain storage unless such warehouse is registered with the director.

55062. Except as otherwise provided in Section 55063, each warehouseman shall pay a registration fee of ten dollars ($10) for each warehouse for each fiscal year or portion of a fiscal year beginning July 1st, but in no case shall the total of registration fees for one warehouseman exceed one hundred fifty dollars ($150) in any one fiscal year.

55063. If a warehouse is licensed and bonded pursuant to Chapter 3 (commencing with Section 54601) of this division, the registration fee for such warehouse is waived.

55064. Each licensee and warehouseman that registers one or more warehouses shall file with the director the address to which notices under this chapter shall be mailed. Notices which are mailed to such address shall be conclusively presumed to have been received.

Article 4. Duties of Warehouseman

55091. Every warehouseman that registers a warehouse pursuant to this chapter and with whom grain has been stored shall make monthly inspections of the grain which is stored in such warehouse. Upon any finding of insect infestation in any such lot of grain, he shall give a written notice to the person on whose account the goods are held, and to any other person that is known by the warehouseman to claim an interest in the goods. Such notice shall be given by delivery in person or by registered letter addressed to the last known place of business or abode of the person to be notified.

Article 5. Abatement

55111. Every lot of grain that is stored in any warehouse, and every warehouse, which is infested with any insect pest of stored grain to such a degree as to constitute a menace to any uninfested grain that is, or may be, stored with it or in such warehouse is hereby declared to be a public nuisance. The director may cause the abatement of every such nuisance which is found upon inspection which is made or caused to be made by him. Upon the finding of such infestation in any warehouse, the director, in writing, shall notify the warehouseman that the warehouse or the contents of the warehouse is a public nuisance in accordance with this section. Such notification may be made by mail to his filed address and shall require him to abate or cause to be abated such nuisance within the time which is specified in the notice.

55112. The director, in notifying any warehouseman that any lot of grain which is stored in his warehouse consti-

tutes a public nuisance, shall supply such warehouseman with an additional copy of the notice. Within three days after receipt of the additional copy, the warehouseman shall deliver in the manner and to each person that is specified in Section 55091 such copy accompanied by a statement which requires such owner to abate such nuisance either by removal of the grain or by authorizing its treatment by the warehouseman whereby the nuisance shall be abated within the time which is specified by the director in the notice. If, however, a warehouseman fails to give the notice which is required by Section 55091, such warehouseman is liable for the cost of such treatment as the director may require if such infestation was previously known to the warehouseman or by due diligence would have been known to him.

55113. If any warehouseman fails before the end of the time which is specified in the notice from the director to abate or cause to be abated the nuisance which is specified in the notice, the director shall notify the district attorney of the county in which the nuisance exists. Upon receipt of such notice, such district attorney shall forthwith bring an action in the name of the people of the State of California against the warehouseman and the owner of the infested grain to abate the nuisance.

55114. Any warehouseman that, after receipt of notice to abate such nuisance, fails to abate it within the time which is specified in the notice, and accepts for storage, without notice of such nuisance to the storer or his delivering agent as soon as practical, any grain in the warehouse which, or the contents of which, is a public nuisance under this chapter, is liable to any storer of such grain for any and all damages which are occasioned by subsequent infestation of grain so stored from such nuisance.

55115. In any case in which a lot of grain has been declared to be a nuisance and has been required to be abated, the director shall also require the warehouseman to eliminate or control any infestation of the premises which results from or in the infestation of the grain.

55116. Within the number of days which is specified in the notice, after notification as provided in Section 55112, the owner of any lot of infested grain which is specified in the notice shall either remove the grain from the warehouse which is mentioned in the copy of notice and statement or shall cause it to be treated so as to abate the nuisance. If such owner fails to remove the grain, cause its treatment, or authorize the warehouseman to treat it, the warehouseman may treat the grain or may sell it at public sale without further notice.

If it cannot be sold, the warehouseman may make such other disposition of it as is possible and shall incur no liability by reason of any such disposition. Except in those cases in which the warehouseman is liable for the cost of treatment to abate the nuisance, such cost is a lien against the grain.

55117. From the proceeds of such sale the warehouseman shall satisfy his lien, including the reasonable charge of notice, advertisement, and sale. The balance, if any, of such proceeds shall be held by the warehouseman, and delivered to the person to whom he would have been bound to deliver or justified in delivering the goods.

55118. If the owner authorizes the warehouseman to treat the infested grain, the warehouseman shall proceed with such treatment as is prescribed by the director. The cost of such treatment is a lien against such grain.

CHAPTER 5. GRAIN AND SEED CLEANERS

55251. As used in this chapter:

(a) "Grain and seed" includes any grain, seeds, rice, beans, and any other agricultural product which is customarily cleaned by grain and seed cleaners.

(b) "Grain and seed cleaner" means a person that is lawfully engaged in the business of cleaning grain and seeds for others.

55252. If the owner delivers any grain and seed to a grain and seed cleaner for cleaning, and desires to have the cleanings from the grain and seed kept for him, he shall make written request to the grain and seed cleaner to segregate and hold all cleanings which result from the cleaning of the grain and seed.

55253. If a request is made by the owner, the cleaner shall sack or otherwise segregate the cleanings and give written notice to the owner when the cleaning is completed.

55254. If the cleanings are not removed from the cleaning plant within five days after the mailing of the written notification to the owner, as provided in Section 55253, or five days from the date of receiving authorization to move the cleanings if such authorization is required by Section 7571, the grain and seed cleaner may dispose of the cleanings in such manner as is provided by law.

55255. If no disposition of the cleanings is provided for by law and authorization to move the cleanings if required by Section 7571 is received as provided in Section 55254, the grain and seed cleaner may dispose of the cleanings by sale or otherwise and shall pay the grower the net receipts received from such sale after deducting reasonable expenses of the sale and satisfying any claims which he may have against such cleanings.

CHAPTER 6. PROCESSORS OF FARM PRODUCTS

Article 1. Definitions

55401. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

55402. "Agent" means any person that on behalf of any processor contracts for or solicits any farm product

from a producer of the farm product, or that negotiates the purchase of any farm product on behalf of any processor.

55403. "Farm product" includes every agricultural, horticultural, viticultural, or vegetable product of the soil, honey and beeswax, oilseeds, poultry, and poultry product. It does not include timber or any timber product or milk or any milk product.

55404. "Lender" includes any person that advances new value to a processor.

55405. "New value" includes any new advance or loan, whether in money or other property, which is made by a lender to a processor. It does not, however, include any extension or renewal of any existing obligation of the processor, nor any obligation which is substituted for such existing obligation.

55406. "Packout basis" means that payment for the farm product is based on the grade or quality of the finished product, as determined at the completion of the processing.

55407. "Processor" means any person that is engaged in the business of processing or manufacturing any farm product, that solicits, buys, contracts to buy, or otherwise takes title to, or possession or control of, any farm product from the producer of the farm product for the purpose of processing or manufacturing it and selling, reselling, or redelivering it in any dried, canned, extracted, fermented, distilled, frozen, or other preserved or processed form. It does not, however, include any retail merchant that has a fixed or established place of business in this state and does not sell at wholesale any farm product which is processed or manufactured by him.

55408. "Producer" means any person that is engaged in the business of growing or producing any farm product.

Article 2. General Provisions

55431. The marketing of agricultural commodities within this state is hereby declared to be affected with a public interest. The provisions of this chapter are enacted in the exercise of the police powers of this state for the purpose of protecting the health, peace, safety, and general welfare of the people of this state.

55432. The director may publish in pamphlet form as often as he thinks necessary a list of processors that are licensed pursuant to this chapter, together with all necessary regulations which concern the enforcement of this chapter.

55433. Any money in the Department of Agriculture Fund which was derived pursuant to this chapter, or Chapter 7 (commencing with Section 56101) of this division, may be expended for the administration and enforcement of any and all of the provisions of such chapters, notwithstanding any other provision of law which limits the expenditure of any such money to the specific purposes or to the administration or enforcement of each of such chapters separately.

55434. The director shall, within 30 days prior to the general session of the Legislature submit to the Governor a full and true report of the transactions pursuant to this chapter during the preceding biennium, including a complete statement of receipts and expenditures during the period.

55435. No provisions in any bond which is given pursuant to any provision of this chapter which attempts by contract to shorten the period which is prescribed for the commencement of an action on the bond by Section 337 of the Code of Civil Procedure, is valid if such provision attempts to limit the time for commencement of action on the bond to a shorter period than six months from the termination of the 35-day period which is covered by such bond.

55436. Civil suits and criminal prosecutions which arise by virtue of any provision of this chapter may be commenced and tried in any of the following:

(a) The county where the products were received by the processor.

(b) The county in which the principal place of business of such processor is located.

(c) The county in which the violation of this chapter occurred.

55437. The rights, remedies, and penalties which are provided for in this chapter are in addition to any other rights, remedies, or penalties which are provided for by law, and any acts or parts of acts in conflict therewith are hereby repealed.

55438. Except as otherwise provided in this chapter, the provisions of Part 2 (commencing with Section 307) of the Code of Civil Procedure are applicable to, and constitute the rules of practice in, the proceedings which are mentioned in this chapter, and the provisions of Part 2 of the Code of Civil Procedure relative to new trials and appeals, except insofar as they are inconsistent with the provisions of this chapter, apply to the proceedings which are mentioned in this chapter.

55439. If any clause, sentence, paragraph, or part of this chapter is for any reason adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this chapter, but shall be confined in its operation to the clause, sentence, paragraph, or part of this chapter which is directly involved in the controversy in which such judgment is rendered.

Article 3. Exceptions

55461. This chapter does not apply to or include any nonprofit cooperative association which is organized and operating pursuant to Chapter 1 (commencing with Section 54001) of this division or of similar laws of any other states or District of Columbia or the United States or the agents of such organizations in the performance of their duties as such except as to that portion of the activities of such organization, or

agent, which involves the handling or dealing in any farm product of nonmembers of such organizations.

Article 4. Agent's License

55481. A person shall not act as an agent unless such person has first obtained a license as provided in this chapter.

55482. Every person, before acting as an agent, shall file an application with the director for a license to so act. The application shall be accompanied by the application fee which is prescribed by Article 16 (commencing with Section 55861) of this chapter.

55483. Each application shall include all of the following:

(a) Such information as the director may consider proper or necessary.

(b) The name and address of the applicant.

(c) The name and address of the processor that is represented or sought to be represented by the agent.

(d) The written endorsement or nomination of the processor.

55484. Fraud or misrepresentation in making any application shall ipso facto work a revocation or refusal of any license which is granted or applied for pursuant to this chapter.

55485. The applicant shall satisfy the director of the applicant's character, responsibility, and good faith in seeking to carry on the business which is stated in the application.

55486. If the applicant is a corporation or partnership, it shall likewise satisfy the director of the character, responsibility, and good faith of any or all persons connected with it in a responsible or managing position, such as manager, superintendent, officer, or director of a corporation, or manager, superintendent, or member of a partnership. The failure of any such person to satisfy the director of his character, responsibility, or good faith may be considered by the director as adverse to a showing of such qualifications by such corporation or partnership, and is a good and sufficient ground for the denial of an application for license or the renewal of the license.

55487. Previous conviction of a felony, previous bankruptcy, voluntary or involuntary, or previous violation of this chapter may be considered by the director as adverse to a showing of such character, responsibility, or good faith on the part of any applicant, or on the part of any manager, superintendent, director, or officer of an applicant corporation, or on the part of any superintendent, manager, or member of an applicant partnership. The same considerations are applicable to an individual applicant who has previously been in a responsible or managing position with a corporation or partnership which has suffered revocation or suspension of license by reason of violation of this chapter or by reason of violation of Chapter 7 (commencing with Section 56101) of this division.

55488. The director may refuse to grant any license or the renewal of any license in any of the following cases:

(a) He is satisfied, after hearing as provided in this chapter, that the applicant has violated any provision of this chapter.

(b) There has been any previous violation of record of any provision of this chapter by the applicant or by any person that owns any substantial interest in or that acts in a proprietary capacity in the business of the applicant, or is charged with the management of such business.

55489. Except as otherwise provided in Sections 55484 and 55488, upon the filing of the application and the application fee, the director shall. if he is satisfied as to the character, responsibility, and good faith of the applicant, or the persons in a responsible or managing position of a corporate or partnership applicant, in seeking to carry on the business which is stated in the application, issue to the applicant a license which entitles the applicant to conduct the business which is described in the application.

55490. The license of an agent shall expire upon the date of expiration of the license of the processor for whom the agent acts, or upon revocation in the manner and upon the grounds which are specified in this chapter, whichever first occurs.

55491. The director may issue to each agent a separate license card for each processor represented by the agent.

55492. Any agent that displays a void or expired license card is guilty of a misdemeanor.

55493. Each agent shall show his license upon the request of any interested person.

Article 5. Processor's License

55521. A person shall not act as a processor unless he has first obtained a license as provided in this chapter or in Section 56574.

55522. Every person, before acting as a processor, shall file an application with the director for a license to so act. The application, unless it is an application for a conjunctive processor's license pursuant to Section 56574, shall be accompanied by the application fee which is prescribed by Article 16 (commencing with Section 55861) of this chapter.

55523. Each application shall state all of the following:

(a) The full name of the applicant.

(b) If the applicant is a firm, exchange, association, or corporation the full name of each member of the firm, or the names of the officers of the exchange, association, or corporation.

(c) The principal business address of the applicant in this state.

(d) The name of every person that is authorized to receive and accept service of summons for the applicant.

55524. Fraud or misrepresentation in making any application shall ipso facto work a revocation or refusal of any license which is granted or applied for pursuant to this chapter.

55525. The applicant shall satisfy the director of the applicant's character, responsibility, and good faith in seeking to carry on the business which is stated in the application.

55526. If the applicant is a corporation or partnership, it shall likewise satisfy the director of the character, responsibility, and good faith of any or all persons connected with it in a responsible or managing position, such as manager, superintendent, officer, or director of a corporation, or manager, superintendent, or member of a partnership. The failure of any such person to satisfy the director of his character, responsibility, or good faith may be considered by the director as adverse to a showing of such qualifications by such corporation or partnership, and is a good and sufficient ground for the denial of an application for a license or of the renewal of a license.

55527. Previous conviction of a felony, previous bankruptcy, voluntary or involuntary, or previous violation of this chapter may be considered by the director as adverse to a showing of such character, responsibility, or good faith on the part of any applicant, or on the part of any manager, superintendent, director, or officer of an applicant corporation, or on the part of any superintendent, manager, or member of an applicant partnership. The same considerations are applicable to an individual applicant who has previously been in a responsible or managing position with a corporation or partnership which has suffered revocation or suspension of license by reason of violation of this chapter or by reason of violation of Chapter 7 (commencing with Section 56101) of this division.

55528. The director may refuse to grant any license or the renewal of any license in any of the following cases:

(a) He is satisfied, after hearing as provided in this chapter, that the applicant has violated any provision of this chapter.

(b) He determines, in the manner which is described in this chapter, that an applicant processor has failed to make payment for any farm product within the time which is specified for such payment in a contract of sale and purchase between the producer and the processor and in accordance with the terms of the contract.

(c) There has been any previous violation of record of any provision of this chapter by the applicant or by any person that owns any substantial interest in, or that acts in a proprietary capacity in, the business of the applicant or is charged with the management of such business.

55529. Except as otherwise provided in Section 55524 or 55528, upon the filing of the application and the payment of the application fee, the director, if he is satisfied as to the

character, responsibility, and good faith of the applicant, or the persons in a responsible or managing position of a corporation or partnership applicant, in seeking to carry on the business which is stated in the application, shall issue to the applicant a license which entitles the applicant to conduct the business of processor within this state for a year from the date of the license, or until the license is revoked in the manner and upon the grounds which are specified in this chapter.

55530. Each licensed processor shall post his license, or a copy of it, in his office or salesroom in plain view of the public.

Article 6. Processor's Bond

55551. Before any license is issued to any processor that buys or otherwise takes title to or possession of any farm product from the producer of the farm product, except by payment to the producer at the time of obtaining such possession or control of the full agreed price in lawful money of the United States, the applicant shall execute and deliver to the director a surety bond in the sum of five thousand dollars ($5,000) which is executed by the applicant as principal and by a surety company which is qualified and authorized to do business in this state as surety.

55552. The bond shall be conditioned upon compliance with the provisions of this chapter and upon the faithful and honest handling of farm products in accordance with the terms of this chapter. The bond shall be to the state in favor of every producer-creditor of any farm product which is grown within this state.

55553. Any producer-creditor of any farm product which is grown within this state that claims to be injured by the fraud, deceit, or willful negligence of any processor may bring action upon the bond against both principal and surety in any court of competent jurisdiction to recover the damages which are caused by such fraud, deceit, or willful negligence, or the failure to comply with any provision of this chapter.

55554. If a processor fails to pay any producer-creditor for any farm product which is received from such producer-creditor, the director shall proceed forthwith to ascertain the names and addresses of all producer-creditors of such processor, together with the amounts which are due and owing to them and each of them by such processor, and shall request all such producer-creditors to file a verified statement of their respective claims with the director. The request shall be addressed to each known producer-creditor at his last known address.

55555. If such a producer-creditor fails, refuses, or neglects to file in the office of the director his verified claim as requested by the director within 60 days from the date of such request, the director is thereupon relieved of further duty or action pursuant to this article on behalf of such producer-creditor.

55556. If by reason of the absence of records, or other circumstances which make it impossible or unreasonable for the

director to ascertain the names and addresses of all such producer-creditors, the director, after exerting due diligence and making reasonable inquiry to secure such information from all reasonable and available sources, may make demand on the bond on the basis of information then in his possession, and thereafter is not liable or responsible for claims or the handling of claims which may subsequently appear or be discovered.

55557. Upon ascertaining all claims and statements in the manner set forth in this article, the director may make demand upon the bond on behalf of those claimants whose statements have been filed, and may settle or compromise the claims with the surety company on the bond. In such cases, he may execute and deliver a release and discharge of the bond which is involved.

55558. Upon the refusal of the surety company to pay the demand, the director shall bring an action on the bond in behalf of the producer-creditors.

55559. Upon any action being commenced on the bond, the director may require the filing of a new bond and immediately upon the recovery in any action on such bond such processor shall file a new bond. If a processor fails to file a new bond within 10 days, in either case, such failure constitutes grounds for the suspension or revocation of his license.

Article 7. Sale of Farm Products by Weight

55581. If any farm product is sold to and purchased by any processor on the basis of weight, such product shall be weighed by a weighmaster licensed under the laws of this state, and a certificate as to such weight issued by him shall be delivered to the seller by the processor or by the weighmaster as agent for the processor. Settlement for such product shall be made on the basis of the weight which is shown on the certificate.

Article 8. Processors

55601. Every processor shall pay for any farm product which is delivered to the processor at the time and in the manner which is specified in the contract with the producer. If no time is set by such contract, or at the time of delivery, then the processor shall pay for the farm product within 30 days of the delivery or taking possession of such farm product.

55602. Every processor except a licensed winegrower, that purchases any farm product from the producer of the farm product on a packout basis shall promptly upon completion of the processing inform the producer of the results which are obtained, and in so doing shall account fully and completely for the entire weight of the farm product which is so received from the producer.

55603. If a specific grade or quality is a condition of a packout basis contract between the producer and the processor, such grade or quality shall be determined at the completion of the processing by a state or federal agency which is duly authorized to determine such grade or quality. The certificate which is issued in connection with such inspection is prima facie evidence of the grade or condition, or both, of the finished product.

55604. Every contract between a processor and a producer which covers the purchase of any farm product on a packout basis shall, in addition to designating the price to be paid for the specific grade, designate the price to be paid for any other grade into which the farm product is processed as determined by inspection of the finished product by a duly authorized state or federal agency.

55605. Every processor, except a licensed winegrower, that receives any farm product from the producer of the farm product for processing on a consigned basis shall promptly make and keep a correct record which shows in detail all of the following with reference to the processing, handling, storage, and sale of such farm product:

(a) The name and address of the consignor.

(b) The date received.

(c) The quantity received.

(d) The size of the containers into which the finished product is packed.

(e) The grade and quality of the finished product.

(f) The price which is obtained from the sale of the finished product.

(g) An itemized statement of costs and charges which the processor paid in connection with the processing, handling, storage, and sale of the farm product.

55606. If the processor has entered into a written contract with two or more owners or consignors, which provides that the returns for any farm product which is handled and sold for the account of such owners or consignors shall be pooled on a definite basis as to grade or quality, or both, during a specific period of time, the processor shall render an account of sale which shows the net average pool return on each grade and quality from the sales that are made, which shows in detail all charges in connection with the handling, processing, and selling of such farm product. The processor shall keep a correct record of such sales and charges.

55607. Every processor shall keep accurate books and records which show the name and address of any producer that is selling and making delivery of any farm product to him, including the dates of deliveries, the quantities of the farm product which is delivered, and the agreed price to be paid for such farm product. If no agreed price has been arrived at, or a method for determining it agreed upon, such agreed price shall be considered the value of such product as of date of

delivery. For the purpose of ascertaining such value and in addition to other evidence, reference may be had to price quotations from the federal-state market news service.

55608. Accurate grading and weight receipts shall be given by all processors to each producer, or his agent, upon each and every delivery. Each receipt shall state all of the following:

(a) The date of the receipt.

(b) The name and address of the producer.

(c) The name of the processor.

55609. Not later than five days after demand, the processor shall give to every such producer so requesting a full and complete statement of such producer's account, which shows all of the following:

(a) The entire quantities of the product which has been delivered by the producer.

(b) The grades of the product which has been delivered by the producer.

(c) The amount which is owing for every lot and for the total amount of the product which has been delivered by the producer.

55610. A processor, in order to prevent loss or economic waste, may resell or redeliver any raw product purchased and received from the producer of the raw product to another processor for the purpose of processing and such act is not an act which requires licensing pursuant to Chapter 7 (commencing with Section 56101) of this division. Any processor acting in this manner, or the surety on his bond, as required by Article 6 (commencing with Section 55551) of this chapter, is, however, liable for the full value of the raw product which is so handled.

Article 9. Producer's Lien

55631. Except as otherwise provided in Article 10 (commencing with Section 55681) of this chapter, every producer of any farm product that sells any product which is grown and harvested by him to any processor under contract, express or implied, in addition to all other rights and remedies which are provided for by law, has a lien upon such product and upon all processed or manufactured forms of such farm product for his labor, care, and expense in growing and harvesting such product. The lien shall be to the extent of the agreed price, if any, for such product so sold. If there is no agreed price or a method for determining it which is agreed upon, the extent of the lien is the value of the farm product as of the date of the delivery.

55632. This producer's lien attaches on all of such delivered product from the date of delivery of such farm product or any portion of it by a producer to any processor.

55633. Except as provided in Article 10 (commencing with Section 55861), the producer's lien is a preferred lien

prior in dignity to all other liens, claims, or encumbrances except the following:

(a) Labor claims for wages and salaries for personal services which are rendered by any person to any processor in connection with such processing business after the delivery of any such product for processing.

(b) The lien of a warehouseman as provided by Division 7 (commencing with Section 7101) of the Uniform Commercial Code.

55634. Every lien which is provided for in this article is on every farm product and any processed form of the farm product which is in the possession of the processor without segregation of such product.

55635. Except as otherwise provided in Section 55636, the lien of a producer, unless sooner released by payment or by security which is given for such payment as provided in this article, is complete from the date of delivery of such product, or if there is a series of deliveries, it is complete from the date of the last delivery. The lien shall remain in effect for 60 days thereafter at which time it shall cease unless proceedings are commenced in a proper court within that time to enforce the lien.

55636. If suit is commenced by any such producer to enforce any lien, as provided in Section 55635, such lien shall remain in effect until one of the following occurs:

(a) The payment of the agreed price or the value of such product.

(b) Deposit of the amount of the lien or claims with the clerk of the court in which any such action is pending.

(c) The final determination of such court proceeding.

55637. Any lien on any product or processed product may, however, be released, to the extent the value of the claim upon such product is secured, by a surety bond or a cash deposit or other security given as provided in this article. Any producer may also release any lien which is possessed by him upon payment being made to him for the agreed or reasonable value of the product which is so sold and delivered, or upon arrangements being made for such payment which are satisfactory to the producer.

55638. It is unlawful for any processor to remove any farm product which is delivered to him, or any processed form of the farm product, from this state or beyond his ownership or control upon which such a lien or any of the liens which are provided for in this chapter, are attached, except any of such product or processed product as may be in excess of a quantity which is on hand of a value that is sufficient to satisfy all existing liens.

55639. Any processor that desires to secure a release of any or all of such liens on any product or processed product may do so in any of the following ways:

(a) By paying the agreed or actual value of any farm product which is purchased by such processor within 20 days

from the date of delivery of the farm product unless the date of payment is otherwise agreed upon in writing or such payment is secured other than by lien.

(b) By depositing with the director a surety bond which is executed by such processor as principal and by a surety company which is qualified and authorized to do business in this state as surety in an amount which equals the current market value of the product or processed product which is intended by such processor to be sold or otherwise disposed of, as such value may appear by the sworn statement of such processor in accordance with quotations from the federal-state market news service or other evidence which is satisfactory to the director. The bond shall be conditioned that if the processor fails to pay up to the amount of such bond the lawful claims of all producers whose liens have been released by the bond, within 35 days after date of the bond, the surety shall be liable to and shall pay to the state on behalf of such claimants all such lawful claims as may be covered by the amount of the bond, together with costs of suit if an action is filed on the bond.

(c) By depositing with the director a cash sum in lawful money of the United States which is expressly set apart by an instrument in writing that is signed by the processor for the purpose of guaranteeing to the extent of such sum, payment of all existing claims of producers whose liens are released by the deposit, within 35 days from the date of such deposit. The director shall be named in such instrument as trustee to carry out the purpose and intent of the instrument.

(d) By designating, setting apart, and depositing in a public warehouse a quantity of any processed farm products and indorsing over to the director and delivering to him the warehouse receipt for such products for the purpose of guaranteeing to the extent of the value of such deposit, payment within 35 days from the date of such deposit, all existing claims of producers and labor claimants whose liens are released by it.

(e) By securing a release from the director after payment in full for such farm product.

55640. If all lawful claims of the producers have been paid in accordance with this article by any processor, any product which is released by such action may be sold, transported, or otherwise disposed of.

55641. If a bond, cash deposit, or security is given to the director by any processor as provided in this article, such processor may sell, transport, or otherwise dispose of the product or processed product to the value which is represented by such security as such value may appear by the sworn statement of such processor in accordance with quotations from the federal-state market news service or other evidence satisfactory to the director.

55642. The director may accept such bond, if approved by him, and such other security. If the claims or any of them are not paid in accordance with the condition of such security, the director may, on proof being made to his satisfaction of the amounts which are due such claimants, pay all such unpaid claims insofar as possible out of the deposit money, or proceeds from any sale made by him of any securities or processed products which are given as security.

55643. If a bond has been given as security, the director shall notify the principal and surety of any default on the part of the principal under the bond, and make demand for payment on behalf of such unpaid claimants. If payment is not made, the director may take any legal action he may deem necessary to enforce payment under such bond.

55644. If the director has received warehouse receipts for any processed product as security, and the processor giving them has failed to pay the claims in accordance with the terms of such security, the director may sell such security with or without notice, and in such manner as he shall determine.

55645. All claims in relation to payment shall have equal standing and payment shall be prorated if necessary among the claimants.

55646. This article does not prevent the director if in his opinion the rights of all of the claimants are fully protected, as provided for in this article, from issuing a certificate in the name of the department and signed by him which releases any specific lot or quantity of any product or processed product from all liens of the claimants. No security which is held by the director shall, however, be released by him to any processor unless and until it is made to appear to his satisfaction that all claims have been fully paid, or that the rights of all of the claimants are fully protected.

A fee of five dollars ($5) shall be paid to the director for issuing any certificate or release which is provided for in this section.

55647. This article does not impair or affect the right of any claimant that possesses a lien to maintain a personal action to recover such debt against a processor, either in an action to foreclose his lien or in a separate action. He is not required to state in his affidavit to procure an attachment that his demand is not secured by a lien.

55648. The judgment, if any, which is obtained by the plaintiff in such personal action, or personal judgment which is obtained in such lien action, does not impair or merge any lien right or claim which is held by such plaintiff. Any money, however, which is collected on the judgment shall be credited on the amount of such lien or claims in any action which is brought to enforce the lien or in any action which is filed pursuant to this article by the director.

55649. In an action that is filed by any such lien claimant, the defendant processor may file with the court in which the action is pending a surety bond which is approved by such

court in an amount that is sufficient to cover the demand of plaintiff's complaint, including the costs, whereupon the court may order the release of a portion or the whole of any product or processed product upon which the lien of plaintiff has attached.

55650. Such processor may also, on motion duly noticed, introduce evidence to the court before whom any such action is pending to the effect that he has sufficient security or money on deposit with the director to protect the lien or other rights of plaintiff. If he does so, the court may order the release of a portion or the whole of such product upon which the lien of plaintiff is attached, and deny to plaintiff any recovery in such action. Such action by the court does not, however, prejudice any other rights or remedies which are possessed by the plaintiff.

55651. The plaintiff in an action which is brought to foreclose any of the liens which are provided for in this article may, in a proper case, and upon proper allegations, secure an injunction against the processor in accordance with the provisions of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure to restrain the doing of any acts on the part of such processor which are designed to or which would, in effect, remove any processed product in his possession or under his control and upon which valid liens exist, beyond the process of the court, to plaintiff's injury.

55652. If in a court proceeding to foreclose such lien, it is found and determined by the court that there is no cash, bond, or other deposit placed with the director as security for the payment of any of the lien claims as set out in the complaint, the judgment of foreclosure shall be against a sufficient quantity in value of such farm product or processed product in the possession or under the control of the defendant processor, as may be necessary to satisfy such claim or render judgment and declare forfeited any bond which is deposited in the court by such processor to secure the lawful claims of the plaintiff as determined by the court.

55653. All actions filed by the director or producers against any processor for the foreclosure of the liens or other security which are provided for in this article may be consolidated by the court and all persons that are necessary to a determination of such action may be made parties to such actions. Any judgment which is rendered shall determine the lawfulness of the amount of each claim as represented by the pleadings.

Article 10. Farm Products Which Are Hypothecated or Pledged

55681. As used in this article, "statement of intention to finance" means the statement which is described in Section 55682.

55682. Notwithstanding any other provisions of this code, a producer shall not have a lien on any farm product or any manufactured or processed product which is derived from any farm product that is hypothecated or pledged, within the period of financing which is specified in the statement that is filed with the director as provided in this article, to any lender that, at the time of the hypothecation or pledging, advances new value to the processor, and that, at least 15 days prior to the time of the making of any loan or the advancing of any moneys to secure the repayment of which such processor hypothecates or pledges any farm product or any manufactured or processed product which is derived from the farm product, has filed a statement in writing with the director, which is signed by the lender and the processor and contains all of the following:

(a) A designation of the name of the lender and the processor, and the chief place of business of each within this state.

(b) A statement that the lender is engaged, or expects to be engaged, in financing the processor on the hypothecation or pledging of farm products or the manufactured or processed products which are derived from farm products, and the times within which the financing shall take place.

55683. The fee for filing a statement of intention to finance is one dollar ($1).

55684. The following form of statement (or any other form of statement which contains substantially the same information) shall suffice for the purpose of this chapter:

Statement of Intention to Finance on the
Hypothecation of Farm Products

The lender, _____, whose chief place of business within this state is at _____, is or expects to be engaged in financing through said chief place of business (or its _____ branch) the processor _____, whose chief place of business within this state is at _____ , on the hypothecation or pledging of farm products, or the manufactured or processed products which are derived from farm products, between the _____ day of _____, 19___, and the _____ day of _____, 19___.

_____
Lender.

_____
Processor.

55685. Neither the execution nor the filing of any statement of intention to finance is a commitment by the lender to finance the producer to any extent whatever.

55686. The director shall mark each statement of intention with a consecutive filing number and with the date and hour of the filing. He shall keep the statement of intention to finance in a separate file and note and index the filing in a suitable

index, indexed according to the name of the processor and the lender and containing a notation of the chief place of business of both and the branch office, if any, of the lender as given in the statement.

55687. Any producer may file with the director a request, which contains his name and address and the name of the processor to whom he has delivered or intends to deliver any farm product, that he be notified of the filing of any such statement of intention to finance.

The director shall, within three days after the filing of such request, mail to such producer, advice or notice, in such form as he may adopt, which indicates whether or not such a statement has been filed.

55688. Presentation for filing of the statement of intention to finance, and payment of the filing fee, shall constitute filing pursuant to this chapter in favor of the lender as to any farm product or manufactured or processed product of the farm product which is hypothecated or pledged to the lender within the time which is contemplated in the statement.

55689. Any producer that would, but for Section 55682, be entitled to a lien, may file a written verified statement in duplicate with any such lender, which sets forth the fact that the producer has delivered a farm product to the processor and that the processor has failed to pay for it when due, together with the amount which is due for the farm product.

55690. The verified statement which is provided for in Section 55689 shall be filed with the manager or other officer of the lender at the office or branch of the lender which is designated in the statement of intention to finance as the office or branch through or at which the financing is to be done. The filing of any such verified statement at any other office or branch except that which is so designated in the said statement of intention to finance is not effective for any purpose whatsoever.

55691. The lender shall note on the face of each such verified statement the date and time of day when such verified statement was received by it. Such verified statements shall have priority in accordance with the order in which they are filed with any lender.

55692. If, at any time, prior to the time that the lender has advanced to the processor the amount of any loan, the repayment of which is secured by a pledge or by the hypothecation of any farm product or any manufactured or processed products of the farm product, there has been filed with any lender such verified statement, the lender shall withhold the whole or such portion of the proceeds of such loan as will satisfy in full or to the greatest extent of the amount of such verified statement. He shall not advance such sums to the producer, or processor, except on the order of the producer for whose statement such sums have been withheld, and the processor, or upon final order of a court of competent jurisdiction.

Article 11. Examinations and Audits of the Books and Records of Licensees

55721. If the director finds that any licensee has failed, refused, or neglected to make payment in full for any farm product purchased and received from the producer of the farm product, as required by this chapter, he may, upon his own motion, do all of the following:

(a) Make examinations and audits of the books and records of any licensee which pertain to the purchase of, or to the handling and accounting for, any farm product which is purchased or received from the producer of the farm product.

(b) Examine and audit all pertinent books, records, weight tags, receipts, ledgers, papers, contracts, and other documents of the licensee which show or tend to show facts regarding the status of accounts of growers doing business with such licensee.

55722. If the examination discloses evidence of any violation of this chapter, the director may issue a complaint which is directed against the licensee, either on his own behalf or on behalf of producers that are affected by such violation together with such other process for the enforcement of the provisions of this chapter as is provided in this chapter.

Article 12. Investigations and Hearings

55741. The director upon his own motion may, or upon the verified complaint of any interested party shall, investigate, examine, or inspect any transaction which involves the failure of the processor to make payment for any farm product within the time which is specified for such payment in the contract of sale and purchase between the producer and the processor, in accordance with the terms of such contract or in accordance with the provisions of this chapter.

55742. Except as otherwise provided in Section 55743 or 55744, if the complaint is a bona fide dispute which involves any of the following, the director shall have no jurisdiction to act upon such complaint if the processor within 10 days after the filing of such verified complaint has submitted such dispute to arbitration in accordance with the provisions of a written contract:

(a) The rejection of any farm product.

(b) The failure or refusal to accept and pay for any farm product which is bought or contracted to be bought from a producer by a processor.

(c) The failure or refusal by the processor to furnish or provide boxes or other containers, or hauling, harvesting, or any other service which is contracted to be done by the processor in connection with the acceptance, harvesting, or other handling of the farm product.

55743. The jurisdiction which is otherwise reserved to the director in this chapter is, however, restored for the purposes of this chapter if the arbitrators, without reasonable cause, fail, refuse, or neglect to adjudicate the matter of dispute within 90 days from the date the matter was submitted to arbitration.

55744. The director also has jurisdiction over any such complaint or dispute if the processor has failed to perform in accordance with any arbitration award which is made in accordance with the terms of such written contract.

55745. If the director is unable to effect a settlement satisfactory to him and to both parties to the complaint, he shall cause a copy of such complaint, together with a notice of the time and place of hearing of such complaint, to be served personally or by mail upon the processor against whom the complaint is filed at least 10 days before the hearing.

55746. The hearing shall be held in one of the following places which is selected by the director:

(a) The city or place which is the principal place of business of the licensee or respondent.

(b) The city or place in which the alleged violation which is complained of is said to have occurred.

(c) The county seat of the county in which the alleged violation which is complained of is said to have occurred.

(d) The nearest office of the department.

55747. At the hearing, the director may do all of the following:

(a) Administer oaths, and take testimony.

(b) Issue subpoenas requiring the attendance of witnesses before him, together with such books, memoranda, papers, and other documents, articles, or instruments as may be pertinent to the controversy as set forth in the complaint.

(c) Compel the disclosure by such witnesses of all facts known to them relative to the controversy.

55748. At the time and place which is appointed for the hearing, the director shall hear the parties to such complaint.

55749. At the conclusion of the hearing, the director shall enter in his office in Sacramento an order which dismisses the complaint unless he is satisfied that the licensee has violated any provision of this chapter. If he is satisfied that the licensee has violated any provision of this chapter, he may issue an order which suspends or revokes the processor's license or places such license under such probationary terms and conditions as may be necessary to obtain compliance with the provisions of this chapter by such licensee.

55750. A copy of such order shall be furnished to the respective parties to the complaint.

Article 13. Procedure Governing Hearings

55781. Before a hearing has commenced, the director shall issue subpoenas and subpoenas duces tecum at the request of

any party in accordance with Section 1985 of the Code of Civil Procedure. After the hearing has commenced, the director may issue subpoenas and subpoenas duces tecum.

55782. The process which is issued pursuant to Section 55781 extends to all parts of the state and shall be served in accordance with Sections 1987 and 1988 of the Code of Civil Procedure.

55783. A witness is not obliged to attend at a place out of the county in which he resides except when the distance is less than 100 miles from his place of residence, or the director, upon affidavit of any party which shows that the testimony of such witness is material and necessary, has endorsed on the subpoena an order that requires the attendance of such a witness.

55784. Every witness who appears pursuant to a subpoena, except a party or an officer or employee of the state or any political subdivision of the state, shall receive fees. Every witness who appears pursuant to a subpoena, except a party, shall receive mileage in the same amount and under the same circumstances as is prescribed by law for witnesses in civil actions in a superior court.

55785. Oral evidence shall be taken only on oath or affirmation.

55786. Each party shall have all of the following rights:

(a) Call and examine witnesses.

(b) Introduce exhibits.

(c) Cross-examine opposing witnesses on any matter which is relevant to the issues even though the matter was not covered in the direct examination.

(d) Impeach any witness regardless of which party first called him to testify.

(e) Rebut the evidence against him.

55787. If the respondent does not testify in his own behalf, he may be called and examined as if under cross-examination

55788. The hearing need not be conducted according to technical rules which relate to evidence and witnesses. Any relevant evidence shall be admitted if it is the sort of evidence on which responsible persons are accustomed to rely in the conduct of serious affairs, regardless of the existence of any common law or statutory rule which might make improper the admission of such evidence over objection in civil actions. The rules of privilege shall be effective to the same extent that they are now or hereafter may be recognized in civil actions, and irrelevant and unduly repetitious evidence shall be excluded.

