Under existing law, the California Beverage Container Recycling and Litter Reduction Act, every beverage container sold or offered for sale in this state is required to have a minimum refund value for every beverage container redeemed and every beverage distributor is required to pay to the Department of Conservation, for deposit into the California Beverage Container Recycling Fund, a redemption payment for every beverage container sold or offered for sale in this state by the distributor. The money in the fund is continuously appropriated to the department to pay refund values, processing fees, and, from July 1, 1993, to January 1, 1996, inclusive, handling fees to a recycling center at a supermarket site, which is defined as a certified recycling center which redeems all types of empty beverage containers and which is located at, or within the contiguous parking lot surrounding, a supermarket, as specified.

This bill would revise the definition of supermarket site to include locations within,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

or outside and immediately adjacent to the entrance of, a supermarket.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 532 (SB 799) Presley. Medical Board of California: contingent fund.

Existing law requires any moneys returned to the Contingent Fund of the Medical Board of California, in the event the California Medical Association prevails in a certain action for injunctive and other relief, to be used to offset any license fee increase authorized under existing law.

This bill would exempt any amount paid to the California Medical Association for attorneys' fees and costs of suit from the amount that is required to be used to offset any license fee increase.

Existing law, the Budget Act of 1993, requires interest earned by governmental cost funds, and revenues from penalties for late payment of fees or taxes, to be transferred to the unappropriated surplus of the General Fund, as determined jointly by the Controller and the Director of Finance for the period July 1, 1993, to June 30, 1994, inclusive.

This bill would exempt the Contingent Fund of the Medical Board of California from these transfers.

Ch. 533 (SB 1032) Thompson. Oil spills: contingency plans.

Existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, requires the administrator for oil spill response, if deficiencies are found to exist in an oil spill contingency plan, to remand the plan to the originating party with recommendations for amendments necessary to ensure that the coastline is protected.

This bill would require the administrator, by July 1, 1995, to report to the Legislature on the changes made to oil spill contingency plans remanded to originating parties and would require the report to include specified recommendations.

This bill would also make a technical, nonsubstantive change pertaining to oil spill response.

Ch. 534 (SB 1134) Russell. Congestion management: trip reduction plan.

(1) Existing law requires specified governmental agencies to adopt a congestion management plan for each county.

Existing law authorizes air pollution control districts and air quality management districts to encourage or require the use of ridesharing, vanpooling, flexible work hours, or other measures that reduce the number or length of vehicle trips and to adopt, implement, and enforce transportation control measures, as defined, for the attainment of state or federal ambient air quality standards. The South Coast Air Quality Management District is prohibited from requiring employers with fewer than 100 employees at a single worksite to submit a trip reduction plan.

This bill would specify measures that the south coast district or an agency in the south coast district may or may not require an employer to provide for purposes of those provisions. The bill would require employers to give employees notice of proposed plans and the opportunity to comment prior to submittal of the plan to the agency or the south coast district. The bill would require the agencies to modify existing programs, and the south coast district to modify existing regulations, by June 30, 1995, to conform to these provisions, thereby imposing a state-mandated local program. The bill would make a related statement of legislative intent.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 535 (SB 1288) Calderon. Discrimination: gender-based pricing: employment.

(1) Existing provisions of the Unruh Civil Rights Act and related provisions prohibit various types of discrimination by business establishments. Existing law further provides for the civil liability of a person who denies, aids or incites a denial of these rights, or

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

makes any discrimination contrary to these provisions and sets actual damages at a minimum of $250.

This bill would instead provide for actual damages at a minimum of $1,000.

The bill also would direct the Department of Consumer Affairs, by June 1, 1995, to provide notice to licensees of the State Board of Barbering and Cosmetology that California state law prohibits gender-based pricing, as provided. The bill requires the department, by June 1, 1998, to submit to the Legislature, upon request, a summary of the number and subject of any inquiries or comments by licensees in response to that notice, as specified, and requires the department to develop, by June 1, 1995, and to make available to the public, consumer information on the problem of gender-based price discrimination.

(2) Existing law declares it to be an unlawful employment practice for an employer, among other things, to discriminate against a person in terms, conditions, or privileges of employment because of the person's sex.

This bill would make it an unlawful employment practice for an employer to refuse to permit an employee to wear pants on account of the sex of the employee. The bill would not prohibit an employer from requiring employees in a particular occupation to wear a uniform, and would permit the Fair Employment and Housing Commission to exempt an employer from these provisions for good cause shown.

Ch. 536 (SB 1291) Kelley. California regional water quality control boards.

Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies responsible for water quality control. Under the act, there is a regional board for each of 9 prescribed regions.

This bill would authorize a person or entity, that is subject to regulation by more than one regional board, to submit any matter that may be submitted to a regional board to one of those regional boards if prescribed requirements are met.

Ch. 537 (SB 1323) Leslie. Kirkwood Meadows Public Utility District: June Lake Public Utility District: powers.

Existing law authorizes the Kirkwood Meadows Public Utility District to acquire, construct, own, and operate public parking facilities and cable television facilities and to provide snow removal and road maintenance services for all roads open to the public within the district.

This bill would also authorize the Kirkwood Meadows Public Utility District, under specified conditions, to exercise all of the powers of a mosquito abatement district or vector control district, as set forth in specified provisions of the Health and Safety Code, as necessary for purposes of mosquito abatement or vector control within the service area of the Kirkwood Meadows Public Utility District.

This bill would impose a state-mandated local program by applying existing misdemeanor provisions to persons who interfere with mosquito abatement and vector control work done by the Kirkwood Meadows Public Utility District.

Existing law authorizes the June Lake Public Utility District to exercise all of the powers of a mosquito abatement district or vector control district necessary for mosquito abatement and vector control within the territory of the June Lake Public Utility District.

This bill would require the June Lake Public Utility District to comply with existing statutory requirements relating to mosquito abatement and vector control districts.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 538 (SB 1336) Leonard. Air pollution: gross polluters.

(1) Existing law authorizes air pollution control districts and air quality management districts to establish programs using remote sensors or other methods to identify gross polluters and other high-emitting vehicles and to provide financial incentives to encourage the repair or scrapping of those vehicles as a method of reducing mobile source emissions. The districts are authorized to establish procedures to generate marketable emission reduction credits from the program.

This bill would, under specified conditions, require the districts to establish a process to approve or disapprove, within 90 days of receiving a request from an employer, an employer-established program that produces emission reductions equivalent to those that would be achieved under a district rule or regulation by identifying gross polluters and other high-emitting vehicles whose emissions could be reduced by repair.

The bill would thereby impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 539 (SB 1416) Rogers. Air pollution: inter-basin stationary sources.

(1) Existing law provides that increases in stationary source air pollution emissions in an air pollution control district or air quality management district may be offset by reductions credited to a stationary source located in another district in the same air basin.

This bill would allow those offsets as to stationary sources in different air basins if emissions are transported from an upwind to a downwind district, as specified. The bill would further require that any offset credited pursuant to those provisions be approved by a resolution adopted by the governing board of each district, as specified. The bill would also make various technical and clarifying changes in those provisions, and would impose a state-mandated local program by imposing new duties on the districts relative to determining the applicability of the offsets.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 540 (SB 1488) Beverly. Public retirement systems: benefits: service credit.

(1) The Public Employees' Retirement Law authorizes, under certain circumstances, contracting agencies to encourage the retirement of senior employees by offering an additional 2 years of service credit for retirement during prescribed periods.

This bill would, for the 1994–95, 1995–96, and 1996–97 fiscal years, authorize contracting agencies to offer their employees up to an additional 4 years of service credit, under specified conditions.

(2) The existing County Employees Retirement Law of 1937, in a provision that is applicable only at the option of the county board of supervisors and is not subject to the law relating to local public employer-employee relations, authorizes counties to offer their employees up to an additional 2 years of service credit, under specified conditions.

This bill would, in a provision that is applicable only at the option of the county board of supervisors, and that is not subject to the law relating to local public employer-employee relations, authorize counties to offer, for the 1994–95, 1995–96, and 1996–97 fiscal years, up to an additional 4 years of service credit, under specified conditions.

Ch. 541 (SB 1501) Marks. Crimes: public transportation.

Existing law provides that any of specified acts committed on or in any facility or vehicle of a public transportation system or other specified transportation entity is an infraction. Existing law specifies that those acts include evasion of any fare, misuse of any transfer, pass, ticket, or token, playing sound equipment, smoking, eating, drinking,

NOTE: Superior numbers appear as a separate section at the end of the digests.

expectorating, or willfully disturbing others.

This bill would additionally prohibit carrying specified hazardous materials, urinating or defecating, except as specified, willfully blocking the free movement of another person, skateboarding, roller skating, or rollerblading, and unauthorized use of a discount ticket or failure to present specified proof of eligibility to use a discount ticket when entering or exiting a transit station or vehicle. The bill would provide, however, that the prohibition against willfully blocking the free movement of another person shall not be interpreted to affect any lawful activities permitted or first amendment rights protected under the laws of this state or applicable federal law, including, but not limited to, laws related to collective bargaining, labor relations, or labor disputes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 542 (SB 1576) McCorquodale. Department of Food and Agriculture: duties.

(1) Existing law requires the Department of Food and Agriculture to promote and protect the agricultural industry of the state.

This bill would also require the department to seek to enhance, protect, and perpetuate the ability of the private sector to produce food and fiber in a way that benefits the general welfare and economy of the state. The bill would also require the department to seek to maintain the economic well-being of agriculturally dependent rural communities in this state.

(2) Existing law permits the Secretary of Food and Agriculture to investigate and certify to shippers or other financially interested parties the analysis, classification, grade, quality, or condition of any fruit, vegetable, or other agricultural product. Existing law also provides for the Shipping Point Advisory Committee to advise the secretary on all matters pertaining to these provisions.

This bill would permit the committee to request the secretary to utilize an appropriate entity, rather than personnel of the department, to supply the field staff, office facilities, and supplies necessary to provide inspection services.

Ch. 543 (SB 1654) Kelley. Milk and milk products: bulk transportation.

(1) Existing law requires every person that is engaged in the production of market milk to obtain a permit from the Secretary of Food and Agriculture or from the approved milk inspection service that is maintained by the county and designated by the secretary. Existing law also requires every person outside the jurisdiction of an approved milk inspection service and every person engaged in the processing, manufacture, or distribution of milk, milk products, or products resembling milk products or in the processing, manufacture, or freezing of ice cream, ice milk, sherbet, or any similar frozen product, to pay a cost-related inspection fee to the secretary.

This bill would require each person, before engaging in the transportation of unpackaged market milk or unpackaged market milk products, to obtain a bulk milk hauler tanker permit from the secretary for each tanker that person uses in the bulk transport of unpackaged market milk or unpackaged market milk products. The bill would require the permit to conform to the requirements of a specified federal memorandum and would make the permit requirement operative upon the adoption of the federal memorandum. The bill would authorize the secretary to adopt regulations to implement the bill and would provide for related matters.

(2) Existing law requires money derived under the bill to be deposited in the Department of Food and Agriculture Fund and continuously appropriates it for the enforcement of the Milk and Milk Products Act of 1947.

Because this bill would impose new duties on the secretary that would be payable from that continuously appropriated fund, the bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 544 (SB 1726) Kopp. Property taxation: supplemental and escape assessments: limitation periods.

Existing property tax law provides for a penalty of 25% of the additional assessed value in those cases where a fraudulent act, omission, or collusion, causes property to escape assessment, in whole or in part, or to be underassessed.

This bill would increase this penalty to 75% of the amount of the additional assessed value.

Existing property tax law provides that supplemental and escape assessments shall not be valid unless those assessments are made prior to the applicable July 1, determined in accordance with the nature or circumstances of the assessment, after the July 1 of the assessment year in which the event giving rise to the supplemental or escape assessment occurred.

This bill would modify these limitation periods to provide, with respect to supplemental assessments, for 4- and 6-year limitation periods only, that commence in the assessment year in which necessary filings are made with respect to a change in ownership or new construction is completed. This bill would eliminate the limitations period applicable to escape assessments resulting from unrecorded changes in ownership or changes in control, and would provide, in the case where property has escaped taxation or been underassessed following a change in ownership, that otherwise applicable limitations periods shall not commence until the beginning of the assessment year in which a change in ownership statement has been filed.

Ch. 545 (SB 1752) McCorquodale. Department of Pesticide Regulation: Department of Food and Agriculture: responsibilities.

(1) Existing provisions of the Governor's Reorganization Plan No. 1 of 1991 created the Department of Pesticide Regulation and transferred the pesticide regulatory program to that department from the Department of Food and Agriculture. Existing law also provides that the chief executive officer of the Department of Food and Agriculture shall be known as the Secretary of Food and Agriculture.

This bill would make conforming changes in the statutory provisions that set forth the respective duties of the Department of Pesticide Regulation, the Department of Food and Agriculture, and the secretary. The bill would also require the Department of Pesticide Regulation to determine, by April 30, 1995, those applicants for licenses as processors of farm products or produce dealers who should not be assessed the food safety surcharge due to the limited applicability of specified sections of the Food and Agricultural Code and the Health and Safety Code.

(2) Existing law requires the secretary to establish a Pest Management Research Committee to award competitive grants to conduct pest management research projects. The committee consists of 10 persons.

This bill would increase the membership of the committee to 12 persons, by providing for an additional member who represents the Department of Pesticide Regulation and an additional member who represents the State Department of Health Services.

(3) Existing law requires the secretary to establish a pest control research screening committee.

This bill would repeal that provision.

(4) The bill would also require the Director of Pesticide Regulation to establish a pest management advisory committee with duties as specified.

Ch. 546 (SB 1773) McCorquodale. Foster family agencies.

Under existing law, specified foster care services, including certification and monitoring of certified family homes, are provided by foster family agencies under the regulation of the State Department of Social Services.

Existing law requires that, effective January 1, 1993, all new hires for the position of social work personnel for foster family agencies shall meet a coursework and field practice or experience requirement in addition to possessing a master's degree in speci-

NOTE: Superior numbers appear as a separate section at the end of the digests.

fied areas. An applicant who does not meet the degree requirements may apply for certain exceptions if he or she satisfies the coursework and field practice or experience requirement.

This bill would expand the areas in which an applicant may possess a master's degree, and would make the coursework and field practice or experience requirement applicable to all new hires for the position of social work personnel effective January 1, 1995. It would also permit an applicant who has not met the coursework and field practice or experience requirement, or both the degree and coursework and field practice or experience requirements, to apply for an exception.

Ch. 547 (SB 1811) Hurtt. Sales and use taxes: credit: qualified property.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, including a credit equal to 6% of the amount paid or incurred on or after January 1, 1994, for qualified property that is placed in service in this state. Under those provisions, qualified property includes tangible personal property purchased to be used primarily (1) in any stage of manufacturing, processing, refining, fabricating, or recycling of property, as specified, (2) in research and development, or (3) to maintain, repair, measure, or test that property.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property.

This bill would permit a person who has paid sales tax reimbursement to a retailer or use tax on a purchase or purchases of property, in lieu of claiming the credit for qualified manufacturing property under the Personal Income Tax Law or the Bank and Corporation Tax Law, to file a claim for refund equal to the amount of the credit, as specified. The bill would require that a claim for refund be accompanied by proof of payment of the tax to a retailer. The bill would require the State Board of Equalization to provide an annual listing to the Franchise Tax Board of persons who claim the sales or use tax refund.

This bill would take effect immediately as a tax levy.

Ch. 548 (SB 1815) Wright. Hazardous waste facilities: standardized permits: fees.

(1) Under existing law, the Department of Toxic Substances Control is required to issue hazardous waste facilities permits to use and operate one or more hazardous waste management units at a facility which, in the judgment of the department, meet specified requirements.

Existing law requires the State Board of Equalization to assess a fee for any application for a new hazardous waste facilities permit, a permit for a hazardous waste facility which would manage extremely hazardous waste, a variance, or a permit modification, for deposit into the Hazardous Waste Control Account. Existing law specifies certain fee amounts to be assessed and provides that these amounts are base rates for the 1989–90 fiscal year.

Certain offsite non-RCRA treatment or storage facilities are eligible, under existing law, for operation under a standardized permit. Interim status granted pursuant to the standardized permit provisions terminates upon a final permit determination, or June 1, 1995, whichever date is earlier. An offsite treatment facility which is not subject to the federal Resources Conservation and Recovery Act of 1976 (RCRA) operating pursuant to interim status under the standardized permit provisions is required to pay a specified facility fee to the department.

A violation of the hazardous waste control laws is a crime.

This bill would extend the June 1, 1995, date for interim status termination under the standardized permit provisions, to October 1, 1995. The bill would additionally require offsite non-RCRA storage or treatment or storage facilities subject to the standardized permit provisions to pay the facility fee, thereby imposing a state-mandated local program by creating a new crime. The bill would exempt the operator of a hazardous waste facility operating pursuant to a grant of interim status under the standardized permit provisions from specified facility fees, subject to specified conditions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would instead provide that, for all facilities operating pursuant to a standardized permit, the fee amounts are to be the base rates for the 1993–94 fiscal year. The bill would require the board to pay a refund to an owner or operator of a facility operating pursuant to a standardized permit who paid fees in excess of the amounts specified for the 1993–94 fiscal year.

The bill would make related and technical changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 549 (SB 1826) Bergeson. Crimes: public inebriate reception center: Orange County.

The Substance Abuse Community Correctional Treatment Act provides for the establishment of substance abuse community correctional detention centers to, among other things, reduce the number of substance abusers and offenders who are currently being sent to state prison.

This bill would authorize the County of Orange, in consultation with the Board of Corrections, to establish a regional public inebriate reception center in that county as a one-year pilot project to provide short-term shelter, surveillance, assessment, and referral services, as specified. It would authorize the county to operate the center and to report to the board within a specified period.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 550 (SB 1844) Mello. Contractors: substantial compliance.

Existing law provides that a person who engages in the business or acts in a capacity for which a contractor's license is required may not bring an action for compensation for performance of any act or contract for which the license is required unless he or she was licensed during the time of the performance of the act or contract. However, under current law, a court may find substantial compliance with licensing requirements if the person can show during an evidentiary hearing (1) that he or she was duly licensed during any portion of the 90 days immediately preceding the performance of the act or contract for which compensation is sought, (2) that the person's license was in a category that would have authorized the performance of the act or contract, and (3) that the failure to comply with licensing requirements was the result of either an inadvertent clerical error, or other error or delay not caused by the negligence of the person.

This bill would provide instead that a court may find substantial compliance with licensing requirements if the person who acted in the capacity of a contractor or who engaged in the business (1) was duly licensed in California prior to the performance of the act or contract, (2) acted reasonably and in good faith to maintain his or her proper license, and (3) did not know or reasonably should not have known that he or she was not duly licensed.

Existing law provides that the provisions concerning substantial compliance with licensing requirements shall have no retroactive effect and shall apply only to proceedings commenced after January 1, 1992.

This bill would instead provide that the existing substantial compliance provisions shall apply to all contracts entered into on or after January 1, 1992, and to all actions or arbitrations arising therefrom.

The bill provides that amendments contained in this bill relating to substantial compliance with licensing requirements shall apply to all proceedings commencing on or after January 1, 1995, except a legal action or arbitration commenced prior to January 1, 1995, or, if commenced after January 1, 1995, to a legal action or arbitration that was commenced prior to that date and was subsequently dismissed.

Ch. 551 (SB 1852) Thompson. Home health agency services: emergency regulations.

Existing law provides for the licensure and regulation of home health agencies, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

defined, by the State Department of Health Services.

This bill would express legislative findings regarding the necessity of adopting emergency home health agency licensing regulations. It would require the director of the department to adopt revised home health agency emergency regulations.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 552 (SB 1914) Killea. Postsecondary education: cross-enrollment.

Existing law requires the Board of Governors of the California Community Colleges, the Regents of the University of California, and the Trustees of the California State University to develop, maintain, and disseminate a common core curriculum in general education courses for the purposes of transfer. Under existing law, any person who has successfully completed the transfer core curriculum shall be deemed to have completed all lower division general education requirements for the University of California and the California State University.

This bill would permit any student who meets specified criteria and who is enrolled in any campus of the California Community Colleges, the California State University, or the University of California to enroll without formal admission or payment of additional fees, except an administration fee of not more than $10, in a maximum of one course per academic term at a campus of either of the other systems on a space available basis at the discretion of the appropriate campus authorities on both campuses, as specified. These provisions would become operative commencing with the fall 1995 term and would be repealed on January 1, 2000.

The bill would require the California Community Colleges, the California State University, and the University of California to evaluate the impact of the program established by this bill and to report to the California Postsecondary Education Commission on or before June 30, 1998, on specified matters to determine whether the program should be established permanently. The bill would require the California Postsecondary Education Commission to prepare a report based on the information from the segments and present the report, with recommendations, to the Governor and the Legislature on or before December 1, 1998.

Under existing law, these provisions would not apply to the University of California except to the extent that the Regents of the University of California, by appropriate resolution, make them applicable.

Ch. 553 (SB 1922) Lewis. Energy resources: grants and loans.

(1) Under existing law, there are, in the General Fund, specified accounts, including the Geothermal Resources Development Account, the State Energy Conservation Assistance Account, the Local Jurisdiction Energy Assistance Account, and the Energy Technologies Research, Development, and Demonstration Account, available for expenditure by the State Energy Resources Conservation and Development Commission to provide financial assistance, including loans and grants, to specified entities for purposes generally relating to energy research, conservation, and development. These provisions provide various specified methods of calculating the interest on those loans and grants.

This bill would require the commission to periodically set interest rates based on surveys of existing financial markets and at rates not lower than the Pooled Money Investment Account, unless it makes a specified determination.

(2) Under existing law, geothermal resources revenues deposited in the Geothermal Resources Development Account are available for expenditure by the commission for grants or loans to local jurisdictions or private entities for specified purposes relating to the research and development of geothermal energy.

This bill would authorize the commission to require an award repayment or program reimbursement agreement of each recipient of an award.

(3) Existing law, the Energy Conservation Assistance Act of 1979, creates the State Energy Conservation Assistance Account in the General Fund to provide grants and loans to eligible institutions, as defined, for specified purposes relating to energy conservation assistance. The act authorizes the commission to contract for specified services to be performed for eligible institutions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, in addition, authorize the commission to charge a fee for those services, provided that the funds used for the payment for the services has been made available to the eligible institution as a result of the realization of savings in energy costs. The bill would provide that, if anticipated savings do not result from the project, the repayment of fees shall be forgiven.

(4) Under existing law, the Local Jurisdiction Energy Assistance Account provides local jurisdictions, as defined, with financial assistance for training and management related to energy resources and loans for energy project assistance. The provisions of the local jurisdiction energy assistance program are to be repealed on January 1, 1997.

This bill would authorize the commission to charge a fee for services provided local jurisdictions pursuant to those provisions, provided that the funds used for the payment for the services has been made available as a result of the realization of savings in energy costs. The bill would provide that, if anticipated savings do not result from the project, the repayment of fees shall be forgiven.

The bill would require the commission to report to the Legislature, as specified, on the effect of those fees on alternative public and private financing for public sector programs.

The bill would extend the operation of the program until January 1, 2002, with all unexpended funds in the account on that date reverting to the General Fund.

(5) Existing law requires the commission to establish a small business energy assistance low-interest revolving loan program to fund the purchase of equipment for alternative technology energy projects for small businesses.

This bill would authorize the program to use program reimbursement agreements to replenish program funds beyond the amount of loan repayment and to deposit loan repayments, interest, and royalties derived from the program into the Energy Technologies Research, Development, and Demonstration Account.

(6) Existing law, the Energy Research, Development, Demonstration, and Commercialization Act of 1993, requires the commission to make loans, research contracts, and grant awards, as defined, for the purposes of funding energy technology programs. Existing law defines specified terms for purposes of that act.

This bill would require any loan, research contract, or grant award to include an award repayment or program reimbursement agreement and would make specified changes to the definition of certain terms.

(7) Under existing law, the Rosenthal-Naylor Act of 1984, the Energy Technologies Research, Development, and Demonstration Account is administered by the commission for the purpose of making loans, repayable research contracts, and primary research contracts, as defined, for the financing of energy research, demonstration, or development projects. The act requires the Controller to deposit in the account all money appropriated to the account by the Legislature, plus interest, and money from loan repayments and loan interest repayments. The act requires the repayment of a loan within 90 months.

This bill would require repayable research contracts and primary research contracts to include an award repayment or program reimbursement agreement. The bill would require that money from research contract and grant repayments and royalties interest payments be deposited in the account. The bill would extend the loan repayment period to 20 years.

(8) Existing law requires the commission to establish criteria for, and to adopt, by January 1, 1994, in consultation with specified agencies and organizations, a statewide home energy rating program for residential dwellings. The commission is required, by January 1, 1995, to publish an informational booklet concerning the program.

This bill would extend the date by which the commission is required to establish criteria for adopting the program to July 1, 1995, would delete the January 1, 1994 deadline for adopting the program, and would extend other specified dates relating to the program, including extending the required date of publication of the informational booklet from January 1, 1995, to on or before July 1, 1996.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 554 (SB 2115) Committee on Natural Resources and Wildlife. Sportfishing.

(1) Under existing law, any person over the age of 16 years who takes any fish, reptile, or amphibia for any purpose other than profit is required to obtain from the Department of Fish and Game or an authorized agent of the department, and possess while fishing, a license, as specified, and any applicable license stamps. Existing law also, generally, delegates to the Fish and Game Commission the authority to adopt regulations relating to fish, amphibia, and reptiles, with specified exceptions. Pursuant to that authority, the commission has adopted regulations that provide for the taking of fish for purposes other than profit by angling with rod and reel or hook and line.

This bill would authorize a person to obtain a second-rod sportfishing stamp for a fee of $7.50 during the 1995 calendar year, that is adjusted, as specified, in subsequent years. The second-rod stamp would authorize that person to fish in inland lakes and reservoirs with 2 rods in any sport fishery in which the regulations of the commission provide for the taking of fish by angling. Because fishing with 2 rods without the stamp would be a crime under other provisions of existing law, the bill would impose a state-mandated local program. The bill would require the department to submit a report to the commission and the appropriate policy committees of the Legislature on or before January 1, 1997, that evaluates the second-rod stamp program and makes specified recommendations.

(2) Existing law requires certain state agency contracts to be entered into with the lowest responsible bidder and that at least 3 bids or proposals be received for that purpose, with specified exceptions. Existing law also prohibits limiting bidding to one bidder.

This bill would, until January 1, 1995, authorize the department to enter into contracts for the purpose of producing and publishing second-rod sportfishing license stamps and related informational material without complying with that existing law.

(3) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department and the commission to carry out the Fish and Game Code.

Because this bill would provide new revenue to the fund from the second-rod sportfishing stamp fees and would impose new duties on the department and the commission, it would make an appropriation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 555 (SB 1260) Presley. Prisoners.

(1) Existing law prohibits a state prisoner from being deprived of rights other than those necessary to provide for the reasonable security of the institution and for the reasonable protection of the public.

This bill, instead, would provide that a state prisoner may, during the period of confinement, be deprived of such rights, and only such rights, as is reasonably related to legitimate penological interests.

(2) Existing law specifies certain civil rights of a state prisoner, including, among others, the right to purchase, receive, read, and permit other inmates to read any and all legal materials and to initiate civil actions, subject to specified limitations.

This bill would revise these rights. The bill, among other things, would make the enumerated civil rights of state prisoners subject only to (1) above, would give a state prisoner the right to purchase, receive, and read any and all newspapers, periodicals, and books accepted for distribution by the United States Post Office, except as specified, and would make a state prisoner's right to initiate civil actions subject to a $3 filing fee and other specified civil procedures.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 556 (SB 1330) Calderon. Felons: profits of crime.

Existing law requires that proceeds in connection with the sale of materials based on the story of a felony for which a felon was convicted, as defined, be subject to a 5-year, involuntary trust from which victims of the crime may recover, as specified.

This bill would expand these provisions to apply as well to the income from anything sold or transferred, including any right, the value of which is enhanced by the notoriety gained from the commission of the crime. The bill would also make an appropriation by providing that any unclaimed funds remaining in trust at the end of the 5-year period shall be transferred to the Controller for allocation to the Restitution Fund, a continuously appropriated fund, for the payment of victim claims. The bill would make other related changes and provide that these provisions shall be severable.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 557 (AB 2782) Boland. Prisoners.

Existing law recognizes a person's common law right to change his or her name.

This bill would provide that no person imprisoned in the state prison and under the jurisdiction of the Director of Corrections shall be allowed to file an application for change of names, except at the discretion of the director.

Ch. 558 (SB 1411) Mello. Vehicles: special interest license plates.

(1) Existing law requires the Department of Motor Vehicles to issue special interest license plates containing a distinctive design or decal of a participating organization, to any person, to be displayed in lieu of regular license plates. Existing law also requires each organization that applies to the department for participation in the program to collect and hold applications for the plates until it has received at least 5,000 applications, and to submit the applications along with the necessary fees, to the department within one calendar year following an enactment of the specific enabling legislation. Existing law requires an organization to return to all applicants any fees or deposits that have been collected if 5,000 applications have not been received within one calendar year. As an alternative to returning the applicant's application and fees or deposits following the one-calendar year period, an organization may contact the department to indicate its intent to undertake collection of additional applications and fees or deposits for an additional period, not to exceed 12 months, in order to obtain the minimum 5,000 applications.

This bill would specifically prohibit the department from issuing any special interest license plate until the organization has received and submitted to the department not less than the 5,000 applications for that particular plate within the existing time limitations. The bill would further provide that it does not constitute compliance with the 5,000-application requirement for an organization to submit advanced payment to the department representing the department's estimated or actual administrative costs associated with the issuance of that special interest license plate.

The bill would prohibit an eligible, participating organization from expending more than 25% of the funds generated by revenues from the sale of these plates on certain marketing and promotional activities. The bill would, however, provide that this prohibition does not apply to any expenses incurred prior to January 1, 1995. Because a violation of these provisions would be a crime, this bill would create a state-mandated local program by creating a new crime.

This bill would authorize the department to issue special interest license plates that bear a design depicting features or qualities of the Monterey Bay National Marine Sanctuary. The bill would prescribe the fees to be paid for the issuance, renewal, retention, transfer, and substitution of the plates. The bill would create the Monterey Bay National Marine Sanctuary Account in the California Environmental License Plate Fund for expenditure, upon appropriation, for specified purposes. The bill would require that ½ of those fees be deposited in the account, and ½ in the fund.

This bill would authorize the department to issue special environmental interest license plates that bear a design depicting a California coastal motif and would authorize the plates to be issued in a combination of numbers or letters, or both, as requested by the applicant for the plates. The bill would prescribe the fees to be paid for the issuance,

NOTE: Superior numbers appear as a separate section at the end of the digests.

renewal, transfer, and substitution of the plates. The bill would create the California Beach and Coastal Enhancement Account in the California Environmental License Plate Fund for expenditure, upon appropriation, for specified purposes. The bill would require that any additional fees for the issuance of environmental license plates would be deposited in that fund, and that of the other additional fees, ½ be deposited in that account, and ½ in that fund.

For environmental license plates, additional fees would be imposed by the bill under both of the above special license plate programs which would be deposited in the California Environmental License Plate Fund.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 559 (AB 2802) T. Friedman. Forestry: fire protection: waterscooping aircraft.

Under existing law, the Department of Forestry and Fire Protection provides fire prevention and suppression for timber, brush, grass, or range lands classified as state responsibility areas by the State Board of Forestry.

This bill would require the department, if federal funds are obtained for the purpose, to lease or otherwise secure, on a trial basis, 2 fixed-wing turboprop aircraft that have specified waterscooping capabilities, and to utilize those aircraft, depending on their availability, during all or part of the 1995 and 1996 fire seasons. The bill would require the department, before leasing or otherwise securing the aircraft, to appoint a technical advisory committee, as prescribed, to assist the department in evaluating the aircraft, as specified. The bill would require the department to base the aircraft, as specified, and to make the aircraft available for use in, but not limited to, the Counties of Alameda, Contra Costa, El Dorado, Los Angeles, Orange, San Diego, Santa Barbara, and Ventura. The bill would prescribe the use of the aircraft. The bill would require the department, with assistance of the technical advisory committee, to evaluate, not later than March 1, 1997, the effectiveness of integrating the aircraft into the state's firefighting system, as specified, and to submit the results of that evaluation to the Governor and specified legislative committee chairs. The bill would make related findings and declarations.

Ch. 560 (SB 826) Leonard. Parole.

Under existing law, if a prisoner is denied parole, the Board of Prison Terms is required to hear the prisoner's case no later than 2 years after the hearing denying parole. If the prisoner has been convicted of more than one offense that involves the taking of a life, the parole hearing must be held no later than 3 years after the hearing denying parole and not later than 5 years if the prisoner has been convicted of more than 2 murders, as specified.

This bill would instead require that the hearing be held no later than up to 5 years after the hearing denying parole if the prisoner has been convicted of murder.

Ch. 561 (AB 2520) Napolitano. Immigration consultants: crime: felony.

Under existing law, it is unlawful for any person, for compensation, other than persons authorized to practice law or authorized by federal law, to represent persons before the Board of Immigration Appeals or the United States Immigration and Naturalization Service, to engage in the business or act in the capacity of an immigration consultant, as defined, except as specified. A violation of these provisions is punishable as a misdemeanor for the first offense and as a felony for 2nd and subsequent offenses.

This bill would also require an immigration consultant to conspicuously display in his or her office a notice of specified size in English and in the native language of the consultant's clientele, that contains information concerning the consultant, and a statement that the consultant is not an attorney. It would require certain written disclosures.

This bill would prohibit an immigration consultant with the intent to mislead from literally translating words, as specified, in a document, including an advertisement,

NOTE: Superior numbers appear as a separate section at the end of the digests.

stationery, letterhead, business card, or other comparable written material describing the immigration consultant.

The bill would require the immigration consultant to notify the Secretary of State of certain changes. This requirement would become operative only if AB 3137 is enacted, and would be repealed on January 1, 1998.

This bill would revise the fines and monetary damages that could be imposed and awarded in connection with violations of these provisions.

Ch. 562 (AB 3137) Escutia. Immigration consultants.

Existing law provides for the regulation of immigration consultants, as defined.

This bill would require an immigration consultant to file a bond in the amount of $10,000, or, in lieu of a bond, a deposit in the same amount with the Secretary of State, as specified. The bill would require the Secretary of State to charge a filing fee to cover the cost of filing the bond or deposit, as specified, and to enforce the provisions that govern the filing and maintenance of bonds and deposits. The bond or deposit may be retained for a specified period of time. The bill would provide that the bond requirement does not apply to employees of nonprofit, tax-exempt corporations that provide services free of charge or under specified fee arrangements. The bond and deposit provisions would be repealed as of January 1, 1998, unless extended by subsequent legislation.

The bill would also provide that a person who is awarded damages against an immigration consultant can recover those damages from the bond or deposit, which must then be reinstated before the immigration consultant can conduct any further business. These provisions would be repealed as of January 1, 1998, unless extended by subsequent legislation.

The bill would also require an immigration consultant to deliver to a client a copy of each document or form completed on behalf of the client and to retain copies of all documents and forms of a client for at least 3 years from the date of the last service to the client.

Since a violation of these requirements would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Ch. 563 (AB 2979) Napolitano. Courts: undocumented felons.

(1) Existing law generally provides for the organization and government of the courts of this state.

This bill would require every court of this state to cooperate with the United States Immigration and Naturalization Service (INS) to identify and place a deportation hold on any defendant convicted of a felony who is determined to be an undocumented alien subject to deportation.

By requiring the courts to cooperate with INS in identifying and placing deportation holds on undocumented convicted felons, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 564 (AB 1025) Peace. Public works and purchase contracts.

Existing law defines the requirements of a qualified bidder for public works and purchase contracts and provides that no public works contractor may engage in discriminatory employment practices, deviate from specified rates of wages in the call for a bid and falsely certify facts necessarily predicate to bidding preferences. Existing law also imposes penalties upon contractors who evade these requirements that include criminal and civil sanctions as well as forfeiture of amounts paid pursuant to the contract involved and suspension of bidding privileges.

This bill would make a bidder or contractor ineligible to bid for or receive a public works or purchase contract who has, in the preceding 5 years, been convicted of violating a state or federal law respecting the employment of undocumented aliens, and would prohibit a state agency or department from awarding a public works or purchase contract to such a bidder or contractor.

Ch. 565 (SB 1878) Torres. Undocumented aliens: convicted felons: deportation.

(1) Existing law provides that on or before July 1, 1993, the Department of Corrections shall implement and maintain procedures to identify inmates serving terms in state prison who are undocumented aliens subject to deportation. Existing law also provides, as specified, that the department shall refer to the United States Immigration and Naturalization Service (INS) the name and location of any inmate who may be an undocumented alien and who may be subject to deportation for a determination of whether the inmate is undocumented and subject to deportation.

This bill would delete the requirement that the department refer to the INS the name and location of any inmate who may be an undocumented alien and who may be subject to deportation for a determination of whether the inmate is undocumented and subject to deportation, and would, instead, require that the identification procedure be completed, as to each inmate, within 90 days of the department having taken custody of the inmate.

Existing law provides that after all direct appeal rights have been exhausted or waived or the appeal period has lapsed, names and identifying information regarding all persons 18 years of age or older, regardless of race, national origin, or ancestry, who are convicted of a felony for a specified controlled substance offense, or a violent felony, as defined, may be referred by the court to the INS to determine whether the person is undocumented and subject to deportation.

The bill would delete that provision.

Existing law requires the department to report annually to the Legislature the number of persons referred to the INS.

This bill, instead, would require the department to report annually to the Legislature the number of persons identified as undocumented aliens.

Existing law requires the Department of Justice Bureau of Criminal Statistics to prepare an annual report on referrals made by the court to the INS, as specified.

This bill would delete that provision.

(2) Existing law allows the Director of Corrections to enter into contracts, as specified, with appropriate officials or agencies of the United States for the confinement, care, education, treatment, and employment of such persons convicted of criminal offenses in the courts of this state and committed to state prisons as he or she believes can benefit by such confinement, care, education, treatment, and employment.

This bill would provide that these provisions shall not apply to an inmate who is transferred by the Department of Corrections to the INS pursuant to the provisions in (1) above.

(3) This bill, in addition, would include legislative findings and declarations, would contain expressions of legislative intent, and would require the Board of Prison Terms to (a) devise a method of notifying each undocumented felon in a prison or reception center operated by the Department of Corrections that he or she may be eligible to serve his or her term of imprisonment in his or her country of origin, (b) actively encourage each eligible undocumented alien felon to apply for return to his or her country of origin, (c) provide quarterly reports outlining its efforts to the chairpersons of specified legislative committees, and (d) adopt the model program developed by the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

State of Texas for encouraging participation in the federal repatriation program where appropriate.

(4) This bill would appropriate $5,000 from the General Fund to the Board of Prison Terms for the purpose of implementing this legislation.

(5) This bill would memorialize the United States Congress to meet its obligations under the Immigration Reform and Control Act of 1986 and to reimburse California for the costs it has incurred in incarcerating undocumented immigrants convicted of felonies.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 566 (AB 1874) Polanco. Corrections: undocumented aliens.

(1) Under existing law, the Director of Corrections is authorized to enter into contracts, subject to the approval of the Director of General Services, with appropriate officials or agencies of the United States for the confinement, care, education, treatment, and employment of inmates.

This bill would make that provision inapplicable to contracts involving inmates or wards transferred by the Department of Corrections or the Department of the Youth Authority to the custody of the Attorney General of the United States.

(2) Existing law requires the Department of Corrections, on or before July 1, 1993, to implement and maintain procedures, as specified, for the identification and referral to the United States Immigration and Naturalization Service (INS) of any inmate serving a term in state prison who may be an undocumented alien and subject to deportation.

This bill would specify that its provisions apply to both the Department of Corrections and the Department of the Youth Authority and that the above procedures provide for the identification of inmates or wards within 90 days of the departments assuming custody of the inmates or wards.

The bill would require the departments, within 48 hours of establishing identifying information, to transfer undocumented felons to the custody of the Attorney General of the United States and would require that evaluation and classification procedures cease once identity as undocumented felons has been established.

(3) Under existing law, a court may, after all direct appeal rights have been exhausted or waived, or the appeal period has lapsed, refer specified information regarding those persons who have been convicted of a felony controlled substance offense or violent felony, as specified, to the INS for a determination as to whether the person is undocumented and subject to deportation.

This bill would delete that provision.

(4) Existing law requires the Department of Corrections to report annually specified information to the Legislature regarding the people referred to the INS pursuant to these provisions.

This bill would, instead, require a quarterly report.

(5) The bill would provide that specified provisions of the bill shall become operative only upon the enactment of specified federal legislation.

Ch. 567 (SB 1314) Johannessen. Corrections: undocumented felons.

(1) Under existing law, the Director of Corrections is authorized to enter into contracts, subject to the approval of the Director of General Services, with appropriate officials or agencies of the United States for the confinement, care, education, treatment, and employment of inmates.

This bill would make that provision inapplicable to contracts involving inmates or wards transferred by the Department of Corrections or the Department of the Youth Authority to the custody of the Attorney General of the United States.

(2) Existing law requires the Department of Corrections, on or before July 1, 1993, to implement and maintain procedures, as specified, for the identification and referral to the United States Immigration and Naturalization Service (INS) of any inmate serving a term in state prison who may be an undocumented alien and subject to deportation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that, commencing on the effective date of its enactment, its provisions apply to both the Department of Corrections and the Department of the Youth Authority and that the above procedures provide for the identification of inmates or wards within 90 days of the departments assuming custody of the inmates or wards.

The bill would require the departments, within 48 hours of establishing identifying information, to transfer undocumented felons to the custody of the Attorney General of the United States and would require that evaluation and classification procedures cease once identity as undocumented felons has been established.

(3) Under existing law, a court may, after all direct appeal rights have been exhausted or waived, or the appeal period has lapsed, refer specified information regarding those persons who have been convicted of a felony controlled substance offense or violent felony, as specified, to the INS for a determination as to whether the person is undocumented and subject to deportation.

This bill would delete that provision.

(4) Existing law requires the Department of Corrections to report annually specified information to the Legislature regarding the people referred to the INS pursuant to these provisions.

This bill would, instead, require a quarterly report.

(5) The bill would provide that specified provisions of the bill shall become operative only upon the enactment of specified federal legislation.

(6) This bill also would provide that it shall become operative only if AB 1874 is enacted.

Ch. 568 (AB 308) Andal. Liability: parents.

(1) Existing law provides that the parent or guardian of a minor shall be liable for any act of willful misconduct on the part of that minor which results in injury or death to another person, or which results in injury to the property of another, as specified. Existing law provides that the parent or guardian shall be jointly and severally liable for up to $10,000 for each tort of the minor.

This bill would increase the maximum liability of the parent or guardian to $25,000. In addition, the bill would provide that this amount shall be adjusted every 2 years by the Judicial Council to reflect increases in the cost of living, as specified.

(2) Under existing law, an insurer is not liable for a loss caused by the willful act of the insured.

This bill would provide that the provisions described in (1) above shall not impose liability on an insurer for a loss caused by the willful act of the insured. The bill would provide that an insurer shall not be liable for conduct imputed to a parent or guardian by the provisions described in (1) above for any amount in excess of $10,000.

Ch. 569 (AB 1066) Conroy. Special interest license plates.

(1) Existing law authorizes private organizations to participate in special interest license plate programs in which the Department of Motor Vehicles issues license plates with a participating organization's distinctive design or decal. Participation in a special interest license plate program is subject to specified conditions, including meeting a 5,000 application threshold within one year of the enactment of the legislation specifically authorizing the organization to begin receiving applications for the special interest license plates. Existing law authorizes any veterans' organization to apply, either individually or with other veterans' organizations, to meet the specified application threshold.

The bill would authorize the veterans' organization special interest license plates to be issued in a combination of numbers or letters, or both, requested by the owner or lessee of the vehicle, to be displayed in addition to the authorized design or decal and could impose a fee of $40 for that personalization of the plates. The bill would require ½ of the revenue derived from that fee to be deposited in the Veterans Service Office Fund and ½ in the California Environmental License Plate Fund.

(2) Existing law requires the California Arts Council to participate in a special inter-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

est license plate program and specifies the various fees concerning the issuance and renewal of registration of those plates.

This bill would include a $15 fee for the transfer of those plates to another vehicle.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 570 (AB 1392) Speier. Consumer affairs boards.

Existing law provides that any contract for goods or services offered by a funeral director, a cemetery authority, or crematory shall prominently disclose specific information.

This bill would provide that the information must appear on the first page of the contract.

Existing law provides generally for the disposition of cremated remains and specifically requires crematory licensees to pay regulatory charges for each crematory, plus an additional charge of up to 50¢ per cremation, and requires cemetery authorities to pay regulatory charges for each cemetery, plus an additional charge of up to $1 per cremation, as provided.

This bill would require crematory licensees to pay instead an additional charge of up to $1 per cremation and would make other clarifying changes to these provisions.

Existing law provides that a funeral director or cemetery director shall have complete authority to control disposition of human remains and to proceed to recover usual and customary charges if certain circumstances exist. One necessary circumstance is the public administrator's failure to assume responsibility for disposition of the remains within 24 hours after having been given written notice.

This bill would extend the time limit from 24 hours to 7 days from receipt of notice.

Existing law provides that a crematory regulated by the Cemetery Board shall knowingly cremate only human remains in cremation chambers, along with cremation containers and items used for disease control.

This bill would provide that the cremation chambers may also be used to cremate personal effects of the deceased.

Existing law requires that, within a specified time period after a licensed crematory takes custody of a body, the crematory must store the body at a certain temperature, except as provided.

This bill would make this requirement applicable only in cases in which a licensed crematory takes custody of a body that has not been embalmed.

Ch. 571 (AB 2112) Solis. Education: California School Paraprofessional Teacher Training Program.

Existing law establishes the California School Paraprofessional Teacher Training Program for the purpose of recruiting persons employed as paraprofessionals by a school district or county office of education to enroll in and complete a teacher training program that leads to a teaching credential. Existing law requires the Commission on Teacher Credentialing, in consultation with specified entities and representatives, to develop criteria and guidelines, as specified, for the selection of school districts and county offices of education, as prescribed, to participate in the program. Existing law requires school districts and county offices of education to provide support and information to paraprofessionals who participate in the program and requires that these paraprofessionals complete one year of classroom instruction in the district or county office of education for each year they received assistance while enrolled in a teacher training program, as specified.

This bill would declare the intent of the Legislature that funding for the program be allocated to the commission for grants to school districts, as specified.

This bill would find and declare that, although 7 school districts were selected to participate in the program in 1992, no funds were appropriated for the program for the 1992–93 and 1993–94 fiscal years. The bill would require the commission to allocate funds appropriated for the program in the Budget Act of 1994 to those 7 school districts provided that the commission determines the qualifying conditions and circumstances of those districts are substantially the same or better than they were in 1992. To the extent funds remain after those allocations have been made, the commission would be

NOTE: Superior numbers appear as a separate section at the end of the digests.

required to select additional school districts to participate in the program on or before July 1, 1995, pursuant to the criteria set forth in the program.

Ch. 572 (AB 2339) O'Connell. Highways: signs: services available.

Under existing law, the Department of Transportation is generally responsible for construction, improvement, and maintenance of state highways and freeways. The department has adopted regulations prescribing criteria for determining the need for signs on highways and freeways indicating the availability of certain services.

The bill would require the department to administer a program prescribed by the bill for the placement of generic tourist oriented directional signs along highways in rural areas, except as specified, to guide motorists to facilities and attractions that are eligible for signs under criteria prescribed by the bill.

The bill would require the department to establish and charge a fee to place and maintain generic tourist oriented directional signs. Funds from those fees, upon appropriation, would be required to be used to fund all operations and related administrative functions of the department with regard to the program.

This bill would remain in effect only until January 1, 1999, and as of that date would be repealed, unless a later enacted statute, enacted before January 1,1999, deletes or extends that date.

Ch. 573 (AB 2372) Costa. Seniors: grant evaluations.

Existing law requires the implementation of various programs for seniors.

This bill would require the Department of Aging, when evaluating proposals for grants under the Institutionalization Prevention Services Program and the Multipurpose Senior Services Program, to give preference to proposals that would serve clients in underserved areas or areas without existing programs.

Ch. 574 (AB 2559) Vasconcellos. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $1,807,086.04 from specified funds to the Secretary of the State Board of Control to pay claims accepted by the State Board of Control.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 575 (AB 2595) Connolly. Juveniles: graffiti: community service.

Existing law specifies various offenses relating to graffiti and the punishments therefor, which include community service, or community service as a condition of probation, and requires the parent or legal guardian to pay a fine levied for certain offenses, as specified, if the minor is unable to pay.

This bill would require any person convicted of possession of a destructive implement with intent to commit graffiti or willfully affixing graffiti under specified provisions, where the offense was committed when he or she was under the age of 18 years, to perform not less than 24 hours of community service, as specified. The bill would provide that one parent or guardian shall be present at the community service site, as specified, except in certain instances, and would expand the liability of the parent or legal guardian to pay a fine which the minor is unable to pay. By changing the penalty for a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 576 (AB 2722) Cannella. Public retirement systems: supplemental member contributions program.

The Public Employees' Retirement Law closed the additional member contributions program to new participants from July 1, 1983, to January 1, 1994.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would authorize members of the Legislators' Retirement System and the Public Employees' Retirement System to participate in newly created supplemental contributions programs.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 577 (AB 2935) Hoge. Unclaimed tickets: distribution of funds.

(1) Existing law provides that any person claiming to be entitled to any part of a redistribution from a parimutuel pool operated by a racing association, who fails to claim the money due the person prior to the completion of the horseracing meeting, may, within 120 days after the close of that meeting, file a claim with the association issuing the person's ticket.

This bill would instead require the claim to be filed prior to May 15 of the year following the close of the horseracing meeting.

(2) Existing law requires the payment, 126 days after the close of any horseracing meeting, as specified, of any redistributable money in a parimutuel pool not successfully claimed.

This bill would instead require estimated payments to be made quarterly, as specified, and on May 30 of the year following the close of any horseracing meeting, the association would be required to pay all of the redistributable funds owed by it, less any estimated payments.

(3) This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 578 (AB 2943) Hauser. Optometry: continuing education: cardiopulmonary resuscitation.

Existing law prohibits the practice of optometry without a certificate of registration issued by the State Board of Optometry.

Under existing law, the board is required to adopt regulations requiring that licensees submit proof of continuing education as a condition of renewal of licensure.

This bill would authorize the board to adopt regulations to require licensees to maintain current certification in cardiopulmonary resuscitation.

Ch. 579 (AB 2989) Conroy. Health facilities: license and renewal fees: actual costs.

Existing law sets forth the licensing and renewal fee to be charged certain health facilities, as defined.

This bill would require the State Department of Health Services , in consultation with provider representatives, to develop a specific proposal by July 1, 1995, to revise fee methodologies, to ensure the validity and reliability of data systems to calculate fees, address the subsidy of licensing and certification activities, and develop a licensing and certification special fund.

Ch. 580 (AB 3198) Hauser. Zoning: residential: 2nd units.

Existing law authorizes any local agency to provide, by ordinance, for the creation of 2nd units in single-family and multifamily residential zones, as specified.

This bill, without making substantive changes, would recast and revise the provisions of existing law authorizing the creation of these 2nd units. The bill would make legislative findings and declarations with respect to the value of 2nd units to California's housing supply, and would state legislative intent in that regard.

The bill would also make substantive changes in the provisions relating to 2nd units, as defined, by authorizing local agencies to provide, within specified limits, for minimum and maximum unit size, and parking requirements. The bill would provide that fees for the construction of 2nd units shall be determined in accordance with specified provisions of existing law. Because the bill would impose new requirements on local agencies relating to 2nd units, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims

NOTE: Superior numbers appear as a separate section at the end of the digests.

Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 581 (AB 3202) V. Brown. School finance: lottery funds.

Existing law established the California State Lottery Act of 1984 (Lottery Act) for the purpose of providing additional moneys to benefit education. Pursuant to that act payments are made to various educational entities, including school districts, county superintendents of schools, and the State Department of Developmental Services which must use those payments for clients with developmental or mental disabilities who are enrolled in state hospital education programs, as specified.

Existing law also provides that for the purpose of calculating the minimum funding obligation of the state pursuant to Section 8 of Article XVI of the California Constitution, "school districts" includes, among other things, direct elementary and secondary level instructional services provided by the state. Existing law makes legislative findings and declarations that the only state agencies that provide those services are those enumerated in the Lottery Act, as specified, and California Indian education centers, as specified.

This bill would amend the Lottery Act to also make the State Department of Mental Health eligible for Lottery Act payments for clients with developmental or mental disabilities who are enrolled in state hospital education programs. This bill, by amending the Lottery Act to include the State Department of Mental Health as eligible for those payments, would thereby expressly include that department within the state agencies that provide direct elementary and secondary level instructional services for the purposes of Section 8 of Article XVI of the California Constitution.

This bill, in addition, by requiring the Controller to make quarterly distributions to the State Department of Mental Health for clients with developmental or mental disabilities who are enrolled in state hospital education programs as specified, would establish a new purpose for a continuously appropriated fund and therefore, constitute an appropriation.

The Lottery Act, an initiative measure, specifies that none of its provisions may be changed except to further its purpose by a bill passed by a ⅔ vote of each house of the Legislature and signed by the Governor.

This bill would declare that it furthers the purposes of that act.

The bill would declare that these provisions are effective for the entire 1994–95 fiscal year and each fiscal year thereafter.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 582 (AB 3244) Epple. Health coverage: open medical review hearings.

Existing law requires health care service plans, nonprofit hospital service plans, and disability insurers that cover hospital, medical, or surgical expenses to offer coverage for specified procedures and services.

This bill would require health care service plans, nonprofit hospital service plans, and certain disability insurers that deny coverage for an experimental medical procedure or plan of treatment for an enrollee or claimant with a terminal illness, as defined, to notify the enrollee or claimant of specified information and rights. It would require a health care service plan or certain disability insurers covered by the bill to hold a conference on the matter if requested by the enrollee. Since a willful violation of these notice and hearing requirements by a health care service plan would be a crime under existing provisions of law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified

NOTE: Superior numbers appear as a separate section at the end of the digests.

reason.

Ch. 583 (AB 3270) T. Friedman. Disaster relief.

(1) Under the Natural Disaster Assistance Act, the Director of Emergency Services is required to allocate funds to meet the cost of specified projects, as defined, and may be used to cover local agency personnel regular hourly wage and overtime costs.

This bill would instead specify that these funds may be used to cover local agency personnel costs eligible for funding or reimbursement under specified federal disaster assistance provisions.

(2) Under the act, for any eligible project, the state share is limited to no more than 75% of total state eligible costs, except for certain occurrences for which the state share may be 100% of total state eligible costs.

This bill would add the fires that occurred in southern California from October 1, 1993, to November 30, 1993, inclusive, to those occurrences for which the state share may be 100% of total state eligible costs.

(3) This bill would incorporate additional changes in Section 8686 of the Government Code, proposed by AB 3065 and SB 273, to become operative only if AB 3065 or SB 273, or both, and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 584 (AB 3312) Takasugi. Vehicle occupational licensing: injunctive relief.

Existing law makes it unlawful for persons to engage in certain acts which require a license or permit with respect to business practices under the Vehicle Code without having procured that license or permit issued by the Department of Motor Vehicles.

This bill would authorize the department to apply to the appropriate court for an appropriate order if, in the judgment of the department, any person has engaged, or is about to engage, in any acts or practices that constitute, or will constitute, an offense against the statutes governing licensure and permit requirements by engaging in any act subject to license requirements under the Vehicle Code without obtaining a license.

Ch. 585 (AB 3336) Speier. Adoption.

Existing law sets forth the procedure for the placement of a child for independent adoption, as specified. Existing law, operative on January 1, 1995, sets forth the duties of adoption service providers with regard to independent adoptions, including the duty to advise each birth parent of his or her rights at least 10 days before signing an adoption placement agreement.

This bill would provide that if at least 3 adoption service providers are not reasonably available, as specified, independent legal counsel for the birth parent may serve as an adoption service provider for a fee not exceeding $500. This bill would authorize the signing of an adoption placement agreement prior to the expiration of the 10-day period.

Under existing law, operative on January 1, 1995, after the consent to an independent adoption is signed by a birth parent, he or she has 120 days to (1) revoke consent, (2) sign a waiver of the right to revoke consent in the presence of the State Department of Social Services or the adoption agency or a notary if outside the state, as specified, provided the department or agency has interviewed the birth parent, or (3) allow the consent to become permanent, as specified.

This bill would change this time period from 120 days to 90 days and make a conforming change. The bill would, among other things, delete provisions regarding the use of a notary outside the state described above and instead provide that the interview, and the witnessing of the signing of the waiver of the right to revoke consent, of a birth parent who is residing or located outside of California may be conducted by specified persons. The bill would permit the birth parent to sign a waiver of the right to revoke consent without an interview by the department or delegated county adoption agency if the birth parent signs the waiver in the presence of a judicial officer. The bill would authorize the court to conduct interviews of birth parents.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 586 (AB 3414) O'Connell. Financial institutions.

Existing law prohibits a credit union from paying any commission or compensation for securing members, as specified.

This bill would, pursuant to regulations adopted by the Commissioner of Corporations, authorize a credit union to offer an incentive or inducement to individuals who wish to become members of the credit union, or to its employees or members who assist in adding new members to the credit union.

Existing law provides that an industrial loan company may not make loans, acquire or discount obligations secured primarily by real property unless the loan or other obligation is repayable in substantially equal periodic installments, as specified, and the term of the loan does not exceed 30 years and 30 days. For obligations secured by 1 to 4 residential units, the term of the loan must not be greater than 40 years and 30 days. No more than 5% of the assets of an industrial loan company may be held in loans or obligations with terms exceeding 30 years and 30 days.

This bill would exclude from those equal installment requirements those loans and obligations made or purchased by the industrial loan company in accordance with federal law, as specified.

Existing law provides that any consumer loan or any purchase or discount of any consumer obligation with a term of more than 3 years may be secured either by real property or by personal property. If the obligation is greater than $20,000, the obligation may be secured by a combination of real property and personal property. These loans may not have terms greater than those provided above, with specified exceptions. Those loans and obligations are repayable in installments, as specified.

This bill would exclude those loans and obligations from equal installment requirements if made or purchased by the industrial loan company in accordance with federal law, as specified.

Existing law restricts an industrial loan company from having more than 70% of its assets held in loans or obligations that have a term of greater than 7 years. Under current law, any loan or obligation guaranteed or insured by a federal or state agency is deemed to have a term of less than 7 years.

This bill would also deem as having a term of less than 7 years any loan or obligation that (1) is for the purchase or refinance of single or multifamily residential property, (2) is saleable in the secondary market, as defined, and (3) is owned by the industrial loan company for 90 days or less.

This bill would also delete a provision relating to federal preemption.

Existing law authorizes an industrial loan company to charge an appraisal fee in connection with an application or request for a loan in excess of $5,000 that is secured primarily by real property, as specified. The appraisal must be rendered to the industrial loan company in writing by a qualified appraiser approved in writing by the Commissioner of Corporations.

This bill would provide that the appraisal must be rendered to the industrial loan company in writing by a qualified appraiser approved instead pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, and any applicable regulations, guidelines, and policies adopted thereunder.

Existing law provides that a loan or obligation of specified industrial loan companies that is secured primarily by real property and has an outstanding principal balance of at least $10,000 must be secured by real or personal property with a fair market value of at least 115% of the principal amount owing on the loan or obligation, as specified. Fair market value of the real property must be determined by a real property appraiser who meets qualifications established by regulation of the commissioner.

This bill would provide instead that the fair market value of the real property must be determined by a real property appraiser who meets qualifications established pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, and any applicable regulations, guidelines, and policies adopted thereunder.

The bill also would permit a loan made by an industrial loan company to facilitate the sale of real property owned by that company resulting from either the foreclosure or receipt of a deed in lieu of foreclosure to be secured by real property with a fair market

NOTE: Superior numbers appear as a separate section at the end of the digests.

value of less than 115% of the principal amount owing on the loan, subject to specified requirements.

Ch. 587 (AB 3600) Committee on Judiciary. Courts.

(1) Existing law provides for the performance of notarial acts by an officer in the armed forces.

This bill would remove reference to the serial number of an officer in the notarization.

(2) Existing law provides for a maximum of 3 postponements of sale proceedings under provisions authorizing the sale of real property pursuant to a power of sale contained in a deed of trust or mortgage, and specifies the scheduling of further sale proceedings if the proceedings are postponed 3 times.

This bill would, instead, specify the scheduling of further sale proceedings if the proceedings are postponed more than 3 times.

(3) Existing law sets forth certain times and deadlines for the performance of various court functions, as specified.

This bill would make specified changes regarding notice of a hearing on a petition to release property from a lien, the filing of a request for postponement and rescheduling of a small claims court hearing, the return of a small claims case to small claims court following appeal, and the filing and service of a notice of opposition to a writ of attachment.

(4) Existing law relative to vexatious litigants defines "litigation" as any civil action or proceeding commenced, maintained, or pending, in any state or federal court of record.

This bill would expand the definition of litigation to apply it to all courts, whether or not they are courts of record.

(5) Existing law provides for the payment of court fees.

This bill would specify the consequences of failure to pay, including payment by check which is later returned without payment.

(6) Existing law sets forth the procedures for issuance of an injunction, a preliminary injunction, and a temporary restraining order, including an injunction or temporary restraining order for harassment.

This bill would limit injunctions before judgment to preliminary injunctions, and revise various procedures regarding injunctions, preliminary injunctions, and temporary restraining orders, including injunctions and temporary restraining orders for harassment.

(7) Existing law provides for settlement of litigation by written stipulation or oral stipulation on the record.

This bill would delete the requirement that such oral stipulation be made on the record.

(8) Existing law prohibits access to court records regarding unlawful detainer actions, except as specified.

This bill would limit this prohibition to unlawful detainer actions filed in municipal court.

(9) Existing law requires arbitrators selected in international commercial disputes to disclose specified information affecting impartiality.

This bill would extend this requirement to neutral arbitrators selected pursuant to arbitration agreements.

(10) Existing law specifies the notice required before certain personal property may escheat to the state.

This bill would revise the period for providing this notice.

(11) Existing law defines a confidential communication between client and lawyer.

This bill would specify that such a communication does not lose its confidentiality solely because it is transmitted by electronic means.

(12) Existing law permits certain instruments to be proved by a subscribing witness, but exempts therefrom any mortgage, deed of trust, or security agreement.

This bill would include grant deeds within that limiting exception.

(13) Existing law specifies the intent of the Legislature regarding the provisions governing civil discovery pursuant to an economic litigation program for municipal and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

justice courts.

This bill would make technical, nonsubstantive changes in that provision.

Ch. 588 (AB 3781) Brulte. Child care and development programs: staffing ratios: adjustment factors.

Existing law establishes the Child Care and Development Services Act for the purpose of providing a system of child care and development services for children, as specified. Existing law requires that a provider agency's reported child days of enrollment be adjusted by specified factors if that agency provides child care for children with exceptional needs, as defined, and has an assigned reimbursement rate at or below the standard reimbursement rate. Under existing law, the adjustment factor for infants and toddlers 0 to 36 months of age is 1.4.

This bill would change the adjustment factor for infants 0 to 18 months of age who are served in a child day care center to 1.7, and would establish an adjustment factor of 1.4 for toddlers 18 to 36 months of age who are served in a child day care center. The bill would establish an adjustment factor of 1.4 for infants and toddlers who are 0 to 36 months of age and are served in a family child care home.

This bill would state the intent of the Legislature that the State Department of Education ensure that the level of child care and development services provided for infants in the 1994–95 fiscal year is at least equal to the level of those services provided in the 1993–94 fiscal year.

Ch. 589 (AB 3799) Lee. Defense conversion.

Existing law establishes the Defense Conversion Matching Grant Program under the direction of the Defense Conversion Council and the administration of the Office of Strategic Technology to provide matching grants and technical assistance to California nonprofit organizations, public agencies, consortia, and businesses for projects qualifying for federal funds under programs providing incentives for economic conversion.

This bill would specify a procedure for the evaluation of applications for state matching funds available under the program and the composition of evaluation committees. The bill would also require the Trade and Commerce Agency to adopt state matching grant criteria that favor proposals meeting specified objectives and standards and that are at least as stringent as specified federal award criteria.

Ch. 590 (SB 280) Roberti. Driving offenses: drug and alcohol programs.

Existing law authorizes a county to develop, implement, operate, and administer a specified alcohol and drug problem assessment program with respect to driving under the influence. Those provisions are to remain in effect until January 1, 1995.

This bill would extend that authorization until January 1, 2000.

Ch. 591 (SB 1116) Presley. Confidential information: welfare workers.

Existing law prohibits the disclosure of confidential information regarding applicants and recipients of public assistance benefits, with certain exceptions.

This bill would authorize the disclosure of certain information regarding criminal acts, as defined, to a state or local law enforcement agency.

Ch. 592 (SB 1644) Kelley. Weights and measures.

(1) Existing law requires any state or county sealer who has knowledge of a violation of any specified law governing weights and measures to cause the violator to be prosecuted.

This bill would authorize any sealer to levy a civil penalty against a person who violates specified laws or regulations governing weights and measures with specified exceptions. The payment of a civil penalty assessed pursuant to the bill would be a complete defense to a criminal prosecution for the same acts. The bill would require the Secretary of Food and Agriculture to adopt specified regulations relating to violations subject to the civil penalties.

The bill would provide that any person convicted of violating specified laws governing weights and measures, or any person who is determined to be civilly liable for violating

NOTE: Superior numbers appear as a separate section at the end of the digests.

any of those provisions, is liable for reasonable costs incurred in investigating the action, except as specified.

The bill would require the sealer to provide, on request, all reports and records regarding actions in which civil penalties were levied or liability for costs incurred were determined to the Attorney General, a district attorney, or a specified city prosecutor or city attorney.

(2) Existing law authorizes the board of supervisors to charge an annual weighing device registration fee in specified amounts and, if not specified, in amounts that may not exceed the county's total cost of actually inspecting or testing the devices, as required by law.

This bill would limit the registration fees for some devices to the amount set forth in the maximum annual charge table and would prescribe the fee for motor truck scales at $100 per device. For specified livestock scales, the bill would establish the fee at $100 for a single device or $100 for up to 3 devices at one location.

(3) Existing law provides that the Secretary of Food and Agriculture is the chief executive officer of the Department of Food and Agriculture.

This bill would make a conforming change with respect to certain provisions of the Business and Professions Code.

Ch. 593 (SB 1669) Rogers. Adult education: apportionments.

Existing law limits the eligibility of high school pupils to enroll in adult education classes unless certain requirements are met, including, among other things, that the pupils have completed a counseling session that involved the pupil, a certificated representative of the high school, and the pupil's parent or guardian.

This bill would require that commencing July 1, 1994, no school district shall enroll high school pupils in adult education classes unless the school district complies with these requirements.

Existing law prohibits the State Board of Education and the Superintendent of Public Instruction from waiving any provisions of law relating to the operation of adult education programs or state funding for those programs until July 1, 1995.

This bill would permit the Superintendent of Public Instruction, with the approval of the Department of Finance, to waive any provision of law relating to the operation of, or state funding for the operation of, adult education programs.

Existing law authorizes a school district that was not authorized to operate an adult education program to apply to the State Department of Education for initial program approval and funding to begin an adult education program if the school district meets certain criteria. The Superintendent of Public Instruction may approve the program and state apportionment funding on the basis of the school district's documented need for the program. Existing law also sets forth the only funding available for the purposes of adult education.

Existing law includes within the average daily attendance that may be reported by school districts and county offices of education for apportionment purposes, the attendance of pupils while engaged in education activities required of those pupils under the immediate supervision and control of an employee of the district or county office who possessed a valid certification document.

This bill would authorize certain county offices of education in geographically isolated, sparsely populated areas to report the average daily attendance of certain school districts over which the county office of education has jurisdiction for the purpose of conducting a county-administered adult education program. The Superintendent of Public Instruction would be required to make those apportionments if, among other conditions, the attendance of students reported is attendance while engaged in educational activities required of those students under the immediate supervision and control of a certificated employee of a school district, as specified, and the school districts for which the average daily attendance is reported generates a specified amount of average daily attendance.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 594 (SB 1681) Mello. Aging: elder and dependent adult abuse.

(1) Existing law sets forth the provisions for the reporting of actual or suspected physical or other abuse, as defined, of an elder or dependent adult by specified persons and entities, including care custodians, as defined, imposes various requirements on local, county, and state agencies in processing, investigating, and reporting on these reports, and requires the development of certain reporting forms by the State Department of Social Services in consultation with various entities. Existing law further imposes criminal penalties on persons required to report abuse who fail to do so.

This bill would recodify and recast these provisions. It would, in addition, define the terms "long-term care facility," "reasonable suspicion," and "multidisciplinary personnel team" for purposes of these provisions. It would include Alzheimer's Disease day care centers, in-home supportive services agencies, vocational rehabilitation facilities, independent living centers, private assistance agencies, and clients' rights advocates, as defined, within the definition of "care custodian."

This bill would delete the provisions referring to the long-term care ombudsman coordinator and instead refer to the long-term care ombudsman program. It would delete the provisions requiring the ombudsman coordinator to submit certain reports to the county adult protective services agency, and instead require the ombudsman program to report to the Department of Aging monthly, and the Department of Aging to report to the State Department of Social Services quarterly. It would no longer require the county to include the reports it receives from the ombudsman program in its report to the State Department of Social Services.

This bill would except state development centers and hospitals from the requirement that abuse occurring in long-term care facilities be submitted to the long-term care ombudsman coordinator. It would authorize state development centers and state hospitals to report alleged or suspected abuse to the State Department of Mental Health or the State Department of Developmental Services.

This bill would authorize the disclosure of certain confidential information between members of the multidisciplinary team. It would also require various agencies to report on an investigation of a referral or report of abuse to the agency submitting the referral or report.

This bill would delete the requirement that the State Department of Social Services consult with the State Department of Education, among others, in the development of certain forms, and instead require consultation with the State Department of Mental Health, among others.

This bill would specifically make it a crime for any person to cause a dependent adult to suffer, or to inflict unjustifiable physical pain or mental suffering on a dependent adult or for any person having the care or custody of any elder or dependent adult to willfully cause or permit the elder or dependent adult to be injured or to cause or permit the elder or dependent adult to be placed in a situation that his or her person or health is endangered. It would also make it a crime for a person to fail to report an instance of physical abuse of an elder or dependent adult when the person is required to do so.

By creating new crimes, this bill would impose a state-mandated local program on counties implementing its provisions.

This bill would require the State Department of Social Services to maintain minimum guidelines for use by counties in determining when an investigation of abuse is warranted.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund, except that the bill would specify that no reimbursement is required by a particular provision of this act for a

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified reason.

Ch. 595 (SB 1686) Lewis. Insurers: securities.

Existing law generally regulates specified securities transactions by an insurer, as defined, and specifically prohibits an insurer from selling in this state, except as provided, offering for sale, negotiating for the sale of, or taking subscriptions for, a security of its own issue until it has obtained a permit from the Insurance Commissioner.

This bill would exempt from these provisions specified transactions of a domestic and admitted insurer, as defined. That exemption would be subject to, among other things, a requirement of notification to the commissioner, as specified. The notice would be required to be executed under penalty of perjury. The bill would thus impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 596 (SB 1700) Hart. Child custody.

Under existing law, in any proceeding concerning the custody of a child, the court is required to consider and give due weight to the wishes of the child in making an order granting or modifying custody if the child is of sufficient age and capacity to reason so as to form an intelligent preference as to custody.

This bill would require the court to control the examination of a child witness so as to protect the best interests of the child, as specified.

Ch. 597 (SB 1863) Leslie. Adult entertainment: local regulation.

Existing law provides that the legislative body of any county or city may adopt zoning ordinances that regulate, among other things, the use and size of buildings, signs and billboards, land use, and parking requirements. Existing law provides that nothing in the Penal Code shall invalidate a local ordinance that directly regulates the exposure of specified parts of a person who acts as a waiter, waitress, or entertainer, as specified.

This bill would additionally allow the legislative body of any county or city to regulate, pursuant to a content neutral zoning ordinance, the time, place, and manner of operation of sexually oriented businesses, when the ordinance is designed to serve a substantial governmental interest, does not unreasonably limit alternative avenues of communication, and is based on narrow, objective, and definite standards. The bill would provide that its provisions do not apply to a theater, concert hall, or similar establishment that is primarily devoted to theatrical performances.

Ch. 598 (SB 2016) Leslie. Vehicles: golf cart transportation program.

(1) Under existing law, golf carts may be operated in a limited manner on local highways. No golf cart may be operated on any highway except in a speed zone of 25 miles per hour or less.

Existing law also establishes a 5-year pilot project authorizing the City of Palm Desert to establish golf cart lanes, adopt design and marking specifications for those lanes, and adopt design and safety standards for electric golf carts, as specified.

This bill would allow the City of Roseville to adopt a golf cart transportation plan in a specified plan area, as specified. The bill would make a violation of certain restrictions regarding operating the golf carts an infraction, thereby imposing a state-mandated local program by creating a new crime. The bill would require the city to issue permits for golf carts and adopt safety criteria for golf cart operators, including financial responsibility requirements. The bill would require the city's golf cart transportation plan to be submitted to the transportation planning agency for review and comments prior to adoption. The city would be required to transmit reports to the Legislature on January 1, 1997, and on January 1, 1998, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 599 (AB 801) B. Friedman. Domestic violence.

(1) The Battered Women Protection Act of 1994 requires the Maternal and Child Health Branch of the State Department of Health Services, in consultation with an advisory council composed of specified members, to administer a comprehensive shelter-based services grant program to battered women's shelters, subject to specified conditions, and requires the department to issue a Request for Proposals for grants no later than October 15, 1994.

This bill would revise various conditions for the receipt of these grants, and would specify that the council shall remain in existence until January 1, 1996. It would also require the department to issue a Request for Proposals and encumber the funds or complete negotiations for agreements under the program no later than May 1, 1995.

(2) The Battered Women Protection Act of 1994 specifies that the sum of $11,500,000 appropriated in the Budget Act of 1994 and made available for the purposes of the act shall he distributed to the State Department of Health Services for the shelter-based grant program.

This bill would, instead, specify that $5,750,000 of that sum shall be distributed to the department for that program, and that $5,750,000 shall be distributed to the department to augment existing battered women's shelters currently funded by the state, subject to specified conditions, thus making an appropriation.

(3) Existing law establishes the Spousal Abuser Prosecution Program within the Office of Criminal Justice Planning, to be administered by the office, pursuant to which specified types of financial and technical assistance are provided to district attorneys' offices for the prosecution of felony spousal abuse cases.

This bill would, instead, provide that the program is established within the Department of Justice, to be administered by the department. It would delete the provisions restricting assistance to the prosecution of felony cases, expand the program to prosecution by city attorneys' offices, and make various related changes. It would also specify that administrative costs incurred by the department in administering the program shall not exceed 5% of the total funds allocated for the program.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 600 (SB 692) Roberti. Animals: nonambulatory: cruelty.

(1) Existing law generally prohibits cruelty to animals.

This bill would prohibit a non-federally inspected slaughterhouse, stockyard, or auction from buying, selling, or receiving nonambulatory animals, as defined. The bill also would prohibit a slaughterhouse, stockyard, auction, market agency, or dealer from holding a nonambulatory animal without taking immediate action to humanely euthanize the animal or remove it from the premises. The bill also would prohibit dragging or pushing a nonambulatory animal with equipment and require that the animal be moved with a sling or on a stoneboat or other sled-like or wheeled conveyance, while the animal is in transit or on the premises of a stockyard, auction, market agency, dealer, or slaughterhouse. The bill would provide that a violation of these provisions is a misdemeanor, thereby imposing a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 601 (AB 1285) Cannella. Milk: pooling referendum.

Existing law provides for stabilization and marketing plans pursuant to which the Secretary of Food and Agriculture establishes minimum prices to be paid by handlers to producers for market milk. Until January 1, 1995, existing law also requires that

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

producers be paid a specified amount for market milk.

This bill would delete the termination date of January 1, 1995, and instead continue in effect those provisions establishing a specified price for market milk until producers vote in a referendum to suspend them. The bill would require the secretary to hold public hearings for the purpose of considering whether to hold the referendum. The bill would require the secretary, following the hearing, to submit a ballot to producers in a statewide election, and would specify the procedures to be followed in conducting the referendum. If existing law is not continued in effect, the bill would require the secretary to continue in operation the pooling plan in effect on December 31, 1993. The bill would also require the statewide weighted average minimum price level for class 1 milk to bear a reasonable relationship to class 1 milk prices paid to producers in contiguous states.

Ch. 602 (AB 2489) Lee. Martin Luther King, Jr. Freedom Center.

Existing law authorizes two or more public agencies by agreement to jointly exercise any power common to the contracting parties in accordance with specified provisions.

This bill would make a legislative finding and declaration that a joint powers agreement will be entered into by the City of Oakland and the East Bay Regional Park District in order to establish and operate the Martin Luther King, Jr. Freedom Center within the Martin Luther King, Jr. Shoreline Park in Oakland, California.

This bill would specify that the center is an eligible project for construction and development grants from any funds appropriated for the purposes of the bill through the annual Budget Act, any appropriate bond act, or any other legislation that provides local assistance grants for park, recreational, and community facilities. The bill would also specify that the center is eligible for grants under the Roberti-Z'Berg-Harris Urban Open-Space and Recreation Program Act.

Ch. 603 (AB 2554) Solis. State Teachers' Retirement System: provision of information to potential members.

The State Teachers' Retirement Law prescribes criteria for membership in the system and makes membership optional to certain part-time and substitute certificated employees.

This bill, in response to a federal law, would require employing agencies to make available criteria for membership, including optional membership, in a timely manner to all certificated employees and to inform part-time and substitute certificated employees, within specified time periods, that they may elect membership at any time while employed. This bill would also make employing agencies liable for employee and employer contributions, interest, administrative costs, and audit costs, if an audit or member's complaint reveals noncompliance.

Ch. 604 (AB 2784) Epple. Occupational safety and health: cranes.

Existing law requires that regulations of the Division of Occupational Safety and Health specify a procedure for licensing certificating agencies or agents for certification inspections of cranes.

Existing law imposes restrictions with respect to those persons who may certify the safety of cranes, as specified, but permits the licensure of certifiers of cranes who are employed by insurance carriers who insure the specific crane.

This bill would, except as to certification of tower cranes, additionally permit the licensure of certifiers of cranes who are employed by an electrical, gas, or telephone corporation, as defined, or a municipal utility serving a city having a population of 3,000,000 or more, that meet prescribed criteria.

Ch. 605 (AB 3048) Costa. San Joaquin River: conservancy: management program.

(1) Existing law, the San Joaquin River Conservancy Act, establishes the San Joaquin River Conservancy to acquire and manage public lands within the San Joaquin River Parkway, as described, and requires that the governing board of the conservancy consist of 7 voting members and 5 ex officio, nonvoting members, as prescribed. The act also

NOTE: Superior numbers appear as a separate section at the end of the digests.

authorizes the conservancy, among other things, to accept any revenue, money, grants, goods, or services from any public agency, private entity, or person for any lawful purpose of the conservancy.

This bill would place the conservancy within the Resources Agency and increase to 6 the number of ex officio, nonvoting members of the governing board of the conservancy by requiring that the board also include the Secretary of the Resources Agency or a member of his or her executive staff designated by the secretary. The bill would additionally authorize the conservancy to expend, upon receipt, the revenue, money, or grants for capital improvements, land acquisitions, or support of the conservancy's operations.

(2) Existing law creates the San Joaquin River Management Program Advisory Council, with membership as prescribed, and requires the council to develop a management program for the San Joaquin River, as specified. Existing law makes related legislative findings and declarations. These provisions are to be repealed as of January 1, 1995.

This bill would extend those provisions until January 1, 2000, and would revise the related legislative findings and declarations.

Ch. 606 (AB 3121) Archie-Hudson. Tax incentives: Los Angeles Revitalization Zone.

Existing law provides for the establishment of the Los Angeles Revitalization Zone consisting of specific geographic areas that suffered damage as a result of the civil disturbances of April 29, 1992, and the following days in the County of Los Angeles. Taxpayers located within the zone are eligible for specified tax incentives under the Personal Income Tax Law and the Bank and Corporation Tax Law. The geographic areas of the zone are determined by maps that are prepared by the county and affected cities and approved by the Trade and Commerce Agency in accordance with specified criteria.

This bill would require the Trade and Commerce Agency to retain jurisdiction to determine whether an approved map complies with the applicable criteria, and would declare that any approved map that is subsequently determined by the agency to be not in compliance is void.

This bill would also require the Secretary of the Trade and Commerce Agency to publish, no later than 60 days after the effective date of this bill, an amended zone consisting of an approved map minus areas that do not meet specified criteria.

This bill would provide that those tax incentives under the Personal Income Tax Law and Bank and Corporation Tax Law specified with respect to the Los Angeles Revitalization Zone shall be inoperative with respect to the business activities of a taxpayer that occur within those areas that are either determined to be noncomplying or are excluded pursuant to this bill.

This bill would take effect immediately as a tax levy.

Ch. 607 (AB 3324) Connolly. Curriculum: teen court.

Existing law provides that the adopted course of study for grades 7 to 12, inclusive, shall offer certain courses in specified areas of study, including social sciences. Under existing law, a course in social science is required to provide instruction in our American legal system, the operation of the juvenile and adult criminal justice systems, and the rights and duties of citizens under the criminal and civil law and the California Constitution and the United States Constitution.

This bill would provide that the above instruction may include participation in a teen court or peer court program, as specified, and would require the School Law Enforcement Partnership to provide information to school districts and county offices of education about teen or peer court programs.

Ch. 608 (AB 3610) Moore. Telephones: telecommunication devices.

Existing law requires the Public Utilities Commission to design and implement programs whereby each telephone corporation shall provide a telecommunications device capable of servicing the needs of individuals who are deaf or hearing impaired, as specified, and to establish a rate recovery mechanism through a surcharge to be in effect

NOTE: Superior numbers appear as a separate section at the end of the digests.

until January 1, 1995.

This bill would extend that surcharge until January 1, 1997.

Ch. 609 (SB 1017) McCorquodale. Fees and assessments.

(1) Existing law requires an urban water supplier to bear all costs incurred in developing or implementing an urban water management plan, unless otherwise provided by statute.

This bill would authorize an urban water supplier to recover in its rates the costs incurred in preparing its plan and implementing the reasonable water conservation measures included in the plan, as prescribed.

(2) The Central Delta Water Agency Act creates the Central Delta Water Agency and requires the agency to impose an annual assessment in an amount sufficient to pay the estimated expenses of the agency if the total amount of money assessed during any year for purposes other than payment under prescribed contracts does not exceed $250,000.

This bill would require the agency to impose that assessment if the total amount of money assessed during any year for purposes other than payment under those prescribed contracts does not exceed $250,000, unless any greater amount is approved by ⅔ of the votes cast at an agency election.

(3) The North Delta Water Agency Act creates the North Delta Water Agency and requires the agency to impose an annual assessment in an amount sufficient to pay the estimated expenses of the agency, not exceeding 35¢ per acre of taxable land within the agency for purposes other than payment under prescribed contracts.

This bill would require the agency to impose that assessment if the total amount of money assessed during any year for purposes other than payment under those prescribed contracts does not exceed $250,000, unless any greater amount is approved by ⅔ of the votes cast at an agency election.

Ch. 610 (SB 1570) Hart. Public Employees' Retirement System.

The Public Employees' Retirement law prescribes increased special death benefits for industrial and safety members whose death arises out of and in the course of official duties.

This bill would provide those benefits for state miscellaneous members whose deaths were a direct consequence of violent acts that arose out of and in the course of their official duties. The benefits would be available for local miscellaneous members whose employers elect to provide those benefits. The benefits would be applicable to acts that occurred on and after July 1, 1993.

Ch. 611 (SB 1612) Kopp. Letters of credit.

Under existing law, a surety or guarantor is one who promises to answer for the debt, default, or miscarriage of another, or hypothecates property as security therefor.

This bill would provide that, for specified purposes, a letter of credit is not a form of suretyship obligation.

Under existing law, an issuer must honor a draft or demand for payment that complies with the terms of the relevant credit regardless of whether the goods or documents conform to the underlying contract for sale or other contract between the customer and the beneficiary, as specified.

This bill would make technical, nonsubstantive changes to this provision.

This bill would provide that, with respect to an obligation secured by a mortgage or deed of trust on real property or an estate for years therein, that is also supported by a letter of credit, neither the presentment, receipt of payment, or enforcement of a draft or demand for payment under the letter of credit by the beneficiary of the letter of credit nor the honor or payment of, or the demand for reimbursement, receipt of reimbursement, or enforcement of any contractual, statutory, or other reimbursement obligation relating to the letter of credit by the issuer of the letter of credit, whether done before or after the foreclosure of the mortgage or deed of trust or conveyance in lieu thereof, constitutes an action to foreclose or failure to comply with any other statutory or judicial requirement to proceed first against security, constitutes a money

NOTE: Superior numbers appear as a separate section at the end of the digests.

judgment for a deficiency or a deficiency judgment, under specified circumstances, or constitutes a specified violation.

The bill would also provide that no letter of credit shall be enforceable by any party in a loan transaction in which specified circumstances exist.

This bill would express the intent of the Legislature relative to the independent nature of the letter of credit and to abrogate the holding in Western Security Bank, N.A. v. The Superior Court of Los Angeles County, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 612 (SB 1630) Hart. Telephone corporations: "911" emergency services.

Existing law sets forth the authority of the Public Utilities Commission in regulating the provision of services by telephone corporations.

This bill would require local telephone corporations in the state, excluding wireless or cellular corporations, to provide, to the extent permitted by existing technology or facilities, all existing and newly installed telephone connections to residential households with access to "911" emergency service regardless of whether an account has been established, and to prohibit telephone corporations from terminating access to these services for nonpayment of any delinquent account or indebtedness owed by the subscriber to the telephone corporation.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 613 (SB 1720) Hart. Oil spills: prevention and response: felony violations.

Existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, requires criminal actions prosecuting misdemeanor violations under the act, actions to recover civil damages or penalties, and actions to compel the removal of oil or the restoration and rehabilitation of wildlife habitat to be commenced within specified periods from the date of discovery of the facts or circumstances which constitute the violation.

This bill would additionally require that criminal actions prosecuting felony violations under the act be commenced within 3 years from the date of discovery of the facts or circumstances which constitute the violation. The bill would define the term "date of discovery" for purposes of those provisions specifying periods for the commencement of criminal actions and civil actions.

The bill would also authorize the administrator for oil spill response to adopt regulations prescribing procedures for the implementation of those provisions.

Ch. 614 (SB 1832) Bergeson. Health care coverage.

(1) Existing law, known as the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of specified health care service plans, administered by the Commissioner of Corporations. Existing law makes the willful violation of the act or any rule or regulation thereunder a misdemeanor. Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

Existing law requires that health care service plan contracts and disability insurance policies meet certain requirements, and provide coverage for prescribed services and treatments.

This bill would require health care service plans to reimburse providers for emergency services and care without prior authorization in specified circumstances.

This bill would also provide procedures for obtaining authorization and resolving disagreements in circumstances where, in the opinion of the emergency or attending physician, or other provider, a patient who has received emergency care may not be

NOTE: Superior numbers appear as a separate section at the end of the digests.

safely discharged. It would provide an exception to certain of these provisions for a provider who has a contract with a health care service plan for providing emergency and necessary medical care, and for a health care service plan that has 3,500,000 enrollees and maintains a prior authorization system that meets certain criteria.

It would also require the Department of Corporations to adopt emergency regulations governing instances when an enrollee requires medical care following stabilization of an emergency condition.

(2) Existing law requires every plan to establish procedures in accordance with the Department of Corporations regulations for continuously reviewing the quality of care, performance of medical personnel, utilization of services and facilities, and costs.

This bill would require a plan to disclose to the commissioner and providers under contract with the plan the processes the plan uses to authorize health care services by a provider pursuant to the benefits provided by the plan, with certain exceptions. It also would require that those processes be disclosed to enrollees upon request.

This bill would prohibit certain disability insurers, a health care service plan, or a nonprofit hospital service plan that authorizes a specific type of treatment by a provider from rescinding or modifying this authorization after the provider renders the health care service in good faith and pursuant to the authorization.

(3) Existing law requires a plan to establish and maintain a grievance system approved by the department under which enrollees may submit grievances, and imposes procedures for this system.

This bill would require the commissioner to annually file, as a public record, an aggregate summary of complaints filed against plans.

The bill would also provide that upon appeal to the plan of a contested claim, the claim would be referred by the plan to the medical director or other appropriately licensed health care provider, and sets forth procedures for this appeal.

(4) Existing law requires a plan to reimburse claims or any portion thereof as soon as practical, but no later than 30 working days for a health care service plan and 45 working days for a health maintenance organization after receipt of the claim unless the claim or portion thereof is contested. It deems a claim or portion thereof to be reasonably contested where the plan has not received the completed claim and all information necessary to determine payor liability for the claim.

This bill would require a health care service plan to complete reconsideration of the claim within 30 working days and would require a health maintenance organization to complete reconsideration of the claim within 45 working days after receipt of this additional information.

(5) This bill would require health care service plans to notify enrollees of the termination of a contract with a medical group, individual practice association, or individual provider within such a group or association selected by those enrollees, and would authorize the plan to request the medical group or individual practice association to notify the enrollees who are patients of that provider when the individual provider is within that group or association. This bill would also require plans to disclose the reasons for termination of a contract in certain circumstances.

(6) This bill would, with certain exceptions, prohibit the release of any information by certain disability insurers, a health care service plan, or a nonprofit hospital service plan to an employer that would directly or indirectly indicate to the employer that an employee is receiving or has received services from a health care provider that are covered by the plan, unless authorized to do so by the employee.

(7) Since this bill would create new crimes with respect to health care service plans, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 615 (SB 1893) Leslie. Local agencies: elective members: benefits.

Existing law permits the legislative body of a local agency, as defined, to provide for the continuation of any health and welfare benefits for the benefit of former elective members of the legislative body after January 1, 1981, subject to specified conditions.

This bill would provide that:

(1) A legislative body that provided those benefits to former elective members before the effective date of the bill shall not provide those benefits to any person first elected to a term of office that begins on or after January 1, 1995, unless the recipient participates on a self-pay basis or was fully vested prior to January 1, 1995, as specified.

(2) A legislative body that did not provide those benefits to former elective members before January 1, 1994, shall not provide those benefits to former elective members after January 1, 1994, unless the recipients participate on a self-pay basis.

(3) A legislative body that provided benefits to former elective members before January 1, 1994, may continue to provide these benefits to these members who received those benefits before January 1, 1994.

Ch. 616 (AB 2906) Cortese. Crushed grape report: fees.

Existing law requires every processor who crushes grapes in California to annually furnish to the Secretary of Food and Agriculture a report of the total number of tons of grapes purchased by the processor in California during the preceding crush within each grape pricing district. Existing law requires the secretary to subsequently publish a report containing specified information regarding the previous crush. To provide funds to carry out that provision, each processor who crushes more than 100 tons of grapes in California is required to pay to the secretary the amount determined to be necessary to cover those costs, but not to exceed 5¢ per ton of grapes received for crushing. Under existing law, if the secretary conducts an acreage survey, he or she may increase the fee charged by not more than 2¢ per ton of grapes received for crushing, to cover costs of the survey. Under existing law, these moneys are deposited in the Department of Food and Agriculture Fund, and continuously appropriated for the purposes for which they are collected.

This bill would increase the fee to not more than 10¢ per ton of grapes received for crushing, and would permit the secretary to increase the fee charged by not more than 4¢ per ton to cover the costs of the acreage survey, thereby making an appropriation. The bill would also require the secretary to establish the fee for the reports and the surveys so as to generate only the amount of revenue to cover the cost of producing the reports , in conducting the survey, and in conducting related enforcement activities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 617 (AB 3150) Tucker. Horseraces: 2-year-old horses.

(1) Existing provisions of the California Constitution authorize the Legislature to provide for the regulation of horseraces and horserace meetings, and wagering on the results.

This bill would make it a misdemeanor to enter or accept the entry of a horse in a race upon which there is parimutuel wagering until 2 years after the horse's foaling date, as defined. This bill would authorize the California Horse Racing Board to suspend the license of any person who violates this provision for a period of not more than one year. The bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 618 (AB 3263) Campbell. Hazardous materials: accidental release.

(1) Existing law requires the administering agency to make a preliminary determination whether there is a significant likelihood that a handler's use of an acutely hazardous material may pose an acutely hazardous materials risk. If the administering agency determines that there is a significant likelihood of risk, the administering agency is

NOTE: Superior numbers appear as a separate section at the end of the digests.

required to require the handler to prepare and submit a risk management and prevention program (RMPP), consisting of specified elements. A knowing violation of RMPP requirements is a crime.

This bill would require the Office of Emergency Services to obtain and maintain state delegation of the federal accidental release prevention program established pursuant to specified provisions of the Clean Air Act.

The bill would allow petitions to be submitted, subject to specified requirements, and in accordance with prescribed procedures, to the office to add a material to, or to delete a material from, the acutely hazardous materials list, or to revise threshold planning quantities.

The bill would impose specified duties on a handler who intends to modify a facility which may result either in a significant increase in the amount of acutely hazardous materials handled by the facility, or in a significantly increased risk in handling an acutely hazardous material, as compared to the amount of materials and the amount of risk identified in the facility's RMPP relating to the process proposed for modification, thereby imposing a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 619 (AB 3540) Andal. Hazardous materials: corporate fees.

Existing law requires corporations which use, generate, store, or conduct activities in this state related to hazardous materials to pay an annual fee based on the number of employees employed in the state during the previous calendar year. The annual fee is deposited in the Hazardous Waste Control Account in the General Fund.

This bill would exempt from those provisions, specified nonprofit corporations primarily engaged in the provision of residential social and personal care for children, the aged, and special categories of persons with some limits on their ability for self-care.

Ch. 620 (AB 3752) Alpert. Beverage containers: redemption: supermarket closure: Pacific Beach pilot program.

(1) Existing law, the California Beverage Container Recycling and Litter Reduction Act, requires every dealer to post a sign which contains specified information regarding the redemption of beverage containers. That act also requires dealers in specified convenience zones to either submit to the Department of Conservation an affidavit containing specified information regarding the redemption of beverage containers or pay a specified fee to the department. The provisions prescribing the sign and affidavit requirements provide for the redemption of beverage containers at one specific location within the dealer's place of business or store.

This bill would revise those provisions to instead provide for the redemption of beverage containers at one specific location on the dealer's premises.

(2) Under the act, the money in the California Beverage Container Recycling Fund is continuously appropriated to the department for the payment of handling fees. The act provides for the payment of handling fees to a supermarket site, which is defined as a certified recycling center that is located at or contiguous to a supermarket, as specified, to provide an incentive for the redemption of empty beverage containers in convenience zones, as defined. A violation of the act is a crime and the penalties for a violation of the act are deposited in the fund.

The department is prohibited from making convenience incentive payments to a certified recycling location if the department determines that all empty beverage container types are not redeemed at the same physical location within the recycling location. A certified recycling center that, among other things, redeems all empty beverage container types at the same physical location is eligible to receive convenience incentive payments.

This bill would revise those provisions pertaining to the payment of convenience incentive payments to instead pertain to the payment of handling fees to supermarket

NOTE: Superior numbers appear as a separate section at the end of the digests.

sites, thereby making an appropriation.

The bill would make the operator of a supermarket site eligible to apply for handling fees for a period of 3 months after the supermarket ceases operation for remodeling or because of a change of ownership. The bill would require the operator to notify the department of the closure of the supermarket which is the focal point of the convenience zone, thereby imposing a state-mandated local program by creating a new crime, and thereby making an appropriation.

(3) The bill would require the department to certify one operator to establish a pilot program, the Pacific Beach Pilot Mobile Recycling Program, not to exceed 2 years in duration, incorporating all convenience zones in the Pacific Beach area of San Diego County. The bill would prescribe special terms and conditions applicable to the pilot program and would require the department to submit a report on the pilot program, as prescribed, to the Legislature by July 1, 1996. The bill would authorize the department to adopt emergency regulations to implement these provisions.

The bill would require the law enforcement agency having jurisdiction over the Pacific Beach area to provide specified information to the department, thereby imposing a state-mandated local program.

The pilot program would remain in effect only until January 1, 1997.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs, no reimbursement is required by this act for a specified reason, and that, for all other costs, no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 621 (SB 762) Wright. Hazardous waste : financial assurances.

Under existing law, the Department of Toxic Substances Control is required to adopt standards and regulations which specify the financial assurances required to be provided by the owner or operator of a hazardous waste facility for responding to third-party damage claims and for the costs of closure and subsequent maintenance. Existing law exempts, until December 31, 1994, a facility or transportable treatment unit operating pursuant to a permit-by-rule from those standards and regulations concerning providing financial assurances for treatment unit third-party liability and closure costs, and requires those assurances to be provided on and after January 1, 1995, except as specified.

This bill would extend the date when financial assurances for third-party liability are required to be provided to January 1, 1998.

The bill would require the department, from January 1, 1995, until January 1, 1997, to review the records of any releases of hazardous waste from a treatment unit within a facility or transportable treatment unit operating pursuant to a permit-by-rule, and to submit to the Governor and the Legislature, by March 31, 1997, a report concerning any incidents in which the owner or operator of such a facility or unit is held to be liable to a third party due to the operation of the facility or unit.

Ch. 622 (SB 1360) Leslie. Employees: alternative transportation.

Existing law with respect to workers' compensation generally requires, as a condition of employer liability for compensation for an injury suffered by an employee of that employer, that the employee sustain that injury in the course of his or her employment.

This bill would provide, except as specified, that an employee who voluntarily participates in a government-mandated or government-sponsored alternative commute program, as defined, is not acting within the course of his or her employment while utilizing that program, unless that employee receives wages or salary for those periods of travel. This bill also would specify that an employee who is injured while acting outside the course of his or her employment, or his or her dependents in the event of the employee's death, shall not be barred from bringing an action at law for damages against his or her

NOTE: Superior numbers appear as a separate section at the end of the digests.

employer as a result of that provision. This bill would state the intent of the Legislature that this specification only declare and clarify, but not expand, limit, or otherwise alter existing law.

Existing law requires certain charter-party carriers of passengers who own and operate vehicles and other owners of vehicles to maintain liability insurance, as specified.

This bill would require charter-party carriers of passengers who own and provide vanpool vehicles to employers or a group of employees and employers who own vanpool vehicles to maintain specified liability insurance covering personal injury and property damage.

The Personal Income Tax Law provides an exclusion from gross income for compensation or the fair market value of any other benefit, except salary or wages, that is received by an employee from an employer for the use of various transportation methods or arrangements, including a vanpool or transit pass.

This bill would include within those specified methods or arrangements bicycling, commuting by ferry, the use of an alternative transportation method, not already specified, that reduces the use of a motor vehicle by a single occupant, and travel to or from telecommuting facilities. This bill would also clarify or modify the definitions of a vanpool and transit pass.

Ch. 623 (SB 1709) Peace. Public utilities: telecommunications.

Existing law requires the Public Utilities Commission to set rates and perform various other functions concerning public utilities.

Existing law also provides that whenever a public utility and a cable television corporation or association of cable television corporations are unable to agree upon the terms, conditions, or annual compensation for pole attachments or the terms, conditions, or costs of rearrangements, the commission shall establish and enforce the rates, terms, and conditions for pole attachments and rearrangements so as to assure a public utility the recovery of specified funds.

This bill would state the intent of the Legislature that public utilities and publicly owned utilities be fairly and adequately compensated for the use of their rights-of-way and easements for the installation of fiber optic cable and that electric public utilities and publicly owned utilities have the ability, if they so desire, to negotiate access to those fiber optic cables, for their own use, and would make findings and declarations in that regard.

The bill would state that it shall not be deemed to change a provision of existing law.

Ch. 624 (SB 1774) Maddy. Sales and use taxes: exemptions: carbon dioxide packing.

The Sales and Use Tax Law imposes a tax on the sale of, or the storage, use, or other consumption in this state of, tangible personal property. Existing law provides various exemptions from that tax, including an exemption for food products for human consumption, and, as incidental to that exemption, for ice or dry ice used or employed in packing and shipping or transporting food products for human consumption, as specified.

This bill would provide an additional exemption from those taxes for carbon dioxide used or employed in packing and shipping or transporting fruits or vegetables for human consumption and any related nonreturnable materials containing the carbon dioxide atmosphere.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 625 (SB 1894) Leslie. Solid waste: Local Government Technical Advisory Committee.

Existing law, the California Integrated Waste Management Act of 1989, is administered by the California Integrated Waste Management Board. The act provides for the Local Government Technical Advisory Committee in the board, with a specified composition which is required to, among other things, reflect the ethnic and cultural diversity of the state. The committee is required to provide any advice which may be necessary to the board in carrying out the requirements of the act regarding the preparation of integrated waste management plans. The act requires the committee to meet not less than once each calendar quarter and requires members to be reimbursed at a rate of $100 per day for each day of meeting, but in an amount not to exceed $400 per month. The provisions providing for the advisory committee remain operative until January 1, 1995, or until the operative date of any amendments to specified provisions regarding the appointment to the board of a representative of local government, whichever occurs earlier, and are repealed as of that date.

This bill would require appointments to the committee to also reflect the demographic diversity of the state relative to urban, suburban, and rural areas, and would make a related statement of legislative intent.

The bill would delete those provisions providing for reimbursement for attendance at each meeting.

The bill would require the quarterly meetings of the advisory committee to be held in locations that reflect the demographic diversity of the state relative to urban, suburban, and rural areas.

The bill would revise the duties of the committee to instead require the committee to provide any advice which may be necessary to assist the board in carrying out the requirements of the act.

The bill would delete those provisions providing for per diem reimbursement for the commission.

The bill would extend the operative date of the provisions providing for the committee to January 1, 1999, or until the operative date of any amendments to the specified provisions regarding the appointment to the board of a representative of local government, whichever occurs earlier, unless a later enacted statute, enacted before that date, deletes or extends that date.

Ch. 626 (AB 3096) Katz. Environmental Water Fund.

(1) Existing law creates the Environmental Water Fund and requires the Department of Water Resources to use the money in the fund, upon appropriation by the Legislature, to carry out an environmental water program and a water quality program. Existing law declares that it is the intent of the Legislature that the department allocate, in prescribed fiscal years, specified amounts of money that are appropriated to it from the fund to projects included in the environmental water program and the water quality program.

This bill would, instead, declare that it is the intent of the Legislature that $9,000,000 per year be appropriated in the annual Budget Act for the 1994–95 to 1997–98 fiscal years to pay for projects included in the environmental water program. The bill would declare that it is the intent of the Legislature that the department allocate, in the 1995–96 to 1997–98 fiscal years, at least $1,000,000 per year from the funds that are appropriated to it from the Environmental Water Fund to projects included in the water quality program.

(2) Existing law authorizes the City of Los Angeles, with the Mono Lake Committee, to submit grant applications to the department to receive money from the fund to pay for projects that protect and preserve the Mono Lake Basin.

This bill would require the City of Los Angeles to submit a grant application to the department, in accordance with that provision, for the purpose of implementing a prescribed voluntary water conservation program in the City of Los Angeles that benefits the ecosystem of Mono Lake. The bill would impose a state-mandated local program by imposing duties on the City of Los Angeles in connection with the preparation of the grant application. The bill would authorize the Los Angeles Department of Water and

NOTE: Superior numbers appear as a separate section at the end of the digests.

Power to impose a specified charge on ratepayers who contract for the installation of water conservation equipment in connection with the water conservation program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 627 (AB 463) Tucker. Alcoholic beverages: licenses.

The Alcoholic Beverage Control Act contains various provisions regulating the application for, the issuance of, the suspension of, and the conditions imposed upon, alcoholic beverage licenses by the Department of Alcoholic Beverage Control.

This bill would revise those provisions to, among other things, revise the law regarding an offer in compromise following the suspension of a license, expand the authority of the Department of Alcoholic Beverage Control to impose and enforce conditions on retail licenses, and limit applications for, and issuance of, original retail off-sale beer and wine licenses, as specified.

Under existing law, until January 1, 1994, establishments engaged in the concurrent sale of motor vehicle fuel with beer and wine for off-premises consumption were required to abide by certain conditions. Under existing law, until January 1, 1994, if there was a finding that a licensee or his or her employee had sold any alcoholic beverage to a minor at such an establishment, the license at the establishment would be suspended for 72 hours.

This bill would delete the termination dates from those provisions thereby reinstating their operation.

Under existing law, the Department of Alcoholic Beverage Control may delegate the power to hear and decide with regard to suspension and revocation of licenses to an administrative law judge on the staff of the Office of Administrative Hearings, as provided.

This bill would authorize the department, on and after July 1, 1995, to delegate the power to hear and decide to an administrative law judge appointed by the Director of Alcoholic Beverage Control.

Ch. 628 (AB 987) Tucker. Alcoholic beverages.

Existing law provides that alcoholic beverage license fees and taxes be deposited in the Alcohol Beverage Control Fund, with a specified portion of that revenue to be transferred to the Department of Alcoholic Beverage Control and the remainder to be transferred to the General Fund on the order of the Controller.

This bill would appropriate the amounts of $900,000 and $2,600,000 from the Alcohol Beverage Control Fund to the Department of Alcoholic Beverage Control in augmentation of specified items in the Budget Act of 1994.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 629 (AB 2742) Lee. Alcoholic beverages.

Existing law requires the Department of Alcoholic Beverage Control to notify the appropriate sheriff, chief of police, district attorney, and legislative body of an application for the issuance or transfer of a liquor license, and prohibits the Department of Alcoholic Beverage Control from issuing or transferring a license until at least 30 days after these notices are provided.

This bill would require the Department of Alcoholic Beverage Control to also notify the city or county planning agency of the license or license transfer application, and would allow any local law enforcement agency that is so notified to request an extension of the 30-day waiting period for a period not to exceed an additional 20 days.

Existing law provides that protests against the issuance of a liquor license may be filed

NOTE: Superior numbers appear as a separate section at the end of the digests.

with the Department of Alcoholic Beverage Control, as specified. Existing law permits the department to reject protests it determines to be false, vexatious, or without reasonable or probable cause, and permits a protestant whose protest has been rejected to file an accusation with the department, as specified.

This bill would require the Department of Alcoholic Beverage Control, if, after investigation, it recommends that a license be issued notwithstanding a protest by a public agency, a public official, or the governing body of a city or county, to notify the agency, official, or governing body in writing of its determination and the reasons therefor, in conjunction with the notice of hearing provided to the protestant, as specified.

Existing law establishes various matters, including a licensee's failure to take reasonable steps to correct a nuisance on the licensed premises or other immediate areas within a reasonable time after receipt of a notice pursuant to a specified statute, as grounds for the suspension or revocation of a liquor license.

This bill would, as provided, establish a licensee's failure, within a reasonable time after specified notice, to take reasonable steps to correct objectionable conditions that occur during business hours on any public sidewalk abutting a licensed premises, as an additional ground for revocation or suspension of a liquor license, except with respect to certain specified licenses.

Existing law establishes certain regulatory requirements with respect to alcoholic beverages, and provides that the violation of any of those requirements shall be punished as a misdemeanor, unless otherwise provided.

This bill would establish certain general operating standards that are applicable, as provided, to the licensed premises of certain retailers of alcoholic beverages, the violation of which would be punishable as a misdemeanor. By creating a new crime, this bill would establish a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 630 (AB 2897) Caldera. Alcoholic beverages: retail licenses: undue concentration.

Existing law provides that the Department of Alcoholic Beverage Control may deny an application for a license if the issuance would, among other things, result in or add to an undue concentration of licenses, and the applicant fails to show that public convenience or necessity would be served by the issuance. Existing regulatory law defines "undue concentration" with regard to applications for on-sale and off-sale retail licenses.

This bill would instead require the Department of Alcoholic Beverage Control to deny an application if issuance would tend to create a law enforcement problem, or would result in or add to an undue concentration of licenses. The bill would change the definition of undue concentration, and would provide that, notwithstanding the requirement that the department deny an application that would result in or add to an undue concentration of licenses, a license may be issued with respect to a nonretail license, a retail on-sale bona fide eating place license, a retail license issued for a hotel, motel, or other lodging establishment, as defined, a retail license issued in conjunction with a beer manufacturer's license, or a winegrower's license, if the applicant shows that public convenience or necessity would be served by the issuance, and with respect to any other license, if the local governing body of the area in which the applicant premises are located determines that public convenience or necessity would be served by the issuance.

Ch. 631 (AB 2178) Peace. Medi-Cal.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law authorizes the State Department of Health Services to implement a comprehensive program of managed health care plan services to Medi-Cal recipients

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

residing in clearly defined geographical areas.

This bill would authorize the State Department of Health Services, upon approval of the County of San Diego, to implement a multiplan pilot program, as defined, for the provision of Medi-Cal services in that county, and would authorize that county to establish advisory boards to review and comment on aspects of the multiplan pilot program.

This bill would exempt the County of San Diego when contracting with the State Department of Health Services for geographic health services from liability for specified damages, and would further specify that any contract entered into between the department and that county shall not be a contract for the benefit of third parties.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 632 (SB 2092) Watson. County administration of health services.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law authorizes the California Medical Assistance Commission to negotiate exclusive contracts with any county for the provision of, or the arrangement for the provision of, health care services under the Medi-Cal program.

This bill would authorize the Board of Supervisors of the County of Los Angeles to establish a commission for the provision or arrangement for the provision of health care services under the Medi-Cal program in all or a portion of the geographic area of the county.

The bill would also specify that the members of the commissions and governing bodies of local health initiatives in Los Angeles County and Kern County shall be deemed not to be interested in contracts in specified circumstances.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 633 (AB 757) Polanco. Mental health: Medi-Cal managed care.

(1) Existing law provides for the provision of health care benefits to eligible persons under the Medi-Cal program, which is administered by the State Department of Health Services.

Existing law provides for the establishment of local systems of managed care under the Medi-Cal program on a pilot program basis.

Under existing law, specified mental health services, including specified services administered by community mental health programs, may be provided to Medi-Cal beneficiaries pursuant to guidelines established by the State Department of Mental Health.

This bill would require the State Department of Health Services, in consultation with the State Department of Mental Health, to ensure that all systems for Medi-Cal managed care include a process for screening, referral, and coordination with medically necessary mental health services.

This bill would designate the State Department of Mental Health as the state agency responsible for the development and implementation of a plan to provide local mental health managed care for Medi-Cal beneficiaries. It would require the department to convene a steering committee to provide advice on the development of local mental health managed care plans, and would require the department to ensure that specified criteria are met in the development of the plans.

(2) This bill would require the State Department of Mental Health to implement managed mental health care for Medi-Cal beneficiaries through fee-for-service or capitated rate contracts negotiated with mental health plans, including counties, counties acting jointly, any qualified individual or organization, or a nongovernmental entity. It would set forth the requirements for the transfer of county matching funds and other funds to the department for the implementation of the contracts, under certain conditions, for claim and payment procedures under fee-for-service and capitated rate contracts, and for related administrative procedures. It would specify that these provisions shall be implemented only to the extent necessary federal waivers are obtained by the department, and that they shall become inoperative if more than 10% of all counties fail to become contractors, and no acceptable alternative contractors are available, or if

NOTE: Superior numbers appear as a separate section at the end of the digests.

more than 10% of all funds allocated for Medi-Cal mental health services must be administered by the department because no acceptable plan is available.

Existing law provides for the regulation of health care service plans under the Knox-Keene Health Care Service Plan Act of 1975.

This bill would provide that mental health plan contractors or capitated rate contracts for mental health services may be exempted from the provisions of the Knox-Keene Health Care Service Plan Act of 1975, subject to specified conditions.

This bill would require the State Department of Mental Health to adopt emergency regulations to implement these provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 634 (AB 876) Collins. Prisoners: restitution.

Existing law provides that in any case in which a prisoner owes a restitution fine, as specified, the Director of Corrections shall deduct a reasonable amount not to exceed 50% from the wages of a prisoner and shall transfer that amount, as specified to the State Board of Control for deposit in the Restitution Fund, a continuously appropriated fund in the State Treasury. Existing law also provides that the sentencing court shall be provided a record of those payments.

This bill, instead, would provide that in any case in which a prisoner owes a restitution fine, as specified, the Director of Corrections shall deduct a minimum of 20% or the balance owing on the fine amount, whichever is less, up to a maximum of 50%, rather than a reasonable amount not to exceed 50%, from the wages and trust account deposits, rather than from the wages, of the prisoner, unless prohibited by federal law, and shall transfer the amount as specified above.

The bill, in addition, would provide that in any case in which a prisoner owes a restitution order to a victim pursuant to existing provisions of law, as specified, the Director of Corrections shall deduct a minimum of 20% up to a maximum of 50% from the wages and trust account deposits of a prisoner, unless prohibited by federal law. If the restitution is owed to a person who has filed an application with the Victims of Crime Program, the director shall transfer that amount to the State Board of Control for direct payment to the victim, or payment shall be made to the Restitution Fund to the extent the victim has received assistance pursuant to that program. The bill would specify that the director shall deduct and retain from those deposits, unless prohibited by federal law, an administrative fee totaling 10% of any amount transferred to the State Board of Control pursuant to the above provisions for the purpose of reimbursing administrative and support costs of the restitution program. The bill also would specify that the sentencing court shall be provided a record of the payments.

This bill, in addition, would provide that in a case where a prisoner has both a restitution fine and a restitution order, the Department of Corrections shall collect the restitution order first.

Ch. 635 (AB 1147) Lee. Public contracts: state government.

(1) Existing law authorizes certain state public works contracts to include a provision for the substitution of equivalent securities for moneys withheld to ensure performance.

This bill would make those provisions applicable to State Department of Health Services cooperative agreement contracts.

(2) Existing law authorizes specified state agencies contracting with a community-based private nonprofit agency to make advanced payments.

This bill would include the Office of Statewide Health Planning and Development within that provision.

Ch. 636 (AB 1799) Speier. Public employees: retirement: health benefits.

(1) The Public Employees' Retirement Law authorizes public agencies to exclude various employee categories from contracts for membership in the retirement system.

This bill would make nonsubstantive technical changes in various provisions.

(2) The Public Employees' Medical and Hospital Care Act prescribes eligibility for health plan coverage on the basis of employment and retirement status.

This bill would enable specified local employees who are receiving disability retire-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment allowances to obtain health plan coverage.

Ch. 637 (AB 1882) Bates. Adult day health care.

Existing law provides for the provision of adult day health care services to Medi-Cal eligible older persons who meet specified additional criteria.

This bill would add residence in an intermediate care facility for the developmentally disabled-habilitative to the additional criteria.

Ch. 638 (AB 2221) Martinez. Political Reform Act of 1974: reports: filing.

Under the existing Political Reform Act of 1974, when a report or statement or copies thereof required to be filed with any officer under the act have been sent by first-class mail addressed to the officer, it is deemed to have been received by the officer on the date of the deposit in the mail.

This bill would grant the same operative effect to any report or statement of copies thereof sent by any guaranteed overnight delivery service.

This bill would permit any report or statement or copies thereof required to be filed under specified provisions to be faxed by the applicable deadline, provided that the originals or paper copies are sent by first-class mail or by any other guaranteed overnight delivery service within 24 hours of the applicable deadline, as specified.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 639 (AB 2709) Cortese. Tissue banks.

Existing law requires every tissue bank operating in California to have a current valid license. Existing law provides an exemption from any license fee for any tissue bank operated by the state or any state agency or by a district, city, county, or city and county, or any subdivision thereof.

This bill would exempt from any license fee requirement any tissue bank operated by a mothers' milk bank, as defined, that has applied for licensure prior to January 1, 1995.

Ch. 640 (AB 2731) Murray. Allied health personnel: advisory committee.

Existing law requires an advisory committee of the Office of Statewide Health Planning and Development to conduct a study regarding the current and potential role of allied health professionals in health care delivery in medically underserved areas.

This bill would require the statewide office to submit a report to the Governor and to the Legislature, on or before June 30, 1995, regarding the work completed but not reported by the advisory committee.

This bill would repeal these provisions and the existing provisions of law relating to the advisory committee on January 1, 1996.

Ch. 641 (AB 2735) Pringle. Booking fees: cities.

Existing law authorizes a county to collect a criminal justice administration fee, as specified, from a person booked into a county jail and subsequently convicted of any criminal offense related to the arrest if the person is not one for whom a local public entity, as specified, must pay a booking fee or may recover payment of a booking fee from the person if he or she is convicted.

This bill would specify that the conviction related to the arrest need not be the offense for which the person was originally booked.

Existing law authorizes any city, special district, school district, community college district, college, university, or other local arresting agency whose officer or agent arrests a person to recover any criminal justice administrative fees imposed by a county, from the arrested person if the person is convicted of any criminal offense related to the arrest.

This bill would authorize a city which books or processes persons to a jail administered by it and which does not otherwise incur an administrative fee for an arrested person

NOTE: Superior numbers appear as a separate section at the end of the digests.

from the county, to establish and collect an administrative fee pursuant to the same standards and procedures set forth above for a local arresting agency recovering criminal justice administrative fees imposed by a county, from an arrested person if the person is convicted of any criminal offense related to the arrest. The bill also would provide that any city whose agent or officer arrests a person is entitled to recover from that person a criminal justice administration fee if the person is convicted of any criminal offense related to the arrest. The bill would further specify that this authority shall not be construed to limit the ability of any city to enter into agreements with other local arresting agencies to impose the fee on local arresting agencies.

Ch. 642 (AB 2755) Lee. Medi-Cal managed care.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

The Knox-Keene Health Care Service Plan Act of 1975 provides for the licensure of various types of health care service plans.

This bill would authorize the boards of supervisors of counties selected by the Director of Health Services with concurrence of the county, to establish a health authority for delivery of health services.

This bill would, in addition, specifically authorize the Board of Supervisors of Alameda County to establish a health authority for delivery of services to certain Medi-Cal populations.

This bill would also specifically authorize the City and County of San Francisco to create a health authority for the provision of health services.

This bill would, in addition, set forth certain requirements to be met in respect to a health authority established pursuant to its provisions that does not fully meet all the financial requirements applicable to a health care service plan licensed under the Knox-Keene Health Care Service Plan Act of 1975.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 643 (AB 2826) Allen. Schools: first aid training.

Existing law requires the governing board of a school district, county superintendent of schools, or principal of any public or private school to equip the school with a first aid kit, as specified. Existing law authorizes specified money to be used for members of a school district police department to be trained in, among other things, CPR and first aid. Existing law requires the study of CPR as one of the minimum requirements for receiving the professional multiple or single subject teaching credential.

This bill would declare the Legislature's intent to encourage school districts to develop a program whereby the staff and pupils in the district would understand the importance of first aid and cardiopulmonary resuscitation training and would have the opportunity to develop these skills.

This bill would authorize a school district or school, individually or jointly with another school district or school, to provide a comprehensive program in first aid or CPR, or both. The bill would specify guidelines to be used in developing the program and would require each school district or school that develops a program to report to a specified committee of the Legislature on or before January 1, 1997, as to the success of the program and any concerns raised in the program including information regarding the ratio of trained staff to the total pupil enrollment per school.

Ch. 644 (AB 2831) Mountjoy. Airports: land use commissions: plans.

Existing law authorizes the Governor to take various actions in accordance with the State Emergency Plan and programs for the mitigation of the effects of an emergency in the state.

This bill would include within those actions the provision for the use of public airports.

Under existing law, each county in which there is an airport served by a scheduled airline and, with a specified exception, each county with an airport operated for the benefit of the general public, was required, prior to June 30, 1993, and permitted thereafter, to establish an airport land use commission. The commission is required to formulate

NOTE: Superior numbers appear as a separate section at the end of the digests.

a comprehensive land use plan to provide for the orderly growth of the airport and the area surrounding the airport within the jurisdiction of the commission.

This bill would impose a state-mandated local program by reinstating the requirement to establish an airport land use commission, but would provide an alternative procedure for the formulation of the land use plan other than by establishing the commission, under specified conditions.

The bill would also require an airport land use commission that formulates, adopts or amends a comprehensive airport land use plan to be guided by the Airport Land Use Planning Handbook published by the Division of Aeronautics of the Department of Transportation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 645 (AB 2839) Solis. Skilled nursing facilities: registered nurses.

Existing law requires the State Department of Health Services to establish certain standards and regulations for health facilities, including staffing with duly qualified licensed personnel, based on the type of health facility and the needs of the persons served by those facilities.

This bill would prohibit those standards and regulations from requiring the use during the evening and night shifts of a registered nurse for the performance of any service or staffing of any position in skilled nursing facilities that may be lawfully performed or staffed by a licensed vocational nurse if the facility is unable to obtain a registered nurse. It would require the facility to make a good faith effort to obtain a registered nurse, and if it is unable to do so, to document this effort in its records.

The bill would authorize the department to require the facility to provide additional staffing if the level of care is determined to be inadequate.

Since the knowing violation of these provisions would be a misdemeanor under provisions of existing law, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 646 (AB 2879) V. Brown. Medi-Cal.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law authorizes nurse practitioners to provide, under the Medi-Cal program, specified health care services provided in a long-term health care facility.

This bill would revise the scope of those duties that may be performed by a nurse practitioner under the Medi-Cal program.

Ch. 647 (AB 2934) Richter. Contractors.

Existing law provides for an advisory committee to recommend grant awards for the support of courses of study in construction management and requires that the membership of the committee consist of 11 members, including at least one representative from each of a list of specified contractor associations.

This bill would name the advisory committee, expand and revise its membership, provide for the appointment and terms of its members, and specify its mission and duties.

Ch. 648 (AB 2985) Hannigan. University of California: Community-Based Health Professions Education Partnership Program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the University of California has the exclusive jurisdiction in public higher education over graduate instruction in the profession of medicine.

This bill would establish a Community-Based Health Professions Education Partnership Program to be administered by the University of California. The purpose of the program would be to encourage the development of undergraduate medical and other health professional clerkships in primary care.

This bill would specify that these provisions would not apply to the University of California unless the Regents of the University of California, by resolution, make them applicable.

The bill would specify that funding for this program shall be provided as specified in the Supplemental Report of the Budget Act of 1994.

Ch. 649 (AB 3059) Johnson. Bail.

Under existing law, the undertaking or deposit of bail is forfeited if the defendant fails to appear for certain specified proceedings. Existing law provides for the court, on its own motion, to direct the order of forfeiture to be vacated and the bond exonerated upon the appearance or surrender of the defendant within a specified period. Existing law requires, for all other orders to vacate a forfeiture, 10 days' prior notice by the bail to the applicable prosecuting agency, unless notice is waived by the agency.

This bill would require the court, on its own motion and at the time the defendant first appears in court on the case in which the forfeiture was entered, to direct the order of forfeiture to be vacated and the bond exonerated. The bill would further require the court, with respect to a defendant surrendered to custody by the bail or arrested in the underlying case within a specified period, on its own motion, to direct the order of forfeiture to be vacated and the bond exonerated if either (1) the defendant is surrendered or arrested within the county where the case is located and is subsequently released from custody prior to an appearance in court, or (2) the defendant is surrendered or arrested outside the county where the case is located.

This bill also would provide that if the court fails to so direct the order of forfeiture to be vacated and the bond exonerated on its own motion, then the surety's or depositor's obligations under the bond shall be immediately vacated and the bond exonerated. The bill would provide that the court, in its discretion, may require that the bail provide 10 days' prior notice to the applicable prosecuting agency before vacating the forfeiture.

Ch. 650 (AB 3141) Alpert. County superintendents of schools: public disclosure: fiscal management of school districts and county offices of education.

(1) Under existing law, the superintendent of schools of each county, among other things, is required to submit 2 reports during the fiscal year to the county board of education regarding the financial and budgetary status of the county office of education.

This bill would state that the county superintendent of schools is not responsible for the fiscal oversight of the community colleges in the county, but may perform financial services on behalf of those community colleges.

(2) Existing law authorizes the governing board of a school district and a county superintendent of schools to establish and maintain educational data-processing centers. Under existing law, the California Education Information System has been developed to establish and maintain an integrated statewide information system for education.

This bill would require a specified governing board, with the assistance of a team of certain school district and county office of education personnel volunteers and the advice of a specified committee, to establish telecommunication standards, by July 1, 1995, for use by the State Department of Education and county superintendents of schools in purchasing computer hardware or software for school business and administration. The bill would require the department to publish those standards, as specified, and to disseminate those standards to county superintendents of schools by July 15, 1995, and would specify that any new or replacement equipment purchased after that date may meet those standards, as specified.

This bill also would require county superintendents of schools to consult with school districts regarding their telecommunication needs for maintaining and sharing financial information at the local level, and would require the county offices of education to

NOTE: Superior numbers appear as a separate section at the end of the digests.

develop specified standards, by January 1, 1996, for use at the local level, as specified. The bill would also specify that school districts would not be required to replace current hardware or software as a result of the act.

The bill would establish a fund to carry out the purposes of the act relating to telecommunication, for expenditure as specified, funded by any offsets made to specified principal apportionments. This bill would make that funding provision inoperative as of January 1, 2000.

(3) Existing law authorizes governing boards of education to incur debt for various purposes, including the purpose of financing school facilities. Certain debt instruments, such as school facilities bonds, are required to be approved by the local voters, and other debt instruments, such as certificates of participation, do not require voter approval.

This bill would require a school district to notify the county superintendent of schools and the county auditor, upon approval by the governing board of the school district to proceed with the issuance of participation or revenue bonds. The bill would authorize either of those county officials to comment publicly on the capability of the school district to repay the debt obligation. The bill would also require specified county superintendents to notify the Superintendent of Public Instruction, upon approval by the county board of education to proceed with the issuance of participation or revenue bonds and would authorize the Superintendent of Public Instruction to comment publicly on the ability of the county office of education or school district to repay the debt obligation.

(4) Existing law requires the State Department of Education, with the assistance of the Controller, the Department of Finance, the Auditor General, and private financial management and auditing firms to design and implement a system to review and assess, for purposes of establishing a training schedule, the capacity of school districts and offices of the county superintendents of schools to implement certain financial practices. Existing law also required the department to take steps to provide school business personnel staff development and training programs, as a pilot project in the 1986–87 fiscal year if funds were appropriated. Existing law also makes a statement of legislative intent regarding school business personnel staff development in-service training programs.

This bill would repeal these provisions.

(5) Under existing law, a County Office Fiscal Crisis and Management Assistance Team is established to, among other things, provide fiscal management assistance to school districts or county offices of education.

This bill would require that team to facilitate training for various school district and county office of education personnel on fiscal accountability and related topics, to provide fiscal management training to certain county office of education staff, and to produce a calendar that publicizes all of the fiscal training services available, as specified. The bill would change certain references from county offices of education to county superintendents of schools. The bill would state the intent of the Legislature that money to fund these additional responsibilities be appropriated in the annual Budget Act.

(6) Existing law authorizes school districts and county offices of education to provide health and welfare benefits to employees upon their retirement and to be self-insured for workers' compensation claims. Existing law requires each school district or county office of education to develop a budget for the ensuing fiscal year, as specified.

This bill would require the superintendent of a school district or a superintendent of schools of a county that provides those benefits under certain conditions or that is self-insured for those claims to provide information annually to the governing board of the school district or county office of education, as appropriate, regarding the estimated accrued but unfunded costs of those benefits or claims, as specified. The bill would require the governing board to disclose to the public and to certify to the county superintendent of schools the amount of money, if any, that it has decided to reserve in its budget for the cost of those benefits or those claims, and any annual budget revisions that may be necessary to account for that budget reserve, as specified. The bill also would require the county board of education annually to certify to the Superintendent of Public Instruction the amount of money, if any, that has been reserved in the

NOTE: Superior numbers appear as a separate section at the end of the digests.

budget of the county office of education for those benefits or those claims.

This bill would require the superintendents of school districts to forward to the county superintendent of schools any revisions to the school district's current year budget that are necessary to fulfill the terms of an adopted collective bargaining agreement, as specified.

(7) Under existing law, a school district governing board and the exclusive bargaining representative of school district employees are required to meet and negotiate regarding various aspects of public school employment.

This bill would require a school district to provide to the county superintendent of schools, upon request, all information relevant to provide an understanding of the financial impact of any final collective bargaining agreement.

(8) Because the bill would impose additional duties upon school districts, county superintendents of schools, and county offices of education, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 651 (AB 3163) Frazee. Clinics: health facilities: adult day health care: home health agencies: records: electronic recordkeeping systems.

Existing law requires health care providers, as defined, including clinics, to maintain health records of patients for at least 7 years, and to permit access to those records by patients. Existing law requires the State Department of Health Services to adopt regulations to carry out the purposes of the clinic licensure law.

This bill would require certain providers of health care that use only electronic recordkeeping systems to utilize various mechanisms regarding the security, access, safety, integrity, maintenance, destruction, and confidentiality of these records. The bill would clarify that these provisions do not exempt prescribed providers from the requirement of maintaining original copies of records for those patient records that may not be electronically recorded. It would also provide that these provisions do not affect existing regulatory requirements regarding the access, use, disclosure, confidentiality, and maintenance of health information in patient records by health care providers.

The bill would also provide that these provisions do not prohibit any provider of health care services from maintaining patient records electronically.

Because willful violation of these provisions would be a misdemeanor under existing provisions of law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 652 (AB 3221) Jones. Medi-Cal: case management services.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. One of the methods by which services are obtained under the Medi-Cal program is pursuant to contracts between the department and primary care case management providers.

This bill would permit the board of supervisors of Tulare County and the board of supervisors of San Joaquin County to establish, for each respective county, by ordinance, a commission to negotiate a primary care case management contract with the depart-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment and arrange for the provision of primary care case management services.

Ch. 653 (AB 3260) Bornstein. Health: health coverage: controlled substances.

(1) Existing law provides for the licensure of health care service plans administered by the Department of Corporations.

Existing law also provides for the licensure of disability insurance policies and nonprofit hospital service plans administered by the Commissioner of Insurance. Existing law requires each health care service plan, disability insurance policy, and nonprofit hospital service plan to meet certain requirements.

This bill would require a health care service plan, disability insurance policy, and a nonprofit hospital service plan, as defined, that includes terms that require binding arbitration to settle disputes and that restrict, or provide for a waiver of, the right to a jury trial to include a specified disclosure.

This bill would require any health care service plan, disability insurance policy, or nonprofit health care service plan that includes a term that requires binding arbitration in case of a medical malpractice claim or dispute to provide for the selection of a neutral arbitrator by the parties in those cases or disputes for which the total amount of damages claimed is $50,000 or less. It would provide that the single neutral arbitrator shall have no jurisdiction to award more than $50,000. This bill would provide that certain procedures for court appointment of an arbitrator shall be followed if the parties are unable to agree on the selection of an arbitrator. It would expressly prohibit waiver of these requirements.

(2) Existing law requires certain judgments against specified licensed health care professionals by a court to be reported by the clerk of the court to the licensing agency.

This bill would require an arbitration under a health care service plan contract for any death or personal injury resulting in an award for an amount in excess of $30,000 to be a judgment for purposes of the above-described provision of law.

(3) Existing law provides for the licensure and regulation of health facilities administered by the State Department of Health Services. Existing law, the Pharmacy Law, imposes requirements regarding the content and administering of prescriptions.

This bill would authorize health facilities, as defined, to establish and maintain injection card systems for controlled substances that would allow an outpatient to receive injections at the facility pursuant to a prior written order by a physician and surgeon. It would require that the facility develop a written protocol including certain information regarding the use of the injection card system prior to its implementation.

Since the knowing violation of the provisions regarding health care service plans, and the Pharmacy Law, would be a misdemeanor under provisions of existing law, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 654 (AB 3350) Gotch. Local agencies.

Existing law defines the term principal county for purposes of the Cortese-Knox Local Government Reorganization Act of 1985.

This bill would revise that definition.

Existing law, with specified exceptions, prohibits a city or district from providing new or extended services outside its jurisdiction without prior written approval of the local agency formation commission. Existing law permits the commission to authorize a city or district to provide new or extended services outside its jurisdiction but within its sphere of influence in anticipation of a later change of organization. These provisions do not apply to an extended service that a city or district was providing on January 1, 1993.

This bill would state that these provisions do not apply to an extended service that a city or district was providing on January 1, 1994, and would make related changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law specifies the powers of the local agency formation commission.

This bill would grant the commission the power to authorize a city or district to provide new or extended services outside its jurisdictional boundaries pursuant to the above provision.

Existing law permits a change of organization or reorganization to be made subject to any of specified terms or conditions.

This bill would include as such a condition certification by the California Coastal Commission of an amendment to the local coastal program of a city or a county.

Existing law permits any person or affected agency to file a written request with the executive officer of the commission requesting amendments to, or reconsideration of, any resolution adopted by the commission making determinations.

This bill would require the request to state the specific modification to the resolution being requested and would make other changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 655 (AB 3353) Gotch. Subdivision Map Act: maps: certificates of compliance.

(1) Existing law, the Subdivision Map Act, prescribes the permissible types of improvements, and construction fulfillment requirements for land which is not a subdivision of 5 or more lots. Existing law requires that information regarding these matters be noted on the parcel map, or the instrument evidencing the waiver of the parcel map, as specified. Existing law also provides that local ordinances may require a tentative map where a parcel map is otherwise required.

This bill would provide that the requirements relating to improvements on the subdivisions described above, shall apply notwithstanding those provisions of existing law allowing a local ordinance to require a tentative map in place of a parcel map.

(2) The Subdivision Map Act allows any person owning real property, or a vendee of that person, as specified, to request, and requires a local agency to determine, whether the real property complies with the provisions of the act and any local ordinances enacted pursuant to it, and to subsequently issue a certificate of compliance or a conditional certificate of compliance reflecting that determination.

This bill would require any certificate of compliance or conditional certificate of compliance to include a notice describing the purpose and effect of the certificate. The bill would require that the certificate include certain information. It would authorize local agencies to process applications for certificates of compliance or conditional certificates of compliance concurrently, and to record a single certificate for multiple parcels.

This bill would provide that its provisions are not intended to either enlarge or diminish the regulatory authority of a local agency, nor to support or overrule specified case authority.

(3) Because this bill would establish new procedures with respect to subdivision improvements and certificates of compliance, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 656 (AB 3407) Committee on Public Employees, Retirement and Social Security. State Teachers' Retirement System: information program.

The State Teachers' Retirement Law sets forth the duties of the Teachers' Retirement Board in providing services and overseeing the delivery of benefits to members of the State Teachers' Retirement System.

This bill would require the board to offer a midcareer retirement information program for the benefit of all members of the system, to assist members in understanding various aspects of personal and financial planning and benefits offered by the system. The bill would appropriate $100,000 from the Teachers' Retirement Fund to the board for startup costs. It would require the board to assess a participation fee for the recovery

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the costs of the program.

Ch. 657 (AB 3497) B. Friedman. Physicians and surgeons: family medicine.

Existing law, the Medical Practice Act, provides for the licensure and regulation of physicians and surgeons administered by the Medical Board of California. Existing law sets forth the required clinical instruction for applicants for licensure as a physician and surgeon and specifies the required minimum amounts of instruction.

Under existing law, clinical instruction is required in surgery, medicine, pediatrics, obstetrics and gynecology, and psychiatry.

This bill would add 4 additional weeks of clinical instruction in family medicine to the instruction required to be completed by applicants. It would specify that this added requirement applies only to applicants for licensure who graduate from medical school or a school of osteopathic medicine after May 1, 1998. The bill would provide that medical schools located outside of California may fulfill this requirement instead by a required clinical course in primary care medicine, provided that the school meets certain other criteria, and would repeal this provision on June 30, 1999.

Ch. 658 (AB 3568) Margolin. Earthquake insurance.

Existing law requires the offer of earthquake insurance coverage to disclose certain information, including any deductible related to earthquake damage.

This bill would provide that every policy of residential property insurance or policy endorsement covering an individually owned condominium unit for loss or damage from earthquakes shall disclose, in a specified typeface, specified loss assessment coverage information if it excludes, or limits or changes coverage for loss assessment, as specified. The bill would require the Insurance Commissioner to issue a bulletin that specifies the language of the required disclosure.

Ch. 659 (AB 3630) Karnette. State real property: Department of General Services: City of Long Beach.

Existing law authorizes the Director of General Services to lease, lease-purchase, or lease with an option to purchase real property for the use of any state agency, but prohibits the director from entering into an office space lease-purchase agreement or a lease with an option to purchase with an initial option purchase price over $2,000,000, unless specifically authorized by the Legislature.

This bill would authorize the Director of General Services, after providing notice to the Chairperson of the Joint Legislative Budget Committee, as specified, to enter into an agreement to lease-purchase finance or lease with an option to purchase, with an initial option purchase price that exceeds $2,000,000, for the purpose of providing approximately 230,000 square feet of office, warehouse, parking, and related facilities to consolidate the operations of state agencies in Long Beach. This bill would require an acquisition of real property pursuant to these provisions to be made in accordance with existing bidding procedures. This bill would condition the acquisition of the facilities on the cost of that acquisition being no greater than the cost of leasing and operating an equivalent amount of office space, as specified.

This bill would authorize the State Public Works Board to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance the acquisition of the facilities authorized by the bill. This bill would provide that the authorized costs of facilities shall not exceed $75,000,000.

This bill would authorize the Director of General Services to sell, lease, or exchange the existing state office and parking facilities located at 245 West Broadway Street in the City of Long Beach, as specified. This bill would require that the net proceeds from the sale, lease, or exchange of these facilities be applied toward any obligations undertaken by the director in securing consolidated facilities as authorized by this bill.

Ch. 660 (AB 3670) Horcher. Shorthand reporters.

Existing law authorizes the Certified Shorthand Reporters Board to establish, by regulation, a system for an inactive category of licensure.

This bill would require the board to establish an inactive category of licensure, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified.

Existing law specifies certain causes for suspension, revocation, or denial of certification as a shorthand reporter.

This bill would additionally provide as a cause for that action the loss or destruction of stenographic notes, whether on paper or electronic media, which prevents the production of a transcript, due to negligence of the licensee.

Existing law regulates court reporting schools, as defined.

This bill would require schools, as defined, intending to offer a court reporting program to notify the board, as specified, with respect to approval and recognition.

Existing law provides that the board may grant recognition to a provisionally recognized court reporting school that has been in continuous operation for no less than 3, and no more than 5, consecutive years from the date provisional recognition was granted and requires the board to deny recognition after the 5-year period, as provided.

This bill would provide instead that the board may recognize a provisionally recognized court reporting school in continuous operation for no less than 3 years, as specified, and would permit the board to extend the 3-year period for not more than one year, as provided.

The bill also would require recognized and provisionally recognized schools to include specified information in school or course catalogs concerning minimum requirements that a court reporting program must meet in order to be recognized.

The bill would also, with respect to oral depositions, revise certain requirements as to qualifications of the deposition officer and transcription of transcripts, as specified.

This bill would incorporate additional amendments to Section 8025 of the Business and Professions Code proposed by AB 3657, contingent upon the prior enactment of that bill.

Ch. 661 (AB 3793) Eastin. Special education: out-of-state contractors.

(1) Under existing law, before contracting with a nonpublic, nonsectarian school or agency outside of the State of California for placement of an individual with exceptional needs, a local education agency, as specified, is required to locate an appropriate program within the state, and to document those efforts. If an appropriate program is not available, the local education agency is required to petition the State Board of Education for a waiver to place the individual in an out-of-state program.

This bill would delete those waiver requirements.

(2) Under existing law, a nonpublic, nonsectarian school or agency that seeks certification as a special education program provider is required to file an application with the Superintendent of Public Instruction. The superintendent is required to conduct an onsite review of the facility and program prior to certification and within 5 years of certification, as specified, and the certification is valid for a period of not longer than 5 years.

This bill, instead, would require the superintendent to conduct the second onsite review within 4 years of certification, and would authorize the school or agency to be certified for a period of not longer than 4 years.

This bill also would change the date by which the superintendent is required to notify the county superintendent of schools and special education local plan area in which a proposed new or expanded nonpublic, nonsectarian school or agency is located of that school or agency's intent to seek certification, and the date by which the certification will become effective. The bill also would specify the dates between which a school or agency is required to file the application for certification.

(3) Under existing law relating to special education, no contract for special education and related services provided by a nonpublic, nonsectarian school or agency may be reimbursed by the state if the contract covers special education, related services, administration, or supervision by a former employee of the school district, special education local plan area, or county office, as defined, within the last 365 days.

This bill would create an exception to that provision. The bill also would state that those provisions shall not apply to employees of school districts, special education local plan areas, or county offices, who are available to provide designated instruction and services, as specified.

(4) Existing law requires a nonpublic, nonsectarian school or agency to submit a list

NOTE: Superior numbers appear as a separate section at the end of the digests.

of uniform tuition fees for providing services, as a condition of certification.

This bill, instead, would require a nonpublic, nonsectarian school or agency to submit a list of uniform tuition fees for services, as a condition of certification, and would require the superintendent to ensure that tuition fee information is uniformly collected from those schools and agencies that seek certification.

The bill would require the superintendent to not certify or to decertify a nonpublic, nonsectarian school or agency that does not submit that list by a specified date. The bill would provide that the provisions in (4) would become inoperative as of June 30, 1999, and would be repealed as of January 1, 2000, as specified.

Ch. 662 (AB 3823) Committee on Insurance. Insurance.

Existing law authorizes domestic incorporated insurers to invest their assets, as specified.

This bill would require those insurers to file a report with the Insurance Commissioner, as specified, disclosing material acquisitions and dispositions of assets or material nonrenewals, cancellations, or revisions of ceded reinsurance agreements, as specified.

Existing law regulates insurers transacting financial guaranty insurance.

This bill would revise these provisions with respect to reinsurance requirements and would make technical and clarifying changes.

Ch. 663 (SB 17) Russell. Foster care placement: siblings.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, administered by each county, under which a combination of federal, state, and county funds are used to pay for the costs of foster care for qualified children.

Existing law establishes AFDC-FC program rates for children placed in a licensed or approved family home with a capacity of 6 or less, or in an approved home of a relative or nonrelated legal guardian.

This bill would permit the State Department of Social Services to establish a rate to supplement this basic rate for the provision of additional shelter needs for children placed with their siblings. This provision would be implemented only if and when the director has determined that the federal government has approved state plan amendments required by the bill for implementation of this supplemental rate and that federal funding in accordance with these amendments becomes available.

Existing law declares the Legislature's intent to maintain the continuity of the family unit by ensuring that siblings will be placed in foster care together, as specified. Existing law provides for the placement of dependent children of the juvenile court in foster care, as specified.

This bill would require diligent effort to be made in all out-of-home placements of dependent children, including those with relatives, to maintain sibling togetherness and contact, unless sibling separation is in the best interest of the child. The bill would provide that when maintaining sibling togetherness is not possible, diligent effort shall be made, and a plan of care prepared, to provide for ongoing and frequent interaction among siblings until family reunification is achieved or, if parental rights are terminated, during permanency planning. Under the bill, if the court determines by a preponderance of the evidence that sibling interaction is detrimental to a child, the reasons for the determination shall be noted in the court order, and interaction may be suspended.

The bill would also require periodic review of the reasons for suspension of sibling interaction until sibling interaction can be safely resumed, at which time the plan of care is to be revised accordingly. The bill would specify that the sibling who is a dependent child and his or her appointed guardian ad litem or representative shall have the right to comment on the plan of care, and would require the sibling who is a dependent child to be given an opportunity to comment and express personal preferences if of sufficient age and understanding.

The bill would also make conforming changes.

Because the bill would require an increased level of service by local officials, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 664 (SB 245) Bergeson. Transportation: public transit subsidies.