Article 14. Contempt

55811 If any person in any proceedings before the director disobeys or resists any lawful order or refuses to re-

spond to a subpoena, or refuses to take the oath or affirmation as a witness or thereafter refuses to be examined, or is guilty of misconduct during a hearing or so near the place of a hearing as to obstruct the proceeding, the director shall certify the facts to the superior court in and for the county where the proceedings are held.

55812. The court shall thereupon issue an order which directs the person to appear before the court and show cause why he should not be punished as for contempt. The order and a copy of the certified statement shall be served on the person. Thereafter the court shall have jurisdiction of the matter.

55813. The same proceedings shall be had, the same penalties may be imposed, and the person charged may purge himself of the contempt in the same way, as in the case of a person who has committed a contempt in the trial of a civil action before a superior court.

Article 15. Suspension or Revocation of Licenses

55841. The director may suspend or revoke any license, as the case may require, if after a hearing as provided in this chapter he is satisfied that the licensee has violated any provision of this chapter.

55842. The director may suspend or revoke the license of any processor if he determines, in the manner which is described in this chapter, that the processor has failed or refused to make payment for any farm product within the time which is specified for such payment in the contract of sale and purchase between the producer and the processor, and in accordance with the terms of the contract, whether or not such determination of the director is accompanied with an order which directs the payment or reparation as provided in Section 55749.

55843. Either at the time of serving a verified complaint, or after the hearing and decision, the director may issue to and serve upon the licensee, an order which directs such licensee to show cause why his license should not be suspended or revoked for the violation which is charged or specified in the decision.

55844. If the order to show cause is heard separately from the case or hearing which is set forth in the verified complaint, a copy of the order to show cause, together with notice of the time and place of hearing upon the order, shall be served personally or by mail upon the licensee. The order shall refer to an attached copy of a verified complaint, or to such other notice, affidavit, or official document, in such a way as generally to advise and inform the licensee of the charge or violation upon which the order is based and pursuant to which it is issued. Except as otherwise provided in

Section 55848, service of the copy of the order and the notice shall be made at least 10 days before the hearing.

55845. The hearing shall be held in one of the following places which is selected by the director:

(a) The city or place in which is situated the business location of the licensee.

(b) The city or place in which the transaction or violation which is complained of is said or charged to have occurred.

(c) The county seat of the county in which the transaction or violation which is complained of is said or charged to have occurred.

(d) At the nearest office of the department.

55846. At the time and place which is appointed for such hearing, the director shall hear the matter which is set forth in the order, and the showing of the licensee.

55847. At the conclusion of the hearing, the director shall enter in his office at Sacramento an order and decision specifying the facts, dismissing the order to show cause, or directing the suspension or revocation of the license which is held by the licensee, or making such other conditional or probationary orders as may be proper. A copy of the order and decision shall be furnished to the licensee.

55848. If the director is satisfied, either by investigation or after hearing, that a processor is insolvent and unable to pay the producer-creditors or producers with whom the processor has executory or executed contracts for the processing and handling of any farm product, and is further satisfied that to permit the processor to continue to purchase and receive further shipments or deliveries of any farm product would be likely to cause serious and irreparable loss to such producer-creditors, or producers with whom the said processor has the contracts, the director may thereupon and forthwith shorten the time which is provided for hearing upon an order to show cause why the license of the processor should not be forthwith suspended or revoked.

55849. The time of notice of the hearing shall in no event be less than 24 hours. The director shall within that period call a hearing, at which the processor proceeded against shall be ordered to show cause why his or its license should not be suspended, revoked, or continued under such conditions and provisions, if any, as the director may consider just and proper and for the protection of the best interests of the producer-creditors that are involved.

55850. The hearing, in the case of such emergency, may be called upon written notice which is served personally or by mail on the processor that is involved. It may be held at the nearest office of the director or at such place as may be most convenient in the discretion of the director, for the attendance of all parties involved.

55851. Any order which suspends or revokes a license may, within the discretion of the director, be made condi-

tional upon the settlement, adjustment, or satisfaction of the consequences of any violation which is specified, and the operation of such an order may be deferred for such purpose. Any such order may contain provisions for modification or dismissal of the order upon presentation to the director of evidence that the matter of complaint has been settled, adjusted, or withdrawn at any time before such order becomes final.

Article 16. Fees

55861. Except as otherwise provided in this article or in Section 56574, each applicant for filing an application for a license shall pay the following fee which is prescribed for such license:

(a) Processor. Ninety dollars ($90) for each year.

(b) Agent. Ten dollars ($10) for each year.

55862. If any processor does not apply for the renewal of a preexisting license on or before the date of expiration of the license, a penalty of ten dollars ($10) shall be added to the original fee of ninety dollars ($90), and shall be paid by the applicant before the renewal license may be issued.

55863. Any person that is licensed as processor pursuant to this chapter may secure a dealer's, commission merchant's, broker's, or cash buyer's license, pursuant to Chapter 7 (commencing with Section 56101) of this division by filing an application for each desired license which is accompanied by an application fee of twenty-five dollars ($25) for each license for which application is made and upon further complying with those provisions of Chapter 7 of this division which regulate the licensing of each particular classification involved. The license shall be known as a conjunctive dealer's, commission merchant's, broker's, or cash buyer's license, as the case may be.

55864. All fees which are collected pursuant to this chapter shall be paid into the State Treasury monthly and shall be credited to the Department of Agriculture Fund and, except as otherwise provided in Section 55433, shall be expended in carrying out this chapter.

Article 17. Violations

55872. It is a violation of this chapter if the applicant, or licensee, has failed or refused to pay for any farm product at the time and in the manner which is specified in the contract with the producer, or as is otherwise provided in this chapter.

55873. It is a violation of this chapter if the applicant, or licensee, has rejected, without reasonable cause, or has refused to accept, without reasonable cause, any farm product which is bought or contracted to be bought from a producer by such applicant or licensee, or failed or refused, without

reasonable cause, to furnish or provide boxes or other containers, or hauling, harvesting, or any other service which is contracted to be done by the licensee in connection with the acceptance, harvesting, or other handling of such farm product which is bought or handled or contracted to be bought or handled.

55874. It is a violation of this chapter if the licensee has knowingly employed an agent without causing the agent to comply with the licensing requirements of this chapter which are applicable to agents.

55875. It is a violation of this chapter if the licensee has failed or refused, upon demand, to permit the director or his agents to make the investigations, examinations, or audits as provided in this chapter, or that the licensee has removed or sequestered any books, records, or papers necessary to any such investigations, examinations, or audits, or has otherwise obstructed them.

55876. It is a violation of this chapter if the applicant, or licensee, has otherwise violated any provision of this chapter or Chapter 7 (commencing with Section 56101) of this division.

55877. It is a violation of this chapter if the licensee, being licensed as a processor without bond, has bought or otherwise taken title to, or possession of, any farm product from the producer of the farm product, except by payment to the producer, at the time of obtaining such possession or control, of the full agreed price in lawful money of the United States.

55878. The failure or refusal of a processor to make payment for any farm product within the time which is specified for such payment in the contract of sale and purchase between the producer and the processor, and in accordance with the terms of the contract, is a violation of this chapter.

Article 18. Criminal Penalties

55901. Any misdemeanor which is prescribed by this article is punishable by a fine of not more than one thousand dollars ($1,000), or by imprisonment in the county jail for not more than one year, or by both fine and imprisonment.

55902. It is a misdemeanor for any person that is subject to this chapter to assume or attempt to act as a processor or agent without a license, or, if licensed as a processor without a bond, to buy or otherwise take title to, or possession of, any farm product from the producer of such product, except by payment to the producer, at the time of obtaining such possession or control, of the full agreed price in lawful money of the United States.

55903. It is a misdemeanor for any person that is subject to this chapter to willfully refuse to pay for any farm product which such person purchases within 20 days after the date of the delivery of such product by the producer if he has the ability to pay and demand for payment is made, except in

the case of a bona fide dispute, unless the time of payment is otherwise agreed upon in writing, or the payment of the purchase price is secured other than by a lien.

55904. It is a misdemeanor for any person that is subject to this chapter to falsely deny the amount, or the validity, of any producer's claim, or that it is due, with the intent to secure for himself, his employer or other person, any discount upon such indebtedness, or with the intent to annoy, harass, oppress, hinder, delay, or defraud the person to whom such indebtedness is due.

55905. It is a misdemeanor for any person that is subject to this chapter to sell, hypothecate, sequester with intent to defraud any producer, or in any manner place or attempt to place any product upon which liens in favor of any producer have attached, beyond the control, reach, or recovery of any such claimant.

55906. It is a misdemeanor for any person that is subject to this chapter to fail to comply with this chapter.

Article 19. Civil Remedies and Penalties

55921. The director may bring an action to enjoin the violation or the threatened violation of any provision of this chapter or of any order which is made pursuant to this chapter in the superior court in the county in which such violation occurs or is about to occur.

There may be enjoined in one proceeding any number of defendants alleged to be violating the same provisions or orders, although their properties, interests, residences, or places of business may be in several counties and the violations separate and distinct. Any proceeding which is brought pursuant to this section shall be governed in all other respects by the provisions of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure.

55922. Any person that violates any provision of this chapter is liable civilly in the sum of five hundred dollars ($500) for each and every violation, such sum to be recovered in an action by the director in any court of competent jurisdiction. All sums which are recovered under this section shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

CHAPTER 7. PRODUCE DEALERS

Article 1. Definitions

56101. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

56102. "Agent" means any person that, on behalf of any commission merchant, dealer, broker, or cash buyer, receives, contracts for, or solicits any farm product from a producer of

such product or that negotiates the consignment or purchase of any farm product on behalf of any commission merchant, dealer, broker, or cash buyer.

56103. "Broker" means any person, except a commission merchant, dealer, or cash buyer, that negotiates the purchase or sale of any farm product. A broker may not, however, handle either the farm product which is involved or the proceeds of a sale.

56104. "Cash buyer" means any person, except a commission merchant, dealer, or broker, that obtains from the producer of any farm product, title, possession, or control of the farm product, or that buys or agrees to buy any farm product, by paying to the producer at the time of obtaining possession or control, or at the time of contracting for the title, possession, or control of any farm product, the full agreed price of such farm product in coin or currency, lawful money of the United States.

56105. "Commission merchant" means any person that receives on consignment or solicits from the producer of any farm product such farm product for sale on commission on behalf of such producer, or that accepts any farm product in trust from the producer of such farm product for the purpose of sale, or that sells on commission any farm product, or that handles any farm product in any way for the account of or as an agent of the producer of such farm product. Any person that accepts a farm product from the producer of such farm product for the purpose of sale or resale is a commission merchant, unless he has bought, or agreed to buy, the farm product by contract of purchase and sale, which designates the price to be paid to the producer.

56106. "Consignor" includes any person that ships or delivers to any commission merchant or dealer any farm product for handling, sale, or resale.

56107. "Dealer" means any person, except a cash buyer, that solicits, or obtains from the producer of any farm product, the title, possession, control, or delivery of the farm product for the purpose of resale or that buys or agrees to buy any farm product from the producer of the farm product. A dealer shall not, however, obtain title, possession, control, or delivery of any farm product except by contract of purchase and sale, or by contract of agreement to purchase, wherein the price to be paid by the dealer to the producer is designated in the contract.

56108. "Established place of business" means any permanent warehouse, building, or structure which is owned in fee or leased, at which the owner or lessee carries on a legitimate permanent business in good faith, and at which a stock of any farm product is stored or kept in quantities which are usually carried and reasonably adequate to meet the requirements of the business. It does not mean any tent, temporary stand, or other temporary structure, or permanent structure which is occupied pursuant to a temporary arrangement.

56109. "Farm product" includes every agricultural, horticultural, viticultural, and vegetable product of the soil, poultry and poultry products, livestock and livestock products, bees and apiary products, hay, dried beans, honey, and cut flowers. It does not, however, include any timber or timber product, or any milk product which is subject to the licensing and bonding provisions of Chapter 2 (commencing with Section 61801), Part 3, Division 21 of this code.

56110. "Producer" means any person that is engaged in the business of growing or producing any farm product.

Article 2. General Provisions

56131. The marketing of agricultural commodities within this state is hereby declared to be affected with a public interest. The provisions of this chapter are enacted in the exercise of the police powers of this state for the purpose of protecting the health, peace, safety, and general welfare of the people of this state.

56132. The director may publish in pamphlet form as often as he thinks necessary a list of all commission merchants, dealers, brokers, cash buyers, and agents that are licensed pursuant to this chapter together with all necessary regulations which concern the enforcement of this chapter.

56133. Any money in the Department of Agriculture Fund which was derived pursuant to this chapter or Chapter 6 (commencing with Section 55401) of this division may be expended for the administration and enforcement of any or all of the provisions of such chapters, notwithstanding any other provision of law which limits the expenditure of any such money to the specific purposes or to the administration or enforcement of each of such chapters separately.

56134. Civil suits and criminal prosecutions which arise by virtue of any provision of this chapter may be commenced and tried in any of the following:

(a) The county where the product was received by the commission merchant, dealer, broker, cash buyer, or agent.

(b) The county in which the principal place of business of such commission merchant, dealer, broker, cash buyer, or agent is located.

(c) The county in which the violation of this chapter occurred.

56135. If any clause, sentence, paragraph, or part of this chapter is for any reason, adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this chapter, but shall be confined in its operation to the clause, sentence, paragraph, or part of this chapter which is directly involved in the controversy in which such judgment is rendered.

Article 3. Exceptions

56161. This chapter does not apply to or include any of the following:

(a) Any nonprofit cooperative association which is organized and operating pursuant to Chapter 1 (commencing with Section 54001) of this division or similar law of any other state, the District of Columbia, or the United States, or the agents of such organizations in the performance of their duties as such, except as to that portion of the activities of such organization, or agent, which involves the handling or dealing in any farm product of any nonmember of such organization.

(b) Any person or exchange that buys, receives, or otherwise handles any farm product as a processor, as that term is defined in Section 55407.

(c) Any person or exchange that deals in livestock and operates at a public livestock market if it is subject to and operates under a bond which is required by the United States to secure the performance of its obligations.

(d) Any retail merchant that has a fixed or established place of business in this state. This exemption of retail merchants does not, however, apply to retail merchants that also are engaged in the business of selling at wholesale any farm product which is purchased from a producer or to any transaction wherein possession of any farm product is obtained from a producer and the farm product is sold to another person without being handled in the regular course of a retail business which is conducted at a fixed and established place of business.

(e) Any person that is licensed as a slaughterer pursuant to Article 2 (commencing with Section 22031), of Chapter 10, Division 10 of this code if the livestock which are handled by such slaughterer are slaughtered at the place of business of the slaughterer. Any slaughterer that handles livestock upon a consignment basis is not, however, exempt from the bonding provisions of this chapter.

(f) Any person that buys any farm product for his own use or consumption.

(g) Any person, not otherwise required to be licensed pursuant to this chapter, that buys or otherwise acquires possession of any farm product from a nonprofit cooperative association to which subdivision (a) of this section is applicable.

Article 4. Licenses

56181. Except as otherwise provided in Sections 55610 and 55863, a person shall not act as a commission merchant, dealer, broker, cash buyer, or agent unless such person has obtained a license as provided in this chapter.

56182. Every person, before acting as a commission merchant, dealer, broker, cash buyer, or agent, shall file an application with the director for a license to transact the busi-

ness of commission merchant, dealer, broker, cash buyer, or agent, as the case may be. The application shall be accompanied by the application fee which is provided in Article 17 (commencing with Section 56571) of this chapter for each specified class of business. A separate application shall be filed for each class of business.

56183. The application shall in each case state all of the following:

(a) Every class of farm products which the applicant proposes to handle.

(b) The full name of the person that is applying for such license. If the applicant is a firm, exchange, association, or corporation, the full name of each member of the firm, or the names of the officers of the exchange, association, or corporation shall be given in the application.

(c) The principal business address of the applicant in this state and elsewhere.

(d) The name of each person authorized to receive and accept service of summons and legal notices of all kinds for the applicant.

56184 In addition to the general requirements which are applicable to all classes of applications as set forth in this article, the following requirements shall apply to the class of applications which is designated:

(a) Each application for a commission merchant's license shall include a complete schedule of commissions, together with an itemized listing of all charges for all services. Such designated commissions and charges shall not be changed or varied for the license period except by written contract between the parties or by written notice to the director. If they are changed by a written contract, such charges shall be clearly set forth in detail in such written contract. Any services which are rendered for which charges are made, if not listed in the schedule on the application, shall be rendered on a strictly cost basis.

(b) Each application for an agent's license shall include such information as the director may consider proper or necessary, and shall include the name and address of applicant, and the name and address of the commission merchant, dealer, broker, or cash buyer that is represented or sought to be represented by the agent, and the written endorsement or nomination of such commission merchant, dealer, broker, or cash buyer.

56185. Fraud or misrepresentation in making any application for a license pursuant to this chapter shall ipso facto work a revocation of any license which is granted pursuant to this chapter.

56186. The director shall require the applicant to make a showing of character, responsibility, and good faith in seeking to carry on the business which is stated in the application, and may make investigations, hold hearings, and make determinations respecting such matters.

56187. If the applicant is a corporation or partnership, it shall likewise satisfy the director of the character, responsibility, and good faith of any or all persons connected with it in a responsible or managing position, such as manager, superintendent, officer, or director of a corporation, or manager, superintendent, or member of a partnership. The failure of any such person to satisfy the director of his character, responsibility, or good faith may be considered by the director as adverse to a showing of such qualifications by such corporation or partnership, and is a good and sufficient grounds for the denial of an application for license or the renewal of a license.

56188. Previous conviction of a felony, previous bankruptcy, voluntary or involuntary, or previous violation of this chapter shall be considered by the director as adverse to a showing of such character, responsibility, or good faith on the part of any applicant, or on the part of any manager, superintendent, director, or officer of an applicant corporation, or on the part of any superintendent, manager, or member of an applicant partnership. The same considerations are applicable to an individual applicant who has previously been in a responsible or managing position with a corporation or partnership which has suffered revocation or suspension of license by reason of any violation of this chapter or by reason of any violation of Chapter 6 (commencing with Section 55401) of this division.

56189. Any person that has been adjudged a bankrupt, or any person against whose bondsman a claim has been collected by the director pursuant to any provision of this chapter or Chapter 6 (commencing with Section 55401) of this division, and that has not made full settlement with all producer-creditors, shall not be licensed by the director for three years from the date of such adjudication or collection.

56190. The director, after due hearing, may refuse to grant any license which is provided by this chapter, and may upon his own motion, after hearing, or upon a verified complaint which is signed and filed with him by any interested person refuse renewal of any such license if he is satisfied that the applicant or the licensee has violated any provision of this chapter.

56191. The director may also refuse to grant any license or the renewal of any license in any of the following cases:

(a) If he is satisfied, after hearing as provided in this chapter, that the applicant is violating any provision of this chapter.

(b) He determines that the applicant or any person connected with the applicant has violated any provision of this chapter or Chapter 6 (commencing with Section 55401) of this division.

(c) If he is satisfied, after hearing or investigation, that the applicant has become bankrupt or insolvent and is thereby unable to pay producer-creditors of the applicant, or producers with whom the applicant has executory or executed contracts for the purchase of any farm product, or for the handling of any farm product on consignment.

56192. Except as otherwise provided in Section 56189, 56190, 56191, or 56221, upon the filing of the application and the payment of the application fee, the director shall, if he is satisfied as to the character, responsibility, and good faith of the applicant, or the persons in a responsible or managing position of a corporate or a partnership applicant, issue to such applicant a license that entitles the applicant to conduct the business which is described in the application at the place that is named in the application for a year from the date of the license or until it is suspended or revoked for cause. The license of any agent shall, however, expire upon the date of expiration of the license of the principal for whom the agent acts.

56193. Each licensed commission merchant, dealer, broker, cash buyer, or agent shall post his license or a copy of it in his office or salesroom in plain view of the public.

56194. The director shall issue to any dealer or cash buyer that collects or receives any farm product from any producer by truck, a card which bears the signature of the dealer or cash buyer, and certifies that he is licensed as a produce dealer or cash buyer. The dealer or cash buyer shall show such card upon the request of any interested person.

56195. The director may also issue to each agent a separate card for each principal which the agent represents, which shall bear the signature of the agent. Any agent shall show the card upon the request of any interested person. Any agent that displays a void or expired license card is guilty of a misdemeanor, punishable as provided in Section 56631 of this chapter.

56196. All indicia of the possession of a license are at all times the property of this state. Each licensee is entitled to the possession of them only for the duration of the license.

Article 5. Commission Merchant's and Dealer's Bonds

56221. Before any license is issued to any commission merchant or dealer, the applicant shall execute and deliver to the director a surety bond which is executed by the applicant as principal and by a surety company qualified and authorized to do business in this state as surety in the following sum:

(a) If the application is for a commission merchant's license, the bond shall be in the sum of five thousand dollars ($5,000).

(b) If the application is for a dealer's license, the bond shall be in the sum of two thousand dollars ($2,000).

56222. The bond shall be conditioned upon compliance with the provisions of the chapter and upon the faithful and honest handling of farm products in accordance with this chapter.

56223. The bond shall be to the state in favor of the following:

(a) If the application is for a commission merchant's license, the bond shall be in favor of every producer-consignor of any farm product which is grown within this state.

(b) If the application is for a dealer's license, the bond shall be in favor of every producer-creditor of any farm product which is grown within this state.

56224. (a) Any producer-consignor of any farm product which is grown within this state that claims to be injured by the fraud, deceit, or willful negligence of any commission merchant may bring action upon the bond of such commission merchant against both principal and surety in any court of competent jurisdiction to recover the damages which are caused by such fraud, deceit, or willful negligence, or the failure to comply with the provisions of this chapter.

(b) Any producer-creditor of any farm product which is grown within this state that claims to be injured by the fraud, deceit, or willful negligence of any dealer may bring action upon the bond of such dealer against both principal and surety in any court of competent jurisdiction to recover the damages which are caused by such fraud, deceit, or willful negligence, or the failure to comply with the provisions of this chapter.

56225. If a commission merchant fails to pay the producer-consignor creditors for any farm product which is received from such consignors to be sold, or a dealer fails to pay producer-creditors for any farm product which is received from such producers, the director shall proceed forthwith to ascertain the names and addresses of all consignor creditors of such commission merchant, or producer-creditors of such dealer, together with the amounts due and owing to them and each of them by such commission merchant or dealer, and shall request all such consignor creditors or producer-creditors to file a verified statement of their respective claims with the director. Such request shall be addressed to each known consignor creditor or producer-creditor at his last known address.

56226. If a consignor creditor or producer-creditor fails, refuses, or neglects to file in the office of the director his verified claim as requested by the director within 60 days from the date of such request, the director is thereupon relieved of further duty or action pursuant to this article on behalf of such consignor creditor or producer-creditor.

56227. If by reason of the absence of records or other circumstances which make it impossible or unreasonable for the director to ascertain the names and addresses of all such consignor creditors or producer-creditors, the director, after exerting due diligence and making reasonable inquiry to secure

such information from all reasonable and available sources, may make demand on the bond on the basis of information which is then in his possession, and thereafter is not liable or responsible for claims or the handling of claims which may subsequently appear or be discovered.

56228. Upon ascertaining all claims and statements in the manner which is set forth in this article, the director may make demand upon the bond on behalf of those claimants whose statements have been filed, and may settle or compromise the claims with the surety company on the bond. He may in such cases execute and deliver a release and discharge of the bond which is involved.

56229. Upon the refusal of the surety company to pay the demand, the director shall bring an action on the bond in behalf of the consignor creditors or producer-creditors.

56230. Upon any action being commenced on the bond, the director may require the filing of a new bond and immediately upon the recovery in any action on such bond such commission merchant or dealer shall file a new bond. If a commission merchant or dealer fails to file a new bond within 10 days in either case, such failure constitutes grounds for the suspension or revocation of his license.

Article 6. Financing Charges

56251. A commission merchant, dealer, or broker that finances, lends money, or otherwise makes advances of money or credits to another commission merchant, dealer, or broker may not deduct from the proceeds of any farm product which is marketed, sold, or otherwise handled by him on behalf of or for the account of the commission merchant, dealer, or broker to whom such money, loans, advances or credits are made, an amount which exceeds a reasonable commission or brokerage, together with the usual and customary selling charges or costs of marketing, or both. He may not otherwise divert to his own use or account or in liquidation of such loans, advances, or credits the moneys, returns, or proceeds accruing from the sale, handling, or marketing of any farm product which is handled by him on behalf of or for the account of the commission merchant, dealer, or broker to whom or for whom such loans, advances, or credits are made.

Article 7. Commission Merchants

56271. Every commission merchant, that receives any farm product for sale as a commission merchant, shall promptly make and keep a correct record which shows in detail all of the following with reference to the handling, sale, or storage of such farm product:

(a) The name and address of the consignor.

(b) The date it was received.

(c) The condition and quantity upon arrival.

(d) Date of such sale for the account of the consignor.

(e) The price for which it was sold.

(f) An itemized statement of the charges to be paid by the consignor in connection with the sale.

(g) The names and addresses of all purchasers if the commission merchant has any financial interest in the business of the purchasers, or if the purchasers have any financial interest in the business of the commission merchant, directly or indirectly, as holder of the other's corporate stock, as copartner, as lender or borrower of money to or from the other, or otherwise. Such interest shall be noted in such records following the name of any such purchaser.

(h) A lot number or other identifying mark for each consignment, which number or mark shall appear on every sales tag or other essential record, or both, which is needed to show what the produce was actually sold for.

(i) Any claim which has been or may be filed by the commission merchant against any person for overcharges or for damages which result from the injury or deterioration of such farm product by the act, neglect, or failure of such person. Such records shall be open to the inspection of the director and the consignor of the farm product for whom such claim is made.

56272. If requested by his consignor, a commission merchant shall, before the close of the next business day following the sale of any farm product which is consigned to him, transmit or deliver to the owner or consignor of the farm product a true written report of such sale, which shows the amount sold and the selling price.

56273. Remittance in full of the amount which is realized from such sales, including all collections, overcharges, and damages, less the agreed commission and other charges, together with a complete account of sales, shall be made to the consignor within 10 days after receipt of the moneys by the commission merchant, unless otherwise agreed in writing.

56274. In the account, the names and addresses of purchasers need not be given, except as required in Section 56271. If, however, a commission merchant has entered into a written contract with two or more owners or consignors which contract provides that the returns for any farm product which is sold for the account of such owners or consignors shall be pooled on a definite basis as to size or grade, or both, during a certain period of time, a commission merchant is required to render an account of sales, which shows the net average pool return on each size or grade, or both, from sales which are made and shall keep a correct record of such sales, which shows in detail all information as required in Section 56271.

56275. Every commission merchant shall retain a copy of all records which cover each transaction, for one year from

the date of the transaction, which copy shall at all times be available for, and open to, the confidential inspection of the director, consignor, or the authorized representative of either.

56276. If there is any dispute or disagreement between a consignor and a commission merchant which arises at the time of delivery as to condition, quality, grade, pack, quantity, or weight of any lot, shipment, or consignment of any farm product, the department shall furnish, upon the payment of a reasonable fee for it by the requesting party, a certificate which establishes the condition, quality, grade, pack, quantity, or weight of such lot, shipment, or consignment.

56277. Such certificate is prima facie evidence in all courts of this state as to the recitals in it. The burden of proof is upon the commission merchant to prove the correctness of his accounting as to any transaction which may be questioned.

56278. The sale of any farm product which is made by a commission merchant for less than the current market price to any person with whom he has any financial connection, directly or indirectly as owner of its corporate stock, as copartner, or otherwise, or any sale out of which such commission merchant receives, directly or indirectly, any portion of the purchase price, except the commission which is named in the licensee's application or in a specific contract with the consignor, is prima facie evidence of fraud within the meaning of this chapter.

Article 8. Dealers

56301. Every dealer that purchases any farm product from the producer of the farm product shall promptly make and keep for one year a correct record which shows in detail all of the following:

(a) The name and address of the grower.

(b) The date received.

(c) The price to be paid.

(d) An itemized statement of any charges which are paid by the dealer for the account of the producer.

56302. Every dealer shall pay for any farm product which is delivered to him at the time and in the manner which is specified in the contract with the producer. If no time is set by such contract, or at the time of the delivery, he shall pay for the farm product within 30 days from the delivery or taking possession of such farm product.

Article 9. Brokers

56331. Every broker, upon negotiating the sale of any farm product, shall issue to both buyer and seller a written memorandum of sale, which shows the price, date of delivery, quality, and other details which are concerned in the transaction. A copy of this memorandum shall be retained by the broker for one year.

Article 10. Claims of Dealers or Cash Buyers

56351. A claim may not be made against the seller of any farm product by a dealer or cash buyer pursuant to this chapter, and no credit may be allowed to such dealer or cash buyer against a producer of any farm product by reason of damage to, or loss, dumping, or disposal of any farm product which is sold to such dealer or cash buyer, in any payment, accounting, or settlement which is made by the dealer or cash buyer to the producer, unless the dealer or cash buyer has secured and is in possession of a certificate, which is issued by a commissioner, as defined in Section 26, a county health officer, the director, a duly authorized officer of the State Board of Health, or by some other official now or hereafter authorized by law, to the effect that the farm product which is involved has been damaged, dumped, destroyed, or otherwise disposed of as unfit for human consumption or as in violation of the fruit and vegetable standards which are contained in Division 17 (commencing with Section 42501) of this code.

56352. The certificate is not valid as proof of a proper claim, credit, or offset unless it is issued within 24 hours of the receipt by the dealer or cash buyer of the farm product which is involved.

Article 11. Examinations and Audits

56381. The director on his own motion may make examinations and audits of the books and records of any licensee which pertain to the purchase, or to the handling and accounting for, of any farm product which is purchased or received on consignment from the producer. He may examine and audit all pertinent books, records, weight tags, receipts, ledgers, papers, contracts, and other documents of the licensee which show or tend to show facts regarding the number and status of accounts of growers that are doing business with such licensee.

56382. If the examination discloses evidence of any violation of this chapter, the director may issue a complaint which is directed against the licensee, either on his own behalf or on behalf of producers that are affected by such violation, together with such other process for the enforcement of the provisions of this chapter as is provided in this chapter.

56383. The failure or refusal of any licensee to produce and make available to the director any such books or records, or otherwise to obstruct such examination or audit, is a good and sufficient ground for the suspension or revocation of his license.

Article 12. Complaints by Producers

56411. For the purpose of enforcing the provisions of this chapter, the director may receive verified complaints from producers against any commission merchant, dealer, broker,

cash buyer, or agent or any person, that assumes or attempts to act as such. Upon receipt of any such verified complaint, he may make any and all necessary investigations relative to the complaint.

56412. The director may administer oaths of verification on the complaints

56413. He shall have free and unimpeded access at all times to any building, yard, warehouse, or storage or transportation facility in which any farm product is kept, stored, handled, or transported.

56414. He may do all of the following:

(a) Administer oaths and take testimony under oath.

(b) Issue subpoenas which require the attendance of witnesses before him, together with all books, memoranda, papers, and other documents, articles, or instruments.

(c) Compel the disclosure by such witnesses of all facts which are known to them relative to the matters under investigation.

56415. All parties disobeying the orders or subpoenas of the director are guilty of contempt and shall be certified to the superior court of the state for punishment for such contempt.

56416. Copies of records, audits and reports of audits, inspection certificates, certified reports, findings, and all papers on file in the office of the director are prima facie evidence of the matters which are contained in them, and may be admitted into evidence in any hearing which is provided in this chapter.

Article 13. Investigations and Hearings

56441. The director on his own motion may, or upon the verified complaint of any interested party shall, investigate, examine, or inspect any of the following:

(a) Any transaction which involves solicitation, receipt, sale, or attempted sale of any farm product by any person that is acting or assuming to act as a commission merchant, dealer, broker, cash buyer, or agent.

(b) Failure to make proper and true account of sales and settlement of sales as required by this chapter.

(c) The intentional making of false statements as to condition and quantity of any farm product which is received or in storage.

(d) The intentional making of false statements as to market conditions.

(e) The failure to make payment for any farm product within the time which is required by this chapter.

(f) Any and all other injurious transactions.

56442. In furtherance of any such investigation, examination, or inspection, the director may examine that portion of the ledgers, books, accounts, memoranda and other docu-

ments, farm products, scales, measures, and other articles and things which are used in connection with the business of the person which relate to the transactions which are involved.

56443. If a producer-consignor or seller of any farm product fails to obtain settlement satisfactory to him in any transaction after having notified the consignee, or buyer, a verified complaint may be filed with the director who shall undertake to effect a settlement. If he fails to effect such a settlement, he shall call a hearing as provided for in this article.

56444. Upon the filing of such a verified complaint, the director shall cause a copy of it, together with a notice of the time and place of hearing of such complaint to be served personally or by mail upon each person that is named as a respondent in the verified complaint. Such service shall be made at least 10 days before the hearing.

56445. The hearing shall be held in one of the following places which is selected by the director:

(a) The city or place in which is situated the principal place of business of the licensee or respondent.

(b) The city or place in which the transaction or violation which is complained of is said to have occurred.

(c) The county seat of the county in which the transaction or violation complained of is said to have occurred.

(d) The nearest office of the department.

56446. At the time and place which is appointed for the hearing, the director shall hear the parties to the complaint.

56447. At the conclusion of the hearing, the director shall enter in his office at Sacramento a decision which either dismisses such complaint or specifies the facts which are established on such hearing.

56448. The decision may include an order suspending or revoking the license which is held by the respondent, or affixing such other conditional and probationary orders as may be proper for the enforcement of this chapter. A copy of the decision shall be furnished to the licensee and complainant.

56449. If either party to the hearing requests a continuance after due notice, the party that requests the continuance shall make such request 48 hours prior to the time of hearing. The party that requests such continuance is required to pay the costs which are attached to such continuance.

56450. This article does not limit the power of the director, after hearing, to suspend or revoke a license pursuant to Section 56531 if he is satisfied of the existence of any of the facts which Article 18 (commencing with Section 56601) of this chapter makes a violation of this chapter.

Article 14. Procedure Governing Hearings

56471. Before a hearing has commenced, the director shall issue subpoenas and subpoenas duces tecum at the request of any party in accordance with the provisions of Section 1985 of the Code of Civil Procedure After the hearing has com-

menced, the director may issue subpoenas and subpoenas duces tecum.

56472. The process which is issued pursuant to Section 56471 extends to all parts of the state and shall be served in accordance with the provisions of Sections 1987 and 1988 of the Code of Civil Procedure. A witness is not obliged to attend at a place out of the county in which he resides except when the distance is less than 100 miles from his place of residence, or the director, upon affidavit of any party which shows that the testimony of such witness is material and necessary, has endorsed on the subpoena an order which requires the attendance of such witness.

56473. Every witness who appears pursuant to a subpoena, except a party or an officer or employee of the state or any political subdivision of the state, shall receive fees. Every witness who appears pursuant to subpoena, except a party, shall receive mileage in the same amount and under the same circumstances as prescribed by law for witnesses in civil actions in a superior court.

56474. Oral evidence shall be taken only on oath or affirmation.

56475. Each party shall have all of the following rights:

(a) Call and examine witnesses.

(b) Introduce exhibits.

(c) Cross-examine opposing witnesses on any matter which is relevant to the issues even though that matter was not covered in the direct examination.

(d) Impeach any witness regardless of which party first called him to testify.

(e) Rebut the evidence against him. If the respondent does not testify in his own behalf he may be called and examined as if under cross-examination.

56476. The hearing need not be conducted according to technical rules which relate to evidence and witnesses. Any relevant evidence shall be admitted if it is the sort of evidence on which responsible persons are accustomed to rely in the conduct of serious affairs, regardless of the existence of any common law or statutory rule which might make improper the admission of such evidence over objection in civil actions. The rules of privilege shall be effective to the same extent that they are now or hereafter may be recognized in civil actions, and irrelevant and unduly repetitious evidence shall be excluded.

Article 15. Contempt

56501. If any person in any proceedings before the director disobeys or resists any lawful order, refuses to respond to a subpoena, refuses to take the oath or affirmation as a witness or thereafter refuses to be examined, or is guilty of misconduct during a hearing or so near the place of the

hearing as to obstruct the proceeding, the director shall certify the facts to the superior court in and for the county where the proceedings are held.

56502. The court shall thereupon issue an order which directs the person to appear before the court and show cause why he should not be punished as for contempt. The order and a copy of the certified statement shall be served on the person. Thereafter the court shall have jurisdiction of the matter.

56503. The same proceedings shall be had, the same penalties may be imposed and the person charged may purge himself of the contempt in the same way, as in the case of a person who has committed a contempt in the trial of a civil action before a superior court.

Article 16. Suspension or Revocation of Licenses

56531. The director may suspend or revoke any license, as the case may require, if after a hearing as provided in this chapter, he finds that the licensee has violated this chapter.

56532. The director, upon his own motion, after hearing, or upon a verified complaint which is signed and filed with him by any interested person, may suspend or revoke any such license, as the case may require, if he is satisfied that the licensee has violated any provision of this chapter.

The director may also, after hearing, suspend or revoke a license pursuant to Section 56531 if he is satisfied of the existence of any of the facts which Article 18 (commencing with Section 56601) of this chapter makes a violation of this chapter.

56533. Previous violation by the licensee, or by any person that is connected with him or it, of any provision of this chapter, or Chapter 6 (commencing with Section 55401), of this division is a good and sufficient ground for the suspension or revocation of a license.

56534. The director, after hearing, or investigation may suspend or revoke any license as the case may require, if he is satisfied that the licensee has become bankrupt or insolvent, and is thereby unable to pay producer-creditors of the licensee, or producers with whom the licensee has executory or executed contracts for the purchase of any farm product, or for the handling of any farm product on consignment.

56535. In any case which is mentioned in Section 56534, if the director is satisfied that to permit the dealer or commission merchant to continue to purchase or to receive further shipments or deliveries of any farm product would be likely to cause serious and irreparable loss to producer-creditors, or to producers with whom the dealer or commission merchant has such contracts, the director may shorten the time which is provided for hearing upon an order to show cause why

the license of the dealer or commission merchant should not be forthwith suspended or revoked.

56536. The time of notice of such hearing shall in no event be less than 24 hours. The director shall within that period call a hearing, at which the dealer or commission merchant proceeded against shall be ordered to show cause why his or its license should not be suspended, or revoked, or continued under such conditions and provisions, if any, as the director may consider just and proper and for the protection of the best interests of the producer-creditors that are involved.

56537. The hearing, in the case of such emergency, may be called upon written notice, such notice to be served personally or by mail on the dealer or commission merchant that is involved, and may be held at the nearest office of the director or at such place as may be most convenient at the discretion of the director, for the attendance of all parties involved.

56538. Any order suspending or revoking a license may, within the discretion of the director, be made conditional upon the settlement, adjustment, or satisfaction of the consequence of the violation which is specified, and the operation of such an order may be deferred for such purpose. Any such order may contain provisions for modification or dismissal of the order upon presentation to the director of evidence that the matter of complaint has been settled, adjusted, or withdrawn at any time before such order becomes final.

56539. After any decision, including any conditional or probationary orders, if the licensee does not comply with any of such orders, the director may thereupon issue to and serve upon the licensee an order which directs the licensee to show cause why his license should not be suspended or revoked for the failure to comply with the conditional or probationary orders.

56540. A copy of the order to show cause, together with the notice of the time and place of hearing upon the order, shall be served personally or by mail upon the licensee. The order shall refer to an attached copy of the conditional or probationary orders in such a way as to advise and inform the licensee of the charge or violation upon which the order is based and pursuant to which it is issued. Such service shall be made at least 10 days before the hearing.

56541. The hearing shall be held in one of the following places which is selected as the place of the hearing by the director:

(a) The city or place in which the principal place of business of the respondent is situated.

(b) The city or place in which the transaction or violation which is complained of is said or charged to have occurred.

(c) The county seat of the county in which the transaction or violation complained of is said or charged to have occurred.

(d) The nearest office of the department.

56542. At the time and place which is appointed for such hearing, the director shall hear the matter set forth in the order, and the showing of the licensee.

56543. At the conclusion of the hearing, the director shall enter in his office at Sacramento an order and decision which specifies the facts, dismissing the order to show cause, or directing the suspension or revocation of the license or licenses held by the licensee, or making such further conditional or probationary orders as the director may deem proper, upon the evidence which is presented at the hearing. A copy of the order and decision shall be furnished to the licensee.

Article 17. Fees

56571. Except as otherwise provided in this article or in Section 55863, each applicant, for filing the application for a license, shall pay the following fee which is prescribed for such license:

(a) Commission Merchants. Eighty dollars ($80) for each year. A person that is licensed as a slaughterer pursuant to Article 2 (commencing with Section 22031), Chapter 10, Division 10 of this code is, however, entitled to be licensed as a commission merchant without payment of any further fees.

(b) Dealers. Eighty dollars ($80) for each year.

(c) Brokers. Eighty dollars ($80) for each year.

(d) Cash Buyers. Eighty dollars ($80) for each year.

(e) Agents. Ten dollars ($10) for each license period of the principal.

56572. If any commission merchant, dealer, broker, or cash buyer does not apply for the renewal of a preexisting license on or before the date of the expiration of the license, a penalty of ten dollars ($10) shall be added to the original fee of eighty dollars ($80), and shall be paid by the applicant before the renewal license may be issued.

56573 Any person that has applied for and obtained a license within the classification of commission merchant, dealer, broker, cash buyer, in the manner and upon payment of the fee which is set forth in Section 56571, may apply for and secure a license in any or all of the remaining such classifications upon payment of a further fee in the amount of twenty-five dollars ($25) for each additional classification for which application is made, and upon further complying with those provisions of this chapter which regulate the licensing of the other particular classification that is involved.

56574. Any person that has applied for and obtained a license within the classification of commission merchant, dealer, broker, or cash buyer, in the manner and upon the payment of the fee which is set forth in Section 56571 may apply for and secure a license as processor pursuant to Chapter 6 (commencing with Section 55401) of this division, by filing an application which is accompanied by a fee in the amount of thirty-five

dollars ($35) and by further complying with those provisions of Chapter 6 of this division, which regulate the licensing of processors. This license shall be known as a "conjunctive processor's license."

56575. Every license which is held by any licensee pursuant to this chapter shall automatically expire on the expiration date of the original license for which the license fee of eighty dollars ($80) was paid.

56576. All license fees which are collected pursuant to this chapter shall be paid into the State Treasury monthly and shall be credited to the Department of Agriculture Fund and, except as otherwise provided in Section 56133, shall be expended in carrying out this chapter.

Article 18. Violations

56602. It is a violation of this chapter if the applicant or licensee has made any fraudulent charges or returns for the handling, sale, or storage of, or for rendering any service in connection with the handling, sale, or storage of any farm product.

56603. It is a violation of this chapter if the applicant, or licensee, has failed or refused to render a true account of sales, or to make a settlement on the sales, or to pay for any farm product which is received, within the time and in the manner which are required by this chapter.

56604. It is a violation of this chapter if the applicant, or licensee, has made any false statement as to the condition, quality, or quantity of any farm product which is received, handled, sold, or stored by him.

56605. It is a violation of this chapter if the applicant, or licensee, directly or indirectly, has purchased for his, or its, own account any farm product which is received by him upon consignment without prior authority from consignor together with the price fixed by the consignor or without promptly notifying the consignor of such purchase. This does not prevent any commission merchant from taking to account of sales, in order to close the day's business, miscellaneous lots of parcels of any farm product which remains unsold, if such commission merchant forthwith enters such transaction on his account of sales.

56606. It is a violation of this chapter if the applicant, or licensee, has intentionally made any false or misleading statement as to the conditions of the market for any farm product.

56607. It is a violation of this chapter if the applicant, or licensee, has made any fictitious sale or has been guilty of collusion to defraud the producer.

56608. It is a violation of this chapter if a commission merchant to whom any consignment is made has reconsigned such consignment to another commission merchant and has received, collected, or charged by such means more than one

commission for making the sale of such consignment for the consignor, unless by written consent of such consignor.

56609. It is a violation of this chapter if the licensee was intentionally guilty of fraud or deception in the procurement of such license.

56610. It is a violation of this chapter if the licensee or applicant has failed or refused to file with the director a schedule of his charges for services in connection with produce which is handled on account of, or as an agent of, another.

56611. It is a violation of this chapter if the applicant, or licensee, has indulged in any unfair practice.

56612. It is a violation of this chapter if the licensee has rejected, without reasonable cause, or has failed or refused to accept, without reasonable cause, any farm product which is bought or contracted to be bought from a producer by such licensee, or failed or refused, without reasonable cause, to furnish or provide boxes or other containers, or hauling, harvesting, or any other service which is contracted to be done by the licensee in connection with the acceptance, harvesting, or other handling of such farm product, or has used any other device to avoid acceptance or unreasonably to defer acceptance of such farm product.

56613. It is a violation of this chapter if the licensee has otherwise violated any provision of this chapter.

56614. It is a violation of this chapter if the licensee has knowingly employed an agent, without causing the agent to comply with the licensing requirements of this chapter which are applicable to agents.

56615. It is a violation of this chapter if the applicant or licensee has in the handling of any farm product been guilty of fraud, deceit, or willful negligence.

56616. It is a violation of this chapter if the licensee has failed or refused, upon demand, to permit the director or his agents to make the investigations, examinations, or audits as provided in this chapter, or that the licensee has removed or sequestered any books, records, or papers which are necessary to any such investigations, examinations, or audits, or has otherwise obstructed them.

56617. It is a violation of this chapter if the licensee, without reasonable cause, has failed or refused to execute or carry out a lawful contract with a producer.

56618. It is a violation of this chapter if the licensee has failed or refused to keep and maintain the records as required by this chapter.

56619. It is a violation of this chapter if a dealer has obtained title to or possession, control, or delivery of any farm product from a producer of the farm product without having, in either case, executed a contract of purchase and sale, or a contract agreeing to purchase the farm product at a designated price to be paid by the dealer.

Article 19. Criminal Penalties

56631. Any misdemeanor which is specified in this article is punishable by a fine of not more than one thousand dollars ($1,000), or by imprisonment in the county jail for not more than one year, or by both.

56632. It is a misdemeanor for any person to assume or attempt to act, or to act, as a commission merchant, dealer, broker, cash buyer, or agent without a license.

56633. It is a misdemeanor for any person to impose any false charge for handling or services in connection with any farm product.

56634. It is a misdemeanor for any person to fail to account promptly, correctly, fully, and properly and to make settlement of accounts as provided in this chapter.

56635. It is a misdemeanor for any person to intentionally make any false or misleading statement as to market conditions.

56636. It is a misdemeanor for any person to make any fictitious sale or be guilty of collusion to defraud the producer.

56637. It is a misdemeanor for any person to directly or indirectly purchase for his own account, goods which are received by him upon consignment without prior authority from the consignor, or to fail to promptly notify the consignor of such purchases, if any, on his own account. This section does not, however, prevent any commission merchant from taking to account of sales, in order to close the day's business, any miscellaneous lot or parcel of any farm product which remains unsold, if such commission merchant forthwith enters such transaction on his account of sales.

56638. It is a misdemeanor for any person to intentionally make any false statement regarding the grade, conditions, markings, quality, or quantity of any goods which are shipped or packed in any manner.

56639. It is a misdemeanor for any person to fail to comply in every respect with the provisions of this chapter.

Article 20. Civil Remedies and Penalties

56651. The director may bring an action to enjoin the violation or the threatened violation of any provision of this chapter or of any order which is made pursuant to this chapter in the superior court in the county in which such violation occurs or is about to occur.

There may be enjoined in one proceeding any number of defendants that are alleged to be violating the same provisions or orders, although their properties, interests, residences, or places of business may be in several counties and the violations separate and distinct. Any proceeding which is brought pursuant to this section shall be governed in all other respects by the provisions of Chapter 3 (commencing

with Section 525), Title 7, Part 2 of the Code of Civil Procedure.

56652. Any person that violates any provision of this chapter is liable civilly in the sum of five hundred dollars ($500) for each and every violation. Such sum shall be recovered in an action by the director in any court of competent jurisdiction. All sums which are recovered pursuant to this section shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

CHAPTER 8. PRODUCE MARKETS

Article 1. Definitions

56801. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

56802. "Association" means an association of produce dealers which is organized to carry out the responsibilities of produce dealers which are imposed by this chapter.

56803. "City" includes city and county.

56804. "Commissioner," with respect to any matter which relates to a particular market, means the deputy labor commissioner who is in charge of the office of the Labor Commissioner which is located nearest to that market.

56805. "Director" means the Director of Industrial Relations.

56806. "Farm product" means any fruit, nut, vegetable, or berry.

56807. "Market" means the places of business, collectively, of produce dealers that operate in a city, or the vicinity of a city, and that deal in any farm product which is intended, in whole or in part, for ultimate sale for consumption in a fresh state within the city and the vicinity of the city. This chapter applies only to markets in which five or more produce dealers operate

56808. "Produce dealer" includes "commission merchant," as defined in Section 56105, and "dealer," as defined in Section 56107. It does not, however, include a "broker," as defined in Section 56103, nor "processor," as defined in Section 55407.

56809. "Registered unloader" means a person who unloads any farm product in a market. It does not, however, include any of the following:

(a) A producer of farm products, or his son, father, or regularly employed employee.

(b) The operator of any vehicle which is engaged in the transportation of any farm product to market if the operation of such vehicle is subject to the jurisdiction of the Public Utilities Commission and the rate which is charged for such transportation includes the charge for unloading the farm product which is so transported.

56810. "Union" means the labor union which has been recognized by the National Labor Relations Board, or other

governmental agency which has jurisdiction, as the bargaining agency for employees who are employed in a market.

Article 2. General Provisions

56831. It is the purpose of this chapter to promote the orderly marketing of farm products and the establishment of reasonable charges for unloading such products at markets in this state. It is declared that in some of the markets of this state the charges for unloading farm products have been found to be exorbitant and unreasonable and that this chapter is enacted to remedy such evils and in the interests of the public welfare.

56832. The director may make such regulations as he may deem necessary to carry out this chapter and to effectuate its purposes.

Article 3. Exceptions

56861. This chapter does not apply to any market in which less than five produce dealers operate.

56862. This chapter does not apply to any produce dealer at whose place of business every farm product which is delivered is unloaded without charge by employees of the produce dealer either with or without the assistance of the operator of the vehicle which transports such product or other persons who accompany the operator on such vehicle. This chapter does not prohibit any employee of a produce dealer from assisting in unloading any farm product without charge if registered unloaders are not available.

Article 4. Registered Unloaders

56891. Every person who unloads any farm product in a market and who is a registered unloader shall register his name, Federal Social Security number, and address and union affiliation, if any, with the commissioner. The commissioner shall supply each registered unloader with a card of registration. Each registered unloader shall carry such card at all times while employed or seeking employment in unloading any farm product in a market. A person within the definition of the term registered unloader shall not unload any farm product in a market unless he is registered as provided in this chapter.

56892. Every producer who transports any farm product to a market may register himself, his father, and his sons, and regular full-time employees, with the commissioner. Such registration shall show the name of the producer, the registration number and other means of identification of his own personally owned vehicles, and the relationship of the registrant to the producer.

This chapter does not prohibit a person so registered from unloading any farm product from a vehicle as to which he is so registered, and no such person is required to employ

any other person to unload or assist in unloading such farm product nor to pay for any services which are not requested to be performed. The commissioner shall supply each such registrant with an appropriate card, which the registrant shall carry at all times while engaged in unloading any farm product at a market.

56893. Every produce dealer that operates in a market is responsible for providing that registered unloaders sufficient in number to do the work which is required are available at all times when any farm product is being delivered to his place of business. He is also responsible for having on hand at his place of business at all such times a responsible person to receipt for any farm product which is unloaded at his place of business.

Article 5. Association of Produce Dealers

56921. In order to facilitate the carrying out of their responsibilities pursuant to this chapter, the produce dealers that operate in a market may organize an association. A produce dealer shall not be required to become or to be a member of such association, but any such association shall admit to membership any produce dealer that operates in the market. If a produce dealer is admitted to membership in the association, he shall not be subject to any assessment or payment except those which are necessary to carry out his responsibilities pursuant to this chapter.

56922. An association may do all of the following:

(a) Obtain a dispatching service from which registered unloaders may be sent to the places where their services are required.

(b) Act as the bargaining agent to establish with a union the scale of charges for unloading any farm product in the market in accordance with this chapter.

(c) Provide for watchman service to protect and give a receipt for any farm product which is delivered to a market at times when the market is not otherwise in operation.

56923. The costs of services of an association to its members for carrying out any of the activities which are provided for or required by this chapter are subject to review by the director. No cost or expenditure for any other purpose shall be payable by any produce dealer except on an entirely voluntary basis.

The director shall from time to time on his own motion, or at the request of a produce dealer, review the activities of the association to determine if any charge is made against any produce dealer in violation of this chapter.

Article 6. Charges for Unloading Produce

56951. Each produce dealer that operates within a market shall establish a scale of charges for unloading any farm prod-

uct which is transported to his place of business and shall post and maintain a legible copy of such scale in a conspicuous place at his place of business where it is readily visible at all times during which any farm product is delivered to such place of business.

56952. Any scale of charges which is established pursuant to this article may be modified from time to time in accordance with the method and procedure which is prescribed for establishing such scale.

56953. The scale of charges which is established shall be the standard charge for unloading any farm product in the market.

56954. A person shall not charge or receive any payment for unloading any farm product in excess of the standard charge which is established for the market.

56955. The scale of charges shall be established as follows:

(a) If all the produce dealers in a market, or a majority of such produce dealers, either individually or through group representation, have an agreement with a union, the scale of charges shall be that which is prescribed in such agreement and approved as provided in this chapter. If an agreement which covers any employees of produce dealers in a market does not cover persons who unload farm products, the agreement shall be modified, or a new agreement made, to cover such persons.

(b) If there is no such union, the scale of charges shall be fixed by the produce dealers that operate within the market.

In either event, the scale of charges is subject to the approval of the director.

56956. Upon the determination of a scale of charges for a market, the scale of charges shall be transmitted to the director. The director shall examine such scale and shall compare it with any available information relative to the charges for similar work which is performed under similar conditions in the city in, or for, which the market is operated. The director may take into consideration any and all factors which are relevant to the determination of the reasonableness of such charges, including any rates of the Public Utilities Commission for the performance of work of a similar nature.

56957. If the director determines that the scale of charges is not unreasonable, he shall approve the scale and thereafter the scale of charges shall be the standard charge for unloading any farm product in the market.

56958. If the director finds that the scale of charges is unreasonable, he shall fix a time and place for a hearing on the matter.

Notice of such hearing shall be mailed to each produce dealer that operates in the market and to the officials of the union, if a union is involved. The director may also notify any or all producers of any farm product which is delivered to the market.

56959. At the hearing the director shall consider any relevant matters that may be presented and, at or after the conclusion of such hearing, he shall so adjust the scale or any item of the scale so that the scale is not unreasonably higher than the prevailing rate for similar work which is performed under similar conditions in the city or its vicinity.

Article 7. Penalties

56981. The violation of any provision of this chapter by any person is a misdemeanor.

56982. The violation of any provision of this chapter by a produce dealer is grounds for the revocation of his license, and the violation of any provision of this chapter by an association is grounds for the revocation of the license of each produce dealer that participates in such violation.

CHAPTER 9. DAIRY PRODUCE EXCHANGES

Article 1. Definitions and General Provisions

57101. "Dairy produce exchange" means any association of persons which is organized for the following purposes:

(a) Furnishing a medium for trading in butter, cheese, or eggs.

(b) Facilitating the marketing of any such product.

(c) Establishing the wholesale market value of any such product.

57102. The director may require such monthly or other periodical reports, records of market quotations, and other statistical information as may be necessary to him in administering this chapter. All such reports, statistics, or information which is pertinent to each dairy produce exchange which is licensed pursuant to this chapter shall be kept on file in the office of the director and subject to public inspection.

57103. The director shall have access to all records of every dairy produce exchange which is licensed pursuant to this chapter, and may appoint a representative to sit with the board of directors or other governing body of such exchange.

Article 2. Licenses

57131. It is unlawful for any person to establish or operate a dairy produce exchange unless he has first obtained from the director a license to do so.

57132. Every dairy produce exchange, and any person that desires to operate a dairy produce exchange, before engaging in such activity, shall file with the director a written application for a license, accompanied by the license fee which is prescribed by Section 57134. The application shall state all of the following information:

(a) The name under which the dairy produce exchange proposes to operate.

(b) The location of its place of business.

(c) The names of its officers, directors, and the persons, firms, corporations, or associations which constitute its membership.

(d) A certified copy of its articles of incorporation, its constitution and bylaws, and the rules and regulations and bases of trade under which it proposes to operate.

57133. The director shall examine the application, and if he finds that the applicant has fully complied with the provisions of this chapter, he shall issue a license which authorizes the applicant to operate a dairy produce exchange. The license shall recite in bold type that the issuance of the license is permissive only and does not constitute a recommendation or endorsement of the rules and regulations or bases of trade under which the applicant proposes to operate.

57134. For each license, the director shall charge the sum of one hundred dollars ($100), which sum shall accompany the application for the license. Except as otherwise provided in this chapter, each license which is issued by the director shall continue in effect so long as the licensee shall continue in business, and shall pay a fee of one hundred dollars ($100) annually to the director. Such fee is payable on the first Monday of each calendar year.

Article 3. Arbitration

57161. The director shall act as arbitrator in all cases of dispute or contention which concerns the maintenance or operation of any licensed dairy produce exchange, or the bylaws, rules, or regulations which pertain to it.

57162. Upon receipt of any verified complaint which concerns a licensed dairy produce exchange, the director shall proceed to make a thorough investigation. In this connection, the director:

(a) May conduct hearings, of which all interested parties shall receive due notice, and may require written statements which set forth the views of any or all contending parties.

(b) Shall invite the cooperation and solicit the opinion of the Federal Trade Commission and the Economic Research Service of the United States Department of Agriculture.

57163. On the basis of the information which is so obtained, the director shall prescribe a tentative rule which shall be effective in the operation of any licensed dairy produce exchange for not to exceed 90 days.

57164. If, after such trial period, it appears that the tentative rule operates in a fair and equitable manner, it shall then, upon order of the director, be made a permanent rule of such licensed dairy produce exchange.

57165. If, in the conduct of any such investigation, it appears that any unlawful act has been committed by any licensed dairy produce exchange, the director may initiate appropriate legal proceedings against such exchange.

Article 4. Investigations, Hearings, and Suspension or Revocation of Licenses

57191. The director may upon his own motion, and shall upon the verified complaint in writing of any person, investigate the actions of any dairy produce exchange and may temporarily suspend or permanently revoke any license which is issued pursuant to this chapter if the licensee is guilty of any of the following:

(a) Failure to supply all the information which is required by subdivisions a, b, c, and d of Section 57132.

(b) Making any false statement or misrepresentation of fact to the director.

(c) Fraud or deception in the application for or procurement of a license.

(d) Any other conduct, whether of the same or a different character than the conduct which is specified in this section, which is unlawful.

(e) Violation of any law or ordinance of the state or any city or county or the rules of the Federal Trade Commission which govern unfair trade practices in the handling of butter, cheese, or eggs.

57192. The proceedings shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code, and the director shall have all the powers which are granted in that chapter.

57193. If judicial review of the decision of the director is sought, the decision of the director shall remain in effect pending the determination of such review, unless the party that seeks the review files with the court a bond in a sum to be fixed by the court, in favor of the people and conditioned upon the faithful performance of all those things which are ordered to be done, or the faithful observance of such restraint as may be directed by the director

57194. The bond shall be for the benefit of any person that has dealings with the person that seeks the review. Any person so dealing with the person that seeks the review has the right to commence a suit on the bond in his own name against him and his sureties.

Article 5. Violations and Penalties

57221. Any person that operates a dairy produce exchange without a license is guilty of a misdemeanor and shall also pay to the state one hundred dollars ($100) for each and every day of such operation. Any money which is due the state pursuant to this section shall be recovered by an action at law brought by the Attorney General in the name of the people.

57222. Any person that makes any false statement in applying for a license or violates any rule or decision of the director which is authorized by this chapter is guilty of a misdemeanor.

DIVISION 21. MARKETING

PART 1. GENERAL PROVISIONS

CHAPTER 1. STATE MARKETING SERVICES

Article 1. Definitions and General Provisions

58001. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

58002 "Organization of producers and distributors" includes all corporations, societies, associations, and organizations of producers, producers and distributors, or distributors, cooperative or otherwise, which are formed for the purpose of facilitating the marketing of any product.

58003. "Product" means any agricultural, dairy, or farm product which is produced, grown, raised, manufactured, or processed within the state.

58004. All fees, charges, and costs which are collected under this chapter shall be paid into the State Treasury to the credit of the General Fund.

Article 2. Powers of the Director

58031. The director may act as adviser for producers and distributors, if requested, and assist them in economical and efficient distribution of any product at fair prices.

58032. The director may gather and disseminate impartial information which concerns supply, demand, prevailing prices, and commercial movements, including common and cold storage of any product.

58033. The director may promote, assist, and encourage the organization and operation of cooperative and other associations and organizations for improving the relations and services among producers, distributors, and consumers of any product, and protect and conserve the interests of the producers and consignors of products.

58034. The director may foster and encourage cooperation between producers and distributors of any product, in the interest of the general public.

58035. The director may foster and encourage the standardizing, grading, inspection, labeling, handling, storage, and sale of any product.

58036. The director may act as a mediator or arbitrator, if invited by both parties, in any controversy or issue that may arise between producers and distributors of any product.

58037. The director may certify, for the protection of owners, buyers, or creditors, if so requested, warehouse receipts for any product, verifying quantities and qualities of the product, and charge for such service, fees which are sufficient to make the service self-supporting.

58038. The director may issue labels on request of the producer, packer, canner, or distributor, for any product for which labels have not otherwise been authorized by law, pursuant to such regulations as he deems necessary and charge for such labels such fees as in his judgment are proper.

58039. The director may act on behalf of the consumers of any product in conserving and protecting their interests in every practicable way.

58040. The director may improve, broaden, and extend in every practicable way, the distribution and sale of any product of this state throughout the markets of the world.

58041. The director may promote in the interest of the producer, the distributor, and consumer, economical and efficient distribution and marketing of any product which is produced or processed within the state and to better effectuate the purposes of this article may attend necessary meetings and conferences in relation to any such product and may enter into cooperative agreements with the United States Department of Agriculture.

58042. The director may enter into any cooperative agreement with any department or agency of the federal government, or with any other state or agency of it, in order to effectuate the purposes of this division, Division 20 (commencing with Section 54001), or of any marketing law, including any marketing order, marketing program, regulation, or rule and regulation, which is issued under it, the responsibility for the administration and enforcement of which is with the director.

Article 3. Investigations

58061. The director may conduct investigations, make surveys, and assemble facts which are pertinent to marketing and to the formulation, administration, or amendment of any marketing order, agreement, or program which is authorized by any law now in effect or which may hereafter be enacted.

58062. The director may make pertinent investigations which concern the aggregate amount of any product which is held in common or cold storage. In connection with any such investigation, the director may inspect only the pertinent books and records of common or cold storage warehouses for the purpose of determining and publishing aggregate amounts of any product which is held in storage, and may issue subpoenas for the attendance of witnesses and the production of pertinent books, papers, accounts, documents, and testimony in any such investigation.

Article 4. Collection and Dissemination of Information

58091. The director shall provide for the collection, analysis, and dissemination of statistics and other information which relates to the production and marketing of farm products,

including processed farm products, which are produced in this state, such as, but not limited to, crop and livestock estimating and market news services.

58092. The director may establish such facilities and publish such bulletins and reports as are necessary and proper in keeping producers and handlers informed with regard to the supply, demand, and other economic conditions which affect the sale of any farm product which is produced in this state.

58093. The director shall cooperate with the Secretary of Agriculture, and with the appropriate office of the State of Oregon, to establish a market news service in the Klamath Basin.

CHAPTER 2. COOPERATIVE AGREEMENTS

Article 1. General Provisions

58201. It is the policy of this state to gain maximum benefits in behalf of agriculture from the results of research and service work performed by local, state, and federal governments through coordination and correlation of such activities.

58202. Since the Congress of the United States has recognized the value of marketing research, developmental, and service work through the enactment of agricultural marketing laws, including Public Law 733 (60 Stat. 966), and since Title II thereof embodies features of a nature akin to agricultural and regulatory service functions performed by the department, and inasmuch as financial cooperation in those phases of the marketing field is provided in Title II, it is hereby declared to be the purpose of this chapter to make possible a furtherance of intergovernmental cooperation in such marketing activities as will accrue advantageously to the agricultural industry of the state.

58203. The department is the proper state agency for such intergovernmental cooperation in those regulatory and service features contemplated by Public Law 733 (60 Stat. 966) and in relation to such other federal laws as may relate to the same and comparable activities.

Article 2. Powers of the Director

58231. The director may enter into cooperative agreements with the Secretary of Agriculture or the Administrator, Agricultural Marketing Act of 1946 (7 U.S.C., Sec. 1621 et seq.), or both, to develop projects or programs which are designed to improve, expand, and correlate the work of both agencies in any of the following:

(a) Federal-state cooperative crop reporting.
(b) Federal-state cooperative market news services.
(c) Seed and crop improvement.
(d) Agricultural products certification.
(e) Marketing orders and programs.

(f) Milk and milk products stabilization.
(g) Market enforcement.
(h) Agricultural trade.
(i) Agricultural commodities, grades, and standards.
(j) Prepackaging of, and special containers for, shipment of any farm product.

58232. The director may also enter into agreements with federal administrative committees established by the Secretary of Agriculture of the United States pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937 (50 Stat. 246), with advisory boards and program committees which are established by the director pursuant to Chapters 1 (commencing with Section 58601) and 2 (commencing with Section 59501), Part 2 of this division, with producers' cooperative marketing associations and other producer or handler organizations to assist financially or otherwise in the development of such projects or programs and in putting the results of such projects or programs into operation within this state.

58233. The director may receive and pay out money for the purposes which are mentioned in this article.

CHAPTER 3. VOID CONTRACTS AND RESTRAINT OF TRADE

Article 1. Void Contracts

58351. Any contract which is made for the purpose of injuring competitors and destroying competition under which the seller of any agricultural product agrees to pay or allow any brokerage charge, rebate, discount, or other credit, except an allowance for variation in quality, condition, or quantity, or any other form of compensation or credit by a seller to a buyer, or to an agent, employee, subsidiary, or affiliate of a buyer that buys to sell at retail and which is not paid, given, or allowed in like circumstances to all other buyers or to the agents, employees, subsidiaries or affiliates of other buyers, whether the same is paid or allowed directly or indirectly, is hereby declared to be against public policy and void.

58352. Advertising allotments or discounts by a seller to a buyer for bona fide advertising expenditures, however, are not included within such transactions which are against public policy and void.

58353. It is a misdemeanor for any person to take any part in any transaction which is declared by this article to be against public policy and void whether as seller, buyer, buyer's agent, employee, or subsidiary.

Article 2. Destruction of Foodstuffs in Restraint of Trade

58381. It is unlawful for any person to destroy, in restraint of trade, any fowl, animal, vegetable, or other stuff, product, or article which is customary food, or which is proper

for food, for human beings, and is in fit sanitary condition to be used as such.

58382. A person that receives any agricultural product, for sale on commission or for sale or exchange for the benefit of any other person, shall not destroy, abandon, discard as refuse, or dump, such product, without a permit in writing from the commissioner, county health officer, director, Secretary of the State Board of Health, or from some other official now or hereafter authorized by law to issue permits for the destruction of such product. Such permits, together with a detailed statement of every product which is destroyed pursuant to the permit, shall be kept on file by the person to whom they are issued.

58383. A copy of each such permit together with a copy of each such detailed statement shall, on the day such permit is issued, be served personally by the consignee, upon the consignor of the destroyed product, or in lieu of such personal service, shall on such day be served by the consignee on the consignor by depositing it in the post office, inclosed in a sealed envelope, postage fully prepaid, addressed to the consignor of the destroyed product at the consignor's address, if known, or if not known, then to the place where the shipment or consignment of such product originated.

CHAPTER 4. ASSIGNMENT OF DUES

58451. If any grower or producer of any farm product within this state voluntarily executes and causes to be delivered to a dealer or processor of farm products, either as a clause in a sales contract or other instrument in writing, a notice of assignment of dues to a nonprofit agricultural commodity organization directly representing the specific product involved, by which the processor or dealer is directed to deduct a sum from the price to be paid for such product and to pay the same over to such association as dues for the grower or producer, the processor or dealer shall deduct from the price to be paid for any farm product being sold by any such grower or producer to any such processor or dealer, the amount authorized and pay it over to the organization as assignee.

58452. No provision which is inserted in any contract that is prepared by a dealer or processor which makes an assignment of the dues described in Section 58451 ineffective is valid.

58453. An assignment of dues may not exceed 2 percent of the total value of the product which is delivered by the grower or producer to the dealer or processor.

58454. Payment need not be made under any assignment of dues pursuant to Section 58451 until the dealer or processor has available and under his control funds owing to the grower or producer that are sufficient in amount for making the payment of the dues involved. In the case of an annual product, such payment need not be made until the end of the product year.

PART 2. GENERAL MARKETING LAWS

CHAPTER 1. CALIFORNIA MARKETING ACT OF 1937

Article 1. Short Title and Definitions

58601. This chapter shall be known as "The California Marketing Act of 1937."

58602. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

58603. "Administrative rules and regulations" means rules and regulations that are applicable to a particular marketing order or agreement which are issued and made effective by the director pursuant to Article 18 (commencing with Section 59161) of this chapter.

58604. "Advertising and sales promotion" means, in addition to its ordinarily accepted meaning, trade promotion and activities for the prevention, modification, or removal of trade barriers which restrict the free flow of any commodity to market and may include the presentation of facts to, and negotiations with, state, federal, or foreign governmental agencies on matters which affect the marketing of any commodity that is included in any marketing order or marketing agreement which is made effective pursuant to the provisions of this chapter.

58605. "Commodity," except as otherwise provided in Section 58747, means any agricultural, horticultural (including floricultural), viticultural (including wine) or vegetable product which is produced in this state, any fish or seafood, or any class, variety, or utilization of such product, either in its natural state or as processed by a processor or as processed by a producer for the purpose of marketing such product. It includes bees and honey, manufacturing milk as such milk is defined in Section 32509, and any market milk which is used in the manufacturing of any dairy product or imitation dairy product in which the use of manufacturing milk is permitted by Division 15 (commencing with Section 32501) of this code. It does not, however, include timber or any timber product.

The Legislature hereby declares that the addition of the phrase "(including wine)" in this section is made for the purpose of clarification only and is in no wise to be construed or interpreted as an indication that wine is not a commodity as originally defined by Chapter 404, Statutes of 1937, and as heretofore amended. The Legislature further declares that at the time of the original enactment of the definition of the term "commodity" and at all times since, it intended that wine be, and wine was, included within the definition of the term. Every marketing order issued, signed, or declared effective prior to July 15, 1941, and every act of the director prior to such date which was performed pursuant to the provisions of

this chapter and consistent with the declarations which are contained in this paragraph are hereby confirmed, ratified, and validated.

58606. "Directly affecting" or "directly affected" is synonymous with "directly regulating" and "directly regulated," and means the direct application of regulations upon any person, including the requirement to pay assessments which are levied pursuant to any marketing order or marketing agreement which is issued by the director pursuant to this chapter. A requirement upon handlers to deduct and remit to the director assessments that are owed by producers under a marketing order or marketing agreement which is applicable upon producers only, does not, however, directly regulate such handlers.

58607. "Distributing" means engaging in the business of a distributor as defined in Section 58608.

58608. "Distributor" means any person that engages in the operation of selling, marketing, or distributing, in intrastate commerce any commodity which he has produced or purchased or acquired from a producer or which he is marketing on behalf of a producer, whether as owner, agent, employee, broker, or otherwise. It does not, however, include a retailer, except a retailer that purchases or acquires from, or handles on behalf of any producer, any commodity which was not previously subjected to regulation by the marketing order which covers such commodity.

58609. "Fish" means every form of fish, either salt water or fresh water fish, which is used for human consumption, except fish for canning, retorting, reduction, or use in an extraction process.

58610. "General rules and regulations" means rules and regulations, which are applicable to all marketing orders and marketing agreements and are issued and made effective by the director without prior notice and public hearing, to provide uniform methods and procedures to facilitate the administration and enforcement of all such marketing orders and marketing agreements. Such uniform methods and procedures may include but shall not be limited to any of the following:

(a) Methods and procedures which pertain to the receiving, depositing, and expenditure of moneys which are received from assessments collected pursuant to this chapter.

(b) The preparation, handling, and payment of claim schedules for the payment of bills, salaries, and other obligations.

(c) Establishing the maximum rates to be allowed for travel expenses of board members and board employees.

(d) The preparation, verification, and filing of evidence which relates to violations of marketing orders, agreements, and marketing regulations which are authorized pursuant to this chapter and other fiscal and administrative activities

which the director finds are necessary to obtain reasonable uniformity, efficiency, and economy in the administration and enforcement of such marketing orders and agreements of this chapter.

58611. "Handler," except with respect to fish and seafood, means any person that is engaged within this state as a distributor in the business of distributing any commodity in intrastate commerce, or any person that is engaged as a processor in the business of processing any commodity. With respect to fish and seafood, it means any person that is engaged in the business of the distribution or sale of fish or seafood to restaurants, or to retailers for resale to consumers, or to any other persons or concerns for resale or for sale direct to consumers.

58612. "Handling" means engaging in the business of a handler as defined in Section 58611.

58613. "Major amendments" mean amendments to any marketing order or agreement which are made pursuant to Article 13 (commencing with Section 59021) of this chapter. It does not include a seasonal marketing regulation.

58614. "Marketed by producers" means producer marketing, as defined by Section 58621.

58615. "Marketing order" means an order which is issued by the director, pursuant to this chapter, which prescribes rules and regulations that govern the processing, distributing, or handling in any manner of any commodity within this state during any specified period.

58616. "Minor amendments" are amendments to any marketing order or agreement which are made effective by the director upon recommendation of the advisory board which is concerned, as specified in Article 14 (commencing with Section 59051) of this chapter, with or without prior notice and public hearing, which change or modify the language or the provisions of any such marketing order or agreement for the purpose of clarification, or the removal of conflicts of meaning without involving changes or modifications of language, or provisions which are classed as major amendments.

58617. "Person" means an individual, firm, corporation, association, or any other business unit, and, for the purposes of this chapter, includes any state agency which engages in any of the commercial activities which are regulated pursuant to the provisions of this chapter.

58618. "Processing" means engaging in the business of a processor as defined in Section 58619.

58619. "Processor" means any person that is engaged within this state in the operation of receiving, grading, packing, canning, fermenting, distilling, extracting, preserving, grinding, crushing, or changing the form of any commodity for the purpose of preparing it for market or of marketing such commodity, or any other activities which are performed for the purpose of preparing it for market or of marketing such com-

modity. It does not, however, include a person that is engaged in manufacturing from any commodity, so changed in form, another and different product.

58620. "Producer" means any person that is engaged within this state in the business of producing, or causing to be produced for market, any commodity.

58621. "Producer marketing" means any or all operations which are performed by any producer in preparing for market. It includes selling, delivering, or disposing of for commercial purposes, to any handler any commodity which the producer has produced.

58622. "Retailer" means any person that purchases or acquires any commodity for reseale at retail to the general public for consumption off the premises Such person is also included within the definition of distributor, to the extent that such person engages in the business of a distributor as defined in Section 58607.

58623. "Seafood" means shellfish and every other form of animal or plant life which is taken from fresh or salt water and used for human consumption, except seafood which is used for canning, retorting, reduction, or used in an extraction process.

58624. "Seasonal marketing regulations" mean marketing regulations that are applicable to a particular marketing order or agreement which are made effective by the director pursuant to Article 19 (commencing with Section 59171) of this chapter.

Article 2. General Provisions

58651. It is hereby declared that the marketing of commodities in this state in excess of reasonable and normal market demands therefor; disorderly marketing of such commodities; improper preparation for market and lack of uniform grading and classification of commodities; unfair methods of competition in the marketing of commodities; and the inability of individual producers to maintain present markets or to develop new or larger markets for California-grown commodities, results in an unreasonable and unnecessary economic waste of the agricultural wealth of this state.

Such conditions and the accompanying waste jeopardize the future continued production of adequate supplies of food, fiber, and other products of the farm and of the soil for the people of this and other states, and prevent producers from obtaining a fair return from their labor, their farms, and the commodities which they produce

As a consequence, the purchasing power of such producers has been in the past, and may continue to be in the future, unless such conditions are remedied, low in relation to that of persons engaged in other gainful occupations within the state. Producers are thereby prevented from maintaining a proper standard of living and from contributing their fair

share to the support of the necessary governmental and educational functions, thus tending to increase unfairly the tax burdens of other citizens of this state.

58652. These conditions vitally concern the health, peace, safety, and general welfare of the people of this state. It is hereby declared to be the policy of this state to aid producers in preventing economic waste in the marketing of their commodities, to develop more efficient and equitable methods in the marketing of commodities and to aid producers in restoring and maintaining their purchasing power at a more adequate, equitable and reasonable level.

58653. The marketing of commodities within this state is hereby declared to be affected with a public interest. The provisions of this chapter are enacted in the exercise of the police powers of this state for the purpose of protecting the health, peace, safety, and general welfare of the people of this state.

58654. The purposes of this chapter are to do all of the following:

(a) Enable producers of this state, with the aid of the state, more effectively to correlate the marketing of their commodities with market demands for such commodities.

(b) Establish orderly marketing of commodities.

(c) Provide for uniform grading and proper preparation of commodities for market.

(d) Provide methods and means for the maintenance of present markets, or for the development of new or larger markets, for commodities which are grown within this state or for the prevention, modification, or elimination of trade barriers which obstruct the free flow of such commodities to market.

(e) Eliminate or reduce economic waste in the marketing of commodities.

(f) Restore and maintain adequate purchasing power for the producers of this state.

58655. In any civil or criminal action or proceeding for violation of any of the following, proof that the act which is complained of was done in compliance with the provisions of this chapter or a marketing order which is issued pursuant to, and in furtherance of the purposes and provisions of this chapter, is a complete defense to such action or proceeding:

(a) The Cartwright Act, Chapter 2 (commencing with Section 16700), Part 2, Division 7 of the Business and Professions Code.