Under the Mills-Alquist-Deddeh Act, in order to be eligible for an allocation of state transit assistance funds, a transit operator is required to maintain a specified ratio of fare revenues to operating cost. Until January 1, 1995, liability and casualty insurance premiums, and payments in settlement of claims against an operator, are excluded from operating costs in calculating an operator's compliance with the prescribed ratio.

This bill would extend that exclusion until January 1, 1996.

Ch. 665 (SB 351) Committee on Budget and Fiscal Review. Public social services.

Under the State Supplementary Program (SSP) for the aged, blind, and disabled, payments are made to eligible individuals and married couples in specified amounts.

Existing law requires, commencing September 1, 1994, that a 2.3% decrease be made in aid payment levels to aged, blind, and disabled persons under the SSP program.

Existing law also provides for the In-Home Supportive Services (IHSS) program, under which services are provided to aged, blind, and disabled persons in order to enable them to remain in their own homes.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons, including aged, blind, and disabled persons, are provided with health care services. One category of Medi-Cal eligibility is that of medically needy persons, with an individual having to pay a share of costs to be eligible for Medi-Cal under that category of eligibility.

This bill would specify that any aged, blind, or disabled person eligible for Medi-Cal for the month of August 1994 shall not be responsible for paying his or her share of costs if the person's eligibility was interrupted or terminated by the SSP maximum aid payment reduction, if the person is otherwise eligible to receive benefits without a share of costs.

Existing law requires the State Department of Health Services, effective January 1, 1995, to reduce reimbursements to pharmacists by 50¢ per prescription.

This bill would specify that this provision relates to drug prescriptions.

Existing law contains provisions for targeted case management services, as defined, under the Medi-Cal program.

This bill would make technical nonsubstantive changes in these provisions.

Existing law provides for the Medi-Cal Administrative Claiming process, under which local governmental agencies could obtain federal matching funds for participation with the department in this process.

This bill would remove the word Medi-Cal from the name of this process, and make other technical nonsubstantive changes.

Under existing law, moneys in the Health Care Deposit Fund are used for the purposes of the Medi-Cal program.

Existing law requires local governmental agencies participating in the Administrative Claiming process to pay an amount from nonfederal revenues necessary to yield a combined total reimbursement of $200,000,000 to the state in the 1994–95 fiscal year and subsequent fiscal years, for deposit in the Health Care Deposit Fund, with these moneys to be continuously appropriated to the department for support of the Medi-Cal program.

This bill would, instead, require that this payment be deposited in the Administrative Claiming Fund, which is created by the bill, for transfer to the Health Care Deposit Fund.

Existing provisions of the Budget Act of 1994 appropriate funds for various specified purposes, including health care services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that $100,000 of funds appropriated in Item 4260-111-001 of the Budget Act of 1994 for the 1994–95 fiscal year shall be used for services or facilities provided by a domestic violence program in the San Fernando Valley of Los Angeles County.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 666 (SB 493) Kelley. Cardiac catheterization.

Existing law authorizes the Office of Statewide Health Planning and Development to establish and administer a pilot program to test the safety and cost-effectiveness of performing cardiac catheterizations in up to 7 freestanding cardiac catheterization laboratories, as defined.

Existing law repeals these provisions on January 1, 1994, unless a report prepared by the office recommends that a permanent licensure category be created for freestanding cardiac catheterization laboratories, in which case these provisions would be repealed when legislation is enacted to create a supplemental service licensure category or on January 1, 1996, whichever occurs first.

This bill would repeal the pilot program. It would also permit the State Department of Health Services to license those freestanding cardiac catheterization laboratories that were in active status in the pilot program as of December 31, 1993, and that meet the requirements set forth in the regulations of the department that govern cardiac catheterization laboratories operating in hospitals without facilities for cardiac surgery, any similar regulations developed by the state department specifically for these freestanding cardiac catheterization laboratories, and certain other regulations that govern clinics and cardiovascular catheterization laboratories.

This bill would require an application for licensure or annual renewal to be accompanied by a fee of $1,000. This bill would make licensed freestanding laboratories subject to suspension and revocation procedures applicable to clinics licensed by the department.

This bill would require the freestanding laboratory to have a system for ongoing evaluation of the operation of the laboratory and the services it provides, including a written plan with certain components, and written procedures for evaluating the utility of services.

This bill would authorize the freestanding laboratory to perform only certain diagnostic procedures, and would require that the laboratory perform procedures only on adult patients and on an outpatient basis. It would also require the laboratory to define the appropriate patient characteristics for safe performance of procedures in a laboratory, and evaluate these criteria as part of its quality assurance process.

Ch. 667 (SB 555) Hart. Occupational safety and health: pesticide poisoning.

Existing law requires every physician providing treatment to an injured employee for pesticide poisoning or a condition suspected to be pesticide poisoning, to file a complete report with the Division of Labor Statistics and Research.

This bill would additionally require every physician providing treatment for pesticide poisoning or a condition suspected to be pesticide poisoning to file, within 24 hours of the initial examination, a complete report with the local health officer by facsimile transmission or other means. The bill would provide that the physician shall not be compensated for the initial diagnosis and treatment unless the report to the Division of Labor Statistics and Research is filed with the employer, or if insured, with the employer's insurer, and certifies that a copy of the report was filed with the local health officer.

Ch. 668 (SB 1405) Beverly. Uniform laws.

Existing provisions of law make reference to provisions of commercial law.

This bill would update those references.

Existing provisions governing negotiable instruments and bank deposits and collections were substantially revised by 1992 legislation that became effective January 1, 1993, replacing similar provisions on the same topics.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would add transition provisions, generally declaring that the new provisions are to be construed as a continuation of the old.

Existing provisions of law specify the membership of the Commission on Uniform State Laws.

This bill would revise these provisions.

Ch. 669 (SB 1414) Craven. Mobilehomes: purchase documents: real estate brokers.

(1) Existing law requires mobilehome parks to be constructed and operated under a permit issued by the Department of Housing and Community Development or by a city or county that has assumed responsibility for enforcement of the Mobilehome Parks Act within its jurisdiction. Existing law requires the department to adopt regulations setting forth various standards for the construction and operation of mobilehome parks. These regulations, as well as statutory standards, are required to be enforced by the department or local enforcement agency. Willful violations are a misdemeanor, and are subject to the imposition of a civil penalty of $500 for each violation and each continuing day of violation. Violations are also subject to civil actions brought by the enforcement agency to prevent, restrain, correct, or abate violations.

Existing law requires, for every sale by a dealer of a new or used manufactured home or mobilehome, the dealer to execute in writing and obtain the buyer's signature on a purchase order, conditional sales contract, or other document evidencing the purchase. Existing law requires the purchase order, conditional sales contract, or other document to contain specified data.

This bill would authorize, with regard to the sale of a manufactured home or mobilehome being installed on a foundation system pursuant to a specified statute, a dealer who is also licensed as a real estate broker to include the sale of the manufactured home or mobilehome in the purchase document for the underlying real property, provided that the data required to be included in the purchase document for a manufactured home or mobilehome is included. Since a willful violation of this provision would be punishable as a misdemeanor, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 670 (SB 1500) Hughes. County retirement: division of community property.

Existing law requires the court, in legal separation or marriage dissolution proceedings to which members of certain public retirement systems are parties, to make specified orders, including orders dividing the accumulated community property contributions and service credit, as provided in certain provisions governing public retirement systems.

This bill would add similar provisions to the County Employees Retirement Law of 1937 that would become operative in a county if adopted by the board of supervisors.

Ch. 671 (SB 1544) Maddy. Horseracing: satellite wagering.

Existing law provides, with respect to various breeds of horses, that in order to encourage and develop the racing of those horses, whenever the California State Fair and Exposition or a district or county fair conducts a program of horseraces on which there is parimutuel wagering, it may provide a program of horseracing of the specific breed on the same days that it provides a program of other types of horseracing, if sufficient horses are available to provide competition in one or more horseraces. Existing law also provides that these horse events may be in addition to the customary number of thoroughbred, quarter horse, or standardbred events.

This bill would repeal these provisions, and would instead require state designated fairs, to the extent practicable, to provide a program of mixed breed racing whenever the fair conducts a program of horseraces.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 672 (SB 1609) Hill. Performance and Results Act of 1993.

(1) Existing law, known as the Performance and Results Act of 1993, requires the Department of Finance to develop a performance budgeting pilot project, in accordance with specified principles, involving at least 4 state departments, including the Stephen P. Teale Data Center, the Department of Parks and Recreation, the Department of General Services, the Department of Consumer Affairs, and other departments substituted by the Department of Finance. Existing law requires the fiscal subcommittees of the Assembly and the Senate to review the budget contracts entered pursuant to the performance budgeting pilot project.

This bill would require that the budget contracts proposed to be effective for the fiscal year beginning July 1 be submitted in draft form no later than January 31 to the fiscal subcommittees of the Assembly and the Senate.

(2) Existing law requires the Controller to superintend the fiscal concerns of the state. The Controller is required to audit all claims against the state, and is authorized to audit the disbursement of any state money, for correctness, legality, and for sufficient provisions of law for payment.

This bill would declare the intent of the Legislature that the Controller perform specified tasks relative to preparing financial statements and modifying the computer system in the Controller's office. This bill would, to the extent permitted by state law and provided that the appropriation is consistent with the restrictions, if any, in the special fund, appropriate $593,500 to the Controller from the special funds in the State Treasury for the 1994–95 fiscal year to pay the costs of the specified tasks that are attributable to the special funds. This bill would require the Controller, subject to approval by the Director of Finance, to determine the amount of the total appropriation that is to be funded by each special fund. This bill would permit the Controller, upon written authorization of the Director of Finance, to transfer from each special fund the moneys appropriated by this act, as needed, to augment the appropriation made in the 1994-95 Budget Act for the support of the Controller.

Ch. 673 (SB 1657) Hughes. Teacher certification: district interns for special education for the learning handicapped.

(1) Existing law authorizes the Commission on Teacher Credentialing to issue district intern certificates that are valid for 2 years authorizing persons employed by any school district that maintains kindergarten and grades 1 to 12, inclusive, or that maintains classes in bilingual education, to provide classroom instruction to pupils in those grades and classes provided certain conditions are met.

This bill would also authorize the commission to issue district intern certificates that are valid for 3 or 4 years under certain circumstances, and that authorize persons employed by the Los Angeles Unified School District to provide classroom instruction to pupils with mild and moderate disabilities in special education classes as a pilot program. The bill would make a declaration of unique circumstances in that regard.

(2) Existing law provides that persons holding district intern certificates to teach in grades 9 to 12, inclusive, or grades 6 to 8, inclusive, are limited to teaching in the subject areas in which they completed an undergraduate major or minor and that persons holding district intern certificates to teach kindergarten and grades 1 to 8, inclusive, must have a diversified liberal arts degree that includes certain coursework.

This bill would require that prior to assignment to teach any pupils with mild and moderate disabilities, persons holding district intern certificates must (A) meet either the requirements to teach in grades 9 to 12, inclusive, and grades 6 to 8, inclusive, in a departmentalized program or the requirements to teach kindergarten and grades 1 to 8, inclusive, in a self-contained program and (B) successfully teach in that capacity for one complete school year.

(3) Existing law required the commission to adopt standards relating to the quality of the training, support, evaluation, and performance of district interns on or before July 1, 1988, to make periodic reviews, and to disseminate certain information to school districts on or before March 15, 1988. It also required the commission to report on the district intern program to the Legislature on or before January 1, 1993.

This bill would require the commission to adopt additional standards related to the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

quality of the training, support, evaluation, and performance of district interns, to periodically review district intern programs on the basis of those standards, and to inform all school districts in the state of the district intern program options on or before March 15, 1995. The bill would require each school district with a district intern program to maintain records on the program, as specified. It would also require the commission to report on the district intern program to the Legislature on or before January 1, 1999.

(4) Existing law authorizes the commission to award clear credentials to district interns in the same manner as applicants recommended for credentials by institutions that operate approved programs of professional preparation and waives certain requirements ordinarily required for certification.

This bill would require that any professional credential awarded to a district intern holding a certificate to teach bilingual classes be a basic teaching credential with a specified emphasis. The bill would change the requirement that district interns holding a bilingual education teaching certificate teach for 3 years before receiving a credential, to 2 years. The bill would also make technical changes.

(5) Existing law requires district interns to complete a professional development plan which includes, among other things, certain mandatory preservice training.

This bill would require that plan to also include 120 clock hours of mandatory training and orientation relating to the development of exceptional children and the methods of teaching exceptional children for district interns who will teach pupils with mild and moderate disabilities.

(6) Existing law requires any school district maintaining grades 9 to 12, inclusive, or maintaining grades 6 to 8, inclusive, in a departmentalized junior high school, that employs a "teacher trainee" or "district intern" to classify that person as a probationary employee and to classify that person as a permanent employee after a specified period of time and upon the completion of certain conditions. Existing law makes no other provisions relating to employment of teacher trainees by school districts.

This bill would repeal those provisions relating to the classification of teacher trainees.

Ch. 674 (SB 1663) Craven. Mobilehome parks: inspections.

(1) Existing law, known as the Mobilehome Parks Act, contains various provisions with respect to the inspection of mobilehomes, including requiring certain enforcement agencies, to enter and inspect all mobilehome parks once every 5 years, as specified, and to submit a report on the status of the mobilehome park inspection program to the Senate Committee on Housing and Urban Affairs and the Assembly Committee on Housing and Community Development, by a specified date. Existing law provides that these provisions shall remain in effect only until January 1, 1997, unless a later enacted statute, enacted before January 1, 1997, deletes or extends that date.

This bill would lengthen the inspection time to once every 7 years, and would require the department to submit its status report to the Senate Committee on Local Government and the Senate Select Committee on Mobilehomes, rather than to the Senate Committee on Housing and Urban Affairs. The bill would extend the last date these provisions are effective to January 1, 1999, unless a later enacted statute, enacted before January 1, 1999, deletes or extends that date.

(2) The Mobilehome Parks Act sets specified fees relating to annual operating permits with regard to incidental camping areas of mobilehome parks. These fees are paid to the Department of Housing and Community Development and deposited in the continuously appropriated Mobilehome Parks Revolving Fund. A provision of the Mobilehome Parks Act, operative until January 1, 1997, sets an annual fee of $4 per lot and requires the revenues derived from this fee to be used exclusively for the inspection of mobilehome parks and mobilehomes to determine compliance with the act.

This bill would provide that the provision requiring payment of the annual fee of $4 per lot would remain operative until January 1, 1999. Because the bill would, by extending the period during which payment of this fee would be required, cause additional fees to be paid into the continuously appropriated Mobilehome Parks Revolving Fund, the bill would make an appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 675 (SB 1741) Committee on Transportation. Vehicles.

(1) Existing law currently excludes a vanpool vehicle from the definition of "bus" for purposes of the Vehicle Code.

This bill would make a technical change in that provision.

(2) Existing law excludes, until January 1, 1997, from the definition of "motorcycle" for purposes of the Vehicle Code, certain motor vehicles that would otherwise be covered by the definition but are enclosed and are used by public agencies for the enforcement of parking control provisions.

This bill would require these otherwise excluded motor vehicles to comply with the applicable provisions of the Vehicle Code imposing equipment installation requirements on motorcycles, thereby expanding the scope of crimes relating to equipment installation requirements on motorcycles and creating a state-mandated local program.

(3) Under existing law, a peace officer, upon receiving a report that a vehicle or license plates previously reported as stolen or lost or certain leased or rented vehicles that have not been returned have been recovered, is required to notify the Department of Justice and the police agency which had originally made the report, of the location and condition of the recovered vehicle or license plates, as specified. The police agency in turn is required within 48 hours to notify the reporting party of the location and condition of a recovered vehicle.

This bill would revise the procedure with respect to the duties imposed upon the notification of the reporting party by the original reporting police agency by requiring the immediate attempted notification by telephone followed by written notification by mail within 24 hours of the original agency's receipt of the information. By adding to the duties of the original reporting police agency, the bill would impose a state-mandated local program.

(4) Existing law requires the Department of Motor Vehicles to adopt regulations governing appeal hearings from denials regarding the issuance of driver's licenses or temporary driver's licenses.

This bill would require those regulations to also govern appeal hearings from denials regarding the issuance of identification cards.

(5) Existing law allows the Director of Motor Vehicles to renew by mail driver's licenses for persons whose records for the 2 years immediately preceding the determination of eligibility for renewal shows the following: (a) no notification of failures to appear in court in response to certain notices, (b) a total violation point count not greater than one, and (c) no suspension of the driving privilege because the person had 0.08% or more, by weight, of alcohol in his or her blood.

This bill would also require that the person's driving record for the 2-year period shows no refusal to submit to or complete specified chemical testing.

(6) Existing law prescribes the expiration dates for identification cards issued by the Department of Motor Vehicles.

This bill would authorize the department to adjust the expiration date of any identification card so that the date does not exceed the expiration date of a document submitted pursuant to a provision relating to submission of proof that an applicant's presence in the United States is authorized under federal law.

(7) Existing law restricts equipping vehicles with exterior mounted pilot lights.

This bill would allow any towed vehicle to be equiped with an exterior mounted pilot light used only to indicate the functional status of an antilock braking system if specified conditions are met.

(8) This bill would make other technical and clarifying changes in existing law.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does

NOTE: Superior numbers appear as a separate section at the end of the digests.

not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 676 (SB 1874) Ayala. Peace officers: reserve officers: training.

Existing law provides that every person deputized or appointed as a reserve peace officer shall have the powers of a peace officer only when the person has completed specified training and is (1) deputized or appointed and assigned to the prevention and detection of crime and the general enforcement of the laws of this state, whether or not working alone, (2) assigned to the prevention and detection of crime and the general enforcement of the laws of the state while under the immediate supervision of a specified peace officer, and engaged in a certain field training program, or (3) deployed and authorized only to carry out limited duties not requiring general law enforcement powers in their routine performance under the direct supervision of a specified peace officer.

This bill would provide that the basic training of a level I reserve officer appointed pursuant to (1) above after January 1, 1997, shall meet the minimum requirements established by the commission for deputy sheriffs and police officers. The bill would provide a specified exemption from this training requirement for certain level I reserve officers who have limited duties. The bill would provide that all level I reserve officers appointed pursuant to (1) above shall be required to satisfy the continuing professional training requirement prescribed by the commission.

This bill also would require the commission in carrying out these provisions to facilitate the voluntary transition of reserve officers to regular officers with no unnecessary redundancy between the training required for level I and level II reserve officers and to develop a supplemental course for existing level I reserve officers desiring to satisfy the basic training course for deputy sheriffs and police officers. The bill also would express the intent of the Legislature with regard to the changes made by this bill.

Ch. 677 (SB 1998) Kopp. Telephones: billing practices.

Under existing law, the Public Utilities Commission has jurisdiction over the rates and services of telephone corporations.

This bill would require the commission to investigate the advantages and disadvantages of requiring telephone corporations to bill in increments shorter than one minute and report to the Legislature not later than December 31, 1995.

Ch. 678 (SB 2017) Leslie. Mental health rehabilitation center: pilot project.

Existing law provides for the provision of local mental health services for persons with mental disorders pursuant to standards developed by the State Department of Mental Health.

Existing law establishes the state hospitals for persons with mental disorders and authorizes the placement of these persons in these state hospitals.

Existing law also authorizes the department to permit new programs for mental health services to be developed and implemented without complying with licensure requirements for up to 2 years, subject to certain conditions.

This bill would, until January 1, 1999, authorize, subject to specified provisions governing the development and implementation of new programs, Placer County and up to 6 other counties to establish a pilot project for up to 4 years to develop a shared mental health rehabilitation center for the provision of community care and treatment for persons with mental disorders who are placed in a state hospital or another health facility because no community placements are available to meet the needs of these patients. It would require the department, in conjunction with the county mental health directors, to report to the Legislature on various aspects of the pilot project.

This bill would extend the time during which a new program for mental health services may be developed and implemented without licensure to up to 4 years, and would set forth certain additional conditions for the approval and implementation of new programs. It would specify that local mental health directors shall be responsible for the implementation and regular program monitoring of programs proposed by nongovernmental entities, and that ultimate responsibility and authority for determining the appropriateness of these activities shall be retained by the department. It would

NOTE: Superior numbers appear as a separate section at the end of the digests.

also require the department to evaluate and report to the Legislature on all pilot projects implemented pursuant to these provisions.

This bill would require the Director of Mental Health to promulgate emergency regulations necessary to implement its provisions.

By requiring local implementation, oversight, and monitoring of certain programs, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 679 (SB 2075) Maddy. California Veterinary Diagnostic Laboratory System and the Equine Research Laboratory.

Existing law requires certain funds from parimutuel wagering collected for purposes of the California Veterinary Diagnostic Laboratory System and the Equine Research Laboratory to be deposited in a separate account in the Fair and Exposition Fund. Existing law authorizes the construction of an Equine Drug Testing Laboratory at the University of California, Davis.

This bill would name that account the California Veterinary Diagnostic Laboratory System and Equine Research Account, would declare the funds in that account to be trust funds, and would permit those funds to be used for the repayment of, and other expenses in connection with, bonds issued for the purpose of constructing an Equine Drug Testing Laboratory, and to finance the preparation of preliminary plans and working drawings for the construction of the Equine Drug Testing Laboratory.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 680 (SB 2088) Mello. Hiring of real property: persons who hire property.

(1) Existing law contains various provisions regulating the hiring of real property, as specified. Existing law specifies that "persons who hire" real property does not include a person who, among other things, maintains an occupancy at a hotel or motel where the innkeeper retains a right of access to and control of the dwelling unit and the hotel or motel provides certain specified services, including central dining, maid, mail, room, and recreational services.

This bill would recast the provision to refer to maid, mail, and room services and food services provided by a prescribed food establishment. This bill would make a clarifying change.

(2) Existing law provides that a person whose occupancy of a hotel or motel is exempt from the above-described provisions regarding the hiring of real property is guilty of a misdemeanor by refusing or failing to leave, upon request, a hotel or motel, where he or she has refused to pay for his or her accommodations.

This bill would provide that occupancy at a hotel or motel for a continuous period of 30 days or less shall, in the absence of a written agreement to the contrary or other written evidence of a periodic tenancy of indefinite duration, be exempt from these provisions for purposes of this criminal statute.

Ch. 681 (SB 1843) Hart. School employees.

(1) Existing law authorizes the Commission on Teacher Credentialing (commission) to set a fee for the issuance and renewal of teaching and service credentials that may not exceed $65, as specified. Existing law authorizes the commission to refund a fee or excess amount of fee under specified conditions and continuously appropriates the amount of the refund for the purpose of making the refund.

This bill would increase the maximum fee to $70. To the extent the bill would increase the amount of the fee or excess the commission refunds, the bill would make an appro-

NOTE: Superior numbers appear as a separate section at the end of the digests.

priation.

(2) Existing law requires each allegation of an act or omission by an applicant for, or holder of, a credential for which he or she may be privately admonished or for which his or her application or credential may be denied, suspended, or revoked to be presented to the Committee of Credentials (committee) for an investigation, as specified. At the completion of its investigation, the committee is required to report its actions and decisions to the commission. The findings of the committee are required to be made available to the public upon request.

This bill would provide that the committee has jurisdiction to commence an investigation and a meeting or hearing upon receipt of certain information evidencing misconduct and would require the committee, as part of its investigation, to prepare summaries of the applicable law, the contested and uncontested facts, and any circumstances in aggravation or mitigation of the alleged act or omission. The bill would add a period of limitations for presentation to the committee of any allegation of an act or omission, except for specified acts, by the holder of a credential. The committee would be required to describe in its findings, among other things, the committee's concurrence or nonconcurrence with the facts reported in the investigation. The bill would delete the requirement that the findings of a committee be made available to the public and would instead specify that the findings be made available to specified entities, upon request. The bill would impose a state-mandated local program by making it a misdemeanor for a person to release findings received from the committee or commission without a verified release signed by the person who is the subject of the investigation.

(3) Existing regulations adopted by the commission specify that in cases in which an accusation of unprofessional conduct involves sexual abuse, the employer of the credential holder is permitted to be present while testimony is taken by the committee and is required to be examined by the committee relating to aggravating or mitigating evidence.

This bill would similarly provide that if the allegation is for unprofessional or immoral conduct, the employer of the credential holder is permitted to be present while testimony is taken before the committee. The bill would additionally require that the employer be examined by the committee for any relevant evidence relating to an allegation involving sexual abuse.

(4) Existing law provides that all testimony before the committee at a meeting or hearing conducted regarding allegations of misconduct shall be verified under penalty of perjury by oath or affirmation and that the chairperson of the committee may administer the oath or affirmation.

This bill would authorize the chairperson of the committee to designate staff to administer the oath or affirmation for statements taken during the investigation of allegations of misconduct.

(5) Existing law requires the commission to take certain action, such as private admonition for immoral conduct or other specified behavior.

This bill would require the commission to also take the action of public reproof and would make related changes.

(6) Under existing law, the commission is required to admonish privately, or suspend or revoke the credential of, any certificated person, who knowingly and willfully reports false fiscal expenditure data relative to educational programs.

This bill would require similar action with respect to any certificated person who knowingly and willfully uses school records of pupil data in connection with, or attempts to recruit a pupil to be a customer for, any business owned by the certificated person or in which the certificated person is employed.

(7) Existing law specifies that the minimum requirements for the professional services credential with a specialization in administrative services include the completion of a program of advanced preparation approved by the commission. Each candidate for this credential, in consultation with the employing school district personnel and university personnel, is required to develop an individualized program based upon individual needs. Existing law requires that each individualized program include university coursework and authorizes the inclusion of nonuniversity activities or advanced administrative

NOTE: Superior numbers appear as a separate section at the end of the digests.

field experiences in the program.

This bill would authorize the commission to grant a waiver of required university coursework upon finding that the candidate is not able to develop a program meeting his or her individual needs, as specified.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 682 (AB 777) Katz. Schools: Los Angeles Unified School District: metal detectors.

Existing law appropriates $1,000,000 to the State Department of Education for allocation to the Los Angeles Unified School District for the purchase of stationary and hand-held metal detectors.

This bill would require the funds allocated to the Los Angeles Unified School District pursuant to that item in the Budget Act to be used within 12 months of the district receiving the funds for the only purpose of purchasing security devices and equipment, including stationary and hand-held metal detectors. The bill would require that school district to report to the Legislative Analyst on the expenditure of those funds, as specified. The bill would make related findings and declarations.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 683 (AB 3102) Martinez. Office of AIDS: State Department of Health Services.

Under existing law, there is in state government, in the Health and Welfare Agency, a State Department of Health Services.

This bill would designate the Office of AIDS within the State Department of Health Services as the lead agency within the state responsible for coordinating state programs, services, and activities relating to the human immunodeficiency virus (HIV), acquired immune deficiency syndrome (AIDS), and AIDS related conditions (ARC). This bill would also state the findings and declarations of the Legislature regarding the need for coordinating state HIV and AIDS-related programs in the Office of AIDS in the department.

Ch. 684 (AB 171) Conroy. Consumer protection: goods and services.

Existing law makes it a misdemeanor for any person conducting a business in this state that utilizes a post office box address or a street address representing a site used primarily for the receipt or delivery of mail or as a telephone answering service, to sell or offer to sell consumer goods or services without disclosing the legal name under which business is done and the complete street address from which business is actually conducted in all advertising and promotional materials.

This bill would include within this provision any person conducting a business in this state that utilizes a private mailbox receiving service. By so doing, this bill would impose a state-mandated local program by expanding the scope of an existing crime.

This bill would also provide that a person who conducts a business from his or her residence need not disclose the residence address, if specified requirements are met.

The bill would prohibit a commercial mail receiving agency from providing private mailbox receiving service to any customer until the agency obtains from every customer certain identification and a signed acknowledgment containing specified provisions of law that prohibit engaging in unfair competition or false advertising and that regulate the use of private mailbox receiving service. The bill would also require the commercial mail receiving agency to maintain certain information for each customer and make that information available to the Department of Consumer Affairs and any law enforcement agency conducting an investigation. By making a violation of these provisions a crime, the bill would impose a state-mandated local program.

The bill would specify information to be given to a consumer who complains regarding a mailbox user of actions that may be taken. A commercial mail receiving agency that

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

contacts a governmental agency regarding possible illegal or fraudulent activities by a private mailbox receiving service customer would be immune from civil liability related to that contact.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would state legislative intent.

Ch. 685 (AB 804) Gotch. Communicable disease: tuberculosis.

Existing law requires the State Department of Health Services to maintain a program for the control of tuberculosis and administer the funds made available to it by the state for the care of tuberculosis patients.

Existing law, with certain exceptions, prohibits discharge or release of persons from certain facilities if the person is known to have tuberculosis, or if there are reasonable grounds to believe the person has tuberculosis, unless certain procedures are followed, including providing a notice and report to the local health officer.

This bill would clarify that local health officers may delegate duties and authority relating to the issuance of related orders, and would make conforming and other technical changes. The bill would require review of related treatment plans within 24 hours, and would thereby impose a state-mandated local program.

Existing law requires that related delegations of authority by the local health officer be made pursuant to specified provisions of law relating to delegation of authority to a deputy.

This bill would provide that delegation may also be made to the person in charge of medical treatment of inmates at penal institutions. The bill would specify that in cases of court enforcement of an order, confinement may be accomplished by placement in any appropriate facility, penal institution, or dwelling specifically approved by the local health officer.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 686 (AB 1763) Bates. Youth pilot program.

Existing law authorizes the establishment of a five-year pilot program for the blending of various children's services funds allocated to designated participating counties for the provision of comprehensive, integrated services for high-risk children and their families in alternative and innovative ways, as detailed in county strategic plans.

This bill would authorize the Secretary of Health and Welfare or the Secretary of the Youth and Adult Correctional Agency, as appropriate, to approve a request submitted by a participating county to implement an alternative method for meeting specific state statutory requirements in one or more of the programs proposed for integration in the county's strategic plan, subject to certain conditions.

Ch. 687 (AB 1873) Moore. Commercial filming: permits.

Existing law provides that local agencies are encouraged to utilize uniform film permit provisions.

This bill would specifically authorize a city or county to adopt an ordinance or other regulation governing the issuance of permits to engage in the use of property for occasional commercial filming on location. The bill would specify that this authorization shall not limit the discretion of a city or county to limit, condition, or deny the use of

NOTE: Superior numbers appear as a separate section at the end of the digests.

property for occasional commercial filming on location to protect the public health, safety, or welfare. The bill also would provide that these ordinances and regulations would not be subject to local zoning ordinances or land use regulations unless the filming ordinance or regulations so provides.

Ch. 688 (AB 2845) Connolly. Family law proceedings: accusation of abuse.

Existing law provides that if a court determines during a child custody proceeding that a person has knowingly made a false accusation of child abuse or neglect, the court may impose upon that person reasonable money sanctions, not to exceed $1,000 and reasonable attorney's fees incurred in recovering the sanctions.

This bill would instead provide that the court may impose reasonable money sanctions, not to exceed all costs incurred by the party accused as a direct result of defending the accusation, and reasonable attorney's fees incurred in recovering the sanctions.

Existing law requires the Judicial Council to establish judicial training programs for specified persons who perform duties in family law matters, as specified.

This bill would require the Judicial Council to collect and analyze information regarding allegations of child abuse or neglect made during family law proceedings, and to instruct on the effects of allegations of child abuse or neglect in its family law judicial training programs, as specified.

Ch. 689 (AB 3033) Solis. Service of process: protective orders.

Existing law specifies the fee for service of process.

This bill would provide that there shall be no fee for serving a protective or other order issued pursuant to the Domestic Violence Prevention Act on a respondent who is in custody.

Ch. 690 (AB 3168) Quackenbush. Employer-sponsored child care centers.

Existing law, the California Child Day Care Facilities Act, provides for the licensing and regulation of child day care facilities by the State Department of Social Services.

This bill would add a new category of child day care facility for this purpose, an employer-sponsored child care center, defined as a child day care facility at the site of the employer's business operated directly or through a provider contract by any person or entity having one or more employees, and available exclusively for the care of children of that employer, and of the officers, managers, and employees of that employer. Under the bill, an employer-sponsored child care center would be subject to certain requirements of the California Child Day Care Act, except that the bill would require the department to allow reasonable waivers from licensing requirements to small businesses to encourage and facilitate the establishment of employer-sponsored child day care centers.

Ch. 691 (AB 3307) Takasugi. Service of process: gated communities.

Existing provisions of law govern the service of process in civil actions. Existing law provides for the registration of process servers with the county clerk of the county in which the process server resides or has a principal place of business.

This bill would provide that notwithstanding any other provision of law, any person shall be granted access to a gated community staffed by security personnel for a reasonable period of time for the purpose of service of process, upon identifying the person or persons to be served and displaying a driver's license or other identification and either a badge or other confirmation showing that he or she is a representative of a county sheriff or marshal or evidence of registration as a process server.

The bill would also make a statement of legislative intent.

Ch. 692 (AB 3563) Aguiar. Corrections: regulations.

Existing law authorizes the Director of Corrections to prescribe and amend rules and regulations for the administration of prisons pursuant to the Administrative Procedure Act, but also authorizes the director to specify an effective date for any of those regulations subject to certain conditions with respect to posting and providing copies of that regulation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal those provisions that authorized the director to specify an effective date for regulations but would further authorize the Director of Corrections to prescribe and amend rules and regulations for the administration of parole of those persons who have received determinate sentences, but who do not require state mental health services as a condition of parole.

This bill would also authorize the director or his or her designee to adopt certain rules and regulations under certain conditions that are not subject to the Administrative Procedure Act which apply solely to a particular prison, certain pilot programs, short-term criteria for the placement of inmates, and a determination of imminent danger involving serious injury, illness, or death. It would also enact special provisions applicable to emergency regulations.

Ch. 693 (AB 3764) Campbell. School facilities: liability for funded projects.

Under existing law, the State Allocation Board (board) has full charge of the acquisition, construction, completion, and control of all projects authorized by the board under the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (Greene Lease-Purchase Law). An applicant school district, as an agent of the state, under these provisions is required to comply with all laws pertaining to the construction, reconstruction, or alteration of, or addition to, school buildings.

This bill would provide that the funding by the board of contracts entered into by a school district pursuant to the Greene Lease-Purchase Law shall not, in itself, make the board liable for any tort, breach of contract, or any other action for damages caused by a school district arising from those contracts. The bill would provide that the school district is liable for all torts, breaches of contract, or any other actions for damages caused by the school district.

Ch. 694 (SB 18) Russell. Substance-exposed infants.

Existing law requires a county to establish protocols between county health departments, county welfare departments, and all public and private hospitals in the county regarding the application and use of an assessment of the needs of, and a referral for, a substance-exposed infant prior to release from the hospital.

Existing law contains various programs to provide services to families, including child abuse and neglect prevention programs and child welfare services programs.

This bill would require counties, when preparing their needs assessments and their plans to implement the federal Family Preservation and Support Act, to consider providing an in-home assessment of substance-abused infants as part of the protocols required under existing law. It would authorize the funding of the assessments through available federal funds under the federal act, subject to specified conditions.

Ch. 695 (SB 982) Greene. Agriculture.

(1) Existing law establishes the California Exposition and State Fair and specifies the powers and duties of its board of directors.

This bill, in addition, would authorize the California Exposition and State Fair to enter into a joint powers agreement for the purpose of planning, designing, and constructing real property improvements, as specified.

(2) Existing law provides that no funds appropriated for capital outlay may be expended by any state agency until the Department of Finance and the State Public Works Board have approved preliminary plans for the project to be financed from an appropriation for capital outlay, except as specified.

This bill would provide that nothing in these provisions shall be construed to limit or control the California Exposition and State Fair in the expenditure of all funds appropriated to it for capital outlay purposes.

Ch. 696 (SB 1169) Maddy. Health: hospital districts: health facility licensing standards.

Existing law establishes the Local Hospital District Law.

This bill would change the name to the "Local Health Care District Law," would require references to "hospital district" to mean "health care district," and would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

change references from "hospital" to "health care facility," which would be defined to mean a health facility and a clinic, as prescribed. The bill would require references to "hospital administrator" to mean "chief executive officer." This bill would make certain technical and conforming changes.

Existing law requires sessions of the board of directors to be open to the public, with certain exceptions.

This bill would also add any exceptions provided for in the Ralph M. Brown Act.

The bill would authorize the chief executive officer of a health care district to establish a specified task force to assist the chief executive officer in operating the district's facilities.

The bill would except prescribed energy conservation contracts from the requirement that the board of directors of a district let certain contracts over $25,000 to the lowest responsible bidder.

Existing law authorizes the board of directors of a local hospital district to provide for the operation and maintenance of any hospital acquired or constructed by the district through a lease agreement. Existing law requires a lease entered into with one or more nonprofit corporations for the operation of 50% or more of the district's hospital to meet certain requirements.

This bill would exempt a sublease, an assignment of an existing lease, as defined, or the release of a tenant or lessee from obligations under an existing lease in connection with an assignment of an existing lease, from those requirements in certain circumstances. This bill would require, if substantial amendments are proposed to any lease agreement that was subject to those requirements, or exempt from those requirements as authorized by the bill, that the amendments be discussed in at least 2 properly noticed open and public meetings.

Existing law authorizes a district to borrow money, issue bonds, or execute in favor of the state first mortgages, first deeds of trust, or other security interests exclusively for the purpose of securing state insurance of financing for the construction, renovation, or equipping of health facilities subject to certain requirements.

This bill would further authorize the district to borrow money, issue bonds, or execute in favor of the United States or appropriate federal agency first mortgages, first deeds of trust, or other security interests exclusively for the purposes of securing federal mortgage insurance or federal loans for financing or refinancing the construction, renovation, or equipping of health facilities subject to certain requirements.

This bill would incorporate additional changes to Section 32121 of the Health and Safety Code, proposed by SB 1546, to become operative only if this bill and SB 1546 are both chaptered, in which case a specified provision of this bill would not become operative.

Ch. 697 (SB 1287) Alquist. Budget Act of 1994.

Under existing law, as set forth in the Budget Act of 1994, state funds are appropriated for support of state government for the 1994–95 fiscal year.

This bill would supplement and amend the Budget Act of 1994 by: (1) imposing certain conditions upon the requirement that $940,000 in funds appropriated for the support of the Controller be redirected for designated purposes; (2) augmenting appropriations made for the support of the Department of General Services by $441,000 and, as to other appropriations for support of that department, making a reappropriation of funds and establishing a schedule for the allocation of funds; (3) augmenting appropriations made for the support of the Department of Water Resources by $194,000, making revisions in the schedules of appropriations to that department for support and capital outlay, and providing for the reversion of certain moneys to the Environmental License Plate Fund; (4) making revisions in the schedules of appropriations to the Department of Health Services for support and local assistance; (5) making revisions in the provisions governing apportionment of appropriations to the Department of Social Services for local assistance; (6) making revisions in the schedule of appropriations to the Department of the Youth Authority for local assistance; (7) appropriating $119,000 to the California Postsecondary Education Commission for Pipeline Program grants; (8) augmenting, by a net amount of $30,000, the amount appropriated to the Department of

NOTE: Superior numbers appear as a separate section at the end of the digests.

Industrial Relations for support; and (9) augmenting by $9,081,000 the amount appropriated for support services of the State Board of Control pursuant to the statutory program of assistance to victims of crime.

The bill also would revise the Budget Act of 1994 to authorize the Director of Finance to reduce appropriations in the act for new energy projects made from certain funds other than the General Fund, to the extent that those projects qualify for funding from the Petroleum Violation Escrow Account, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 698 (SB 1372) Dills. Charity racing days: beneficiaries of proceeds; breeder's awards.

(1) Existing law requires each licensed racing association, except as specified, to designate a certain number of racing days as charity days, the proceeds of which are distributed to qualified beneficiaries.

This bill would require the California Horse Racing Board to designate a nonprofit organization that is dedicated to research and development of improved safety standards for horseracing as a beneficiary qualified to receive a distribution of those proceeds.

(2) Existing law provides for the distribution of breeder's premiums and owner's and stallion awards in order to encourage the breeding of quarter horses in this state.

For those purposes, this bill would include a thoroughbred stallion bred to a quarter horse mare in the definition of "eligible quarter horse sire." This bill would also provide for the distribution of uncashed awards or premiums.

This bill also declares that it is to take effect immediately as an urgency statute.

Ch. 699 (SB 1390) Calderon. Vehicles: provisional drivers' licenses.

(1) Existing law requires the Department of Motor Vehicles, in the case of an original applicant for a driver's license, and authorizes the department upon renewal of a license, to require an examination of the applicant. Existing law requires that the examination include an actual demonstration of the applicant's ability to exercise ordinary and reasonable control in operating the vehicle by driving the vehicle under the supervision of an examining officer (behind-the-wheel driving test). Existing law also provides for the issuance of a provisional driver's license for a person under the age of 18 years.

This bill would, until January 1, 1998, permit the behind-the-wheel driving test portion of the examination for a provisional driver's license to be administered by a driving school, under a specified agreement with the department, to persons 16 years of age or older, but less than 18 years of age, under specified conditions. The bill would authorize the Director of Motor Vehicles to terminate the program, as specified. Because a failure to comply with these provisions under existing law is a public offense, this bill would impose a state-mandated local program by expanding the scope of a crime.

The bill would impose various duties on the department regarding monitoring the agreements and the program, including a requirement that the department submit a report on the progress of the program to the Legislature within 3 years after the date the program is implemented. The bill would authorize the department to charge a prescribed fee.

The bill would require the department to prohibit certain driving schools from continuing to administer behind-the-wheel driving tests under specified circumstances.

(2) Existing law authorizes the Department of Motor Vehicles to suspend or revoke any license issued by the department for driving school owners, operators, and instructors if certain enumerated circumstances exist.

This bill would include in the above-listed circumstances, until December 31, 1997, the administration of the behind-the-wheel driving tests and the issuance of certificates of passage in violation of specified agreements with the department. The bill would also include in the above-listed circumstances when the licensee holds a secondary teaching credential and explicitly or implicitly recruits or attempts to recruit a pupil who is enrolled in a junior or senior high school to be a customer for any business owned by the licensee or for which the licensee is an employee.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 700 (SB 1457) Kopp. Privileged communications: medical information.

(1) Existing law, with certain exceptions, makes privileged any publication or broadcast made in a judicial proceeding.

This bill would specify that this provision does not make privileged any communication made in a judicial proceeding knowingly concealing the existence of an insurance policy. The bill would state the intent of the Legislature to overturn the decision in California Dredging Company v. Insurance Company of North America, 18 Cal. App. 4th 572.

(2) Existing law restricts the disclosure of medical information by a health care provider without a court order, except as specified.

This bill would authorize the disclosure of basic medical information, as specified, by a health care provider to a disaster relief organization without a court order.

(3) This bill would incorporate additional changes to Section 47 of the Civil Code proposed by AB 2778 that would become operative only if AB 2778 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 701 (SB 1496) Mello. Sales and use taxes: exemptions: care facilities.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. Existing law provides various exemptions from that tax, including an exemption for meals and food products for human consumption furnished or served to or consumed by residents or patients of specified health and care facilities, or any house or institution supplying board and room for a flat monthly rate and serving as a principal residence exclusively for persons 62 years of age or older.

This bill would additionally allow an exemption for meals and food products for human consumption furnished or served to or consumed by residents or patients of either a residential care facility for the elderly, as specified, or housing that primarily serves older persons, as specified.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 702 (AB 3321) Takasugi. Sales and use taxes: exemptions: care facilities.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. Existing law provides various exemptions from that tax, including an exemption for meals and food products for human consumption furnished or served to or consumed by residents or patients of specified health and care facilities, or any house or institution supplying board and room for a flat monthly rate and serving as a principal residence exclusively for persons 62 years of age or older.

This bill would additionally allow an exemption for meals and food products for human consumption furnished or served to or consumed by residents or patients of a residential care facility for the elderly, as specified, and of any housing that primarily serves older persons and that is financed by state or federal programs.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 703 (SB 1563) Peace. Bus transportation: study.

Existing law requires the Department of the California Highway Patrol to adopt rules and regulations that are designed to promote the safe operation of schoolbuses and school pupil activity buses. Existing law requires the State Board of Education to adopt all other regulations relating to the use of schoolbuses. The governing board of a school district is authorized to provide for the transportation of pupils either with district-owned buses or by contracting with a public transit system. In addition, various state and federal laws regulate the operation of public transit buses.

This bill would require the State Auditor to perform a study to develop comparable information regarding safety, cost, funding sources, operating and equipment differences, and other related information for schoolbus operators and public transit operators in providing pupil transportation and would require the State Auditor to consult with representatives of various organizations for that purpose. The bill would require the State Auditor to complete a report on the results of the study by January 1, 1996, provide a copy of the report to the relevant policy and fiscal committees of the Legislature, and , upon request, provide a copy of the report to any Member of the Legislature, upon request.

This bill would state that the State Auditor is not required to carry out the provisions of the bill until sufficient funds from sources other than the state are available.

Ch. 704 (SB 1699) Committee on Transportation. Transportation.

(1) Existing law requires specified conditional sale contracts to contain specified disclosures, including disclosures relating to itemization of the amount financed.

This bill would add to the list of required disclosures relating to itemization of the amount financed an item relating to donations made to high polluter repair or removal programs.

(2) Existing law requires the Department of Transportation to biennially prepare a 5-year rail passenger development plan for submission to the Legislature, the Governor, the Public Utilities Commission, and the California Transportation Commission.

This bill would, instead, require the department to biennially prepare a 10-year rail passenger program, and would change the dates for submission of the program.

(3) Existing law prescribes the membership of the Metropolitan Transportation Commission, and includes one nonvoting member appointed by the Secretary of the Trade and Commerce Agency.

This bill would, instead, provide for the appointment of that member by the Secretary of the Business, Transportation and Housing Agency.

(4) Existing law requires the Metropolitan Transportation Commission to adopt and annually revise a regional transportation plan.

This bill would, instead, require the commission to revise the plan biennially.

(5) Existing law provides for the collection of registration fees on motor vehicles, including a $2 fee, which may be increased to $4, which may be imposed by an air pollution control district or an air quality management district, including the Bay Area Air Quality Management District and the South Coast Air Quality Management District, except the Sacramento Metropolitan Air Quality Management District, and used to reduce air pollution from motor vehicles, as specified, including, in the bay district, the implementation of enumerated transportation control projects and programs.

This bill would include the implementation of an automobile buy-back scrappage program operated by a governmental agency among the transportation control projects and programs that may be implemented in the bay district from fee revenues generated by the above collection of registration fees.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) Existing law requires certain booms or masts to be secured, as specified, while a vehicle or machine is being transported as a load upon any highway.

This bill would, except as specified, apply the above restriction when the boom or mast is being driven as well as transported, thereby imposing a state-mandated local program by expanding the scope of an existing crime.

(7) Existing law creates a special fund administered by the Department of the California Highway Patrol for use by the department and other enforcement agencies to administer and enforce laws which regulate the safe and lawful operating practices of highway carriers.

This bill would require, instead, that those funds be used to deter commercial motor vehicle cargo thefts and provide safety and security of highway carriers and cargoes.

(8) Existing law creates and prescribes the powers of the Stockton Metropolitan Transit District.

This bill would rename the district the San Joaquin Regional Transit District. The bill would impose a state-mandated local program by requiring that any intercity, interregional, and rural services provided by the district outside the Stockton Metropolitan Area, as defined, be subject to open competitive bidding at least once every 5 years.

(9) Existing law requires a specified percentage of specified funds transferred from the Retail Sales Tax Fund to the Transportation Planning and Development Account in the State Transportation Fund to be allocated in specified ratios to transportation agencies, county transportation commissions, and the San Diego Metropolitan Transit Development Board.

This bill would authorize the Metropolitan Transportation Commission to allocate to itself, from the funds allocated to it pursuant to the provisions specified above, funds for projects to achieve regional transit coordination objectives.

(10) Existing law prohibits specified funds from being allocated to a public transit operator for operating purposes unless the operator meets specified efficiency standards, except as specified. Existing law exempts the Santa Cruz Metropolitan Transit District from that prohibition until July 1, 1993.

This bill would extend that exemption until July 1, 1998.

(11) Existing law prohibits coverings from being used on vehicle license plates, except as specified.

This bill would, additionally, prohibit any casing, shield, frame, border, or other device that obstructs or impairs the reading or recognition of a license plate by a remote emission sensing device, as specified, from being installed on, or affixed to, a vehicle.

(12) Existing law imposes a transaction fee of $10 upon proof of correction of specified violations relating to driver's licenses, vehicle registration, or vehicle equipment.

This bill would prohibit the imposition of that fee if the violation notice is processed only by the issuing agency and no record of the action is transmitted to the court.

(13) This bill would incorporate additional changes in Section 66503 of the Government Code, proposed by AB 2900, to be operative only if both bills are enacted and become effective on or before January 1, 1995, and this bill is chaptered last.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 705 (SB 1804) Committee on Revenue and Taxation. Local government finance.

Existing law authorizes a county treasurer to enter into a contract with a depository, as defined, for the deposit of county moneys.

This bill would authorize a county treasurer, where he or she has entered into a contract with a depository, to allow those county officers and judicial districts required

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to transmit amounts to the treasurer to transmit those amounts directly to the depository with whom the treasurer has contracted.

Existing law authorizes a county treasurer to destroy certificates of the county auditor where certain requirements are met with respect to reproduction and alternative preservation.

This bill would limit the exercise of this authority to those certificates that have been held by the auditor for at least one year.

Existing law requires the county treasurer to keep an account of the receipt and expenditure of all moneys that he or she receives or pays.

This bill would authorize the county treasurer to keep the required accounts in an electronic data processing system.

Existing law provides that any county treasurer who accepts money for deposit in the county treasury from a private and unofficial source is guilty of a misdemeanor.

This bill would expand this misdemeanor provision to apply to any county officer, but would also limit the occurrence of misdemeanor to those cases in which a county officer knowingly accepts money from the private, unofficial source. By changing the definition of a crime, this bill would impose a state-mandated local program.

Existing law authorizes a local agency to invest surplus moneys in various investments, including bankers acceptances, provided that those acceptances are eligible for purchase by the Federal Reserve System.

This bill would delete the requirement that these acceptances be eligible for purchase by the Federal Reserve System.

Property tax law authorizes a county tax collector to file a specified lien on unsecured property for delinquent taxes.

This bill would authorize a county tax collector to file this lien on unsecured property for current taxes, even if current taxes on that property are not delinquent, where previous taxes on the property are unpaid and delinquent.

Property tax law authorizes any county department, officer, or employee responsible for the collection of any tax assessment or amount owed to the county to apply to the board of supervisors for a discharge of accountability where the amount owed does not justify the costs of collection.

This bill would authorize a county board of supervisors to designate the county auditor to exercise the board's authority in granting these discharges of accountability, and would eliminate duplicative provisions with respect to that authority.

Existing property tax law requires that notice of any postponed public auction sale, that is held not less than 8 days nor more than 40 days from the date of the originally scheduled sale, be given in the same manner as the notice for that originally scheduled sale.

This bill would increase the maximum postponement period specified in this requirement from 40 days to 60 days.

Property tax law provides for the sale of tax-defaulted property.

This bill would require that the sales price of tax-defaulted property include, at a minimum, certain amounts.

This bill would also eliminate obsolete provisions or make technical or clarifying changes with respect to the receipt of money into the county treasury, the administration of laws with respect to local government finance, the review and appeal of property tax assessments, the delinquency date for property tax assessments and the date upon which penalties thereon attach, the timeliness of payments with respect to tax-defaulted property and the time at which property becomes tax defaulted, public auction sales of tax-defaulted property, reports and recommendations on property tax assessment protests, corrected tax deeds, the rate of interest on amounts of property taxes recovered in a refund action, and mobilehome tax clearance certificates.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 706 (SB 1918) Campbell. Prisoners: severe mental disorders.

Under existing law, a prisoner who disagrees with the determination of the Board of Prison Terms that he or she has a severe mental disorder that is not in remission or cannot be kept in remission without treatment, as defined, may file a petition in the superior court of the county in which he or she is incarcerated or is being treated for a hearing on whether he or she, as of the date of the Board of Prison Terms hearing, met the criteria of having a severe mental disorder that is not in remission or cannot be kept in remission without treatment. The court is required to conduct a hearing on the petition, as specified. The standard of proof is beyond a reasonable doubt, and if the trial is by jury, the jury is required to be unanimous in its verdict.

This bill would prohibit the court's consideration, at the hearing on the petition, of evidence offered for the purpose of proving the prisoner's behavior or mental status subsequent to the Board of Prison Terms hearing.

This bill would also provide that the court may, upon stipulation of the parties, receive in evidence the affidavit or declaration of any psychiatrist, psychologist, or other professional person who was involved in the certification and hearing process, or any professional person involved in the evaluation or treatment of the petitioner during the certification process, as specified.

This bill would also provide that if the court or jury reverses the determination of the Board of Prison Terms, the court shall stay the execution of the decision for 5 working days to allow for an orderly release of the prisoner.

Ch. 707 (AB 269) Statham. Forest resources.

Existing law, the Budget Acts of 1993 and 1994, provide in specified items for the appropriation of money to the Department of Forestry and Fire Protection for the purposes of emergency fire suppression and detection costs, as prescribed.

This bill would appropriate $7,000,000 from the General Fund to the department, in augmentation of the Budget Act of 1993, as specified, and would authorize the Director of Finance to authorize the temporary redirection of funds appropriated in the Budget Act of 1994 for emergency fire suppression and detection costs of the department to a specified item for the support of the department, for the purpose of maintaining adequate and necessary fire fighting personnel and aerial fire fighting resources through the 1994 fire season.

The bill would declare that the bill makes appropriations for the usual and current expenses of the state and shall go into immediate effect.

Ch. 708 (SB 1239) Russell. AIDS: testing: exposure notification.

Existing law prohibits any person from being compelled to identify or provide identifying characteristics that would identify any person who is the subject of a blood test to detect the probable causative agent of acquired immune deficiency syndrome (AIDS). Existing law also prohibits the disclosure of the results of an HIV test, as defined, and requires the imposition of civil or criminal penalties for the unauthorized disclosure of that information.

This bill would state the findings and declarations of the Legislature with regard to the potential exposure to infection of health care providers, first responders, and other exposed individuals, as defined.

This bill would authorize the blood or other tissue or material of a source patient, as defined, to be tested for HIV pursuant to a prescribed procedure, either with or without the consent of the source patient. This bill would authorize an exposed individual, as defined, who experienced a significant exposure to the blood or other potentially infectious materials of the source patient to be informed of the HIV status of that patient. This bill would provide that nothing in these provisions authorizes the disclosure of the source patient's identity.

This bill would exempt a health care provider from civil or criminal liability or professional disciplinary action for performing an HIV test on a source patient, or for disclosing the HIV status of the source patient to prescribed persons, if the health care provider believes in good faith that his or her action is consistent with these provisions.

This bill would provide that any health care provider or first responder, or any

NOTE: Superior numbers appear as a separate section at the end of the digests.

exposed individual, who willfully performs or permits the performance of an HIV test on a source patient, that results in harm, without adhering to the procedure established by the bill, is guilty of a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 709 (AB 3123) Klehs. Emergency medical services.

(1) Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, in part, provides for various programs that fund or regulate the provision of emergency health care services.

Existing law, to be repealed January 1, 1995, creates the Emergency Medical Services Personnel Fund and continuously appropriates the fund to the state Emergency Medical Services Authority to maintain the authority's testing and personnel certification program.

Existing law, to become operative January 1, 1995, continuously appropriates these funds for the personnel registry program of the authority.

This bill would delete the provision continuously appropriating these funds, and would, instead, provide that these funds are to be held in trust for the purposes of the authority's testing and personnel licensure program and for making certain related reimbursement, upon appropriation by the Legislature, and would make conforming changes.

(2) Existing law requires the authority to adopt, after approval of the commission, minimum standards for the training and scope of practice for EMT-II.

This bill would authorize the director to approve additions to the scope of practice of EMT-IIs in rural or remote areas of the state where patient transport times are particularly long and where local resources are inadequate to support an EMT-II or EMT-P program for EMS programs, and would require the director, in consultation with a committee of local EMS medical directors to approve any addition to a local scope of practice for EMT-IIs and EMT-Ps.

(3) Existing law to be repealed, January 1, 1995, notwithstanding other provisions of law, designates the authority as the agency solely responsible for certification and license renewal of EMT-Ps who meet certain standards, requires each application for certification to include prescribed information, and authorizes the authority to charge a basic fee of $125 for certification and license renewal and other related fees. Existing law authorizes the authority to provide information relating to EMS programs to interested persons upon request, and authorizes the authority to establish a fee for providing this information.

This bill would recast these provisions and would delete the repeal date.

(4) Under existing law, the Emergency Medical Services and the Prehospital Emergency Medical Care System Personnel Act, each county may designate an emergency medical services agency (local EMS agency), for the establishment and administration of an emergency medical services program in the county. Existing law also establishes the Emergency Medical Services Authority, that, among other things, adopts regulations governing these emergency medical services provisions.

Existing law requires the authority to conduct an evaluation of the state EMT-P exam, and to provide by August 1, 1994, a copy of the evaluation and its recommendations to the commission for review and action.

Existing law requires the authority to develop, after approval of the Commission on Emergency Medical Services, minimum standards for the training and scope of practice for an emergency medical technician-paramedic (EMT-P).

Existing law makes the local EMS agency responsible for determining that the operation of training programs, including EMT-P programs are in compliance with the act. It also provides that a local EMS agency may require additional training standards, including standards for EMT-Ps, and additional training or qualifications for practice

NOTE: Superior numbers appear as a separate section at the end of the digests.

within the emergency medical services area in an advanced life support or limited advanced life support prehospital care system.

Existing law authorizes the Director of the Emergency Medical Services Authority to develop standards for, and approve an EMS training and testing program for the Department of the California Highway Patrol, the Department of Forestry and Fire Protection, among others upon request of the director of the agency.

This bill would, notwithstanding contrary provisions of law, require that the statewide examination designated by, and licensure issued by, the authority for EMT-P personnel be the single sufficient examination and licensure required for practice as an EMT-P. The bill would require EMT-P licenses to be renewed every 2 years with proof of compliance with continuing education or other educational requirements established by the authority upon approval by the Commission on Emergency Medical Services. It would authorize the authority to discipline EMT-P personnel for violations of the act.

This bill would, if the authority so concludes after conducting the EMT-P exam evaluation, require that the renewal of EMT-P licenses, in addition to continuing education requirements, be contingent upon 10-year reexamination intervals to ensure competency.

The bill would provide that its provisions do not extend the scope of an EMT-P practice beyond prehospital settings as defined by regulations of the authority, that this bill does not alter or interfere with local accreditation of licensed EMT-Ps, and that the bill does not hinder the ability of the local medical director to maintain medical control.

(5) Existing law, to be repealed January 1, 1995, sets forth any of several grounds under current law for which the medical director may suspend or revoke a certificate, or for which the medical director may place a certificate holder on probation.

Existing law, to be repealed January 1, 1995, makes these grounds the basis for a denial of a certificate, and authorizes the medical director to place on probation or temporarily suspend an EMT-P, or to recommend suspension or revocation of an EMT-P certificate to the authority, if the medical director makes certain findings of imminent threat to the public health and safety based on the above-indicated grounds after an investigation.

This bill would, instead, provide that the medical director may recommend to the authority that disciplinary action be taken against an EMT-P or may after consultation with the relevant employer temporarily suspend, prior to hearing, and in accordance with prescribed procedures, an EMT-P license.

(6) By increasing the duties of local EMS agencies this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 710 (SB 612) Hayden. Sexual harassment.

Existing law makes it unlawful to harass an employee or employment applicant because of, among other things, sex. These provisions are enforced by the Department of Fair Employment and Housing. General provisions of existing law specify that all persons have the right to be free from violence or intimidation by threat of violence, against their persons or property, because of certain bases of discrimination.

This bill would provide a cause of action for sexual harassment that occurs as part of a professional relationship, as specified.

Ch. 711 (AB 3659) Horcher. Lawyers: regulation.

Existing law provides generally for the regulation of lawyer referral services, and requires the State Bar, subject to the approval of the Supreme Court, to formulate and enforce rules and regulations governing lawyer referral services, including requiring the payment of an application and renewal fee.

This bill would provide that the State Bar may require that application and renewal fees be determined by consideration of specified factors, provided that the fees do not exceed $10,000 or 1% of gross annual revenues, whichever is less. The State Bar shall also

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

require that attorney referral services establish separate activities to serve persons of limited financial means. The bill would also specify grounds for refusing to certify a lawyer referral service.

The bill further provides that any person or entity, including but not limited to, any person or entity having an ownership interest in a lawyer referral service, that violates the provisions governing lawyer referral services, shall be liable for a civil penalty, as specified. If a civil penalty is recovered, the State Bar shall be compensated for its expenses of investigation and prosecution, as specified.

Existing law regulates advertising by attorneys to, among other things, prohibit the use of an impersonation of any person directly or implicitly purporting to be that of the attorney or client featured in the advertisement, or a dramatization of events, unless disclosure of the impersonation or dramatization is made in the advertisement.

This bill would provide, instead, that with regard to attorneys, a spokesperson may be used as long as there is no direct or implicit suggestion that the spokesperson is the advertising attorney, and there is disclosure of the spokesperson's title.

Existing law provides that an attorney's advertisement shall not contain any false, misleading, or deceptive statements or omit any fact necessary to make the statements made not false, misleading, or deceptive in context.

This bill would provide that to comply with the prohibition against false, misleading, or deceptive statements, an advertisement in the electronic media may not, taken as a whole, be false, misleading, or deceptive, and the message as a whole must be factually substantiated, as defined.

The bill would also create a rebuttable presumption that certain messages are false, misleading, or deceptive. These messages include presenting the ultimate result in a specific case, without an adequate explanation of the facts or law producing the result, the depiction of an event through use of displays of injuries or accidents scenes, and statements of potential or actual monetary recovery for clients or prospective clients, as specified.

The bill would, in addition, provide that certain information is presumed to not be misleading or deceptive when presented in electronic media advertising. The permissible facts include, among others, the attorney's practice area, fees for routine legal services, schools attended, legal authorship, technical or professional licenses, and foreign language ability of the attorney or a member of the attorney's firm.

The bill would also require certain disclosures to be made in connection with advertising in electronic media that portrays a result in a particular case or cases.

Existing law provides that a court which finds a person to have violated the provisions relating to attorney advertising shall report the name, address, and professional license number of that person to the appropriate professional licensing agency.

This bill would create a procedure for administrative investigation of complaints filed with the State Bar against members of the State Bar and certified lawyer referral services, and for civil enforcement, as provided. If the State Bar investigates and determines that there is no substantial evidence of a violation, then a civil enforcement action may not be filed, but a declaratory relief action may be filed. Persons who are the subject of a complaint or any complainant affected by the decision of the State Bar may bring a declaratory relief action in superior court, and, if applicable, may request injunctive relief. The State Bar shall not be considered a party to the civil enforcement action or the declaratory relief proceeding, except as provided. Additionally, no direct action may be filed against the State Bar challenging its decision under these provisions, as specified. The State Bar shall keep records of all complaints, as specified.

Ch. 712 (AB 1853) Polanco. Air pollution: districts: budget review.

(1) Existing law imposes various requirements on air pollution control districts and air quality management districts relative to the adoption of an annual budget by the districts. Existing law requires the State Air Resources Board to prepare and submit to the Governor and the Legislature a report, contemporaneous with the annual State Budget, on the sources of funding for each district with an annual budget that exceeds $1,000,000, which report is required to include the budget of the district.

This bill would, until January 1, 2000, require districts with an annual budget of

NOTE: Superior numbers appear as a separate section at the end of the digests.

$50,000,000 or more as of January 1, 1994, to submit a proposed budget to the Legislature and the state board, and would prescribe procedures in that regard. The bill would, until January 1, 2000, also require those districts to prepare and submit to the state board a 3-year budget forecast, as prescribed. By imposing those requirements on the districts, the bill would impose a state-mandated local program.

(2) Existing law prohibits the fees assessed on stationary sources of pollution by the South Coast Air Quality Management District from exceeding the actual costs of district programs for the preceding fiscal year, except as specified.

This bill would also limit the fees collected by the south coast district from stationary sources of emissions to the level of expenditure in the 1993–94 fiscal year, adjusted for increases in the California Consumer Price Index.

The bill would except state or federal mandates, as specified, from those limits.

The bill would make related changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 713 (AB 2716) Katz. Sentencing: worktime credits.

(1) Existing law provides that every person convicted of any specified felony offense, who has been previously convicted 2 or more times, on charges separately brought and tried, and who has previously served 2 or more separate prior prison terms, as defined, for any of those specified felony offenses shall be ineligible to earn credit on their terms of imprisonment.

This bill would provide, among other things, that notwithstanding any other law, any person who is convicted of a violent felony, as defined, shall accrue no more than 15% of worktime credit, as defined.

(2) Existing law provides that a prisoner confined in or committed to a county jail, industrial farm, or road camp, or any city jail, industrial farm, or road camp is entitled to reduction in the time served for good behavior and for performance in work.

This bill also would provide that whenever any person who is subject to the 15% worktime credit limitation described in (1) above, the maximum credit that may be earned against a period of confinement in, or commitment to, those facilities, following arrest and prior to placement in the custody of the Director of Corrections, shall not exceed 15% of the actual period of confinement.

This bill also would provide that its provisions shall only apply to violent felonies that are committed on or after the date on which its provisions become operative.

(3) This act would declare that it is to take effect immediately as an urgency statute.

Ch. 714 (AB 2449) Alpert. Ammunition: sale: possession.

(1) Existing law provides that every person engaged in the business of selling, leasing, or otherwise transferring a firearm, shall obtain a license, except with regard to certain exempt transactions. Among those transactions exempt from this licensure requirement are the sales, deliveries, or transfers of firearms by manufacturers or importers licensed pursuant to specified federal statutes and the regulations issued pursuant thereto to dealers or by wholesalers to dealers.

This bill would provide that no wholesaler shall deliver, sell, or transfer a firearm to a person who is licensed pursuant to federal law and whose licensed premises are located in California unless the person presents proof of licensure to the wholesaler or presents proof of exemption from licensure to that wholesaler, in which case the person also shall present proof that the transaction is also exempt from specified provisions of law.

The bill also would provide that no importer or manufacturer who is licensed to engage in that business pursuant to specified federal law shall deliver, sell, or transfer a firearm to a person who is licensed pursuant to federal law and whose licensed premises are located in California unless the person presents proof of licensure to the importer or manufacturer or presents proof of exemption from licensure to that importer or manufacturer, in which case the person also shall present proof that the transaction

NOTE: Superior numbers appear as a separate section at the end of the digests.

is also exempt from specified provisions of law. Because this bill would create a new crime, it would impose a state-mandated local program.

(2) Under existing law, a firearms license is subject to forfeiture for a breach of any of a number of specified prohibitions and requirements.

This bill would include in the list of prohibitions the sale of ammunition or reloaded ammunition to a minor under 18 years of age.

(3) Existing law establishes prohibitions with regard to the sale or possession of specified ammunition.

This bill would make it a crime, punishable as specified, for (a) any person or corporation to sell ammunition or reloaded ammunition to a minor under 18 years of age knowing that person to be a minor; (b) a minor under 18 years of age to possess ammunition or reloaded ammunition, unless the minor is engaged in, or is en route to or from, the activities of hunting, ranching, or target shooting; and (c) any person, except specified persons, including peace officers, to carry ammunition or reloaded ammunition onto school grounds, unless it is with the written permission of specified school authority. This bill would impose a state-mandated local program upon local government by creating new crimes.

(4) This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 3410 or SB 1308, or both, to be operative only if AB 3410 or SB 1308, or both, and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 715 (AB 3410) B. Friedman. Firearms: licensing.

Existing law authorizes the duly authorized licensing authorities of cities, counties, and cities and counties to issue licenses to sell firearms at retail.

Under existing law, a dealer in firearms is required to meet specified requirements to qualify as a licensee, including the requirement that the dealer's license or a copy thereof be displayed on the premises where it can easily be seen.

This bill would require a dealer to maintain and make available for inspection during business hours to any peace officer, authorized local law enforcement employee, or Department of Justice employee designated by the Attorney General, upon the presentation of proper identification, a firearms transaction record, as defined.

Existing law requires, among other things, a purchaser or transferee of a firearm to present clear evidence of his or her identity and age, as defined, to the dealer.

This bill would redefine "clear evidence of his or her identity and age" for purposes of firearm regulation.

Existing law requires the Department of Justice to keep a centralized list of all licensed dealers and make information about an individual dealer available, upon request, for specified purposes.

This bill would (1) authorize the department to remove from the list any person who knowingly or with gross negligence violates certain firearms licensing provisions, (2) require the department, upon removing a dealer from the list, to notify local law enforcement and licensing authorities in the jurisdiction where the dealer's business is located, (3) authorize the department to inspect dealers, except those dealers subject to an inspection program as specified, to ensure compliance with firearms licensing provisions, and (4) authorize the department to assess an annual fee of $85 to cover the reasonable cost of maintaining the centralized list and conducting inspections.

This bill would incorporate additional changes to Section 12071 of the Penal Code proposed by AB 482 (Ch. 23, Stats. 1994).

This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 2449 or SB 1308, or both, to be operative only if AB 2449 or SB 1308, or both, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 716 (SB 1308) Peace. Firearms.

(1) Existing law requires the Attorney General to keep and properly file, among other things, forms and records, copies of applications for licenses to carry concealed firearms, copies of licenses to carry concealed firearms that are actually issued, as specified, and information pertaining to revoked licenses.

This bill would additionally require that the Attorney General permanently keep and properly file and maintain certain additional information including information as to retail licenses, transfers to unlicensed persons, exempted deliveries, sales and transfers, sales or transfers through dealers, and sales or transfers through a sheriff's department, as to pistols, revolvers, or other firearms capable of being concealed upon the person, and to maintain a registry thereof.

(2) Existing law provides that the county sheriff or the chief or other head of a municipal police department may issue to an applicant a license to carry a concealed weapon. Applications for licenses, among other things, are required to be filed in writing and signed by the applicant.

This bill, additionally, would provide that the license issued may be laminated.

(3) Under existing law, a dealer in firearms is required to meet specified requirements to qualify as a licensee, including the requirement that the dealer's business be conducted only in the buildings designated in the license.

This bill would require a dealer to maintain and make available for inspection during business hours to any peace officer or Department of Justice employee designated by the Attorney General, upon the presentation of proper identification, a firearms transaction record, as defined.

(4) Existing law provides that every licensed firearms dealer shall keep a register in which prescribed information concerning firearms transactions shall be entered. Register forms are prepared by, and obtained from, the State Printer in quadruplicate.

This bill would provide that register forms shall be furnished only to dealers.

(5) Existing law provides that copies of the register of sales shall be distributed, among other parties, to the Department of Justice and the chief of police of the city or county where the sale or transfer is made.

This bill, additionally, would require that a copy of the register be provided to the purchaser and, in transactions conducted through a licensed dealer, to the seller. The bill also would make other nonsubstantive, technical changes.

(6) The bill would also incorporate additional changes to Sections 12001, 12026.2, 12072, 12077, 12078, and 12552 of the Penal Code proposed by AB 482 (Ch. 23, Stats. 1994).

(7) This bill would incorporate additional changes in Section 12001 of the Penal Code proposed by SB 37 (1st Ex. Sess.), to be operative only if SB 37 and this bill are both enacted and become effective as specified, and this bill is enacted last.

(8) This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 2449 or AB 3410, or both, to be operative only if AB 2449 or AB 3410, or both, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

(9) This bill would incorporate additional changes in Sections 12072 and 12078 of the Penal Code proposed by AB 2470, to be operative only if AB 2470 and this bill are both enacted and become effective January 1, 1995, and this bill is enacted last.

Ch. 717 (AB 3499) O'Connell. Firearms: possession by minors.

Existing law provides that a minor may not possess live ammunition or a pistol, revolver, or other firearm capable of being concealed upon the person unless he or she has the written consent of his or her parent or legal guardian, or unless he or she is accompanied by his or her parent or legal guardian, while the minor has the firearm in his or her possession. A violation of these provisions is punishable, as specified.

This bill, instead, would provide that a minor shall not possess live ammunition or a pistol, revolver, or other firearm unless one of specified circumstances exist, including, among others, circumstances in which the minor is accompanied by his or her parent or legal guardian, except as specified. The bill would add to the penalty provision the requirement that a minor perform not less than 50 nor more than 500 hours of community service and have his or her driver's license or driving privilege suspended or revoked,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

as specified, except if the license is required for specified employment or medical purposes.

The bill would also authorize the court to require the custodial parent or legal guardian of the minor to participate in classes on parenting education.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 12101 of the Penal Code proposed by AB 2470, to be operative only if AB 2470 and this bill are both enacted and become effective on January 1, 1995, and this bill is enacted last. If both bills are enacted and this bill is enacted last, the community service requirement proposed by this bill would not be added to Section 12101.

Ch. 718 (AB 1921) Speier. State officers : expense allowance.

Existing law requires that the Lieutenant Governor, Attorney General, Controller, Secretary of State, Superintendent of Public Instruction, Treasurer, and the Chief Justice of California each receive, in addition to his or her salary, and his or her actual necessary traveling expenses, an expense allowance for all ordinary and necessary expenses incurred in carrying out the functions and duties of his or her office, including ordinary and necessary expense incurred for entertainment, of not exceeding $10,000 per year.

This bill would repeal this requirement.

Ch. 719 (AB 2030) Costa. Resource conservation districts: watershed protection.

Under existing law, resource conservation districts are authorized to, among other things, construct on privately or publicly owned lands, with the consent of the owner, any necessary works for the prevention and control of soil erosion and erosion stabilization.

This bill would also authorize resource conservation districts to facilitate coordinated resource management efforts for watershed restoration and enhancement. The bill would declare related legislative intent.

Ch. 720 (AB 2090) Aguiar. Air pollution control projects.

(1) Existing law, the California Environmental Quality Act, provides for the environmental review of proposed projects, as specified, by lead agencies, as defined.

Existing law, the Air Pollution Permit Streamlining Act of 1992, requires every air pollution control district and air quality management district to provide procedures for expedited air pollution control project permit review. Existing law requires each district to prepare a list permitting criteria that identifies streamlined permit requirements for each type of project, requires an applicant to submit specified information, and requires the district to act upon the permit and upon any environmental impact report or environmental assessment required by the California Environmental Quality Act concurrently.

This bill would impose that requirement for concurrent action only if the applicant has submitted the required information, and would make a related clarifying change.

(2) Existing law also permits an applicant to petition a district hearing board for a variance from the underlying air pollution project permit requirement if there is a delay in the approval of the permit to construct or permit to operate for projects subject to expedited air pollution project permit review. Existing law requires the hearing board to find that specified findings are met and grant the variance if it finds that the delay is not due to the lack of due diligence on the part of the applicant in the permitting process, and the delay results in the inability of the applicant to legally comply with the rule or compliance schedule that requires the installation and operation of the pollution control equipment.

This bill would, instead, require the hearing board to grant the variance from certain equipment or emission standard or emission limit requirements if the specified findings are made, as prescribed in the bill, and would prohibit the hearing board from imposing

NOTE: Superior numbers appear as a separate section at the end of the digests.

any excess emission fees in connection with the grant of the variance.

(3) Under existing law, certain requirements relating to streamlined permit application procedures apply only to air pollution projects required by law.

This bill would limit the application of those provisions to those projects that are necessary to comply with emission standards or limitations, as specified. The bill would prescribe additional information that a project applicant would be required to provide to the district.

Ch. 721 (AB 2509) Pringle. Air pollution: vehicles.

Existing law creates a regional Mobile Source Air Pollution Reduction Review Committee, requires the committee to submit to the South Coast Air Quality Management District a work program for funding grants, requires the south coast district board to approve or disapprove the program within 60 days, and provides that if the program is not disapproved within that time by a ¾ vote of the full south coast district board, it is deemed approved.

This bill would authorize the south coast district board to approve the program within that time by a majority vote of the full south coast district board, or the program is deemed disapproved.

The bill would take effect immediately as an urgency statute.

Ch. 722 (AB 2516) Katz. Education: gang risk intervention programs.

Existing law requires the State Department of Education to contract with the Los Angeles County Office of Education for the development, administration, and implementation in Los Angeles County of community-based Gang Risk Intervention Pilot Programs, as specified, and to award grants for the purpose of establishing these programs. Existing law specifies that proposals for grant funding shall begin no sooner than the 1989–90 school year.

This bill would expand these provisions to require the State Department of Education to establish a competitive bidding process for county offices of education that elect to submit a grant application for the development, administration, and implementation of community-based Gang Risk Intervention Programs. The bill would require that, for the 1994–95 fiscal year, the department distribute a standard request for proposal to county offices of education in northern California, and select programs submitted by those county offices of education to receive grants through the competitive bidding process. For the 1995–96 fiscal year, and each fiscal year thereafter, county offices of education throughout the state would be eligible to receive grants, as specified. This bill would require the department, upon selecting programs to receive grants, to submit to the Department of the Youth Authority, a request for allocation of funds.

This bill would authorize county offices of education to request and review proposals from, and to award grants through a competitive bidding process to, private nonprofit organizations and public entities that apply jointly with individual schools for the purpose of establishing Gang Risk Intervention Programs. This bill would require that proposals include the methods schools will use to maintain data regarding participating pupils. The bill would also require a full-time, paid community-based coordinator to be placed at program sites. The bill would specify that funding of grant proposals for these programs shall begin with the 1994–95 fiscal year.

This bill would reappropriate $100,000 of the amount appropriated in the Budget Act of 1994 for support of community-based organizations that provide gang violence and reduction services in a designated item of appropriation to the costs associated with administration and evaluation of the Gang Risk Intervention Programs by the State Department of Education.

To the extent the funds appropriated by this bill are for the support of public schools, those funds would be counted toward the minimum funding requirements imposed by Section 8 of Article XVI of the California Constitution.

Ch. 723 (AB 2763) Cortese. Department of Water Resources: loans and grants.

(1) Under the Water Conservation Bond Law of 1988, the Department of Water Resources may make loans to local agencies, upon approval of the Legislature by statute,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to aid in the construction of eligible projects and to aid in the funding of prescribed conservation programs and groundwater recharge facilities.

This bill would make an appropriation by authorizing loans from the 1988 Water Conservation Fund to specified entities for specified projects. The bill would require the department to determine eligibility for, and the amount of, the loans in accordance with that bond law.

(2) The California Safe Drinking Water Bond Law of 1988 permits bond proceeds in the California Safe Drinking Water Fund to be used for a grant program with grants provided, subject to specific approval of the Legislature, to prescribed entities.

This bill would make an appropriation by authorizing a grant from the fund to a specified entity for the purpose of financing projects and investigations to identify alternatives for system improvements. The bill would require the department to determine eligibility for, and the amount of, the grant in accordance with that bond law.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 724 (AB 2797) Harvey. Water reuse.

Existing law regulates and promotes the reuse of wastewater.

This bill would change the term "wastewater" to "water" or "reclaimed water" in various provisions and make related changes.

Ch. 725 (AB 2852) Escutia. Air pollution: vehicles.

Existing law establishes the motor vehicle inspection and maintenance program implemented by the Department of Consumer Affairs, and authorizes the State Air Resources Board to certify new motor vehicles and new motor vehicle engines.

This bill would require motor vehicle manufacturers of all 1980 and newer model-year motor vehicles to provide certain emission control service information, and would, beginning with the 1998 model year, require this information to be provided in an electronic format, as specified. The bill would require the department to direct licensed smog check stations and technicians to private diagnostic assistance service information vendors or intermediaries who possess the information, and to act as a clearinghouse. The bill would require motor vehicle manufacturers to provide the service information required for compliance with this section as a condition of certification of any new motor vehicle by the state board on and after January 1, 1995.

The requirements applicable with respect to 1994 and newer model-year vehicles would become inoperative if the state board determines that the Environmental Protection Agency has adopted rules relative to the provision of emissions-related service information for 1994 and newer model-year vehicles.

Ch. 726 (AB 3069) Frazee. State boards: duties.

(1) Existing law imposes various requirements on the State Board of Control with respect to certain reports affecting bids on state contracts, and hearings before the State Board of Equalization.

This bill would eliminate these duties, as specified, and would declare the intent of the Legislature with respect to the State Board of Control's reduced budgetary resources and duties.

(2) Existing law requires the board to approve various tax closing agreements, settlements, and refunds proposed by various agencies.

This bill would eliminate this approval requirement and provide for items to be made publicly available for a limited time prior to becoming final.

(3) Existing law requires board approval of state agency requests to pay prior-year obligations from current-year appropriations available for a like purpose when funds have reverted.

This bill would eliminate this approval requirement.

(4) Existing law requires the board's chairman to approve state agency requests for the Treasurer to stop payment on erroneously issued warrants.

This bill would eliminate this approval requirement.

(5) Existing law authorizes the board to regulate the establishment of state agency revolving funds if the balance exceeds 10% of the appropriation from which the fund

NOTE: Superior numbers appear as a separate section at the end of the digests.

is drawn, and to approve claims filed by agencies to replenish a deficient revolving fund balance from an omnibus claims bill appropriation from the agency's current support budget.

This bill would transfer these responsibilities to the Director of Finance and provide authority for approved revolving fund claims to be paid administratively from an agency's existing support budget.

(6) Existing law requires board approval of state agency requests to temporarily hire retired state employees for litigation-related purposes.

This bill would transfer that authority to the Director of Personnel Administration.

(7) Existing law authorizes the board to delegate to state agencies the settlement and payment of claims under $1,000, provided that the Department of Finance certifies a payment source for any claim in excess of $100 each.

This bill would eliminate this certification requirement.

(8) Existing law authorizes the board to delegate to all state agencies the authority to grant themselves relief from debt-collection responsibility for uncollectible items which do not exceed $50.

This proposal would increase that delegation level to $250 per uncollectible item.

(9) Existing law limits the extent to which the board members can delegate administrative and program duties to the executive officer.

This bill would authorize the board members to delegate discretionary duties to the executive officer, including the power to enter into contracts on behalf of the board and to act as the appointing power in personnel matters.

(10) Existing law entitles every taxpayer to be reimbursed for any reasonable fees and expenses related to a hearing before the State Board of Equalization if certain conditions are met.

This bill would require that the board's proposed award for fees and expenses be available as a public record for at least 10 days prior to the effective date of the award.

(11) Existing law provided, until January 1, 1994, for the resolution of public works construction claims, as defined, arising between a contractor and a local agency. It established specified procedures for the resolution of these claims, including civil action, mediation, and arbitration. It also provided for payment by the local agency for any undisputed portion of the claim, and for payment of interest, as defined, on any award or judgment.

This bill would reenact these provisions.

(12) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 727 (AB 3119) Quackenbush. Air pollution: permits: penalties.

(1) Existing law authorizes an air pollution control district or air quality management district to establish a permit system, which requires a person to obtain a permit before the person builds, erects, alters, replaces, operates, or uses any article, machine, equipment, or other contrivance which may release air contaminants. The air pollution control officer of a district is required to observe and enforce specified permit conditions and to condition the issuance of a permit on compliance with specified requirements of federal law.

This bill would make technical and clarifying changes in those provisions.

(2) Existing law requires any district permit system or permit provision to meet prescribed criteria, including identifying those terms and conditions of a permit which are federally enforceable and those which are not by either identifying those terms and conditions which are federally enforceable because they are imposed pursuant to a federal requirement or by identifying those terms and conditions which are imposed pursuant to state law or district rules, and are not federally enforceable.

This bill would authorize a district, if it identifies terms and conditions which are not federally enforceable, to further identify those terms and conditions which are not federally enforceable, but which have been adopted by the district to meet federal requirements.

The bill would make specified permit and penalty provisions inapplicable to situations involving the issuance of a Title V permit, as specified.

(3) Existing law prescribes criminal or civil penalties for violations of specified air

NOTE: Superior numbers appear as a separate section at the end of the digests.

pollution control laws, rules, regulations, permits, or orders of the State Air Resources Board or of a district.

This bill would impose civil penalties in additional cases, and would impose misdemeanor penalties for certain violations relating to toxic air contaminants. The bill would thereby impose a state-mandated local program by creating new crimes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 728 (AB 3139) Pringle. Tidelands: Newport Beach.

Existing law grants in trust to the City of Newport Beach all tide and submerged lands, whether filled or unfilled, bordering upon and under the Pacific Ocean or Newport Bay, which were within the corporate limits of the city on July 25, 1919, subject to specified conditions.

This bill would permit a current nonconforming residential use of a specified parcel within that grant to continue to be used for a specified period, subject to specified conditions. The bill would require all money received by the city from that use to be deposited, as prescribed, and to be available for specified purposes. The bill would make related legislative findings and declarations.

Ch. 729 (AB 3203) V. Brown. Mobilehome parks: sale.

Existing law generally prohibits the management of a mobilehome park from requiring the removal of a mobilehome from the park in the event of its sale during the term of the homeowner's rental agreement, but allows the management, in the event of sale, to require that a mobilehome be removed from the park where, among other factors, it is in a significantly rundown condition or in disrepair, which the management has the burden of demonstrating.

This bill would prohibit the management, under this provision, from requiring repairs and improvements to the park space or property owned by the management, except for damage caused by the homeowner.

Ch. 730 (AB 3220) Connolly. Repeat Offender Prevention Project.

Existing law establishes the Department of the Youth Authority. Existing law provides that the Department of the Youth Authority shall have authority over institutions for specified youthful offenders.

This bill would, contingent upon the appropriation of funds therefor, establish the Repeat Offender Prevention Project under the authority of the Department of the Youth Authority. The project would provide comprehensive social services for minors who are 15 years of age or younger, who have been declared a ward of the juvenile court for the first time, as specified, and who are at risk of becoming chronic juvenile offenders, as indicated by specified criteria. The project would implement certain intervention strategies for both the minors and their families. The bill would direct the Department of the Youth Authority to adopt written standards for the implementation, operation, and evaluation of the project and would authorize the department to operate the project for 3 years in 3 counties or regions, as specified. The project would terminate 3 years after the appropriation of funds therefor. The bill would also require the Department of the Youth Authority to make a report to the Legislature on the effectiveness of the program upon request.

Ch. 731 (AB 3521) McDonald. Pipeline safety: reporting requirements.

(1) Under existing law, the Elder California Pipeline Safety Act of 1981, the State Fire Marshal exercises safety regulatory jurisdiction over intrastate pipelines used for the transportation of hazardous, highly volatile liquid substances. Under the act, every rupture, as defined, explosion, or fire involving a pipeline is required to be immediately reported to the appropriate fire department that has fire suppression responsibilities and to the Office of Emergency Services. The fire department having fire suppression responsibilities is required to immediately notify the State Fire Marshal of the incident.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that the requirement to report the rupture, explosion, or fire to the appropriate fire department applies to the pipeline operator.

This bill would expand the definition of "rupture" for purposes of these reporting requirements to include any leak that occurs during hydrostatic testing. In addition, this bill would require, every 5th year, commencing in 1999, the State Fire Marshal to issue a report that identifies pipeline leak incident rate trends, reviews current regulatory effectiveness with regard to pipeline safety, recommends any necessary changes to the Legislature, and includes certain information relating to pipeline leaks.

The bill would require the pipeline operator to report certain information necessary for completion of the 5-year report within 30 days of a rupture, explosion, or fire to the State Fire Marshal. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(2) Existing law provides for the administration of oil and gas districts within the state.

This bill would authorize $10,000 of funds appropriated to the Division of Oil, Gas, and Geothermal Resources to be used to support activities at the West Kern Oil Museum. By authorizing the use of appropriated funds for this additional use, this bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would incorporate additional changes in Section 51018 of the Government Code, proposed by AB 3404, to be operative only if AB 3404 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 732 (AB 3682) Margolin. Workers' compensation insurance.

Existing provisions of law, which will become operative on January 1, 1995, prohibit workers' compensation insurance rates that impair or threaten the solvency of an insurer or create a monopoly, and provide for the filing of rates with the Insurance Commissioner.

This bill would require that rates shall not be unfairly discriminatory, as specified.

Existing law, which will also become operative on January 1, 1995, prohibits any advisory organization from issuing or insurer from using any classification system or rate, as applied or used, that violates specific provisions against discrimination or the Unruh Civil Rights Act, including any arbitrary economic discrimination by an insurer.

This bill would remove arbitrary economic discrimination by an insurer from that prohibition.

This bill would incorporate additional changes in Section 11735 of the Insurance Code, proposed by AB 3075 or SB 1803, or both, to become operative only if AB 3075 or SB 1803, or both, and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

Ch. 733 (AB 3744) Bronshvag. Recycled water.

Existing law makes legislative findings and declarations concerning the use of recycled water. Existing law establishes statewide water recycling goals.

This bill would revise those findings and declarations. The bill would require retail water suppliers to identify potential uses for recycled water within their service areas, potential customers for recycled water service within their service areas, and, within a reasonable time, potential sources of recycled water. The bill would authorize recycled water producers and retail water suppliers to cooperate in joint studies, as prescribed. The bill would authorize a retail water supplier that has identified a potential use of, or customer for, recycled water to apply to a recycled water producer or recycled water wholesaler for a recycled water supply. The bill would authorize a recycled water provider or recycled water wholesaler that has identified a potential use of, or customer for, recycled water to request, in writing, a retail water supplier to enter into an agreement to provide recycled water to the potential customer. The bill would authorize the

NOTE: Superior numbers appear as a separate section at the end of the digests.

prospective parties to a recycled water supply agreement to commence mediation, as prescribed. The bill would, under certain circumstances, authorize a mediator to recommend appropriate terms and conditions applicable to the service of the recycled water. The bill would define terms.

Ch. 734 (SB 1000) Dills. Air pollution: market-based incentive programs.

Existing law authorizes an air pollution control district or air quality management district to adopt a market-based incentive program. Existing law prescribes civil penalties for violations of specified air pollution control laws, rules, regulations, permits, and orders.

This bill would make a specified affirmative defense to the imposition of a civil penalty unavailable to a person who is determined to have violated an annual facility emissions cap established pursuant to a market-based incentive program.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 735 (SB 1038) Wright. Income and bank and corporation taxes: penalties: Northridge earthquake.

The Personal Income Tax Law, by reference to a specified federal statute, provides that certain premature or early distributions from qualified pension plans, employee annuities, and individual retirement accounts are includable in income and imposes certain penalties upon those premature or early distributions.

This bill would except from those penalties imposed any qualified distribution, as defined, to the extent that the distribution is made to any individual who suffered a hardship as a result of the Northridge earthquake of January 1994, any related aftershock, or any related casualty.

Existing law governing the administration of personal income and bank and corporation taxes imposes a specified penalty for the failure to pay the amount of tax shown on the return, as specified, the failure to pay the amount of tax within 10 days of the date of a notice and demand therefor, or the failure to pay the amount of tax on or before the date the tax is due and payable.

This bill would provide that no penalty shall be assessed pursuant to those provisions in the case of a qualified taxpayer, as defined, who has sustained, suffered, or realized certain losses as a result of the Northridge earthquake of January 1994, any related aftershock, or any related casualty.

This bill would take effect immediately as a tax levy.

Ch. 736 (SB 1268) Wyman. Environmental quality: guidelines: road grading.

Existing law, the California Environmental Quality Act, requires the Office of Planning and Research to prepare and develop proposed guidelines for the implementation of the act by public agencies, and to, at least once every 2 years, review and recommend proposed changes or amendments to those guidelines to the Secretary of the Resources Agency.

This bill would state the Legislature's request that the office, when next revising those guidelines, recommend changes that would clarify that a specified regulation relating to an exemption under the act for the operation, repair, maintenance, or minor alteration of existing highways and streets is intended to apply to the grading of an existing road shoulder for purposes of public safety.

Ch. 737 (SB 1450) Hughes. Crimes: dumping waste.

Existing law makes the dumping of any waste matter, as specified, punishable as an infraction and by a mandatory fine, as specified, depending on the number of convictions.

This bill would provide that the prescribed fine shall be doubled if the court finds that the waste matter was used tires.

The bill would make dumping of waste matter in commercial quantities, as defined, a misdemeanor punishable by imprisonment in a county jail for not more than 6 months and by a trebled fine. The bill would impose a state-mandated local program by creating a new crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 738 (SB 1524) Wright. Hazardous waste: transportation.

(1) Existing law requires the Department of the California Highway Patrol to conduct an annual inspection of specified vehicles used to transport hazardous waste. Existing law, until January 1, 1995, excludes from that requirement the transportation of hazardous waste in a rolloff bin, as defined, which complies with specified procedures and requirements, and receives a certificate of compliance, as prescribed, from the Department of Toxic Substances Control. These requirements include that the rolloff bin is used only to transport hazardous waste, except extremely hazardous waste, in a solid physical state that is not required to be labeled or placarded by the United States Department of Transportation. A violation of these requirements is a crime.

This bill would extend those provisions and related provisions until January 1, 1998. The bill would allow hazardous wastes, except extremely hazardous waste, which are in a solid physical state to be transported in a rolloff bin, but would prohibit the transportation of hazardous materials, as listed in the federal regulations, unless the material is a miscellaneous hazardous material (Class 9), as defined, or is not required to be labeled or placarded by the United States Department of Transportation.

The bill would repeal the authority of the Department of Toxic Substances Control to conduct random inspections of rolloff bins and to remove the certificate of noncomplying rolloff bins and would specify that the California Highway Patrol is authorized to conduct these inspections on both public and private property. The bill would also revise the definition of "container" and "rolloff bin" for purposes of these requirements.

Since the bill would extend the provisions concerning rolloff bins, and would revise the requirements for the types of hazardous waste which may be transported in rolloff bins, the bill would impose a state-mandated local program by creating new crimes.

The bill would require the Department of the California Highway Patrol, on or before January 1, 1998, to prepare and submit a report to the Legislature on the inspection program, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 739 (SB 1574) Calderon. Hazardous waste: treatment standards: deadlines.

(1) Existing law, the Hazardous Waste Management Act of 1986, prohibits the land disposal of certain hazardous wastes, unless the hazardous waste is treated or meets other requirements. The act allows any hazardous waste classified under the federal Resource Conservation and Recovery Act of 1976 (RCRA) for which a treatment standard has not been adopted or is not yet in effect pursuant to RCRA, and any non-RCRA hazardous waste subject to specified treatment standards, to be disposed of, until January 1, 1995, at a hazardous waste facility without compliance with any treatment standard adopted by the Department of Toxic Substances Control. The act requires, on and after January 1, 1995, that this RCRA or non-RCRA hazardous waste be disposed of in accordance with the department's treatment standard, except as specified.

This bill would extend to January 1, 1996, the date until which RCRA hazardous waste subject to specified treatment standards may be disposed of at a hazardous waste facility without compliance with any treatment standard adopted by the department, or on and after which RCRA or non-RCRA hazardous waste is required to be disposed of in accordance with the department's treatment standard.

(2) The act also required the department, by January 1, 1994, to issue written findings based upon a reevaluation of the treatment standards adopted for hazardous wastes for which incineration has been identified as a treatment method.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revive that requirement to issue written findings, by instead requiring the issuance of the written findings by January 1, 1995, and would make a conforming change.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 740 (SB 1953) Alquist. Building standards.

(1) Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, establishes, under the jurisdiction of the Office of Statewide Health Planning and Development, a program of seismic safety building standards for certain hospitals constructed on and after March 7, 1973.

This bill would state the Legislature's findings that the Northridge earthquake demonstrated that hospitals built in accordance with this act suffered little damage while several built prior to the act suffered major damage.

The bill would require the office to develop definitions of earthquake performance categories for certain types of hospitals, including hospitals that are not in substantial compliance with the act, and would specify the information that these definitional categories would include. It would also require the office to define rapid seismic evaluation procedures, and to develop regulations regarding seismic standards and other procedures. The bill would require the office to submit specified portions of this information to the California Building Standards Commission by June 30, 1996, and December 31, 1996, respectively, and would require the commission to review, revise as necessary, and adopt the information by December 31, 1996, and June 30, 1997, respectively.

The bill would provide that the office is responsible for reviewing and approving seismic evaluations, compliance schedules, and construction documents that are developed by owners and field review of work done pursuant to these requirements.

The bill would appropriate $318,000 from the Hospital Building Fund to the office for fiscal years 1994–95 through 1997–98 for the purpose of developing regulations to implement certain of the above-described requirements.

The bill would authorize the office, in the event of a seismic event or other calamity, to place a tag on a hospital building indicating the opinion of the office about the structural integrity of the hospital building or any other major system of the hospital building.

The bill would impose certain requirements that the owners of all general acute care hospitals would be required to meet within a specified time. These requirements would include conducting seismic evaluations in accordance with certain procedures, and preparing a comprehensive plan and compliance schedule within 3 years after certain standards are adopted by the commission and submitting it to the office for review and approval. It would provide that owners of all general acute care hospitals may be granted a one-year allowance from these requirements based on certain factors. The bill would impose additional requirements on the hospital building owners, including information the office and other entities of the hospital building's expected earthquake performance, and including certain information in emergency training and recovery plans.

The bill would provide that after January 1, 2008, general acute care hospital buildings that are determined to pose certain risks shall only be used for nonacute care hospital purposes, and would authorize the office to grant a delay to this deadline based on certain factors. It would require, in accordance with the compliance schedule approved by the office, and in any case no later than January 1, 2030, owners of all acute care inpatient hospitals to demolish, replace, or change to nonhospital use, all hospital buildings that are not in substantial compliance, or seismically retrofit them so that they are in compliance with the standards. The bill would require the office to provide written notice to hospital owners of compliance with or violation of these requirements and would require the office to notify the State Department of Health Services of violations or failures to comply.

The bill would require the State Department of Health Services to suspend or refuse to renew the license of a hospital that has received a notice of violation.

Existing law makes violations of these provisions a crime. By expanding the scope of this crime, this bill would impose a state-mandated local program.

(2) Under existing law, building standards contained in various uniform industry

NOTE: Superior numbers appear as a separate section at the end of the digests.

codes as referenced in the California Building Standards Code apply to all occupancies throughout the state.

This bill would make the standards contained in the Uniform Mechanical Code of the International Conference of Building Officials and the International Association of Plumbers and Mechanical Officials, as referenced in the California Building Standard Code, applicable to all occupancies throughout the state. Existing law provides, with certain exceptions, that an adoption, amendment, or repeal of a building standard shall become effective 180 days after its publication in the California Building Standards Code or its approval by the California Building Standards Commission.

This bill would instead provide that a repeal of an amendment to the California Building Standards Code that is found by the commission to be more restrictive than the Uniform Building Code shall become effective 30 days after filing of the repeal with the Secretary of State.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 741 (SB 2058) Watson. Peace officer: personnel records: discovery.

Existing law authorizes a department or an agency that employs peace officers to disseminate data regarding the number, type, or disposition of complaints, as described, made against its officers if the disclosed information is in a form that does not identify the individuals involved. Existing law further specifies that nothing contained in the existing prohibition precludes a department or agency from informing the complaining party of the disposition of the complaint and provides that a notification informing the complaining party of the disposition of his or her complaint shall not be conclusive or binding or admissible as evidence in any separate or subsequent action or proceeding, as specified.

This bill would require a department or agency to release to the complaining party a copy of his or her own statements at the time the complaint is filed and to provide written notification to the complaining party of the disposition of the complaint within 30 days of the disposition.

Because this bill would mandate a higher level of service on a local entity, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 742 (SB 2066) Rogers. University police: alcoholic beverages: juries.

(1) The existing Alcoholic Beverage Control Act authorizes members of the California State Police Division and peace officers of the Department of Parks and Recreation, as defined, to visit and inspect the premises of any licensee located on state property, as specified, in enforcing the provisions of the act.

This bill would additionally authorize members of the University of California and California State University police departments to inspect the premises of licensees located on state property.

(2) Existing law directs the jury commissioner to randomly select jurors for jury panels to be sent to courtrooms for voir dire, except specified peace officers who may not be selected for voir dire in civil or criminal matters.

This bill would additionally exempt members of the University of California and the California State University police departments from the list of persons who may be

NOTE: Superior numbers appear as a separate section at the end of the digests.

selected for voir dire in criminal matters.

Ch. 743 (SB 2112) Bergeson. Zoning: multifamily dwelling: reconstruction.

Under the existing Planning and Zoning Law, cities and counties are authorized to enact ordinances to, among other things, regulate the use of land and structures with respect to residences, including multifamily dwellings.

This bill would provide that no local agency shall prohibit the reconstruction, restoration, or rebuilding of a multifamily dwelling, as defined, that is involuntarily damaged or destroyed, as specified, except if the building or structure is located in an industrial zone, as specified. It would also provide that, notwithstanding this prohibition, a local agency may prohibit reconstruction, restoration, or rebuilding under specified circumstances. It would require that the dwelling be reconstructed, restored, or rebuilt in a manner that conforms with the California Building Standards Code, any more restrictive local ordinances as that code or those ordinances were in effect at the time of the reconstruction, restoration, or rebuilding, the State Historical Building Code, local zoning ordinances, architectural regulations and standards, as specified, and a building permit, which the bill would require to be obtained within 2 years after the date of damage or destruction. The bill would also permit a local agency to enact or enforce an ordinance, regulation, or resolution that grants greater or more permissive rights regarding the restoration, reconstruction, or rebuilding of a multifamily dwelling that is involuntarily damaged or destroyed, as specified.

Ch. 744 (SB 1668) Mello. Monterey Bay State Seashore: recreational trails: Columbia Park.

(1) Under existing law, units of the state park system are classified by the State Park and Recreation Commission into one of specified categories, including state seashores, and specified state seashores are established.

This bill would establish the Monterey Bay State Seashore, consisting of lands extending from Natural Bridges State Beach to Point Joe in Santa Cruz and Monterey Counties, and would authorize the Department of Parks and Recreation to establish a recreational trail system within the boundaries of the Monterey Bay State Seashore which is to be dedicated as the Sam Farr Recreational Trail System.

(2) Existing law, the California Park and Recreational Facilities Act of 1984, a bond act approved by the voters on June 5, 1984, requires that money deposited into the Parklands Fund of 1984 be made available for local assistance grants to counties, cities, and districts for, among other things, the acquisition, development, rehabilitation, or restoration of real property for park, beach, recreational, or historical resources preservation purposes.

An item of the Budget Act of 1984 appropriated money from the fund for local assistance to the Roberti-Z'berg-Harris Urban Open-Space and Recreation Program established pursuant to the Roberti-Z'berg-Harris Urban Open-Space and Recreation Program Act.

Both the bond act and the program act prohibit the disbursal of grant funds until the grant applicant agrees that any property acquired, developed rehabilitated, or restored with those funds shall be used by the applicant only for the purpose for which the funds were requested, and that no other use, sale, or other disposition of the property shall be permitted except by specific act of the Legislature.

This bill would authorize the City of Reedley, California, to convert to a different nonrecreational use, or sell, the property known as Columbia Park which was acquired with a grant of state funds appropriated pursuant to that item of the Budget Act of 1984 if specified conditions are met.

This bill would incorporate changes in Section 5001.6 of the Public Resources Code proposed by SB 1585, but only if this bill and SB 1585 are both chaptered and become effective and this bill is chaptered last.

Ch. 745 (SB 1597) Marks. Fish and wildlife: penalties.

(1) Existing law generally makes it a misdemeanor to violate a provision of the Fish and Game Code, with specified exceptions. Existing law provides that the sale or pur-

NOTE: Superior numbers appear as a separate section at the end of the digests.

chase, or possession for sale, of parts of a bear is a felony or a misdemeanor.

This bill would provide that if the conviction is for the possession of 2 bear gall bladders, imprisonment in the county jail for not less than 30 days shall be a condition of any probation or suspension of sentence, thereby imposing a state-mandated local program. The bill would make the possession of 3 or more bear gall bladders punishable by imprisonment in the county jail for not more than one year, by a fine of not more than $10,000, or by both that fine and imprisonment.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 746 (AB 49) Sher. Forest practices: report: plans and notices.

(1) Existing law, the Z'berg-Nejedly Forest Practice Act of 1973, authorizes the State Board of Forestry to exempt from the act specified forest management activities.

The act authorizes the filing of a notice of exemption to convert less than 3 acres to a nontimber use and an emergency notice for immediate harvest activities, as specified. The act requires an emergency notice to include a declaration, under penalty of perjury, that a bona fide emergency exists which requires immediate harvest activities.

The act requires the Director of Foresty and Fire Protection, within 10 days after a timber harvesting plan is determined to be in conformance with existing law, or within 10 days after the receipt of a notice of timber operations or a nonindustrial timber harvest notice, to notify the State Board of Equalization, as specified.

This bill would exempt the cutting or removal of trees to reduce fire hazards, as prescribed, and would require the board to adopt regulations, initially as emergency regulations, to implement and to obtain compliance with the provisions of that exemption. Since a willful violation of the act, or a willful violation of regulations adopted pursuant to the act, is a misdemeanor, the willful failure to comply with the prescribed terms of the fire hazard exemption, or a willful violation of regulations adopted by the board to govern that exemption, would be a misdemeanor, thereby imposing a state-mandated local program by creating new crimes.

The bill would require the declaration in an emergency notice to additionally state that any applicable timber yield taxes shall be paid by the owner or operator.

The bill would also require the director to notify the State Board of Equalization within 10 days from the date of receipt of a notice of exemption to convert less than 3 acres to a nontimber use or an emergency notice.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 747 (AB 3214) Pringle. Political Reform Act of 1974: air pollution control districts and air quality management districts: conflicts of interest.

(1) Existing law, the Political Reform Act of 1974, an initiative measure, prohibits former members of a state administrative agency from representing any persons before the state administrative agency, as specified.

This bill would amend the act to also prohibit a former board member or officer or employee of any air pollution control district or air quality management district who held a position which entailed the making, or participation in the making, of decisions which may foreseeably have a material effect on any financial interest, for a period of one year after leaving that office or employment, from acting as an agent or attorney for, or otherwise representing, for compensation, any other person, by appearing before, or communicating with, that district board, or any committee, subcommittee, or present member of that district board, or any officer or employee of the district, if the appearance or communication is made for the purpose of influencing regulatory action. The

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions of this bill would also apply to hearing board members and former hearing board members of air pollution control districts and air quality management districts. The bill would prescribe other related matters.

Since a violation of the act is a misdemeanor, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The act provides that the Legislature may amend the act to further the act's purposes by a ⅔ vote of each house and compliance with specified procedural requirements.

This bill would declare that it furthers the purposes of the act.

Ch. 748 (AB 3144) Hannigan. Income taxes: bank and corporation taxes: credits: child care.

The existing Personal Income Tax Law and Bank and Corporation Tax Law provide for taxable or income years beginning on or after January 1, 1988, and before January 1, 1995, tax credits with respect to startup expenses for child care programs or constructing a child care facility, costs for child care information and referral services, and costs paid or incurred for contributions to a qualified care plan, as defined.

This bill would make technical, clarifying changes in the existing credit provision. The bill would also extend the credit to taxable or income years from January 1, 1995, to January 1, 1998, and revise the extended credit provision to, among other things, reduce the percentage of costs for which the credit can be claimed and the maximum amount of the credit, limit qualified contributions to direct payments to child care programs or providers, and limit application of the credit to dependents of a qualified employee under the age of 12 years.

This bill would take effect immediately as a tax levy.

Ch. 749 (SB 101) Bergeson. Infrastructure financing.

The Bergeson-Peace Infrastructure Bank Act, which will become effective January 1, 1995, if this bill is enacted and the Governor provides written notice that funds are available to implement the act, creates the California Infrastructure Bank within the California Housing and Infrastructure Finance Agency, and imposes certain responsibilities on the bank to carry out the purposes of the act.

This bill, among other things, would rename the act the Bergeson-Peace Infrastructure and Economic Development Act, rename the California Infrastructure Bank the California Infrastructure and Economic Development Bank, revise the duties of the bank, authorize the bank to borrow funds from any special funds or up to $5,000,000 from the General Fund for the purpose of meeting the necessary expenses of initial organization, repeal the existence of the Bond Guarantee Trust Account within the California Infrastructure and Economic Development Bank Fund, and make other substantive and technical revisions to the act, as specified.

Ch. 750 (SB 344) Greene. Enterprise zones.

Under the Employment and Economic Incentive Act, targeted economic development and neighborhood economic development program areas are designated and receive tax incentives, special assistance, startup capital, and other incentives for private investment and employment.

This bill would provide that a program area or part of a program area may be redesignated as an enterprise zone by the local governing body if the affected area is designated as surplus under specified federal base closure statutes. The bill would specify tax implications resulting from such a redesignation.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 751 (SB 676) Alquist. Personal income and bank and corporation taxes: sales and use taxes.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law allow to qualified persons, as defined, a credit against those taxes for each taxable and income year beginning on or after January 1, 1994, as specified, in an amount equal to 6% of the amount paid or incurred during the taxable or income year for qualified property that is placed in service in this state. "Qualified property" is defined as property purchased for use by a qualified person for a specified purpose.

This bill would allow the credit to a qualified taxpayer, as defined, only with respect to the qualified cost, as defined, of qualified property, as defined; would expand the definition of qualified property to include computer software that is primarily used for specified purposes and property leased for use by a qualified person for one of those specified purposes; would revise the initial year in which the credit could be claimed; would exclude from credit eligibility amounts paid or incurred under contracts binding prior to a specified date; would provide for recapture of the credit if qualified property is prematurely removed from the state, disposed of, or used for an unauthorized purpose; and would make various other modifications to the credit.

The existing Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property and provides various exemptions from the taxes imposed by that law.

That law provides an exemption from those taxes for the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property, as defined, purchased for use by a qualified person, as defined, to be used primarily in any stage of manufacturing, processing, refining, fabricating, or recycling of property, as specified. That law also exempts the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property primarily used by a qualified person in research and development, to maintain, repair, measure, or test specified property, or for use by a contractor, as specified, for a qualified person. The exemption does not apply to any tangible personal property that is used primarily in administration, general management, or marketing.

This bill would also provide that, for purposes of the exemption, tangible personal property does not include certain described depreciable property, as provided. This bill would provide that the exemption shall not apply to specified taxes, and would require the Employment Development Department to report to the Legislature in connection with the exemption, as provided.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are generally incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but the operative date of certain of its provisions would depend upon this bill's effective date.

Ch. 752 (SB 1304) Ayala. Electricity rates.

Existing law requires electrical corporations to make available to qualifying heavy industrial customers optional interruptible or curtailable service, at a rate to reflect a pricing incentive.

This bill would require the Public Utilities Commission to direct each public utility electrical corporation to renew its efforts to reduce the rates charged heavy industrial customers to a level competitive with other states, and would require each electrical corporation to report to the commission no later than June 30, 1995, on those measures or practices it has identified that would permit it to reduce its firm service rates for heavy industrial customers to the level of its interruptible or curtailable service rates provided to those customers as of January 30, 1993.

This bill would also express legislative findings and declarations and state the legisla-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

tive intent with respect to these provisions.

Since existing law makes any public utility that violates specified provisions regulating public utilities guilty of a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 753 (SB 1387) Thompson. Economic development: California Economic Development Financing Authority.

Existing law gives the Trade and Commerce Agency duties and responsibilities related to economic development. The agency is required to allocate funds in the California Economic Development Grant and Loan Fund for loans or grants to public agencies and private entities for economic development purposes. The agency is authorized to sell notes and evidences of indebtedness derived from grants or loans of moneys in the fund.

This bill would create the California Economic Development Financing Authority in the Trade and Commerce Agency. The authority would be empowered to issue revenue bonds. The authority would also have the power to approve and finance public infrastructure projects and private economic development projects. The California Economic Development Financing Authority Fund would be created and continuously appropriated to the authority, except for purposes of general administration, as specified, for the purposes of the authorized programs.

Ch. 754 (SB 1438) Mello. Enterprise zones.

Existing law authorizes the governing body of a city or county to propose the designation of areas within its respective jurisdiction as enterprise zones based upon specified findings that those areas are depressed areas and in need of private sector investment. The Trade and Commerce Agency is authorized to designate by December 1991 not more than 25 enterprise zones within the state based on its determination that the zones propose the most effective, innovative, and comprehensive regulatory tax program, and other incentives in attracting private sector investment in the zones proposed. The agency is also authorized to designate 2 enterprise zones from applications by cities with a population less than 25,000. The existing Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, including wages paid or incurred by an employer to a qualified disadvantaged individual who meets specified criteria. The criteria include being hired by the employer after the designation of the area in which services were performed as an enterprise zone.

This bill would require the agency to designate 2 additional enterprise zones that meet prescribed criteria. This bill would extend the existing tax credits to the 2 additional enterprise zones designated by the agency pursuant to these provisions. The bill would also require the agency to review the progress and effectiveness of each enterprise zone, as specified, and report its findings to the Legislature.

Ch. 755 (SB 1770) Alquist. Income and bank and corporation taxes: credits: employees.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize a credit in an amount equal to a specified percentage of certain wages paid to a qualified disadvantaged individual, as defined.

This bill would modify certain limitations in the definition of a qualified disadvantaged individual, as provided, and impose specified new duties on the taxpayer.

This bill would incorporate amendments to Sections 17053.8 and 23622 of the Revenue and Taxation Code made by SB 344 and SB 1438 if this bill and either SB 344 or SB 1438, or both, are chaptered and this bill is chaptered last.

This bill would take effect immediately as a tax levy.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 756 (AB 1313) W. Brown. Income and bank and corporation taxes: credits.

The Personal Income Tax Law and Bank and Corporation Tax Law provide, as specified, under either or both laws, among other things, a credit in an amount, not to exceed a specified limit, that is equal to the sales or use tax paid or incurred by a taxpayer engaged in a trade or business within the Los Angeles Revitalization Zone in connection with the purchase of qualified property, as defined; and a credit for certain wages paid to, or received by, specified employees who are residents of the Los Angeles Revitalization Zone. Existing law provides that the amount of the credit shall not exceed the amount of the tax that would be imposed on the income attributable to the zone. The amount of income attributable to the zone is determined pursuant to specified provisions relating to apportionment of income.

This bill would revise and recast those provisions to provide that the amount of the income attributable to the zone be determined by a specified 2-factor formula.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, and provide that only certain of those credits may be applied, as specified, to reduce certain amounts of tax imposed under those laws below the amount of the tentative minimum tax, as defined by a specified statute.

This bill would, commencing with each taxable or income year beginning on or after January 1, 1994, and before January 1, 1998, include the tax credits allowed with respect to the wages paid to certain individuals that are hired within the Los Angeles Revitalization Zone among those credits that may be applied to reduce amounts of tax below the amount of the tentative minimum tax.

This bill would take effect immediately as a tax levy.

Ch. 757 (AB 3662) Caldera. Director of Apparel Industry Support.

Existing law makes the Secretary of Trade and Commerce responsible for coordinating the various trade, investment, and tourism activities of the California State World Trade Commission and the Department of Commerce to ensure that the resources that the state has invested in these programs are used effectively and efficiently.

This bill would require the secretary to direct all relevant components of the Trade and Commerce Agency to coordinate state resources for specified purposes relating to supporting the apparel industry in the state.

Ch. 758 (AB 3081) Lee. Neonatal group B streptococcal infection.

Existing law contains provisions regarding the testing of antibodies for certain diseases and infections, the treatment of certain diseases or conditions, and provides for the administration of these provisions by the State Department of Health Services.

This bill would require the department, provided that funds are available, to convene a conference to address the issue of testing or treatment to prevent neonatal group B streptococcal disease. It would require that there be representatives from certain organizations at the conference, that the conference convene at least once during the 1994–95 fiscal year, and that the department develop a standardized written summary on group B streptococcal disease and guidelines on the prevention of neonatal group B streptococcal disease based on the conference.

Ch. 759 (AB 2493) Speier. Health coverage: primary care providers: obstetrician-gynecologists.

Existing law provides for licensure and regulation of health care service plans by the Commissioner of Corporations. Under existing law, willful violation of these provisions is a misdemeanor. Existing law also provides for the regulation of policies for disability insurance and nonprofit hospital service plans by the Insurance Commissioner.

Existing law requires that health care service plan contracts, nonprofit hospital service plan contracts, and disability insurance policies provide coverage for certain services and treatments.

This bill would state the findings and declarations of the Legislature with regard to the necessity for obstetrician-gynecologists to be deemed primary care providers for the purposes of health coverage. On or after January 1, 1995, this bill would require that

NOTE: Superior numbers appear as a separate section at the end of the digests.

health care service plan contracts, nonprofit hospital service plan contracts, and disability insurance policies, that cover hospital, medical, or surgical expenses, issued, amended, delivered, or renewed in this state , include obstetrician-gynecologists as primary care physicians or providers, as defined, provided they meet certain eligibility criteria.

By revising the provisions pertaining to health care service plans, this bill would create a new crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 760 (AB 2200) Speier. Women's health.

Existing law requires the administration of certain health-related programs by various departments, including the State Department of Health Services, within the Health and Welfare Agency.

This bill would establish the Office of Women's Health in the State Department of Health Services.

This bill would also require the Health and Welfare Agency to establish an interagency task force on women's health composed of representatives of certain departments.

This bill would require the office, in consultation with the task force, to develop a state strategy for addressing the health related needs of women. This bill would further authorize the office to perform various tasks related to women's health.

This bill would authorize the participation of additional departments of state government with the interagency task force as necessary to implement the state strategy developed by the office.

Ch. 761 (SB 1146) Johnston. Insurance discrimination: genetic characteristics.

(1) Existing law provides that a health care service plan, a self-insured employee welfare benefit plan, or a nonprofit hospital service plan may not refuse to enroll any person or accept any person as a subscriber or insured solely by reason of the fact that the person carries a gene which may, under some circumstances, be associated with disability in that person's offspring, but which causes no adverse effects on the carrier, as specified. Existing law contains similar provisions prohibiting rate discrimination and commission discrimination on that basis. A willful violation of these provisions with regard to a health care service plan is punishable as a crime.

This bill would delete the limitation on those prohibitions that those reasons for refusal or discrimination be the sole reasons for that refusal or discrimination. The bill also would instead prohibit those forms of refusal and discrimination by health care service plans, self-insured employee welfare benefit plans, and nonprofit hospital service plans on the basis of a person's genetic characteristics, as defined, which may, under some circumstances, be associated with disability in that person or that person's offspring. The bill would thus expand the definition of an existing crime, thereby imposing a state-mandated local program. These provisions would remain in effect until January 1, 2002, when they would be repealed, except with respect to the deletion of the limitation discussed above.

(2) Existing law also provides that no life or disability insurer shall fail or refuse to accept an application or to issue insurance, or issue or cancel insurance, except with regard to reasons applicable alike to persons of every race, color, religion, national origin, ancestry, or sexual orientation, and that these reasons shall not, of themselves, constitute a risk for which a higher rate, premium, or charge may be required.

This bill would additionally provide that, effective until January 1, 2002, except as otherwise permitted by law, no admitted insurer licensed to issue disability policies for hospital, medical, and surgical expenses shall fail or refuse to accept an application for that insurance, or fail or refuse to issue that insurance, cancel that insurance, charge a higher rate or premium, or place a limitation on coverage, on the basis of a person's genetic characteristics, as specified. It would prohibit discrimination in fees and commissions of agents or brokers for writing or renewing a disability policy, other than disability

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

income, on the basis of a person's genetic characteristics which may, under some circumstances, be associated with disability in that person or that person's offspring. It would similarly prohibit discrimination in fees and commissions with respect to a life or disability income policy on the basis of a test of a person's genetic characteristics.

(3) The bill would also prohibit an insurer from requiring a test for the presence of a genetic characteristic for the purpose of determining insurability other than in accordance with specified informed consent and privacy protection requirements, as specified.

(4) The bill would specify certain civil and criminal penalties for the willful or negligent disclosure of genetic characteristic test results, as specified. In creating a new crime, the bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 762 (AB 2801) W. Brown. Public employees: compensation: retirement benefits.

(1) Existing law requires the Department of Personnel Administration to base recommendations for the salaries of the California Highway Patrol on the estimated average salaries as of July 1 of the year in which the recommendations are made for each corresponding rank for the Los Angeles Police Department, the Los Angeles Sheriff's office, the San Diego Police Department, the Oakland Police Department, and the San Francisco Police Department. Existing law further requires the department to survey the above agencies to determine their practices relative to incentive compensation for educational attainment and training.

This bill would instead declare that it is the policy of the state to compensate state traffic officers the estimated average total compensation as of July 1 of the year in which comparisons are made for the rank corresponding to state traffic officer within the above police and sheriff offices.

(2) The Public Employees' Retirement Law authorizes the state to require a higher rate of member contribution by patrol members not covered by a memorandum of understanding.

This bill, upon the approval of the Department of Personnel Administration, would apply the member contribution rate provided in a memorandum of understanding to those patrol members.

(3) The Public Employees' Retirement Law limits the retirement allowances of state safety, peace officer/firefighter, and patrol members to 75% of final compensation.

This bill would increase that limit to 80% for members who retire on or after January 1, 1995.

(4) Existing workers' compensation law provides that whenever any member of the California Highway Patrol or any member of the Department of Justice falling within the "state safety" class is disabled by injury arising out of and in the course of his or her duties, he or she shall become entitled, regardless of his or her period of service with the patrol, or Department of Justice to a leave of absence while so disabled without loss of salary, in lieu of disability payments, for a period not exceeding one year.

This bill would revise provisions relating to the payment of disability benefits to members of the California Highway Patrol, for periods of disability commencing on or after January 1, 1995.

(5) This bill also declares that it is an addendum to an existing memorandum of understanding and that this addendum requires the expenditure of funds upon approval of the Legislature, thereby making an appropriation.

(6) This bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 763 (SB 1667) Mello. Timber harvesting plans: appeals.

Under existing law, the Z'berg-Nejedly Forest Practice Act of 1973, generally, no person may conduct timber operations on timberland unless the person has submitted

NOTE: Superior numbers appear as a separate section at the end of the digests.

a timber harvesting plan to the Department of Forestry and Fire Protection and received approval of that plan from the Director of Forestry and Fire Protection.

The act authorizes the board of supervisors of a county for which rules and regulations have been adopted pursuant to specified provisions, not later than 10 days after approval of a plan by the director, to appeal that approval to the State Board of Forestry. The act requires the board to grant a hearing if it makes a determination that the appeal raises substantial issues with respect to the environment or public safety and to hold a public hearing within 30 days of filing of the appeal, or a longer period mutually agreed upon by the board, the county, and the plan submitter. The board is authorized, by regulation, to delegate that determination to the chairperson of the board.

This bill would instead require the board to grant to a county that meets the requirements for filing an appeal an initial hearing to consider the county's request for an appeal at the next regularly scheduled board meeting following the receipt of the request, and, if the board determines that the appeal raises substantial issues, to grant a public hearing on the appeal and to hold that hearing within 30 days from the date of granting the hearing, or at the board's next regularly scheduled meeting, whichever occurs first, or within a longer period of time that is mutually agreed upon by the board, the county, and the plan submitter. The bill would delete the authority to delegate the determination to the chairperson of the board. The bill would also make various technical and clarifying changes in those provisions.

Ch. 764 (SB 1189) Maddy. Antelope Valley Storm Water Conservation and Flood Control District.

(1) Under existing law, various local public agencies provide for the control and conservation of drainage, flood, and storm waters.

This bill would enact the Antelope Valley Storm Water Conservation and Flood Control District Act and would create the Antelope Valley Storm Water Conservation and Flood Control District, subject to the approval of the registered voters within the proposed district boundaries, which the bill would prescribe, at the first countywide consolidated elections held after January 1, 1995, in the Counties of Los Angeles and Kern, thereby imposing a state-mandated local program by imposing duties on those counties relating to the conduct of the election. The bill would provide for the organization and management of the district. The bill would establish the general duties and responsibilities of the district. The bill would require the district to collect an assessment, as prescribed, thereby imposing a state-mandated local program by imposing duties on the district. The bill would prescribe other means of district financing. The bill would impose a state-mandated local program by imposing various other duties on the district. The bill would set forth legislative findings and declarations regarding the enactment of the bill.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 765 (SB 1374) Torres. Prisons: wardens.

Existing law provides that the Governor, upon recommendation of the Director of Corrections, and with the advice and consent of the Senate, shall appoint the wardens of the various state prisons.

Existing law also provides that each warden is subject to removal by the director, and if the director removes the warden, the action shall be final.

This bill would require the Inspector General to conduct a management review audit of any warden or superintendent of the state prison who has held his or her position for more than 5 years and to submit the audit report to the secretary of the agency and the respective director for evaluation and for any response deemed necessary by the director.

The bill also would provide that it shall become operative only if SB 1462 is enacted and becomes effective on or before January 1, 1995.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 766 (SB 1462) Maddy. Corrections: office of the Inspector General.

Existing law establishes the Youth and Adult Correctional Agency which consists of the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, the Youthful Offender Parole Board, the Board of Corrections, and the Narcotic Addict Evaluation Authority.

This bill would create the office of the Inspector General. The bill would require the Governor to appoint the Inspector General subject to Senate confirmation. The bill would set forth the Inspector General's responsibilities, including reviewing policies and procedures for conducting audits and investigations of the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, the Youthful Offender Parole Board, or the Board of Corrections.

This bill would transfer up to $250,000 to the Youth and Adult Correctional Agency for the purpose of establishing the office of the Inspector General, from the amount appropriated by the Budget Act of 1994 to the Department of Corrections and the Department of the Youth Authority.

Ch. 767 (SB 1632) Kelley. Public utilities: baseline rates.

Existing law requires the Public Utilities Commission to designate a baseline quantity of electricity and gas, as defined, necessary for a significant portion of the reasonable energy needs of the average residential customer. The commission is also required to avoid excessive rate increases for residential customers, and establish an appropriate gradual differential between the rates for the respective blocks of usage.

The commission is also required to retain an appropriate inverted rate structure in establishing residential rates, and if the commission increases baseline rates, revenues resulting from those increases are required to be used exclusively to reduce nonbaseline residential rates.

This bill would, until January 1, 1999, specify that these provisions shall not prohibit the development of experimental electrical residential rate schedules where the energy component of a rate decreases as consumption increases, if the utility demonstrates and the commission finds that the consumption pattern of those participating customers causes the energy costs of the utility to decrease as consumption increases and would make legislative findings and declarations in that regard.

The provisions of the bill would apply only within extreme climatic zones 15 and 16, as defined by the State Energy Resources Conservation and Development Commission, and that are located within the service territory of the Southern California Edison Company, and only for residential customers who purchase and install high-efficiency heating or cooling equipment for whom the Southern California Edison Company demonstrates and the commission finds that the consumption pattern of those participating customers causes the energy costs of the utility to decrease as consumption increases.

Ch. 768 (SB 1656) Kelley. Wildlife: birds and mammals.

Existing law makes it a misdemeanor to take birds or mammals with a net, pound, cage, trap, set line or wire, or poison, or to possess birds or mammals so taken. Existing law also defines nongame birds as birds occurring naturally in this state that are not resident game birds, migratory birds, or fully protected birds and prohibits the taking of nongame birds except as provided in the Fish and Game Code or in accordance with regulations of the Fish and Game Commission.

This bill would except from that misdemeanor provision taking as provided in the Fish and Game Code or, when related to mining operations, in accordance with a mitigation plan approved by the Department of Fish and Game. The bill would require mitigation plans approved by the department to include provisions that address circumstances where mining operations contribute to bird deaths. The bill would require the mine operator to prepare a mitigation plan to be submitted to the department for approval and would require the department to monitor and evaluate implementation of the mitigation plan and require changes under specified circumstances. The bill would require the mining operator to reimburse the department to provide notice, as specified, and to provide copies of the mitigation plan for public review. The bill would require the plan to be site-specific and provide for related matters.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would make corresponding changes relating to mining operations in the provisions relating to nongame birds.

Existing law requires the reimbursements to be deposited in the Fish and Game Preservation Fund, which is continuously appropriated to the department to carry out the Fish and Game Code.

This bill would make an appropriation by increasing the revenues deposited in the fund and by authorizing moneys in the fund to be used for a new purpose by imposing new duties on the department.

Ch. 769 (SB 1898) Peace. State agencies: business forms.

Existing law requires the Director of General Services to establish and staff a "forms management center" for the orderly design, implementation, and maintenance of a statewide forms management program.

This bill would require each state agency, by June 30, 1995, to inventory all reports and forms it requires businesses to complete and submit in order to comply with agency requirements, and to eliminate all forms it determines are no longer needed to enable the agency to carry out its statutory responsibilities. It would also require each state agency, by June 30, 1995, to submit this inventory to the Director of General Services, who would be required to develop and maintain, by December 31, 1995, an ongoing master inventory of all nontax reporting forms required of businesses by state agencies, as specified.

The bill would also require each state agency, commencing December 31, 1995, and annually thereafter, to review ⅓ of the reports and forms it requires businesses to submit for compliance purposes, so that each report or form is reviewed on a triennial basis, and to eliminate a report or form unless the agency head certifies that each reporting requirement meets specified criteria.

The bill, in addition, would permit a business to appeal the certification of any reporting requirement to the Office of Administrative Hearings after first filing a challenge with the affected state agency, and would require the office to hear and render a decision on any appeal filed and to adopt procedures, by January 1, 1996, governing the filing, hearing, and disposition of appeals, as specified.

Ch. 770 (AB 152) Rainey. Local corrections.

(1) Existing law authorizes the board of supervisors of any county to allow the correctional administrator, as defined, to offer a program whereby minimum security inmates and low-risk offenders committed to a county correctional facility, and certain inmates participating in a work furlough program, may voluntarily participate in a home detention program in lieu of confinement in the county correctional facility, as specified.

This bill would permit minimum security inmates and low-risk offenders who are granted probation to voluntarily participate in a home detention program during their sentence in lieu of confinement in the program under the auspices of the probation officer.

(2) Existing law provides that a participant in a home detention program shall agree that the correctional administrator may, without further order of the court, immediately retake the person into custody to serve the balance of his or her sentence if the electronic monitoring or supervising devices are unable for any reason to properly perform their function at the designated place of home detention, if the person fails to remain within the place of home detention as stipulated in the agreement, or if for any other reason the person no longer meets the established criteria for release under the provision.

This bill would provide, in addition, that a participant in a home detention program shall agree that the correctional administrator may, without further order of the court, immediately retake the person into custody to serve the balance of his or her sentence if the person willfully fails to pay fees to the provider of the electronic home detention services, as specified.

(3) Existing law provides that a person shall be eligible for participation in a home detention program only if the correctional administrator concludes that the person meets specified criteria for release.

This bill would also require that for the person to be eligible to participate in a home

NOTE: Superior numbers appear as a separate section at the end of the digests.

detention program the participation of the person shall be consistent with any reasonable rules and regulations prescribed by the board of supervisors or the administrative policy of the correctional administrator. This bill would, furthermore, provide that the rules and regulations and the administrative policy of the program shall be written and annually reviewed by the board of supervisors and the correctional administrator, as specified; a copy of the rules and regulations shall be given or made available to any participant upon request; all persons referred or recommended by the court to participate in a home detention program who are denied or removed from participation in the program shall be provided with a notice of the denial or removal, as specified, which notice shall include the participant's appeal rights, as established by program administrative policy. Because this bill would increase the duties of the correctional administrator of a home detention program, it would impose a state-mandated local program.

(4) Existing law requires the Board of Corrections to monitor home detention programs.

This bill would delete this requirement. The bill would, instead, provide that the police department of a city where an office is located to which persons on an electronic monitoring program report may require the county correctional administrator to provide specified information concerning those persons for the purpose of monitoring the impact of home detention programs on the community, and thus the bill would impose a state-mandated local program by increasing the duties of county probation departments.

This bill, among other things, would also authorize the correctional administrator of a home detention program to contract, as specified, with appropriate public or private agencies or entities to provide specified program services. The bill would further provide that the contract shall be in writing and shall contain, among other provisions, provisions (a) relating to the respective responsibility and liability of the county and the private agency or entity; (b) requiring the private agency or entity to provide evidence of financial responsibility in amounts and under conditions sufficient to fully indemnify the county for reasonably foreseeable public liability that may arise from, or be proximately caused by, acts or omissions of the contractor; and (c) requiring the private agency or entity to provide evidence of financial responsibility or the contract may be terminated.

(5) Existing law provides procedures that, among other things, authorize a board of supervisors that implements a work furlough program, electronic home detention program, or county parole program, as specified, to prescribe a program administrative fee and an application fee, that includes equipment and supervision costs, to be charged by the administrator based on the prisoner's ability to pay. These provisions are effective only until January 1, 1995, on which date they are repealed.

This bill would extend the repeal date of these provisions to January 1, 1999. The bill would expand the program administrative and application fees to include other operating costs. The bill would exempt privately operated home detention programs from specified maximum limits on the administrative fee prescribed by the board of supervisors to be paid by each home detention participant. This bill, among other things, also would require the administrator of a work furlough or home detention program, as specified, to ensure that these fee provisions are contained in any contract with a private agency or entity to provide specified program services.

(6) Existing law prohibits the administrator of a program specified in (5) above from considering the prisoner's ability to pay for purposes of granting or denying participation in any of the programs. Existing law provides that this provision does not prohibit the administrator from verifying certain information relating to the prisoner's employment. This provision is effective only until January 1, 1995, on which date it is repealed.

This bill would extend the repeal date of this provision to January 1, 1999.

(7) Existing law authorizes the board of supervisors of 2 or more counties having one or more of the programs specified in (5) above to enter into agreements whereby a person sentenced to, or imprisoned in, the jail of one county, but regularly residing or regularly employed in another county, may be transferred from the custody of the appropriate county official of the county in which he or she is confined to the custody

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the appropriate county official of the county in which he or she resides or is employed. This provision is effective only until January 1, 1995, on which date it is repealed and a similar alternative provision which is limited to work furlough programs becomes operative.

This bill would extend the repeal date of the former provision to January 1, 1999, and delay the operative date of the alternative provision to January 1, 1999.

(8) Existing law provides sentencing procedures under which a defendant who has been in custody in a jail, camp, work furlough facility, halfway house, rehabilitation facility, hospital, prison, juvenile detention facility, or similar residential institution is given credit on his or her term of imprisonment for all days of custody in those facilities, as specified.

Existing law, to be repealed as of January 1, 1995, extends this provision to time spent in a home detention facility and provides that if a defendant serves time in one of the specified facilities or programs in lieu of imprisonment in a county jail, and the statute under which the defendant is sentenced requires a mandatory minimum period of time in jail, the time spent in these facilities or programs shall qualify as mandatory time in jail.

This bill would provide that the repeal date for the above provisions shall be January 1, 1999, instead of January 1, 1995, and would provide that nothing in these provisions regarding time credits for sentenced convicted offenders is to be construed as authorizing the sentencing of convicted offenders to any of the facilities or programs mentioned therein.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 771 (AB 161) Peace. Sales and use taxes: exemptions: animals and plants.

The existing Sales and Use Tax Law establishes various general exemptions from the taxes levied thereunder, including an exemption with respect to the sale, storage, use, or other consumption in this state of endangered animal and plant species, as defined, where both the seller and the purchaser are nonprofit zoological societies.

This bill would expand this exemption to apply to endangered or threatened animal or plant species. This bill would modify the current definition of exempt animals or plants, and would also define a "nonprofit zoological society." This bill would also provide an exemption with respect to endangered or threatened animal or plant species acquired or disposed of by trade or exchange between nonprofit zoological societies or between a member of a specified association and a nonprofit zoological society. It would provide that any retailer, other than a nonprofit zoological society, that stores, uses, or otherwise consumes in this state endangered or threatened animal or plant species acquired through a trade or exchange with a nonprofit zoological society is liable for the use tax.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are automatically incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 772 (AB 679) Moore. State contractor: minority, women, and disabled veteran businesses.

Existing law requires state agencies that award construction and goods and service contracts to have statewide participation goals for minority business enterprises, women business enterprises, and disabled veteran business enterprises and requires agencies to consider the efforts of bidders to meet the participation goals.

This bill would require an awarding department to accept the submission by a bidder of a minority, women, and disabled veteran business enterprise utilization plan approved prior to the solicitation due date by the Department of General Services and would prescribe the criteria for utilization plans. It would provide that if a bidder cites an approved utilization plan in response to participation requirements that call for statutory minimum statewide participation goals, the utilization plan shall be considered responsive to the participation goals of the solicitation document. If a solicitation specifies higher participation goals than those in the bidder's utilization plan, the bidder would be required to meet the goals in the solicitation or make a good-faith effort to do so.

Ch. 773 (AB 854) Tucker. Medi-Cal.

Existing law requires the provision of health care services to eligible low-income persons through the Medi-Cal program, which is administered pursuant to rules and regulations adopted by the State Department of Health Services.

Existing law establishes procedural requirements for the disposition of appeals of noninstitutional providers under the Medi-Cal program.

This bill would revise the procedures for the disposition of the final decision in a noninstitutional provider appeal.

Ch. 774 (AB 1018) Campbell. Summer school: attendance apportionments.

Under existing law, school districts receive apportionments for summer school based generally on summer school attendance during the 1983–84 fiscal year, adjusted for various factors. Summer school attendance for purposes of that computation is the sum of 2 factors involving attendance, as specified.

This bill would add to that sum the number of hours of general vocational work experience education, as defined, provided that certain requirements relating to course offerings have been met and would limit, as specified, the increase in state expenditures attributable to including these hours in the computation of summer school attendance.

Ch. 775 (AB 1688) Hauser. Dredging.

Existing law requires a person to apply for and obtain a permit from the Department of Fish and Game to use vacuum or suction dredge equipment in any river, stream, or lake of this state. Existing law authorizes the department to designate waters or areas wherein vacuum or suction dredges may be used pursuant to a permit, waters or areas closed to those dredges, the maximum size of dredges permitted to be used, and the time of year when the dredges may be used. Existing law authorizes the department to adopt regulations to carry out that law.

This bill would expressly prohibit use of a vacuum or suction dredge by any person in any river, stream, or lake of this state, except as authorized by a permit issued to that person by the department and pursuant to the regulations adopted by the department. The bill would require, instead of permit, the department, by regulation, to designate waters or areas wherein vacuum or suction dredges may be used pursuant to a permit, waters or areas closed to those dredges, the maximum size of dredges permitted to be used, and the time of year when the dredges may be used.

Ch. 776 (AB 1913) Polanco. Workers' compensation.

Existing law requires the Insurance Commissioner to issue a classification of risks and rates, and authorizes the approval of a system of merit rating, for workers' compensation insurance.

Existing law provides for the licensure of rating organizations, and requires workers' compensation insurers to be members of a rating organization. It authorizes the commis-

NOTE: Superior numbers appear as a separate section at the end of the digests.

sioner to adopt statistical plans to be used by insurers to report loss and experience information.

This bill would require insurers to report certain events to their rating organizations as corrections or revisions.

Ch. 777 (AB 2410) Speier. Voter registration: information requests.

Existing law requires that unless otherwise specifically provided, an application for voter registration information available pursuant to law and maintained by the Secretary of State or by the elections official of any county shall be made by way of a request for information that sets forth specified items of information, including the name, address, and telephone number of the information applicant, and a statement of the intended use of the information requested. It requires the applicant to certify to the truth and correctness of the content of the application, under penalty of perjury, and to state the date and execution of the place of declaration.

This bill would delete the application of other provisions of law where otherwise specifically provided. It would require, in addition, that the application for voter registration information set forth the number of the applicant's driver's license, state identification card, or other identification, as specified, and the specific information requested. It would also require the elections official to request the applicant to display his or her identification for purposes of verifying that identifying numbers of the identification document match those written by the applicant on the application form.

This bill would require that completed applications for voter registration information be retained by the elections official for 5 years from the date of application.

This bill would not apply to requests for information by elections officials for election purposes or by other public agencies for governmental purposes.

This bill, by expanding the definition of the crime of perjury and by imposing new duties on the local elections officials, would impose a state-mandated local program.

This bill would add identical alternative provisions to the Elections Code that would become operative only if this bill and SB 1547 are both chaptered, in which case specified provisions of this bill would not become operative.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 778 (AB 2427) Baca. Veterans homes: second home in southern California.

Existing law authorizes the Department of Veterans Affairs to establish and construct a 2nd veterans home to be located in one or more sites in one of several specified counties in southern California.

Pursuant to law that was repealed July 1, 1993, a Governor's Commission on a Southern California Veterans Home was established with 12 members to advise the Governor and the Legislature on the establishment of the home.

This bill would reestablish the commission and would require annual reports.

This bill would repeal these provisions as of January 1, 1997.

Ch. 779 (AB 2711) V. Brown. State Government Strategic Planning and Performance Review Act.

Existing law requires the Department of Finance to develop a performance budgeting pilot project, in accordance with specified principles, involving at least 4 state departments, to be implemented during the 1994–95 fiscal year, for the purposes of improving the delivery of governmental services through the use of strategic planning and per-

NOTE: Superior numbers appear as a separate section at the end of the digests.

formance measurement.

This bill would enact the State Government Strategic Planning and Performance Review Act that would require the Controller, the Department of Finance, and the Bureau of State Audits, in consultation with the Legislative Analyst, to develop a plan for conducting performance reviews of all state agencies, as specified.

This bill would require the Department of Finance to survey state agencies to obtain specified information concerning strategic plans and to identify which state agencies for which the department recommends the development or updating of a strategic plan. Those identified agencies would be required to develop a strategic plan and report to the Governor and the Joint Legislative Budget Committee regarding the steps being taken to develop and adopt the plan.

This bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 780 (AB 3152) Bates. Land use: Transit Village Development Planning Act of 1994.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas of those communities known as project areas.

This bill would enact the Transit Village Development Planning Act of 1994, and would express various findings and declarations of the Legislature regarding the use of rail transit in California and related issues. The bill would authorize the establishment of transit village development districts, which would include all land within a quarter-mile of one exterior boundary of the parcel on which a transit station is located, designated by the legislative body of the city, county, or city and county that has jurisdiction over the station area. The bill would authorize a city or county to prepare a transit village plan for the district, that would address specified transit-, community-, and commerce-related characteristics, and would provide for the manner in which the plan may be adopted, amended, or repealed. The bill would require that the transit village plan be consistent with the general plan, and would require other specified planning tools to be consistent with the transit village plan, before they may be approved. The bill would also authorize an agency to increase, improve, and preserve the supply of low- and moderate-income housing located within a transit village plan, as indicated.

Ch. 781 (AB 3290) Cannella. Motor vehicle diesel fuel: fines and penalties: rules and regulations.

Existing law authorizes the State Air Resources Board to adopt specifications to reduce air contaminants from motor vehicle fuel. The state board has adopted rules and regulations governing the content of diesel fuel.

This bill would require any revenues received by the state board from variance fees imposed upon manufacturers who receive variances from the standards for the content of diesel fuel adopted by the state board, which apply on and after October 1, 1993, to be deposited in the Diesel Fuel Trust Fund, which the bill would create. The bill would authorize the expenditure of the money in the trust fund only upon appropriation by the Legislature to reimburse owners of diesel fuel-powered vehicles and diesel fuel-powered equipment for damage to fuel injection system elastomer components which can be established as the result of the use of the diesel fuel and which is damage that is not the responsibility of the manufacturer, and would require the state board to develop and implement, by November 30, 1994, a reimbursement program, as prescribed. The bill would make related statements of legislative intent and related findings and declarations.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 782 (AB 3087) Baca. Construction lenders.

Existing law provides that specified persons may give a construction lender a stop notice or a bonded stop notice in private works of improvement.

Existing law requires, if a payment bond has previously been recorded in the office of the county recorder, a construction lender to withhold funds pursuant to a bonded

NOTE: Superior numbers appear as a separate section at the end of the digests.

stop notice filed by an original contractor. Under existing law, the construction lender may elect not to withhold pursuant to a bonded stop notice filed by anyone other than the original contractor if a payment bond has been recorded.

This bill would revise and recast these provisions. It also would provide that in no event shall a construction lender be required to withhold, pursuant to a bonded stop notice, more than a prescribed amount.

Ch. 783 (AB 3001) Conroy. Contractors: disclosure and notice.