(b) The Unfair Practices Act, Chapter 4 (commencing with Section 17000), Part 2, Division 7 of the Business and Professions Code.

(c) The Fair Trade Act, Chapter 3 (commencing with Section 16900), Part 2, Division 7 of the Business and Professions Code.

(d) Any rule of statutory or common law against monopolies or combinations in restraint of trade.

58656. If a provision of this chapter and a provision of Chapter 2 (commencing with Section 61801), Part 3 of this division are applicable to the same person and subject matter, the provisions of such Chapter 2 shall control. If a provision of this chapter is applicable to any person and subject matter as to which such Chapter 2 makes no express provision, the provision of this chapter shall be applicable.

58657. The provisions of this chapter regarding the marketing of commodities are applicable to fish and seafood and persons that handle, process, or distribute fish and seafood.

Any marketing order or agreement relating to fish and seafood shall affect handlers only. It may include only those provisions which are authorized by Sections 58889 and 58892, but such provisions shall apply to all fish and seafood whether or not they are a product of this state.

58658. If any section, sentence, clause, or part of this chapter is for any reason held to be unconstitutional, such decision shall not affect the remaining portions of this chapter. The Legislature hereby declares that it would have passed this chapter and each section, sentence, clause, and part of this chapter despite the fact that one or more sections, sentences, clauses, or parts of this chapter is declared unconstitutional.

58659. The suspension, amendment, or termination of any marketing order or marketing agreement does not suspend or terminate any cause of action which has accrued under it, but such cause of action shall survive and exist the same as if such marketing order or agreement had not been suspended, amended, or terminated.

58660. It is hereby declared, as a matter of legislative determination, that the amendments of the statutory predecessor of Sections 58651 to 58653, inclusive, (former Section 1300.10) which were made at the 1959 General Session are enacted in the exercise of the power of this state for the purpose of protecting and furthering the public health and welfare.

Article 3. Exceptions

58681. This chapter does not apply to any order, rule, or regulation which is issued, or is issuable, by the Public Utilities Commission or the Interstate Commerce Commission with respect to the operation of common carriers.

58682. This chapter is not applicable to any retailer of any commodity except to the extent that such retailer also engages in the processing or distribution of any commodity.

Article 4. Administration

58711. The director shall administer and enforce this chapter and may exercise any or all of the administrative powers which are conferred by Sections 11180 to 11191, inclusive, of the Government Code upon the head of a department of the state.

58712. In order to effectuate the declared purposes of this chapter, the director may issue, administer, and enforce the provisions of any marketing order issued pursuant to this chapter which regulates producer marketing or the handling of any commodity within this state.

58713. The director may do all of the following:

(a) Confer and cooperate with the legally constituted authorities of other states and of the United States, for the purpose of obtaining uniformity in the administration of federal and state marketing regulations, licenses, or orders.

(b) Conduct joint hearings and issue joint or concurrent marketing orders for the purposes and within the standards which are set forth in this chapter.

(c) Exercise any administrative authority which is prescribed by this chapter to effect such uniformity of administration and regulation.

Article 5. Marketing Orders and Agreements

58741. Subject to the provisions, restrictions, and limitations which are imposed in this chapter, the director may issue marketing orders which regulate producer marketing, the processing, distributing, or handling in any manner of any commodity by any and all persons that are engaged in such producer marketing, processing, distributing, or handling of such commodity within this state.

58742. The director may also, subject to the restriction and limitations which are contained in Article 7 (commencing with Section 58811) of this chapter, issue marketing orders which regulate the handling, processing, preparation for marketing, or marketing of any or all portions of any commodity which is produced in this state for which marketing regulatory powers are not being exercised by the federal government pursuant to the Marketing Agreement Act of 1937 (50 Stat. 249).

58743. If the director finds that it tends to effectuate the declared purposes of this chapter within the standards which are prescribed in this chapter, the director may issue a marketing order, applicable to the marketing, within this state, of any commodity, which contains like terms, provisions, methods, and procedures as any license or order that regulates the marketing of such commodity in interstate or foreign commerce which is issued by the Secretary of Agriculture of the United States pursuant to the provisions of any law or laws of the United States.

In selecting the members of any board or other advisory agency under such marketing order, the director shall, insofar as practicable, utilize the same persons as those serving in a similar capacity under such federal license or order, so as to avoid duplicating or conflicting personnel.

Any board, agency, or committee so appointed by the director shall be responsible to the director for the performance

of such of their duties as relate to the administration of any such marketing order which is issued by the director pursant to this section.

58744. Any marketing order which is issued by the director pursuant to this chapter may be limited in its application by prescribing the marketing area or portion of the state in which it shall be effective. A marketing order shall not, however, be issued by the director unless it embraces all persons of a like class that are engaged in a specific and distinctive agricultural industry or trade within this state.

58745. In order to effectuate the declared policy of this chapter, the director may also, after due notice and opportunity for hearing, enter into marketing agreements with processors, distributors, producers, and others that are engaged in the handling of any commodity, which regulate the preparation for market and handling of such commodity. Such marketing agreements are binding upon the signatories to the agreements exclusively.

58746. The purposes and provisions of the chapter which relate to marketing orders are applicable to marketing agreements except as follows:

(a) Section 58779, which requires the preparation of an official list of the names and addresses of all producers and the volume of such commodity which was produced or marketed by all such producers in the preceding marketing season and a list of the names and addresses of all handlers and the volume of such commodity which was handled by all such handlers, during the preceding marketing season, is not applicable to marketing agreements.

(b) Sections 58991 to 58998, inclusive, and the provisions of Article 15 (commencing with Section 59081) of this chapter, insofar as Article 15 prescribes requirements for termination by request in writing, are not applicable to marketing agreements. Prior to the issuance of any marketing agreement, or amendment to it, the director shall, however, find, in addition to the findings which are set forth in Section 58813, that the marketing agreement, or any amendment to it, has been assented to by a sufficient number of signatories that handle a sufficient volume of the commodity which is affected to accomplish the objectives of such agreement or amendment and provide sufficient moneys from assessments levied to defray the necessary expenses of formulation, issuance, administration, and enforcement.

(c) Section 59233 is not applicable to marketing agreements.

58747. Notwithstanding the provisions of Section 58605, the director may issue and make effective marketing orders or marketing agreements that affect handlers only which include only the provisions which are authorized in Sections 58889, 58890, 58892, 58893, and 58894, or any of such provisions, but no others, as may be applicable to the commod-

ity that is regulated which is handled within this state, without regard to whether or not such commodity is produced within this state.

58748. If producers or handlers of any commodity which is regulated by a marketing order or marketing agreement that is issued by the director pursuant to the provisions of this chapter are required to comply with minimum quality, condition, size, or maturity regulations, no person may, except as otherwise provided in such order or agreement, process, distribute, or otherwise handle any of such commodity from any source, whether produced within or without this state, which commodity does not meet such minimum requirements applicable upon producers or handlers of such commodity in this state. Such regulations do not, however, apply to any commodity which has been produced outside of this state and is in transit on the effective date of the regulations.

Article 6. Notice, Reports, and Hearings

58771. If the director has reason to believe that the issuance of a marketing order, or amendments to an existing marketing order, will tend to effectuate the declared policy of this chapter with respect to any commodity, he shall, either upon his own motion or upon application of any producer or handler of such commodity, or any organization of such persons, give due notice of, and an opportunity for, a public hearing upon a proposed marketing order or such amendments to such existing marketing order.

58772. Notice of any hearing which is called for such purpose shall be given by the director by publishing a notice of such hearing for a period of not less than five days in a newspaper of general circulation published in the capital of the state and in any other newspaper which the director may prescribe. A public hearing shall not be held prior to five days after the last day of such period of publication.

58773. The director shall also mail a copy of such notice of hearing and a copy of such proposed marketing order, or proposed amendments, to every producer or handler of such commodity whose name and address appears upon lists of such persons, on file in the department that may be directly affected by the provisions of such proposed marketing order or such proposed amendments

58774. The notice of hearing shall set forth all of the following:

(a) The date and place of the hearing.

(b) The commodity and the area which are covered by such proposed marketing order or such proposed amendments.

(c) A statement that the director will receive, at such hearing, in addition to testimony and evidence as to other necessary and relevant matters which are set forth in Article 7 (commencing with Section 58811) of this chapter, testimony

and evidence with respect to the accuracy and sufficiency of lists on file with the director which show the names and addresses of producers or handlers of such commodity that are directly affected by such proposed marketing order or proposed amendments, and the quantities of such commodity which were delivered by such producers to handlers, or handled by such handlers, in the marketing season next preceding such hearing.

58775. To provide the director with accurate and reliable information, if such information is not then on file in the department, regarding the persons that may be directly affected by the provisions of any proposed marketing order for any commodity, the director shall, if he has reason to believe that the issuance of a marketing order will tend to effectuate the declared policy of this chapter, or upon receipt of a written application for a hearing pursuant to Section 58771, notify all handlers of such commodity, by publication of a notice as required by Sections 58776 and 58777, to file with the director within 10 days from the last date of such publication a report, properly certified, which shows all of the following:

(a) The correct name and address of such handler.

(b) The quantities of the commodity that are affected by such proposed marketing order which were handled by such handler in the marketing season next preceding the filing of such report.

(c) The correct name and address of every producer of such commodity, that may be directly affected by such proposed marketing order, from whom such handler received such commodity in the marketing season next preceding the filing of such report.

(d) The quantities of such commodity which were received by such handler from each such producer in the marketing season next preceding the filing of such report.

58776. The notice to handlers which requires them to file the report shall be published by the director for a period of not less than five days in a newspaper of general circulation published in the capital of the state and in any other newspaper as the director may prescribe.

58777. The director shall also mail a copy of such notice to file such report to every handler of such commodity whose name and address appears upon the lists on file in the department, of handlers that may be directly affected by the provisions of such proposed marketing order.

58778. Each handler of such commodity that may be directly affected by the provisions of such proposed marketing order shall file such verified report with the director within the time which is specified in Section 58775. Failure or refusal of any handler to file such report within the time which is specified does not invalidate any proceeding which is taken or marketing order which is issued pursuant to this chapter.

The director shall proceed upon the basis of such information and reports as may otherwise be available.

58779. From the reports which are filed and the information which is received or available to the director, including any proper corrections, the director shall prepare a list of the names and addresses of the producers and the volume of such commodity which was produced or marketed by all such producers and a list of the names and addresses of such handlers and the volume of such commodity which was handled by all such handlers, that are directly affected by the provisions of such proposed marketing order, or amendments to it, in the preceding marketing season. Such lists shall constitute complete and conclusive lists for use in any finding made by the director pursuant to the provisions of Article 12 (commencing with Section 58991) of this chapter and such findings are conclusive.

58780. In the preparation of the list of producers or handlers to be used in the formulation or amendment of any marketing order or marketing agreement, the director may omit from such list the name of any person that makes only casual sales of the product which is involved, or whose sales or marketings of such product are incidental to urban home ownership, or the result of activity other than a commercial farm or business venture. Any person that is excluded from such lists is not subject to the provisions, including the payment of any assessments, which are applicable upon producers, or handlers, as prescribed in any such marketing order or marketing agreement.

The Legislature hereby declares that the addition of this section is made for the purposes of clarification of the existing law.

58781. The information which is contained in the individual reports of handlers which are filed with the director pursuant to this article shall not be made public by the director in such form but the information which is contained in such reports may be prepared in combined form for use by the director, his agents, or other interested persons, in the formulation, administration, and enforcement of a marketing order, or may be made available pursuant to court order. Such information shall not be made available to anyone for private purposes.

58782. The hearing on a proposed marketing order or proposed amendments shall be public and all testimony shall be received under oath. A full and complete record of all proceedings at such hearing shall be made and maintained on file in the office of the director.

58783. At the hearing, the director shall receive, in addition to other necessary or relevant matters, evidence upon all of the following:

(a) The matters which are set forth in Article 7 (commencing with Section 58811) of this chapter.

(b) The accuracy and sufficiency of the lists on file with the director which show the names of the producers or handlers of

such commodity that are directly affected by the provisions of such proposed marketing order or proposed amendments.

(c) The quantity of such commodity which was delivered by such producers or handled by such handlers in the marketing season next preceding such hearing.

58784. At any public hearing which is held in connection with the formulation or amendment of a marketing order or marketing agreement, the director shall receive testimony with respect to the establishment of the official producer or handler list which is applicable, and may thereafter issue regulations to effectuate the provisions of this section and of this chapter.

The Legislature hereby declares that the addition of this section is made for the purpose of clarification of the existing law.

58785. At each public hearing upon a marketing order or a major amendment to it, the director shall receive evidence relative to the period of time which may be necessarily required for the filing, checking, and tabulating of written assents which are prescribed in Article 12 (commencing with Section 58991) of this chapter. He shall also, at the conclusion of each such hearing, make a finding, based upon the evidence, with respect to the period of time which may be reasonably and necessarily required for such filing, checking, and tabulating. On the basis of such finding, the director shall fix and limit the period during which such assents may be received by him and shall be the period at the time of mailing of assent forms to producers and handlers that are affected. If, however, the director finds that an extension of such period is reasonably warranted, he may extend such period for receiving assents.

58786. At a public hearing which is held to consider a proposed marketing order or major amendments to an existing marketing order which directly affects producers or producer marketing, the director shall also receive evidence from which he can determine whether the assent, approval or favor of such producers shall be determined by written assents or by referendum as prescribed in Article 12 (commencing with Section 58991) of this chapter.

58787. Upon the conclusion of such hearing, the director shall make a finding which is based upon the evidence received, whether producer assent, approval, or favor shall be determined by written assents or by referendum.

58788. If the director finds that a referendum shall be had, he shall direct that a referendum be held in accordance with the provisions of Sections 58994 to 58998, inclusive. If a referendum is conducted, the director is not required, with respect to the assent, approval, or favor of producers, to make a finding pursuant to Section 58785 concerning, or to fix and limit, the period during which assents may be received by the director.

Article 7. Findings

58811. After the notice and hearing which are required by Article 6 (commencing with Section 58771) of this chapter,

and before issuing a marketing order or amendments to it for the written assent of producers or handlers which contain provisions for correlating the supply of the commodity which is affected with market demands for it by means of restrictions upon the total quantity of such commodity, or restrictions upon the total quantity of any grade, size, quality, or condition of it, which restrictions have the effect of limiting the total quantity of such commodity which may be marketed during any marketing season, if the restricted portion of such commodity might otherwise be marketed by producers in compliance with other laws of this state or of the United States or in compliance with established commercial practice during such marketing season, the director shall make all of the following findings with respect to such marketing order or amendments to it:

(a) Such provisions are necessary in order to effect a reasonable correlation of the supply of the commodity which is affected with market demands for the commodity and that such marketing order or amendments to it will tend to reestablish or maintain such level of prices for such commodity as will provide a purchasing power for such commodity which is adequate to maintain in the business of producing such commodity such number of producers as is required to provide such supply of the quantities and qualities of such commodity as is necessary to fulfill the normal requirements of consumers of the commodity.

(b) Such marketing order or amendments to it will tend to approach such equality of purchasing power at as rapid a rate as is feasible in view of the market demand for such commodity.

(c) Such marketing order or amendments to it are in conformity with the provisions of this chapter and within the applicable limitations and restrictions which are set forth in this chapter and will tend to effectuate the declared purposes and policies of this chapter.

(d) Such marketing order or amendments to it will protect the interests of consumers of such commodity, by exercising the powers of this chapter only to such extent as is necessary to establish the equality of purchasing power which is described in subdivision (a) of this section.

58812. In making the findings with respect to any of the objectives which are set forth in Section 58811, the director shall, if any or all of the following economic factors are relevant, take into consideration any and all facts which are available to him with respect to all of the following:

(a) The quantity of such commodity which is available for distribution

(b) The quantity of such commodity which is normally required by consumers

(c) The cost of producing such commodity as determined by available statistics and surveys.

(d) The purchasing power of consumers as indicated by reports and indices.

(e) The level of prices of other commodities which compete with, or are utilized as substitutes for, such commodity.

(f) The level of prices of other commodities, services, and articles which farmers commonly buy.

58813. If the marketing order or amendments to it contain provisions only for the purpose of regulating the flow of the commodity, or any grade, size, or condition of the commodity, to market without directly restricting the total quantity which may be marketed during the marketing season, or if the marketing order or amendments to it contain provisions only for the establishment of grade, size, quality, or condition specifications, or for uniform grading and inspection, or the elimination of unfair trade practices, or provisions for advertising or sales promotion, or for research, the director may issue such marketing order or amendments to it if he makes all of the following findings:

(a) That such marketing order or amendments to it are reasonably calculated to attain the objectives which are sought in such marketing order.

(b) That such marketing order or amendments to it are in conformity with the provisions of this chapter and within the applicable limitations and restrictions which are set forth in this chapter and will tend to effectuate the declared purposes and policies of this chapter.

(c) That the interests of consumers of such commodity are protected in that the powers of this chapter are being exercised only to the extent which is necessary to attain such objectives.

In making any findings pursuant to this section, the director shall base his findings upon the facts, testimony, and evidence which is received at the public hearing together with any other relevant facts which are available to him from official publications or institutions of recognized standing.

58814. Any marketing order in effect on August 27, 1945, which was duly issued by the director pursuant to this chapter prior to May 28, 1945, and in effect on such date, shall continue in full force and effect and shall be conclusively presumed to be in conformity with the provisions of this article as amended.

Article 8. Advisory Boards and Committees

58841. Any marketing order which is issued pursuant to this chapter shall provide for the establishment of an advisory board to assist the director in the administration of any marketing order. The members of the advisory board shall be appointed by the director and may hold office at the pleasure of the director. A marketing order may, however, provide for the appointment of members from nominations made by the

producers and handlers and may also provide for the method of selecting such nominees.

58842. If the marketing order affects directly only producers of a particular commodity, the members of the advisory board shall be producers. If the marketing order affects directly only handlers of a particular commodity, the members of the advisory board shall be handlers.

If the marketing order affects directly both producers and handlers of a particular commodity, the advisory board shall be composed of both producers and handlers. The number of producers or handlers upon any such advisory board shall be of such number of producers or handlers as the director finds is necessary to assist properly in the administration of such order.

58843. Upon the recommendation of the advisory board, the director may appoint one person who is neither a producer nor a handler to represent the department or the public generally.

58844. A member of an advisory board shall not receive a salary, but each is entitled to his actual expenses which are incurred while engaged in performing his duties that are authorized by this chapter.

58845. The director may authorize an advisory board to do all of the following:

(a) Enter into contracts or agreements.

(b) Employ necessary personnel, including attorneys engaged in the private practice of the law, and fix their compensation and terms of employment

(c) Incur such expenses, to be paid by the director from moneys which are collected as provided in this article, as the director may deem necessary and proper to enable the advisory board properly to perform its duties as authorized by this chapter.

58846. The duties of an advisory board are administrative only and any such board may do only the following:

(a) Subject to the approval of the director, administer the marketing order.

(b) Recommend to the director administrative rules and regulations which relate to the marketing order.

(c) Receive and report to the director complaints of violations of the marketing order.

(d) Recommend to the director amendments to the marketing order.

(e) Assist the director in the assessment of members of the industry and in the collection of funds to cover expenses incurred by the director in the administration of the marketing order.

(f) Assist the director in the collection of such necessary information and data as the director may deem necessary to the proper administration of this chapter.

58847. The members or alternate members of any advisory board, including employees of the advisory board, are not re-

sponsible individually in any way whatsoever to any person for liability on any contract or agreement of the advisory board.

58848. In addition to the advisory board, one or more special committees or subcommittees may be established to assist the advisory board in carrying out its duties and functions. Upon approval of the director, each advisory board may establish committees or subcommittees to carry out assigned duties and functions and designate the members or alternate members of the advisory board to serve upon such committees.

58849. If the marketing order so authorizes, or upon the recommendation of the advisory board, the director may authorize the establishment of special committees or subcommittees of persons who are not members or alternate members of the board to perform specific duties and functions. The members and alternate members of any such special committee or subcommittee shall be appointed by the director.

58850. An advisory board may at any time invite any persons to their meetings to serve in an advisory capacity and the director may, if requested by the advisory board, pay necessary expenses to such persons at rates not to exceed those granted to advisory board members.

58851. Any action of any committee, special committee, or subcommittee of the board is subject to final approval by the advisory board. Members and alternate members of any committee, special committee, or subcommittee, whether by appointment or approval of the director, are entitled to reimbursement for actual expenses which are incurred while acting in their authorized capacities.

Article 9. Terms of Marketing Orders

58881. Except as otherwise provided in Sections 58657 and 58747, any marketing order which is issued by the director pursuant to this chapter may contain any or all of the provisions which are prescribed by this article for regulating, or providing methods for regulating producer marketing, or the handling, or any of the operations of processing or distributing by handlers, of any commodity within this state, but no others.

58882. A marketing order may contain provisions for determining the existence and extent of the surplus of any commodity, or of any grade, size, or quality of it, and providing for the control and disposition of such surplus, and for equalizing the burden of such surplus elimination or control among the producers, processors, distributors, or other handlers that are affected.

Notwithstanding any other appropriate means of equalizing the burden of surplus control and its elimination as provided in this chapter, provision may be made for the creation of a stabilization fund to be used for purchasing or otherwise acquiring any portion of the surplus of any commodity either in fresh or processed form, except when processed in hermeti-

cally sealed containers, and for the diversion of such surplus quantity of such commodity which is so acquired into noncompetitive or byproducts uses or for disposing of such surplus in noncommercial channels. Money for such stabilization fund shall be provided by means of the establishment of an assessment rate for such purpose levied upon producers or handlers, or upon both producers and handlers. Such assessment rate shall be based upon the units in which such commodity is handled or marketed or upon any other uniform basis which the director determines to be reasonable and equitable. For convenience of collection, the director may collect any producer assessments from handlers of such commodity. Handlers paying such assessments for, and on behalf of, any producers may deduct such producer assessments from any money which is owed by such handlers to such producers.

58883. A marketing order may contain provisions for limiting the total quantity of any commodity, or of any grade, size, or quality of it, which may be marketed by producers, or processed, distributed, or otherwise handled within this state during any specified period by any and all persons that are engaged in such producer marketing, processing, distributing, or handling. Any such limitation shall be applied under a uniform rule which is applicable to all such persons so regulated. The total quantity of any such commodity which is so regulated and permitted to be marketed by producers, processed, distributed, or otherwise handled, shall not be less than the quantity which the director finds is reasonably necessary to supply the market demands of consumers of such commodity.

The marketing of green ripe olives is not, however, subject to any provisions of a marketing order which limits the total quantity of such commodity which may be marketed.

58884. A marketing order may contain provisions for allotting the quantity of any commodity, or of any grade, size, or quality of it, which each handler may purchase or acquire from, or handle on behalf of, any and all producers of the commodity, within this state during any specified period under a uniform rule, which is applicable to all handlers that are so regulated based upon the amounts produced or sold by such producers in a prior period which the director finds to be representative, or upon the current season's production or sales of such producers, or both, to the end that the total quantity of such commodity, or of any grade, size, or quality of it, which is so purchased or handled within this state is apportioned equitably among the producers of the commodity.

58885. A marketing order may contain provisions for allotting the quantity of any commodity, or of any grade, size, or quality of it, which each handler may process, distribute, or handle within this state under a uniform rule, which is applicable to all handlers that are so regulated, which is based upon the quantities of such commodity, or of any grade, size, or quality of it, of the current season's crop which each such handler has available for such processing, distribution, or handling, or

upon the quantities of such commodity, or of any grade, size, or quality of it, which is so processed, distributed, or handled by each such handler in a prior period which the director finds to be representative, or based upon both, to the end that the total quantity of such commodity, or any grade, size, or quality of it, processed, distributed, or handled within this state during any specified period is equitably apportioned among all such handlers of the commodity.

58886. A marketing order may contain provisions which regulate the period during which any commodity, or any grade, size, or quality of such commodity, may be processed, distributed, or otherwise marketed within this state by any and all persons that are engaged in such processing, distributing, or marketing within this state. The total quantity of such commodity which is so regulated and permitted to be processed, distributed, or otherwise marketed during such period, shall not, however, be less than the quantity which the director finds is necessary to reasonably supply the needs of consumers of such commodity.

58887. A marketing order may contain provisions for the establishment of surplus, stabilization, or byproduct pools for any commodity, or of any grade, size, quality, or condition of it, and providing for the sale of the commodity in any such pool and for the equitable distribution among the persons that are participating in the pool of the net returns which are derived from the sale of such commodity. The marketing of green ripe olives is not, however, subject to any provisions of a marketing order which relate to the establishment and operation of surplus pools.

If the marketing order authorizes the establishment of any such pool, the advisory board may receive such commodity from each producer or handler and handle it according to the grade, size, quality, or condition of the commodity and account to each producer or handler that is participating in the pool upon a pro rata basis for the net proceeds derived from the sale of the commodity.

The contents of any surplus pool shall not be marketed by the advisory board in any form which would compete directly with that portion of the commodity which is marketed in regular channels of trade. However, any portion of any surplus pool may be transferred by the advisory board upon any gratuitous basis to charitable organizations and other similar agencies under proper safeguards to insure that none of such commodity shall compete directly with the unrestricted portion of such commodity.

The advisory board may dispose of the contents of a stabilization pool in the regular marketing channels in such manner and at such times as it deems advisable, consistent with the maintenance of stabilized marketing conditions for such commodity. The advisory board may dispose of the contents of any byproduct pool only for byproducts or for other similar pur-

poses under proper safeguards to prevent such portion of the commodity so disposed of from directly competing with that part of the commodity which is marketed in the usual form or in the regular channels of trade.

If the marketing order authorizes the establishment of a surplus, stabilization, or byproduct pool, the advisory board may do any of the following:

(a) Arrange for and operate any necessary facilities for the storing, financing, grading, packing, servicing, processing, preparing for market, selling, and disposing of the contents of any pools which are provided for in this chapter. The board shall not, however, engage in commercial warehousing.

(b) Pledge all of the commodity in any such pools with banks or other lending agencies for the purpose of obtaining loans upon it. The board shall have title, for the purpose of financing and handling, to all of the commodity in any such pools.

(c) Create, by a uniform assessment upon producers, or upon some other uniform and equitable basis, maintain, and disburse an equalization fund to be used for the removal of any inequalities between producers or handlers that are participating in any pool which result from errors in estimating production or surplus or for indemnifying producers whose production, in whole or in part, is diverted in green form or otherwise from normal marketing outlets or diverted to byproducts, relief, or other noncompetitive purposes pursuant to the provisions of the marketing order.

58888. A marketing order may contain provisions which establish, or provide for the establishment, with respect to any commodity, either as delivered by producers to handlers or processors, or as handled, processed, or otherwise prepared for market, or as marketed by producers, handlers, or processors, both of the following:

(a) Grading standards of quality, condition, size, maturity, or pack, which standards may include minimum standards. The standards so established shall not, however, be established below any minimum standards which are prescribed by law for such commodity.

(b) Uniform inspection and grading of such commodity in accordance with the standards which are so established.

58889. A marketing order may contain provisions for the establishment of plans for advertising and sales promotion to maintain present markets or to create new or larger markets for any commodity which is grown in this state, or for the prevention, modification, or removal of trade barriers which obstruct the free flow of any commodity to market. The director may prepare, issue, administer, and enforce plans for promoting the sale of any commodity

Any such plan shall be directed toward increasing the sale of the commodity without reference to any private brand or trade name which is used by any handler with respect to the

commodity regulated by the marketing order, except the use of wine if other than private brands or private trade names are unavailable.

No advertising or sales promotion program shall be issued by the director which makes use of false or unwarranted claims in behalf of any such product, or disparage the quality, value, sale, or use of any other commodity.

58890. A marketing order may contain provisions which relate to the prohibition of unfair trade practices. In addition to the unfair trade practices now prohibited by law, applicable to the processing, distribution, or handling of any commodity within this state, the director may include in any marketing order which is issued provisions that are designed to correct any trade practice which affects the processing, distributing, or handling of any commodity within this state which the director finds, after a hearing upon the marketing order in which all interested persons are given an opportunity to be heard, is unfair and detrimental to the effectuation of the declared purposes of this chapter.

58891 A marketing order may contain provisions for the application for, review, certification, and equitable payment of, production adjustment benefits to growers from funds which are collected for such purpose on a uniform basis from all commercial growers of any commodity in the state, for which production adjustment payments are made Such funds may be supplemented by funds, if any, which are received from federal, state, or other agencies for such purpose.

No program of production adjustment which is adopted pursuant to this chapter shall authorize payments for the removal of acreages of trees or vines of the species, variety, or varieties which are specified in the program which have, during the three years immediately preceding the date of application, produced an annual yield per acre in excess of the comparably computed average yield from bearing trees or vines of the same species, variety, or varieties for the state as a whole. Such yields and averages shall be determined by the director from statistical data compiled by state or federal agencies or such other data as the director deems is representative and reliable.

58892. A marketing order may contain provisions for carrying on research studies in the production, processing, or distribution of any commodity and for the expenditure of moneys for such purposes. In any research in production or processing which is carried on pursuant to this section, the Dean of the College of Agriculture of the University of California and the advisory board which is provided for in Article 8 (commencing with Section 58841) of this chapter shall cooperate in selecting the research project which is to be carried on from time to time. Insofar as practicable, the projects shall be carried out by such college of agriculture, but if the dean of the college and the advisory board determine that the college has no facilities for a particular project, or that some

other research agency has better facilities for it, the project may be carried out by any other research agency which is selected by the dean and the advisory board.

58893. A marketing order may contain provisions which establish, or provide authority for establishing, for any commodity, either as such commodity is produced or is delivered by producers to handlers, or as handled or otherwise prepared for market, or as marketed by producers or handlers, an educational program which is designed to acquaint producers, handlers, or other interested persons with quality improvement, including sanitation practices, procedures, or methods as applied to such commodity.

58894. A marketing order may contain provisions which establish, or provide authority for establishing, and for regulating the permissive use of an official board brand, trade name, or label, or other distinctive designation of grade, quality, or condition, except the grade or quality designations in effect pursuant to state or federal grade standards, for any commodity, other than wine, either as such commodity is produced or is delivered by producers to handlers, or as handled or otherwise prepared for market, or marketed by producers or handlers. As provided in Section 59236, the permissive use of any such official board brand, trade name, or label or other distinctive designation of quality shall be limited to producers and handlers of the commodity that are participating in the marketing agreement or order, and that are in compliance with its provisions and with any regulation, or rule and regulation, which is adopted under it. Any official brand or trade name which is established pursuant to this section shall not be construed as a private brand or trade name with respect to Section 58889.

Article 10. Assessments and Funds

58921. Except as otherwise provided in Section 58926, each marketing order which is issued pursuant to this chapter shall provide for the levying and collection of assessments in sufficient amounts to defray the necessary expenses which are incurred by the director in the formulation, issuance, administration, and enforcement of the marketing order. If the marketing order authorizes the carrying out of advertising and sales promotion plans, it shall also provide for the levying and collection of assessments in sufficient amounts to defray the expenses of such activities. No assessment for advertising or sales promotion activities shall, however, be levied under any marketing order with respect to the marketing and handling of green ripe olives except that green ripe olives may be assessed for their proportionate share of administrative costs.

58922. Each marketing order shall indicate the maximum rate of any assessment which may be collected and the proportion, if any, of each assessment which is payable by each producer and handler that is directly regulated or affected by such marketing order.

58923. The advisory board which is appointed by the director to assist him in administering each marketing order shall recommend to the director, from time to time, budgets to cover necessary expenses, and budgets to cover the expenses of carrying out sales promotion plans if such plans are authorized in the marketing order, and the assessment rates which are necessary to provide sufficient funds. If the director finds that each such budget and assessment rate are proper and equitable and will provide sufficient moneys to defray the expenses which may be incurred, he may approve such budget and rate of assessment and order that each producer and handler so assessed shall pay to the director, at such times and in such installments as the director may prescribe, an assessment which is based upon the units in which such commodity is marketed, or upon any other uniform basis which the director determines to be reasonable and equitable.

58924. The amount of the assessment for necessary expenses shall not, however, exceed the following:

(a) In the case of producers, 2½ percent of the gross dollar volume of sales of the commodity which is affected by all such producers regulated by such marketing order.

(b) In the case of processors, distributors, or other handlers, 2½ percent of the gross dollar volume of purchases of the commodity which is affected by the marketing order from producers or of the gross dollar volume of sales of the commodity which is affected by the marketing order and handled by all such processors, distributors, or other handlers that are regulated by such marketing order during the marketing season during which such marketing order is effective.

58925. Any assessment rate which is established for assessments to defray the expenses of advertising and sales promotion plans shall be in an amount which does not exceed 4 percent of the gross dollar volume of sales by all producers or by all processors, distributors, or other handlers of such commodity which is regulated by such marketing order during the marketing season during which such marketing order is effective.

58926. In lieu of the assessments to defray the costs of formulation, issuance, administration, and enforcement and advertising or sales promotion provided for in Section 58921, if the marketing order contains provisions for advertising or sales promotion as authorized in this chapter, the director may approve and fix one assessment not exceeding 6½ percent of the gross dollar volume of sales of such commodity by all producers, or by all processors, distributors, or other handlers of such commodity regulated by such marketing order during the marketing season during which such marketing order is effective. The method and manner of assessment and collection of such assessment, and the limitations and restrictions applicable thereupon, shall conform in all respects with the provisions of this article regarding assessments for advertising and sales promotion, except as to the maximum amount of such assessment.

58927. If the director approves and fixes a single assessment, the advisory board shall recommend and the director may approve the proportions of such assessment which may be expended to defray the costs of formulation, issuance, administration, and enforcement of the marketing order and that which may be expended for such advertising or sales promotion program. The proportion of such assessment which may be allocated in such manner to defray the cost of such administrative activities for such marketing order shall not, however, exceed the maximum amount which is authorized in Section 58924.

58928. If any advisory board of any marketing order has reason to believe that the administration of a marketing order will be facilitated or the attainment of the purposes and objectives of the marketing order will be promoted thereby, the advisory board may borrow money with or without interest to carry out any provision of any marketing order which is authorized by this chapter, and may hypothecate anticipated assessment collections that are applicable to such respective provisions.

58929. Any assessment which is levied as provided in this article, in such specified amount as may be determined by the director pursuant to this chapter, is a personal debt of every person so assessed and shall be due and payable to the director if payment is called for by the director. If any such person fails to pay any such assessment upon the date which is determined by the director, the director may file a complaint against such person in a state court of competent jurisdiction for the collection of the assessment.

58930. If any producer or handler that is duly assessed pursuant to the provisions of this chapter fails to pay to the director the amount so assessed on or before the date which is specified by the director, the director may add to such unpaid assessment an amount not exceeding 10 percent of such unpaid assessment to defray the cost of enforcing the collection of such unpaid assessment.

58931. The director may require the persons that are assessed to deposit with him in advance the following amounts:

(a) An amount for necessary expenses.

(b) An amount which shall not exceed 25 percent of the assessment to cover the costs of advertising or sales promotion plans which are incurred prior to the receipt of sufficient funds from the assessment for such purpose.

58932. The amount of any deposit which is required by the director pursuant to Section 58931 shall be based upon the estimated number of units to be marketed or handled by the person that is assessed, or upon any other uniform basis which the director determines is reasonable and equitable. Such basis shall be applicable during the marketing season during which such marketing order is effective.

58933. At any time after the funds which are credited to the administrative account, or the advertising or sales promotion account, of the marketing order are sufficient to so warrant, or at the close of the marketing season, the sums deposited by any person shall be adjusted to the amount which is properly chargeable against such person pursuant to the assessment which was authorized.

58934. In lieu of requiring advance deposits, or in order generally to provide funds for defraying administrative or advertising and sales promotion expenses until such time as sufficient moneys are collected for such purpose from the payment of the assessments which are established pursuant to this article, the director may receive and disburse for such expense purposes contributions which are made by producers, processors, distributors, or other handlers. Neither the advisory board nor the director is responsible for the repayment of such contributions. If, however, collections from the payment of established assessments credited to the respective marketing order accounts are sufficient to so warrant, the board shall recommend and the director shall authorize, the repayment of contributions, or authorize the application of such contributions to the assessment obligations of persons that made such contributions.

58935. For the convenience of making collections of any producer assessments which are established pursuant to this article, the director may collect such assessments from the handlers of the commodity which is being regulated. Any handler that pays any such assessments for and on behalf of any producer may deduct such producer assessments from any money which is owed by such handler to such producer. Any marketing order may require a handler to deduct producer assessments from any money which is owed by such handler to such producer.

58936. The director shall prescribe rules and regulations with respect to the assessment and collection of funds pursuant to the provisions of this article.

58937. Any money which is collected by the director pursuant to this chapter shall be deposited in a bank or other depository which is approved by the Director of General Services, allocated to each marketing order under which it is collected, and, except as provided in Section 58941, it shall be disbursed by the director only for the necessary expenses which are incurred by the advisory board and which are approved by the director with respect to each marketing order.

Funds so collected shall be deposited and disbursed in conformity with appropriate rules and regulations which are prescribed by the director. The expenditure of such funds is exempt from the provisions of Section 925.6 of the Government Code. All such expenditures by the director shall be audited at least every two years by the Department of Fi-

nance and a copy of such audit shall be delivered within 30 days after the completion of the audit to the Governor, the director, and the Controller.

58938. The director may, at the close of each fiscal period which is used by the advisory board for budgetary purposes, refund any money which remains in such fund that is allocable to any particular commodity which is affected by a marketing order or, upon recommendation of the advisory board and with the approval of the director, all or a portion of such money may be carried over into the next succeeding fiscal period if the director finds that such money is required to defray subsequent expenses under the marketing order.

Any refund made pursuant to this section shall be on a pro rata basis made to persons from whom, or on whose behalf, the assessments being refunded were collected. Upon termination by the director of any marketing order, any remaining balances which are not required by the director to defray the expenses of such marketing order, shall be returned by the director upon a pro rata basis, to all persons from whom, or on whose behalf, such assessments were collected unless the director finds that the amounts so returnable are so small as to make impractical the computation and remitting of such pro rata refund to such persons. If the director makes such a finding, he may use the moneys in such fund to defray the expenses which are incurred by him in the formulation, issuance, administration, or enforcement of any subsequent marketing order for such commodity. Thereafter, if there is any such money which remains that has not been used by the director as provided in this section, it shall be withdrawn from the approved depository and paid into the State Treasury as unclaimed trust money.

58939. Any money which is deposited by the director pursuant to this article, which the director determines is available for investment, may be invested or reinvested by the State Treasurer in any of the securities which are described in Article 1 (commencing with Section 16430), Chapter 3, Part 2, Division 4, Title 2 of the Government Code, or placed in a bank as provided in Chapter 4 (commencing with Section 16500), Part 2, Division 4, Title 2 of the Government Code, and handled in the same manner as money in the State Treasury.

Any increment which is received from such investment or reinvestment or deposit shall be remitted to the director for allocation, upon a proper and equitable basis, to each of the marketing orders which is concerned, and deposited and disbursed as provided in Sections 58937 and 58938. The State Treasurer may deduct from such remittance an amount equal to the reasonable costs incurred in carrying out the provisions of this section or may bill the director for such costs and the director shall pay such costs from money which is collected pursuant to this chapter.

58940. Any check or warrant which is drawn against the funds of any marketing order which remains unclaimed or uncashed for a period of six months from the date of issuance shall be canceled and the money retained for disbursement to the original payee or claimant upon satisfactory identification for a period of one year from the time the check or warrant is canceled. The money so retained, if not claimed within the period of one year, shall be credited to the then currently operating marketing order for the commodity under which the funds so retained were collected. If there is no marketing order then in effective operation for the commodity, the funds shall be credited to the unexpended balance, if any, of the last previous marketing order for the commodity. If there is no marketing order then in current operation, or no balance exists from any previous marketing order to which the funds may be credited, the funds so retained shall be deposited in the State Treasury as unclaimed trust money.

58941. Notwithstanding the provisions of Article 3 (commencing with Section 241), Chapter 2, Division 1 of this code, each marketing order or agreement shall be charged the amounts which are computed by the director as required to reasonably provide for services to be rendered to such marketing orders by the department. Such amounts are subject to approval by the advisory board which is concerned, shall be included in each budget which is recommended to and approved by the director pursuant to Sections 58923 and 58924, and shall be withdrawn as required by the director and paid into the Department of Agriculture Fund in the State Treasury and expended only for the necessary expenses which are incurred by the director in the administration of this chapter.

Article 11. Deposits by Applicants for Marketing Order

58961. Prior to the issuance of any marketing order by the director pursuant to this chapter, the director may require the applicants for the issuance of the marketing order to deposit with him such amount as he may deem necessary to defray the expenses of preparing and making effective such marketing order. Such funds shall be received, deposited, and disbursed by the director in accordance with the provisions which are set forth in Article 10 (commencing with Section 58921) of this chapter.

58962. The director may reimburse the applicant, from any funds for necessary expenses which he has received pursuant to Article 10 (commencing with Section 58921) of this chapter, for any of the following:

(a) Any amount deposited with the director by applicant pursuant to Section 58961.

(b) For any necessary expenses which are incurred by the applicant in preparing and in obtaining approval of the marketing order, upon receipt of a verified statement of such expenses which is approved by the director.

Article 12. Assent to Marketing Orders

58991. A marketing order or major amendment to it, which directly affects handlers, that is issued pursuant to this chapter, shall not become effective unless and until the director finds that such marketing order or amendment to it has been assented to in writing by one of the following:

(a) The handlers that are engaged in the marketing activity which is regulated by such marketing order that handle not less than 65 percent of the volume of the commodity which is regulated by the marketing order which is processed or distributed within the area defined in such marketing order or amendment to it.

(b) Not less than 65 percent of the number of handlers that engaged in the marketing activity which is regulated by such marketing order.

58992. Any marketing order or major amendment to it which directly affects processors that are engaged in the operation of canning of fresh fruits or vegetables or canning or packing of dried fruits shall not, however, be made effective by the director unless and until the director finds that such marketing order or amendment to it has been assented to in writing by such processors that are engaged in the marketing activity which is regulated by such marketing order or amendment to it that processed not less than 65 percent of the volume of such commodity which is processed within the area defined in such marketing order or amendment to it and by 65 percent of the number of such processors that are engaged in the marketing activity which is regulated by such marketing order or amendment to it.

58993. No marketing order or major amendment to it, which directly affects producers or producer marketing, that is issued pursuant to this chapter, shall be made effective by the director unless and until the director finds one or more of the following:

(a) That it has been assented to in writing by not less than 65 percent of the producers that are engaged, within the area specified in such marketing order or amendment to it, in the production for market, or engaged in such producer marketing, of not less than 51 percent of the commodity which is specified in the marketing order or the amendment to the marketing order in commercial quantities

(b) That it has been assented to in writing by producers that produce not less than 65 percent of the volume of such commodity and by 51 percent of the total number of producers that are so engaged.

(c) That it has been approved by producers in a referendum among producers that are directly affected. The director may make the finding (1) if the valid votes cast in such referendum represent not less than 40 percent of the total number of producers of the commodity of record with the department, and (2) if the producers that cast ballots in the referendum in

favor of the marketing order or amendment to it represent not less than 65 percent of the total number of producers that cast ballots in the referendum and marketed not less than 51 percent of the total quantity of the commodity which was marketed in the next preceding marketing season by all of the producers that cast ballots in the referendum or if the producers that cast ballots in the referendum in favor of the marketing order or amendment represent not less than 51 percent of the total number of producers that cast ballots in the referendum and marketed not less than 65 percent of the total quantity of the commodity which was marketed in the next preceding marketing season by all of the producers who cast ballots in the referendum.

58994. If any marketing order or any major amendment to any marketing order is issued by the director for the approval of producers, he shall determine whether the approval of producers shall be by written assents or by referendum

58995. If the director determines that it should be by referendum, he shall establish a referendum period not to exceed 30 days. If the director determines that the referendum period so established does not provide sufficient time for the balloting, he may extend the referendum period not more than 15 additional days. At the close of the referendum period, the director shall count and tabulate the ballots filed during the referendum period.

58996. If from the tabulation the director finds that the number of producers that voted in the referendum and that the number of producers that voted in favor of the marketing order or amendment to the marketing order are sufficient for him to make the finding that producers that are directly affected have approved the marketing order or amendment, the director may make the marketing order or amendment to the marketing order effective.

58997. If the director finds from the tabulation of such referendum that the number of producers that voted in favor of such marketing order or amendment to the marketing order is not sufficient for him to make the finding that producers that are directly affected have approved the marketing order or amendment to it, he shall not make the marketing order or amendment effective.

58998. The director may prescribe such additional procedures as may be necessary to conduct the referendum.

58999. In finding whether the marketing order or major amendment to it is assented to in writing or approved or favored by producers pursuant to the provisions of this chapter, the director shall consider the approval of any nonprofit agricultural cooperative marketing association, which is authorized by its members so to assent, as being the assent, approval, or favor of the producers that are members of, or stockholders in, such nonprofit agricultural cooperative marketing association.

59000. Any producer that sells a growing crop to be harvested and marketed by another person is entitled to assent to, or vote in a referendum, if both of the following requirements are complied with:

(a) At the time of sale of such growing crop the producer retains the exclusive right so to assent or to so vote.

(b) The quantity of such growing crop can be determined to the satisfaction of the director.

Article 13. Major Amendments

59021. In making effective major amendments to a marketing order, the director shall follow the same procedures which are prescribed in this chapter for the institution of a marketing order.

59022. For the purposes of this chapter, a major amendment to a marketing order shall include, but not be limited to, any amendment which is specified in Sections 59023 to 59035, inclusive.

59023. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for any of the following:

(a) Determining the existence and extent of the surplus of any commodity, or of any grade, size, or quality of it.

(b) Providing for the control and disposition of such surplus and for equalizing the burden of such surplus elimination.

(c) The establishment of a stabilization fund for equalizing surplus obligations.

59024. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for limiting the total quantity of any commodity, or of any grade, size, or quality of it, which may be prepared for market or marketed within this state.

59025. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for allotting the quantity of any commodity, or of any grade, size, or quality of it, which any handler may purchase or acquire from or handle on behalf of any and all producers of such commodity within this state.

59026. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for allotting the quantity of any commodity, or of any grade, size, or quality of it, which any handler may process, distribute, or handle within this state.

59027. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for regulating the period during which any commodity, or any grade, size, or quality of such commodity, may be processed, distributed, or otherwise marketed within this state.

59028. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for the establishment of surplus, stabilization, or byproduct pools for

any commodity, or of any grade, size, quality, or condition of it.

59029. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for the establishment of uniform grading and inspection of any commodity and the establishment of grading standards of quality, condition, size, or pack of such commodity.

59030. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for the establishment of plans for advertising and sales promotion of any commodity.

59031. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority to prohibit unfair trade practices.

59032. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for the establishment of production adjustment requirements and benefit payments which relate to them.

59033. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority for carrying out research studies in the production, processing, or distribution of any commodity.

59034. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority to increase an assessment rate beyond the maximum rate which is authorized by the marketing order then in effect.

59035. An amendment is a major amendment if it adds to, or deletes from, a marketing order authority to extend the application of the provisions of any marketing order to portions or uses of a commodity not previously subject to such provisions or to restrict or extend the application of such provisions upon the producers or handlers of such portions or uses of any such commodity.

59036. Modification of any provision of any marketing order in effect for the purpose of clarifying the meaning or application of such provision or modifying administrative procedures for carrying out such provision is not a major amendment of such marketing order.

59037. The exercise by the director of any regulatory authority which is authorized in a marketing order or marketing agreement is not a major amendment, but is a seasonal marketing regulation.

Article 14. Minor Amendments

59051. The director may make minor amendments to any marketing order upon the recommendation of not less than 75 percent of the producer members or handler members of the advisory board, or not less than 75 percent of each group if both are represented upon the advisory board.

59052. The director may require a public hearing upon minor amendments if in his opinion the substance of such

minor amendments so warrant. The director is not, however, required to submit minor amendments for written assents or referendum approval.

Article 15. Termination or Suspension

59081. The director shall suspend or terminate any marketing order, if he finds, after a public hearing duly noticed and held in accordance with the provisions of Article 6 (commencing with Section 58771) of this chapter, that such marketing order is contrary to, or does not tend to effectuate, the declared purposes or provisions of this chapter within the standards and subject to the limitations and restrictions which are imposed in this chapter.

59082. The director shall terminate any marketing order if he finds that the termination of the marketing order is requested in writing, within a 90-day period, by at least 51 percent of the producers that are directly affected that produce at least 51 percent of the volume of the product, or by at least 51 percent of the handlers that are directly affected that handle at least 51 percent of the volume of the product.

59083. If at least 25 percent of the producers that are directly affected that produce at least 25 percent of the product and at least 25 percent of the handlers that are directly affected that handle at least 25 percent of the product request, within a 90-day period, that such marketing order be submitted to reapproval, the director shall hold a hearing on the question of the reapproval of such marketing order, and after determining whether such reapproval shall be by assent or referendum, shall resubmit the marketing order for reapproval of those producers and handlers that are directly affected as provided in this article within 120 days of the receipt of the original request.

59084. If the director finds that the marketing order is not reapproved, he shall declare such order terminated. An order shall be considered reapproved if it has been assented to or favored at a referendum in the same manner as is required for a new marketing order.

59085. At any time the director finds that a substantial number of persons that are directly affected by an order are in opposition to it, he shall hold a hearing on the question of the termination, suspension, amendment, or reapproval of such order, and shall, not more than 60 days after such hearing, terminate, suspend, or submit for amendment or reapproval such order, or make a finding that there is not sufficient opposition to the order to warrant any action.

59086. A marketing order shall not be submitted for reapproval until one year after the original enactment, or within one year of any prior approval.

59087. The director may terminate, without a public hearing, any marketing order or marketing agreement which has

been inoperative for three consecutive marketing seasons after notice of intent to terminate such marketing order or marketing agreement has been published in the manner which is provided in Section 58772.

59088. No suspension or termination of any marketing order or marketing agreement pursuant to this article shall become effective until the expiration of the marketing season then current.

Article 16. Publication of Notice

59111. Upon the issuance of any order which makes effective a marketing order, or any suspension, amendment, or termination of a marketing order, a notice of the issuance shall be posted on a public bulletin board which the director shall maintain in his office and a copy of such notice shall be published pursuant to Section 6061 of the Government Code in the capital of the state and in such other localities as the director may prescribe. A marketing order, or any suspension, amendment, or termination of it, shall not become effective until five days after the date of such posting and publication. The director shall also mail a copy of the notice to every person that is directly affected by the terms of such marketing order, suspension, amendment, or termination, whose name and address is on file in the office of the director, and to every person that files in the office of the director a written request for such notice.

Article 17. General Rules and Regulations

59141. The director may establish such general rules and regulations for uniform application to all marketing orders and marketing agreements which are issued pursuant to this chapter as may be necessary to facilitate the administration and enforcement of such marketing orders and agreements.

59142. The provisions of Article 16 (commencing with Section 59111) of this chapter relative to posting, publication, and time of taking effect are applicable to any such general rule and regulation which is established pursuant to this article and applicable to marketing orders generally. Such notice shall be mailed to the advisory board for each marketing order or marketing agreement which is in active operation.

Article 18. Administrative Rules and Regulations

59161. Upon recommendation of the advisory board which is concerned, the director may, without prior notice and hearing, establish administrative rules and regulations for each marketing order or marketing agreement which is issued and made effective as may be necessary to facilitate the administration and enforcement of each such order or agreement.

59162. Such rules and regulations may include, but shall not be limited to, any of the following:

(a) Methods and procedures for the purpose of explaining or clarifying the provisions of such marketing order or agreement.

(b) Prescribing reporting forms and procedures to be followed by producers and handlers that are directly affected by such marketing order or agreement.

(c) Providing information to producers and handlers that are subject to such marketing order or agreement.

(d) Other similar procedural and explanatory provisions to enable such producers and handlers better to understand the program and their respective obligations under it and thereby assist in obtaining cooperation and compliance.

59163. The provisions of Article 16 (commencing with Section 59111) of this chapter relative to posting, publication, mailing of notice, and time of taking effect are applicable to any such administrative rules and regulations.

Article 19. Seasonal Marketing Regulations

59171. Upon recommendation of the advisory board which is concerned, the director may, without prior notice to, and public hearing for, the producers or handlers of the commodity which is directly affected, issue and make effective seasonal marketing regulations or modifications of such regulations if all of the following requirements are complied with:

(a) The marketing order, or agreement concerned provides for the issuance or modification of such seasonal marketing regulations without requiring such prior notice and public hearing and sets forth the limits within which such seasonal marketing regulations may be made effective or subsequently modified by the director.

(b) The director finds that such seasonal marketing regulations or modifications of them are reasonable and proper and a practical means of carrying out the marketing provisions which are authorized in such marketing order or agreement and will tend to effectuate the declared purposes and policies of the chapter with respect to such commodity.

59172 Seasonal marketing regulations shall be applicable to a particular marketing order or agreement for the purpose of carrying into effect by administrative order, the marketing regulatory authorizations and provisions of such marketing order or agreement as such authorizations or provisions may be applicable to, or required by, changing economic or marketing conditions and requirements, from time to time, during each marketing season in which such marketing order or agreement may operate.

59173. Seasonal marketing regulations shall not extend beyond the marketing regulatory authorizations which are specified in the marketing order or agreement concerned, or modify

or change the language of such marketing order or marketing agreement by adding to, or subtracting from, such marketing order or agreement any of the marketing regulatory authorizations which are classed in Article 13 (commencing with Section 59021) of this chapter as major amendments, or modify the language of any marketing order or agreement for the purpose of clarification as provided in Article 14 (commencing with Section 59051) of this chapter for minor amendments.

59174. Notice of the issuance and the effective date of any such seasonal marketing regulations, or modifications of them, shall be given by the director to all producers and handlers that are directly affected by any such regulations in the manner and within the time which is specified in the applicable marketing order or agreement, or as specified in the administrative rules and regulations which are made effective for such marketing order or agreement pursuant to Article 18 (commencing with Section 59161) of this article.

59175. It is recognized that, with respect to some commodities, marketing, weather, and other conditions may change so rapidly as to require changes in seasonal marketing regulations from week to week or oftener.

59176. It is intended that the provisions of this article be interpreted liberally so that the director may carry out the marketing regulations and procedures authorized in this article in a practical and effective manner.

Article 20. Records

59201. The director may require any and all processors or distributors, that are subject to the provisions of any marketing order which is issued pursuant to this chapter, to maintain books and records which reflect their operations under such marketing order, and to furnish him with such information as may be from time to time requested by him which relates to operations under such marketing order, and to permit the inspection by the director of such portions of such books and records as relate to operations under such marketing order.

59202. Information which is obtained by any person pursuant to this article is confidential and shall not be disclosed to any other person except to a person with like right to obtain the information, or any attorney who is employed to give legal advice upon it, or by court order.

59203. For the purpose of carrying out the purposes of this article, the director may hold hearings, take testimony, administer oaths, subpoena witnesses, and issue subpoenas for the production of books, records, or documents of any kind.

59204. A person shall not be excused from attending and testifying, or from producing documentary evidence, before the director in obedience to the subpoena of the director on the ground, or for the reason, that the testimony or evidence, documentary, or otherwise, which is required of him may tend to incriminate him or subject him to a penalty or forfeiture. A

natural person shall not, however, be prosecuted or subjected to any penalty or forfeiture for, or on account of, any transaction, matter, or thing concerning which he may be so required to testify, or produce evidence, documentary or otherwise, before the director in obedience to a subpoena which is issued by him.

A natural person so testifying is not, however, exempt from prosecution and punishment for perjury committed in so testifying.

Article 21. Actions and Penalties

59231. Any action for any penalty or other remedy which is prescribed under any provision of this chapter shall be commenced within two years from the date of the alleged violation.

59232. The penalties, remedies, procedures, and actions which are prescribed by this article apply in instances of any violation or complaint of any violation of any provision of this chapter, any marketing order, or any regulation, or rule and regulation, which is issued by the director pursuant to this chapter or pursuant to any marketing order which is issued under this chapter.

59233. Every person that violates any provision of this chapter or any provision of any marketing order which is duly issued by the director pursuant to this chapter, is guilty of a misdemeanor, and upon conviction, shall be punished by a fine of not less than fifty dollars ($50), nor more than five hundred dollars ($500), or by imprisonment of not less than 10 days nor more than six months, or by both such fine and imprisonment. Each violation during any day constitutes a separate offense.

59234. Any person that violates any provision of this chapter or any marketing order which is duly issued by the director and in effect pursuant to this chapter, or that violates any regulation, or rule and regulation, which is issued by the director pursuant to any provision of this chapter or any such marketing order, is liable civilly for a penalty in an amount not to exceed a sum of five hundred dollars ($500) for each and every violation.

59235. In addition to such civil penalty, any person that knowingly exceeds any quota or allotment or marketable percentage fixed for him under any marketing order, regulation, or rule and regulation, issued by the director pursuant to such marketing order, shall forfeit to this state a sum equal to the current market value of such excess (or three times such amount, in the discretion of the court) which forfeiture may be recoverable in a civil suit which is brought in the name of this state Any money which is recovered pursuant to this section shall be deposited in accordance with Section 58937.

59236. If the use by a producer or handler of a particular emblem, label, certificate, or other distinctive designation of

grade, quality, or condition, except the grade or other quality designations then in effect pursuant to state or federal grade standards, is made contingent upon compliance with certain production or handling regulations which are authorized by the provisions of a marketing order or agreement which is issued and made effective pursuant to this chapter, it is unlawful and a violation of this chapter for any person, that is not participating in, and complying with, such order, agreement, or regulations to use such designation of grade, quality, or condition.

59237. It is a violation of this chapter for any person to willfully render or furnish a false or fraudulent report, statement, or record which is required by the director pursuant to any provision of this chapter, or any marketing order which is effective pursuant to this chapter.

59238. It is a violation of this chapter for any person that is engaged in the handling or processing of any commodity, or in the wholesale or retail trade of the commodity, to fail or refuse to furnish to the director or his duly authorized agents, upon request, information concerning the name and address of the persons from whom he has received any commodity which is regulated by a marketing order that is issued and in effect pursuant to this chapter, and the quantity of such commodity which is so received.

59239. It is a violation of this chapter for any handler to receive, handle, or have in his possession any commodity which is regulated by a marketing order or marketing agreement which is issued pursuant to this chapter, that the handler knows is being marketed by the producer of the commodity without complying with, or in violation of any provision of such marketing order or agreement.

59240. The director on his own motion may, or shall upon complaint of any interested party which charges any violation of any provision of this chapter or any provision of any marketing order, regulation, or rule and regulation, which is issued by the director and effective pursuant to this chapter, do one of the following:

(a) Refer the matter directly to the Attorney General or any district attorney for the institution of legal proceedings upon the matter.

(b) If he deems it necessary or advisable, immediately call an administrative hearing to consider the charges which are set forth in such verified complaint.

59241. If the matter is referred directly by the director to the Attorney General or any district attorney, such officer shall thereupon bring an appropriate action in a court of competent jurisdiction in this state, if, after examination of the complaint and evidence he believes that a violation has occurred.

59242. If an administrative hearing is called by the director, the director shall cause a copy of such complaint, together with a notice of the time and place of hearing of such

complaint, to be served personally or by mail upon every person that is named as a respondent in such verified complaint. Such service shall be made at least 10 days before the hearing.

59243. The hearing shall be held at one of the following places which is selected by the director:

(a) The city or place in which the principal place of business of the respondent is situated.

(b) The city or place in which the violation complained of is alleged to have occurred.

(c) In the nearest office of the department.

59244. At the time and place which is designated for such administrative hearing, the director shall hear the parties to the complaint and shall enter in his office at Sacramento, his findings which are based upon the facts that are established at such hearing. If from the testimony and evidence which is adduced at the administrative hearing the director finds that no violation has occurred, he shall forthwith dismiss such complaint and notify the parties to such complaint.

59245. If the director finds from the administrative hearing that a violation has occurred, he shall so enter his findings and notify the parties to such complaint. The director may refer the matter to the Attorney General for the institution of legal proceedings or he may notify such parties to cease and desist from further violation.

Upon their refusal or failure to comply, or if he finds that the facts or circumstances warrant immediate prosecution, he shall file a complaint with the Attorney General or any district attorney which requests that such officer commence any action which is authorized in this chapter against such respondent in a court of competent jurisdiction as set forth in this article.

59246. The Attorney General, or any district attorney, shall upon complaint by the director or any other person, or may, upon his own initiative, if, after examination of the complaint and evidence he believes a violation has occurred, bring an action for criminal penalties in the name of the people of this state in any court of competent jurisdiction in this state against any person violating any provision of this chapter or any marketing order which is duly issued by the director and effective pursuant to this chapter.

59247. The Attorney General shall upon complaint by the director or may, upon his own initiative, if, after examination of the complaint and evidence he believes a violation to have occurred, bring an action in the name of the people of this state in the superior court of this state for civil penalties or for injunctive relief, including specific performance of any obligation which is imposed by any marketing order, regulation, or rule and regulation, which is issued pursuant to this chapter, against any person violating any provision of this chapter or of any marketing order, regulation, or rule and regulation, which is duly issued by the director pursuant to this chapter.

59248. If it appears to the court upon any application for a temporary restraining order, or upon the hearing of any

order to show cause why a preliminary injunction should not be issued, or upon the hearing of any motion for a preliminary injunction, or if the court shall find, in any such action, that any defendant is violating, or has violated, any provision of this chapter, any marketing order, or any regulation, or rule and regulation, duly issued by the director pursuant to this chapter, the court shall enjoin the defendant from committing further violations, and may compel specific performance of any obligation imposed by a marketing order, or any regulation which is issued by the director pursuant to this chapter.

59249. In any suit brought by the Attorney General to enforce any provision of this chapter, any marketing order which is issued by the director and effective pursuant to this chapter, or any regulation, or rule and regulation, which is issued by the director pursuant to the provisions of any marketing order, the judgment, if in favor of the state, shall provide that the defendant pay to the director the costs which were incurred by the director and by the advisory board concerned with the administration of such marketing order in the prosecution of such action. Any money which is recovered shall be deposited in accordance with Section 58937.

59250. Any such action may be commenced either in the county where defendant resides, or where any act or omission, or part of the act or omission, which is complained of occurred.

59251. The penalties and remedies which are prescribed in this article with respect to any violation mentioned in this article are concurrent and alternative, and neither singly nor combined are exclusive, and either singly or combined are cumulative with any and all other civil, criminal, or administrative rights, remedies, forfeitures, or penalties which are provided or allowed by law with respect to any such violation.

59252. In lieu of other procedures which are provided in this article, the director may, if he finds that any person has exceeded any quota, allotment, or marketable percentage which is fixed for him pursuant to any marketing order issued by the director pursuant to this chapter, and if the director further finds that such person did not intend to violate such quota, allotment, or marketable percentage, make demand on such person to pay to the director an amount equal to the market value of the quantity marketed in excess of such quota, allotment, or percentage.

Such market value shall be only the cost of acquisition to the person that is concerned and does not include the value of services or commodities which are added subsequent to acquisition. Payment of such amount shall preclude any further enforcement action in connection with such transaction. If such person refuses to pay, or fails to pay, the amount which is demanded, the director shall thereupon proceed in accordance with the other provisions of this article. Any money which is recovered pursuant to this section shall be deposited in accordance with Section 58937.

Article 22. Inspection and Abatement

59281. This article applies to any lot of any commodity which is regulated by a marketing order or marketing agreement wherever, or in whose possession, such lot may be in the marketing channels within this state.

59282. Any authorized inspector, or other authorized person, who is discharging his duties in the checking of compliance with the provisions of any marketing order which is made effective pursuant to this chapter may enter and inspect any premises, enclosure, building, or conveyance where he has reason to believe any commodity which is subject to a marketing order is produced, stored, being prepared for market, or marketed, and inspect, or cause to be inspected, such representative samples of the commodity as may be necessary to determine whether or not any lot of such commodity is in compliance with applicable regulations, or rules and regulations, of any marketing order which is made effective pursuant to any provision of this chapter.

59283. Except as otherwise provided in this article, any authorized inspector, or other authorized person, in the discharge of his duties, if he has reason to believe that a lot of any commodity subject to a marketing order or marketing agreement which is issued pursuant to this chapter is not in compliance with the requirements of such marketing order or agreement, or of marketing regulations, or rules and regulations, which are issued pursuant to it, as to quality, condition, size, maturity, pack, labeling, or markings, may hold such lot for a reasonable period of time sufficient to enable such officer to ascertain by an authorized inspection whether such lot complies with such marketing requirements, but in any event not to exceed 24 hours in the case of perishables, or 72 hours in the case of nonperishables.

59284. Following inspection, such inspector or other authorized person may affix to any lot which is determined to be in noncompliance, an official notice, warning tag, or other appropriate marking which warns that the lot is held and states the reasons why it is held. It is unlawful for any person, except an authorized inspector or enforcing officer, to detach, alter, deface, or destroy any such official notice, warning tag, or marking so affixed to any such lot, or to remove or dispose of such lot in any manner or under conditions other than as prescribed in such notice of noncompliance except upon written permission of an authorized enforcing officer or by order of a court of competent jurisdiction.

59285. The director, or the authorized person by whom such lot is being held, shall serve the person in possession of the lot with a notice of noncompliance. Such notice shall be served in person or by mail to the last known address of such person that is in possession. The person in possession shall notify the owner of the lot, or every other person that has an

interest in it, of the serving of such notice of noncompliance.

59286. The notice of noncompliance shall include all of the following:

(a) A description of the lot.

(b) The place where, and the reasons for which, the lot is held.

(c) A citation of the applicable marketing order or agreement or marketing regulation, or rule and regulation, and any section of it upon which the notice of noncompliance is based.

59287. The owner of the lot shall have, in the case of a perishable commodity not to exceed 48 hours, and in the case of a nonperishable commodity not to exceed 72 hours, from the time of serving such notice of noncompliance for reconditioning or for the correction of the deficiencies which are noted in the notice of noncompliance. If such lot is reconditioned or the deficiencies are corrected the enforcing officer shall remove the warning tags or markings and release the lot for marketing or may, with the consent of the owner of such lot, divert the lot to other lawful uses or destroy it.

59288. If the owner of the lot fails or refuses to give such consent, or if the lot has not been reconditioned or the deficiencies otherwise corrected so as to bring it into compliance within the time which is specified in the notice, the enforcing officer shall proceed as provided in Section 59289.

59289. The enforcing officer may file a verified petition in any superior or inferior court of this state requesting permission to divert such lot to any other available lawful use or to destroy such lot. Such verified position shall show all of the following:

(a) The condition of the lot.

(b) That the lot is situated within the territorial jurisdiction of the court in which the petition is being filed.

(c) That the lot is held, and that the notice of noncompliance has been served as provided in Section 59285.

(d) That the lot has not been reconditioned as required.

(e) The name and address of the owner and the person in possession of the lot.

(f) That the owner has refused permission to divert or to destroy the lot.

59290. Upon the filing of the verified petition, the court may issue an order to show cause returnable in five days after service upon the owner why the lot shall not be reconditioned or the deficiencies corrected, or why the lot shall not be diverted to other lawful uses or destroyed.

The owner of the lot may, prior to the date when the order to show cause is returnable, either recondition or correct the deficiencies in the lot so as to bring it into compliance, or may file at or before the hearing on the order an answer with the court stating why the lot should not be reconditioned or the deficiencies corrected so as to bring it into compliance, or showing why it should not be diverted to other lawful uses or destroyed.

59291. If at the expiration of the five-day period the owner of the lot has failed or refused to recondition or to correct the deficiencies so as to bring the lot into compliance, the court may enter judgment ordering that the lot be reconditioned, diverted to any other lawful use, destroyed in the manner which is directed by the court, relabeled, denatured or otherwise processed, sold, or released upon such conditions as the court in its discretion may impose. The lot may not, however, be sold or released into the regular channels of trade.

59292. In the event of sale of any lot by order of court, the costs of storage, handling, and reconditioning or disposal shall be deducted from the proceeds of sale and the balance, if any, paid into court for the account of the owner of any such lot.

59293. Disposal of any lot or portion of any lot pursuant to the provisions of this article, whether such disposal be by arrangement with an enforcement officer or by court order, does not waive any of the penalty provisions of this chapter.

CHAPTER 2. THE AGRICULTURAL PRODUCERS MARKETING LAW

Article 1. Short Title and Definitions

59501. This chapter shall be known as the Agricultural Producers Marketing Law.

59502. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

59503. "Commission" means the Agricultural Prorate Advisory Commission.

59504. "Commodity" means any horticultural, viticultural, or vegetable product of the soil, livestock and livestock products, and poultry and poultry products It does not, however, include milk or milk products.

59505. "Dealer" means any distributor or retailer.

59506. "Distributor" means any person, except a retailer, that acquires and distributes any commodity at wholesale or retail.

59507. "Handler" means any person that receives any commodity from the producer for the purpose of marketing it.

59508. "Marketing program" means any program which contains provisions which are authorized by Article 8 (commencing with Section 59801) of this chapter.

59509. "Primary channel of trade" means that transaction in which the producer or a cooperative marketing association of producers transfers physical possession of the commodity to another person in the current of commercial trade.

59510. "Producer" means any person that is engaged in the business of growing or producing any commodity for commercial use.

59511. "Processor" means any person that buys, or otherwise takes title to or possession of, any commodity for the

purpose of processing or manufacturing it or selling, reselling, or redelivering it in dried, canned, extracted, fermented, distilled, or other preserved form. It also includes all of the following:

(a) Any person or exchange that conducts such business.

(b) Any person or exchange that buys any commodity from the producer of the commodity for the purpose of reselling it to any person or exchange that conducts such business.

59512. "Proration" means the application of allocated quantities or percentages under a uniform rule to the production, or merchantable production, of all producers that are affected, for the purpose of regulating the quantity of any commodity which may be harvested, prepared for market, or marketed in primary channels of trade during any specified period.

59513. "Proration zone" means any district for which a marketing program is proposed or has been instituted.

59514. "Retailer" means any person that is engaged in the business of making retail sales direct to the general public.

Article 2. General Provisions

59541. The Legislature declares that: The disorderly marketing of commodities in this state; the improper preparation for market; the lack of uniform grade specifications or uniform inspection of commodities; the marketing of commodities in excess of reasonable or normal market demands therefor; or the inability of individual producers to expand existing markets or to develop new or larger markets for California grown commodities tends to prevent agricultural producers from maintaining a proper standard of living or from contributing their fair share to the support of necessary governmental and educational functions and thereby tends to increase unfairly the tax burden of other citizens of this state.

59542. The conditions set forth in Section 59541 vitally concern the health, peace, safety and general welfare of the people of this state. It is declared to be the policy of this state to aid agricultural producers in preventing or correcting adverse marketing conditions, improving existing marketing conditions, expanding existing markets, promoting new or broader markets, developing more orderly or efficient or equitable methods in the marketing of commodities and thereby to aid agricultural producers to achieve and maintain a purchasing power at an equitable and reasonable level.

59543. The production and marketing of commodities by producers within this state is declared to be affected with a public interest. The provisions of this chapter are enacted in the exercise of the police powers of this state for the purpose of protecting the health, peace, safety, and general welfare of the people of this state.

59545. Any order of the director which makes effective a marketing program, and any other order of the commission

or director which substantially affects the rights of any interested party, may be reviewed by any court of competent jurisdiction. Any such action shall be commenced within 30 days after the effective date of the order which is complained of.

59546. If producers of any commodity which is regulated by a marketing program that is issued by the director pursuant to the provisions of this chapter are required to comply with minimum quality, condition, size, or maturity regulations, no person may, except as otherwise provided in such program, process, distribute, or otherwise handle any of such commodity from any source, whether produced within or without this state, which commodity does not meet such minimum requirements which are applicable to producers of the commodity in this state.

Such regulations do not, however, apply to any commodity which has been produced outside of this state and is in transit on the effective date of the regulations.

Article 3. Exceptions

59571. By reason of the climatic and other conditions which relate to the production and marketing of figs for canning purposes, no marketing program pursuant to this chapter shall be established for figs for canning purposes.

59572. By reason of the climatic conditions and other factors which relate to the production of grapes in such counties, no marketing program shall be applicable to grapes in Sonoma, Napa, Mendocino, Lake, Santa Clara, Santa Cruz, Alameda, San Benito, Solano, San Luis Obispo, Contra Costa, Monterey, and Marin Counties, or any of them.

Article 4. Administration

59601. There is in the state government the Agricultural Prorate Advisory Commission, which consists of nine members.

Eight of the members shall be appointed by the Governor. The director shall be ex officio the ninth member. Six of the appointive members of the commission shall be engaged at the time of their appointment in the production of commodities as their principal occupation, but no two of these shall be appointed as representing the same commodity. One member shall be neither a producer nor a handler of commodities but shall be appointed to represent consumers generally. One member shall represent commercial handlers or processors of commodities.

59602. The terms of office of the members of the commission, except the director, shall be four years beginning with the month of January. The terms shall be so staggered as to permit the appointment of two members each year. Members shall hold office until their successors have been appointed

and have qualified. Vacancies shall be filled by appointment for the unexpired term.

59603. All appointments of members of the commission shall be by and with the consent of the Senate, but are valid, subject, however, to the consent of the Senate at its next regular session. Until such time, the person so appointed has as full and ample authority as though confirmed by the Senate. If the Senate, during its session, fails to act or refuses its consent to any such appointment, the Governor may, after adjournment of the Senate, appoint some other person, which appointment is valid, subject, however, to the consent of the Senate at its next regular session Until such time, the person so appointed has as full authority and power as though confirmed by the Senate.

59604. Within 30 days after notice of his appointment, each member shall qualify by taking the oath of office and filing it with the Secretary of State in accordance with Article 4 (commencing with Section 1360), Chapter 2, Division 4, Title 1 of the Government Code.

59605. The commission shall adopt the general policies as to its activities pursuant to this chapter and may, from time to time, adopt such regulations as it deems necessary in connection with such activities

59606. The director, with the consent of the commission, shall appoint a secretary for the commission. The secretary shall also serve as executive assistant to the director in the administration of the provisions of this chapter.

59607. The director may appoint an attorney and shall provide for such other personnel as may be necessary and shall prescribe their duties.

59608. The members of the commission shall receive ten dollars ($10) per day for each day they are actually engaged on official business and shall be reimbursed for their actual traveling expenses.

59609 The office of the commission is in the City of Sacramento. It may meet at such times and in such places as may be expedient and necessary for the proper performance of its duties. The commission shall meet at least once every calendar year and oftener at the call of the president of the commission or of the director if in the discretion of either the need arises. At all meetings of the commission, a majority constitutes a quorum.

59610. A member or employee of the commission, member of the marketing program committee, or the proration zone agent, shall not unduly influence producers in their choice either for or against the institution of a marketing program, or for or against the termination of such a marketing program

59611. The director may conduct hearings and investigations on behalf of the commission.

59612. In the conduct of any hearing, inquiry, or investigation, the director may administer oaths, and issue subpoenas

for the attendance of witnesses and the production of papers, books, maps, accounts, documents, and testimony in any inquiry, investigation, or hearing which is ordered or undertaken in any part of the state.

59613. At each hearing at least one member of the commission shall be present.

59614. The superior court of the county in which any inquiry, investigation, or hearing is held may compel the attendance of witnesses and require the disclosure by the witnesses of all facts known to them, relative to the matters under investigation, and the production of papers, maps, books, accounts, documents, and testimony as required by any subpoenas issued by the director.

59615. Any party that disobeys any order or subpoena which is issued pursuant to the authority of the director is guilty of contempt and shall be certified to the superior court of the county in which the contempt occurs, which court shall punish the contempt.

59616. The director through his duly authorized representatives and agents, including any proration zone agent who is in charge of a marketing program, shall have access, solely for the purposes of investigating possible violations of any marketing program, to the records of every producer, dealer, distributor, public or private property transportation agency, and handler of a commodity as to which a marketing program has been instituted. He shall have at all times free and unimpeded access to any building, yard, warehouse, store, or transportation facility or other place in which any commodity under a marketing program is kept, stored, handled, or transported. All information which is obtained is confidential and shall not be disclosed unless required in a judicial proceeding.

59617. In carrying out his duties under this chapter, the director may utilize the facilities and personnel of the state and county departments of agriculture.

59618. A full and accurate record of business or acts which are performed, or of testimony which is taken pursuant to the provisions of this chapter, shall be kept and be placed on file in the office of the director. Such records shall at all times be open to any interested person.

Article 5. Establishment of Proration Zone

59641. Ten or more producers of the variety or kind of commodity which is to be affected may file with the commission or the director a petition for the establishment of a proration zone and the institution of a marketing program.

59642. The petition shall, among other things, contain or be accompanied by all of the following:

(a) A description of the district which comprises the proration zone upon which the proposed marketing program is to be based.

(b) A general statement of facts which sets forth the necessity for instituting a marketing program.

(c) A draft of a proposed marketing program, or a statement of the principal features which are to be included in the proposed marketing program.

59643. Except as otherwise provided in Section 59654, if, after receiving a petition for the establishment of a proration zone and a proposed marketing program for it, the director determines that such proposed proration zone and proposed marketing program are consistent with the provisions of this chapter, the director on behalf of the commission shall hold a public hearing at some central point which is located within the area described in the petition and proposed to be established as a proration zone.

If the director determines that the proposed proration zone or proposed marketing program is not consistent with the provisions of this chapter, he shall refer such determination to the commission. If the commission concurs in the director's determination, no hearing need be held.

59644. If the commission does not concur with the determination of the director and determines that the proposed proration zone and marketing program are consistent with this chapter, the commission may request the director to hold a public hearing upon the proposed proration zone and marketing program.

59645. Prior to holding a public hearing upon a proposed proration zone and a proposed marketing program, the director:

(a) May require the petitioners to file with the department a good and sufficient undertaking to cover the probable cost of conducting the hearing and instituting a marketing program.

(b) Shall establish a list of producers of the commodity which is affected within the area which comprises the proposed proration zone

59646 In establishing the list of producers, the director may issue a notice to handlers which requires them to file with the director a certified report that shows all of the following:

(a) The name and mailing address of the handler.

(b) The quantities of the commodity that is to be affected, which were handled by the handler in the marketing season next preceding the filing of the report, together with a reasonable determination of the quantity so handled which was produced within the proposed boundaries of the proration zone.

(c) The correct name and mailing address of each producer, whose producing operations are located within the proposed proration zone, from whom the handler received the commodity which is to be affected, during the next preceding season.