Existing law requires a licensed contractor to include on all written contracts with respect to which the person is a prime contractor a statement specifying that contractors are required by law to be licensed and regulated by the Contractors' State License Board and that the board has jurisdiction to investigate complaints against contractors, as specified.

This bill would also require a contractor who has been disciplined, as defined, 2 or more times within a 10-year period to disclose in a document provided prior to entering into a contract to perform work on residential property with 4 or fewer units, any citation, license suspension, or license revocation during the previous 4 years resulting from any violation of the contractors' law by the contractor or any complaint or legal action relating to conduct regulated under the contractors' law that resulted in an unfavorable judgment against the contractor. The bill would also require a contractor to provide in a document provided prior to entering into a contract for work on residential property with 4 or fewer units a notice that discloses certain information concerning the licensing of contractors, including the fact that the Contractors' State License Board may be contacted to find out if the contractor has a valid license.

A violation of these provisions would be subject to a penalty or license suspension or revocation, as specified. Since these penalties would be deposited into the continuously appropriated Contractors' License Fund, the bill would result in an appropriation.

Ch. 784 (AB 3413) Conroy. State agencies: fees, license fees, and fines.

Existing law authorizes state agencies to assess and collect various fees.

This bill would require each state agency, as defined, to develop and maintain an index of the names or titles of all fees, license fees, fines, and penalties administered or collected by the agency, except for fees collected from a governmental agency.

Ch. 785 (AB 2999) Polanco. Small business: loans and bonds.

The Small Business Development Corporation Law authorizes a small business development corporation to lend money to, guarantee, endorse, or act as surety on bonds or other obligations of, or assist financially, a person, firm, corporation, or other entity, subject to various restrictions. Upon approval of the Executive Director of the Office of Small Business Development, a small business development corporation may act as guarantor on a surety bond for any small business contractor. Federal funds shall be deposited in the Federal Trust Fund, for transfer to the Small Business Expansion Fund.

This bill would authorize the Director of the Office of Small Business, with the approval of the Small Business Development Board, to establish separate accounts within the expansion fund for loan guarantees and surety bond guarantees, including loan loss reserves. Each account shall be a legally separate account, and shall not be used to satisfy the obligations of another corporation. The director may recommend whether the expansion fund and corporate fund accounts are to be leveraged, and if so, how much. The bill also makes conforming changes to reflect the establishment of separate accounts for loan guarantees and surety bond guarantees.

The bill would also require the director to report annually, as specified, regarding the loss experience of the expansion fund for loan guarantees and surety bond guarantees. The report shall include specified information, including the ethnicity and gender of participating contractors and other entities.

Under existing law, the former Department of Commerce is now referred to as the Trade and Commerce Agency.

This bill makes conforming changes to reflect that change.

Existing law provides that the Director of Finance may transfer moneys in the Special

NOTE: Superior numbers appear as a separate section at the end of the digests.

Fund for Economic Uncertainties to the Small Business Expansion Fund, on the approval of the Governor, for use by the Office of Small Business in the Trade and Commerce Agency, for a specified purpose.

This bill would repeal those provisions on January 1, 1997.

Existing law provides that each corporate fund is a legally separate account and the assets of one account cannot be used to satisfy the obligations of another corporation.

This bill would provide that each corporate fund shall consist of a loan guarantee account, and, if approved as required, a bond guarantee account. Not more than one-third of a corporate fund may be allocated to the bond guarantee account.

Existing law provides that a summary of all loans to which a state guarantee is attached shall be submitted upon completion of the loan agreement.

This bill would provide that the summary shall also include bonds to which a state guarantee is attached, and shall be submitted on execution of the loan agreement and periodically thereafter. In addition, a summary of all loans made by a corporation shall be submitted to the director upon execution of the loan agreement and periodically thereafter.

Existing law provides that funds allocated to a corporation are conditional on the corporation's compliance with specified provisions related to agreements with the state. Any guarantees made by the corporation while not in compliance with an agreement with the state are void and the state generally has no liability for those guarantees.

This bill would repeal these provisions.

Existing law provides that loan guarantees shall be secured by a reserve of at least 25%, to be determined by the director with the approval of the board. The guarantee percentage rate shall be set by the director upon approval of the board.

This bill would delete the provision regarding setting the guarantee percentage rate.

Existing law provides that, with the director's approval, a corporation may act as guarantor on a surety bond for any small business contractor, as specified. The resources necessary to act as guarantor for surety bonds may be funded with specified federal funds that are ultimately transferred to the Small Business Expansion Fund. The state is not liable or otherwise obligated on these bonds beyond the state and federal funds that are appropriated to the expansion fund for this purpose.

This bill would delete the provision limiting state liability.

Existing law provides that corporations shall give high priority to providing loan guarantees to small business incubators, and to businesses that lease space in incubators, provided that the businesses meet specified criteria.

This bill would provide instead that corporations shall give high priority to loan guarantees to small business incubators and to businesses that lease space in incubators.

Because this bill affects the conditions under which the continuously appropriated expansion fund may be spent, it is an appropriation.

Under existing law, there is a California Small Business Development Center Program in the Office of Small Business in the Trade and Commerce Agency. Grants under this program are awarded by the agency on a 3-year cycle, and grantees are eligible to compete for a second 3-year term.

This bill would provide that grantees may be funded for successive 3-year terms by negotiated agreements between the agency and the grantee, at the sole discretion of the agency, based on the grantees' prior performance.

The bill would provide that it is to take effect immediately as an urgency statute.

Ch. 786 (AB 2518) Areias. Organic foods: farmers' markets.

(1) Existing law requires any nongovernmental certification organization that certifies certain products as organic to register with the Secretary of Food and Agriculture.

This bill would provide that in lieu of complying with these registration requirements, the Secretary of Food and Agriculture may approve certification organizations that are accredited under the federal organic foods law.

(2) Existing law requires, under certain circumstances, the secretary and county agricultural commissioners to establish a voluntary certification program for producers of organic food products.

This bill would require this program to meet all of the requirements of the federal

NOTE: Superior numbers appear as a separate section at the end of the digests.

certification program, including federal accreditation. This bill would thus increase the duties of county agricultural commissioners by requiring that the certification program meet federal requirements, thereby imposing a state-mandated local program.

(3) Existing law, the Sherman Food, Drug, and Cosmetic Law, prohibits application of prohibited materials on any raw agricultural commodity that is grown directly from seed without soil or any growing medium.

This bill would, instead, prohibit the application to any raw agricultural commodity that is grown directly from seed and harvested within 18 days of germination.

(4) Existing law requires the State Director of Health Services and the Secretary of Food and Agriculture to obtain and provide to a requesting party a copy of specified records that are prepared by producers, handlers, processors, or retailers of food sold as organic that pertain to a specific product and identify the substances applied, administered, or added to the product. It provides that this information is not to be considered a trade secret.

Existing law authorizes the director or secretary to charge a reasonable fee to reimburse himself or herself or the source of the records for the cost of reproducing the records requested.

Existing law provides that the above provisions become inoperative on January 1, 1995.

This bill would delete the provision making the foregoing provision inoperative on January 1, 1995.

The bill would authorize a person required to provide these records to petition the State Director of Health Services or the Secretary of Food and Agriculture to deny the request for the records on the ground that the request is frivolous or harassing, and would authorize the secretary or director to waive this information production requirement for the specific request for information that was the subject of the petition.

(5) Existing law authorizes use of the term "certified" and variations of the term in connection with food sold as organic only in accordance with certain laws.

This bill would, instead, require that all organic products be certified by a registered certifying organization and would permit the sale of food as organic only in accordance with certain laws.

(6) Existing law authorizes the director to establish and maintain a certification program for processors of food sold as organic, subject to certain requirements. Existing law authorizes the director to establish and collect a fee to cover the costs of administering the program.

This bill would require that the program meet all of the requirements for federal certification programs, including federal accreditation.

(7) Existing law, the California Uniform Retail Food Facilities Law regulates sanitary standards in retail food establishments, including certified farmers' markets and vehicles selling food, as defined. Existing law prohibits food preparation at certified farmers' markets. Existing law imposes primary responsibility for the enforcement of this law on local health agencies, and provides that the willful violation of any of its provisions is a misdemeanor.

This bill would provide an exception to this prohibition for food samples if certain sanitary conditions are met, including the use of potable water for hand washing and sanitizing and the disposal of utensil and hand washing water in a manner approved by the local law enforcement agency. This bill would authorize vendors selling food adjacent to and under the jurisdiction and management of a certified farmers' market to store, display, and sell food from a table or display fixture apart from the vehicle in a manner approved by the local enforcement agency. It would provide for the repeal of these provisions on January 1, 1997.

To the extent that this bill would increase the duties of local public health agencies by requiring the approval of the local enforcement agency, this bill would impose a state-mandated local program. By imposing new requirements on certified farmers' markets, this bill would expand the definition of a crime, thereby imposing a state-mandated local program.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for specified reasons.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 787 (SB 1993) Hart. State Librarian: Reading Initiative Program.[3]

Existing law creates the California State Library within the State Department of Education and provides for the appointment of a State Librarian. Existing law requires the State Librarian, among other duties, to keep in order and repair the books and property in the California State Library and to give advisory, consultive, and technical assistance to librarians and library authorities in public libraries and to assist all other authorities, state and local, in assuming their full responsibility for library service.

This bill, in addition, would require the State Librarian to administer the "Reading Initiative Program" and, pursuant to that program, to develop a list of recommended books in consultation with various groups, including, but not limited to, teachers, librarians, parents, writers, publishers, and employees of the State Department of Education. The bill would also require the State Librarian to develop a method of including pupils enrolled in kindergarten and grades 1 to 12, inclusive, in the program and to develop an appropriate form of recognition for successful pupils. To the extent private funds are available, certain portions of the program would be funded from private sources.

This bill would appropriate $50,000 from the General Fund to the State Librarian for the 1994–95 fiscal year for the purpose of administering the program.

Ch. 788 (AB 2849) Escutia. AIDS: pilot project for women's health services.

Under existing law, the State Department of Health Services, as part of its HIV and AIDS prevention, treatment, and service efforts, is authorized to approve up to 35 pilot projects to provide housing and food to homeless persons with AIDS or symptomatic HIV disease and to provide funding for a selected number of these pilot projects.

This bill would require the state department to develop and implement by July 1, 1995, with the assistance of other state agencies, a pilot project to provide a model women's HIV early intervention center. This bill would declare the intent of the Legislature that funding for implementation of this pilot project be provided from funds allocated to the Office of AIDS within the State Department of Health Services, subject to appropriation in the Budget Act of 1994.

This bill would make these provisions inoperative on June 30, 1998, and would repeal them as of January 1, 1999.

Ch. 789 (AB 779) Burton. Robbery.

Existing law provides that robbery under specified circumstances is robbery of the 1st degree, punishable by imprisonment in the state prison for 3, 4, or 6 years. Among others, robbery perpetrated in an inhabited dwelling house, certain other inhabited places, or the inhabited portion of any other building is robbery of the 1st degree.

This bill would provide that where the defendant, voluntarily acting in concert with 2 or more other persons, commits robbery of the 1st degree in violation of this provision, the defendant shall be punished by imprisonment in the state prison for 3, 6, or 9 years.

Existing law provides that an attempt to commit an offense punishable by imprisonment in the state prison is punishable by imprisonment in the state prison for one-half the term prescribed for the offense so attempted. However, existing law provides that, notwithstanding this provision, attempted robbery is punishable by imprisonment in the state prison for 16 months or 2 or 3 years.

This bill would limit application of this latter penalty provision to attempted 2nd-degree robbery.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 790 (AB 825) Bates. Children's services.

Existing law provides for the reimbursement of foster care providers under the Aid to Families with Dependent Children program, and specifies the rates of reimbursement according to the class of provider, as determined by the level of services, and, until January 1, 1999, provides for the implementation of a pilot program using a separate method of reimbursement of foster family agencies for the care of foster children who are emotionally disturbed, set according to the appropriate pilot classification model based on the level of services provided to the eligible child and the certified foster family.

This bill would revise the classification schedule of those agencies under the pilot program.

Existing law prohibits the placement of more than one emotionally disturbed child in a certified family home unless the participating foster family agency provides the county welfare department with a written assessment of the risk and compatibility of placing 2 emotionally disturbed children together.

This bill would authorize the placement of 2 emotionally disturbed siblings in the same certified family home if the placement is approved by the interagency review teams of the placing county and the participating county.

Ch. 791 (AB 1139) Epple. Long-term health care facilities: informed consent: alternative decisionmaking process.

Existing law authorizes an attending physician and a skilled nursing or intermediate care facility to initiate a medical intervention, that requires the informed consent of the patient, for a resident of that facility when the physician has determined that the resident lacks the capacity to provide informed consent and after the facility conducts an interdisciplinary team review, as described, of the prescribed medical intervention. Under existing law, this authority would be repealed on January 1, 1995.

This bill would define lack of capacity for purposes of these provisions, would revise the review process, and would extend this authority until January 1, 1997.

This bill would require the State Department of Health Services to convene a committee of specified composition to assess the need for changes to the process for the initiation of medical intervention for the above-described long-term health care facility residents. This bill would require the committee to make recommendations to the Legislature regarding any identified changes to be made to that process by July 1, 1995.

Ch. 792 (AB 1922) Peace. Consumer credit.

(1) Existing law, the Credit Services Act of 1984, prescribes various duties and prohibitions for defined credit services organizations. A violation of these provisions relating to credit services organizations is a misdemeanor.

Existing law excludes from the definition of a credit services organization any nonprofit organization exempt from taxation under federal law, among other persons and entities.

This bill would revise the definition of credit services organization to exclude only those nonprofit organizations that meet prescribed criteria. This bill would thereby impose a state-mandated local program by expanding the scope of a crime.

(2) Under the Credit Services Act of 1984, a credit services organization and specified persons are prohibited from failing to perform agreed upon services within 90 days following the date the buyer signs the contract for those services. Existing law requires a contract between the buyer and credit services organization for the purchase of the services from the organization to provide the estimated date by which the services are to be performed, or the estimated length of time for performing the services, not to exceed 90 days or a shorter period of time, as specified.

This bill would revise the time period for performing agreed upon services to within 6 months.

(3) Under the Credit Services Act of 1984, any buyer injured by a violation of the act or by the credit services organization's breach of a contract subject to the act may bring an action for the recovery of damages or for injunctive relief, or both. Reasonable attorney's fees and costs may be awarded under this provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would additionally authorize any person, including, but not limited to, certain entities and persons, to bring an action for the recovery of damages or for injunctive relief, or both, for a violation of the Credit Services Act of 1984. Under the bill, any person bringing such an action who prevails in the action is entitled to reasonable attorney's fees and costs.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 793 (AB 2433) Epple. Crimes: attempted murder of a peace officer or firefighter.

Under existing law, a person who attempts the crime of willful, deliberate, and premeditated murder is subject to imprisonment in the state prison for life with the possibility of parole.

This bill would specify that a person who commits either attempted willful, deliberate, and premeditated murder or attempted murder upon a peace officer or firefighter and knows or reasonably should know that the victim is a peace officer or firefighter engaged in the performance of his or her duties is subject to the punishment described above.

The bill also would provide that the above provisions shall apply if it is proved that a direct but ineffectual act was committed by one person toward killing another human being and the person committing the act harbored express malice aforethought.

Ch. 794 (AB 2467) Bowen. Tort claims: elected public officials.

Existing law requires or authorizes a public entity, as specified, to defend an employee or former employee against tort actions arising out of an act or omission within the scope of his or her employment and to pay any judgment, compromise, or settlement arising therefrom.

This bill would prohibit a public entity, except as specified, from paying a judgment, compromise, or settlement arising from a claim or action against an elected official, if the claim or action is based on conduct by the elected official by way of tortiously intervening or attempting to intervene in, or by way of tortiously influencing or attempting to influence the outcome of, any judicial action or proceeding for the benefit of a particular party by contacting a judicial official except as counsel of record. The bill would provide that if a public entity conducted the defense of an elected official against such a claim or action and the elected official is found liable by the trier of fact, the court shall order the elected official to pay to the public entity the cost of that defense. The bill would also require the plaintiff to seek recovery of damages first from the assets of the elected official, and would require the public entity to pursue all available creditor's remedies against the elected official to the extent it pays any portion of the judgment or defense costs.

Ch. 795 (AB 2487) Bowen. Greater Avenues for Independence Program: priority for intake.

Existing law provides for a job training and education program for applicants for, and recipients of, Aid to Families with Dependent Children (AFDC) program assistance, under the Greater Avenues for Independence (GAIN) program. The GAIN program is funded in part by the federal government.

Existing law establishes the order of exclusion of clients from the GAIN program if sufficient funding is not available for full participation and for the intake of new participants if there is sufficient funding.

This bill would specify that that provision shall not be interpreted to prohibit a county from allocating funds to target population groups, in any order selected by the county, to the extent permitted by federal law, provided that no reduction in federal funding would result from that change, and subject to certain conditions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 796 (AB 2508) Katz. Governmental tort liability.

Under existing law, a public entity is liable for injury proximately caused by an act or omission of an employee of the public entity within the scope of his or her employment if the act or omission would otherwise have given rise to a cause of action against that employee or his or her personal representative. However, except as specified, a public entity is not liable for an injury resulting from an act or omission of an employee of the public entity where the employee is immune from liability.

This bill would enact special provisions regarding governmental tort liability in actions based on intentional torts other than defamation committed by elected officials, including provisions requiring joinder of the elected official in order to pursue a cause of action against the public entity involved, requiring recovery on any judgment for the plaintiff first from the elected official before recovery from the public entity, and requiring the public entity to pursue all available creditor's remedies against the elected official in indemnification if it is required to satisfy any portion of the judgment or pay defense costs, and would declare the intent of the Legislature in this regard. This bill would not apply to a criminal or civil enforcement action brought on behalf of the state by specified elected officials.

Ch. 797 (AB 2522) Horcher. Public entities: liability.

Under existing law, if a public entity pays a claim or judgment, or portion thereof, for an injury arising out of an act or omission of an employee, it may recover that payment from the employee or former employee if he or she acted or failed to act because of actual fraud, corruption, or actual malice, or if he or she willfully failed or refused to defend against the claim, or if he or she requested the public entity to defend against the claim and specified facts are established, except as provided to the contrary in certain memoranda of understanding.

This bill would provide, instead, that upon a felony conviction for a violation of specified offenses by an elected official or former elected official of a public entity for an act or omission of that person while in office, the elected official or former elected official shall forfeit any rights to defense or indemnification with respect to a claim for damages for an injury arising from that act or omission.

The bill would further provide that if a public entity pays any claim or judgment, or any portion thereof, either against itself or against an elected official or former elected official of the public entity, for an injury arising out of an act or omission of the elected official or former elected official of the public entity, which act or omission constituted a felony violation of specified offenses, the public entity shall recover from the elected official or former elected official the amount of that payment upon the felony conviction of the elected official or former elected official for that act or omission. The bill would also require that upon that conviction, the public entity shall also recover from the elected official the costs of any defense to a civil action filed against the elected official for that act or omission.

The bill would impose a state-mandated local program by requiring new duties of local public officials.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 798 (AB 2674) Cortese. State park system: Asilomar Conference Grounds: Hollister Hills State Vehicular Recreation Area.

(1) Under existing law, the Department of Parks and Recreation may enter into contracts for the operation of concessions within units of the state park system subject to specified requirements. On March 22, 1994, the department canceled a contract

NOTE: Superior numbers appear as a separate section at the end of the digests.

between the state and the Pacific Grove-Asilomar Operating Corporation for the operation of concessions at the Asilomar Conference Grounds, effective January 31, 1995.

This bill would authorize the department to enter into an interim agreement, based on the prior contract, modified as prescribed, until the department awards a contract, as described.

The bill would require the department to enter into a concession contract for the Asilomar Conference Grounds subject to the requirements imposed by existing law governing concession contracts, except as otherwise specified. The bill would prohibit the contract from being advertised for bid, negotiated, renegotiated, or amended in any material respect unless it has been submitted to the Legislature for review. The bill would set forth various terms of the contract. The bill would require the contract to provide for open meetings and to provide that records be public, as described.

The bill would also require the department, for the purpose of ensuring that all bidders are afforded an equal opportunity to compete for the contract, to consider the estimated amount of fees or taxes that might be paid to the state or to a local government by a bidder as a result of the contract among those factors used to evaluate the bidder's bid or proposal for the contract. The bill would require the department to consult with the Department of Finance and the Board of Equalization to obtain information necessary to estimate the amount of fees or taxes that might be paid by a bidder as a result of the contract.

The bill would require any revenues received by the department pursuant to the contract that are identified by the department as funds in excess of the approved operating and capital improvement budgets to be deposited in the State Parks and Recreation Fund. The bill would require the department to submit a request for proposal for the contract to certain committees of the Legislature for review.

(2) The Off-Highway Motor Vehicle Recreation Act of 1988 provides for the acquisition, operation, and funding of state off-highway vehicular recreation areas and trails in the state park system.

This bill would require certain lands within the Hollister Hills State Vehicular Recreation Area to be managed, as specified.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 799 (AB 3164) Epple. Liens: vehicles.

(1) Existing law provides that every person has a possessory lien on a vehicle for the compensation to which he or she is legally entitled for the work or services performed on, or the towing or storage of, the vehicle, as specified. Existing law specifies when a lien for work or services performed on a vehicle is deemed to arise. Existing law provides for lien sale procedures for vehicles valued over $300, but less than $2,500, and for vehicles valued over $2,500. Existing law provides that a storage lien may be for a prescribed number of days. Existing law specifies when a person improperly causes a vehicle to be towed or removed in order to create or acquire a leasehold interest.

This bill would revise these provisions to provide that the lien arises 15 days after the work or services are complete if earlier than the date the written statement of charges is presented to the registered owner, to revise the length of the storage lien, as specified, to revise the lien sale procedure, to provide that a lien sale in violation of these procedures and prescribed provisions of the Vehicle Code shall be void, and to provide that liens for the towing or storage of any vehicle would be extinguished and no lien sale shall be conducted under prescribed conditions.

(2) Under existing law, it is a misdemeanor to knowingly violate the provisions of law regarding these possessory liens on vehicles.

By revising the definition of existing crimes, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 800 (AB 3191) Murray. Crime: sentences.

(1) Existing law provides that every person found guilty of committing lewd or lascivious acts with a child under the age of 14 years shall receive a 5-year sentence enhancement for a prior conviction of specified crimes involving sexual assault, except with regard to a term served prior to a period of 10 years, in which the person remained free of both prison custody and the commission of an offense that results in a felony conviction.

This bill would provide that the specified crimes involving sexual assaults include any offense committed in another jurisdiction, as specified.

(2) Existing law provides that every person with 2 or more prior convictions of specified crimes involving sexual assault found guilty of committing lewd or lascivious acts with a child under the age of 14 years shall receive a sentence of 15 years to life imprisonment, but only if the current or one of the prior convictions is for a specified act other than committing lewd or lascivious acts with a child under the age of 14 years.

This bill would provide that the specified crimes involving sexual assault include any offense committed in another jurisdiction, as specified.

Ch. 801 (AB 3301) Bustamante. Parklands conversion: Fresno County.

Under existing law, the Cameron-Unruh Beach, Park, Recreational, and Historical Facilities Bond Act of 1964, an applicant for a state grant is required to agree to restrict the use of the property acquired to the purpose for which the state grant funds were requested, and no other use is permitted except by specific act of the Legislature.

This bill would authorize the County of Fresno to convert to a different use up to 20 acres of parkland at Laton-Kingston Regional Park, which was partially acquired with state grant funds under the bond act, subject to specified actions being taken by the county.

Ch. 802 (AB 3314) Takasugi. State agencies: security task force.

Existing law requires the Director of General Services to perform various functions and duties with respect to the planning, acquisition, construction, maintenance, and police protection of state buildings and property.

This bill would require the director to appoint an interagency task force comprised of representatives of certain state agencies, to discuss and recommend methods of improving security at state agency offices where state employees have direct contact with the public. The bill would require the task force to present its recommendations for improving security to the Governor and the Legislature by November 1, 1995.

The bill would also provide that its provisions would remain in effect until January 1, 1996, and as of that date would be repealed, unless a later enacted statute which is chaptered prior to January 1, 1996, extends or deletes that date.

Ch. 803 (AB 3348) Gotch. Local public agencies: contracts: emergency procedures.

Existing law prescribes the procedures for contracting by local public agencies, including cities, counties, municipal utility districts, public utility districts, and water districts and other local public agencies with water or flood control responsibilities, and includes procedures for those local public agencies with respect to emergencies.

This bill would repeal or revise the existing emergency procedures for those specified local public agencies and would require an agency, in the case of an emergency, if notice for bids to let contracts will not be given, to respond to that emergency, as prescribed, pursuant to a 4/5 vote of the governing body, without giving notice for bids to let contracts if the governing body finds, based on substantial evidence set forth in the record or minutes of its meeting, that the public emergency will not permit a delay resulting from a competitive solicitation for bids, and that the action is necessary to respond to the emergency. The bill would authorize the governing body to delegate that authority, as specified, and would require the governing body to periodically review the continuation of an emergency action, as prescribed. The bill would define "public agency" for those purposes. The bill would make conforming and technical changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 804 (AB 3436) Martinez. Arbitration: home construction.

Existing law sets forth the general provisions governing binding arbitration of disputes, as specified.

This bill would provide that, in a binding arbitration of specified claims pursuant to home construction or improvement contracts, the arbitrator shall, within 10 days following his or her appointment, provide to each party a written declaration disclosing an affiliation with either party, if any, as specified. The bill would further provide that either party may disqualify the arbitrator under specified circumstances. The bill would require that a notice of disqualification be served within 15 days, as specified.

Ch. 805 (AB 3512) Polanco. Community colleges.

(1) Existing law requires the Chancellor of the California Community Colleges to submit to the Board of Governors of the California Community Colleges an annual implementation plan for the California Community Colleges Economic Development Program.

This bill would require the board of governors to modify and strengthen the existing California Community Colleges Economic Development Program Executive Committee. The bill would prescribe the membership and duties of the committee with respect to that program.

The bill would provide that, upon conferring with the executive committee, the chancellor would be required to submit to the board of governors, for its approval, a comprehensive annual plan and budget, as specified, for the program.

The bill would require the board of governors to submit an annual report of the economic development program to the Governor and the Legislature, as specified.

The bill would also require the board of governors to initiate a review, as specified, of the economic development program for purposes of determining whether the program should be extended.

The bill would require the Legislative Analyst to prepare a review of the program for submission to the Governor, the Legislature, and the board of governors.

The bill also would make other conforming changes in the program.

(2) Existing law establishes the California Small Business Innovation Research Program, which by its own terms is to be repealed on January 1, 1995.

This bill would change the name of this program to the California Community Colleges Economic Development Program and would provide, instead, that the program would become inoperative on June 30, 1998, and as of January 1, 1999, would be repealed.

Ch. 806 (AB 3686) Horcher. Instruments.

(1) Existing law provides that prescribed persons, including persons interested under deed or will, may bring certain actions for declaratory relief relating to property.

This bill would exclude persons interested under deed or will from this provision.

(2) Existing law defines various terms for purposes of the Probate Code.

This bill would define a "transferee" for purposes of the code.

(3) Existing law prescribes the procedures for disclaiming an interest by a beneficiary and giving notices pursuant to the Probate Code. It also prescribes the information that may be required on an acknowledgement of receipt of a statement of duties and liabilities and the powers and duties of temporary guardians and conservators.

This bill would revise these provisions, as specified, and would make clarifying changes.

(4) Existing law provides for the registration of private professional conservators. Existing law requires all private professional conservators to annually file a prescribed statement under penalty of perjury, with the county clerk.

This bill would apply these provisions to private professional guardians, as defined. By increasing the duties of local officials, this bill would create a state-mandated local program.

(5) Existing law specifies the powers and duties of a conservator and guardian regarding the property of the conservatee or ward. Existing law permits a court, upon petition, to order a person having possession or control of a ward's or conservatee's property to appear before it to account for that property.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require a person in possession of the personal property or a document of title of the personal or real property of a conservatee or ward and who has actual knowledge that there is a conservator or guardian, to disclose prescribed information regarding the property to the conservator or guardian. It would require the person to be liable for all damages suffered by the estate of the conservatee as the result of any failure to make this disclosure.

This bill would permit a court to require the person who appears before it to produce documents and personal property specified in the citation.

(6) Existing law provides for proceedings to authorize particular transactions regarding community property where a spouse lacks capacity.

This bill would revise the procedure for this proceeding.

(7) Existing law provides for the administration of estates of decedents. Existing law specifies that a court, with respect to these proceedings, is a court of general jurisdiction.

This bill would revise these provisions regarding the administration of estates of decedents, as specified. It also would revise the above last mentioned provision to specify that a court, with respect to proceedings under the Probate Code, is a court of general jurisdiction.

(8) Existing law provides rules of construction for wills.

This bill would revise and recast these provisions to apply to instruments generally.

(9) This bill would incorporate changes to Sections 1460 and 2683 of the Probate Code made by AB 2810, contingent upon its prior enactment.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 807 (AB 3695) Honeycutt. Weapons: destructive devices.

Existing law defines the term "destructive device" to include any weapon of a caliber greater than 0.60 which fires fixed ammunition. Existing law expressly excludes a shotgun, shotgun ammunition, or an antique cannon from that definition.

This bill would specify that the exclusion applies to a smooth or rifle bore shotgun, to single projectile or shot shotgun ammunition, and to an antique rifle, as defined pursuant to federal provisions.

Ch. 808 (AB 3745) Woodruff. Bear Valley Unified School District.

Existing law requires the Superintendent of Public Instruction to apportion a specified amount to certain school districts or county offices of education for home-to-school transportation.

This bill would appropriate $77,900 to the Superintendent of Public Instruction from the General Fund for the purpose of allocating $36,500 to the Bear Valley Unified School District for the 1994–95 fiscal year for the purpose of costs of transporting pupils to the Yucaipa-Calimesa Joint Unified School District and $41,400 to the Redlands Unified School District for the 1994–95 fiscal year for the purpose of the costs of transporting pupils residing in severe and remote geographical conditions, as specified.

This bill would condition those allocations on those school districts providing evidence to the superintendent that the districts are negotiating a solution to the transportation problem, as specified. The bill would require the school districts to jointly file a report with the superintendent by February 1, 1995, that specifies the negotiated solution to that problem. The bill would state that if the report is not filed by that time, any money allocated to those school districts pursuant to those provisions would revert to the General Fund prior to June 30, 1995.

This bill would state the intent of the Legislature that no funds shall be appropriated for, or allocated to, the Bear Valley Unified School District or the Redlands Unified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

School District for the purposes specified in the bill in any fiscal year after the 1994–95 fiscal year.

This bill would make a legislative finding and declaration of unique circumstances in this regard.

The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 809 (AB 3762) Campbell. Private postsecondary education.

Existing law includes the Private Postsecondary and Vocational Education Reform Act of 1989 which regulates private postsecondary education in the state.

This bill would set forth notice and hearing requirements, except as specified, for the enforcement of these provisions.

Existing law requires the Council for Private Postsecondary and Vocational Education to establish and maintain a Student Tuition Recovery Fund for the purpose of relieving or mitigating pecuniary losses suffered under specified circumstances by any California resident who is a student of an approved institution.

This bill would revise the formula for calculating the amount of the claims payable to students.

Ch. 810 (AB 3797) Umberg. Juveniles: wards.

(1) Existing law specifies the conditions under which a minor is within the jurisdiction of the juvenile court and may be adjudged a ward of the court. Among those conditions is the violation by a minor of any ordinance of a city or county establishing a curfew based solely on age. Existing law also provides for the temporary custody and detention of minors under specified circumstances.

This bill would authorize local law enforcement personnel to temporarily detain any minor upon a reasonable suspicion based on articulable facts that the minor is in violation of a local curfew ordinance and to transport that minor to his or her residence or to the custody of his or her parents or legal guardian, upon authorization of the governing body of the city, county, or city and county, except as specified. This bill would require the law enforcement officer to issue a warning citation to the minor upon a first violation. The bill would require a designated representative of the governmental entity that issued the citation to mail to the parents or legal guardian a written notification regarding the consequences of a 2nd violation and having a space for an explanation of extenuating circumstances, as provided. This bill would provide that the explanation shall be reviewed by a designated representative of the issuing governmental entity, thereby imposing a state-mandated local program. This bill would also authorize the local government to collect a fee for the actual costs of detention and transportation from the minor and his or her parents or legal guardian, as specified, and to provide for waiver of the fee or the performance of community service in lieu of the fee, as specified. The bill would also provide for judicial review of these fees, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 811 (SB 10) Lockyer. Courts: commissioners.

(1) Existing law provides for the number of superior and municipal court commissioners.

This bill would authorize additional court commissioners in various counties, as specified. The bill would also eliminate certain traffic referee and traffic trial commissioner positions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law authorizes the appointment of an additional municipal or superior court commissioner in each county or city and county, at county or city and county expense, to serve the superior or municipal court, but not both, or in a county or city and county which has consolidated its trial courts, to serve the consolidated courts.

This bill would require that such a commissioner be compensated at the same rate as the other commissioner or commissioners for that court, thereby imposing a state-mandated local program by requiring a higher level of service under an existing program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 812 (SB 697) Torres. Health facilities.

Existing law establishes the California Health Policy and Data Advisory Commission to, in part, advise the Office of Statewide Health Planning and Development and the Health and Welfare Agency relating to health policy and the collection of health data.

Existing law, the Voluntary Health Facility and Clinic Philanthropic Support Act, declares that philanthropic support of health facilities and clinics is a strength which must be preserved and enhanced under any reform measure for certain reasons, including, but not limited to, that philanthropy allows voluntary nonprofit institutions to conduct research and to engage in other innovative efforts to improve health care, and that philanthropy pays for necessary expenditures that otherwise would have to be paid by patients or by government. The act declares the intent of the Legislature to create an environment in which philanthropy and voluntarism in the health care field is encouraged, and excludes certain items constituting gifts or grants from treatment as revenue to health facilities or clinics for the purposes of certain reporting requirements.

This bill would require each hospital, as defined, to reaffirm its mission statement, as defined, that requires its policies to integrate and reflect the public interest by July 1, 1995.

This bill would require each hospital, by January 1, 1996, to complete a community needs assessment, as defined, and by April 1, 1996, adopt a community benefits plan, and to thereafter annually update the community benefits plan.

The bill would require each hospital to file a report on its community benefits plan and the activities undertaken to address community needs with the Statewide Office of Health Planning and Development. The bill would require the statewide office to make the plans available to the public and to file a report with the Legislature by October 1, 1997.

Ch. 813 (SB 718) Wright. Medi-Cal: reimbursement.

(1) Existing law provides for the provision of health care services to eligible low-income persons under the Medi-Cal program, administered by the State Department of Health Services and financed in part by the federal government. Existing law sets forth the requirements for the submission of claims for reimbursement to the department by providers under the program.

This bill would, to the extent permitted by federal law, and when a state of emergency has been declared by the President of the United States or the Governor, authorize the Director of Health Services to remit payment for services under the Medi-Cal program to any provider in good standing who, due to destruction, loss, or inaccessibility of data as a result of the emergency situation, is unable to submit claims, for a period of up to 6 months.

(2) Existing law specifies that reimbursement for incontinence medical supplies under the Medi-Cal program shall consist of the weighted average of the negotiated

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

contract prices within each product category in effect on June 30, 1992, as reduced pursuant to a specified provision of law.

This bill would delete the references to the date on which the contract prices were in effect, and to the reduction of those prices pursuant to the provision of law.

(3) Existing law requires the department to establish utilization controls that limit expenditures for incontinence medical supplies under the Medi-Cal program to no more than $165 per beneficiary per month.

This bill would exclude incontinence creams and washes from the limitation.

Ch. 814 (SB 846) Presley. State civil service: disciplinary proceedings.

(1) Existing civil service law permits a party aggrieved by a decision of an administrative law judge in an action to compel discovery in a disciplinary matter to file, within 30 days of service of the decision, a petition to compel discovery in the superior court for the county in which the administrative hearing will be held.

This bill would permit this petition to compel discovery also to be filed in the county in which the headquarters of the appointing power is located.

(2) Existing law provides that no later than 20 calendar days after service of the notice of adverse action, the employee may file with the State Personnel Board a written answer to the notice. The answer is deemed to be a denial of all of the allegations of the notice of adverse action not expressly admitted and a request for hearing or investigation.

This bill would extend the time period for filing this answer from 20 calendar days to 30 calendar days after service of the notice of adverse action.

(3) This bill would also provide that the total cost to the state of maintaining and operating the hearing office of the State Personnel Board shall be determined by the board in advance or upon any other basis as it may determine utilizing information from the state agencies for which services are provided by the hearing office, and would permit the board to be reimbursed for its services through billing the appropriate state agencies for the costs incurred in conducting hearings involving employees of those state agencies.

(4) Existing law provides that whenever the State Personnel Board revokes or modifies an adverse action and orders that the employee be returned to his or her position, it shall direct the payment of salary and all interest accrued thereto, and the reinstatement of all benefits that otherwise would have normally accrued.

This bill would define "salary" for purposes of this provision.

Ch. 815 (SB 1279) Torres. Acupuncture: peer review: discovery: professional corporations.

Existing law provides for the licensure of acupuncturists administered by the Acupuncture Committee under the jurisdiction of the Medical Board of California.

Existing law prohibits the imposition of monetary liability on the part of professional societies and members of peer review committees that review the quality of various professional health care services for acts performed within the scope of the functions of peer review, if that committee or member acts without malice, has made a reasonable effort to obtain the facts, and acts in reasonable belief his or her action is warranted.

This bill would extend this prohibition to peer review bodies, and members of peer review bodies, that review acupuncturists.

Existing law exempts from discovery as evidence the proceedings and records of peer review bodies.

This bill would extend this exemption to the proceedings and records of acupuncturist review committees.

Existing law conditionally authorizes certain licensed health care professionals to own shares in various professional corporations.

This bill would similarly authorize certain licensed health care professionals to be shareholders in an acupuncture corporation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 816 (SB 1310) Dills. Teacher Credentials Fund: reserve.

Existing law establishes the Teacher Credentials Fund into which all fees levied and collected by the Commission on Teacher Credentialing are deposited.

This bill would state that no money in that fund shall be transferred to any other fund.

Existing law allows the commission to retain a prudent reserve in the fund, as specified.

This bill would require that the reserve not exceed 10% of the total amount that the commission is authorized to spend in that fiscal year. The bill would state that nothing in these provisions shall preclude the implementation of multiyear mandates that require a reserve amount of greater than 10% in one fiscal year.

Ch. 817 (SB 1377) Petris. Civil law: real estate transfers.

Existing law requires that specified written disclosures be made to prospective transferees of real property, including information regarding defects, environmental hazards, and any pending lawsuits that may affect the property. Existing law provides a disclosure form for this purpose.

This bill would provide that these provisions shall apply to transfers of property, as specified. The bill would also provide that any waiver of these provisions shall be void. The bill would also revise the required disclosure forms.

Ch. 818 (SB 1384) Kopp. Elections: payments: inducements.

Existing law imposes criminal penalties for various prohibited acts that corrupt the voting process, including offering or paying any money or other valuable consideration to a voter, or any other person, to induce the voter to vote or refrain from voting for a particular person or measure, or to remain away from the polls at an election, among other things.

This bill would, in addition, prohibit a controlled committee from directly or indirectly paying, lending, or contributing any money or other valuable consideration to or for any voter or person to induce any voter to vote, refrain from voting, or remain away from the polls.

This bill would make identical changes to the Elections Code alternative to those proposed by this bill that would become operative only if this bill and SB 1547 are both chaptered, in which case a specified provision of this bill would not become operative.

This bill would impose a state-mandated local program by creating new crimes imposing penalties of imprisonment in the state prison for 16 months or 2 or 3 years for a violation of its provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 819 (SB 1417) Johnston. State Job Training Coordinating Council: statewide work force preparation: assessment of programs.

Existing law provides that the State Job Training Coordinating Council is established to, among other things, promote integration of employment and training programs at the state level.

This bill would revise the above provision to provide, instead, that the State Job Training Coordinating Council is established to promote integration of work force preparation programs at the state level.

This bill would require the State Job Training Coordinating Council to submit to the Legislature and the Governor on or before April 1, 1995, an assessment of existing state and federal employment and training programs and recommendations, as specified.

Ch. 820 (SB 1463) Petris. Threats: public officials.

(1) Existing law provides that a person who knowingly and willingly threatens an elected state official or other specified individuals with death or serious bodily injury, with the specific intent that the statement is to be taken as a threat, and who has the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

apparent ability to carry out that threat by any means, is guilty of a public offense.

This bill would add all elected public officials, county public defenders, county clerks, and the immediate family and staff of all specified individuals to the group of specially protected individuals.

The bill also would provide that a threat against staff must relate directly to the official duties of the staff in order to constitute a public offense under the above provisions.

(2) Existing law provides that any person who intentionally interferes with any lawful business or occupation carried on by the owner or agent of a business establishment open to the public, by obstructing or intimidating those attempting to carry on business, or their customers, and who refuses to leave the premises of the business establishment after being requested to leave, is guilty of a misdemeanor.

This bill would also make it a misdemeanor to intentionally interfere with any lawful business carried on by the employees of a public agency open to the public and to refuse to leave the premises of the public agency when requested.

(3) Under existing law, any person who has been convicted of specified misdemeanor violations and who, within 10 years of the conviction, owns, or has in his or her possession or under his or her custody or control, any firearm, is guilty of a public offense, punishable as specified.

This bill would include within the above-described prohibition a violation of the provisions in (1) above.

(4) This bill would incorporate additional changes in Section 76 of the Penal Code proposed by AB 136 of the 1993–94 First Extraordinary Session of the Legislature, to be operative only if AB 136 and this bill are both enacted and become effective as specified, and this bill is enacted last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

Because the bill would change the definition of a crime and create new crimes, it would impose a state-mandated local program.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 821 (SB 1468) Kelley. Courts.

(1) Existing law specifies the duties and provides for the compensation and vacation credit of juvenile court referees and municipal and superior court commissioners in Sacramento County.

This bill would revise those provisions and provide that the presiding judge of the superior and municipal courts may authorize a court commissioner and juvenile court referees to exercise all the powers and perform all the duties of specified judicial officers.

(2) Existing law provides for the number, classification, and compensation of various court personnel within the Western Riverside Judicial District.

This bill would revise the name of the district and of a classification within that district. It would also revise the salary range of a classification within that district, thereby imposing a state-mandated local program.

The bill would also authorize the Board of Supervisors of Riverside County to provide that municipal court commissioners shall receive the same compensation as superior court commissioners while serving on assignment with the superior court.

(3) Existing law provides for the funding of trial court operations and establishes the Trial Court Operations Fund for this purpose. Existing law requires the Judicial Council to adopt appropriate rules for budget submission, budget management, and the reporting of revenues and expenditures by each court. The Controller is authorized, at the request of the Legislature or the Judicial Council, to perform financial and fiscal audits of this fund and of the budget reports created pursuant to the rules promulgated by the Judicial Council.

This bill would specify that these provisions apply to compliance audits, and would direct the Judicial Council to provide for the transmission of summary information concerning court revenues and expenditures to the Controller. The bill would also require that amounts appropriated in the annual Budget Act for assigned judges be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

transferred to the Judicial Council on a monthly basis by the Controller in a specified manner.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason. However, the bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 822 (SB 1507) Presley. Medi-Cal: provider reimbursement.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

This bill would revise the method of calculating reimbursement payments to disproportionate share providers under the Medi-Cal program.

Ch. 823 (SB 1523) Watson. Child support: Los Angeles County.

Existing law requires the State Department of Social Services to pay 100% of the nonfederal share of costs for developing the Statewide Automated Child Support System, prior to October 1, 1995, to the extent enhanced federal funding is approved, including county staff costs related to the development and implementation of the Statewide Automated Child Support System.

Existing law also requires the department to reimburse the county, from specified appropriations, for the nonfederal share of the development and implementation costs of the Los Angeles County Automated Child Support System Replacement System that are eligible for enhanced federal funding and that have been incurred by the county in the same fiscal year in which the collection targets are exceeded. The reimbursement is made to the extent that the net share of distributed child support collections from Los Angeles County exceeds specified Aid to Families with Dependent Children program collection targets for the county.

This bill would, instead, authorize the State Department of Social Services to loan funds in the 1994–95 fiscal year to the County of Los Angeles for the nonfederal share of the county automated child support enforcement system, and would provide that the county would not be required to repay the loan if specified conditions are met.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 824 (SB 1665) Hart. School Accountability Report Card.

(1) Under the Classroom Instructional Improvement and Accountability Act (Proposition 98), in order to promote a model statewide standard of instructional accountability and conditions for teaching and learning, the Superintendent of Public Instruction is required to develop and present to the State Board of Education for adoption a statewide model school accountability report card that includes an assessment of specified school conditions. Under the act, the governing board of each school district is required to implement a school accountability report card for each school in the district that includes the conditions covered in the statewide model report card.

This bill would require that the statewide model school accountability report card also include, as a school condition to be assessed, the total number of instructional minutes offered in the school year, separately stated for each grade level and the total number of minimum days in the school year, as specified. The bill, by adding conditions to the statewide model report card, thereby would require school districts to similarly modify their school accountability report cards, thereby imposing a state-mandated local program.

(2) The Classroom Instructional Improvement and Accountability Act, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house.

This bill, which would declare that it furthers the purposes of the act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 825 (SB 1885) Presley. International student exchange visitor placement organizations.

Existing federal law, the Mutual Education and Cultural Exchange Act of 1961, and the regulations thereto, authorizes the United States Information Agency to designate certain exchange visitor programs that meet certain eligibility requirements to act as sponsors of exchange visitor programs, including, among other programs, exchange visitor programs that place certain foreign nationals in schools at the secondary school level. That law authorizes the issuance of a certain federal nonimmigrant visa to students participating in designated programs. Under federal law, certain student exchange visitors, including certain elementary and secondary students, may also be authorized to enter the United States to study on other federal nonimmigrant visas. Student exchange visitor programs assisting student exchange visitors in obtaining those other federal nonimmigrant visas are not subject to regulation by the United States Information Agency.

This bill would establish the Uniform Supervision of International Student Exchange Visitor Placement Organizations Act of 1994 to require that international student exchange visitor placement organizations register with the Attorney General, as specified, meet certain requirements, and perform certain duties. The bill would require the Attorney General to adopt regulations regarding the standards and requirements that those organizations must meet in a manner consistent with specified federal regulations and for the administration of these provisions.

This bill would require each international student exchange visitor placement organization to submit certain documents along with the registration application.

This bill would require each organization to, among other things, provide certain information to participating students, host families, and school districts.

This bill would make it a misdemeanor for any international exchange visitor placement organization to fail to register with the Attorney General or to willfully and knowingly provide false or incorrect information to the Attorney General, as specified, thereby creating a state-mandated local program.

This bill would create the Registry of International Student Exchange Visitor Placement Organizations Fund in the State Treasury and would require deposit of all registration and renewal fees collected into that fund for the purpose of funding the administration of these provisions.

This bill would authorize a school district to require proof of registration with the Attorney General from any organization seeking to place an international student exchange visitor, as defined, in the school district as a condition to agreeing to enroll that student.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 826 (SB 1902) Peace. Correctional facilities.

Existing law requires the Department of Corrections-Department of the Youth Authority Joint Apprenticeship Committee, in consultation with the Robert Presley Institute of Corrections, Research, and Training, to research, establish, and monitor standards for selection and training of correctional peace officer apprentices, to develop

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

standards for advanced correctional peace officer and supervisory curricula, and to develop standards for the training of correctional peace officers in the handling of stress associated with their duties.

This bill would rename the Department of Corrections-Department of the Youth Authority Joint Apprenticeship Committee as the Commission on Correctional Peace Officers' Standards and Training (CPOST). This bill would delete the stipulation that the above requirements be performed in consultation with the Robert Presley Institute of Corrections, Research, and Training.

This bill would require, among other things, that the CPOST develop, approve, and monitor standards for the selection and training of state correctional peace officer apprentices.

Ch. 827 (SB 1920) Lewis. Income taxes: credit: adoption costs.

The Personal Income Tax Law authorizes various credits against the tax imposed by that law.

This bill would authorize a credit against that tax for each taxable year beginning on or after January 1, 1994, in an amount equal to 50% of the costs, as specified, paid or incurred by a taxpayer for the adoption of any minor child who is a citizen or legal resident of the United States and was in the custody of a public agency of either this state or a political subdivision of this state.

This bill would take effect immediately as a tax levy.

Ch. 828 (SB 1951) Killea. Corporations: securities.

Existing law, the Corporate Securities Act of 1968, provides that it is unlawful for any person to offer or sell in this state any security in an issuer transaction, as specified, unless the sale is qualified or exempted.

This bill would exempt from these provisions the offer or sale of a security, except as provided, by specified corporations and business entities to qualified purchasers, as described, and would impose related requirements.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 829 (SB 1980) Kopp. Insurance: liquidation.

Under existing law, in connection with proceedings for the liquidation of insurers and persons engaged in the business of insurance, the commissioner may appoint and employ special deputy commissioners, clerks, and assistants. Existing law provides that the compensation of those persons shall be fixed by the commissioner subject to the approval of the court, and paid out of the assets of the insurer.

This bill would provide instead that the costs of employing those persons shall be fixed by the commissioner, subject to the approval of the court, and paid out of the assets of the insurer to the department. The bill would also provide that the commissioner must give notice to the Chair of the Joint Budget Committee of the Legislature of any appointment or employment of those persons. It would also prohibit the payment of that compensation and expenses out of the assets of other estates.

Ch. 830 (SB 1983) Rosenthal. Statewide network of visitor information centers.

Existing law provides for the Office of Tourism within the Trade and Commerce Agency and prescribes its various functions and activities.

This bill would state that a statewide network of California Welcome Centers, would encourage tourism in California and provide benefits to the state economy. The bill would prescribe various functions and activities for the establishment of that network by the Office of Tourism. This bill would also require the Department of Transportation, to the maximum extent feasible, to install and maintain highway signs identifying California Welcome Centers. The Office of Tourism would be required to collect fees from center operators in amounts sufficient to defray costs of these provisions.

This bill would require the Office of Tourism to submit regulations that may be drafted to implement these provisions to the California Tourism Commission, as specified, and to consult with the Department of Transportation in the design and placement of California Welcome Center highway signs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 831 (SB 2019) Bergeson. Vehicles: schoolbuses.

(1) Existing law requires all pupils at the elementary and secondary level in public or private schools who are transported by a schoolbus or school pupil activity bus to receive instruction in schoolbus emergency procedures and passenger safety. Existing law requires that, at least once each school year, certain younger pupils who receive home-to-school transportation services receive certain specific safety instructions.

This bill would include prekindergarten pupils in the category of pupils who must receive instruction in schoolbus emergency procedures and passenger safety. The bill would also require that specified safety information be given upon registration to the parents or guardians of all pupils in prekindergarten, kindergarten, and grades 1 to 6, inclusive, if the pupils have not previously been transported in a schoolbus or school pupil activity bus.

(2) Existing law requires the driver of a schoolbus to operate specified warning lights and signs and follow other specified procedures on the approach to a schoolbus stop where pupils are loading or unloading from the bus and must cross a highway or private road and at all times when the schoolbus is stopped for the purpose of loading or unloading pupils who must cross a highway or private road upon which the schoolbus is stopped.

This bill would authorize a school district to designate selected schoolbus stops as stops that may require the activation of the flashing red light as required under existing law even though there are no pupils crossing the roadway. These stops could only be so designated because they present unique traffic hazards that can be addressed by the use of the flashing red lights. The bill would prohibit a school district from designating these stops without the prior approval of the Department of the California Highway Patrol and the agency having traffic engineering responsibility for the street on which the stop is located.

To the extent that other city and county agencies would be required to review and approve or reject the district's proposals, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 832 (SB 2034) Ayala. Motor carriers: controlled substances and alcohol testing.

(1) Existing law requires the Department of the California Highway Patrol to adopt rules and regulations designed to promote the safe operation of certain vehicles, including the regulation of prescribed activities involving vehicles.

This bill would require the department to adopt rules and regulations regarding controlled substances and alcohol testing of drivers by motor carriers.

(2) Existing federal regulations require the implementation, on January 1, 1995, of certain controlled substances and alcohol use and testing with regard to prescribed employers of drivers of certain motor vehicles (49 C.F.R. 382.101, et seq.).

This bill would require motor carriers and drivers, except as specified, to comply with the described federal regulations. The bill would expressly require every motor carrier to make specified records available to authorized employees of the department. The bill would make evidence derived from a positive test result in the possession of a motor carrier inadmissible in a criminal prosecution concerning unlawful possession, sale, or distribution of controlled substances. The bill would require certain test results to be mailed to the department within 3 days of a test.

The bill would make it a misdemeanor for any person to willfully violate these provi-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

sions and would thereby impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 833 (SB 2072) Calderon. Common interest developments: liability.

Under existing law, "common interest development" is defined to mean a community apartment project, condominium project, planned development, or stock cooperative. Existing law defines the meaning of the term "separate interest" for purposes of each of these developments.

This bill would provide that any cause of action in tort arising solely by reason of an ownership interest in the common area of a common interest development shall be brought against the association and not against the individual owners of the separate interests, provided the association has maintained one or more policies of insurance with specified coverage in specified minimum amounts, and the association has notified its homeowners at least annually as to the amount and type of insurance carried by the association, upon issuance or renewal of insurance, as specified.

Ch. 834 (SB 2097) Hayden. Improper governmental activities: California State University.

The Reporting of Improper Governmental Activities Act prohibits state employees from directly or indirectly using or attempting to use their official authority or influence, as defined, for the purpose of intimidating, threatening, coercing, commanding, or attempting to do the same, for the purpose of interfering with the right of a person to disclose improper governmental activities of state agencies or employees to the State Auditor. The act further permits a state employee or applicant for state employment who files a written complaint alleging acts of reprisal or intimidation due to disclosure of improper governmental activities to file a copy of the complaint with the State Personnel Board, and the board is required to take adverse action against certain employees in specified instances.

This bill would add provisions, applicable exclusively to California State University employees, including officers and faculty members, or applicants for employment, similar to the provisions administered by the State Personnel Board, as described above, except the Trustees of the California State University would designate an officer to whom complaints could be filed alleging reprisal or intimidation and the trustees would administer these provisions. This bill would provide that if these provisions are in conflict with a memorandum of understanding reached pursuant to existing law, the memorandum of understanding shall be controlling without further legislative action.

Ch. 835 (AB 234) Harvey. Juvenile court law: sealing of records.

Under existing provisions of juvenile court law governing the sealing of records, the court may not seal the record in any case in which the person was found by the juvenile court to have committed one of various, specified, serious offenses until at least 3 years have elapsed since the commission of that offense. However, existing law provides for the destruction of juvenile court records after a certain time period has elapsed, as specified. Under provisions of juvenile court law certain minors may be transferred to criminal court for trial as an adult.

This bill would prohibit the sealing or destruction of juvenile court records for an offense in any case in which the person is convicted of that offense in a criminal court, as specified.

The bill would also incorporate amendments to Section 781 of the Welfare and Institutions Code proposed by AB 560 and SB 1792, contingent upon their prior enactment.

Ch. 836 (AB 1629) Karnette. Juveniles.

Existing law requires the juvenile court to order the payment of restitution as a condition of probation, if a minor is declared a ward of the court as a result of criminal

NOTE: Superior numbers appear as a separate section at the end of the digests.

conduct, except as specified. Existing law also makes a parent or guardian having custody and control of a minor jointly and severally liable for civil damages, up to specified amounts, for willful misconduct by the minor which results in death, personal injury, or property damage, as specified, as well as for specified fines imposed on the minor for certain acts of vandalism.

This bill would revise various notification provisions for parents and guardians to require them to be advised of this potential liability. The bill would also require juvenile court restitution orders to identify the losses to which they pertain, and would provide that the victim in whose favor restitution has been ordered shall be notified of specified facts regarding the order. The bill would also create a rebuttable presumption that the parents or guardians with joint or sole legal and physical custody and control of a minor who is the subject of a juvenile court restitution order are jointly and severally liable therefor, as specified.

The bill would impose a state-mandated local program by increasing the duties of local officers.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 837 (AB 2634) Knight. Real estate: appraisers.

Existing law provides for the licensing and certification of real estate appraisers.

This bill would make various changes to these provisions, including, but not limited to, the following:

(1) The bill would delete the definition of the term "certified real estate appraisal report."

(2) The bill would provide for the issuance of citations and the assessment of fines for violations of these provisions, as specified.

(3) The bill would establish the Uniform Standards of Professional Appraisal Practice as the minimum standard of conduct and performance for appraisers, as specified.

(4) The bill would provide for the submission by an appraiser of copies of appraisals or any work product addressed by the uniform standards to substantiate documentation of appraisal experience or to facilitate the investigation of illegal or unethical activities by an appraiser.

(5) The bill would provide that no real estate appraiser license or certificate may be issued to an applicant who is less than 18 years of age.

(6) Existing law provides that the Director of the Office of Real Estate Appraisers shall recognize on a temporary basis the certification or license of an appraiser issued by another state, subject to certain criteria.

This bill would eliminate these criteria and provide instead that the director shall adopt regulations governing the process and procedure of applying for reciprocity, as specified.

(7) The bill also would provide that the director shall adopt regulations governing the process and procedure of applying for a trainee license. The bill would authorize a licensed trainee to sign an appraisal, as specified.

(8) The bill would provide that the director shall adopt regulations governing the process and procedure of applying for temporary practice.

(9) The bill would make further technical changes.

Ch. 838 (AB 3161) Frazee. Public records: public employees.

Existing law provides that the home address, telephone number, occupation, precinct number, and prior registration information shown on the voter registration card for certain specified persons is confidential if the person requests confidentiality of that

NOTE: Superior numbers appear as a separate section at the end of the digests.

information at the time of registration or reregistration and shall not be disclosed to any person, except as specified.

This bill would add to those persons who may request confidentiality specified city employees involved in criminal law enforcement.

This bill also would make the disclosure of the home address or telephone number of specified peace officers, an employee of a city police department or county sheriff's office, or the spouse or children of these persons who live with these persons by any person or public entity in violation of the above-specified prohibition a misdemeanor. This bill would make a violation of this provision that results in bodily injury to these specified persons a felony.

Because this bill would expand the scope of an existing crime, it would impose a state-mandated local program.

This bill would provide that the above provisions shall not become operative if (1) this bill and SB 1518 are both chaptered, (2) SB 1518 repeals and adds Section 6254.4 of the Government Code, and (3) this bill is chaptered last.

Under existing law, the home address of specified persons, including public prosecutors, public defenders, and certain law enforcement personnel appearing in any records of the Department of Motor Vehicles is confidential and may not be disclosed except as specified. Existing law requires that the home address be withheld from public inspection for 3 years following termination of office or employment.

This bill would also make those provisions applicable to the home addresses of specified city employees involved in criminal law enforcement.

By prohibiting the disclosure of certain information, this bill would impose a state-mandated local program.

This bill would make the disclosure of the home address of specified peace officers, a nonsworn employee of a city police department or county sheriff's office, or the spouse or children of these persons by any person or public entity in violation of this prohibition that results in bodily injury to these persons a felony, thereby imposing a state-mandated local program, by changing the punishment for a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 839 (AB 3316) Takasugi. Personal income tax: bank and corporation tax: credits: tentative minimum tax.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, and provide that only certain of those credits may be applied, as specified, to reduce certain amounts of tax imposed under those laws below the amount of the tentative minimum tax, as defined by a specified statute.

This bill would, commencing with each taxable or income year beginning on or after January 1, 1994, include the tax credits allowed with respect to the wages paid to certain individuals that are hired within the Los Angeles Revitalization Zone among those credits that may be applied to reduce amounts of tax below the amount of the tentative minimum tax.

The Personal Income Tax Law and the Bank and Corporation Tax Law generally provide that any remaining carryover amount with respect to a credit that has been repealed or has become inoperative shall continue to be allowed to be carried over and applied until that amount has been exhausted.

This bill would instead provide that any remaining carryover amount with respect to a credit that has been repealed or has become inoperative shall continue to be allowed to be carried over under the provisions of that credit as those provisions read immediate-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

ly prior to the credit being repealed or becoming inoperative.

This bill would incorporate additional changes in Section 23036 of the Revenue and Taxation Code, proposed by AB 73 or SB 469, or both, to be operative only if AB 73 or SB 469, or both, and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would take effect immediately as a tax levy.

Ch. 840 (AB 3562) Eastin. Education: reports and certifications.

(1) Existing law provides that certain state agencies and local educational entities are to make various reports or certifications or to submit information to specified agencies or entities. These reports, certifications, and submittals encompass numerous areas of the Education Code, including the following: teacher aides; the State Teachers' Retirement System; certain general duties of the Superintendent of Public Instruction; the Educational Innovation and Planning Commission; the Advisory Commission on Special Education; new school planning and design; school facilities; school finance, including class size reduction and experimental kindergarten in the Covina Valley Unified School District; employees, including teacher preparation, the Classroom Teacher Instructional Improvement Program, and certain waivers regarding staff development; the International Studies Project; charter schools; pupil attendance; pupil health; instructional programs, such as school improvement plans, the gifted and talented program, regional career guidance centers, and summer vocational educational; special education; experimental schools; and the State Instructional Materials Fund.

This bill would delete certain reports, certifications, or submittals relating to those areas to be made by certain state agencies and local educational entities and would make an additional conforming change. The bill would also contain legislative findings and declarations and make a statement of legislative intent.

(2) Existing law requires the Superintendent of Public Instruction to calculate district entitlements to economic impact aid in March of the prior fiscal year, as specified, and to notify school districts of their expected entitlements by May 1 of that fiscal year.

This bill would require the superintendent to make this calculation by June 15 of the prior fiscal year, as specified, and to notify school districts of their expected entitlements by July 1 of that fiscal year.

Ch. 841 (AB 3751) Margolin. False or fraudulent insurance claims.

(1) Existing law prohibits insurance fraud and prescribes penalties for its commission. Prior law consolidated these provisions and repealed former provisions.

This bill would correct and update references to these provisions to reflect the consolidation and repeals.

This bill also would provide specifically that the statute of limitations for a workers' compensation fraud offense would commence upon discovery of the offense.

(2) Existing law prohibits certain specified acts with respect to false and fraudulent insurance claims.

This bill would provide that a violation of certain of those acts additionally gives rise to civil liability of up to $5,000 per claim or act plus an assessment of not more than 3 times the amount of each claim for compensation submitted, as specified.

The bill would specify the allocation of any recovered civil penalty. It would require the civil penalty to be deposited in the Workers' Compensation Fraud Account in the Insurance Fund and to be used solely for the investigation and prosecution of insurance fraud, as specified.

This bill would repeal these provisions on January 1, 1999, on which date provisions identical to existing provisions would become operative.

(3) This bill would incorporate additional changes in Section 550 of the Penal Code proposed by SB 1833, to be operative only if SB 1833 and this bill are both enacted and become effective on January 1, 1995, and this bill is enacted last.

Ch. 842 (AB 3774) V. Brown. Environmental impact reports and statements: military base reuse plans.

Existing law, the California Environmental Quality Act, requires a public lead agency,

NOTE: Superior numbers appear as a separate section at the end of the digests.

as defined, to prepare an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, unless exempt from the act. The act requires the state guidelines prepared pursuant to the act to provide that, when an environmental impact statement has been, or will be, prepared for the same project pursuant to federal law, all or part of that statement may be submitted in lieu of an environmental impact report prepared under the act, if the requirements of the act are met.

This bill would, until January 1, 2001, authorize the lead agency to utilize an environmental impact statement prepared pursuant to federal law as the environmental impact report for a federal military base reuse plan, as defined, if specified conditions are met. The bill would make related declarations of legislative intent.

The bill would become operative only if SB 354 is enacted and takes effect on or before January 1, 1995.

Ch. 843 (AB 3819) W. Brown. Fire safety: roofing materials.

Existing law requires the State Fire Marshal, on or before July 1, 1993, to propose, and the State Building Standards Commission to adopt, amend, and repeal, regulations for roof coverings and openings into the attic areas of buildings in specified very high fire hazard severity zones.

This bill would expand this requirement as regards regulations relating to attic openings to include very high fire hazard severity zones designated by local agencies.

Existing law requires that in these specified very high fire hazard severity zones all new buildings, and existing buildings where 50% or more of the roof area is reroofed with a one-year period shall have roofs that are at least class B pursuant to specified building standards relating to fire retardancy. It requires the installer of roof coverings to provide a certificate of the roof covering classification and to install according to manufacturer's listings. It also requires all roofing material to have passed a 10-year accelerated weather test. Existing law permits cities or counties to impose stricter standards, exempts historic buildings or facilities, requires the regulations to be consistent with prescribed housing regulations, and provides for enforcement by the responsible agency within each zone.

This bill would recast these provisions to require, in very high fire hazard severity zones designated by either the Director of Forestry and Fire Protection or by local agencies, every new structure, and every existing structure when 50% or more of the roof area is reroofed within a one-year period, to have a fire retardant roof covering that is at least class B, as defined. The bill would permit certain historic buildings to utilize alternative fire retardant roof constructions and would not affect the validity of certain ordinances establishing equivalent or stricter standards adopted prior to July 1, 1995. The bill would require the installer to provide a certification of the roof covering classification and would require the wood-roofing materials to have passed a 10-year weather test and a rain test.

For purposes of all other areas, existing law requires that on or after July 1, 1995, every new structure and every existing structure, when 50% or more of the roof is reroofed within a one-year period, have a fire retardant roof covering that is at least class C pursuant to specified building standards. Existing law, provides that it shall not affect the validity of ordinances establishing equivalent or stricter standards adopted prior to July 1, 1995, and permits certain historic buildings to utilize alternative fire retardant roof constructions.

This bill would require the installer to provide a certificate of the roof covering classification, would require wood-roofing materials to have passed a 10-year weather test and a rain test, and would change the reference to the prescribed building standards.

This bill would provide that within very high fire hazard severity zones designated by the Director of Forestry and Fire Protection, every new structure and existing structure, when 50% or more of the total roof area is reroofed within any one-year period after January 1, 1997, shall have a fire retardant roof covering that is at least class A pursuant to specified building standards. The bill would provide that this requirement does not apply to any jurisdiction that fulfills certain criteria, including the adoption of

NOTE: Superior numbers appear as a separate section at the end of the digests.

the model ordinance, as described below.

The bill would require local agencies to make information received from the director that identifies very high fire hazard severity zones available to the public within 30 days of receiving that information, thereby imposing a state-mandated local program. The bill would state the legislative finding that space and structure defensibility is essential to diligent fire prevention and would require the State Fire Marshal, in consultation with the Director of Forestry and Fire Protection, by July 1, 1996, to prepare and adopt a model ordinance that provides for comprehensive space and structure defensibility, including in very high fire hazard severity zones. It would require the State Fire Marshal to transmit copies of the ordinance to appropriate local agencies and to the director, and to make efforts to obtain funding for the development and preparation of this model ordinance.

The bill would also require the director, no later than December 1, 1995, to report to the appropriate committees of the Legislature on issues relating to the impact of designating very high fire hazard severity zones.

Existing law provides that a violation of certain fire protection laws is a misdemeanor.

By adding a new requirement to these provisions, the bill would create a new crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 844 (SB 2070) Calderon. Structural pest control.

Under existing law, the Structural Pest Control Board regulates the practice of structural pest control operators in this state, as specified.

This bill would, among other things, do all of the following:

(1) It would prohibit a fire department from charging a fee in excess of $25 for receiving notice of fumigation, as specified.

(2) It would provide for licensure of a "structural pest control applicator," defined as any individual who is licensed by the board to apply a pesticide, rodenticide, or allied chemicals or substances for the purpose of eliminating, exterminating, controlling, or preventing infestation or infections of pests or organisms included in Branch 2, Branch 3, or wood roof cleaning and treatment on behalf of a registered company. It would also specify revised license examination, application, and renewal requirements for an applicator.

(3) It would increase certain civil penalties and fees, as specified. Since those fees would be deposited into the continuously appropriated Structural Pest Control Fund, the bill would make an appropriation.

(4) It would revise requirements applicable to inspection reports and other documents, as specified.

(5) It would require the posting of inspection tags and completion tags, as provided.

(6) It would provide procedural guidelines regarding disciplinary action against licensees whose employees violate personal protection regulations.

The bill would make related technical and clarifying changes.

Ch. 845 (SB 1316) Greene. Open meetings.

Existing law generally requires a state agency to hold open and public meetings but permits closed sessions to consider the appointment, employment, or dismissal of an employee of a state agency and other personnel matters.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would state that, for the purposes of those provisions, the term "employee" includes persons appointed pursuant to a specified exemption from civil service.

Ch. 846 (SB 1426) Mello. Public contracts: minority business enterprises.

Existing law requires contracts awarded by any state governmental entity for construction, professional services, materials, supplies, equipment, alteration, repair, or improvement to have statewide participation goals of not less than 15% for minority business enterprises. For purposes of certifying a business as a minority business enterprise, the term "minority" includes a citizen or lawful permanent resident of the United States who is an ethnic person of color and who is Hispanic. The term "Hispanic" includes a person of Mexican, Puerto Rican, Cuban, or Central or South American culture or origin regardless of race, but does not include a person of Spanish or Portuguese culture or origin, other than Hispanic, except with respect to contracts fully or partially funded by the federal government.

This bill would provide that a person of Spanish or Portuguese culture or origin is Hispanic and therefore a minority for purposes of certification as a minority business enterprise with respect to these contracts that are solely state funded.

Ch. 847 (SB 1443) Beverly. Oil spills: financial responsibility.

Under existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, the level of required financial responsibility for a certificate of financial responsibility for a vessel or for all of the oil contained within a vessel will increase from $500,000,000 to $750,000,000 on July 1, 1995, and to $1,000,000,000 on January 1, 2000.

This bill would instead increase that amount to $700,000,000 on February 20, 1995, to $750,000,000 on February 20, 1998, and to $1,000,000,000 on February 20, 2000.

Ch. 848 (SB 1678) Hart. Schoolage day care.

Existing law, the California Child Day Care Facilities Act, provides for the licensure and regulation by the State Department of Social Services of child day care facilities, including day care centers and family day care homes.

Existing law, regulations adopted by the Department of Social Services, imposes requirements for child care centers, and schoolage child care centers, as defined, including requirements regarding education and experience of teachers and the site director.

This bill would provide alternatives to these existing regulatory requirements for schoolage child care centers. It would provide certain alternative requirements concerning education and experience of site directors and teachers.

The bill would prescribe additional types of education that satisfy the educational requirements for schoolage child care staff. It would require the department to issue a provisional license to operate a schoolage child care program at a functioning schoolsite upon the receipt of a completed application for a license, and would impose requirements regarding the department's review of the application and the program and the issuance of a permanent license to the program.

Ch. 849 (SB 2113) Committee on Natural Resources and Wildlife. Fish and game: licenses, stamps, permits, and vessel registrations.

(1) Existing law requires license tags issued by the Department of Fish and Game, generally, to be consecutively numbered.

This bill would delete that requirement.

(2) Existing law requires the payment of a fee of $3 for a duplicate sportfishing or hunting license to replace a lost or destroyed license and $2 for a reduced fee hunting or sportfishing license issued by the department. Existing law also authorizes a free sportfishing permit to be issued to groups of mentally or physically handicapped persons for not to exceed 2 days.

This bill would increase the fee for duplicate licenses to $5 and increase the fee for reduced fee hunting or sportfishing licenses to $4 and would provide for their adjustment annually by a specified inflation index. The bill would also delete the 2-day limitation on the sportfishing permit for groups of mentally or physically handicapped persons.

(3) The Sacramento-San Joaquin Valley Wetlands Mitigation Bank Act of 1993 defines

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the terms "bank site" and "mitigation bank site" for purposes of that act.

This bill would exclude from that definition land on which rice is produced that provides significant wetland habitat value.

(4) Existing law requires vessels used in commercial fishing operations to be registered with the department. The registration requirements were recast, amended, and renumbered by certain statutes enacted in 1992.

This bill would conform other provisions of law to those changes. The bill would make other technical amendments to related provisions.

(5) Existing law provides for the licensing of pheasant clubs and game bird clubs to provide hunting for domestically propagated pheasants and game birds. That existing law provides for the division of the state into 2 zones with differing requirements applicable in each zone and provides for applications, permits to hunt on club property, open seasons, quotas, license fees and regulations, inspection fees for bird inspection, and other matters.

This bill would delete those provisions and would authorize the licensing of game bird clubs under regulations adopted by the Fish and Game Commission. These provisions of the bill would become operative on July 1, 1995.

(6) Existing law makes a license to harvest kelp or other aquatic plants issued by the department valid for a term of one year from the date of issuance.

This bill would make that license valid from January 1 to December 31, inclusive, or if issued after the beginning of that term, for the remainder thereof.

(7) Existing law requires a person applying for a commercial salmon vessel permit to satisfy one of several alternative requirements in order to obtain that permit. One of those alternative requirements is that the applicant obtain a commercial fishing salmon stamp and pay the fees prescribed for the stamp if the applicant is required to obtain the stamp pursuant to other specified provisions of law.

This bill would delete the cross reference to the other specified provisions of law.

(8) Existing law requires the revenue from fees to be deposited in the Fish and Game Preservation Fund. That fund is continuously appropriated to the department and the commission to carry out the Fish and Game Code.

Because this bill would increase the revenues to the fund, the bill would make an appropriation.

Ch. 850 (AB 3821) Connolly. California Defense Conversion Council.

Existing law requires the California Defense Conversion Council to provide a central clearinghouse for all base reuse and defense conversion activities in the state, to develop and recommend to the Governor and the Legislature a strategic plan for federal, state, and local defense conversion and training programs, and to provide a central location for all military base reuse, community assistance and training funding, regulations, and application procedures to expedite the transfer of state and federal funds to state and local projects.

This bill would additionally require the council to prepare and implement a plan to minimize California's loss of military bases and jobs in the 1995 round of military base closures.

Ch. 851 (AB 72) Klehs. Sales and use tax.

The Sales and Use Tax Law imposes state sales and use taxes on the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property in this state, unless the sale, storage, use, or other consumption is exempt from tax. That law requires, except as provided, that every "retailer engaged in business in this state," as defined, shall collect tax from the purchaser and provide a receipt therefor, as provided.

This bill would provide, for a period of 5 years or until the operative date of a superseding act of Congress, whichever is earlier, that the term "engaged in business in this state" does not include the taking of orders from California customers on a specified type of computer telecommunications network located in this state when the orders result from the electronic display of products on that same network. This bill

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

would make legislative findings and declarations as to the necessity of this provision.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 852 (AB 413) Hannigan. Local government.

Existing law authorizes public agencies, as defined, to enter into joint powers agreements.

This bill would authorize a joint powers entity, that is created pursuant to a joint powers agreement entered into by the City of West Sacramento and Reclamation Districts 537 and 900 for the purpose of carrying out a flood control project, to exercise the assessment and bond authority granted to reclamation districts under existing law.

Existing law provides that on or after May 17, 1991, no redevelopment agency shall pledge as security for payment of the principal and interest of bonds amounts received as state subventions as specified.

This bill would permit those amounts to be pledged as security for those bond payments under specified conditions.

Existing law does not specifically authorize local districts to self-insure in lieu of providing performance bonds for district officers and employees.

This bill would authorize a district, other than a school district, to adopt a program of self-insurance in lieu of bonds for any officer or employee.

Existing property tax law requires, for purposes of determining property tax revenue allocations in each county for the 1993–94 fiscal year, that the amounts of property tax revenue deemed allocated in the prior year to the county, cities, and special districts be reduced in accordance with certain formulas, amounts, exclusions, and offsets.

This bill would establish specific formulas for property tax revenue to be allocated by the Sacramento County Auditor to special districts commencing with the 1994–95 fiscal year. By requiring the implementation of new procedures and calculations in the allocation of property tax revenues, this bill would impose a state-mandated local program.

Existing law, the Ralph M. Brown Act, requires local legislative bodies, as defined, to conduct their meetings openly and publicly and permits the conduct of meetings by video teleconferencing, as defined.

This bill would also permit the Santa Barbara County Board of Supervisors to conduct specified meetings by audio teleconferencing until January 1, 1997.

This bill would provide that no reimbursement is required for a specified reason.

Ch. 853 (AB 2206) Bornstein. Enterprise zones: expansion.

Existing law permits a city or county to propose that an enterprise zone or a targeted economic development and neighborhood economic development area within an incorporated area be expanded subject to the approval of the Trade and Commerce Agency based on prescribed criteria.

This bill would authorize an existing enterprise zone located in the unincorporated area of a county to propose expansion if the agency finds that certain conditions are met.

Ch. 854 (AB 2586) Baca. Small business.

Existing law appropriates funds to the Trade and Commerce Agency to contract with the California Southern Small Business Development Corporation for the establishment of a Small Business Development Corporation Expansion Center in the Inland Empire.

This bill would appropriate $76,000 from the General Fund to the Trade and Commerce Agency to pay for the operation costs of that Small Business Development Corporation Expansion Center established by the California Southern Small Business

NOTE: Superior numbers appear as a separate section at the end of the digests.

Development Corporations, as specified.

Ch. 855 (AB 2685) Costa. Sales and use tax: exemption: auction.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, and the storage, use, or other consumption in this state of, tangible personal property.

This bill would exempt from that tax the gross receipts from the sale of tangible personal property at an auction, as provided, that is conducted by, or affiliated with, a nonprofit organization, as defined.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 856 (AB 3359) Murray. Property taxation: assessment appeals: delinquency penalty relief.

Existing property tax law requires or authorizes, as provided, the correction or cancellation of penalties with respect to delinquent amounts of tax.

This bill would, in the case in which a taxpayer has failed to pay taxes on an assessment that is the subject of a pending assessment appeal, limit, as provided, the amount of penalty relief to the difference between the final determination of value by the county board, as defined, and the value on the assessment roll for the fiscal year covered by the application. This bill would also require the county board to provide specified notice to taxpayers impacted by these penalty provisions, and would require the tax collector to accept certain payments without penalties or interest, as provided. The bill would also provide that these provisions shall only become operative if the county board of supervisors, with the approval of the county tax collector and auditor, adopts a resolution or ordinance approving the provisions.

This bill would state the intent of the Legislature in enacting these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 857 (AB 3836) Burton. Sales and use taxes: exemptions: medicines.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. Existing law provides various exemptions from that tax, including an exemption for prescription medicines.

This bill would provide that the exemption for prescription medicines extends to medicines furnished without charge by a pharmaceutical manufacturer or distributor to specified health care professionals and facilities and specified educational entities, and to materials used to package, and the constituent elements and ingredients used to produce, those medicines.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would make certain legislative findings and declarations regarding the imposition of sales and use taxes on free samples of prescription medicines.

This bill would take effect immediately as a tax levy, but its operative date would

NOTE: Superior numbers appear as a separate section at the end of the digests.

depend on its effective date.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 858 (SB 586) Hughes. State Teachers' Retirement System.

(1) The State Teachers' Retirement Law makes provision for the protection of the purchasing power of original retirement allowances and expresses the intent and purpose to achieve a common minimum purchasing power level equal to 75% of the original purchasing power.

This bill would restate that intent and specify certain revenues that could be used to meet the 75% goal.

(2) Existing law requires school districts and other employing agencies to contribute additional amounts to pay for specified benefits.

This bill would require the Controller to adjust those contributions within 10 days of notification by the board of the actual creditable earnings on which the contributions are based, thereby affecting the amount continuously appropriated to the Teachers' Retirement Fund.

(3) Existing law sets forth the duties of the Teachers' Retirement Board in administering the Teachers' Retirement Fund.

This bill would require the board on March 1, 1995, and annually thereafter, to report to the fiscal committees of the Legislature the return on investments and actual payroll subject to the system in the prior fiscal year.

Ch. 859 (SB 778) Dills. Water service.

Existing law requires the payment of just compensation to a private or public entity when another entity, either public or private, provides or extends water service to a service area served by the first entity.

This bill would provide that these provisions do not apply in Los Angeles County to any entity's own private use of reclaimed water, as defined, under specified conditions.

Ch. 860 (SB 1286) Bergeson. Local taxes.

(1) Existing law, relating to fire suppression assessments, specifies the contents of the notice of the report of the legislative body proposing the assessment and authorizes the legislative body to adopt, revise, change, reduce, or modify the assessment under specified circumstances.

This bill would specify that certain items relating to the assessment be in the notice if applicable. This bill would revise the circumstances under which the legislative body may adopt, revise, change, reduce, or modify each or any fire suppression assessment.

(2) Existing law requires that before adopting any new or increased general tax or any new or increased assessment, the legislative body of a city, county, or special district shall conduct at least one public meeting at which local officials must allow public testimony regarding the proposed new or increased general tax or new or increased assessment in addition to the noticed public hearing at which the legislative body proposes to enact or increase the general tax or assessment.

This bill would make minor changes in the definition of new or increased assessment and in the notice requirements.

(3) Existing laws, the Improvement Act of 1911, the Municipal Improvement Act of 1913, and the Street Lighting Act of 1931 provide, generally, that a majority protest of landowners requires proposed improvements to be terminated unless the protests are overruled by an affirmative vote of ⅘ of the members of the legislative body. The Maintenance Act of 1927 permits the city council by a ⅘ vote to deny all protests against the formation of a district.

This bill would add to these ⅘ vote requirements for overruling or denying protests a requirement that the legislative body make a finding that the public health and safety require that the improvements be made.

(4) Existing law also specifies the form, frequency, and content of the notice to be published of the public meeting required for a proposed new or increased general tax or new or increased assessment.

This bill would make a change to the notice requirement for any annual assessments

NOTE: Superior numbers appear as a separate section at the end of the digests.

levied after the formation of an assessment district.

Ch. 861 (SB 1880) Campbell. Personal income taxes: bank and corporation taxes.

The Bank and Corporation Tax Law imposes taxes measured by income and, in the case of a business with income derived from or attributable to sources both within and without this state, the income is apportioned between this state and other states and foreign countries for tax purposes in accordance with a specified 4-factor formula based on the property, payroll, and sales within and without this state, except as specified.

This bill would provide that in the case of a qualified business, as defined, that business income be apportioned in accordance with a specified 3-factor formula.

This bill would also provide, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, that specified Internal Revenue Code provisions shall apply, as provided, including, among other things, provisions relating to amortization of goodwill and certain other intangibles, specified elections, and depreciation, as provided.

This bill would take effect immediately as a tax levy.

Ch. 862 (SB 354) Ayala. Environmental impact reports and statements: military base reuse plans.

Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare an environmental impact report on a project which it intends to carry out or approve that may have a significant effect on the environment, as defined, unless exempt from the act. The act requires the state guidelines prepared pursuant to the act to provide that when an environmental impact statement has been, or will be, prepared for the same project pursuant to federal law, all or part of that statement may be submitted in lieu of an environmental impact report prepared under the act, if the requirements of the act are met.

This bill would, until January 1, 2001, authorize the lead agency to utilize an environmental impact statement prepared pursuant to federal law as the environmental impact report for a federal military base reuse plan, as defined, if specified conditions are met. The bill would make related declarations of legislative intent.

The bill would provide that it shall become operative only if AB 3774 is also enacted and takes effect on or before January 1, 1995.

Ch. 863 (AB 3456) Harvey. Sex offenders: dismissal of charges: registration.

(1) Existing law requires any person who is convicted of any specified sex offense to register with the chief of police of the city in which the person is domiciled or the sheriff of the county in which the person is domiciled if in an unincorporated area. Any person who is required to register as a sex offender and fails to register is guilty of a misdemeanor.

Existing law also provides that the duty to register for sex offenses adjudicated by a juvenile court shall terminate when a person reaches the age of 25 years.

This bill would delete this provision.

(2) Existing law provides that all records specifically relating to the registration for sex offenses in the custody of the Department of Justice, law enforcement agencies, and other agencies or public officials shall be destroyed when the registrant attains the age of 25 years or has his or her records sealed, as specified, whichever occurs first.

This bill would provide, instead, that the records shall be destroyed when the registrant has his or her records sealed, as specified.

(3) Existing law provides that a person who is convicted of a felony sex offense shall not be relieved from the duty to register under the provisions in (1) above.

This bill would provide, instead, that a person who is convicted of any sex offense for which registration is required under the provisions in (1) above shall not be relieved from the duty to register.

(4) Existing law permits any person who is convicted of a felony, the accusatory pleading of which has been dismissed, and who has not been incarcerated since the dismissal of the accusatory pleading, who is not on probation for the commission of any other felony, and who presents satisfactory evidence of a 3-year residence in California,

NOTE: Superior numbers appear as a separate section at the end of the digests.

to file a petition for a certificate of rehabilitation and pardon.

This bill would provide, in addition, that the above provision applies to any person who is convicted of a misdemeanor violation of any specified sex offense, the accusatory pleading of which has been dismissed, and who meets all of the above specified conditions.

Existing law also provides that the above provision shall not apply to any person who is convicted of a misdemeanor.

This bill would repeal this provision.

(5) This bill would incorporate some of the changes made to Section 290 of the Penal Code proposed by AB 1211, AB 2500, and AB 3513, to be operative only if this bill and one or a combination of any or all of the other bills are enacted and become operative on January 1, 1995, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

To the extent that this bill would impose additional responsibilities on local law enforcement officials, it would impose a state-mandated local program.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 864 (AB 1211) Rainey. Sex offenders: failure to register: penalties.

Existing law requires a person convicted in, among other things, any federal or military court in any state of certain enumerated sex offenses to register with law enforcement officials, as specified. Existing law makes a failure to register under this provision a misdemeanor punishable by imprisonment in a county jail for 6 months.

This bill would expand these registration requirements to apply to a person convicted of certain other offenses, thereby imposing a state-mandated local program by expanding the scope of a crime.

The bill would further expand these registration requirements to apply to a person convicted of those offenses in any federal or military court, thereby imposing a state-mandated local program by expanding the scope of a crime.

Under existing law, any person who has been convicted of certain sex offenses, including committing lewd and lascivious acts upon a child, who violates these registration provisions is required to serve not less than 90 days nor more than one year in a county jail.

This bill, instead, would provide that any person who has been convicted of certain sex offenses, except committing lewd and lascivious acts upon a child, who violates these registration provisions shall be punished by imprisonment in the state prison for 16 months, or 2 or 3 years, or in a county jail for not less than 90 days nor more than one year. The bill would provide that any person convicted of committing lewd and lascivious acts upon a child, as specified, who violates these registration provisions is guilty of a felony punishable by imprisonment in the state prison for 16 months, or 2 or 3 years.

Existing law provides that any person who has a prior conviction of failing to register under these provisions who subsequently willfully commits the same offense is, upon each subsequent conviction, guilty of a misdemeanor or a felony.

This bill, instead, would make a failure to register under this provision a felony. This bill would require a person who, after being discharged from parole, is convicted of a felony under this provision, to complete parole of at least one year. This bill would provide that a person convicted of a felony violation of this provision shall not be granted probation except in the unusual case where the interests of justice would best be served.

Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish proce-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

dures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 865 (AB 3513) Umberg. Sex offenders: registration.

(1) Existing law specifies registration requirements for specified sex offenders.

This bill would revise these provisions to, among other things, specify that registration requirements for certain sex offenders shall be for life while residing in California, add to the list of sex offenses to which these registration provisions apply, extend registration requirements to anyone ordered by any court to register under these provisions for any offense not included specifically in these provisions if the court finds the person committed the offense as a result of sexual compulsion or for purposes of sexual gratification, require the registrant, after initial registration, to annually, within 10 days of his or her birthday, verify his or her address on a form as required by the Department of Justice, and require the registrant to submit his or her vehicle license plate number, if any, as specified.

(2) Existing law makes a violation of these provisions relating to registering of sex offenders a misdemeanor.

This bill would provide, instead, that a person who is required to register under these provisions based on a misdemeanor conviction who willfully violates these provisions is guilty of a misdemeanor punishable by imprisonment in a county jail for not more than one year. The bill would provide that a person required to register under these provisions based on a felony conviction who willfully violates these provisions is guilty of a felony.

(3) Because this bill would add to the list of sex offenses to which these registration provisions apply, it would create new crimes and the bill would expand the duties of local law enforcement agencies with regard to the registration of additional persons, thereby imposing a state-mandated local program.

(4) This bill would incorporate some of the changes in Section 290 of the Penal Code proposed by AB 1211, AB 2500, or AB 3456, or any combination thereof, to be operative only if AB 1211, AB 2500, or AB 3456, or any combination thereof, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 866 (AB 304) Conroy. Sex offenders: fines: DNA.

(1) Under existing law, any person who is required to register as a sex offender shall, prior to discharge, parole, the granting of probation, or release, provide two specimens of blood and a saliva sample, as specified, for analysis of deoxyribonucleic acid (DNA) and other genetic typing analysis at the Department of Justice's DNA laboratory.

This bill would require the Department of Corrections to provide samples of blood and saliva taken from specified prison inmates to the county in which the prison inmate is to be released if the county maintains a local DNA testing laboratory.

(2) Existing law provides that every person convicted of any specified sex offense shall, in addition to any imprisonment or fine, or both, imposed for violation of the underlying offense, be punished by a $100 fine upon the 1st conviction or a $200 fine upon the 2nd and each subsequent conviction, unless as specified.

This bill would, instead, provide that any person who is convicted of any specified sex offense shall, in addition to any imprisonment or fine, or both, imposed for violation of the underlying offense, be punished by a $200 fine upon the 1st conviction or a $300 fine upon the 2nd and each subsequent conviction, unless as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law provides for all funds collected pursuant to (2) above to be deposited in the Department of Justice Sexual Habitual Offender Fund for the purposes of the Statewide Sexual Habitual Offender Program and the Serious Habitual Offender Program.

This bill would provide that out of the funds collected pursuant to (2) above as a result of 2nd and subsequent convictions, ⅓ shall first be transferred to the Department of Justice Sexual Habitual Offender Fund. The bill also would provide that out of the remainder of all funds collected pursuant to (2) above, 50% shall be transferred to the Department of Justice Sexual Habitual Offender Fund, 25% shall be transferred to the Department of Justice DNA Testing Fund for the exclusive purpose of testing DNA samples for law enforcement purposes, and 25% shall be allocated equally to counties that maintain a local DNA testing laboratory for the exclusive purpose of testing DNA samples for law enforcement purposes.

(4) This bill would incorporate additional changes in Section 290.3 of the Penal Code, proposed by AB 2500, to be operative only if AB 2500 and this bill are both enacted and become effective on January 1, 1995, and this bill is enacted last.

Ch. 867 (AB 2500) Alby. Sex offenders: registration.

(1) Existing law requires specified sex offenders to register, as specified, within 14 days of coming into any county, city, or city and county in which he or she temporarily resides or is domiciled for that length of time. A violation of the provisions relating to registering of sex offenders is a misdemeanor. Existing law also provides that the information obtained as a result of this registration shall not be open to inspection by the public or any person other than a regularly employed peace or other law enforcement officer.

This bill, instead, would provide that if the underlying conviction was for enumerated sex offenses relating to minors, certain information obtained as a result of the registration shall be compiled and made available to the public, as specified. This bill would provide specified immunity for persons who photocopy information pursuant to this provision and would establish detailed disclosure guidelines together with specific penalties for unlawful disclosure. This bill also would provide for a 5-year enhancement of the sentence of any person who uses the information contained in a public disclosure authorized by this provision, to commit a felony, and if the information is used to commit a misdemeanor, the bill would provide for a fine, in addition to any other penalty or fine imposed.

This bill, in addition, would require the Department of Justice to operate on and after July 1, 1995, a "900" telephone number program for purposes of making information available to the public pursuant to these provisions. The department would be required to submit to the Legislature an annual report, commencing July 1, 1996, on the operation of the "900" telephone number program, which would be terminated on January 1, 1999.

The bill would provide that income received from the operation of the "900" telephone number program shall be deposited in the Sexual Predator Public Information Account, which the bill would establish. Moneys in the account would be available to the Department of Justice upon appropriation by the Legislature for the program, subject to an annual expenditure limit of $600,000.

The bill would transfer $500,000 from a special account used by the Department of Justice to the Sexual Predator Public Information Account as a loan, and would appropriate this amount from the account for the program.

(2) Existing law requires any person who, on or after January 1, 1986, is discharged or paroled from the Department of the Youth Authority to the custody of which he or she was committed, after having been adjudicated a ward of the court because of the commission or attempted commission of specified offenses, to register pursuant to these provisions.

This bill, in addition, would require any person who is discharged or paroled from a facility in another state that is equivalent to the Department of the Youth Authority, as specified, to the custody of which he or she was committed because of the commission or attempted commission of specified sex offenses, to register pursuant to these provisions. This bill also would provide that a violation of these provisions regarding registra-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion of sex offenders shall be a misdemeanor or felony, depending upon the number of prior convictions. Because this bill would expand the scope of a crime by making it a crime for additional persons to fail to register, it would impose a state-mandated local program.

(3) Existing law authorizes the court to impose a fine, as specified, upon every person convicted of a violation of specified offenses that makes a person subject to registration as a sex offender.

This bill, in addition, would authorize the Department of Corrections or the Department of the Youth Authority to collect this fine if a conviction of the underlying offense results in incarceration in a facility under the jurisdiction of the Department of Corrections or the Department of the Youth Authority.

(4) This bill would incorporate some of the changes in Section 290 of the Penal Code proposed by AB 1211, AB 3456, or AB 3513, or any combination thereof, to be operative only if this bill and one or any combination of the other bills are enacted and become effective on January 1, 1995, and this bill is enacted last.

(5) This bill would incorporate additional changes in Section 290.3 of the Penal Code proposed by AB 304, to be operative only if AB 304 and this bill are both enacted and become effective on January 1, 1995, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) The bill would specify that it shall become operative only if AB 3026 is enacted and becomes effective.

Ch. 868 (SB 254) Kopp. Attorneys: professional conduct.

Under existing law, the Board of Governors of the State Bar, with the approval of the Supreme Court, may formulate rules of professional conduct. Existing rules, among other things, prohibit a lawyer connected with a case from communicating with the jury venire.

This bill would provide that the State Bar of California shall submit to the Supreme Court for approval a rule of professional conduct governing trial publicity and extrajudicial statements made by attorneys concerning adjudicative proceedings. The bill would also state legislative findings and intent.

Ch. 869 (SB 1999) Kopp. Trials.

(1) Under existing law, any person who tampers with a jury list is guilty of a felony.

This bill would provide that a person is guilty of tampering with a jury when, prior to, or within 90 days of, the discharge of the jury in a criminal proceeding, he or she commits any specified act. Because it also would provide that a violation of these provisions is a misdemeanor, the bill would impose a state-mandated local program by creating a new crime.

The bill also would provide that in the case of a juror who is within 90 days of having been discharged, otherwise lawful compensation not exceeding $50 in value shall not constitute a criminal violation of the above provisions.

The bill would further require any compensation received in violation of the above provisions to be forfeited by the defendant and deposited in the Victim Restitution Fund.

(2) Existing law requires the court, at each adjournment of the court before the submission of the cause to the jury, to admonish the jury that it is their duty not to converse among themselves, or with anyone else, on any subject connected with the trial, or to form or express any opinion thereon until the cause is finally submitted to them.

This bill would additionally require the court to instruct the jury generally concerning its basic functions, duties, and conduct after it has been sworn and before the people's opening address. The instructions would be required to include, among other matters, the admonition that prior to discharge, they may not request, accept, agree to accept,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

or discuss with any person receiving or accepting, any payment or benefit in consideration for supplying any information concerning the trial.

(3) Existing law prohibits practicing any fraud or deceit, or knowingly making or exhibiting any false statement, representation, token, or writing, to any witness or person about to be called as a witness upon any trial, proceeding, inquiry, or investigation authorized by law with the intent to affect the testimony of the witness.

This bill would prohibit a person from accepting or receiving, directly or indirectly, any payment or benefit in consideration for providing information obtained as result of witnessing an event or occurrence that he or she knows, or reasonably should know, is a crime or having personal knowledge of facts that he or she knows, or reasonably should know, may require that person to be called as a witness in a criminal prosecution. A violation of this provision would be a misdemeanor. Because this bill would create a new crime, it would impose a state-mandated local program.

The bill also would require any compensation received in violation of the above provisions to be forfeited by the defendant and deposited in the Victim Restitution Fund.

(4) Existing law specifies those contracts that are void as against the policy of the law.

This bill would provide that a contract that violates the provisions in (3) above is void as contrary to public policy, and would authorize the Attorney General or a district attorney to enjoin its enforcement, as specified.

(5) The bill would provide that its provisions are severable.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 870 (AB 501) W. Brown. Criminal procedure: witnesses and jurors.

Existing law prohibits practicing any fraud or deceit, or knowingly making or exhibiting any false statement, representation, token, or writing, to any witness or person about to be called as a witness upon any trial, proceeding, inquiry, or investigation authorized by law with the intent to affect the testimony of the witness.

This bill would contain legislative findings and declarations and would prohibit a person from accepting or receiving, directly or indirectly, any money or its equivalent in consideration for providing information obtained as a result of witnessing an event or occurrence that he or she knows is a crime or having personal knowledge of facts that he or she knows or reasonably should know may require that person to be called as a witness in a criminal prosecution. A violation of this provision would be a misdemeanor. Because this bill would create a new crime, it would impose a state-mandated local program.

The bill also would prohibit any witness to an event or occurrence, as specified, from accepting or receiving any money or its equivalent for providing information obtained as a result of witnessing the event or occurrence, and would authorize the Attorney General or the district attorney to institute a civil proceeding in response to an alleged violation of those provisions.

Existing law requires the court to admonish the jury at each adjournment of the court before the submission of the cause to the jury that it is their duty not to converse among themselves or with anyone else on any subject connected with the trial, or to form or express any opinion thereon until the cause is finally submitted to them.

This bill would, in addition, authorize the court, in its discretion, to admonish the jury that, prior to discharge, they may not accept, agree to accept, or benefit from any payment or other consideration for supplying any information concerning the trial.

The bill would further provide that its provisions are severable.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 871 (SB 1278) Hart. Domestic violence: protective orders.

(1) Existing law requires a local law enforcement agency, upon receipt of a domestic violence protective order, to immediately notify the Department of Justice of specified information pertaining to the order. Under this provision, the failure of the petitioner to provide the department with certain information does not invalidate the protective order.

This bill would revise these provisions to specify that the failure of the local law enforcement agency to provide the department with the personal descriptive information does not invalidate the protective order, and to revise a provision governing immunity of employees of local law enforcement agencies and the department to make that provision conform to the following provisions of the bill. This bill would provide that the changes made to these provisions would not become effective if AB 3034 is enacted and amends Section 6385 of the Family Code.

(2) Existing law makes it a public offense, punishable as specified, for any person who knows that he or she is subject to a domestic violence protective order to purchase or receive, or attempt to purchase or receive, a firearm, as specified, or to willfully and knowingly violate such a protective order.

This bill would prohibit a person subject to a protective order from owning or possessing a firearm while the protective order is in effect when prohibited by an order issued under the bill, and would authorize the court to order the person, upon a certain determination by the court, to relinquish any firearm he or she owns or possesses, except as specified. It would require all such orders to prohibit the person from possessing or controlling any firearm for the duration of the order, except as specified. The bill would require the order to relinquish the firearm to state on its face, among other things, that the firearm shall be relinquished to the local law enforcement agency for that jurisdiction, which would be authorized to charge a specified fee for storage of the firearm, or sold to a licensed gun dealer. This bill would specify procedures for the sale of firearms pursuant to these provisions. A violation of any such order would be a misdemeanor. The bill would impose a state-mandated local program by creating a new crime. The bill would also impose a state-mandated local program by requiring a local law enforcement agency to determine whether a surrendered firearm is stolen or the respondent is prohibited from possessing a firearm. The bill would require the Judicial Council to provide a specified notice on all forms requesting a protective order.

(3) Existing law requires a court to allow reasonable attorney's fees to a prevailing party in any civil action or proceeding for the return of a firearm or ammunition or other deadly weapon seized by any state or local law enforcement agency and not returned within 72 hours of the seizure.

This bill would provide an exception from recovery of such fees when a law enforcement agency initiates a petition in superior court to determine if the firearm or other deadly weapon should be returned.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Moreover, the bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for other costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for those other costs.

Ch. 872 (AB 3034) Solis. Domestic violence: statewide registry.

Under existing law, the court is required to order the petitioner or his or her attorney to deliver, or the county clerk to mail, a copy of a domestic violence protective order, or an extension, modification, or termination of an order, to each local law enforcement agency designated as having jurisdiction over the matter. Existing law requires each local law enforcement agency to notify the Department of Justice of certain information

NOTE: Superior numbers appear as a separate section at the end of the digests.

when it receives a copy of a protective order.

This bill would revise these provisions, and would require each county to develop a specified procedure, upon the issuance of a protective order, for immediately notifying the Department of Justice of the contents of the order and other specified information, by electronic transmission, thereby imposing a state-mandated local program. The bill would require the Department of Justice to maintain a Domestic Violence Protective Order Registry, and to make available to court clerks and law enforcement personnel, through computer access, specified information regarding protective orders. The bill would require the Judicial Council to develop informational packets describing general procedures for obtaining a domestic violence restraining order indicating the appropriate Judicial Council forms, and including other specified information.

The bill would require law enforcement officers to verify the existence of a protective order through the registry upon receiving information at the scene of a domestic violence incident that an order has been issued or that a person in custody is restrained by an order, if the protected person cannot produce a certified copy of the order. The bill would require law enforcement officers to verbally notify the respondent of the terms of the order if the officer determines that a protective order was issued but not served, and upon service of the order, to notify the respondent to obtain from the court a copy of the order containing the full terms and conditions.

The bill would require local law enforcement agencies or the court to notify the Department of Justice, by electronic transmission, of certain information regarding protective orders. The bill would extend a specified immunity provided for law enforcement agency employees and department employees to court employees.

Existing law authorizes designated peace officers who are at the scene of a family violence incident involving a threat to human life or a physical assault to take temporary custody of any firearm or other deadly weapon in plain sight or discovered under a consensual search as necessary for the protection of the peace officer or other persons present.

This bill would include a member of the California Highway Patrol among the designated peace officers under this provision.

Existing law authorizes the Department of Justice to charge a dealer in firearms a fee sufficient to reimburse costs to the department with respect to the department's examination and determination that the purchaser or transferee is not a person prohibited from owning or possessing a firearm, as specified. The money received by the department under this provision is deposited in the Dealers' Record of Sale Special Account of the General Fund, and upon appropriation is available for expenditure by the department to offset specified costs.

This bill would appropriate $250,000 from the Dealers' Record of Sale Special Account to the department for purposes of this bill, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 873 (SB 739) Bergeson. Domestic violence.

(1) Existing law provides that any person who willfully inflicts upon his or her spouse, any person of the opposite sex with whom he or she is cohabiting, or any person who is the mother or father of his or her child, corporal injury resulting in a traumatic condition, is guilty of a felony, punishable by imprisonment in the state prison for 2, 3, or 4 years, or in a county jail for not more than one year, or by a fine of up to $6,000, or by both the imprisonment and fine.

This bill would provide that any person convicted of that felony within 7 years of a previous conviction for specified assaults if the victim of the prior offense is a person

NOTE: Superior numbers appear as a separate section at the end of the digests.

designated under (1) above, shall be punished by imprisonment in a county jail for not more than one year or by imprisonment in the state prison for 2, 4, or 5 years, or by both imprisonment and a fine of up to $10,000.

(2) Existing law provides that the willful and knowing violation of any of specified temporary restraining orders is a misdemeanor punishable by a fine of not more than $1,000, or by imprisonment in a county jail for not more than one year, or by both the fine and imprisonment.

Existing law also provides that in the case of a violation of this provision which results in a physical injury, the offender shall be imprisoned in the county jail for at least 48 hours, whether a fine or imprisonment is imposed or the sentence is suspended.

This bill would limit these provisions to specified court orders. The bill would provide that a subsequent conviction for an act in violation of a specified order and occurring within 7 years of a prior conviction for a violation of a similar order and involving an act of violence or a "credible threat" of violence, as defined, would be punishable by imprisonment in a county jail not to exceed one year, or in the state prison. A subsequent conviction for an act in violation of an order, which occurs within one year of the prior conviction, and which results in physical injury to the same victim would be punishable by a fine of up to $2,000, by imprisonment in a county jail for not less than 6 months nor more than one year, by both that fine and imprisonment, or by imprisonment in the state prison.

The bill would also provide that if the person is imprisoned in a county jail for at least 48 hours, the 30-day minimum imprisonment may be reduced or eliminated, as specified. The bill would authorize the court to reduce or eliminate the 6-month minimum imprisonment, as specified. The bill would also authorize the court to order a person convicted of violating these provisions to undergo counseling and, if appropriate, to complete a batterer's treatment program.

This bill would impose a state-mandated local program by changing the definition of, and penalty for, a crime.

(3) Existing law provides, among other things, that any person who, with the intent to inflict such injury, personally inflicts great bodily injury on any person other than an accomplice in the commission or attempted commission of a felony shall, in addition and consecutive to the punishment prescribed for the felony or attempted felony of which he or she has been convicted, be punished by a additional term of 3 years, unless infliction of great bodily injury is an element of the offense for which he or she is convicted.

This bill would require that any person who commits the above offense under circumstances involving domestic violence, as defined, be punished by an additional term of 3, 4, or 5 years, to be imposed as specified.

(4) The bill would recommend that the Judicial Council revise a specified court rule regarding circumstances in aggravation of a crime.

(5) This bill would incorporate additional changes in Section 273.6 of the Penal Code proposed by AB 68 (1st Ex. Sess.) or AB 93 (1st Ex. Sess.), or both, to be operative only if AB 68, or AB 93, or both, and this bill are enacted and become effective as specified, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 874 (AB 2701) Costa. Child pornography: commercial consideration.

Existing law provides that every person who knowingly sends or causes to be sent, or brings or causes to be brought, into this state for sale or distribution, or in this state possesses, prepares, publishes, develops, duplicates, or prints, with intent to distribute or to exhibit to, or to exchange with, others for commercial consideration, or who offers to distribute, distributes, or exhibits to, or exchanges with, others for commercial consideration, any obscene matter, knowing that the matter depicts a person under the age of 18 years personally engaging in or personally simulating sexual conduct, as defined,

NOTE: Superior numbers appear as a separate section at the end of the digests.

is guilty of a felony and shall be punished, as specified.

This bill would, in addition, make the above offense a felony or misdemeanor where the element of commercial consideration is absent. This bill would impose a state-mandated local program upon local governments by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 875 (AB 3026) Bowen. Department of Justice: state fingerprint identification system.

Under existing law, the Department of Justice is required to maintain specified information and statistics.

This bill would require that all statewide automated fingerprint identification systems be maintained by the department and would provide that information contained in these systems shall be released to all state agencies only on a need-to-know basis, as specified.

Ch. 876 (AB 3273) Umberg. Sexual assault of children.

(1) Under existing law, the Department of Justice is authorized to create and administer a statewide task force with authority to study and develop recommendations for the Legislature relating to pedophiles and the Office of Criminal Justice Planning is authorized to secure grants, donations, or other funding for the purpose of funding any statewide task force on sexual assault of children that may be established and administered by the Department of Justice.

This bill would instead require the department to create and administer a statewide Special Unit on Child Exploitation and Assault to take a proactive role in the investigation and prosecution of preferential child molesters and sexual exploiters. The bill would define preferential child molesters.

This bill would authorize the department to cooperate with other law enforcement agencies with expertise in this area.

(2) Existing law provides that funding for the task force shall be subject to the availability of grants or donations from private individuals and groups, and that no state money may be used in the implementation of this task force.

This bill would delete the limitation on the use of state money for the implementation of the statewide unit.

(3) SB 12 of the 1993–94 First Extraordinary Session would require the Attorney General to establish and maintain a statewide Sexual Habitual Offender Program special force comprised of 3 special agent teams.

This bill would require these special agent teams to take a proactive role in the investigation and prosecution of preferential child molesters and sexual exploiters. This provision would become operative only if SB 12 of the 1993–94 First Extraordinary Session is enacted and becomes operative on or before January 1, 1995, in which case the Department of Justice would not be required to create and administer a statewide Special Unit on Child Exploitation and Assault as proposed in (1) above.

Ch. 877 (AB 3405) Umberg. Missing and Exploited Children's Recovery Network.

Existing law requires the Attorney General to establish and maintain the Violent Crime Information Center to, among other things, assist in the identification and the apprehension of persons responsible for the disappearance and exploitation of children and to establish and maintain an automated computer system for response to reports of missing persons.

This bill would require the Attorney General to establish, by July 1, 1995, within the Department of Justice, the Missing and Exploited Children's Recovery Network consisting of an automated computerized system to transmit to law enforcement agencies and cooperating news media services specified information on missing children. The bill would require the department to cooperate with the National Center for Missing and

NOTE: Superior numbers appear as a separate section at the end of the digests.

Exploited Children, as specified.

Ch. 878 (AB 3707) Boland. Sex offenses.

Existing law prescribes penalties for specified sex offenses, including sex offenses committed upon a child.

This bill would provide that any person who commits any specified sex offenses upon a child who is under 14 years of age and 10 or more years younger than the person is guilty of aggravated sexual assault of a child and shall be punished by imprisonment in the state prison for 15 years to life.

Ch. 879 (SB 65) McCorquodale. Judges' Retirement System II.

The Judges' Retirement Law prescribes the retirement benefits of judges under a defined benefit type of retirement plan and provides that the Legislature finds and declares that on and after January 1, 2002, the Judges' Retirement System shall be fully funded and actuarially sound.

This bill would repeal the legislative finding and declaration and would establish the Judges' Retirement System II Law which would include alternative defined benefit and defined contribution type retirement plan benefits. The bill would prescribe retirement, disability, and death benefits for judges who are first elected or appointed to judicial office on and after November 9, 1994, would establish the Judges' Retirement System II Fund, and would require specified state and member contributions to the fund, which would be continuously appropriated for the purposes of the system. The provisions of the bill would become operative on November 9, 1994.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 880 (AB 1551) Epple. Rewards.

Under existing law, the Governor may offer a reward of not more than $50,000 for information leading to the arrest and conviction of persons who have committed any one of several specified crimes. These crimes include assaulting or causing death or serious bodily harm to a police officer who is acting in the line of duty, and the burning or bombing of public property.

This bill would add to the list of persons for whose arrest and conviction the Governor may offer a reward to any person who attempts to murder either in the first or 2nd degree a peace officer or firefighter who is acting in the line of duty, and any person who has committed a crime involving the burning or bombing of private property.

This bill would incorporate additional changes in Section 1547 of the Penal Code proposed by SB 43 (1st Ex. Sess.), to be operative only if SB 43 (1st Ex. Sess.) and this bill are chaptered, this bill becomes effective on or before January 1, 1995, SB 43 (1st Ex. Sess.) becomes effective, as specified, and this bill is chaptered last.

Because this bill would authorize the expenditure of funds from the General Fund, it would make an appropriation.

Ch. 881 (AB 1209) Tucker. Horseracing: allocation of racing weeks; official veterinarian: treatment of horses within a racing inclosure.

(1) Existing law provides that an association licensed to conduct a racing meeting in the southern zone may operate a satellite wagering facility at a location approved by the California Horse Racing Board if the location is eligible to be used as a satellite wagering facility during any of specified periods.

This bill would delete that provision.

(2) Existing regulations adopted by the California Horse Racing Board provide for an official veterinarian whose duty it is to supervise practicing licensed veterinarians at horserace meetings, and to enforce the board's rules and regulations relating to veterinary practices.

This bill would require every veterinarian who treats a horse within a racing inclosure to report to the official veterinarian in a manner prescribed by him or her, in writing and on a form prescribed by the board, the name of the horse treated, the name of the trainer of the horse, the time of treatment, any medication administered to the horse, and any other information requested by the official veterinarian.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 882 (AB 1327) Epple. Minors.

(1) Existing law limits the amount a person who petitions for a change of plea, a setting aside of a verdict, or an order sealing a record, as specified, may be required to reimburse a county or a city for the cost of services in an amount not to exceed $60.

This bill would revise that limitation to apply to the actual costs involved, not to exceed $120, whether or not the petition is granted.

(2) Existing law provides that a parent of a minor, or the estate of the parent or the minor, shall be liable for the reasonable costs of support of the minor when the minor is placed, detained, or committed to any institution.

This bill would revise that provision to provide that the father, mother, spouse, or other person liable for the support of the minor, or the estate of that person, shall be liable for those costs.

(3) Existing law provides that the father, mother, spouse, or other person liable for the support of a minor, or the person himself or herself if he or she is an adult, or the estates of those persons shall, unless indigent, be liable for the cost to the county for the sealing of any traffic infraction or traffic misdemeanor records, as specified.

This bill would expand that provision to make it applicable to any juvenile court or arrest records, and to the cost of any investigation related to the sealing of those records. It also would provide for the liability of those persons, or their estates, with respect to specified costs involved in a petition to seal a record, not to exceed $120, whether or not the petition is granted, unless the court determines the person is unable to pay, as specified.

(4) The bill would also authorize any state or local agency so qualified under federal law to apply for federal funds under the Violent Crime Control and Law Enforcement Act of 1994, as specified.

(5) This bill would incorporate additional changes in Section 1203.4 of the Penal Code proposed by AB 3456, contingent upon the prior enactment of that bill.

(6) This bill would also incorporate additional changes in Section 903 of the Welfare and Institutions Code proposed by AB 2208, contingent upon the prior enactment of that bill.

Ch. 883 (AB 2003) Bornstein. Housing: local housing programs.

Under existing law, any city or county may administer a home financing program to acquire, contract, and enter into advance commitments to acquire, home mortgages made or owned by lending institutions at the purchase prices and upon other terms and conditions as determined by the city or county. Existing law specifies eligibility criteria for qualification of persons and families under the program, including a maximum household income not exceeding, among other things, the median household income where the purchaser will not be the first occupant.

This bill would revise that specific criterion to instead not exceed 120% of the median household income for mortgages where the purchaser will not be the first occupant.

Ch. 884 (AB 2607) Hauser. Economic development: small cities: block grants.

(1) Under existing law governing the Small Cities Community Development Block Grant Program, the Department of Housing and Community Development is required to distribute federal funds in the form of grants to eligible cities and counties to provide housing and economic development, principally for persons and families of low or moderate income. Existing law imposes on each program applicant a yearly maximum grant request ceiling of $800,000 of which $500,000 may be used for either a general program or economic development application.

Existing law provides that no applicant may receive more than $1,200,000 in any 2 consecutive calendar years.

This bill would delete that limitation.

(2) Existing law requires that 10% of the total amount of the program funds set aside in the annual budget for economic development be allocated to make economic development assistance grants to eligible small cities for various specified economic development activities. The maximum grant per application is $30,000 per project.

This bill would raise that limit to $35,000, but would prohibit grants in excess of $35,000

NOTE: Superior numbers appear as a separate section at the end of the digests.

to one applicant in any one year. This bill, by continuously appropriating any unexpended funds in the following year, would make an appropriation. The bill would permit 2 or more jurisdictions to pool their funds and make a joint application for the same project. The bill would make other changes governing the eligibility for and administration of those federal funds.

Ch. 885 (AB 2770) Cortese. Common interest developments: reserve funds.

Existing law requires the association managing a common interest development to prepare a pro forma operating budget that includes certain information regarding defined reserve accounts. Existing law prohibits the association's board of directors from expending reserve funds for any purpose other than those specified by law, but authorizes the board to temporarily transfer reserve funds to the general operating fund to meet short-term cash-flow requirements or other expenses. Existing law requires the board to restore these funds within 3 years, unless the board delays the restoration based on a specified finding. Existing law authorizes a board to levy a special assessment to recover the full amount of the expended funds. Existing law restricts the imposition of a special assessment without approval of the owners, as specified. Under existing law, a special assessment levied to recover expended reserve funds is not subject to these restrictions.

This bill would authorize the temporary transfer of reserve funds to the general operating fund to meet short-term cash-flow requirements or other expenses only if the board has made a written finding, recorded in the board's minutes, explaining the reasons that the transfer is needed and describing when and how the money will be repaid to the reserve fund. The bill would require the board to restore reserve funds within one year, and would require any delay in restoring the reserve funds to be temporary. The bill would provide that a special assessment levied to recover expended reserve funds is subject to the restrictions described above, including the requirement of owner approval, unless the special assessment is to pay prescribed legal costs. The bill would authorize the board to extend the date of payment of the special assessment but would provide that any extension shall not prevent the board from pursuing any legal remedy to enforce the collection of an unpaid special assessment.

This bill would require the association to provide a prescribed notice to association members when a decision is made to use reserve funds or temporarily transfer money from the reserve fund for litigation and to make an accounting of expenses related to the litigation, as specified.

Ch. 886 (AB 2788) W. Brown. Public safety services: funding.

The California Constitution imposes a tax at a rate of ½ of 1% on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. The revenue from the tax is allocated to counties, as specified, for allocation to the county and the cities therein to use exclusively for public safety services, which include, but are not limited to, sheriffs, police, fire protection, county district attorneys, county corrections, and ocean lifeguards.

This bill would provide, as specified, commencing with the 1994–95 fiscal year, that the amount of these revenues allocated to any county, city and county, or city, including a charter city, that funds combined public safety services within its jurisdiction in an amount that is less than the amount of funding for those services in the 1992–93 fiscal year, as adjusted, be reduced by the difference between those 2 amounts. By imposing new duties in the allocation of sales and use tax revenues to cities and counties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,-

NOTE: Superior numbers appear as a separate section at the end of the digests.

000, shall be made from the State Mandates Claims Fund.

Ch. 887 (AB 2957) Klehs. Physician emergency services: Alameda County.

Existing law provides for the California Healthcare for Indigents Program, which is operative until July 1, 1994, and repealed on January 1, 1995, for the allocation of money from various accounts in the Cigarette and Tobacco Products Surtax Fund to the counties for the provision of health care services to eligible persons.

Existing law, operative until July 1, 1994, and repealed on January 1, 1995, also requires each county to establish within its emergency medical fund a Physicians Services Account and to deposit into that account funds appropriated by the Legislature for the purposes of that account. Authorized uses for the account include reimbursement of physicians for losses incurred for services provided to indigents during the fiscal year of allocation, with specified limitations.

This bill would, until January 1, 1996, exempt Alameda County from those limitations with respect to the use of unexpended 1990–91 and 1991–92 fiscal year funds for expenses incurred for the development of managed care systems to increase access for indigents to physician emergency services, up to a maximum of $850,000.

Ch. 888 (AB 3269) B. Friedman. Retail installment contracts: home improvement business: security interests in real property.

Existing provisions of the Contractors' State License Law regulate home improvement salespersons. Existing law makes it a misdemeanor to act as a home improvement salesperson, as specified, without being registered.

This bill would provide that any security interest taken by a contractor, to secure any payment for the performance of any act or conduct relating to home improvement, as defined, that occurs on or after January 1, 1995, is unenforceable if the person soliciting the act or contract was not a duly registered salesperson or was not exempt from registration at the time the homeowner signs the home improvement contract solicited by the salesperson.

Under existing law, every retail installment contract that provides for a security interest in real property is required to be contained in a single document that states, among other things, certain warnings, as specified.

This bill would revise these warnings and the position at which they appear in the contract, to be operative October 1, 1995.

Ch. 889 (AB 3306) Takasugi. State employees.

The Public Employees' Retirement Law prescribes increased death and disability benefits for specified state miscellaneous members injured at certain state hospitals.

This bill would include state miscellaneous members employed at Metropolitan State Hospital and Napa State Hospital in those benefits.

Ch. 890 (AB 3542) Richter. State lottery.

The California State Lottery Act of 1984 provides, among other things, that the right of any person to a prize shall not be assignable, except that payment of any prize may be paid to a trust established for the benefit of that person, to the estate of a deceased prizewinner, or to a person designated pursuant to an appropriate judicial order.

This bill, instead, would provide that the right of any person to a prize shall not be assignable except that the payment of any prize may be paid to another person, paid to a person designated pursuant to an appropriate judicial order, or assigned as collateral for an obligation owed to another person, as specified.

The California State Lottery Act of 1984, an initiative measure, specifies that none of its provisions may be changed except to further its purpose by a bill passed by a ⅔ vote of each house of the Legislature and signed by the Governor.

This bill would declare that it furthers the purposes of the act and would require a ⅔ vote.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 891 (AB 3567) Bornstein. Intercity rail: funding.

Existing law establishes a state transportation funding plan for the expenditure, during the 10-year period from July 1, 1990, to June 30, 2000, of new revenues resulting from the enactment of transportation revenue measures in 1989. That plan calls for the expenditure of $3,000,000,000 for intercity rail, commuter rail, and urban rail transit, and specifies the eligible rail corridors within each category.

This bill would include the Los Angeles-Fullerton-Riverside-Coachella Valley-Calexico corridor among the eligible intercity rail corridors.

Ch. 892 (AB 2601) Johnson. Insurance Commissioner: investigation of complaints.

Under existing law, the Insurance Commissioner is required to establish a program to investigate complaints and respond to inquiries, and when warranted, to bring enforcement actions against insurers, as specified.

Existing law specifies guidelines relative to the dissemination of complaint and enforcement information on individual insurers to the public, including the ratio of complaints received to total policies in force, or premium dollars paid in a given line, or both.

This bill would require that private passenger automobile insurance ratios be calculated as the number of complaints received to total car years earned in the period studied.

This bill would require the commissioner to promulgate a regulation that sets forth the criteria that the department shall apply to determine if a complaint is deemed to be justified prior to the public release of a complaint against a specifically named insurer.

This bill would also require the commissioner to provide to the insurer a description of any complaint against the insurer that the commissioner has received and has deemed to be justified at least 30 days prior to public release of a report, as specified.

This bill would also require an insurer to provide information to the Department of Insurance regarding a person who the insurer designates to receive complaints, as specified.

This bill would state legislative intent regarding the codification of the department's complaint procedure.

Ch. 893 (AB 3586) O'Connell. Insurance Commissioner: investigation of complaints.

Under existing law, the Insurance Commissioner is required to establish a program to investigate complaints and respond to inquiries, and when warranted, to bring enforcement actions against insurers, as specified. This program includes guidelines to disseminate complaint and enforcement information on individual insurers to the public, including the ratio of complaints received to total policies in force, or premium dollars paid in a given line, or both.

This bill would require that private passenger automobile insurance ratios be calculated as the number of complaints received to total car years earned in the period studied.

This bill would incorporate additional amendments to Section 12921.1 of the Insurance Code proposed by AB 2601, contingent upon the prior enactment of that bill.

Ch. 894 (AB 3642) Rainey. Vehicles: forfeiture.

Existing law authorizes, until January 1, 1999, specified cities, counties, and portions of cities to adopt an ordinance establishing a 5-year pilot program implementing procedures for declaring any motor vehicle a public nuisance when used in the commission of an act of prostitution, as specified, and there is a conviction of the underlying offense, except in specified circumstances. Existing law authorizes the ordinance to include procedures, as prescribed, to enjoin and abate the declared nuisance.

This bill would add the County of Alameda, any city in that county, the County of Contra Costa, any city in that county, the County of Sacramento, any city in that county, and the City and County of San Francisco to the list of cities and counties authorized to adopt the specified ordinance.

The bill would also make the above provisions applicable if there is a conviction of a lesser included offense to which a plea is made, as specified.

The bill would add convictions for pimping and pandering, as well as guilty pleas and convictions of lesser included offenses, to the list of prohibited activities that could

NOTE: Superior numbers appear as a separate section at the end of the digests.

qualify the motor vehicle as a public nuisance.

The bill would delete a provision that prohibits, under specified circumstances, declaring a nuisance a vehicle that is owned by a person other than the defendant.

The bill would limit the impoundment to those instances in which the defendant violates the court order prohibiting the use of the vehicle and would limit the duration of the impoundment to a period not to exceed 48 hours.

Ch. 895 (AB 3732) Takasugi. Osteopathic medicine.

Existing law requires the Osteopathic Medical Board of California to require each licensed osteopathic physician and surgeon to demonstrate satisfaction of continuing education requirements as a condition for renewal of a license.

This bill would provide that, commencing January 1, 1995, the board instead require each licensed osteopathic physician and surgeon to complete a minimum of 150 American Osteopathic Association continuing education hours, as defined, during each three-year cycle as a condition for renewal of a license.

Existing law provides that an osteopathic physician's and surgeon's certificate expires at midnight on the last day of the birth month of the licensee.

This bill would instead provide that the certificate expires at midnight on the last day of the birth month of the licensee during the second year of a 2-year term, if not renewed on or before that date.

Existing law establishes fees for examinations, taxes, and registration as licensed osteopathic physicians and surgeons and requires these fees to be deposited in the Osteopathic Medical Board of California Contingent Fund, a continuously appropriated fund. Under existing law, the annual tax and registration fee to be set by the board may not exceed $200. Under existing law, the fee for failure to timely pay the annual tax and registration fee is 50% of the renewal fee but not more than $100.

This bill would change the maximum amount for the tax and registration fee to $300, and would change the penalty fee to provide that it may not exceed $150, thereby making an appropriation by increasing the revenues to be deposited in a continuously appropriated fund. It would provide that any and all fees received by the board shall be for the sole purpose of the operation of the board and would require that 80% of the funds received from the increase in tax and registration fees and penalty fees be used solely for the board's enforcement activities. The operative date of these changes would be on the later of, July 1, 1994, or the effective date of this act.

Existing law requires the board to issue an osteopathic physician's and surgeon's certificate on reciprocity to an applicant if he or she meets certain requirements, including, that the applicant hold an unlimited license to engage in the practice of osteopathic medicine in another state whose written licensing examination is recognized and approved by the board to be equivalent in content to that administered in California. Existing law authorizes the board, for these purposes, to recognize as equivalent an examination prepared by the Federation of State Medical Boards provided the applicant has met certain other criteria.

This bill would clarify that the examination prepared by the Federation of State Medical Boards is one examination, along with others, that the board may recognize and approve as equivalent to the California exam.

This bill would provide that, operative July 1, 1999, the provisions providing the increase in fees would be repealed and would reestablish the fee requirements under existing law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 896 (AB 3735) Bornstein. Land use: mobilehome parks: manufactured homes: housing development approval process.

(1) Under existing law, known as the Planning and Zoning Law, counties and cities are prohibited from precluding installation of federally certified manufactured homes on a foundation system, as specified.

This bill would make a technical amendment to this provision by changing a reference to "mobilehome" to a reference to "manufactured home."

(2) Existing law, known as the Manufactured Housing Act, authorizes the Depart-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment of Housing and Community Development to adopt regulations for the construction, maintenance, occupancy, use, and design of manufactured housing communities, as defined. An existing provision of the act excludes from the definition of a manufactured housing community under the act an area or tract of land zoned for agricultural purposes where 2 or more manufactured home lots are rented or leased, held out for rent or lease, or provided as a term or condition of employment to accommodate manufactured homes or mobilehomes used for the purpose of housing fewer than 5 agricultural employees.

This bill would amend the Manufactured Housing Act to exclude such an area or tract of land used for the purpose of housing 12 or fewer, rather than 5, agricultural employees from the definition of manufactured housing community under the act and would also make technical nonsubstantive changes to existing law.

(3) Existing law, known as the Mobilehome Parks Act, generally governs the operation of mobilehome parks, as defined. The Mobilehome Parks Act defines mobilehome parks to exclude land zoned for agricultural purposes where 2 or more mobilehome lots or spaces are rented or leased to accommodate manufactured homes or mobilehomes used for housing less than 5 agricultural employees. The act also defines the terms "recreational vehicle parks" and "temporary recreational vehicle parks" for its purposes.

The bill would specify that, notwithstanding certain provisions of the Mobilehome Parks Act, mobilehomes and recreational vehicles used to house agricultural employees must be maintained in conformity with the requirements of the Mobilehome Parks Act.

This bill would exclude land zoned for agricultural purposes where 2 or more mobilehome lots or spaces are rented or leased, as specified, for housing 12 or fewer agricultural employees from the respective definitions of mobilehome parks, recreational vehicle parks, and temporary recreational vehicle parks for the purposes of the Mobilehome Parks Act.

(4) The existing Planning and Zoning Law prohibits a city, county, or city and county from discriminating against residential developments and emergency shelters based on specified criteria relating to the intended occupants. Existing law defines a residential development as a single family residence or a multifamily residence.

This bill would impose a state-mandated local program by extending this prohibition to other local governmental agencies and by adding additional criteria, as specified, to those upon which discrimination may not be based. The bill would specifically include manufactured homes, as defined, within the definition of "residential development."

(5) Existing law requires local agencies to make specified findings before disapproving or conditionally approving certain housing development projects.

This bill would make specified changes in these findings relating to very low income housing and the housing element of a general plan, respectively.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 897 (AB 3754) Caldera. Parking and business improvement areas: benefit assessments.

Under the Parking and Business Improvement Area Law of 1989, a parking and business improvement area may be established by a city to impose benefit assessments or charges on businesses in the area to fund specified improvements and activities.

This bill would enact a similar law, entitled the Property and Business Improvement District Law of 1994, to supplement previously enacted provisions of law that authorize cities to levy assessments within a business improvement area.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 898 (SB 690) Kopp. Unlawful detainer.

(1) Existing law provides for enforcement of judgments for possession issued in unlawful detainer proceedings by the issuance and execution of a writ of possession.

This bill would, except as to the money portion of a judgment in unlawful detainer proceedings, require enforcement of the writ of possession without delay, notwithstanding notice of the filing by the defendant of bankruptcy proceedings. However, this provision would not apply to mobilehomes, manufactured homes, real property in mobilehome parks, or defined manufactured housing communities.

(2) Existing law provides for the payment of rent to the court or into escrow, as the rent would otherwise become due and payable, during the pendency of an unlawful detainer action, according to a specified procedure.

This bill would, commencing July 1, 1995, establish, until July 1, 1998, a pilot project in courts determined by the Judicial Council, upon approval of the affected courts and the county in which the court is located. Within the pilot project, the plaintiff in specified unlawful detainer actions may demand that the defendant deposit with the court clerk 15 days' prospective rent, calculated as specified, unless the defendant has paid the rent through the month in which the action is filed, provided the plaintiff's complaint contains specified allegations.

The bill would impose a state-mandated local program by requiring court clerks to issue receipts for the above-described deposits and to remit the deposits to the county treasury, and as specified. This bill would provide for a filing fee to be paid by a plaintiff and deposited with the county treasurer for exclusive use by the county and court for the support of the pilot project.

However, no deposit would be required under this bill where the rented premises are subject to an outstanding citation as of the date the complaint is filed for any of specified violations.

The bill would provide that a court shall have discretion to order the defendant to deposit prospective rent with the court clerk if the court finds at a pretrial hearing specified facts regarding the unlawful detainer, based on written declarations and oral testimony presented by the parties, as specified. It would require a court to enter judgment for the plaintiff on the issue of possession of the premises and dismiss any claim for monetary relief without prejudice if the defendant fails to pay the deposit required by the court. However, the defendant would have an opportunity to avoid entry of judgment for possession by making the prospective rent deposit 2 days from the date of the hearing.

The bill would also provide that if at trial the court determines that a breach of the warranty of habitability has occurred, that was not caused by the defendant or his or her guests or invitees, sufficient to diminish the value of the premises in an amount greater that 60% of the rent, and that the defendant had notified the owner of the breach, the court shall order any prospective rent deposited pursuant to the bill returned to the defendant. The obligation to pay specified past rent would be extinguished.

The bill would also provide that any deposits made by the defendant pursuant to these provisions shall be awarded to the party entitled thereto by the trial court, and the defendant shall be given credit to the extent of the deposit against any money judgment ordered against that defendant in a subsequent action.

The bill would exempt mobilehomes, manufactured homes, real property in mobilehome parks, or defined manufactured housing communities from these provisions.

The bill would also require the Judicial Council to adopt specified forms for the purposes of the bill.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 899 (SB 1099) Calderon. Blood products: platelets.

Existing law prohibits engagement in the production of human whole blood derivatives without a license from the State Department of Health Services or the federal

NOTE: Superior numbers appear as a separate section at the end of the digests.

Public Health Service. Under existing law, it is a misdemeanor to use blood obtained from a paid donor in any transfusion, as defined, with certain exceptions. One of these exceptions, applicable after March 15, 1987, and on or before December 31, 1994, authorizes the use of blood platelets secured from donors through the hemapheresis process when certain requirements are satisfied.

This bill would extend until December 31, 2001, the date that the exception applies, and would revise the requirements that must be satisfied for the exception to apply. This bill would require blood banks to report certain information regarding collection of blood platelets from volunteer donors to the department, and would require the department to transmit that information to specified committees of the Legislature.

Under existing law, violation of any of the provisions relating to the licensing of producers and distributors of human whole blood products and derivatives and the regulation of human whole blood products is a misdemeanor.

By revising these provisions, this bill would create new crimes, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 900 (SB 1407) Russell. Dependent children: guardianship.

Under existing law, after receiving and considering the evidence on the proper disposition of a case involving an abused or neglected minor, if the juvenile court finds that the minor is within the jurisdiction of the court, it is authorized to order that services be provided to keep the family together and place the minor and the minor's parent or guardian under the supervision of the probation officer without adjudicating the minor a dependent child of the juvenile court, or to adjudge the minor to be a dependent child of the juvenile court.

This bill would additionally authorize the court to order a legal guardianship and appoint the legal guardian and issue letters of guardianship, in addition to or in lieu of adjudicating the minor a dependent child of the court, if the court determines that a guardianship is in the best interest of the minor, provided the parent and the minor agree to the guardianship. The bill would require the court to advise the parent and the minor that no reunification services will be provided as a result of the establishment of a guardianship. The bill would provide that the proceeding for the appointment or termination of a guardian shall be in the juvenile court.

The bill would provide that the court shall not appoint a person as a legal guardian until a specified assessment is read and considered by the court and reflected in the minutes of the court.

The bill would provide that where a petition to terminate guardianship is granted and no dependency jurisdiction has attached, the probation officer shall make any investigation he or she deems necessary to determine whether the minor may be within the jurisdiction of the juvenile court, as specified in existing law.

The bill would also make conforming changes.

The bill also would incorporate the changes to Section 361.5 of the Welfare and Institutions Code that would be made by Chapter 57 of the Statutes of 1994.

Ch. 901 (SB 1425) Mello. California State University, Monterey Bay.

Existing law sets forth provisions governing the California State University, which includes institutions for higher education in specified locations.

This bill would set forth legislative findings and declarations concerning the acquisition of property at the site of Fort Ord in Monterey County for the purpose of developing and opening a campus of the California State University at that location, to be known as the California State University, Monterey Bay. In addition, the bill would amend existing law to include this institution for higher education as an institution that is part of the California State University system.

Existing law provides that construction of specified campuses of the California State

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

University shall commence only upon resolution of the Trustees of the California State University, approved by the California Postsecondary Education Commission.

This bill would add the campus of the California State University, Monterey Bay to this provision.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 902 (SB 1446) Kelley. Health services: rural providers.

Existing law requires counties to provide health care services to certain low-income persons who meet eligibility standards.

This bill would require the Office of Statewide Health Planning and Development, in conjunction with the State Department of Health Services, to act as the coordinating agency to develop a strategic plan that would assist rural California to prepare for health care reform. It would require the office to designate representatives of provider groups and convene meetings with prescribed objectives.

Ch. 903 (SB 1733) Greene. Taxation.

The Sales and Use Tax Law imposes various penalties for failure to file a timely return form, failure to remit the tax when due, and failure to remit the amount due by an appropriate electronic funds transfer.

This bill would add an additional penalty for the failure to remit the tax when due if that failure results in the State Board of Equalization's issuance of a deficiency determination.

Under the Sales and Use Tax Law, retailers located outside this state who are engaged in business in this state are required to register with the State Board of Equalization and collect, report, and remit any applicable California use taxes on sales made to customers located in this state. If a retailer fails to register with the board and fails to file a return, the board is authorized to issue a notice of determination for a period of 8 years.

This bill would reduce the period within which the board may issue a deficiency determination from 8 years to 3 years for a "qualifying retailer," as defined.

The Sales and Use Tax Law authorizes the Controller to recover any refund that is erroneously made or any credit that is erroneously allowed in an action brought in a court of competent jurisdiction, as specified. Existing law requires the Attorney General to prosecute the action, and makes relevant provisions of the Code of Civil Procedure applicable to the proceedings.

This bill would, as an alternative to that provision, authorize the State Board of Equalization to recover any refund or credit erroneously made or allowed. It would permit the board, in its discretion, to issue a deficiency determination, as specified.

The Sales and Use Tax Law makes it a misdemeanor to make a false or fraudulent return with intent to defeat or evade the determination of an amount required by law to be made.

This bill would also make it a misdemeanor to willfully aid or assist in, or procure, counsel, or advise in, the preparation of a false or fraudulent return or other document. By creating a new crime punishable as a misdemeanor, this bill would create a state-mandated local program.

This bill would make additional, clarifying changes to the Sales and Use Tax Law.

The Sales and Use Tax Law, the Use Fuel Tax Law, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Underground Storage Tank Maintenance Fee Law, and the Fee Collection Procedures Law authorize the State Board of Equalization to require any person subject to those laws to place with it security, as determined by the board. Those provisions of existing law refer to bearer bonds issued by the state or federal government as one of the forms of security that may be held by the board.

This bill would delete any reference to bearer bonds in those provisions of law.

Under the Cigarette and Tobacco Products Tax Law, both cigarettes and tobacco products are subject to that tax. The existing law requires any person desiring to engage in the sale of cigarettes as a wholesaler to register with and obtain a wholesaler's license from the State Board of Equalization.

This bill would also apply that provision to any person desiring to engage in the sale

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of tobacco products as a wholesaler.

This bill would incorporate the changes to Section 8951 of the Revenue and Taxation Code proposed by both this bill and SB 840, to become operative only if this bill and SB 840 are both chaptered and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 904 (SB 1736) Greene. Parole: county of release.

Existing law requires that an inmate be released on parole to the county from which he or she was committed, except that the inmate may be paroled to another state as authorized by law or released to another county in a case where that would be in the best interests of the public and the parolee. In deciding to release an inmate to another county, the parole authority is authorized to consider certain factors.

This bill would provide that among these certain factors the parole authority may consider, the protection of the victim and the safety of the community is to be given the greatest weight. The bill would further provide that when making parole decisions, consideration shall be given to the equitable distribution of parolees and the proportion of out-of-county commitments from a county compared to the number of commitments from that county.

The bill would incorporate additional changes in Section 3003 of the Penal Code proposed by AB 3331 and AB 3 (1st Ex. Sess.), to be operative only if AB 3331 or AB 3 (1st Ex. Sess.), or both, and this bill are enacted and become effective as specified, and this bill is enacted last.

Ch. 905 (SB 1763) Wright. Department of the Youth Authority: construction.

The State Administrative Manual sets forth a procedure for state agencies to submit plans for major capital outlay projects to the Department of Finance for inclusion in the annual budget process, and requires state agencies to submit a 5-year plan regarding projected capital outlay needs by project to the Department of Finance. Existing law, the State Building Construction Act of 1955, requires the Department of General Services to prepare the plans and specifications for the construction and renovation of public buildings, except as specified, and requires construction to be in accordance with the State Contract Act. Existing law, the State Contract Act, provides that the Department of General Services is to provide general management services for major capital outlay projects of various state agencies, including the Department of the Youth Authority.

This bill would require the Department of the Youth Authority to annually develop a population management and facilities master plan presenting projected population and strategies for treatment and housing of wards over the succeeding 5-year period, to be updated and submitted to the Legislature by January 10 of each year. The bill would authorize the Department of the Youth Authority to contract with the Department of Corrections or the Office of Project Development and Management within the Department of General Services for certain services related to the construction of the facilities or renovation projects included in the 1994–99 master plan for which funds are appropriated by the Legislature. The bill would specify that any power, function, or jurisdiction for planning, design, and construction of facilities or renovation projects pursuant to the 1994–99 master plan that is conferred upon the Department of General Services shall be deemed to be conferred upon the Department of Corrections for these purposes. The bill would authorize the Director of the Department of General Services to, upon request, delegate to the Department of Corrections any power, function, or jurisdiction for planning, design, and construction of any additional projects included within subsequent master plans.

Ch. 906 (AB 923) Speier. Family law: child support.

(1) Existing law sets forth the statewide uniform guideline for determining child support.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise the method of calculating child support under the statewide uniform guideline where the obligor's monthly net disposable income is less than $1,000. The bill would provide that in the event a court uses a computer to calculate a child support order, the computer program shall not automatically default on whether a low-income adjustment is to be applied, or provide the amount of the adjustment, as specified.

(2) Existing law provides for the enforcement of child support orders. Under these provisions, a child support obligor may be required to deposit money in a trust account to secure future child support payments, or may be subject to an earnings assignment order, as specified.

This bill would also authorize a court to order a child support obligor to designate a bank or similar account for the purpose of paying the child support obligation by electronic funds transfer, as specified, provided the obligor is not subject to an earnings assignment order and has an account that may be used for this purpose. The bill would require the obligor to maintain funds in the account sufficient to pay the monthly child support obligation, and to notify the obligee if the depository institution or the account number is changed.

(3) Under existing law, the district attorney may refer child support delinquencies to the Franchise Tax Board for collection. This program is operative in 6 counties, as specified, and is automatically repealed on January 1, 1996.

This bill would delete the repeal of this program and delete provisions limiting the program to 6 counties. The bill would instead provide that the Franchise Tax Board may phase in the referrals as administratively necessary, and that by December 31, 1996, all counties shall be allowed to refer delinquencies pursuant to the program. The bill would prohibit the Franchise Tax Board from collecting any referred delinquency if the obligor is in compliance with a court order requiring scheduled payments on a child support arrearages obligation and the court order does not provide the district attorney with authority to engage in continued or additional collection activities.

(4) Existing law requires various state licensing agencies, including the Department of Motor Vehicles, to issue a temporary license, which may not be extended, including a commercial driver's license, to licensees and qualified applicants in arrears in the payment of child or family support, as specified.

This bill would specifically require the Department of Motor Vehicles to take specified action against the commercial driving privilege of any person who neglects to pay or defaults in the payment of child or family support obligations.

(5) Existing law precludes state professional licensing agencies from issuing or renewing a license if the licensee is on a list of persons who have not complied with support orders. These provisions will be repealed according to their own terms on January 1, 1997.

This bill would delete the repeal of these provisions, and make further revisions to these provisions, operative January 1, 1996. Among other things, it would authorize the State Department of Social Services to provide a supplemental list of certain obligors to each licensing board with which the department has a specified interagency agreement, in cases where the department is aware that these child support obligors are on the list and have been out of compliance with support orders for more than 4 months; authorize the department to request the suspension of the licenses of these obligors, provided that the licenses would not otherwise be eligible for renewal within 6 months from the date of the request by the department; require district attorneys to respond to obligors within 75 days of receipt of a written request for the review of a listing; delete provisions exempting the adoption of a specified surcharge from the requirements for the adoption of regulations under the Administrative Procedure Act; and authorize the court to conditionally release a license to an obligor under certain conditions on judicial review of the decision of the district attorney. The bill would impose a state-mandated local program by adding to the duties of district attorneys.

(6) Existing law requires the district attorney to take appropriate action to establish, modify, and enforce child support orders when the child is receiving public assistance, and when appropriate, to take the same actions on behalf of a child who is not receiving

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

public assistance.

This bill would require a district attorney who is collecting child support payments on behalf of a child and who is unable to deliver the payments to the obligee because the district attorney is unable to locate the obligee, to make all reasonable efforts to locate the obligee for a period of 6 months. The bill would provide that if the district attorney is unable to locate the obligee within the 6-month period, he or she shall return the undeliverable payments to the obligor along with a specified written notice. The bill would provide that no interest shall accrue on any past due child support amount for which the obligor made payment to the district attorney for 6 consecutive months, or on any amounts due thereafter, provided that the district attorney returned the funds to the obligor because the district attorney was unable to locate the obligee and, when the obligee was located, the obligor made full payment for all past due child support amounts. The bill would impose a state-mandated local program by adding to the duties of district attorneys.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 907 (SB 1351) Marks. Sex offenses: consent.