(d) The quantities of the commodity which were received by the handler from each such producer in the marketing season next preceding the filing of the report.

59647. The notice to handlers which requires them to file the lists shall be published by the director pursuant to Section 6062 of the Government Code in the capital of the state and in

such other localities as the director may require, and shall be mailed to all handlers of the commodity that are directly affected, of record with the department. The lists of producers shall be filed by handlers within 10 days from the last date of publication of the notice.

59648 In addition, the director may obtain lists of producers that are affected, whenever and in such manner as he may deem necessary or advisable for the purpose of checking, comparing, or correcting such lists. The director shall maintain a current list of producers which is based upon the records of operations under each marketing program. Such producer list shall, subject to any proper corrections, be final and conclusive in making determinations relative to the assent by producers upon a marketing program.

59649. Any producer that produces the commodity which is affected by any proposed or existing marketing program, whose name does not appear upon the director's list of producers affected, may have his name established upon such list by filing with the director a signed statement which states that he produced such commodity in the next preceding season and gives the quantity which was produced and the quantity which was delivered into primary channels of trade in such season

59650. Notice of the public hearing shall be mailed to a list of producers within the proposed zone at least 10 days prior to such hearing. The list of producers shall be established in accordance with the provisions of Sections 59646, 59647, 59648, and 59649. A notice of such public hearing shall also be given at least 10 days prior to such hearing by publication pursuant to Section 6061 of the Government Code in the area proposed as the proration zone. If the proposed proration zone includes areas that are noncontiguous, the director shall hold a hearing in each.

59651. At the public hearing, the director shall receive evidence offered by the petitioners in support of the proposed proration zone and the proposed marketing program and evidence from any interested person in support of, or in opposition to, them. All testimony at the hearings shall be under oath.

59652. The hearings may be adjourned from time to time and from place to place as the circumstances may require. For the purpose of procuring additional evidence, facts, and data, petitioners or opponents shall, upon proper motion, be granted a continuation of any hearing by the director for a period not exceeding five days. A transcript of the proceedings at all such hearings shall be made by the director and shall be open to inspection by any interested party

59653. All evidence and exhibits and all facts and data which are used directly or indirectly by the director, or introduced at a hearing shall, within a reasonable time after being used or introduced, be available at the office of the commission to all interested parties.

59654. The director, with the approval of the commission, may decline to hold a public hearing upon a proposed proration zone and a proposed marketing program if he determines and is satisfied that a public hearing cannot be held within a reasonable time in advance of the harvesting of, or the beginning of the marketing season for, the commodity, so as to permit the formulation and establishment of an equitable and effective marketing program for the marketing season.

59655. Before issuing a marketing program for the written assent of producers, which contains provisions for correlating the supply of the commodity which is affected with market demands for it by means of restrictions upon the total quantity of the commodity, or restrictions upon the total quantity of any grade, size, quality, or condition of it, which restrictions have the effect of limiting the total quantity of the commodity which may be marketed during any marketing season and which restricted portion of the commodity might otherwise be marketed by producers in compliance with other laws of this state or of the United States, or in compliance with established commercial practice during the marketing season, the director shall make all of the following findings with respect to the marketing program:

(a) The marketing program will tend to reestablish or maintain such level of prices for the commodity as will provide a purchasing power for the commodity which is adequate to maintain in the business of producing the commodity such number of producers as is required to provide such supply of the quantities and qualities of the commodity as is necessary to fulfill the normal requirements of consumers.

(b) The marketing program will tend to approach such equality of purchasing power at as rapid a rate as is feasible in view of the market demand for the commodity.

(c) The marketing program conforms with the provisions of this chapter and will tend to effectuate the declared purposes and policies of this chapter.

(d) The marketing program will protect the interest of consumers of the commodity through the exercise of the powers of this chapter only to such an extent as is necessary to establish the level of purchasing power which is described in subdivision (a) of this section.

59656. In making the findings which are required by Section 59655, the director shall take into consideration all facts which are available to him with respect to all of the following economic factors.

(a) The quantity of the commodity which is available for distribution.

(b) The quantity of the commodity which is normally entered into primary channels of trade

(c) The necessary costs of producing the commodity as determined by available surveys or other facts.

(d) The purchasing power of consumers as indicated by available reports and indices.

(e) The level of prices of other commodities which compete with, or are utilized as substitutes for, the commodity.

(f) The level of prices of other commodities, services, and articles which producers commonly purchase.

59657. Before issuing a marketing program for the written assent of producers, which contains provisions for the purpose of regulating the flow of the commodity, or any grade or size of it, to market without restricting the total quantity which may be marketed during the season, or which marketing program provides for the establishment of grade, size, quality, or condition specifications, for uniform grading and inspection, or for advertising and trade promotion, the director shall make all of the following findings with respect to the marketing program:

(a) The marketing program will tend to attain the objectives which are sought by the program.

(b) The marketing program conforms with the provisions of this chapter and will tend to effectuate the declared purposes and policies of this chapter.

(c) The marketing program will protect the interests of consumers in that the powers of this chapter are being exercised only to the extent which is necessary to attain the objectives of the program.

59658 In making any findings pursuant to Section 59657, the director shall base his findings upon the facts, testimony, and evidence which is received at the public hearing together with any other relevant facts which are available to him from official publications or institutions of recognized standing.

59659. In addition to either of the applicable findings prescribed by Section 59655 or 59657, the director shall find that the proposed proration zone includes all of the area within this state which is reasonably necessary to carry out and attain the objectives of this chapter.

59660 If, at a public hearing which includes a consideration of the establishment of the boundaries of a proration zone, it appears that the inclusion of territory additional to that which is described in the petition that is being heard is necessary to the proper administration or enforcement of the proposed marketing program, the director shall postpone further proceedings until notice has been given by the director to the producers within the additional territory in the manner which is provided for in Sections 59643, 59644, 59650, 59652, 59653, and 59654 Thereafter, the director may conclude the hearing, and prepare his findings.

59661. The director shall submit his findings, together with a summary of the evidence which was received at any hearing which is authorized in this chapter, to the commission for approval prior to the establishment of any proration zone or the issuance of any marketing program. Upon the approval of the findings by the commission, the director shall establish such proration zone and issue such marketing program for the written assent of producers. If the commission does not approve

of the findings of the director, the commission shall examine the evidence and prepare its own findings and thereupon instruct the director to proceed in accordance with such findings.

59662. Each proration zone is a separate public corporate entity.

Article 6. Change of Proration Zone Boundaries

59691. Any area within the state which is not already included in a proration zone that produces the same kind or variety of a commodity as is produced in a proration zone which is already established pursuant to this chapter, and regulated by a marketing program, may be added or annexed to the established proration zone pursuant to this article.

59692. A petition to change the boundaries of any proration zone may be filed with the director by producers that produce not less than 10 percent of the production of the commodity which is affected that is produced within the boundaries of the proration zone which is established, or within the boundaries of the area which is proposed to be added. The petition may request that the existing marketing program or a proposed marketing program, as amended, be made applicable to the entire area which is included within the proposed changed boundaries of the proration zone. Upon the receipt of such a petition, the director shall, on behalf of the commission, hold a public hearing, as provided in Article 5 (commencing with Section 59641) of this chapter, and receive evidence as to whether or not the boundaries of the proration zone as established shall be changed as recommended.

The director shall also, at the hearing, receive evidence with respect to the marketing program which is to be applicable to all of the area within the proposed changed boundaries of the proration zone.

59693. After the hearing, findings shall be made and procedures followed which are in accordance with the applicable provisions of Article 5 (commencing with Section 59641) of this chapter. If the findings are positive, a marketing program is issued, and a proration zone with new boundaries is established, the marketing program shall be submitted to producers within the zone for their written assent as prescribed by the applicable provisions and procedures of Article 9 (commencing with Section 59851) of this chapter.

59694. If the marketing program which is submitted is not assented to by producers in sufficient number and by sufficient volume to meet the requirements of Article 9 (commencing with Section 59851) of this chapter, the director, with the approval of the commission, shall dismiss the proceedings which were instituted to change or annex the boundaries of the proration zone, and the marketing program in operation at the time the proceedings were instituted shall continue to be effective within the boundaries of the proration zone as con-

stituted prior to the proceedings. The marketing program has the same force and effect as though no proceedings had been instituted pursuant to this article.

Article 7. Marketing Program and Grading Committees

59721. The affairs of each proration zone shall be managed by a marketing program committee which is appointed in accordance with this chapter. The director shall appoint the initial marketing program committee from nominations which are received at the public hearing upon the proposed program. The term of office of the initial marketing program committee shall be for one marketing season. The term of office of subsequent marketing program committees for each marketing program shall be two years or until their successors have been appointed and have qualified. The beginning date of the term of office shall be set forth in the marketing program.

59722. For terms subsequent to the term of the initial committee, members and their respective alternates shall be selected and appointed in accordance with the following procedure: The director shall divide the proration zone into as many districts as may be necessary for the proper administration of the program, and allot to each district the proper number of producers to be appointed to serve as members and alternate members upon a marketing program committee so as to give as nearly as possible adequate representation to all producers in all such districts. Members and their respective alternate members shall be appointed by the director with the approval of the commission from lists of producers that are eligible to serve on the marketing program committee.

59723. Eligible lists shall be established by the director either by means of a meeting of producers in each district, or by means of mail ballot, or by a combination of meetings and mail ballot. The method to be used shall be determined by the director with the approval of the commission, except that a mail ballot shall be granted upon a written request of 10 percent of the producers. Each producer is entitled to one vote and voting by proxy is not permitted. From nominations which are made, not less than three eligible persons shall be selected for each member of the committee. Any person that is nominated shall be a producer with producing property which is located within the district for which he is nominated.

59724. If a corporation or a partnership is a producer, it may designate a representative who may be a nominee.

59725. Each respective alternate shall be appointed from the same eligible list from which the member is appointed. Each district in the proration zone is entitled to at least one member and one alternate member of the committee.

59726. The marketing program committee may at any time invite any handler or other person to its meetings to serve in an advisory capacity and may authorize, subject to the ap-

proval of the director, the payment of compensation and necessary expenses to any person that is serving in such advisory capacity at rates not to exceed those which are granted to marketing program committee members.

59727. The director may, if requested by the producer members of the marketing program committee, appoint on the committee, in addition to the producer members, not more than three handler members and their respective alternates who are handlers of the commodity which is affected by the marketing program of the proration zone. The appointments of the director are subject to approval by the commission. Such approval may be given by the commission, in lieu of approval at a meeting of the commission, by written approval of a majority of the commission members except the director.

59728. If grade, quality, or size regulations are authorized under any marketing program for any commodity which is used for canning, freezing, fermenting, or distilling, and the regulations are not an integral part of a proration plan for the purpose of controlling a surplus condition in the commodity, such grade, quality, or size regulations or interpretations, or modifications of them, shall be approved by a grading committee which is appointed by the director. A grading committee shall consist of the marketing program committee, or a subcommittee, of at least seven members and an equal number of processor representatives that are nominated by the industry which is engaged in the processing of the commodity that is involved. Any action of the grading committee shall be concurred in by a majority of the processor members, a majority of the producer members, and by the director.

59729. The members and alternate members of any marketing program committee or grading committee which are duly appointed by the director, including employees of the marketing program committee, are not responsible individually in any way whatsoever to any person for liability on any contract or agreement of the committee.

59730. Marketing program committee members are entitled to compensation at a rate not exceeding ten dollars ($10) each for each day while engaged on official business. Such compensation shall not, however, be paid for more than five days in any month unless approved by the director. The members shall be reimbursed for their necessary traveling expenses

59731. An alternate member of a marketing program committee shall sit as a regular member of the committee if the member for whom he is an alternate fails for any reason to attend any meeting of the committee. He shall be compensated and reimbursed for his necessary traveling expenses in the same manner and to the same extent as a regular member while so serving

59732. Any vacancy on the marketing program committee which is occasioned by the expiration of term of office shall be filled from eligible lists of producers selected in each district obtained as provided in Sections 59721 to 59729, inclusive.

Any vacancy which is occasioned by the death or resignation of any member, or by removal for incompetence, inattention, or neglect of duties as a member of the marketing program committee, by the director, with the approval of the commission, or by a member who ceases to qualify as a producer or handler of the commodity which is concerned, shall be filled from persons who remain on the eligible lists of producers from which the appointments for the current term were made, or from new lists which are obtained as provided in Sections 59721 to 59729, inclusive.

59733. The marketing program committee shall appoint an agent, subject to the approval of the director, who shall administer the marketing program under the direction of the marketing program committee and who may be removed from office in the same manner as he was appointed. The salary or compensation of the agent shall be fixed by the marketing program committee, subject to the approval of the director.

59734. The agent shall appoint such deputy agents and other assistants as may be necessary to direct the marketing program. Such appointments are subject to the approval of the program committee. The agents, deputy agents, and other assistants are employees of the proration zone and not of the state. An officer or employee shall not receive compensation which is based on a percentage of volume which is involved in a marketing program, or in any manner that would lend encouragement to the promotion of a marketing program for the purpose of increasing salaries and income.

59735. The marketing program committee, with the approval of the director, may do all of the following:

(a) Appoint subcommittees in any producing areas within the proration zone to facilitate the carrying out of the purposes of this chapter.

(b) Collaborate and cooperate with any agency or organization with similar purposes, whether of this state, any other state, or of the United States, in the formulation and execution of any marketing program or marketing order which has common objectives. In any proper case, the commission or director may require such collaboration and cooperation.

(c) Cooperate with any duly constituted authority in the enforcement of other laws of this state, or of the United States, which are enacted to protect producers or the consuming public from fraud or deception.

(d) Make contracts and agreements in the furtherance of any of the powers of the marketing program committee.

59736. The exercise of the powers which are granted to a marketing program committee in its administration of a marketing program which is made effective pursuant to this chapter is subject to the approval of the director. If the director disapproves of an action which is taken by a marketing program committee or does not within a reasonable time approve of an action of a marketing program committee, the com-

mittee may appeal to the commission. The commission shall make a review of the subject matter under consideration and make a determination. In such event, the director shall proceed in accordance with the determination of the commission.

59737. Upon recommendation of the marketing program committee which is concerned, the director may, consistent with this chapter, establish such administrative regulations as may be necessary to facilitate the administration and enforcement of each marketing program which is promulgated pursuant to this chapter. Upon the issuance and making effective of such regulations, notice of the issuance of the regulations shall be made in the same manner as provided in Article 16 (commencing with Section 59111), Chapter 1, Part 2 of this division for marketing orders.

Article 8. Marketing Programs

59801. The powers which are granted to a marketing program committee by a marketing program pursuant to this article may be exercised for the purpose of minimizing the effect of any surplus or other adverse market condition.

59802. A marketing program may authorize the marketing program committee to establish and maintain stabilization and surplus pools. The marketing of green ripe olives is not, however, subject to the provisions of any marketing program which relates to the esablishment and operation of stabilization and surplus pools.

59803. The program committee may receive from each producer for delivery into a stabilization or surplus pool the uncertificated portions of the commodity which is regulated by the marketing program and market it by any variety, grade, or size for the account of the producers if the uncertificated portion can be disposed of advantageously either in its original or a converted state. The marketing program committee shall designate the quantity or the percentage of the marketable supply of the commodity that shall be placed in the stabilization pool and the quantity or the percentage of the marketable supply of the commodity that shall be placed in the surplus pool. Any quantity or percentage which is so established is applicable to each producer.

59804. In operating any stabilization or surplus pool, the marketing program committee may receive and account for the commodity on the basis of variety, grade, or size classifications, and may fix servicing charges to be assessed against the total quantity of any commodity which is received into the pools.

59805. The marketing program committee has title to all of the commodity in each of the pools and shall handle all of the commodity received into each of the pools and account for it to each producer that is beneficially interested in such commodity upon a pooled basis.

59806. The contents of a stabilization pool may be disposed of or may be marketed, from time to time, as the marketing program committee deems advisable, consistent with the maintenance of stabilized marketing conditions.

59807. The contents of a surplus pool shall not be marketed in any form which would directly compete with that portion of the commodity which is regularly certificated or which is in a stabilization pool. Any part of any surplus pool may, however, be transferred by a marketing program committee on a gratuitous basis to any charitable organization, self-held cooperative, or similar agency under proper safeguards to prevent any part of the commodity so disposed of from directly competing with the part of the commodity which is marketed through the usual channels of trade.

59808. A marketing program may authorize the marketing program committee to establish and maintain diversion or substandard pools. The program committee may receive from each producer for delivery into a diversion or a substandard pool such quantity of each producer's production or deliveries as fails to qualify for marketing or sale in regular marketing channels, under grade, quality, or size regulations which are established in the marketing program or under standardization laws or other laws of this state or of the United States.

59809. In operating any such diversion or substandard pool, the marketing program committee may fix servicing charges to be assessed against the commodity which is received into the pool and may receive and account for the commodity on a basis of variety, grade, and size classifications. The program committee has title to all of the commodity in either of the pools and shall handle all of the commodity which is received into either of the pools and account for it to each producer that is beneficially interested in such upon a pooled basis.

59810. The contents of any diversion or substandard pool shall be disposed of for byproducts or for other purposes under proper safeguards to prevent that part of the commodity which is so disposed of from directly competing with the part of the commodity which is marketed in its usual form through the usual channels of trade.

59811. A marketing program may authorize the marketing program committee to create, establish, or otherwise obtain and operate any facility for the storing, financing, grading, packing, servicing, processing, preparing for market, selling, or disposal of the contents of any pools which are provided for in this article. A marketing program committee shall not, however, engage in public warehousing.

59812. The marketing program committee may pledge all of the commodity that is in any pool which is established pursuant to any provision of this article with a bank or other lending agency for the purpose of obtaining loans upon such commodity. The marketing program committee has title to all of the commodity which is in any such pools for the purpose of financing and handling.

59813. A marketing program may authorize the marketing program committee to create, by a uniform assessment upon producers based upon the volume of the commodity which is marketed by each, or upon some other uniform and equitable basis, maintain, and disburse an equalization fund to be used for the removal of any inequalities between producers as to the total volume which is marketed through prorated channels that result from errors in estimating production or surplus, or for indemnifying producers whose production, in whole or in part, is diverted in green form or otherwise from normal marketing outlets, or diverted to relief, byproducts, or other noncompetitive purposes pursuant to a marketing program.

59814. No part of any funds which are raised for equalization fund purposes, as specified in Section 59813, shall be applied to the cost of maintenance of the commission and the department.

59815. A marketing program may authorize the marketing program committee to establish, adopt, and apply methods for correlating the marketable supply of any commodity to the reasonable market demands by means of volume limitation, time limitation, diversion, or by grade, quality, or size regulations which are applicable to the total production of any commodity, or to that portion of any commodity which qualified for marketing pursuant to standards which are authorized in the marketing program, standardization laws, or other laws of this state, or of the United States.

The marketing of green ripe olives is not, however, subject to the provisions of any marketing program which limits the total quantity of such commodity which may be marketed.

59816. A marketing program may authorize the marketing program committee to broaden distribution and increase consuming outlets by appropriate educational and trade stimulation efforts of a general industry nature and not unfairly depreciative of the quality of any other food product.

59817. Educational and trade stimulation efforts may include all of the following:

(a) Efforts to prevent, modify, or remove trade barriers which directly affect the commodity to which the marketing program applies.

(b) The presentation of facts to, and negotiations with, any state, federal, or foreign governmental agency on any matter which affects the marketing of the commodity.

59818. For the purpose of providing funds to defray the cost of formulating, administering, and enforcing educational and trade stimulation efforts, a fee or assessment shall be established and collected upon the volume of the commodity which is marketed or upon some other uniform and equitable basis

The fee may be collected separately by the marketing program committee or may be combined with any fee which is collected for general administrative purposes, in which case the

marketing program committee may recommend to the director, and the director may approve, the proportions of the combined fee which may be expended for each of such purposes.

59819. Any portion of the funds which are collected during any marketing season to accomplish the purposes of Sections 59816, 59817, and 59818 may, subject to the approval of the director, be carried forward for expenditure during any season subsequent to the season during which the funds are collected.

59820. Any educational and trade stimulation efforts which are authorized by any marketing program if approved by growers, either by written assent or by referendum ballots, for a specified period of time, but not exceeding four years, may be carried out for such period without the necessity of a biennial referendum as required in Section 59981.

59821. A marketing program may authorize the marketing program committee to provide for the adjustment of production of any commodity by means of tree or vine pulling. The marketing program committee may receive applications from producers for acreage adjustment payments. The marketing program committee shall, upon proper review and certification, make such acreage adjustment payments on an equitable basis from funds which are collected for that purpose under the marketing program on a uniform basis from all commercial producers of the commodity within the proration zone, or from funds which are received from any federal, state, or other agency for that purpose.

59822. A marketing program of production adjustment adopted under Section 59821 shall not authorize any payment for the removal of acreages of trees or vines of any species or variety specified in the marketing program which have, during the three years immediately preceding the date of application, produced an annual yield per acre in excess of the comparably computed average yield from bearing trees or vines of the same species or variety for the state as a whole. Such yields and averages shall be determined by the director from statistical data which is compiled by any state or federal agency or such other data as the director deems to be representative and reliable.

59823. If the marketing program committee finds that the results of research would be advantageous in the administration of a marketing program, it may, subject to the approval of the director, authorize and arrange for research to be conducted. The cost of the research shall be considered a part of the cost of the administration of that portion of the marketing program for which the research is authorized.

59824. In any such research, the Dean of the College of Agriculture of the University of California and the program committee shall cooperate in selecting the research projects to be carried on from time to time. Insofar as practicable, the projects shall be carried out by the College of Agriculture, but if the dean of the college and the marketing program com-

mittee determine that the college has no facilities for a particular project or that some other research agency has better facilities for it, the project may be carried out by any other research agency which is selected by the dean and the marketing program committee.

Article 9. Assents to Marketing Programs

59851. Upon the issuance of a marketing program for the written assent of producers, the director shall submit a copy of the marketing program in full to each of the producers of the commodity which is to be affected, or their duly authorized agent, within the proposed proration zone as shown by the lists of producers which are compiled in accordance with this chapter, accompanied by a printed, typewritten, or mimeographed form upon which the producer can record his assent to the marketing program.

59852. A nonprofit cooperative association may assent on behalf of any of its members only if it is authorized so to do by an instrument in writing which is signed by the member.

Such authority may be revoked as to him by any such member by an instrument in writing which is filed with the director and with such association. The revocation shall become effective three days after its receipt by the director. A copy of any written authorization, or any revocation of such authority, of a producer to the nonprofit cooperative association of which he is a member shall be forwarded to the director by the association.

59853. The director may at the time of mailing to producers a marketing program or amendments to it for written assent, establish a closing date after which assents will not be counted. If he does so, the closing date upon which assents are required to be postmarked in order to be counted shall be shown on the assent form and be announced by a press release for general dissemination which is issued by the director.

59854. If the closing date is not established at the time assent forms are mailed to producers, and the director subsequently finds that because of the oncoming harvesting season or because of any other relevant reason it is desirable to fix a closing date for filing assents, he may do so by publishing a notice pursuant to Section 6061 of the Government Code in the capital of the state and in such other localities as the director may prescribe not less than 10 days prior to the closing date. The closing date shall also be announced by a press release for general dissemination which is issued by the director at least 10 days prior to the closing date.

59855. If the director finds that the marketing program has been assented to in writing by one of the following, he shall make the marketing program effective:

(a) Not less than 65 percent of the producers in the proration zone that produced for market not less than 51 percent of the quantity of the commodity which was produced in the proration zone in the next preceding season.

(b) Not less than 51 percent of the producers that produced for market not less than 65 percent of the quantity of such commodity which was produced in the proration zone in the next preceding season.

59856. If the director makes a marketing program effective, he shall publish a notice of the effective date pursuant to Section 6061 of the Government Code in the capital of the state and in such other localities as the director may prescribe, not less than five days prior to the effective date.

Article 10. Proration Certificates

59881. After any marketing program has been formulated and has been approved as provided in this chapter, the agent for the proration zone shall assume the administration of the marketing program and any subsequent modification of it and the issuance of proration certificates pursuant to it. Such certificates shall be divided into primary and secondary certificates.

59882. Each producer is entitled to one primary certificate which may indicate the quantities of the commodity for which the marketing program has been instituted which the producer that is named in the certificate is entitled to harvest or otherwise prepare for market and delivery into the primary channels of trade. The primary certificate may also indicate from time to time the number of secondary certificates which are issued under it.

59883. Secondary certificates shall be numbered consecutively and shall be used to control the time and volume of harvesting or other preparation for disposal. Secondary certificates shall accompany all deliveries of the prorated commodity by producers into a primary trade channel

59884. In the case of any commodity which is normally concentrated for preparation for market, the marketing program committee may authorize the harvesting of the entire commodity for the purpose of delivery to a concentration point and subsequent marketing control.

59885. Primary or secondary certificates are not negotiable between producers, except with the approval of the marketing program committee and the director.

59886. In the operation of any marketing program, any cooperative or other market agency which is entitled to the possession of any commodity for marketing purposes may be authorized in writing by the marketing program committee to receive certificates for producers that are represented by it and to represent its respective producers if proration is applied to the commodity while it is in the possession of such agency.

Article 11. Amendments to Marketing Programs

59911. Any amendment to a marketing program which is specified in Sections 59912 to 59921, inclusive, is a major amendment.

59912. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to correlate the marketable supply of any commodity with reasonable market demands by means of volume, grade, size, variety, or time regulations.

59913. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to fix salable and surplus percentages.

59914. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to establish, maintain, and operate stabilization, surplus, or diversion—substandard pools.

59915. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to create, establish, or otherwise obtain and operate any facility for the storing, financing, grading, packing, servicing, processing, preparing for market, selling, or disposing of the contents of any pools which are established.

59916. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to create and disburse an equalization fund as provided for in Sections 59813 and 59814.

59917. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to broaden distribution and increase consuming outlets by educational and trade stimulation efforts.

59918. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to provide for the adjustment of production of any commodity by means of tree or vine pulling.

59919. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority for carrying on research which is related to production, processing, or distribution of any commodity, that is in addition to research that is directly necessary to the administration of the marketing program.

59920. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to increase an assessment rate or fee beyond the maximum authorized by the marketing program which is in effect.

59921. An amendment is a major amendment if it adds to, or deletes from, a marketing program authority to extend the application of the provisions of the marketing program to portions or uses of any commodity which is not subject to such provisions or to extend the application of such provisions upon the producers of such portions or uses of any such commodity.

59922. A major amendment shall not be made effective unless a public hearing has been held upon it in accordance with Article 5 (commencing with Section 59641) of this chap-

ter for the establishment or institution of a marketing program, and the director makes both of the following findings:

(a) The amendment is in conformity with the applicable provisions and procedures of Article 5 of this chapter.

(b) The amendment is assented to in writing in the required percentages prescribed in Article 9 (commencing with Section 59851) of this chapter.

59923. Minor amendments may be made to an effective marketing program upon the recommendation of not less than 75 percent of the producer members of the marketing program committee, with the approval of the director, if the director finds that such amendments are in conformity with the applicable provisions and procedures of Article 5 (commencing with Section 59641) of this chapter.

59924. If the director deems it advisable, he may, on behalf of the commission, hold a public hearing upon minor amendments prior to such approval. Any public hearing held for this purpose shall be held within the boundaries of the proration zone.

59925. The amendment of any marketing program to provide for a referendum is a minor amendment.

59926. Any modification of the provisions of any marketing program in effect for the purpose of clarifying the meaning or application of the provisions or modifying administrative procedures for carrying out the provisions is a minor amendment.

59927. If the director makes any amendment to a marketing program effective, he shall publish a notice of the effective date pursuant to Section 6061 of the Government Code in the capital of the state and in such other localities as the director may prescribe, not less than five days prior to the effective date.

Article 12. Funds

59941. The proration zone agent for each marketing program shall collect, either for each primary certificate or for each secondary certificate, or for both, a reasonable and proportional fee to be fixed by the program committee, subject to the approval of the director, so calculated as to provide an amount which is adequate to defray the necessary expenses of instituting and carrying out the marketing program and a proper proportion of the cost of the maintenance of the commission and of the department in the performance of duties which are required by this chapter.

59942. Any fee for primary certificates or secondary certificates which is fixed by the program committee with the approval of the director, pursuant to this article, is due and payable by each producer upon all units of the commodity of the producer which are subject to the certificates and constitutes a personal debt of the producer.

59943. If any producer has authorized a handler to obtain secondary certificates and pay secondary certificate fees on

behalf of the producer, or the handler has been a party to noncompliance with respect to payment for certificates or corresponding fees, the amounts unpaid constitute a personal debt of the handler.

59944. The proportion of the fees which is payable to the commission and to the department may vary upon a seasonal basis for each program according to the estimated expense to be incurred by the director and the commission in administering the marketing program. The amount so required shall not exceed 15 percent of the certificate fees which are collected by the proration zone agent specifically for administrative purposes and, in addition, such proportion of fees which are collected for any educational and trade stimulation marketing program as may be required by the commission and the director to administer the marketing program, which shall in no event exceed 5 percent of the fees which are collected for such purpose, unless the payment of a larger proportion of such funds is approved by the marketing program committee for the marketing program.

59945 Upon the request of any marketing program committee, the commission shall confer with the committee or its representatives prior to fixing the amount or proportion of any fees of the marketing program which are payable to the department for maintenance of the commission and the department in the performance of the duties which are required by this chapter.

59946. All such fees shall be deposited promptly by the proration zone agent in a bank which is approved by the Director of General Services, and shall be accounted for forthwith to the Director of Agriculture. Each deposit shall be made in the name of the proration zone under which the funds are collected.

Any money which is so deposited may be invested and reinvested by the State Treasurer in any of the securities which are described in Article 1 (commencing with Section 16430), Chapter 3, Part 2, Division 4, Title 2 of the Government Code, or placed in a bank as provided in Chapter 4 (commencing with Section 16500), Part 2, Division 4, Title 2 of the Government Code, and handled in the same manner as money in the State Treasury. For such purposes, such moneys may also be combined with funds which are determined by the director to be available for investment pursuant to Section 58939. Any increment which is received from such investment, reinvestment, or deposit shall be remitted to the director for allocation. The State Treasurer may deduct from such remittance an amount equal to the reasonable cost incurred in carrying out this section or may bill the director for the costs and the director shall pay the costs from any money which is collected pursuant to this chapter.

59947. The funds which are deposited pursuant to Section 59946 shall be disbursed by the director, pursuant to regula-

tions prescribed by him, and approved by the commission, only for the expenditures which are incurred by the marketing program committee in carrying out the specific purposes and provisions of the marketing program, including all necessary expenses which are incurred in the formulation, administration, and enforcement of the marketing program.

59948. The proportionate amount of fees which are payable to the department shall be withdrawn from the funds monthly by the director and paid into the Department of Agriculture Fund in the State Treasury. Such funds shall be used only for the support of the commission and of the department in carrying out their duties as required by this chapter.

59949. At the end of any marketing season as designated in each marketing program, after proper provision has been made for the payment of all necessary expense which is incurred in connection with the marketing season, any money which remains to the credit of the marketing program committee may be refunded upon a pro rata basis to all persons from whom certificate fees were collected.

During any marketing season, however, the marketing program committee may, with the approval of the director, carry forward any unexpended balances for expenditure during seasons subsequent to the season during which such fees were collected. Alternatively, the refund may, upon the resolution of the marketing program committee and with the approval of the director, be deferred so as to permit the marketing program committee to use the residual funds to meet operating expenses in the succeeding season or until sufficient funds have been collected, or the collection of sufficient funds is assured, to enable the committee to make the refund and to defray the expenses of the then current marketing season, including an allowance for preliminary expenses of the next succeeding season.

59950. At the time a refund is made, the marketing program committee shall file with the director a claim for the refund to growers that are entitled to such refund. If the director finds that as of the end of any marketing season the amount which remains to the credit of the marketing program committee is so small as to make impractical the computation and remitting of the pro rata refund, he may authorize the transfer of the funds to the then current marketing season for expenditure in carrying out the marketing program.

59951. Unexpended balances of any money which is collected to carry out the educational and trade stimulation efforts which are provided for in Sections 59816, 59817, and 59818 which are sufficient in amount to warrant incurring the expense of making a refund shall be refunded following the termination of any marketing program which contains provisions which are authorized by those sections or following the suspension or termination of educational and trade stimula-

tion provisions of any marketing program. The refund shall be made upon such pro rata basis as the program committee and the director determine is equitable.

59952. If the unexpended balance is so small as to make impractical the computation and remitting of a pro rata refund, the director may authorize the transfer of the funds to the administrative account of the marketing program or to the Department of Agriculture Fund for the support of the commission and the department in carrying out their duties in the administration of this chapter.

59953. Unless otherwise requested by the marketing program committee, the director is not required to issue refunds to any producer in an amount less than one dollar ($1).

59954. Any check or warrant which is drawn against the fund of any marketing program which remains unclaimed or uncashed for a period of six months from the date of issuance shall be canceled and the money retained for disbursement to the original payee or claimant upon satisfactory identification for a period of one year from the time the check or warrant is canceled. The money so retained, if not claimed within the period of one year, shall be credited to the then currently operating marketing program for the commodity pursuant to which the funds so retained were collected.

59955. If there is no marketing program then in effective operation for the commodity, the funds shall be credited to the unexpended balance, if any, of the last previous marketing program for the commodity. If there is no marketing program then in current operation or no balance exists from any previous marketing program to which the funds may be credited, the funds so retained shall be deposited in the State Treasury as unclaimed trust money.

59956. An agent or employee of the marketing program committee shall not have or receive any funds which are collected pursuant to this chapter until such agent or employee has filed with the director a bond in such form and in such penal sum as the director may prescribe.

59957. Upon the recommendation of the marketing program committee, the director may relieve the proration zone agent of the responsibility of collecting any amount which is due and unpaid not exceeding one dollar ($1) if the director determines that the collection is improbable or the cost of collecting would exceed the amount which is involved.

59958. The director, in addition to other remedies which are provided by law, may direct suit in the name of the people of this state as plaintiff, to be brought for the recovery of fees as provided in this chapter. In such case, the director may make the necessary affidavit for and a writ of attachment may issue, without any bonds being given on behalf of the plaintiff. All fees collected in this manner shall be handled as provided in this article.

Article 13. Termination of Marketing Programs

59981. Except as otherwise provided in Section 59820, if any marketing program which is in active operation does not provide for a periodic referendum of producers of record with the department, directly affected by the program, for the purpose of determining whether or not the program shall be continued or modified, the director shall, prior to the beginning of a marketing season, conduct a referendum on the program at least biennially for the purpose of making the determination.

59982. An expression by a majority of the producers that participate in the referendum shall govern the action of the commission and the director in declaring a program modified, continued, or suspended.

59983. In conducting the referendum, the commission and the director may require the majority expression to be that of producers in terms of volume of production in addition to numbers of producers voting.

59984. After the institution of any marketing program, the program shall be terminated if there is filed with the director a petition for its termination which is signed by not less than 40 percent of the producers of the commodity in the proration zone that produced not less than 40 percent of the commodity affected that was produced within the proration zone during the last preceding season.

The signatures of the producers upon the petition shall be those of the producers whose names appear on the list which was used at the institution of the program or on any corrected list which the director has had prepared during the existence of the marketing program, or their successors in interest.

59985. Each petitioner shall, upon affixing his signature to the petition for termination, write in the date of signing. No signature to the petition shall be valid for any purpose if affixed more than six months prior to the filing of the petition with the director. The petition shall be accompanied by a good and sufficient undertaking in an amount which is equal to the probable costs incident to conducting the hearing and making of findings. A hearing shall be held by the director upon the petition to determine the sufficiency of the signatures within 60 days after the presentation of the petition.

59986. If from a check of the petition together with the facts and evidence which are adduced at the hearing, it is established that the petition to terminate is signed by the required 40 percent of the producers of the commodity in the zone that produced at least 40 percent of the proration commodity affected which was produced within the zone during the last preceding season, the director, with the approval of the commission, shall terminate the marketing program Any marketing program on a seasonal commodity shall not, however, be terminated except at the end of its marketing season.

59987. The costs incident to conducting the hearing and making of findings shall initially be paid from the funds of the program to the extent that they are available and thereafter from the undertaking. If the petition is found to be insufficiently signed, the entire cost of conducting the hearing shall be paid from the undertaking. If a program is terminated, any funds which remain for the use of the program committee that are not otherwise disposed of by this chapter shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

59988. The director, on behalf of the commission, may at any time initiate an investigation to determine whether or not the facts which are specified in Sections 59655 to 59662, inclusive, continue to exist. Upon a finding that any one or more of the prerequisite facts no longer exist, the director, with the approval of the commission, shall terminate or suspend the marketing program and may dissolve the proration zone. A program on a seasonal commodity shall not, however, be terminated or suspended except at the end of its marketing season.

Article 14. Actions and Penalties

60011. Any action for penalties or other remedies which is prescribed in this chapter shall be commenced within two years from the date of the alleged violation

60012. Any person that possesses, markets, handles, or transports any commodity in violation of any provision of an original or modified marketing program which is approved and made effective or in violation of any regulation which is adopted by any marketing program committee and approved by the director may be enjoined by the director, or, with the approval of the director, by the proration zone which is affected, in an action which is brought in the superior court for any county in which the violation is alleged to be occurring. There may be enjoined in the same proceeding any number of defendants that are alleged to be violating the same program although their actual violations of the marketing program may be separate and distinct and occur in different counties. In any action for injunction which is brought pursuant to this section, the procedure shall be governed by Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure.

60013. Any person that violates any provision of a marketing program which is approved and made effective or who violates any regulation which is adopted by any program committee and approved by the director is liable civilly in an amount not to exceed a sum of five hundred dollars ($500) for each and every violation. Such sum shall be recovered by the director or, with the approval of the director, by the proration zone which is affected, in an action brought in any court of competent jurisdiction. All sums recovered pursuant to this

section shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

60014. Except as otherwise provided in Section 60015, it is a misdemeanor for:

(a) Any person to willfully render or furnish a false or fraudulent report, statement, or record required under this chapter.

(b) Any person to deliver into a primary trade channel without proper authority any commodity upon which a marketing program has been instituted.

(c) Any handler, dealer, or carrier to receive or have in its possession, within this state, without proper authority, any commodity upon which a marketing program has been instituted.

(d) Any person to deliver or to attempt to deliver any commodity that has been diverted under the provisions of any marketing program into any channel of trade except that into which diversion has been ordered.

(e) Any person to aid or abet in the commission of any of the acts which are specified in this section.

Each infraction under this section constitutes a separate and distinct offense.

60015. Section 60014 does not apply to a common carrier which is operating over a regular route or between fixed termini if the shipment is made by the carrier in good faith and in accordance with its duties as a common carrier and a record of every such shipment within or from this state is kept by the carrier which shows the date of shipment, character and quality of shipment, origin and destination of the shipment, and the names of the consignor and the consignee. The record shall be open to inspection at all reasonable hours by or on the written order of the official or administrative authority that is charged with the enforcement of this chapter or any marketing program pursuant to this chapter.

PART 3. MARKETING LAWS REGARDING PARTICULAR PRODUCTS

CHAPTER 1. MARKETING OF MILK AND OTHER DAIRY PRODUCTS

Article 1. Definitions

61301. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

61302. "Bulk milk" or "bulk cream" means milk or cream, respectively, which has not been pasteurized or packaged in bottles, cartons, dispenser cans, or other consumer packages, and which is handled or delivered, in bulk, in tanks, cans, or other bulk containers.

For this purpose, skim milk or cream which has been preheated or pasteurized not more than once, as provided in Sec-

tion 34004 or 34005 of this code, and is handled or delivered in bulk is not pasteurized.

61303. "Consumer" means any person that buys milk, cream, or any dairy product for consumption and not for resale.

61304. "Cream" has the meaning of that term as defined in Section 32504.

61305. "Dairy product" means buttermilk; flavored milk drinks; bottled milk drinks which are sold under a trade name; modified milk; acidophilus milk; skim milk for human consumption; milk and cream in combination which does not come within the statutory definitions of milk or cream; ice cream, ice milk, and sherbet, separately, or in combination; ice cream mix; ice milk mix; cottage cheese; butter; American or cheddar cheese; Monterey jack cheese; pasteurized process cheese; eggnog; sour cream dressing; and yogurts.

61306. "Distributor" means any person, that purchases or handles market milk, market cream, or any dairy product for resale. It includes brokers and agents and the nonprofit cooperative associations described in Article 2 (commencing with Section 61331) of this chapter in the transactions in which such article provides that the associations are distributors. It does not, however, include any of the following:

(a) Any retail store which is not engaged in manufacturing, processing, or bottling milk, cream, or any dairy product.

(b) Any establishment where milk, cream, or any dairy product is sold only for consumption on the premises and which is not engaged in manufacturing, processing, or bottling of milk, cream, or any dairy product.

(c) Any producer that delivers milk or cream only to a distributor or manufacturer.

61307. "Frozen dairy product," as used in Sections 61375, 61376, and 61387, means any frozen product which is manufactured in a milk products plant, and imitation ice cream, imitation ice milk and water ices, which are sold by the distributor that furnishes refrigeration facilities to a wholesale customer.

61308. "Manufacturer" means any person that is engaged in the business of manufacturing any dairy product.

61309. "Market milk" has the meaning of that term as defined in Section 32510.

61310. "Market cream" has the meaning of that term as defined in Section 35811.

61311. "Milk" has the meaning of that term as defined in Section 32511.

61312. "Packaged milk," "packaged cream," or "packaged dairy product" means market milk, market cream, or any dairy product, respectively, which is packaged in cartons, bottles, dispenser cans, or other consumer packages for sale to wholesale customers, retail customers, or consumers.

61313. "Person" means any individual, firm, corporation, partnership, trust, incorporated or unincorporated association, nonprofit cooperative association, nonprofit corporation, or any other business unit or organization.

61314. "Producer" means any person that operates a dairy herd which produces milk or cream commercially and whose bulk milk or bulk cream is received or handled by any distributor, manufacturer, or any nonprofit cooperative association of producers. It includes the nonprofit cooperative associations described in Article 2 (commencing with Section 61331) of this chapter in the transactions in which such article provides the associations are producers.

61315. "Producer-distributor" means any person that is both a producer of milk or cream and a distributor of milk, cream, or any dairy product. For the purpose of this chapter, a "producer-distributor" is a producer in any transaction which involves the delivering of bulk milk or bulk cream produced by him to a distributor, manufacturer, or any nonprofit cooperative association of producers, and is a distributor in any transaction which involves the pasteurization of bulk market milk or bulk market cream, or the packaging of such milk or cream in bottles, cartons, dispenser cans, or other consumer packages, or the sale or delivery of packaged milk, packaged cream, or packaged dairy products.

61316. "Retail store" means any person that owns or operates a retail grocery store, restaurant, confectionery, or other similar business where milk, cream, or any dairy product is sold to the general public.

61317. "Wholesale customer" means any person that buys milk, cream, or any dairy product from a distributor or manufacturer for resale to consumers.

Article 2. Nonprofit Cooperative Associations

61331. For the purposes of this chapter, a nonprofit cooperative association which is organized and existing under Chapter 1 (commencing with Section 54001) of Division 20 of this code, that acts for producers, including members and any nonmembers of the association, to whom it accounts on a patronage basis, is a producer in any of the following transactions:

(a) Any transaction which involves its receipt or handling of bulk market milk, bulk market cream, or any bulk dairy product which was produced or delivered by such producers.

(b) Any transaction which involves the sale or delivery of bulk market milk, bulk market cream, or any bulk dairy product to any producer, distributor, manufacturer, or other nonprofit cooperative association of producers.

(c) The receipt by it of payment for bulk market milk, bulk market cream, or any bulk dairy product which was produced or delivered by such producers.

(d) Any transaction in connection with accounting to such producers for the proceeds derived from the sale or marketing

of market milk, market cream, or any dairy product whether packaged or in bulk.

61332. For the purposes of this chapter, a nonprofit cooperative association which is organized and existing under Chapter 1 (commencing with Section 54001) of Division 20 of this code, that acts for producers, including members and any nonmembers of the association, to whom it accounts on a patronage basis, is a distributor in any transaction which involves the receipt by it of market milk, market cream, or any dairy product from any person other than a producer to whom it accounts on a patronage basis and in any transaction which involves the pasteurization of bulk milk or bulk cream, or the packaging of it in bottles, cartons, dispenser cans, or other consumer packages, or the sale or delivery of packaged milk, packaged cream, or any packaged dairy product.

61333. A nonprofit cooperative association accounts to producers on a patronage basis when it accounts to each producer for his share of the net proceeds derived from the marketing operations of the association, according to quantity and quality of fluid milk and fluid cream furnished to the association for marketing and according to any marketing pools and quotas established by the association.

Article 3. General Provisions

61341. The director may adopt regulations for the proper administration and enforcement of the provisions of this chapter. Any violation of any such regulation is subject to the remedies, procedures, and penalties which are provided in Article 10 (commencing with Section 61571) of this chapter.

The director may, through regulations adopted pursuant to this section, exempt from the provisions of Sections 61386, 61387, 61388, and 61389 of this chapter, upon such conditions and to such extent as are reasonably determined by the director to be necessary for effectuation of the purposes of this chapter, transactions in fluid milk subject to subdistributor prices pursuant to Section 62474.

61342. The provisions of this chapter shall be liberally construed as being complementary of, and supplemental to, the provisions of Chapter 2 (commencing with Section 61801) of this part. If a provision of this chapter and a similar provision of Chapter 2 is applicable to the same person and subject matter the provisions of Chapter 2 shall control. If a provision of this chapter is applicable to any person and subject matter as to which Chapter 2 makes no express provision, the provision of this chapter shall control.

61343 Any person and subject matter to which this chapter is applicable is not subject to the provisions of the Unfair Practices Act, Chapter 4 (commencing with Section 17000, Part 2, Division 17 of the Business and Professions Code).

Article 4. Unfair Practices

61371. Except as otherwise provided in Section 61372, in the marketing of market milk, cream, and dairy products, the methods of doing business or trade practices which are described in this article, of manufacturers, distributors, producers, wholesale customers, retail stores, consumers, or any representatives of them, are unfair practices and are unlawful.

61372. This article does not, however, prohibit any of the following, if the terms and other conditions of the transaction conform to regulations which have been adopted by the director after investigation and determination by him that such regulations are consistent with good business practice:

(a) The meeting, in good faith, of a lawful, competitive price or a lawful, competitive condition.

(b) A distributor from making conditional sales of equipment or other property, extending credit for merchandise purchased, or paying a customer's obligations which are not prohibited pursuant to this chapter to another distributor in connection with the transfer of the customer's business from the latter to the former.

61373. The payment, allowance, or acceptance of secret rebates, secret refunds, or unearned discounts, whether in the form of money or otherwise, is an unfair practice.

61374. The payment or gift, or the offer or promise of any payment or gift, of money or other thing of value by a producer or distributor, directly or indirectly or through any agent or other intermediary, to any person with the purpose or design of inducing such person to become or remain a wholesale customer of any distributor is an unfair practice.

61375. The giving of any milk, cream, dairy product, service, money, or article of any kind, except to a bona fide charity, for the purpose of securing or retaining the milk, cream, or dairy product business of any wholesale customer or consumer is an unfair practice except as follows:

(a) This section does not prohibit a distributor of any frozen dairy product for reasonable compensation, as provided in Section 61387, from furnishing a wholesale customer with, and maintaining such refrigeration facilities as are reasonably necessary for the storage and preservation of any frozen dairy product which is distributed by such distributor to such wholesale customer.

(b) This section is not applicable to a manufacturer of imitation ice cream or imitation ice milk that is not also a distributor.

61376. The use of any refrigeration facilities which are furnished by a distributor to a wholesale customer pursuant to subdivision (a) of Section 61375 by any person for the storage or preservation of any product except the frozen dairy products which are distributed to the wholesale customer by the distributor that furnishes such facilities is an unfair practice, unless all of the following are true:

(a) The distributor that furnishes the refrigeration facilities does not manufacture or distribute imitation ice cream or imitation ice milk and has authorized, in writing, the use of said refrigeration facilities for the storage and preservation of imitation ice cream or imitation ice milk sold to such wholesale customer by another vendor.

(b) A copy of such authorization has been filed with the director prior to the use of the refrigeration facilities for such purpose.

61377. The extension to any wholesale customer or consumer of any special price or service which is not made available to all wholesale customers or consumers that purchase any milk, cream, or dairy product of like quantity under like terms and conditions is an unfair practice.

61378. A distributor shall not allow or give any payment of money, credit, compensation, gift, or loan of anything of value to a wholesale customer for advertising or display in connection with the sale of the distributor's milk, cream, or dairy product, or for the privilege of placing a sign, advertisement, or other advertising material in, on, or adjoining any premises which are occupied by such wholesale customer.

61379. Outside advertising shall not advertise items other than the distributor's milk, cream, or dairy product and items which are made from such milk, cream, or dairy product, except that the distributor may allocate not in excess of one-third of the advertising space to customer advertising.

61380. Inside advertising material which is furnished by a distributor shall be confined and limited to the advertising of milk, cream, or any dairy product which is manufactured or distributed by the manufacturer or distributor of the milk, cream, or dairy product or their agents. It may include the name, brand, price, or description of any of the following:

(a) The milk, cream, or dairy product of the manufacturer or distributor.

(b) Fountain products which contain the milk, cream, or dairy product as ingredients.

(c) Dessert items which are customarily sold in conjunction with the milk, cream, or dairy product

61381. Any false or misleading advertising, as defined in Sections 17500, 17501, and 17502 of the Business and Professions Code, of milk, cream, or any dairy product is an unfair practice.

61382. Discrimination in price between wholesale customers, or between consumers, that purchase milk, cream, or any dairy product of like grade and quality under like conditions of service if the effect of such discrimination may be substantially to lessen competition or to injure or destroy or prevent competition with the person that either grants or knowingly receives the benefit of such discrimination is an unfair practice. This section does not, however, prevent differentials which make only due allowance for differences in the cost of the raw

product which is used in such milk, cream, or dairy product, or the cost of manufacture, processing, sale, or delivery which results from the different methods or quantities in which the commodities are manufactured, processed, sold, or delivered.

61383. The sale or offer to sell or giving of any article in any transaction which involves the sale or disposal of milk, cream, or any dairy product, for less than the invoice or replacement cost of the article, whichever is lower, to secure or retain the milk, cream, or dairy product business of any wholesale customer or any person that buys as a consumer is an unfair practice.

61384. The sale by any retail store, manufacturer, distributor, including any producer-distributor or nonprofit cooperative association acting as a distributor, of milk, cream, or any dairy product at less than cost is an unfair practice.

Cost as applied to manufacturers and distributors, as used in this section, means the cost of raw product, plus all costs of manufacturing, processing, handling, sale, and delivery, including overhead costs. Cost as applied to retail stores, as used in this section, means invoice or replacement cost, whichever is lower, plus the cost of doing business of such retail store.

"Cost of raw product," in the case of market milk and market cream, whether or not such market milk or market cream is used in the processing or manufacture of any dairy product, means the applicable minimum price of the market milk or market cream, if any, payable by distributors to producers pursuant to stabilization or marketing plans in effect pursuant to Chapter 2 (commencing with Section 61801) of this part. The definition of "cost of raw product," as applied to sales on a bid basis to public agencies or institutions, is, however, applicable only to market milk or market cream which is utilized for class 1 purposes, as such purposes are defined in Chapter 2 of this part.

Evidence of cost, based on audits or surveys, made in accordance with generally accepted cost accounting procedures, constitutes prima facie evidence of such cost at the time of the commission of the unfair practice which is described in this section. The director shall establish by regulations pursuant to Section 61341 the procedures which shall be considered as "generally accepted cost accounting procedures." Such procedures are those which are found by the director to accurately determine actual costs.

61385. Any false statement or representation which is knowingly made, by any wholesale customer or consumer, or anyone that is acting on the behalf of either, to any distributor or manufacturer, or any representative of a distributor or manufacturer, that a competitor of such distributor or manufacturer has offered or is offering to sell, or is selling milk, cream, or any dairy product to the wholesale customer or consumer at a lower price than such manufacturer or distributor has offered or is offering to sell, or is selling it, or that the competitor has offered or is offering to do, or is doing any of the

business practices which are declared by this article to be unfair and unlawful is an unfair practice.

61386. The making or renewal of any money loan to any wholesale customer is an unfair practice.

61387. Refrigeration facilities may be furnished by a distributor to a retail store or other wholesale customer, only to the extent that they are reasonably necessary for the preservation of frozen dairy products which are distributed by the distributor on a rental basis for reasonable compensation as determined by the director after conducting a survey. Such compensation shall provide for interest on investment, reasonable depreciation and cost of repairs and maintenance during the normal life of such facilities.

61388. All equipment, including refrigeration facilities, may be sold to retail stores or other wholesale customers. Such sales may be made for cash or on a conditional sales contract. Any contract shall provide for a payment of at least one-third cash and the balance to be paid on monthly installments for a term not to exceed 18 months. The prices prescribed in such conditional sales contract shall include interest at current rates, and shall include installation or maintenance for the life of the contract if the distributor agrees to perform or cause to be performed such service.

61389. The selling of any new equipment by a distributor or ice cream manufacturer to any customer or individual at a price except the printed retail list price of the equipment manufacturer, jobber, or their agent and at terms which are different than the printed retail terms of such equipment manufacturer or jobber or agent is prohibited.

61390. Solicitation by, or collusion or joint participation between or among, any manufacturer, distributor, producer, wholesale customer, retail store, consumer, or any representative of any of them, to commit any of the unfair practices which are prescribed in this article, or the use of any misrepresentation, threat, intimidation, or boycott to effectuate the commission of such unfair practices, makes any person that participates in such unfair practices subject to the penalties of this chapter.

Article 5. Price Filing

61411. Every distributor in any marketing area shall file with the director schedules and any amendments to the schedules which set forth the prices at which each such distributor is selling, offering, or agreeing to sell in such marketing area any of the following: market milk; market cream; buttermilk; flavored milk drinks; bottled milk drinks which are sold under a trade name; modified milk; acidophilus milk; skim milk for human consumption; milk and cream in combination which does not come within the statutory definitions of milk or cream; cottage cheese; eggnog; sour cream dressing, and yogurts.

Price filing is not required for any other dairy product.

61412. Prices which are filed pursuant to Section 61411 shall be filed in such office of the director as he shall designate. Such prices shall not become effective until the seventh day after filing.

61413. Evidence of any sale of, or offer or agreement to sell, such market milk, market cream, or any such dairy product by a distributor at less than the prices filed with the director by such distributor pursuant to the provisions of this article is prima facie proof of a violation of this article.

Offers and agreements to sell, as used in this section, include offers and agreements which are conditional, or which shall become effective, upon the filing thereafter of amended prices by the distributor that makes such offer.

61414. Upon receipt of such filings or amendments, the director shall forthwith date, file, and index them in such manner that the information shall at all times be kept current and be readily available to any interested person that desires to inspect them.

61415. Any other distributor in the marketing area may meet any such prices so filed if such distributor files with the director a schedule of prices which do not exceed the prices so met by him within 24 hours after meeting them.

Article 6. Records

61441. Every distributor or manufacturer of milk, cream, or any dairy product shall keep all of the following records:

(a) A record of all milk, cream, or dairy products received, detailed as to location, names and addresses of suppliers, prices paid, and deductions or charges made, and the use to which such milk or cream was put.

(b) A record of the quantity of each kind of milk or dairy product which is manufactured and the quantity and price of milk or any dairy product which is sold.

(c) A record of the wastage or loss of milk or any dairy product.

(d) A record of the items of handling expense.

(e) A record of all refrigeration facilities which are rented or furnished for storage purposes to any wholesale customer, which shows the types and sizes of the refrigeration facilities, the location of such facilities, and the original or duplicate original of any agreement which covers rentals which are charged for them.

(f) A record of all conditional sales of equipment or other property, the location of such property, and the original or duplicate original of all conditional sales contracts which pertain to the equipment or the property.

(g) A record of all moneys which were loaned prior to August 4, 1943 to wholesale customers, the terms and conditions of such loans, and the original evidence of the indebtedness based on such loans.

(h) Such other records as the director may deem necessary for the proper enforcement of this chapter.

61442. Every distributor shall keep a full and complete record of all milk, cream, or dairy products sold, classified as to kind and grade of milk, cream, or dairy product, that shows where it was sold, and the amount which was received for it.

61443. The director shall have access to, and may enter at all reasonable hours, any place where any dairy product is being processed, bottled, stored, kept, or sold, or where the books, papers, records, or documents pertaining to any transaction which relates to any dairy product is kept. He may inspect and copy such books, papers, records, or documents in any place within the state.

61444. Any record or report which is made to the director pursuant to any provision of this article is confidential and shall not be divulged except if necessary for the proper determination of any court proceeding or hearing before the director.

Article 7. Investigations and Hearings

61471. The director may, upon his own motion, or shall, upon the receipt of any verified complaint, investigate any transaction which involves the violation of any provision of this chapter by any person. The director may call and conduct a hearing in furtherance of such investigation.

61472. If a verified complaint is received by the director, he shall cause a copy of the complaint, together with a notice of time and place of hearing of such complaint, to be served personally or by mail upon such person. Such service shall be made at least 10 days before the hearing.

61473. The hearing shall be held in the city or place in which is situated the business location of the person that is complained of, or in which the transaction complained of is said to have occurred.

61474. The person complained of shall, at least three days prior to the date fixed for the hearing, serve upon the complaining party and file with the director a verified answer to all the allegations which are contained in the complaint.

61475. At the time and place which is appointed for such hearing the director shall hear the parties to such complaint, and shall enter in the office of the director at Sacramento a decision dismissing such complaint or specifying the facts which are established on such hearing. A copy of such decision shall be furnished to each of the respective parties to it.

61476. The director may do any of the following:

(a) Administer oaths and take testimony thereunder

(b) Issue subpoenas which require the attendance of witnesses before him, together with all books, memoranda, papers, and other documents, articles, or instruments.

(c) Compel the disclosure by such witnesses of all facts which are known to them relative to the matters under investigation.

61477. Any party that disobeys any order or subpoena of the director is guilty of contempt and shall be certified to the superior court of the state, in and for the county wherein such contempt occurs, for punishment for such contempt in accordance with Sections 11180 to 11191, inclusive, of the Government Code.

61478. Any act of the director pursuant to any provision of this chapter may be reviewed by any court of competent jurisdiction.

Article 8. Manufacturers' Fees

61501. Every manufacturer that is subject to the provisions of this chapter shall pay to the director on all milk fat contained in the ice cream mix and ice milk mix which is manufactured by him, a fee of two mills ($0.002) per pound milk fat.

The fee is a maximum fee. The director may fix such fee at a less amount, and may adjust such fee from time to time, whenever he finds that the cost of administering this chapter can be defrayed with such below-maximum fee. The amount of the fee shall be paid to the director on or before the 30th day following the last day of the month in which the mix was manufactured. The amount so received by the director shall be paid into the Department of Agriculture Fund.

61502. Any manufacturer's fee which is payable pursuant to Section 61501 is a debt of the manufacturer and is due and payable to the director upon the date set forth in Section 61501. If such manufacturer does not pay such fee upon the required date, the director may file a complaint against such manufacturer in a state court of competent jurisdiction for the collection of such fee.

If any manufacturer does not pay to the director the fees which are provided for in Section 61501, on or before the date which is specified in the section, the director may add to such unpaid fees an amount not exceeding 10 percent of such unpaid fees to defray the cost of enforcing the collection of such unpaid fees.

Article 9. Disposition and Use of Funds

61531. Any money in the Department of Agriculture Fund which was derived under this chapter and Chapter 2 (commencing with Section 61801) of this part may be expended for the administration and enforcement of any or all of the provisions of such chapters, notwithstanding any other provision of law which limits the expenditure of any such money to the specific purposes or to the administration or enforcement of each of such chapters separately.

Article 10. Actions and Penalties

61571. The violation of any provision of this chapter is a misdemeanor which is punishable by a fine not less than fifty dollars ($50) and not exceeding five hundred dollars ($500) or by imprisonment in a county jail not exceeding six months, or by both such fine and imprisonment. The amount of penalty which is assessed pursuant to this section on each count of violation shall be based upon the nature of the violation and the seriousness of the effect of such violation upon effectuation of the purposes and provisions of this chapter.

61572. Any person that violates any provision of this chapter is liable civilly in an amount not less than fifty dollars ($50) and not exceeding five hundred dollars ($500) for each and every violation, such sum to be recovered by the director in any court of competent jurisdiction. The amount of penalty which is assessed pursuant to this section on each count of violation shall be based upon the nature of the violation and the seriousness of the effect of such violation upon effectuation of the purposes and provisions of this chapter. Any sum which is recovered under this section shall be deposited in the State Treasury to the credit of the Department of Agriculture Fund.

61573. The director may bring an action to enjoin the violation or the threatened violation of any provision of this chapter or of any order which is made pursuant to this chapter in the superior court in the county in which such violation occurs or is about to occur. There may be enjoined in one proceeding any number of defendants alleged to be violating the same provisions or orders, although their properties, interests, residences, or places of business may be in several counties and the violations separate and distinct. Any proceeding which is brought pursuant to this section shall be governed in all other respects by the provisions of Chapter 3 (commencing with Section 525), Title 7, Part 2 of the Code of Civil Procedure.

Chapter 2. Stabilization and Marketing of Fluid Milk and Fluid Cream

Article 1. Definitions

61801. Unless the context otherwise requires, the definitions in this article govern the construction of this chapter.

61802. "Board" means any advisory board which is created as authorized in this chapter.

61803. "Bulk fluid milk" or "bulk fluid cream," means fluid milk or fluid cream, respectively, as defined in this code, which has not been pasteurized or packaged in bottles, cartons, dispenser cans, or other consumer packages, and is handled or delivered, in bulk, in tanks, cans, or other bulk containers.

For this purpose, skim milk or cream which has been preheated or pasteurized not more than once, as provided in Sec-

tion 34004 or 34005 of this code, and is handled or delivered in bulk, is not pasteurized.

61804. "Consumer" means any person that purchases fluid milk, fluid cream, or any dairy product for consumption.

61805. "Dairy product" includes any product which is manufactured from milk or any derivative or product of milk.

61806. "Distributor" means any person that purchases or handles fluid milk or fluid cream for processing, manufacture, or sale. It includes brokers and agents and the nonprofit cooperative associations described in Article 2 (commencing with Section 61831) of this chapter in the transactions in which such article provides that the associations are distributors. It does not, however, include any of the following:

(a) Any retail store that is not actively and directly engaged in processing and packaging fluid milk or fluid cream.

(b) Any establishment where fluid milk or fluid cream is sold only for consumption on the premises, that is not actively and directly engaged in processing and packaging fluid milk or fluid cream.

(c) Any person that is owned or controlled by one or more retail stores, or owned or controlled by one or more establishments where fluid milk or fluid cream is sold for consumption on the premises which person is not actively and directly engaged in the processing and packaging of fluid milk or fluid cream.

(d) Any producer that delivers fluid milk or fluid cream only to a distributor.

(e) Any person as to any transaction where such person purchases processed and packaged fluid milk or fluid cream, but does not thereafter physically handle such fluid milk or fluid cream for sale. "Physically handle," as used in this subdivision, means (1) to refrigerate, store, or assemble individual order allotments at a fixed, established business location prior to transportation on regularly operated routes for sales of fluid milk or fluid cream on such routes to wholesale customers or directly to consumers at their homes or places of work, or (2) to transport in a mobile vehicle or unit which is regularly operated on routes predominately for sales of fluid milk or fluid cream on such routes to wholesale customers or directly to consumers at their homes or places of work.

61807. "Fluid cream" means cream, as defined in this code, and any combination of cream and milk, or any fluid product of milk or cream which is sold under any trade name whatsoever, which complies with all of the following requirements:

(a) Is not packaged in hermetically sealed containers.

(b) Contains more than 11.6 percent milk fat.

(c) Conforms to the health and sanitary regulations of the place where it is sold or disposed of for human consumption.

61808. "Fluid milk" means any and all whole or concentrated milk that is produced in conformity with applicable

health regulations for market milk of the place where such milk is consumed.

61809. "Fluid skim milk" means skim milk, as defined in this code, that is derived from market milk and conforms to the health and sanitary regulations of the place where sold or disposed of for human consumption.

61810. "Marketing area" is any area within this state which is declared to be such in the manner that is prescribed in this chapter.

61811. "Minimum retail prices" means the minimum prices at which fluid milk or fluid cream, or both, shall be sold by distributors and retail stores to consumers.

61812. "Minimum wholesale prices" means the prices at which fluid milk or fluid cream, or both, shall be sold by distributors to retail stores. It also includes subdistributor prices, as defined in Section 61819, and the prices at which fluid milk or fluid cream shall be sold by distributors to retail stores, restaurants, confectioneries, and other places for consumption on the premises. It does not, however, include the prices at which fluid milk or fluid cream, or both, shall be sold by any distributor to any retail store which is owned or operated by such distributor or the prices at which fluid milk or fluid cream, or both, shall be sold in bulk by any distributor to any other distributor.

61813. "Packaged fluid milk" or "packaged fluid cream" means fluid milk or fluid cream, respectively, which is packaged in cartons, bottles, dispenser cans, or other consumer packages for sale to wholesale customers, retail customers, or consumers.

61814 "Person" means any individual, firm, corporation, partnership, trust, incorporated or unincorporated association, nonprofit cooperative association, nonprofit corporation, or any other business unit or organization.

61815. "Producer" means any person that produces fluid milk from five or more cows or goats in conformity with the applicable health regulations of the place in which it is sold, and whose bulk fluid milk or bulk fluid cream is received or handled by any distributor or any nonprofit association of producers. It includes the nonprofit cooperative associations described in Article 2 (commencing with Section 61831) of this chapter in the transactions in which such article provides that the associations are producers.

61816. "Producer-distributor" means any person that is both a producer and a distributor of fluid milk or fluid cream. For the purposes of this chapter a producer-distributor is a producer in any transaction which involves the delivery of bulk fluid milk or bulk fluid cream which was produced by him to a distributor, or any nonprofit cooperative association of producers and is a distributor in any transaction which involves the purchase by him of fluid milk or fluid cream, the pasteurization or packaging of fluid milk or fluid cream, or the

sale or delivery of packaged fluid milk or packaged fluid cream to any person.

61817. "Retail store" means any person that owns or operates a retail grocery store, restaurant, confectionery, or other similar business, where fluid milk or fluid cream is sold to the general public for consumption off the premises.

61818. "Stabilization and marketing plan" means any plan which is formulated and made effective by the director within the legislative standards which are provided by this chapter. It includes, among other things, the establishing of prices to be paid by distributors for any or all of the various classes of fluid milk or fluid cream.

61819. "Subdistributor prices" means the prices at which fluid milk or fluid cream, or both, shall be sold, other than in bulk, by distributors to other distributors.

Article 2. Nonprofit Cooperative Associations

61831. For the purposes of this chapter, a nonprofit cooperative association which is organized and existing under Chapter 1 (commencing with Section 54001) of Division 20 of this code, that acts for producers, including members and any nonmembers of the association, to whom it accounts on a patronage basis, is a producer in any of the following transactions:

(a) Any transaction which involves its receipt or handling of bulk fluid milk or bulk fluid cream, which was produced or delivered by such producers.

(b) Any transaction which involves the sale or delivery of bulk fluid milk or bulk fluid cream to any producer, distributor, or manufacturer, or other nonprofit cooperative association of producers.

(c) The receipt by it of payment for bulk market milk, bulk market cream, or any bulk dairy product which was produced or delivered by such producers

(d) Any transaction in connection with accounting to such producers for the proceeds derived from the sale or marketing of bulk fluid milk or bulk fluid cream, or packaged fluid milk or packaged fluid cream.

61832. For the purposes of this chapter, a nonprofit cooperative association which is organized and existing under Chapter 1 (commencing with Section 54001) of Division 20 of this code, that acts for producers, including members and any nonmembers of the association, to whom it accounts on a patronage basis, is a distributor in any transaction which involves the receipt by it of fluid milk or fluid cream from any person other than a producer to whom it accounts on a patronage basis and in any transaction which involves the pasteurization of bulk fluid milk or bulk fluid cream or the packaging of it in bottles, cartons, dispenser cans, or other consumer packages, or the sale or delivery of packaged fluid milk or packaged fluid cream.

61833. A nonprofit cooperative association accounts to producers on a patronage basis when it accounts to each producer for his share of the net proceeds derived from the marketing operations of the association, according to quantity and quality of fluid milk and fluid cream furnished to the association for marketing and according to any marketing pools and quotas established by the association.

Article 3. Classes of Fluid Milk

61841. Fluid milk may be classified for the purposes of this chapter as provided in this article.

61842. Class 1 comprises:

(a) Any fluid milk, fluid skim milk, or fluid cream that is supplied to consumers as market milk, market skim milk, or market cream or concentrated milk.

(b) Any combination of market milk, market skim milk, and market cream, or any market milk which is not sterilized and packaged in hermetically sealed containers.

(c) Any other dairy product in which the use of market milk or any components or derivatives of market milk is required by, or pursuant to, the provisions of this code.

(d) Any fluid milk, fluid skim milk, fluid cream, milk fat, or milk solids not fat which is used in the standardizing or fortifying of market milk or any dairy product which is defined in this section as class 1.

(e) Any product which is required by any regulations adopted by the director pursuant to Article 2 (commencing with Section 36631), Chapter 1, Part 3, Division 15 of this code to be made from market milk or any components or derivative of market milk.

61843. Class 2 comprises any fluid milk, fluid skim milk, or fluid cream which is used in the manufacture of any product for which a definition and standard is prescribed in Division 15 (commencing with Section 32501) of this code, except any such product which is included in class 1 or class 3.

61844. Class 3 comprises all fluid milk, fluid skim milk, or fluid cream, which is used in the manufacture of butter, cheese other than cottage cheese, dried milk, dried skim milk, nonfat dry milk solids, defatted milk solids, dried buttermilk, or any product for which no definition and standards are prescribed in Division 15 (commencing with Section 32501) of this code.

61845. If the director establishes a temporary definition and standards for any new milk product pursuant to Article 2 (commencing with Section 36631), Chapter 1, Part 3, Division 15 of this code he shall assign such new product to that class under this article which includes the most nearly comparable product as determined by the director. Any product which is required by any regulation of the director adopted pursuant to Article 2, Chapter 1, Part 3, Division 15 of this code to be

made from market milk, or any components or derivatives of market milk, shall, however, be included within class 1.

Article 4. General Provisions

61871. The production and distribution of fluid milk and of fluid cream and the dissemination of accurate, scientific information as to the importance of milk and other dairy products in the maintenance of a high level of public health, is hereby declared to be a business affected with a public interest. The provisions of this chapter are enacted in the exercise of police powers of this state for the purpose of protecting the health and welfare of the people of this state.

61872. The Legislature hereby declares all of the following:

(a) Fluid milk and fluid cream are necessary articles of food for human consumption.

(b) The production and maintenance of an adequate supply of healthful milk of proper chemical and physical content, free from contamination, is vital to the public health and welfare, and the production, transportation, processing, storage, distribution, or sale of fluid milk and fluid cream in this state is an industry affecting the public health and welfare.

(c) Unfair, unjust, destructive, and demoralizing trade practices have been carried on, and are now being carried on, in the production, marketing, sale, processing, or distribution of fluid milk and fluid cream, which constitute a constant menace to the health and welfare of the inhabitants of this state and tend to undermine sanitary regulations and standards of content and purity, however effectually such sanitary regulations may be enforced.

(d) Health regulations alone are insufficient to prevent disturbances in the milk industry which threaten to destroy and seriously impair the future supply of fluid milk, and to safeguard the consuming public from future inadequacy of a supply of this necessary commodity.

(e) It is the policy of this state to promote, foster, and encourage the intelligent production and orderly marketing of commodities which are necessary to its citizens, including milk, and to eliminate speculation, waste, improper marketing, unfair and destructive trade practices, and improper accounting for milk which is purchased from producers.

61873. It is recognized by the Legislature that conditions within the milk industry of this state are such that it is necessary to establish marketing areas wherein different prices and regulations are necessary, and for that purpose the director shall have the administrative authority, with such additional duties as are herein prescribed, after investigation and public hearing, to prescribe such marketing areas and modify the same when advisable or necessary.

61874. The foregoing statements in this article of facts, policy, and application of this chapter are hereby declared a matter of legislative determination.

61875. The purposes of this chapter are to do all of the following:

(a) Provide funds for administration and enforcement of this chapter, by assessments to be paid by producers of fluid milk or fluid cream, or both, and from licenses which are issued to distributors in the manner which is prescribed in this chapter.

(b) Authorize and enable the director to prescribe marketing areas and to determine prices to producers for fluid milk or fluid cream, or both, which are necessary due to varying factors of costs of production, health regulations, transportation and other factors in such marketing areas of this state. The cost to distributors within any marketing area, for fluid milk or fluid cream shall be uniform with all other distributors purchasing fluid milk and fluid cream of similar grade or quality under like terms and conditions.

(c) Authorize and enable the director to formulate stabilization and marketing plans subject to the limitations which are prescribed in this chapter with respect to the contents of such stabilization and marketing plans and to declare such plans in effect for any marketing area.

(d) Enable the dairy industry, with the aid of the state, to correct existing evils, develop and maintain satisfactory marketing conditions, and bring about and maintain a reasonable amount of stability and prosperity in the production and marketing of fluid milk and fluid cream and provide means for carrying on essential educational activities.

61876. It is the intent of the Legislature that the powers which are conferred in this chapter shall be liberally construed.

61877. Nothing in this chapter permits or authorizes the development of conditions of monopoly in the production or distribution of fluid milk or fluid cream. In the establishment of the terms and conditions under which fluid milk and fluid cream shall be purchased from producers, and under which distributors and retail stores shall sell and distribute fluid milk or fluid cream, such terms and conditions shall be those which will, in the several localities and markets of the state, and under the varying conditions of production and distribution, insure an adequate and continuous supply of pure fresh wholesome fluid milk and fluid cream to consumers of the fluid milk and fluid cream at fair and reasonable prices.

61878. The Legislature hereby declares that this chapter is intended to formulate a comprehensive scheme for the regulation of marketing and distribution of fluid milk and fluid cream. If, however, any provision of, or addition or amendment to, this chapter, either as originally enacted in 1935 at the 51st Regular Session of the California Legislature, or as amended, added to, recodified, or reenacted at any subsequent session of the California Legislature, should be held to be unconstitutional, the unconstitutionality of such provision does not affect any other provision of this chapter.

61879. If any article, section, subdivision, sentence, clause, or phrase of any provision of this chapter is for any reason held to be unconstitutional, such decision does not affect the validity of the remaining provisions of this chapter. The Legislature hereby declares that it would have enacted each article, section, subdivision, sentence, clause, or phrase of this chapter irrespective of the fact that one or more other articles, sections, subdivisions, sentences, clauses, or phrases is declared unconstitutional.

Article 5. Exceptions

61901. No provision of this chapter, or of any stabilization and marketing plan which is formulated by the director pursuant to this chapter, is any limitation upon the right of any distributor or producer-distributor, including any nonprofit cooperative association of producers which association is also a distributor, by reason of the form or nature of the legal entity under which such distributor conducts business, to sell or distribute fluid milk, fluid cream, or any dairy product at prices or upon terms and conditions according to, and within, the several methods of distribution, at or subject to which the fluid milk, fluid cream, or dairy product lawfully may be sold or distributed by any other distributor.

This section does not make lawful or permit the payment by any such distributor to a producer for fluid milk, fluid cream, or the milk fat or fluid skim milk of such components of fluid milk or fluid cream, at prices less than the minimum prices which are prescribed in the applicable stabilization and marketing plan.

61902. No amendment of any provision of this chapter shall have the effect of terminating or invalidating any minimum prices for fluid milk or fluid cream, or both, which is established by the director pursuant to this chapter prior to the effective date of such amendment, or any minimum wholesale or minimum retail prices as modified to reflect changes in minimum prices paid by distributors to producers as provided in Section 62418. The director shall, however, establish minimum prices pursuant to the provisions of such amendment at the earliest practicable date after the effective date of such amendment.

Article 6. Administration

61931. The director shall enforce the provisions of this chapter and of any stabilization and marketing plan which is initiated pursuant to the provisions of this chapter. The director shall adopt regulations for the proper administration and enforcement of the provisions of this chapter.

61932. The director shall have and may exercise any or all the powers which are conferred by the Government Code upon the head of a department of the state with respect to hearings and investigations under this chapter.

61933. The director is the instrumentality of this state for the purpose of administering and enforcing the provisions of this chapter and to execute the legislative intent which is expressed in this chapter, and is hereby vested with the administrative authority which is described in this chapter.

61934. For the purposes of enforcing the provisions of this chapter, the director may investigate any and all transactions between producers and distributors, between nonprofit cooperative associations and producers, among distributors or between distributors and retail stores, between distributors and consumers, or between retail stores and consumers. For that purpose, the director shall have access to, and may enter at all reasonable hours, any place where milk is being stored, bottled, or manufactured, where milk or any milk product is being bought, sold, or handled, or where the books, papers, records or documents which relate to such transactions are kept. He may inspect and copy such books, papers, records, or documents in any place within the state.

61935. The director may issue licenses to distributors and require the registration of producers.

61936. The director may formulate any stabilization and marketing plan as prescribed in this chapter and declare it effective after public hearing and reasonable notice by mail or otherwise to all producers and distributors of record with the director, that are affected by such plan.

61937. A full and accurate record of business or acts performed, or of testimony taken, by the director pursuant to this chapter shall be kept and placed on file in the office of the director.

61938. The director shall, within 30 days prior to each general session of the Legislature, submit to the Governor a full and true report of the transactions under this chapter during the preceding biennium, including a complete statement of receipts and expenditures during such period.

61939. In addition to the compilation of information which pertains to fluid milk and fluid cream from the reports that are required by this chapter, the director shall collect, assemble, compile, and distribute statistical data relative to fluid milk, fluid cream, other milk and milk products, and such other information as may relate to the dairy industry and the provisions of this chapter.

61940. Any order of the director made pursuant to this chapter which substantially affects the rights of any interested party may be reviewed by any court of competent jurisdiction. Any such action shall be commenced within 30 days after the effective date of the order which is complained of, or within 30 days after the injurious effect which is complained of becomes reasonably apparent.

61941. The director may confer, enter into agreements, or otherwise arrange with the constituted authorities of this state, other states, or agencies of the United States with

respect to plans which relate to the stabilization and distribution of fluid milk and fluid cream within this state or as between this state and other states or the United States, and may exercise his powers pursuant to this chapter to effectuate and enforce such plans.