Existing law defines "consent," for purposes of the prosecution of certain sex offenses, including rape, to mean positive cooperation in act or attitude pursuant to an exercise of free will.

This bill would provide that evidence that the victim of such an offense suggested, requested, or otherwise communicated to the defendant that the defendant use a condom or other birth control device, without additional evidence of consent, does not constitute consent.

Ch. 908 (SB 2036) McCorquodale. Professional licensing: review: repeals.

Existing law provides for the licensing and regulation of various occupations and professions, each administered by a board, as defined.

This bill would require that provisions establishing certain of these boards, and authorizing the appointment of an executive officer by those boards, become inoperative on either July 1, 1997, July 1, 1998, or July 1, 1999, and for their repeal effective January 1, 1998, January 1, 1999, or January 1, 2000, respectively.

Existing law provides for legislative oversight of state board formation in accordance with a prescribed procedure.

This bill would expand this procedure and legislative oversight to cover the creation of new categories of licensed professionals, and the revision of the scope of practice of an existing category of licensed professional.

This bill would establish the Joint Legislative Sunset Review Committee, as specified, to conduct a review process of all the boards, as defined, that are to become inoperative and be repealed by this bill. This bill would require each board, with the assistance of the Department of Consumer Affairs, to prepare an analysis and submit a report to the committee no later than one year plus 90 days prior to the January 1st of the year during which the inoperative date for that board occurs. This bill would require the analysis and report to contain specified information. This bill would require the committee to hold described public hearings during the interim recess preceding the date upon which a board becomes inoperative, to receive testimony from the department, the board, the public, and the regulated industry. This bill would require the committee to evaluate and determine whether each board has demonstrated a public need for the continued existence of that board in accordance with enumerated factors and standards. This bill would require the committee to report its findings and recommendations to the depart-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment, as provided, and would require the department to submit its findings and recommendations, which shall incorporate the findings and recommendations of the committee, to the Legislature, as specified.

This bill would also make the law on regulating certified interior designers, and the Athletic Commission and regulation of certain athletes by the commission subject to the review of the Joint Legislative Sunset Review Committee as described above.

This bill would state the intent of the Legislature that all existing and proposed consumer-related boards or categories of licensed professionals be subject to this review every 4 years. This bill would further require that the Department of Consumer Affairs succeed to and be vested with all of the duties, powers, including the authority to expend continuously appropriated funds, purposes, responsibilities, and jurisdiction of a board, and its executive officer, in the event that board becomes inoperative or is repealed in accordance with this bill.

The bill would state the intent of the Legislature.

This bill would incorporate additional changes in Section 4800 of the Business and Professions Code, proposed by SB 1821, to be operative only if SB 1821 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 909 (SB 1779) Bergeson. Minors: tort liability: graffiti prevention.

Existing law prohibits the defacement of property of another. Every person who maliciously defaces, damages, or destroys the real or personal property of another is guilty of vandalism, which is punishable by a fine, imprisonment, or both, as specified. Liability for an act for the willful misconduct of a minor which results in injury or death to another person or injury to the property of another or in the defacement of property with paint or a similar substance is imputed to the parent or guardian of that minor, for amounts up to $10,000. However, under existing law, an insurer is not liable for a loss caused by the willful act of the insured. It is unlawful to sell to a minor, or for a minor to possess, a container of aerosol paint capable of defacing property. Existing law authorizes a city or county to enact an ordinance to provide for the use of city or county funds to remove graffiti or other inscribed material.

This bill would, among other things, increase the maximum amount that may be imputed to a parent or guardian for the willful misconduct of a minor to $25,000. In addition, the bill would provide that this amount shall be adjusted every 2 years by the Judicial Council to reflect increases in the cost of living. The bill would provide that its provisions shall not impose liability on an insurer for a loss caused by the willful act of the insured. The bill would further provide that an insurer shall not be liable for conduct imputed to a parent or guardian under the bill's provisions for any amount in excess of $10,000. The bill would increase the penalties for specified acts of vandalism resulting in defacement, damage, or destruction valued at $400 or more, but less than $5,000. The bill would authorize local governments and school districts to determine and recover the costs of removing graffiti, as specified. The bill would also require minors who commit specified acts of vandalism to provide restitution. In addition, the bill would make parents liable for the payment of specified fines levied on the minor if the minor is unable to pay, and would establish a procedure whereby the parent or guardian of that minor may be ordered to pay restitution if the minor or the minor's estate is unable to do so. The bill would impose a state-mandated local program by expanding the definition of various crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 910 (SB 302) McCorquodale. Graffiti abatement.

(1) Existing law authorizes a city to provide for the summary abatement of any nuisance at the expense of the persons creating, causing, committing, or maintaining the nuisance. Existing law also authorizes a city to adopt an ordinance to make the expense of abatement a lien against the property on which it is maintained and a personal

NOTE: Superior numbers appear as a separate section at the end of the digests.

obligation against the property owner.

This bill would specifically authorize a city, county, or city and county to provide for the abatement of a nuisance resulting from the defacement of the property of another by graffiti or any other inscribed material at the expense of a minor creating, causing, or committing the nuisance. The bill would also authorize a city, county, or city and county to adopt an ordinance to make the expense of abatement a lien against property of the minor or the parent or guardian of the minor and a personal obligation of the minor or the parent or guardian of the minor. The bill would specify procedures for the recording, abatement, and satisfaction of the lien. Procedures to record the lien would impose a state-mandated local program on counties.

(2) Existing law authorizes a city or county to enact an ordinance to provide for the use of city or county funds to remove graffiti or other inscribed material from publicly or privately owned permanent structures. Under this law, removal may only be performed after a finding by the city or county that the graffiti or other inscribed material is obnoxious.

This bill would instead authorize such an ordinance to provide for the use of city or county funds to remove graffiti or other inscribed material from publicly or privately owned real property and delete the reference to "permanent structures." The bill would also delete the requirement that a city or county find the graffiti or other inscribed material obnoxious as a condition for removing it. The bill also would make technical changes.

(3) The bill would make other conforming and related changes to existing law.

(4) This bill would incorporate additional changes in Section 53069.3 of the Government Code, proposed by SB 1779, to be operative only if SB 1779 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 911 (SB 583) Lewis. Crimes: graffiti.

Existing law makes it a misdemeanor to possess specified instruments with the intent to commit vandalism or graffiti.

This bill would add aerosol paint containers, felt tip markers, and any other marking substance to the list of specified instruments. Because this bill would expand the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 912 (SB 840) Presley. Diesel fuel tax.

The existing Use Fuel Tax Law requires a vendor of fuel to collect the tax when he or she sells and delivers that fuel into a fuel tank.

This bill would, instead, with respect to diesel fuel, as defined, enact the Diesel Fuel Tax Law which would impose a tax, with specified exemptions, at specified rates, upon the specified removal, entry, sale, delivery, and specified use of diesel fuel, as provided, for each gallon of fuel subject to the tax. This bill would provide, for purposes of the Sales and Use Tax Law, that gross receipts do not include the fuel tax imposed by the bill. This bill would delete specified provisions of the Use Fuel Tax Law that require a wholesaler to collect the excise tax imposed on fuel in the state for resale to a retailer or to a person who is not a retailer who subsequently uses the fuel, as provided.

This bill would require that all moneys received from the taxes imposed be deposited in the Motor Vehicle Fuel Account in the Transportation Tax Fund and would continuously appropriate those moneys for specified purposes.

This bill would provide that specified provisions shall only become operative if AB

NOTE: Superior numbers appear as a separate section at the end of the digests.

3069 is chaptered, in which event specified other provisions would not become operative.

This bill would incorporate the changes to Section 8951 of the Revenue and Taxation Code proposed by both this bill and SB 1733, to become operative only if this bill and SB 1733 are both chaptered and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would take effect immediately as a tax levy, but would become operative as provided.

Ch. 913 (SB 881) Killea. Economic development: bonds.

(1) The Enterprise Zone Act and the Employment and Economic Incentive Act provide for the designation of areas to receive incentives for economic development.

This bill would provide that these incentives may also include the use of certain bonds, as specified.

(2) Existing law requires the California Industrial Development Financing Advisory Commission to authorize an annual maximum amount of qualifying bonds of $75,000,000, and limits the allowable uses of bond proceeds.

This bill would require the commission to authorize that annual maximum amount of qualifying bonds and would exempt bonds issued on behalf of any enterprise zone or portion of any enterprise zone from the limitation on the uses of the bond proceeds.

Ch. 914 (SB 927) Wright. Hazardous waste: reusable soiled textile materials: fees.

Existing law exempts reusable soiled textile materials, as defined, from specified facility and generator fees and from specified requirements concerning the transportation of hazardous waste, if the materials are managed in a specified manner, and exempts a facility laundering or cleaning reusable soiled textile materials from the requirements of obtaining a hazardous waste facilities permit and financial assurances if the facility complies with specified requirements.

This bill would specify that these provisions do not affect the application to reusable soiled textile materials of specified provisions which subject recyclable materials to the requirements of hazardous waste control laws.

The bill would also make technical changes in provisions pertaining to fees required to be paid by the owner or operator of a facility or transportable treatment unit operating pursuant to a permit-by-rule, by a generator operating under a grant of conditional authorization, and by a generator performing treatment conditionally exempted.

Ch. 915 (SB 1267) Wyman. San Joaquin Valley Unified Air Pollution Control District.

Existing law provided that the San Joaquin Valley Air Quality Management District (valley district) shall be established, unless, by July 1, 1992, specified counties form a unified or regional air pollution control district meeting specified criteria. The San Joaquin Valley Unified Air Pollution Control District (unified district) was formed. If the unified district ceases to exist, the provisions for establishment of the valley district become operative.

This bill would delete the obsolete provisions relating to the valley district and to a regional district.

The bill would enact provisions pertaining to the valley district, that would become operative if the unified district ceases to exist.

Ch. 916 (SB 1327) Johnston. Job training.

(1) Existing law establishes the Employment Training Panel, which approves and pays for various job training programs. The Employment Training Fund is the funding source for these expenditures. Existing law provides that, commencing with the 1994–95

NOTE: Superior numbers appear as a separate section at the end of the digests.

fiscal year, and for each fiscal year thereafter, to the extent that interest is earned on the money in the Employment Training Fund, that interest shall be used to fund the activities of the Employment Development Department Service Center Program and to fund up to 50% of the costs of the State-Local Cooperative Labor Market Information Program, as specified.

This bill would eliminate the use of that interest to fund the activities of the Employment Development Department Service Center Program.

(2) Existing law requires employers to perform various functions and duties with respect to implementing job training for eligible participants, including the establishment of a plan relating to the effectiveness of the proposed training.

This bill would provide that the Employment Training Panel may modify the specific requirements relating to the plan as they apply to employers or contractors proposing projects that involve training for a significant number of small employers in the same project.

(3) Existing law authorizes the panel to allocate money in the fund for specified purposes, including reimbursement of reasonable training costs and administrative costs incurred by contractors. Existing law also provides that, in making a determination of costs to be reimbursed, the panel may allocate funds in accordance with specified methods that include examining reasonable and normal costs for the training, based upon the panel's experience.

This bill would eliminate the reference to the panel's experience.

(4) Existing law provides that the panel may allocate up to 10% of the annually available training funds for the purpose of funding special employment training projects for specified purposes, including increasing understanding of the requirements for effective new hire and retraining programs, especially as they relate to diverse sectors of the population and to businesses that are difficult to serve under the panel's standard project format.

This bill would, instead, provide for an allocation up to 20% for the purpose of funding special employment training projects and would eliminate the above as a purpose for which a special employment training project may be funded. The bill would provide instead that such a project may be funded for the purpose of supporting retraining for frontline workers, as defined, in occupations that pay 100% of the state or regional average hourly wage when a business is difficult to serve under the panel's standard project format; provided that the employment may not result in earnings of less than 95% of the state average hourly wage.

The bill also would delete a requirement that the projects contribute to the panel's understanding of the relationship between various training designs, the achievement of employer's training objectives, and the development of new industries, and would delete a characterization of the projects as research projects.

(5) Existing law provides that the panel may allocate up to 30% of the annually available training funds designated for funding special employment training projects for job-related vocational and literacy skills training and the employment of individuals with barriers to full-time, stable employment.

The bill would change that allocation authorization to up to 15% of those funds.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 917 (SB 1371) Bergeson. Child health care.

Existing law provides for the provision of various health care services to eligible children under the California Children's Services (CCS) Program.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for the department to enter into contracts with managed care systems, hospitals, and prepaid health plans for the provision of various Medi-Cal benefits.

This bill would require the Director of Health Services to investigate, and, to the extent feasible, require managed care contractors serving children with CCS eligible conditions to take specified actions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would prohibit the CCS covered services from being incorporated into a Medi-Cal managed care contract entered into after August 1, 1994, until 3 years after the effective date of the contract.

The bill would authorize the department to approve, implement, and evaluate pilot projects under the CCS program to test alternative managed care models for children under this program. It would require the department to submit an evaluation of pilot projects to the Legislature, and prohibit the incorporation of the program into the Medi-Cal managed care system until the evaluation process is completed.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 918 (SB 1619) Wright. Probation: sex offense.

Existing law prohibits the granting of probation to any person who has been convicted of a violation of specified provisions relating to, among other things, rape, sodomy, oral copulation, and penetration of the genital or anal openings by a foreign object.

This bill would provide that before probation may be granted to any person convicted of a violation of specified provisions relating to rape, sodomy, lewd and lascivious conduct with a child under the age of 14 years, oral copulation, or penetration of the genital or anal openings by a foreign object, the court shall order the defendant evaluated for the purposes of diagnosis and treatment, conduct a hearing to determine if probation would pose a threat to the victim, and order any appointed psychiatrist or psychologist to consider specified factors in making his or her report to the court.

The bill would further require the court to order any defendant granted probation pursuant to the above provision to be placed in an appropriate treatment program designed to deal with child molestation or sexual offenders, if an appropriate program is available in the county. The bill provides that the defendant shall be responsible for paying the expense of the treatment program.

By increasing the duties of local agencies, including the evaluation of the defendant, the holding of a hearing, and placement of the defendant in a treatment program when the defendant is unable to pay, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 919 (SB 2098) Hayden. Crime: robbery: automated teller machine.

Existing law provides that (1) every robbery of any person who is performing his or her duties as an operator of any bus, taxicab, cable car, streetcar, trackless trolley, or other vehicle, as specified, and used for the transportation of persons for hire, (2) every robbery of any passenger that is perpetrated on any of these vehicles, and (3) every robbery that is perpetrated in an inhabited dwelling house, vessel, as defined, that is inhabited and designed for habitation, inhabited floating home, trailer coach, as defined, that is inhabited, or the inhabited portion of any other building, is robbery of the first degree and is punishable by imprisonment in the state prison for 3, 4, or 6 years. Under existing law, all other kinds of robbery are of the 2nd degree punishable by imprisonment in the state prison for 2, 3, or 5 years.

This bill would provide that every robbery of any person while using an automated teller machine or immediately after the person has used an automated teller machine and is in the vicinity of the automated teller machine is first degree robbery and is punishable by imprisonment in the state prison for 3, 4, or 6 years.

Ch. 920 (SB 1547) Senate Committee on Elections and Reapportionment. Elections Code: reorganization.

The existing Elections Code governs the conduct of statewide and local elections, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

sets forth provisions governing the registration of voters, regular election dates, the qualification of initiative and referendum petitions, candidacy and nomination procedures, political party organization, the preparation and distribution of ballots, election procedures, the preservation of records, the declaration of results, election contests, consolidation of elections, the conduct of special elections, the recall of elected officials, penalties for prohibited acts, and reapportionment of state and local government election districts, among other things.

This bill would repeal the existing Elections Code, and would reenact the code in a reorganized format. It would repeal the statutes applicable to the 1983 redistricting of legislative, congressional, and State Board of Equalization districts that were superseded by the 1992 redistricting plans adopted by the California Supreme Court (Wilson v. Eu, 1 Cal. 4th 707).

This bill would state the intent of the Legislature to reorganize and clarify the Elections Code and thereby facilitate its administration. It would further state the Legislature's intent that the changes made to the Elections Code, as reorganized by this act, have only technical and nonsubstantive effect.

This bill would state the finding of the Legislature that the reorganization of the Elections Code pursuant to this act, in view of the nonsubstantive statutory changes made, will not result in new or additional costs to local agencies responsible for the conduct of elections or charged with any duties or responsibilities in connection therewith.

This bill would provide that any section of any act enacted by the Legislature during the 1994 calendar year that takes effect on or before January 1, 1995, and that amends, amends and renumbers, adds, repeals and adds, or repeals a section with the same number as a section repealed or added by this act, shall prevail over this act, whether that act is enacted prior to, or subsequent to, this act.

Ch. 921 (AB 1250) Campbell. Special education: alternative services.

(1) Under existing law, no contract for special education and related services provided by a nonpublic, nonsectarian school or agency may be authorized unless the school or agency has been certified, as specified.

This bill would refer to such a contract as a master contract, and would limit the period of certification of a school or agency that provides those services to 4 years from the date of approval of certification.

(2) Under existing law, a district, special education local plan area, county office, nonpublic, nonsectarian school or nonpublic, nonsectarian agency may petition the Superintendent of Public Instruction to waive specified sections of the Education Code, including a section that requires a nonpublic, nonsectarian school or agency seeking certification to file an application, as specified. The petition for the waiver must state the reason for the waiver and include certain information such as documentation and assurance that the waiver does not abrogate any right provided to individuals with exceptional needs and their parents or guardians under state or federal law and does not hinder compliance of the district, special education local plan area, or county office with specified federal acts and regulations.

This bill would delete from the list of provisions that may be waived the section pertaining to the application for certification. The bill also would add the Americans with Disabilities Act of 1990 to the list of federal acts and regulations with which the district, special education local plan area, or county office must comply.

(3) Under existing law, the Superintendent of Public Instruction is required to submit to the State Board of Education, the Legislature, and the Governor an annual evaluation of special education programs, as specified. That evaluation is required to include specified information about special education programs and the numbers of special education pupils in various special education programs.

This bill, in addition, would require that funding provided by state and local noneducational public agencies and identification of pupils who are referred to special education programs by state and local noneducational public agencies be included in that evaluation. The bill would also require the State Department of Education to collect data on the types of agencies that provide designated instruction and services or related services

NOTE: Superior numbers appear as a separate section at the end of the digests.

that are contracted for by specified entities or programs to determine the number of pupils who are enrolled in nonpublic, nonsectarian special education schools or who are receiving nonpublic, nonsectarian agency services.

(4) Existing law requires the county superintendent to compute for each district and county office the sum of certain services, including amounts for nonpublic, nonsectarian schools.

This bill would add the amounts for nonpublic, nonsectarian agencies to the computation.

(5) Under existing law, the Superintendent of Public Instruction is authorized to conduct a pilot program for the 1992–93, 1993–94, and 1994–95 fiscal years to enable and encourage school districts and county offices of education to establish programs in public schools for individuals with exceptional needs who currently are placed in nonpublic, nonsectarian schools, as specified. Existing law requires the superintendent to select, for those purposes, not more than 11 school districts or county offices of education, with not more than 220 pupils participating in the statewide pilot program at any given time.

In addition, under existing law, the superintendent is required to conduct a similar pilot program in San Mateo County and Contra Costa County for the 1994, 1995, and 1996 calendar years, as specified.

The superintendent is required to evaluate both pilot programs pursuant to separately identified criteria and to report to the Legislature no later than January 1, 1997.

Under existing law, these provisions are to be repealed as of January 1, 1998.

This bill would extend the operation of both pilot programs to the 1995–96 and 1996–97 fiscal years, would change the maximum number of school districts or county offices of education that may participate in the pilot program to 10 and the number of pupils that may participate to 200, and would make conforming changes. Because the bill would require San Mateo County and Contra Costa County to continue their pilot programs for an additional 2 years, the bill would impose a state-mandated local program.

The bill would consolidate the evaluations to be conducted of both pilot programs and would extend the reporting date to January 1, 1998.

The bill would extend the repeal date of these provisions to January 1, 1999.

(6) Existing law requires each district and county office to submit to the county superintendent the adjusted operating costs for special education in fiscal year 1979–80. These adjusted costs are to be computed by reducing the total cost for special education reported by the district or county superintendent for fiscal year 1979–80 less specified costs, including services provided by nonpublic, nonsectarian schools.

This bill would add services provided by nonpublic, nonsectarian agencies to the costs to be deducted.

(7) Under existing law, the Superintendent of Public Instruction is required to apportion to each district and county office 70% of the cost of tuition in excess of the revenue limit and applicable federal funds for pupils enrolled in nonpublic, nonsectarian schools and agencies. In reporting the costs of contracts with nonpublic, nonsectarian schools and agencies certain costs are not to be reported, including the costs for services routinely provided by the district or county office of education.

In order to receive the apportionment, a district or county office is required to submit an annual report to the superintendent that includes full-day nonpublic, nonsectarian agency and partial-day nonpublic, nonsectarian agency placements.

This bill would refer to the contract with the nonpublic, nonsectarian school and agencies as the master contract and would include within the costs not to be reported the costs for services routinely provided by the special education local plan area and other services not specified by a pupil's individualized education program or funded by the state on a caseload basis.

The bill would require the annual report to include full-day nonpublic, nonsectarian agency and partial-day nonpublic, nonsectarian agency services rather than placements.

(8) Existing law prohibits the Superintendent of Public Instruction from apportioning additional funds to districts or county offices on behalf of certain placements in nonpublic, nonsectarian schools reported by school districts, unless the superintendent makes a specified finding. This prohibition exists notwithstanding those provisions of law

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

that require the superintendent to apportion to districts and county offices 70% of the cost of tuition in excess of the revenue limit and applicable federal funds for pupils enrolled in nonpublic, nonsectarian schools and agencies.

This bill would prohibit the superintendent from apportioning additional funds to districts or county offices on behalf of placements and services in nonpublic, nonsectarian schools and agencies and would provide for the prohibition notwithstanding the aforementioned apportionment of 70% of the cost or the apportionment to each district and county superintendent of the difference between the costs of contracts with nonpublic, nonsectarian schools to provide special education instruction, related services, or both, to pupils in certain placements and the state and federal income received by the district or county superintendent for providing the programs.

(9) Under existing law, the Superintendent of Public Instruction is required to apportion to each district and county superintendent the difference between the costs of contracts with nonpublic, nonsectarian schools to provide special education instruction, related services, or both, to pupils in certain placements and the state and federal income received by the district or county superintendent for providing the programs. The sum of the excess cost plus the state or federal income is not to exceed the costs of the contracts with nonpublic, nonsectarian schools. Existing law specifies certain costs of contracts with nonpublic, nonsectarian schools and agencies that are not to be reported, including transportation costs provided directly or through the contract.

This bill would refer to the contract as the master contract. In the computation, the bill would include master contracts with nonpublic, nonsectarian agencies and would provide that the costs of the contracts are for special education instruction, designated instruction and services, or both, in the specified placements. With respect to the costs of the contract that are not to be included, the bill would provide that transportation costs provided directly or through the contract or an individual services agreement shall be excluded as well as other services not specified by a pupil's individualized education program or funded by the state on a caseload basis and costs for services provided by public employees.

(10) Existing regulations adopted by the State Department of Education require, among other things, that (A) a public education agency seek an appropriate special education or related service placement in a program operated by another public education agency prior to nonpublic school or agency placement, (B) a nonpublic school shall meet certain criteria regarding the length of the school day and school year, and (C) a nonpublic school or nonpublic agency meet certain certification requirements.

The bill would declare that these regulations are void and of no effect on or after January 1, 1996.

(11) To the extent the changes discussed in (6) to (9), inclusive, specified above, would require a district or county office to determine new or different costs, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 922 (AB 2587) Eastin. Education Code: obsolete provisions.

Under existing law, certain provisions in the Education Code have become obsolete for various reasons, including requirements that state or local agencies perform one-time duties or prepare and submit one-time reports by certain dates.

This bill would repeal or amend provisions of the Education Code that have become obsolete and make conforming changes to affected sections of the Education Code and other California codes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 923 (SB 1546) Senate Committee on Elections and Reapportionment. Elections.

Existing law contains various references to specific provisions of the Elections Code.

This bill would make technical nonsubstantive changes by renumbering references to specific provisions of the Elections Code, and by making related technical changes.

This bill would declare that the changes made by this bill are necessitated by the reorganization of the Elections Code by SB 1547 of the 1993–94 Regular Session.

This bill would provide that it shall become operative only if SB 1547 is chaptered.

This bill would provide that any section of any act enacted by the Legislature during the 1994 calendar year that takes effect on or before January 1, 1995, and that amends, amends and renumbers, adds, repeals and adds, or repeals a section amended by this act, shall prevail over this act, whether that act is enacted prior to, or subsequent to, this act.

Ch. 924 (AB 2358) Sher. Air pollution: vehicles.

(1) Existing law requires agencies responsible for the preparation of regional transportation improvement programs to develop and biennially update a congestion management program for every county that includes an urbanized area and to monitor implementation of the program. Existing law specifies the elements required to be contained in a congestion management program, including a trip reduction and travel demand element.

This bill would require the use of specified multimodal system performance measures, would require coordination of trip reduction responsibilities by an agency and an air pollution control district or air quality management district, as specified, and would make related changes, thereby imposing a state-mandated local program. The bill would require the Department of Transportation to request the Federal Highway Administration to accept the congestion management program in lieu of a new congestion management system otherwise required by federal law. These provisions would not become operative if AB 1963 is chaptered and takes effect, as specified.

(2) Existing law requires an air pollution control district or air quality management district to take specified actions before adopting or amending a rule or regulation to establish employer-based trip reduction requirements.

This bill would require the district to also encourage or require the use of ridesharing, vanpooling, flexible work hours, or other measures to reduce the number or length of vehicle trips.

(3) Existing law requires specified state agencies to establish a technical advisory group to develop model guidelines and procedures for traffic control measures affecting heavy-duty trucks, and requires air pollution control districts and air quality management districts to consider those guidelines and procedures in adopting or revising regulations.

This bill would repeal those provisions.

(4) Existing law authorizes the districts to adopt and implement regulations to reduce or mitigate emissions from indirect sources of air pollution and to encourage or require measures to reduce the number or length of vehicle trips. Existing law requires the districts to adopt, implement, and enforce transportation control measures for the attainment of state or federal ambient air quality standards, as specified.

This bill would require a district to comply with prescribed procedures in adopting or amending a rule or regulation imposing any requirement on indirect sources to reduce vehicle trips or vehicle miles traveled, or establishing employer-based trip reduction requirements. The imposition of these requirements on the districts would impose a state-mandated local program.

(5) Existing law authorizes a district to delegate any function with respect to the implementation of transportation control measures to any local agency if specified conditions are met.

This bill would authorize an indirect source to elect to be subject only to district regulation under specified conditions with respect to the rules and regulations described in (1), above.

(6) The bill would authorize any county or city, which is contained, in whole or in part, within the South Coast Air Quality Management District to declare by ordinance

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

a reduced prima facie speed limit for air pollution control purposes, as specified.

(7) The bill would make other conforming, technical, and nonsubstantive changes.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(9) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 925 (AB 2523) Bowen. Electronic data processing: state agencies: master plan.

Existing law contains provisions with respect to the use, management, and security of data processing information by state agencies. Existing law further prohibits the exchange or transfer of data between data centers by intercoupling, or telecommunication, with certain exceptions.

This bill would require the Director of the Office of Information Technology, notwithstanding this prohibition, to develop a master plan by January 1, 1996, that provides for networking between all state agencies in order to enable these agencies to communicate with each other, share data where appropriate, and maximize public access to this network.

The bill would also require the director to create an inventory list of all computer hardware and software retained by each state agency and the purposes for which the hardware or software was purchased.

The bill, in addition, would provide that funding for the development of the master plan would be derived from a specified federal grant received by the Trade and Commerce Agency for this purpose.

Ch. 926 (AB 2533) Campbell. Civil procedure.

(1) Existing law creates a cause of action for treble the amount, except as specified, for failure to pay upon a dishonored check, in cash, within 30 days of written demand therefor mailed to the maker by certified mail. In the case of a check dishonored pursuant to a stop payment order, a court may not award damages or costs unless it receives into evidence a signed certified mail receipt showing delivery or, if delivery is refused, of attempted delivery, of the demand notice.

This bill would provide that, when the payee is a municipal court, the required service may be mailed by a municipal court clerk and would make a corresponding change with regard to evidence of mailing in the case of checks dishonored pursuant to a stop payment order.

(2) Existing law provides for the enforcement of the judgment of a small claims court and requires the clerk to charge and collect specified fees for the issuance of a writ of execution, an order of examination of a judgment debtor, or an abstract of judgment.

This bill would require the clerk also to charge and collect specified fees upon a motion to vacate, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 927 (AB 2600) Bustamante. Public schools: instructional materials.

Under existing law, the State Board of Education is required to adopt basic instructional materials for use in kindergarten and grades 1 to 8, inclusive, consistent with the adopted curriculum framework of the State Board of Education. The governing board of each school district maintaining one or more high schools is required to adopt textbooks for use in high schools and the State Board of Education is required to designate the kinds of books that are to be classified as textbooks for high schools. Existing law creates the State Instructional Materials Fund to provide for the annual funding for the acquisition of instructional materials.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would establish the Pupil Textbook and Instructional Materials Incentive Program. Commencing with the 1994–95 fiscal year that program , as a condition of eligibility for funding available for purposes of the program, would require the governing board of a school district to hold a public hearing or hearings, as specified, as to the sufficiency of textbooks or instructional materials for each pupil and to determine whether each school in the district has sufficient textbooks and instructional materials. This bill would require, if the governing board finds that there are insufficient textbooks or instructional materials, or both, governing boards of school districts to take any action, except an action that would require reimbursement by the Commission on State Mandates, to alleviate these insufficiencies within 2 years from the date that determination is made. In addition, the bill would specify that school districts that receive funds for instructional materials from any state source are subject to the requirements of the bill only in a fiscal year in which the Superintendent of Public Instruction determines that the base revenue limit for each school district will increase by a specified amount.

The bill would provide sources for funding this plan. To the extent this bill would require the governing board of a school district to hold hearings, make determinations, and develop plans with existing sources of funding, it would impose a state-mandated local program.

In addition, the bill would create the Pupil Textbook and Instructional Materials Incentive Account in the State Instructional Materials Fund, with money in the account to be provided to school districts that meet specified criteria relating to the Pupil Textbook and Instructional Materials Incentive Program.

The bill would also make a statement of legislative intent.

The bill would reappropriate $9,118,000 of the amount appropriated in the Budget Act of 1994 for instructional materials, in a designated item of appropriation, to the Pupil Textbook and Instructional Materials Incentive Account in the State Instructional Materials Fund to be allocated to school districts, as specified.

To the extent the funds appropriated by this bill are for the support of public schools, those funds would be counted toward the minimum funding requirements imposed by Section 8 of Article XVI of the California Constitution.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 928 (AB 2638) T. Friedman. Controlled substances: public park or ocean-front beach.

Existing law makes it a felony, punishable by imprisonment in the state prison, to possess for sale or sell heroin, cocaine, cocaine base, methamphetamine, or phencyclidine (PCP).

This bill would provide that, from January 1, 1995, until January 1, 1998, any person who is convicted of any of these offenses, in addition to the punishment imposed for that conviction, shall be imprisoned in the state prison for an additional one year if the violation occurred upon the grounds of a public park or ocean-front beach, including adjacent public parking lots and sidewalks, and if no other additional punishment is imposed pursuant to specified provisions of the Uniform Controlled Substances Act.

The bill would also provide that its provisions shall apply to a public park or ocean-front beach only if the city council or county board of supervisors having jurisdiction over the public park or ocean-front beach adopts an ordinance designating the public park or ocean-front beach as a "drug-free zone" and notice of the bill's provisions is posted at the public park or ocean-front beach.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 929 (AB 2900) Alby. Commerce.

(1) Existing law, the State Assistance Fund for Enterprise Act of 1989, creates a corporation known as the State Assistance Fund for Enterprise, Business and Development Corporation, that is authorized to make loans to business firms meeting prescribed criteria.

This bill would prohibit the finance officer from executing any loan that is not approved for guarantee by the Small Business Administration under specified standards regarding that agency's prevailing standards for loans of similar type, purpose, amount, and duration, as specified.

(2) Existing law provides for the Trade and Commerce Agency consisting of the Department of Commerce and the California State World Trade Commission created for the purpose of promoting economic development. The work of the agency is divided between various offices including the Office of Competitive Technology.

This bill would rename the Office of Competitive Technology, the Office of Strategic Technology and add the Office of California-Mexico Affairs to the list of offices.

(3) Existing law authorizes that all persons employed by the California World Trade Commission on January 1, 1993, to participate in departmental promotional examinations for the California World Trade Commission for a one-year period following October 11, 1993.

This bill would authorize all persons employed by the California World Trade Commission on January 1, 1993, or current employees of the Trade and Commerce Agency in positions targeted to be converted to civil service to participate in departmental promotional examinations for the California World Trade Commission for a specified 2-year period.

(4) Existing law provides for the California Women's Business Ownership Fund in the State Treasury created to further the work of the California Council to Promote Business Ownership by Women within the Department of Commerce.

This bill would specifically provide that $20,000 from the fund may be expended in the 1994–95 fiscal year, thus constituting an appropriation, and that funding in subsequent years is subject to appropriation in the Budget Act.

(5) Existing law provides for the California Competitive Technology program within the Trade and Commerce Agency created, in part, to provide grants to technology transfer projects.

This bill would allow the agency to award funds on a multiyear basis to a grantee without requiring the grantee to reapply, so long as the funds in multiple years are for the same project originally funded.

(6) Existing law provides for a local area planning agency, the 19 member Metropolitan Transportation Commission, consisting, in part, of a nonvoting commissioner appointed by the Secretary of the Trade and Commerce Agency.

This bill would provide that the nonvoting commissioner appointed by the Secretary of the Trade and Commerce Agency shall instead be appointed by the Secretary of the Business, Transportation and Housing Agency.

Ch. 930 (AB 3673) Hauser. Petroleum storage tanks cleanup.

Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, requires any owner or operator of an underground storage tank containing petroleum, or other responsible party, to take corrective action in response to an unauthorized release in compliance with specified regulations adopted by the State Water Resources Control Board and specified provisions of the act.

This bill would require the board, in adopting those regulations, to develop corrective action requirements for health hazards and protection of the environment, based on the severity of the health hazards and other specified factors.

Ch. 931 (AB 3730) Umberg. Crime: stalking.

Under existing law, it is a crime for a person to willfully, maliciously, and repeatedly follow or harass another person and to make a credible threat with the intent to place that person in reasonable fear for his or her safety, or the safety of his or her immediate family.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that the present incarceration of a person making the threat shall not be a bar to prosecution for that crime.

This bill would incorporate additional changes in Section 646.9 of the Penal Code proposed by AB 95 (1st Ex. Sess.), to be operative only if AB 95 and this bill are both enacted and become effective on January 1, 1995, and this bill is enacted last.

Ch. 932 (AB 2550) Karnette. State Teachers' Retirement Law: administration.

(1) The State Teachers' Retirement Law requires the Teachers' Retirement Board to make specified deductions from refunds made upon termination of service.

This bill would repeal that provision on July 1, 1995, and would permit certain refunds to be canceled with restoration to membership.

(2) Chapter 893 of the Statutes of 1993 recast and recodified the State Teachers' Retirement Law.

This bill would make various technical, nonsubstantive changes to incorporate the changes made by this bill into the recodified provisions of the State Teachers' Retirement Law.

Ch. 933 (AB 3171) Napolitano. State Teachers' Retirement Law.

(1) The State Teachers' Retirement Law sets forth the provisions pursuant to which members of the State Teachers' Retirement System are provided specified benefits.

This bill would make various revisions to these provisions, including those provisions relating to membership status, the granting of leave, eligibility for service credit and certain benefits, and reinstatement to service.

(2) Chapter 893 of the Statutes of 1993 recast and recodified the State Teachers' Retirement Law.

This bill would revise the recodified provisions to reflect changes in the State Teachers' Retirement Law enacted by other legislation in 1993, and would make other technical and conforming changes.

(3) The State Teachers' Retirement Law sets forth the definitions of certain terms for purposes of the law.

This bill would place those provisions in alphabetical order.

(4) This bill would incorporate changes in the State Teachers' Retirement Law proposed by AB 3832 (Chapter 193 of the Statutes of 1994), to become operative on January 1, 1995, the effective date of AB 3832.

(5) This bill would incorporate additional changes in Section 23104 of the Education Code proposed by AB 2550, to become operative only if AB 2550 and this bill are both chaptered on or before January 1, 1995, and this bill is chaptered last.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 934 (AB 3720) Costa. Public utilities: telecommunications services.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities.

This bill would require the commission to require competitive intrastate interexchange telecommunications service, subject to specified conditions.

The bill would also require the commission to pursue all reasonable and necessary legislative and judicial actions to open California's intrastate interexchange markets to full competition. These provisions would be known as the California Long Distance Telecommunications Consumer Choice Act.

Since violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would specify that its provisions shall not take effect unless AB 3643 of the 1993–94 Regular Session of the Legislature is enacted and takes effect.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 935 (SB 492) Kelley. Fish and game.

(1) Existing law, the Wildlife Conservation Law of 1947, authorizes the Wildlife Conservation Board to investigate, study, and determine the areas in the state that are suitable for various purposes relating to wildlife and to determine what areas, lands, or rights in lands or waters should be acquired by the state in order to effectuate a coordinated and balanced program resulting in the maximum restoration of wildlife in the state and in the maximum recreational advantages to the people of the state. Existing law requires the board to authorize the acquisitions under specified conditions.

Existing law authorizes the Department of Fish and Game, when authorized by the board, to apply for and accept federal grants and receive gifts, donations, and other financial support from public or private sources for specified purposes. Funds received from those sources are required to be deposited in the Wildlife Restoration Fund. Existing law authorizes the board to authorize the department to lease, sell, exchange, or otherwise transfer real property, any interest in real property, or option acquired pursuant to that law, and requires the proceeds from those sources to be deposited in the Wildlife Restoration Fund.

This bill would provide that the net proceeds of the sale or other disposition of real property used as a fish hatchery that has been acquired by or is under the jurisdiction of the board or the department, either in easement or in fee, shall be deposited in the Wildlife Restoration Fund or the Fish and Game Preservation Fund, as determined by the board and would make those proceeds available for specified purposes.

(2) Existing law provides that any notice or other written communication required to be sent to a person pursuant to the Fish and Game Code or regulations adopted pursuant thereto is sufficient if sent by certified mail to the last address that the person furnished to the department.

This bill would provide that the notice is sufficient if sent by first-class mail to that address.

(3) Existing law, which is to be repealed on January 1, 1995, delegates to the Fish and Game Commission the power to regulate sportsfishing and the taking of specified mammals and resident game birds.

This bill would continue that existing law to January 1, 2000. Because the bill would require the commission to continue to perform those duties during that extended period, the costs of which are funded from a continuously appropriated fund, the bill would make an appropriation.

(4) Existing law, which is to be repealed on January 1, 1995, provides for the issuance of permits to land Dungeness crab, take sea cucumbers, or take hagfish for commercial purposes for specified fees.

This bill would make those provisions applicable to the taking of Dungeness crab and would make those provisions relating to Dungeness crab inoperative on April 1, 1997, and would repeal them on January 1, 1998. The bill would make the other provisions inoperative on April 1, 1998, and would repeal them on January 1, 1999. Because violations of those laws are crimes under existing law, the bill would impose a state-mandated local program by continuing the effect of those laws beyond January 1, 1995.

(5) The bill would also require the department to determine by September 1 of each year the total landings of hagfish in the year ending the previous June 30 from the landing receipts submitted by hagfish fishermen and, if the total landings in that previous year were more than 250,000 pounds, the bill would make the permit requirements for taking hagfish for commercial purposes operative for the following permit year commencing the next April 1. The bill would require the department to notify commercial fishermen of the permit requirements if they become operative.

(6) Existing law authorizes the taking of prawns or shrimp with prawn or shrimp traps at any time, and provides that, south of Point Conception to the southerly boundary of Ventura County, prawns or shrimp may be taken with those traps only in waters 50 fathoms or greater in depth.

This bill would repeal that authorization to take prawns or shrimp with those traps at any time and would change the range where prawns or shrimp may be taken with those traps only in waters 50 fathoms or greater in depth to the range from Point

NOTE: Superior numbers appear as a separate section at the end of the digests.

Conception to the Mexican border.

(7) Under existing law, a violation of the prohibition on taking fish for purposes other than profit without obtaining a license and having the license in possession is an infraction with specified penalties.

This bill would also make those penalties apply to a violation of a regulation requiring a license to be displayed, but would provide that a person may not be charged or convicted of both offenses for the same act.

(8) Under existing law, to obtain a permit to take sea cucumbers for commercial purposes a person is required to prove landings of sea cucumbers in the period of January 1, 1988, to June 30, 1991, as specified. To renew a permit, the person is required to have had a permit in the previous permit year.

This bill would authorize a person to appeal the denial of a sea cucumber permit under those provisions to the director on or before April 1, 1995, if the person can demonstrate to the satisfaction of the department that he or she had a vessel and trawl gear capable of fishing for sea cucumbers under a purchase contract, construction, or conversion between January 1, 1992, and May 1, 1992, and who otherwise was unable to meet the minimum landing requirements. The bill would specify the form and the proof of the facts required to be included in the appeal.

Because this provision for additional permits would result in the deposit of additional fees in the Fish and Game Preservation Fund, a continuously appropriated fund, the bill would make an appropriation.

(9) Existing law prohibits the possession of more than 1,500 pounds of incidentally taken fish per calendar day of a fishing trip, when fishing for pink shrimp (Pandalus jordani), except for Pacific whiting, shortbelly rockfish, and arrowtooth flounder which may be taken in any amount.

This bill, instead, would provide that under these circumstances, Pacific whiting, shortbelly rockfish, and arrowtooth flounder may be taken in any amount not to exceed federal regulations.

(10) Existing law provides that not more than 150 pounds of California halibut or Pacific halibut shall be possessed or landed when fishing under a trawl net permit issued in accordance with specified provisions of law.

This bill would exclude Pacific halibut from that authorization.

(11) Existing law prohibits the possession of more than 1,000 pounds of incidentally taken fish when fishing for ridgeback prawn and spotted prawn for commercial purposes under a permit, except for sea cucumbers that may be taken in any amount.

This bill would delete that exception for sea cucumbers.

(12) Under existing law, the department may authorize one or more persons to substitute for a Dungeness crab permittee and to land Dungeness crab under the authority of the permit from one or more vessels for which the permittee is the registered owner.

This bill would, instead, provide that, upon notification to the department, the permittee may authorize another person to substitute for the permittee and to land Dungeness crab under the authority of the permit. The bill would require the notice to be made by certified mail to a department office specified by the department, and to contain all the information required by the department.

(13) The bill would also delete obsolete provisions of law and would make other technical changes.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 936 (SB 732) Bergeson. Redevelopment: Community Redevelopment Law Reform Act of 1993.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities. Existing law, effective January 1, 1994, and known as the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Community Redevelopment Law Reform Act of 1993, revised the definition of a blighted area and enacted numerous other revisions in the Community Redevelopment Law, including the imposition of specified time limitations on redevelopment plans, the requirement of the adoption of implementation plans describing the goals and objectives of redevelopment agencies, and the inclusion of specified information on statements of indebtedness required to be filed by redevelopment agencies.

This bill would make numerous technical and clarifying revisions in provisions of the Community Redevelopment Law Reform Act of 1993, including revisions that define blight to mean, for the purpose of specified provisions, the conditions described in the definition of blight existing at the time the redevelopment plan was adopted or, at the option of the redevelopment agency, the conditions described in the definition of blight under the law as it exists at the time of the contemplated action.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 937 (SB 740) Watson. School improvement programs.

(1) Existing law establishes a program in 2 phases to improve certain schools with low schoolwide testing results and attendance rates by identifying these schools, under specified criteria, as focus schools and establishing instructional improvement programs, as specified, at those schools.

This bill would alter the criteria used to identify focus schools.

(2) Existing law requires the Superintendent of Public Instruction to biennially identify and evaluate each focus school in accordance with the specified criteria.

This bill would require the Superintendent of Public Instruction to annually identify and evaluate each focus school commencing at such time when 2 years of data from the statewide pupil assessment system is available.

(3) Existing law provides for written appeals to the Superintendent of Public Instruction for schools preliminarily identified as focus schools. Grounds for appeal include mitigating factors that impact the ability of the school to meet the criteria. Grounds for appeal also include mitigating factors that show that the criteria do not reflect the level of achievement at the school.

This bill would include as a mitigating factor a "high mobility rate for a significant percentage of the pupils at the school," as defined. The bill would also include as a mitigating factor "significant individual progress toward the statewide performance standard," as defined.

(4) Existing law requires a school that has been formally identified as a focus school to notify the parents of pupils attending the school. The bill would prohibit a school from being publicly identified as a focus school until there is final resolution of all appeals and would state that the preliminary notice regarding identification as a focus school is not a public record.

(5) Existing law specifies that any school that is identified as a program improvement school under the federal Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary Improvement Amendments of 1988 and is a focus school under the state program is deemed to have completed the first phase of the state program.

This bill would specify that, for a school under the federal program to be deemed as having completed the first phase of the state improvement program, the school must have been designated as a program improvement school under that federal law for at least 2 years.

(6) Existing law sets forth the factors that the Superintendent of Public Instruction is required to use to determine if a school shall remain in Phase I.

This bill would require a school to remain in Phase I if the testing results of pupils who have attended a school for more than one year exceeds the results of schools in its comparison group, except as specified.

(7) The bill would declare the intent of the Legislature that funding for specified provisions of the bill be provided in future Budget Acts and that the Superintendent of Public Instruction and the State Department of Education would only be required to implement these provisions in years in which sufficient funds have been appropriated.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 938 (SB 1295) Lockyer. Vehicles: driving under the influence.

(1) Existing law authorizes a person to voluntarily enter a driving under the influence program licensed under specified provisions of the Health and Safety Code if the person's privilege to drive has been suspended or revoked by the department pursuant to specified provisions. Existing law requires the completion of the specified program before restoration of the driving privilege if the person is subsequently convicted of a violation of specified provisions relating to driving under the influence of any alcoholic beverage or drug, or both, or driving with a specified blood-alcohol concentration. Existing law requires the department to restore the person's privilege to drive if specified conditions are met, including receipt by the department of satisfactory evidence of lack of prosecution of the specified violations.

This bill would delete the above provisions and would, instead, require the person to present evidence of satisfactory completion of a specified treatment program,, within a time period set by the department, after a conviction or a finding by a court of a violation of a specified provision relating to driving under the influence of any alcoholic beverage or drug, or both, or driving with a specified blood-alcohol concentration. The bill would require the department to suspend the driving privilege of any person who is not in compliance with the requirement and would prohibit the department from restoring that privilege until the department receives satisfactory proof of the completion of a specified treatment program. The bill would make conforming changes to related provisions of law. The bill would make these provisions operative on January 1, 1995.

(2) Existing law requires the Department of Motor Vehicles to suspend the privilege of a person to drive for one year upon receipt of a report that the person had refused a peace officer's request to take a prescribed preliminary alcohol screening test upon being detained for violation of a specified section of law relating to persons under the age of 21 years driving with a blood-alcohol concentration of 0.01%.

This bill would include any other chemical test in addition to the preliminary alcohol screening test authorized in existing law.

This bill would require the department to suspend the person's privilege to drive for 2 years if the refusal occurred within a specified time of conviction of a separate violation of other provisions or of a separate suspension or revocation of the privilege to drive under other provisions. The bill would require the department to suspend the driving privilege for 3 years if the refusal occurred within a specified time of 2 or more of the specified convictions, suspensions, or revocations, or any combination thereof.

(3) Existing law requires the department to suspend a person's driving privilege to drive for a prescribed period if the department determines that the person violated specified provisions relating to driving with prescribed blood-alcohol concentrations. The department is required to suspend the privilege to drive for an additional time if the violation occurred within a specified time of other violations.

This bill would add additional violations for which the department would be required to suspend the driving privilege.

(4) Existing law prohibits the department from restoring the driving privilege during the suspension or revocation period to persons who have violated specified provisions relating to driving a vehicle with specified blood-alcohol concentrations or refusing to take a chemical test upon the request of a peace officer. Existing law prohibits the department from restoring the driving privilege after a suspension or revocation that was imposed pursuant to specified provisions until specified conditions have been met, including the payment of all applicable reinstatement fees.

This bill would expand the condition specified above to include the payment of all applicable fees.

This bill would prohibit the department from restoring the driving privilege during the suspension or revocation period to persons who have violated a specified provision relating to refusing to take a preliminary alcohol screening test, or other chemical test, upon the request of a peace officer.

(5) Existing law authorizes a person who has received a notice or an order of suspension of the driving privilege pursuant to specified provisions to request a hearing with

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the department.

This bill would add to the list of provisions for which a hearing is authorized a provision relating to refusing to take a specified preliminary alcohol screening test upon the request of a peace officer.

(6) Existing law prohibits a person from driving a motor vehicle at any time when the person's privilege to drive has been suspended or revoked pursuant to specified provisions and that person has knowledge of the suspension or revocation. Existing law prohibits driving while the privilege to drive has been restricted pursuant to specified provisions, except in compliance with the restriction.

This bill would add other circumstances under which the driving privilege may be suspended, revoked, or restricted.

(7) Existing law requires a specified program relating to driving under the influence to be of an appropriate length and scope, as determined by the number of prior convictions of violations of specified provisions.

This bill would delete a provision relating to persons under the age of 21 years driving with a blood-alcohol concentration of 0.05% or more from the list of specified provisions.

(8) Existing law authorizes any peace officer, as defined, to remove a vehicle under specified circumstances.

This bill would authorize the removal of a vehicle when an officer serves a notice of an order of suspension or revocation of a driver's license pursuant to a specified provision.

(9) Existing law makes it unlawful for a person under the age of 18 years who has a specified blood-alcohol concentration to drive a vehicle.

This bill would change the specified age from 18 to 21 years. Because this change would make the prohibition applicable to more persons, the bill would create a state-mandated local program by creating a new crime.

(10) The bill would make other technical and clarifying changes.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(12) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 939 (SB 1393) Committee on Local Government. Local agencies.

Existing law requires agencies and nonprofit corporations that issue mortgage revenue bonds to file specified reports to the California Debt Advisory Commission and that the agency or nonprofit corporation cannot issue those bonds until the State Treasurer certifies to the Legislature that the report has been filed with the commission.

This bill would delete the requirement that the State Treasurer certify to the Legislature that the reports have been filed.

Existing law specifies that all meetings of the county board of supervisors pertaining to salaries of county employees be open and public with a specified exception from the Ralph M. Brown Act, which relates to open meetings of local agencies.

This bill would state that the meetings are open and public except as provided in the Ralph M. Brown Act.

Existing law specifies that a county may manage its real property in specified ways including sale, lease, development, and other disposition after compliance with specified procedures. Existing law requires the county to hold a noticed public hearing and to adopt an ordinance subject to referendum before taking action on the real property.

This bill would make those requirements applicable to a lease of county real property with an option to purchase for a term not to exceed 99 years.

Existing law permits the board of supervisors in a county having a population of 1,000,000 or more to prescribe by ordinance an alternate procedure to that prescribed by statute for the sale or lease of real property.

This bill would provide that the necessary population level shall be based on the most recent estimate by the demographic research unit of the Department of Finance.

Existing law permits a county board of supervisors to establish a procedure for the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

abatement of a nuisance. The procedure requires, among other things, that the owner of the parcel, or anyone known to be in possession of the parcel, be given notice of the abatement proceeding and an opportunity to appear before the board and be heard prior to abatement of the nuisance by the county. However, in counties with a population of 1,000,000 or more, the board of supervisors may delegate the hearing to a designated hearing board.

This bill would permit the board of supervisors, by ordinance, to delegate to a hearing officer of the office of county hearing officer its powers and duties under the procedure. The bill would also permit the board of supervisors of any county to delegate the hearing to a designated hearing board.

Existing law requires the county treasurer to disburse funds only on county warrants issued by the county auditor, except for the making of legal investments. Existing law requires those investments to be reported daily to the county auditor-controller.

This bill would require the county treasurer to disburse funds only on county warrants, checks, or electronic fund transfers issued by the county auditor and would delete the requirement of daily reporting of investments.

Existing law permits the county board of supervisors to extend the August 30 date for adoption of a county budget in any year when the state budget is enacted after July 1.

This bill would permit the board by resolution to extend that date to October 2 on a permanent or limited basis.

Existing law requires that, upon the filing of an affidavit that a county warrant has been lost or destroyed, the county auditor shall issue a duplicate warrant to the legal owner or custodian bearing the same date as the original warrant.

This bill would delete the requirement that the duplicate warrant bear the same date as the original warrant.

Existing law permits the county board of supervisors to establish a different period of time of at least 7 days but shorter than the 20-day period after mailing and failure to receive a county warrant, prescribed by statute, to determine that a warrant is lost.

This bill would delete the requirement that the shorter period be at least 7 days.

Existing law authorizes a community services district to fix a $10 water or sewer standby or availability charge for each acre of land or each parcel of less than an acre to which water or sewers are made available by the district.

This bill would permit a district to use the Uniform Standby Charge Procedures Act to fix and levy standby and availability charges for water, sewer, or water and sewer services.

Existing law permits a city to prezone adjoining unincorporated territory to determine what zones will apply in the event of annexation.

This bill would permit prezoning of unincorporated territory to determine the zoning that will apply to that territory upon annexation.

Under the existing Community Redevelopment Law, the territorial jurisdiction of the redevelopment agency of a county over a project area within territory subsequently annexed to a city or included within the boundaries of a new city remains with the county redevelopment agency unless the territorial jurisdiction is transferred to the city redevelopment agency pursuant to specified procedures.

This bill would provide that if noncontiguous territory of a project area of an agency of a county is subsequently included within the boundaries of a new city, the jurisdiction of the noncontiguous territory may be transferred to the agency of the city pursuant to those procedures and would make other conforming changes.

Existing law requires the Department of Housing and Community Development to report to the Legislature on or before December 31, 1991, and annually thereafter on provisions of the state housing law.

This bill would change that date to April 1, 1995.

Under existing law, traffic fines and forfeitures collected by cities and counties are divided by the local agency and the state according to prescribed formulas.

This bill would provide that in any fiscal year that a county, which has an agreement that was in effect on March 22, 1977, that gives city fines and forfeitures to the county in exchange for sales tax receipts, does not remit to the state General Fund an amount

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

equal to the amount during the 1993–94 fiscal year, that county shall make a payment from county funds equal to the difference to the state General Fund by October 1 of the subsequent fiscal year.

Existing law excludes certain activities from the Surface Mining and Reclamation Act of 1975.

This bill would make a technical change to one of those exclusions.

Existing law authorizes the board of directors of a resource conservation district, by resolution, to request the board of supervisors to appoint the directors, except those first elected, from those candidates who have filed an application, as prescribed, with the elections official. The board of supervisors' appointments are required to be made by ordinance. The resolution of the board of directors remains in effect until rescinded by the board of directors or until a petition requesting the rescission is signed by 10% of the registered voters or 50 voters, whichever is the smallest number, in the district.

This bill would delete the requirement that the board of supervisors make appointments by ordinance, and would provide that the appointment be made from candidates that have filed an application with the board of supervisors, as prescribed by the board of supervisors. This bill would require that a petition to rescind the resolution of the board of directors be instead signed by 5% of the registered voters in the district.

Existing law generally specifies that, where a public utility district formed and operating pursuant to the Public Utility District Act is situated entirely in one county, the directors of the district shall be elected at large.

This bill would permit directors of any public utility district that is wholly or partially within the County of Placer to be elected at large, by wards, or from wards, as defined.

Existing law specifies how the number of directors of a public utility district is determined.

This bill would specify that if a reorganization occurs that involves the Fallbrook Public Utility District and the Fallbrook Sanitary District that dissolves the sanitary district and allows the utility district to provide sewer service, the number of directors shall be seven. This provision would be repealed December 31, 1996.

Existing law allows the City of South Lake Tahoe to select, for purposes of making annual reports to the state Controller on financial transactions and on street and road spending, on a one-time basis, a fiscal year that does not end on June 30.

This bill would permit the City of Huntington Beach to do the same.

Existing law provides that if the Capistrano Beach County Water District has assumed the responsibilities of the Capistrano Beach Sanitary District it may increase the number of its directors to 7, 9, or 11.

This bill would instead provide that if the Orange County local agency formation commission orders the reorganization of those districts into a single district, the board of directors shall initially consist of 10 members who shall be the combined boards of directors of the 2 districts as of the effective date of the reorganization. The bill would also provide for the reduction of the board to 7 members, as specified, and would permit the board to choose not to fill vacancies when the total number of directors is greater than 5.

Existing law prohibits a county treasurer from paying a warrant for the creation or replenishment of a revolving fund of a reclamation district unless a bond in double the amount of the fund and meeting other conditions has been filed with the county treasurer.

This bill would substitute for the bond a condition that the order creating the revolving fund included the assumption by the district of the responsibility for the disbursement of the fund and contains an agreement to hold and save the county treasurer harmless from any improper disbursement of the fund.

The bill would also authorize a reclamation district to conduct an election by all-mailed ballots under a specified procedure.

This bill would declare the need for a special law with respect to specified provisions of the act.

This bill would provide that certain provisions of the act shall become operative on January 1, 1995.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 940 (SB 1626) Marks. Vessels: taxes and costs.

Existing law requires the Department of Motor Vehicles to perform certain duties within 15 days of receiving an application for a possessory lien sale with respect to a vessel of a value that is determined to exceed $1,500.

This bill would expand those duties to include a notice, as provided, to the applicant of any outstanding property tax lien on that vessel of which the Department of Motor Vehicles has itself been notified pursuant to a specified statute.

Existing law with respect to vessels authorizes a municipal corporation or other public corporation, subject to certain notice requirements, to sell, destroy, or otherwise dispose of abandoned property, as defined, that is located within its corporate limits.

This bill would expand this authorization by allowing a municipal corporation or other public corporation to charge a fee to the person that is determined by that corporation to have caused the property to become abandoned in an amount not to exceed the corporation's actual and reasonable costs incurred under the authorization. This bill would also clarify this authorization with respect to the taking of title to abandoned property by the public corporation, and the satisfaction of any property tax lien on the abandoned property that is so acquired.

Existing property tax law provides that a documented vessel, as defined in a specified statute, shall be assessed at 4% of its full cash value if it is engaged or employed exclusively in, among other activities, carrying or transporting 7 or more people for hire for commercial passenger fishing purposes.

This bill would provide that a vessel shall not be deemed to be engaged in activities other than the carrying or transporting of 7 or more persons for hire for commercial passenger fishing purposes by reason of that vessel being used occasionally, as defined, for dive, tour, or whale watching purposes.

This bill would classify additional vessels for differential taxation within the meaning of Section 2 of Article XIII of the California Constitution, and thus would require for enactment the approval of ⅔ of the membership of each house of the Legislature.

Existing law prohibits the Department of Motor Vehicles from renewing the certificate of a vessel until delinquent property taxes with respect to that vessel, as reported to the department by the county tax collector, are paid, and authorizes the county tax collector to so notify the owner of the tax delinquent vessel. Existing law also conditions the effective transfer or the title or any interest in an undocumented vessel upon compliance with certain requirements.

This bill would additionally prohibit the Department of Motor Vehicles from allowing any transfer of any title to or interest in a vessel until delinquent property taxes with respect to that vessel, as reported by the county tax collector, are paid, and would authorize the county tax collector to so notify the owner of the tax delinquent vessel. This bill would also establish the payment of delinquent property taxes as an additional requirement for the effective transfer of title to, or any interest in, an undocumented vessel.

This bill would provide that it shall become operative on July 1, 1995.

Section 2229 of the Revenue and Taxation Code provides that no new classification or exemption of property for purposes of ad valorem property taxation shall extend for more than 5 years or shall exempt more than 75% of the value thereof. That section also requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any such exemption or classification.

This bill would provide that the requirements of Section 2229 of the Revenue and Taxation Code do not apply to the property tax classification or exemption provided by the bill, and that no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

Ch. 941 (SB 1846) Mello. Telephone corporations: intrastate inter-exchange boundaries.

Existing law sets forth the duties and authority of the Public Utilities Commission in regulating telephone corporations in the state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the commission to pursue all available legal remedies to redraw intrastate inter-exchange boundaries for the purpose of eliminating restrictions that result in discriminatory costs, added inconvenience, and less service for consumers of telecommunications services solely in and between the Counties of Monterey and Santa Cruz.

Ch. 942 (SB 1915) Marks. State contracts: procurement of recycled paper products.

Existing law provides that it is the intent of the Legislature to encourage the procurement of recycled paper products by various state agencies and requires state agencies to give purchase preference to recycled paper products, as defined, as well as set percentage goals for the purchase of recycled paper.

This bill would revise the definition of recycled paper products for those purposes. It would also define "recycled paper" for certain fine grades of paper and would increase the postconsumer material content in these papers, as specified, effective January 1, 1999.

The bill would specify that changes from the terms "postconsumer waste," "secondary waste," and "total weight" to "postconsumer material," "secondary material," and "fiber weight" made by this bill would take effect immediately, but that other changes to provisions relating to certain fine grades of paper would not become operative until January 1, 1995.

The bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 943 (SB 1939) Rosenthal. Telephone corporation: rates.

Existing law authorizes the Public Utilities Commission to establish rates for telephone corporations.

This bill would require the commission to extend special programs for up to a 3-year period to encourage telecommuting in the area of the state affected by the Northridge earthquake of 1994.

The bill would require the commission to initiate an investigation into the establishment of special telecommunications programs to encourage telecommuting in the entire state, and report to the Legislature its findings and recommendations by December 1, 1995.

Ch. 944 (AB 2398) Gotch. Highways: environmental mitigation.

Existing law declares the Legislature's intent to annually allocate $10,000,000 to the Environmental Enhancement and Mitigation Demonstration Program Fund to be used for making grants to local, state, and federal agencies and nonprofit entities that undertake projects to mitigate the adverse environmental effects of existing and future transportation facilities.

This bill would appropriate $887,000 from the fund to the Department of Transportation for the purposes of that program.

Ch. 945 (AB 2576) Baca. Public utilities: economic development.

Existing law requires the Public Utilities Commission to authorize public utilities to engage in programs to encourage economic development. It does not authorize the commission to establish discriminatory rates for the purpose of attracting or benefiting specific industries or business entities, however it authorizes the commission to provide incentives for the benefit of industries or business entities located within the boundaries of enterprise zones or economic incentive areas.

This bill would permit the commission to authorize rate discounts to industries or business entities whose facilities are located or will be located within the boundaries of enterprise zones, recycling market development zones, or economic incentive areas in addition to the incentives permitted by existing law. The discounts would be applied in the form of reduced monthly rates on utility bills, or, for industries or business entities that agree to maintain their facilities in an enterprise zone, a recycling market development zone, or an economic incentive area for a minimum of 5 years from the date of commencement of the discount, the utility would be authorized to assign the dis-

NOTE: Superior numbers appear as a separate section at the end of the digests.

counts to a private or public entity that returns consideration of like value to those customers.

Ch. 946 (AB 3429) Bustamante. Public Utilities Act: low-income assistance.

The Public Utilities Act requires the Public Utilities Commission to establish a program of assistance to low-income electric and gas customers, to include, as soon as practicable, nonprofit group living facilities specified by the commission.

This bill also would require the commission to include within this program, under specified conditions, migrant farmworker housing centers, as defined, employee housing, as defined, that is licensed and inspected by local or state agencies, and housing for agricultural employees, as defined.

Ch. 947 (SB 491) Rosenthal. Public utilities: assistance program for low-income gas and electric customers.

Existing law requires the Public Utilities Commission to establish a program of assistance to low-income electric and gas customers, which is required to include nonprofit group living facilities under specified conditions.

This bill would designate the program as the California Alternate Rates for Energy or CARE program, and would require the commission to authorize utilities to offer discounts to specified eligible facilities.

This bill would specify that it would not become operative if AB 1879 is chaptered.

Ch. 948 (SB 707) Committee on Revenue and Taxation. Income taxes: bank and corporation taxes.

The Personal Income Tax Law requires every individual to file a tax return for a taxable year if that individual has an adjusted gross income or gross income in excess of the threshold amount designated for the class of persons that includes that individual.

This bill would, by reference to a specified provision of the federal tax that relates to the standard deduction allowed to certain dependents, establish a threshold amount for the filing of a separate state tax return by one of those dependents that is equal to the amount of the standard deduction allowed under that federal provision.

The Bank and Corporation Tax Law does not specify whether adjusted current earnings are to be determined on the level of individual entities or upon the combined report of a unitary group.

This bill would specify that adjusted current earnings are to be determined on the level of individual entities.

The Bank and Corporation Tax Law provides that all banks and corporations subject to tax under that law shall pay annually to the state a minimum franchise tax of $800, except as specified. Existing law requires that every limited partnership doing business in this state and required to file a specified return pay a minimum tax of $800. Existing law also requires, for taxable years beginning on or after January 1, 1993, that every limited partnership that has executed, acknowledged, and filed a certificate of limited partnership with the Secretary of State pay that minimum tax.

This bill would provide that specified limited partnerships are subject to that tax, and other specified limited partnerships are not subject to that tax, as provided.

This bill would also make various technical, clarifying changes.

This bill would take effect immediately as a tax levy.

Ch. 949 (AB 2407) Klehs. Income and bank and corporation taxes.

The Personal Income Tax Law authorizes a specified net operating loss deduction until January 1, 1997, whereas the Bank and Corporation Tax Law authorizes that net operating loss indefinitely.

This bill would, under the Personal Income Tax Law, extend the operation of the net operating loss provisions indefinitely. This bill would, under the Personal Income Tax Law and the Bank and Corporation Tax Law, make various clarifying and supplemental changes to the net operating loss deduction allowed to a new business, including, among other things, changes to prevent the evasion of the purposes of those provisions, as provided.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The Bank and Corporation Tax Law, by reference to a specified federal law, authorizes a credit for increasing research activities until June 30, 1995.

This bill would extend the operation of that credit indefinitely.

This bill would incorporate amendments to Section 23609 of the Revenue and Taxation Code made by SB 1805 if both this bill and SB 1805 are chaptered and this bill is chaptered last.

This bill would take effect immediately as a tax levy.

Ch. 950 (AB 1334) Gotch. Minors: transitional shelter care.

(1) Existing law provides for the licensing of community care facilities.

This bill would include transitional shelter care facilities, as defined, within the scope of the definition of community care facilities, and would require the licensing of those facilities.

(2) Existing law requires the Director of Social Services to deny a license to any application for a new residential care facility license if the director determines that the facility is in such proximity to an existing residential care facility as would result in overconcentration.

This bill would exempt any transitional shelter care facility, as defined, that is subject to licensing from that license denial requirement.

Ch. 951 (AB 1674) Margolin. Insurance: notices.

Under existing law, if the Insurance Commissioner finds that liability insurance for a designated class of risk is not readily available, the commissioner may authorize the formation of voluntary market assistance programs, which must meet specified requirements. If, after a hearing, the commissioner determines that a market assistance program has failed to provide adequate liability insurance coverage, the commissioner may order the creation of a temporary joint underwriting association. Every insurer writing liability insurance would be a member of the association, which shall have powers and duties specified by statute. The association would continue in existence for one year from the date of its creation unless renewed because of a determination of the necessity of its continued existence. The association would be required to have a plan or operation to provide for liability insurance for designated types of risks, subject to the approval of the commissioner. These provisions will be repealed on December 31, 1994, unless extended by a subsequently enacted statute.

This bill would extend the repeal date to January 1, 1996.

Ch. 952 (AB 1965) Goldsmith. County general assistance programs.

Existing law requires each county to relieve and support all incompetent, poor, indigent persons, and those incapacitated by age, disease, or accident lawfully resident therein, when these persons are not supported and relieved by their relatives and friends, by their own means, or by state hospitals or other state or private institutions. These programs are commonly referred to as county general assistance programs.

Existing law, effective until January 1, 1995, authorizes each county to adopt general assistance residency requirements, discontinue general assistance benefits, and establish a standard of general assistance for applicants and recipients who share housing with one or more unrelated persons or with one or more persons who are not legally responsible for the applicant or recipient under specified circumstances.

This bill would extend these provisions until January 1, 1997, except that it would eliminate the authority to establish a general assistance standard for recipients who share housing.

The bill would require the Legislative Analyst to conduct an evaluation of the impact of these residency and benefit discontinuance provisions.

Ch. 953 (AB 2142) Bates. Family law: support.

(1) Existing law sets forth the statewide uniform guideline for determining child support orders, as specified. Existing law authorizes the Judicial Council to develop model worksheets to assist parties in determining the approximate amount of child support due under the statewide uniform guideline and the approximate percentage of

NOTE: Superior numbers appear as a separate section at the end of the digests.

time each parent has primary physical responsibility for the children, and a form to assist the courts in making certain findings and orders pertaining to the guideline.

This bill would require the Judicial Council, in consultation with representatives of specified entities, to develop a simplified income and expense form for determining child support under the statewide uniform guideline by June 1, 1995, and to develop factors to use to determine when the simplified income and expense form may be used and when the standard income and expense form must be used.

(2) Existing law requires the district attorney to take appropriate action to establish, modify, and enforce child and spousal support obligations on behalf of individuals receiving public assistance, and permits the district attorney to take these actions in other cases.

This bill would require the Judicial Council, in consultation with the representatives of specified entities, to develop simplified complaint and answer forms for these support actions. The bill would require the simplified answer form to be served on all defendants with the simplified complaint.

(3) Existing law requires the district attorney or the Attorney General to provide specified notices to persons requesting services involving paternity or support obligations from the district attorney or Attorney General, including notices concerning the relationship between the person requesting services and the district attorney or Attorney General and the status of that person's case.

This bill would specify that these notices are not required in foster care cases.

(4) Existing law provides that one of these notice requirements is that the district attorney or Attorney General give reasonable notice of the initial date and time, and purpose of every hearing in these support actions.

This bill would specify language to be used for this notice, thus imposing a state-mandated local program.

(5) Existing law requires the State Department of Social Services to develop a statewide registry of all child support orders in the state, and to implement the registry when the Statewide Automated Child Support System is operational, as specified. Existing law requires the department to contract with the Judicial Council to prepare specified forms for purposes of the registry, and requires the Judicial Council to complete the preparation of the forms by January 1, 1995.

This bill would revise and recast these provisions, and would, among other things, require the department to begin development of the registry when federal funds are available for the costs of the registry or on April 30, 1996, whichever occurs first, and delete the requirement that the Judicial Council complete the preparation of the forms described above by January 1, 1995.

(6) This bill would incorporate changes to Section 11475.1 of the Welfare and Institutions Code proposed by AB 2208, contingent on its prior enactment.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 954 (AB 2635) Hauser. Ambulance drivers: exemptions.

Under existing law, every ambulance driver is required to have been trained to assist the ambulance attendant in the care and handling of the ill and injured. Existing law further requires the driver of a California-based ambulance to, within one year of initial issuance of his or her ambulance driver certificate, possess a certificate or license evidencing compliance with the emergency medical training and educational standards established for ambulance attendants by the Emergency Medical Service Authority.

This bill would exempt from those certificate or licensing requirements certain drivers who volunteer to drive for a volunteer ambulance service under a specified procedure,

NOTE: Superior numbers appear as a separate section at the end of the digests.

if the service is provided in the unincorporated areas of a county with a population of less than 125,000 persons. The bill would authorize the Director of Motor Vehicles to terminate any ambulance driver certificate issued under that exemption, under specified circumstances.

Ch. 955 (AB 2717) Morrow. California Children's Services Program: income eligibility: reimbursement.

Existing law requires the State Department of Health Services to establish and administer a program of services for physically handicapped persons under the age of 21 years, in cooperation with the federal government, and sets forth eligibility standards for treatment services. Under existing law, the board of supervisors of each county is required to designate a county agency to administer the program in that county.

This bill would require applicant families, prior to being determined financially eligible for services under the program, to agree to repay the program for any services authorized by the program in an amount not to exceed the proceeds of any judgment, award, or settlement for damages or pursuant to an agreement relating to a medically eligible condition.

Existing law provides that a recipient of treatment services provided by this program, or his or her representative, who brings an action against a 3rd person who may be liable for the injury is required to provide certain notice of these proceedings to the State Director of Health Services, except where the director specifies that notice is to be given to the Attorney General or to the county agency administering the program.

This bill would instead require that this type of notice be provided to the director and the county administering the program, and would authorize the director to provide notice to the Attorney General. This bill would further require that the amount of any judgment, award, or settlement relating to medically eligible conditions for which treatment services have been provided under the program be subject to a claim by the department or the county designated agency for reimbursement of the costs of the benefits provided, or to a lien against that judgment, award, or settlement. It would provide that in the event there is a judgment against a 3rd person for liability for a medical condition for which treatment was provided under this program, a court or other agency would be required to first order reimbursement for the actual costs of the treatment services.

This bill would authorize the department or the county to enforce this right to reimbursement by instituting and prosecuting legal proceedings.

Ch. 956 (AB 2836) Snyder. Physical therapy: licensing.

Existing law prohibits the practice of physical therapy without a valid license issued by the Physical Therapy Examining Committee. Existing law authorizes the utilization of an aide by a licensed physical therapist to assist in his or her practice of physical therapy. Existing law also provides for the approval by the committee of physical therapist assistants. Existing law defines the scope of practice of physical therapists and physical therapist assistants.

This bill would require the committee to adopt regulations setting forth standards and requirements regarding the supervision of an aide and a physical therapy assistant, and would instead authorize a physical therapist to utilize the services of one aide engaged in patient-related tasks, as defined. This bill would require that the maximum number of physical therapist assistants that may be supervised by a physical therapist be 2 assistants, but would authorize the committee, under certain circumstances, to permit the supervision of a greater number not to exceed twice the number of physical therapists employed by a facility at any one time. This bill would prescribe the manner in which a physical therapist is required to supervise an aide performing patient-related tasks, and would require that the physical therapist provide direct service to a patient for whom an aide is performing patient-related tasks.

Existing law authorizes a licentiate to use initials indicating possession of a specific academic degree issued by an institution accredited by certain accrediting agencies.

This bill would add the United States Department of Education to the list of accrediting agencies.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law delineates the educational requirements and the standards for licensure as a physical therapist or for approval as a physical therapist assistant.

This bill would revise these requirements and standards. This bill would also revise the requirements for practice while an applicant for licensure is a "physical therapist license applicant" or while an applicant for approval is a "physical therapist assistant applicant." The bill would provide that upon the failure of an applicant for licensure as a physical therapist or a physical therapist assistant to satisfy subsequent licensure requirements, when the applicant is temporarily performing the duties of a physical therapist or assistant, as authorized by existing law, the privilege to perform those duties will terminate upon notice by certified mail, return receipt requested.

Existing law authorizes an applicant for licensure who fails to pass the examination to, in certain circumstances, be reexamined 3 times before paying an additional reexamination fee.

This bill would instead authorize applicants who fail to pass the examination to take another examination, and would require that they pay the reexamination fee.

Existing law requires the committee to approve certain schools of physical therapy and schools for physical therapist assistants in accordance with specified standards.

This bill would revise the standards for approval of physical therapy education programs and physical therapist assistant education programs.

This bill would make additional technical changes.

Under existing law, violation of the provisions relating to the practice of physical therapy is a misdemeanor.

By revising these provisions, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

This bill would incorporate additional changes related to amendment of Section 2630 of the Business and Professions Code, proposed by SB 437, to be operative only if SB 437 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 957 (AB 2967) Committee on Higher Education. Earthquake relief.

Existing law contains various provisions governing California postsecondary educational institutions.

This bill, which would enact the Higher Education Emergency Earthquake Recovery Act of 1994, would do all of the following:

(1) With regard to the California Community Colleges, the bill would provide that in addition to any other adjustments authorized by law, any decrease in the 1993–94 fiscal year in full-time equivalent student enrollment resulting solely from the Northridge earthquake in the spring and summer terms of that fiscal year, as determined by the chancellor, in the Antelope Valley, Los Angeles, Santa Clarita, Santa Monica, or Ventura Community College Districts would not result in any reduction in revenue for the 1994–95 fiscal year.

(2) With regard to the California State University, Northridge, the bill would provide, until June 30, 1995, as follows:

(a) In any instance where necessary records are not fully available to the campus for the completion of reports or other actions required by statute or regulation, state agencies would be required to provide the university a reasonable extension of deadlines.

(b) The deadline for specified reports that are required by statute to be submitted to the Legislature may be extended by the trustees, as specified.

(3) The provisions of the bill would be repealed as of January 1, 1996.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 958 (AB 3010) Vasconcellos. Public child care institutions.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, through which qualified children in foster care are provided assistance for specified needs. The AFDC-FC program is administered and partially funded by counties, and is administered pursuant to regulations adopted by the State Department of Social Services.

Under existing law, a child who is otherwise eligible for federal financial participation in the AFDC-FC payment may be eligible for aid under the AFDC-FC program when the child is placed in a public child care institution during federal fiscal years when no restriction on federal matching for AFDC-FC payments exists.

This bill would require the State Department of Social Services, upon notification by the federal government that those restrictions do not exist, to amend the state plan for the AFDC-FC program to authorize federal financial participation to all counties operating a public child care institution that is a temporary shelter care facility with a licensed capacity exceeding 25 children.

Ch. 959 (AB 3072) Costa. Child support.

(1) Existing law provides for the enforcement of child support, as specified.

This bill would specify that court orders and money judgments for child support shall provide notice that interest on arrearages accrues at the legal rate. By imposing additional duties on district attorneys with respect to required contents of statements of account, the bill would create a state-mandated local program.

(2) Existing law provides that the district attorney and other specified agencies shall enforce child support obligations utilizing specified civil penalties.

This bill would provide, instead, that the district attorney or other agency may not enforce those obligations utilizing those penalties. It also would specify the Legislature's intention that these penalties be applied in egregious instances of noncompliance with child support orders.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 960 (AB 3320) Takasugi. Unemployment insurance: disability benefits.

Under existing law, a waiver by a person of any unemployment benefit or right is invalid, except as specified.

This bill would add to the valid waivers the ability of an individual covered by a voluntary plan to voluntarily allow his or her plan administrator to redirect a portion of his or her voluntary plan benefits to cover either part or all of the costs of employee-paid benefits. An individual who redirects his or her benefits would be required to designate in writing the weekly dollar amount to be redirected, and would have the power to terminate or change the terms of the redirection.

Existing law requires any employer who elects to pay unemployment insurance disability benefits pursuant to a voluntary plan but whose liability to pay the benefits is not assumed by an admitted disability insurer, to file a bond or deposit securities with the Director of Employment Development to ensure payment by the employer pursuant to the plan.

This bill would additionally allow for the deposit of an irrevocable letter of credit. The bill would provide that this provision shall become operative, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 961 (AB 3364) Bates. Family preservation and support services.

(1) Existing law contains various programs to provide services to families, including child abuse and neglect prevention programs and child welfare services programs.

This bill would require the State Department of Social Services to implement a program of family preservation and support services that meets federal requirements and would establish specified procedures for the allocation of federal funding for family preservation and support programs. The bill would authorize counties to participate in the program.

(2) Existing law authorizes counties or cities and counties with a family preservation program in operation at least 3 consecutive years prior to the year in which the transfer is to occur, to request the department to transfer once, on a permanent basis, funds from the category of General Fund moneys appropriated for specified types of out-of-home placements to the category of child welfare services for the purposes of providing family preservation services.

Existing law requires the county to make the request as part of a specified annual family preservation services program application and documentation submitted to the department.

This bill would, instead, authorize counties or cities and counties with a family preservation program in operation at least 3 consecutive years to request a permanent transfer of these funds, and would expand the category of General Fund moneys from which a transfer may be made. The bill would require the county to make the request to the department no later than 90 calendar days following the beginning of the fiscal year in which the permanent transfer is to be made, or 90 days following the date on which the annual Budget Act is chaptered, whichever is later. It would also authorize a county to request a permanent transfer of funds retroactively to July 1, 1993, subject to specified conditions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 962 (AB 3550) Woodruff. Alcohol and drug abuse: runaway and homeless youths.

Existing law requires the State Department of Alcohol and Drug Programs to develop and implement, in partnership with counties, alcohol and drug prevention strategies especially for youth.

Existing law requires the Office of Criminal Justice Planning to administer 2 homeless youth projects in Los Angeles and San Francisco and requires those projects to provide food and access to overnight shelter, counseling, outreach services, screening for basic health needs, linkage to other services, long-term stabilization planning, and followup services.

Existing law established, to the extent funding was provided, a 2-year pilot project in the County of Los Angeles to operate an outreach program targeted at treating substance abuse problems of substance-dependent homeless youth, including juvenile prostitutes. Under existing law, the department, in consultation with the Office of Criminal Justice Planning, is required to develop guidelines for the scope of, and supervise the management of, the pilot project.

Existing law also requires the department, in consultation with, the Office of Criminal Justice Planning, to submit to the Legislature a written interim evaluation of the effectiveness of the pilot project.

This bill would expand the substance-dependent homeless youth program to include the City and County of San Francisco, and provide for it to operate for 2½ years. It would require the department to enter into separate contracts with the substance-dependent homeless youth project in the County of Los Angeles and with the project in the City and County of San Francisco for $125,000 for the remainder of the 1994–95 fiscal year, and for $250,000 per year for the following 2 consecutive fiscal years for each contract for a duration of 2½ years commencing January 1, 1995, and would require the contract terms to be in accord with the funding. The bill would provide that the program shall cease to operate on June 30, 1997. This bill would repeal the provisions requiring the written interim evaluation.

This bill would appropriate $1,250,000 of available and unencumbered federal trust

NOTE: Superior numbers appear as a separate section at the end of the digests.

funds to the department for purposes of funding the contracts for fiscal years 1994–97.

This bill would provide that the funds for the project in the County of Los Angeles be appropriated by the department to the county, would require the county to expend the funds solely for purposes of the project located at the Los Angeles Children's Hospital, and would allow the county to retain a portion of the funds that reflects the actual costs, if any, incurred by the county in making this expenditure.

This bill would provide that the obligations of the City and County of San Francisco and the County of Los Angeles to provide services under their programs is limited to the amount of funds provided by the section adding these provisions. It would provide that additional funds, with the exception of federal block grant funds, may be expended for either or both of the programs to the extent that other nonstate sources of funding become available.

By requiring the County of Los Angeles to administer the expenditure of these funds, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 963 (SB 853) Greene. Workers' compensation.

Existing law authorizes collective bargaining agreements between a private employer or groups of employers engaged in construction, construction maintenance, and related activities and a recognized or certified exclusive bargaining representative that establishes a dispute resolution process for workers' compensation instead of the hearing before the Workers' Compensation Appeals Board and its referees, or that provides for specified other alternative workers' compensation programs.

This bill would change the reference to related activities to a reference to specific activities. It would require the agreement to be between a private employer or group of employers and a labor union that is the recognized or certified exclusive bargaining representative.

Existing law requires the employer or group of employers to have a minimum workers' compensation premium in order to enter into this program.

This bill would specify that the employer or group of employers may be self-insured, as specified, and would revise other provisions relating to qualifications for participation.

Existing law requires the collective bargaining agreements to be filed with the Administrative Director of the Division of Workers' Compensation.

This bill would provide for the filing of additional documents. Since some of these would be required to be signed under penalty of perjury, it would impose a state-mandated local program by expanding the scope of an existing crime.

This bill would require the Administrative Director of the Division of Workers' Compensation to make available an updated list of employers and unions entering into these collective bargaining agreements on a monthly basis.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 964 (SB 1028) Thompson. Human services.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Included within the scope of services available under the Medi-Cal program are personal services, when provided to a specified class of Medi-Cal recipients, until July 1, 1996.

This bill would revise the procedures for the administration of those services. This bill would also provide for specified additional reimbursement to certain IHSS recipients.

This bill would require the State Department of Social Services to report to the appropriate committees of the Legislature, by March 1, 1995, on compliance of the state in the provision of in-home supportive services to the federal Employment Opportunities for Disabled Americans Act.

Ch. 965 (SB 1395) Leslie. Insurance: fees.

Existing law provides for the examination of insurers by the Insurance Commissioner in various instances, and generally requires examinations to be at the expense of the insurer, organization, or person examined.

Existing law provides for the adoption of a schedule of filing fees to be used in connection with insurance rate filings made under provisions added by Proposition 103, an initiative statute.

This bill would also require the department to adopt an accounting system, as specified, that will allow the department to accurately identify costs by the regulatory activities and to link the costs to fees collected for those regulatory activities.

The bill would provide that, on and after October 1, 1995, the department may not levy specified fees unless they comply with the requirements of the bill.

The bill would require examination fees to be based on the actual cost of the examination, and would require fees imposed in connection with rate regulation provisions added by Proposition 103, an initiative statute, to be based on the actual administrative and operational costs arising from those provisions.

It would require the department to provide a schedule of fees and justification to specified entities. It would require the Bureau of State Audits to complete an audit of the schedule of fees to determine if the fees are in compliance with the bill.

The bill would state legislative findings. Since it would revise fee provisions added by Proposition 103, it would amend Proposition 103, which may be amended by the Legislature only by a ⅔ vote, and it would require that vote for enactment.

Ch. 966 (SB 1557) Thompson. Requests to forego resuscitative measures: health care providers: immunity: residential care facilities for the elderly.

Existing law authorizes an individual of sound mind and 18 or more years of age to execute a declaration governing the withholding or withdrawal of life sustaining treatment.

Existing law also authorizes an individual to appoint an attorney in fact to make health care decisions for that individual in the event of his or her incapacity pursuant to a durable power of attorney for health care. Existing law provides that a health care provider is not subject to criminal prosecution, civil liability, or professional disciplinary action for relying on a health care decision made by an attorney in fact under a durable power of attorney for health care in described conditions. Existing law also authorizes a health care provider to presume that a durable power of attorney for health care or similar instrument is valid.

This bill would require that health care providers, who honor a request to forego resuscitative measures, as defined, not be subject to criminal prosecution, civil liability, discipline for unprofessional conduct, administrative sanction, or any other sanction, under certain circumstances. This bill would provide that, in the absence of knowledge to the contrary, a health care provider may presume that a request to forego resuscitative measures is valid.

Existing law prohibits the operation of a residential care facility for the elderly without a current valid license, and sets forth the requirements for licensure of those facilities.

This bill would authorize licensed residential care facilities for the elderly that employ health care providers to establish policies to honor a request to forego resuscitative measures if certain conditions are satisfied.

This bill would incorporate additional technical changes to conform with SB 1907 of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the 1993–94 Regular Session (Chapter 307 of the Statutes of 1994).

Ch. 967 (SB 1584) Johnston. Unemployment compensation.

Under existing law, there is, in the Employment Development Department, an Appeals Division composed of the Unemployment Insurance Appeals Board and its employees. The members of the appeals board review the decisions of administrative law judges regarding petitions for unemployment insurance benefits. All cases that are designated as precedents by the appeals board are published in a manner that makes them available for public use.

This bill would require the appeals board to maintain an index of significant legal and policy determinations, to be updated at least annually, as specified. The bill would also require that the index be made available to the public by subscription.

Existing law sets forth a number of factors that determine whether an employment relationship exists when one person performs services for another person or entity. However, services performed in specified situations are excluded from the definition of employment. Employment does not include persons in the employ of any public entity in certain capacities, including, among others, an elected official, a member of a legislative body, and an employee serving on a temporary basis during an emergency.

This bill would add to the list of excluded capacities a person serving as an election official or election worker who reasonably expects to be paid less than $200 during the calendar year for those services, and would provide that this provision shall only take effect if there is a similar change in federal unemployment tax law.

Under existing law, there is an Unemployment Fund and an Unemployment Compensation Disability Fund, for specified purposes.

This bill would require the Employment Development Department to submit to the Legislature in May and October of each year a report on the status of these funds, as specified.

Existing law provides that the Director of Employment Development may assess a penalty against an employer who willfully makes a false statement or fails to report a material fact concerning the termination of an employee claiming unemployment insurance benefits.

This bill would provide that the director may also assess a penalty against any person who falsely certifies the medical condition of a claimant for the purpose of fraudulently obtaining disability insurance benefits, as specified.

Under existing law, an unemployed person is eligible to receive unemployment compensation benefits for any week if the director finds that the person has met certain requirements, including that the person has made a claim for benefits, has registered for work, was able and available to work, has been unemployed for a waiting period of one week, and has searched for work, as specified.

This bill would provide that, in addition, a person must also participate in reemployment activities if the person has been identified as likely to exhaust regular unemployment benefits, as specified, unless there is good cause for the failure to participate.

Existing law prohibits any person from falsely certifying the medical condition of any person in order to obtain disability benefits, as specified.

This bill would provide, in addition, that it is unlawful to knowingly present a false statement in support of a claim for benefits, to knowingly solicit or receive any payment for soliciting a claimant to apply for disability insurance benefits, or to assist any person who engages in fraudulent or prohibited actions, as specified.

Because a violation of these provisions is a criminal offense, this bill would impose a state-mandated local program.

This bill would also require the Director of Employment Development to report to the Legislature by June 30 of each year on the department's fraud deterrence and detection activities.

Under existing law, a claimant is required to establish medical eligibility for each uninterrupted period of disability by filing a first claim for disability benefits supported by the certificate of a treating physician or practitioner, as specified. This certificate is required to contain a diagnosis or specified diagnosis code, a statement of medical facts including secondary diagnoses when applicable, within the physician's or practitioner's

NOTE: Superior numbers appear as a separate section at the end of the digests.

knowledge, indicating his or her conclusion as to the claimant's disability, and a statement of his or her opinion as to the expected duration of the disability.

This bill would require that the statement of medical facts in the certificate be based on a physical examination of the claimant by the physician or practitioner. The bill would also require that the certificate contain both a diagnosis and a specified diagnosis code.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 968 (SB 1642) Craven. Physician assistants: drugs.

Existing law, the Physician Assistant Practice Act, authorizes a physician assistant, as defined, to perform medical services, as set forth by the regulations adopted by the Medical Board of California, when the services are rendered under the supervision of a licensed physician and surgeon or physicians and surgeons approved by the board, or under certain emergency circumstances, under the supervision of a licensed physician regardless of whether the physician assistant's approved supervising physician is available to supervise the physician assistant.

This bill would authorize a licensed physician and surgeon approved to supervise a physician assistant to delegate to a physician assistant under his or her supervision, and in a manner determined by the supervising physician and surgeon, the authority to administer or provide medication to a patient or transmit a prescription from the supervising physician and surgeon to a person who may lawfully furnish the medication or medical device to the patient. It would require, prior to delegating prescription transmittal authority to a physician assistant, the supervising licensed physician and surgeon to adopt a written, practice specific, formulary and protocols that specify all criteria to be considered for use of a particular drug or device, and any contraindications for the drug or device.

The bill would require any supervising licensed physician and surgeon's prescription that is transmitted by the physician assistant to be based on either the physician and surgeon's order for the particular patient or for a drug listed in the formulary. It would prohibit a physician assistant from administering, providing, or transmitting a prescription for Schedule II through Schedule V controlled substances without an order from the supervising licensed physician and surgeon.

The bill would impose other requirements regarding the content of the prescription transmittal order. It would provide that when transmitting a prescription the physician assistant is acting on behalf of and as an agent for the supervising physician and surgeon.

Under existing law, a violation of certain of the provisions relating to the prescribing and dispensing of dangerous drugs is punishable as a misdemeanor.

By authorizing physician assistants to furnish dangerous drugs, this bill would expand the definition of a crime thereby imposing a state-mandated local program.

Existing law, governing the practice of pharmacy, authorizes a licensed pharmacist to dispense drugs or devices upon the order of a nurse practitioner with certain authority.

This bill would authorize a licensed pharmacist to also dispense drugs or devices upon a transmittal order of a physician assistant with certain authority.

Since the knowing violation of any of the provisions governing the practice of pharmacy is a misdemeanor, this bill would expand the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 969 (SB 1909) Greene. Juveniles: FAIR centers.

(1) Under existing law, a juvenile comes under the jurisdiction of the juvenile court pursuant to a petition to declare the juvenile a dependent child of the court, a petition to declare the juvenile a ward of the court as habitually disobedient or truant, or a petition to declare the juvenile a ward of the court because of criminal conduct. A juvenile taken into temporary custody by a peace officer may also be referred or delivered to a public or private agency, or released, if the officer determines that the minor does not need to be brought to the attention of the juvenile court.

This bill would enact the Pilot Family Assessment Intervention and Resource Act under which the Judicial Council would establish, in cooperation with the board of supervisors of the county and other local entities, FAIR centers, as specified, in up to 3 counties, in which the probation officer or social worker would be authorized to refer certain juveniles to a FAIR center if he or she determines that they are within the jurisdiction of the juvenile court or soon to be within that jurisdiction, with the consent of the juvenile and his or her parent or guardian. Referrals could also be made by interested agencies and organizations under specified protocols. Under this program, the parties involved and representatives of the center could enter into a contract that would be submitted to the juvenile court and would be enforceable by contempt. The bill would declare the intent of the Legislature in this regard, and require the Judicial Council to evaluate the FAIR projects and report thereon to the Legislature not later than July 1, 1997. The provisions of the bill would be repealed on January 1, 1998, unless the program is extended by the Legislature.

The bill would impose a state-mandated local program on the participating counties by requiring new duties of local officials.

The bill would make additional conforming changes to take effect only if AB 2488 is chaptered and becomes effective.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 970 (AB 2444) O'Connell. Coastal sanctuary: oil and gas.

(1) Existing law creates, until January 1, 2003, the California Coastal Sanctuary which includes all state waters subject to tidal influence from a line parallel to the southernmost boundary of tidelands surrounding the Farallon Islands north to the Oregon border, except for waters in the Sacramento-San Joaquin Delta situated east of the Carquinez Bridges. Existing law prohibits any state agency from entering into any new lease for the extraction of oil or gas from the sanctuary unless the President has found a severe energy supply interruption and has ordered distribution of the Strategic Petroleum Reserve pursuant to specified provisions, the Governor finds that the energy resources of the sanctuary will contribute significantly to the alleviation of that interruption, and the Legislature subsequently acts to amend these provisions.

This bill would extend the sanctuary to include all state waters subject to tidal influence, except for waters subject to a lease for the extraction of oil or gas in effect on January 1, 1995, unless the lease is thereafter deeded or otherwise reverts to the state.

The bill would delete other provisions which impose similar restrictions on leasing in state waters from the southern boundary of the proposed Monterey Bay National Marine Sanctuary north to a line parallel to the southernmost boundary of tidelands surrounding the Farallon Islands, but which authorize the State Lands Commission to enter into new leases under specified circumstances. The bill would make related changes.

(2) Existing law authorizes the commission to lease specified tide and submerged lands if the commission determines that oil or gas deposits are contained in those lands, those oil or gas deposits are being drained by means of wells upon adjacent lands, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the leasing of the land for oil or gas production is in the best interests of the state.

This bill would repeal that provision and would instead authorize the commission to enter into a lease for the extraction of oil or gas from state-owned tide and submerged lands in the sanctuary if the commission determines that those deposits are being drained by means of producing wells upon adjacent federal lands and the lease is in the best interests of the state.

(3) Existing law authorizes the commission to modify the boundaries of existing leases to encompass all of a field partially contained within the existing lease subject to specified conditions.

The bill would require, as additional conditions, that the commission finds that the number and size of existing offshore platforms will not be increased, except as specified, that the boundary adjustment will not require the construction or major modification of a refinery in this state, except as specified, and the boundary adjustment represents the environmentally least damaging feasible alternative for the extraction and production of affected resources.

The bill would make a statement of legislative intent with regard to the authority of the commission.

Ch. 971 (AB 2937) Cannella. Small claims courts.

Existing law provides that the small claims court shall have jurisdiction in actions where the amount of the demand does not exceed $5,000.

Existing law also prohibits any person from filing more than 2 small claims actions in which the amount demanded exceeds $2,500 anywhere in the state in any calendar year. The City and County of San Francisco and the County of Stanislaus have been authorized, however, to participate in a pilot project under which the city and county, the county, and specified local entities in those jurisdictions are exempt from that limitation. This pilot project is scheduled to be repealed on January 1, 1995.

This bill would extend the above exception to all cities, counties, and cities and counties, and other specified local entities, as specified.

This bill would also prohibit cities and counties, counties, and other local public entities from filing a claim in small claims court if the amount of the demand exceeds $5,000.

Ch. 972 (AB 3073) Caldera. Securities: local agency obligations.

Under existing law, it is unlawful to offer or sell a security unless the security is qualified or exempt from qualification requirements. Existing law also provides that it is unlawful for any person to offer or sell in this state any security constituting a fractional interest in a lease, installment sale, or other obligation of a city, county, city and county, school district, special district, or other local agency of this state without obtaining the prior written consent of the city, county, city and county, school district, special district, or other local agency to that offer or sale, except as specified.

This bill would delete that provision and, instead, enact a comprehensive scheme as to fractional interests in local agency obligations providing that it is unlawful for any person to offer or sell in an issuer transaction in this state, or to otherwise knowingly offer or sell in this state, any security constituting a fractional interest in a lease, installment sale, or other obligation of a local agency without obtaining the prior written consent of that local agency to that offer or sale, except as specified. A violation would be a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 973 (AB 3337) Hauser. Dungeness crab.

(1) Existing law, until January 1, 1995, prohibits a person from landing Dungeness crab for commercial purposes except under a Dungeness crab permit that is valid from

NOTE: Superior numbers appear as a separate section at the end of the digests.

April 1 to March 31, inclusive, of the following year. Existing law prescribes the conditions for issuing and renewing the permits. A violation of the prohibition is a misdemeanor.

This bill would, commencing April 1, 1995, and until April 1, 1998, prohibit a person from landing Dungeness crab for commercial purposes from a vessel unless a Dungeness crab vessel permit has been issued for that vessel to the vessel owner. The vessel permit would be valid from April 1 to March 31, inclusive, of the following year, unless revoked by the Fish and Game Commission, as specified. The bill would establish the qualifications for the permit, and the Department of Fish and Game would be required to issue the permits for a fee established to pay all reasonable and necessary costs for administering the permit program, not to exceed a specified amount. The bill would, until April 1, 1998, provide for the transfer of the permits to another person upon sale of the vessel, to a replacement vessel owned by the permitholder under specified conditions, and to a temporary replacement vessel for 6 months upon written approval of the department for specified reasons and would provide for fees for those transfers to be established in specified amounts. The bill would also prohibit a vessel from being used to take and land crab for both commercial and sport purposes in the same day.

The bill would also require the Director of Fish and Game to convene a Dungeness crab review panel composed of specified persons to review applications for Dungeness crab vessel permits and transfers of those permits under specified conditions.

Because other provisions of existing law would make a violation of the prohibitions in the bill a crime, the bill would impose a state-mandated local program.

(3) Under existing law, Dungeness crab may be taken in Fish and Game Districts 6, 7, 8, and 9 between December 1 and July 15 and in all other districts from the second Tuesday in November to June 30.

This bill would permit the director to delay the opening of the Dungeness crab fishery in Districts 6, 7, 8, and 9 after December 1 in any year if recommended by the California Seafood Council, and if the Dungeness crab fishing industry votes to join the California Seafood Council or otherwise reimburse the council for all costs in carrying out the bill.

The bill would provide for testing of Dungeness crabs and would provide for related matters. The bill would also change the opening of the Dungeness crab fishery in other districts to November 15.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) Existing law requires the fees for the Dungeness crab vessel permits to be deposited in the Fish and Game Preservation Fund. That fund is continuously appropriated to the department and the commission to carry out the Fish and Game Code.

Because this bill would provide new revenue to the fund and impose new duties on the commission and the department, it would make an appropriation.

Ch. 974 (AB 3357) Goldsmith. Works of improvement.

(1) Under existing law, a 90-day public works preliminary bond notice must be given by a prescribed claimant as a prerequisite to enforcement of a claim on a payment bond, as specified.

This bill would delete these provisions and instead require the giving of a prescribed 20-day public works preliminary bond notice, as specified.

(2) Existing law provides that an owner of a work of improvement or an original contractor may be the principal upon any payment bond.

This bill would provide that a subcontractor also may be the principal upon any payment bond.

(3) Under existing law, a preliminary 20-day notice (private work) must be given prior to the recording of a mechanic's lien and prior to the filing of a stop notice and is required to be given to the owner, the original contractor, and to the construction lender, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make these provisions applicable to the enforcement of a claim on a payment bond. This bill also would require the preliminary 20-day notice to be given to any subcontractor with whom the claimant has contracted. It would also require every contract entered into between an original contractor and subcontractor, and between subcontractors, to provide a space for the name and address of the owner, original contractor, and any construction lender. It would also make a clarifying change.

(4) Under existing law, if the surety on any payment bond records the bond, as provided, before the work of improvement is completed, no action may be maintained on the bond unless a mechanic's lien has been recorded, or written notice, as specified, has been given to the surety before the expiration of the time prescribed for recording a lien to enforce the claim.

This bill would repeal that provision and would instead provide that if the 20-day private work preliminary notice was not given, a claimant may enforce a claim upon a payment bond given in connection with a private work by giving written notice to the surety and the bond principal, as provided, within 15 days after recordation of a notice of completion, or, if no notice of completion has been recorded, within 75 days after completion of the work of improvement. This bill would make a similar alternative notice provision applicable to enforcement of a claim upon a payment bond given in connection with a public work.

Ch. 975 (AB 3375) Klehs. Taxation: motor vehicle fuel license tax: tax evasion diesel fuel tax: penalties.

Under the existing Motor Vehicle Fuel License Tax Law, failure to pay the motor vehicle fuel license tax is punishable as a misdemeanor.

This bill would specify that, notwithstanding any other provision of that law, any person who willfully evades or attempts to evade or defeat the payment of the motor vehicle fuel license tax is guilty of a misdemeanor punishable by a fine or imprisonment, or both, as specified.

This bill would also impose a penalty of up to $2 per gallon for each gallon of motor vehicle fuel knowingly refined, manufactured, produced, blended, compounded, imported, possessed, kept, stored, or retained for the purpose of distribution, or distributed or offered for distribution in violation of this provision. Proceeds of the penalty would be distributed to the treasurer of the county in which the action was brought, for allocation to the local prosecuting agency, for the costs of prosecution, and to the county for its reasonable costs of administration. Any remaining proceeds would be deposited in the Motor Vehicle Fuel Account in the Transportation Tax Fund, and would be available, upon appropriation by the Legislature, to pay administrative costs of the State Board of Equalization to enforce the Motor Vehicle Fuel License Tax Law.

This bill would also add similar monetary penalties, with respect to specified violations of the Diesel Fuel Tax Law that would be enacted by SB 840, that would become operative only if SB 840 is chaptered and becomes operative.

Ch. 976 (AB 3776) T. Friedman. Employment: railroad safety.

(1) Existing law requires specified personnel on passenger, mail, or express railroad trains and makes any violation of those provisions a misdemeanor.

This bill would impose a state-mandated local program by requiring that, during passenger train service provided by a local agency, or by any entity under contract with a local agency, there be in addition to the operator at least one qualified employee inside a train car set of 6 or fewer coaches and at least 2 qualified employees inside a train car set of 7 or more coaches. This requirement would not apply to passenger train service provided by the San Diego Metropolitan Transit Development Board or the North San Diego County Transit Development Board.

The bill would provide that a request for proposal, request for bid, or contract by a local agency for passenger train service requires compliance with this personnel standard. The bill would also provide that any contract of a public entity to provide train service shall require compliance with the statutory personnel standards for trains. However, if a court determines that one recipient of a request for proposal or request for bid is exempt from the requirements of this bill, all other recipients of the same

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

request for proposal or request for bid would also be exempt from the requirements of this bill in responding to that request for proposal or request for bid. The bill would not apply to heavy rail transit systems that are owned or operated by a public entity, or to light rail public transit systems. To the extent that this bill would expand the scope of existing crimes, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However this bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 977 (SB 243) Lewis. Subdivision Map Act.

Existing law known as the Subdivision Map Act provides that no advisory agency or legislative body may require a routine waiver of time limits as a condition of accepting the application or processing of tentative, final, or parcel maps, unless the routine waiver is obtained for the purpose of permitting concurrent processing of related approvals or an environmental review on the same development project.

This bill would further provide that no advisory agency or legislative body may disapprove an application for a tentative, final, or parcel map in order to comply with the time limits unless there are reasons for disapproval other than the failure to timely act, as specified.

This bill would impose a state-mandated local program by requiring that applications for parcel map waivers be acted upon by a local agency within 60 days of the application being deemed complete pursuant to specified provisions.

Existing provisions of the act generally require that an approved or conditionally approved tentative map expire 24 months after its approval, excluding any period of time during which a development moratorium imposed after approval of the tentative map is in existence. For these purposes, a development moratorium includes actions of public agencies that regulate land use, development, or the provision of services to land, other than the public agency with the authority to approve or conditionally approve the tentative map, which thereafter prevents, prohibits, or delays the approval of the map.

This bill would include within the development moratorium the actions of the public agency with the authority to approve or conditionally approve the tentative map, which thereafter prevents, prohibits, or delays the approval of the map.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 978 (SB 403) Russell. State agencies: land.

Existing law requires each state agency, on or before December 31 of each year, to make a review of all proprietary state lands, with specified exceptions, over which it has jurisdiction, to determine what, if any, land is in excess of its foreseeable needs and report thereon in writing to the Department of General Services.

This bill would specifically include certain types of lands among those proprietary state lands to be reviewed by each state agency in accordance with the above provision.

Ch. 979 (SB 937) Killea. Controlled substances: manufacture: seizures: school science use.

Existing law provides that any retailer or wholesaler who sells any chemical or drug, or any laboratory apparatus or device, with knowledge or intent that it will be used to unlawfully manufacture, compound, convert, process, or prepare a controlled substance

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

for unlawful sale or distribution, shall be punished by imprisonment in the county jail for no more than one year, or in the state prison for 16 months, or 2 or 3 years.

This bill would provide, instead, that one who violates this provision shall be punished by imprisonment in a county jail for not more than 1 year, or in the state prison for 16 months, or 2 or 3 years, or by a fine not exceeding $25,000, or by both that imprisonment and fine. Any fine collected pursuant to this provision would be allocated to reimburse any local agency for the reasonable costs of the removal and disposal, or storage, of any chemical or drug, or any laboratory apparatus or device, unlawfully sold by the defendant.

Existing law provides that, with specified exceptions, all seizures under the asset forfeiture law, shall, upon conviction of the owner or defendant, be ordered destroyed by the court in which conviction was had.

This bill would provide that law enforcement may request of the court that certain uncontaminated science equipment be relinquished to a school or school district for science classroom education in lieu of destruction.

Existing law provides that all seizures of controlled substances, instruments, or paraphernalia used for unlawfully using or administering a controlled substance which are in possession of any city, county, or state official as found property, or as the result of a case in which no trial was had or which has been disposed of by way of dismissal or otherwise than by way of conviction, shall be destroyed by order of the court, unless the court finds that the controlled substances, instruments, or paraphernalia were lawfully possessed by the defendant.

This bill would provide that if the court finds that the property was not lawfully possessed by the defendant, law enforcement may request of the court that certain uncontaminated instruments or paraphernalia be relinquished to a school or school district for science classroom education in lieu of destruction.

Ch. 980 (SB 959) Johnston. Insurance: surplus lines.

Existing law generally requires insurance to be transacted only with admitted insurers. However, under existing law, a surplus line broker may solicit and place insurance with nonadmitted insurers only if that insurance, after a diligent search, cannot be procured from insurers admitted for the particular class or classes of insurance and that actually write the particular type of insurance in this state. It is prima facie evidence that a diligent search among admitted insurers has been made if it is established that 3 admitted insurers that actually write the particular type of insurance in this state have declined the risk, or that fewer than 3 admitted insurers actually write the particular type of insurance.

This bill would, for those purposes, define "type of insurance" to mean the hazard or combination of hazards covered by a contract of insurance. It would exempt from those provisions insurance issued or delivered by a nonadmitted Mexican insurer by and through a surplus line broker affording coverage exclusively in Mexico, as specified.

The bill would revise certain requirements relative to reinsurance ceded to an alien reinsurer and surplus line broker eligibility, as specified.

Existing law requires every nonadmitted insurer and surplus line broker to be responsible to ensure that, at the time of accepting an application for any insurance policy issued by a nonadmitted insurer, except with respect to policies issued to industrial insureds, a signed disclosure statement is provided to policyholders and applicants for insurance, as specified.

This bill would require that the disclosure statement be printed in English and in the language principally used by the surplus line broker and nonadmitted insurer for specified purposes. It would require the surplus line broker to maintain a copy of the signed disclosure statement which shall be made available to the Insurance Commissioner and the insured, upon request. If that disclosure statement is not received and completed by the applicant, the insurance may be cancelled on a pro rata basis, and the applicant shall be entitled to a return of any broker fees charged for the placement.

The bill would also provide that no surplus line broker may place coverage with a nonadmitted insurer unless the insurer is domiciled in Mexico, for specified purposes, or at the time of placement the insurer has established its financial stability, reputation,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and integrity, as defined, and maintains certain capital, surplus, and other financial requirements, as specified. The bill would also provide that a surplus line insurer may be sued upon any cause of action arising in this state, as specified.

Existing law requires every insured for whom insurance has been effected with nonadmitted insurers to, upon request in writing by the commissioner, produce for examination all policies, contracts, and other documents evidencing that insurance, and to disclose the amount of gross premiums paid or agreed to be paid for that insurance. A refusal to obey that request would subject the insurer to a $200 fine.

This bill would increase the amount of that fine to $1,000.

The bill would delete the January 1, 1995, repeal date relative to provisions governing the surplus line advisory organization.

Existing law provides that a violation of specified provisions is a crime.

This bill would provide that the violation must be willful. It would make certain additional provisions subject to that penalty. In so doing the bill would create new crimes and thus impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 981 (SB 1346) Roberti. Criminal defendants: public emergencies.

Existing law requires a defendant charged with a felony offense to be taken before a magistrate within 2 days of his or her arrest, as specified. Existing law also provides for the extension of certain time requirements set forth in the law during times of public emergency, as specified.

This bill would, within the affected county during a state of emergency, as specified, extend the time within which a defendant charged with a felony shall be taken before a magistrate from 2 days to a period of not more than 7 days, as designated by the Chair of the Judicial Council.

Ch. 982 (SB 1362) Russell. State contracts: Veterans Memorial Commission; monetary purchasing limits.

(1) Existing law exempts the Veterans Memorial Commission from regulations and procedures established by the Department of General Services with respect to bidding or entering into contracts. Existing law specifies that all statutes relating to state contracts and any regulations other than those adopted by the Department of General Services are applicable to contracts executed by the commission.

This bill would repeal these provisions.

(2) Existing law requires the Department of General Services, with respect to the purchase of supplies or equipment in excess of $10,000 in nonemergency situations, to furnish to certain prequalified vendors complete specifications of, and when practicable, the details of the delivery of, the equipment or supplies to be purchased. Existing law requires the department to report purchases of supplies or equipment in excess of $10,000 without bids to the State Board of Control, as specified. Existing law also requires the department to prepare annually a purchasing delegation program for district agricultural associations pursuant to specified criteria, including the condition that purchases not exceed $10,000.

This bill would increase those amounts to $15,000.

(3) Existing law authorizes any state agency that receives delegated authority to purchase materials, supplies, and equipment, to make minimum specified purchases, including purchases not exceeding $10,000 from vendors not listed on price schedules in specified circumstances, and from vendors at a price lower than state warehouse prices.

This bill would increase the purchase limitation to $15,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 983 (SB 1461) Craven. Mobilehomes: school district fees.

(1) Existing law authorizes a school district to levy a fee, charge, dedication, or other form of requirement against a development project, as defined, for purposes of funding the construction or reconstruction of school facilities. Existing law applies these provisions to manufactured homes and mobilehomes, under specified conditions.

This bill would provide that when a manufactured home or a mobilehome owned by a person 55 years of age or older who is also a member of a lower income household, as defined, is moved from a mobilehome park space where the mobilehome owner has resided in one school district, to a mobilehome park space in another school district, and is subject to these school facilities construction fees, the school district may waive the fee, as specified; otherwise, the district to which the manufactured home or mobilehome has been moved is required to grant the homeowner the necessary approval for occupancy, and permission to pay the fee in installments, as indicated, over a specified minimum time period. It would also authorize the school district to secure the fee as a lien perfected against the mobilehome or manufactured home. The imposition of new requirements on school districts with respect to the collection of these fees would create a state-mandated local program.

(2) The existing Mobilehome Residency Law generally regulates the conditions of residency in mobilehome parks, and subdivisions, cooperatives, and condominiums for mobilehomes.

This bill would require the management to disclose in writing to any person who proposes to purchase or install a manufactured home or mobilehome as indicated, on which the construction of the pad or foundation system commenced after September 1, 1986, and no other manufactured home or mobilehome was previously located, installed, or occupied, that the manufactured home or mobilehome may be subject to a school facilities fee, as specified.

(3) This bill would also make technical nonsubstantive changes to existing law.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 984 (SB 1505) Calderon. Life insurance and annuity contracts: senior citizen policies and annuities.

Existing law provides that a senior citizen who purchases a life insurance policy is entitled to notice of cancellation rights, and provides procedures and time limits for cancellation. The purchaser of a life insurance contract who cancels within the appropriate time period is entitled to a refund of all premiums and fees paid. These provisions do not apply to noncontributory employer group life insurance contracts.

This bill would make specified changes in the cancellation procedures and notice requirements and would, in addition, apply those procedures and requirements to individual annuity contracts. In addition, for variable annuity contracts, variable life insurance contracts, and modified guaranteed contracts, a cancelling purchaser would be entitled to a refund of any policy fee paid as well as payment for the value of the account. These provisions would not apply to specified types of group life insurance or group annuity contracts. Under specified circumstances, senior citizens are entitled to refunds if they cancel policies of group term life insurance during the first 30 days of the policy period. The bill would also make conforming changes.

Existing law requires that all life insurance policies for senior citizens that contain a surrender charge period shall disclose the surrender period and all associated penalties in 12-point bold print on the cover sheet of the policy.

This bill would make the above provision applicable only to individual life insurance policies and individual annuity contracts for senior citizens. The bill would also add the

NOTE: Superior numbers appear as a separate section at the end of the digests.

options of stating only the location in the policy text of the required information in 12-point bold type on the cover page of the policy, or by disclosing that information on a sticker that is affixed to the cover page of the policy or to the policy jacket.

Existing law provides that the Insurance Commissioner shall adopt regulations governing modified guaranteed annuities.

This bill would provide that modified guaranteed annuities are subject to the forfeiture provisions for individual deferred annuities computed under the terms of the annuity, but excluding market adjustment factors, as specified. In addition, group annuities exempted from the provisions governing individual deferred annuities would also be exempted from any modified guaranteed annuity regulations. This exemption would be retroactive to January 1, 1987, to the extent that the assets underlying the group contracts have not been maintained in a separate account.

The bill would provide that it is to take effect immediately as an urgency statute.

Ch. 985 (SB 1603) Maddy. Hospice licensure.

Existing law prohibits any private or public organization from providing, or arranging for providing, skilled nursing services in the home without a home health agency license. Existing law provides that it is not the intent of the Legislature to require a hospice to secure a home health agency license unless it is performing the functions of a home health agency.

This bill would instead provide that it is not the intent of the Legislature to require a hospice to secure a home health agency license.

Existing law also prohibits the operation of a hospice without a license, and sets forth the requirements for licensure, including payment of a license application fee, and a biennial license fee set by the State Department of Health Services. Under existing law, violation of these provisions is a misdemeanor.

This bill would exempt a hospice program certified in accordance with federal Medicare hospice conditions of participation from the hospice licensure requirement, but would require that it meet home health agency licensing requirements, unless the hospice program elects to apply for hospice licensure.

This bill would require that basic services required to be provided in order to qualify for licensure be provided in compliance with the "Standards for Quality Hospice Care, 1993" available from the California State Hospice Association, until the department adopts alternative standards by regulation, and would authorize the department to adopt those regulations. This bill would provide that the annual new and renewal license application fee be$622 until the department determines a fee level based on the cost of administering this chapter and that adjusted fee is printed in the Budget Act. This bill would require hospices to maintain compliance with the licensing requirements, but would authorize program flexibility with the prior written approval of the department and pursuant to certain procedural requirements.

This bill would require each hospice, on or before March 15 of each year, to file a report containing prescribed data with the Office of Statewide Health Planning and Development.

By requiring hospices to maintain compliance with these new licensing requirements, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 986 (SB 1637) Killea. Civil actions: law libraries: fees.

(1) Existing law authorizes a county to impose prescribed fees for filing the first paper and for a first appearance in a civil action as necessary to defray the cost of the law library.

Existing law limits the total law library fee in actions and proceedings in which a claim for damages falls within the monetary jurisdiction of the small claims court to the law

NOTE: Superior numbers appear as a separate section at the end of the digests.

library fee in effect on January 1, 1990. It also provides a procedure whereby a party could request a reduction of this fee to the January 1, 1990, level.

This bill would specify this limit and procedure instead apply to actions and proceedings in which the claim falls within the monetary jurisdiction of the small claims court and is filed by an assignee of a claim, as specified.

(2) Existing law authorizes the establishment by the board of law library trustees of a revolving fund of not more than $2,500 from money in the law library fund for expenditures in an amount not to exceed $150 each for purposes for which the law library fund may be lawfully expended.

This bill would increase the maximum amount of that revolving fund to $7,500 and increase the maximum individual expenditure to $750.

(3) Existing law authorizes a fee of $1 for filings in civil actions and proceedings as specified, in addition to the total filing fee, as defined, to be used to defray the cost of micrographics and automated recordkeeping systems for the county clerk and the municipal and justice courts. It also authorizes, until January 1, 1996, the board of supervisors to increase this additional fee to up to $3, as specified. Existing law exempts from this increase any claim for money damages filed by a person that is within the monetary jurisdiction of the small claims court.

This bill would delete the January 1, 1996, repeal date of the authorization for the additional fee. It would also delete the exemption.

Ch. 987 (SB 1646) Rogers. Military personnel: employment: driver's licenses.

(1) Existing law provides for the licensure and regulation of certain businesses, occupations, and professions by boards provided for in the Business and Professions Code.

This bill would require rules and regulations of boards provided for in that code to provide for methods of evaluating education, training, and experience obtained in the armed services, if applicable to the requirements of the business, occupation, or profession regulated. It would also require these rules and regulations to specify how the education, training, and experience may be used to meet specified licensure requirements. It would require each board to consult with the Department of Veterans Affairs before adopting these rules and regulations.

(2) Existing law requires the Director of Employment Development to establish and maintain public employment offices for veterans, among other persons.

This bill would provide that it is the policy of this state to make every reasonable effort to assist men and women who are leaving active duty with the armed services of the United States in obtaining employment in the civilian workforce with outreach programs, including job seminars and job fairs at military bases.

(3) Existing law authorizes the Department of Motor Vehicles to issue specified classes of driver's licenses.

This bill would specify that it is the policy of this state to recognize the training and experience that individuals gain while serving in the armed forces of the United States. The bill would require the department, in conjunction with the military services of the United States, to develop policies to assist persons who are leaving active duty to obtain commercial driver's licenses, as specified. The bill would prohibit those policies from waiving any requisites, fees, or examinations required by law for a commercial driver's license. This bill would require the department to consult with the Department of Veterans Affairs before adopting these policies.

(4) This bill would require each department or board required to perform duties by this act to do so within existing budgetary resources of the agency within which the department or board operates.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 988 (SB 1742) Kopp. San Francisco Bay Area Rapid Transit District: airport extension.

Existing law creates the San Francisco Bay Area Rapid Transit District with specified duties and responsibilities, and prescribes procedures for letting contracts.

This bill would authorize the district to elect to award contracts for the design and construction of all, or any part of, its San Francisco Airport extension in accordance with

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

an alternative procurement procedure.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 989 (SB 1848) Greene. School safety.

Existing law expresses the intent of the Legislature that all California public schools develop a comprehensive school safety plan to develop strategies aimed at the prevention of, and education about, potential incidents involving crime and violence on the school campus. Existing law establishes the School Safety Partnership, comprised of the Superintendent of Public Instruction and the Attorney General, to carry out various duties with school safety programs.

This bill would make findings and declarations regarding the effect of violent incidents on school campuses on pupils and staff, and the importance of the availability of culturally appropriate mental health services. The bill would declare the intent of the Legislature, contingent upon available funding, to establish a supplementary victim assistance fund for use by mental health agencies to provide services to victims of schoolsite tragedies, to encourage mental health agencies to assess their current level of cultural competence, as defined, and to commission a related pilot project within the Marysville Joint Unified School District, as specified.

The bill would further declare the intent of the Legislature that the Superintendent of Public Instruction assist the Marysville Joint Unified School District in applying for private foundation grants and federal funds to fund the pilot project.

Ch. 990 (SB 1873) Petris. Buildings: ABS pipe.

(1) Existing law, known as the State Housing Law, which is administered by the Department of Housing and Community Development and local enforcement agencies, generally regulates the construction, use, maintenance, and occupancy of buildings used for human habitation. Violations of the State Housing Law, or of the building standards published in the State Building Standards Code relating to the State Housing Law, are punishable as misdemeanors.

This bill would express findings and declarations of the Legislature with regard to the use of acrylonitrile-butadiene-styrene ("ABS") pipe. The bill would prohibit, on and after the effective date of the bill, any person from selling or offering for sale to a manufacturer of ABS pipe any plastic resin that does not meet the specifications for ABS pipe set forth in enumerated specifications of the American Society for Testing and Materials. The bill would require that any and all plastic resin sold to an ABS pipe manufacturer contain a specified certification. This bill would prohibit the sale of any ABS pipe that does not comply with the standards set forth for the manufacture of ABS pipe in the enumerated specifications of the American Society for Testing and Materials from being sold or offered for sale, or installed in any structure that is subject to the State Housing Law. This bill would provide that listing agencies, as approved by the Department of Housing and Community Development, be required to publish in each listing agreement with ABS DWV pipe manufacturers a list of ABS resins and resin compounds used by that manufacturer and approved for use by the listing agency. Because the provisions of the bill would be added to the State Housing Law, the violation of these provisions would be punishable as a misdemeanor, and the bill would therefore impose a state-mandated local program by creating new crimes.

This bill would require the Department of Housing and Community Development to periodically evaluate its list of approved listing and testing agencies to determine whether any additions to, or deletions from, the list are appropriate.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 991 (SB 1882) Campbell. Public officers: suspension of retirement allowances while wrongfully absent from court's jurisdiction.

Under existing law the eligibility of public officers for retirement benefits in public

NOTE: Superior numbers appear as a separate section at the end of the digests.

retirement systems is governed by the separate provisions of the various retirement statutes, laws, charters, and plans.

This bill would suspend the public retirement allowance of any past or present public officer against whom specified felony charges are pending in either a state or federal court, who has a legal obligation to not leave the jurisdiction of the court, and who leaves that jurisdiction, during the period of that absence. This bill would apply to persons who served in a public office prior to January 1, 1995, as well as to persons who serve in a public office on or after January 1, 1995.

The bill would provide that its provisions are severable and those provisions that may be given effect would do so even if other provisions are held invalid.

Ch. 992 (SB 2065) Killea. Automobile insurance: conditions for notice of cancellation.

Existing law provides that a notice of cancellation of an automobile insurance policy shall be effective only if it is based upon one or more of certain enumerated reasons.

This bill would additionally provide as a basis for cancellation the discovery of material misrepresentation of one or more of the following: (1) safety record, (2) annual miles driven in prior years, (3) number of years of driving experience, (4) record of prior automobile insurance claims, if any, and (5) any other factor having a substantial relationship to the risk of loss, as provided.

The bill also would provide that an insured who negligently misrepresents this information may avoid cancellation, as specified.

Ch. 993 (SB 2025) Bergeson. Communicable disease: testing of employees and inmates.

Existing law prohibits the initial employment of a person by the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, or the Youthful Offender Parole Board unless the person, after an offer of employment, completes an examination, a test, or a medical evaluation and is found to be free of tuberculosis in an infectious or contagious stage prior to assuming work duties.

Existing law also imposes tuberculosis testing requirements for employees as a condition of continued employment with the department or board.

Existing law provides that all costs of implementing the tuberculosis testing under these provisions are to be met by the Department of Corrections.

This bill would repeal this provision and provide that each department or board shall be responsible for the costs of testing or evaluating its own employees or potential employees.

Existing law sets forth procedures under which inmates or wards committed to the Department of Corrections or the Department of the Youth Authority are required to be examined for tuberculosis. Existing law requires the involuntary testing and authorizes the involuntary treatment of an inmate or ward who refuses to submit to an examination, test, or treatment for tuberculosis.

This bill would require each health facility in the Department of Corrections or in the Department of the Youth Authority to ascertain the existence of, and investigate all reported or suspected cases of, any communicable, contagious, or infectious disease. It would authorize the medical director, chief of medical services, chief medical officer of the facility, or the physician designated by the Department of Corrections or the Department of the Youth Authority to act in that capacity, to inspect, examine, test, or isolate any inmate or ward that is known or reasonably suspected to be infected with such a disease.

The bill would provide that if the inmate or ward refuses to submit to an examination, test, or treatment, he or she shall be tested or treated involuntarily, subject to certain conditions.

The bill would state that these provisions do not apply where the disease is AIDS, HIV, or tuberculosis.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 994 (SB 1978) Johnston. Lending: residential mortgages.

Existing law regulates various types of lenders and brokers, including commercial finance lenders and real estate brokers, as defined.

This bill, in addition, would regulate residential mortgage lenders by enacting the California Residential Mortgage Lending Act, as provided. Specifically, the bill would, among other things, do the following:

(1) Require the licensing by the Commissioner of Corporations of persons or entities who engage in the business of making residential mortgage loans, as defined.

(2) Require the licensing by the commissioner of persons or entities who service residential mortgage loans, as defined.

(3) Exempt from these provisions various individuals and entities, including, but not limited to, specified lenders and licensed California real estate brokers.

(4) Impose financial reporting and record keeping requirements on licensees and require certain licensees to maintain a specified net worth and make financial assurances, as provided.

(5) Restrict the use of escrow funds and the charging of fees in connection with a loan transaction.

(6) Prohibit certain fraudulent practices.

(7) Grant the commissioner extensive powers to investigate and discipline persons or entities licensed to make or service residential mortgage loans.

(8) Provide for the levying and collection of specified fees and assessments.

(9) Impose civil and criminal penalties and provide for injunctive relief for violation of these provisions.

In addition, existing law provides that all money held for specified purposes by a mortgagee or beneficiary of a deed of trust on real property must be held or invested in this state. Specified entities are exempt from in-state requirements and may deposit funds in an impound account in out-of-state institutions insured by the Federal Deposit Insurance Corporation. The exemptions for these entities will be terminated on January 1, 1996.

This bill would create an exemption, commencing January 1, 1996, for licensed residential mortgage lenders and servicers, which would be permitted to deposit funds in an impound account in out-of-state institutions insured by the Federal Deposit Insurance Corporation, as specified.

This bill would also provide for assessment of licensees on a pro rata basis, to raise revenue to pay for the costs of administering this act and to maintain a reserve, as specified. The moneys raised by assessment would be deposited into the State Corporations Fund. This bill would become operative on January 1, 1996. The provisions of the bill would be repealed on January 1, 1996, unless the Commissioner of Corporations receives a specified number of applications, application fees, and accompanying materials by March 1, 1995, and the Legislature makes a specified appropriation. After the effective date and prior to the operative date of this bill, the commissioner may apply, as if operative, provisions of the bill and may adopt rules for the review of licensure applications.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 995 (SB 1861) Committee on Judiciary. Courts: personnel.

(1) Existing law specifies the number, compensation, and classification of superior and municipal court personnel in Butte, Contra Costa, Fresno, Kern, Los Angeles, Merced, San Diego, San Luis Obispo, Santa Barbara, Shasta, Solano, Tulare, and Ventura Counties.

This bill would revise the number, compensation, and classification of superior and municipal court personnel in Butte, Contra Costa, Fresno, Kern, Los Angeles, Marin, Merced, San Diego, San Luis Obispo, Santa Barbara, Shasta, Solano, Tulare, and Ventura Counties, thereby imposing a state-mandated local program by requiring a higher level

NOTE: Superior numbers appear as a separate section at the end of the digests.

of service under an existing program.

(2) Existing law authorizes the San Diego Municipal Court to establish "900" telephone numbers for traffic, misdemeanor, and other telephonic arraignment, for court scheduling, and for rendering tentative civil decisions, with the proceeds to be continuously appropriated to the use of the court.

This bill would authorize the El Cajon Municipal Court, North County Municipal Court, and the South Bay Municipal Court in San Diego County or any supporting agency to establish "900" telephone numbers for computerized remote access by individuals or organizations to court information, with the proceeds to be continuously appropriated to the court or court support agency, as specified.

(3) Existing law specifies that the annual salary of the Administrative Director of the Courts shall be the same as the salary of a judge of the Court of Appeal.

This bill would provide that that salary shall be set by the chairperson of the Judicial Council and shall be no less than the salary of a judge of the Court of Appeal.

(4) This bill would also make related changes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 996 (SB 1800) Campbell. Trial courts.

Existing law establishes the trial courts, as specified. Existing law also establishes the Brown-Presley Trial Court Funding Act providing for state funding of trial courts on a county option basis.

This bill would authorize any trial court to establish a "900" telephone number or numbers for conducting certain court functions in civil and criminal cases in those courts, under specified circumstances.

The bill would also make a conforming change.

Ch. 997 (AB 1647) Costa. Income taxes: designations: Olympics.

Under the existing Personal Income Tax Law, taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds or accounts.

This bill would additionally allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be contributed to the California Olympic Training Fund, which would be created by this bill. It would require the Franchise Tax Board to determine annually, the total amount designated and to notify the Controller of the amounts to be transferred by the Controller from the Personal Income Tax Fund to the California Olympic Training Fund. It would, upon appropriation by the Legislature, allocate the money in the California Olympic Training Fund to the Franchise Tax Board and the Controller to cover costs incurred in collecting and administering the funds, and to the United States Olympic Committee to be used for Olympic activities in California. The bill would provide that no money shall be allocated to the United States Olympic Committee unless an annual agreement has been reached between the Controller and the United States Olympic Committee that the committee will match the tax return contributions deposited in the California Olympic Training Fund, and that the combined proceeds will be used by the committee for Olympic activities in California. The bill would require the Franchise Tax Board to revise the form of tax returns to provide for the designation.

The bill would provide that these provisions shall remain in effect only until January 1, 1998, and as of that date are repealed. The provisions would also be repealed with respect to taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than $250,000.

Ch. 998 (AB 2445) Conroy. Special education: blind pupils.

(1) Existing law provides for the education of children with exceptional needs, including visually impaired children, through special education programs. Existing law

NOTE: Superior numbers appear as a separate section at the end of the digests.

requires school districts, special education local plan areas, or county offices of education to provide for the identification and assessment of an individual's exceptional needs and the planning of an individualized education program to best meet his or her assessed needs.

This bill would make legislative findings and declarations related to the needs of visually impaired pupils to receive instruction in reading and writing braille, as defined. The bill would require that a functional vision assessment be used as one criterion in determining the appropriate reading medium for pupils. This bill would also require school districts, special education local plan areas, or county offices of education to provide opportunities for braille instruction to pupils who may be expected to have a need for braille as a reading medium. All visually impaired pupils would be given the opportunity to receive an assessment to determine the appropriate reading medium or media of each pupil. The bill would therefore expand the duties of school districts, special education local plan areas, or county offices of education in regards to special education programs, and, to the extent those expanded duties exceed any requirements of federal law, the bill would thereby create a state-mandated local program. The bill would also make a statement of legislative intent.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 999 (AB 2664) Burton. Unemployment insurance: income tax withholding.

Existing law requires employers to make contributions for the unemployment insurance coverage of their employees and to make specified returns and reports relating to these contributions to the Employment Development Department. Existing law also requires employers to withhold from employee compensation estimated state income taxes and employee contributions for disability insurance coverage and to make specified returns and reports related to these taxes and contributions to the department. Employers are subject to various penalties for failure to make these contributions or withholding payments and to file these returns and reports.

This bill would require the Employment Development Department to develop and administer an amnesty program for a 3-month period, under which an employer may apply for the waiver of (a) unpaid penalties imposed on or before December 31, 1993, that are owed as a result of the nonpayment or underpayment of these tax liabilities or the failure to file reports, (b) penalties imposed or that may be imposed, including interest, that are owed as a result of the nonreporting or underreporting of these tax liabilities or the failure to file reports for periods that ended on or before December 31, 1993, or (c) penalties, interest, and taxes, with respect to wages paid prior to March 17, 1992, that are owed as a result of the misclassification of workers as independent contractors.

This bill would provide that an employer is eligible for this waiver if the employer files an application for amnesty as prescribed by the department during the amnesty period, files completed contribution returns or completed amended contribution returns for the appropriate reporting periods, and pays in full the amounts due exclusive of amounts waived.

This bill would require the department to adequately publicize this amnesty program so as to maximize public awareness of and participation in the program.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1000 (AB 3239) Conroy. Public utilities: special programs.

Existing law requires the Public Utilities Commission to authorize public utilities to pursue various activities such as research and development of electric and compressed

NOTE: Superior numbers appear as a separate section at the end of the digests.

natural gas fueled vehicles and low-emission vehicles.

This bill would define "interests" as they apply to these programs.

Ch. 1001 (AB 3271) Alpert. School funding: year-round scheduling.

Under existing law, state school funding apportionments to school districts are calculated, in part, according to the average daily attendance in each district, which is based upon the number of days in which classes are taught in the district.

Existing law, for the purposes of computing average daily attendance in each school district, permits a school district to exclude from the calculation of the number of days taught, the number of days taught in any school year in late entry makeup classes, as defined, in programs of year-round scheduling, as to any pupil who entered the program of year-round scheduling after September 1 of that school year, if the track in which the pupil is enrolled began instruction in July or August of that school year and subject to specified limits.

This bill would provide instead that for the 1993–94 fiscal year as specified, and the 1994–95 fiscal year, if a pupil transfers to another school within the district, the pupil's average daily attendance shall be calculated independently for each school in which the pupil was enrolled. The bill would specify that these provisions apply to school districts having an average daily attendance of 100,001 or more pupils that have installed an individual tracking system, as specified. The bill would further provide that, in no event shall any transferring pupil generate more than 0.98 unit of average daily attendance for the district in any one school year under these provisions for the 1993–94 fiscal year, as specified, and the 1994–95 fiscal year. The bill would also provide that an enrolled pupil may not generate more than one of a unit of average daily attendance for the district per school year under those circumstances.

Ch. 1002 (AB 3627) Campbell. Insolvent school districts.

(1) Existing law requires the county superintendent of schools to establish a budget review committee to review the proposed budget of the county office of education. Existing law requires the Superintendent of Public Instruction (superintendent) to either approve or disapprove the budget of the county office of education.

This bill would make a technical change to that provision.

(2) Existing law requires the superintendent, if at any time during the fiscal year he or she determines that a county office of education may be unable to meet its financial obligations for the current or 2 subsequent fiscal years or that a county office has a qualified or negative certification, as specified, to take certain steps to ensure that the county office meets its financial obligations. Among other things, the superintendent must assign a fiscal expert to the district and conduct a study of the financial and budgetary conditions of the county office. The superintendent may, under specified circumstances, employ staff for the study on a short-term basis.

Existing law requires governmental entities, as specified, to have annual statewide participation goals for the award of contracts for professional bond services to disabled veteran business enterprises and provides for minority and women business participation goals for state contracts.

This bill would exempt the superintendent, for the purposes of appointing the trustee and employing the staff on a short-term basis, from the statewide participation goals for the award of contracts to disabled veteran business enterprises and minority and women businesses.

(3) Under existing law, in the 1994–95 fiscal year, and in each fiscal year thereafter, the State Department of Education is required to request certain budget information from a representative sampling of school districts throughout the state.

This bill would instead require the department to request that information in the 1994–95 fiscal year and thereafter in every 3rd fiscal year.

(4) Existing law requires the county superintendent of schools to provide for an audit of all funds under his or her jurisdiction and control and the governing board of each district to provide for an audit of its books, as specified. If the governing board does not provide for that audit, the county superintendent of schools must provide for that audit. Each county superintendent of schools is responsible for the correction of any audit

NOTE: Superior numbers appear as a separate section at the end of the digests.

exceptions not affecting state funds that is identified by the audit report.

This bill would require the county superintendent of schools to review the audit exceptions contained in the audit of each school district in his or her jurisdiction relating to attendance, inventory of equipment, internal control, and any miscellaneous items and determine whether the district has adequately corrected the audit exception or provided an adequate plan to correct the audit exception. The county superintendent of schools would be required to certify to the Superintendent of Public Instruction that the audit exceptions have been reviewed and that the school district has either corrected or has an approved plan to correct the audit exception, as specified. If audit exceptions are found, in the fiscal year subsequent to the audit, the auditor would be required to review the corrections or plans to correct the exception to determine whether it has been corrected.

This bill would require the Superintendent of Public Instruction to ensure that each school district and county superintendent of schools has either corrected each audit exception or developed a plan of correction for audit exceptions, as specified.

The bill would make conforming changes to related provisions of law.

(5) Under existing law, if the superintendent determines that a county office will be unable to meet its financial obligations, as specified, or if the county office has a negative certification, the superintendent is required to take certain actions, if necessary, to enable the county office to meet its financial obligations, including, the development and imposition by the superintendent in consultation with the county office governing board and county superintendent, of revisions to the county office budget to enable the county to meet its financial obligations. Existing law contains similar provisions with respect to the actions required by a county superintendent of schools as to a school district that may not be able to meet its financial obligations.

This bill would authorize the superintendent to assist in developing a financial plan to enable the county office to meet its future obligations. The bill would also make a technical change in the provision.

The bill would also provide a similar authorization for the county superintendent of schools to assist in developing a financial plan to enable a school district to meet its future obligations.

(6) Existing law requires the superintendent to appoint a trustee to any district that has accepted emergency apportionments because it has determined during a fiscal year that its revenues are less than the amount necessary to meet its current year expenditure obligations. Existing law further provides that if a school district accepts an emergency apportionment that exceeds an amount equal to 200% of the amount of reserve recommended for that district, as specified, the superintendent must, among other things, assume the legal rights, duties, and powers of the governing board and appoint an administrator to act on his or her behalf.

This bill would authorize the superintendent to employ on a short-term basis any staff necessary to assist the trustee and the administrator, including, but not limited to, a certified public accountant. The bill would authorize the superintendent to appoint an employee of the State Department of Education as the trustee or as the administrator, as specified. An employee appointed as trustee or administrator would have the right to return to his or her former position, or a position at substantially the same level, at the department. During the term of the appointment, retirement benefits and other benefits for that employee would continue to be calculated as if the employee had continued to serve in the position at the department that he or she held prior to the appointment. The bill would make certain individuals appointed as a trustee or administrator eligible to participate in the State Teachers' Retirement System and make other provisions relating to the salaries and benefits of those individuals.

This bill would also exempt the superintendent, for the purpose of making those appointments and for employing that short-term staff, from the statewide participation goals for the award of contracts to disabled veteran business enterprises and minority and women businesses described in (2).

(7) Under existing law, if a school district budget is disapproved by the county superintendent, the county superintendent must call for the formation of a budget review

NOTE: Superior numbers appear as a separate section at the end of the digests.

committee. Based upon the recommendations of the budget review committee and any response to those recommendations by the school district, the superintendent either approves or disapproves the budget. If the superintendent disapproves the budget, existing law requires that, for the remainder of the current fiscal year, the county superintendent of schools take certain actions, including the monitoring and review of the operation of the district.

This bill would instead require that the county superintendent take these actions as necessary.

(8) Existing law requires copies of any certification in which the governing board of a school district is unable to certify that its financial obligations will be met and a copy of the report submitted to the governing board by the superintendent of the school district concerning the financial and budgetary status of the district to be sent to the Controller and the superintendent, as specified.

This bill would specify that the copies shall be sent to the Controller and the superintendent by the county office of education.

Ch. 1003 (AB 3718) Ducheny. Community college districts: revenue limits: property tax revenues.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities. Existing law, effective January 1, 1994, and known as the Community Redevelopment Law Reform Act of 1993, revised the definition of a blighted area and enacted numerous other revisions in the Community Redevelopment Law, including the imposition of specified time limitations on redevelopment plans, the requirement of the adoption of implementation plans describing the goals and objectives of redevelopment agencies, and the inclusion of specified information on statements of indebtedness required to be filed by redevelopment agencies. Existing law provides for the payment of certain property taxes for those purposes, a portion of which is available to school districts, county superintendent of schools, and community college districts. Existing law provides that a portion of the property taxes received by school districts pursuant to those sections are to be considered property taxes for the purposes of determining the state aid a school district receives for each fiscal year.

This bill would make conforming changes to a related provision of law to clarify that any amount that is allocated to a community college district for revenue level purposes pursuant to the Community Redevelopment Law, that is considered to be from property tax revenues, as specified, is subtracted from the amount of state aid that would otherwise be available to that district, as specified.

Ch. 1004 (AB 3717) Costa. Off-highway vehicles.

(1) Under existing law, there is an Off-Highway Vehicle Fund, to which there is transferred, subject to the Budget Bill and certain other provisions, from the Motor Vehicle Fuel Account in the Transportation Tax Fund, money attributable to taxes imposed upon distributions of motor vehicle fuel used in (a) the off-highway operation of vehicles subject to identification as off-highway vehicles, and (b) motor vehicles subject to registration, while engaged in off-highway recreational use, as estimated by the Department of Transportation with the cooperation of the Department of Parks and Recreation.

The Off-Highway Motor Vehicle Recreation Act of 1988 provides for the acquisition, operation, and funding of state off-highway vehicular recreation areas and trails. The act and provisions relating to the Off-Highway Vehicle Fund will be repealed on January 1, 1998.

This bill would rename the Off-Highway Motor Vehicle Fund the Off-Highway Vehicle Trust Fund, require that the taxes imposed upon distribution of motor vehicle fuel, described above, and certain other fees, fines, forfeitures, and reimbursements be deposited in the fund, require all money in the fund to be administered by the Off-Highway Motor Vehicle Recreation Commission, require the money, when appropriated by the Legislature, to be allocated by the commission as specified, and require reimbursement, without interest, of money temporarily transferred by the Legislature from the fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law requires a fee of $1 to be paid, in addition to other specified fees, at the time of issuance or renewal of identification of off-highway motor vehicles. Existing law requires the money from the additional fee to be deposited in the Motor Vehicle Account in the State Transportation Fund to be available, upon appropriation by the Legislature, to offset the costs of maintaining the uniformed field strength of the Department of the California Highway Patrol.

The provision authorizing the imposition of that fee is to be repealed as of January 1, 1995.

This bill would delete that repeal date and thus would extend the fee indefinitely.

Ch. 1005 (AB 3747) Quackenbush. Education: bonds.

Under existing law, the governing board of any school district or community college district is authorized, when in its judgment it is advisable, and is required, upon a petition of the majority of the qualified electors residing in the school district or community college district, to order the county superintendent of schools to call an election and submit to the electors of the district the question whether bonds of the district shall be issued and sold for the purpose of raising money for specified school facilities purposes.

This bill would authorize any school district that has a community facilities district formed pursuant to the Mello-Roos Community Facilities Act of 1982 that has as one of its purposes the construction of school facilities within the territory of the school district to form a school facilities improvement district, as specified, similar to the existing authority of water districts to form improvement districts, in that portion of the territory of the school district that is not located within the boundaries of the community facilities district. However, the bill would provide that the provisions relating to school facilities improvement districts shall not be operative in any county or counties until the board of supervisors of specified counties, by a resolution adopted by a majority vote of the board of supervisors, makes the provisions applicable in the county or counties.

This bill would authorize a proposition to authorize the issuance of general obligation bonds of the school facilities improvement district for the purpose of financing certain school facilities improvement projects to be placed on a ballot, as specified. The bill would authorize persons who are residents of the territory of the school facilities improvement district to vote on the bond proposition. The bill would require approval of the proposition by ⅔ of the voters voting on the proposition before bonds may be issued pursuant to specified procedures governing the issuance of bonds.

This bill would set forth provisions governing the formation of the school facilities improvement district, the financing of the bonds through a tax on property located within the boundaries of the school facilities improvement district, the bond elections, the issuance and sale of bonds, the form of the bonds, the registration of bonds, the cancellation of unsold bonds, and the imposition of the tax for payment of the bonds.

Ch. 1006 (SB 1484) Peace. In-home supportive services workers.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either pursuant to employment by the recipient of services or by or through contract by the county, qualified aged, blind, and disabled persons are provided with services to enable them to remain in their own homes.

This bill would authorize counties to establish or designate entities or agents to act on behalf of IHSS recipients who are designated as employers and who elect not to, or are unable to, ensure compliance with all applicable federal, state, and county wage, hour, and workplace laws.

Ch. 1007 (SB 1531) Presley. Minors: hearings.

Existing law provides that a minor who has been abused or neglected may be adjudged a dependent child of the juvenile court.

Existing law specifies the procedure for conducting hearings to determine the long-term placement of a dependent child of the court, including determination of whether parental rights should be terminated. An order by the court directing that a hearing be held pursuant to this section is not an appealable order, but may be the subject of review

NOTE: Superior numbers appear as a separate section at the end of the digests.

by extraordinary writ.

This bill would specify that the order is not appealable, except as specified.

The bill would incorporate additional changes in Section 366.26 of the Welfare and Institutions Code, proposed by AB 2982, to be operative only if AB 2982 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 1008 (SB 1833) Torres. Vehicles: theft prevention: insurance fraud prevention.

(1) Existing law sets forth a comprehensive scheme specifying certain prohibited acts and criminal penalties for insurance fraud. Existing law also provides for the creation of a Bureau of Fraudulent Claims within the Department of Insurance for the purpose of pursuing insurance fraud, as specified.

This bill would, additionally, specify certain insurance fraud acts subject to mandatory civil penalties, as specified. The bill would require the deposit of these civil penalties in the General Fund for prescribed distribution. The bill would require the commissioner to appoint full-time attorneys and supervisory and investigatory personnel within the bureau. The commissioner would be required to report annually to the Legislature as to its activities, as specified.

(2) Existing law makes it unlawful to knowingly do specified acts relating to insurance claims.

This bill would specify additional acts which would be a violation of the above provision.

(3) Existing law defines a "total loss salvage vehicle" for purposes of the Vehicle Code.

This bill would define a "nonrepairable vehicle" and a "nonrepairable vehicle certificate" for purposes of the Vehicle Code, as specified.

(4) Existing law creates the Department of the California Highway Patrol in the Business, Transportation and Housing Agency, prescribes the department's powers, and designates the department's duties.

This bill would require the department, if a vehicle is a total loss salvage vehicle or has been reported dismantled, to conduct an inspection, as specified, of the vehicle when application is made for registration of the vehicle with the Department of Motor Vehicles. The bill would require a prescribed $50 fee to be paid to the Department of the California Highway Patrol. The bill would require the money generated by the fee, after a prescribed deduction, to be deposited in the Motor Vehicle Account in the State Transportation Fund to be used, upon appropriation by the Legislature, to offset the costs incurred as a result of conducting the inspections.

(5) Existing law requires the Department of Motor Vehicles to issue a salvage certificate for a total loss salvage vehicle under specified circumstances.

This bill would require an insurance company, whenever the insurance company has made a total loss settlement on a nonrepairable vehicle, to forward, within 10 days after receipt of title by the insurer, free and clear of all liens, the properly endorsed certificate of ownership or other evidence of ownership acceptable to the department, the license plates, and a $3 fee, to the department. The bill would require the owner of a nonrepairable vehicle to comply with the specified procedure when the owner retains possession of the vehicle, when the nonrepairable vehicle is not the subject of an insurance settlement, or when the nonrepairable vehicle is owned by a self-insurer, as defined. The department, upon receipt of the specified documents and fee, would be required to issue a nonrepairable vehicle certificate for the vehicle. The bill would require the owner to obtain a properly endorsed nonrepairable vehicle certificate prior to the sale of a nonrepairable vehicle. The bill would make a violation of the specified provisions a misdemeanor, except as they apply to the department and except as specified. Because the bill would thereby create a new crime, it would impose a state-mandated local program.

The bill would prohibit the department from issuing a new registration card and certificate of ownership on a vehicle that has been issued a nonrepairable vehicle certificate.

The bill would make conforming changes in related provisions of existing law.

These provisions and those of (4) and (5), above, would become operative July 1, 1995.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) This bill would incorporate additional changes in Section 550 of the Penal Code proposed by AB 3751, to be operative only if AB 3751 and this bill are both enacted and become effective, and this bill is enacted last.

(7) This bill would include provisions proposed by SB 2050 (Section 43705 of the Health and Safety Code), to become operative only if SB 2050 is enacted and becomes operative.

(8) This bill would include provisions proposed by AB 1926 (Section 6161 of the Vehicle Code), to become operative only if AB 1926 is enacted and becomes operative.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1009 (SB 1927) Hayden. Tobacco: sales.

Existing law provides that every person, firm, or corporation that knowingly sells, gives, or in any way furnishes to another person under 18 years of age, any tobacco or prescribed tobacco-related product, is subject to either a criminal action for a misdemeanor or to a civil action to be brought by a city attorney, a county counsel, or a district attorney. Existing law also requires that every person under the age of 18 years who purchases or receives tobacco or prescribed tobacco-related products, be punished by a fine or community service work.

Under existing law, the Department of Alcoholic Beverage Control issues licenses for, and administers and enforces provisions governing, retail sales of alcoholic beverages.

This bill would establish the Stop Tobacco Access to Kids Enforcement Act or "STAKE" Act and would state the findings and declarations of the Legislature regarding the necessity for reducing and eliminating the consumption of tobacco products by minors, and in this connection, would require the State Department of Health Services to establish and develop a program to reduce the availability of tobacco products to minors, and to establish requirements for posting of related notices by retailers. This bill would provide that primary responsibility for enforcement of this bill shall be with the department and as part of its enforcement responsibilities, would require the department to conduct random, onsite sting inspections at retail sites with the assistance of minors. It would require the department to adopt and publish guidelines governing the use of persons under the age of 18 years in these inspections, and would specify certain guidelines to be included. In addition, this bill would authorize the department to assess civil penalties in accordance with a defined schedule against persons, firms, or corporations that sell, give, or furnish tobacco or tobacco products to minors.

This bill would establish the Sale of Tobacco to Minors Control Account, and would require all moneys collected as civil penalties pursuant to the STAKE Act, up to $300,000 annually, in the 1995–96, 1996–97, 1997–98, and 1998–99 fiscal years, to be deposited in the account, to be expended by the department for enforcement and administration of the program upon appropriation by the Legislature. Thereafter, this bill would require that civil penalties collected be deposited in the General Fund.

Under existing law, the State Department of Alcohol and Drug Programs is designated the single state agency authorized to receive certain federal Substance Abuse and Mental Health Services Administration block grant moneys.

For the 1994–95 fiscal year, this bill would transfer $1,500,000, and annually thereafter in the 1995–96, 1996–97, 1997–98, and 1998–99 fiscal years, $2,000,000, of a certain portion of that money to the Sale of Tobacco to Minors Control Account to be appropriated by the Legislature to administer and enforce this division.

This bill would require certain distributors and wholesalers of tobacco products to provide, to the department, the names and addresses of those persons to whom they provide tobacco products in order that the department may ensure compliance with the tobacco products retail sales program.

Existing law provides for the designation of inspectors of the Food and Drug Section of the department as peace officers for purposes of the enforcement of certain provisions regulating food and drugs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would extend certain peace officer powers and immunities granted to the Food and Drug Section inspectors to these inspectors as peace officers for purposes of enforcing this bill.

This bill would provide that persons under 18 years of age that participate, in a defined manner, in an investigation of possible violations of the tobacco products licensing program, are immune from prosecution under these provisions.

This bill would authorize the department to contract with local law enforcement agencies to delegate enforcement duties pursuant to this bill and would require reimbursement from the account.

Ch. 1010 (SB 2053) Killea. Legal entities: limited partnerships: limited liability companies: professional corporations.

Existing law sets forth the California Revised Uniform Limited Partnership Act.

This bill would revise that act. Among other things, this bill would do the following:

(1) Revise provisions governing certificates of limited partnership, certificates of dissolution, certificates of cancellation, and certificates of continuation, and provide for the filing of restated certificates of limited partnership, as specified.

(2) Change voting requirements, as provided.

(3) Eliminate the 6-month withdrawal right of a limited partner of a partnership with an indefinite term and a partnership agreement that is silent regarding withdrawal.

(4) Specify that the provision allowing the legal representative or successor of a partner to exercise the powers of that partner applies only to a limited partner.

(5) Revise provisions regarding dissolution of a limited partnership by limiting the time that a limited partnership may operate without a general partner.

(6) Make technical, clarifying, and conforming changes.

(7) Include limited liability companies within the definition of person in numerous statutory provisions. These provisions relating to limited liability companies would become operative only if SB 469 is enacted.

(8) Existing provisions of the Moscone-Knox Professional Corporation Act define "foreign professional corporation" as a corporation organized under the laws of another state that is engaged in a profession for which there is authorization in California law, as specified, for the performance of professional services by a professional corporation.

This bill would revise that definition to provide that the authorization in California law be for the performance of professional services by a foreign professional corporation.

Ch. 1011 (SB 1373) Torres. Public holidays: Cesar Chavez Day.

(1) Existing law prescribes the holidays in this state for state agencies and the public schools and community colleges.

The bill would include March 31, known as "Cesar Chavez Day," in the list of holidays in this state. The bill would also authorize governing boards pursuant to memoranda of understanding to provide that March 31 shall be a holiday known as "Cesar Chavez Day," and would authorize exercises, funded through existing resources, to be conducted in all schools respecting that day . This bill would authorize the State Board of Education to adopt a model curriculum guide related to "Cesar Chavez Day."

(2) Under existing law, generally, trial courts are required to be closed for the transaction of judicial business on state holidays, except for certain, specified proceedings, and state holidays are excluded from the computation of time for judicial deadlines.

This bill would exclude the state holiday held on March 31, known as "Cesar Chavez Day," from those provisions.

(3) Existing law requires the Governor to proclaim various days of the year as days to give attention to certain persons or events.

This bill would require the Governor to proclaim March 31 as "Cesar Chavez Day."

(4) Existing law provides that all state employees, with specified exceptions, shall be entitled to certain paid holidays and to one personal holiday per fiscal year, unless a collective bargaining agreement provides otherwise.

This bill would permit a state employee, as specified, to elect to receive 8 hours of holiday credit for March 31, known as "Cesar Chavez Day," in lieu of receiving 8 hours of personal holiday credit.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1012 (AB 1958) Katz. Highways: seismic retrofit.

(1) Existing law requires the Director of Transportation to establish a statewide priority list for seismic retrofit projects based on the bridge assessments performed by the department and the Counties of Santa Clara and Los Angeles, and requires the department, with those counties, to prepare or cause the preparation of retrofit plans, specifications, and estimates for all projects included in the priority list. Existing law requires all affected local agencies, with respect to projects within their jurisdictions, and the department, with respect to projects on state highways, to award contracts for and to complete those highway bridge seismic retrofit projects by specified dates.

This bill would require contracts for seismic repair, replacement, and retrofit to be awarded to the lowest responsible bidder through a competitive bid contract.

The bill would prohibit the Department of Transportation, the California Transportation Commission, and regional transportation planning agencies from taking any action to reprogram the state transportation improvement program until the next statutorily prescribed cycle for adoption of the program.

(2) Existing law provides a specific permit procedure involving certain seismic retrofit projects, as defined.

This bill would, until January 1, 1997, authorize the Director of Transportation to contract out design services, as described, for projects that are subject to the specific permit procedure in order to enhance or assist seismic retrofit project delivery. The bill would set forth certain legislative findings and intent regarding this authority.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1013 (AB 3335) Caldera. Department of Finance: reports.

Existing law requires the Department of Finance to perform various functions and duties with respect to the development and examination of policies and actions relating to demographic data.

This bill would require the department, whenever it issues reports containing population breakdowns or analyses based on race or ethnicity, to report Asian-Pacific Islanders as a distinct category, and not combine Asian-Pacific Islanders into any other category.

Ch. 1014 (AB 1045) Allen. Education.

(1) Existing law authorizes county boards of education to establish and maintain one or more community schools.

This bill would require the superintendent of schools of a county that does not maintain a community school to develop a plan with the governing board of the school districts in that county to ensure that pupils in that county who need an alternative school placement are served. This requirement would impose a state-mandated local program.

(2) Existing law authorizes a county board of education to enroll in a community school a pupil who has been expelled for (A) causing serious physical injury to another person, except in self-defense, (B) possessing a designated dangerous object, (C) selling a designated controlled substance, (D) committing robbery or extortion, or (E) possessing a firearm, and specifies certain levels of apportionments for those pupils.

This bill would specify the same level of apportionment for pupils that are expelled for the 5 reasons stated above and would authorize the county board also to enroll pupils who are expelled for a specified related act.

(3) Existing law provides that community school apportionments may be claimed only for pupils enrolled in grades 7 to 12, inclusive.

This bill would provide that these apportionments may be claimed also for pupils who are enrolled in kindergarten and grades 1 to 6, inclusive, and are expelled from a school district.

(4) Existing law contains provisions relating to school safety, but makes no specific provision for the installation of 2-way communication devices in public school classrooms.

This bill would state the Legislature's intent that each school district and each county superintendent of schools equip classrooms with 2-way communication devices that a teacher can use if a medical emergency or violent crime occurs in a classroom.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law requires a principal or superintendent of schools, except in certain circumstances, to recommend the expulsion of a pupil for the acts listed in (A) and (D) of paragraph (2) above, and authorizes the governing board, upon recommendation as specified, to expel that pupil or a pupil who commits specified related acts. Existing law requires a principal or superintendent of schools to suspend immediately and recommend for expulsion a pupil found in possession of a firearm at a school or at a school activity off school grounds and also requires the governing board, when certain conditions are met, to expel that pupil or refer that pupil to a specified program of study.

This bill would require a principal or superintendent of schools to recommend the expulsion of a pupil for an act listed in (A), (B), and (D) above, or for unlawful possession of a designated controlled substance, and would authorize the governing board, upon recommendation as specified, to expel that pupil upon specified findings. The bill would require the immediate suspension and a recommendation of expulsion of a pupil in grades 7 to 12, inclusive, for possessing, selling or otherwise furnishing a firearm, except as specified, for causing harm to, or threatening harm to, another person with a knife, as defined, or for unlawfully selling a controlled substance, as specified, and would require the governing board to expel that pupil upon a finding that the pupil committed the act. The bill would require that the expelled pupil be referred to a specified program of study. The bill would apply certain of these suspension, expulsion, and referral requirements to a pupil in kindergarten and grades 1 to 6, inclusive. By increasing the circumstances when suspensions and expulsions are required, this provision would impose a state-mandated local program.

(6) Existing law prohibits a pupil expelled from school for an act listed in (A) through (D) above from enrolling in any other school or school district during the period of expulsion unless it is a community or juvenile court school.

This bill would apply this prohibition also to a pupil expelled from school for a specified related act and for possessing, selling, or furnishing a firearm.

(7) Under existing law, an expulsion order of a pupil remains in effect until the governing board of a school district orders the readmission of the pupil according to specified circumstances. Existing law expressly authorizes the governing board of a school district to recommend a plan of rehabilitation.

This bill would authorize, if the expulsion is for specified acts, a pupil to apply for readmission not earlier than the last day of the semester following the semester in which the expulsion occurred. The bill would require the governing board of the school district to recommend a plan of rehabilitation for the pupil, as specified, thereby imposing a state-mandated local program.

(8) Existing law requires written notice of a governing board's decision to expel a pupil to be given to the pupil or the pupil's parent or guardian, accompanied by a notice of the right to appeal, as specified.

This bill would also require the pupil, or the parent or guardian of the pupil, to receive notice of the education alternatives available to the pupil during the time of expulsion.

To the extent that these requirements would impose additional duties on governing boards of school districts, the bill would impose a state-mandated local program.

(9) Existing law provides that pupils may be suspended or expelled for specified reasons and requires certain procedures to be followed if a pupil is to be suspended or expelled. Existing law requires the parent or guardian of a suspended pupil to be given written notice of the suspension and requires a pupil to be given written notice of an expulsion hearing.

This bill would require the posting, at a schoolsite on a bulletin board that is accessible to all pupils, a notice of the suspension and expulsion policy of the school and the governing board of the school district or the county superintendent of schools, as appropriate. This requirement would impose a state-mandated local program.

(10) This bill would state the intent of the Legislature that specified federal funds be used to offset any costs to school districts imposed by Section 5 of the bill.

(11) This bill would incorporate additional changes in Section 48915 of the Education Code, proposed by SB 1645, to be operative only if SB 1645 and this bill are chaptered and this bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(12) This bill would provide that it shall not become operative unless SB 1645 of the 1993–94 Regular Session is enacted and becomes operative in which case this bill would declare that it shall become operative August 1, 1995.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1015 (AB 645) Allen. Gun-Free School Zone Act of 1995.

Existing law provides that, except for certain enumerated persons, any person who brings or possesses a loaded firearm upon the grounds of, or within, any public or private school providing instruction in kindergarten or grades 1 to 12, inclusive, unless it is with the written permission of the school district superintendent, his or her designee, or equivalent school authority, shall be punished by imprisonment in the state prison for 2, 3, or 4 years.

Existing law also provides that, except for certain enumerated persons, any person who brings or possesses a firearm upon the grounds of, or within, any public or private school providing instruction in kindergarten or grades 1 to 12, inclusive, or any private university or college, unless with written permission, shall be punished by imprisonment in the state prison for 1, 2, or 3 years.

This bill would create the Gun-Free School Zone Act of 1995, and would provide that, except as specified, any person who possesses a firearm in a place that the person knows, or reasonably should know, is a school zone of a public or private school, providing instruction in kindergarten or grades 1 to 12, inclusive, and within a distance of 1,000 feet from the grounds of the school, shall be punished by imprisonment in the state prison for 2, 3, or 5 years, and any person who, with reckless disregard for the safety of another, discharges, or attempts to discharge, a firearm in a school zone, as so defined, shall be punished by imprisonment in the state prison for 3, 5, or 7 years. Because these provisions would expand the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1016 (AB 2728) B. Friedman. Pupils: suspension.

Existing law enumerates the reasons a pupil may be suspended from school. Existing law also specifies the manner in which a pupil may be suspended.

This bill would authorize schools to assign certain suspended pupils to a supervised suspension classroom for the entire period of suspension, as specified. The bill would require the teacher of a suspended pupil who is assigned to a supervised suspension classroom to provide all assignments and tests that the pupil will miss while suspended. The bill would also require, as specified, the notification of a pupil's parent or guardian when a pupil is assigned to a supervised suspension classroom.

This bill would provide that a school in which the number of pupils suspended in the prior year exceeded 30% of enrollment, should consider implementing a supervised suspension program or an alternative to the school's off-campus suspension program, as specified. The bill would permit that school to report to a specified district administrator on the rate of reduction in the school's off-campus suspensions, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1017 (AB 2752) Allen. Pupils: suspension and expulsion.

(1) Existing law specifies the acts for which a pupil may be suspended or expelled and includes sexual harassment among them.

This bill would add to these acts the intentional harassment, threatening, or intimidation of a pupil or group of pupils, that materially disrupts classwork, creates substantial disorder, and invades the rights of that pupil or group of pupils by creating an intimidating or hostile educational environment, as specified. By adding these acts to those for which a pupil may be suspended or expelled, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1018 (AB 3053) Connolly. Juveniles: confidentiality of records.

Existing law generally provides for the confidentiality of juvenile court records and includes a statement of legislative intent to that effect. Existing law requires, however, that a court provide written notice that a minor has committed specified offenses to the superintendent of the school district in which the minor is a student. This information must be transmitted to any teacher, counselor, or administrator who has direct supervisorial or disciplinary responsibility over the minor who the superintendent, or his or her designee, believes needs this information to work with the pupil, to avoid being needlessly vulnerable, or to protect other persons. Existing law provides for the destruction of this information, as specified.

This bill would revise the statement of legislative intent regarding the confidentiality of juvenile records. The bill would require a court to transmit written notice, as specified, that a minor has committed any felony or any one of certain enumerated misdemeanors, rather than one of the specified offenses, to the superintendent of the school district in which the minor is a student. The notice must contain only the offense found to have been committed by the minor and the disposition of the minor's case.

The bill would require the district superintendent to transmit the information to the principal of the school attended by the minor, and would require the principal to expeditiously disseminate that information, as specified. The bill would also provide that the information shall be retained in a confidential file, shall be transferred to the minor's subsequent school of attendance, and shall be maintained until the minor graduates from high school, is released from the jurisdiction of the juvenile court, or reaches the age of 18 years, whichever occurs first, before being destroyed. By increasing the duties of local school officials, this bill would create a state-mandated local program.

This bill would incorporate additional changes in Section 827 of the Welfare and Institutions Code proposed by AB 3309 of the Regular Session of the Legislature, to be operative only if AB 3309 and this bill are both enacted and become effective as specified, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1019 (AB 3309) Takasugi. Juveniles: confidentiality of reports.

(1) Existing law generally provides for the confidentiality of juvenile court proceedings. However, it provides that the names of minors found to have committed any one of certain offenses shall not be confidential unless the court so orders.

This bill would specifically authorize the name of a minor who is 14 years of age or older and who has committed any one of specified violent or serious offenses to be disclosed to the public once a juvenile court has sustained a petition to declare the minor a ward based on the commission of that offense.

(2) Existing law generally prohibits the disclosure of juvenile court records, probation reports, and other documents relating to a matter within the jurisdiction of the juvenile court, except to the minor who is the subject of the proceeding, his or her parents or guardian, specified prosecutors, court personnel, attorneys for the parties, child protective agencies, as specified, school officials, as specified, and, upon court order.

This bill would expand the list of persons authorized to inspect juvenile court records and documents.

The bill also would revise the law relating to disclosure of records to school personnel to require that written notice that a minor enrolled in a public school has been found by a court to have committed any felony or any one of certain enumerated misdemeanors, rather than specified offenses only as required by existing law, be provided by the court to the superintendent of the school district in which the minor is a student. The notice would be required to contain only the offense found to have been committed by the minor and the disposition of the minor's case. It also would revise the procedure for the dissemination of that information. The bill would also require that information concerning a minor received from a court be retained in a confidential file and transferred, as specified, until the minor graduates from high school, is released from juvenile court jurisdiction, or turns 18 years of age, whichever occurs first. By imposing additional duties on local officials, the bill would create a state-mandated local program. This bill would make the intentional violation of these provisions a misdemeanor punishable by a fine not to exceed $500, thereby creating a new crime or infraction.

This bill would incorporate additional changes to Section 827 of the Welfare and Institutions Code proposed by AB 3053 of the Regular Session of the Legislature, to be operative only if AB 3053 and this bill are both enacted and become effective, as specified, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 1020 (AB 3409) Umberg. Criminal law: drug offenders.

Existing law provides that any specified sex offender who comes into any school building or upon school grounds and remains there or reenters after being asked to leave by designated school officials or public safety officers shall be guilty of a misdemeanor, unless that person is a parent or guardian of a child attending the school or a student at the school, or has prior written permission for the entry from the chief administrative officer of the school.

This bill would provide that any specified drug offender, as defined, who comes into any school building, or upon school grounds or adjacent public ways, and remains there, reenters, or otherwise establishes a continued pattern of unauthorized entry within 7 days of being asked to leave by designated school officials or public safety officers shall be guilty of a misdemeanor, punishable by a fine of up to $1,000 or up to 6 months in jail, or both. These provisions would not apply to any person who is a parent or guardian

NOTE: Superior numbers appear as a separate section at the end of the digests.

of a child attending the school or a student at the school, or who has prior written permission for the entry from the chief administrative officer of the school. This bill would create a new crime, thereby creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1021 (AB 3457) Harvey. School volunteers: criminal records check.

Existing law specifically authorizes the governing board of a school district to permit any person to supervise pupils during the school lunch period or another nutrition period and to serve as a nonteaching volunteer aide under the immediate supervision and direction of certificated personnel. Existing law also authorizes a school district to request that a local law enforcement agency conduct an automated records check of a prospective noncertificated employee to ascertain whether the prospective employee has a criminal record.

This bill would specifically authorize a school district or county office of education to request that a local law enforcement agency conduct an automated records check of a prospective nonteaching volunteer aide to ascertain whether that person has been convicted of a sex offense, as specified.

Ch. 1022 (SB 1255) Hughes. Crime and violence on school campuses: grant program.

Under existing law, the Legislature recognizes that crime and violence have reached an alarming level at schoolsites throughout the state and that there is a need for dealing with the complex problems of crime and violence at schoolsites and for developing effective techniques and programs to combat crime and violence on school campuses. Existing law establishes the Interagency School Safety Demonstration Act of 1985 to encourage local educational agencies and law enforcement agencies to develop and implement interagency strategies that, among other things, will reduce crime and violence on school campuses. Existing law expresses the intent of the Legislature that local educational agencies and law enforcement agencies work cooperatively to develop school safety plans, as specified.

This bill would make legislative findings and declarations relating to crime and violence on school campuses, including a declaration that the Legislature recognizes its responsibility to assist school districts in correcting and preventing school safety problems.

This bill would create, until January 1, 1998, the Conflict Resolution and School Violence Reduction Program under which the Superintendent of Public Instruction would allocate specified funds according to a formula to county offices of education that notify the superintendent of their intent to participate in the grant program. The bill would require participating county offices of education to develop requests for proposals no later than March 1, 1995, and no later than March 1 of each succeeding year through the 1996–97 school year, pursuant to which the county offices of education would select grant recipients from schools in accordance with specified criteria. The grants would be used for conflict resolution projects, as specified. The bill would authorize consortia of county offices of education, to be created only if certain circumstances exist, to participate in the grant program. These consortia would be subject to the program to the same extent as an individual county office of education under the program.

The bill would create the School Safety Account, which would be continuously appropriated. Funds made available pursuant to a specified section pertaining to asset forfeiture would be deposited in the School Safety Account and allocated to county offices of education, as specified. The bill would require the superintendent to contract for an ongoing evaluation of the conflict resolution projects that receive grant funds and would require the superintendent to submit to the Legislature an interim evaluation on or before June 1, 1996, and a final evaluation on or before June 1, 1997.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1023 (SB 1728) Hughes. Truancy.

(1) Existing law defines a truant as any pupil subject to compulsory full-time education or to compulsory continuation education who is absent from school without valid excuse more than 3 days or tardy in excess of 30 minutes on each of more than 3 days in one school year, and provides for the punishment therefor.

This bill would instead provide that pupils are truant if they are absent without valid excuse 3 days in one school year or tardy without valid excuse in excess of 30 minutes on each of more than 3 days in one school year.

(2) Existing law requires a school district, upon a pupil's classification as a truant, to notify the pupil's parent or guardian of certain information, including that the parent or guardian is obligated to compel the attendance of the pupil at school.

This bill would require that the notice include additional information, including informing the parent or guardian that alternative education programs may be available in the district, that the pupil may be subject to prosecution, and that the pupil is subject to suspension or revocation of the pupil's driving privilege.

(3) Under existing law, any minor who is subject to compulsory full-time or continuation education and is absent from school without a valid excuse may be taken into custody by an attendance supervisor, peace officer, or school administrator or his or her designee.

This bill would instead provide that the attendance supervisor or his or her designee, a peace officer, a school administrator or his or her designee, or any probation officer may arrest or assume temporary custody of the minor under these provisions.

(4) Under existing law, a juvenile who is an habitual truant is required to be referred to a school attendance review board or truancy mediation program, before referral to the juvenile court. Under existing law, a juvenile may be adjudged a ward of the juvenile court for habitual truancy. If a minor initially has been referred to the board or program and has been adjudged a ward of the court, the court may order the juvenile to participate in a specified community service education program under certain conditions. Existing law specifies further procedures for resolving continuing truancy.

This bill would repeal the section on referral to the school attendance review board or truancy mediation program and would instead provide that, upon the first truancy, the pupil may be personally given a written warning by a specified peace officer. The bill would provide that a record of the written warning may be kept at the school for 2 years or until the pupil graduates or transfers from the school. The law enforcement agency may also maintain a record of the written warning.

This bill would provide that, upon the 2nd truancy within the same school year, the pupil may be assigned by the school to an afterschool or a weekend study program, as specified. Upon the 3rd truancy within the same school year, the bill would provide that the pupil be referred to and required to attend an attendance review board, truancy mediation program, or a comparable program.

This bill would provide that if a pupil who has attended certain programs including a school attendance review board program, has a 4th truancy in the same school year, the pupil shall be classified as an habitual truant, within the jurisdiction of the court, and may be adjudged a ward of the court. If the pupil is adjudged a ward of the court, he or she shall be subject to one or more of the following: community service, a $100 fine, attendance in a court-approved truancy prevention program, or suspension, delay, or restriction of driving privileges, as specified. The bill would also make the pupil's parent or guardian jointly liable for the $100 fine. The bill would make conforming changes to related provisions of law.

(5) This bill would impose a state-mandated local program by placing new duties on local education entities, juvenile laws, and probation officers.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this

NOTE: Superior numbers appear as a separate section at the end of the digests.

bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1024 (AB 2658) B. Friedman. Juveniles: truancy.

Existing law defines truancy, authorizes counties to establish school attendance review boards, and authorizes the district attorney and the probation officer to participate in a truancy mediation program. Existing law specifies procedures for the management of pupils who have been classified as truant, which include referral by a school district to any truancy mediation program in a county that does not have a school attendance review board, referral by a school district to any school attendance review board, and referral by a school attendance review board to any truancy mediation program, or, if there is none, to the juvenile court which may adjudge the minor to be a ward of the court.

This bill would authorize a school district to refer a truant pupil to the probation department for services if the probation department has elected to receive these referrals. The bill would require the probation officer to perform certain duties concerning referred pupils, and would authorize the probation officer to refer the pupil to a truancy mediation program or to the juvenile court, as specified. The bill would make related and conforming changes.

This bill would incorporate additional changes in Section 601 of the Welfare and Institutions Code proposed by AB 55 of the First Extraordinary Session of the Legislature and SB 1728, to become operative only if AB 55 or SB 1728 and this bill are enacted and become effective as specified, and this bill is enacted last.

This bill would repeal Section 601.1 of the Welfare and Institutions Code if AB 55 of the First Extraordinary Session of the Legislature, or SB 1728, or both, and this bill, are enacted.

Ch. 1025 (AB 1905) Campbell. Property tax revenue allocations: library services.

Existing property tax law requires the auditor for the County of Santa Cruz, for the 1993–94 fiscal year only, to deposit those property tax revenues that would otherwise be allocated to enterprise special districts into a Supplemental Allocation Fund for allocation to enterprise special districts and the County Library Fund.

The bill would also require the auditor for the County of Santa Cruz to deposit those property tax revenues that would otherwise be allocated to enterprise special districts into a Supplemental Allocation Fund for allocation to enterprise special districts and the County Library Fund for the 1994–95, 1995–96, and 1996–97 fiscal years. By requiring local officials to perform new duties in allocating property tax revenues with respect to the 1994–95 fiscal year, this bill would impose a state-mandated local program.

This bill would contain legislative declarations as to the necessity for a special statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1026 (AB 722) Karnette. Rental-purchase agreements.

Existing provisions of the Unruh Act governing retail installment sales regulate the terms of defined retail installment contracts under which goods or services are sold for a deferred payment price payable in installments which exceed the cash price, and including bailment or lease contracts under which the lessee or bailee pays substantially the equivalent or in excess of the purchase price for the use of property and has an option to acquire the property for no more than nominal additional consideration. Existing law does not contain special regulation of transactions involving rental of personal property for personal, family, or household purposes, other than vehicles, under which the renter may optionally purchase the property with an agreed portion of the rent to be applied to the purchase price.

This bill would enact the Karnette Rental-Purchase Act. The bill would require every

NOTE: Superior numbers appear as a separate section at the end of the digests.

rental-purchase agreement to be in writing and to contain specified information, including a description of the property and the total number and the total amount of periodic payments necessary to acquire the property. The bill would also prohibit the inclusion of certain provisions in these agreements, including an agreement to purchase insurance from the lessor against loss or damage to the rental property, or to purchase any service contract, except as specified, the waiver of specified rights or defenses under the act, or the granting of a security interest in property.

The bill would specify the parameters of the consumer's liability for loss of, or damage to, the property and those of permissible security deposits. The bill would also regulate the advertisement of rental-purchase agreements, including the sending of solicitation or other promotional materials. The bill would provide that any waiver or modification of any of these provisions shall be void and unenforceable as contrary to public policy.

Since a willful violation of these provisions would be a misdemeanor, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1027 (AB 810) Tucker. State employees: industrial disability leave.

Existing law provides temporary disability indemnity benefits for state officers and employees.

This bill would limit the receipt of temporary disability indemnity benefits by certain excluded state officers and employees entitled to receive industrial disability benefits, but would permit an employee to elect to supplement industrial disability leave payments with certain accrued leave credits in an amount necessary to approximate the employee's full net pay, as specified.

Ch. 1028 (AB 988) Tucker. Alcoholic beverages: fair trade contracts and price posting.

Under existing law, the Department of Alcoholic Beverage Control sets the fee for an original on-sale or off-sale general license according to a specified formula, but in no event at less than $12,000. The fee for an original on-sale general license for seasonal business is set according to another specified formula, but in no event at less than $9,000. Existing law also provides that an original on-sale or off-sale general license for which a fee has been paid pursuant to the above provision may not be transferred for one year following its initial issuance.

This bill would instead provide that an original on-sale or off-sale general license for which a fee in excess of $12,000 has been paid may not be transferred for one year following its initial issuance. The bill would set the fee for an original on-sale or off-sale general license at $12,000, and would provide that such a license may not be transferred for 2 years following its initial issuance. It would delete the provision regarding an original on-sale general license for seasonal business.

Existing law authorizes the Department of Alcoholic Beverage Control, in its discretion, to issue an interim retail permit to an applicant for any retail license to operate the premises during the period an application for a license at the premises is pending, subject to specified conditions. Existing law also sets forth requirements for renewal of alcoholic beverage licenses.

This bill would make technical, clarifying changes in these provisions.

Existing law authorizes and regulates certain fair trade contracts and the filing of price lists with the Department of Alcoholic Beverage Control, as specified.

This bill would delete those provisions.

The Alcoholic Beverage Control Act provides that nothing in that law prohibits a winegrower from giving or selling wine, or a beer manufacturer from giving or selling beer, to certain nonprofit organizations, as specified, at prices other than those contained in schedules filed with the Department of Alcoholic Beverage Control.

This bill would provide that distilled spirits manufacturers and distilled spirits manu-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

facturers' agents are not prohibited from giving or selling distilled spirits to those nonprofit organizations. The bill would also provide that licensed importers are not prohibited from giving or selling beer, wine, or distilled spirits to those nonprofit organizations.

Under existing law, the holder of no more than 6 on-sale licenses may hold not more than 10% of the stock of one corporate licensed beer manufacturer located in the County of Los Angeles.

This bill would delete that provision.

Existing provisions of the Alcoholic Beverage Control Act known as "tied-house" restrictions generally prohibit an on-sale alcoholic beverage licensee from having an ownership interest in an alcoholic beverage manufacturer. Existing law allows as an exception to those provisions a holder of no more than 6 on-sale licenses to own a microbrewery, and provides that the on-sale licensee shall purchase no alcoholic beverages for sale in this state other than from a wholesale or winegrower licensee.

This bill would create an exception to the requirement regarding purchase from a wholesale or winegrower licensee for alcoholic beverages manufactured by the licensed beer manufacturer at a single location contiguous or adjacent to the premises of the on-sale licensee. This bill would also allow, until January 1, 1998, a holder of no more than one on-sale license and one off-sale general license in Siskiyou County only to own a licensed beer manufacturer, as specified.

Ch. 1029 (AB 1354) Bates. In-home supportive services.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law also provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Under existing law, personal care services, when provided to a categorically needy person, are a covered benefit under the Medi-Cal program.

Existing law authorizes the reimbursement of providers of in-home supportive services, and specifies that the level of personal services provided through the IHSS program shall be equal in amount, scope, and duration to personal services provided through the Medi-Cal program.

This bill would limit the rate of reimbursement for in-home supportive services provided through any mode of service to the rate of reimbursement for the same mode of service provided under the Medi-Cal program, unless otherwise provided in the Budget Act.

Existing law requires nonprofit consortiums and public authorities that provide IHSS services to provide for certain functions, including providing for training and monitoring of providers and recipients.

This bill would revise that requirement to instead require the provision of access to training for providers and recipients.

This bill would incorporate additional changes in Section 12300 of the Welfare and Institutions Code, proposed by AB 2208, to be operative only if AB 2208 and this bill are chaptered and become effective on January 1, 1995, and this bill is chaptered last.

Ch. 1030 (AB 1374) Frazee. Court records: destruction.

(1) Existing law sets forth various procedures for the retention, management, and destruction of court records.

This bill would repeal existing procedures and enact new procedures for the retention, management, and destruction of court records, thereby imposing a state-mandated local program by requiring new duties of local officials.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and

NOTE: Superior numbers appear as a separate section at the end of the digests.

other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1031 (AB 1691) Margolin. Insurance: fraud.

Existing law prohibits insurance fraud and prescribes penalties for its commission. Prior law consolidated these provisions and repealed former provisions.

This bill would correct and update references to these provisions to reflect the consolidation and repeals.

This bill also would provide specifically that the statute of limitations for a workers' compensation fraud offense would commence upon discovery of the offense.

Ch. 1032 (AB 1901) Speier. Talent agencies: penalties and prohibitions.

Existing law requires the licensing of talent agencies, as defined, by the Labor Commissioner, and also establishes various requirements and prohibitions with respect to the operation and management of a talent agency, including a requirement that a talent agency disburse to an artist, as defined, any moneys received on behalf of that artist within 15 days of receipt. It further requires that any matter of controversy pursuant to the foregoing provisions shall be heard and determined by the Labor Commissioner, subject to de novo review by the superior court on appeal, unless the contract of the parties contains an arbitration provision meeting certain criteria.

This bill would modify the above requirement for disbursement of funds to require disbursement within 30 days of receipt by a licensed talent agency, but would permit retention of the funds to offset an obligation of the artist to the talent agency or where the funds are the subject of a controversy before the Labor Commissioner involving a dispute as to the amount of a fee alleged to be owed to the talent agency. The bill would expressly make any withholding of funds by a talent agency beyond the 30-day period a controversy subject to the jurisdiction of the Labor Commissioner if disputed by the artist, the dispute is referred to the Labor Commissioner, and the contract of the parties does not contain an arbitration provision preempting the Labor Commissioner's jurisdiction. The bill would authorize the Labor Commissioner to award attorney's fees and interest at a 10% annual rate to an artist whose funds are withheld by a talent agency in willful violation of the requirement for disbursement within the 30-day period.

This bill would prohibit talent agencies from referring artists for certain types of services to persons, firms, or corporations in which the talent agency has a financial interest. The bill also would prohibit talent agencies from accepting a referral fee or similar compensation from any person, firm, or corporation providing certain services to an artist under contract to the talent agency.

Ch. 1033 (AB 1996) Archie-Hudson. Medi-Cal: disproportionate share providers.

Existing law provides for the Medi-Cal program pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

The Medi-Cal program is funded by federal, state, and local funds, and administered by the State Department of Health Services. Federal financial participation, through the federal medicaid program, is contingent upon approval of the state plan for the provision of health services through the Medi-Cal program.

Under existing law, the State Department of Health Services is required to make supplemental payments to certain outpatient disproportionate share hospitals based on specified criteria.

This bill would revise the calculation of supplemental payments to disproportionate share hospitals for specified payment adjustment years, as defined.

Under existing law, supplemental payments to disproportionate share hospitals made on or after the date of federal approval with respect to the 1993–94 payment adjustment year or subsequent payment adjustment years shall be deemed nonfinal payments and subject to later adjustments.

This bill would revise that limitation to apply to supplemental payments made with

NOTE: Superior numbers appear as a separate section at the end of the digests.

respect to the 1994–95 payment adjustment year or subsequent payment adjustment years.

Existing law requires the State Department of Health Services to take steps necessary to have published, on or before June 28, 1994, any public notices that are appropriate or required under federal or California law in order to ensure a federal medicaid effective date prior to July 1, 1994, for the provisions of Chapter 120 of the Statutes of 1994, with respect to the revision of supplemental payments to disproportionate share hospitals.

This bill would revise the required publication date to June 29, 1994.

The bill would make additional technical revisions.

This bill would take effect immediately as an urgency statute.

Ch. 1034 (AB 2163) Areias. Workers' compensation: Department of Corrections and Department of the Youth Authority.

Existing law establishes a specified workers' compensation early intervention program in the Department of Corrections and the Department of the Youth Authority for employees who sustain injuries. Existing law also requires the Director of Corrections and the Director of the Youth Authority to report to the Auditor General by a specified date on the accomplishments of early intervention and to include specified data in the report, and requires the Auditor General to review and evaluate the report, and submit this report, along with its review and evaluation, to the Legislature, as specified.

This bill would require the Department of Corrections, the Department of the Youth Authority, with the State Department of Mental Health as a control group, and in conjunction with the State Compensation Insurance Fund to develop a plan to accomplish an audit of the early intervention program to be administered by the Bureau of State Audits to identify the data needed to determine whether the program satisfies certain objectives. The bill would require the Bureau of State Audits to report to the Legislature, as specified.

The bill would state legislative intent.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1035 (AB 2411) Knight. Postsecondary education: resident classification.

(1) Existing law establishes uniform student residency requirements for purposes of ascertaining the amount of the fees to be paid by students who attend the California Community Colleges. Existing law entitles a student who is a member of the armed forces of the United States stationed in this state on active duty, except a member of the armed forces assigned for educational purposes to state-supported institutions of higher education, to resident classification until he or she has resided in the state the minimum time necessary to become a resident.

This bill, until January 1, 2000, would entitle that student to resident classification at any campus of the California Community Colleges. The bill, therefore, would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1036 (AB 2415) Napolitano. Taxation: violations: place of trial.

Under the existing Personal Income Tax Law and Bank and Corporation Tax Law, the place of trial for offenses under those laws is the county of residence or principal place of business of the defendant or defendants. If the defendant has no residence or principal place of business in this state, existing law provides that the trial shall be held in the County of Sacramento.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that the place of trial is the county of residence or principal place of business of the defendant or defendants at the time of the commission of the offense. It would provide that if the defendant or defendants had no residence or principal place of business at the time of commission of the offense, the trial shall be held in the County of Sacramento.

Under existing law, the place of trial for a criminal offense is generally the jurisdiction within which the crime is committed.

This bill would provide that in a criminal case charging a defendant or defendants with committing a violation of the Personal Income Tax Law or the Bank and Corporation Tax Law, the place of trial may be as set forth in this bill, or as provided in specified provisions of law establishing the place of trial in criminal cases.

Ch. 1037 (AB 2438) Karnette. Vehicles: weight limits: local exception.

Existing law prescribes gross weight limits for vehicles operated upon the highways.

Existing law authorizes the legislative body of any county or city, by ordinance or resolution, to permit the operation and movement of vehicles and loads upon highways under their respective jurisdictions that exceed the prescribed gross weight limits. That authorization does not apply to state highways.

This bill would authorize the Department of Transportation, upon adoption of an ordinance or resolution by both the City of Long Beach and the City of Los Angeles that is in conformance with the provisions of the bill, to issue a special permit to the operator of a vehicle that exceeds the maximum gross weight limits specified above, permitting the operation and movement of the vehicle and its load on specified state highways, if the vehicle meets specified criteria. The bill would prescribe criteria to be included in the application for the permit issued by the department.

These provisions would remain in effect only until January 1, 1998, and as of that date would be repealed, unless a later enacted statute, which is enacted on or before that date deletes or extends that date.

Ch. 1038 (AB 2488) Bowen. Children's services: disclosure of records.

Existing law authorizes members of children's multidisciplinary services teams to disclose to one another information and records on a child that are relevant to the treatment and services available to that child through integrated children's services programs, subject to the release of the information on the child signed by the child's parent, guardian, or legal representative.

Existing law alternatively authorizes, until January 1, 1996, children's multidisciplinary services teams in the County of San Diego to disclose to one another information and view records on a child or the child's family necessary to formulate an integrated services plan or to deliver services to children and their families, subject to memoranda of understanding between the agencies represented on the team. Consent of the child's parent, guardian, or legal representative is only required for the release of copies of mental health records, physical health records, and drug or alcohol records on the child or the child's family. The team may also designate qualified persons to be members of the team for a particular case, and to receive and disclose information and records.

This bill would repeal the provisions applying to children's multidisciplinary services teams generally, and would instead make the provisions relating to the County of San Diego applicable to children's multidisciplinary services teams statewide. It would also delete the repeal date of those provisions.

The bill would permit multidisciplinary services team members to establish a data base for specified purposes.

Ch. 1039 (AB 2531) Gotch. Administrative regulations.

The Administrative Procedure Act includes provisions governing the procedure for the adoption of regulations by state agencies and for the review of those regulations by the Office of Administrative Law.

This bill would revise and reorganize these provisions and would make other technical, nonsubstantive changes, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1040 (AB 2681) Mountjoy. Drinking water standards: fluoride level variances.

Existing law, commonly referred to as the California Safe Drinking Water Act, the State Department of Health Services is required to administer provisions relating to the regulation of drinking water to protect public health, including, but not limited to the conduct of research, studies, and demonstration programs relating to the provision of a dependable, safe supply of drinking water, development of a safe drinking water plan, adoption of primary drinking water standards for contaminants found in water, enforcement of the federal Safe Drinking Water Act, and adoption of enforcement regulations.

Existing law permits the department to grant variances from primary drinking water standards to public water systems, and also requires the department to grant requested variances from the primary drinking water standards adopted by the department for fluoride to specified water systems.

This bill would delete the reference to specified water systems and would require the department to grant these fluoride standard variances at the request of any public water system.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1041 (AB 2733) Karnette. Vehicles: proof of ownership: personal identification.

(1) Existing law provides for the issuance of copies, transfers, duplications, and substitutions by the Department of Motor Vehicles of certificates of vehicle ownership, registration, registration cards, and license plates upon the request of the owner of the vehicle.

This bill would prohibit, except as specified, the issuance of copies, duplications, or substitutions, as the case may be, of certificates of ownership or license plates to applicants who apply in person, unless the registered owner presents proof of ownership of the vehicle acceptable to the department and presents, in person, a driver's license or identification card containing a photograph.

Ch. 1042 (AB 2844) Cannella. Incarcerated minors: benefits.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, under the administration of the State Department of Social Services, and pursuant to which each county provides cash assistance and other benefits to qualified low-income families. Each county is required to pay a share of the cost of both aid grant and administrative costs for the AFDC program.

Existing law requires the board of supervisors in every county to provide a juvenile hall for the detention of wards and dependent children of the juvenile court and of persons alleged to come within the jurisdiction of the juvenile court.

This bill would provide that whenever any minor is incarcerated in a juvenile hall or other county juvenile facility or by the Youth Authority, for a period of at least 30 consecutive days, the county facility would be permitted and the Youth Authority would be required to inform the department of the minor's name, date of birth, and social security number.

The bill would require the department to determine whether these minors are part of a family receiving AFDC benefits, and if so, to notify the county welfare department in the county in which the minor resides. It would require the county welfare department to seek reimbursement of any overpayments pursuant to existing law and regulation.

Ch. 1043 (AB 2851) Escutia. Insurance: local agency building or construction contracts.

Existing law prohibits, with respect to competitively bid local public agency building or construction contracts, certain practices relating to insurance or surety requirements but exempts certain projects and agencies including any project undertaken by the Harbor Department of the City of Los Angeles.

This bill would extend the exemptions to include any projects undertaken by the harbor departments of the City of Los Angeles and the City of Long Beach or projects of any joint powers authority formed by the City of Los Angeles and the City of Long

NOTE: Superior numbers appear as a separate section at the end of the digests.

Beach for the purpose of improving the Alameda Corridor.

Ch. 1044 (AB 2887) Seastrand. State operations.

(1) Existing law permits the State Personnel Board to authorize the extension of limited-term appointments for up to a total of 2 years' duration under certain specified conditions.

This bill would authorize the board, until January 1, 2000, to extend that term limit for an additional 2 years if the extension is needed to complete construction projects still in progress.

(2) Existing law provides that whenever any statute requires by the use of the word or words "approve," "approval," "authorize," or "authorization," the Director of General Services to approve or authorize any act or transaction, the approval or authorization shall be deemed to have been given only if given in writing by the director, the deputy director, or by some other officer or employee of the Department of General Services acting pursuant to written authority of the director.

This bill would provide that the term "in writing" includes an electronic signature, as specified.

(3) Existing law exempts, until January 1, 1995, all product specifications that the Department of General Services or any other state agency prepares for goods for any contract entered into by any state agency for the purchase of goods, as specified, from the review and adoption procedures of the Administrative Procedure Act.

This bill would delete the January 1, 1995, expiration date for the above exemption, thereby making the exemption permanent.

Ch. 1045 (AB 2909) Cannella. Horseracing revenue: appropriation for state designated fairs; joint powers agreements.

(1) Existing law provides that notwithstanding the provisions that provide for the continuous appropriation of license fees from ontrack wagering for various specific purposes, for the 1993–94 fiscal year, those funds shall be utilized for capital outlay for fair projects involving public health and safety, for fair projects involving major and deferred maintenance, for fair projects necessary due to any emergency, for projects that are required by physical changes to the fair site, for projects that are required to protect the fair property or installation, such as fencing and flood protection, for the acquisition or improvement of any property or facility that will serve to enhance the operation of the fair, and for general operational support purposes, and provides that the funds may be allocated by the Secretary of Food and Agriculture for those purposes to all state designated fairs, as defined.

This bill would make an appropriation by requiring that those continuously appropriated funds also be used for those purposes for the 1994–95 fiscal year.

(2) Under existing law, a joint powers agency may create risk pooling arrangements for the payment of general liability losses incurred by participants and exhibitors in fair sponsored programs and special events users of fair facilities.

This bill would permit a joint powers agency, the members of which may conduct agricultural, livestock, industrial, cultural, or other types of fairs and exhibitions, to establish and administer risk pooling arrangements for the payment of general liability losses incurred by nonprofit corporations conducting or benefiting agricultural, livestock, industrial, cultural, or other types of fairs and exhibitions, and by nonprofit corporations or auxiliary organizations operating facilities, programs, or events at public schools, the California Community Colleges, the California State University, or the University of California.

Ch. 1046 (AB 2962) Baca. Private works of improvement.

Existing law contains various provisions relating to contracts for the performance of private works of improvement, including provisions for the withholding and timely disbursement of retention proceeds.

Existing law specifies that, with respect to all contracts relating to the construction of any private work of improvement entered into on or after July 1, 1991, the original contractor may withhold from a subcontractor its portion of the retention proceeds if

NOTE: Superior numbers appear as a separate section at the end of the digests.

a bona fide dispute exists between the subcontractor and the original contractor.

This bill would recast that latter provision to provide that if a bona fide dispute between the original contractor and a subcontractor exists, the original contractor may withhold from that subcontractor with whom the dispute exists its portion of the retention proceeds.

Ch. 1047 (AB 3057) Alpert. Lobster traps: hazards.

Under existing law, publicly employed safety personnel may remove a trap, buoy, or line located in or near breaking surf or adjacent to a public beach which they believe poses a public safety hazard. Existing law requires persons removing a trap, buoy, or buoy line to report the buoy identification number to the Department of Fish and Game for the purposes of identifying the owner and to notify the owner of its removal.

This bill would, instead, require the person removing a trap and any attachments thereto, if identified by a buoy identification number, to make an attempt to contact the person whose permit or license number is marked on the buoy, advising where the property is located. The bill would exempt those persons from responsibility to secure the trap or attachments, would authorize employees of the department to disclose the name, address, and buoy identification numbers of currently permitted or licensed persons to representatives of public safety agencies to assist in the return of traps and attachments to trap owners or operators, and would permit the trap to be discarded after 7 days, if the person whose permit or license number is marked on the buoy has been notified pursuant to the bill and has not retrieved the trap or if that person cannot be identified.

Ch. 1048 (AB 3068) Bustamante. Agriculture.

(1) Existing law makes it unlawful to violate the provisions governing fruit, nut, and vegetable standards, or to commit certain acts with respect thereto.

This bill would create a new crime by also making it a misdemeanor for any person to adulterate any solution or chemical or to alter any instrument or any other device provided to an enforcing officer for use in determining compliance with those standards, thereby imposing a state-mandated local program.

(2) Existing law permits the Secretary of Food and Agriculture to create an industry-funded standardization program for the purpose of implementing the provisions that govern fruit, nut, and vegetable standards.

This bill would establish an assessment on navel and Valencia oranges in the Counties of Fresno, Tulare, Kern, Madera, Riverside, Ventura, Orange, Santa Clara, and San Bernardino for the purpose of reimbursing the agricultural commissioners in those counties for administering a county maturity and freeze damage inspection program if the agricultural commissioners elect to provide the inspection program. The bill would also create a Navel and Valencia Orange Advisory Committee in the Department of Food and Agriculture for the purpose of making recommendations to the secretary on all matters regarding the implementation of these provisions. These provisions would be repealed on January 1, 1998.

(3) Existing law provides for the California Strawberry Commission in state government. Under existing law, a quorum of the commission is 7 voting producer members, 3 voting processor members, and 3 voting shipper members of the commission. Also, under existing law, a favorable vote of not less than 8 producer members, 3 processor members, and 3 shipper members of the commission is required to establish an assessment.

This bill would provide that a quorum of the commission is a majority of the voting producer members, a majority of the voting shipper members, and a majority of the voting processor members on the commission. The bill would also permit an assessment to be established by ⅔ of the voting producer members, a majority of the voting shipper members, and a majority of the voting processor members on the commission.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified

NOTE: Superior numbers appear as a separate section at the end of the digests.

reason.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1049 (AB 3086) Frazee. Unemployment insurance: reporting.

Existing law requires employers to file certain documents with the Employment Development Department relating to tax and contribution reporting.

This bill would recast and revise these provisions to simplify reporting procedures, as specified.

Among other things, this bill would do the following:

(1) Require additional information to be included in a report of wages, as provided.

(2) Require an employer to file an annual reconciliation return, as provided.

(3) Impose penalties for a failure to submit a report of wages on magnetic media, as specified, and for a failure to file an annual reconciliation return. Because these penalties would be deposited in the Employment Development Department Contingent Fund, which is continuously appropriated, this bill would make an appropriation.

(4) Provide for a waiver, under certain circumstances, by the Employment Development Department of requirements specifying time periods within which an employer must remit withheld income tax.

(5) Existing law requires that an employer submit to the department a copy of a specified written statement required to be sent to an employee.

This bill would limit the applicability of this requirement to specified employers for the 1995 calendar year and would repeal the provision containing this requirement entirely as of March 1, 1996, unless a later enacted statute that is enacted before that date deletes or extends that date.

(6) Existing law contains provisions dealing with the filing of an annual return, as specified.

This bill would limit the applicability of these provisions to specified employers for the 1995 calendar year and would repeal the sections containing these provisions entirely as of January 1, 1996, unless a later enacted statute that is enacted before that date deletes or extends that date.

This bill would also require the Employment Development Department, upon appropriation in the annual Budget Act, to allocate resources from any savings that may be realized by the passage of this bill to tax collection activities sufficient to recover any lost interest earnings to the General Fund that may be caused by the passage of this bill.

Ch. 1050 (AB 3122) Klehs. Unemployment insurance.

Under existing law, any person who receives an overpayment of unemployment compensation benefits is liable for the amount overpaid unless the overpayment was not due to fraud, misrepresentation, or willful nondisclosure, and was received without fault, and recovery would be against equity and good conscience.

This bill would provide that any employer that induces, solicits, or coerces an employee to file a false or fraudulent claim for benefits is liable for 100% of the amount of overpayment in addition to a 30% penalty. The bill would also provide that the overpayment would be deposited into the fund from which the overpayment was made, and the penalty would be deposited into the Benefit Audit Fund.

This bill would, in addition, provide that the person receiving overpayment is not liable for the overpayment if that person cooperates with the Employment Development Department in an investigation that results in a penalty or prosecution of the employer, as specified, or the department determines that it is in the interest of justice to waive all or part of the liability because overpayment was a direct result of inducement, solicitation, or coercion on the part of the employer.

Under existing law, it is a crime to aid, assist in, procure, counsel, or advise the preparation or presentation of a return, affidavit, claim, or other document, that is fraudulent or false in connection with a matter under the Unemployment Insurance Code.

This bill would provide that, in addition, it is a crime to coerce anyone in the preparation or presentation of a report, return, affidavit, claim, or other document.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also make conforming changes.

Ch. 1051 (AB 3124) Richter. Hazardous substances: property owner liability.

Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, imposes liability for the release of hazardous substances and, for that purpose, defines the terms "owner" and "property" with regard to a presumption against liability of an owner of property that is the site of a hazardous substance release.

This bill would, in addition, applicable to property acquired on or after January 1, 1995, create a rebuttable presumption, affecting the burden of producing evidence, that, if an environment assessment of property, as defined, discovers no evidence of a hazardous substance release, as specified, the owner of that property, that is either a special district or an entity or organization that holds a conservation easement pursuant to specified provisions, is not a liable person or responsible party, and would prohibit an action under the act to recover response costs for a hazardous substance release against such an owner, except as specified.

Ch. 1052 (AB 3149) Tucker. Horseracing: equine medication.

Existing law prohibits the administration of any substance of any kind to a horse after it has been entered to race in a horserace, unless the California Horse Racing Board has, by regulation, specifically authorized the use of the substance and the quantity and composition thereof. In addition to any other penalties that may be imposed, a first violation of that provision is punishable by the imposition of a civil penalty, as specified. For any 2nd or subsequent violation of that provision, the board may revoke the license. Existing law also authorizes the board to overrule any steward's decision on a specified finding.

This bill would exclude from the board's power to overrule steward's decisions those decisions to disqualify a horse due to a foul or a riding or a driving infraction in a race. The bill would instead provide for punishment specified by regulations adopted by the board, including the permanent revocation of a license. The bill would also permit the board to adopt regulations that prohibit the entry in a race of any horse that tests positive for a drug substance. This bill would permit the disqualification of the horse from the race in connection with which the drug sample was taken, as specified. The bill would also make any medication or equipment used to dispense medication that is located within the inclosure subject to search and inspection at the request of any board official.

Ch. 1053 (AB 3162) Escutia. Vehicles: traffic violator schools.

Existing law requires a traffic violator school owner to meet specified listed criteria before a license may be issued by the Department of Motor Vehicles to the traffic violator school. The department may refuse to issue a license for failure to comply with any of the requirements to obtain a license, and an existing license will be suspended or revoked by the department under specified circumstances.

This bill would include in the above-listed criteria a written assurance by the owner that the school will comply with applicable provisions of the federal Americans with Disabilities Act of 1990 and other federal and state laws prohibiting discrimination against individuals with disabilities. The bill would require the department to automatically suspend for 30 days the license issued to the owner or operator of a traffic violator school, as specified, if the department has been notified that more than one final determination, as defined, has been made that the traffic violator school violated the federal act or any other federal or state law prohibiting discrimination against individuals with disabilities.

The bill would also set forth legislative findings and declarations.

Ch. 1054 (AB 3218) Costa. Recovery and storage of oil.

(1) Under existing hazardous waste control laws, a biological process on the property of the producer treating oil, its products, and water, which is a non-RCRA waste, and which produces an effluent that is continuously discharged into navigable waters in compliance with a permit issued pursuant to the Federal Water Pollution Control Act, is exempt from regulation. The residues produced in the treatment process and subse-

NOTE: Superior numbers appear as a separate section at the end of the digests.

quently removed that conform to any criteria and guidelines for the identification of hazardous waste and extremely hazardous waste adopted by the Department of Toxic Substances Control are not exempt. A violation of the laws regulating hazardous waste is a crime.

This bill would make technical, nonsubstantive changes in those provisions and make legislative findings and a statement of legislative intent regarding the exemption which would be provided by the bill for certain oil recovery operations.

The bill would exempt units, including associated piping, that are part of a system used for the recovery of oil from oil-bearing materials, and the associated storage of these materials and the recovered oil, from the hazardous waste control laws if specified conditions are met, to the extent consistent with the federal Resource Conservation and Recovery Act of 1976. The bill would require that any residual materials removed from an exempted unit be managed in a specified manner, thereby imposing a state-mandated local program by creating a new crime. The bill would define the terms "oil," "oil-bearing materials," "oil recovery operations," and "petroleum refinery" for purposes of that exemption.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1055 (AB 3246) Bustamante. Juveniles: Fresno County.

Existing law establishes within the Department of the Youth Authority the Leadership, Esteem, Ability, and Discipline program, known as LEAD, a pilot project providing an intensive correctional program for minors 14 years of age or older who have been adjudged wards of the juvenile court on the basis of criminal conduct. Existing law initially authorizes the department to create 2 pilot programs.

This bill would authorize a similar pilot program juvenile boot camp as a partnership between Fresno County and the Department of the Youth Authority, and would specify the division of costs and sources of state funding. It would provide that the implementation of this pilot program would be contingent upon the appropriation of funds to the department, as specified.

Ch. 1056 (AB 3258) Bornstein. Child support.

Existing law provides the statewide uniform guideline for determining child support orders, as specified. Under the statewide guideline, a hardship deduction may be allowed if a parent is experiencing extreme financial hardship due to justifiable expenses resulting from certain enumerated circumstances, including the minimum basic living expenses of either parent's children for whom the parent has the obligation to support from other marriages or relationships who reside with the parent. Existing law specifies the maximum hardship deduction under this provision concerning children from other marriages or relationships, and authorizes the Judicial Council to develop tables to reflect the maximum hardship deduction.

This bill would require the Judicial Council to develop a formula for calculating the maximum hardship deduction and to submit it to the Legislature for its consideration on or before July 1, 1995.

Ch. 1057 (AB 3303) Woodruff. State Personnel Board.

Statutory law authorized the State Personnel Board to retain eligibles on employment lists for up to 6 years based on specified factors. That law was repealed by its own terms on January 1, 1994. After January 1, 1994, other provisions authorize the State Personnel Board to remove all names from open and promotional eligible lists after they have remained for more than one year from the date of the adoption of the lists that created their eligibility, and require the board to remove all names from lists of eligibles not later that 4 years after the adoption of these lists.

This bill would reenact the repealed provisions to, again, authorize the State Personnel Board, until January 1, 1996, to retain eligibles on an employment list for up to 6 years

NOTE: Superior numbers appear as a separate section at the end of the digests.

based on specified factors.

Ch. 1058 (AB 3373) Bustamante. Environmental quality: agricultural employee housing.

(1) Existing law, the California Environmental Quality Act, requires a public lead agency, as defined, to prepare an environmental impact report on a project which it intends to carry out or approve that may have a significant effect on the environment, as defined, unless the project is exempt from the act.

This bill would exempt from the act, with a specified exception, certain development projects that consist of the construction, conversion, or use of residential housing for agricultural employees, as provided. By imposing new duties on local agencies regarding determining the applicability of, and giving notice of, that exemption, the bill would impose a state-mandated local program.

(2) The bill would express the Legislature's intent that the Office of Planning and Research include in its annual survey questions relating to the impact of that exemption on lead agencies that are considering the approval of agricultural employee housing development projects, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1059 (AB 3383) Bornstein. Agricultural chemicals: reduction pilot program.

Under existing law, the Regents of the University of California are charged with the duty of administering the university. The university carries out various research and educational projects, including pest management research.

This bill would request the Regents of the University of California to establish a pilot program, as specified, to provide extension services, training, and financial incentives for farmers who voluntarily participate in pilot projects to reduce their use of chemicals for agricultural production. The bill would prohibit the commencement of any new pilot demonstration project on or after December 31, 2001.

The bill would appropriate $250,000 from the Food Safety Account in the Department of Pesticide Regulation Fund to the Department of Pesticide Regulation for expenditure for the purposes of the bill.

Ch. 1060 (AB 3388) Harvey. Pharmacy.

Existing law provides for the licensure and regulation of health facilities, as defined, by the State Department of Health Services.

Existing law provides for the licensure and regulation of pharmacies and pharmacists. It defines the terms "pharmacy" and "controlled substances or dangerous drugs or dangerous devices" and provides that pharmacy includes a place where controlled substances or dangerous devices are furnished, sold, or dispensed.

Existing law provides that no provision of law shall be construed as prohibiting a pharmacy from furnishing a prescription drug or device to a licensed health care facility for storage in a prescribed manner.

This bill would require that these supplies furnished by a pharmacy to licensed health facilities for storage in a prescribed manner be approved by the facility's patient care policy committee or pharmaceutical service committee and be readily available to each nursing station.

Since the knowing violation of these provisions would be a misdemeanor under provisions of existing law, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The bill would, notwithstanding certain regulations, provide that a total of 24 oral dosage form or suppository form drugs may be furnished by a pharmacy to certain health facilities as described above and would provide that the department may limit the number of doses of any separate drug dosage form in each emergency supply to 4.

The California Constitution requires the state to reimburse local agencies and school

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1061 (AB 3570) Isenberg. Punitive damage awards.

Existing law provides that in an action for the breach of an obligation not arising from contract, where it is proven by clear and convincing evidence that the defendant has been guilty of oppression, fraud, or malice, the plaintiff may recover punitive or exemplary damages.

This bill would provide that when a judgment for punitive damages is entered against a defined insurer or health care service plan on or after January 1, 1995, the plaintiff shall, within 10 days, provide the Commissioner of the Department of Insurance or the Commissioner of Corporations, as specified, with a copy of the judgment, a brief recitation of the facts of the case, and copies of relevant pleadings as determined by the plaintiff. Under the bill, willful failure to comply with this provision would subject the plaintiff or his or her attorney to sanctions at the discretion of the trial court.

Ch. 1062 (AB 3594) Weggeland. Civil procedure: sanctions.

Under existing law, every pleading is required to be signed by the party or his or her attorney. Existing law authorizes every trial court to order a party, the party's attorney, or both, to pay any reasonable expenses, including attorney's fees, incurred by another party as a result of bad faith actions or tactics, as defined, that are frivolous or solely intended to cause unnecessary delay, as specified.

This bill would, until January 1, 1999, limit the applicability of the latter provisions to actions or tactics that arise from a complaint filed, or a proceeding initiated, on or before December 31, 1994. It would, until January 1, 1999, and with respect to prescribed pleadings, petitions, written notice of motions, and other similar papers, revise and recast these provisions to, among other things, require these documents of a party represented by an attorney to be signed by at least one attorney of record in his or her individual name and to state his or her address. It would require a party not represented by an attorney to sign and state his or her address and telephone number on these documents.

It would specify that, by presenting the paper to the court, the attorney or unrepresented party certifies to meeting prescribed conditions. It would provide for sanctions to be imposed for violation of these conditions, as specified. These sanctions may consist of, or include, directives of a nonmonetary nature, an order to pay a penalty to the court, or, if imposed on motion and warranted for effective deterrence, an order directing payment to the movant for some or all of reasonable attorney's fees and other expenses, as specified.

This bill would specify that these requirements would not apply to disclosures and discovery requests, responses, objections, and motions.

Under existing law, applicable only to Riverside County, until January 1, 1998, except in actions pertaining to personal injury or wrongful death, the signature of an attorney or party constitutes a certificate that the person has read the pleading, motion, or paper, that it is well grounded in fact and is warranted by existing law, and that it is not interposed for any improper purpose. If the paper is not signed, it is required to be stricken if not promptly signed. If a paper is signed in violation of those provisions, the court, upon motion or its own initiative and after notice and an opportunity to be heard, is required to impose sanctions, as specified.

This bill would repeal that provision.

This bill would make conforming changes.

This bill would require, on January 1, 1998, the Judicial Council to provide a report to the Legislature regarding the nature and frequency of sanctions motions and sanctions imposed.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1063 (AB 3639) Margolin. Health facility reporting.

Existing law, the Health Data and Advisory Council Consolidation Act, requires every organization, and officers thereof, that operates, conducts, or maintains a health facility to make reports containing prescribed data and file them with the Office of Statewide Health Planning and Development. Under the act, this data includes a hospital discharge data record filed semiannually by all health facilities, except skilled nursing, intermediate care, and congregate living health facilities, containing prescribed patient data.

This bill would require the hospital discharge data record to include additional patient information relating to prehospital care and resuscitation, and to diagnosis.

Existing law designates the Office of Statewide Health Planning and Development as the single state agency to collect prescribed health facility and clinic data for use by all state agencies.

This bill would, under certain conditions, require information collected pursuant to these provisions to be made available to the State Department of Health Services.

Ch. 1064 (AB 3649) Weggeland. Corporations: distributions.

Existing provisions of the General Corporation Law provides that distributions to shareholders can be made only when a corporation's assets exceed its liabilities by a specified ratio.

This bill would modify the standards that must be met by a corporation that incurs obligations in connection with the repurchase of its shares. The bill also specifies the civil liability incurred by receipt or distribution of corporate property in violation of specified provisions.

Existing law provides that issuers and purchasers of debt securities are exempt from state usury laws if the security is issued in compliance with specific provisions.

This bill would additionally exempt from usury provisions debt securities issued, among other things, in any exchange in connection with any merger or consolidation or purchase of assets in consideration of the issuance of securities, if properly qualified.

Ch. 1065 (AB 3664) Martinez. Public officers: benefits.

Existing law authorizes members of legislative bodies of local public agencies to receive various retirement, health and welfare, and pension trust benefits.

This bill would limit receipt of those benefits for members of legislative bodies of local public agencies whose first service commences on and after January 1, 1995.

Ch. 1066 (AB 3676) Burton. Pilots for San Francisco, San Pablo, and Suisun Bays: retirement benefits.

(1) Existing law provides for retirement benefits for pilots for the Bays of San Francisco, San Pablo, and Suisun and specified inland waters.

This bill would specify a formula for calculating the retirement benefits of a disabled or retired pilot who was issued an original pilot's license in 1985 and who was not thereafter issued an inland pilot's license, and for calculating the retirement benefits of the widow of such a pilot who is deceased.

Ch. 1067 (AB 3748) Cortese. State park system: concession contracts: operating agreements.

(1) Existing law authorizes the Department of Parks and Recreation to enter into contracts with private parties to construct, maintain, and operate concessions within units of the state park system. With specified exceptions, all concession contracts authorizing occupancy of any portion of the state park system for a period of more than 2 years are required to be awarded to the best responsible bidder, as defined. Existing law prescribes procedures for the bid process.

This bill would authorize the Director of Parks and Recreation, with regard to concession contracts entered into on and after October 1, 1994, if the director determines that it is in the best interests of the state, upon giving notice to the State Park and Recreation Commission, and in lieu of the prescribed process for awarding contracts, to award concession contracts authorizing occupancy of any portion of the state park system for a period of more than 2 years to the best responsible person or entity submitting a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

proposal, as defined. The bill would prescribe procedures for the request for proposal process, and for public notice to persons or entities for the purpose of soliciting proposals for a concession contract, as specified, and would require that any concession contract entered into pursuant to those provisions that is expected to involve a total investment or estimated annual gross sales in excess of $500,000 comply with specified requirements for entry into contract. The bill would also make a related conforming change.

(2) Existing law generally requires that revenues received from lands in a unit of the state park system that are subject to an operating agreement entered into between the department and a local agency be expended only for the care, maintenance, operation, administration, improvement, or development of the unit of the state park system in which the lands from which the revenues were derived are located and any recreational trail providing access to those lands. If the local agency operates more than one unit, excess revenues from one unit may be utilized at the other units.

This bill would require, as to operating agreements entered into, renewed, or renegotiated on and after October 1, 1994, that excess revenues, as determined by the department, from lands subject to an operating agreement be made available to the department, upon appropriation by the Legislature in the Budget Act, for support of the department.

(3) The bill would declare legislative intent.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1068 (AB 3814) W. Brown. Vehicles: special interest license plates.

Existing law authorizes the Department of Motor Vehicles to issue special interest license plates, among other special license plates, to applicants for specified additional fees.

This bill would require the department, in consultation with the American Heritage Rodeo Foundation, to design and make available for issuance special interest license plates, as specified. The bill would require an applicant for these plates to pay, in addition to regular registration or renewal fees, specified additional fees for the issuance, renewal, retention, transfer, or substitute replacement, as the case may be, of these special interest license plates. These fees, less the administrative costs of the department under these provisions would be deposited in the American Heritage Rodeo Foundation License Plate Account, which the bill would create in the General Fund, for allocation, upon appropriation by the Legislature, to the foundation to educate the public about the ethnic American West and to preserve important cultural and historical artifacts and features of California and the American West.

The bill would authorize, for additional fees, the issuance of the special interest license plates as environmental license plates. These additional fees would be deposited in the Environmental License Plate Fund.

Ch. 1069 (AB 3625) Campbell. Insurance: sales by licensees.

Existing law provides that a fire and casualty licensee can transact insurance for fire and casualty coverage. A life licensee, under existing law, can transact insurance for life and disability coverage.

This bill would authorize a life agent or fire and casualty licensee to transact 24-hour care coverage, which would be defined as the joint issuance of a workers' compensation policy with a disability insurance policy or other medical coverage for nonoccupational injuries and illness. The bill also would impose education and examination requirements for the transaction of that coverage, as specified.

This bill would require the Department of Insurance to establish a task force to make recommendations to the Legislature by July 1, 1995, on the creation of a single license for insurance agents and brokers.

Existing law provides for a license fee for life agents at an annual rate of $48 for resident life agents and $53 for nonresident life agents.

This bill would increase the annual rate for life agents to $56.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1070 (SB 163) Presley. Inmate medical expenses.

Existing law specifies procedures under which a county, city, or the Department of the Youth Authority is authorized to make a claim for recovery of the costs of necessary hospital, medical, surgical, dental, or optometric care rendered to any prisoner confined in a county or city jail or any juvenile confined in a detention facility, as specified.

This bill, in addition, would authorize a sheriff, chief or director of corrections, or a chief of police to charge a fee in the amount of $3 for each inmate-initiated medical visit of an inmate confined in a county or city jail who has money in his or her personal account, would authorize the medical provider to waive the fee, would require the medical provider to waive the fee in any life-threatening or emergency situation, as defined, would exempt followup medical visits from the fee, and would require all moneys received pursuant to this provision to be transferred to the county or city general fund.

This bill would require that the above fee be charged to the inmate's account at his or her respective facility and would prohibit a denial of medical care to an inmate because of a lack of funds in that account.

Ch. 1071 (SB 470) Thompson. Small business development corporation.

Existing law establishes the State Assistance Fund For Enterprise, Business and Industrial Development Corporation with the authority of a business and industrial development corporation and a small business development corporation. The corporation is authorized to obtain loans from the State Enterprise Loan Fund for purposes of providing financial assistance to businesses in this state.

This bill would require the Secretary of Trade and Commerce to use $145,000 in state sales and use tax revenue in the Small Business Expansion Fund for the purpose of contracting with SAFE-BIDCO for the establishment of a small business development corporation expansion center on the north coast of California to serve the northern area of the County of Mendocino and the Counties of Del Norte and Humboldt, as specified.

Ch. 1072 (SB 622) Maddy. Health facilities: postsurgical care demonstration project.

Existing law requires the Office of Statewide Health Planning and Development to conduct a demonstration project to evaluate the accommodation of postsurgical care patients. Under existing law, the demonstration project is required not to exceed 6 years in no more than 12 sites.

This bill would require that the project be extended an additional 3 years, to September 30, 1997, only for those project sites that were approved by the office and operational prior to January 1, 1994.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1073 (SB 783) Lockyer. Dependent children: counsel.

Existing law authorizes the court to appoint counsel for the parent or guardian of a minor in certain dependency proceedings involving cases relating to the provision of out-of-home care for the minor where the parent or guardian is financially unable to employ counsel, and to appoint counsel for the minor when it appears to the court that the minor would benefit from the appointment.

This bill would specify that all parties who are represented by counsel at dependency proceedings shall be entitled to competent counsel, and that each minor who is the subject of a dependency proceeding is a party to the proceeding. The bill would require the Judicial Council to adopt rules of court by January 1, 1996, regarding the appointment of competent counsel in dependency proceedings, as specified. The bill would also require each superior court to adopt local rules of court by July 1, 1996, regarding the conduct of dependency proceedings, as specified, thus imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1074 (SB 861) Hughes. Crimes: contests: sports trading cards.

(1) Existing law relating to contests, as defined, prohibits specified unfair acts or practices undertaken by, or omissions of, any person in the operation of a contest, and requires every person who conducts a contest to disclose entry submission deadlines, to refund consideration given by a contestant under specified circumstances, and to maintain specified records. A violation of any of these provisions is a misdemeanor.

This bill would provide, in addition, that no person shall advertise, offer, or operate any contest in which any prize may be awarded or transferred if the opportunity to win that prize is conditioned on a minimum number of entries or contest participants. Because this bill would create a new crime, it would impose a state-mandated local program.

(2) Existing law provides that any person, or agent thereof, who knowingly manufactures, produces, or distributes unlicensed or counterfeit sports trading cards with the intent to deceive, injure, or defraud another, is guilty of a misdemeanor, punishable as specified.

This bill, in addition, would provide that any person who knowingly sells a cut, unlicensed sports trading card that has been produced by cutting the card from a publication in which unlicensed sports trading cards are bound, without disclosing the source and the means of producing the card, with the intent to deceive, injure, or defraud another, is guilty of a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program.

The bill would also require any person who violates this provision to both refund to the buyer the full consideration paid or furnished for the cut, unlicensed sports trading card and be liable to the buyer for a civil penalty not to exceed $1,000 for each violation. For these purposes, the bill would provide that each card sold represents a separate and distinct violation.

(3) The California Constitution provides for the establishment of the California State Lottery. In addition, the California Constitution provides that the Legislature has no power to authorize lotteries and shall prohibit the sale of lottery tickets in the state.

Existing statutory law also defines a lottery as any scheme for the disposal or distribution of property by chance, among persons who have paid or promised to pay any valuable consideration for the chance of obtaining that property or a portion of it, or for any share or any interest in that property, upon any agreement, understanding, or expectation that it is to be distributed or disposed of by lot or chance, whether called a lottery, raffle, or gift enterprise, or by whatever name it may be known. Existing law also provides that any person who contrives, prepares, sets up, proposes, or draws any lottery, is guilty of a misdemeanor.

This bill, in addition, would provide that a lottery also shall include a grab bag game which is a scheme whereby, for the disposal or distribution of sports trading cards by chance, a person pays valuable consideration to purchase a sports trading card grab bag with the understanding that the purchaser has a chance to win a designated prize or prizes listed by the seller as being contained in one or more, but not all, of the grab bags. For these purposes, the bill also would define "sports trading card grab bag" and "sports trading card." Because this bill would create a new crime, it would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1075 (SB 869) Bergeson. Subdivisions: approval procedures.

Existing law, the Subdivision Map Act, governs filing and approval procedures for tentative, final, and parcel maps for proposed subdivisions, including the procedures by which local and state agencies may review and make recommendations regarding tentative maps for proposed subdivisions affecting their territories or facilities to the local agency having jurisdiction over the proposed subdivision.

Existing law provides time limits within which the affected agencies must submit territorial maps, as specified, and make their recommendations. It also requires a local agency with jurisdiction over a proposed subdivision to provide notice, as specified, to any elementary school, high school, or unified school district within the boundaries of the proposed subdivision, and authorizes the governing board of the school district to submit a report on the subdivision's impact on the district, as specified.

This bill would shorten the time limits within which a school district must receive notice that a tentative map application has been determined to be complete, as specified, and the school district must make its recommendations. The bill would specifically require a local agency having jurisdiction over a proposed subdivision to consider the recommendations of an affected agency or district before acting on the tentative map. It would also provide that the local agency's actions must take place within 5 days of a tentative map application being determined to be complete, as specified. By imposing new duties and changing existing duties of school districts and other local agencies, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1076 (SB 1001) Bergeson. Life insurers: separate accounts.

(1) Existing law provides for the liquidation or rehabilitation of insurers by the Insurance Commissioner, and specifies that claims allowed in those proceedings shall be given an order of preference.

This bill would provide that claims under a separate account policy, contract, or agreement, as specified, shall be satisfied out of the assets allocated to the separate account, with certain exceptions.

(2) Existing law provides that, after the issuance of an order of liquidation of an insurer, certain transactions are voidable by the commissioner if the transaction has the effect of enabling any creditor to obtain a preference over any other creditor of the same class or a greater percentage of his or her debt than any other creditor of the same class.

This bill would include as a voidable transaction certain transfers respecting life insurance separate accounts, as specified.

(3) Existing law permits any domestic life insurance company to allocate to one or more separate accounts, in accordance with the terms of a written agreement, any amounts which are paid to the company in connection with specified pension and retirement plans or policies, and which are to be or may be applied in payment of specified benefits. With respect to those amounts, existing law provides that the amounts may be allocated to those accounts invested without regard to any limitations of law regarding investments by insurance companies.

This bill would provide that those separate accounts for which the insurer has guaranteed benefits, as specified, shall be invested in the types of investments permitted to life insurance companies for investments held in the insurer's general account, as specified.

(4) Existing law also provides that, except with the approval of the commissioner, reserves for benefits guaranteed as to dollar amount and duration and funds guaranteed as to principal amount or stated rate of interest shall not be maintained in a separate account.

This bill would additionally provide that an admitted life insurer that is financially qualified and meets other requirements, as specified, may guarantee the value of assets allocated to a separate account, as specified. The bill would also authorize the commissioner to issue a bulletin respecting the above provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) The bill would make related changes.

Ch. 1077 (SB 1111) Ayala. Accountants: accountancy corporations.

Existing law provides for registration of accountancy corporations with the State Board of Accountancy.

This bill would require each accountancy corporation to renew its permit to practice biennially and to pay the renewal fee fixed by the board, as specified. The bill would also make related changes.

Existing law requires each accountancy corporation to file with the board a report pertaining to qualification and compliance with statutes and regulations, as specified, and to pay a fee for filing this report.

This bill would delete the fee requirement for that report.

Ch. 1078 (SB 1272) Presley. South coast district: programs: performance audits.

(1) Existing law, the Lewis-Presley Air Quality Management Act, creates the South Coast Air Quality Management District governed by a district board, and authorizes the board to develop and implement programs to achieve and maintain federal and state ambient air quality standards.

The act requires the board, every 3 years, to contract with a qualified firm, selected from the Auditor General's approved list of firms, to conduct a performance audit of those programs.

This bill would require the performance audit to be conducted by an independent auditor pursuant to a request for proposals to be issued to qualified firms and reviewed by the Legislative Analyst prior to issuance, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1079 (SB 1333) Lockyer. Consumer credit.

Existing law requires banks and other financial institutions to maintain certain information concerning charges and interest on accounts, and to make that information available to the public. Existing law also requires banks and other financial institutions to furnish depositors with statements concerning charges and interest on accounts, as specified.

This bill would authorize a supervised financial organization, defined to include banks, savings associations, savings banks, and credit unions, or charge card issuer, as defined, to charge and collect fees pursuant to a consumer credit agreement, as specified.

Ch. 1080 (SB 1391) Thompson. 25th District Agricultural Association: joint powers agreement.

Existing law permits 2 or more public agencies to enter into an agreement to jointly exercise any power common to them.

This bill would authorize the 25th District Agricultural Association to enter into a joint powers agreement with the City of Napa for the purpose of establishing and operating a Napa Center for Wine, Food, and the Arts facility. The bill would specify the powers of the joint powers agency, and would authorize it to issue revenue bonds for the purpose of the facility. The bill would also authorize the 25th District Agricultural Association to accept the donation of any real property suitable for the location of the facility, and to lease the property to the joint powers agency. The bill would provide that the state is not liable for any debt of the joint powers agency.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1081 (SB 1418) Johnston. Employment: domestic service.

Existing law regulates employment agencies that refer or place domestic workers, as specified. Existing law specifically requires every employment agency referring or plac-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ing a domestic worker in a job and who is not the employer of the domestic worker being referred or placed, to, in any telephone directory advertisement placed on or after January 1, 1994, insert a statement that the agency is a referral agency.

This bill would revise the applicability of that requirement to any paid telephone directory advertisement or any other promotional literature or advertising distributed or placed by the agency and would delay the date of that provision to January 1, 1995. It would also require an employment agency referring a domestic worker to verify legal status or authorization to work prior to providing referral services, revise certain disclosure requirements relative to domestic worker referral to the person seeking domestic services, and prohibit an employment agency referring a domestic worker from specifying that the person is self-employed or an independent contractor in any notice, advertisement, or brochure provided to the worker or customer. It also would prohibit an employment agency from advertising that it is bonded or licensed.

The bill would specify that violation of these provisions, as specified, constitutes unfair competition and would provide a civil penalty for each violation.

The bill also would make technical and clarifying changes to these provisions.

Ch. 1082 (SB 1430) Johnston. Insurance: health benefits.

Existing law imposes various requirements on self-insured employee welfare benefit plans concerning the benefits that must be provided, but does not generally regulate those plans.

This bill would prescribe an application process through which a self-funded or partially self-funded multiple employer welfare arrangement, as defined, with specified exceptions, could apply for a certificate of compliance to do business in the state. A self-funded or partially self-funded multiple employer welfare arrangement that obtains and maintains a certificate of compliance in accordance with these provisions would not be considered an unauthorized insurer for the purposes of providing specified benefits and would be required to file financial statements, as specified, with the Insurance Commissioner.

This bill would, after December 31, 1995, prohibit a self-funded or partially self-funded multiple employer welfare arrangement from providing any benefits without first obtaining a certificate of compliance. The Insurance Commissioner would be required to issue a temporary certificate of compliance upon submission of the application and certain enumerated items, and would issue either a final certificate of compliance or a cease and desist order after a reasonable time to complete investigation and examination. This bill would authorize the commissioner or his or her designee to examine the affairs of a self-funded or partially self-funded multiple employer welfare arrangement and the association that established and maintains it and would authorize the Department of Insurance to conduct an examination of the financial condition of a multiple employer welfare arrangement and to apply specified remedies available to the commissioner.

The bill would authorize the commissioner to suspend the certificate of compliance for various reasons, and in some instances to impose a fine as an alternative to the suspension. The bill would require a notice to be provided to employers who obtain coverage from a multiple employer welfare arrangement and would impose various fees in connection with the certificate of compliance that would be deposited into the Insurance Fund.

The bill also would impose various requirements on multiple employer welfare arrangements and would provide that the commissioner may adopt reasonable rules and regulations for the implementation and administration of the above provisions.

The bill also would specify that its provisions would remain in effect until January 1, 1998, and on that date would be repealed, unless a later enacted statute that is enacted before that date deletes or extends that date.

Ch. 1083 (SB 1445) Thompson. Prisoners: civil actions.

Existing law requires various civil actions to be brought within specified periods of time, but these periods of limitation are tolled during the time that the person entitled to bring the action is imprisoned on a criminal charge for a term less than life.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would limit the tolling provision for prisoners to 2 years.

Ch. 1084 (SB 1459) Watson. State and local government: investments.

The California Constitution confers upon the retirement boards of public retirement systems plenary authority and fiduciary responsibility for the investment of moneys of the system.

This bill would authorize any state or local public retirement system to invest, subject to and consistent with the constitutional fiduciary standard, and the state and any political subdivision of the state to invest, its assets in rated bonds, notes, or other obligations of various international financial institutions.

Ch. 1085 (SB 1465) Rogers. Grand juries.

Existing law provides that vacancies on an existing grand jury may be filled so as to maintain the required number of members. Existing law requires each grand jury to submit to the presiding judge of the superior court a final report of its findings and recommendations that pertain to county governmental matters other than fiscal matters.

This bill would provide that if the number of grand jurors, in a county having a population of 20,000 or less, falls below 12 and the vacancies are not filled, a report regarding these county governmental matters may be submitted by a unanimous vote of at least 10 of the remaining grand jurors under specified conditions.

Ch. 1086 (SB 1487) Mello. Criminal procedure: insanity.

(1) Existing law provides that in the case of a person found not guilty by reason of insanity, the person may apply for release upon the ground that his or her sanity has been restored. Existing law also provides that the court shall hold a hearing to determine whether the applicant would be a danger to the health and safety of others, due to mental defect, disease, or disorder, while under supervision and treatment in the community, and that if the court finds that the applicant will not, the court is required to order the applicant placed with an appropriate forensic conditional release program for one year, all or a portion of which is required to include outpatient supervision and treatment. Existing law provides that the court shall not determine whether the applicant has been restored to sanity until the applicant has completed the one-year program. The provisions relating to the placement of an applicant in an appropriate forensic conditional release program are operative only until January 1, 1995, and as of that date are repealed.

This bill would require the court to set and hold a trial to determine whether restoration of sanity and unconditional release should be granted if, during the one-year program, the community program director is of the opinion that the person is no longer a danger to the health and safety of others, due to mental defect, disease, or disorder, and submits a report of his or her opinion and recommendations to the committing court, the prosecuting attorney, and the attorney for the person. The bill also would delete the repeal date of this provision, thereby imposing a state-mandated local program, by extending the period additional duties are imposed upon local mental health programs, indefinitely.

(2) Existing law authorizes outpatient status to be granted for certain offenders committed to a state hospital or other treatment facility after, among other things, notice has been given to the victim or next of kin of the victim of the offense for which the person was committed if a request for notice has been filed with the court. Existing law also requires notice of any unattended day release of a committed person to the victim or next of kin at the inception of a program. These notice provisions are scheduled to be repealed on January 1, 1995.

This bill would delete the repeal of the notice provisions, thereby extending their application indefinitely.

This bill would also repeal provisions alternative to the above provisions which are scheduled to become operative January 1, 1995.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1087 (SB 1551) Kelley. State employees' health benefits: vesting in employer contributions for annuitants.

The existing Public Employees' Medical and Hospital Care Act authorizes the Board of Administration of the Public Employees' Retirement System to provide health benefits plan coverage to state and local public employees and annuitants. That act conditions the vesting of the right of state employees to the benefit of the applicable employer's contribution toward annuitants' health benefits costs upon having various minimum periods of service credit at retirement.

In cases where the state assumes a function from a local public agency and the related personnel, the act prohibits service rendered by those employees as employees of the local public agency from being credited, at retirement, as state service unless the local public agency agrees to pay the state agency the amount of the state agency's cost for any employee health benefit vested at the time the function and related personnel were assumed by the state. For contracting agencies, this provision is subject to a finding by the Department of Finance that the contract contains a benefit factor sufficient to compensate the state for those costs.

This bill would provide that, notwithstanding the provisions requiring reimbursement by the local agencies, for purposes of meeting the required minimums of credited state service for vesting for the employers' contributions, employees of the Cities of Rubidoux and Coachella who became state employees as a result of the state's assuming firefighting functions for the local agency, on or before December 31, 1990, shall be credited, subject to specified conditions, with each complete year of service with the local agency, as if that service had been with the state. It would require the former employer to reimburse the state for the costs of postretirement health benefits vesting credit.

This bill would also require any county, city, or district considering entering into a specified agreement with the Department of Forestry and Fire Protection under which the state would assume personnel from the county, city, or district, to give each affected employee, prior to the execution of the agreement, written notice of how the transfer of functions would affect his or her health benefits upon his or her retirement.

Ch. 1088 (SB 1558) Mello. Residential care facilities for the elderly: licensees: death.

Existing law, the California Residential Care Facilities for the Elderly Act, administered by the State Department of Social Services, regulates the licensing and operation of residential care facilities for the elderly. Existing law provides that when a licensee dies, an adult relative that has control of the property may continue operation of the facility, subject to certain conditions, including submission of a fingerprint card.

This bill would permit a nonrelated adult to apply to operate the facility. It would revise the procedure for being designated as the responsible party to continue operation of the facility to require a notarized written statement, filed by the licensee and signed by the designee, including a declaration under penalty of perjury regarding criminal convictions. By requiring this declaration under penalty of perjury, the bill would impose a state-mandated local program by creating a new crime.

This bill would also require a designee who decides not to apply for licensure to notify the department. It would require the department to assist the designee in development and implementation of a relocation plan. Since violating the notice requirement would be a misdemeanor under existing provisions of the act, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish proce-

NOTE: Superior numbers appear as a separate section at the end of the digests.

dures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1089 (SB 1578) Thompson. Local districts.

(1) Existing law authorizes the Camp Meeker Recreation and Park District, until July 1, 1998, to exercise prescribed powers of a county water district if that authority is approved by the local agency formation commission.

This bill would grant that authority to the district indefinitely.

(2) The Sonoma County Flood Control and Water Conservation District Act creates the Sonoma County Flood Control and Water Conservation District and grants specified authority to that district.

This bill would grant additional authority to that district relating to the treatment, disposal, or reuse of sewage, wastewater, or storm water, as prescribed, and the provision of sanitation services.

(3) This bill would allow prescribed sanitation zones to be formed within the district for the purpose of providing specified sanitation services. The bill would grant certain authority to the board of the district with regard to its administration of the sanitation zones.

The bill would require the Sonoma County Local Agency Formation Commission, within 60 days from the date of the receipt of a resolution of application from the Sonoma County Board of Supervisors, to determine whether the dissolution of prescribed county sanitation zones and the creation of successor zones within the district are subject to approval by the commission pursuant to the Cortese-Knox Local Government Reorganization Act of 1985, thereby imposing a state-mandated local program. The bill would dissolve those county sanitation zones and create those successor zones if the commission determines that the dissolution and creation of those zones are not subject to commission approval. The bill would require the dissolution and creation of those zones to be subject to that act if the commission determines that its approval is required. The bill would prescribe related matters.

(4) The act generally requires claims for money or damages against the district to be governed by prescribed provisions in the Government Code.

This bill would require, to the extent that any judgment or claim against the district is based upon a cause of action arising from the performance or nonperformance of the responsibilities or activities of a zone or sanitation area, any payment upon the claim or judgment to be made exclusively from the funds of the zone or sanitation area and not from the general funds of the district or the funds of any other zone or sanitation area, as prescribed.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1090 (SB 1585) Craven. San Diego Coast State Seashore: Robert C. Frazee State Beach.

Existing law establishes within San Diego County the San Diego Coast State Seashore consisting of lands extending from San Onofre State Beach to La Jolla, and including, among other state beaches, Carlsbad State Beach.

This bill would rename to Robert C. Frazee State Beach that section of Carlsbad State Beach within the San Diego Coast State Seashore that is located north of Agua-Hedionda Lagoon, and would make a related conforming change.

This bill would incorporate changes in Section 5001.6 of the Public Resources Code proposed by SB 1668, but only if this bill and SB 1668 are both chaptered and become effective and this bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1091 (SB 1713) Hart. Security guards: standards.

Existing provisions of the Private Investigator Act regulate security guards and require them to be registered.

This bill would declare legislative intent that armed security guards not be required to meet the same standards required of peace officers.

The bill would require the Bureau of Security and Investigative Services with the technical assistance of the Commission on Peace Officer Standards and Training to develop minimum selection, competence, and training standards for armed security guards, as provided, by July 1, 1995, and would require implementation of these standards through regulations by January 1, 1996.

Ch. 1092 (SB 1721) Johnston. Assigned risk plan.

Existing law requires liability insurers to form a plan for the equitable apportionment of applicants for automobile insurance who are unable to obtain that insurance through ordinary means. Existing law does not contain provisions specially applicable to that assigned risk plan governing the effective time of coverage for insurance issued by the plan.

This bill would provide that in no event shall coverage be effective prior to the date and time of execution of the application forms. It would generally provide that postage meter postmarks shall not be recognized as establishing effective dates.

The bill would require the plan to establish an electronic effective date procedure, and would require the use of that procedure beginning July 1, 1995, if the applicant requires that coverage be effective at the date and time the application forms are completed and executed as specified. Since the bill would require the producer of record and the applicant to certify under penalty of perjury on the application the date and time that the application forms were completed and executed, the bill would impose a state-mandated local program by expanding the crime of perjury.

The bill would provide that if the application is made without using the electronic effective date procedure, coverage shall be effective as of 12:01 a.m. on the date following receipt of the application in the plan office unless a later date is requested.

These requirements would not apply to applications for additional coverage, as specified.

The bill would require the producer of record to maintain appropriate records to identify the date of coverage.

This bill would allow the producer of record to bind coverage in the event that its plan's electronic effective date procedure is disrupted due to disaster or emergency, and for the coverage to be rescinded, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1093 (SB 1723) Kelley. California Pistachio Commission and California Egg Commission.

(1) Existing law provides for the California Pistachio Commission in state government in order to promote the marketing of pistachio nuts. Existing law authorizes the commission to adopt, alter, rescind, modify, and amend all proper and necessary bylaws, rules, regulations, and orders for carrying out the laws relating to the commission.

This bill would make the adoption, alteration, rescission, modification, or amendment of any bylaw, rule, regulation, or order implementing a brand-credit advertising program authorized pursuant to a specified provision of existing law subject to the rulemaking provisions administered by the Office of Administrative Law. The bill would also require that any decision to implement a brand-credit advertising program be ratified by a vote of the pistachio producers, as specified.

(2) Existing law provides for the California Egg Commission in state government in order to promote the marketing of eggs and egg products. Existing law provides for an assessment upon handlers and distributors of eggs and egg products to support the

NOTE: Superior numbers appear as a separate section at the end of the digests.

activities of the commission. For that purpose, existing law defines "distributor," and provides for a distributor member of the commission.

This bill would eliminate the distributor as a person subject to assessment, would repeal the law defining "distributor" for that purpose, and would eliminate the distributor member on the commission. The bill would add an at-large handler who exclusively handles eggs or egg products produced outside of California as an additional member of the commission. The bill would levy an assessment on the handler for all eggs and egg products that were not previously assessed by the commission. The bill would also make conforming changes.

(3) Existing law defines "egg products" for purposes relating to the California Egg Commission.

This bill would additionally define "processed" with respect to "egg products," and would exempt from the definition food products that contain less than 75% egg substances or that have not historically been considered "egg products."

Ch. 1094 (SB 1727) Hughes. Public employees: home loan program: annuity contracts.

(1) Existing law authorizes the Controller to purchase annuity contracts for permanent employees of specified state departments and boards.

The bill would include additional state agencies in that list.

(2) The California Constitution provides that the Board of Administration of the Public Employees' Retirement System has plenary authority and fiduciary responsibility for investment of moneys and administration of the system subject to the Legislature's authority to prohibit certain investments under specified circumstances. The Public Employees' Retirement Law authorizes members to obtain home loans secured by both the purchased home and a portion of the member's individual retirement account.

This bill revises member home loan program provisions to provide that 95% of the loan be secured by the purchased home and not to exceed 5% be secured by the members accumulated contributions and vested accrued benefits. The changes would be deemed to have become operative on November 1, 1993.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1095 (SB 1730) Russell. Family home care: adults with developmental disabilities.

(1) Under the California Community Care Facilities Act, the State Department of Social Services licenses various types of facilities that provide nonmedical care, including residential care facilities for children and adults. Specified facilities are exempted from these provisions.

This bill would include family homes, as defined, and family home agencies, as defined, within these exemptions.

(2) Existing law provides for the placement of adults with developmental disabilities in specified types of living facilities within the community, subject to standards established by the State Department of Developmental Services.

This bill would require the State Department of Developmental Services to promulgate regulations governing the placement of these persons in family homes and the monitoring of these homes by family home agencies. It would further set forth the procedures for the filing of fingerprints of specified persons providing family home services, or connected to the provision of those services, and would require that each of these persons be subject to a criminal background check. It would prohibit persons with specified types of criminal convictions from providing or being connected to the provision of family home services, with certain exceptions, and would set forth the procedures pursuant to which a departmental determination may be appealed.

This bill would require persons subject to these provisions to sign a declaration under penalty of perjury regarding any prior criminal convictions. By expanding the definition of a crime, the bill would impose a state-mandated local program.

(3) Under the Lanterman Developmental Disabilities Services Act, the State Department of Developmental Services is required to establish annual rates of reimbursement for out-of-home care provided to persons with developmental disabilities, subject to

NOTE: Superior numbers appear as a separate section at the end of the digests.

review by the State Council on Developmental Disabilities, and subject to the appropriation of funds by the Legislature.

This bill would prohibit reimbursement to adult family home agencies from exceeding rates for other types of out-of-home care established under existing law. It would also require the department to review the appropriateness of the rates paid to adult family home agencies and report its findings to the Legislature no later than December 31, 1996.

(4) Existing law establishes developmental centers under the jurisdiction of the State Department of Developmental Services for the provision of specified services to persons with developmental disabilities. Each developmental center is required to have an advisory board, consisting of 7 members appointed by the Governor.

This bill would change the membership of the advisory board to 8 members appointed by the Governor, to include an additional specified member, and would make various technical and conforming changes.

(5) Existing law establishes the State Council on Developmental Disabilities, consisting of specified members, to perform various duties in the development and review of services and programs for persons with developmental disabilities. The state council is required to meet at least 9 times each year.

This bill would, instead, require that the state council meet at least 6 times each year.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1096 (SB 1795) Bergeson. Mental health funding.

(1) Existing law provides for the allocation of funds from the Mental Health Subaccount of the Local Revenue Fund to local health and welfare funds for community mental health programs according to a percentage-based formula. Existing law also sets forth a procedure for determining the poverty-population allocation needs of each county or city and county for additional funds.

Existing law requires that available funding for community mental health programs beyond the funding provided according to the allocation formula for the Mental Health Subaccount of the Local Revenue Fund be distributed to counties and cities and counties according to the procedures for determining poverty-population allocation needs. Funding provided pursuant to Section 6 of Article XIII B of the California Constitution, and funding provided for future pilot projects are exempt from this requirement.

This bill would also require that available funding beyond that provided according to the allocation formula be distributed to cities according to these procedures. It would also include specified federal mental health block grant funding allocated by the State Department of Mental Health within the exemption from the distribution requirement.

(2) Existing law, effective in the 1993–94 fiscal year, requires the State Department of Mental Health to annually identify from the federal Substance Abuse and Mental Health Services Administration funds the maximum amount that federal law and regulation permit to be allocated to counties and cities and counties according to a specified formula. Funds appropriated by the Legislature for departmental support and children's systems of care projects are not included in this amount.

This bill would, instead, effective in the 1994–95 fiscal year, require the department to identify from mental health block grant funds provided by the federal government, the maximum amount that federal law and regulation permit to be allocated to counties and cities and counties according to the formula. It would apply these provisions to any federal mental health block grant funds in excess of a prescribed amount.

(3) Existing law requires, for the 1992–93 fiscal year and fiscal years thereafter, the Controller, after making certain deposits and allocations from the Sales Tax Growth Account of the Local Revenue Fund, to deposit into the Base Restoration Subaccount of the Sales Tax Growth Account, the remainder of those revenues deposited in the Sales Tax Growth Account, up to a cumulative amount, that, in conjunction with specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

local matching funds, is sufficient to fund the difference between $2,211,724,000, less the amount allocated for certain realignment funding shortfalls, and actual amounts distributed for the 1991-92 fiscal year.

This bill would, instead, require the Controller to deposit up to a cumulative amount, that, in conjunction with the local matching funds, is sufficient to fund the difference between $2,214,410,260, less the amount allocated for the funding shortfalls, and actual amounts distributed for the 1991–92 fiscal year.

(4) Existing law requires the State Department of Mental Health to contract with one or more counties for at least one, but not more than 3, demonstration projects to implement the model adult and senior county interagency mental health service system beginning July 1, 1989, and ending June 30, 1995.

This bill would extend the contracting period to December 31, 1996.

(5) Existing law requires the State Department of Mental Health to establish, and contract for the operation of, at least 2, but not more than 6, pilot integrated service agencies for the seriously mentally disordered beginning July 1, 1989, and ending June 30, 1995.

This bill would extend the period for establishment of, and contracting for, the pilot agencies to December 31, 1996.

(6) Existing law requires, with specified exceptions, that bills for service provided under the Medi-Cal system be submitted not more than 6 months after the month in which the service was rendered, and in the case of Short-Doyle Medi-Cal claims for mental health services provided to Medi-Cal beneficiaries, no more than 2 months after the month in which the service is rendered, with a specified exception.

This bill would delete the provision relating to the submission of Short-Doyle Medi-Cal claims.

(7) This bill would make various technical and conforming changes.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1097 (SB 1803) Johnston. Workers' compensation.

Existing law contains references to the Division of Industrial Accidents.

This bill would reflect the change of the name of the Division of Industrial Accidents to the Division of Workers' Compensation and would make other technical changes.

Existing law provides for review by the Medical Bureau of certain workers' compensation matters.

This bill would eliminate this review by the Medical Bureau.

Ch. 1098 (SB 1886) Presley. Medical Board of California: expert consultants: liability.

Existing law requires the Medical Board of California to provide for representation of any person, not a regular employee of the board, but hired or under contract to provide expertise in evaluating the conduct of a licensee, who is named as a defendant in a civil action for defamation resulting from the opinion rendered, statements made, or testimony given by that person. Existing law provides that the board shall not be liable for any judgment rendered against that person. Existing law further provides that the Attorney General shall be utilized in those actions. Existing law also requires the board to provide representation in the same manner to persons who make reports to the board regarding diversion evaluation.

This bill would include persons retained under any other arrangement, paid or unpaid, to provide that expertise to the board among those to whom the board is required to provide representation. This bill would add malicious prosecution and any other civil cause of action to the actions that must be defended. This bill would instead provide that the board shall be liable for any judgment rendered against the person, except any punitive damages award. The bill would require that the defendant be liable to the board for the full costs of representation if the plaintiff prevails in a claim for punitive damages. This bill would further provide that the Attorney General shall be utilized in those actions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1099 (SB 1997) Russell. Crimes: enhancements.

Under existing law, any person convicted of certain felony offenses, including, for example, the kidnapping of a child under the age of 14 years, is punished by an enhancement or a term in addition to the punishment prescribed for the base crime.

This bill would provide, until January 1, 1999, that any person convicted of certain felony offenses involving a child under the age of 14 years, including any sexual offense or the willful causing of physical pain and mental suffering or the willful infliction of cruel or inhumane physical punishment pursuant to specified provisions of the law, as part of a ceremony, rite, or any similar observance, as defined, shall be punished by an additional term of 3 years.

Ch. 1100 (SB 2003) Russell. County retirement systems: benefits.

The County Employees' Retirement Law of 1937 defines the term "compensation" for purposes of computation of benefits and purposes of funding retirement systems.

This bill would authorize Los Angeles County to include specified payments in "compensation" for nonrepresented members.

Ch. 1101 (SB 2004) Petris. Vehicles: safety belts: child passenger restraint systems.

(1) Existing law prohibits a person from operating a private passenger motor vehicle, as defined, on a highway unless that person and all passengers 4 years of age or over are properly restrained by a safety belt. Existing law prohibits the operator of a limousine for hire, an authorized emergency vehicle, or a taxicab, from operating the vehicle unless any passengers 4 years of age or over in the front seat are properly restrained by a safety belt.

This bill would, instead, prohibit a person from operating a private passenger motor vehicle on a highway unless that person and all passengers 16 years of age or over are properly restrained by a safety belt.

The bill would prohibit the operator of a limousine for hire, an authorized emergency vehicle, or a taxicab, from operating the vehicle unless any passengers, 4 years of age or over and weighing 40 pounds or more, in the front seat are properly restrained by a safety belt.

The bill would prohibit a parent or legal guardian, when present in a passenger vehicle or motortruck, from permitting his or her child or ward, who is 4 years of age or older but less than 16 years of age and weighs more than 40 pounds, to be transported upon a highway in the motor vehicle without providing and properly using, for each child or ward, a safety belt meeting applicable federal motor vehicle safety standards.

The bill would also prohibit the driver of a passenger vehicle or motortruck from transporting a child under the circumstances described above.

The bill would prescribe fines for a 1st and subsequent offense of the third and fourth provisions described above. Because those provisions would create new crimes, the bill would impose a state-mandated local program.

(2) Existing law prohibits a parent or legal guardian, when present in a passenger vehicle or motortruck, from permitting his or her child or ward under the age of 4 years or weighing less than 40 pounds to be transported upon a highway in the motor vehicle without providing and properly using, for each such child or ward, a child passenger restraint system meeting applicable federal motor vehicle safety standards. Existing law also prohibits the driver of a passenger vehicle or motortruck from transporting a child under those circumstances. A violation of those provisions of existing law is a crime.

This bill would specify that the prohibition is applicable when the child is under the age of 4 years, regardless of weight, or when the child weighs less than 40 pounds, regardless of age.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1102 (SB 2083) Campbell. Peace officers.

Existing law provides that any person who loiters or wanders upon the streets or from place to place without apparent reason or business and who refuses to identify himself or herself and to account for his or her presence when requested by any peace officer to do so, is guilty of disorderly conduct if the surrounding circumstances indicate to a reasonable person that the public safety demands identification.

This bill would, in a county where the provisions are adopted by the board of supervisors, provide that any peace officer, as defined, may transport any person, as quickly as is feasible, to the nearest homeless shelter, if the officer inquires whether the person desires the transportation, and the person does not object to the transportation. The bill also would provide that any officer exercising due care and precaution shall not be liable for any damages or injury incurred during transportation.

Ch. 1103 (SB 2110) Leslie. Transportation planning agencies.

Under the Mills-Alquist-Deddeh Act, county auditors are required to pay to transit operators, from the local transportation fund for public transportation purposes, amounts allocated by the appropriate transportation planning agency for the county, as designated by the Director of Transportation. For certain counties, local transportation commissions established by the county board of supervisors, have been designated as the transportation planning agency for the county.

This bill would delete provisions prescribing the membership of the local transportation commissions in the Counties of Placer, Nevada, and Monterey and would, instead, expressly provide that the Placer County Transportation Planning Agency, the Nevada County Transportation Planning Agency, and the Transportation Planning Agency of Monterey County are the transportation planning agencies for Placer County, Nevada County, and Monterey County, respectively. The bill would prescribe the membership of those agencies.

Ch. 1104 (AB 901) Polanco. Hazardous waste permits: environmental quality.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare an environmental impact report on any project which it intends to carry out or approve that may have a significant effect on the environment, as defined, with specified exceptions. The act requires a lead agency to prepare an environmental impact report for, among other things, the initial issuance of hazardous waste facilities permits to a land disposal facility or an offsite large treatment facility.

This bill would provide that the initial issuance of a permit does not include a closure or postclosure permit.

(2) Under existing law, except as specified, any person who desires to continue the use or operation of a hazardous waste facility which was in existence on November 19, 1980, or which was in existence on the effective date of any statute or regulation which subjected that facility to hazardous waste facilities permit requirements, pending the review and decision of the department on the permit application, may be granted interim status by the Department of Toxic Substances Control if the person has made application for a permit, as prescribed. A violation of the laws regulating hazardous waste is a crime.

This bill would require the department to require any offsite facility which was granted interim status prior to January 1, 1992, and which is not subject to specified provisions regarding standardized permits, to perform a Phase I environmental assessment, as prescribed, thereby imposing a state-mandated local program by creating a new crime. The bill would require the department to provide public notice for a permit determination with regard to offsite facilities operating under a grant of interim status, by specified dates, and to prepare a status report and workplan with regard to these facilities by March 1, 1995.

(3) The bill would make legislative findings and declarations with regard to facilities operating under a grant of interim status.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1105 (AB 3126) Johnson. Political Reform Act of 1974: gift limitations: candidates for elected office.

Effective January 1, 1995, the existing Ethics in Government Act of 1990, as part of the Political Reform Act of 1974, imposes a $250 limit, adjusted as specified, on the value of gifts that may be accepted by local elected officeholders, elected state officers, and elected members of the governing board of a special district, among others.

This bill would make candidates, as defined, for those types of offices subject to the same honoraria prohibitions and gift limitations.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 1106 (AB 3169) Hoge. Crime: restitution.

(1) Existing law requires, when a person is convicted of any crime in this state, the court to order the defendant to pay restitution, as specified. Existing law provides that restitution shall be sufficient to fully reimburse the victim or victims for all determined economic losses incurred.

This bill would revise and recast those provisions. The bill would provide that it is the intent of the Legislature that a victim of a crime who has incurred any economic loss as a result of the commission of a crime or the conduct of a minor found in violation of the law shall receive restitution directly from any defendant convicted of that crime or from the minor found in violation of the law. This bill would specify that economic losses include the value of stolen or damaged property, medical expenses, and wages or profits lost by the victim, and if the victim is a minor, by the minor's parent, parents, guardians, or guardians related to injury incurred by the victim or time spent as a witness or in assisting the police or prosecution. The bill would provide, in the case of a minor, that a restitution order is enforceable as a civil judgment.

(2) Under existing law, certain of these provisions require that a person convicted of a crime be ordered to pay restitution in the form of a penalty assessment as specified and restitution to the victim as specified.

This bill would revise these provisions to (a) recharacterize "restitution in the form of a penalty assessment" as a "fine in the form of a penalty assessment" and (b) consolidate within these provisions related provisions regarding payment of a restitution fine.

(3) Existing law requires a person who is convicted of a felony, except as specified, to pay a restitution fine, to be deposited in the Restitution Fund, of not less than $200, subject to the defendant's ability to pay, and not more than $10,000. In setting the amount of the restitution fine, the court is required to consider certain relevant factors.

This bill would require a person who is convicted of a misdemeanor to pay a restitution fine of not less than $100 and not more than $1,000. The bill would, among other things, delete the requirement that the imposition of the restitution fine be subject to the defendant's ability to pay and would provide, instead, that the defendant's ability to pay shall be one of specified relevant factors to be considered in setting the amount of the fine in excess of the minimum of $100 or $200.

(4) Existing law also sets forth procedures under which a person who is granted

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

probation is required as a condition of probation to pay to the Restitution Fund a restitution fine of not less than $200, except in the case of a minor it is not less than $100, as specified, subject to a determination of the person's ability to pay.

This bill would delete the requirement that this restitution fine be subject to a determination of a person's ability to pay the fine and, instead, would make that determination a factor to consider in setting that fine. This bill would also reduce the minimum restitution fine a probationer is required to pay to the Restitution Fund to not less than $100 if the person is convicted of a misdemeanor.

(5) Existing law defines "victim" for the purposes of the Restitution Fund to include, among others, any resident of the state, or military personnel and their families stationed in the state who is a person who sustains injury or death as a direct result of a crime.

This bill would specify that nothing in these provisions regarding restitution shall prevent the court from ordering restitution to any corporation, business trust, estate, trust, partnership, association, joint venture, government, governmental subdivision, agency, or instrumentality, or any other legal or commercial entity when that entity is a direct victim of crime.

(6) Existing law requires the court to order a minor adjudicated a ward of the court by reason of the commission of an offense to pay a restitution fine in the form of a penalty assessment as specified. Existing law also authorizes the court to levy a fine against such a minor up to the amount that could have been imposed on an adult for the same offense, if the court finds the minor has the financial ability to pay the fine.

This bill would delete the authority of the court to order payment of the restitution fine in the form of a penalty assessment described in the former provision, and would provide, instead, that the court shall consider levying the fine described in the latter provision.

(7) Existing law also provides that if the offense the minor commits is a felony, the court is required to impose an additional restitution fine of not less than $100, subject to the minor's ability to pay, and not more than $1,000. In setting the amount of the fine, the court is required to consider certain relevant factors.

This bill would provide, in addition, for a fine not to exceed $100 if the offense the minor commits is a misdemeanor. This bill would, among other things, delete the requirement that the imposition of this fine be subject to the minor's ability to pay and would provide, instead, that the minor's ability to pay shall be one of specified relevant factors to be considered in setting the amount of the fine.

(8) The Restitution Fund is continuously appropriated to the State Board of Control for the purpose of indemnifying victims of crime.

This bill, by increasing the money deposited in the fund, would make an appropriation.

(9) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1107 (AB 3201) Baca. Hazardous substances: cleanup standards and remediation: California Steel Industries, Inc. site.

Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, requires the Department of Toxic Substances Control or a California regional water quality control board to prepare or approve remedial action plans which specify, among other things, removal and remedial actions selected for the cleanup of all hazardous substance release sites identified and categorized pursuant to a specified procedure. The remedial action plan is required to be based upon specified federal regulations, and upon certain factors concerning health and safety risks, uses of resources, site specific characteristics, and the cost-effectiveness and impact of alternative remedial action measures, to the extent these factors do not require a less stringent level of cleanup than those federal regulations.

The Director of Toxic Substances Control is authorized to release from liability under the act and the provisions regulating hazardous waste, or from any state action taken pursuant to federal law, with regard to a removal or remedial action at the former Kaiser Steel Corporation steel mill site, any person who provides financing for the costs of performing the removal or remedial action, any person who enters into an agreement with the responsible party owner, as defined, to provide development services for

NOTE: Superior numbers appear as a separate section at the end of the digests.

development of the site, as specified, and any person who acquires an interest in the site, if certain conditions are met with regard to the site, including that the responsible party has entered into a stipulated settlement pursuant to the department's authority to issue a compliance schedule order on an imminent or substantial endangerment order.

This bill would include as eligible for a release from liability a responsible party owner that has entered into a stipulated settlement of an order issued by the department, pursuant to the department's authority to issue a removal or remedial action order, to perform the removal or remedial action at the site.

Ch. 1108 (AB 3358) Frazee. Real estate brokers.

Under existing law, real estate brokers engaging in certain activities with respect to transactions involving real property that meet certain criteria are subject to specified advertising requirements.

This bill would provide that these advertising provisions are permissive, rather than mandatory, and would impose a fee for the submission of an advertisement to the Department of Real Estate for approval. Because these fees would be deposited in the Real Estate Fund, which is continuously appropriated, this bill would make an appropriation. The bill also would provide that an advertising approval is effective for 5 years.

Existing law regulates the sale of accessible urban subdivisions, as defined, under the law relating to out-of-state land promotions.

This bill would eliminate the term "accessible urban subdivision" from existing law and provide, instead, for the regulation of improved out-of-state residential subdivisions and improved out-of-state time-share projects, as defined.

This bill further would provide that these subdivisions and projects would not be subject to specified requirements relating to real property securities. The bill also would require the commissioner to take specified actions to afford substantially the same protection to purchasers of these subdivisions or projects as is afforded to purchasers of subdivisions in this state.

Existing law prescribes various fees for permits issued under the provisions governing out-of-state land promotions.

This bill would increase these fees, as provided. Because these increased fees would be deposited in the Real Estate Fund, which is continuously appropriated, this bill would make an appropriation.

Existing law requires a person who sells a lot or parcel in an accessible urban subdivision to deliver an appraisal to the buyer.

This bill would eliminate these provisions.

Existing law authorizes the commissioner to issue a preliminary permit for an accessible urban subdivision, as provided.

This bill instead would authorize the commissioner to issue a preliminary permit and a conditional permit, as provided, for an improved out-of-state residential subdivision.

This bill also would provide that the term of any final permit issued under the provisions governing out-of-state land promotions shall be one year, except as provided, and would provide certain requirements applicable to nonresident applicants for permits.

Existing law provides that the commissioner may issue a conditional public report for specified subdivisions, if certain requirements are met, the application for the report has been determined to be qualitatively complete and all requirements for issuance of the report have been met except as specified, including the filing of a final map that has not yet been recorded.

This bill would provide instead that the commissioner may issue a conditional public report for specified subdivisions, if certain requirements are met, all deficiencies and substantive inadequacies in the documents that are required to make an application for a final public report for the subdivision substantially complete have been corrected, the material elements of the setup of the offering to be made under the authority of the report have been established, and all requirements for issuance of a public report set forth in the regulations of the commissioner have been satisfied except as specified, including the fact that a final map has not been recorded.

Existing law provides that it is unlawful for an owner, subdivider, agent or employee of a subdivider, or other person to use false advertising to sell or lease property, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

provided.

This bill would provide that these individuals may submit an advertisement concerning subdivided lands to the Department of Real Estate for approval, with the specified fee, as provided. Because these fees would be deposited in the Real Estate Fund, which is continuously appropriated, this bill would make an appropriation.

Existing law requires certain subdividers to submit reports listing persons who agreed to purchase property and subsequently withdrew, as provided.

This bill would eliminate this requirement.

Ch. 1109 (AB 1790) Hauser. Fish and game.

(1) Existing law provides that before any person uses any vacuum or suction dredge equipment in any river, stream, or lake of this state, the person shall submit an application for a permit for a dredge to the Department of Fish and Game, specifying the type and size of equipment to be used and other information as the department may require.

This bill would provide that for these purposes, "person" does not include a partnership, corporation, or other type of association.

(2) Existing law, operative until January 1, 1997, limits the persons who may obtain a permit to take and land shrimp and prawns with trawl nets to persons who possessed a trawl net shrimp and prawn permit, as specified, in any previous permit year. Existing law also limits the permits to operators of vessels used for that purpose.

This bill would for the 1994–95 permit year also authorize the department to issue permits to owners of vessels used to land pink shrimp on or before March 31, 1994, and would require the owner to specify the vessel to be used under that permit. Beginning with the 1995–96 permit year, a pink shrimp permit would be authorized to be issued only to applicants who possessed a valid pink shrimp permit in the immediately preceding permit year.

The bill would validate the interpretation of the department that certain changes limiting the persons eligible for those permits was intended to apply commencing with the 1994–95 permit year.

(3) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department and the Fish and Game Commission to carry out the Fish and Game Code. Because this bill would impose new duties on the department and supersede regulations adopted by the commission, thereby requiring new regulations to be adopted, it would make an appropriation.

(4) Existing law makes a violation of the Fish and Game Code or regulations adopted under that code a crime. Because this bill would change the permit provisions of the shrimp and prawn fishery, it would change the definition of a crime, thereby imposing a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) This bill would specify that certain of its provisions shall become operative only if AB 399 is enacted and becomes effective, as specified.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1110 (AB 2850) Escutia. Public Utilities Commission: proceedings.

Existing law requires the Public Utilities Commission, upon scheduling hearings and specifying the scope of issues to be heard in any proceeding involving an electrical, gas, telephone, railroad, or water corporation, or a highway carrier, to assign an administrative law judge to preside over the hearings, either sitting alone or assisting the commissioner or commissioners who will hear the case.

Existing law permits the commission, in issuing its decision, to adopt, modify, or set aside the proposed decision of the administrative law judge or any part of that decision. Every finding, opinion, and order made in the proposed decision and approved or confirmed by the commission shall, upon that approval or confirmation, be the finding, opinion, and order of the commission.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require, with a specified exception, beginning January 1, 1995, any item appearing on the commission's public agenda as an alternate item, as defined, to an administrative law judge's proposed decision to be served upon all parties to the proceeding and be subject to public review and comment before it may be voted upon.

The bill would also require that prior to commencement of any meeting at which commissioners vote on items on the public agenda the commission make available to the public copies of the agenda and, upon request, any agenda item documents that are proposed to be considered at a commission meeting.

Ch. 1111 (SB 290) Leslie. School facilities: loans.

(1) Under the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereafter the Greene Act), the State Allocation Board is authorized to make a loan to an applicant school district of all or part of the school district's share of the cost of a project under the Greene Act.

This bill would authorize the board to provide a loan to any school district from the proceeds of specified bond acts to provide aid for the school district in accordance with the Greene Act under certain conditions. The bill would make an appropriation by requiring the Controller to transfer from the General Fund to the State School Deferred Maintenance Fund an amount equal to any amount paid to the General Fund pursuant to the immediately described loan provision.

The bill would also authorize the board to make 2 loans, one for $448,600 and one for $225,000, to the Colfax Elementary School District to be repaid as specified. By requiring the school district to make certain transfers to the Controller for deposit in the General Fund, the bill would constitute a state-mandated local program. The bill would also require the school district to repay any other funds provided to it by the board for purposes of its school construction project. This repayment would be made from a specified portion of any settlement or judgment received by the school district from litigation related to the school construction project.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1112 (AB 3537) Sher. Hazardous waste facilities: permit applications: notices of deficiency: environmental data reporting.

(1) Existing law authorizes the Department of Toxic Substances Control to issue hazardous waste facilities permits, and requires any applicant for a final hazardous waste facilities permit who receives a notice of deficiency from the department concerning the permit application to submit the information specified in the notice of deficiency by the date specified by the notice or by a later alternative date approved by the department. The department is required, pursuant to specified statutory provisions relating to the denial of permits, to initiate proceedings to deny the permit application if the applicant does not respond to 3 or more of these notices of deficiency regarding the same or different deficiencies or responds with substantially incomplete or substantially unsatisfactory information on 3 or more occasions.

This bill would require the department to initiate those proceedings pursuant to regulations adopted by the department, rather than pursuant to those statutory provisions, if the applicant fails to so respond.

(2) Existing law establishes the California Environmental Protection Agency headed by the Secretary for Environmental Protection.

This bill would require the secretary to examine and adopt information technology standards by which public agencies and the regulated community may use computers and other information technology to comply with environmental data reporting requirements. The bill would require the secretary to establish a standardized electronic format and protocol for the exchange of electronic data for the purpose of meeting the environmental data reporting requirements of specified laws. The bill would require the secre-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

tary to prescribe techniques by which a report may be signed electronically instead of by written signature and would also authorize the secretary to prescribe a paper form for this purpose.

The bill would establish a pilot program to test the format and protocol and alternative signature techniques, and would establish the Environmental Data Management Advisory Committee, whose members would be appointed by the secretary, as specified, to advise the secretary. The bill would require the committee, on or before July 1, 1996, to report to the secretary on the pilot program, as prescribed.

Ch. 1113 (SB 1592) Killea. Insurance: rates.

Existing law requires various insurance rates, including automobile insurance, to be approved by the Insurance Commissioner prior to their use, and provides for the filing of rate change applications with the commissioner.

This bill would provide that automobile liability insurance and automobile physical damage insurance may, at the option of the insurer, be considered a single line for rate filing purposes. Since the rate filing requirements were added by Proposition 103, which may be amended by the Legislature only by a ⅔ vote, this bill would require that vote for enactment.

Ch. 1114 (AB 2781) Horcher. Repossessors.

(1) Existing law provides that any financial institution that knowingly engages a nonexempt unlicensed person to repossess personal property on its behalf, after being duly notified by the bureau in writing of the nonexempt unlicensed person's unlicensed status with the bureau, is guilty of a misdemeanor and punishable, as specified.

This bill would delete the requirement of notification by the bureau of the agency's unlicensed status. Because the bill would expand the definition of a crime, it would impose a state-mandated local program.

(2) Existing law lists various prohibited acts and provides for the imposition of penalties, including the suspension of licenses, for those acts. Any licensee and certain other individuals, including family members, are required to dispose of any financial interest in any repossession agency a specified time after revocation of the license.

This bill, instead, would require any licensee and other specified individuals, including, under certain circumstances, immediate family members, to dispose of any financial interest in any repossession agency whose license was revoked, after revocation of the license.

(3) Existing law provides that when possession is taken of a vehicle by or on behalf of a legal owner under the terms of a security or lease agreement, the debtor shall pay the sheriff or police a specified fee and prohibits the release of the vehicle to the debtor until the debtor provides proof of payment or pays the fee and an administrative fee to the person in possession or the legal owner. Existing law also provides for a fine if the fee is not transmitted to the sheriff or police. Proof of payment is required to be retained by the party releasing possession to the debtor.

This bill would make clarifying changes in these provisions and would require the party releasing possession to provide a copy of the proof of payment to the debtor upon request of the debtor. It would also exempt certain of those fees from specified charge limitations contained in the Personal Property Brokers Law and the Consumer Finance Lenders Law.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1115 (AB 2885) Committee on Banking and Finance. Financial institutions: finance lenders.

Existing law regulates various persons in the business of making loans to others. The existing Personal Property Brokers Law regulates certain persons that make loans secured by personal property, the Consumer Finance Lenders Law regulates certain

NOTE: Superior numbers appear as a separate section at the end of the digests.

consumer lenders, and the Commercial Finance Lenders Law regulates certain commercial lenders.

This bill would consolidate those 3 laws by repealing the latter 2, and regulating consumer and commercial loans under the Personal Property Brokers Law, to be renamed the California Finance Lenders Law. The bill would make various changes.

The bill would generally become operative July 1, 1995.

Ch. 1116 (SB 1482) Watson. Unemployment: self-employment.

Existing law provides for the payment of unemployment compensation benefits during the period that a person is unemployed. Existing law imposes various requirements on the compensation, including work search requirements. Existing law also establishes retraining programs for unemployed workers.

This bill would require persons to have participated in reemployment activities as a condition of eligibility for unemployment benefits, as specified.

This bill would provide for the establishment of a self-employment assistance program, to be administered by the Director of the Employment Development Department. The bill would provide for a weekly allowance for participants equal to regular unemployment benefits, subject to various limits, and would waive requirements relating to job search and self-employment, as specified. The bill would impose various eligibility requirements.

Since the benefits would be payable from the continuously appropriated Unemployment Fund, it would result in an appropriation.

The self-employment program provisions of the bill would apply to weeks beginning after approval of the United States Department of Labor, and would last only until December 5, 1998.

Ch. 1117 (SB 1490) Johnston. Joint Enforcement Strike Force on the Underground Economy.

Under executive order W-66-93, the Governor has created a Joint Enforcement Strike Force for purposes of addressing problems of the underground economy.

This bill would provide for the Joint Enforcement Strike Force on the Underground Economy pursuant to that executive order, under the Director of Employment Development and including representatives of the Employment Development Department, the Department of Consumer Affairs, the Department of Industrial Relations, and the Office of Criminal Justice Planning, with powers and duties as specified. The strike force would be required to report to the Governor and the Legislature annually, commencing February 1, 1995, regarding its activities. These provisions would remain in effect until January 1, 2000, when they would be repealed unless extended by later enacted statute.

The bill would authorize the Labor Commissioner to authorize an employee of any agency participating in the task force to issue citations and to issue and serve a penalty assessment order, pursuant to specified provisions. These provisions would remain in effect until January 1, 2000, when they would be repealed.

Under existing law, income taxes and related taxes are collected by the Franchise Tax Board.

This bill would require the Department of Industrial Relations to enter into an agreement with the Franchise Tax Board that transfers responsibility from the department to the board for the collection of delinquent fees, wages, penalties, costs, and interest thereon, effective July 1, 1995, as specified.

Existing law requires an employing unit to register with the Employment Development Department, as provided.

This bill would impose a penalty of $100 per nonreported employee, as provided, if the employing unit fails to register with the department due to intentional disregard or intent to evade specified laws or regulations.

Existing law imposes a penalty of 50% of the amount of contributions assessed if the failure of an employing unit to file a return within the required time is due to fraud or intent to evade laws or if any part of the deficiency for which an assessment is made is due to fraud or intent to evade laws.

The bill would, in addition, impose the 50% penalty on an employing unit that fails

NOTE: Superior numbers appear as a separate section at the end of the digests.

to file a report under those circumstances.

This bill would also impose an additional penalty of 50% of the amount of contributions assessed in those circumstances if the employer paid wages and failed to provide information returns, as specified.

The bill would require the Franchise Tax Board to report the results of the program authorized by this bill to the Legislature on or before January 1, 1997.

This bill would incorporate additional amendments to Section 19531 of the Revenue and Taxation Code proposed by AB 3343, contingent upon the prior enactment of that bill.

Ch. 1118 (SB 1768) Johnston. Workers' compensation.

(1) Existing law prohibits a healing arts licensee from performing any medical evaluation for which the evaluator is required to be certified as a qualified medical evaluator without having first obtained that certification.

This bill would provide that no person shall be in violation of that provision if the person is certified as a qualified medical evaluator at the time of assignment to a specified 3-member panel or if the injured worker is represented at the time the injured worker is referred for a medical evaluation.

(2) Existing law specifies requirements for appointment as a qualified medical evaluator.

This bill would define, for those purposes, "board certified" and "board qualified" with respect to a physician with an M.D. or D.O. degree. The bill would also revise, for those purposes, the degree requirements for a psychologist.

(3) Existing law defines psychologist for purposes of the workers' compensation law.

This bill would revise that definition.

(4) Existing law requires an employer to notify its insurer in writing at any time during the pendency of a claim when the employer has actual knowledge of any facts which would tend to disprove any aspect of the employee's claim. Existing law provides that when an employer notifies its insurer in writing that, in the employer's opinion, no compensation is payable to an employee, at the employer's written request, to the appeals board, the board may approve a compromise and release agreement or stipulation, providing compensation to the employee, only where there is proof of service upon the employer by the insurer of notice of the hearing at which the agreement or stipulation is to be approved.

This bill would require notice of the time and place of the hearing and would also require the insurer to file proof of service of the notice with the appeals board.

(5) Existing law specifies requirements for certification as a health care organization to provide health care to injured employees under the workers' compensation law.

This bill would provide that with respect to care provided by these organizations individually identifiable medical information on patients submitted to the Division of Workers' Compensation in the Department of Industrial Relations shall not be subject to the Public Records Act.

(6) Existing law provides for filing a claim form with an employer for eligibility of benefits under the workers' compensation law and provides that the filing of the claim form shall toll certain time limitations.

This bill would make that provision applicable to injuries occurring on or after January 1, 1994. The bill would also provide that for injuries occurring on or after January 1, 1990, and before January 1, 1994, (1) the filing of an application for adjudication and not the filing of a claim form shall establish the jurisdiction of the appeals board, and (2) an application for adjudication shall accompany the declaration of readiness to proceed.

(7) The bill would make related and clarifying changes in the workers' compensation law.

Ch. 1119 (AB 3390) B. Friedman. Health care practitioners: advocating appropriate health care.

Existing law states that it is the public policy of the state that licensed physicians and surgeons be encouraged to advocate for medically appropriate health care, as defined, for their patients. Existing law provides that the application and rendering by any

NOTE: Superior numbers appear as a separate section at the end of the digests.

person, as defined, of a decision that penalizes a physician and surgeon principally for advocating for medically appropriate health care as defined, violates public policy. Existing law requires that these provisions not be construed to prohibit a payer from making a determination not to pay for a particular medical treatment or service, to prohibit certain entities from enforcing reasonable peer review or utilization review protocols, or to prevent the Medical Board of California from taking disciplinary actions authorized by existing law.

This bill would revise the definition of advocating for medically appropriate health care.

This bill would add similar provisions applicable to health care practitioners, as defined. This bill would require that nothing in these provisions be construed to revise or expand the scope of practice of any health care practitioner.

Ch. 1120 (AB 3660) Caldera. Nursing home administrators: licensure: fees.

(1) Existing law prohibits acting or serving in the capacity of a nursing home administrator without a license issued by the State Board of Examiners of Nursing Home Administrators. Under existing law, the board is authorized to set and charge fees for, among other things, the application and examination of applicants for licensure as nursing home administrators. Under existing law, the fees are required to be deposited in the Nursing Home Administrator's State License Examining Board Fund, a continuously appropriated fund.

This bill would revise this fee schedule. By increasing the amounts of certain fees deposited in a continuously appropriated fund, this bill would make an appropriation.

(2) Existing law requires every holder of a nursing home administrator's license to reregister biennially. Existing law provides that in the event the license of an individual is not reregistered within 3 years from the date of expiration, it shall lapse.

This bill would, instead, provide that the license would lapse in the event that it is not reregistered within 3 years from the date of expiration and all accrued and unpaid renewal fees and penalty fees required by existing law are not paid.

Ch. 1121 (SB 1492) Mello. Care facilities.

(1) Existing law, the California Adult Day Health Care Act, states the findings and declarations of the Legislature with regard to the need for quality adult day health care and prohibits persons or organizations, other than a city, a county, or certain nonprofit corporations, from operating an adult day health center, as defined. Existing law provides that any person who negligently, repeatedly, or willfully violates any of the provisions or regulations governing adult day health care is guilty of a misdemeanor.

This bill would delete the prohibition against persons or organizations, other than a city, county, or certain nonprofit organizations, from operating an adult day health center and would state the intent of the Legislature to support the role of the Adult Day Health Care Planning Council in ensuring the accountability and equitable distribution of adult day health care centers and to ensure that all laws and regulations, among other things, for adult day health care be enforced or administered equitably.

By expanding the number of persons or organizations that may operate an adult day health center, this bill would change the definition of a crime and thereby impose a state-mandated local program.

(2) Under existing law, the Long Term Care Health, Safety, and Security Act of 1973, the State Department of Health Services is required to define by regulation, a certain phrase used in regulations relating to long-term health care facilities. This bill would repeal this requirement.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1122 (AB 408) Escutia. Hemodialysis technicians.

Existing law, the Hemodialysis Technician Training Act of 1987, requires the State Department of Health Services to prescribe minimum training standards and a department-approved test for hemodialysis technicians. Existing law permits a hemodialysis clinic or unit to employ hemodialysis technicians who meet certain requirements.

This bill would recast those requirements, and would require an applicant for certification or renewal of certification as a hemodialysis technician to pay a $50 fee to the department. This bill would require that a certification be valid for 4 years, and would require hemodialysis technicians certified prior to January 1, 1995, to apply for renewal of certification before January 1, 1996. For renewals occurring on or after January 1, 1996, this bill would require hemodialysis technicians applying for renewal of certification to submit proof of completion of 30 hours of in-service training or continuing education. This bill would authorize hemodialysis technicians to obtain the required training or continuing education from specified sources. This bill would authorize the department to deny, suspend, or revoke the certification of a hemodialysis technician for certain causes.

This bill would make certification of hemodialysis technicians by the department subject to the review of the Joint Legislative Sunset Review Committee if SB 2036 establishing that committee is enacted and becomes operative on or before January 1, 1995.

This bill would make certain of its provisions inoperative on July 1, 1999, and would repeal those provisions as of January 1, 2000.

Ch. 1123 (AB 918) Speier. Travel.

Existing law proscribes the use of certain incentives as part of an advertising plan or program and deems them to be deceptive and unfair trade practices. This provision does not apply to an incentive constituting an opportunity to stay at a hotel or other resort accommodations at a discount from the standard rate if certain conditions are met, including that the accommodations to be occupied by the recipient of the incentive are located within a 20-mile radius of the property on which the accommodations offered for sale are located.

This bill would expand that provision to apply to accommodations located outside a 20-mile radius if the accommodations offered for sale are managed and operated by the same person as, an affiliate of, or a franchisee of, the manager and operator of the accommodations to be occupied, where the manager and operator of either of the accommodations is an issuer or subsidiary of an issuer that has a security listed on a national securities exchange or designated as a national market system security, as specified.

Existing law does not require advertisements that offer free or discounted transportation or certificates to obtain transportation and that require a consumer to purchase accommodations, as specified, or that offer free or discounted accommodations or certificates to obtain accommodations and that require a consumer to purchase transportation, as specified, to be set forth, in a particular size and prominence, and to disclose the total price, as specified.

This bill would so require. A violation of this requirement would be a misdemeanor. In creating a new crime the bill would impose a state-mandated local program.

Existing law provides a comprehensive scheme for the regulation of travel promoters, defined as a person who sells, provides, furnishes, contracts for, arranges, or advertises that he or she can or may arrange, or has arranged, wholesale or retail air or sea transportation either separately or in conjunction with other services, as specified.

This bill would replace those provisions and instead provide for the regulation of sellers of travel, as specified. The bill would revise existing trust account deposit requirements. The bill would also require the establishment of the Travel Consumer Restitution Corporation, which would be supervised by the Department of Justice.

Various of the provisions would be repealed, or operative, on specified dates.

Since any violation of these provisions would be a misdemeanor or, in some instances, a felony and this bill would add new provisions relating to the conduct of travel sellers, this bill would impose a state-mandated local program by creating new crimes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1124 (AB 1110) Bustamante. In-Home Supportive Services Program.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law authorizes the State Department of Social Services to waive the enforcement of specific statutory requirements, regulations, and standards in one or more counties or on a statewide basis for the purpose of conducting and administering experimental social service programs to test methods and procedures of administering assistance and services to recipients of public social services.

This bill would authorize the department to extend an experimental project for in-home supportive services for an additional period of time as long as the total duration of the project does not exceed 5 years, and would authorize counties participating in experimental IHSS projects that are conducted pursuant to a private provider and a county to extend the contracts as long as the duration of the initial and extended periods of the contract do not exceed 5 years.

This bill would also require the Director of Social Services to specify performance and quality assurance standards to be included in any of those experimental projects that are undertaken or extended, and would specify procedures for the establishment of the standards.

This bill would also provide for a study to review the performance of these projects.

The bill would limit the scope of its application to projects that were in existence on July 1, 1994.

Ch. 1125 (AB 1645) Moore. Title insurance.

Existing law regulates the issuance of owners' policies of title insurance.

This bill would provide that when constituting an offer to issue an owner's policy of title insurance, a preliminary report shall incorporate a statement of specified information relative to exceptions and exclusions.

Ch. 1126 (AB 1836) Eastin. Special education: hard-of-hearing or deaf pupils.

(1) Existing law expresses the intent of the Legislature that special education programs include certain elements for each individual with exceptional needs, including offering individuals with exceptional needs programs that promote maximum interaction with the general school population.

This bill would add to those provisions the intent of the Legislature that those programs for hard-of-hearing or deaf children take into consideration the individual's needs for age and language mode peers and for special education teachers who are proficient in the individual's primary language mode.

(2) Existing law makes certain findings and declarations relating to pupils with low-incidence disabilities.

This bill would add to those findings and declarations provisions relating to hard-of-hearing or deaf pupils.

(3) Existing law requires an individualized education program team to produce a written statement of the individualized education program for each pupil with exceptional needs. The statement must address certain factors and the program must include certain provisions.

This bill, in addition, would declare the intent of the Legislature that for hard-of-hearing or deaf pupils the program include a determination of the specific communication needs of the pupil, and make a placement determination that is consistent with those needs, specified federal law and regulations, and specified legislative findings, in

NOTE: Superior numbers appear as a separate section at the end of the digests.

accordance with prescribed considerations.

The bill would also state that the cost of certain additional responsibilities and services associated with the communication needs of the pupil and the placement determination are to be paid from existing funding sources, as specified, except the General Fund, that training is to be conducted within existing staff development programs, and those training activities are to be consistent with other staff development statutory provisions, as specified.

The bill would declare the intent of the Legislature to ensure that state law complies with the requirements of the federal Individuals with Disabilities Education Act.

The bill would provide that designated provisions shall be implemented only to the extent that funds are specifically appropriated for that purpose in the annual Budget Act.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1127 (AB 1859) Vasconcellos. Economic development.

Existing law establishes within the Trade and Commerce Agency, the California State World Trade Commission. The purpose of the commission is to encourage international trade and development.

Existing law requires the California Foreign Trade Office, within the commission, to, among other things, assist the Governor, the Legislature, and state agencies in establishing and maintaining relations with public and private representatives in other countries.