61942. All money which is received by the director pursuant to this chapter shall be paid monthly into the State Treasury to the credit of the Department of Agriculture Fund.

61943. If the director determines that it is probable that one or more factors or conditions which affect prices of fluid milk, fluid cream, and fluid skim milk have changed on a relatively uniform basis throughout two or more marketing areas, he may consolidate the hearings on the matter of price changes for such areas. No price change shall be made as a result of such a consolidated hearing unless it is uniform throughout the areas which are affected.

61944. If the director conducts a survey of the costs of production of fluid milk or fluid cream, or both, in any marketing area, which does not include the costs of production of all of the producers for the area, the director shall, upon request, supply the names and addresses of the producers whose costs were included in such survey to any interested party as a matter of public record.

Article 7. Distributors' Licenses

61971. As used in this article, "milk plant" means any place, structure, or building where a distributor receives fluid milk or fluid cream and weighs, tests, standardizes, pasteurizes, homogenizes, separates, bottles, or packages such fluid milk or fluid cream. It does not, however, include a place, structure, or building which is used for the purpose of receiving, weighing, or testing fluid milk or fluid cream which is to be diverted or delivered to the milk plant of the distributor that receives fluid milk or fluid cream which milk plant is licensed and bonded pursuant to this chapter.

61972. The licenses which are provided for in this article are required for each distributor. For the purposes of this article, each subsidiary milk plant or branch milk plant, whether under one ownership or not, shall be considered as an individual distributor.

61973. The provisions of this article with respect to licenses do not apply to any retail store.

61974. A distributor shall not deal in fluid milk or fluid cream unless such distributor first obtains a license from the director. The special license which is provided for in this article is in addition to any license which is required by Division 15 (commencing with Section 32501) of this code, or any law or ordinance of any county or municipality of this state.

61975. Applications for the license which is provided by this article shall be made on forms that are prescribed by the director, shall be accompanied by an application fee of three

dollars ($3), and shall state the name and address of the applicant and such details as to the nature of the applicant's business as the director may require. Such applicant shall further satisfy the director of his or its character, responsibility, and good faith in seeking to carry on the business stated in the application.

61976. Licenses shall be issued for a period of 12 months from the first day of each year or for the remainder of the calendar year from the date of issuance. Application for renewal of a license for the following year by a licensee, together with the application fee of three dollars ($3), shall be made prior to the expiration date of the license held. If it is not so made, the applicant shall pay an additional sum equal to 100 percent of the application fee before such license shall be issued.

61977. The director may refuse to grant any license if he is satisfied that any applicant, or any person that is connected with the applicant, has violated any of the following:

(a) This chapter or any stabilization and marketing plan which is formulated pursuant to this chapter.

(b) Any order of the director which establishes minimum wholesale and minimum retail prices for fluid milk or fluid cream which is formulated pursuant to this chapter.

(c) Any regulation which is duly adopted by the director pursuant to Section 61931.

61978. The director may also refuse to grant any license to a distributor if he is satisfied that the distributor has failed to pay for any fluid milk or fluid cream which was delivered to him at the time and in the manner specified in the contract with the producer.

61979. The proceedings to determine whether or not the director shall refuse to grant a license shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. and the director shall have all of the powers which are granted in such chapter.

61980. The decision may include an order refusing the license which is applied for, or affixing such other conditional and probationary orders as may be proper for the enforcement of any of the following:

(a) This chapter or any stabilization and marketing plan which is formulated pursuant to this chapter.

(b) Any order of the director which establishes minimum wholesale and minimum retail prices for fluid milk or fluid cream which is formulated pursuant to this chapter

(c) Any regulation which is duly adopted by the director pursuant to Section 61931.

61981. After any decision in favor of the issuance of a license which includes any conditional or probationary orders, if the person to whom the license is issued does not comply with any such orders, the director may suspend or revoke the license in accordance with the procedure which is provided in Article 27 (commencing with Section 62611) of this chapter.

Article 8. Distributors' Bonds

62001. As used in this article, "milk plant" means any place, structure, or building where a distributor receives fluid milk or fluid cream and weighs, tests, standardizes, pasteurizes, homogenizes, separates, bottles, or packages such fluid milk or fluid cream. It does not, however, include a place, structure, or building which is used for the purpose of receiving, weighing, or testing fluid milk or fluid cream which is to be diverted or delivered to the milk plant of the distributor that receives fluid milk or fluid cream which milk plant is licensed and bonded pursuant to this chapter.

62002. The bonds which are provided for in this article are required for each distributor. For the purposes of this article, each subsidiary milk plant or branch milk plant, whether under one ownership or not, shall be considered as an individual distributor.

62003. Every distributor before purchasing any fluid milk or fluid cream from a producer shall execute and deliver to the director a surety bond, which is executed by the applicant as principal and by a surety company that is qualified and authorized to do business in this state as surety. The minimum amount of the bond shall be based upon the average daily quantity of fluid milk or fluid cream that is purchased by the distributor during any calendar month during a license year.

The minimum amount of the bond shall be as follows:

(a) One thousand dollars ($1,000) for any distributor that purchases an average daily quantity of fluid milk of less than 100 gallons.

(b) Two thousand dollars ($2,000) for any distributor that purchases an average daily quantity of at least 100 gallons but less than 200 gallons.

(c) Three thousand dollars ($3,000) for any distributor that purchases an average daily quantity of at least 200 gallons but less than 300 gallons.

(d) Five thousand dollars ($5,000) for any distributor that purchases an average daily quantity of 300 gallons or more.

The same bond requirements apply to purchases of fluid cream, except that for the purposes of computation of the required bond, 10 gallons of fluid cream shall be deemed to be the equivalent of 100 gallons of fluid milk.

62004. If any distributor so increases his purchases of fluid milk or fluid cream during the license year that such purchases exceed the amount for which the distributor is bonded, such distributor shall forthwith post such additional bond as may be required to comply with this article.

62005. The bond required by Section 62003 shall be upon a form which is approved by the director, and shall be conditioned upon the payment in the manner that is required by this chapter, of all amounts which are due to producers

for fluid milk and fluid cream that is purchased by such licensee or applicant during the license year. It shall be to the state in favor of every producer of fluid milk and fluid cream.

62006. If a distributor fails to pay any producer or producers for fluid milk or fluid cream in the manner which is required by this chapter, the director shall proceed forthwith to ascertain the names and addresses of all producer-creditors of such distributor, together with the amounts which are due and owing to them and each of them by such distributor, and shall request all such producer-creditors to file a verified statement of their respective claims with the director. The producer need only verify that he is owed an amount by the distributor. The actual amount may be as ascertained pursuant to this article.

62007. After determining the claims of the producer-creditors, the director shall bring an action on the bond on behalf of such producer-creditors.

62008. Upon any action being commenced upon the bond, the director may require the filing of a new bond and immediately upon a recovery in any action upon such bond the failure of a distributor to file a new bond in either case within 10 days after notice from the director constitutes grounds for the revocation or suspension of the license of such distributor.

62009. If recovery upon the bond is not sufficient to pay all of the claims as finally determined and adjudged by the court, any such amount recovered shall be divided pro rata among the producer-creditors.

62010. The failure of any distributor that purchases fluid milk or fluid cream from producers to execute and deliver the bond as provided and required in this article is a violation of this chapter. The failure of any such distributor to post any additional bond as may be required to comply with any provision of this chapter is also a violation of this chapter.

Article 9. Unfair Practices

62041. The unfair practices which are described in this article apply to every distributor whether or not a stabilization and marketing plan is in effect in the area in which the distributor is licensed or carries on his business.

62042. The payment, allowance, or acceptance of any secret rebate, secret refund, or unearned discount by any person, whether in the form of money or otherwise, is an unfair practice.

62043. The giving of any milk, cream, dairy product, service, or article of any kind, except to a bona fide charity, for the purpose of securing or retaining the fluid milk, fluid cream, or fluid skim milk business of any customer is an unfair practice.

62044. The payment, gift, or the offer or promise of any payment or gift, of money or other thing of value, directly or

indirectly, or through any agent or other intermediary, to any person with the purpose or design of inducing such person to become or remain the wholesale customer of any distributor is an unfair practice.

62045. The payment, gift, or the offer or promise of any payment or gift, of money or other thing of value by any person, directly or indirectly, or through any agent or other intermediary, to any distributor or producer, or the acceptance by any distributor or producer of such payment or gift or thing of value is an unfair practice if it is any of the following:

(a) For the purpose of inducing a distributor or producer to enter into a new contract, or to renew, extend, or modify an existing contract, for the purchase of fluid milk by a distributor from a producer.

(b) As a condition upon which a distributor will enter into a new contract, or renew, extend, or modify an existing contract for the purchase of fluid milk from a producer.

(c) For the purpose of enabling a distributor to pay to a producer, or a producer to receive from a distributor, less than the minimum class usage prices which are established by the director to be paid by distributors to producers for fluid milk.

62046. The extension to certain customers of any special price or service which is not made available to every customer that purchases fluid milk, fluid cream, or fluid skim milk of like quantity under like terms and conditions is an unfair practice.

62047. The false or misleading advertising, as defined in Sections 17500, 17501, and 17502 of the Business and Professions Code, of any fluid milk, fluid cream, or fluid skim milk is an unfair practice.

62048. Except as otherwise provided in Section 62050, the purchase of any fluid milk in excess of 200 gallons monthly from any producer unless a written contract, which complies with all of the requirements which are prescribed by this section, has been entered into with such producer is an unfair practice.

The contract shall include all of the following:

(a) The amount of fluid milk which is to be purchased for any period.

(b) Except as otherwise provided in this subdivision, the minimum quantity of such milk which is to be paid for as class 1, if any is to be purchased for class 1 purposes. The quantity shall be stated in pounds of milk, pounds of milk fat, or gallons of milk, unless the price which is to be paid for such class 1 milk is established separately for the milk fat and skim milk which is contained in such milk. If it is, the quantity which is to be paid for as class 1 shall be stated in pounds of milk, pounds of milk fat, or gallons of milk, or both in pounds of milk fat and pounds of skim milk separately.

In any marketing area where an equalization pool is a part of a stabilization and marketing plan, such contract need not specify the quantity of milk to be paid for as class 1.

The minimum quantity of milk which is to be paid for as class 1 shall be not less than 70 percent of the total quantity provided in the contract to be purchased at a milk products plant, and not less than 60 percent of the total quantity of milk fat, or the total quantity of skim milk components, but not necessarily both, provided in the contract to be purchased at a country plant, as defined by the director in stabilization and marketing plans.

(c) The price to be paid for all milk which is received.

(d) The date and method of payment for such fluid milk, which shall be that payment shall be made for approximately one-half of the milk delivered in any calendar month not later than the first day of the next following month and the remainder not later than the 15th day of that month.

(e) The charges for transportation if hauled by the distributor.

(f) A proviso that no milk which is received within the total quantity provided by the contract to be purchased for any period shall be paid for at less than the minimum price for fluid milk that is used for class 2.

The contract may contain such other provisions as are not in conflict with this chapter. A signed copy of such contract shall be filed by the distributor with the director within five days from the date of its execution.

62049. The production of fluid milk in excess of amounts provided to be purchased under contracts executed pursuant to Section 62048 shall be voluntary on the part of the producer and shall not be a condition, oral or written, of execution or renewal of any such contract.

62050. Section 62048 does not apply to the purchase of fluid milk which is necessary to meet an unanticipated increase in demand or an unanticipated shortage in the supply of a distributor if both:

(a) The quantity of fluid milk so purchased from any one producer does not exceed 1,000 gallons in any one month.

(b) A complete record of all such purchases is kept by the distributor and the price paid for such milk by the distributor is not less than the price which is established in the applicable stabilization and marketing plan for the usage to which such milk is applied.

62051. The purchasing, processing, bottling, transporting, delivering, or otherwise handling in any marketing area of any fluid milk, fluid cream, or fluid skim milk which is to be, or is, sold or otherwise disposed of by such distributor at any place in the geographical area within the outer, outside and external boundaries or limits of such marketing area, whether such place is a part of the marketing area or not, at

less than the minimum wholesale and minimum retail prices which are effective in such marketing area is an unfair practice.

62052. The payment by a distributor to any producer, including any nonprofit cooperative association acting as a producer, or the receipt by a producer, including any nonprofit cooperative association acting as a producer, from a distributor, of a lesser price for any fluid milk, fluid cream, or fluid skim milk which is distributed to any person, including any agency of federal, state, or local government which is located upon property within the geographical limits of any marketing area, for less than the minimum prices which are established by the director to be paid by distributors to producers for fluid milk, or the milk fat and skim milk contained in it, or fluid cream or fluid skim milk for the marketing area is an unfair practice.

62053. The failure of any distributor to pay for fluid milk or fluid cream which is delivered to him at the time and in the manner which is specified in the contract with the producer is an unfair practice.

62054. The provisions of Sections 62041, 62042, 62043, 62046, 62047, 62048, 62049, 62050, 62051, and 62052 with respect to fluid milk apply whether or not such fluid milk is received by the distributor as whole milk, or as skim milk and fluid cream, or either, or as any other derivatives of such fluid milk which are reconstituted into such fluid milk, fluid cream, or fluid skim milk for market usage, and whether or not a fluid cream plan has been established for the marketing area.

Article 10. Marketing Areas

62081. The director shall designate marketing areas which he deems necessary or advisable to effectuate the purposes of this chapter, and in which he finds the conditions affecting the production, distribution, and sale of fluid milk, fluid cream, and fluid skim milk are reasonably uniform.

62082. The director may establish additional areas, or modify areas previously established, if he deems the establishment or modification of such areas necessary or advisable to effectuate the purposes of this chapter.

62083. If the director finds, after a public hearing in and for each particular marketing area under consideration for consolidation, that conditions of production and distribution are reasonably uniform in two or more such marketing areas in which stabilization and marketing plans and minimum wholesale and minimum retail prices are in effect, he may consolidate the areas.

If there is a sales stimulation and consumer educational program in effect in one or more of the areas under consideration for consolidation, the existence of such a program shall not prevent the consolidation. If the areas are consolidated, the program may remain in effect until the date of termination

of the program in that part of the consolidated area where the program was in effect prior to the consolidation. If the period the program is to remain in effect is extended, it shall be effective in the entire consolidated marketing area.

Article 11. Local and Regional Producer Advisory Boards

62111. Except as otherwise provided in Section 62113, the director may, if he deems such board necessary or advisable, appoint:

(a) A local advisory board for any marketing area which is established as prescribed in this chapter to assist and advise him in matters which pertain to the production and marketing of fluid milk or to the operation of a stabilization and marketing plan.

(b) A regional advisory board, if he deems such board necessary or advisable to represent several marketing areas which are adjacent to each other and wherein production conditions and costs are reasonably uniform.

62112. Except as otherwise provided in Section 62113, the director shall appoint:

(a) A local advisory board, if a majority of the producers individually, or through any nonprofit agricultural cooperative marketing association which is authorized by its members to so petition, request the establishment of such board.

(b) A regional advisory board, if in each marketing area which is involved a majority of producers that supply such marketing areas individually, or through any nonprofit agricultural cooperative marketing association which is authorized by its members to so petition, requests that such a board be established.

62113. The director shall not establish any local or regional advisory board pursuant to this article if he finds that the assessments which are collected pursuant to Article 24 (commencing with Section 62521) of this chapter from the marketing area are insufficient to cover the costs of such local or regional advisory board.

No regional advisory board shall be set up to include any marketing area which on September 7, 1955 was operating under a local advisory board, unless by petition as provided for in this article or through public hearing, producers of such marketing area request that they be represented by a regional advisory board.

62114. If the director receives a qualified petition for a local advisory board, he may investigate the possibility of establishing a regional advisory board covering the marketing area from which the petition was received and the adjacent marketing areas, by holding one or more public hearings for the purpose of establishing whether or not a majority of producers supplying the marketing areas proposed to be included in such region desire such regional advisory board.

62115. A local advisory board which is established pursuant to this article shall consist of seven members who shall be producers that supply fluid milk to the particular marketing area. A regional advisory board may consist of any number of members who are producers that supply fluid milk to any of the marketing areas in the region, but shall consist of not less than one member from each such marketing area in the region.

62116. The term of office of each member of a regional advisory board or a local advisory board shall be two years.

62117. The director may remove any member from a local or a regional advisory board if he finds, after a hearing, that such member is guilty of nonfeasance or malfeasance in office.

62118. The director may appoint a member to fill any vacancy on a local or a regional advisory board.

62119. Each regional advisory board and each local advisory board may meet in regular session each month, and each member shall be allowed twelve dollars ($12) per diem and mileage at the rate of nine cents ($0.09) per mile for attending such regular meetings, and any other meeting or conference which is called or authorized by the director within or outside of the boundaries of this state.

62120. Any regional or local advisory board may, with the previous approval of the director, employ such personnel as may be necessary in the performance of its duties and shall adopt regulations for its conduct. Each such board shall submit a budget of its expenses to the director for his approval.

The funds to be used for the maintenance of each such board shall be paid from the proceeds of assessments and licenses which are paid to the director under the plan of any area which is represented upon verified claims that are presented by the board to the director. A regional or local advisory board shall not incur any expenses except those for per diem and mileage, unless the expenses are approved by the director.

62121. Regional and local advisory boards shall review with the director the methods which are to be used in determining producer costs, and aid the director in the selection of the level of production which is necessary to meet the requirements of Sections 62212 and 62411 with respect to producer price minimums.

62122. For purposes of developing uniformity of administration as between marketing areas in which producer advisory boards have been appointed, the director shall call together representatives of regional and local advisory boards from time to time to advise him as to the relationships in producer costs among the marketing areas, and may designate such representatives as the statewide committee of producer advisory boards.

Article 12. Local Marketing and Distribution Advisory Boards

62151. The director may, if he deems such board necessary or advisable, appoint a local advisory board for any marketing area which is established pursuant to this chapter to assist and advise him in matters which pertain to the marketing, distribution, and sale of fluid milk or fluid cream or both.

62152. Except as otherwise provided in Section 62153, a local advisory board shall consist of nine members, who shall be residents of, or engaged in business within, the marketing area for which they are appointed by the director, four of whom shall be persons whose major interest is the distribution, marketing or sale of fluid milk or fluid cream, or both, one producer-distributor, two retail storekeepers, one person active in the restaurant business or a person representing restaurants, and one person, representative of the consuming public, who has no connection with the milk or cream business.

62153. In any marketing area where organized labor is the collective bargaining agent of milk plant employees, the director may, upon recommendation of a majority of the board members, add a representative of organized labor to the local advisory board.

62154. The term of office of each member shall be two years, unless the plan is terminated before such term expires.

62155. The director may remove any member from a local advisory board if he finds, after hearing, that such member is guilty of nonfeasance or malfeasance in office.

62156. The director may appoint a member to fill any vacancy on a local advisory board.

62157. A local advisory board may meet in regular session each month, and each member shall be allowed ten dollars ($10) per diem and mileage at the rate of five cents ($0.05) per mile for attending such regular meetings.

62158. The board, or any member, may be allowed actual and necessary expenses incurred in attending any meeting or conference called or authorized by the director within or outside of the boundaries of this state. A local advisory board may, with the previous approval of the director, employ such personnel as may be necessary in the performance of its duties and shall adopt regulations for its conduct. Each such board shall submit a budget of its expenses to the director for his approval. The funds to be used for the maintenance of the board shall be paid from the proceeds of fees and licenses paid to the director under the plan upon verified claims presented by the board to the director. A board shall not incur any expenses, except those for per diem and mileage, unless approved by the director.

Article 13. Formation and Adoption of Stabilization and Marketing Plans

62181. Except as otherwise provided in Section 62182, the director shall, prior to the formulation of a stabilization and marketing plan for fluid milk for any marketing area, conduct a public hearing in the area for the purpose of determining whether or not the formulation of a stabilization and marketing plan for fluid milk for such area is desired by producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area and that both:

(a) Represent not less than 65 percent of the total number of producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area.

(b) Produce not less than 65 percent of the total volume of the fluid milk which is produced for the marketing area by all such producers.

62182. A hearing need not, however, be held if a petition requesting a stabilization and marketing plan is presented to the director by the producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area, and that both:

(a) Represent not less than 65 percent of the total number of producers whose major interest in the fluid milk business is in the production of fluid milk for the marketing area.

(b) Produce not less than 65 percent of the total volume of the fluid milk which is produced for the marketing area by all such producers.

62183. If the director finds that a stabilization and marketing plan is necessary to accomplish the purposes of this chapter, he shall formulate a stabilization and marketing plan for fluid milk for such area and issue a notice of public hearing upon the plan which is formulated to all producers and distributors of record with the department that may be subject to the provisions of such plan.

62184. The notice of the hearing may be effected by mail, or by publication pursuant to Section 6062 of the Government Code in the area which is designated. It shall specify the time and place of such hearing, which shall not be prior to 10 days from the mailing, or from the final publication of such notice. If no daily newspaper of general circulation is published in the area which is designated, publication pursuant to Section 6066 of the Government Code shall be considered proper publication of notice.

62185. At the hearing, interested parties shall be heard and records kept of the proceedings of such hearing for determination by the director whether the plan proposed will accomplish the purposes of this chapter.

62186. If, after the public hearing, the director determines that the proposed plan will tend to accomplish the purposes of this chapter within the standards which are prescribed in it, he shall issue an order to all producers and distributors of

record with the department and subject to the provisions of such plan, declaring such plan in effect within 45 days from the date of such hearing.

62187. A distributor that is subject to the provisions of any stabilization and marketing plan shall not purchase milk from any producer that does not comply with this chapter and such plan.

62188. No stabilization and marketing plan shall involve a limitation upon the production of fluid milk, fluid cream, or fluid skim milk.

Article 14. Mandatory Provisions

62211. Each stabilization and marketing plan shall contain provisions for prohibiting producers, distributors, and retail stores from engaging in the unfair practices which are applicable to them that are set forth in Article 9 (commencing with Section 62041) of this chapter.

62212. Each stabilization and marketing plan shall contain provisions whereby the director designates and prescribes, or provides methods for designating or prescribing, minimum prices to be paid by distributors to producers, for fluid milk in the various classes.

The prices so designated or prescribed shall be in a reasonable and sound economic relationship with the price of manufacturing milk.

In determining such economic relationship, the director shall take into consideration all of the relevant factors in such relationship, including, but not limited to, all of the following:

(a) The reasonableness and economic soundness of manufacturing milk prices in relation to the costs of producing manufacturing milk.

(b) The additional costs of producing and marketing fluid milk over and above costs of producing and marketing manufacturing milk.

(c) Current and prospective supplies of fluid milk in relation to current and prospective demands for such fluid milk for all purposes.

In designating and prescribing, or in providing methods for designating or prescribing, such prices, the director shall also take into consideration all of the purposes, policies, and standards contained in Sections 61871, 61872, 61875, 61876, 61877, 62414, and 62415.

The director shall also find that such prices will insure consumers an adequate and continuous supply of pure, fresh, wholesome milk at fair and reasonable prices, including a reasonable estimate of the additional supply which is needed to provide for normal fluctuations in production and in consumer demand for fluid milk, cream, and skim milk for such marketing area.

62213. Each stabilization and marketing plan shall contain provisions whereby the director designates and prescribes, or provides methods for designating or prescribing, minimum prices to be paid by distributors to producers for fluid milk which is received by a distributor in one marketing area and separated in that area into fluid cream and fluid skim milk when such fluid cream, fluid skim milk, or both, are transported for utilization into another marketing area or into a locality in which no stabilization or marketing plan is in effect. This section does not, however, affect the provisions of this chapter which relate to the establishment of minimum wholesale and minimum retail prices for fluid cream.

62214. Subject to the provisions of Section 62412, each stabilization and marketing plan shall contain provisions whereby the director shall provide methods for the establishment of minimum prices for fluid milk, fluid cream, or the milk fat or fluid skim milk components of such fluid milk or fluid skim milk, received within a marketing area regardless of whether such fluid milk, fluid cream, or the milk fat is, or fluid skim milk components of such fluid milk or fluid skim milk are, subsequently sold or distributed within or without such marketing area within the jurisdiction of this state, and may contain such provisions whether or not such fluid milk, fluid cream, or the milk fat is, or fluid skim milk components of such fluid milk or fluid skim milk are, subsequently sold or distributed without the jurisdiction of this state.

62215. Each stabilization and marketing plan shall provide all of the following:

(a) For the establishment of prices for fluid milk, fluid cream, or the milk fat or fluid skim milk components of such fluid milk or fluid skim milk, whether or not such fluid milk, fluid cream, or the milk fat is, or fluid skim milk components of such fluid milk or fluid skim milk are, subsequently sold or distributed in another marketing area within this state where a stabilization and marketing plan is in effect.

(b) That producers shall be paid not less than the minimum prices which are established for the marketing area wherein such fluid milk, fluid cream, or the milk fat is, or fluid skim milk components of such fluid milk or fluid skim milk are, ultimately sold or distributed.

(c) That if such fluid milk, fluid cream, or the milk fat is, or fluid skim milk components of such fluid milk or fluid cream are, subsequently sold or distributed in any place within the jurisdiction of this state where no stabilization and marketing plan is in effect, such fluid milk, fluid cream, or the milk fat or fluid skim milk components of such fluid milk or fluid skim milk, shall be paid by the distributor to the producer at not less than the average of prices which are paid by distributors, whose plants are located within such area, to producers for fluid milk, fluid cream, or the milk fat or fluid skim milk components of such fluid milk. If, however, no

plants are located within such area, the price which shall be paid by the distributor to the producer shall not be less than the average of prices which are paid by distributors to producers for fluid milk, fluid cream, or fluid skim milk, or the milk fat or fluid skim milk components of such fluid milk, at the plants in the nearest marketing areas adjacent to the area where such fluid milk, fluid cream, or the milk fat is, or fluid skim milk of such fluid milk or fluid skim milk are, sold or distributed, as established by the stabilization and marketing plans in effect in such adjacent marketing areas.

62216. Any stabilization and marketing plan for fluid cream established by the director in any marketing area prior to September 7, 1955, is continued in effect, and may be amended or terminated only as provided in Article 19 (commencing with Section 62381) of this chapter.

62217. No amendment of this article terminates or invalidates any provision of any stabilization and marketing plan which has been established by the director prior to the effective date of such amendment. Each such plan shall, however, be brought into conformity with such amendment at the earliest practicable date after the effective date of such amendment.

Article 15. Optional Provisions Generally

62241. Each stabilization and marketing plan may contain provisions which require distributors to report to each producer from whom fluid milk is secured all of the following:

(a) The volume of fluid milk which is received from such producer in pounds of milk.

(b) The milk fat test of such milk.

(c) The amount of fluid milk in milk fat pounds which is paid for in the several classes.

(d) The prices which are paid for the various classes for each month.

62242. Each stabilization and marketing plan may contain provisions which authorize any distributor that purchases fluid milk under contract from any producer to pool such milk for producer payment purposes in accordance with such contracts, irrespective of whether such milk is actually and physically received at the same milk products plant or diverted, in accordance with such plan. Such provisions may do any of the following:

(a) Provide that fluid milk or fluid cream, or both, that is received from producers by milk products plants under the same ownership, may be pooled for purposes of payment to producers.

(b) Provide that if a distributor pools fluid milk, fluid cream, or both, as provided in subdivision (a), the distributor shall allocate, among all producers that participate in the class 1 usage, transportation savings which are applicable to fluid milk, fluid cream, or both, not actually transported between

the plant of first receipt and one or more other plants subject to the pool, and used for class 1, and may pay to producers shipping fluid milk, fluid cream, or both, directly to a plant subject to the pool a price for usage of such fluid milk, fluid cream, or both, for class 1, which price represents the average of minimum producer prices payable by that particular plant for such class 1 usage.

62243. The director may establish minimum prices to be paid by distributors to producer-distributors for milk which is not used by the purchasing distributor as class 1 milk. Such provisions may provide that such milk, if used in classes other than class 1 by the purchasing distributor, may be paid for at the minimum prices which are established by the director for such other usage but which shall not be less than the prices as found by the director to be paid by manufacturing milk plants in, or adjacent to, the area which use milk for similar purposes. Such prices shall remain in effect only for the period during which, as determined by the director, there is a surplus of producer-distributor milk.

62244. Each stabilization and marketing plan may further provide for maximum charges for plant processing and transportation service on the fluid milk, fluid cream and fluid skim milk, or milk fat, or fluid skim milk components which are transported to the area where sold. The stabilization and marketing plan may enumerate the applicable maximum charges, and may establish individual charges for each function enumerated. In establishing any such maximum charges for such transportation services, the director shall base such maximum charges upon the rates which are charged for actual or reasonably similar services by highway carriers, as the term "highway carriers" is defined in Section 3511 of the Public Utilities Code.

62245. If any contract between a distributor and a producer for the purchase of any fluid milk, fluid skim milk, or fluid cream provides that the charges for the hauling of it shall be paid, in whole or in part, by the producer, and such hauling is done by the distributor either directly or through an agent or by any person that contracts with, or is designated by, such distributor for such hauling, the director may, and upon the written request of the producer or the written request of any association representing the producer shall, investigate the rates, terms, and conditions which are involved in such hauling in order to determine whether such rates, terms and conditions are in compliance with Section 62244.

If the director determines that such rates, terms, and conditions are not in compliance with Section 62244, he shall determine, within the standards which are prescribed in Section 62244, the maximum charges on account of such hauling that will comply with Section 62244 with respect to such purchase of fluid milk, fluid skim milk, or fluid cream.

Article 16. Equalization Pools

62271. Each stabilization and marketing plan may contain provisions whereby the director designates, or prescribes methods to provide, uniform prices to be paid to every producer that supplies fluid milk to any distributor for pasteurization purposes in the marketing area involved by pooling the returns of all such fluid milk. An equalization pool shall not be established unless the director, after hearing, determines that the establishment of such pool is desired by producers that both:

(a) Supply distributors with not less than 65 percent of the total volume of fluid milk which is used for pasteurization purposes.

(b) Represent not less than 65 percent of the total number of such producers.

A hearing is not, however, necessary if 65 percent, by volume and production, of such producers petition the director in writing to establish such equalization pool as a part of the plan.

62272. If the director finds that an equalization pool is necessary to carry out this chapter, he shall make provision for it. The director may designate the local advisory board for the marketing area as his agency to operate the equalization pool and may permit such local board to employ a pool manager and such other necessary personnel and to incur such expenses incidental to the operation of the pool as the director finds are necessary.

The director may require distributors to make reports to the pool manager at such intervals and in such detail as he finds is necessary for the operation of the pool. Such reports shall be kept confidential as to any individual distributor but shall be available to the director or his agents and the pool manager, and such employees of the pool as are necessary to the operation of the equalization pool.

62273. Every distributor that purchases any fluid milk from any producer for pasteurization purposes shall deduct from payments due such producer at such time and in such manner such sums as the director determines are sufficient to insure uniform prices to all producers that are subject to the provisions of the equalization pool, irrespective of the usage of such fluid milk by the distributor.

62274. Every distributor shall make, in addition to the deductions which are prescribed in Section 62273, such additional deductions per pound of milk fat as the director finds are necessary to pay all expenses which are incidental to the operation of the equalization pool, including the establishment of a reserve account to insure prompt payments to producers.

62275. The deductions which are prescribed in this article are in addition to any other deductions which are prescribed by this chapter.

62276. A pooling program shall not prevent any distributor from paying premiums for quality if all producers that

supply fluid milk of like quality to such distributor are paid similar premiums, nor shall any pooling program prohibit the paying of different prices to producers which are based on differentials in transportation or adjustments or deductions which are made by a cooperative association of producers to its members, including the blending of proceeds which are received from the sale of fluid milk by such cooperative in other markets.

Article 17. Sales Stimulation and Consumer Educational Programs

62301. Each stabilization and marketing plan may contain provisions which authorize sales stimulation or consumer educational programs to be formulated and administered to increase the consumption of fluid milk and fluid cream, or other dairy products Such programs shall be carried on without reference to a particular brand or trade name. No such sales stimulation or consumer educational program shall be carried on which makes use of false or unwarranted claims on behalf of such products or which disparages the quality, value, sale, or use of any fluid milk or fluid cream or any other agricultural commodity which is authorized by law to be marketed within such marketing area.

62302. Before any stabilization and marketing plan may provide for a sales stimulation and consumer educational program, one of the following is necessary:

(a) Not less than 65 percent of the total number of producers, including members of producers' cooperative marketing associations, whose major interest in fluid milk is in the production of fluid milk for the marketing area and that produced not less than 65 percent of the total volume of fluid milk produced by such producers for and sold in the area in a representative period to be determined by the director shall petition the director in writing for the inclusion of such a program as part of the stabilization and marketing plan for such marketing area.

(b) Not less than 65 percent of the total number of distributors and that distribute not less than 65 percent of the total volume of fluid milk for consumption in the marketing area shall petition the director in writing for the inclusion of such a program as part of the stabilization and marketing plan.

62303. For the purpose of determining the number of producers that are required by subdivision (a) of Section 62302 to petition the director for the establishment of a sales stimulation and consumer educational program:

(a) The director shall consider as producers, other than members of a cooperative marketing association, the producers for whom contracts are required to be filed with the director by Section 62048.

(b) The director shall consider as producers, with respect to producers that are members of a cooperative marketing

association, all of such producers whose major interest is in the production of fluid milk for marketing through such cooperative marketing association in such marketing area.

62304. If the production of any producer is shipped, handled, or distributed in such manner that the marketing area in which such producer has his major interest cannot be ascertained by the director with reasonable certainty, such marketing area shall be conclusively deemed by the director to be that marketing area in which is located the milk plant where such production is first received by any distributor or by any cooperative marketing association.

62305. In determining whether a petition has been signed by the required number of producers in accordance with subdivision (a) of Section 62302, the director shall consider the approval of any nonprofit agricultural cooperative marketing association which is authorized by its members so to petition, as being the petition of the producers that are members of, or stockholders in, such nonprofit agricultural cooperative marketing association.

62306. If the sales stimulation and consumer educational program is requested by distributors, the petition shall bear all of the following:

(a) The signatures of the petitioners and their addresses.

(b) The approximate daily volume of fluid milk in gallons and milk fat pounds which the petitioners handle and the type of product which they distribute.

(c) The estimated cost of the program each month.

(d) The number of months the program is to continue in operation.

62307. Before a program may be instituted a public hearing shall be called by the director. The procedure for the public hearing shall be the same as required for the institution of a stabilization and marketing plan for fluid milk. At such public hearing testimony and evidence shall be taken to determine all of the following:

(a) The necessity of such a program

(b) The estimated costs of the program.

(c) The time during which the program is to be continued.

(d) Such other matters as are necessary in the institution of the program.

62308. If, after public hearing and consideration of the testimony and evidence presented at the hearing, the director finds that a sales stimulation and consumer educational program will tend to effectuate the purposes of this chapter, he shall issue an order making effective such program. The order shall contain all of the following:

(a) The number of months the program shall continue in operation.

(b) The rate of assessment per pound milk fat or per gallon to be paid by those petitioning for the program.

(c) The names, addresses, and business locations of the persons who are appointed to administer the program.

(d) Any other provisions which are necessary and incidental to the operation of the program.

62309. The persons named in the order to administer the program shall be selected by the director in the following manner and in the following number:

(a) If the program was instituted by producers, the director shall name not less than five representative producers nor more than nine representative producers from nominations made at the public hearing by the petitioners.

(b) If the program was instituted by distributors, the director shall name not less than five representative distributors nor more than nine representative distributors from nominations made at the public hearing by the petitioners.

(c) If the program was instituted by both producers and distributors, the director shall name not less than three representative producers nor more than five representative producers from nominations made at the public hearing by the petitioning producers and not less than three representative distributors nor more than five representative distributors from nominations made at the public hearing by petitioning distributors. An equal number of producers and distributors shall, however, be named by the director to administer the program.

62310. Distributors that are also producers are eligible to nomination for service on, and may be named by the director to serve on, the committee to administer any program for which they will be required to pay assessments.

62311. Persons selected by the director to administer the program who resign or become ineligible to serve shall be succeeded by persons selected by the director from nominations made at the public hearing or from persons nominated at a nomination meeting which is called by the director to receive nominations for persons eligible to serve. If such a nomination meeting is held, notice of such meeting shall be mailed to each person that is eligible to petition for the program as provided for in Section 62302.

62312. If a vacancy occurs on any committee which is appointed to administer a sales stimulation and consumer educational program, the director shall appoint another person from the list of persons who were nominated at the public hearing. If there is no person on such list who is eligible and willing to accept such appointment, then the director shall hold a nomination meeting within the marketing area for the purpose of receiving nominations, and the director shall appoint one of the persons so nominated.

A notice of any such nomination meeting shall be mailed by the director to all producers of record with the department that are eligible to sign a petition for such a program. If the program was initiated both by producers and distributors, such notice shall also be mailed to all distributors of record that are eligible to sign such petition for such marketing area.

62313. Except as otherwise provided in this section, all programs shall be administered by the persons named in the order of the director which makes the program effective, and shall be administered subject to the approval of the director. If the persons appointed by the director to administer an order pursuant to Section 62308 request that the Dairy Council of California supervise the administration of the program, and the director approves, the Dairy Council of California shall supervise the administration of the program.

62314. Upon the termination of any program, if there are any obligations arising thereunder, the final accrual or ascertainment of which requires further acts by any producer or distributor, by the persons who are appointed to administer the program, or by the director, the power or duty to perform such further acts continues, notwithstanding such termination.

62315. A sales stimulation and consumer educational program which is instituted by producers shall be financed by all producers supplying fluid milk to the marketing area. Such program, if instituted by distributors, shall be financed by all distributors that supply fluid milk to the marketing area. If such program is instituted by both producers and distributors, both producers and distributors shall finance the program equally.

62316. If the program is instituted by producers, the director may require producers to pay assessments of not more than five mills ($0 005) per pound of milk fat or, if the program is instituted upon a gallonage basis, not more than eighteen mills ($0 018) for each 10 gallons of fluid milk which is received by distributors, including the production of distributors that are also producers.

62317. If the program is instituted by distributors, the director may require distributors to pay assessments of not more than five mills ($0 005) per pound of milk fat or, if the program is instituted upon a gallonage basis, not more than eighteen mills ($0.018) for each 10 gallons of fluid milk, which is received by distributors, including the production of distributors that are also producers.

62318. If the program is instituted by both producers and distributors, the director may require both producers and distributors to pay assessments for the purpose of providing funds for formulating, administering, and carrying on such program. The assessments to be paid by distributors shall not exceed five mills ($0.005) per pound milk fat or, if the program is instituted upon a gallonage basis, not more than eighteen mills ($0.018) for each 10 gallons of fluid milk which is received by the distributors, including the production of distributors that are likewise producers. Assessments of not more than five mills ($0.005) per pound milk fat or, if the program is instituted upon a gallonage basis, not more than eighteen mills ($0.018) for each 10 gallons of fluid milk which is produced by producers and received by dis-

tributors, shall likewise be paid by producers. The combined assessments shall not, however, exceed 10 mills ($0.010) per pound milk fat or, if the program is instituted upon a gallonage basis, not more than 36 mills ($0.036) for each 10 gallons of fluid milk which is received from producers and processed by distributors for distribution in the marketing area in the form of whole milk, fluid cream, or manufactured dairy products which are derived from fluid milk.