This bill would require the California World Trade Commission, in consultation with the California Offices of Trade and Investment in Tokyo, Taipei, and Hong Kong, to conduct at least biennially a California Pacific Rim Conference in this state or in another Pacific Rim country if sufficient funds are available to bring together political, academic, business leaders of each of the Pacific Rim nations with state political, academic, business, and labor leaders for the purpose of advancing California's awareness and knowledge of, and commitment and relationship with, and success in engaging in, economic development partnerships in the Pacific Rim. This bill would require the agenda of the conference be designed to enable the participants to engage in dialogue, in order to educate each other about how the state can more effectively engage in Pacific Rim economic development, both by investments in the state and effective marketing overseas. The California World Trade Commission would be authorized to charge a reasonable and appropriate fee for participation in, and public attendance at, the conference and to accept private contributions in order to recoup all necessary costs for the conference.

Ch. 1128 (AB 1892) Polanco. Foster care: eligible facilities.

Existing law relating to special education requires placement decisions for pupils found eligible for special education to be made by individualized education program teams.

The bill would impose certain conditions that must be met in order for an individualized education program team to authorize an out-of-state placement of a seriously emotionally disturbed pupil.

By modifying requirements applicable to education agencies, the bill would impose a state-mandated local program.

This bill would also provide that, in order to place a minor who is a ward or dependent of the court under various provisions of law in an out-of-state residential facility or program, the juvenile court would be required to find that in-state facilities or programs

NOTE: Superior numbers appear as a separate section at the end of the digests.

are unavailable or inadequate to meet the needs of the minor.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1129 (AB 2052) Margolin. Political Reform Act of 1974: campaign statements.

Under the existing Political Reform Act of 1974, all committees are required to file campaign statements each year by a specified deadline if they have made contributions or independent expenditures during the 6-month period before the closing date of the statement.

This bill would include payments to a slate mailer organization during the 6-month period before the closing date of the statement within the contributions or independent expenditures for which campaign statements must be filed.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 1130 (AB 2233) McDonald. Banking: small business loans.

Existing law provides for the regulation of financial institutions in this state .

This bill would direct the California Research Bureau of the California State Library to conduct a study of factors affecting credit for small businesses, and to report to the Legislature on or before July 1, 1995, as specified, and to include within this report, among other things, the effect of state and federal financial institution laws and regulations on small business loans.

Ch. 1131 (AB 3075) Costa. Workers' compensation insurance.

Existing law, operative January 1, 1995, requires workers' compensation insurers to adhere to a uniform experience rating plan filed with the Insurance Commissioner by a rating organization. Existing law requires every insurer to file with the commissioner all rates, rating plans, and supplementary rate information, and provides for the disapproval of a rate in certain instances.

This bill would provide that a rating plan or supplementary rate information filed with the commissioner for purposes of offering deductibles to policyholders shall be deemed complete if the filing complies with specified requirements.

The bill would require the commissioner to establish those forms of collateral or security that an insurer may designate to secure the deductible amount of any policy of workers' compensation insurance and the establishment of reserves and recognition of receivables for insurers writing workers' compensation deductible policies.

This bill would incorporate additional amendments to Section 11735 of the Insurance Code proposed by AB 3682, contingent upon the prior enactment of that bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1132 (AB 3083) Alpert. Ticket sellers: sale requirements.

Existing law provides comprehensive regulation of ticket sellers, including requiring disclosure of specified information to consumers, record maintenance, and maintaining a permanent business address, among other provisions.

This bill would prohibit a ticket seller from contracting to sell or accepting payment for tickets unless he or she either has the ticket in his or her possession or has a contractual right to obtain the ticket, as specified. If the ticket seller cannot meet one of these requirements, he or she must disclose to the ticket purchaser that the ticket may not be available as promised, as specified. If the ticket seller makes the necessary disclosures, he or she may accept a deposit and promise to make best efforts to obtain a ticket for the buyer, as specified.

Existing law provides that a violation of the statutes regulating ticket sellers is a misdemeanor.

This bill would provide that it is unlawful for a ticket seller to promise to deliver a ticket and fail to deliver the ticket on the terms agreed upon.

This bill would further provide that, in addition to existing remedies, a ticket seller who fails to deliver a ticket as promised is liable to the purchaser for 2 times the contracted price, in addition to any nonrefundable expenses the purchaser incurred in attending or attempting to attend the event, and reasonable attorney's fees and court costs.

Existing law provides that a ticket seller shall have a permanent business address from which tickets may be sold, that the address must be included in all advertising or solicitations, and that the ticket seller must comply with any local licensing requirements. A violation of these provisions is a misdemeanor.

This bill would specify the penalties for a misdemeanor offense and would also provide for prosecution and imposition of civil penalties.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

Because this bill makes failing to deliver a ticket as promised unlawful, it imposes a state-mandated local program by creating a new crime.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would provide that is to take effect immediately as an urgency statute.

Ch. 1133 (AB 3148) Katz. Vehicles: driver's licenses.

(1) Existing law prescribes the powers and duties of the Department of Motor Vehicles.

This bill would enact the Safe Streets Act of 1994 and would require the department to publicize the act in specified documents mailed by the department, and in other educational materials made available by the department.

(2) Existing law authorizes the court or the Department of Motor Vehicles, under specified circumstances, to revoke or suspend a person's driver's license.

This bill would require the department, whenever a person's driver's license is suspended or revoked, to notify the person by certified mail, return receipt requested, as specified, of that action and of the effective date thereof, except as specified. This provision would become operative on June 30, 1995.

(3) Existing law prohibits a person from operating a motor vehicle if the person's driver's license has been suspended or revoked for specified causes, and that person has knowledge of the suspension or revocation. The person is presumed to have knowledge of the suspension or revocation if the department has given notice to the person.

This bill would provide that knowledge is conclusively presumed if the department gives notice to the person by certified mail, as specified.

The bill would require every notice to include a demand for surrender to the department within 15 days of the effective date of the suspension or revocation, as specified in the notice, of all driver's licenses held by that person and would provide for reinstatement fees for driver's licenses as set by the department. The bill would require the person to surrender the driver's licenses to the department within the 15-day period.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would state that a violation of this provision is not a crime.

These provisions would become operative on June 30, 1995.

(4) Existing law makes it unlawful for a person whose driving privilege has been suspended or revoked to accumulate a driving record history, as defined, which results from driving during a period of suspension or revocation which resulted from a conviction of specified offenses.

This bill would make it unlawful for a person whose driving privilege has been suspended or revoked to accumulate a driving record history which results from driving during any period of suspension or revocation. Because the bill would expand the definition of a crime, it would impose a state-mandated local program.

(5) Existing law prescribes procedures for the forfeiture of a motor vehicle used in the commission of specified crimes.

This bill would authorize, and prescribe procedures for, the forfeiture as a nuisance of a motor vehicle owned and operated by a person whose driver's license is suspended or revoked, or who is not licensed to drive, and who is a registered owner of the vehicle and has a previous misdemeanor conviction for a violation of specified provisions.

By imposing new duties on local entities in connection with the forfeiture of motor vehicles, the bill would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Moreover, the bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for other costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for those other costs.

Ch. 1134 (AB 3296) Campbell. Irrigation districts.

(1) Under the Irrigation District Law, a director of a district formed pursuant to that law is generally required to be a voter, landowner of the district, and a resident within the division which the director represents.

This bill would authorize the directors of the Byron-Bethany Irrigation District to adopt a resolution that authorizes a person who meets the landownership requirement and who resides in the County of Alameda, Contra Costa, or San Joaquin to be a director in that district. The bill would authorize the registered voters in that district to request, in writing, that all of the directors who are elected subsequent to the receipt of the request be required to meet the requirements of existing law. The bill would require all the directors of that district who are elected subsequent to the receipt of the request to meet the requirements of existing law if the directors determine that at least 25% of the registered voters have signed the request.

The bill would authorize the directors of that district to adopt a resolution that requires the election of directors by division. The bill would specify related matters.

The bill would authorize the directors of the Stratford Irrigation District to adopt a resolution that authorizes a person who meets the landownership requirement and who resides in Kings County to be a director of that district. The bill would authorize the registered voters in that district to request, in writing, that all of the directors who are elected subsequent to the receipt of the request be required to meet the requirements of existing law. The bill would require all directors of that district who are elected subsequent to the receipt of the request to meet the requirements of existing law if the directors determine that at least 25% of the registered voters have signed the request.

(2) The Irrigation District Law, with certain exceptions, requires irrigation districts to have 5 divisions and requires directors of those districts to be elected by the division each director represents.

This bill would authorize the directors of the Alta Irrigation District to adopt a resolution that increases the number of directors and the divisions from which they are elected

NOTE: Superior numbers appear as a separate section at the end of the digests.

from 5 to 7 in accordance with prescribed procedures. Certain provisions would become operative only if AB 2536 is enacted and becomes operative.

Ch. 1135 (AB 3302) Speier. Licensees: licensing boards: Contractors' State License Board.

Under existing law, any board, as defined, and the State Bar and the Department of Real Estate are required at the time of issuance or renewal of a license to require that any licensee provide its federal employer identification number if the licensee is a partnership or his or her social security number for all others.

This bill would provide that a licensing board may not process any application for an original license or for renewal of a license unless the applicant or licensee provides its federal employer identification number or social security number where requested on the application.

Under existing law, a complaint against an individual licensed by the Contractors' State License Board alleging commission of any acts or omissions that may be grounds for legal action shall be filed in writing with the registrar within 3 years after the act or omission alleged as the ground for the disciplinary action.

This bill would instead provide that a complaint against a licensee alleging commission of any patent acts or omissions that may be grounds for legal action shall be filed in writing with the registrar within 4 years after the act or omission alleged as the ground for the disciplinary action and a complaint against a licensee alleging commission of any latent acts or omissions, as defined, that may be grounds for legal action based on structural defects, as provided, shall be filed in writing with the registrar within 10 years after the act or omission alleged as the ground for the disciplinary action.

Under existing law, any contractor or home improvement salesperson, or applicant therefor, within the state, is subject to disciplinary action by the Contractors' State License Board if he or she commits any one or more acts or omissions, as specified.

This bill would provide that the revocation, suspension, or other disciplinary action of a license to act as a contractor by another state is grounds for disciplinary action in this state if the individual is a licensee, or applies for a license, in this state.

This bill would also provide that when the board resolves a complaint, the board shall notify the complainant in writing of its action and the reasons for taking that action and the contractor, provided that the contractor is licensed and the notification would not jeopardize an action or investigation that involves the contractor.

Under existing law, there is no prohibition against a licensee using the name or position of a public official in advertising or promotional materials.

This bill would prohibit the use of the name or position of a public official, as defined, in any advertising or promotional material by the licensee without the written authorization of the official and a disclaimer, as specified.

Existing law provides requirements applicable to arbitration provisions contained in specified real estate contracts.

This bill would impose requirements applicable to arbitration provisions contained in contracts for work on residential property with 4 or fewer units, as specified.

Ch. 1136 (AB 3575) Speier. Political Reform Act of 1974: Secretary of State: study.

The existing Political Reform Act of 1974 requires candidates, government officers and employees, lobbyists, lobbying firms, and lobbyist employers to file various documents, statements, and certifications disclosing information regarding specified activities and financial interests.

This bill would express legislative intent with regard to the development of a system to permit persons required to file reports under the Political Reform Act of 1974 to file all reports electronically or by computer diskette and to provide the availability of this information to the public through on-line public access computer networks. The bill would, with respect to all reports required to be filed with the Secretary of State under the Political Reform Act of 1974, require the Secretary of State to study, as specified, the options for a computerized system through which these reports would be filed, maintained, and made available to the public. The bill would require the Secretary of State

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to report in writing to the Legislature on the results of this study no later than January 1, 1996.

Ch. 1137 (AB 3611) Moore. Election information: availability: technology.

Existing law designates the Secretary of State as the chief elections officer of the state. It requires the Secretary of State to prepare a ballot pamphlet for statewide elections.

This bill would state legislative findings and declarations on the need to utilize information processing technology to improve the accessibility of election information to the voters.

This bill would require the office of the Secretary of State to develop a program to utilize modern communications and information processing technology to enhance the availability and accessibility of information on statewide candidates and ballot initiatives. It would require the Secretary of State to report to the Legislature on the scope and cost of the program by June 30, 1995.

Ch. 1138 (SB 151) Watson. Health care for indigents.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits.

Existing law requires that local entities meet specified maintenance of effort requirements in order to participate in the CHIP.

This bill would revise the maintenance of effort requirements for the 1994–95 fiscal year for Los Angeles County.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1139 (SB 217) Dills. Political Reform Act of 1974: reports and audits of lobbying payments and expenses.

Under the existing Political Reform Act of 1974, lobbying firms, lobbyist employers, and certain persons who directly or indirectly make payments to influence legislative or administrative action of $5,000 or more in value in any calendar year, as specified, are required to file reports disclosing information about the payments made and expenses incurred for their lobbying activities. Existing law requires these reports to be filed during the month following each calendar quarter and requires the period covered to be from the beginning of the calendar year through the last day of the quarter prior to the month during which the report is filed, with certain exceptions.

This bill would instead require those reports to cover the period from the first day of January of each new biennial legislative session through the last day of the calendar quarter prior to the month during which the report is filed, with those same exceptions.

Existing law further requires random audits of the reports filed by lobbying firms and lobbyist employers on an annual basis, with the audits covering reports filed during a one-year period.

This bill would instead require biennial random audits covering reports filed during a 2-year period.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 1140 (SB 279) Calderon. Child support.

(1) Existing law prohibits a court from considering the income of the subsequent spouse or nonmarital partner of a parent who has a duty to provide child support when the court determines or modifies child support, except in an extraordinary case, which may include a parent voluntarily or intentionally quitting work or reducing income.

This bill would provide that an extraordinary case also may include a parent who intentionally remains unemployed or underemployed and relies on a subsequent spouse's income. It also would make a statement of legislative intent.

(2) Existing law provides for the assignment of wages to satisfy an order to pay

NOTE: Superior numbers appear as a separate section at the end of the digests.

arrearages in child support.

This bill would require an obligee alleging arrearages in child support to specify the amount thereof under penalty of perjury.

Ch. 1141 (SB 366) Maddy. Clinical laboratories: licensure: exemptions.

Existing law prohibits the operation or maintenance of a clinical laboratory without a valid clinical laboratory license issued by the State Department of Health Services. Existing law exempts laboratories owned and operated by certain persons or entities from this requirement. Under existing law, a laboratory owned and operated by an individual physician and surgeon or podiatrist for the performance of laboratory work on his or her own patients is exempted.

This bill would revise this provision to exempt laboratories owned and operated by a physician and surgeon or podiatrist, or a partnership or professional corporation of 5 or fewer physicians and surgeons or podiatrists, that perform clinical laboratory tests or examinations only for the patients of that individual physician and surgeon, podiatrist, partnership, or professional corporation. This bill would make this exemption become inoperative when the United States Department of Health and Human Services exempts state-licensed or state-registered laboratories from certain federal law, and the Director of Health Services has determined this condition has occurred.

Ch. 1142 (SB 1498) Hughes. Cosmetology: externship program.

Existing law prohibits a licensed cosmetology establishment from employing an unlicensed person who performs or practices cosmetology, as defined.

This bill would provide that a student extern, as defined, may work at a licensed cosmetology establishment, and that the student extern may receive school credit, as provided, for the work. The bill would impose various requirements on the externship program.

Ch. 1143 (SB 1683) Thompson. Emergency medical services fund: poison control.

Existing law authorizes each county to establish an emergency medical services fund to be available in each county for reimbursement of prescribed costs relating to emergency medical services pursuant to a formula. Under existing law, the formula requires, in part, that 17% of the fund, after administrative costs, be distributed for other emergency medical services purposes as determined by the county.

This bill would specify that this other category includes, but is not limited to, the funding of regional poison control centers.

This bill, would, notwithstanding these provisions and if certain conditions are met, permit the county board of supervisors for prescribed counties , by a ⅘ vote, and upon a finding by the board that prior year unexpended and unencumbered funds, as defined, exist within the fund, to authorize expenditure of those prior year unexpended and unencumbered funds for poison control without regard to the formula. This bill would repeal these provisions as of January 1, 2000.

The bill would impose certain restrictions with regard to expenditure of unexpended and unencumbered funds for emergency medical services purposes other than poison control.

This bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

Ch. 1144 (SB 1910) Greene. Health coverage: continuation of coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Commissioner of Corporations. Existing law also provides for the regulation of policies of disability insurance and nonprofit hospital service plans by the Insurance Commissioner.

Existing law requires that health care service plan contracts, disability insurance policies, and nonprofit hospital service plan contracts provide coverage for certain services and treatments.

This bill would require health care service plan contracts, disability insurance policies,

NOTE: Superior numbers appear as a separate section at the end of the digests.

and nonprofit hospital service plan contracts issued, amended, delivered, or renewed in this state on or after January 1, 1995, that provide hospital, medical, or surgical expense coverage under the plan of an employer subject to federal continuing medical insurance requirements (hereafter "COBRA") to permit an employer to provide extended coverage to eligible former employees and their spouses. In order to be eligible for extended coverage, the employee would be required to be over 60 years of age on the date employment ends, and have worked for the employer for at least the 5 prior years.

The bill would additionally require any employer subject to these provisions to provide continuation coverage for an eligible employee and the employee's spouse, if the employee continues coverage under COBRA. The employer would be required to provide notice of the availability of continuation coverage, and the employee or spouse would be required to elect to continue coverage under these provisions. The coverage would begin after the COBRA coverage ends, on the same terms as the COBRA coverage, at a premium not to exceed 213% of the applicable group rate, as defined. The coverage would end automatically on the occurrence of a specified event.

Under existing law, violation of the Knox-Keene Health Care Service Plan Act of 1975 is a misdemeanor. This bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1145 (AB 446) Sher. Energy resources: State Energy Resources Conservation and Development Commission.

Existing law, the Warren-Alquist State Energy Resources Conservation and Development Act, among other things, prohibits the State Energy Resources Conservation and Development Commission from adopting or publishing a building standard except under prescribed conditions, requires the commission to develop a maximum feasible solar implementation plan by January 1, 1980, and to develop a related program on a continuous basis, requires the commission to conduct random or periodic audits and inspections of retail gasoline service stations to determine withholding of supplies and compliance with price regulations, establishes the Motor Vehicle Fuel Conservation Act of 1980 to authorize certain county ordinances, requires the commission to review building standards in relation to indoor air pollution by December 31, 1991, requires the commission to do an energy survey study and develop a program by December 31, 1979, prohibits certain oil or gas pipeline projects except under specified conditions, establishes the Smart Corridor Telecommunications Demonstration Project to study the feasibility of smart corridor technologies, establishes the Harvey Clean Fuel and Campus Rideshare Act requiring the commission to develop and submit to the Legislature certain recommendations by March 1, 1992, establishes the Coal Gasification Generation Act imposing certain duties on the commission relating to project approval, requires the commission by June 30, 1992, to adopt home energy rating and labeling guidelines, and requires the Controller to establish, maintain, and administer the Clean Coal Account in the General Fund and requires the commission to use the money in the account for the purpose of entering into specified development and demonstration contracts.

This bill would repeal those provisions of the act.

The bill would also repeal certain obsolete and other provisions of the act and make related changes with regard to powerplant siting.

Ch. 1146 (AB 1963) Katz. Transportation: congestion management programs.

(1) Existing law requires the development, adoption, and updating of a congestion management program for each county that includes an urbanized area, as defined. The plan is required to contain specified elements and to be submitted to regional agencies, as defined, for determination of whether the program is consistent with regional transportation plans. The regional agency is then directed to monitor the implementation of all elements of each congestion management program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise various definitions and program elements and incorporate new definitions and program elements for purposes of the above. The bill would also revise the duties of the regional agency with respect to monitoring the programs and would require the Department of Transportation to collect and analyze state highway data, unless the local regional agency designates that responsibility to another entity. The bill would also revise the duties of cities and counties that are subject to the provisions, thereby imposing a state-mandated local program.

The bill would authorize the department to undertake a demonstration study comparing multimodal performance standards to highway level of service standards and provide for a June 30, 1997, report to the Legislature regarding that study.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1147 (AB 2762) Sher. Oil recycling: reporting.

(1) Existing law, the California Oil Recycling Enhancement Act, requires every oil manufacturer, as defined, to pay to the California Integrated Waste Management Board, on or before the last day of the month following each quarter, a charge of 4¢ for each quart and 16¢ for each gallon, of lubricating oil sold or transferred in the state, or imported into the state for use in the state that quarter. The act exempts specified sales or transfers from that charge, including the sale or transfer of oil handled by the oil manufacturer otherwise subject to the charge pursuant to those provisions if the lubricating oil has a volume of 5 gallons or less. These payments are deposited in the California Used Oil Recycling Fund, and the money in the fund is continuously appropriated to the board for specified purposes, including the payment of recycling incentives and the making of block grants for local used oil collection programs. A violation of the act is a crime.

This bill would delete obsolete provisions in those provisions, and would, until January 1, 2000, instead exempt the sale or transfer of oil handled by the oil manufacturer otherwise subject to payment by those provisions, if the oil has a total volume of 500 gallons or less each quarter. On and after January 1, 2000, that exemption would return to the existing exemption for oil which has a volume of 5 gallons or less. By changing the definition of what constitutes a crime under those provisions, the bill would impose a state-mandated local program.

(2) The act defines, for purposes of the act, "bulk oil" and "used oil hauler."

This bill would clarify the definition of "bulk oil," revise the definition of "used oil hauler," and define the terms "used oil storage facility" and "used oil transfer facility."

(3) Existing law requires the board to maintain a toll-free telephone for the purpose of informing callers of specified information related to used oil. Existing law also requires manufacturers of containers for lubricating oils or industrial oils, which are intended for sale in California, to label the containers in a specified manner.

This bill would recast those provisions as part of the act.

(4) The act authorizes the board to issue grants or loans to, among others, nonprofit entities for projects which include specified programs or activities.

This bill would also authorize the board to issue those grants or loans for research, testing, and demonstration projects to develop collection technologies for recycled or used oil. By changing the purposes for which the money in the fund may be used, the bill would thereby make an appropriation.

(5) The act requires that, to receive payment of a recycling incentive, an industrial generator of used lubricating oil, a used oil collection center, or a curbside collection program is required to submit a specified report to the California Integrated Waste Management Board on or before the last day of the month following each quarter.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would extend the date when those reports are due to the 45th day following each quarter. The bill would also authorize the board to delegate to the executive officer the authority to accept reports submitted after the 45th day, and to reduce, eliminate, or approve the amount of the incentive fee to be paid due to the late submission of the report.

(6) The bill would authorize the board, on or before July 1, 1995, to establish a 2-year pilot program for recycling used oil filters, as prescribed. The bill would require the board, on or before November 1, 1997, to prepare a report on the success or failure of any pilot program so established, including recommendations for legislation, if warranted, and to make the report available to the Governor, the appropriate policy and fiscal committees of the Legislature, and, upon request, to Members of the Legislature. The bill would prohibit the board from expending more than $120,000 annually during each year of the 2-year pilot program, for purposes of conducting the program. The pilot program would be required to be terminated if a statewide oil filter recycling program is enacted.

(7) The bill would prescribe other, related matters and would make clarifying changes in the act.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1148 (AB 2874) Snyder. Threatened or endangered plant species: surface mining operations.

(1) Existing law, the California Endangered Species Act, prohibits importing, exporting, taking, possessing, purchasing, or selling an endangered species or a threatened species or any part or product thereof, with specified exceptions.

This bill would make a technical change in those exceptions.

(2) Under existing law, the Surface Mining and Reclamation Act of 1975, a person is prohibited, with specified exceptions, from conducting surface mining operations unless, among other things, a permit is obtained from the lead agency, as defined.

This bill would exempt a surface mining operation, if it has been issued a permit pursuant to the act, is in compliance with the permit with regard to matters relating to plants, and is in compliance with any memorandum of understanding with the Department of Fish and Game, from criminal prosecution pursuant to the Fish and Game Code for any take of a threatened or endangered plant species that is incidental to the surface mining operation.

The bill would also require the department to notify the surface mining operator within 14 days of any plant species on the private property of the operator that is added to the list of threatened or endangered species or that is newly discovered on the property. The bill would require the department to issue reasonable and feasible interim management measures and would require the operator and the department to develop and finalize a reasonable memorandum of understanding, as specified, to protect the newly added or newly discovered plant species. The bill would require the interim management measures and the final memorandum of understanding, to the extent feasible, to avoid interference with ongoing surface mining operations.

(3) The bill would require the surface mining operator to pay to the department the actual costs incurred by the department in preparing and finalizing the interim management measures and the memorandum of understanding for newly discovered or newly added species. The bill would require these fees to be deposited in the Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account in the Fish and Game Preservation Fund and would continuously appropriate the fees to the department for purposes of implementing the provisions described in (2).

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1149 (AB 2878) Alpert. Vehicles: disabled person placards.

(1) Existing law requires the Department of Motor Vehicles, upon application from qualified persons, to issue special identification plates to disabled persons.

Existing law authorizes a distinguishing placard to be used in lieu of the special identification license plates for obtaining parking privileges authorized for disabled persons.

This bill would require the department to issue a temporary distinguishing placard for the specified parking privileges upon receipt of an application and specified substantiating documents from persons who are temporarily disabled, disabled persons or disabled veterans who do not reside in this state and are planning to travel in the state, and disabled persons or disabled veterans who have been issued either, but not both, a special identification license plate or a distinguishing placard.

The bill would make conforming changes in related provisions of existing law.

(2) Under existing law, it is an infraction punishable by a fine of not less than $250 for a person to park a vehicle in violation of specified provisions relating to disabled persons' and veterans' parking spaces, but the court is authorized to suspend that fine if the person convicted of that violation possessed at the time of the offense, but failed to display, a distinguishing license plate or placard for disabled persons or disabled veterans, as specified.

This bill would additionally allow the court to suspend the fine if the person possessed, but failed to display, a specified valid special identification license plate or a specified temporary distinguishing placard.

(3) This bill would appropriate $174,000 from the Motor Vehicle Account in the State Transportation Fund to the Department of Motor Vehicles for expenditure in the 1994–1995 fiscal year for purposes of implementing the bill.

Ch. 1150 (AB 2938) Aguiar. Solid waste: diversion requirements: time extension.

(1) Existing law, the California Integrated Waste Management Act of 1989, requires cities and counties to divert 25% of all solid waste from landfill or transformation facilities by January 1, 1995, and, with specified exceptions, to divert 50% by January 1, 2000, through source reduction, recycling, and composting activities. The act requires each city or county, based on the number of years of remaining disposal site capacity, to submit a source reduction and recycling element, that demonstrates how the city or county will achieve those diversion requirements, in accordance with a prescribed schedule. The act authorizes the California Integrated Waste Management Board to grant a time extension from the diversion requirements, as specified, to a city that was incorporated after January 1, 1990, if the city meets specified conditions, including, among others, that the city is a successor agency to more than one solid waste franchise agreement entered into by the county within which the city is located prior to the incorporation of the city and the city has prepared a source reduction and recycling element which has been approved by the board and which demonstrates that the city will comply with the diversion requirements on or before the date on which the time extension expires.

This bill would delete those conditions as requisites for obtaining a time extension from the diversion requirements, and would authorize the board to allow a city which meets the revised conditions, notwithstanding existing provisions of law regarding the schedule for submitting a source reduction and recycling element, to submit a source reduction and recycling element, a household hazardous waste element, and a nondisposal facility element in accordance with a specified schedule.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1151 (AB 3082) Alpert. Hazardous waste: enforcement delegation: permits.

(1) Existing law prohibits the operation of a hazardous waste storage, treatment, transfer, resource recovery, or disposal facility without the obtaining of a hazardous waste facilities permit or other grant of authorization from the Department of Toxic Substances Control. A violation of the hazardous waste control laws is a crime.

This bill would define the term "transportable hazardous waste treatment unit."

(2) Existing law requires the department and any local health officer or a local public

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

officer designated by the Director of Toxic Substances Control to enforce the standards and regulations concerning hazardous waste. Under existing law, until January 1, 1997, the department is authorized to delegate to local health officers in not more than 8 counties, as part of a 5-year pilot program, the department's authority to issue certain orders specifying a schedule for compliance or correction. The department is required to adopt regulations defining the criteria for eligibility for that authorization.

Existing law requires the Secretary for Environmental Protection, by January 1, 1996, to adopt implementing regulations and implement a unified hazardous waste and hazardous materials management regulatory program. A city or local agency which meets specified requirements is authorized to apply to the secretary to implement the unified program and every county, by January 1, 1996, is required to apply to the secretary to be certified to implement the unified program. Each certified unified program agency is required to institute a single fee system and the fee is required to include a surcharge, the amount of which the secretary is required to determine and adjust, to cover the necessary and reasonable costs of state agencies in carrying out the unified program.

This bill would require the department to establish a program to delegate, upon the request of a certified unified program agency in San Diego County, the enforcement authority granted to the department, except as specified. The department would be required to adopt regulations defining the criteria for the certified unified program agency to receive a delegation and include provisions in those regulations to ensure consistent enforcement of the hazardous waste control laws.

The bill would provide that a local health officer or designated local public officer in San Diego County that has previously been delegated authority by the department to enforce the hazardous waste laws would continue to have all authority that was delegated to that officer.

The bill would require the department to annually determine the total ongoing, necessary, and reasonable costs of coordinating and evaluating the delegation program and to annually submit to the secretary an itemized cost report as verification of these total annual costs, to be included by the secretary in the surcharge which the secretary is required to adjust.

The bill would make a legislative finding that a general statute, within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution, cannot be made applicable because of the unique circumstances that exist in San Diego County.

(3) Existing law requires the department to develop a permitting process for transportable hazardous waste treatment units for treating waste.

This bill would allow a transportable hazardous waste treatment unit operating pursuant to a hazardous waste facilities permit or pursuant to the department's regulations for operation under a permit-by-rule to operate at a facility for a period not to exceed one year, except as specified.

(4) Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, upon notifying the department, to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization. The act also exempts from hazardous waste facilities permit requirements a generator who treats not more than specified amounts of hazardous waste, in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste. Local health officers or designated local public officers are authorized to develop a program to inspect generators performing that conditionally authorized and conditionally exempt treatment, and facilities conducting treatment pursuant to a permit-by-rule.

Existing law requires owners and operators of facilities or transportable treatment units and generators conducting conditionally authorized or conditionally exempted treatment to pay a specified fee to the State Board of Equalization. Up to 25% of that fee is required to be offset by any fees paid during the preceding calendar year for the local inspection program.

This bill would instead authorize certified unified program agencies to develop the local inspection program. The bill would delete that 25% fee offset and would instead

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

exempt a person subject to the local inspection program fee from paying the fee to the board. The bill would also make conforming changes with regard to the fees imposed upon persons managing recyclable materials.

(5) Existing law authorizes the department to establish an administrative process to certify, in accordance with prescribed procedures and requirements, hazardous waste environmental technologies, as prescribed, that it determines will not pose a significant potential hazard to public health and safety or to the environment, if they are used under specified operating conditions and can be operated without specialized training and with minimal maintenance. Any technology so certified by the department may be eligible for authorization pursuant to permit-by-rule, conditional authorization, or conditional exemption, if the department determines that the use of that technology to handle the waste stream or streams is demonstrated to be as safe and as effective as the processes that are subject to regulation under those provisions.

This bill would require the department, in determining the placement of a certified technology for operation pursuant to permit-by-rule, conditional authorization, or conditional exemption, to consider specified factors in making its determination.

(6) Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1152 (AB 3352) Gotch. Local government.

Existing law authorizes public agencies, as defined, to enter into joint powers agreements.

This bill would authorize a joint powers entity, that is created pursuant to a joint powers agreement entered into by a city and one or more reclamation districts for the purpose of carrying out a flood control project, to exercise the assessment and bonding authority granted to reclamation districts under existing law.

Existing law requires specified county offices, including the district attorney and public administrator, to be elective offices unless the voters of the county adopt a proposal making an office appointive. Other county offices are appointive. Special authorization is given the board of supervisors of Madera, Mendocino, and Lake Counties to adopt an ordinance making the office of public administrator appointive, to appoint the same person to the offices of public administrator, veteran service officer, and public guardian, and to separate the consolidated offices of district attorney and public administrator at any time in order to make these appointments.

This bill would extend to the board of supervisors of Trinity County the same authority possessed by the boards of supervisors of Madera, Mendocino, and Lake Counties.

Existing law specifies the powers and duties of the local agency formation commission.

This bill would require the commission to notify specified state agencies having oversight or regulatory responsibility over, or a contractual relationship with, a local hospital district when a proposal is made for any of specified changes of organization affecting that district.

Existing law requires the conducting authority to order, subject to voter confirmation, a change of organization or reorganization that was initiated by the commission when the conducting authority makes a specified finding.

This bill would make a technical change in that provision.

Existing law regulating the construction standards for mausoleums does not distinguish between community and private mausoleums and columbariums.

This bill would define private mausoleum or columbarium and permit the Cemetery Board to adopt additional regulations for the construction of private mausoleums and columbariums, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1153 (AB 3467) Murray. Open meetings: state agencies.

Under existing law, the notice of a meeting of a state body, as defined, is required to include a brief general description of the business to be transacted or discussed and no item shall be added to the agenda subsequent to the provision of the notice.

This bill would permit a state body to take action on items not appearing on the posted agenda in specified circumstances.

Under existing law, the meetings of a state body are required to be open and public. Existing law also requires that all persons be permitted to attend any meeting of a state body except under specified conditions.

This bill would authorize a state body to hold an open or closed meeting by teleconference, as defined and as specified.

Ch. 1154 (AB 3582) Richter. Hazardous waste: oil disposal and use.

(1) Under existing law, the use of used oil, recycled oil, or oil exempted pursuant to specified provisions as a dust suppressant or weed control agent is prohibited unless the oil meets specified requirements and standards. Used oil is classified as a recyclable material which is subject to regulation as a hazardous waste, unless it meets certain requirements. A violation of the requirements concerning used oil is a crime.

This bill would prohibit any use of used oil or recycled oil as a dust suppressant or insect or weed control agent unless allowed under another applicable law, but only to the extent that the use is consistent with the federal act.

The bill would require that used oil which is not subject to regulation as a hazardous waste be managed in accordance with specified federal regulations.

The bill would require all copies of each receipt for manifested used oil under specified procedures to contain the Environmental Protection Agency identification number.

The bill would require a transfer facility that accepts used oil and holds the oil for more than 24 hours, but less than 144 hours, and does not handle the used oil, other than the transfer of packaged or containerized used oil from one vehicle to another, to comply with the requirements for used oil transfer facilities in specified federal regulations.

The bill would revise the definition of used oil and recycled oil for purposes of conforming with federal provisions regulating the management of used oil and would make related changes.

The bill would require, if the material is used oil, that the containers, aboveground tanks, or fill pipes used to transfer the oil into underground storage tanks be labeled or clearly marked with the words "Used Oil".

Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1155 (SB 285) Johnston. Sacramento-San Joaquin Delta: regional plan.

(1) Existing law, the Johnston-Baker-Andal-Boatwright Delta Protection Act of 1992, creates the Delta Protection Commission with prescribed membership and requires the commission to prepare and adopt by July 1, 1994, a comprehensive long-term resource management plan for specified lands within the delta.

This bill would extend to October 1, 1994, the date by which the commission is required to prepare and adopt the regional plan, and would require the commission, by January 7, 1995, to transmit copies of the regional plan to the Governor. The bill would require the regional plan to be made available, upon request, to Members of the Legislature. The bill would make nonsubstantive changes with regard to the membership of the commission.

(2) Under the act, a local government is required to adopt proposed general plan amendments within 60 days after their approval by the commission.

This bill would extend that period to 120 days.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1156 (SB 1456) Rosenthal. Public utilities: catastrophic events.

Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility in the state and to do all things necessary and convenient in the exercise of its power and jurisdiction, including the approval of utility expenses and the establishment of rates.

This bill would require the commission to authorize public utilities to establish catastrophic event memorandum accounts and to record in those accounts specified costs that would be recoverable in rates following a request by the affected utility, a finding of their reasonableness, and approval by the commission.

The bill would also require the commission to hold expedited proceedings in response to utility applications to recover costs associated with catastrophic events.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1157 (SB 1521) Kelley. Weights and measures: unit pricing.

Existing law requires the Department of Consumer Affairs, in cooperation with the retail food industry, to adopt a standardized format for unit pricing, including, among other things, the total price of the item, the volume, weight, or number of units of which the item is composed, and the price per unit.

This bill would, instead, require the Department of Food and Agriculture to adopt that standardized format. The bill would include within unit pricing the price per ounce for infant formula and would declare the reconstituted fluid ounce to be the preferred unit of measure for unit pricing of powdered and concentrated infant formula. The bill would require the standardized format to be available to a retailer on request.

Existing law also requires the Department of Consumer Affairs to prepare for public distribution an informational pamphlet containing information relating to unit pricing.

This bill would delete the requirement for the department to prepare the pamphlet containing information relating to unit pricing.

Ch. 1158 (SB 1534) Johnston. Land conservation.

Existing provisions of the Williamson Act authorize any city or county to enter into contracts to limit the use of agricultural lands for the purpose of preserving those lands. Existing law requires a public agency that intends to consider the location of a public improvement within an agricultural preserve established by contract under the act to advise the Director of Conservation and the local governing body responsible for administration of the preserve.

This bill would require the public agency to include in its notice of intention to consider the location of a public improvement within the preserve an explanation of the preliminary consideration that the location is not based primarily on a consideration of lower cost of acquiring land in a preserve and that there is no other land on which it is reasonably feasible to locate the public improvement. The bill would add to the instances where the above provision does not apply the acquisition of temporary construction easements within a preserve for public utility improvements and the acquisition of a fee interest or conservation easement for a term of at least 10 years, as specified. The bill would define public improvement. The bill would also require the public agency to notify the Director of Conservation and the local governing body administering the preserve of changes in the intended public improvement, as specified.

Existing law provides that when land under contract in an agricultural preserve is taken by a public agency by condemnation or other proceedings the contract is null and void as to the land actually taken.

This bill would provide that if, after acquisition, the acquiring public agency determines that it will not for any reason actually locate on that land the public improvement for which the land was acquired, the land shall be reenrolled in a contract or encumbered by an enforceable deed restriction with terms at least as restrictive as those provided under the Williamson Act for a period of time equal to the remainder of the original contract before the land can be returned to private ownership.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1159 (SB 1579) Wright. Hazardous waste facilities: standardized permits.

(1) Under existing law, the Department of Toxic Substances Control is required to issue hazardous waste facilities permits to use and operate one or more hazardous waste management units at a facility which, in the judgment of the department, meet specified requirements.

Existing law requires the State Board of Equalization to assess a fee for any application for a new hazardous waste facilities permit, a permit for a hazardous waste facility which would manage extremely hazardous waste, a variance, or a permit modification, for deposit into the Hazardous Waste Control Account. Existing law specifies certain fee amounts to be assessed and provides that these amounts are base rates for the 1989–90 fiscal year.

Certain offsite non-RCRA treatment or storage facilities are eligible, under existing law, for operation under a standardized permit. A facility treating oil or solvents is not eligible for a standardized permit. Interim status granted pursuant to the standardized permit provisions terminates upon a final permit determination, or June 1, 1995, whichever date is earlier. An offsite treatment facility which is not subject to the federal Resources Conservation and Recovery Act of 1976 (RCRA) operating pursuant to interim status under the standardized permit provisions is required to pay a specified facility fee to the department.

A violation of the hazardous waste control laws is a crime.

This bill would extend the June 1, 1995, date for interim status termination under the standardized permit provisions, to October 1, 1995.

The bill would provide that an offsite facility treating only solvents of the types generated from dry cleaning operations is eligible for a standardized permit if specified conditions are met. The bill would also make that facility eligible for the facility fee exemption for any year or reporting period prior to January 1, 1995, if the owner or operator is in compliance with specified notification and application requirements not later than March 1, 1995.

The bill would additionally require offsite non-RCRA storage or treatment or storage facilities subject to the standardized permit provisions to pay the facility fee, and would exempt the operator of a hazardous waste facility operating pursuant to a grant of interim status under the standardized permit provisions from specified facility fees, subject to specified conditions.

The bill would provide that, for all facilities operating pursuant to a standardized permit, the fee amounts are to be the base rates for the 1993–94 fiscal year. The bill would require the board to pay a refund to an owner or operator of a facility operating pursuant to a standardized permit who paid fees in excess of the amounts specified for the 1993–94 fiscal year.

The bill would make related and technical changes.

Since a violation of the requirements for facilities eligible to operate under a standardized permit is a crime, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1160 (SB 1747) Calderon. Hazardous waste: enforcement.

(1) Existing law requires the Department of Toxic Substances Control, any local health officer, or any designated local public officer to enforce the standards in the hazardous waste control laws and the regulations adopted to implement those laws. Existing law authorizes the department or officer to issue an order specifying a schedule for compliance or correction for violations of those standards and regulations and imposing an administrative penalty. The department is required to take into consideration, in an order proposing a penalty, the nature, circumstances, extent, and gravity of the violation, certain factors concerning the violator's past and present efforts, the violator's ability to pay the proposed civil penalty, and the effect of the imposition of the proposed

NOTE: Superior numbers appear as a separate section at the end of the digests.

penalty.

This bill would delete the requirement that the department take into account those specified factors when issuing an administrative penalty.

The bill would require the department to enforce the hazardous waste laws so that hazardous waste generators, transporters, and operators of hazardous waste treatment, storage, transfer, and disposal facilities, are treated equally and consistently with regard to the same types of violations.

(2) Existing law allows any authorized representative of the department or of the local health officer to enter and inspect a factory, plant, construction site, disposal site, transfer facility, or any establishment or any other place or environment where hazardous wastes are stored, handled, processed, disposed of, or being treated to recover resources. The inspector is required to prepare a report listing any violations found during the inspection and to provide the report to the operator. A violation of the hazardous waste control law is a crime.

This bill would additionally require the inspector, at the conclusion of the inspection, to deliver to the operator of the site or facility a written summary of all violations alleged by the inspector, to prepare an inspection report, as specified, and provide the operator with the inspection report and specified information not later than 65 days after the inspection, unless that time period is extended for specified reasons. The bill would require the department to discuss the inspection report with the operator, and, upon the request of the operator, review the inspection report and determine whether the operator's responses and documented or proposed corrective actions would be sufficient to comply with the hazardous waste laws.

The bill would require the operator of the site or facility that receives an inspection report to submit a written response to the department in a specified time period, thereby imposing a state-mandated local program by creating a new crime. The bill would require the department, upon receiving the written response, from the operator, to meet and confer with the operator. The department would also be required to determine whether any corrective actions documented or proposed to be taken by the operator would achieve compliance, and would require the department to deem the corrective actions documented or proposed to be taken by the operator to be in compliance, if the department fails to make that determination within a specified time period.

(3) Existing law requires the department to comply with specified procedures with regard to the public disclosure of photographs taken during an inspection.

This bill would include specified information gathered during an inspection within the public disclosure requirements.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1161 (SB 1759) Kopp. Pharmacy.

Existing law, the Pharmacy Law, provides for the licensing and regulation of pharmacies and pharmacists. It describes some of the functions that a registered pharmacist may perform, including some functions that may only be performed in a licensed health care facility, as defined.

This bill would provide that a registered pharmacist would not be prohibited from performing certain functions , as part of the care provided by certain unlicensed facilities operated by a health care service plan, or by a licensed clinic, or a provider who contracts with a licensed health care service plan, in accordance with policies, procedures, or protocols of that facility, clinic, or health care service plan developed by health professionals, provided that the pharmacist has successfully completed clinical residency training or demonstrated clinical experience in direct patient care delivery. It would require that these policies, procedures, or protocols include requirements that the medical records of the patient be available to both the patient's prescriber and the licensed pharmacist, that the procedures to be performed by a licensed physician relate to a condition for which the patient has already seen a physician and surgeon, and that in

NOTE: Superior numbers appear as a separate section at the end of the digests.

certain instances the pharmacist function as part of a multidisciplinary group that includes physicians and surgeons and direct care registered nurses.

This bill would incorporate additional changes in Section 4046 of the Business and Professions Code, proposed by AB 3173, to be operative only if AB 3173 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 1162 (AB 3204) Cannella. Air pollution: emission reductions: closed military bases.

(1) Existing law requires air pollution control districts and air quality management districts to establish a system by which reductions in air contaminant emissions may be banked and used to offset future emission increases.

This bill would prescribe procedures by which the federal government or a base reuse authority, as specified, may apply to a district for registration, certification, or other approval of any emission reductions related to the termination or reduction of operations at a military base, as specified. The bill would require a district to quantify and bank the emission reductions for a closing or realigning military base within 180 days of a request by a base reuse authority and the payment of applicable fees, if specified events occur, thereby imposing a state-mandated local program.

(2) Existing law requires district plans to achieve and maintain state ambient air quality standards to consider specified factors.

This bill would require the district plans to consider reuse plans for closing military bases, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1163 (AB 253) Bronshvag. Capital Access Loan Program.

(1) Existing law establishes the Capital Access Loan Program, administered by the California Pollution Control Financing Authority. For purposes of the program, a qualified business means a small business concern that is a specified entity with its primary business location in the state with operations that affect the environment, as specified.

This bill would delete the qualification that the small business have operations that affect the environment and instead specify that the contract between the authority and a participating financial institution require that a business loan under the program that receives matching contributions from the Small Business Assistance Fund, created by the authority, be to a business that has operations affecting the environment.

(2) Under existing law, a financial institution participating in the program is required to deliver prescribed fees to the authority for deposit in a loss reserve account. The authority is required to deposit in the account an amount equal to 150% of those fees if the qualified business is located within a severely affected community.

This bill would impose that 150% deposit requirement additionally in the case of an area, as designated by the executive director of the authority, that is contiguous to the boundaries of a military base designated for closure and in the case of an industry affected by defense or aerospace downsizing.

(3) This bill would also authorize any individual, company, corporation, institution, utility, government agency, or other entity, including any consortium of these persons or entities, to participate in this program by depositing funds in a designated account under terms and conditions deemed appropriate by the authority, and would redefine a financial institution for purposes of the program as including a consortium of financial institutions.

Ch. 1164 (AB 3651) Hauser. Housing: California Tax Credit Allocation Committee.

Under existing law, the California Tax Credit Allocation Committee administers the state low-income housing tax credit program until authority for this program is repealed on January 1, 1995. Under existing law, the state agency known as the California Housing

NOTE: Superior numbers appear as a separate section at the end of the digests.

Finance Agency has various functions in connection with this program.

This bill would delay the repeal date for the state low-income housing tax credit program until January 1, 2000. The bill would also make numerous technical and conforming changes in the law relating to the California Tax Credit Allocation Committee.

This bill would provide that any references to the California Housing Finance Agency are deemed to refer to the California Housing and Infrastructure Finance Agency, only if Chapter 94 of the Statutes of 1994 becomes operative.

Ch. 1165 (AB 3759) Gotch. Military Base Reuse Authority Act.

Existing law generally authorizes cities and counties to plan and control land use within their jurisdictions.

This bill would enact the Military Base Reuse Authority Act to authorize counties and cities located wholly or partly within the boundaries of a military base to establish a military base reuse authority to prepare, adopt, finance, and implement a plan for the future use and development of the territory occupied by the military base. The authority would be governed by a board consisting of one member from each county and city within the territory of the military base.

This bill would authorize the board to acquire and dispose of existing real property and facilities within the territory of the military base, to plan, finance, and construct new public capital facilities within that territory, and to levy assessments, reassessments, special taxes, or development fees and to issue bonds to finance projects in accordance with specified state statutes.

The bill would require a county or city with territory occupied by a base for which an authority has adopted a reuse plan to submit to the authority, for approval, general plans, zoning ordinances, and other actions necessary for implementing the reuse plan.

This bill would require each agency represented by a board member to contribute annually to the authority an unspecified amount. The bill would authorize the board and member agencies to provide by contract for the transfer to the board or between member agencies of revenues available from sales tax, property tax, or other sources in order to help finance the cost of paying for services or capital facilities to serve or enhance the development of the military base.

This bill would provide that a military base reuse authority shall cease to exist when the board determines that 80% of the territory of the military base that is designated for development or reuse in the plan prepared pursuant to the bill has been developed or reused in a manner consistent with the plan, or 20 years after the creation of the authority, whichever occurs first.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1166 (AB 786) Hannigan. Local government.

AB 3759 of the 1993–94 Regular Session would, if enacted, enact the Military Base Reuse Authority Act to authorize counties and cities located wholly or partly within the boundaries of a military base to establish a military base reuse authority, to be governed by a board consisting of representatives of each county and city within the territory of the military base.

This bill would further define the territory and responsibilities of those legislative bodies that must approve the formation of a military base reuse authority, those territories represented on an authority's governing board, and exemptions for local agencies that do not act in favor of establishing an authority. This bill would also state the intent of the Legislature with respect to the use of the California Conservation Corps by the board of a military base reuse authority in performing certain duties. This bill would provide that these modifications and statements of intent shall not become operative unless AB 3759 of the Regular Session becomes operative to add certain provisions, and in that event, would become operative on the same date.

Existing property tax law authorizes counties to adopt an alternative method for the distribution of secured roll property tax levies pursuant to a resolution of the board of supervisors that is adopted no later than July 15 of the fiscal year to which it is to first apply, except that the resolution may be adopted as late as October 15 with respect to the 1993–94 fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would apply the October 15 deadline for the adoption of a resolution to the 1994–95 fiscal year.

Existing property tax law establishes in each county that adopts the alternative distribution method a tax losses reserve fund to be used to cover losses that may occur with respect to special sales of tax-defaulted property. It provides that amounts otherwise to be deposited in this fund may be credited to the county general fund where the amount in that reserve fund exceeds in any fiscal year either 3% of the total of all taxes and assessments levied on the secured roll for that fiscal year or 50% of the total delinquent secured taxes and assessments for that fiscal year.

This bill would apply both of these percentages to the relevant totals of taxes and assessments levied only with respect to entities in the county that are participating in the alternative distribution method.

Existing property tax law requires, for purposes of determining property tax revenue allocations in each county for the 1993–94 fiscal year, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education in accordance with certain limitations.

This bill would provide, for the 1994–95 fiscal year, that the property tax revenue allocation reduction for a county that is attributable to the amount of the reduction determined for that county for the 1993–94 fiscal year, be reduced by the amount of increased allocations made in the 1994–95 fiscal year to certain educational entities as a result of that county having first adopted the alternative distribution method described by this bill for the 1994–95 fiscal year.

This bill would require the auditor for the County of Marin, commencing with the 1993–94 fiscal year, to apply certain remaining amounts in the Educational Revenue Augmentation Fund that, as a result of allocation limitations, may not be allocated to community college districts, to reduce the amount of the reductions calculated for the county, cities, and special districts in proportion to the amount of the reduction calculated for each of those agencies. By imposing new duties in the allocation of property tax revenues, this bill would impose a state-mandated local program.

Existing property tax law authorizes each county, pursuant to a specified formula, to recover its costs of administering the property tax within its jurisdiction.

This bill would provide that no amount appropriated to the counties for purposes of property tax administration in the Budget Act of 1994 or any subsequent budget act shall result in any deduction from those property tax administrative costs that are eligible for reimbursement.

The San Bernardino County Flood Control Act specifies the boundaries of various zones established for purposes of that act.

This bill would establish a public hearing requirement with respect to changing the boundaries of any of those zones.

This bill would make legislative findings as to the necessity of a special statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1167 (AB 3347) Gotch. Property taxation: revenue allocation.

Existing property tax law establishes various procedures and requirements with respect to the annual allocation of ad valorem property tax revenues derived from the ad valorem taxation of both locally and state assessed property.

This bill would repeal and reenact those provisions with nonsubstantive technical and clarifying changes. It would contain a statement of legislative intent as to this repeal and reenactment, make related nonsubstantive, technical changes, and would provide that

NOTE: Superior numbers appear as a separate section at the end of the digests.

this bill is not to be construed as invalidating or otherwise affecting any act performed under, or any requirement of, prior law.

This bill would incorporate changes in Section 97.03 of the Revenue and Taxation Code, proposed by this bill and AB 2373, to be operative only if AB 2373 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate changes in Section 97.035 of the Revenue and Taxation Code, proposed by this bill and AB 3304 or AB 413, or both, to be operative only if AB 3304 and AB 413, or both, and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate changes in Section 97.09 of the Revenue and Taxation Code, proposed by AB 1905, to be operative only if AB 1905 and this bill are both chaptered and become effective on January 1, 1995, and this bill is chaptered last.

This bill would incorporate changes in Section 97.5 of the Revenue and Taxation Code, proposed by AB 786, to be operative only if AB 786 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate changes in Section 10 of Chapter 155 of the Statutes of 1994, proposed by SB 496, to be operative only if SB 496 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 97.091, proposed by AB 1905, to be effective only if AB 1905 and this bill are both chaptered and become effective on January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 98.65, proposed by AB 413, to be effective only if AB 413 and this bill are both chaptered and become effective on January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 97.092, proposed by SB 929, to be operative only if SB 929 and this bill are both chaptered and become effective on January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 97.032, proposed by AB 786, to be effective only if AB 786 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 97.033, proposed by AB 786, to be effective only if AB 786 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 97.037, proposed by SB 348, to be operative only if SB 348 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate the addition to the Revenue and Taxation Code of Section 97.031, proposed by SB 1648, to be effective only if AB 1648 and this bill are both chaptered and become effective on January 1, 1995, and this bill is chaptered last.

Ch. 1168 (SB 1035) Thompson. Mare Island Redevelopment Project Area.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities. The Community Redevelopment Law contains provisions authorizing the establishment of a redevelopment project area located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission and defining "affected taxing entity" for the purpose of a redevelopment area established thereby.

This bill would add to the Community Redevelopment Law a provision defining "affected taxing entities" to include, for the purposes of redevelopment project areas established, pursuant to the law, within the boundaries of a former military base, any local governmental taxing agency that will have service and administrative responsibilities within a proposed taxing area where there is no prior property tax assessment. The bill would authorize the establishment of a Mare Island Redevelopment Project Area. The bill would define the territory of the project area, and would specify the contents of the redevelopment plan. The bill would exempt the project area from specified requirements of the Community Redevelopment Law, and would require the prepara-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion of certain environmental documents. Because the bill would require the affected county to take specified actions with regard to the establishment of the redevelopment project area, the bill would constitute a state-mandated local program.

(2) The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique problems within the City of Vallejo that the bill is intended to remedy, a general statute within the meaning of a specified provision of the California Constitution cannot be made applicable and a special statute is necessary.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement is required for a specified reason.

Ch. 1169 (SB 1600) Mello. Redevelopment: Fort Ord Reuse Plan: Redevelopment Agency of Fort Ord.

(1) Existing law, known as the Mello-Roos Community Facilities Act of 1982, authorizes the formation of community facilities districts. An existing provision of the Mello-Roos Community Facilities Act of 1982 defines "landowner" or "owner of land" to exclude a public agency unless the land owned by the public agency would be subject to a special tax pursuant to a specified provision of the act.

This bill would expand this exclusion to include land owned by a public agency within the territory of a military base that is closed or is being closed.

(2) Existing law, known as the Fort Ord Reuse Authority Act, authorizes specified local agencies in Monterey County to establish the Fort Ord Reuse Authority to prepare, adopt, finance, and implement a plan for the future use and development of the territory occupied by the Fort Ord military base in Monterey County.

This bill would authorize the governing board of the Fort Ord Reuse Authority to determine, at a noticed public hearing, that the adoption of a Fort Ord Reuse Plan, or of a general plan or zoning ordinance consistent with the Fort Ord Reuse Plan, is not subject to the California Environmental Quality Act, under specified conditions. The bill would also authorize the board to prepare specified environmental documents in connection with the reuse of Fort Ord.

(3) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas of those communities known as project areas. The Community Redevelopment Law contains provisions authorizing the establishment of redevelopment project areas located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission.

This bill would authorize the establishment, by the governing board of the Fort Ord Reuse Authority, of a redevelopment agency, to be known as the Redevelopment Agency of Fort Ord, within the boundaries of the territory occupied by Fort Ord. Because this bill would require the County of Monterey to perform certain actions with regard to the establishment and funding of the Redevelopment Agency of Fort Ord, the bill would impose a state-mandated local program.

(4) The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, because of the unique circumstances applicable to the closure of Fort Ord in the County of Monterey, a general statute cannot be made applicable and this special statute is therefore necessary.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory provisions, and if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1170 (AB 3769) Weggeland. Redevelopment: March Air Force Base Redevelopment Project Area.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas of those communities known as project areas. The Community Redevelopment Law contains provisions authorizing the establishment of redevelopment project areas located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission. Existing law defines "affected taxing entity" for these purposes as any governmental taxing agency that levied a property tax, as specified.

This bill would expand the definition of "affected taxing entity" for these purposes to include specified local governmental taxing agencies in areas where there is no prior property tax assessment.

The bill would authorize the March Joint Powers Authority, which is composed of the County of Riverside, the City of Riverside, the City of Moreno Valley, and the City of Perris, to establish the March Joint Powers Redevelopment Agency and would authorize the agency to engage in redevelopment activities, as specified. The bill would define blight for purposes of the bill, and would specify the limitations on the redevelopment plan for the area, particularly with respect to the funding of the redevelopment project, the use of funds, housing requirements, and other programs the agency finds necessary to promote redevelopment of the project area.

The bill would authorize the redevelopment of certain territory outside the boundaries of March Air Force Base. Among the changes of this bill would be to revise the existing procedures for allocation of property tax revenues to school districts and community college districts, as those procedures apply to territory outside the boundaries of the military base but within the project area of the March Joint Powers Redevelopment Agency. This change would require reimbursement by the state to school districts and community college districts as necessary to maintain the minimum level of funding guaranteed by Section 8 of Article XVI of the California Constitution.

(2) The California Constitution requires that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would provide that, because of the unique circumstances with regard to the particular conditions of blight intrinsic to the realignment of March Air Force Base, a general statute cannot be made applicable, and a special statute is therefore necessary.

Ch. 1171 (AB 2981) Hannigan. Child care and development: contractors.

(1) Existing law refers to "agencies funded by the state preschool programs," in setting priorities for preschool services. Local educational agencies are authorized to subcontract with an appropriate public or private agency to operate a state preschool program and receive funds for the program.

This bill would clarify that, in addition to local educational agencies, various other public or private agencies may operate a state preschool program.

(2) Existing regulation requires child development contractors to be reimbursed for funds actually expended in providing child care services, as specified.

This bill would allow child care contractors to be reimbursed for, and retain, a reserve fund, up to a specified amount, from moneys earned but not expended, which reserve funds would only be expended for specified reimbursable allowable expenses.

(3) Existing regulations prohibit a child care contractor or provider from requiring or soliciting from families of children receiving child care and development services additional payments that would increase a family's costs of participation in a program, as specified.

This bill would allow contractors to require parents to provide diapers and to charge parents for field trip costs, under specified conditions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) This bill would incorporate additional changes in Section 8263 of the Education Code, proposed by AB 2869, to be operative only if AB 2869 and this bill are chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(5) This bill would incorporate additional changes in Section 8263 of the Education Code, proposed by AB 2971, to be operative only if AB 2971 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(6) This bill would incorporate additional changes in Section 8263 of the Education Code, proposed by AB 2869 and AB 2971, to be operative only if those bills and this bill are all chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

Ch. 1172 (AB 2971) O'Connell. Education.

(1) Existing law requires the Superintendent of Public Instruction, subject to the approval of the Director of Finance, to make a one-time adjustment to the base revenue limit of each school district or county office of education, upon request, for any fiscal year, as specified.

This bill would require the Superintendent of Public Instruction, at the request of a county superintendent of schools or school district, and with the approval of the Director of Finance, to calculate the days of attendance in schools and classes maintained by the county superintendent of schools or school district in a specified manner for the 1994–95 fiscal year as to county superintendents of schools and the 1993–94 fiscal year as to school districts, or any later fiscal year, and the succeeding fiscal years thereafter, to approve the request under specified circumstances, and verify the percentages to be calculated. The bill would also make conforming changes.

(2) Existing law defines "site supervisor" for purposes of the Child Care and Development Services Act and requires a site supervisor to meet the qualifications prescribed by the state licensing regulations for a child care center director.

This bill would provide that a person who meets the qualifications of a site supervisor under designated provisions of law is also qualified under this provision.

(3) Under the existing Child Care and Development Services Act, contractors providing services pursuant to specified contracts are prohibited from denying services to an otherwise eligible child on the basis of the child's disability, unless a certain condition is met.

This bill would delete the condition and, instead, would provide that these contractors are subject to the requirements of the Americans with Disabilities Act.

(4) Existing law specifies the order of priority for families who seek to receive state or federally subsidized child development services. Under these provisions, in order to promote continuity of services, a family that is enrolled in a state or federally funded child care and development program and that would otherwise be terminated because the family no longer meets specified criteria of the program is allowed to continue to receive services if the contractor is able to transfer the enrollment of the family to another program for which the family continues to be eligible.

This bill would instead provide that a family that would otherwise be terminated may continue to receive services in another state or federally funded child care and development program if the contractor is able to transfer the family's enrollment, as specified, or to exchange the family's existing enrollment with the enrollment of a family in another program, providing both families satisfy the requirements for the program in which they are being enrolled.

(5) Under existing law, approvals of programs for multitrack year-round scheduling terminate July 1, 1995.

This bill would delete this termination date.

(6) Existing law provides that the amount of funding otherwise calculated for a schoolsite that receives funding for a multitrack year-round education program, as specified, shall be reduced by the Superintendent of Public Instruction to reflect the extent to which the number of pupils certified for that schoolsite for the prior fiscal year is greater than the number of pupils in excess of the capacity of the schoolsite for that

NOTE: Superior numbers appear as a separate section at the end of the digests.

prior fiscal year.

This bill would instead provide that the amount of funding otherwise calculated shall be reduced to reflect the extent to which the number of pupils estimated for that schoolsite for the prior fiscal year is greater than the number of pupils certified in excess of the capacity of the schoolsite for that prior fiscal year. The bill would make other corresponding changes.

(7) Existing law requires the governing board of school districts and county offices of education to disseminate guidelines adopted by the State Board of Education concerning the filing of child abuse complaints by parents and guardians in the primary language of those parents or guardians.

This bill would codify existing law.

(8) Existing law provides a funding system for school improvement programs. As part of that system, the governing board of any school district that receives funds for school improvement programs in kindergarten and grades 1 to 6, inclusive, is authorized to elect to allocate the funds to any school or schools in the district for use in kindergarten and grades 1 to 6, inclusive, for the operation of school improvement programs.

This bill would specify that these school districts may elect to allocate the funds, excluding carryover reserves, on an equal per pupil basis.

(9) This bill would clarify an ambiguity with respect to the effect to be given to certain provisions dealing with special education that resulted from a technical defect in the language that controlled the operation of several double-jointed sections of the Education Code.

(10) Existing law prescribes a formula for the apportionment of funds for regional occupational centers and programs, based upon units of average daily attendance.

This bill would revise the formula by requiring that for the 1993–94 and 1994–95 fiscal years, the base average daily attendance for each regional occupational center or program shall be deemed to be the same as the 1992–93 fiscal year.

(11) Existing law requires the State Department of Social Services and the State Department of Education to coordinate their efforts and claim federal financial participation under Title IV-A of the Social Security Act (Title IV-A) for the provision of specified child care and development services to families eligible for assistance under the Aid to Families with Dependent Children (AFDC) program. Funds received under Title IV-A are to be expended to support specified costs, services, programs, and recipients, including all other AFDC recipients.

This bill would specify that Title IV-A funds are to be expended on all other AFDC recipients who meet the eligibility criteria for federally funded Title IV-A child care.

(12) Existing law appropriates from the General Fund to the Superintendent of Public Instruction a specified item of the Budget Act of 1992.

This bill would, under certain circumstances, reappropriate $656,252 of the aforementioned appropriation to specified items of the Budget Act of 1987, the Budget Act of 1988, and the Budget Act of 1989.

(13) This bill would appropriate $250,000 from the Proposition 98 Reversion Account to the Department of Justice to pay any judgment or settlement claim in a specified case involving the Richmond Unified School District, and would provide for the reversion of any excess amount appropriated.

(14) This bill would eliminate a provision in an item of the Budget Act of 1994 regarding the reporting of instructional personnel services units serving infants, except as otherwise provided.

(15) This bill would incorporate additional changes in Section 8263 of the Education Code, proposed by AB 2869, to be operative only if AB 2869 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(16) This bill would incorporate additional changes in Section 8263 of the Education Code, proposed by AB 2981, to be operative only if AB 2981 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(17) This bill would incorporate additional changes in Section 8263 of the Education

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Code, proposed by both AB 2869 and AB 2981, to be operative only if those bills and this bill are all chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(18) This bill would incorporate changes in Section 56365 of the Education Code, proposed by AB 3793, to be operative only if AB 3793 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(19) This bill would incorporate changes in Section 56366 of the Education Code, proposed by AB 1250, to be operative only if AB 1250 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(20) This bill would incorporate changes in Section 56366.2 of the Education Code, proposed by AB 1250, to be operative only if AB 1250 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

(21) This bill would incorporate changes in Section 56740 of the Education Code, proposed by AB 1250, to be operative only if AB 1250 and this bill are both chaptered and this bill becomes effective on or before January 1, 1995, and this bill is chaptered last.

Ch. 1173 (AB 3182) Bates. Laboratory and office facilities.

(1) Existing law authorizes the Director of General Services to purchase or lease property for up to $2,000,000. Existing law authorizes the director, notwithstanding this $2,000,000 limit, to lease-purchase, or to lease with an option to purchase, real and other property to establish a laboratory and office facility in the City of Richmond for use by the State Department of Health Services.

Existing law authorizes the State Public Works Board to issue revenue bonds, negotiable notes, and negotiable bond anticipation notes to finance the acquisition, equipping, and remodeling of the laboratory and office facility not to exceed $43,000,000.

This bill would, instead, authorize these bonds not to exceed $54,000,000, to be used for the purposes of acquisition and construction of a new laboratory and office facility, or remodeling an existing facility including equipment and land needed for future expansion. By increasing amounts authorized to be deposited in a continuously appropriated fund, this bill would make an appropriation. This bill would permit the State Public Works Board to authorize the augmentation of the bond amount authorized but would require the amount of bonds to be sold equal the costs of land acquisition and facility design, construction, remodeling, and financing costs.

Existing law prohibits expenditure of funds appropriated for capital outlay until the Department of Finance and the board have approved preliminary plans for the project, requires deferral of augmentations in excess of 20% until the Legislature makes additional funds available, requires augmentations in excess of 10% of the amount appropriated for each capital outlay to be reported to the Legislature 20 days prior to board approval, and limits the use of augmentation to certain costs. Existing law specifically requires augmentations of these projects to be subject to those requirements.

This bill would delete the specific requirement that the augmentations comply with those requirements, and would, instead, provide that, notwithstanding those requirements, augmentations not exceeding 10% may be made.

Existing law requires the Director of Health Services to report to the Legislature regarding the acquisition and renovation of these facilities.

This bill would, instead, make these reporting requirements apply to the acquisition, construction, or remodeling of these facilities.

Existing law requires the Director of General Services to submit preliminary plans, specifications, and cost estimates to the Legislature.

This bill would delete this requirement.

Existing law continuously appropriates to the board, funds made available from any source for the purposes of acquiring, planning, equipping, and remodeling of the laboratory and office facility.

This bill would delete this appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the Treasurer to use or direct the use of the proceeds or earnings to pay any rebate, penalty, or other payment required under federal law or to take other action to maintain tax-exempt status of the bonds or to take any other advantage under federal law.

This bill would delete this authority.

Existing law appropriates, without regard to fiscal year, amounts necessary to pay rent for the facilities and equipment if the director certifies that the amounts required to pay this rent has not been appropriated in the Budget Act for that fiscal year.

This bill would delete this appropriation.

(2) This bill would, under prescribed conditions, require the State Department of Health Services to exchange specified real property with the Regents of the University of California for use as a site to construct the laboratory and office facility if approved by the Regents and the State Public Works Board. In the event the exchange is not approved, it would provide for the continued use of the real property as an additional state department facility or for its sale by the Department of General Services on behalf of the state department.

(3) Existing law authorizes the board to issue revenue bonds not to exceed $11,500,000 for the purposes of renovating, restoration, repair, improvement, and equipping of laboratory and office facilities in the City of Berkeley for the State Department of Health Services.

This bill would delete this authority, and would make conforming changes.

Ch. 1174 (AB 3535) Harvey. Agricultural land: preservation contracts.

Existing provisions of the Williamson Act authorize any city or county to enter into contracts, as provided, to limit the use of agricultural lands for the purposes of preserving those lands. Existing law also provides, as specified, for the nonrenewal or cancellation of those contracts, and for a report by the Department of Conservation to the Legislature on or before May 1 of each year regarding the implementation of the act by cities and counties.

This bill would require the report to be made on or before May 1 of every other year beginning in 1996 and would make corresponding changes in the content of the report.

Ch. 1175 (AB 1900) T. Friedman. Employment: minors.

Existing law provides a system for the imposition of criminal and civil sanctions against violators of the laws and regulations of the state relating to the employment of minors, as defined.

This bill, which would be known as the Omnibus Child Labor Reform Act of 1993, would, among other things, raise specified civil penalties for violations of certain laws regulating the employment of minors to conform to penalties imposed for violations of child labor laws under federal law. It would also make conforming changes with respect to state laws regulating the employment of minors under the age of 18 years in specified industries.

Existing law contains provisions regulating the employment and working hours of minors in specified industries.

This bill would alter existing prohibitions against the employment of minors to prohibit, among other things: a minor under the age of 12 years from being employed or permitted to work, or from accompanying an employed parent or guardian in specified agricultural occupations; a minor from being employed or permitted to work in any occupation declared particularly hazardous for employment of, or detrimental to the health or well-being of, minors between 16 and 18 years of age under specified provisions of federal law; a minor under the age of 16 years from being employed or permitted to work in any occupation declared particularly hazardous under specified provisions of federal law; a minor under the age of 16 years from being employed in an employment that does not meet the conditions and limitations of specified federal law respecting employment of minors between 14 and 16 years of age; and a minor under the age of 6 years from being permitted to engage in door-to-door or street sales of specified items. By altering the definition of certain crimes, creating certain new crimes, and increasing the penalties for certain existing crimes, this bill would impose a state-mandated local

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

program.

This bill would provide that specified prohibitions against the employment of minors shall not apply to minors in courses of training in vocational or manual training schools or state institutions, apprenticeship training programs or work experience education programs, as specified. It would provide that a specified prohibition against the employment of minors in agricultural employment, shall not apply to student-learners in a bona fide vocational agriculture program, or to minors 14 or 15 years of age who hold certificates of completion in tractor or machine operation programs and who are working in the occupations for which they have been trained, as specified. The bill would also add provisions permitting minors 16 or 17 years of age to work in gas service stations, with specified restrictions.

Existing law authorizes the Division of Labor Standards Enforcement, after a hearing, to determine whether any particular trade, process of manufacture, or occupation, in which the employment of minors under the age of 16 years is not already forbidden by law, or whether any particular method of carrying on the trade, process, or manufacture, or occupation is sufficiently dangerous to the lives or limbs or injurious to the health to justify their exclusion therefrom, and prohibits any minor under 16 years of age from being employed or permitted to work in any occupation determined to be dangerous or injurious to minors.

This bill would make these provisions relating to the employment of minors in dangerous occupations applicable to minors under 18 years of age.

Existing law requires that any fine or civil penalty collected under provisions regulating the employment of minors be paid into the State Treasury and credited to the General Fund.

This bill would instead require that of the total fines and civil penalties due under the provisions regulating the employment of minors the fines and penalties collected in judicial enforcement proceedings, with certain exceptions, be transmitted pursuant to court order to local prosecuting jurisdictions, the Department of Industrial Relations, and the State Treasury in specified percentages.

Existing law specifies criminal penalties, including fines, for violation of certain provisions of law specifying maximum work hours and other conditions respecting service of minors.

This bill would increase these fines by specified amounts.

Existing law contains restrictions on the employment of minors under the age of 16 years in specified types of door-to-door sales.

This bill, with certain exceptions, would require any adult, who accompanies or transports a minor under the age of 16 years, and any individual or business entity, as specified, who employs or uses a minor under the age of 16 years, in door-to-door sales, as defined, more than 10 miles beyond the minor's residence, to register with the Labor Commissioner and to carry proof of registration when engaging in the specified activities. This bill would require an applicant for registration to provide specified information to the Labor Commissioner and require the commissioner to investigate and make a determination as to whether the applicant is qualified for registration. The bill would impose a state-mandated local program by making violation of these registration provisions a misdemeanor punishable by specified fines.

This bill would also permit the Labor Commissioner to revoke, suspend, or refuse to renew any registration where it is shown that an applicant therefor, or registrant has, among other specified things, been found by a court of law, the Labor Commissioner, or the Secretary of Labor to have violated any provisions of law relating to the employment of minors with respect to the health and safety of minors under either state or federal law, as provided.

Existing law makes it a misdemeanor for every person who has a minor under his or her control, as a ward or an apprentice, and who, except in viticultural or horticultural pursuits or in domestic or household occupations, requires the minor to labor more than 8 hours in any one day.

This bill would, instead, make it a misdemeanor for every person who has a minor under his or her control, as a ward or an apprentice, and who, except in household

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

occupations, requires the minor to work more than 8 hours in any one day. By changing the definition of a crime, the bill would impose a state-mandated local program.

This bill would make various other changes with respect to the occupational privileges and restrictions and the working hours of minor employees, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1176 (AB 3760) Speier. Infant safety.

(1) Existing law imposes various safety requirements affecting children and infants, including playground safety requirements and requirements for child safety warning labels on industrial containers.

This bill would prohibit a commercial user from remanufacturing, selling, leasing, or placing in the stream of commerce, among other things, a full-size or non-full-size crib, as defined, that is unsafe for any infant using the crib. The bill would also express the Legislature's intent that informational materials regarding baby crib safety be available to consumers through the Department of Consumer Affairs.

This bill would provide that a full-size or non-full-size crib is unsafe when it does not conform to certain regulatory standards, or when it has specified dangerous features or characteristics. This bill would impose a state-mandated local program by providing misdemeanor penalties for the willful and knowing violation of these provisions by a commercial user, as defined. It would make a commercial user who violates these provisions subject to a civil action when a crib is unsafe for any infant using the crib. The bill would provide that these provisions do not apply to hotels, motels, or similar transient lodging until January 1, 1998.

(2) This bill would express the Legislature's intent to encourage public and private collaboration in developing instructional materials regarding shaken baby syndrome, and to encourage that these materials be provided to health facilities, midwives, and to the State Department of Social Services free of charge.

This bill would require health facilities and midwives to provide information and instructional materials relating to shaken baby syndrome, if available, free of charge to parents or guardians of newborns, and would require the State Department of Social Services to provide information and instructional materials, if available, free of charge to child care providers upon licensure and at the time of a site visit. The bill would not require persons or agencies to provide duplicative or redundant materials.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1177 (AB 472) Cortese. Discharge of waste.

(1) Existing law provides that it is unlawful for any person or firm to carry on or engage in the business of the cleaning of septic tanks, chemical toilets, cesspools, or sewage seepage pits, or to dispose of those cleanings in any city, county, or city and county, unless the person or firm holds an unrevoked registration issued by the local health officer, or his or her duly authorized representative, of the city, county, or city and county. Existing law requires the registration to be issued only after a satisfactory examination of the applicant's knowledge of the laws and ordinances affecting human health or nuisances. Existing law authorizes the local health officer, or his or her duly authorized representative, to require registrants to submit a statement providing certain information.

This bill would also require the statement to specify discharges of waste that may result in violation of those laws or ordinances required to be known by the registrant. The bill would also require the registrants to provide a statement of this type to the regional water quality control board.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law requires a regional water quality board to consider all relevant evidence in making a determination that discharge of waste from existing or new individual disposal systems or from community collection and disposal systems that utilize subsurface disposal should not be permitted.

This bill would require a board also to consider information provided to the board from a registrant, as described in (1).

(3) Existing law requires discharges to be permitted from individual disposal systems, under certain conditions, if an authorized public agency provides satisfactory assurance to the regional board that the systems will be appropriately designed, located, sized, spaced, constructed, and maintained.

This bill would define "authorized public agency" to mean a public agency having authority to ensure that systems are adequately designed, located, sized, spaced, constructed, and maintained. The bill would require an authorized public agency to notify the regional board if the systems are not adequately designed, located, sized, spaced, constructed, and maintained. The bill would impose a state-mandated local program by increasing the duties of local agencies.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, for certain costs, no reimbursement is required by this act for specified reasons.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1178 (SB 1969) Hughes. Teacher credentialing.

Existing law requires the Commission on Teacher Credentialing to issue certificates that authorize the holder to provide specified services to limited-English-proficient pupils.

This bill would authorize a teacher who holds a basic teaching credential to be assigned to provide specially designed content instruction delivered in English, as defined, if the teacher is a permanent employee or an employee of certain small school districts, and, prior to January 1, 1998, completes 45 hours, or an equivalent thereof, of certain staff development training, as specified.

This bill would require the commission to establish guidelines on that staff development no later than January 1, 1996. The bill would require that the guidelines and standards established by the commission require and maintain compliance with requirements mandated by federal law for purposes of assuring continued federal financial assistance.

This bill would authorize a teacher who has taught for at least 9 years in California public schools, provides a certain certification, and completes that staff development, to be assigned to provide instruction for English language development, as defined, in a self-contained classroom. A teacher who has taught for less than 9 years in California public schools, or who has taught for at least 9 years in California public schools but does not provide that certification, would be authorized to provide that instruction if he or she completes an additional 45 hours of specified staff development within 3 years of completing the initial 45 hours of staff development. A teacher who meets these requirements would be issued a specified certificate of completion by the school district or county office of education. By requiring school districts or county offices of education to issue a certificate of completion, the bill would create a state-mandated local program.

This bill would authorize a teacher pursuing this training to be provisionally assigned to provide instruction in that subject matter during the period in which the teacher is pursuing the training.

This bill would provide that a teacher who completes this staff development may use those hours of staff development to meet specified professional growth requirements.

This bill would authorize school districts to use funds received for the purposes of specified staff development and resource centers to provide that staff development

NOTE: Superior numbers appear as a separate section at the end of the digests.

training.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would also contain a declaration of legislative intent.

Ch. 1179 (SB 455) Presley. Air pollution: south coast district: market-based incentive program.

(1) Existing law authorizes air pollution control districts and air quality management districts to adopt market-based incentive programs to improve air quality.

This bill would require the South Coast Air Quality Management District to comply with specified requirements in the implementation of its market-based incentive program, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1180 (SB 1486) Peace. Career preparatory programs.

Existing law authorizes a county superintendent of schools or governing board of a school district maintaining any of grades 7, 8, and 9, to establish a program relating to prevocational education. Under existing law, the governing board of a school district may provide for the maintenance of Saturday and evening classes in vocational training, as specified. A school district participating in school-based categorical programs may also establish alternative education and work centers for school dropouts.

This bill would authorize any business, trade or professional association, union, or state or local governmental agency operating in the state to establish and operate career preparatory programs, as specified, that would provide a specified course of instruction to meet the requirements for graduation from high school and on-the-job training and instruction in specific vocational skills. An entity establishing and operating a career preparatory program would not be eligible for any moneys from the state or a school district to operate the program. Any pupil who has successfully completed his or her education through grade 10, with the written consent of his or her parent or guardian would be permitted to choose to follow either a college preparatory curriculum or a career preparatory program. A pupil enrolled in a career preparatory program is to receive a certificate of completion that would supplement a high school diploma. The bill would require the State Department of Education to adopt rules and regulations in relation to career preparatory programs.

Ch. 1181 (SB 1607) McCorquodale. Schools: postsecondary education.

(1) Existing law provides that an action to form a new community college district is initiated upon the filing of a petition with the appropriate county superintendent of schools signed by either a certain percentage of registered voters or a majority of the members of the governing board of each of the community college districts and of each of the high school or unified school districts located within the territory to be formed into the new district.

Existing law also requires each affected district governing board to set a date for a hearing on the petition which shall be within 60 days of the receipt of the petition. Among other things, existing law provides that no new district shall be formed unless a majority of the members of each affected district governing board sign a statement agreeing to all conditions of the formation at the hearings.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no new district shall be formed unless a majority of the members of a majority of the affected district governing boards, rather than a majority of the members of each affected district governing board, sign a statement agreeing to all conditions of the formation at the hearings. The bill would make other related changes.

(2) The bill also would establish, on a pilot basis, the Eastern Madera Education Center as an off-campus center of Kings River Community College within the State Center Community College District, as specified.

For these purposes the bill would require the Chancellor of the California Community Colleges to apportion to the district funds for enrollment growth equal to 90 full-time equivalent students (FTES) in the fiscal year 1995–96 at the statewide average funding rate per FTES, as specified.

The bill would require the governing board of the State Center Community College District to establish a local advisory committee and to consult regularly with the committee in matters relating to the operation of the center. Thus, the bill would impose a state-mandated local program.

Among other things, the bill would require the California Postsecondary Education Commission to evaluate the center and to submit its findings to appropriate committees of the Legislature and to the Governor no later than January 1, 2000.

These provisions would become inoperative on June 30, 2000, and as of January 1, 2001, would be repealed unless a later enacted statute deletes or extends that date.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

(4) The bill would become operative on the July 1 following the date on which the bill takes effect.

Ch. 1182 (SB 1849) Greene. Education: teacher preparation programs and allocation of federal funds for education.

(1) Under existing law, various duties are imposed on the Commission on Teacher Credentialing.

This bill would require the Commission on Teacher Credentialing to conduct a study of teacher preparation programs to assess the extent to which those programs prepare candidates for teaching credentials to teach critical thinking and problem-solving skills to pupils who are in kindergarten and grades 1 to 12, inclusive. The bill would require the commission to submit a written report, based on the results of the study, on or before November 1, 1995, to a specified special committee and to specified committees of the Legislature.

This bill would appropriate $20,000 to the Commission on Teacher Credentialing for the 1994–95 fiscal year, for the purposes of staff costs associated with the commission.

(2) Under existing federal law, a state educational agency that receives a specified allotment of federal funds is required to develop and implement a state improvement plan for the improvement of elementary and secondary education in the state.

This bill would prohibit the State Department of Education from soliciting applications for the award of designated federal funds prior to February 28, 1995.

This bill would state that it is the intent of the Legislature to provide additional time for public notice of, and input in, the development of the state plan to adopt content and performance standards, as specified, to increase the amount of information and time available to school districts for the development of plans to meet those standards, and to give the State Department of Education adequate time to develop a plan to distribute certain related federal funds, as specified.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1183 (AB 3466) Weggeland. Schools: portable classrooms.

Existing law authorizes the State Allocation Board to lease portable classrooms to school districts. The State Allocation Board is authorized to adopt rules to establish priorities for the leasing of classrooms and, under certain conditions, may authorize additional classrooms to be placed in a school district. However, after January 1, 1990, to qualify for a lease, a school district is required to submit a study examining the feasibility of implementing a year-round multitrack educational program, as specified. A school district must also furnish evidence to the State Allocation Board that the school district has no bond proceeds available to purchase classroom facilities.

This bill would, under certain conditions, require the State Allocation Board to authorize additional portable classrooms to be placed in any school district that requests the classrooms for the purpose of providing licensed child day care programs or recreation or enrichment activities or programs for schoolage children on a schoolsite. The bill would further provide that a school district may sublease any portable classroom obtained by the district for the purpose of providing licensed child day care programs or recreation or enrichment activities or programs for schoolage children to a private provider that has entered into a contract with the district to provide any child care and development program or programs or any recreation or enrichment activities or programs for schoolage children on a schoolsite. The bill would exempt from the reporting and bond requirements specified above leases or subleases for portable classrooms to provide licensed child day care programs or recreation or enrichment activities or programs for schoolage children.

Ch. 1184 (SB 569) Greene. School facilities.

Under existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976, no project shall be approved if the building area will provide a total area of school building construction per unit of estimated average daily attendance in excess of the maximum area allowed for that grade level. Existing law provides that the estimates of average daily attendance shall be based upon the number of family dwellings and mobilehome parks, under construction or newly constructed and never occupied in the district and the number of children residing in the district.

This bill would provide that the State Allocation Board (board) may use a master plan prepared by a district to determine the estimate of average daily attendance for an applicant school district if certain conditions are met including the condition that at least 60% of the total cost of the project shall be provided by funding sources other than any state program administered by the board.

Ch. 1185 (AB 3469) Bustamante. Child care: Migrant Family Day Care program.

Existing law authorizes the governing board of a school district to establish and maintain child care and development programs upon the approval of, and subject to the regulations of, the Superintendent of Public Instruction. Existing law authorizes the governing board of a school district or a county office of education to offer educational opportunities through independent study that include volunteer community service activities that support and strengthen pupil achievement. Existing law also authorizes the governing board of a school district that maintains secondary schools to establish and maintain community service classes, as specified. Existing law provides for migrant child care and development programs, a state master plan for services to migrant children, and migrant education programs that are to be implemented through a service regional system.

This bill would require the Superintendent of Public Instruction to establish, as specified, a 3-year child care pilot program to serve migrant children from the time of their birth to the time of their enrollment in kindergarten. The bill would require the superintendent to: (1) issue a request for applications from eligible school districts, county offices of education, nonprofit entities, public entities, or consortia thereof, (2) consult with migrant parents, school districts, county offices of education, nonprofit entities, or public entities to develop the design of a model pilot program, and (3) fund the program with the design that best meets the needs of the persons to be served and that provides the most comprehensive educational component. The bill would require the school

NOTE: Superior numbers appear as a separate section at the end of the digests.

district, county office of education, nonprofit entity, or public entity selected to implement the program to collect data and prepare a report for the Legislature pertaining to the implementation of the program, as specified.

The bill would require that any funds apportioned by the Superintendent of Public Instruction for the pilot program be used in conformity with a provision of the Constitution of the State of California that prohibits the use of public money for the support of any sectarian or denominational school, or any school not under the exclusive control of the officers of the public schools. The bill would state the intent of the Legislature that the superintendent explore all available sources of funding for the pilot program, develop a funding proposal for approval by the Department of Finance, and report his or her findings by March 1, 1995, as specified.

Ch. 1186 (SB 1537) Thompson. Reorganization of school districts.

(1) Existing law authorizes a county committee on school district organization, except as specified, to establish, rearrange the boundaries of, and abolish trustee areas and make specified changes to the governing boards of school districts. Under existing law, a resolution of the county committee approving a proposal to establish or abolish trustee areas or to make specified changes to the governing boards of school districts constitutes an order of election, as specified.

This bill would additionally authorize the county committee on school district organization to establish a common governing board for a high school district and an elementary school district within the boundaries of the high school district by presenting the issue to the qualified registered voters within those boundaries, as specified. This bill would provide that a resolution of the county committee approving a proposal to establish a common governing board for a high school district and an elementary school district within the boundaries of the high school district shall constitute an order of election. The proposal would then be presented to the electors of the district on the ballot, as specified.

(2) Existing law provides a procedure for the reorganization of school districts. That law contains provisions relating to the territory of school districts, including a requirement that, whenever the boundaries of an elementary school district and a high school district become coterminous, the districts are merged into a new unified school district.

This bill would provide that an elementary school district with boundaries that are totally within a high school district may be excluded from an action to unify both of the districts upon approval of the exclusion by the State Board of Education. Any elementary school district authorized by the State Board of Education to be excluded from an action to unify would continue to feed into the coterminous high school under the same terms that existed before any unification action.

(3) Existing law requires that, except for petitions for the transfer of territory, the county committee on school district organization transmit a petition to reorganize one or more school districts along with its recommendations to the State Board of Education.

This bill would require that petitions for transfers of territory be transmitted by the county superintendent of schools to the county committee and the State Board of Education.

(4) Existing law requires a proposal for reorganization of school districts to include a computation of the revenue limit per unit of average daily attendance, as specified.

This bill would revise and recast the formula for computing the base revenue limit per unit of average daily attendance for newly organized school districts. The county superintendent of schools would be required to make that computation for a proposal to reorganize or to transfer territory. The State Department of Education would be required to make that calculation for a proposal for unification or in an appeal of a transfer of territory.

This bill would set forth a formula for computing the base revenue limit per unit of average daily attendance for newly organized school districts that is based upon the total of (A) the amount of the blended revenue limit per unit of average daily attendance of the school districts affected by the reorganization, (B) an amount based on salaries and benefits of classified employees, (C) an amount based on salaries and benefits of certificated employees, and (D) the amount of a specified inflation adjustment and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

other specified adjustments. The bill would authorize the Superintendent of Public Instruction to make adjustments to the base revenue limit per unit of average daily attendance of a newly organized district, as specified, consistent with that formula.

This bill would require the county superintendent of schools to include within a specified audit of school district fiscal practices, an audit of the information used to calculate the base revenue limit per unit of average daily attendance for that district. The bill would require the county superintendent of schools to request the Superintendent of Public Instruction to withhold certain amounts from the base revenue limit apportionments for a newly organized school district if the school district fails to provide the school facilities necessary to provide instructional services by employees of the district to pupils who are residents of the newly organized school district. The base revenue limit per unit of average daily attendance of the reorganized school district would be increased by all or a portion of the amounts withheld in each fiscal year that the school district provides school facilities for all or a portion of those pupils according to a specified formula. The bill would require the county superintendent of schools to inform the Superintendent of Public Instruction of the extent to which the district is complying with the proposal approved by the State Board of Education for the purpose of making those adjustments.

This bill would prohibit the State Board of Education from waiving these provisions pursuant to its general waiver authority and would prohibit the Superintendent of Public Instruction from waiving these provisions.

(5) Existing law authorizes the State Board of Education to approve proposals for the reorganization of school districts if specified conditions are substantially met, including, among other conditions, that the proposed reorganization will not negatively affect the fiscal status or management of the proposed district or any district affected by the reorganization.

This bill would revise that condition to state that the proposed reorganization will not cause a substantial negative effect on the fiscal status or fiscal management of those districts.

(6) This bill would also make various technical changes to provisions relating to the reorganization of school districts.

(7) Existing law authorizes school districts to lapse if there are no school facilities or sites on which to maintain any school in the district.

This bill would require the county committee on school district organization, upon direction from the State Board of Education, to initiate lapsation procedures or revert the reorganized district to its original status if 5 years from the date of reorganization the newly organized school district has been unable to provide school facilities, as specified.

(8) Existing law provides that if the Superintendent of Public Instruction determines that as a result of a unification or other reorganization of a school district or the change of school district boundaries, a school district does not have suitable quarters in which to maintain school for all the day pupils of the district, or for other specified reasons, the governing board of the district of residence must contract with the governing board of another school district for the education of pupils that it cannot provide suitable quarters to. That contract may not be authorized beyond the close of the third fiscal year following the formation or reorganization of the district or the change in boundaries. The contract must provide for the payment of tuition by the district of residence to the district of attendance, as specified. The average daily attendance of all pupils attending school in a district in which they do not reside is required to be credited to the district of residence for apportionment purposes.

This bill would delete the requirement that the contract not be authorized beyond the close of the third fiscal year and the provisions relating to payment of tuition and the credit of average daily attendance to the district of residence. The bill would also repeal related provisions of law governing the admission of pupils into another district for that 3-year period. The bill would also provide that, except as specified, the average daily attendance of all pupils attending school in a district other than the district in which they reside pursuant to such a contract shall be credited to the district of attend-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ance for apportionment purposes. The bill would provide that these provisions do not apply to any school district reorganization proposal approved by the State Board of Education on or before December 31, 1994.

(9) Existing law authorizes the children residing in any newly formed district, in any district whose boundaries have been changed, or in any joint district, to attend the school in the district or district from which the newly formed district was constituted until the first day of July next succeeding the formation or change.

This bill would repeal that provision.

(10) This bill would incorporate additional changes in Section 33050 of the Education Code, proposed by SB 33, AB 2457, AB 3399, and AB 3516, to be operative only if SB 33, or AB 2457, or AB 3399, or AB 3516, or any combination thereof, are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

(11) This bill, by placing new responsibilities on the county superintendent of schools, relating to audits and information reported to the Superintendent of Public Instruction, would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1187 (AB 3205) Knight. Money laundering.

Existing law provides that any person who conducts or attempts to conduct a money laundering transaction, as described, shall be punished by imprisonment in a county jail for not more than one year or in the state prison, by a specified fine, or by both.

This bill would modify or add the definitions of the terms "financial institution," "monetary instrument," and "foreign bank draft" for purposes of applying money laundering provisions. By changing the definition of a crime, this bill would impose a state-mandated local program. This bill would also provide for the enhancement of a felony sentence for money laundering by certain additional periods of years in the state prison, each of which is applied with respect to a certain threshold amount of money involved in the offense or offenses.

Existing law requires the reporting and recording of certain monetary instrument transactions in order to assist criminal investigations or proceedings, and defines various terms for purposes of those requirements, including the terms "financial institution" and "monetary instrument."

This bill would modify the definitions of these terms and define the term "currency" to conform to definitions established under related federal law. It would also specify that a person may be in violation of state reporting and recording requirements where that person violates certain requirements of that related federal law. By changing the definition of a crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 1170.1 of the Penal Code proposed by SB 59 or SB 1997, or both, to be operative only if SB 59 or SB 1997, or both, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1188 (SB 59) McCorquodale. Sex offenses.

Existing law defines the term "consent" for the purpose of prosecuting designated sex offenses where consent is at issue and provides that a current or previous dating relation-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

ship is not sufficient to constitute consent where consent is at issue in those prosecutions.

This bill would add the offense of spousal rape, as defined, to the list of designated sex offenses for this purpose and provide that a current or previous marital relationship is not sufficient to constitute consent where consent is at issue.

Existing law provides that in the case in which the defendant, voluntarily acting in concert with another person, by force or violence and against the will of the victim, commits specified sex offenses, either personally or by aiding and abetting the other person, that fact shall be charged in the indictment or information and if found to be true, as specified, or admitted by the defendant, the defendant shall be punished by confinement in the state prison for 5, 7, or 9 years.

This bill would add the offense of spousal rape, as defined, to the list of specified sex offenses for the purposes of this provision.

Existing law makes it a crime for any person to induce another person, other than the spouse of the perpetrator, to engage in various sexual activities, including sexual intercourse, when his or her consent is procured by false or fraudulent representation or pretense that is made with the intent to create fear, and which does induce fear, under specified circumstances.

This bill would delete the exception with respect to the spouse of the perpetrator. By expanding the scope of an existing crime this bill would create a state-mandated local program.

Existing law defines domestic violence shelter, for purposes of a provision making it a misdemeanor to, among other things, maliciously publish the location of any shelter, as a confidential location which provides emergency housing on a 24-hour basis for victims of sexual assault and spousal abuse.

This bill would add spousal rape to the list of specified offenses included within sexual assault and spousal abuse.

Under existing law, a person shall be released on bail except with respect to, among other things, felony offenses involving acts of violence, as specified. Existing law specifies that specified sexual offenses are deemed to be offenses involving acts of violence for these purposes.

This bill would include the offense of spousal rape as an offense deemed to be an offense involving acts of violence for the above-specified purposes.

Existing law defines the term "violent felony" for the purpose of enhancing the prison terms for new offenses because of prior prison terms.

This bill would add the offense of spousal rape, where it is accomplished against a person's will by means of force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the person or another, or where it is accomplished against the victim's will by threatening to retaliate in the future against the victim or any other person and there is a reasonable possibility that the perpetrator will execute the threat, to the list of felonies constituting a violent felony for this purpose.

Existing law provides for one-year to 10-year enhancements for persons convicted of specified sexual or violent offenses under specified circumstances.

This bill would include the offense of spousal rape in the enumerated list of sex offenses in which the above enhancements may be imposed.

Existing law provides that the aggregate term of imprisonment that may be imposed when a person is convicted of 2 or more felonies and a consecutive term of imprisonment is imposed, as specified, shall be the sum of the principal term, the subordinate term, and any additional term imposed, as specified. Existing law provides that in lieu of the term imposed pursuant to the above-stated restriction, a full, separate, and consecutive term may, and in some instances shall, be imposed for each violation of enumerated sex offenses, as specified. In those instances, the terms shall be served consecutively to any other term of imprisonment, and other terms shall commence from the time the person would otherwise have been released from imprisonment.

This bill would include the offense of spousal rape in the enumerated list of sex offenses in which a full, separate, and consecutive term may, or in some instances, shall be imposed.

Under existing law, all criminal actions in which any person is a victim of an alleged

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

violation of specified sexual offenses committed by the use of force, violence, or threat of violence, shall be given precedence in the order of trial.

This bill would add spousal rape to the list of specified sex offenses for the purposes of this provision.

Existing law prohibits use of the term "unchaste character" by any court in any instruction to the jury in any criminal case in which the defendant is charged with rape or statutory rape.

This bill would add spousal rape to the list of specified sex offenses for the purposes of this provision.

Existing law provides that the number of enhancements that may be imposed for any violation of specified violent sex offenses shall not be limited.

This bill would add the offense of spousal rape, as specified, to the list of specified sex offenses for the purposes of this provision.

Existing law provides that upon a plea of guilty or no contest to a felony charge, other than specified violent sex offenses, the plea may specify the punishment to the same extent as it may be specified by the jury or fixed by the court, as specified.

This bill would add the offense of spousal rape, as specified, to the list of specified violent sex offenses excepted from this provision.

Existing law provides that, among other things, probation shall not be granted to, nor shall the sentence be suspended for, any person convicted of specified violent offenses under specified circumstances.

This bill would add the offense of spousal rape, as specified, to the list of specified violent offenses to which the above restriction applies.

Existing law provides that outpatient status shall not be granted to any person found not guilty by reason of insanity of specified violent offenses including, among others, murder, until that person has actually been confined for 180 days or more.

This bill would add spousal rape, as specified, to the list of specified violent felonies for purposes of this provision.

Under existing law, any person convicted of a specified felony offense including, among others, murder or voluntary manslaughter, and who has been previously convicted 2 or more times and served 2 or more prior prison terms, as specified, is ineligible to earn credit on his or her term of imprisonment.

This bill would add spousal rape, as specified, to the enumerated list of felony offenses to which this provision applies.

Existing law provides that any confinement imposed pursuant to a revocation of parole shall not exceed 12 months in the absence of a conviction and commitment pursuant to other provisions of law. Any revocation period of confinement may be reduced by worktime credits, as specified, except specified parolees shall not be eligible for credit.

This bill would provide that parolees whose parole was revoked for conduct that could be prosecuted as spousal rape, as specified, shall not be eligible for credit pursuant to this provision.

This bill would incorporate additional changes in Section 667.8 of the Penal Code proposed by AB 19 (1st Ex. Sess.), to be operative only if AB 19 and this bill are both enacted and become effective as specified, and this bill is enacted last.

This bill would incorporate additional changes in Section 1170.1 of the Penal Code proposed by AB 3205 or SB 1997, or both, to be operative only if AB 3205 or SB 1997, or both, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

The bill also would incorporate additional changes in Sections 667.9, 1203.075, 1203.09, and 1601 of the Penal Code proposed by SB 1436 (Ch. 224, Stats. 1994).

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1189 (SB 1545) Senate Committee on Elections and Reapportionment. Elections: voting.

(1) Existing law requires the Secretary of State to mail ballot pamphlets to voters, in those instances in which the county clerk uses data processing equipment to store the information set forth in the affidavits of registration, before the election at which measures contained in the ballot pamphlet are to be voted upon. Existing law requires this mailing to commence not more than 40 days before the election.

This bill would require that the mailing commence not less than 40 days before the election.

(2) The Truth in Endorsements Law prohibits a state party convention, state central committee, or county central committee from endorsing, supporting, or opposing any candidate for nomination by that party for partisan office in the direct primary election. Existing law also makes it a misdemeanor for any candidate in a primary election to claim official party endorsement.

The Truth in Endorsements Law also requires that every advertisement, bill, placard, pamphlet, or other printed or duplicated matter having reference to any candidate for nomination for partisan office in the direct primary election, which contains a statement or words to the effect that the candidate has been endorsed or is being supported by a political party, political party organization, or organization using as part of its name the name of a political organization, bear a notice to voters that the endorsement is by an unofficial political group, as specified. The United States Supreme Court, in the case of Eu v. San Francisco County Democratic Central Committee, 489 U.S. 214, has declared unconstitutional the provision that prohibits the endorsements, as well as the provision that makes it a misdemeanor for any candidate in a primary election to claim official party endorsement.

This bill would repeal these provisions, as well as specified related provisions.

(3) Existing law governs the conduct of elections at local precincts.

This bill would prohibit members of local precinct boards from displaying, distributing, or making available at the polling place any materials other than those required pursuant to this division without the express approval of the county elections official. Because a violation of this provision would be punishable by a fine not exceeding $1,000 or by imprisonment in the state prison for 16 months or 2 or 3 years, or by both fine and imprisonment, the bill would impose a state-mandated local program by creating a new crime.

(4) This bill would make identical changes to the Elections Code alternative to those proposed by this bill that would become operative only if this bill and SB 1547 are both chaptered, in which case specified provisions of this bill would not become operative.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1190 (SB 728) Presley. Prisons: experimental treatment of sex offenders: HIV testing.

(1) Existing law requires the State Department of Mental Health to develop a voluntary experimental treatment program for persons convicted of specified sex offenses, which shall remain operative until June 30, 1995.

This bill would extend the operation of this program to January 1, 1998.

(2) Existing law sets forth procedures for requiring HIV testing of an inmate of any state or local correctional institution, a person not in a correctional institution who has been arrested or taken into custody, and a person on probation or parole, and provides that those provisions shall remain operative only until July 1, 1994.

This bill would make those provisions operative in a city, county, or city and county only when its governing body adopts a resolution affirming that the provisions shall be operative in that city, county, or city and county, and would extend the operation of those provisions to July 1, 1999.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1191 (SB 1764) Thompson. Hazardous substances: petroleum underground storage tanks.

(1) Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, requires owners and operators of petroleum underground storage tanks to establish and maintain evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage arising from operating an underground storage tank. Existing law requires the level of financial responsibility to be at least $10,000 per occurrence, and at least $10,000 annual aggregate coverage for taking corrective action. Existing law requires every owner of an underground storage tank to pay a storage fee of six mills for each gallon of petroleum placed in an underground storage tank. The fees are required to be deposited in the Underground Storage Tank Cleanup Fund. The money in the fund may be expended by the State Water Resources Control Board, upon appropriation by the Legislature, for various purposes, including the payment of claims to aid owners and operators of petroleum underground storage tanks who take corrective action to clean up unauthorized releases from those tanks.

This bill would provide that owners or operators eligible for payment of a claim from the fund, with respect to which the tank is located at a residence or is not used for agricultural purposes, as specified, shall be deemed in compliance with the financial responsibility requirements. The bill would require a claimant who is a small business, a business that meets certain requirements, or a city, county, district, or nonprofit organization to obtain a level of financial responsibility of at least $5,000 for each occurrence and at least $5,000 annual aggregate coverage for taking corrective action. The bill would provide that these changes with regard to obtaining financial responsibility apply to all claimants with claims at sites that have not been completed.

The bill would require, when corrective action is required, that the owner, operator, or responsible party prepare a workplan which details the specific actions required to be taken to achieve the required corrective action, and would prescribe related matters.

The bill would require the board to convene an advisory committee by February 1, 1995, to conduct a review of the board's cleanup standards for corrective action and would require the board to adopt regulations by March 1, 1997, for local agencies and regional boards to follow in requiring corrective actions.

The bill would require every owner of an underground storage tank to pay a storage fee of one mill for each gallon of petroleum placed in an underground storage tank to the State Board of Equalization, for deposit in the fund, and would increase that fee to two mills as of January 1, 1996, and three mills as of January 1, 1997. Since a failure to pay the fee would be a crime, pursuant to other provisions of law, the bill would impose a state-mandated local program by creating new crimes.

(2) Under existing law, the board may, in specified circumstances, pay a claim for reimbursement of the costs of corrective actions or for compensating third parties for bodily injuries and property damages which exceed the level of required financial responsibility, but in an amount that does not exceed $990,000 for each occurrence.

This bill would raise that limit to $1,000,000 for each occurrence.

The bill would require a claimant who submits a claim to the board for the payment of professional engineering and geologic work to submit multiple proposals and fee estimates, and would require any claimant who submits a claim for payment to the board for remediation construction contracting work to submit multiple bids.

The bill would prohibit the board from rejecting any actual costs of corrective action in a claim solely on the basis that the invoices submitted fail to sufficiently detail the actual costs of corrective action work in the claim, if certain auxiliary documentation is provided, the costs are reasonably commensurate with similar corrective action work, and the invoices include certain information.

The board would be required to pay a claimant, within 60 days from the date of receipt of an invoice of expenditures, all costs specified in the workplan or related to compliance with an order. The bill would impose related duties on the board.

Since the bill would impose specified duties upon local agencies, the bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) The bill would become operative on July 1, 1995, except those provisions imposing a storage fee, which would become operative on January 1, 1995.

(4) The bill would incorporate additional changes in Section 25299.37 of the Health and Safety Code, proposed by AB 3673, to be operative only if AB 3673 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 1192 (SB 2050) Presley. Air pollution: vehicles.

(1) Existing law authorizes each air pollution control district and air quality management district to modify its emission reduction strategy if the State Air Resources Board makes a specified finding.

This bill would require the districts and the state board, for that purpose, to take into account specified district and state programs.

The bill would require the San Diego County Air Pollution Control District and the Ventura County Air Pollution Control District, in their triennial plan review, to determine the target pollution miles per vehicle, as defined, and to reduce that figure by 5% annually.

The bill would require a decal disclosing the smog index, as defined, for each vehicle, as determined by the state board, to be affixed to a new motor vehicle, except as specified, prior to the sale or registration of the vehicle. The bill would require certain information to be affixed to a used motor vehicle offered for sale by a dealer.

(2) Existing law requires the state board to adopt emission standards for used motor vehicles.

This bill would authorize the Bureau of Automotive Repair to develop, and require the bureau to make available to the public, a list of maintenance practices designed to improve a motor vehicle's operating efficiency, and would provide for reduction of the vehicle's smog index if a test shows that emissions are reduced.

The bill would require the Department of Consumer Affairs to develop a program to certify emissions retrofit devices, as defined.

These provisions would become inoperative upon a specified finding by the Environmental Protection Agency.

(3) Existing law defines "low-emission motor vehicle" for certain purposes in state law.

This bill would include in that definition a vehicle that has been modified by the use of an emissions retrofit device.

(4) Existing law requires the test at smog check stations to include specified items and establishes criteria for smog check stations to issue a certificate of compliance or a certificate of noncompliance.

This bill would establish additional criteria for the issuance of those certificates based on the target pollution miles of a motor vehicle. The bill would require the bureau to develop a program to visually confirm the operation of motor vehicle odometers at smog check stations, and to notify the smog check stations of the target pollution miles, as specified. The bill would, in the San Diego County District and in the Ventura County District, require the test at smog check stations to include determinations relating to the odometer and target pollution miles, and would require a smog check after one year if the prescribed mileage is exceeded.

(5) Existing law requires the department to develop and implement a repair subsidy program.

This bill would require the department to establish a retrofit subsidy program and the state board to establish an emissions credit exchange program, as specified.

(6) Existing law authorizes a district to levy a specified fee on motor vehicle registrations.

This bill would authorize the San Diego County District and the Ventura County District to increase that fee by $1 to implement the pilot program that would be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

established by the bill. The bill, except for that fee increase authority, would not become operative until those districts have sufficient funds to implement the pilot program, as specified.

(7) The bill would impose a state-mandated local program by imposing new duties on the districts, and by changing the definition of a crime relating to pollution control equipment of vehicles.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

(9) The bill, except as specified, would not become operative until a specified system for the electronic filing of certificates of compliance or noncompliance is determined by the department to be operational, as specified, and, except as specified, the bill would become inoperative 5 years from its operative date and be repealed on the January 1 following that inoperative date.

Ch. 1193 (AB 600) Speier. Liability: interference with health care.

Existing law establishes the crime of intentionally blocking the entrance or exit of a health care facility, place of worship, or school, as specified. Existing law also provides for the award of exemplary damages, in addition to actual damages, in certain civil actions where the defendant has been proven guilty of oppression, fraud, or malice.

This bill would make it unlawful, and specify it is the tort of commercial blockade, to intentionally prevent ingress or egress to or from a health care facility, as defined, or to disrupt the normal functioning of a health care facility, as specified. The bill would require the courts to safeguard the privacy of patients, licensed health care practitioners, and health care facility employees, clients, and customers, as specified.

Ch. 1194 (AB 1448) Rainey. Hazardous waste consolidation sites: transportation.

(1) Existing law requires any person producing a hazardous waste to provide the person who will transport the hazardous waste with an applicable manifest that is completed as required by the department. Existing law prohibits the transportation of hazardous waste by any person, unless the person holds a registration issued by the Department of Toxic Substances Control. A violation of the laws regulating hazardous waste is a crime.

Existing law defines the term "non-RCRA hazardous waste" as all hazardous waste regulated in the state other than RCRA hazardous waste, which is waste identified in specified federal regulations adopted pursuant to the Resource Conservation and Recovery Act of 1976.

This bill would make a statement of legislative intent and would define the terms "consolidation site" and "remote site." The bill would deem hazardous waste initially collected at a remote site and subsequently transported to a consolidation site to have been generated at the consolidation site, and would allow a generator to hold hazardous waste at the remote site where the waste is initially collected, or at another remote site operated by the generator, if the waste is a non-RCRA hazardous waste or not subject to RCRA, and if specified requirements are met. The bill would, subject to compliance with specified conditions, exempt a person who initially collects any such hazardous waste at a remote site and transports the hazardous waste to a consolidation site operated by the generator from complying with the requirements concerning possession of a manifest and registration as a hazardous waste transporter with regard to the hazardous waste. Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1195 (AB 1808) Areias. Emergency homeless shelters: state armories.

Existing law authorizes the Adjutant General, under the direction of the Governor, to make and enforce regulations for the government and control of state armories, as defined, for use by the state militia. It authorizes the Adjutant General to appoint a Community Advisory Committee to advise the Adjutant General on the use of state armories as shelters for the homeless.

This bill would require certain state armories to be made available to specified cities and counties for use by homeless persons for emergency shelter purposes during defined periods of the year. It would require participating counties or cities, in consultation with the Community Advisory Committee or, if no committee has been appointed, in consultation with the Adjutant General, to obtain from the Military Department a license to operate state armories as emergency shelters for homeless persons and to report to the Department of Economic Opportunity.

The bill would require the Military Department, the Department of Economic Opportunity, the Department of Housing and Community Development, and a representative of participating counties and cities to prepare an evaluation of the program for the temporary armory shelter and to report to the Governor and Legislature prior to March 15, 1997.

Ch. 1196 (AB 2949) Vasconcellos. California Highway Patrol: vehicles: registration and identification fees.

(1) Existing law imposes registration and license fees for the privilege of operating upon the public highways in this state any vehicle of a type that is subject to registration under the Vehicle Code. These fees are collected by the Department of Motor Vehicles and deposited to the credit of the Motor Vehicle Account in the State Transportation Fund.

This bill would impose an additional $1 registration fee upon every vehicle subject to registration. The bill would require all of the additional fees collected to be available, upon appropriation by the Legislature, for expenditure to offset the costs of increasing the uniformed field strength of the Department of the California Highway Patrol.

(2) Existing law requires, until January 1, 1995, the levy of a $1 fee to be paid at the time of issuance or renewal of identification of off-highway motor vehicles which are subject to identification under the Vehicle Code. Fees received pursuant to this levy are required to be deposited in the Motor Vehicle Account in the State Transportation Fund and, upon appropriation by the Legislature, to be expended to offset the costs of maintaining the uniformed field strength of the Department of the California Highway Patrol.

This bill would continue to require the levy of the $1 fee and the deposit of those fees in the Motor Vehicle Account. The bill would require the fees to be deposited in the account and to be available, upon appropriation by the Legislature, for expenditure to offset the costs of increasing the uniformed field strength of the department, as specified.

Ch. 1197 (AB 3080) Katz. Registration fees.

(1) Under existing law, in addition to the other fees imposed for the registration of a vehicle, an additional registration fee of $1, with certain exceptions, is imposed and used to offset the costs of maintaining the uniformed field strength of the California Highway Patrol. These provisions authorizing the additional fees and expenditures are to be repealed as of January 1, 1995.

This bill would delete those repeal dates, and would require that the funds also be used to ensure sufficient support for those peace officer members employed on December 31, 1994, and to support an additional 130 peace officer members of the California Highway Patrol.

(2) Existing law requires a fee of $1 to be paid, in addition to other specified fees, at the time of issuance or renewal of identification of off-highway motor vehicles. Existing law requires the money from the additional fee to be deposited in the Motor Vehicle Account in the State Transportation Fund to be available, upon appropriation by the Legislature, to offset the costs of maintaining the uniformed field strength of the Depart-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment of the California Highway Patrol.

The provision authorizing the imposition of that fee is to be repealed as of January 1, 1995.

This bill would delete that repeal date and thus would extend the fee indefinitely.

Ch. 1198 (AB 2543) Lee. California Schools Hate Violence Reduction Act of 1995.

(1) Existing law prescribes the powers and duties of the State Board of Education and the State Department of Education and authorizes the State Board of Education to adopt rules and regulations not inconsistent with state law for its own government, for the government of its appointees, and for the government of the public schools under its jurisdiction.

This bill would enact the California Schools Hate Violence Reduction Act of 1995.

This bill would require the State Board of Education, if private funds are available, at the request of the Superintendent of Public Instruction, to adopt policies and guidelines to prevent and respond to acts of hate violence, as defined, and, among other things, to revise, as specified, existing state curriculum frameworks and guidelines and the moral and civic education curricula to include human relations education, as specified; to establish guidelines for use in teacher and administrator in-service training programs to promote an appreciation of diversity and to discourage discriminatory attitudes and practices among pupils, teachers, administrators, and counselors and to enable teachers and administrators to prevent and respond to acts of hate violence; and to revise guidelines previously adopted by the board to include procedures to prevent and respond to acts of hate violence.

The bill would declare that nothing in these provisions be construed to require the governing board of a school district to offer an ethnic studies or human relations course.

(2) Existing law requires teachers providing instruction in kindergarten and grades 1 to 12, inclusive, to endeavor to impress upon the minds of pupils the principles of morality, truth, justice, patriotism, and a true comprehension of the rights, duties, and dignity of American citizenship, and to teach them to avoid idleness, profanity, and falsehood, and to instruct them in manners and morals and the principles of a free government.

This bill would encourage teachers also to impress upon the minds of pupils the meaning of equality and human dignity, including the promotion of harmonious relations. The bill would additionally encourage teachers to endeavor to create and foster an environment that encourages pupils to realize their full potential and that is free from discriminatory attitudes, practices, events, or activities, in order to prevent acts of hate violence.

(3) Existing law provides that no pupil may be suspended from school or recommended for expulsion unless the superintendent or principal determines that the pupil has engaged in specified conduct.

This bill would include among the grounds for the suspension or expulsion of a pupil, conduct by which a pupil in any of grades 4 to 12, inclusive, caused, attempted to cause, threatened to cause, or participated in an act of hate violence, as defined.

Ch. 1199 (AB 133) W. Brown. Land use: property owned by religious organizations.

Existing law authorizes cities and counties to acquire property for the purpose of developing or preserving a historical landmark, or for the purpose of developing recreational facilities.

Existing law further authorizes cities and counties to enact, by ordinance, special restrictions or conditions for the purpose of protecting places, buildings and objects of special historical or cultural value.

This bill would exempt noncommercial property owned by specified religiously affiliated associations or corporations from the aforementioned provisions of existing law, if the association or corporation objects to the application of the provisions, and the association or corporation makes specified determinations in a public forum.

This bill would make a finding that the bill addresses a matter of statewide concern relating to religious freedom.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would state that it applies to charter cities.

Ch. 1200 (SB 469) Beverly. Corporations: limited liability companies.

Existing law authorizes and regulates the formation and operation of corporations, partnerships, and associations in this state. Existing law does not provide for limited liability companies.

This bill would enact the California Limited Liability Company Act and would authorize a limited liability company to engage in any lawful business activity, as specified. Among other things, this bill would:

(1) Govern the formation of limited liability companies, including requiring the members to enter into an operating agreement and to execute and file articles of organization with the Secretary of State.

(2) Establish requirements and procedures for membership interests in limited liability companies, including voting, meeting, and inspection rights.

(3) Set forth the duties and obligations of the managers of a limited liability company or permit the business and affairs of a limited liability company to be managed by the members, as specified.

(4) Establish capital contribution standards and liability of members.

(5) Regulate the allocation of profits and losses, distributions of money and property, withdrawal of membership, assignment of interests, and dissolution of limited liability companies.

(6) Require the registration of foreign limited liability companies, as defined, with the Secretary of State, and prohibit the transaction of business in this state by an unregistered foreign limited liability company, subject to specified penalties.

(7) Permit the bringing of class actions or derivative actions by members of a foreign or domestic limited liability company, subject to specified conditions.

(8) Regulate the merger of limited liability companies with other limited liability companies or with one or more other business entities, as specified, including requiring an agreement of merger and protection of the rights and liabilities of limited liability companies, creditors, and dissenting members.

(9) This bill would also impose filing and tax requirements on limited liability companies, as specified, and would make conforming changes to existing law. Since the bill would make limited liability companies and certain of their managers subject to certain criminal provisions, it would impose a state-mandated local program by expanding the scope of a crime.

(10) This bill would appropriate funds from the Secretary of State's Business Fees Fund to the Secretary of State for specified purposes.

(11) The bill would appropriate $350,000 from the General Fund to the Franchise Tax Board to implement the act.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(13) This bill would incorporate additional amendments to Sections 17220, 18402, and 18621.5 of the Revenue and Taxation Code proposed by SB 1805, contingent upon the prior enactment of that bill.

(14) This bill would incorporate additional amendments to Section 23036 of the Revenue and Taxation Code proposed by AB 3316, contingent upon the prior enactment of that bill.

(15) This bill would declare that it would take effect immediately as an urgency statute.

Ch. 1201 (SB 1397) Johnston. Community services districts.

Existing law prescribes the purposes and powers of community services districts.

This bill would additionally grant community services districts the power of constructing streets in the district subject to the consent of the city or county in which the improvement is to be made.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would prescribe additional purposes and powers granted to the Mountain House Community Services District and would state the reasons necessitating a special law. The bill would require formation of, and powers exercised by, the Mountain House Community Services District to be subject to approval by the local agency formation commission for San Joaquin County in accordance with prescribed law. It would also require San Joaquin County to maintain a labor compliance program, as defined under existing law, for all work within the Mountain House Community Services District.

The bill would require San Joaquin County to provide funds to the petitioners to pay the costs of filing the application for incorporation of the Mountain House area, as specified, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1202 (SB 1638) Lockyer. Arbitration: selection of arbitrator.

Existing law governing the enforcement of arbitration agreements specifies a procedure for the method of appointing an arbitrator.

This bill would provide that, except as specified, in any arbitration pursuant to an arbitration agreement involving a claim for damages, when a person is proposed for nomination or appointment to serve as a neutral arbitrator, as specified, that person shall disclose, within 10 days of service of notice of the proposed nomination or appointment, to all parties, certain information concerning the names of prior or pending cases arbitrated by that proposed arbitrator. The bill would provide for the disqualification of a proposed nominee or appointee, as prescribed.

Ch. 1203 (SB 1689) Hart. Employment: field sanitation.

(1) Existing law requires a prescribed occupational safety and health standard for field sanitation. Existing law requires the Division of Occupational Safety and Health to develop a written plan to coordinate its program for enforcement of this standard with other state and local agencies.

This bill would require the plan to be developed by March 15, 1995, and would require the plan to provide for coordination between the division and local officials in counties where sanitation facilities are registered with the county health officer or other appropriate official of the county. The bill would require the division to establish guidelines to assist the counties choosing to perform these registrations to develop specified charges or assessments to defray the costs.

(2) Existing law specifies that past violations, within the previous 5 years, of field sanitation requirements imposed under designated provisions are to be considered evidence of willfulness for purposes of provisions authorizing civil penalties for willful or repeated violations of occupational safety or health standards, orders, or special orders.

This bill would specify that, for both fixed-site and nonfixed-site employers, past violations of regulations adopted under the provisions amended by the bill or of related federal regulations, occurring anywhere in the state within the previous 5 years, shall be considered for purposes of establishing both willfulness and repeated violation under the above provisions authorizing civil penalties for willful or repeated violations.

Ch. 1204 (AB 3101) Caldera. Guarantors.

Under existing law, in some instances when a lender forecloses on an obligation secured by real property, the lender cannot obtain a deficiency judgment against the debtor. If that obligation is also guaranteed by a 3rd-party guarantor, such as a surety, the guarantor is generally liable and is subrogated to the rights of the lender to collect the obligation from the debtor, but where the actions of the lender have destroyed the guarantor's rights of subrogation, the guarantor has a defense against liability on the guarantee. However, the guarantor may waive those defenses, but, under existing case law, only if the waiver is made with actual knowledge of what is being waived, and such

NOTE: Superior numbers appear as a separate section at the end of the digests.

case law provides that any doubt should be resolved against the waiver.

This bill would provide that any guarantor may waive the guarantor's rights of subrogation and reimbursement and any other rights and defenses available to the guarantor by reason of specified law. It would provide that any language that expressly sets forth a suretyship waiver shall be effective whether or not it contains references to statutory provisions or judicial decisions, except as specified. It would also provide that the use of specified language would be an effective waiver of those rights and defenses.

This bill would provide that its provisions do not represent a change in, but are declarative of, existing law, as specified.

Ch. 1205 (AB 3805) Richter. Alcoholic beverages: sale to minors.

Existing law prohibits the sale of alcoholic beverages to, or the purchase of alcoholic beverages by, persons under the age of 21 years.

This bill would provide that persons under the age of 21 years may be used by peace officers to apprehend licensees, or their employees or agents, who sell alcoholic beverages to minors. It would also provide that a person under the age of 21 years who purchases or attempts to purchase any alcoholic beverage while under the direction of a peace officer is immune from prosecution for that purchase or attempt to purchase alcoholic beverages. The bill would require the Department of Alcoholic Beverage Control to adopt and publish guidelines with respect to the use of persons under the age of 21 years as decoys in accordance with the Administrative Procedure Act.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1206 (SB 1775) Presley. Disciplinary actions: crimes: licensed professionals.

(1) Existing law provides for the licensure, regulation, and discipline of licensees licensed to practice various businesses and professions, including, among others, healing arts professionals. Under existing law, any person who displays or possesses a canceled, revoked, suspended, or fraudulent license, lends his or her license or permits its use, displays a license not issued to him or her, or takes certain other actions with regard to a license to practice any business or profession is guilty of a misdemeanor. Under existing law, it is also a misdemeanor for a licensee to conspire with an unlicensed person, or to aid or assist that person in a specified manner, to violate any provision of law relating to licensure of healing arts professionals.

This bill would revise the crime to prohibit knowingly permitting the use of his or her license. By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) Existing law requires every insurer providing professional liability insurance to certain healing arts licensees to send a complete report to the appropriate licensing board regarding any settlement or arbitration award over specified dollar amounts of described claims or actions for damages. Existing law also requires every entry of judgment, settlement agreement, or arbitration award over a certain dollar amount for claims or actions against specified healing arts licensees, when the judgment, settlement, or arbitration award is entered against the licensee's employer, to be reported as an entry of judgment, settlement, or arbitration award against the licensee.

This bill would define employer for purposes of this provision. This bill would further require insurers to retain copies of certain documents related to the report for a least one year and to make those documents available for copying by the applicable board except in certain circumstances.

(3) Existing law authorizes the Medical Board of California and the Board of Podiatric Medicine to adopt regulations governing disclosure of information regarding certain disciplinary actions to the public. Under existing law, these provisions remain operative after July 1, 1995, if the Division of Medical Quality of the Medical Board of California and the Board of Podiatric Medicine adopt these regulations, and provisions requiring the disclosure of that information become operative July 1, 1995, if the division and the board do not adopt those regulations.

This bill would authorize the Division of Licensing of the Medical Board of California, rather than the Division of Medical Quality to adopt these regulations.

(4) Existing law requires the Medical Board of California to prepare and issue a report

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

at least once every 2 years containing certain information regarding licensees of the board. Existing law requires every licensed physician to complete a questionnaire at least once every 2 years to provide information for the report to the board.

This bill would repeal these provisions.

(5) Existing law requires the Medical Board of California to hold at least one regular meeting in the County of Sacramento, the County of Los Angeles, and the City and County of San Francisco or its environs, and sets forth the quorum requirements for those meetings and meetings of the divisions of the board.

This bill would eliminate the requirements that the board hold regular meetings in those specific locations, and would revise the quorum and vote requirements for meetings of the board, its divisions, and panels of its divisions.

(6) Existing law requires the Medical Board of California to create a Committee on Allied Health Professions.

This bill would instead require the creation of a Committee on Affiliated Healing Arts Professions.

(7) Existing law requires the president of the Division of Medical Quality to rotate the membership of the panels of the division at least annually.

This bill would repeal this requirement.

(8) Existing law requires the division to report certain information annually to the Legislature.

This bill would revise these reporting requirements.

(9) Existing law provides that the conviction of any offense substantially related to the qualifications, functions, or duties of a physician and surgeon constitutes unprofessional conduct, and sets forth a procedure for the suspension or revocation of a license based on those convictions. Existing law also requires certain prosecuting agencies to notify the appropriate board of any filing against a licensee charging a felony immediately upon obtaining information that the defendant is a licensee. Existing law also requires the clerk of the court to notify the board of a conviction of a licensee within 48 hours.

This bill would revise the procedure for suspension or revocation based on convictions and would require an automatic suspension of a license in certain circumstances. This bill would require prosecuting agencies to notify the division of the pendency of an action against a licensee charging a felony or a misdemeanor, and to notify the clerk of the court that a defendant is a licensee. This bill would require the clerk of the court to record this information prominently in the file. By requiring the performance of these duties by local prosecutors and court clerks, this bill would impose a state-mandated local program.

(10) Existing law establishes a Medical Quality Hearing Panel within the Office of Administrative Hearings, sets forth the duties of the panel, and repeals those provisions on January 1, 1997. Existing law also requires the decisions of administrative law judges of the Medical Quality Hearing Panel in the Office of Administrative Hearings, together with any court decisions reviewing those decisions or relevant to medical quality adjudications, to be published in a quarterly "Medical Discipline Report."

This bill would extend the repeal date until January 1, 1999. This bill would also delete the requirement of publication of any court decisions relevant to medical adjudications.

(11) Existing law requires the issuance by the administrative law judge, prior to commencement of a disciplinary hearing, of subpoenas and subpoenas duces tecum. Existing law requires these subpoenas to be served in person.

This bill would authorize the service of these subpoenas in person, or by certified mail or messenger, in accordance with certain procedures.

(12) Under existing law, judicial review of a disciplinary decision may be had upon filing a petition within certain time limits. Existing law requires the complete records of the proceedings to be prepared by the agency and delivered to the petitioner within 30 days after a request by him or her and upon payment of a fee.

This bill would require the complete records to be prepared by the Office of Administrative Hearings or the agency, and would require the extension of the 30-day time period for preparation and delivery of the record for good cause shown.

(13) Existing law requires, until January 1, 1995, and after January 1, 1999, review by

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the superior court of a decision revoking, suspending, or restricting a license to take preference over other civil actions. Existing law alternatively requires that from January 1, 1995 to January 1, 1999, review of final decisions of an administrative law judge of the Medical Quality Hearing Panel, or the Division of Medical Quality or the Board of Podiatric Medicine, to be by writ of mandamus pursuant to specified procedures before a district court of appeal exercising independent judgment.

This bill would revise the dates that these alternative provisions are operative.

(14) Existing law requires physicians and surgeons to furnish certain information to the board, including changes of address.

This bill would require the provision of a street address if the address provided is a post office box, and would authorize the licensee to request that the second address not be disclosed to the public.

(14.5) Existing law requires medical or podiatric societies, licensed health facilities, and state or local governmental agencies that receive complaints about licensees to provide certain information to the complainant.

This bill would revise this requirement.

(15) Existing law regulates patient access to medical records and requires that patients of health care providers, as defined, be entitled to inspect their medical records and to obtain copies of those records in accordance with certain procedures. Existing law provides that willful violation of these requirements by a health care provider is either unprofessional conduct or an infraction for certain health care providers.

This bill would include psychologists within the definition of health care provider for these purposes, and willful violation of the requirements by a psychologist would be unprofessional conduct.

(16) Existing law sets forth the requirements for issuance of a certificate to practice podiatric medicine, including one year of postgraduate podiatric surgical training in a general acute care facility. Existing law also requires the Board of Podiatric Medicine to approve podiatric residency programs.

This bill would revise the requirements for issuance of a certificate to include one year of postgraduate podiatric medical and podiatric surgical training in a general acute care hospital. This bill would also require the board, on and after January 1, 1998, to approve only those podiatric residencies approved by certain organizations, provided that the organization requires entry-level podiatric residencies to include podiatric surgical training.

(17) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, for certain costs, no reimbursement is required by this act for a specified reason.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1207 (SB 1518) Marks. Voters: registration information: confidentiality.

(1) Existing law contains various provisions relating to the availability of the information contained in affidavits of registration, and the ability of specified persons to file a confidential affidavit of registration. Under existing law, information contained in a confidential affidavit of registration may only be released for certain election, government, or research purposes, or whenever a person's vote is challenged, as specified.

This bill would repeal or revise provisions of existing law relating to the disclosure of voter registration information, specifically the home address, telephone number, occupation, precinct number, and prior registration information, to declare this information confidential and not available to the public. The bill would repeal provisions establishing the confidential affidavit of registration, and would apply the conditions for the release of information contained in a confidential affidavit of registration to all affidavits of registration. It would also require disclosure of this information to any candidate for federal, state, or local office, to any committee for or against any initiative or referendum

NOTE: Superior numbers appear as a separate section at the end of the digests.

measure for which legal publication is made, and to any person for journalistic purposes pursuant to an application for voter registration information, as specified.

(2) Existing law, as amended by Chapter 77 of the Statutes of 1994, imposes misdemeanor penalties upon any person or public entity who, in violation of a specified provision of law, discloses the home address, as defined, or telephone number appearing on a confidential voter registration card of peace officers, as specified, employees of a city police department or a county sheriff's office, or the spouse or children of these individuals who live with these individuals.

This bill would revise and reenact these provisions of Chapter 77 of the Statutes of 1994 in a reorganized format, as specified.

(3) This bill would also make technical, nonsubstantive changes to existing law.

(4) This bill would make identical changes to the Elections Code alternative to those proposed by this bill that would become operative only if this bill and SB 1547 are both chaptered, in which case specified provisions of this bill would not become operative.

Ch. 1208 (AB 867) Sher. Surface mining operations: reclamation plans: lead agencies.

(1) Existing law, the Surface Mining and Reclamation Act of 1975, generally prohibits a person from conducting surface mining operations unless a permit is obtained from, a reclamation plan addressing prescribed elements has been submitted to and approved by, and financial assurances for reclamation have been approved by, the lead agency, as defined.

This bill would allow a person submitting a reclamation plan, if required information or a required document has already been prepared as part of a permit application or as part of an environmental document prepared pursuant to the California Environmental Quality Act (CEQA), to include that information or that document in the reclamation plan by reference, if the information or document is attached to the reclamation plan when the lead agency submits the reclamation plan to the Director of Conservation for review.

(2) The act requires the lead agency, prior to approval, to submit to the director for review a surface mining operation's reclamation plan, financial assurances, or any amendments, requires the lead agency to certify to the director that the reclamation plan is in compliance with specified requirements, and authorizes the director to comment on the plan, financial assurances, or amendments to the lead agency within 45 days. The lead agency is required to respond to any such comments during the 45-day comment period.

This bill would authorize the director to comment on a reclamation plan or plan amendments within 30 days, and to comment on financial assurances within 45 days. The bill would require the lead agency to respond to comments from the director within a reasonable amount of time. The bill would provide that, to the extent that there is a conflict between the comments of a trustee agency or a responsible agency that are based on the agency's statutory or regulatory authority and the comments of other commenting agencies which are received by the lead agency pursuant to CEQA regarding a reclamation plan or plan amendments, the lead agency shall consider only the comments of the trustee agency or responsible agency.

The bill would require a lead agency, when it submits a reclamation plan or plan amendments to the director for review, to also submit to the director, for use in reviewing the reclamation plan or plan amendments, information from any related document prepared, adopted, or certified pursuant to the CEQA and any other pertinent information.

(3) The act requires the Department of Conservation, on or before March 1, 1994, to submit to the Governor and the Legislature a report evaluating the effectiveness of lead agencies, as prescribed.

This bill would extend the date for the submission of that report to March 1, 1995.

Ch. 1209 (AB 2672) Cortese. State agencies: telecommuting.

Existing law authorizes every state agency to incorporate the telecommuting work option as an element of its transportation management programs, which are designed

NOTE: Superior numbers appear as a separate section at the end of the digests.

to reduce the number of commute trips by state employees.

This bill would delete the current authorization and, instead, would require every state agency to review its work operations to determine where in its organization telecommuting can be of practical benefit to the agency, and, on or before July 1, 1995, to develop and implement a telecommuting plan, as specified.

Ch. 1210 (AB 2793) B. Friedman. California Children's Services: billing.

Existing law requires the State Department of Health Services to establish and administer a program of services, including diagnosis, treatment and therapy, for physically handicapped persons under the age of 21 years, in cooperation with the federal government.

This bill would require counties and other providers of children's services to submit all claims for services to the state fiscal intermediary for payment no later than January 1, 1999, thereby imposing a state-mandated local program. It would require the department to work in cooperation with counties to develop a timeline for implementing this centralized billing system. It would provide an exemption for certain counties upon a determination of the department.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1211 (AB 3032) Bustamante. Vehicles: lessees.

The Vehicle License Fee Law provides that delinquent vehicle license fees and related penalties are collected by the Franchise Tax Board by the seizure and sale of the vehicle to which the delinquent fees and penalties relate, or by appropriate civil action.

This bill would extend that collection authority to include any interest or service fees in connection with those delinquent license fees and penalties.

This bill would provide that in the case of a leased vehicle, the authority to seize and sell the vehicle or any other vehicle owned by the lessor of that vehicle shall not apply to a lien for delinquency for those fees, fines, penalties, and interest for which only the lessee is liable, as provided. The bill would also provide that the lien shall be released upon a bona fide sale or transfer of the vehicle if the lessor has paid the registration and license fees, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1212 (AB 3245) Epple. Energy conservation: local government and small business assistance.

(1) Under existing law, funds in the Petroleum Violation Escrow Account, as defined in federal law, consisting of federal oil overcharge funds, have been disbursed to this state by the federal government and deposited in the Federal Trust Fund.

Existing law appropriates those funds from the Federal Trust Fund, for expenditure for specified purposes relating to energy resources, including a $500,000 appropriation to the Office of Planning and Research for the small business energy assistance program for the 1993–94 fiscal year.

This bill would reappropriate those funds to the office for expenditure for that purpose for the 1994–95 fiscal year, thereby making an appropriation.

(2) Under existing law, those funds have been appropriated from the fund to the State Energy Resources Conservation and Development Commission for the transportation energy technology advancement program. The sum of $1,000,000 of those funds have also been appropriated to the commission to provide funding for the San Diego ITER project.

This bill would reappropriate to the commission the funds appropriated for the San Diego ITER project, plus any interest earned on those funds, for the purpose of making awards under the transportation energy technology advancement program.

(3) Existing law, the Energy Conservation Assistance Act of 1979, creates the State Energy Conservation Assistance Account, a continuously appropriated account, for pur-

NOTE: Superior numbers appear as a separate section at the end of the digests.

poses of carrying out the act.

This bill would authorize the commission to make a grant from the account for the conversion of street lights, as specified, for the 1994–95 fiscal year, thereby making an appropriation.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1213 (AB 3287) Tucker. Horseracing.

(1) The Horse Racing Law requires that a sum equal to 10% of the first and second place money of every purse won by a California-bred Appaloosa horse at a horserace meeting be paid by the licensee conducting the meeting to the breeder of the horse. That law also requires that $\frac{1}{10}$ of 1% of the total handle be distributed to breeders of Appaloosa horses.

This bill would set forth the requirements for determining the amount of breeder premiums, and owners' and stallion awards for Appaloosa horseraces, and provide for the distribution of those amounts. The bill would also provide that up to, but not to exceed, 10% of the total deposits made may be deducted by the official registering agency for Appaloosa horses to compensate it for its administrative costs.

(2) Existing law permits any county fair or district agricultural association in San Joaquin or Fresno County to operate one satellite wagering facility on leased premises, as specified.

This bill would, in addition, permit Humboldt County to operate one satellite wagering facility pursuant to those provisions.

(3) Under existing law, the California Horse Racing Board is authorized to permit an association conducting a race meeting to accept wagers on the results of out-of-state harness or quarter horse feature races or stake races and, with the board's approval and with the concurrence of the horsemen's organization contracting with the association, other designated harness or quarter horse races during the period it is conducting the racing meeting, if specified conditions are met.

This bill would include as a condition that the association conducts at least 7 live races, and imports not more than 4 races on those days during a racing meeting when live races are being run.

(4) Existing law provides that all purse moneys derived from wagering on out-of-zone races at fair racing meetings conducted within the northern zone shall be distributed to all breeds of horses participating in the fair meeting in direct proportion to the purse money generated by breed on live races conducted during the fair race meeting.

This bill, instead, would provide that all purse moneys derived from wagering on out-of-zone races at fair racing meetings conducted shall be distributed, as specified above.

(5) Existing law provides that if the total revenues distributed to the state as license fees for deposit in the General Fund for the 1992–93 fiscal year in the central and southern zones, as determined by the California Horse Racing Board, do not equal or exceed the amount of total revenues distributed to the state as license fees for deposit in the General Fund for the 1990–91 fiscal year in the central and southern zones, the license fees in the central and southern zones shall be increased by $\frac{1}{4}$ of 1% for meetings in the central and southern zones commencing during the following fiscal year.

This bill would repeal these provisions and would specify that the repeal of these provisions does not constitute a change in existing law.

(6) Existing law provides for the distribution of certain amounts as additional commissions and purses by an association with an average daily handle of $750,000 that conducts a harness, quarter, Arabian, or Appaloosa horse meeting, and sets forth the percentage to be distributed as additional commissions, and the percentage to be distributed as additional purses.

This bill would permit the association and the horsemen's organization to agree to a different distribution of those funds.

(7) This bill would require the board, upon recognition by the board of a successor horsemen's organization or organizations, to apportion specified assets for the benefit of the horsemen and the successor organizations.

(8) This bill would incorporate additional changes in Section 19613.2 of the Business

NOTE: Superior numbers appear as a separate section at the end of the digests.

and Professions Code, proposed by AB 991, to be operative only if AB 991 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last. These changes would become operative on the operative date of AB 991.

(9) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1214 (AB 3404) Cannella. Disasters: hazardous substances and materials spills: reporting requirements.

(1) Existing law establishes various requirements for the notification and reporting of unauthorized spills of hazardous substances. Under existing law, the Office of Emergency Services has responsibilities with regard to disaster response.

This bill would provide that the office is the central point in state government for the emergency reporting of spills, unauthorized releases, or accidental releases of hazardous materials. Upon receiving a report, as prescribed, the office would be required to notify designated public agencies of the incident, as specified.

The bill would make related legislative findings and declarations.

The bill would make conforming changes to reporting requirements for pipeline ruptures, explosions, or fires, oil discharges, spills from above ground petroleum tanks, releases from underground storage tanks, releases on highways, and hazardous substance and sewage releases into water. This bill would also provide that notifications made pursuant to specified provisions satisfy any notification requirements contained in any permit issued by a permitting agency.

(2) Existing law requires any person who dumps, spills, or causes a release of a hazardous substance on a highway to notify the Department of the California Highway Patrol.

This bill would require the department to notify the Office of Emergency Services of a dump, spill, or release except for petroleum spills of less than 42 gallons from vehicular fuel tanks.

(3) This bill would incorporate additional changes in Section 51018 of the Government Code, proposed by AB 3521, to be operative only if AB 3521 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 1215 (AB 3424) Statham. Secret witness program: funding.

Under existing law, a state penalty in the amount of $10 for every $10, or fraction thereof, is required to be levied on every fine, penalty, or forfeiture imposed by a court for a criminal offense. Of the amount collected, 0.33% is required to be transferred monthly into the Fish and Game Preservation Fund, as specified, to be used for education or training of employees of the Department of Fish and Game. Existing law continuously appropriates the fund to the department to carry out the Fish and Game Code.

This bill would, additionally, impose a $15 penalty on all fines, penalties, and forfeitures for violations of the Fish and Game Code or regulations adopted pursuant thereto, except specified violations relating to sportfishing and hunting licenses. The revenues from the penalty would be required to be deposited in the Fish and Game Preservation Fund and used to pay the department's costs for a secret witness program and to make contributions to that program. Because the bill would increase the revenue to the fund, it would make an appropriation.

Ch. 1216 (SB 1802) Rosenthal. Automated rail crossing enforcement system.

Existing law requires the driver of any vehicle approaching a railroad grade crossing to stop not less than 15 feet from the nearest rail and not to proceed until he or she can do so safely, as specified.

This bill would specify that the above restriction applies to rail transit grades, authorize the equipping, by governmental agencies, in cooperation with law enforcement agencies, of automated rail crossing enforcement systems, as defined, provide a special written, mailed notice to appear procedure in connection with alleged certain violations recorded by an automated rail crossing enforcement system, and limit the availability of photographic records to the purposes of the bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1217 (SB 1899) Peace. Hazardous waste: minor violations: notice to comply.

(1) Existing law requires the Department of Toxic Substances Control and an authorized local health officer or a local public officer designated by the Director of Toxic Substances Control to enforce, in accordance with prescribed procedures, the standards and regulations regarding the management and control of hazardous waste, a violation of which is subject to specified penalties.

This bill would define the terms "Class I violation" and "minor violation" and would require a representative of the department, an authorized local health officer, or a local public officer designated by the director, who, in the course of conducting a facility inspection, detects a minor violation, to issue a notice to comply, as specified. The bill would impose a state-mandated local program by imposing that duty on local health officers and local public officers.

The bill would provide that a facility that receives a notice to comply shall have not more than 30 days from the date of receipt of the notice to comply to achieve compliance with the permit conditions, rule, regulation, standard, or other requirement cited on the notice to comply. The bill would provide that a notice to comply is the only means by which the department representative or authorized or designated officer can cite a minor violation, and would prohibit any other enforcement action against a facility receiving such a notice, unless a facility fails to comply with a notice to comply within the prescribed period, or if the department, or an authorized or designated officer, determines that the circumstances surrounding a particular minor violation are such that immediate enforcement is warranted to prevent harm to the public health or safety or to the environment, or if the assessment of a civil penalty is warranted or is required by the Resource Conservation and Recovery Act of 1976. The bill would require the department, until January 1, 1998, to maintain a public record of all minor violations, as specified. The bill would prescribe related requirements and procedures. The bill would make a false statement that compliance has been achieved a violation, thereby imposing a state-mandated local program by creating a new crime.

(2) Existing law subjects a person who, among other things, is convicted of knowingly making any false statement or representation in certain documents used for purposes of complying with the hazardous waste control laws, to a fine of not less than $2,000 or more than $25,000 for each day of violation, or by imprisonment in the county jail for not more than one year, or by both the fine and imprisonment, and if the conviction is for a second or subsequent violation, imprisonment in the state prison for 16, 20, or 24 months.

This bill would subject any person to that criminal liability who knowingly makes a false statement or representation in a notice to comply, thereby imposing a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 1218 (SB 1952) Rosenthal. Alternative energy sources: advanced transportation: financing.

Existing law, the California Alternative Energy Source Financing Authority Act, authorizes the California Alternative Energy Source Financing Authority, among other things, to provide financing assistance to a participating party, as defined, for projects utilizing alternative energy sources.

This bill would rename the act the California Alternative Energy and Advanced Transportation Financing Authority Act, would rename the authority and revise the membership of the authority, as specified, and would authorize the authority to additionally provide financing assistance under the act to a participating party for projects for the development and commercialization of advanced transportation technologies, as defined. The bill would make related and conforming changes.

If both this bill and AB 1379 are chaptered, this bill would not become operative, regardless of which bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1219 (SB 1988) Alquist. Earthquake safety.

Existing law prohibits, notwithstanding any other provision in the State Housing Law, certain model code building standards from applying to a local jurisdiction that has adopted on or before January 1, 1993, a program for mitigation of potentially hazardous buildings if a proposed ordinance containing prescribed standards to strengthen buildings was introduced on or before July 27, 1992. Existing law otherwise requires ordinances and programs to conform to the model code building standards, except for requirements found by local ordinance to be inapplicable based on local conditions.

This bill would instead require ordinances and programs, adopted on or before January 1, 1993, that contain certain standards to strengthen potentially hazardous buildings, to incorporate the model code building standards, except for standards found by local ordinance to be inapplicable based on local conditions, as defined, or based on an approved study.

Ch. 1220 (AB 3132) Katz. Transportation.

(1) Existing law provides that every person has a possessory lien for the compensation to which the person is legally entitled for the towing or storage of any vehicle which has been authorized to be removed by a public agency.

This bill would provide that a tow truck operator who has a possessory lien under the above provisions has a deficiency claim against the registered owner or the lessee, depending upon whether the vehicle is owned or leased and the nature of the lease, of a vehicle for an amount equal to the towing and storage charges and the lien sale processing fee, less the amount received from the sale of the vehicle. The bill would provide that the registered owner who has sold or transferred his or her vehicle and who was not responsible for creating the circumstances leading to the removal shall not be liable for any deficiency under this bill after executing and submitting a specified notice to the Department of Motor Vehicles, and the person who is noted as the transferee would be liable for the amount of the deficiency after submission of that notice only if the transferee received notice of the transfer and is responsible for the event leading to the abandonment of the vehicle or requested the removal.

(2) Existing law requires tow trucks to be equipped with, among other things, one or more shovels, and requires, whenever practical, a tow truck driver engaged to remove any disabled vehicle to spread dirt upon that portion of the roadway where oil or grease has been deposited by the disabled vehicle.

This bill would authorize the Department of Transportation to conduct a study to determine the policy and fiscal consequences of deleting the above provision if the department receives donations from nonstate sources to cover the costs of the study.

(3) Existing law establishes the vehicle inspection and maintenance (smog check) program, administered by the Department of Consumer Affairs. Existing law requires the department to establish procedures for issuing citations to the owners of vehicles that are gross polluters, as defined, including the imposition of a specified civil penalty.

This bill would, instead, require the department to issue notices of noncompliance to the owners of gross polluters and, instead of the civil penalty, would require those owners to pay a specified administrative fee. The bill would make conforming changes in existing law.

(4) Under existing law, passage of a qualification test is required upon the biennial renewal of a smog check technician's license.

This bill would specify that training may also be required for the renewal of that license.

(5) Under existing law, a notice to correct is required to be issued when it is found that a used motor vehicle failed to comply with applicable emissions standards or equipment standards.

This bill would also require that the appropriate vehicle information be entered into the centralized computer data base and that the data base include consumer protection data.

(6) Existing law makes the Department of Transportation responsible for the planning, design, and construction of state highways.

This bill would, until January 1, 1998, prescribe conditions applicable to projects in the

NOTE: Superior numbers appear as a separate section at the end of the digests.

state highway system that are financed from the proceeds of local retail transaction and use taxes and any other local resources.

(7) Existing law authorizes the Board of Directors of the Southern California Rapid Transit District to provide by resolution for the sale, destruction, or other disposition of specified documents when the board determines the documents are of no further value to the district.

This bill would delete the existing authorization. Instead, this bill would authorize the Los Angeles County Metropolitan Transportation Authority to undertake the above action by resolution. However, the bill would require that certain documents be microfilmed or otherwise preserved prior to the sale, destruction, or other disposition of the original.

(8) Under existing law, the Los Angeles County Metropolitan Transportation Authority has various duties and responsibilities regarding transportation programs in Los Angeles County. Existing law provides for contracts by the commission for rail transit facilities. Any agreement by the commission in the County of Los Angeles is required to include a system linking the Los Angeles International Airport with the Palmdale Regional Airport, and any project developed by the commission is also required to include an option to develop a system linking the eastern and western portions of the San Fernando Valley.

This bill would delete the requirement that any project also include an option to develop a system linking the eastern and western portions of the San Fernando Valley and would make conforming changes.

(9) Existing law prohibits the allocation of operating funds from the Transportation Planning and Development Account in the State Transportation Fund to transit operators that have not met either of 2 specified efficiency standards.

This bill would specify that the prohibition is inapplicable to allocations made for capital purposes.

(10) Existing law creates the Los Angeles County Metropolitan Transportation Authority as the successor to the Los Angeles County Transportation Commission and the Southern California Rapid Transit District. Existing law prescribes the powers and the duties of the authority and, among other things, authorizes it to enter into contracts with private entities for the planning, design, construction, and operation of facilities on real property owned or to be owned by the authority and of transit systems. Existing law prescribes a procedure that the authority is required to utilize in awarding those contracts. Existing law makes those provisions inapplicable to any rail transit system that links the Los Angeles International Airport with the Palmdale Airport, to any rail transit system that links the eastern and western portions of the San Fernando Valley, and to any related works of improvement.

This bill would make the provisions applicable to the specified rail transit systems and related works of improvement.

(11) Existing law authorizes the Department of Transportation to accept funds or services and authorizes the Director of Transportation to authorize a courtesy sign with respect to the maintenance of a section of a state highway by a person providing funds or services.

This bill would authorize the department to additionally accept materials and equipment and to enter into a specified agreement involving the display of a corporate or community service logo instead of the courtesy sign.

(12) Existing law authorizes the department, with the approval of the Department of the California Highway Patrol, to declare a higher maximum speed limit of 60 or 65 miles per hour on specified freeway segments, if certain conditions exist.

This bill would expand that authorization to specified highway segments.

(13) Existing law provides for the relinquishment of state highways or portions of state highways to any county or city by the California Transportation Commission in accordance with specified criteria and procedures.

This bill would allow for the relinquishment of any portion of State Route 275 that has been agreed to by a city in which it is located pursuant to those terms the commission finds to be in the best interest of the state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(14) Existing law designates specified routes as being in the state highway system and designates certain portions of the state highway system as state scenic highways.

This bill would make clarifying, technical changes to those designations.

(15) Existing law defines "official traffic control device" for purposes of the Vehicle Code.

This bill would revise the definition of that term.

(16) Existing law authorizes any automobile dismantler owning or operating a vehicle of a type otherwise required to be registered under the Vehicle Code to operate or move that vehicle upon the highway without subjecting the vehicle to registration or transfer if specified special plates are displayed on the vehicle and if the vehicle is moved solely for the purpose of moving it to the place of business of the dismantler.

This bill would authorize the operation or movement of the vehicle under the above circumstances if the vehicle is being moved to a scrap processor.

(17) Existing law requires any applicant for a driver's license to submit to an examination appropriate to the type of motor vehicle or combination of vehicles the applicant desires to drive, in accordance with specified classifications of licenses. Existing law requires the examination for a class A or class B license to include a report of a medical examination given not more than 2 years prior to the date of the application by a physician licensed to practice medicine or by a licensed physician's assistant or nurse practitioner under the supervision of a physician and surgeon licensed to practice medicine.

This bill would, instead, require the examination to be given by a health care professional, as defined.

(18) Existing law authorizes the Department of Motor Vehicles to refuse to issue or renew a driver's license to any person who is a negligent operator. The determination of whether a person is a negligent operator is based on the number of traffic violation points the person acquires within a specified period. Certain traffic violations are given a value of 2 points and others 1 point.

This bill would require that a value of 2 points be given to a violation of a specified provision of the Vehicle Code relating to proximately causing death or serious bodily injury to any person as a result of willful flight or attempt to elude a pursuing peace officer's motor vehicle under specified circumstances.

(19) Existing law regarding warranties on motor vehicles does not impose particular responsibilities on the manufacturers of fire safety vehicles.

This bill would require the manufacturer of equipment used in the assembly of a local public fire service agency's emergency vehicles to reimburse the agency for the cost of repairs to the vehicle if the repair was made to correct a manufacturer's defect, and the vehicle is placed on a safety-related recall to correct that defect. Because a violation of this provision would be a crime, the bill would impose a state-mandated local program. The bill would make other related changes, and would make legislative findings and declarations.

(20) Existing law authorizes the Department of Motor Vehicles to charge a fee for the issuance of a certificate of exemption concerning the first biennial renewal smog inspection due after the date of the initial registration of a vehicle. The amount of the fee is equal to the fee that is charged for the issuance of a certificate of compliance.

This bill would require the payment of that fee and would delete reference to the term "certificate of exemption."

(21) Existing law prohibits a person from operating firefighting equipment unless that person has in his or her immediate possession a valid driver's license or restricted driver's license for the appropriate class of vehicle operated.

This bill would exempt a person from that prohibition if the person has been issued, but does not have in his or her immediate possession, a currently valid and appropriate class driver's license or restricted driver's license for the operation of firefighting equipment and is operating that equipment wholly within this state under prescribed conditions.

(22) Existing law allows a vehicle to be impounded when, among other things, the driving privilege of the driver has been suspended or revoked for specified offenses and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

there is no passenger in the vehicle who has a valid driver's license and authorization to operate the vehicle.

The bill would expand the scope of specified offenses and would remove the requirement that there be no passenger able to operate the vehicle before a vehicle may be impounded under the above circumstances.

(23) Existing law authorizes any peace officer, as defined, to remove a vehicle under specified circumstances.

This bill would authorize the removal of a vehicle when an officer serves a notice of an order of suspension or revocation of a driver's license pursuant to a specified provision.

(24) Existing law generally provides that the enforcement of penalties for violations regarding the unlawful standing or parking of vehicles shall be governed by a civil procedure that includes a processing procedure, an administrative investigation and review procedure, and an administrative and judicial appeal process. Those provisions specify that the particular procedure or processes shall take place within a specified number of days.

This bill would revise certain of those days and would specify that the particular procedure or process shall occur within a specified number of calendar days rather than within a specified number of days.

(25) Existing law authorizes any peace officer to remove a vehicle located within the territorial limits in which the officer may act, under specified circumstances, including when the peace officer issues the driver of a vehicle a notice to appear for a violation of specified provisions of law relating to driving a vehicle when the privilege to drive has been suspended or revoked.

This bill would authorize the vehicle to be removed from private property after having been on a highway or on public lands under the circumstances described above.

(26) The bill would make other clarifying, technical changes in existing law.

(27) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(28) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1221 (SB 1758) Kopp. Vehicles.

(1) Existing law requires every form prescribed by the Department of Motor Vehicles for use by an applicant for the issuance, renewal, or transfer of the registration of, or certificate of title to, a motor vehicle to contain a section for the applicant's social security number. Any person who submits one of the specified forms to the department is required to furnish his or her social security number in the space provided.

This bill would, instead, require the application forms to contain a section for the applicant's driver's license or identification card number and would require the applicant to furnish the appropriate number in the space provided.

The bill would require the department to provide a space for the applicant's driver's license or identification card number, and would require that number, if any, to be furnished by the applicant, in connection with other specified vehicle registration transactions.

(2) Existing law authorizes the court or the Department of Motor Vehicles, under specified circumstances, to revoke or suspend a person's driver's license.

This bill would require the department, whenever a person's driver's license is suspended or revoked, to notify the person by certified mail, return receipt requested, as specified, of that action and of the effective date thereof, except as specified.

(3) Existing law requires the Department of Motor Vehicles to revoke the privilege of any person to drive a motor vehicle upon receipt of a duly certified abstract of the record of any court showing that the person was convicted of specified offenses.

This bill would additionally require the department to revoke the privilege of any person to drive a motor vehicle upon receipt of a duly certified abstract of the record of any court showing that the person has been convicted of an assault with a deadly

NOTE: Superior numbers appear as a separate section at the end of the digests.

weapon or instrument and a vehicle was found by the court to constitute the deadly weapon or instrument used to commit that offense. The department would be prohibited from reinstating the privilege of a person so convicted.

(4) Existing law requires the Department of Motor Vehicles to suspend immediately the driver's license of any person if the person was driving a motor vehicle when the person had a specified percentage or more, by weight, of alcohol in his or her blood. If the person whose license is suspended held a commercial driver's license and specified conditions existed, including that the person enrolls in a licensed drinking driver program, that person may apply to the department for a restricted driver's license limited to travel to and from the activities of the drinking driver program.

This bill would allow that restricted license to include permitting the person to drive to and from and in the course of the person's employment provided the person's privilege to operate a motor vehicle generally is suspended for 6 months and the person was 21 years of age or older at the time the offense occurred. The privilege to operate a motor vehicle to and from or in the course of the person's employment under the terms of a restricted license would not apply to the holder of a commercial driver's license who was operating a commercial vehicle at the time the violation occurred.

(5) Under existing law, it is a misdemeanor with a prescribed punishment for any person to be subsequently convicted within specified periods for driving when driving privileges were previously suspended or revoked for convictions of specified public offenses and that person has knowledge of the suspension or revocation. The person is presumed to have knowledge of the suspension or revocation if the department has given notice to the person.

This bill would provide that knowledge is conclusively presumed if the department gives notice to the person by certified mail, as specified.

(6) Existing law allows the Department of Motor Vehicles to require the payment of a fee at the time of the issuance, reissuance, or return of the suspended or revoked license sufficient to pay the actual costs of providing notices to the person regarding the suspension or revocation of the person's driving privilege.

This bill would allow for the imposition of the same fee payment in connection with the issuance, reissuance, or return of a suspended or revoked license sufficient to pay the actual costs of providing the notices identified under (4).

(7) Existing law authorizes a court, upon a showing of good cause, to waive the mandatory minimum imprisonment in county jail (10 days) upon a subsequent conviction within 5 years of driving a motor vehicle when the person's privilege to operate has been suspended or revoked by the Department of Motor Vehicles, as specified.

This bill would impose a state-mandated local program by deleting that authority, thereby requiring the imposition of the 10-day minimum imprisonment.

(8) Existing law does not prohibit a person who has a suspended or revoked license because of driving under the influence from driving a motor vehicle when emergency medical service is needed immediately.

This bill would make it a misdemeanor for a person to engage in that conduct if the person knows that his or her driver's license has been suspended or revoked, thereby imposing a state-mandated local program by creating a new crime.

(9) Existing law prohibits a person from renting a motor vehicle to another unless the person to whom the vehicle is rented is licensed under the Vehicle Code, and the person renting the vehicle has inspected the renter's driver's license, as specified.

This bill would make it unlawful for the owner of a motor vehicle to knowingly allow another person to drive the vehicle upon a highway unless the owner determines that the person possesses a valid driver's license that authorizes the person to operate the vehicle. Because a violation of this provision, in conjunction with provisions of existing law, would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(10) Existing law allows a vehicle to be impounded when, among other things, the driving privilege of the driver has been suspended or revoked for specified offenses and there is no passenger in the vehicle who has a valid driver's license and authorization to operate the vehicle.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would expand the scope of specified offenses and would remove the restriction that there must be no passenger able to operate the vehicle before a vehicle may be impounded under the above circumstances. This bill would specifically authorize a peace officer to immediately arrest any person who is driving a vehicle while his or her driving privilege is suspended or revoked or when the person is driving without ever having been issued a driver's license and to cause the removal and seizure of the vehicle. The bill would provide for a 30-day impoundment on that vehicle subject to a hearing.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(12) The bill would incorporate changes in Sections 14601.5 and 22651 of the Vehicle Code proposed by SB 1295 to be operative only if SB 1295 is enacted and becomes operative.

Ch. 1222 (SB 1431) Senate Committee on Revenue and Taxation. Taxation.

Existing law with respect to the taxation of timber authorizes the State Board of Equalization to modify immediate harvest values of timber on its own motion, and provides for the levy of tax recoupment fees upon the immediate rezoning of a parcel located within a timberland production zone. Existing law further requires that applications for waiver of tax recoupment fees be made to the State Board of Equalization.

This bill would require the State Board of Equalization to consult with the Timber Advisory Committee prior to modifying immediate harvest values on its own motion, and would require that payments of tax recoupment fees be made to the county in which the immediate rezoning has occurred. This bill would also allow applications for waiver of tax recoupment fees to be made to a county board of supervisors that has adopted an authorizing resolution.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution also excludes from the terms "purchased" and "change in ownership" the purchase or transfer of the principal residence of the transferor, or the purchase or transfer of the first $1,000,000 of all other real property, in the case of a purchase or transfer between parents and their children, as defined by the Legislature.

Statutory law that implements this constitutional exclusion requires an applicant for the exclusion to submit information to the assessor that includes, among other things, the social security number of each eligible transferor.

This bill would provide, for purposes of this implementing statute, that the term "social security number" includes a taxpayer identification number provided by the Internal Revenue Service where the taxpayer is a foreign national who cannot obtain a social security number.

Existing property tax law, pursuant to the authorization of the California Constitution, authorizes counties to adopt an ordinance allowing the transfer of the property tax base year value of property in another county in the state that has been substantially damaged or destroyed by a disaster, as provided, to comparable replacement property, of equal or lesser value, that is located in the adopting county and is acquired or newly constructed within 3 years of the damage to, or destruction of, the original property.

This bill would make technical and clarifying changes with respect to this authorization.

Existing property tax law provides that any previously filed application for the homeowners' property tax exemption, that was granted and is the basis for a current exemption, shall constitute a claim for that same exemption with respect to supplemental assessments.

This bill would expand this provision to include similar applications for the veterans' and disabled veterans' property tax exemptions, and would provide that no additional

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

exemption claim is required until the next succeeding lien date in the case in which a supplemental assessment results from the completion of new construction upon property that has previously been exempted with respect to either the current tax roll or the tax roll being prepared.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. Existing law further requires, with respect to property that has been so reassessed, that the new taxable value of that property, after being fully repaired, restored, or reconstructed, be enrolled on the supplemental roll following the completion of that process.

This bill would revise and recast this requirement to require both the determination of a new taxable value for the property for the following lien date, and an additional assessment or assessments with respect to that period after the completion of restoration, repair, or reconstruction and prior to that lien date. It would also authorize, as specified, a county assessor to apply supplemental assessment provisions in implementing the reassessment ordinance.

Existing property tax law allows a taxpayer to receive partial exemption from tax under the veterans' exemption and the disabled veterans' exemption where a claimant, that fails to file the required affidavit prior to the April 15 immediately preceding the relevant fiscal year, files that affidavit prior to the immediately following December 1.

This bill would change the December filing date to December 10.

Existing law requires a manufactured home to be transferred from taxation under vehicle license fee provisions to ad valorem property taxation upon the request of the owner of that manufactured home.

Existing property tax law requires, whenever a change in ownership of real property occurs, that the transferee of that property file a specified change in ownership statement with the county in which that property is located either at the time of recording or within 45 days after the change.

This bill would require, in the case in which a change in ownership occurs by reason of death, that a change in ownership statement be filed within 150 days after the date of death, if the decedent's estate is not subject to probate, or at the time of filing of an inventory or appraisal in a probate proceeding, if the decedent's estate is subject to probate.

This bill would provide that the property tax base year value of a manufactured home that is so transferred shall be that home's full cash value on the lien date for the fiscal year in which that home is first subject to property taxation.

This bill would also make nonsubstantive, technical and clarifying changes, and would eliminate provisions that are ineffective as a result of court decisions.

This bill would incorporate additional changes in Section 480 of the Revenue and Taxation Code, proposed by SB 469, to be operative only if SB 469 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

Ch. 1223 (AB 3629) Karnette. Hazardous substances.

(1) Existing law requires any person producing or transporting extremely hazardous waste to pay an annual fee of $200 to the Department of Toxic Substances Control. Existing law also requires the State Board of Equalization to administer and collect the fee.

This bill would delete the conflicting requirement that the fee be paid to the department.

(2) Under existing law, the Generator Surcharge Fee imposed on generators of hazardous waste is collected on a calendar year basis but the base rate is established for each fiscal year. A failure to pay this fee is a crime.

This bill would establish the base rate on a calendar year basis and would make related changes. The bill would increase the amounts required to be paid by generators of hazardous waste, thereby imposing a state-mandated local program by creating a new crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law creates the Railroad Accident Prevention and Immediate Deployment Force and imposes a fee on surface transporters engaged in transporting hazardous materials.

This bill would enact the Hazardous Spill Prevention Fee Law which would prescribe procedures and requirements for collection and administration of the fee by the board.

The bill would require the fee to be collected and administered pursuant to the Fee Collection Procedures Law, which imposes criminal penalties for certain violations, thereby imposing a state-mandated local program by creating new crimes.

(4) Existing law imposes a fee on the owners of underground storage tanks for each gallon of petroleum placed into the tank. Existing law authorizes the board to examine the books and records of any feepayer.

This bill would also authorize the board to examine the books and records of any person who is not a feepayer but operates an underground storage tank in a manner that may result in a fee liability being assessed against a feepayer.

The bill would authorize the board to disclose otherwise confidential information obtained from the lessee or operator of an underground storage tank only to the feepayer and only to the extent that this information is necessary for assessment, administration, and verification of the underground storage tank fee.

(5) The bill would incorporate additional changes in Section 25205.2 of the Health and Safety Code, proposed by SB 1815 or SB 1967, or both, to become operative only if SB 1815 or SB 1967, or both, and this bill are chaptered and become effective January 1, 1995, and this bill is chaptered last.

The bill would incorporate additional changes in Section 25205.4 of the Health and Safety Code, proposed by SB 1815, to be operative only if SB 1815 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

The bill would incorporate additional changes in Section 25205.7 of the Health and Safety Code, proposed by SB 1815, to be operative only if SB 1815 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1224 (SB 1838) Campbell. State and local government: accounts receivable.

Existing law, the Financial Integrity and State Manager's Accountability Act of 1983, provides that state agency heads are responsible for the establishment and maintenance of a system or systems of internal accounting and administrative control within their agencies.

This bill would establish the Accounts Receivable Management Act to require each participant, as defined, to submit a written report annually by December 1 containing specified information on its accounts receivable collection system. This bill would require each participant to allocate collection resources, and to consult with the Franchise Tax Board or other agencies, as specified.

This bill would authorize a participant under specified conditions to assign or sell, and would authorize a city, county, or city and county to sell or transfer, part or all of its accounts receivable to a private debt collector or private persons or entities, provided the debtor has been notified in writing of the proposed assignment, transfer, or sale. This bill would prohibit an assignment, transfer, or sale of any debt that has been contested.

This bill would not apply to claims for reimbursement for certain public assistance programs.

These provisions would be repealed on January 1, 1999.

Ch. 1225 (AB 2955) Karnette. Hazardous waste facilities permits: corrective action: exemption.

(1) Under existing law, the owner or operator of a hazardous waste facility is prohibited from managing the hazardous waste, unless the owner or operator holds a hazardous waste facilities permit or other grant of authorization from the Department of Toxic

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Substances Control, unless the facility or operation is exempt. Existing law imposes various fees upon hazardous waste facilities, persons generating hazardous waste, corporations handling hazardous materials, and persons applying for hazardous waste facilities permits.

This bill would exempt from any requirement for a hazardous waste facilities permit, or other grant of authorization, from the department, and from the requirement to pay those fees, a facility's operation of a physical process to remove air pollutants from exhaust gases prior to their emission to the atmosphere, as permitted by an air pollution control district or an air quality management district, unless a permit is required pursuant to the federal Resource Conservation and Recovery Act of 1976, except with regard to hazardous waste generated as part of, and removed from, that process.

(2) Under existing law, the department is required to require the owner or operator of a facility operating pursuant to a permit-by-rule or a generator operating pursuant to a grant of conditional authorization to complete and file a phase I environmental assessment with the department within one year of the adoption of a specified checklist, but not later than January 1, 1995.

This bill would delete the requirement for completion not later than January 1, 1995. The bill would exempt from the requirement to submit a phase I environmental assessment those portions of a facility that are also subject to a corrective action or a cleanup and abatement order pursuant to specified provisions or a corrective action pursuant to the Federal Resource Conservation and Recovery Act of 1976.

(3) The bill would define the term "contained gaseous material" for purposes of the hazardous waste control laws and make a statement of legislative intent in that regard.

Ch. 1226 (SB 1026) Thompson. Local health care funding.

Existing law provides for the allocation of state funds to local agencies for the provision of health care to eligible persons, and authorizes any county that contracted with the State Department of Health Services under prior provisions of law during the 1990–91 fiscal year and any county with a population under 300,000, as determined in accordance with the 1990 decennial census, may enter into a contract with the department to administer local health care responsibilities.

Existing law requires counties to provide health care to eligible indigent persons.

Existing law authorizes counties with a population that does not exceed a specified size to enter into a contract with the State Department of Health Services for the provision of health services to indigent persons.

This bill would revise local jurisdiction risk limitations and state funding allocations.

This bill would, until July 1, 1996, also authorize counties that participate in the CMSP program to establish the CMSP Governing Board, to be comprised of various officers of participating counties, to govern the CMSP program and to establish eligibility and benefit levels.

Ch. 1227 (AB 688) Sher. Solid waste: planning: diversion requirements.

(1) Under existing law, the California Integrated Waste Management Act of 1989, the California Integrated Waste Management Board is authorized to reduce specified solid waste diversion requirements of the act if a city or county demonstrates, and the board concurs, that the achievement of the diversion requirements is not feasible due to specified circumstances, including the small geographic size or low population density of the city or county.

This bill would repeal those provisions, and would instead authorize the board to reduce the diversion requirements for a rural city, as defined, a rural county, as defined, and a rural regional agency under prescribed conditions, and would make clarifying changes in those provisions.

The bill would authorize the board, notwithstanding specified provisions, to grant a 2-year time extension from the diversion requirements to a rural city, rural county, or rural regional agency if specified conditions are met.

(2) The act requires, to the extent practicable, disposal facility operators to submit to counties specified information from periodic tracking surveys on the disposal tonnages by jurisdiction or region of origin, which are disposed of at each facility, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

requires counties to submit periodic reports to cities within the county and to the regional agency of which it is a member agency, and to the board, on the amounts of waste disposed by jurisdiction or region of origin, as specified.

This bill would authorize the board to make adjustments in the amounts reported pursuant to those provisions, if the jurisdiction demonstrates, and the board concurs, based on substantial evidence in the record, that achievement of the diversion requirements is not feasible due to specified circumstances.

(3) The act provides that, for any city, county, or regional agency source reduction and recycling element submitted to the board after January 1, 1995, the 50% diversion requirement may include not more than 10% through transformation, as defined, if specified conditions are met, including a public hearing conducted by the board, in the city, county, or regional agency within which a transformation project is proposed. Any violation of the planning requirements of the act is a misdemeanor.

This bill would revise those conditions to additionally require any facility where that transformation occurs to be permitted and operating on or before January 1, 1995.

The bill would define "biomass conversion" as the controlled combustion of specified materials, when separated from other solid waste and used for producing electricity or heat, and would revise the definition of transformation to exclude biomass conversion.

The bill would provide that, for any city, county, or regional agency source reduction and recycling element submitted to the board on or after January 1, 1995, the 50% diversion requirement may not include more than 10% through biomass conversion, if specified conditions are met.

(4) The act authorizes a city or county to form a regional agency with another city or county for the purpose of complying with the planning requirements of the act. The act makes a regional agency which has been specified in the regional agency formation agreement as the responsible party for compliance with the diversion requirements or any member of the regional agency ineligible for a reduction in the diversion requirements.

This bill would repeal those provisions making a regional agency ineligible for a reduction in the diversion requirements, and would instead authorize the board to reduce the diversion requirements for a rural regional agency, if the agency demonstrates, and the board concurs, based on substantial evidence in the record, that achievement of the diversion requirements is not feasible due to specified circumstances.

(5) The act requires the board, within 120 days of receiving a city source reduction and recycling element or a countywide or regional integrated waste management plan, to determine whether the element or plan complies with specified requirements of the act, and based on that determination, to approve or disapprove the element or plan.

This bill would include in those provisions any element of the plan, give the board the option of conditionally approving a plan or element, and would make clarifying changes in those provisions.

The bill would require the board, if the board conditionally approves a countywide or regional integrated waste management plan, or any element of a plan, to issue a notice of conditional approval to the city, county, or regional agency identifying the specific reasons for the conditional approval, along with specific recommendations on how to correct the deficiencies in the plan or element. The bill would require any city, county, or regional agency which receives a notice of conditional approval, within 60 days of receiving the notice of conditional approval, to submit a compliance schedule to the board that demonstrates how the city, county, or regional agency will correct the deficiencies identified in the notice of conditional approval by the earliest possible date, but in no event beyond 1 year from the date the conditional approval was issued, thereby imposing a state-mandated local program by creating a new crime for failure to submit the compliance schedule and by imposing new duties on local agencies. The bill would authorize the board, if it determines, based on substantial evidence in the record, that a city, county, or regional agency is not in substantial compliance with an approved compliance schedule, to revoke the notice of conditional approval.

(6) Under the act, the board is authorized to impose administrative civil penalties on any city or county which fails to submit an adequate element or plan or which fails to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

implement its source reduction and recycling element or household hazardous waste element.

This bill would specify circumstances under which the board is not to impose penalties against a city or county, and would define, for purposes of those provisions, "good faith effort." The bill would require any civil penalty imposed pursuant to these and other related provisions to be deposited in the Local Government Assistance Account, which this bill would create in the Integrated Waste Management Fund, and would require those funds to be used for specified purposes.

(7) The act requires any manufacturer of a product packaged in a rigid plastic packaging container, as defined, on or before January 1, 1995, to make a specified reporting to the board and, on or before January 1, 1996, to diligently seek one or more "nonobjection letters" from the United States Food and Drug Administration which will permit the manufacturer to use recycled plastic in the manufacture of rigid plastic packaging containers for use with food or cosmetics, defined as specified.

This bill would specify that every manufacturer of a product packaged in a rigid plastic packaging container that is manufactured for use with food or cosmetics is required to make that reporting and to seek one or more "nonobjection letters."

(8) The bill would require the board to adopt, by regulation, a permitting, inspection, and enforcement program for the disposal of asbestos containing waste, as defined, at any solid waste facility or disposal site regulated pursuant to specified provisions of the act. The bill would require, on or before March 1, 1995, or on the earliest feasible date thereafter, for the board and the Department of Toxic Substances Control to enter into a specified memorandum of understanding that defines the enforcement duties of each agency at those sites. The bill would require any regulations adopted by the board to implement this program to be deemed emergency regulations, as specified.

(9) The act requires each operator of a disposal facility in the state to pay a quarterly fee to the State Board of Equalization, as specified, for all waste disposed of at each disposal site.

This bill would delete obsolete provisions in those provisions.

(10) The bill would prescribe other related matters.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 1228 (SB 1735) Greene. School facilities.

Existing law establishes the Leroy F. Greene School Building Lease-Purchase Law of 1976 (Greene Act) for the purpose of providing funding to school districts for school facilities construction under certain conditions. Existing law confers various responsibilities and powers on the State Allocation Board relating to the administration of the Greene Act, including, among other things, the power to fix specified changes for any project, as specified.

This bill would make technical changes to certain provisions relating to the State Allocation Board's responsibilities and powers under the Greene Act. The bill would include, within the board's power to fix specified changes for any project, the power to fix those changes for rehabilitation of the project.

Existing law establishes the Emergency Classroom Law of 1979 for the purpose of providing school districts with funding for the lease of portable classrooms under certain conditions.

This bill would change the name of that law to the "State Relocatable Classroom Law of 1979."

Under existing law, there is within the Department of General Services the Office of Local Assistance and a local assistance officer. Under existing law, the Office of Local Assistance performs specified functions with respect to the construction of public schools.

This bill would refer to the Office of Public School Construction rather than the Office of Local Assistance. The bill would also change the name of the local assistance officer

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

within the Department of General Services to the Executive Officer of the Office of Public School Construction.

Ch. 1229 (SB 1971) Bergeson. Environmental quality.

(1) Existing law, the California Environmental Quality Act, requires a public lead agency, as defined, to prepare an environmental impact report on a project which it proposes to carry out or approve that may have a significant effect on the environment, as defined, unless the project is exempt from the act. The act authorizes the use of a master environmental impact report for specified categories of projects.

This bill would authorize the use of a master environmental impact report for a project that is a plan proposed by a local agency for the reuse of a federal military base or reservation that has been closed or that is proposed for closure.

(2) The bill would incorporate changes in Section 21157 of the Public Resources Code proposed by AB 314, but only if this bill and AB 314 are both chaptered and become effective and this bill is chaptered last.

Ch. 1230 (SB 749) Thompson. Environmental quality.

(1) Existing law, the California Environmental Quality Act, requires the lead public agency, as defined, after the conduct of an initial study, to prepare a negative declaration or an environmental impact report for a proposed project, as specified.

The act requires that the environmental impact report set forth, among other things, the potentially significant effects on the environment, as defined, of the project and a brief written statement indicating the reasons for determining that various potential effects are not significant and consequently have not been discussed in detail in the report.

This bill would specify that a lead agency, in an environmental impact report, is required to focus the discussion on those potential effects on the environment which the lead agency has determined are, or may be, significant and may limit the discussion on other effects to a brief explanation as to why those effects are not potentially significant. The bill would declare policy in that regard and make related changes.

The bill would revise the definition of "project" for purposes of the act to specify that it is an activity which may cause a direct physical change, or a reasonably foreseeable indirect change, in the environment, and would express legislative intent in that regard.

The bill would exempt from the act, with a specified exception, any development project which consists of the construction, conversion, or use of residential housing consisting of not more than 45 units in an urbanized area, as defined, that is affordable to lower income households or low- and moderate-income households, as prescribed, that meets specified requirements. By imposing new duties on local agencies regarding determining the applicability of, and giving notice of, that exemption, the bill would impose a state-mandated local program.

(2) The act requires an environmental impact report to set forth the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity.

This bill would delete that requirement and would conform related provisions. These provisions of the bill would prevail over specified provisions of AB 314 if both bills are chaptered, regardless of which bill is chaptered last.

(3) The act requires a lead agency to adopt a negative declaration if it determines that there is no substantial evidence in light of the record before the lead agency that the proposed project would have a significant effect on the environment, or, after an initial study identifying potentially significant effects on the environment that may result from the project, that the project, as revised and mitigated, would not have a significant effect on the environment.

This bill would authorize the lead agency to conclude that certain mitigation measures that have been identified in the initial study are infeasible or otherwise undesirable, and would, in those circumstances, authorize the lead agency, prior to approving the project, to delete those mitigation measures and substitute for them other mitigation measures that are equivalent or more effective in mitigating significant effects on the environment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) The act prescribes procedures relating to the preparation and certification of the record of proceedings in an action or proceeding alleging noncompliance with the act.

This bill would require the record of proceedings to include specified items.

(5) The act requires the Office of Planning and Research, at least every 2 years, to review the guidelines adopted to implement the act. The act authorizes the use of a focused environmental impact report under prescribed circumstances.

This bill would require the office, in its next scheduled review of the guidelines, to review and provide further development of the concept of using a focused environmental impact report, and to provide recommendations for revising the definition of "project" in the guidelines to conform to changes in that definition made by the bill.

(6) The bill would also authorize the office to include in its annual survey questions relating to the impact of the exemption for development projects that are affordable to lower income households or to low- and moderate-income households on lead agencies that are considering the approval of those development projects.

(7) The bill would make various clarifying and technical changes.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Moreover, the bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for other costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for those other costs.

(9) This bill also makes additional changes proposed by AB 314, to be operative only if AB 314 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1231 (AB 405) Hauser. Spud Point Marina: loan repayment.

Under existing law, loans for the construction of the commercial fishing vessel marina at Spud Point in Bodega Bay were granted by the Department of Boating and Waterways. Existing law requires the loans to be repaid with interest over a period of 30 years for revenue-producing features, and 50 years for nonrevenue-producing features.

This bill would make legislative findings, and would authorize the loan payments on the loans administered by the department for the Spud Point Marina to be renegotiated by the department and the County of Sonoma, with the advice and consent of the Boating and Waterways Commission, to solve the fiscal problems involving the marina existing on the effective date of the bill.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 1232 (AB 3619) Moore. State civil service: family care leave.

Existing law makes it an unlawful employment practice for specified employers, including the state, to refuse to grant a request by an employee who meets certain criteria, to take up to a total of 4 months in a 24-month period for any unpaid family care leave. Family care leave, for purposes of these provisions, means leave for reason of the birth of a child of the employee, the placement of a child with an employee in connection with the adoption of the child by the employee, the serious illness of a child of the employee, or the serious health condition of a parent or spouse of the employee.

Existing civil service law provides that an appointing authority's obligation to provide family care leave, other than for birth or adoption of a child, resulting in costs incurred by the state shall be contingent upon provision in the annual Budget Act.

This bill would delete this civil service provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1233 (AB 3661) Allen. Vessel pumpout facilities: coastal, water, and community facilities.

(1) The Budget Act of 1994 appropriated funds to the Department of Boating and Waterways for allocation to unspecified local assistance projects subject to the provision that those funds be allocated pursuant to subsequent legislation enacted in the 1993–94 Regular Session. The Budget Act of 1994 also appropriated funds to the Department of Boating and Waterways for unspecified capital outlay projects subject to the provision that those funds be appropriated pursuant to subsequent legislation enacted in the 1993–94 Regular Session.

This bill would, in accordance with the Budget Act of 1994, allocate those local assistance funds for specified projects and would appropriate those capital outlay funds for expenditure during the 1994–95, 1995–96, and 1996–97 fiscal years for specified projects.

(2) Under existing law, loans for the construction of the commercial fishing vessel marina at Spud Point in Bodega Bay were granted by the Department of Boating and Waterways. Existing law requires the loans to be repaid with interest over a period of 30 years for revenue-producing features, and 50 years for nonrevenue-producing features.

This bill would make legislative findings, and would authorize the loan payments on the loans administered by the department for the Spud Point Marina to be renegotiated by the department and the County of Sonoma, with the advice and consent of the Boating and Waterways Commission, to solve the fiscal problems involving the marina existing on the effective date of the bill.

(3) Existing provisions of the Budget Act of 1994 appropriate certain funds to the Department of Parks and Recreation from the California Wildlife, Coastal, and Park Land Fund of 1988 for capital outlay.

This bill would additionally appropriate $96,000 for working drawings for the Empire Mine Shaft project, less $48,000 in reimbursements. The bill would also reappropriate to the department certain funds appropriated from the Parklands Fund of 1984 to be used for the Downieville Community Park project.

(4) Existing law authorizes the Department of Boating and Waterways to make loans to specified cities, counties, or districts for the planning, acquisition, construction, improvement, maintenance, or operation of small craft harbors and facilities in connection therewith, small craft launching facilities, restrooms, and vessel pumpout stations.

This bill would, additionally, authorize the department to grant funds to any public agency for the construction or procurement of vessel pumpout or dump stations and ancillary items. The bill would require the department to establish general policies for determining appropriate bodies of water and locations thereon for placing vessel pumpout or dump stations. The bill would authorize the department to adopt rules and regulations that it finds necessary to carry out the bill.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1234 (AB 2556) Martinez. Freeway construction: environmental quality.

Existing law authorizes the Department of Transportation to construct a freeway without an agreement with a county or city, on the route determined by the California Transportation Commission, if specified requirements have been met, including the requirements that the department prepare a draft environmental impact report on the unconstructed portion of the freeway within one year of the enactment of specified existing law, that the department prepare a final environmental impact report within 12 months following the public review period for the draft environmental impact report, and that the commission select the route within 6 months of the completion of the final report. Existing law also authorizes the commission to hold public hearings on the draft environmental impact report or statement, to be concluded within 6 months of its availability.

This bill would remove the deadlines for complying with those conditions. The bill would require the department to establish an outreach program to maximize the participation of local businesses and professionals in the construction of freeway segments, as specified. The bill would also make clarifying technical changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1235 (AB 51) Costa. Housing: regional housing needs.

(1) Existing law requires that each planning agency provide an annual report to the legislative body on progress in meeting regional housing needs, as specified.

This bill would require that the annual report on progress in meeting regional housing needs for the previous calendar year shall be provided, using forms and definitions adopted by the Department of Housing and Community Development pursuant to the Administrative Procedure Act, to the legislative body on or before July 1 of each year.

(2) Existing law requires each city, county, and city and county to adopt for its jurisdiction, according to specified deadlines, a general plan that includes certain mandatory elements, including a housing element. Existing law requires the Department of Housing and Community Development to review local housing elements for conformity with specified provisions of law, including the regional housing needs of the city or county. Under existing law, either a council of governments or the Department of Housing and Community Development, in areas with no council of governments, is required to determine, in accordance with specified procedures, the share of a city or county of regional housing needs in all economic sectors of housing.

This bill would revise the conditions under which the shares of regional housing needs to be met may be transferred among cities and counties. By requiring new procedures of councils of governments, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1236 (AB 2425) Baca. California State Lottery: allocations.

(1) Under the California State Lottery Act of 1984, not less than 84% of the total annual revenues from the sale of state lottery tickets or shares is required to be returned to the public in the form of prizes and net revenues to benefit public education. Fifty percent of this total is returned in the form of prizes and at least 34% is allocated to the benefit of public education by being deposited in the California State Lottery Education Fund which is continuously appropriated for these purposes. The remaining 16% is allocated for lottery expenses.

This bill would require that all of the interest earned upon funds held in the State Lottery Fund be allocated to the benefit of public education. The bill would specify that this interest is not to be considered as part of the 34% that is otherwise required to be allocated for the benefit of public education. The bill would also declare that lottery funds allocated for the benefit of public education are in addition to other funds appropriated or required under existing constitutional reservations for educational purposes.

(2) As an initiative measure, the act provides that none of its provisions may be changed except to further its purpose by a bill passed by a ⅔ vote of each house of the Legislature and signed by the Governor.

This bill would declare that it furthers the purposes of the act and would require a ⅔ vote.

Ch. 1237 (AB 2639) T. Friedman. Vehicles: ignition interlock devices.

(1) Existing law authorizes a court to require any person who is convicted of a violation of specified provisions relating to driving under the influence of any alcoholic beverage or drug and who is granted probation to not operate a vehicle unless the vehicle is equipped with a functioning, certified ignition interlock device.

Existing law also requires a court to prohibit a person from driving a vehicle without an ignition interlock device if that person has been convicted of a violation of specified provisions relating to driving under the influence of any alcoholic beverage or drug and the conviction occurred within 7 years of a separate violation of those provisions which

NOTE: Superior numbers appear as a separate section at the end of the digests.

resulted in a conviction, except as specified.

This bill would substantially recast the existing provisions and procedures governing the monitoring, installation, and operation of ignition interlock devices.

The bill would allow a court to prohibit any person who is convicted of the offenses of driving under the influence of alcoholic beverages or drugs, regardless of whether probation is granted, from operating a motor vehicle unless that vehicle is equipped with a functioning, certified ignition interlock device. The bill would impose additional monitoring duties upon the courts, thereby imposing a state-mandated local program, and would revise the duties of the Department of Motor Vehicles, including requiring the department to crossmatch, on a weekly basis, driver's license records of persons convicted of the described offense with records of those persons applying for a change of ownership or transfer of title and to report any matched records to the appropriate court.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1238 (AB 3638) Margolin. Judges: acceptance of gifts.

Existing provisions of the California Constitution create the Commission on Judicial Performance with powers to investigate and recommend discipline of judges for misconduct.

This bill would enact limitations on the amount of gifts, as defined, that may be accepted by judges, as defined, and would prohibit judges from accepting any honorarium. The bill would require the commission to enforce these prohibitions.

Ch. 1239 (SB 457) Presley. Healthy Start Support Services for Children Act.

(1) Existing law, the Healthy Start Support Services for Children Act (the act), requires the Superintendent of Public Instruction to award grants to local educational agencies or consortia to fund programs in qualifying schools that provide designated support services to eligible pupils and their families.

The act defines "qualifying school" as, among other things, a school in which 50% or more of the enrolled pupils are from families that receive welfare benefits, have limited English proficiency, or both, or are eligible to receive free or reduced-price meals.

This bill would revise that definition to apply to a school that maintains kindergarten or any of grades 1 to 6, inclusive, in which 50% or more of the enrolled pupils meet the above criteria, or a school that maintains any of grades 7 to 12, inclusive, in which 35% or more of the pupils meet those criteria.

(2) The act establishes the Healthy Start Support Services for Children Program Council. One of the duties of the council is to review grant applications submitted to the lead agency, as specified.

This bill would change that duty to assisting the lead agency in reviewing those applications.

(3) The act authorizes the issuance of both planning grants and operational grants to local educational agencies or consortia that provide support services, as defined, to pupils and their families. The grants are awarded based on specified criteria, as identified in the application of the agency or consortium.

This bill would authorize the superintendent to offer a planning grant to an agency or consortium that submits an application for an operational grant but does not meet the criteria for an operational grant, as specified.

In addition, the bill would authorize the issuance of county or regional planning and coordinating grants to a specified number of local educational agencies or consortia each

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

year, for the purposes of increasing the local planning and coordinating efforts among school districts, county offices of education, county governments, community organizations, and nonprofit organizations, as specified. The grants would be limited to an amount not to exceed $50,000.

(4) The act limits the amount that may be used for program administration, evaluation, and technical assistance to 5%, and sets forth a timeline for issuing requests for applications, submitting applications, and awarding grants.

This bill instead would limit that amount to no more than 10% of the amount appropriated in a fiscal year for the general operating expenses of the act, and would change the dates in the timeline. This bill would authorize an amount awarded for an operational grant that is not expended within the 3-year period to be carried over to the subsequent year to continue the program, as specified.

This bill would incorporate additional changes in Section 8804 of the Education Code, proposed by AB 2682, to be operative only if AB 2682 and this bill are chaptered and this bill is chaptered last.

This bill would incorporate additional changes in Section 8807 of the Education Code, proposed by AB 3618, to be operative only if AB 3618 and this bill are chaptered and this bill is chaptered last.

Ch. 1240 (SB 679) Thompson. Local transactions and use taxes.

Existing law authorizes various local governmental entities, subject to certain requirements, to levy transactions and use taxes pursuant to the Transactions and Use Tax Law.

This bill would additionally authorize the City of Lakeport to levy, subject to voter approval, a transactions and use tax at a rate of 0.25% or a multiple thereof, not to exceed 1% for purposes of repair, replacement, construction, or reconstruction of that city's streets and roads system.

This bill would also authorize the City of Clearlake to levy, subject to voter approval, a transactions and use tax at a rate of 0.25% or 0.5% for purposes of funding local public safety services, as defined in a specified statute.

This bill would contain legislative findings and declarations as to the necessity of a special statute.

Ch. 1241 (SB 1029) Thompson. Medi-Cal: disproportionate share providers.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for the supplemental reimbursement of hospitals that serve a disproportionate share of low-income persons, and includes provisions for the reimbursement of those hospitals for eligible capital projects.

This bill would specify that an eligible disproportionate share hospital that has submitted final plans for an eligible capital project may submit substitute final plans and shall qualify for supplemental reimbursement for the revised capital project as described in the substitute final plans if the substitute capital project is otherwise eligible for reimbursement, the substitute plans are submitted prior to June 30, 1995, and the substitutions serve to replace buildings that are not in compliance with current seismic safety standards.

Ch. 1242 (AB 3343) Hannigan. Crimes: victims.

(1) Existing law authorizes the State Board of Control to provide assistance to victims of crime for the pecuniary losses they suffer as a direct result of criminal acts.

This bill would revise and recast these provisions to, among other things, provide that in cases where the crime involves child abuse or molestation, if the board seeks an independent examination and report from a provider of psychological or psychiatric treatment or mental health counseling services, the provider shall have expertise in the needs of victims of child abuse or molestation, as appropriate; and make technical changes.

(2) Existing law establishes the Franchise Tax Board and sets forth its duties and powers, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize a county to refer specified fines, penalties, or forfeitures imposed for criminal offenses payable to the county to the Franchise Tax Board for collection, would specify the authority of the Franchise Tax Board in collecting these amounts, would specify the deduction and transfer to the General Fund, as specified, of costs incurred in collecting these amounts, and would specify the allocation of amounts remitted to the General Fund. The bill would also appropriate $369,000 to the Franchise Tax Board for these purposes in augmentation of the Budget Act of 1994, as specified; would create the Court Collection Account, a continuously appropriated fund, in the State Treasury; and would require the Franchise Tax Board to report the results of this court collection program to the Legislature on or before April 1, 1998, and require the board to either implement certain recommendations contained in a specified study or report to the Legislature by June 1, 1995, as to why those recommendations have not been implemented.

This bill would incorporate additional changes in Section 1463.001 of the Penal Code proposed by SB 1393, to be operative only if SB 1393 and this bill are both enacted and become effective on or before January 1, 1995, and this bill is enacted last.

This bill would incorporate additional changes in Section 19531 of the Revenue and Taxation Code proposed by SB 1490, to be operative only if SB 1490 and this bill are both enacted and become effective on January 1, 1995, and this bill is enacted last.

Ch. 1243 (SB 1805) Committee on Revenue and Taxation. Taxation.

(1) Existing law permits any person to negotiate and effect insurance on his or her property with any nonadmitted insurer to indemnify against loss, damage, or liability.

This bill would recast that provision and provide that any person may negotiate and effect insurance to protect himself or herself against loss, damage, or liability with any nonadmitted insurer.

(2) Existing law imposes a tax on the gross premiums of insurance obtained from nonadmitted insurers, except as specified. Existing law provides that the tax imposed on the gross premiums of insurance obtained from nonadmitted insurers in a single transaction is determined by allocating to the state a specified portion of the total premium, as computed on the exposure in this state on the basis of any single standard rating method in use in all states or countries where the insurance applies.

This bill would provide that the tax shall not apply if a tax is paid by a risk retention group, as specified. The bill would also provide that, with the prior approval of the Franchise Tax Board, the exposure in this state that is used for the allocation to the state may be made on any other reasonable basis as determined by the Franchise Tax Board in its sole discretion.

(3) Existing law provides that the amount appropriated by the Legislature for the use of the Department of Motor Vehicles for the enforcement of the Vehicle License Fee Law be transferred from the Motor Vehicle License Fee Account to the Motor Vehicle Account in the State Transportation Fund.

This bill would additionally provide that the amount appropriated by the Legislature for use of the Franchise Tax Board for the enforcement of the Vehicle License Fee Law be transferred from the Motor Vehicle License Fee Account to the Motor Vehicle Account in the State Transportation Fund.

Existing law provides that money from commercial vehicle registration fees are deposited in the State Highway Account in the State Transportation Fund. Existing law requires the Controller to transfer an amount equal to the costs incurred by the Department of Motor Vehicles in connection with its duties relating to those fees from the State Highway Account to the Motor Vehicle Account.

This bill would require the Controller to also transfer an amount equal to the costs incurred by the Franchise Tax Board in connection with its duties relating to those fees from the State Highway Account to the Motor Vehicle Account.

(4) Existing law permits the State Department of Social Services to refer specified child support delinquencies for collection by the Franchise Tax Board. Those amounts collected by the Franchise Tax Board are deposited to the credit of the Special Deposit Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete an incorrect reference regarding the deposit in the Personal Income Tax Fund of fees received by the Franchise Tax Board in connection with the collection of those delinquencies.

(5) The Bank and Corporation Tax Law imposes taxes measured by income and, in the case of a business with income derived from or attributable to sources both within and without this state, the income is apportioned between this state and the other states and foreign countries for tax purposes in accordance with a specified formula based on the property, payroll, and sales within and without this state. That law provides that the Franchise Tax Board may, in the case of a corporation required to report under those provisions owning or controlling, or owned or controlled by, directly or indirectly, another corporation or corporations, require a consolidated report showing the combined net income and assess the tax accordingly. That law defines, for those purposes, that direct or indirect ownership or control of more than 50% of the voting stock of the taxpayer shall constitute ownership or control.

This bill would delete the provisions defining ownership or control for income years beginning on or after January 1, 1995, and, instead, provide for purposes of that law, except as provided, that the income and apportionment factors of 2 or more corporations shall be included in a combined report only if the corporations, otherwise meeting certain requirements, are members of a commonly controlled group, as defined.

(6) Chapter 31 of the Statutes of 1993, among other things, made various changes to the Revenue and Taxation Code by deleting specified provisions in the Personal Income Tax Law and the Bank and Corporation Tax Law, relating to, among other things, administration, enforcement, and penalties, and adding substantially similar provisions under a new part to that code that would apply to either or both laws, as specified.

This bill would make various, nonsubstantive changes relating thereto, and to various other provisions of the Revenue and Taxation Code, including renumbering of sections, correcting cross-references, and other clarifying changes.

(7) The Bank and Corporation Tax Law provides that for any income year beginning on or after January 1, 1994, consideration for water's-edge contracts in existence as of that date is no longer provided by law, that those contracts are rescinded, as provided, and any fiscal year taxpayer whose contract is in effect as of December 31, 1993, shall continue to be bound by that contract until the close of its income year after January 1, 1994, and before December 31, 1994.

This bill would provide that notwithstanding those provisions, and except as provided, specified taxpayers that are members of a water's-edge group shall continue to be bound by the contract in effect as of December 31, 1993, until the income year beginning prior to January 1, 1994, and ending in 1994 for each of those taxpayers has ended.

(8) Existing law provides for purposes of income and bank and corporation franchise taxes that penalties shall be imposed for specified underpayments of tax.

This bill would provide a specified exception to those provisions.

(9) Existing law imposes specified duties and responsibilities upon the Franchise Tax Board.

This bill would provide that in the case of a specified new statutory provision, as defined, the Franchise Tax Board itself is authorized until January 1, 1995, to grant relief relating to waiving penalties or perfecting elections, as provided. The bill would require the Franchise Tax Board to make a specified report to the Legislature on or before March 1, 1995, on the utilization of these provisions.

(10) This bill would incorporate additional changes in Sections 64, 18402, and 18621.5 of the Revenue and Taxation Code, proposed by SB 469, to be operative only if SB 469 and this bill are both chaptered and become operative on or before January 1, 1995, and this bill is chaptered last. These changes would become operative on the operative date of SB 469.

(11) This bill would incorporate additional changes in Section 18723 of the Revenue and Taxation Code, proposed by AB 339, to be operative only if AB 339 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the operative date of AB 339.

(12) This bill would incorporate additional changes in Section 19531 of the Revenue

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and Taxation Code, proposed by this bill and SB 1490 or AB 3343, or both, to become operative only if SB 1490 or AB 3343, or both, and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last. These changes would become operative on January 1, 1995.

(13) This bill would incorporate additional changes in Section 23609 of the Revenue and Taxation Code, proposed by AB 2407, to be operative only if AB 2407 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the operative date of AB 2407.

(14) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1244 (AB 2976) Solis. Fire protection: State Board of Fire Services: California Firefighters' Memorial Fund: Contributions.

Under existing law there exists in the office of the State Fire Marshal a State Board of Fire Services consisting of 18 members. Among other things, the State Board of Fire Services provides policy guidance to the State Fire Marshal in the establishment and validation of minimum standards for fire protection personnel. Under existing law the Governor appoints to the board one representative from city government, selected from elected or appointed city chief administrative officers, and one representative from county government, selected from elected or appointed county chief administrative officers.

This bill would require that the city government representative appointed to the board be selected from elected city mayors or council members or elected or appointed city chief administrative officers and that the county government representative be selected from elected county supervisors or elected or appointed county chief administrative officers.

Under existing law regulating the administration of personal income taxes and bank and corporation taxes, individual taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds or accounts, including, among others, the California Firefighters' Memorial Fund. Existing law provides for the repeal of the contribution provisions for this fund on January 1, 1999, or on January 1 of any calendar year that the Franchise Tax Board estimates the minimum contribution amount will be less than a prescribed amount. Existing law also requires the Franchise Tax Board to adjust the minimum contribution amount for purposes of the repeal provisions commencing with the 1994 calendar year.

This bill would modify these provisions so that they would become inoperative commencing on January 1 of any calendar year beginning on or after January 1, 1995, that the Franchise Tax Board estimates the minimum contribution amount will be less than the prescribed amount, and would be repealed on January 1, 1999. This bill would also require the adjustment of the minimum amount beginning with the 1996 calendar year.

This bill would incorporate additional changes to the Revenue and Taxation Code, proposed by SB 1805, to be operative only if SB 1805 and this bill are both chaptered and become effective on or before January 1, 1995. These changes would become operative on January 1, 1995.

Ch. 1245 (AB 1983) O'Connell. Taxation: disaster relief.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of disaster as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by a county that was declared by the Governor to be in a state of disaster as a result of a fire occurring in

NOTE: Superior numbers appear as a separate section at the end of the digests.

California in August of 1994. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

The existing Personal Income Tax Law and Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of disaster.

This bill would extend these provisions to losses sustained as a result of fire or any other related casualty that occurred in the County of San Luis Obispo in August of 1994, and eliminate, for purposes of this extension, the requirement that the Governor have proclaimed the County of San Luis Obispo to be in a state of disaster. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

This bill would contain legislative findings and declarations as to the statewide public purpose of this bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1246 (AB 3477) O'Connell. Elder and dependent adults.

(1) Existing law contains provisions governing the licensure of home health agencies, as defined, and provides for the administration of these provisions by the State Department of Health Services.

Existing law requires certain health facilities to adopt an approved training program for nurses assistants, as defined, provides for the issuance of certificates by the State Department of Health Services, regulates the use or related titles, and requires establishment of related fees.

This bill would similarly, require a training and certificate program for home health aides, as defined, and would make conforming changes.

Existing law requires the state department to provide certificate holders with prescribed notice regarding renewal of the certificate.

This bill would provide that nonreceipt of this notice does not relieve the applicant of the obligation to timely renew his or her certificate, and failure to do so results in expiration of the certificate.

This bill would, with certain exceptions, require a criminal background check for nurse assistants and home health aides as a component of this certification program. It would provide that the applicant pay for the cost of fingerprinting and processing, but would require the department to reimburse the applicant for this cost if the search demonstrates that the applicant does not have any criminal convictions. The bill would recast the fee provisions and would revise certain fees.

Existing law provides that these fees shall not exceed the actual costs of providing the services.

This bill would provide that the department is not required to adopt regulations to demonstrate that the fees do not exceed the actual costs.

Existing law authorizes the department to discipline nurse assistants for certain specified conduct.

This bill would repeal, recast, and reenact those provisions, and make them applicable also to home health aides.

By changing the definition of related crimes, this bill would impose a state-mandated local program.

(2) This bill would require criminal background checks for all initial applicants for nurse assistant or home health aide certificates. For nurse assistant and home health aide applicants, the bill would require criminal background checks commencing July 1, 1995. It would require criminal background checks to be phased in for renewal of nurse assistant and home health aide certificates by June 30, 1997. It would require, until July 1, 1997, employers to reimburse certificate holders who are their employees for the amount of $7 for the cost of the criminal background check upon receipt of evidence that the renewal application has been submitted.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the department to deny, suspend, or revoke a certified nurse assistant or home health aide certificate or application if the applicant or certificate holder has been convicted of certain violations, unless certain exceptions apply.

(3) Existing law provides for supplemental in-home supportive services to be provided in a uniform manner in every county. Existing law authorizes counties to hire homemakers and other in-home supportive personnel for this purpose.

The bill would specify that a law enforcement agency may seek a search warrant for the inspection of premises if there is probable cause to believe an elder or dependent adult on those premises is subject to abuse.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, no reimbursement is required for a specified reason.

Ch. 1247 (AB 1926) Peace. Insurance: fraud.

(1) Existing law provides that it is unlawful to knowingly employ runners, cappers, steerers, or other persons to procure clients or patients to perform or obtain services or benefits pursuant to specified workers' compensation provisions. A violation of this prohibition would, among other things, subject a person to an assessment of not more than 3 times the amount of each claim for compensation, as defined, submitted in violation of the above provisions.

This bill would extend the applicability of that prohibition to certain crimes involving fraudulent claims against insurers, as specified, and make related changes. The bill would, additionally, make a person who violates these provisions subject to a penalty of 3 times the amount of each false or fraudulent insurance claim or activity punishable, as specified.

(2) Existing law establishes an advisory committee on automobile insurance fraud within the Bureau of Fraudulent Claims.

This bill would revise membership of the committee to, among other things, add insurer representatives, and would make related changes.

(3) Existing law requires every insurer doing business in this state to pay an annual fee, as specified, for each vehicle it insures in this state, for the purpose of funding increased investigation and prosecution of fraudulent automobile insurance claims. Existing law apportions this money, as specified.

This bill would require that a specified portion of this fee be allocated to the Department of the California Highway Patrol to investigate suspected automobile insurance fraud and would make additional revisions for the allocation of those funds.

(4) Existing law provides for the licensure of insurance claims analysis bureaus.

This bill would revise the purposes of insurance claims analysis bureaus.

(5) Existing law imposes requirements on, and regulates the procedures for, the transfer of title or interest on motor vehicles registered in this state.

This bill would provide that in any criminal proceeding in which ownership, possession, or use of a motor vehicle is an issue, a copy certified by the department as its record of title on file, or with the official custodian of those documents in another state, shall be evidence of ownership of the motor vehicle.

This bill would require the owner of a motor vehicle who seeks to export from the United States a vehicle titled in this state, to appear at the Department of Motor Vehicles, as specified. If there are no unsatisfied liens on the motor vehicle and the certificate of title is found to be in proper order, the department would enter into its record of title that the vehicle is intended for permanent exportation.

This bill would also establish procedures for the release of a stolen motor vehicle retained as evidence in a criminal action, as specified.

(6) This bill would, in addition, enact the Motor Vehicle Theft Prevention Act, for purposes of prevention and increased investigation of economic automobile theft. The bill would specify certain funding and reporting requirements, as specified. It would require the Department of the California Highway Patrol to establish a program to

NOTE: Superior numbers appear as a separate section at the end of the digests.

reduce the incidence of economic auto theft, as specified.

(7) Existing law requires the driver of a motor vehicle involved in a motor vehicle accident that has resulted in property damage in excess of specified amounts or in bodily injury or death to report the accident to the Department of Motor Vehicles.

This bill would also require the driver to identify on the form, by name and address, if available, any person involved in the accident complaining of bodily injury.

(8) Existing law requires the driver of a vehicle involved in an accident resulting in injury or death to give certain information to a person struck or the driver or other occupants of the other vehicle collided with.

This bill would also require the furnishing of information concerning injured occupants of the driver's vehicle.

(9) Existing law provides that all accident reports are for the confidential use of the Department of the California Highway Patrol and the Department of Motor Vehicles, except that the Department of the California Highway Patrol or the law enforcement agency to whom the accident was reported shall disclose the contents of the reports to persons with a proper interest, as specified.

This bill would specify that names and addresses of injured persons and statements of occupants injured in the accident are part of the contents of those reports.

Ch. 1248 (SB 1743) Lockyer. Motor vehicle theft prevention.

Existing law, the Motor Vehicle Theft and Motor Vehicle Insurance Fraud Reporting Act, provides for the release of certain relevant information by insurers to authorized governmental agencies concerning motor vehicle theft or insurance fraud, as specified.

Existing law requires each insurer doing business in this state to pay an annual fee, not to exceed $1 annually for each vehicle it insures in this state, as specified, in order to fund increased investigation and prosecution of fraudulent automobile insurance claims.

This bill would provide that the fee shall also be used to fund increased investigation and prosecution of economic automobile theft, as specified. The bill would make related changes.

The bill would designate the Commissioner of the California Highway Patrol as the Statewide Vehicle Theft Investigation and Apprehension Coordinator with specified duties.

This bill would, in addition, enact the Motor Vehicle Theft Prevention Act, for purposes of prevention and increased investigation of economic automobile theft. The bill would specify certain funding and reporting requirements, as specified. It would require the California Highway Patrol to establish a program, to reduce the incidence of economic auto theft, as specified.

The bill would state legislative intent relative to certain provisions contained in AB 1926.

Ch. 1249 (AB 2240) McDonald. Graffiti clearinghouse.

Under existing law, there is no state agency with responsibilities for a statewide graffiti abatement program.

This bill would create the State Graffiti Clearinghouse in the Office of Criminal Justice Planning and would vest specified responsibilities in the clearinghouse relating to graffiti abatement. The bill would declare legislative intent with regard to the financing for the clearinghouse.

Ch. 1250 (AB 2571) Polanco. Employee Housing Act: enforcement.

Existing law, known as the Employee Housing Act, generally provides for the licensure and regulation of employee housing in the state. Among other things, the act prohibits local enforcement agencies, or the state Department of Housing and Community Development, in areas where it serves as an enforcement agency, from ordering the vacating of all or any part of an employee accommodation unless it concurrently orders the operator to provide for the relocation of the tenants, as specified. Existing law authorizes the enforcement agency to require vacation and demolition of the building, or itself vacate the building, repair or demolish the building, or institute any other

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

appropriate action or proceeding, if the repair work is not done as scheduled, cannot be completed within a reasonable period of time, or if there is a significant threat to the health and safety of the residents or of the public.

This bill would provide that, in any civil action brought by a private person or entity to obtain tenant relocation assistance, as specified, the private person or entity, if he, she, or it is the prevailing party, may be granted reasonable attorney's fees and costs, in addition to any other remedy granted.

Ch. 1251 (AB 2663) Sher. Land use.

Existing law provides for the payment of open-space subventions to local governments. Existing law requires the governing body of each county, city, or city and county to submit a report annually to the Secretary of the Resources Agency itemizing the number of acres of land it believes to be qualified for state payments. The Controller is required to pay amounts certified by the secretary and may withhold and deduct any certified overpayment.

This bill would require the governing body of each county, city, or city and county to report annually to the secretary the number of acres which qualify for state payments. The bill would additionally permit the Controller to withhold and deduct any cancellation fees for contracts for land conservation under the Williamson Act not collected and transmitted to the Controller.

The California Land Conservation Act of 1965, otherwise known as the Williamson Act, permits a county or city to establish agricultural preserves in which, pursuant to contract with landowners, a county or city may limit the use of agricultural land for the purpose of preserving that land. Existing law permits a county board of supervisors to impose conditions on lands to be placed within the preserves.

This bill would additionally permit the board of supervisors to impose conditions on land uses subject to specified principles of compatibility and would make conforming changes.

Ch. 1252 (AB 2890) Statham. Motor vehicle insurance.

Under existing law, where 2 or more policies affording valid and collectible liability insurance apply to the same motor vehicle, it is conclusively presumed that the insurance afforded by the policy in which the motor vehicle is described or rated as an owned automobile is primary and the insurance afforded by any other policy or policies is excess.

This bill would provide that where 2 or more personal policies affording liability insurance that apply to the same motor vehicle in an occurrence out of which a loss shall arise, and one policy is primary and one or more policies are excess, then each insurer shall pay for the cost of defense in proportion to the percentage of total damages paid by that insurer, as specified.

Ch. 1253 (AB 3539) Aguiar. Vehicles: brokering.

(1) Existing law defines a buying and selling service, for the purposes of specified provisions of the Insurance Code relating to motor clubs, as an arrangement by a motor club whereby the holder of a service contract with the club is aided in any way in the purchase or sale of an automobile.

This bill would require an advertisement to disclose specified information, if the advertisement is of a service offered by a motor club to refer members to a new motor vehicle dealer for the purchase of a new motor vehicle and if the dealer pays the motor club any compensation.

(2) Existing law defines "dealer" for purposes of the Vehicle Code as, among other things, a person who is engaged in the business of selling vehicles.

This bill would define "brokering" for purposes of the Vehicle Code as an arrangement under which a dealer, for consideration, provides the service of arranging, negotiating, assisting, or effectuating the purchase of a motor vehicle, not owned by the dealer, for another or others. The bill would define "autobroker" or "auto buying service" as a dealer who engages in the business of brokering.

(3) Existing law specifies exemptions from the definition of "dealer" for purposes of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions of the Vehicle Code.

This bill would add to the exemptions a motor club, as defined, that does not arrange or negotiate specified purchase transactions but refers members to a new motor vehicle dealer for the purchase of a new motor vehicle and does not receive a fee from the dealer contingent upon the sale of the vehicle.

(4) Existing law prescribes the fee for the issuance of a license to dealers.

This bill would prescribe the fees for the registration of a dealer as an autobroker.

(5) Existing law defines a "new vehicle" for purposes of the Vehicle Code as, among other things, a vehicle constructed entirely of new parts that has never been sold and exempts specified transactions involving dealer-to-dealer sales from the definition of the term "sold."

This bill would, instead, define a new vehicle as, among other things, a vehicle constructed entirely of new parts that has never been the subject of a retail sale.

(6) Existing law makes it a misdemeanor for a dealer to, among other things, advertise or offer for sale or exchange any vehicle not actually for sale at the premises of the dealer or available to the dealer from the manufacturer or distributor of the vehicle at the time of the advertisement or offer. Existing law makes an exception to that provision by authorizing a dealer to advertise that it has the ability to purchase for resale vehicles available from franchised dealers, if the advertisement or offer states, among other things, that the dealer is not franchised to sell new vehicles and that the vehicles must be purchased as used.

This bill would delete the exception specified above and would, except as provided, authorize an autobroker to advertise its service of arranging or negotiating the purchase of a new motor vehicle from a franchised new motor vehicle dealer. The bill would limit the content of the advertisements, require a specified advertising statement, and specify the type, size, and placement of that statement. The bill would require that a certain statement be included with certain smaller advertisements. The bill would also make a technical and clarifying change in the above provision.

(7) Existing law makes it a misdemeanor for a dealer to, among other things, advertise for sale as new any new vehicle of a line-make for which the dealer does not hold a franchise.

This bill would, in addition, make it a misdemeanor for a dealer to sell the specified vehicle. Because this provision would create a new crime, it would impose a state-mandated local program.

(8) Existing law makes it a misdemeanor for a dealer to do specified acts relating to the selling of motor vehicles.

This bill would make it a misdemeanor for a dealer to do specified acts when brokering, as defined above. Because this provision would create a new crime, the bill would impose a state-mandated local program.

The bill would also prescribe a specified form to be used by the dealer as a brokering agreement.

(9) Existing law makes it a misdemeanor for any motor vehicle manufacturer, manufacturer branch, distributor, or distributor branch to do specified acts relating to motor vehicle dealers.

This bill would make it a misdemeanor for any motor vehicle manufacturer, manufacturer branch, distributor, or distributor branch to dishonor a warranty, rebate, or other incentive offered to the public or a dealer in connection with the retail sale of a new motor vehicle, based solely upon the fact that an autobroker arranged or negotiated the sale. Because this provision would create a new crime, the bill would impose a state-mandated local program.

This bill would also impose specified duties pertaining to title registration, warranties, rebates, and incentives on a selling, franchised new car dealer involved in a brokered retail motor vehicle sale.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

reason.

Ch. 1254 (AB 3566) Bornstein. Mobilehome parks: park costs.

Existing law prohibits the management of a mobilehome park, which includes the owner thereof, from charging a homeowner a fee or imposing an increase in rent for prescribed penalties assessed by a court against the management for a violation of the Mobilehome Residency Law.

This bill would revise this provision to include money damages within these penalties. This bill would also provide that a provision in a rental agreement entered into, renewed, or modified on or after January 1, 1995, that permits a fee or increase in rent that reflects the costs to management of these money damages shall be void.

Ch. 1255 (AB 3669) Ferguson. Schools for juvenile offenders.

Existing law provides for juveniles who commit crimes to be made wards of the juvenile court and for various dispositions of those wards, as specified. Existing law also authorizes the establishment of charter schools, as specified.

This bill would establish, until January 1, 2000, a program of financial assistance to county offices of education for the operation of school activities within existing camps, ranches, and boot camps for juvenile offenders. Habitual juvenile offenders could be committed to these camps, ranches, or boot camps with educational and job training programs at the discretion of the juvenile court, as specified. The bill would authorize 3 counties selected by the Department of the Youth Authority, as specified, to establish a program. These educational programs would be operated by each county office of education. The bill would require the Department of the Youth Authority to prepare a specified evaluation of each funded program and report its findings and recommendations to the Governor and the Legislature, as specified.

The bill would only become operative if California receives certain federal funding.

Ch. 1256 (AB 3731) Umberg. Juveniles: boot camps.

Under existing law, the board of supervisors of any county may establish juvenile homes, ranches, camps, or forestry camps to which minors adjudged wards of the juvenile court on the basis of criminal conduct may be committed. Under existing law, the Department of the Youth Authority is required to work with counties to develop boot camp programs either separately or as part of existing ranches, camps, and forestry camps.

This bill would authorize a county to contract with the Military Department for specified services related to the development, establishment, and operation of boot camp and similar programs for young, first-time offenders, as specified.

Ch. 1257 (SB 1240) Marks. Disabled persons.

(1) Under existing law, individuals with disabilities are entitled to equal access rights to various facilities.

This bill would include medical facilities.

(2) Under existing law, individuals with disabilities are entitled to full and equal access to rental housing accommodations.

This bill would prohibit landlords from refusing to permit individuals with disabilities, subject to certain conditions, from making reasonable modifications to existing rented premises to afford the individual full enjoyment of the premises. The bill would also prohibit landlords and other persons providing real property for compensation from refusing to make reasonable accommodations in rules, policies, practices, or services, when necessary to afford disabled persons equal use and enjoyment of the premises.

(3) Existing law specifies that it is a denial of equal access to housing accommodations to deny rental housing to an individual with a physical disability on the basis that the individual uses a service dog.

This bill would change the reference to "physical disability" to instead refer to "disability" generally.

(4) Under existing law, persons licensed to train dogs as guide, signal, or service dogs may take the dogs, for purposes of training, into specified places where disabled persons

NOTE: Superior numbers appear as a separate section at the end of the digests.

are required to be given access.

This bill would extend that right to persons with specified disabilities. The bill would provide that this right and certain other rights of disabled persons, as defined, do not preclude a requirement for showing a license plate or disabled placard to enforcement units enforcing disabled persons parking violations. The bill would revise an existing requirement that persons training guide, signal, or service dogs carry specified identification to instead require them to ensure the dog is on a leash and tagged, as specified. The bill would also impose a state-mandated local program by requiring county clerks or animal control departments to endorse identification tags issued for such dogs, and to maintain records thereof open to public inspection. This bill would require the Department of Food and Agriculture, in consultation with the State Department of Health Services, to specify the shape, size, and color of these tags.

(5) Under exiting law, persons interfering with certain access rights of disabled persons are subject to treble damages, with a minimum of $250.

This bill would raise the minimum to $750 and would expressly declare that this remedy is nonexclusive. The bill would also specify that "interfere," for purposes of these provisions, includes preventing or causing the prevention of a guide, signal, or service dog from performing its functions.

(6) Existing law specifies that totally or partially blind persons are entitled to certain access rights and privileges, regardless of whether they carry a white cane or use a guide dog, and that failure to use a white cane or guide dog is not negligence per se.

This bill would make the above provisions applicable to all blind and visually impaired persons, as defined.

(7) Existing law permits zoos and wild animal parks to exclude guide dogs, signal dogs, and service dogs used by blind persons, visually handicapped persons, deaf persons, and physically disabled persons from areas where animals are not separated from members of the public by a physical barrier, but in that case requires the zoo or wild animal park to maintain specified kennel facilities.

This bill would make these provisions applicable to guide dogs, signal dogs, and service dogs used by individuals with a disability.

(8) Existing law requires zoos and wild animal parks that do not permit guide dogs to provide free transportation for blind persons who would otherwise use the guide dog, on any mode of transportation provided for the public.

This bill would make these provisions also applicable with respect to other visually impaired persons who use guide dogs. The bill would require zoos and wild animal parks that do not permit service dogs to provide free transportation to individuals with a disability in wheelchairs where it is readily apparent that the person is unable to maintain complete and independent mobility without the aid of the service dog.

(9) Existing law requires schoolbuses to transport guide dogs, signal dogs, and service dogs when accompanied by a handicapped pupil or teacher in a public high school, or persons employed by licensed or approved schools. Existing law also restricts these provisions, with respect to guide dogs, to guide dogs that are trained by guide dog schools licensed by the California State Board of Guide Dogs for the Blind. Existing law allows a schoolbus driver to determine whether a guide dog, signal dog, or service dog should be muzzled while being transported in a schoolbus.

This bill would expand these provisions to include guide dogs and trainers that are not trained or employed by a school licensed by the board. The bill would make these provisions applicable to guide, signal, and service dogs accompanied by handicapped pupils or teachers in any public or private school. The bill would delete the provisions regarding muzzling of a guide, signal, or service dog while being transported in a schoolbus.

(10) Existing law generally regulates cruelty to animals, but does not expressly regulate harmful conduct directed toward guide, signal, or service dogs.

This bill would make it an infraction for any person to permit any dog which is owned, harbored, or controlled by him or her to cause injury to or the death of any guide, signal, or service dog while the guide, signal, or service dog is in discharge of its duties. The bill would also provide that upon conviction, the defendant shall be ordered to make

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

restitution to the disabled person having custody or ownership of the guide, signal, or service dog for any veterinary bills and replacement costs of the dog if it is disabled or killed. By creating a new crime, the bill would impose a state-mandated local program.

(11) The bill would also make it a misdemeanor for any person to knowingly and fraudulently represent himself or herself as the owner or trainer, as defined, of a guide, signal, or service dog. By creating a new crime, the bill would impose a state-mandated local program.

(12) The bill would make it a misdemeanor for any person to intentionally cause injury to or the death of any guide dog, signal dog, or service dog, as defined, while the dog is in discharge of its duties. The bill would also provide that upon conviction the defendant shall he ordered to make restitution to the disabled person having custody or ownership of the dog for any veterinary bills and replacement costs of the dog if it is disabled or killed. By creating a new crime, the bill would impose a state-mandated local program.

(13) The bill would also make related and clarifying changes.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $500,000, shall be payable from the State Mandates Claims Fund.

Ch. 1258 (SB 1368) Peace. Residential care.

Existing law provides for the licensure and regulation of community care facilities, including residential facilities, foster family agencies, small family homes, community treatment facilities, residential care facilities for the elderly, and social rehabilitation facilities, as defined, by the State Department of Social Services.

This bill would require a public agency social worker, in determining whether to refer an individual to an adult residential care facility, to take into account the compatibility of the individual with the other residents of the facility in light of any medical diagnoses or behavioral problems. By imposing this requirement on local public agency social workers, this bill would create a state-mandated local program.

Existing law requires any community care facility providing residential care for 6 or fewer persons at which the owner does not reside to provide a procedure approved by the licensing agency for immediate response to incidents and complaints.

This bill would revise that requirement to apply it to any community care facility providing residential care for 6 or fewer persons, regardless of whether the owner is in residence. Since violation of this requirement would be a misdemeanor under existing law, this bill would impose a state-mandated local program by changing the definition of a crime.

Existing law requires the department to ensure that operators and staffs of community care facilities have the appropriate training.

The bill would, among other things, require that an administrator of an adult residential care facility successfully complete an approved training program prior to employment. It would establish procedures for renewal of residential care facility administrator certificates, would authorize the State Department of Social Services to revoke a certificate for certain reasons, and would require that department to establish regulations regarding the training program content, testing instruments, and the process for approving training programs and the individuals or entities to conduct these programs. It would provide for fees to be charged by that department for the purposes of the training program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, for certain costs, no reimbursement is required by this

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

act for specified reasons.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1259 (SB 1860) Leslie. Public safety officers: interrogation.

Existing law requires that certain conditions be met when any public safety officer is under investigation and subjected to interrogation by his or her commanding officer, or any other member of the employing public safety department, that could lead to punitive action.

This bill would prohibit any statement made during interrogation by a public safety officer under duress, coercion, or threat of punitive action from being admissible in any subsequent civil proceeding, subject to specified qualifications.

Ch. 1260 (AB 3606) Moore. Public utilities: telecommunications services.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities.

This bill would make a legislative finding and declaration that a policy for telecommunications in California is to promote lower prices, broader consumer choice, and avoidance of anticompetitive conduct.

The bill would state the legislative intent that all telecommunications markets subject to commission jurisdiction be opened to competition not later than January 1, 1997, and require the commission to take steps to ensure that competition in telecommunications markets is fair and that the state's universal service policy is observed.

The bill would provide that if any local exchange telephone company obtains the right to offer cable television or video dialtone service within its service territory from a regulatory body or court of competent jurisdiction, any cable television corporation may immediately have the right to enter into the local telecommunications market within the service territory of that local exchange carrier by filing for approval a certificate of public convenience and necessity, if necessary, which shall be expeditiously reviewed by the commission.

The bill would require the commission to expedite its open network architecture and network development, interconnection, and other related dockets so that whatever additional rules and regulations that may be necessary to achieve fair local exchange competition shall be in place no later than January 1, 1997.

Since violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The bill would incorporate changes to Section 709 of the Public Utilities Code proposed by SB 1966 to become operative if both bills are chaptered and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1261 (AB 3755) Honeycutt. Military base reuse.

Existing law provides for a California Defense Conversion Council with 15 voting members to provide a central clearinghouse for all base reuse and defense conversion activities in the state. The council is required to develop and recommend to the Governor and the Legislature a strategic plan for federal, state, and local defense conversion and training programs and provide a central location for all military base reuse, community assistance and training funding, regulations, and application procedures to expedite that transfer of state and federal funds to state and local projects.

This bill would require the council to hold special information meetings throughout the state on base reuse problems and issues and to review and comment on plans of state

NOTE: Superior numbers appear as a separate section at the end of the digests.

agencies that may substantially affect military base reuse.

This bill would also specify a procedure for the recognition of a single local reuse entity for each military base closure in the state, would recognize specified existing entities as the single local reuse entity for specified military bases, and would provide that a recognized entity is the only entity that is eligible for specified state benefits for use on the base. These provisions would be repealed on January 1, 2001.

This bill would only become effective if AB 3759 of the 1993–94 Regular Session is enacted and becomes effective.

Ch. 1262 (AB 2768) Quackenbush. School districts: pupil attendance alternatives.

(1) Existing law requires the governing board of each school district, except for certain small school districts, as a condition for the receipt of school apportionments from the State School Fund, to adopt rules and regulations, on or before July 1, 1994, establishing a policy of open enrollment within the district for residents of the district. Existing law sets forth elements that are required to be included in the open enrollment policy.

This bill would authorize a school district to include in the open enrollment policy a provision that schools receiving requests for admission give priority for attendance to siblings of children already in attendance in the school. The bill also would authorize a school district to include in its open enrollment policy, a provision that special circumstances, based on a specific finding, exist that might be harmful or dangerous to a particular pupil in the current attendance area of that pupil serve as a basis for granting priority of attendance outside the current attendance area. The bill would authorize a school district to provide that any pupil attending a school prior to July 1, 1994, may be considered a current resident of that school until the pupil is promoted or graduates. The bill would also allow the school district to include in the open enrollment policy that no pupil who was on a waiting list for a school or specialized program, on or before July 1, 1994, shall be displaced by pupils transferring after July 1, 1994, from outside the attendance area as long as continued enrollment or maintenance on the waiting list remains consistent with the former policy.

(2) Effective until June 30, 1995, existing law requires the governing boards of any unified school district that has entered into an agreement for interdistrict attendance of a pupil based on the pupil's child care needs to allow the pupil to continue to attend through the 12th grade in that district if the parent or guardian so chooses subject to certain conditions.

This bill, instead, would provide that the governing board of any school district that has entered into an agreement for interdistrict attendance of a pupil based on the pupil's child care needs shall allow the pupil to remain continuously enrolled in the school district of choice if the parent or guardian so chooses subject to certain conditions. The bill would extend the effective date of these provisions until July 1, 1998, thereby imposing a state-mandated local program.

(3) Existing law requires that a person subject to compulsory full-time education attend the school in which the residence of either the parent or guardian is located, as specified. Existing law also sets forth circumstances under which a pupil is deemed to have complied with residency requirements for school attendance in a school district, including, effective until June 30, 1995, the situation where one or both parents or the legal guardian of the pupil is employed within the boundaries of the school district.

This bill would impose a state-mandated local program by requiring that, once a pupil is deemed to have complied with the residency requirements and is enrolled in a school in a school district whose boundaries include the location where that pupil's parent or guardian is employed, the pupil be allowed to continue to attend school through the 12th grade in that district if the parent or guardian so chooses, subject to specified provisions of existing law. This bill would extend the effective date of these residency provisions until July 1, 1998, and make a change related to that extension.

(4) Existing law authorizes the governing board of any school district to admit pupils residing in another school district to attend any school in that district, as specified. Existing law authorizes the school district of residence or the school district of choice to prohibit a transfer or limit the number of pupils transferred upon a determination

NOTE: Superior numbers appear as a separate section at the end of the digests.

that the transfer would negatively impact that district's court-ordered or voluntary desegregation plan or that district's racial and ethnic balance. Existing law authorizes school districts of residence to limit the number of pupils newly transferring out each year based upon the district's average daily attendance, as specified. Existing law credits the school district of choice, as to pupils admitted to the school district under this authority, with a corresponding increase in average daily attendance for state apportionment purposes.

This bill would authorize the school district of residence to make the determination of a negative impact upon the district's court-ordered or voluntary desegregation plan or the district's racial and ethnic balance upon notification of the transferring pupil's acceptance to the school district of choice.

This bill would prohibit the school district of residence from adopting policies that block or discourage pupils from applying for a transfer.

This bill would permit the parent or guardian of a pupil who is prohibited from transferring because of a negative impact upon the district's court-ordered or voluntary desegregation plan or the district's racial and ethnic balance or because of an imposed limit upon the number of pupils transferring out each year to appeal the decision to the county board of education.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(6) This bill would declare that it would take effect immediately as an urgency statute.

Ch. 1263 (AB 1328) Epple. Crime.

(1) Existing law requires state and local law enforcement agencies to disclose certain information to specified persons regarding an incident caused by specified crimes, except as specified.

This bill would add carjacking to the list of specified crimes with respect to which that information must be disclosed, except as specified.

This bill would impose a state-mandated local program by requiring local law enforcement agencies to disclose information regarding an incident caused by carjacking.

(2) Existing law requires a permit to participate in certain activities related to explosives and any destructive device, as specified. Existing law prohibits the issuance of this permit to specified persons.

This bill would provide that the prohibition against issuing these permits shall apply to persons prohibited under existing law from owning or having under his or her possession or control any firearm and persons previously convicted of specified offenses.

(3) Existing law specifies various penalties pertaining to the theft of any motor vehicle, trailer, special construction equipment, or any vessel, as defined. These provisions provide that a person convicted of a felony violation who has been previously convicted of 2 or more felony violations of specified theft offenses shall not be granted probation, except in unusual cases where the interests of justice would be served.

This bill would make a clarifying change by adding to the list of previous convictions of which a person must be convicted for this provision to apply, related theft offenses described under former provisions.

(4) Existing law requires the Department of Justice to furnish information upon the request of a human resource agency or an employer for records of all convictions or any arrest pending adjudication involving specified offenses of a person who applies for a license, employment, or volunteer position in which he or she would have supervisory or disciplinary power over a minor or any person under his or her care.

This bill would make a technical change to this provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law provides that any person who is convicted of violating certain prohibitions against child endangerment who willfully causes or permits any child to suffer, or inflicts thereon unjustifiable physical pain or injury that results in death, or having the care or custody of any child, under circumstances likely to produce great bodily harm or death, willfully causes or permits that child to be injured or harmed, and that injury or harm results in death, shall receive a 4-year enhancement in addition to the sentence provided for that conviction.

This bill would make a nonsubstantive technical change to this provision and, additionally, would require that this enhancement shall not apply unless it has been alleged in the accusatory pleading and admitted by the defendant or found to be true by the trier of fact.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(7) This bill would incorporate additional changes in Section 6254 of the Government Code, proposed by AB 2547, to be operative only if AB 2547 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

(8) This bill would incorporate additional changes in Section 273a of the Penal Code, proposed by AB 27 (1st Ex. Sess.), to be operative only if AB 27 (1st Ex. Sess.) and this bill are both chaptered, this bill becomes effective on or before January 1, 1995, AB 27 (1st Ex. Sess.) becomes effective as specified, and this bill is chaptered last.

(9) This bill would incorporate additional changes in Section 11105.3 of the Penal Code, proposed by AB 3738, to be operative only if AB 3738 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 1264 (AB 3738) Honeycutt. Criminal history information.

Existing law authorizes a human resource agency and certain employers to request from the Department of Justice records of all convictions or any arrest for which the person is released on bail or on his or her own recognizance pending trial, involving certain sex crimes, drug crimes, or crimes of violence, as defined.

This bill would add offenses relating to obscene matter and the offense of sexual exploitation of a person under the age of 14 years, as described, to the list of offenses for which records can be furnished under this provision.

This bill would incorporate additional changes in Section 11105.3 of the Penal Code proposed by AB 1328 or AB 2208, or both, to be operative only if AB 1328 or AB 2208, or both, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

Ch. 1265 (AB 3628) Karnette. Care facilities: criminal records.

Existing law requires, as a condition to issuing a license, permit, or certificate of approval to any person or persons to operate a community care facility, foster family home, certified family home, or a residential care facility for the elderly, and as a condition to employment, residence, or presence at any of these care facilities, that specified persons be fingerprinted. Existing law further requires the licensee of a community care facility or residential care facility for the elderly, subsequent to licensure, to submit the fingerprints of specified persons associated with the care facility to the Department of Justice in accordance with certain procedures. The Department of Justice is required to notify the State Department of Social Services and the State Department of Social Services is required to notify the licensee if the person has been convicted of or is awaiting trial for specified crimes.

This bill would state the intention of the Legislature to support the use of fingerprint live-scan technology by the Department of Justice as a means to generate timely and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

accurate positive fingerprint identifications.

This bill would require the Department of Justice to complete work on its current backlog of criminal record clearances for community care facilities and residential care facilities for the elderly by July 1, 1995, and complete all new requests for criminal record clearances within 30 days of receiving a request.

This bill would require the Department of Justice to coordinate with the State Department of Social Services to establish and implement an automated live-scan processing system for fingerprints in 2 district offices of the Community Care Licensing Division of the State Department of Social Services by July 1, 1995, and to connect these live-scan processing units to the main system at the Department of Justice by July 1, 1996. This bill would appropriate $105,000 from the General Fund to the State Department of Social Services to be expended in the 1994–95 fiscal year for the purposes of purchasing and installing this system. This bill would authorize the State Department of Social Services to charge a fee not to exceed $5 or the actual cost of processing a set of live-scan fingerprints.

This bill would require the Department of Justice to provide reports to the Assembly Human Services Committee and to the Senate Health and Human Services Committee by specified dates and containing information relating to the progress of the department in processing requests for criminal record clearances for community care facilities and residential care facilities for the elderly.

This bill would incorporate additional changes to Sections 1522 and 1569.17 of the Health and Safety Code, proposed by SB 1984, to be operative only if SB 1984 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 1266 (AB 3804) T. Friedman. Family law: child support: paternity.

(1) Existing law provides the powers of court commissioners.

This bill would authorize court commissioners to hear certain actions filed by the district attorney to establish paternity or to establish or enforce child support.

(2) Under existing law, to the extent required by federal law, all applications filed by the district attorney for an order to establish or enforce child support, except paternity cases or cases involving complex issues, as specified, are required to be referred for hearing to a commissioner or a referee, except as specified. Under existing law, these cases involving paternity and complex issues may be referred to and heard by a commissioner or a referee.

This bill would require all applications filed by the district attorney for an order to establish or enforce child support, including actions to establish paternity, to be referred for hearing to a commissioner or a referee, except as specified, and would make related changes.

(3) Under existing law, at hearings pursuant to (2) above, commissioners and referees are authorized to take testimony, establish a record, evaluate evidence, make recommendations or decisions, accept voluntary acknowledgments of support liability, parentage, and stipulated agreements respecting child support, and enter default orders, as specified.

This bill would authorize commissioners and referees to order the mother, child, and alleged father to submit to blood tests in actions in which paternity is at issue.

(4) Under existing law relating to child support, if the obligor asserts as a defense that he is not the father of the child and it appears to the court that the defense is not frivolous, the court may adjudicate the paternity issue if certain conditions are met.

This bill would provide that the court may adjudicate the paternity issue under this provision if it appears to the court that the issue of paternity has not previously been determined in this state or another state. The bill would require a previous determination of paternity made by another state to be given full faith and credit by the courts in this state.

(5) Existing law, the Uniform Act on Blood Tests to Determine Paternity, specifies procedures under which a court may order the mother, child, and alleged father to submit to blood tests in civil actions and proceedings in which paternity is a relevant fact. Under these provisions, the tests are required to be made by experts appointed by the

NOTE: Superior numbers appear as a separate section at the end of the digests.

court, who are required to be called by the court as witnesses to testify to their findings and to be subject to cross-examination.

This bill would delete the provision requiring these experts to be called by the court as witnesses to testify to their findings and to be subject to cross-examination. The bill would require a copy of the results of blood tests to be served on all parties prior to any hearing in which the results may be admitted into evidence, as specified, and to be accompanied by a specified declaration. The bill would provide that the blood test results shall be admitted into evidence without foundation testimony of authenticity and accuracy, unless a written objection to the test results is filed and served as specified.

(6) Existing law prescribes procedures for the establishment of paternity by voluntary declaration, under which paternity may be conclusively presumed. Under existing law, this presumption may be rebutted within 3 years, as specified. Existing law provides other conditions under which paternity will be presumed, and specifies which of conflicting presumptions of paternity will prevail.

This bill would revise the latter provision governing conflicting presumptions of paternity. The bill would require any person rebutting this presumption of paternity based on voluntary declaration to submit a sworn declaration stating the factual basis for placing the issue of paternity before the court. The bill would require declarations for the voluntary establishment of paternity to be made available without charge at all district attorney offices, and would require district attorneys to make specified informational pamphlets available upon request to any parent, and to provide qualified staff to answer questions regarding the declaration and the process of establishing paternity, thereby imposing a state-mandated local program. The bill would require the State Department of Social Services and district attorneys to publicize the availability of these declarations. The bill would revise provisions relating to the registration and filing of the declarations, and would provide that certified copies of declarations shall be made available only to specified persons.

(7) Existing provisions of the Uniform Parentage Act provide for the establishment of the parent and child relationship.

This bill would provide that an action for child custody and support and other specified relief under the Uniform Parentage Act may be filed based upon a voluntary declaration of paternity, as described above, and would specify procedures in this regard. The bill would require the Judicial Council, in consultation with specified entities and persons, to develop forms and procedures necessary to implement this provision.

(8) Existing law provides that in any case of separation or desertion of a parent from a child which results in public assistance being granted to the family, the noncustodial parent is obligated to the county for certain support amounts paid by the county. Existing law requires the district attorney to take appropriate court action in this regard, in the name of the county on behalf of the child and caretaker parent. Existing law limits to 75 days any continuance granted to a defendant in these cases, as specified, except in cases determined to be complex.

This bill would delete this exception for complex cases. The bill would provide that an action for child support may be brought by the district attorney on behalf of a minor child or caretaker parent based upon a voluntary declaration of paternity, and would specify procedures for these actions. The bill would require the Judicial Council, in consultation with specified entities and persons, to develop forms and procedures necessary to implement this provision. The bill would require the district attorney, in these actions, to provide the mother and the alleged father the opportunity to voluntarily acknowledge paternity by signing a paternity declaration as described above prior to a hearing or trial where paternity is at issue, thereby imposing a state-mandated local program.

(9) The bill would make related changes.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1267 (SB 1984) Bergeson. Care facilities: criminal history information: licensure.

(1) Existing law provides for the licensure and regulation of persons operating, employed at, or otherwise in contact with the clients of community care facilities, residential care facilities for persons with a chronic, life-threatening illness, residential care facilities for the elderly, and child day care facilities. For those persons who operate, are employed at, or otherwise in contact with the clients of these facilities, existing law requires the State Department of Social Services to secure from an appropriate law enforcement agency, a criminal record to determine whether a person has been convicted of, or is currently awaiting trial for, a crime, other than a minor traffic violation. Existing law provides that the record of conviction or a certified copy is conclusive evidence of the conviction for these purposes.

This bill would instead require, for those persons who operate, are employed at, or otherwise in contact with, the clients of these care facilities, the department to secure from an appropriate law enforcement agency, a criminal record to determine whether any person has been convicted of a crime other than a minor traffic violation, or arrested for certain crimes. In addition this bill would provide that the arrest disposition report certified by the Department of Justice or other specified records demonstrating imprisonment is prima facie evidence of conviction. This bill would prohibit the department from using a record of arrest to deny, revoke, or terminate any application or license for, or employment or residence at, any of these care facilities unless the department first investigates the incident and secures certain evidence.

The bill would authorize the department to issue an exemption from disqualification for an individual if his or her criminal history indicates he or she is of good character based on certain factors. It would require the department to concurrently notify the licensee and the affected individual of the right to seek an exemption, and would allow the individual to seek an exemption even if the licensee terminates the person upon receiving the notice from the department. The bill would also provide that the department shall not prohibit a person from being employed or having contact with clients in a facility on the basis of a denied criminal record exemption request or arrest information, unless the department complies with certain requirements.

(2) Existing law permits an individual to transfer a current criminal record clearance, as defined, from one care facility to another as long as the criminal record clearance has been processed through a state licensing district office, and is being transferred to another state licensing district office. For child day care facilities, the department is required to hold criminal records clearances, for purposes of these transfers, in its active files for a minimum of one year after an employee is no longer employed at a licensed facility.

This bill would provide that for all of the above-mentioned care facilities, the department is required to hold a criminal records clearance in its active files for a minimum of 2 years after an employee is no longer employed at a licensed facility.

(3) Existing law provides that proceedings for the suspension, revocation, or denial of a license to operate certain care facilities shall be conducted in accordance with specified administrative procedures, and requires that the standard of proof to be applied in those proceedings is by the preponderance of the evidence.

This bill would provide that the administrative law judge conducting a hearing in accordance with these provisions may permit the testimony of a child witness, or a similarly vulnerable witness to be taken outside the presence of the respondent in certain circumstances. This bill would require the department to provide for the use of one-way closed-circuit television for the respondent to observe the testimony if the testimony is taken outside the presence of the respondent, and would provide that these provisions would not limit the respondent's right of cross-examination. This bill would also permit the administrative law judge to clear the hearing room of persons not a party

NOTE: Superior numbers appear as a separate section at the end of the digests.

to the action to protect any witness from intimidation or other harm, taking into account the rights of all persons.

(4) Existing law also provides for the establishment by the Department of Justice of a trustline registry for individuals responsible for the care and supervision of children.

This bill would require that the Department of Justice, in order to enter a child care provider's name into the trustline registry, obtain specified information, including the full criminal record, if any, of the provider. Also this bill would provide that the Department of Justice may consider the licensing records of the State Department of Social Services but that any decision by the Department of Justice to grant or deny trustline registration to a child care provider would not be legally binding on the State Department of Social Services. Further, this bill would provide that the State Department of Social Services may have access to the Trustline Registrant Information System upon written request by the provider to the Department of Justice, however, any determination by the State Department of Social Services to grant a criminal records exemption to an individual would not be binding on the Department of Justice with regard to the trustline registry.

(5) This bill would incorporate additional changes in Section 8172 of the Education Code, proposed by AB 2560, to be operative only if AB 2560 and this bill are both chaptered and become effective on or before January 1, 1995, and this bill is chaptered last.

This bill would incorporate additional changes to Sections 1522 and 1569.17 of the Health and Safety Code, proposed by AB 3628, to be operative only if AB 3628 and this bill are both chaptered and become effective January 1, 1995, and this bill is chaptered last.

Ch. 1268 (AB 2560) Gotch. Child care: trustline registration system.

(1) Existing law requires the Department of Justice to use the fingerprints submitted by a trustline registry system applicant to search the California Criminal History System and the California Child Abuse Central Index and authorizes the department to charge the applicant a fee that includes the actual cost of these searches.

This bill would authorize a child care provider to request the Department of Justice also to use a second set of fingerprints to search the records of the Federal Bureau of Investigation, and would authorize the department to include the cost it incurs for this search in the fee it charges applicants.

(2) Existing law specifies the procedure by which a child care provider may become known as a "trustline applicant" or "registered trustline child care provider."

This bill would make it a misdemeanor to falsely represent or present oneself as a trustline applicant or a registered trustline child care provider.

(3) Existing law requires, to the extent permitted by specified federal law and if funding is available in the Budget Act or other statute, a child care provider who receives compensation provided by specified federal programs to register with the trustline registration system to be eligible for that compensation. Existing law also requires specified providers who receive compensation provided by the At Risk Child Care program to register with the trustline if specified funding conditions exist.

This bill would require providers who are initially exempted from trustline registration because they registered for compensation from specified programs before implementation of the trustline registration system in those programs to register with the trustline when specified circumstances occur. The bill would require the Department of Justice to enter into a contract with the California Child Care Resource and Referral Network to administer the trustline as it relates to specified providers. The bill would require the State Department of Social Services to enter into an interagency agreement with the Department of Justice to provide federal matching funds for the trustline registration system. The bill would delete the provision requiring specified providers who receive compensation provided by the At Risk Child Care program to register with the trustline if specified funding conditions exist. The bill also would make technical changes related to the funding conditions that are required to exist in order to implement the trustline registration system.

(4) Existing law requires the trustline registry system to become inoperative during

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

any fiscal year that there is not sufficient funding to support the performance of the duties of the Department of Education or the Department of Justice under this program, as specified.

The bill would repeal this provision.

(5) The bill would incorporate additional changes in Section 8172 of the Education Code, proposed by SB 1984, to become operative only if SB 1984 and this bill are chaptered and become effective on or before January 1, 1995, but this bill is operative first, and this bill is chaptered last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1269 (AB 2208) Committee on Judiciary. Family law.

Existing law provides that in a proceeding for dissolution of marriage, the county in which the petitioner has been a resident for 3 months is the proper county for the trial of the proceeding.

This bill would instead provide that in a proceeding for nullity of marriage or legal separation of the parties the county in which either the petitioner or respondent resides at the commencement of the proceeding is the proper county for the trial of the proceeding. This bill would revise provisions governing the proper venue for support cases initiated by the district attorney, and would provide for the filing of a supplemental complaint for a paternity or support order in any action in which the support of children is an issue.

Existing law, with certain exceptions, requires a civil action to be brought to trial within 5 years after the action is commenced. Under existing law, this requirement does not apply if the action is for dissolution of marriage or legal separation and there is a child support order in effect which was issued in connection with the proceeding.

This bill would create 2 additional exceptions to the requirement for bringing a civil action to trial within 5 years for (1) actions for dissolution of marriage or legal separation in which a spousal support order issued in connection with the proceeding is in effect and (2) actions for dissolution of marriage in which a trial on the issue of the status of the dissolution of the marriage has been conducted separately from a trial of other issues in the action.

Existing law specifies the punishment for a party who is found to be in contempt of court for failure to comply with specified family law-related court orders.

This bill would revise this punishment to delete specified fines and would specify that if the contempt alleged is for failure to pay child, family, or spousal support, each month for which payment has not been made may be alleged as a separate count of contempt. The bill would also prescribe periods of limitations for these contempt cases.

Existing law defines the term "employee benefit plan" for purposes of the Family Code, provides the award of attorney's fees, and specifies procedures for the copying of records.

This bill would change the term "employee pension benefit plan" for purposes of the Family Code to "employee benefit plan," and revise the definition of that term.

The bill also would revise a provision of law that specifies when an employer, administrator, fiduciary, trustee, or insurance company is discharged from adverse claims upon payment or refund from an employee retirement, death, benefit, or savings plan.

This bill would revise provisions relating to awards of attorney's fees under the Family Code as they relate to governmental entities.

The bill would revise provisions concerning the microfilming of confidential marriage certificates.

Under existing law, each summons issued in an action for dissolution or nullity of marriage or legal separation of the parties is required to contain specified temporary restraining orders.

This bill would require these summons to contain a specified notice.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would revise existing provisions governing the joinder of an employee pension benefit plan as a party to a proceeding for dissolution or nullity of marriage or legal separation of the parties.

Existing law authorizes the court in proceedings for dissolution of marriage or legal separation of the parties, except as specified, to make whatever orders are necessary or appropriate to ensure that each party receives the party's full community property share in any retirement plan, including all survivor and death benefits.

This bill would revise these provisions.

The bill would revise requirements for the payment of counseling fees for counseling ordered by the court in child custody and visitation disputes.

Existing law authorizes a health insurance coverage wage assignment where a party defaults in instituting health insurance coverage for a supported child.

This bill would revise and recast these provisions. The bill would require the party or district attorney seeking such an assignment order to file a specified certificate of service with the court. The bill would revise specified time periods in which an assignment order becomes effective and certain other actions are required to be undertaken.

Existing law prohibits a court from considering the income of the subsequent spouse or nonmarital partner of a parent who has a duty to provide child support when the court determines or modifies child support, except in an extraordinary case, which may include a parent voluntarily or intentionally quitting work or reducing income.

This bill would provide that an extraordinary case also may include a parent who intentionally remains unemployed or underemployed and relies on a subsequent spouse's income.

Under existing law, an abstract of judgment ordering a party to pay spousal, child, or family support is required to be certified by the clerk of the court and contain specified information.

This bill would prescribe procedures for the filing and recordation of an abstract of support judgment and for filing a substitution of payee where a support obligation is being enforced by a governmental entity, as specified, and would require the Judicial Council, in consultation with certain entities, to develop forms for these purposes.

Existing law, the Uniform Reciprocal Enforcement of Support Act, specifies a procedure for the registration of a foreign support order in a court of this state.

This bill would provide an alternative procedure for the registration of a foreign support order by a district attorney who is enforcing a support obligation pursuant to a specified provision of law.

Existing law sets forth a procedure for the establishment of paternity by voluntary declaration on and after January 1, 1995.

This bill would, among other things, specify that if certain requirements are met, a voluntary declaration of paternity shall be recognized as the basis for the establishment of an order for child custody or support. The bill would also provide that in any action to rebut the presumption of paternity established by voluntary declaration, the declaration shall be admissible as evidence to determine paternity. The bill would revise the information that is required to appear on the declaration.

Existing law provides that a man is presumed to be the natural father of a child if he meets certain conditions.

This bill would include within these conditions, the requirements of law for the establishment of paternity by voluntary declaration.

Existing law sets forth procedures for actions to determine a parent and child relationship in which a minor child who is a party to the action is required to be represented by a guardian ad litem appointed by the court.

This bill would specify that the guardian ad litem need not be represented by counsel if he or she is a relative of the child. The bill would authorize the court, in any proceeding under these provisions where custody of, or visitation with, a minor child is in issue, to appoint private counsel to represent the interests of the child, thereby imposing a state-mandated local program.

Existing law requires certain information to be contained on a certificate of live birth, and specifies other medical and social information that is required to appear on the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

certificate provided the information is kept confidential, as specified.

This bill would include the social security numbers of the mother and father within the information that is required to appear on the certificate and to be kept confidential, on and after January 1, 1995. The bill would provide that a parent shall not be required to disclose his or her social security number if he or she has good cause for not disclosing the number. The bill would require the State Department of Social Services to adopt regulations to define good cause for not disclosing the number for purposes of this provision. The bill would specify that, notwithstanding these provisions, a parent's social security number contained in the confidential portion of the certificate shall be accessible to the State Department of Social Services and district attorneys for the purposes of operating the Child Support Enforcement Program provided under specified federal law.

Existing law specifies the conduct for which, or the circumstances under which, the juvenile court may adjudge a minor to be a ward of the court or a dependent child of the court.

This bill would specify a procedure for the coordination of paternity determinations made by the juvenile court and the family law department of the superior court for cases in which the issue of paternity is raised during any hearing pursuant to the provisions described above, thereby imposing a state-mandated local program by adding to the duties of local officials.

This bill would prescribe procedures for the consolidation of support or reimbursement arrearages owed by one obligor to one obligee in 2 or more court files into a single court file, and the consolidation of 2 or more orders for current child support into a single court file.

Existing law requires the district attorney to take appropriate action to establish, modify, and enforce child support orders when the child is receiving public assistance, and when appropriate, to take the same actions on behalf of a child who is not receiving public assistance. Existing law specifies timeframes in which actions brought by the district attorney to establish or enforce support obligations shall be completed, to the extent required by federal law.

This bill would, instead, provide that actions brought by the district attorney to establish paternity or child support or to enforce child support obligations shall be completed within federal time limits. It also would specify the proper venue for these cases.

This bill would make other related changes.

This bill would incorporate changes in Section 2610 of the Family Code proposed by SB 1500, contingent upon its prior enactment.

This bill would incorporate, in substantive effect, changes in Section 7575 of the Family Code proposed by AB 3804, contingent upon its prior enactment.

This bill would incorporate changes in Sections 7611 and 7612 of the Family Code proposed by SB 997, contingent upon its prior enactment.

This bill would incorporate changes in Section 1522 of the Health and Safety Code proposed by AB 3628 or SB 1984, or both, contingent upon their prior enactment.

This bill would incorporate additional changes in Section 11105.3 of the Penal Code proposed by AB 1328 or AB 3738, or both, to be operative only if AB 1328 or AB 3738, or both, and this bill are enacted and become effective on January 1, 1995, and this bill is enacted last.

This bill would incorporate additional changes to Section 903 of the Welfare and Institutions Code proposed by AB 1327, contingent upon its prior enactment.

This bill would incorporate changes in Section 11475.1 of the Welfare and Institutions Code proposed by AB 2142, contingent upon its prior enactment.

This bill would incorporate changes in Section 12300 of the Welfare and Institutions Code proposed by AB 1354, contingent upon its prior enactment.

This bill would incorporate changes in Section 16501.1 of the Welfare and Institutions Code proposed by SB 17, contingent upon its prior enactment.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish proce-

NOTE: Superior numbers appear as a separate section at the end of the digests.

dures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1270 (AB 2659) Morrow. Psychotherapist-patient privilege.

Existing law sets forth the psychotherapist-patient privilege, under which the patient has a privilege to refuse to disclose, and to prevent another from disclosing, a confidential communication between the patient and the psychotherapist, as specified. Existing law defines psychotherapist for purposes of this privilege. Existing law provides that a professional person rendering mental health treatment has the psychotherapist-patient privilege in situations in which a minor has requested and received mental health treatment or counseling, as specified.

This bill would repeal the latter special provision and instead include a person rendering mental health treatment or counseling services upon the request of minors in the general provisions setting out the psychotherapist-patient privilege, under which the patient is the holder of the privilege.

Ch. 1271 (AB 2105) Knowles. Public contracts: retention funds.

Existing law requires a public agency entering into a contract to retain specified amounts to ensure performance. Existing law provides that the retained amounts be deposited with the State Treasurer or a state or federally chartered bank as escrow agent.

This bill, until January 1, 1997, would add any person licensed under the Escrow Law in the Financial Code to the list of designated escrow agents with whom the retained funds may be deposited upon approval by the public agency.

Ch. 1272 (SB 2057) Watson. Criminal records: hate crimes.

Existing law requires local law enforcement agencies, at the direction of the Attorney General and subject to the availability of adequate funding for the Department of Justice, to report to the Department of Justice, in a manner to be prescribed by the Attorney General, any information that may be required relative to any criminal acts or attempted criminal acts to cause physical injury, emotional suffering, or property damage where there is a reasonable cause to believe that the crime was motivated, in whole or in part, by the victim's race, ethnicity, religion, sexual orientation, or physical or mental disability.

Existing law also requires the Department of Justice to submit an annual report to the Legislature, commencing July 1, 1992, analyzing the results of the information obtained from local law enforcement agencies.

This bill would make statements regarding the necessity in formulating legislation to prevent hate crimes of having accurate and adequate statistical information relative to any criminal acts or attempted criminal acts where there is reasonable cause to believe that the crime was motivated by race, ethnicity, religion, sexual orientation, or physical or mental disability.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1273 (SB 2038) McCorquodale. Consumer affairs: legal charges: State Board of Accountancy.

(1) Under existing law the Department of Consumer Affairs regulates certain businesses and licensed professions.

This bill would require the Department of Justice, prior to the payment to the Department of Justice of any charges for legal services rendered to any board within the department, to submit to the board an itemized statement of those services and charges.

(2) Existing law provides for a State Board of Accountancy which consists of 12 members, 7 of whom shall be certified public accountants, one of whom shall be a public

NOTE: Superior numbers appear as a separate section at the end of the digests.

accountant, and 4 of whom shall be public members. Existing law requires the board to appoint an administrative committee and authorizes the board to appoint an examining committee, a continuing education committee, and other committees, as specified.

This bill would change the number of members on the board to 10 by changing the number of certified public accountants on the board to 5. The bill would, instead, authorize the board to establish an administrative committee, an examining committee, and a continuing education committee, with certain members, as specified.

This bill would provide that the provisions described in (2) become operative on July 1, 1997.

Ch. 1274 (SB 2039) McCorquodale. Healing arts.

(1) Under existing law, the Board of Psychology of the Medical Board of California administers the Psychology Licensing Law. The Psychology Licensing Law authorizes the board to deny an application for a license, issue a license, subject to terms and conditions, or order the suspension of a license for a period not exceeding one year, or revoke, or impose probationary conditions upon a licensee for, among other things, any act of sexual abuse, or sexual relations with a patient, or sexual misconduct that is substantially related to the qualifications, functions, or duties of a psychologist or psychological assistant.

This bill would, notwithstanding the above-described provision, require the board to include an order of revocation of any license to practice psychology upon a proposed decision or decision made, in accordance with specified procedures, that contains any finding of fact that the licensee or registrant engaged in any act of sexual contact, as defined, with a patient, or with a former patient in described circumstances. It would prohibit an administrative law judge from issuing a stay of the order of revocation.

(2) Existing law also provides for the licensure and discipline of marriage, family, and child counselors, licensed educational psychologists, and licensed clinical social workers by the Board of Behavioral Science Examiners. Under existing law, the board is authorized to revoke or suspend the license of a marriage, family, and child counselor or a clinical social worker for unprofessional conduct, which includes, among other things, engaging in sexual relations with a client, committing an act of sexual abuse, sexual misconduct with a client, or committing an act punishable as a sexually related crime if that act is substantially related to the qualifications, functions, or duties of the licensee.

This bill would, notwithstanding that authority, require the board to include an order of revocation of the license of a licensee or registrant, upon any proposed decision or decision, made in accordance with specified procedures, that contains a finding of fact that the licensee or registrant engaged in any act of sexual contact, as defined, with a patient, or with a former patient in described circumstances. It would prohibit an administrative law judge from issuing a stay of the order of revocation.

This bill would also require the board to revoke the license of an educational psychologist on those same grounds.

(3) Existing law provides for the licensure and discipline of respiratory care practitioners by the Respiratory Care Examining Committee.

This bill would change the name of the examining committee to the Respiratory Care Board of California, and would make various conforming changes.

Under existing law, the committee may revoke or suspend the license of a respiratory care practitioner for conviction of a crime that substantially relates to the qualifications, functions, or duties of a respiratory care practitioner. Existing law requires that a crime involving sexual misconduct or attempted sexual misconduct, whether or not with a patient, be considered such a substantially related crime.

This bill would, notwithstanding that authority, require the board to revoke the license of a respiratory care practitioner for engaging in any act of sexual contact, as defined, with a patient, or for committing an act or being convicted of a sex offense, as defined.

This bill would revise certain licensure requirements for respiratory care practitioners. This bill would revise the dates between which an applicant may practice prior to receipt of his or her license to be the dates specified by the board. This bill would limit the titles and suffixes that may be used by a respiratory care practitioner.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes members of the examining committee or a respiratory care practitioner appointed by the committee to inspect hospitals and certain other facilities providing respiratory care.

This bill would authorize an investigative unit appointed by the board to conduct the inspection, and would include employment records within the items that may be inspected.

This bill would repeal certain requirements relating to the licensure of applicants who were educated or licensed in another state, and would authorize the board to disapprove an application based on a diploma received from any respiratory therapy school if the instruction received is not equivalent to that required by the board. This bill would revise requirements for approval of respiratory therapy schools by the board, and would revise the authority of the board to establish fees, not to exceed the cost to the board, for certain activities related to approval of schools. By providing for the deposit of additional fees into the Respiratory Care Fund, a continuously appropriated fund, this bill would make an appropriation.

This bill would delete a 12-month limitation on the period for which the board may order the suspension of a license, would revise the grounds for revocation or suspension, and would additionally authorize the board to require an examination for the reinstatement, restoration, or modification of the terms of probation imposed on a license, and revise the grounds for which a competency examination may be required.

Existing law authorizes any licensing agency to deny an application for licensure on certain grounds, and to deny a subsequent application without a hearing if, within one year previously, the agency denied that applicant's application after a hearing.

This bill would notwithstanding that provision, allow an applicant for licensure by the board to reapply only after a period of 3 years has elapsed from the date of the denial.

This bill would revise certain terminology relating to respiratory care licensure and regulation and would make certain technical and conforming changes.

This bill would revise the penalties for certain unprofessional conduct that constitutes a misdemeanor, thereby imposing a state-mandated local program.

Under existing law, violation of the provisions relating to licensure of respiratory care practitioners is a misdemeanor.

By revising the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1275 (SB 2101) McCorquodale. Business and professions: licensing and regulations.

Existing law provides for the licensing and regulation of various professions and vocations administered by licensing boards under the jurisdiction of the Department of Consumer Affairs.

This bill would provide that a disciplinary action taken by another state, any agency of the federal government, or another country, that is substantially related to the practice regulated by a license issued by any of those licensing boards, may be grounds for disciplinary action by that state licensing board.

Existing law creates the State Board of Examiners of Nursing Home Administrators.

This bill would rename that board the State Board of Nursing Home Administrators. This bill would also increase from 12 to 24 months, the length of time within which the board may serve an accusation to suspend or revoke an administrator's license after the issuance of a temporary suspension order, service of an accusation to revoke a facility's license, or final decertification from the Medi-Cal or Medicare program.

The practice of speech pathology and audiology is subject to regulation and licensure under the existing Speech Pathologists and Audiologists Licensing Act.

This bill would revise existing law to include public preschools within a requirement that no provision of that act be construed as restricting or preventing the practice of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

speech-language pathology or audiology by personnel holding the appropriate credential from the Commission on Teacher Credentialing under certain circumstances.

Existing law provides for the licensure and discipline of dentists by the Board of Dental Examiners of California, and dental auxiliaries by the Committee on Dental Auxiliaries.

This bill would authorize the board and the committee to include an examination on California law and ethics in the licensing examinations.

Existing law establishes the Board of Registered Nursing and requires the board annually at its first meeting in each year to elect from its members certain officers.

This bill would delete the requirement that the election of those officers occur at the first meeting in each year.

Existing law authorizes the board to take disciplinary action against a person possessing a certificate as a nurse-midwife for specific acts of unprofessional conduct.

This bill would repeal that authority and would instead subject those persons and other persons whose practice is regulated under the Nursing Practice Act to discipline under that act. The bill would also revise the various procedures and grounds for discipline applicable to certain persons regulated by that act.

The existing Vocational Nursing Practice Act establishes a Board of Vocational Nurse and Psychiatric Technician Examiners of the State of California and requires the board to meet at least once every 3 months.

This bill would instead require the board to meet at least twice each year.

Existing law requires the board to publish a notice of each exam given by the board.

This bill would repeal that requirement.

Existing law authorizes any person who has served on active duty in the medical corps of any of the armed forces, in which no less than an aggregate of 12 months was spent in rendering patient care, and among other things, whose service has been under honorable conditions, to be granted a license under the Vocational Nursing Practice Act, under certain circumstances.

This bill would require that person to have rendered bedside patient care and would allow those persons who receive a general discharge under honorable conditions be granted that license under those circumstances.

Existing law creates a special nursing manpower development program for the purpose of assisting persons in nursing occupations to either upgrade the level of their skills or licensure or both.

This bill would repeal that program.

Existing law provides for the licensure and discipline of psychologists administered by the Board of Psychology.

This bill would revise the grounds for denial of licensure or discipline of psychologists to include the suspension, revocation, or imposition of probationary conditions on a license by another country, and would revise the time period within which a licensee whose license has been suspended, revoked, or made subject to probationary conditions may apply for modification or termination of probation, or reinstatement.

Existing law provides for the licensure and discipline of optometrists administered by the State Board of Optometry. Under existing law the board is required to give a licensee a reasonable opportunity to comply with a rule or regulation of the board prior to taking disciplinary action for violation of that rule or regulation.

This bill would repeal that requirement.

The existing Respiratory Care Practice Act is enforced and administered by a Respiratory Care Examining Committee. Existing law authorizes each member of the examining committee or any licensed respiratory care practitioner appointed by the examining committee to inspect hospitals and facilities that provide respiratory care, and the staff thereof, as specified. Existing law prohibits a member of the examining committee from delegating the authority to make those inspections to any person other than a respiratory care practitioner.

This bill would delete that prohibition and would authorize an investigative unit appointed by the examining committee to conduct those inspections.

This bill would require every holder of a pocket license or work permit to produce

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

for inspection by the examining committee the original license or permit. It would make a violation an unauthorized practice which is a misdemeanor under existing law. By changing the definition of a crime, this bill would impose a state-mandated local program.

Existing law provides for the licensure of pharmacists administered by the California State Board of Pharmacy.

This bill would revise requirements for renewal of pharmacists' licenses.

Existing law provides for the licensure and discipline of acupuncturists administered by the Acupuncture Committee.

This bill would extend the dates during which independent consultants are required to administer the licensing examination with technical advice and assistance from the committee.

This bill would provide that petitions for reinstatement or modification of penalty may be made after certain minimum time periods have elapsed from the date of the decision ordering the disciplinary action.

Existing law provides for the licensure of veterinarians, administered by the Board of Examiners in Veterinary Medicine. Existing law prescribes the composition of the board and prohibits the membership of 2 members from the same congressional district at any time.

This bill would repeal this prohibition.

Existing law provides for the licensure and discipline of accountants administered by the State Board of Accountancy. Existing law requires the board to appoint an administrative committee to perform specified duties relating to investigation of complaints.

This bill would revise the composition of that committee.

Existing law provides for the regulation of professional engineers administered by the State Board of Registration for Professional Engineers and Land Surveyors.

This bill would revise the time period within which renewals of certificates to use certain titles may be made.

Existing law provides for the regulation of locksmiths administered by the Bureau of Security and Investigative Services.

This bill would revise the requirements for issuance of a license in any fictitious business name.

Under the existing Private Investigator Act, any institution, firm, or individual wishing the approval of the Bureau of Security and Investigative Services to offer a firearms course is required to complete an application for certification as a firearms training facility.

This bill would instead prohibit an institution, firm, or individual from offering a certified firearms course of the bureau unless the institution, firm, or individual has received a Firearm Training Facility Certificate.

Under the existing Private Investigator Act, any individual who desires certification by the Bureau of Security and Investigative Services to instruct a firearms course is required to complete an application for a Firearms Training Instructor Certificate.

This bill would instead prohibit a person from instructing a bureau-approved firearms course unless that person has received a Firearms Training Instructor Certificate issued by the bureau.

Under the existing Private Investigator Act, any institution, firm, or individual who wishes approval of the Bureau of Security and Investigative Services to offer a baton course is required to complete an application for certification as a baton training facility.

This bill would instead prohibit an institution, firm, or individual from offering the certified baton course of the bureau unless that institution, firm, or individual has received a Baton Training Facility Certificate.

Under the existing Private Investigator Act, any individual who desires certification by the Bureau of Security and Investigative Services to instruct a baton course is required to complete an application for baton training instructor certificate.

This bill would instead prohibit a person from instructing a bureau-approved baton course unless that person has received a Baton Training Instructor Certificate issued by the bureau.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under the existing Electronic and Appliance Repair Dealer Registration Law, to renew an expired registration, the service dealer is required to apply for renewal on a form prescribed by the Director of Consumer Affairs, pay the renewal fee in effect on the last regular renewal date, and, if the registration of a service dealer is renewed more than 30 days after it ceased to be valid, the service dealer must pay all accrued and unpaid delinquency and renewal fees.

This bill would instead require all service dealers that renew expired registrations to pay all accrued and unpaid delinquency and renewal fees. Because this bill would increase the fees deposited in the continuously appropriated Electronic and Appliance Repair Fund, it would make an appropriation.

This bill would revise the information that is required to be submitted with forms from each service dealer and service contractor.

The bill would also require the Bureau of Electronic and Appliance Repair to design and approve a sign that is required to be placed in all electronic and appliance repair locations operated by a service dealer, as specified. Violation of this requirement would be a misdemeanor under provisions of existing law. Changing the definition of a crime, imposes a state-mandated local program.

Existing law requires the bureau to advise a service dealer or service contractor of certain complaints, and to investigate the facts relating to the complaint.

This bill would instead authorize the bureau to advise the dealer or contractor of the complaint, and would require investigation only of those complaints of which the dealer or contractor has been advised.

Existing law prohibits any person from engaging in the promotion of, or participating in, a boxing, wrestling, or martial arts contest, match, or exhibition without a license issued by the State Athletic Commission. Existing law requires the payment of certain fees to the commission by a person conducting a wrestling exhibition based on a percentage of specified receipts.

This bill would make a clarifying change in the formula for calculating the fee.

This bill would grant the commission the authority to obtain and review criminal history information to determine whether any applicant or licensee has been convicted of any offense or has been arrested for any offense for which disposition is still pending, and to use that information for specified purposes.

This bill would make certain conforming changes and other technical, nonsubstantive changes to existing law.

This bill would state the findings and declarations of the Legislature regarding satisfaction of a condition that made certain provisions relating to discipline of private security guards and alarm company operators operative January 1, 1993.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1276 (AB 595) Speier. Outpatient settings.

Existing law provides for the licensure and regulation of clinics, as defined, and health facilities, as defined, by the State Department of Health Services.

This bill would prohibit, on and after July 1, 1996, any physician and surgeon from performing surgery in an outpatient setting, as defined, using specified anesthesia unless the setting is one of enumerated health care settings, including a setting accredited by an accreditation agency, as defined, approved by the Division of Licensing of the Medical Board of California.

This bill would prohibit an association, corporation, firm, partnership, or person from operating, managing, conducting, or maintaining an outpatient setting, as defined, unless the setting is one of those enumerated settings. This bill would require the division to adopt standards for accreditation in accordance with prescribed criteria.

This bill would require the division to adopt standards for approval of accreditation agencies to perform accreditation of outpatient settings. It would permit the division or accreditation agency to inspect outpatient settings accredited by an accreditation

NOTE: Superior numbers appear as a separate section at the end of the digests.

agency, and would authorize certain disciplinary actions to be taken with regard to outpatient settings and accreditation agencies that are out of compliance with the requirements of these provisions. It would require the division to establish fees for approval of accreditation agencies.

The bill would provide that a willful and knowing violation of these provisions constitutes unprofessional conduct for a physician and surgeon.

This bill would create the Outpatient Setting Fund, provide for the deposit of the accreditation fees into the fund, and would require funds deposited into this fund to be expended by the board for the purpose of implementing and administering these provisions upon appropriation by the Legislature.

This bill would transfer $150,000 from the Contingent Fund of the Medical Board to the Outpatient Setting Fund and would appropriate this amount to the Medical Board, for purposes of this bill, as a loan to be repaid with interest by January 1, 2003.

The bill would provide that willful violation of these provisions is a misdemeanor and would subject a person or entity that violates these provisions to a fine not to exceed $1,000 per day of violation thereby imposing a state-mandated local program. The bill would require the district attorney of a county to institute and conduct the prosecution of any violation of these provisions, upon application by the Division of Medical Quality of the Medical Board of California, thereby imposing a state-mandated local program by increasing the duties of local agencies by creating a new crime.

The bill would further authorize the Division of Medical Quality of the Medical Board of California or the local district attorney to bring an action to enjoin a violation or threatened violation of these provisions in accordance with specified procedures.

The bill would authorize the division to adopt regulations to implement these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 1277 (AB 1920) Peace. Franchises.

Existing law known as the California Franchise Relations Act regulates the termination, renewal, and transfer of certain specified franchises in this state.

This bill would provide that a provision in a franchise agreement restricting venue to a forum outside California is void with respect to any claim arising under or relating to a franchise agreement involving a franchise business operating within the state.

This bill would apply to any new franchise located in this state and to any existing franchise agreement renewed after the effective date of this act.

Ch. 1278 (SB 2079) Campbell. Accountancy.

Existing law authorizes the Board of Accountancy to, among other things, examine all applicants for the certificate of certified public accountant.

This bill would, instead, refer to licensure of certified public accountants and make related changes, as specified. The bill would also revise various license requirements, reciprocity provisions, examination provisions, and procedures, as specified.

Under existing law, the board may, by regulation, provide for the forfeiture of the part of the applicant's examination or reexamination fee that is commensurate with the cost of providing examination facilities if the applicant fails to appear for examination after being scheduled and notified, as specified.

This bill would delete that provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1279 (AB 3443) Connolly. Charitable solicitations.

Existing law requires a commercial fundraiser for charitable purposes to disclose, prior to an oral or written solicitation or sales solicitation, as specified, its name and that the solicitation or sales solicitation is being conducted by a commercial fundraiser for charitable purposes.

This bill would prohibit any individual, corporation, or other legal entity who, for compensation, solicits funds or other property in this state for charitable purposes from retaining more than 50% of the net proceeds collected as a fee for fundraising services. The bill would provide that for purposes of this prohibition, a fee does not include a flat fee agreed upon prior to the initiation of direct solicitation that is associated with the development of a solicitation or marketing campaign for charitable purposes. The bill would provide that any person who collects a fee in violation of this bill, as specified, would be subject to all applicable civil remedies and would be liable for excess proceeds collected. This bill would apply only to contracts entered into or renewed on or after January 1, 1995.

Ch. 1280 (SB 1857) Watson. Durable powers of attorney for health care.

Existing law specifies the requirements for a durable power of attorney for health care that authorizes an attorney in fact to make health care decisions for the principal.

This bill would require the Secretary of State to establish a registry system by which any person who has executed a durable power of attorney for health care may register in a central information center information regarding the durable power of attorney for health care, making that information available upon request to any health care provider, the public guardian, or other person authorized by the registrant. The bill would limit the information that may be received and released by the registry. The bill would authorize the Secretary of State to transmit the information to the registry system of another jurisdiction as identified by the registrant, at the request of the registrant. The bill would authorize the Secretary of State to charge a specified fee to registrants. The bill would require the Secretary of State to establish procedures to verify the identities of health care providers, the public guardian, and other authorized persons requesting this information, and to establish procedures to advise registrants of specified information. Failure to register would not invalidate such a power of attorney. The bill would also provide that registration with the Secretary of State shall not prevent the revocation of a power of attorney nor shall it raise any presumption of validity or superiority among competing powers or revocations.

Ch. 1281 (SB 1972) Campbell. Possessory interest taxation: investment property of state public retirement systems: full cash value.

Existing law requires a lease of real property that is owned by a state retirement system to provide, for purposes of property taxation, that the full cash value of the possessory interest created by the lease shall be the greater of either the full cash value of the possessory interest or, if the lease covers less than the entire real property, the lessee's allocable share of the full cash value that would be determined for that real property if it were subject to tax.

This bill would require full cash value, as provided for under either of these measures, to reflect the anticipated term of possession if, on the property tax lien date, that term is expected to terminate prior to the end of the next succeeding fiscal year.

This bill would take effect immediately as a tax levy.

Ch. 1282 (AB 2994) Brulte. Health insurance: benefit coverage.

Existing law does not prohibit health care service plans from excluding coverage for any surgical procedure for any condition directly affecting the upper or lower jawbone, or associated bone joints. It also does not prohibit group and individual policies of disability insurance, and individual and group nonprofit hospital service plan contracts that provide hospital, medical, or surgical coverage from excluding or denying coverage for the surgical procedure for those conditions directly affecting the upper or lower jawbone, or associated bone joints, as specified.

This bill would provide that any provision of a prescribed health care service plan

NOTE: Superior numbers appear as a separate section at the end of the digests.

contract that excludes coverage for these surgical procedures shall have no force or effect if that provision results in any failure to provide medically-necessary services, as specified. It would also require certain individual and group policies of disability insurance and certain nonprofit hospital service plans to provide coverage for these procedures except with respect to dental services, if each procedure being considered for reimbursement is deemed medically-necessary pursuant to the plan's or policy's definition of medical necessity. A willful violation of this provision by a health care service plan is a misdemeanor. The bill would thus impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1283 (AB 3234) Murray. Medi-Cal: disproportionate share hospitals.

Existing law authorizes hospitals contracting to provide Medi-Cal inpatient hospital services, or that contract with county organized health systems, and that meet specified criteria, to receive reimbursement, in addition to their Medi-Cal reimbursement, from the State Department of Health Services for a portion of the costs of certain capital projects. Projects for which plans are submitted to the Office of Statewide Health Planning and Development between September 1, 1988, and June 30, 1994, are eligible under these provisions.

This bill would also specify that projects for which final plans for the shell and core are submitted between September 1, 1988, and June 30, 1994, and for which final plans for tenant improvements have been submitted between September 1, 1988, and January 1, 1995, are eligible under these provisions, thereby expanding the number of capital projects eligible for reimbursement.

Ch. 1284 (SB 1966) Calderon. Public Utilities Act: telecommunications services.

The Public Utilities Act sets forth the findings and declarations of the Legislature that a policy for telecommunications in California is, among other things, to promote economic growth, job creation, and the substantial social benefits that will result from the rapid implementation of advanced information and communications technologies by assuring adequate long-term investment in the necessary infrastructure.

This bill would, instead, refer to the rapid implementation of these technologies by adequate long-term investment in the necessary infrastructure. It would declare that it is a policy of the state to remove the barriers to open and competitive markets and promote fair product and price competition in a way that encourages greater efficiency, lower prices, and more consumer choice. It would also make various technical, nonsubstantive changes.

Ch. 1285 (AB 3291) McPherson. Security services.

Existing law, the Private Investigator Act, provides for the licensing and regulation of private investigators, private patrol operators, armored contract carriers, firearms and baton training facilities, and employees of those licensees.

This bill would repeal those provisions and would reenact, reorganize, and revise those provisions. The bill would enact the Private Investigator Act for the licensing and regulation of private investigators and the Private Security Services Act for the licensing and regulation of private patrol operators, armored contract carriers, and firearms and baton training facilities.

The bill would also provide that revenues collected for the licensing and regulation of private investigators under the Private Investigator Act, which is repealed and enacted by this bill, and which are held in the Private Investigator Fund on the effective date of the act, shall be transferred as of that date to the Private Investigator Fund created by this bill to carry out the purposes of the act. The remaining revenues in the Private Investigator Fund, collected for the licensing and regulation of private patrol operators, armored contract carriers, and firearms and baton training facilities shall be transferred on the effective date of the act to the Private Security Services Fund created by the bill

NOTE: Superior numbers appear as a separate section at the end of the digests.

to carry out the purposes of the act. Funds in both the Private Investigator Fund and the Private Security Services Fund shall be available when appropriated by the Legislature.

Existing law provides that revenue collected respecting the regulation of locksmiths, repossessors, and alarm company operators shall be deposited in the Private Investigator Fund.

This bill, instead, would provide that this revenue shall be deposited in the Private Security Services Fund.

Ch. 1286 (AB 2902) Conroy. Termination of parental rights: fees.

Existing law specifies the conditions under which an action to terminate parental rights may be commenced, and provides that any interested person may file a petition for an order or judgment declaring the minor free from the custody and control of either or both parents.

This bill would provide that the petitioner under these provisions is liable for all reasonable costs, up to $900, incurred in connection with the termination of parental rights. The bill would provide that these costs may be deferred, waived, or reduced by the court when the payment would cause economic hardship which would be detrimental to the welfare of the child. The bill would provide a specified exemption for public agencies and nonprofit organizations for certain of these costs.

Ch. 1287 (AB 3816) O'Connell. Pupils: special education: expulsion.

Under existing law, a pupil with previously identified exceptional needs who is enrolled in a special education program may only be expelled if specified conditions are met, including the condition that the individualized education program team determines that the misconduct was not caused by, or was not a direct manifestation of, the pupil's identified disability. Existing law also requires that no expulsion hearing shall be conducted for an individual with exceptional needs until specified procedures have been completed, including due process hearings and appeals, if initiated under specified provisions of federal law.

This bill would instead provide that, with respect to an expulsion based on the pupil's possession of any firearm, knife, explosive, or other dangerous object of no reasonable use to the pupil at school or at a school activity off school grounds, these restrictions and special procedures for the expulsion of a pupil with exceptional needs shall only apply if mandated under federal law.

Ch. 1288 (AB 3235) Solis. Special education.

(1) Existing law exempts public community colleges, other public or private institutions of higher education, and other specified schools from certain provisions relating to the confidentiality of pupil records and parental access to them.

This bill would make these provisions applicable to public agencies that provide educationally related services to pupils with disabilities, as specified, and to public agencies that educate pupils with disabilities in state hospitals or developmental centers and in youth and adult facilities.

(2) Existing law provides that the parent of a pupil may request the correction or removal of information that is allegedly inaccurate, an unsubstantiated personal conclusion or inference, outside of the observer's area of competence, or not based on personal observation and that is contained in the written records of the pupil.

This bill would permit a parent of an individual with exceptional needs also to request the removal or correction of information that is allegedly misleading or in violation of the pupil's privacy or other rights.

(3) Existing law authorizes the State Board of Education to approve local plans for special education and early education services for a maximum of 3 years.

This bill would authorize the approval of these plans for a maximum of 4 years.

(4) Under existing law, the components of an individualized education program to which the parent of a pupil has consented may be implemented without delay, while the components to which the parent has not consented may become the basis for a due process hearing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the components to which the parent consents to be implemented without delay and would require a due process hearing to be initiated, under certain circumstances, regarding the components to which the parent has not consented. In addition, the bill would authorize the school district, special education local plan area, or county office of education to reconsider the program, to meet informally with the parents, or to hold a prehearing mediation conference, as specified.

(5) Existing law requires designated instruction and services as specified in an individualized education program to be available, as specified. These services may include health and nursing services.

This bill would specify that a school district is not required to purchase medical equipment and that the school district, special education local plan area, or county office is responsible for providing other specialized equipment for use at school that is needed to implement the individualized education program. The bill would define medical equipment to exclude equipment that is used to increase, maintain, or improve the functional capabilities of individuals with disabilities.

(6) Existing law provides that special education and services for specified individuals with exceptional needs who are between the ages of 3 and 5 years and who do not require intensive special education and services be phased-in.

This bill would require those individuals with exceptional needs to be eligible for special education and services, as specified.

(7) Under existing law, a party to a due process hearing to be conducted for the purpose of resolving a special education dispute may request the Superintendent of Public Instruction to grant a continuance.

This bill would specify that the request be made to the hearing officer and would change the term continuance to extension.

(8) Under existing law, certain instructional materials for individuals with special needs that are procured with state or federal funds are property of the state and are required to be available for use by individuals with exceptional needs throughout the state, as specified.

This bill would include in these materials other specialized technology, media, and materials.

(9) Existing law requires the State Board of Education to make available copies of state-adopted textbooks in large print and braille for certain visually impaired pupils.

This bill would require the board also to make available to these pupils other state-adopted print materials in large print and in other accessible media and alternate formats.

(10) This bill would make technical changes in existing law by referring to a state special school or center, pupils with visual impairments, pupils with disabilities, and individualized family service plan (for the early education program) instead of referring to a state school for the handicapped, visually handicapped pupils, handicapped minors, and individualized education program, respectively. The bill would also make other related technical changes.

Ch. 1289 (SB 496) Ayala. Special districts: property tax revenue allocation.

Existing property tax law requires, for purposes of determining property tax revenue allocations in each county for the 1992-93 fiscal year, that the amounts of property tax revenue deemed allocated in the prior fiscal year to special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education.

This bill would authorize the Chino Basin Municipal Water District, notwithstanding this reduction and transfer requirement, to maintain a commitment of a stream of property tax revenues to the servicing of revenue bonds, issued within a certain period, until those bonds have been fully amortized.

This bill would make legislative findings and declarations as to the necessity of a special statute.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1290 (AB 2590) Eastin. Employees: school activities.

Existing law prohibits an employer who employs 25 or more employees working at the same location from discharging or discriminating against an employee who is a parent or guardian of a child in kindergarten or grades 1 to 12, inclusive, for taking off 4 hours each school year, per child, to visit the school of the child if the employee first gives reasonable notice to the employer of the planned absence. The employee is required to utilize existing vacation, personal leave, or compensatory time off for this purpose, unless otherwise provided by a collective bargaining agreement. Existing law specifies that these provisions do not apply to the state.

This bill instead would permit the employee to utilize specified time off to take off up to 40 hours per school year for the purpose of participating in school activities, subject to specified conditions including a limitation of 8 hours in any calendar month of the school year. The bill would provide that the entitlement of any employee under this bill shall not be diminished by any collective bargaining agreement term or condition that is agreed to on or after January 1, 1995, would extend the entitlement to grandparents having custody, and would also authorize an employee to utilize, as specified, time off without pay for this purpose. The bill would delete the provision of existing law exempting the state from these provisions.

Ch. 1291 (SB 657) Campbell. Hazardous waste facilities: treatment.

(1) Existing law requires hazardous waste facilities, including, but not limited to, storage facilities, to operate under hazardous waste facilities permits issued by the Department of Toxic Substances Control. A "storage facility" is defined as a facility at which the hazardous waste is held pursuant to certain requirements, including if liquid hazardous waste is held at an onsite facility in tanks for any period of time and the quantity exceeds 5,000 gallons in any individual tank or more than 50,000 gallons of liquid hazardous waste in the aggregate, unless the waste is held in a tank as part of the ongoing treatment of that waste.

Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, upon notifying the department, to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also conditionally exempts from hazardous waste facilities permit requirements and corrective action requirements a generator who treats not more than specified amounts of hazardous waste, in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste, including the neutralization of certain hazardous wastes. A generator is authorized to contract with another party to provide onsite treatment pursuant to a grant of conditional authorization or conditional exemption. Existing law requires any person who performs conditionally authorized or conditionally exempt onsite treatment in a transportable treatment unit to comply with certain treatment standards and with any additional requirements for transportable treatment units imposed by the department. A violation of the provisions regulating hazardous waste is a crime.

This bill would exempt from the definition of storage facility a tank used for the purpose of storing hazardous waste which is treated onsite in accordance with the requirements for conditional authorization or a conditional exemption.

The bill would instead authorize a generator who would be otherwise subject to conditional authorization to contract for that treatment with the operator of a transportable treatment unit operating pursuant to a full state hazardous waste facilities permit. The bill would delete the requirement that a transportable treatment unit comply with the department's additional requirements, but would instead require these units to comply with all requirements applicable to transportable treatment units operating pursuant to a permit-by-rule, as set forth in the regulations adopted by the department with regard to units performing conditionally authorized treatment, or to comply with the requirements for conditionally exempt treatment, with regard to units performing that treatment.

The bill would delete the neutralization of certain hazardous waste as being eligible for a conditional exemption and would instead exempt from hazardous waste facilities

NOTE: Superior numbers appear as a separate section at the end of the digests.

requirements an owner or operator of an elementary neutralization unit, as defined, and any storage tank not regulated under the Resource Conservation and Recovery Act of 1976 which is an integral part of the demineralizer operation, that neutralizes wastes which are hazardous solely due to corrosivity or toxicity that results only from the acidic or alkaline material, if the wastes result solely from the regeneration of ion exchange media used to demineralize water, do not contain more than 10% acid or base concentration by weight, and are treated in vessels and piping constructed of materials that are compatible with the range of temperatures and pH levels, and subject to appropriate pH and temperature controls. The bill would make legislative findings and declarations.

This bill would, until April 11, 1996, include, as eligible for operation under conditional exemption, the use of any technology, as prescribed, that is certified by the department as effective for the treatment of formaldehyde or glutaraldehyde solutions used in health care facilities that are operated pursuant to the conditions imposed on that certification and which makes the operation appropriate to operation under conditional exemption.

Since the bill would revise the requirements for contracting for, and for conducting, conditionally authorized or conditionally exempt treatment, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1292 (SB 1777) Thompson. Fire protection: emergency procedure information.

Existing law requires the owner or operator of any privately owned high-rise structure, as defined, any office building 2 stories or more in height, or any hotel or motel, to provide emergency procedure information to persons entering those buildings. Existing law also requires that in the case of hotels or motels, emergency procedure information be posted in a conspicuous place in every room available for rental in the hotel or motel, or by certain other means. Under existing law, a violation of these requirements is a misdemeanor.

This bill would add the requirement that the owner or operator of any apartment house 2 stories or more in height that contains 3 or more dwelling units where the front door opens into an interior hallway or lobby area provide emergency procedure information to persons entering those buildings, and would require the information to also be posted in every apartment or be provided by certain other means at the option of the apartment owner. This bill would also require the owner or operator of an apartment house, where more than 25% of the occupants do not read English, to provide the emergency procedure information in any language or languages, other than English, understood by at least 25% of the occupants. Additionally, this bill would delete an obsolete provision of law.

This bill would provide that an owner, operator, translator, or transcriber who provides this information in good faith and without gross negligence shall be held harmless for any errors in the translation or transcription of the information.

This bill would provide that these provisions become operative as to apartment houses or residential condominiums on July 1, 1995.

By applying the emergency procedure information requirements to owners and operators of apartment houses and residential condominiums, this bill would create a new crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1293 (SB 1911) Thompson. Propane storage systems.

Existing law establishes the office of the State Fire Marshal and requires the State Fire Marshal, to foster, promote, and develop ways and means of protecting life and property against fire and panic and to enforce all laws regulations and ordinances relating to fires, fire prevention, and protection. Existing law requires cities, counties, cities and counties, and fire protection districts, within their respective jurisdiction, to enforce certain building standards relating to fire and panic safety and other regulations of the State Fire Marshal.

This bill would enact the Propane System Fire Safety Act, to require the State Fire Marshal in conjunction with the Occupational Safety and Health Standard Board, after public hearings to adopt prescribed standards for storage and handling of petroleum gasses prior to January 1, 1996.

This bill would require the State Fire Marshal in cooperation with the Department of Industrial Relations as appropriate, by January 1, 1997, to inspect and certify the safety of all propane storage systems existing on January 1, 1995, and to prepare, adopt, and submit for approval building standards setting forth safety standards for the siting and construction of fixed propane storage systems. It would require the State Fire Marshal to adopt propane storage system fire safety compliance requirements setting forth propane fire safety handling standards, and standards setting forth minimum training and other qualifications for propane storage system personnel, and fire fighting personnel. It would also require the State Fire Marshal to issue operator certificates to the persons who meet the minimum training and other qualifications.

This bill would require the Division of Occupational Safety and Health and the State Fire Marshal to report to the Legislature on the condition of propane storage systems statewide.

This bill would require the Department of Industrial Relations to develop a propane storage system inspection curriculum and certification program for fire inspectors.

By increasing the enforcement duties of local agencies, this bill would impose a state-mandated local program.

This bill would specify that it shall be superseded by the Federal Clean Air Act, and would declare that its provisions relating to propane storage and handling are severable.

This bill would require prescribed persons or entities engaged in activities related to any energy product to carry prescribed liability insurance.

The bill would require the State Fire Marshal, in conjunction with local fire departments, to determine a fee, not to exceed $250 per propane storage system, to pay for the cost of the inspections and regulations.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1294 (AB 314) Sher. Environmental quality.

(1) Existing law, the California Environmental Quality Act, requires the Office of Planning and Research, by July 1, 1995, to recommend, and the Secretary of Resources to certify and adopt, changes to the guidelines adopted under the act to reflect 1993 legislative changes.

This bill would change that date to within 6 months of the enactment of this bill.

(2) The act prohibits a public agency from approving or carrying out a project for which an environmental impact report has identified any significant effect on the environment unless any of specified findings are made.

This bill would, as to one of those findings, require an additional finding to be made.

(3) The act requires a public agency to adopt mitigation measures as conditions of project approval in specified instances.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, instead, require the public agency to provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures.

(4) The act provides that a cumulative impact analysis for a project is not required to consider a project for which information subsequently becomes available, as specified.

This bill would delete that provision, thereby imposing a state-mandated local program by imposing new duties on local agencies.

(5) The act requires a public agency contract for the preparation of specified environmental documents to be executed within 45 days of receipt of the complete application.

This bill would instead require the execution of the contract within 45 days of the date that the agency determines that a negative declaration or environmental impact report is required, except as specified.

(6) Existing law prohibits the use of a master environmental impact report for purposes of the limited review of a subsequent project under prescribed circumstances unless specified conditions are met.

This bill would also prohibit the use of a master environmental impact report unless those conditions are met if a project not described in the report may affect the adequacy of the environmental review in the report for any subsequent project. The bill would delete related provisions. The bill would authorize the use of a master environmental impact report for a project that is a regional transportation plan or congestion management plan.

(7) The act prescribes procedures for the conduct of actions or proceedings to attack, review, set aside, void, or annul a determination, finding, or decision of a public agency subsequent to the act.

This bill would revise those procedures for the conduct of actions or proceedings, as specified, and would specify related matters.

The bill would require each party, not later than 30 days from the date that notice of certification of the record of proceedings was filed and served, to file and serve on all other parties a statement of issues which that party intends to raise in any brief or at any hearing or trial.

(8) The bill would make various technical and clarifying changes.

(9) Existing law prohibits the discharge or changes in the discharge of waste relative to an injection well, or the construction of an injection well, unless specified conditions are met.

This bill would prescribe additional conditions for those actions relating to compliance with the act.

(10) This bill also makes additional changes proposed by SB 749 and SB 1971, respectively, to be operative only if either of those bills and this bill are chaptered and become effective on or before January 1, 1995, and this bill is chaptered last. Also, specified provisions of this bill would become operative only if SB 749 is not operative.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(12) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1295 (AB 2632) Solis. Open space: public parks: Puente Hills.

Existing law includes in the definition of open-space land areas particularly suited for park and recreation purposes. Under existing law, any city or county may acquire and hold land for public parks, among other uses.

This bill would provide that the owner of the disposal site known as the Puente Hills Landfill, located in an unincorporated portion of the County of Los Angeles, shall dedicate as open-space specified property within the landfill, for use as a public park, pursuant to specified terms of Los Angeles County Conditional Use Permit 92–250 (4). The bill would provide for consultation with a citizens advisory committee in this regard, as specified in the conditional use permit. It would also provide that a joint powers authority established pursuant to the conditional use permit shall give due consideration

NOTE: Superior numbers appear as a separate section at the end of the digests.

to the purchase of specified parcels located near the landfill property.

This bill would declare that, because of the unique circumstances applicable to Hacienda Heights and the Puente Hills Landfill, a statute of general applicability cannot be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution.

This bill, by requiring local entities to perform specific acts with respect to the acquisition and use of the landfill property, would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1296 (AB 2925) Sher. Income and bank and corporation taxes: credits: salmon and steelhead trout habitat restoration and improvement projects: water's-ed

The Personal Income Tax Law and the Bank and Corporation Tax Law provide various credits against the taxes imposed by those laws.

This bill would, under both laws, until January 1, 2000, provide a credit in an amount equal to 10% of the qualified costs paid or incurred by a taxpayer or partnership for salmon and steelhead trout habitat restoration and improvement projects, as specified, not to exceed an aggregate credit of $500,000 per year. The bill would require the Department of Fish and Game to, among other things, establish criteria for determining the amount of credit to which a taxpayer is entitled, accept applications for credit allocation and certification, issue certifications regarding credit allocation amounts, and provide an annual listing to the Franchise Tax Board of those taxpayers who were issued a certification and of the amount of any credit authorized.

The Bank and Corporation Tax Law imposes taxes measured by income and, in the case of a business with income derived from or attributable to sources both within and without this state, the business income is apportioned between this state and other jurisdictions for tax purposes in accordance with a specified formula.

This bill would provide, until January 1, 2000, that, notwithstanding specified provisions, the sale or milling of any unprocessed timber, as defined, that is a softwood shall be deemed to be in this state if that unprocessed timber was cut from an area in this state and is delivered or shipped, as provided.

This bill would also provide that specified recently enacted federal income tax provisions, relating to source rule for sales of unprocessed timber, as defined, shall apply for purposes of the Personal Income Tax Law and the Bank and Corporation Tax Law until December 1, 2000.

This bill would take effect immediately as a tax levy.

Ch. 1297 (AB 3418) Weggeland. Vehicles: traffic control signals.

(1) Existing law requires that only those official traffic control devices that conform to the uniform standards and specifications promulgated by the Department of Transportation be placed upon a street or highway, except as specified.

This bill would require that any traffic signal controller that is newly installed or upgraded by the department or a local authority be of a standard traffic signal communication protocol capable of two-way communication. Because the bill would impose new duties on local authorities, it would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1298 (AB 3425) Sher. Oil spills: tugboat escorts.

(1) Existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, requires the administrator for oil spill response to adopt regulations governing the use of tugboat escorts for tankers entering, leaving, or navigating harbors in this state. The act requires the administrator to be guided by the recommendations of harbor safety committees when adopting those regulations and provides that the administrator may adopt regulations that differ from the recommendations of the harbor safety committees only after conducting a public hearing.

This bill would require the administrator, prior to the start of the public comment period on any proposed regulations that differ from the recommendations of a harbor safety committee, to notify the harbor safety committee and any other party who has requested notification, in writing, of the proposed changes. The bill would require the administrator, if a member of a harbor safety committee or any other interested party requests notification within 30 days from the start of the comment period for the proposed regulations, to hold a public hearing after notice, as prescribed, and would make various technical and clarifying changes in those provisions.

(2) The act specifies the level of required financial responsibility for a certificate of financial responsibility for a vessel or for all of the oil contained within a vessel. The act authorizes the administrator to establish a lower standard of financial responsibility for small barges.

This bill would also authorize the administrator to establish a lower standard of financial responsibility for small marine fueling facilities, as defined.

Ch. 1299 (AB 3589) Rainey. Dump truck carriers.

Existing law provides generally for the regulation of highway permit carriers by the Public Utilities Commission and provides specifically for the regulation of dump truck carriers as a specialized type of truck transportation.

This bill would specifically require the commission to establish just, reasonable, and nondiscriminatory minimum rates for dump truck carriers and adjust the rates of those carriers to reflect costs that have increased or decreased since the rates were last adjusted, would require the commission to establish or approve expedited rate deviation procedures for dump truck carriers, and would authorize the commission to approve applications by dump truck carriers for deviations from those minimum rates.

NOTE: Superior numbers appear as a separate section at the end of the digests.

DIGESTS OF STATUTES ENACTED IN 1994

1993–94 FIRST EXTRAORDINARY SESSION

First Extraordinary Session

BILL CHAPTERS

Ch. 1 (AB 1) Baca. Economic development centers: military bases.

Existing law requires the Public Utilities Commission to engage in programs to encourage economic development. Existing law provides that incentives may be provided for the benefit of industries or business entities located within the boundaries of enterprise zones or economic incentive areas.

This bill would provide that previously approved incentives may be applied to attract a federal Department of Defense Finance and Accounting Service Center at the existing site of Norton Air Force Base in San Bernardino County.

This bill would appropriate $1,500,000 from the Federal Trust Fund received from the Petroleum Violation Escrow Account and related sources, to the Trade and Commerce Agency for allocation to the Inland Valley Development Agency to provide funds to rehabilitate facilities to be used by the Defense Finance and Accounting Service Center facility at the existing site of Norton Air Force Base, as specified.

The bill would become inoperative if the federal Department of Defense Finance and Accounting Service Center is not located on Norton Air Force Base in San Bernardino County and would also be inoperative on February 1, 1994, if the facility is not awarded to that site before that date.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (SB 2) Ayala. Economic development.

Existing law establishes the Employment Training Panel which, among other things, may allocate the Employment Training Fund to facilitate employment.

This bill would authorize the panel to allocate up to $10,000,000 to fund special employment training agreements that are related to and in response to the establishment of a federal Defense Finance and Accounting Services facility at the existing site of Norton Air Force Base, as specified, but would provide that the provisions relating to the foregoing authorization shall only become operative if the Norton Air Force Base is selected as the site for the federal Defense Finance and Accounting Services facility on or before December 31, 1993.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (SB 1) Ayala. State representative: base closure.

Existing law authorizes the Governor to appoint and fix the salaries of assistants and personnel.

This bill would require the Governor to appoint a person to represent the state in Washington, D.C. to identify revenue sources available to the state in connection with military base closures and conversion. The provision would become inoperative when the Governor determines that there is no longer a need for a representative.

The bill would also require the person so appointed to furnish the Secretary of the Senate and the Chief Clerk of the Assembly an annual report of his or her activities related to the appointed position.

The bill would state legislative intent.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 4 (AB 30) Epple. Crime: judicial emergencies.

Existing law authorizes a presiding judge or, where there is not a presiding judge, the sole judge of a superior, municipal, or justice court to request, and the Chair of the Judicial Council to authorize, certain actions when specified judicial emergencies arise.

This bill would, for a 30-day period, as specified, include within the actions that may be requested and authorized the extension of the time period within which a defendant charged with a felony offense must be taken before a magistrate from 2 days to not more than 7 days.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 5 (SB 25) Lockyer. Child custody and visitation.

Under existing law, a court may not grant custody of, or unsupervised visitation with, a child to a parent if the parent has been convicted of specified offenses, unless the court finds that there is no significant risk to the child.

This bill would apply this provision to any person and expand the prohibition to include any person who is required to be registered as a sex offender under a specified provision of law where the victim was a minor.

Ch. 6 (SB 12) Thompson. Crimes: violent and sex offenders.

(1) Existing law provides for the Serious Habitual Offender Program (SHOP) under which the Department of Justice is required to establish and maintain a comprehensive file of certain existing information regarding persons identified as sexual habitual offenders, as defined. The Department of Justice is required to provide summary profiles and complete files of information on sexual habitual offenders to law enforcement agencies, as specified.

(2) Existing law also requires the department to accept and maintain specified registration information regarding persons required to register upon conviction of certain sex offenses.

(3) Existing law also requires the department to do certain acts related to facilitating the analysis of DNA and other genetic typing analysis at its DNA laboratory, filing and maintaining this information in an offender's file or computerized data bank system, and releasing the information to law enforcement agencies and district attorneys' offices, as specified.

This bill would require the Attorney General to establish and maintain a statewide Sexual Habitual Offender Program special force, a Violent Crime Information System, and a Violent Crime Information Network.

This bill would appropriate $7,931,225 from the General Fund to the Department of Justice for expenditure during the 1994–95 fiscal year for specified purposes as follows:

(a) The sum of $739,082 for support of the Violent Crime Information Network (VCIN).

(b) The sum of $838,893 for implementing and supporting the Violent Crime Information System (VCIS).

(c) The sum of $850,000 for the addition of the Supervised Release File to the California Law Enforcement Telecommunications System (CLETS).

(d) The sum of $536,698 to support the expansion of SHOP described in (1) above.

(e) The sum of $1,179,171 to update and enhance the sex offender registration system described in (2) above.

(f) The sum of $1,999,411 for the expansion and support of the DNA files and bank described in (3) above which shall contain certain profiles of sex and violent offenders and profiles of evidence in unsolved sexual crimes.

(g) The sum of $1,787,970 to support a statewide Sexual Habitual Offender Program special force.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (AB 81) Epple. Prosecuting attorneys.

Existing law provides that with the consent of the district attorney of the county, the city attorney of any general law city or chartered city within the county may prosecute any misdemeanor committed within the city arising out of violation of state law. Existing law also provides that a violation of a city ordinance is a misdemeanor and authorizes city authorities to prosecute these violations in the name of the people of the state. Existing law authorizes a county counsel to discharge specified duties vested in the district attorney.

This bill would provide that where the district attorney is granted any powers or access to information with regard to the prosecution of misdemeanors, this grant of power shall be deemed to apply to any other officer charged with the duty of prosecuting misdemeanor charges in the state, as authorized by law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 8 (AB 49) Burton. Crimes.

Existing law provides that any person who engages in specified acts constituting the inhumane treatment of horses is guilty of a crime, punishable as specified.

This bill would provide, in addition, that it is a misdemeanor for any person to intentionally trip or fell a horse by the legs by any means whatsoever. The bill would provide, furthermore, that existing provisions which prohibit the poling or tripping of a horse, as well as the above provisions which would prohibit the intentional tripping or felling of an equine by the legs by any means whatsoever, do not apply to the lawful laying down of a horse for medical or identification purposes, nor shall the provisions be construed as condemning or limiting any cultural or historical activities, except those prohibited in the provisions.

This bill would impose a state-mandated local program upon local governments by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 9 (SB 39) Russell. Commitment: mentally disordered offenders: credit for time on outpatient status.

(1) Existing law provides that in the case of any person committed or confined to a state hospital or other treatment facility, as specified, who committed a felony, a maximum term of commitment shall be determined, and the person may not be kept in actual custody longer than the maximum term of commitment, except as specified. Existing law further provides that where the court or jury finds that the person represents a substantial danger of physical harm to others, the court shall order the person recommitted for an additional period of 2 years.

This bill would provide that a person who is recommitted may not be kept in actual custody longer than 2 years unless another extension of commitment is obtained, as specified. The bill also would provide that time spent on outpatient status, except when placed in a locked facility at the direction of the outpatient supervisor, shall not count as actual custody or be credited toward the person's maximum term of commitment or toward the person's term of extended commitment.

(2) Existing law provides that for a person committed as a mentally disordered sex offender, as specified, who is placed on outpatient status under provisions of the Penal Code, time spent on outpatient status, except when placed in a locked facility, shall not count as actual custody and shall not be credited toward the person's maximum term of commitment.

This bill would, in addition, make the above provision applicable to a person who was committed as a mentally disordered sex offender under certain former provisions of the Welfare and Institutions Code. The bill also would provide that time spent in a locked facility on outpatient status shall not count as actual custody or be credited toward the person's maximum term of commitment or toward the person's term of extended commitment unless the placement is at the direction of the outpatient supervisor.

Ch. 10 (SB 40) Bergeson. Criminal procedure: insanity plea.

Existing law, added by initiative statute, provides, among other things, that the defense of not guilty by reason of insanity shall be found by the trier of fact only when the accused person proves by a preponderance of the evidence that he or she was incapable of knowing or understanding the nature and quality of his or her act and of distinguishing right from wrong at the time of the commission of the offense.

This bill would bar any finding in support of that defense that is based solely on a personality or adjustment disorder, a seizure disorder, or an addiction to, or abuse of, intoxicating substances. The bill would be applicable to persons who use the defense after its provisions become operative.

The bill would amend an initiative statute that may be further amended by a ⅔ vote of the Legislature.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 11 (AB 8) Hoge. Arson: registration of offenders.

Existing law authorizes, upon the conviction of the offense of arson or attempted arson, or upon the discharge or parole of any person from the Department of the Youth Authority for those offenses, the court to impose, in addition to any other penalty prescribed by law, a requirement that the person register with the chief of police of the city in which he or she resides, or with the sheriff of the county if he or she resides in an unincorporated area, within 30 days of coming into any county or city in which he or she expects to reside or is temporarily domiciled for at least 30 days. The court may require the person to register under this provision only if it finds the person has previously been convicted of, or if a juvenile has been adjudicated to have committed, arson, as specified, or in committing arson, exhibited compulsive behavior. A person required to register under these provisions who violates these provisions is guilty of a misdemeanor. The duty to register under this provision for a first-time-convicted offender terminates 5 years after the offender's release from prison or jail, or termination of probation or parole.

This bill would, instead, require mandatory registration of all persons convicted of, or adjudicated to have committed, arson or attempted arson.

Existing law provides that the duty to register under these provisions for offenses adjudicated by a juvenile court shall terminate when a person reaches the age of 25 years.

This bill would provide, instead, that the duty to register under these provisions for offenses adjudicated by a juvenile court shall cease 10 years after the adjudication of the offense for which the registration was required.

This bill would impose a state-mandated local program by increasing the duties of officials in charge of local correctional facilities who would be required to provide written notification to additional registrants.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 12 (AB 95) Burton. Stalking.

(1) Existing law prohibits a person from stalking, as defined, another person with the intent of placing that person in reasonable fear for his or her safety, or the safety of his or her immediate family, as defined.

This bill would require the Department of Corrections or county sheriff to give notice not less than 15 days prior to the release, as defined, from the state prison or a county jail of any person who is convicted of violating the above provisions or other specified provisions to any person the court identifies as a victim of the offense, a family member of the victim, or a witness to the offense, as specified. The bill would make that notice provision applicable to the escape from an institution or reentry facility by any person who is convicted of violating the above provisions or other specified provisions. The bill would also specify that substantial compliance satisfies the requirements of the notice provision.

The bill also would provide that all information relating to any person who receives notice shall remain confidential and shall not be made available to the person convicted of violating the above provisions or other specific provisions. The bill would also specify that substantial compliance satisfies the requirements of the notice provision.

This bill would impose a state-mandated local program by imposing a higher level of service on county sheriffs.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide costs does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 13 (AB 128) Richter. Criminal procedure: homicide cases: change of venue.

Under existing law, if the venue for trial of a homicide case has been changed from the county which is eligible for designated reimbursement under certain provisions to a location more than 60 miles from the county seat of that county, and the district attorney of that county has entered into a contract with an attorney to try the case or an investigator to assist in the trial of the case, the Controller is required to reimburse the county for the actual costs of the attorney or investigator as specified. This provision applies to homicide cases in which a final judgment was entered prior to January 1, 1990.

This bill would provide that the County of Sierra may apply to the Controller for reimbursement pursuant to this provision for the county's costs incident to the prosecution of the homicide trial of People v. Corjasso.

This bill would make legislative findings and declarations that the provisions of the bill constitute necessary special legislation.

Ch. 14 (SB 26) Bergeson. Sex offenses.

(1) Existing law prescribes enhanced prison terms for, among other things, repeat offenders.

This bill would provide that any person convicted of a felony violation of specified sex offenses shall be punished by an additional consecutive term of imprisonment in the state prison for 25 years to life if one or more of any specified circumstances is true.

(2) Existing law provides that probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, nor shall a finding bringing the defendant within those provisions be stricken for, among others, any person who commits any lewd or lascivious acts or continuous sexual abuse of a child under 14 years of age.

This bill would, among other things, delete and add various offenses to the list of offenses specified for this purpose.

(3) Existing law defines a "habitual sexual offender" for the purpose of enhanced punishment and delayed parole provisions and makes those provisions applicable to persons found guilty of committing specified sex crimes.

This bill would include kidnapping with the intent to commit those crimes in the habitual sexual offender provision as well as an offense committed in another jurisdiction that has all the elements described in the above provisions.

(4) Under existing law, a habitual sexual offender, as defined, is punishable by 25 years in the state prison or, under certain circumstances, 25 years to life, a prison term that requires application of a specified statutory term reduction provision. Existing law prohibits the release on parole of any habitual sexual offender, sentenced as specified, until he or she has been incarcerated for at least 20 years.

This bill would, instead, specify that a habitual sexual offender is punishable by imprisonment in state prison for 25 years to life and would prohibit the release on parole of any habitual sexual offender until he or she has been incarcerated for at least 85% of the minimum term of 25 years.

(5) This bill would become operative only if AB 1029, AB 2261, and AB 3707 of the 1993–94 Regular Session and AB 19 of the 1993–94 First Extraordinary Session are enacted.

Ch. 15 (SB 23) Leonard. Juveniles.

Existing law provides that no person convicted of specified offenses committed when that person had attained the age of 18 years may be committed to the Youth Authority, as specified. Existing law also authorizes the transfer of persons under the age of 21 years from the Department of Corrections to the Youth Authority for housing and other specified purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, contingent upon the enactment of AB 560 and AB 2428, provide that no minor shall be committed to the Youth Authority when he or she is convicted in a criminal action for specified offenses and is sentenced to incarceration for life, an indeterminate period to life, or a determinate period of years such that the maximum number of years of potential confinement when added to the minor's age would exceed 25 years. In all other cases in which the minor has been convicted in a criminal action, the bill would provide that the court shall retain discretion to sentence the minor to the Department of Corrections or to commit the minor to the Youth Authority. The bill would further provide that notwithstanding any other provision of law, no person under the age of 16 years shall be housed in any facility under the jurisdiction of the Department of Corrections.

Ch. 16 (SB 22) Peace. Corrections: inmates.

Existing law specifies the duties and responsibilities of the Department of Corrections and the Department of the Youth Authority.

This bill would require both the Department of Corrections and the Department of the Youth Authority to adopt regulations governing inmate access to weight lifting and weight training equipment in state prison and California Youth Authority facilities, respectively, on or before July 1, 1995.

This bill also would require the departments to report to the Chair of the Assembly Committee on Public Safety and the Chair of the Senate Judiciary Committee on or before July 1, 1995, regarding the regulations adopted pursuant to the bill.

Ch. 17 (SB 29) Peace. False government documents.

(1) Existing law provides, among other things, that every person who knowingly procures or offers any false or forged instrument to be filed, registered, or recorded in any public office within this state, which instrument, if genuine, might be filed, registered, or recorded under any law of this state or of the United States, is guilty of a felony.

This bill would provide that any person who manufactures or sells any false government document, as defined, with the intent to conceal the true citizenship or resident alien status of another person is guilty of a misdemeanor and shall be punished by imprisonment in a county jail for one year. This bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 18 (AB 19) V. Brown. Kidnapping.

Existing law provides that a person convicted of certain felony sex offenses who, for the purpose of committing that sexual offense kidnapped the victim, as specified, shall be punished by an additional term of 3 years imprisonment, except if the victim was under the age of 14 years at the time of the offense, the offense is punishable by an additional term of 9 years imprisonment.

This bill would increase these enhancements to 9 years and 15 years, respectively. This bill also would provide with regard to these enhancements that (1) only one enhancement shall be imposed for a victim per incident, (2) if there are 2 or more victims, one enhancement can be imposed for each victim per incident, and (3) the enhancement may be in addition to punishment for kidnapping or punishment for certain felony sex offenses.

This bill would incorporate additional changes in Section 667.8 of the Penal Code proposed by SB 59 (1993–94 Reg. Sess.), to be operative only if SB 59 and this bill are both enacted and become effective as specified, and this bill is enacted last.

Ch. 19 (AB 74) Speier. Health: hospitals: security.

Existing law requires certain licensed hospitals to conduct a security and safety assessment and to develop a security plan to protect personnel, patients, and visitors from

NOTE: Superior numbers appear as a separate section at the end of the digests.

aggressive or violent behavior. Existing law requires these hospitals to report any act of assault or battery, as defined, against any on-duty hospital personnel, to the local law enforcement agency within 72 hours.

This bill would instead require the reporting of any act of assault or battery, as defined, that results in injury or involves the use of a firearm or dangerous weapon, as defined, and would make the reporting of other acts of assault or battery permissive. This bill would further provide that no health facility or employee of a health facility who reports a known or suspected instance of assault or battery pursuant to these provisions shall be civilly or criminally liable for any required report. It would also provide that a health facility or employee of a health facility that makes this report when it is authorized but not required shall not be civilly or criminally liable for the report, unless it can be proven that a false report was made and the health facility or the employee knew the report was false, or made the report with reckless disregard of the truth or falsity of the report. The bill would provide that any health facility or employee of a health facility who makes a report known to be false, or with reckless disregard for the truth or falsity of the report, shall be liable for any damages caused.

Existing law requires any health practitioner, as defined, employed in a health facility or clinic, as defined, or physician's office who, in his or her professional capacity or within the scope of his or her employment, has knowledge of or observes a patient whom he or she knows or reasonably suspects has suffered from any wound or injury inflicted by his or her own act, or inflicted by another where the injury is by a knife, firearm, or other deadly weapon, or any wound or physical injury inflicted on the person as a result of assaultive or abusive conduct, as defined, to report to a law enforcement agency, as specified.

This bill would instead impose this reporting requirement when the health practitioner provides medical services for a physical condition to a patient whom he or she reasonably suspects is suffering from any wound or other physical injury inflicted by his or her own act, or by another where the injury is by means of a firearm, or the patient is seeking treatment for a wound or other physical injury inflicted on the person as a result of assaultive or abusive conduct.

The bill would extend the reporting requirement to also apply to any health practitioner employed in a local or state public health department, or a clinic or other type of facility operated by a local or state public health department.

Ch. 20 (AB 109) Martinez. Sexual assault: HIV tests: search warrant.

Existing law authorizes a crime victim, in accordance with certain procedures and requirements, to petition a court to issue a search warrant for the purpose of testing the blood of the person charged with that crime for the presence of the AIDS virus.

This bill would include within this authorization those persons who have filed a police report alleging the commission of a separate, uncharged offense that could be charged under specified provisions relating to sexual offenses where the subject of the police report has been charged under those specified provisions relating to sexual offenses. By requiring additional tests and disclosures of test results, this bill would impose a state-mandated local program. The bill would provide that the court may issue a search warrant on the request of a victim of an uncharged offense for HIV testing of a defendant who otherwise has been charged with a separate offense only when the court finds that there is probable cause to believe that the accused committed the uncharged offense, and that there is probable cause to believe that blood, semen, or any other body fluid, as specified, has been transferred from the accused to the victim.

The bill would impose additional procedural requirements to petition the court to issue a search warrant. It would also provide for certain misdemeanor penalties for an individual who files a false report of sexual assault for purposes of obtaining test results under the authorization as expanded by this bill. By establishing a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

for a specified reason.

However, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 21 (AB 116) Alpert. Crime: disorderly conduct.

Existing law provides that every person is guilty of disorderly conduct, a misdemeanor, who, while loitering, prowling, or wandering upon the private property of another, at any time, peeks in the door or window of any inhabited building or structure located thereon, without visible or lawful business with the owner or occupant thereof.

This bill would provide, in addition, that a person is guilty of disorderly conduct if the person looks through a hole into a bathroom with the intent to invade the privacy of persons therein. This bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 22 (AB 152) Polanco. Sex offenders.

Existing law requires the Department of Corrections or the Board of Prison Terms to notify the sheriff or chief of police of the release on parole of persons convicted of violent felonies. Existing law also requires notification of local law enforcement agencies in any case in which a person who is confined upon conviction of a felony sex offense for which the person would be required to register is to be temporarily sent outside the institution where he or she is confined on any assignment within a city or county.

This bill would require, 15 days before the scheduled release date of a person confined upon conviction of specified sex offenses, the Department of Corrections to provide to local law enforcement certain information regarding the person.

Ch. 23 (AB 45) Andal. Juvenile court law: incarceration.

Existing law provides that any person under 18 years of age detained or sentenced to an institution where adults are confined, or any ward or dependent child of the juvenile court detained or committed to a state hospital or other state facility, may not come or remain in contact with adult inmates, except as specified.

This bill would provide that this prohibition is not applicable to any minor 16 years of age or older who is alleged to have committed any of specified violent offenses and who will be tried in a court of criminal jurisdiction if a court finds that the minor's further detention in the juvenile hall would endanger the safety of the public, staff, or other minors in the juvenile hall, the minor will receive adequate care and protection, and no other juvenile facility is available, suitable, or feasible, as specified. The bill would specify that detention in a jail or other secure facility for confinement of adults shall not occur prior to the filing of a criminal complaint and only if the sheriff agrees, on a case-by-case basis, to accept custody of the minor.

The bill would provide that a minor delivered to the custody of the sheriff for confinement in a jail or adult facility may be allowed to come or remain in contact with adults, but that such a minor may not be placed in the same cell with an adult prisoner unless no other cell or living arrangement within the jail or secure adult facility is available, and specified supervision is provided. The bill would provide that the juvenile court shall retain jurisdiction for the purpose of periodically reviewing the order of transfer, as specified, and that the minor shall be returned to a juvenile facility unless the court finds good cause to continue to confine the minor in the jail or adult facility.

The bill would repeal these provisions as of January 1, 1998, at which time existing law would be restored.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 24 (AB 67) Bowler. Juveniles: juvenile justice professionals.

(1) Existing law generally provides that records, reports, and other documents related to juvenile court proceedings are confidential and may be released only to specified parties. Existing law permits, however, members of a multidisciplinary personnel team engaged in the prevention, identification, and treatment of child abuse to disclose and exchange information and writings to and with one another relating to any incidents of child abuse that may also be a part of a juvenile court record or otherwise designated as confidential.

This bill would authorize members of a juvenile justice multidisciplinary team engaged in the prevention, identification, and control of crime, including, but not limited to, criminal street gang activity, as defined, to disclose and exchange nonprivileged information, as defined, and writings to and with one another relating to any incidents of juvenile crime that may also be part of a juvenile court record or otherwise designated as confidential. The bill would provide that the members of a juvenile justice multidisciplinary team who receive such information or writings shall have the same obligation regarding privacy and confidentiality as the person providing the information or writings; and shall maintain the information and writings in a manner which ensures the protection of confidentiality, thereby imposing a state-mandated local program by requiring new duties of local officials.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 25 (AB 87) Alpert. Crimes.

Existing law provides that any person is guilty of trespass who makes a credible threat to cause serious bodily injury, as defined, to another person and who, within 14 days of the threat, unlawfully enters into the other person's residence, real property contiguous to the residence, or workplace, as specified.

This bill would provide, instead, that any person is guilty of trespass who makes a credible threat to cause serious bodily injury to another person with the intent to place that other person in reasonable fear for his or her safety, or the safety of his or her immediate family, as defined, and who, within 30 days of the threat, unlawfully enters into the other person's residence, real property contiguous to the residence, or workplace, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would impose a state-mandated local program by changing the definition of a crime.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 26 (SB 48) Kopp. Peace officers.

Existing law provides that certain persons who have been deputized or appointed by the proper authority as, among other things, a reserve or auxiliary sheriff or city police officer, a reserve deputy sheriff, a reserve deputy marshal, or a reserve police officer of a regional park district or of a transit district, are designated as peace officers with the full powers and duties of a peace officer, as specified.

This bill would add reserve officers of a community service district, as specified, and reserve officers of a police protection district, as specified, to these provisions.

This bill would incorporate additional changes in Section 830.6 of the Penal Code proposed by SB 281 of the 1993–94 Regular Session of the Legislature, to be operative

NOTE: Superior numbers appear as a separate section at the end of the digests.

only if SB 281 and this bill are both enacted and become effective, as specified, and this bill is enacted last.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 27 (AB 91) Burton. Firearms.

Under existing law, any person who has been convicted of specified misdemeanor violations and who, within 10 years of the conviction, owns, or has in his or her possession or under his or her control, any firearm is guilty of a public offense, punishable as specified.

This bill would include within the above-described prohibition, among other violations, the criminal possession of a firearm, as specified. The bill would create the crime of criminal possession of a firearm which it would generally define as the carrying of a firearm in public by a person while the person is masked to hide his or her identity. The bill would provide that the crime of criminal possession of a firearm is punishable as a misdemeanor or a felony, as specified. The bill would impose a state-mandated local program upon local governments by creating a new crime.

The bill also would incorporate additional changes to Section 12021 of the Penal Code proposed by AB 482 (Ch. 23, Stats. 1994).

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 28 (AB 93) Burton. Domestic violence.

(1) Existing law provides that the conditions of probation for a person convicted of a battery committed against a noncohabiting former spouse, fiancé, fiancée, or a person with whom the defendant currently has, or has previously had, a dating relationship, or for a person convicted of willfully inflicting upon his or her spouse, any cohabitant of the opposite sex, or the mother or father of the defendant's child, corporal injury resulting in a traumatic condition, or for a person convicted of any willful and knowing violation of any specified court order, including, but not limited to, an order enjoining any party from molesting, attacking, striking, threatening, sexually assaulting, battering, or harassing the other party, or other named family and household members, may include that the defendant make payments to a battered women's shelter, up to a maximum of $1,000.

This bill would increase the maximum total of payments by the defendant to a battered women's shelter to $5,000.

This bill would prescribe additional conditions of probation, including, but not limited to, successful completion of a batterer's program, for a person convicted of any crime in which the victim is, among other persons, a spouse or former spouse, cohabitant or former cohabitant, a person with whom the defendant is having or has had a dating or engagement relationship, or a person with whom the defendant has had a child. The bill would also require, as a condition of probation, that the defendant pay a minimum of a $200 payment to be disbursed as specified.

This bill would impose a state-mandated local program by imposing additional duties upon local agencies.

(2) Existing law requires, as a condition of probation of any person who willfully inflicts upon his or her spouse, any cohabitant of the opposite sex, or the mother or father of his or her child, corporal injury resulting in a traumatic condition, participation in a batterer's treatment program unless the court finds participation inappropriate for the defendant.

This bill would delete the court's discretion to find participation inappropriate for the defendant and make the provisions applicable to cohabitants whether or not of the opposite sex.

(3) This bill would incorporate additional changes in Section 273.6 of the Penal Code proposed by AB 68 (1st Ex. Sess.), to be operative only if AB 68 and this bill are both enacted and become effective as specified, and this bill is enacted last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 29 (AB 68) Alpert. Harassment of employees.

(1) Existing law regulates the employer-employee relationship, as specified. Existing law also prohibits harassment of individuals, authorizes the issuance of temporary restraining orders and injunctions prohibiting such harassment, and specifies the penalties therefor.

This bill would enact similar provisions authorizing an employer to obtain a temporary restraining order and an injunction against unlawful violence or credible threats of violence against an employee, as defined, a violation of which would be punishable under a specified provision of existing law. The bill would also require the Judicial Council to develop forms, instructions, and rules for these purposes, as specified. By requiring greater duties of courts and local law enforcement officials, the bill would impose a state-mandated local program.

(2) Existing law makes it a public offense for a person to purchase or receive, or attempt to purchase or receive, a firearm knowing that the person is subject to, among other things, a protective order, as defined, and makes it a public offense for a person convicted of certain misdemeanors, including a misdemeanor violation under (1) above, to own or possess a firearm within 10 years thereafter.

This bill would add a temporary restraining order or injunction issued above, or pursuant to existing law regarding harassment, to the former offense. A violation of the temporary restraining order or injunction would be a public offense under the latter provision. The bill would also incorporate the changes to Section 12021 of the Penal Code made by Chapter 23 of the Statutes of 1994.

(3) Existing law makes the willful and knowing violation of a protective order or temporary restraining order or injunction, as specified, a public offense.

This bill would add a temporary restraining order or injunction issued pursuant to (1) above to this offense.

(4) The bill would impose a state-mandated local program by expanding the definition of various crimes.

(5) This bill would incorporate additional changes in Section 273.6 of the Penal Code proposed by AB 93 (1st Ex. Sess.), to be operative only if AB 93 (1st Ex. Sess.) and this bill are both enacted and become effective as specified, and this bill is enacted last.

(6) This bill would incorporate additional changes in Section 12021 of the Penal Code proposed by SB 36 (1st Ex. Sess.), to be operative only if SB 36 (1st Ex. Sess.) and this bill are both enacted and become effective as specified, and this bill is enacted last.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 30 (AB 141) Andal. Probation eligibility: mayhem.

Existing law provides that, except in unusual cases where the interests of justice would best be served if the person is granted probation, probation shall not be granted to any person convicted of designated offenses where certain circumstances exist, including, but not limited to, the circumstance where the person has a prior conviction of the designated offense or the circumstance in which the person used or attempted to use a deadly weapon upon a human being in connection with the perpetration of the designated offense of which he or she was convicted.

This bill would add torture and aggravated mayhem to the list of designated offenses which make a person ineligible for probation under the circumstances enumerated above.

Existing law provides that probation shall not be granted to any person convicted of specified offenses if certain conditions exist, including, but not limited to, if the person personally used a firearm during the commission or attempted commission of the offense.

This bill would add torture and aggravated mayhem to the list of specified offenses which make a person ineligible for probation.

This bill would incorporate additional changes to Section 1203 of the Penal Code proposed by AB 482 (Ch. 23, Stats. 1994).

This bill would incorporate additional changes in Section 1203 of the Penal Code proposed by AB 2470 or SB 36 (1st Ex. Sess.), or both, to be operative only if AB 2470, SB 36 (1st Ex. Sess.), or both, and this bill are enacted and become effective as specified, and this bill is enacted last.

This bill would incorporate additional changes in Section 1203.06 of the Penal Code proposed by SB 1309, to be operative only if SB 1309 and this bill are both enacted and become effective as specified, and this bill is enacted last.

Ch. 31 (AB 13) Solis. Firearms: sentencing enhancements.

(1) Existing law provides that any person who, while armed with a firearm in the commission or attempted commission of any felony, has in his or her immediate possession ammunition designed primarily to penetrate metal or armor, shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 3, 4, or 5 years.

This bill would increase the maximum prison term available for this enhancement from 5 to 10 years.

(2) Existing law also provides that any person who wears a body vest, as defined, in the commission or attempted commission of a violent offense, as defined, shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 1, 2, or 3 years.

This bill would increase the maximum prison term available for this enhancement from 3 to 5 years.

(3) Existing law provides that, in addition to the sentence provided for the offense, any person who commits any specified sex offense shall receive a 3-, 4-, or 5-year enhancement if the person uses a firearm or deadly weapon in committing the offense.

This bill would increase the maximum enhancement available for this enhancement from 5 to 10 years.

(4) Existing law also provides that, in addition to the sentence provided for the offense, any person who commits any specified sex offense shall receive a 1-, 2-, or 3-year enhancement if the person is armed with a firearm or deadly weapon.

This bill would increase the maximum enhancement available for this enhancement from 3 to 5 years.

(5) Existing law provides that any person who personally uses a firearm in the commission or attempted commission of a felony shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 3, 4, or 5 years, unless use of a firearm is an element of the offense. However, if the person has been

NOTE: Superior numbers appear as a separate section at the end of the digests.

convicted of carjacking or attempted carjacking, the additional prison term shall be 4, 5, or 6 years.

This bill would, instead, provide that the maximum prison term available for these enhancements shall be 10 years.

(6) Existing law provides that notwithstanding the enhancement set forth in (5) above, any person who is convicted of a felony or an attempt to commit a felony, including murder or attempted murder, in which that person discharged a firearm at an occupied vehicle which caused great bodily injury or death to the person of another, shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 5 years.

This bill would, instead, provide that the additional term of imprisonment available for this enhancement shall be 5, 6, or 10 years.

(7) Existing law provides that notwithstanding the enhancement set forth in (5) above, any person who personally uses an assault weapon, as defined, or a machinegun, as defined, in the commission or attempted commission of a felony, shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 5 years.

This bill would, instead, provide that the additional term of imprisonment available for this enhancement shall be 5, 6, or 10 years.

(8) Existing law provides that notwithstanding the enhancement set forth in (5) above, any person who personally uses a firearm in the commission or attempted commission of any specified controlled substance offense, shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 3, 4, or 5 years, as specified.

This bill would, instead, provide that the additional term of imprisonment available for this enhancement shall be 3, 4, or 10 years.

(9) Existing law provides that any person who, with intent to inflict great bodily injury or death, inflicts great bodily injury or causes the death of a person, other than an occupant of a motor vehicle, as a result of discharging a firearm from a motor vehicle in the commission of a felony or attempted felony, shall, upon conviction of that felony or attempted felony, in addition and consecutive to the punishment prescribed for the felony or attempted felony, be punished by an additional prison term of 5 years.

This bill would, instead, provide that the additional prison term available for this offense shall be 5, 6, or 10 years.

Ch. 32 (SB 37) Roberti. Weapons.

(1) Existing law provides penalties for violations of specified prohibitions involving firearms.

This bill would provide that with regard to certain prohibited conduct related to any firearm, each firearm or the frame or receiver of the same shall constitute a distinct and separate offense under those provisions. This bill would state legislative intent to overrule People v. Kirk, 211 Cal. App. 3d 58, as specified.

(2) Existing law provides that every person who carries a loaded or unloaded firearm on his or her person, or in a vehicle, during the commission or attempted commission of any street gang crimes, as specified, shall, upon the conviction of the felony or attempted felony of which he or she is convicted, be punished by an additional term of imprisonment in the state prison for 1, 2, or 3 years.

This bill, in addition, would provide that every person who carries a loaded or unloaded firearm together with a detachable shotgun magazine, a detachable pistol magazine, a detachable magazine, or a belt-feeding device, as defined, on his or her person, or in a vehicle, during the commission or attempted commission of any street gang crimes, as specified, shall upon the conviction of the felony or attempted felony be punished by an additional term of imprisonment in the state prison for 2, 3, or 4 years in the court's discretion, as specified.

(3) Existing law establishes prohibitions with regard to the sale or possession of speci-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

fied ammunition.

This bill would make it a crime, punishable as specified, for (a) any person or corporation to sell ammunition or reloaded ammunition to a minor under 18 years of age knowing that person to be a minor; (b) a minor under 18 years of age to possess ammunition or reloaded ammunition, unless the minor is engaged in, or is en route to or from, the activities of hunting, ranching, or target shooting; and (c) any person, except specified persons, including peace officers, to carry ammunition or reloaded ammunition onto school grounds, unless it is with the written permission of specified school authority. This bill would impose a state-mandated local program upon local government by creating new crimes.

(4) This bill would incorporate additional changes in Section 12001 of the Penal Code proposed by SB 1308, to be operative only if SB 1308 and this bill are both enacted and become effective as specified, and this bill is enacted last.

(5) Some of the changes made by the bill would become operative only if AB 2449 is enacted.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 33 (SB 36) Presley. Firearms.

Existing law provides that upon the conviction of any person of certain offenses, the court shall order a vehicle used in the commission of that offense sold.

This bill would provide that where a person, who is a member of a criminal street gang, is found to be unlawfully in possession of a firearm while present in a motor vehicle, the court shall order the vehicle in which the person was found sold.

Existing law provides enhancements where certain circumstances exist with regard to an offense involving a firearm.

This bill would provide that where these enhancements consist of a triad, the fact that a person knew or had reason to believe that a firearm was stolen shall constitute a circumstance in aggravation of the enhancement justifying imposition of the upper term.

Existing law provides that except in unusual cases where the interests of justice would best be served if probation is granted, probation shall not be granted to persons who, among other things, have been convicted of specified crimes and were armed with a deadly weapon at the time of the perpetration of the crime or arrest.

This bill would, in addition, provide that persons who, among other things, are convicted of knowingly selling any firearm or deadly weapon to specified persons shall not be granted probation except in unusual cases, as specified.

Existing law provides that, except as specified, any person who has been convicted of certain misdemeanors and who, within 10 years of the conviction, owns, or has in his or her possession or under his or her custody or control, any firearm shall be punished by imprisonment in the state prison, or in a county jail not exceeding one year, by a fine not exceeding $1,000, or by both that imprisonment and fine.

This bill would add conviction of specified offenses involving a firearm and threatening certain persons to the convictions that subject a person to punishment under this provision.

Existing law prohibits persons alleged to have committed certain offenses who have been found to be a fit and proper subject to be dealt with under the juvenile court law and subsequently adjudged a ward of the juvenile court for having committed one of those offenses, from owning, or having in his or her possession or under his or her custody or control any firearm until the age of 30 years.

This bill would add to the list of offenses that subject a person to this prohibition.

Under existing law, any person who is either armed with, or uses, a firearm in the commission or attempted commission of a felony shall, upon conviction, in addition and consecutive to the punishment prescribed for the offense, be punished by an additional term, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

First Extraordinary Session

This bill would increase those sentence enhancements.

Existing law provides that any person, corporation, or firm who knowingly supplies, sells, or gives possession or control of any firearm to any person who is a member of certain prohibited classes is guilty of a felony, or a misdemeanor punishable by imprisonment in a county jail not exceeding one year. Existing law provides that this offense is a misdemeanor if committed without knowledge, but instead, with a cause to believe the person was a member of specified prohibited classes.

This bill would revise the punishment for the above-described firearms offenses. The bill would make the former offense a felony punishable by imprisonment in the state prison for 2, 3, or 4 years, the latter offense punishable as a misdemeanor or a felony, and certain other violations punishable as specified.

Existing law provides that no person licensed to sell firearms, as specified, shall sell, deliver, or transfer a pistol, revolver, or firearm capable of being concealed upon the person to any person under the age of 21 years or any other firearm to a person under the age of 18 years, punishable as a misdemeanor by imprisonment in a county jail not exceeding 6 months.

This bill would provide that if this offense involves the delivery of a pistol, revolver, or other firearm capable of being concealed upon the person to a minor, it shall be a felony, or a misdemeanor punishable by imprisonment in a county jail not exceeding one year.

Existing law provides that every person engaged in the business of selling, leasing, or otherwise transferring a firearm, shall obtain a license, except with regard to certain exempt transactions. Among those transactions exempt from this licensure requirement are the sale, delivery, or transfer of firearms by manufacturers or importers licensed pursuant to specified federal statutes and the regulations issued pursuant thereto to dealers or by wholesalers, as defined, to dealers.

This bill would also provide that no person who is licensed pursuant to federal law shall deliver, sell, or transfer a firearm to a person licensed pursuant to federal law and whose licensed premises are located in this state unless the person presents proof of licensure or presents proof of exemption from licensure and proof that the transaction is also exempt from specified provisions of law. Because this bill would create a new crime, it would impose a state-mandated local program.

Existing law provides that specified procedures required to be completed by the parties to a transaction involving the sale or transfer of a firearm where neither party holds a firearm dealer's license shall not apply to, among other transactions, the infrequent transfer of firearms by gift, bequest, intestate succession, or other means by one individual to another if both individuals are members of the same immediate family.

This bill would modify the latter exception to the procedures to provide that the procedures shall not apply if certain conditions are met where the firearm is a pistol, revolver, or other firearm capable of being concealed upon the person.

This bill would add to the list of transactions which are exempt from these procedures the loan of an unloaded firearm loaded with blank cartridges for use solely as a prop for a motion picture, television, or video production or entertainment or theatrical event and the loan or transfer of a firearm to a minor under specified circumstances, including for the purpose of engaging in a motion picture, television, or video production, or entertainment, or theatrical event.

Existing law provides that a minor shall not possess a pistol, revolver, or other firearm capable of being concealed upon the person or live ammunition except as specified. A violation of this provision is a misdemeanor.

This bill would revise and recast the exceptions to this prohibition and would provide that a violation of the prohibition against a minor possessing a pistol, revolver, or other firearm capable of being concealed upon the person is a misdemeanor or a felony.

Existing law, on a first offense, authorizes, and on successive offenses requires, a court to suspend, restrict, or delay for one year the driving privilege of persons 13 years of age or older who commit vandalism by defacing property with paint or any other liquid.

This bill would also authorize a court to suspend or delay for 5 years the driving privilege of a minor who commits a public offense involving a pistol, revolver, or other

NOTE: Superior numbers appear as a separate section at the end of the digests.

firearm capable of being concealed upon the person. For each successive year, the court would be authorized to suspend or delay the minor's driving privilege for one year. The bill would permit the period of suspension or delay to be reduced by performance of specified community service under certain conditions.

Because this bill would increase the scope and punishment for certain crimes, it would impose a state-mandated local program.

Under existing law, any person who knowingly supplies, sells, gives, or allows possession or control of any firearm or deadly weapon, as defined, to any person who is deemed to be a danger to self or others due to a mental disorder or a mental illness, or who has been adjudicated to be a mentally disordered sex offender, shall be punished by imprisonment in the state prison, or in a county jail for a period of not exceeding one year, by a fine not exceeding $1,000, or by both the fine and imprisonment.

This bill would revise and recast the above provision so that it would be applicable only to a deadly weapon and would make it a felony punishable by imprisonment in the state prison for 2, 3, or 4 years for any person who knowingly supplies, sells, gives, or allows possession or control of any firearm to any person, as described above.

This bill would incorporate additional changes to Section 12078 of the Penal Code proposed by AB 482 (Ch. 23, Stats. 1994).

This bill would incorporate additional changes in Section 1203 of the Penal Code proposed by AB 141 (1st Ex. Sess.), to be operative only if AB 141 (1st Ex. Sess.) and this bill are both enacted and become effective as specified, and this bill is enacted last.

This bill would incorporate additional changes in Section 12021 of the Penal Code proposed by AB 68 (1st Ex. Sess.), to be operative only if AB 68 (1st Ex. Sess.) and this bill are both enacted and become effective as specified, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 34 (AB 160) W. Brown. Crimes: detention: search and seizure.

Existing law makes theft from a merchant or library a crime and allows a merchant or library employee to detain a person for a reasonable time in order to seize suspected stolen items or to search for them.

This bill would expressly permit a theater owner, as defined, to detain a person suspected of recording or attempting to record images or sounds of a motion picture being presented within the theater in order to search and seize suspected recordings or recording items. Because the bill would expand the definition of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 35 (AB 88) Burton. Criminal procedure.

Existing law provides that when the person injured by an act constituting a misdemeanor has a remedy by a civil action, the offense may be compromised, as specified, except when it is committed, among other things, by or upon any family or household member, or upon any person if the violation involves domestic violence and the defendant has civilly compromised any domestic violence offense committed upon any victim within 7 years of the commission of the currently charged offense. Existing law requires the court to hold a hearing, as specified, when the above misdemeanor domestic violence offense is sought to be compromised.

This bill would require a defendant who enters into a civil compromise of a misdemeanor domestic violence offense to attend a batterer's program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 36 (AB 62) Haynes. Crimes: disclosure of information.

(1) Existing law requires certain offenders to provide 2 specimens of blood and a saliva sample, as specified, for analysis of deoxyribonucleic acid (DNA) and other genetic typing analysis, as specified. Existing law provides that DNA and other genetic information obtained pursuant to this provision shall be released only to law enforcement agencies and district attorneys' offices, at the request of the agency.

This bill would provide that for the purpose of this provision, law enforcement agency includes, but is not limited to, parole officers of the Department of Corrections, hearing officers of the parole authority, and district attorneys' offices.

(2) Existing law provides that no law enforcement agency shall disclose to any person, except the prosecutor or other persons or public agencies where authorized or required by law, the address of a person who alleges to be the victim of a sex offense, or the name of a person who alleges to be the victim of a sex offense if that person has elected to exercise his or her right to request that his or her name be withheld as the victim of a designated crime.

This bill would add parole officers of the Department of Corrections and hearing officers of the parole authority to the list of exceptions to these prohibitions against a law enforcement agency disclosing the address and name of a person who alleges to be the victim of a sex offense.

The bill also would provide that parole officers of the Department of Corrections and hearing officers of the parole authority shall be entitled to receive information under the above provisions only if the person to whom the information pertains alleges that he or she is the victim of a sex offense, the alleged perpetrator of which is a parolee who is alleged to have committed the sex offense while on parole.

(3) Under existing law, the parole authority is required to revoke the parole of any prisoner who refuses to sign a parole agreement setting forth the general and any special conditions applicable to the parole.

This bill, in addition, would require the parole authority to revoke the parole of any prisoner who refuses to sign any form required by the Department of Justice stating that the duty of the prisoner to register as a sex offender has been explained to the prisoner, unless the duty to register has not been explained to the prisoner, or who refuses to provide samples of blood or saliva as required in (1) above.

(4) This bill would incorporate additional changes in Section 290.2 of the Penal Code proposed by AB 151 (1st Ex. Sess.), to be operative only if AB 151 and this bill are both enacted and become effective as specified, and this bill is enacted last.

Ch. 37 (SB 31) Peace. Juveniles: release of names.

Existing law, with limited exceptions, provides that certain documents relating to a juvenile court proceeding may be inspected only by specified persons.

This bill would provide that notwithstanding any other provision of law, except as specified, a law enforcement agency may disclose the name of any minor 14 years of age or older taken into custody for the commission of any serious felony, as defined, and the offenses allegedly committed, upon the request of interested persons, if a hearing has commenced based upon a petition that alleges that the minor has violated any law or ordinance defining crime, as specified.

Ch. 38 (AB 79) Frazee. Driver's licenses: suspension.

(1) Existing law authorizes a court to suspend, or order that the Department of Motor Vehicles revoke, the privilege of any person to operate a motor vehicle upon conviction of any offense related to controlled substances, as specified, if the use of a motor vehicle was involved in, or incidental to, the commission of the offense.

This bill would require the Department of Motor Vehicles, with specified exceptions, to immediately suspend or delay the privilege of any person to drive a motor vehicle for 6 months upon receipt of a duly certified abstract of the record of any court showing that the person has been convicted of any specified controlled substance offense. The bill would require the department, for each successive offense, to suspend or delay the privilege for an additional 6 months.

The bill would require a court that convicts a person of any specified controlled

NOTE: Superior numbers appear as a separate section at the end of the digests.

substance offense to require all driver's licenses held by the person to be surrendered to the court. The bill would require the court to transmit a certified abstract of the conviction, together with any driver's license surrendered, to the department not later than 10 days after the conviction.

The bill would require the payment of a $24 fee to the department before a driver's license may be issued, reissued, or returned to a person after the suspension or delay of a person's privilege to operate a motor vehicle pursuant to the above provisions.

The above provisions of the bill would be repealed one year following their effective date.

The bill would set forth certain legislative findings and declarations.

(2) The bill would appropriate $1,023,000 from the Motor Vehicle Account in the State Transportation Fund to the department to implement the provisions of the bill.

The bill would create a state-mandated local program by imposing new duties on the courts.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 39 (AB 114) Epple. Crime: sex offenses.

Existing law makes it a crime to engage in certain acts of rape and sodomy.

Existing law also makes it a crime for any person to cause the penetration, however slight, of the genital or anal openings of any person, to cause another person to so penetrate any person's genital or anal openings by a penis or by any foreign object, substance, instrument, or device, as specified. Existing law also provides that it is a crime under certain circumstances, if it cannot be established whether penetration was by a penis or by a foreign object, substance, instrument, or device.

This bill would revise and recast those provisions. The bill would provide that it is a crime for any person to cause the penetration, however slight, of the genital or anal openings of any person, to cause another person to so penetrate any person's genital or anal openings by a penis or by any foreign object, substance, instrument, or device, or by any unknown object. The bill would define an unknown object as including any foreign object, substance, instrument, or device, or any part of the body, including a penis, when it is not known whether penetration was by a part of the human body or other foreign object.

Ch. 40 (AB 85) Martinez. Crimes: rape: definition.

Existing law provides definitions for rape, sodomy, oral copulation, and penetration by foreign object, which contain the common element that the act includes, among other conditions, the circumstance where a victim is prevented from resisting by any intoxicating or anesthetic substance, or any controlled substance, administered by or with the privity of the accused.

This bill would delete the language "administered by or with the privity of the accused" from that element and add language that would require the accused to have known or reasonably should have known of the victim's condition. To the extent that this bill would expand the scope of existing crimes, it would impose a state-mandated local program.

This bill would incorporate additional changes in Section 289 of the Penal Code proposed by AB 114 (1st Ex. Sess.), to be operative only if AB 114 and this bill are both enacted and become effective as specified, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 41 (AB 99) Rainey. Corrections: punishment options.

Existing law provides for the establishment and operation of community correctional centers by the Department of Corrections, and requires certain notice to local governments prior to a change in capacity or use of a center.

This bill would create the Community-Based Punishment Act of 1994 for the purpose of establishing community-based punishment programs based on a partnership between state and local governments in order to expand the use of intermediate sanctions for certain specified offender populations. The bill would provide that its provisions shall be administered by the Board of Corrections in conjunction with a county or a collaboration of counties electing to operate a community-based punishment program, as defined. The bill would also provide that its implementation is contingent upon the availability of funding from legislative appropriations or certain other sources, including revenue generated by the programs.

This bill would specify that its provisions are severable.

Ch. 42 (AB 151) Cannella. Sex offenders: registration: full palm prints.

Under existing law, any person required to register as a sex offender is required to provide, prior to discharge, parole, the granting of probation, or release, 2 specimens of blood and a saliva sample for analysis of deoxyribonucleic acid (DNA) and other genetic typing analysis at the Department of Justice's DNA laboratory. The knowing disclosure of this information to unauthorized persons is a misdemeanor.

This bill would require this person to also provide a right thumbprint and a full palm print impression of each hand, to be obtained as specified, and to be placed on a form prescribed by the Department of Justice to be forwarded to and maintained by the Bureau of Criminal Identification and Information of the Department of Justice for law enforcement purposes. The bill would provide that the full palm prints may be included in the state summary criminal history information. The knowing disclosure of this information to unauthorized persons would also be a misdemeanor and thus this bill would impose a state-mandated local program by creating a new crime. This bill would also impose a state-mandated local program by expanding the duties of local agencies with respect to obtaining and forwarding the full palm prints.

Existing law provides that the Department of Justice shall provide instructions for the collection of blood specimens and saliva samples.

This bill would provide that the Department of Justice shall also provide instructions for the collection of thumbprints.

This bill would incorporate additional changes in Section 290.2 of the Penal Code proposed by AB 62 (1st Ex. Sess.), to be operative only if AB 62 and this bill are both enacted and become effective as specified, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those other costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 43 (SB 18) Killea. Criminal penalties: spousal abuse.

Under existing law, any person who willfully inflicts injuries resulting in a traumatic condition upon, among other persons, a spouse or a person of the opposite sex with whom he or she is cohabiting is required to be punished by imprisonment in the state

NOTE: Superior numbers appear as a separate section at the end of the digests.

prison for 2, 3, or 4 years or in a county jail.

Existing law requires as a condition of probation for any offense described above which occurred within 7 years of the offense of the 2nd conviction that the convicted person be imprisoned in a county jail for not less than 96 hours. Similarly, under existing law, as a condition of probation a person convicted for any of the above offenses that occurred within 7 years of the most recent conviction is required to be imprisoned in a county jail for not less than 30 days.

This bill would provide instead that a condition of probation for a 2nd conviction be 15 days imprisonment in a county jail or 60 days imprisonment in the case of an offense that occurred within 7 years of the most recent conviction.

By increasing the penalties for crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 44 (AB 94) Bates. Drug offenses.

Existing law authorizes the referral to a drub diversion program of any defendant accused of any specified drug offense who meets specified requirements.

This bill would provide that any jurisdiction providing this diversion may require a divertee to undergo urine analysis for the purpose of testing for the presence of any drug as part of a treatment and supervision program.

The bill also would provide that urine analysis results shall not be admissible as a basis for any new criminal prosecution or proceeding.

Ch. 45 (SB 43) Beverly. Rewards.

Under existing law, the Governor may offer a reward of not more than $50,000 for information leading to the arrest and conviction of persons who have committed any one of several specified crimes. These crimes include assaulting or causing death or serious bodily harm to a police officer who is acting in the line of duty.

This bill would authorize the Governor to offer a reward of not more than $100,000 for information leading to the arrest and conviction of any person who kills a peace officer who is acting in the line of duty. This bill would also make a related change.

The bill also would incorporate additional changes in Section 1547 of the Penal Code proposed by AB 1551 of the 1993–94 Regular Session, to be operative only if AB 1551 and this bill are both enacted and become effective, as specified, and this bill is enacted last.

The bill would further provide that it shall become operative only if AB 1551 of the 193–94 Regular Session is enacted and becomes effective on or before January 1, 1995.

Because this bill would authorize the expenditure of funds from the General Fund, it would make an appropriation.

Ch. 46 (AB 25) Andal. Sentencing: restitution.

(1) Existing law requires persons convicted of one or more felony offenses to pay, in addition to any other lawfully imposed penalty, a restitution fine of not less than $200, subject to the defendant's ability to pay, and not more than $10,000.

This bill would specify that the crimes for which that restitution find is imposed include misdemeanor sexual offenses and any misdemeanor offense that causes bodily harm.

(2) Existing law authorizes the filing of a criminal complaint within one year of the date of a report to a responsible adult or agency by a child under 18 years of age that the child is a victim of any one of a number of specified crimes.

This bill would include in the list of specified crimes the offense of annoying or molesting any child under the age of 18 years in a variety of described circumstances and would make a conforming change.

(3) Under existing law, if a person is convicted of a felony, the court may order full restitution to the victim subject to a stay procedure in any case in which the defendant

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

is ordered to pay restitution as a condition of probation.

This bill would delete the provisions authorizing the stay procedure.

(4) This bill would provide that changes in Section 13967 of the Government Code proposed by this bill shall not become operative if AB 3169 is chaptered.

(5) This bill would incorporate additional changes in Section 803 of the Penal Code proposed by AB 1691 of the 1993–94 Regular Session, to be operative only if AB 1691 of the 1993–94 Regular Session and this bill are both enacted and become effective as specified, and this bill is enacted last.

(6) This bill would incorporate additional changes in Section 1202.4 of the Penal Code proposed by AB 3169 of the 1993–94 Regular Session, to be operative only if AB 3169 of the 1993–94 Regular Session and this bill are both enacted and become effective as specified, and this bill is enacted last.

Ch. 47 (AB 27) Speier. Crimes: child abuse.

(1) Existing law provides that any person who, under circumstances or conditions likely to produce great bodily harm or death, willfully causes or permits any child to suffer, or inflicts thereon unjustifiable physical pain or injury that results in death, or having the care or custody of any child, under circumstances or conditions likely to produce great bodily harm or death, willfully causes or permits that child to be injured or harmed, and that injury or harm results in death, shall receive a 4-year enhancement for each violation in addition to the sentence provided for the underlying conviction.

This bill would provide that any person who, having the care or custody of a child who is under the age of 8 years, assaults the child by means of force that to a reasonable person would be likely to produce great bodily injury, resulting in the child's death, shall be punished by imprisonment in the state prison for 15 years to life. By creating a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 48 (SB 30) Peace. Crimes: child rape.

Under existing law, rape is defined as an act of sexual intercourse accomplished with a person not the spouse of the perpetrator, under certain specified circumstances, and is punishable by imprisonment in the state prison for 3, 6, or 8 years.

This bill would, in addition, provide that any person who commits any specified sex offenses upon a child who is under 14 years of age and 10 or more years younger than the person is guilty of aggravated sexual assault of a child and shall be punished by imprisonment in the state prison for 15 years to life. Because the bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 49 (SB 38) Kopp. Child abuse: diversion.

(1) Existing law provides that, among other things, in lieu of prosecuting a person suspected of committing any crime in which a minor is a victim of an act of abuse or neglect, the prosecuting attorney may refer that person to the county department in charge of public social services or the probation department for counseling or psychological treatment and any other services as the department deems necessary.

This bill would provide, in addition, that in lieu of trial, the prosecuting attorney may make a motion to the trial court to defer entry of judgment with respect to certain crimes involving a minor victim of molestation or sexual abuse, provided that the defendant pleads guilty to all crimes and enhancements charged. Upon that motion and defendant's plea of guilty to all charges and enhancements, the court would be author-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ized to defer entry of judgment, contingent upon the defendant's referral to, and completion of, an approved treatment program.

(2) Existing law sets forth provisions governing counseling programs for those persons who are suspected of sexually abusing a child and referred for counseling in lieu of prosecution. Certain of these provisions govern the procedures for monitoring persons participating in a counseling program and the consequences of successful or unsuccessful completion of a counseling program.

This bill would repeal those certain provisions and would specify terms that condition the grant of a deferred entry of judgment and family unification.

Ch. 50 (SB 54) Greene. Criminal history information: access by public housing authority.

Existing law authorizes the Attorney General to furnish state summary criminal history information to persons and entities enumerated by statute and subject to certain requirements and conditions.

This bill would, subject to specified requirements and conditions, authorize local law enforcement agencies to furnish state summary criminal history information for the purpose of screening prospective residents and prospective and current staff of a regional, county, city, or other local public housing authority, at the request of the chief executive officer of the authority or his or her designee, upon a showing by the authority that it operates housing at which children under the age of 18 years reside or operates housing for persons categorized as aged, blind, or disabled. This state summary criminal history information would be used by the chief executive officer of the housing authority in identifying prospective residents and prospective and current staff who have access to residences and whose criminal history is likely to pose a risk to children under the age of 18 years or persons categorized as aged, blind, or disabled living in the housing operated by the authority.

Ch. 51 (AB 57) Archie-Hudson. Consumer protection: price gouging: home solicitation contracts.

(1) Existing law regulates the content and effect of home solicitation contracts, as defined. Existing law defines "services" for purposes of these provisions to include, among other things, services furnished in connection with the repair, alteration, or improvement of residential premises.

This bill would revise this definition to also include services furnished in connection with the restoration of residential premises.

This bill would provide that any home solicitation contract or offer for the repair or restoration of residential premises signed and dated by the buyer within a prescribed time period from when a disaster, as defined, causes damages to the residential premises shall be void, except as otherwise provided.

This bill would provide that, in addition to any other right to revoke an offer, a buyer has the right, within a prescribed time period, to cancel a home solicitation contract or offer for the repair or restoration of residential premises damaged by a disaster that was not otherwise void. The bill would provide that these contracts shall contain a statement describing the buyer's right to cancel, as specified.

This bill would specify that the provisions added by this bill regarding home solicitation contracts or offers for the repair or restoration of residential premises damaged by a disaster shall not apply to a contract that is solicited by the buyer or his or her agent or insurance representative, as specified, and that is executed in connection with the making of prescribed emergency repairs or services, among other conditions, and would make a conforming and clarifying change.

(2) Existing law provides that every person who willfully makes or publishes any false statement, spreads any false rumor, or employs any other false or fraudulent means or device, with intent to affect the market price of any kind of property is guilty of a misdemeanor.

This bill would provide that, upon the proclamation of a state of emergency, as specified, and for a specified period following that declaration, any person who sells or attempts to sell specified goods and services, as defined, at a price that is more than 10%

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the price charged for that good or service by that person immediately prior to the proclamation of emergency is guilty of a misdemeanor and shall be punished by imprisonment in a county jail for not more than one year, by a fine not exceeding $10,000, or by both that fine and imprisonment, subject to specified exceptions.

This bill would make certain legislative findings and declarations regarding price gouging during disasters and emergencies.

This bill would impose a state-mandated local program by creating a new crime.

(3) This bill would provide that it shall become operative only if Assembly Bill 36 of the 1993–94 First Extraordinary Session is also enacted and becomes operative.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 52 (AB 36) Katz and Bowen. Emergencies.

(1) Existing law does not generally regulate the price of goods and services.

This bill would provide that, upon the proclamation of a state of emergency, as provided, and for a period of 30 days following the declaration, it is a misdemeanor for any person, contractor, business, or other entity to sell or offer to sell any consumer food items or goods, goods or services used for emergency cleanup, emergency supplies or medical supplies, home heating oil, building materials, housing, transportation, freight, and storage services, or gasoline or other motor fuels for a price that exceeds by 10% the price charged by that person for those goods or services immediately prior to the proclamation of emergency, unless that person can prove that an increase in price was directly attributable to additional costs imposed on it by the supplier of the goods, or for labor or materials used to provide the services, as specified.

The bill also would provide that, upon the proclamation of a state of emergency, as provided, and for a period of 180 days following the declaration, it is a misdemeanor for any contractor to sell or offer to sell any repair or reconstruction services or any services used in emergency cleanup for a price that exceeds by 10% the price charged by that person for those services immediately prior to the proclamation of emergency, unless that person can prove that an increase in price was directly attributable to additional costs imposed on it by the supplier of the goods, or for labor or materials used to provide the services, as specified. The bill would also provide for the extension of the provisions of the bill for additional 30-day periods, as specified.

The bill would also provide that violation of these provisions would also be an unfair business practice and an act of unfair competition.

(2) Under existing law, the conviction of a crime substantially related to the qualifications, functions, and duties of a contractor constitutes grounds for disciplinary action.

This bill would require the Contractors' State License Board to take disciplinary action, as specified, against a contractor convicted of violating the provision in paragraph (1), above, or any substantially similar local ordinance in connection with the sale, or offer for sale, of repair or reconstruction services, as defined.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would provide that its provisions shall become operative only if AB 57 of the 1993–94 First Extraordinary Session is enacted and becomes operative.

Ch. 53 (SB 32) Kopp. Parole: revocations: Board of Prison Terms.

Under existing law, the Department of Corrections is the parole authority with respect to persons sentenced to a fixed term of imprisonment, except for prisoners who have a severe mental disorder, and the Board of Prison Terms is the parole authority with respect to persons sentenced to an indeterminate term of imprisonment and those prisoners who have a severe mental disorder.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that the Board of Prison Terms is the parole authority for all prisoners sentenced to a term of imprisonment in state prison.

Existing law provides that the parole authority has full power to suspend or revoke any parole, and to order returned to prison any prisoner upon parole. The written order of the parole authority is sufficient warrant for any peace or prison officer to return to actual custody any conditionally released or paroled prisoner.

This bill would provide that the sole authority to issue warrants for the return to actual custody of any state prisoner released on parole rests with the Board of Prison Terms, except for any escaped state prisoner or any state prisoner released prior to his or her scheduled release date who should be returned to custody.

This bill also would declare that it is not the intent of the Legislature that the above provisions relating to parole diminish resources allocated to the Department of Corrections for parole functions for which the department is responsible nor diminish the resources allocated to the Board of Prison Terms to execute its duties with respect to parole functions for which the board is responsible.

Ch. 54 (SB 35) Kopp. Contracts: victims of sexual abuse.

(1) Existing law provides that certain contracts are void as contrary to public policy.

This bill would provide that, except as specified, any contract for the payment of money or other consideration to a minor who has been alleged to be the victim of an unlawful sex act, as defined, or to his or her legal representative, by the alleged perpetrator of that unlawful sex act, or his or her legal representative, entered into on or after the time of the alleged unlawful sex act, and providing for any payments to be made more than one year after the date of the execution of the contract, is void as contrary to public policy.

The bill would also authorize a district attorney to bring an action or intervene in any action to enjoin enforcement of any contract which is in violation of this section, and to enforce the contract against the payor for the benefit of the State Children's Trust Fund, a continuously appropriated fund, thereby making an appropriation.

The bill would also provide that any parent or guardian of a child who enters into such an agreement on behalf of that child, and any alleged perpetrator of an unlawful sex act, as defined, upon that child who enters into such an agreement, is guilty of a misdemeanor, punishable as specified.

(2) The bill would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 55 (SB 47) Calderon. Hazardous substances: controlled substances.

Under existing law, the Department of Toxic Substances Control is required to take remedial action with respect to any hazardous substance that is an illegal controlled substance or a precursor of a controlled substance believed to have been used in the unlawful manufacture of controlled substances, upon notice that the hazardous substance has been disposed of contrary to law. The department is authorized to spend funds from the Hazardous Substance Account for costs incurred in taking that remedial action. Under existing law, the money in the Hazardous Waste Control Account may be expended by the department for, among other things, the payment of all removal and remedial costs incurred by the state in response to a hazardous substance release and $1,000,000 is continuously appropriated from the Hazardous Waste Control Account to a reserve account for taking immediate corrective action to remedy or prevent a specified emergency.

This bill would require state or local law enforcement officers or investigators or other law enforcement agency employees, under specified circumstances in the course of an official investigation or enforcement action, to notify the department for the purpose of securing a contractor to identify, clean up, store, and dispose of a suspected hazardous substance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

First Extraordinary Session

The bill would include, as subject to removal action, any hazardous substance that is a material intended to be used in the unlawful manufacture of controlled substances. The bill would authorize the department to utilize funds for that purpose, to the extent available, from the reserve account, thereby making an appropriation, or transferred from the Hazardous Waste Control Account to the Hazardous Substance Account, until December 31, 1995.

The bill would create the Illegal Drug Lab Cleanup Account in the General Fund and would authorize the department to expend, on and after January 1, 1996, the money in that account, upon appropriation by the Legislature, to carry out the removal actions.

The bill would prescribe related powers and immunities for the department, the county health department, or their designee in carrying out specified actions in connection with these substances. The bill would authorize the department to adopt regulations to implement the bill.

The bill would provide that the responsibilities assigned to the department by the bill apply only to the extent sufficient funding is made available for that purpose.

Ch. 56 (AB 3) Baca. Prisoners: parole.

Existing law requires the Board of Prison Terms or the Department of Corrections, when releasing an inmate on parole, to return the inmate to the county from which he or she was committed, as defined, except as specified.

Existing law provides generally that an inmate may be returned to another county if that would be in the best interests of the public and the inmate.

Existing law provides specifically that, in deciding whether to return an inmate to another county, the Board of Prison Terms or the Department of Corrections may consider, among others, the following factors:

(1) The need to protect the life or safety of a victim, the inmate, a witness, or any other person.

(2) Public concern that would reduce the chance that the inmate's parole would be successfully completed.

(3) The verified existence of a work offer or an educational or vocational training program.

(4) The fact that the last legal residence of the inmate was in another county.

(5) The existence of family in another county with whom the inmate has maintained strong ties and whose support would increase the chance that the inmate's parole would be successfully completed.

(6) The lack of necessary outpatient treatment programs for specified inmates.

This bill would provide, in addition, that the Department of Corrections, in determining an out-of-county commitment, shall give priority to the safety of the community and any witnesses and victims.

This bill would also require the Department of Corrections to establish a pilot project in San Bernardino County in which specified information regarding inmates paroled in that county, if available, would be released to local law enforcement agencies. The bill would require the San Bernardino County Sheriff's Department to provide a monthly program evaluation to the Department of Corrections, and would require the Department of Corrections to prepare and submit to the Legislature a report on the program.

By requiring the San Bernardino County Sheriff's Department to report to the Department of Corrections, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 3003 of the Penal Code proposed by AB 3331 or SB 1736, or both, to be operative only if AB 3331 or SB 1736, or both, and this bill are enacted and become effective as specified, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 57 (AB 4) Baca. Economic development: Norton Air Force Base.

(1) Existing law authorizes the Employment Training Panel within the Employment Development Department to allocate up to $10,000,000 to fund special employment training agreements that are related to, and in response to, the establishment of a federal Defense Finance and Accounting Services facility at the existing site of Norton Air Force Base if the base is selected as the site for the federal facility on or before December 31, 1993.

This bill would extend this date to February 1, 1995.

(2) Existing law appropriates $1,500,000 from the Federal Trust Fund received from the Petroleum Violation Escrow Account and related sources, to the Trade and Commerce Agency for allocation to the Inland Valley Development Agency to provide funds to rehabilitate facilities to be used by the federal Defense Finance and Accounting Service Center facility at the existing site of Norton Air Force Base in San Bernardino County. This provision of law will become inoperative if the center is not located on Norton Air Force Base and will also be inoperative on February 1, 1994, if the facility is not awarded to that site before that date.

This bill would also extend that date to February 1, 1995. By extending the time period during which this existing appropriation from the Federal Trust Fund would be available, this bill would constitute an appropriation.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 58 (AB 59) Alpert. Bail: violent felonies.

Existing law provides that, among other things, before any person who is arrested for a violent felony, as defined, is released on bail, which bail is set in an amount which is either more or less than the amount contained in the schedule of bail for that felony, a hearing shall be held in open court before the magistrate or judge, as specified.

This bill would, in addition, require a hearing to be held before any person who is arrested for stalking, as defined, willful infliction of corporal injury on his or her spouse, battery on a former spouse, fiancé, fiancée, or a person with whom there is a current or former dating relationship, or spousal rape, among others, is released on bail set in an amount that is more or less than the amount contained in the schedule of bail or is released on his or her own recognizance.

Ch. 59 (AB 158) Brulte. Crimes: forgery.

Existing law makes it a crime to engage in various acts of theft or forgery involving an access card, defined as any card, plate, code, account number, or other means of account access that can be used to obtain money, goods, services, or any other thing of value.

This bill would make it a crime to engage in various acts of theft or forgery involving access card account information. The bill would also make it a crime to alter in any fashion access card account information with the intent to defraud. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 60 (AB 29) Rainey. Sex offenders.

(1) Existing law provides that any person who (a) willfully and lewdly commits any lewd or lascivious act upon or with the body, or any part or member thereof, of a child under the age of 14 years, with the intent of arousing, appealing to, or gratifying the lust or passions or sexual desires of that person or of the child, or (b) commits an act specified in (a) by use of force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person, is guilty of a felony and shall be imprisoned in the state prison for 3, 6, or 8 years.

Existing law also provides that upon conviction of any person under the above provisions, the court may, in addition to any other penalty or fine imposed, order the defend-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

First Extraordinary Session

ant to pay an additional fine not to exceed $5,000.

This bill would increase the amount of this additional fine to $10,000.

(2) Existing law provides that probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, nor shall a finding bringing the defendant within these provisions be stricken, as specified, for specified persons.

This bill would include within the list of persons specified for these purposes (a) a person who is convicted of committing a violation of the provisions in (1) above or continuous sexual abuse of a child and who has been previously convicted of spousal rape, and (b) a person who is convicted of committing a violation of the provisions in (1) above or continuous sexual abuse of a child and who has been previously convicted in another state of an offense which, if committed or attempted, as specified, in California, would have been punishable as one or more of specified sex offenses.

(3) Existing law provides that the provisions of existing law described in (2) above shall not apply to specified persons when the court finds, among other things, that (a) the defendant is the victim's natural parent, adoptive parent, stepparent, relative, or is a member of the victim's household who has lived in the household, and (b) rehabilitation of the defendant is feasible in a recognized treatment program designed to deal with child molestation and, if the defendant is to remain in the household, a program that is specifically designed to deal with molestation within the family.

This bill would, instead, provide that the provisions of existing law described in (2) above shall not apply to specified persons when the court finds, among other things, that rehabilitation of the defendant is feasible, the defendant is placed in a recognized treatment program designed to deal with child molestation immediately after the grant of probation or the suspension of execution or imposition of sentence, and the defendant is removed from the household of the victim until the court determines that the best interests of the victim would be served by returning the defendant to the household of the victim.

(4) Existing law provides that the statute relating to denial of probation or nonsuspension of sentence does not prohibit the adjournment of criminal proceedings pursuant to specified provisions of the Welfare and Institutions Code relating to narcotic addicts and admissions and judicial commitments.

This bill would delete that provision.

(5) This bill would incorporate additional changes in Section 1203.066 of the Penal Code proposed by SB 26 (1st Ex. Sess.), to be operative only if SB 26 and this bill are both enacted and become effective as specified, and this bill is enacted last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

DIGESTS OF RESOLUTIONS AND PROPOSED CONSTITUTIONAL AMENDMENTS ADOPTED IN 1994

1993–94 REGULAR SESSION

RESOLUTION CHAPTERS

Res. Ch. 1 (SJR 34) Marks. Old Mint.
This measure would memorialize the President and the Congress of the United States to direct to the Treasury Department to make the reopening of the museum at the Old Mint in San Francisco permanent at the end of the 90-day review period.

Res. Ch. 2 (SJR 13) Dills. Disabled veterans: contract participation.
This measure would memorialize the President and the Congress of the United States to establish and maintain participation by service-disabled veteran owned and operated businesses in contracting and procurement programs with the government or with government contractors, licensees, or agents.

Res. Ch. 3 (ACR 85) W. Brown. Week of the School Administrator.
This bill would designate the week of March 7 through March 11, 1994, as the Week of the School Administrator and would commend the administrators of California's public schools for their support of, and contributions to, the quality of public education in this state.

Res. Ch. 4 (ACR 86) Lee. Black History Month.
This measure would proclaim the month of February 1994 as Black History Month.

Res. Ch. 5 (ACR 100) McPherson. Boys and Girls Club of Santa Cruz.
This measure would commend the Boys and Girls Club of Santa Cruz and recognize March 1, 1994, as Boys and Girls Club of Santa Cruz Day.

Res. Ch. 6 (ACR 89) Solis. Women's History Month and International Women's Day.
This measure would proclaim the month of March 1994 Women's History Month and would urge all Californians to join in the celebration of International Women's Day on March 8, 1994.

Res. Ch. 7 (AJR 63) Cortese. Trade agreements.
This measure would request the federal government to negotiate a more rapid phase-out of tariffs for wine and brandy with Mexico.

Res. Ch. 8 (ACR 107) Burton. Policy committee deadline.
This measure would change the 1994 policy committee deadline for hearing and reporting fiscal bills from April 15, 1994, to April 22, 1994.

Res. Ch. 9 (ACR 84) Murray. Adult Education Week.
Existing law provides for the establishment of various adult education programs in the public schools.
This measure would proclaim the week of March 13 through 19, 1994, as Adult Education Week.

Res. Ch. 10 (ACR 75) Burton. Commander Isiah Nelson Memorial Hanging Gardens.
This measure would designate the terraced landscaping of southbound Interstate 280 between 18th Street and 209th Street, popularly known as the Hanging Gardens, in the City and County of San Francisco the Commander Isiah Nelson Memorial Hanging Gardens.
The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 11 (ACR 98) Goldsmith. Mediation Week.
This resolution designates the week of March 20 through 26, 1994, as Mediation Week.

Res. Ch. 12 (SCR 39) Beverly. California Logistics Week.
This measure would proclaim the week of April 3 through April 9, 1994, as California Logistics Week.

Res. Ch. 13 (SCR 40) McCorquodale. Autism Treatment Awareness Week.

This measure would proclaim the week of April 24 through April 30, 1994, as Autism Treatment Awareness Week, and acknowledge the contributions made in the area of autism by experts in the field and the families involved.

Res. Ch. 14 (ACR 82) Katz. California Holocaust Memorial Week.

This measure would designate the week of April 10 through April 16, 1994, as California Holocaust Memorial Week, and would urge Californians to observe these days of remembrance for the victims of the Holocaust in an appropriate manner.

Res. Ch. 15 (AJR 19) Polanco. Banking.

This measure would resolve that the Legislature urge the United States Congress to repeal those laws found to be unduly restrictive, burdensome, and unnecessary to protect the safety and soundness of the banking system and to direct the federal agencies responsible for banking regulations to modify and rescind those regulations that may inhibit lending to small businesses, women, communities of color, and agricultural borrowers. This measure would also resolve that the Legislature urge the President of the United States to use the authority of the executive branch of the federal government to reduce overregulation of the banking system by administrative act and to seek necessary legislative changes.

Res. Ch. 16 (ACR 93) McDonald. State Tourism Year.

Existing law provides for the establishment of various programs to promote tourism for the stated purpose of improving the economic well-being of the state.

This measure would proclaim 1994 to be State Tourism Year.

Res. Ch. 17 (AJR 16) Areias. California State University: University of California: collaborative conversion project.

This measure would memorialize the President and Congress of the United States to enact legislation to appropriate the necessary funds to convert a portion of Fort Ord to a campus of the California State University.

Res. Ch. 18 (ACR 12) Hauser. Vehicles: weight fees: method of assessment.

This measure would direct the Department of Transportation, in consultation with the Department of Motor Vehicles and the Department of the California Highway Patrol, to (1) review the current methods of assessing vehicle weight fees, which are based upon the vehicle's unladen weight, (2) consider the alternatives of assessing weight fees based on laden weight or the combined gross vehicle weight, and (3) report to the Legislature by January 1, 1996, with recommendations and a timetable for implementation of a more equitable system, together with a recommended schedule of weight fees.

Res. Ch. 19 (AJR 71) McPherson. California Missing Children's Week.

This measure would memorialize the President and Congress to commit to pursuit of policies that will protect children and punish those who harm them. It also would condemn crimes against children and establish the week of April 17, 1994, through April 23, 1994, and the 3rd week in April each year thereafter, as California Missing Children's Week.

Res. Ch. 20 (ACR 103) Horcher. Southeast Asia Genocide Remembrance Week.

This measure would proclaim April 24 through April 30, 1994, as Southeast Asia Genocide Remembrance Week.

Res. Ch. 21 (ACR 83) Alpert. International Year of the Family.

This measure would declare that the Legislature joins with the world community in observing 1994 as the International Year of the Family and encourages all citizens to take appropriate actions in observance thereof.

Res. Ch. 22 (ACR 116) Hauser. Homebuyer Education Month.

This measure would declare April 1994 to be Homebuyer Education Month in the

State of California and would commend the California Housing Loan Insurance Fund, the California Housing Finance Agency, and the Department of Housing and Community Development for their contributions in helping to make homeownership attainable for residents of the state.

Res. Ch. 23 (AJR 64) Vasconcellos. NASA/Ames Wind Tunnel Project.

This measure would memorialize the President and the Congress of the United States to select as the site for the proposed National Wind Tunnel Complex the NASA/Ames Research Center in Silicon Valley.

Res. Ch. 24 (AJR 84) Costa. National Day of Remembrance.

This measure would memorialize the President and Congress of the United States to designate April 24 as "National Day of Remembrance" and would request the President of the United States to issue a proclamation calling upon the people of the United States to observe that day, as described.

Res. Ch. 25 (AJR 51) Solis. Main San Gabriel Groundwater Basin.

This measure would memorialize the Administrator of the Environmental Protection Agency to incorporate conjunctive use into the remedial design for the Baldwin Park Operable Unit Cleanup Project for the purpose of remedying groundwater contamination in the Main San Gabriel Groundwater Basin.

Res. Ch. 26 (SCR 42) Watson. Take Our Daughters To Work Day.

This measure would proclaim Thursday, April 28, 1994, as "Take Our Daughters To Work Day" when mothers, fathers, friends, and relatives are encouraged to take girls nine to 15 years of age to work with them for a day as a means to spark their vision about their own future in the workforce.

Res. Ch. 27 (SCR 36) Wyman. Day of Prayer.

This measure would recognize May 5, 1994, as "National Day of Prayer" and calls on the people of California to gather together to pray for unity of the hearts of all mankind.

Res. Ch. 28 (ACR 124) Karnette. Mathematics Education Month.

This measure would designate April as Mathematics Education Month and encourage all California schools and communities to recognize the increased importance of mathematics in daily life.

Res. Ch. 29 (SCR 29) Peace. Joint Committee on Workers' Compensation.

This measure would create a Joint Committee on Workers' Compensation, with specified duties. The measure would authorize the Senate Committee on Rules to make money available from its operating fund as necessary for the expenses of the committee.

The measure would require the committee to report to the Legislature at the end of each legislative session on its findings and recommendations. The measure would authorize the committee to act until January 31, 1995, at which time the committee's existence would terminate.

Res. Ch. 30 (SCR 48) Leslie. California Public Lands Week.

This measure would declare the week of May 8, 1994, to May 14, 1994, and the 2nd week in May in the 4 subsequent years thereafter, as California Public Lands Week in recognition of the many benefits which California citizens derive from the use and enjoyment of federally owned public lands in the state.

Res. Ch. 31 (ACR 120) Bronshvag. Mother's Day: violence-free day.

This measure would declare Mother's Day, May 8, 1994, and every subsequent Mother's Day, to be a violence-free day throughout California.

Res. Ch. 32 (AJR 26) Alpert. Freedom of Access to Clinic Entrances Act of 1993.

This measure would memorialize the President and the Congress of the United States to enact the Freedom of Access to Clinic Entrances Act of 1993 to guarantee American women their fundamental right to reproductive health care.

Res. Ch. 33 (ACR 130) Hannigan. Chronic fatigue syndrome.
This measure would designate May 12, 1994, as International Chronic Fatigue and Immune Dysfunction Syndrome Awareness Day.

Res. Ch. 34 (AJR 61) Conroy. Homebased business: Homebased Business Week.
This measure would declare the Legislature's recognition of a Homebased Business Week, sponsored by the Home Office and Business Opportunities (HOBO) Association, the week of September 19 through 23 of 1994.

Res. Ch. 35 (ACR 88) McDonald. Putting children first.
This measure would recognize the perils faced by the children of California and declare that the Legislature is committed to putting children first during 1994 by promoting parental responsibility, encouraging community involvement, and attending to their educational, health care, and public safety needs.

Res. Ch. 36 (ACR 87) Aguiar. Blue Ribbon Week.
This measure would, on and after January 1, 1995, designate the first week of May of each year as Blue Ribbon Week, and would urge all citizens to annually observe these days of recognition and support for all peace officers and law enforcement agencies by wearing or displaying a blue ribbon.

Res. Ch. 37 (ACR 132) Karnette. California State University, Long Beach.
This measure would encourage the Trustees of the California State University, the Chancellor of the California State University, and the President of the California State University, Long Beach, to name a building on the campus of California State University, Long Beach, in honor of Senator Ralph C. Dills.

Res. Ch. 38 (ACR 129) Epple. Management Week In California.
This measure would declare the week of June 6 to June 11, 1994, to be Management Week In California, to coincide with the recognition of Management Week In America, sponsored by the National Management Association.

Res. Ch. 39 (AJR 86) Alpert. National health care reform legislation: alcohol and other drug abuse treatment.
This measure would memorialize the President and the Congress of the United States to include comprehensive alcohol and other drug abuse treatment as a benefit covered under health insurance as part of the health care reform legislation.

Res. Ch. 40 (ACR 91) Connolly. Commemorating the 50th Anniversary of the Allied D-Day Invasion of France.
This measure would commemorate the 50th Anniversary of the June 6, 1944 Allied D-Day Invasion against Nazi fortified positions in western Europe and would honor the men and women of our United States Armed Forces, its leaders, and our allies who bravely fought the Axis powers for the defeat of fascism and for the liberation of Europe.

Res. Ch. 41 (ACR 134) Bates. Wildland Fire Prevention Month.
This measure would proclaim the month of June to be Wildland Fire Prevention Month.

Res. Ch. 42 (ACR 97) Caldera. World Cup Month.
This measure would declare the Legislature's support of the World Cup tournament, its welcome to each competitor and spectator who comes to participate in or watch the games in California, and its commitment to promote the success of the World Cup tournament in California. The measure would proclaim the period of June 17, 1994, to July 17, 1994, inclusive, as World Cup Month in California. The measure would also commend the efforts of the organizing committee of World Cup USA 1994, Inc., and of the World Cup host committees for the venues of Los Angeles and San Francisco. Finally, the measure would call upon the Governor and all state agencies to work with the organizing and host committees to ensure a safe, successful, and enjoyable World

Cup 1994, consistent with the kind of support that made the 1984 Summer Olympics at Los Angeles a successful event.

Res. Ch. 43 (SJR 45) Marks. United States flag merchant marine.

This measure would memorialize the President and Congress of the United States to take action to ensure a strong and capable United States flag merchant marine.

Res. Ch. 44 (AJR 60) Archie-Hudson. Deportation: spouses and children of permanent United States residents.

This measure would memorialize the President and Congress of the United States to review the actions of the Immigration and Naturalization Service with respect to deportation procedures for the children and spouses of permanent residents who were under the amnesty provisions of Immigration Reform and Control Act of 1986 and amend Section 301 of the Immigration Act of 1990 to ensure that the spouses and children of permanent residents who are legalized under the amnesty provisions of the Immigration Reform and Control Act of 1986 are afforded family unity protection. This measure would also urge the President to issue an executive order that will direct the Immigration and Naturalization Service to cease any deportation actions that it may be taking against the spouses and children of permanent residents until the effective date of certain amendments to the Immigration Act of 1990.

Res. Ch. 45 (SJR 36) Russell. Interstate insurance compacts.

This bill would memorialize the United States Congress to adopt appropriate resolutions encouraging the states to adopt interstate compacts for the regulation of interstate insurance, and to consent to the adoption of those compacts.

Res. Ch. 46 (ACR 78) Connolly. California Korean War Veterans Remembrance Memorial.

This measure would recognize the value of constructing the California Korean War Veterans Remembrance Memorial and encourage all Californians to support the development of the Memorial.

Res. Ch. 47 (ACR 76) O'Connell. Highways: E.G. Lewis Highway.

This measure would designate a specified segment of State Highway Route 41 as the E.G. Lewis Highway.

The measure would also request the Department of Transportation to determine the cost for appropriate signs showing this special designation and, upon receiving donations from private sources covering that cost, to erect those signs.

Res. Ch. 48 (AJR 69) Weggeland. Federal income taxes: sale of principal residence: capital loss.

This measure would memorialize the President and Congress of the United States to revise federal income tax law to recognize a capital loss on the sale of a principal residence.

Res. Ch. 49 (AJR 70) Weggeland. Federal income tax: personal exemption.

This measure would memorialize the President and Congress to increase the personal exemption from federal income tax from $2,350 to $8,000, and to continue to index that exemption to inflation.

Res. Ch. 50 (AJR 77) Costa. Undocumented alien criminals: imprisonment in federal prisons.

This measure would memorialize the President and Congress to enact legislation to construct new federal prisons and to transfer undocumented alien criminals who are presently imprisoned in state prisons to the new federal facilities as a first priority in order to relieve California and other states from the financial burden of imprisoning dangerous convicted criminals who have entered the country illegally.

Res. Ch. 51 (AJR 78) Pringle. Law enforcement.

This measure memorializes the President and the Congress of the United States to exempt California law enforcement agencies from the matching funds requirement of the "Public Safety Partnership and Community Policing Act of 1993." The measure would also memorialize the President and Congress to give the Attorney General broad authority to waive the matching funds requirement if the exemption is not forthcoming. The measure would also urge that local officials be permitted to use the funds in the most flexible manner.

Res. Ch. 52 (ACR 80) Bronshvag. Polly Hannah Klaas Memorial Grove.

This measure would designate a grove of native trees to be planted at Petaluma Adobe Historic Park, and a bench with a plaque to be placed in the grove, the Polly Hannah Klaas Memorial Grove.

The measure would also direct the Department of Parks and Recreation to determine the cost of the grove, bench, and plaque, to determine the location of the grove, and, upon receiving donations from nonstate sources sufficient to cover that cost, to plant the grove and place the bench and plaque in the grove.

Res. Ch. 53 (ACR 106) McPherson. Hospice providers.

This measure would proclaim November 14 through 20 as "Hospice Week" in recognition of the valuable services provided by hospice providers.

Res. Ch. 54 (AJR 7) Conroy. Vietnam.

This measure would declare the support of the Legislature for the struggle of the Vietnamese people for freedom and democracy, would call for an end to political repression and for respect for human and civil rights in Vietnam, and would urge the United States Government to continue making normalized relations and the extension of Most Favored Nation status contingent upon satisfaction of specified conditions.

Res. Ch. 55 (AJR 44) Snyder. Extension of COBRA benefits.

This measure would memorialize the President and Congress to extend the federal Consolidated Omnibus Budget Reconciliation Act of 1985 to enable individuals 50 years of age or older to continue participating in their employer provided group health plan.

Res. Ch. 56 (AJR 46) Mountjoy. Illegal aliens: international trade agreements.

This measure would memorialize the President and the Congress of the United States to negotiate with countries to whom the United States gives foreign aid or with whom the United States enters into trade agreements, for an agreement to require that nationals convicted of felonies in the United States, when they have entered the United States illegally, serve their prison sentences in their country of origin and that the term of each sentence to be served in a country of origin shall be comparable to the sentence imposed in the state within the United States wherein the crime occurred.

Res. Ch. 57 (AJR 52) Cortese. Federal Safe Drinking Water Act.

This measure would memorialize the President and the Congress of the United States, when the federal Safe Drinking Water Act is reauthorized, to adopt amendments to that act that would preserve the federal requirements that ensure the protection of the public health and safety, but would reduce the regulatory burden on drinking water providers and, in turn, reduce the financial burden on the citizens of this nation. The measure would memorialize the President and Congress to adopt specified amendments to the act that have been recommended by various state and national water organizations, associations of public health officials, and the National Governors Association.

Res. Ch. 58 (AJR 81) Lee. Federal Hate Crimes Sentencing Enhancement Act of 1994.

This measure would memorialize the Congress and the President of the United States to swiftly pass and sign into law the "Hate Crimes Sentencing Enhancement Act of 1994."

Res. Ch. 59 (SCA 38) Marks. Recall election: state officers.

Existing provisions of the California Constitution require the Governor, in the case of petition to recall of a state officer, to order a recall election not less than 60 nor more than 80 days from the date of certification of sufficient signatures.

This measure would authorize a recall election to be conducted within 180 days from the date of certification of sufficient signatures in order that the election may be consolidated with the next regularly scheduled election occurring wholly or partially within the same jurisdiction in which the recall election is held, if the voters eligible to vote at that next regularly scheduled election equal at least 50% of all the voters eligible to vote at the recall election.

Res. Ch. 60 (ACR 77) Epple. Red Ribbon Week.

This measure would proclaim October 23 through October 31, 1994, as "Red Ribbon Week," and would encourage Californians to help build drug-free communities and to participate in drug prevention activities, as specified.

Res. Ch. 61 (AJR 40) Alpert. Gaming on cruise ships.

This measure memorializes the Congress of the United States to amend the federal Johnson Act to remove California's authority to regulate gambling on cruise ships traveling to foreign ports or on segments of voyages going to another state or country.

Res. Ch. 62 (AJR 75) Bornstein. New River: pollution.

This measure would memorialize the President and Congress to implement measures, in cooperation with the Republic of Mexico and state and local public officials, to correct the contamination of the New River caused by discharges within the Republic of Mexico.

Res. Ch. 63 (AJR 80) McDonald. Women's health care.

This measure would memorialize the President and Congress of the United States to include the provision for mammograms and other women's health care needs as an integral part of any nationwide health care benefit reform package.

Res. Ch. 64 (ACR 111) Katz. Clarence Wayne Dean Memorial Interchange.

This measure would designate the Interstate Highway Route 5 and State Highway Route 14 Interchange the Clarence Wayne Dean Memorial Interchange.

The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 65 (SCR 55) Peace. Joint Committee on Oversight of the State Library: creation.

This measure would create a Joint Committee on Oversight of the State Library, with specified duties. The measure would authorize the Senate Committee on Rules to make money available from the Senate Operating Fund as necessary for the expenses of the committee.

The measure would require the committee to report to the Legislature at the end of each legislative session on its findings and recommendations.

The measure would authorize the committee to act until January 31, 1995, at which time the committee's existence would terminate.

Res. Ch. 66 (SJR 5) McCorquodale. State services to immigrants: federal funding.

This measure would memorialize the President and Congress of the United States to provide at least $400 million in federal funds to the state to offset costs incurred by the state in providing health and social services to refugees and other immigrants, at least $1.7 billion for the school year cost of educating undocumented immigrants in the public schools, and at least an additional $402 million in federal funds to cover the cost of incarcerating felons who are undocumented aliens.

Res. Ch. 67 (ACR 126) Cannella. California Fire Museum.

This measure would designate the museum that is to be constructed in the City of Atwater and dedicated to the history of the firefighting profession and industry as a California Fire Museum.

Res. Ch. 68 (ACR 135) Burton. The National Council on Alcoholism and Drug Dependence: 50th anniversary.

This measure would commend the National Council on Alcoholism and Drug Dependence for the outstanding contributions that it has made to improving the quality of life of all Americans.

Res. Ch. 69 (SJR 37) Torres. Natural disasters.

This measure would memorialize Congress and the President of the United States to enact the Natural Disaster Protection Act, which establishes a federal program of hazard insurance and mitigation against the risks of catastrophic disasters such as earthquakes, hurricanes, windstorms, volcanic eruptions, and flooding, as provided.

Res. Ch. 70 (SCR 32) Mello. Gillian Cichowski Memorial Overcrossing.

This measure would designate the Bear Creek Overpass on State Highway Route 17 at the Lexington Reservoir as the Gillian Cichowski Memorial Overcrossing. The measure would request the Department of Transportation to determine the cost of erecting appropriate plaques and markers showing that designation and to erect the plaques and markers upon receiving donations from nonstate sources to cover that cost.

Res. Ch. 71 (SCR 46) McCorquodale. Sig Sanchez Highway.

This measure would designate the Morgan Hill Bypass on State Highway Route 101 in the County of Santa Clara the Sig Sanchez Highway.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 72 (SJR 23) Mello. Nursing facilities.

This measure would memorialize the President and Congress of the United States to enact legislation that (1) requires governmental agencies responsible for the disapproval of a nurse aide training program to disapprove this program only for violations of regulations that directly relate to the quality of the program and (2) authorizes the timely reapproval of a nurse aide training program within a nursing facility once the problems are resolved.

Res. Ch. 73 (AJR 87) Baca. Special education: funding.

This measure would memorialize the President and Congress of the United States to provide the full federal share of funding for special education programs to the states by the year 2000 so that California and other states will not have to take funding from other state and local programs, as specified.

Res. Ch. 74 (ACR 114) Vasconcellos. Trade and commerce with Japan.

This measure would request the Trade and Commerce Agency to do all of the following: (1) seek proactively to develop a working partnership with the Japanese Ministry of International Trade and Industry, (2) reach out and seek to develop a working partnership with the Japan External Trade Organization, (3) invite the Japan External Trade Organization to place one of its personnel to work in the California Office of Export Development to assist in export promotion only and be restricted from being involved in foreign investment projects, (4) consider becoming an active member of the Japan Western Association, and (5) encourage the major trade and commercial and economic development associations and businesses in the state to consider participation in the Japan Western Association, and would request the Governor and the Legislature to pay more attention to engaging in additional vehicles and opportunities for the state to improve relationships and trade and commerce with Japan and other Pacific Rim

nations.

Res. Ch. 75 (ACR 138) Knight. Code Enforcement Week.

This measure would proclaim the week of September 24, through September 30, 1994, as Code Enforcement Week and would urge all Californians to recognize and support code enforcement officials statewide for their efforts to improve the quality of life in our state.

Res. Ch. 76 (AJR 66) Quackenbush. Employment taxes: withholding: disabled persons.

This measure would memorialize the President and Congress to enact legislation to exempt disabled persons from paying any employment taxes for any immediate family member who is compensated for providing domestic services for them in their home.

Res. Ch. 77 (AJR 72) Haynes. Federal mandates.

This measure memorializes the President and Congress of the United States to provide funding for, or relieve the State of California from, federally mandated programs.

Res. Ch. 78 (AJR 88) Speier. Republic of Armenia.

This measure would memorialize the President and the Congress of the United States to take immediate steps necessary to cause Azerbaijan to cease its illicit blockade of the Republic of Armenia and call upon Azerbaijan and Turkey to resume honoring transit rights for shipments of food and fuel to the neighboring people of the Republic of Armenia, to respect international calls for a comprehensive cease fire in Nagorno Karabagh, and to remove foreign mercenaries and advisers at once.

Res. Ch. 79 (AJR 92) Honeycutt. Military bases: the Southwest Complex.

This measure would memorialize the President and Congress of the United States to support the southwest complex of military bases.

Res. Ch. 80 (ACR 140) Burton. Robert Moretti: memorial.

This measure would dedicate a bench memorial in Capitol Park to the memory of Robert Moretti.

Res. Ch. 81 (SCR 34) Roberti. California Law Revision Commission.

Existing law requires the California Law Revision Commission to file a report at each Regular Session of the Legislature containing a calendar of topics selected by it for study, including a list of studies in progress and a list of topics intended for future consideration, and, after the filing of the commission's first report, its studies are confined to topics set forth in the calendar contained in its last preceding report that are thereafter approved for its study, or referred to it for study, by concurrent resolution of the Legislature.

This measure would give legislative approval to the commission to continue its study of numerous, specified topics that the Legislature has previously authorized or directed the commission to study, and would refer to the commission a new topic for study relative to tolling statutes of limitations while the defendant is out of state, and would delete from the commission's calendar of topics studies relative to involuntary dismissal for lack of prosecution, statute of limitation for felonies, modification of contracts, sovereign or governmental immunity, liquidated damages in contracts, parol evidence rule, and pleadings in civil actions.

Res. Ch. 82 (SCR 44) Calderon. Landlord-tenant mediation.

This measure would encourage local agencies that administer or are considering local rent control ordinances to adopt procedures that encourage the submission of disputes between landlords and tenants to a mediator prior to the submission of the dispute to arbitration or the formal legal process of the local agency.

Res. Ch. 83 (SJR 31) Thompson. Forest plan: economic assistance.

This measure would memorialize the President and the Congress of the United States to continue efforts to appropriate and allocate the entire $1.2 billion in economic assist-

ance committed in the Economic Adjustment Initiative in the President's forest plan to assist communities adversely impacted by reduced timber harvest of United States forest lands, as specified.

The measure would urge the Governor and the Secretary of the Resources Agency to keep the Legislature and local government informed of the activities of the executive branch with regard to the economic assistance package and to provide administrative support, as specified.

The measure would also urge the Secretary of the Resources Agency to provide quarterly reports to the Joint Legislative Budget Committee identifying the amount and source of funding for all economic assistance programs and projects that are developed by the State Community Economic Revitalization Team (CERT) and financed by specified state or federal agencies.

Res. Ch. 84 (SJR 50) Beverly. C-17 airlifter.

This measure would memorialize the President and Congress of the United States to support and enact funding that will ensure the continued production of the C-17 airlifter.

Res. Ch. 85 (AJR 94) Bustamante. Trade barriers: exportation of tree fruit.

This measure would respectfully request the President of the United States to use any means necessary to encourage the government of Mexico to remove any trade barriers for the export of tree fruit to Mexico.

Res. Ch. 86 (SCR 47) Peace. North American Free Trade Agreement: task force.

This measure would request the Secretary of Business, Transportation and Housing to appoint an interagency task force, composed of specified members, to assess the impact of the transportation provisions of the North American Free Trade Agreement on the regulatory and enforcement activities of the state, as specified.

Res. Ch. 87 (SCR 49) Rosenthal. Khanty-Mansiysk Autonomous District of the Russian Federation and the State of California.

This measure would encourage the establishment of programs for a sister state relationship between the Khanty-Mansiysk Autonomous District of the Russian Federation and the State of California that will facilitate the exchange of technical and industrial information and will promote mutual international trade and commerce.

Res. Ch. 88 (SCR 53) Alquist. Joint Legislative Committee on Information Technology in State Government.

This measure would create the Joint Legislative Committee on Information Technology in State Government, with specified duties regarding legislative oversight of the information technology infrastructure of the state. The measure would authorize the Senate Committee on Rules to make money available from the Senate Operating Fund as necessary for the expenses of the committee.

The measure would require the committee to report to the Legislature at the end of each legislative session on its findings and recommendations.

The measure would authorize the committee to act until January 31, 1995, at which time the committee's existence would terminate.

Res. Ch. 89 (SCR 54) Alquist. Accounting standards: Financial Accounting Standards Board.

This measure would express the sense of the Legislature that the accounting standards relative to the valuation of employee stock option plans and employee stock purchase plans proposed by the Financial Accounting Standards Board will have grave economic consequences, as specified, and that the board should not change the current accounting rules, as specified, by requiring that businesses deduct from profits the value of stock options.

Res. Ch. 90 (SCR 57) Thompson. Rural health care.

This measure would resolve that the State Department of Health Services and the Office of Statewide Health Planning and Development consolidate their rural health

programs into one central Office of Rural Health.

Res. Ch. 91 (SJR 28) Wright. Human rights violations: Punjab.

This measure would memorialize the President and the Congress of the United States to make the resolution of the difficulties in the Punjab a high priority through the use of all its diplomatic means.

Res. Ch. 92 (SJR 38) Alquist. Railroad Retirement System.

The measure memorializes the President and the Congress of the United States to recognize and affirm a continued commitment to the Railroad Retirement System.

Res. Ch. 93 (SJR 44) Rogers. 10th Amendment.

This measure would declare the state's sovereignty under the 10th Amendment to the United States Constitution and demand that the federal government cease and desist mandates that are beyond the scope of constitutionally delegated powers.

Res. Ch. 94 (SJR 48) Alquist. Major An Quy Nguyen.

This measure would memorialize the President and Congress of the United States to enable Major An Quy Nguyen and his daughter to remain in the United States and to assist them to meet their goal of obtaining citizenship.

Res. Ch. 95 (ACA 37) Bustamante. Crimes: bail.

Existing provisions of the California Constitution provide that a person shall be released on bail, as provided, except for certain crimes and offenses, including felony offenses involving acts of violence on another person, when the facts are evident or the presumption great, and the court finds, based upon clear and convincing evidence, that there is a substantial likelihood the person's release would result in great bodily harm to others.

This measure would expand this exception to include felony sexual assault offenses on another person, when the facts are evident or the presumption great, and the court finds, based upon clear and convincing evidence, that there is a substantial likelihood the person's release would result in great bodily harm to others.

Res. Ch. 96 (ACR 79) Bronshvag. H. Dana Bowers Memorial Vista Point.

This measure would designate a specified vista point on United States Highway 101 at the north end of the Golden Gate Bridge as the H. Dana Bowers Memorial Vista Point.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation, and to erect the plaques and markers upon receiving donations from nonstate sources covering that cost.

Res. Ch. 97 (ACR 92) Areias. Celano-Norris Memorial Bridge and Sandvig-Scanlon Memorial Bridge.

This measure would designate the O'Neill Forebay Bridge on State Highway Route 152 as the Celano-Norris Memorial Bridge and the bridge on State Highway Route 152 east of the intersection with Interstate Highway Route 5 as the Sandvig-Scanlon Memorial Bridge.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing these special designations and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 98 (ACR 94) Statham. Stone Turnpike Memorial Freeway.

This measure would designate the portion of Interstate Route 5 between the Pit River Bridge in Shasta County and the Shasta-Siskiyou County line the Stone Turnpike Memorial Freeway.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate

plaques and markers.

Res. Ch. 99 (ACR 105) V. Brown. Roger Van Den Broeke Memorial Plaque.

This measure would direct that a plaque be placed in the memory of Roger Van Den Broeke on the Carquinez Bridge on Interstate Highway Route 80 south of the City of Vallejo.

The measure would also direct the Department of Transportation to determine the cost of an appropriate plaque and, upon receiving donations from nonstate sources covering that cost, to erect that plaque.

Res. Ch. 100 (ACR 110) Eastin. Peace Corps' World Wise Schools Program.

This measure would state that the Legislature endorses the goals of, and supports the concept and philosophy of, the Peace Corps' World Wise Schools program. The measure would urge the State Department of Education and other educational entities to expand the scope of that program in this state, as specified.

Res. Ch. 101 (ACR 117) Hauser. The Gambetta Memorial Bridges.

This measure would designate the State Highway Route 101 overpasses above First Street in the City of Cloverdale as the Gambetta Memorial Bridges.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 102 (ACR 118) Cannella. State employee merit awards.

This measure would request that additional merit award payments, authorized by the Department of Personnel Administration, be made to specified individuals whose proposals have resulted in annual savings and net revenue gain to the state.

Res. Ch. 103 (ACR 133) Areias. Veterans' Memorial Highway.

This measure would designate the portion of State Highway Route 101 that is within the city limits of the City of Salinas the Veterans' Memorial Highway.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 104 (ACR 137) Bornstein. Veterans' Memorial Freeway.

This measure would designate the portion of Interstate Highway Route 10 extending 5 miles to the east and 5 miles to the west of mile marker number 84 the Veterans' Memorial Freeway.

The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 105 (ACR 141) Hauser. Richard F. Cavness Memorial Bridge.

This measure would designate Bridge No. 20-0061 (the Arata Lane Bridge) on U.S. Highway 101 as the Richard F. Cavness Memorial Bridge. The measure would request the Department of Transportation to determine the cost of erecting appropriate plaques and markers showing that official designation and to erect the plaques and markers upon receiving donations from nonstate sources to cover that cost.

Res. Ch. 106 (ACR 144) Knowles. Bert Lund Memorial Overlook.

This measure would designate the overlook just west of Peddler Hill on State Highway Route 88 as the Bert Lund Memorial Overlook. The measure would request the Department of Transportation to determine the cost of appropriate plaques and markers showing this designation and, upon receiving donations from nonstate sources to cover that cost, to erect appropriate plaques and markers.

Res. Ch. 107 (ACR 146) Bates. East Bay Public Safety Corridor.

This measure recognizes and applauds the innovative and courageous efforts of the East Bay Public Safety Corridor and urges all federal, state, and local agencies to actively support and work with the Corridor to achieve its goals of safe communities for all East Bay residents.

Res. Ch. 108 (ACR 148) O'Connell. California COASTWEEKS and Adopt-a-Beach Coastal Cleanup Day.

This measure would proclaim September 17 through October 10, 1994, as California COASTWEEKS, and September 17, 1994, as Adopt-a-Beach Coastal Cleanup Day.

Res. Ch. 109 (AJR 90) W. Brown. Presidio National Park.

This measure would declare the Legislature's support of the designation of the Presidio National Park as proposed in specified federal legislation, and would memorialize the President and the Congress to enact and implement that proposed legislation.

Res. Ch. 110 (ACA 17) Knowles. Property taxation: purchase or change in ownership: parent-child transfer exclusion.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, the California Constitution defines "full cash value" to mean the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. For purposes of applying this definition, the California Constitution also provides that the terms "purchase" and "change in ownership" exclude certain purchases or transfers of real property between parents and their children, as defined by the Legislature.

This measure would, subject to certain conditions, expand this exclusion to also apply to otherwise qualifying transfers between grandparents and their grandchild or grandchildren, as defined by the Legislature, if the parents of that grandchild or those grandchildren are deceased upon the date of the purchase or transfer.

Res. Ch. 111 (ACA 46) W. Brown. Commission on Judicial Performance.

(1) The California Constitution currently specifies the membership, terms of office, and appointing powers with respect to the composition of the Commission on Judicial Performance.

Commencing March 1, 1995, this measure would revise the membership, terms of office, and appointing powers with respect to the composition of the Commission on Judicial Performance.

(2) The California Constitution currently provides that the Commission on Judicial Performance recommends the removal or retirement of a judge to the Supreme Court, which exercises the power to remove, retire, or censure a judge, as specified. The Commission on Judicial Performance or the Supreme Court may suspend a judge without salary, as specified.

Commencing March 1, 1995, this measure would transfer the authority to remove, retire, suspend, publicly or privately admonish, or censure a judge to the Commission on Judicial Performance; provide for review by the Supreme Court, or by a panel of judges of the courts of appeal in the case of a judge of the Supreme Court, of decisions to retire, remove, admonish, disqualify, or censure a judge; provide for the public or private admonishment or censure of former judges, and the barring of a former judge from further judicial work, as specified; provide for disciplinary action by the State Bar against judges who retire or resign with disciplinary charges pending; provide for the review of commission proceedings by the Supreme Court; provide for the authority of the Commission on Judicial Performance to determine a judge to be disqualified from acting as a judge without loss of salary upon notice of formal proceedings by the commission, and provide for the rulemaking authority of the Commission on Judicial Performance; specify the duty of the commission to provide copies of its disciplinary actions to specified public officials; provide that formal proceedings against judges shall be open

to the public, as specified; provide for the immunity of commission members staff and specified employees from suit for conduct in the course of their official duties, the immunity of persons from civil action for statements made to the commission, the jurisdiction of actions against the commission, and the budgeting mechanism for the commission; and require the Supreme Court to make rules for the conduct of judges and judicial candidates, as specified.

Res. Ch. 112 (AJR 56) Knowles. Funding for the USDA Forest Service-Lake Tahoe Basin Management Unit.

This measure would request the Congress of the United States to provide sufficient funding to the USDA Forest Service-Lake Tahoe Basin Management Unit to address, as specified, the effects of drought and insect damage on national forest lands.

Res. Ch. 113 (SCA 7) Dills. Courts: elimination of justice courts.

The California Constitution presently provides that each county shall be divided into municipal court districts and justice court districts, as specified, with districts of more than 40,000 residents constituting municipal court districts and the remainder justice court districts. The California Constitution also requires the Legislature to prescribe for each municipal court and provide for each justice court the number, qualifications, and compensation of judges, officers, and employees.

This measure would eliminate all justice courts, elevate existing justice courts to municipal courts, and provide that the number, qualifications, and compensation of judges, officers, attachés, and employees of justice courts on the effective date of this measure shall continue until changed by the Legislature.

The measure would also make conforming changes. The measure would become operative January 1, 1995.

Res. Ch. 114 (ACR 54) Hauser. Frank P. Belotti Memorial Freeway and Sam Helwer Memorial Freeway.

This measure would designate the portion of State Highway Route 101 in the area known as the Redwood Freeway, from the Bridge numbered 04-241, over the South Fork of the Eel River at Smith Point, to Myers Flat, as the Frank P. Belotti Memorial Freeway. The measure would also designate the portion of State Highway Route 101 in the area known as the Redwood Freeway, from Myers Flat to Stafford, as the Sam Helwer Memorial Freeway.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing those special designations and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 115 (ACR 62) Umberg. State Highway Routes 23 and 99: special designations.

This measure would, in honor of the Nisei soldiers of World War II who served in units of the United States Armed Forces comprising the 100/442/MIS triad, designate specified segments of State Highway Routes 23 and 99 as the 442nd Regimental Combat Team Memorial Highway, the 100th Infantry Battalion Memorial Highway, and the Military Intelligence Service Memorial Highway, respectively.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing these special designations and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 116 (ACR 113) Vasconcellos. Osaka Prefectural Government.

This measure would express the Legislature's support for the Governor to execute an Amended Cooperation Agreement between Osaka Prefectural Government and the State of California on behalf of the State of California, and to seek out and enter into similar cooperation and exchange agreements with other foreign governments, nations, or regions, as appropriate.

Res. Ch. 117 (ACR 127) Cortese. Italian Americans.

This measure would declare that the Legislature welcomes the exhibit "Una Storia Segreta—The Secret Story" to the Capitol, and requests the Legislature to take various other actions with respect to increasing the awareness of the experience of Italian Americans in California.

Res. Ch. 118 (ACR 151) Vasconcellos. Supplemental Report on the 1994 Budget Bill.

This measure would declare that the Supplemental Report on the 1994 Budget Bill reflects the intent of both houses of the Legislature in adopting the Budget Act of 1994. The measure also would declare that the report shall be interpreted as the intent of the Legislature by the various agencies of state government affected by the statements contained in the report. The measure would require the Legislative Analyst to transmit copies of the appropriate parts of the report to the agencies to which the report is directed.

Res. Ch. 119 (AJR 55) Polanco. Republic of China on Taiwan.

This measure encourages the recognition of our ongoing commercial relationship with the people of the Republic of China on Taiwan as serving our mutual interests, encourages the people of this state to accord appropriate recognition to the record of the Republic of China on Taiwan in light of her democratization at home and humanitarian service abroad, and encourages the giving of due consideration of the readiness of the Republic of China on Taiwan for broader participation in the international community.

Res. Ch. 120 (AJR 62) Harvey. Conversion of closed military bases to state prisons.

This measure would memorialize the President and Congress of the United States to allow California to, upon local approval, convert closed military bases to state prisons.

Res. Ch. 121 (ACR 90) Burton. Employment: indoor air standards.

This measure would request the Occupational Safety and Health Standards Board to adopt an occupational safety and health standard for indoor air quality, including the elimination of environmental tobacco smoke. The measure would request the Division of Occupational Safety and Health to work in consultation with prescribed representatives and entities, and indoor air specialists to develop a proposed standard, in coordination with the California Building Standards Commission, for presentation to the board on or before December 31, 1995.

Res. Ch. 122 (ACR 139) W. Brown. Biodegradable plastics.

This measure would urge state agencies to act expeditiously to increase their purchase of biodegradable plastics. The measure would urge the California Integrated Waste Management Board and other appropriate agencies to analyze the efficacy of biodegradable plastics, including an analysis of potential impacts resulting from the mixing of biodegradable plastic resins with other plastic resins, as a means of reducing the state's solid waste stream. The measure would also request the board to adopt standards and specifications, as appropriate, for biodegradable plastics.

Res. Ch. 123 (ACR 153) Knowles. Mormon-Carson Pass Emigrant Trail.

This measure would recognize the designation of the historic Mormon-Carson Pass Emigrant Trail as a national landmark by Congress and the official naming of Lofty Peak 9763 adjacent to the Emigrant Trail above Kirkwood as Melissa Coray Peak, and commend the Sierra Chapter of the Sons of the Utah Pioneers for their effort in this regard.

Res. Ch. 124 (AJR 21) Takasugi. Social security: taxation.

This measure would memorialize the President and Congress of the United States to enact legislation that would increase prescribed income limits before subjecting social security benefits to specified federal income taxes.

Res. Ch. 125 (AJR 24) Areias. Credit cards.

This measure would memorialize the President, Congress and the Federal Reserve Board to review and revise specified provisions of federal law so that holders of charge

cards and credit cards are required to be advised on the billing statement to inscribe their account number on the payee line of their check, and would urge that Congress enact a statute or the Federal Reserve Board adopt a prescribed regulation, or both, which would deem this inscription controlling where the inscribed account number is different from the account number on the remittance stub. The measure would urge that this statute or regulation, or both, apply to all charge cards and credit cards regardless of use.

Res. Ch. 126 (AJR 58) Martinez. Violence on television affecting young children.

This measure would memorialize the Federal Communications Commission to review television's efforts and accomplishments in addressing the impacts of violence on children.

Res. Ch. 127 (SCR 30) Johannessen. Veterans' Home Memorial Bridge.

This measure would designate a specified bridge on State Highway Route 29 at the City of Yountville as the Veterans' Home Memorial Bridge.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 128 (SCR 31) Johnston. Teaching the arts.

This measure would request the Commission on Teacher Credentialing to review and assess the adequacy of specified teachers to teach the arts and to report its findings to the Senate Education Committee, the Assembly Education Committee, and the Joint Legislative Committee on the Arts no later than November 1, 1995.

Res. Ch. 129 (SCR 33) Hughes. School Safety Month and Yellow Ribbon Week.

This measure would proclaim October as School Safety Month and October 16 to 22 as Yellow Ribbon Week. The measure would encourage all schools to participate in appropriate activities during School Safety Month to recognize the importance of conflict resolution and violence eradication and would encourage the wearing of yellow ribbons during Yellow Ribbon Week to demonstrate a commitment to school safety.

Res. Ch. 130 (SCR 35) Hughes. Educational materials on violence in the media.

This measure would establish a 17-member task force, to be appointed as specified, to develop and examine existing video and other educational materials designed to enhance the critical viewing skills of teachers, parents, and children regarding media violence and to teach how to prevent its negative effects. The State Department of Education would fund the task force from its existing resources, receive the materials developed by the task force, and disseminate them to specified local educational entities.

Res. Ch. 131 (SCR 41) Roberti. Sadao S. Munemori Memorial Freeway Interchange and Korean War Veterans' Memorial Highway.

This measure would designate the freeway interchange between Interstate Highway Route 105 and Interstate Highway Route 405 the Sadao S. Munemori Memorial Freeway Interchange and the portion of State Highway Route 126 between the City of Santa Paula and Interstate Highway Route 5 the Korean War Veterans' Memorial Highway.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing these special designations and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 132 (SCR 45) Rogers. Engineering geologists.

This measure would request the State Personnel Board and the Department of Personnel Administration to review the civil service classification for engineering geologists to ensure that these positions are used in compliance with the Geologist and Geophysicist Act, and to report to the Legislature within 180 days of the adoption of this measure.

Res. Ch. 133 (SCR 52) Presley. Senior respite care.

This measure would request the Department of Aging to study whether it is possible to institute a training program for respite care workers for seniors using federal Senior Companion ACTION grant funds under an existing program.

Res. Ch. 134 (SCR 58) Leslie. El Dorado County Veterans Bridges.

This measure would designate Bridge No. 25-98 and Bridge No. 25-99 on State Highway Route 50 near the junction of Alder Creek and the South Fork of the American River as the "El Dorado County Veterans Bridges."

The measure would request the Department of Transportation to determine the cost of erecting appropriate plaques and markers showing the special designations and, upon receiving donations from nonstate sources to cover that cost, to erect appropriate plaques and markers.

Res. Ch. 135 (SCR 60) Wyman. Richard Alan Maxwell Memorial Interchange.

This measure would designate the traffic interchange located at the intersection of State Highway Route 99, State Highway Route 204, and Airport Drive in Bakersfield as the Richard Alan Maxwell Memorial Interchange.

The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 136 (SJR 32) Hart. Health: tobacco sales: international marketing practices.

This measure would urge the President, the Congress of the United States, and American tobacco companies to take specified actions with regard to the marketing of tobacco internationally.

Res. Ch. 137 (SJR 33) Marks. Territory of Guam.

This measure memorializes the President and the Congress of the United States to support the people of the Territory of Guam in their efforts to attain the status of a Commonwealth of the United States and a just and permanent relationship with the government of the United States.

Res. Ch. 138 (SJR 39) Hughes. Violence prevention education.

This measure would memorialize the Congress of the United States to encourage federal efforts to develop, implement, and evaluate violence prevention and anti-aggression education curricula for use in public elementary and secondary schools.

Res. Ch. 139 (SJR 46) Rosenthal. Federal income tax: social security: indexing.

This measure would memorialize the President and the Congress of the United States to enact legislation to index to inflation the income thresholds for the income taxation of Social Security benefits.

Res. Ch. 140 (SJR 49) Bergeson. Space Station.

This measure would express the Legislature's intent to urge specified entities to support the continued funding of the Space Station and to communicate their support to specified federal officials.

Res. Ch. 141 (SJR 51) Peace. Unfunded federal mandates: federal legislation.

This measure would memorialize the President and the Congress of the United States to enact House Bill No. 140, the Federal Mandate Relief Act, at the earliest possible time to ease the fiscal burdens imposed on state, local, and tribal governments by federal mandates.

Res. Ch. 142 (ACR 96) Vasconcellos. Industry of the Month program.

This measure would create an "Industry of the Month" program that would, every other month until June 30, 1996, feature one leading California industry for a day-long

intensive dialogue in the State Capitol, as specified.

Res. Ch. 143 (ACR 145) Snyder. General John Fremont: historical plaque.

This measure would request the Department of Transportation to grant to the Matuca Chapter, E Clampus Vitus, an encroachment permit to authorize a historical plaque dedicated to General John Fremont to be placed within the right-of-way of State Highway Route 49 between mile markers 30.5 and 31 in Mariposa County.

Res. Ch. 144 (ACR 154) Ferguson. Try American Day.

This measure would request the Governor to proclaim Labor Day, September 5, 1994, to be Try American Day to encourage the people of the State of California to purchase American-made goods and services.

Res. Ch. 145 (AJR 93) Baca. Martinez Job Creation and Infrastructure Restoration Act of 1994.

This measure would memorialize the Congress of the United States to enact the Martinez Job Creation and Infrastructure Restoration Act of 1994.

Res. Ch. 146 (AJR 96) Martinez. The Gabrielinos.

This measure would recognize the Gabrielinos as the aboriginal tribe of the Los Angeles Basin and would memorialize the President and Congress to give similar recognition to the Gabrielinos.

Res. Ch. 147 (ACR 119) Hannigan. Blecher-Freeman Memorial Causeway; Richard Alan Maxwell Memorial Interchange; and John McVeigh, Jr. Memorial Highway.

This measure would designate the Yolo Causeway on Interstate Highway Route 80 in the County of Yolo the Blecher-Freeman Memorial Causeway, the traffic interchange located at the intersection of State Highway Route 99, State Highway Route 204, and Airport Drive in the City of Bakersfield the Richard Alan Maxwell Memorial Interchange, and the portion of State Highway Route 198 from the junction with State Highway Route 101 to the County of Fresno the John McVeigh, Jr. Memorial Highway.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing the special designation, clearly displaying the Star of the California Highway Patrol, and identifying California Highway Patrol Officers Roy P. Blecher, W. Michael Freeman, Richard Alan Maxwell, and John McVeigh Jr., and, upon receiving donations from nonstate sources sufficient to cover that cost, to erect appropriate plaques and markers.

Res. Ch. 148 (ACR 143) Sher. Public utilities.

This measure would urge that the Public Utilities Commission issue no interim, final, or effective order in specified proceedings relating to the regulation of the electric services industry, until it has held evidentiary hearings and made specified reports to the Legislature and the Governor in that regard.

This measure would establish a Joint Oversight Committee on Lowering The Cost of Electric Services, to ensure that the proposals made by the commission meet certain standards, to ensure that the Legislature is properly consulted and involved in policies proposed by the commission, and to provide a mechanism for the Legislature to work with specified entities to achieve lower utility rates, improved environmental protection, and resource diversity.

Res. Ch. 149 (SCR 38) Roberti. Juvenile justice.

This measure would provide that if AB 2428 of the 1993–94 Regular Session is not enacted, the California Task Force to Review Juvenile Crime and the Juvenile Justice Response shall be established by the Legislature with a prescribed membership to accomplish specified purposes related to juvenile crime.

Res. Ch. 150 (SCR 59) Johannessen. Veterans of Foreign Wars Memorial Bridge.

This measure would designate the bridge over the Pit River Arm on Interstate 5 in Shasta County the Veterans of Foreign Wars Memorial Bridge.

The measure would also direct the Department of Transportation to determine the cost of appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

DIGESTS OF RESOLUTIONS ADOPTED IN 1994

1993–94 FIRST EXTRAORDINARY SESSION

RESOLUTION CHAPTERS

Res. Ch. 1 (SCR 1) Roberti. 1993–94 First Extraordinary Session: Joint Rules.

This measure adopts the Joint Rules of the Senate and Assembly for the 1991–92 Regular Session as the Joint Rules, except as specified, for the 1993–94 First Extraordinary Session.

Res. Ch. 2 (AJR 1) Baca. Norton Air Force Base: foreign trade zones.

This measure would memorialize the President, the Congress, and the Foreign Trade Zone Board under the United States Department of Commerce to designate the airport located at Norton Air Force Base in San Bernardino County as a foreign trade zone center.

NOTE: Superior numbers appear as a separate section at the end of the digests.

1994 DIGEST CHAPTERS SUPERIOR NUMBERS

1 I am reducing the General Fund appropriation in Assembly Bill 670 by $3,738,000. This reduction reflects funding already provided in Chapter 102, 1994 for the Secretary of State to cover actual expenses related to printing and mailing the November 1993 special statewide ballot.

With this reduction, I hereby approve Assembly Bill 670.

PETE WILSON, Governor

2 I object to the following appropriations contained in Senate Bill 2120.

Item 0974-001-918—For support of the California Pollution Control Financing Authority, payable from the Small Business Expansion Fund. I delete this item.

The $750,000 augmentation would result in a reduction in the amount of funds that would otherwise be available to provide assistance to small businesses through the Small Business Loan Guarantee Program and the Surety Bond Program. These programs have a proven track record in creating jobs and investment in California.

Item 1760-001-666—For support of the Department of General Services. I am deleting Provision 3.

I am deleting Provision 3 which would require that any balance in the Building Rental Account on June 30, 1994 and on June 30, 1995 be used to complete high-priority deferred maintenance projects, rather than be transferred to the General Fund pursuant to existing provisions of law. Although there may be a backlog of such projects, given the state's current fiscal situation, I am concerned about establishing a precedent of diverting any potential revenues to the General Fund for other purposes.

Item 1760-001-768—For support of the Department of General Services. I delete Provision 1.

I am deleting Provision 1, which specifies that the Department shall limit the use of Earthquake Safety and Public Buildings Rehabilitation Bond Act of 1990 funds to the structural retrofit of seismic deficiencies only. This language is unnecessarily restrictive and is not consistent with the State's plan to retrofit, reconstruct, repair or relocate State buildings depending on which is the most economical option. This language would also preclude making certain types of repairs authorized by the Act and would prohibit the use of funds for building replacement in cases where building replacement is found to be more cost-effective than seismic retrofit.

Item 1880-001-001—For support of State Personnel Board. I revise this item by reducing:

(a) 10-Merit System Administration from $11,565,000 to $11,550,000, and

(e) Reimbursements from −$8,666,000 to −$8,651,000,

and by deleting Provision 2.

I am deleting the $15,000 legislative augmentation to the State Personnel Board's (SPB) reimbursement authority for the production of an Affirmative Action and Annual Census Report. The Legislature authorized SPB to charge departments for the cost of producing the report. However, Chapter 710, Statutes of 1992 (AB 2824), was enacted to reduce the costs to the State of producing reports by deferring various report requirements until 1995. Chapter 710 resulted in deferring the requirement for preparation of the Affirmative Action and Annual Census Report until the 1995-96 fiscal year. Therefore, my veto of this augmentation is consistent with existing law and with the intent and actions of the Legislature in enacting Chapter 710.

I am deleting Provision 2 to conform to this action.

Item 2180-001-067—For support of Department of Corporations. I revise this item by deleting Provision 1.

This language would require the Department of Corporations to submit a plan, by December 1, 1994, to consolidate the Office of Savings and Loan, State Banking Department, and Department of Corporations into a single financial regulatory agency during the 1995–96 fiscal year.

This is a policy decision that should precede any requirement to submit or implement a plan of action. Several legislative proposals to consolidate state financial services have been considered in recent years but not enacted.

Item 2290-401—For support of the administrative costs for operating the Conservation and Liquidation Division of the Department of Insurance. I am revising this item by deleting Provision 2.

I am deleting Provision 2, which would require that beginning with the 1995–96 fiscal year, the Governor's Budget shall include specific information regarding all costs for each conserved estate, including both the administrative and direct costs, attributable to the operation of companies under conservation by the Division. This language hinders the Administration's ability to reflect a level of detail in the budget that is informative, but not overly burdensome. In addition, it is not necessary to include such detailed information in the budget because interested parties can obtain this information on an as-needed basis through the normal information request process. I recognize, however, that some information of this type may be useful and, therefore, I have requested the Director of Finance to included an appropriate level and amount of information on conserved insurance companies in the 1995–96 Governor's Budget.

Item 2640-101-046—For local assistance, Special Transportation Programs. I reduce this item from $68,396,000 to $61,650,000.

I am deleting the $6,746,000 legislative augmentation for the State Transportation Assistance program. This augmentation was made in anticipation of savings in the 1993–94 fiscal year due to postponement of the construction phase of a maintenance station in San Jose and delays in the delivery schedule of the new California rail cars. The Legislature also adopted a reduction I proposed in May to this item which was made necessary by a significant reduction in projected revenues to the Transportation Planning and Development Account. In adopting my recommended reduction, the same savings was applied equally to mitigate the reductions to this program and the Transit Capital Improvement Program funded in Item 2660-101-046. It is, therefore, prudent to eliminate this augmentation to avoid over appropriating the Transportation Planning and Development Account.

Item 2660-001-042—For support of Department of Transportation. I am revising this item by deleting Provisions 5 and 6 of this item.

I am deleting Provision 5, which would restrict the average daily number of vehicles authorized to be taken home by Caltrans employees to 1,939 vehicles because the department is already in the process of auditing and justifying the use of each vehicle and because this Provision may interfere with the department's ability to respond to emergencies and perform essential field work.

I am deleting Provision 6, which would require the department to fund a study, conducted by the Bureau of State Audits, of the department's fleet management practices. The department is already conducting such a review; therefore, this study is unnecessary.

Item 2660-011-042—For transfer by the Controller from the State Highway Account, State Transportation Fund, to the Seismic Safety Retrofit Account, State Transportation Fund. I reduce this item from ($41,500,000) to ($15,500,000).

I am reducing the transfer made by this item for the purposes of funding capital outlay related to seismic retrofit by $26,000,000. The source of funding for this transfer is the result of legislative reductions to the department's support budget. These reductions and other reductions made by the Legislature to the support operations of the department have the cumulative effect of jeopardizing the department's ability to keep funded projects on schedule and adequately maintain the State's existing transportation investment. Furthermore, the reductions in the Department's

support budget could result in a shortage of funds to do the preliminary planning and design of phase II of the seismic retrofit projects. Through my veto action, I am setting aside the $26.0 million for future appropriation to provide the department with the appropriate resources in fiscal year 1994–95 to perform the seismic retrofit design and engineering work and other high- priority work necessary to ensure that transportation project delivery schedules can be met. I am taking conforming action in Item 2660-325-056.

Item 2660-126-042—For local assistance, Department of Transportation. I delete this item and Provision 1.

I am deleting this item and Provision 1, which appropriates $500,000 of State Highway Account funds to finance the preliminary engineering and environmental work for the transportation system necessary to support the conversion of the Mare Island Naval Shipyard to civilian use. I am vetoing this item because it would constitute project-specific budgeting of State Highway Account funds and it is not an appropriate use of State Highway Account funds, since the project is not on the State Highway system. Additionally, the Trade and Commerce Agency's Economic Development Grant and Loan Program has already provided the City of Vallejo with an $80,000 Military Base Reuse Planning Grant, which will be used to match federal dollars to prepare a Mare Island general reuse plan.

Item 2660-325-042—For capital outlay, Department of Transportation. I am revising this item by deleting Provision 6.

I am deleting Provision 6, which would prohibit the use of toll bridge revenues to finance the seismic retrofit of toll bridges until all projects authorized by Regional Measure 1 are completed. I am however committed to ensuring that the Measure 1 projects are completed without delay. Furthermore, I have directed the Department of Transportation in keeping with the intent of the language to not use toll bridge funds for seismic retrofit purposes during fiscal year 1994–95.

Item 2660-325-056—For capital outlay, Department of Transportation. I reduce this item from $41,500,000 to $15,500,000, and delete Provision 1.

I am reducing this item by $26,000,000 to conform to my action on Item 2660-011-042. Additionally, I am deleting Provision 1, which specifies that the funds appropriated in this item shall be allocated by the California Transportation Commission to accelerate the repair, replacement, and retrofitting of the I-280 Freeway because this language would constitute project-specific budgeting for State Highway Account funds. I have been advised by the department that no additional state funds are needed in order to complete the I-280 projects. The inclusion of this provision would prevent the $15.5 million remaining in this item after my veto from being expended on other high-priority seismic retrofit projects.

Item 2740-001-044—For support of Department of Motor Vehicles. I am revising this item by deleting Provision 3.

This language would restrict the use of any of the funds appropriated to the department on any database redevelopment expenditures. I have requested the Director of the Department of Motor Vehicles to contract for a study of all of the department's data processing needs, including any need to redevelop the core database systems. This language unnecessarily restricts the options of both the Legislative and Executive Branch once the evaluation I am proposing has been completed.

Item 2740-005-044—For support of Department of Motor Vehicles. I reduce this item from $3,044,000 to $2,701,000 by reducing:

(a) 11-Vehicle/Vessel Identification and Compliance from $2,148,000 to $1,906,000,
(b) 22-Driver Licensing and Personal Identification from $1,515,000 to $1,345,000,
(c) 25-Driver Safety from $559,000 to $496,000,
(d) 32-Occupational Licensing and Investigative Services from $221,000 to $196,000,
(e) 41.01-Administration from $507,000 to $450,000,
(f) 41.02-Distributed Administration from −$507,000 to −$450,000, and

(g) Amount payable from the Motor Vehicle License Fee Account, Transportation Tax Fund (Item 2740-005-064) from —$1,399,000 to —$1,242,000,

and by deleting Provisions 1, 2, 3, 4 and 5.

I am deleting $343,000 in this item and $157,000 in Item 2740-005-064 and the associated budget control language added by the Legislature for the purpose of contracting for a legislative study of the Department of Motor Vehicle's Database Redevelopment Project and overall data processing needs. This language includes provisions that place the decisions for the design and implementation of a new database system for the department in the hands of an outside contractor with the review and consent only of the Legislature. As such, the language would effectively eliminate Executive Branch participation in the decisions regarding the system design, its costs, and its appropriateness to the department's business plan.

I am deleting this language because it improperly limits and interferes with the authority of the Executive Branch to manage the department and constitutes an infringement on the separation of powers.

An evaluation of the Department of Motor Vehicle's total data processing needs, including an evaluation of the Database Redevelopment Project, should be performed before the state proceeds any further with this project. For that reason, I have requested the Director of the Department of Motor Vehicles to immediately contract with an outside consultant, through the competitive bid process, to perform this evaluation.

Item 2740-005-064—For support of Department of Motor Vehicles. I reduce this item from $1,399,000 to $1,242,000.

I reduce this item by $157,000 to conform to the action I have taken in Item 2740-005-042.

Item 2780-001-683—For support of Stephen P. Teale Data Center. I revise this item by deleting Provision 4.

I am deleting Provision 4, which authorizes the Department of Finance to augment this item by up to $13,300,000 if the Teale Data Center renegotiates its contract with the Department of Motor Vehicles for network services. This action is being taken as a technical adjustment to reflect intended legislative action and the fact this amount was restored to the Teale Data Center budget.

Item 2920-011-001—For support of Trade and Commerce Agency. I revise this item by deleting Provision 1.

I am deleting Provision 1, which would specify that $76,000 transferred to the Small Business Expansion Fund be used to continue funding the San Bernardino Regional Development Corporation, which was established and provided with $76,000 from the General Fund to fund support costs pursuant to Chapter 1273, Statutes of 1993 (AB 579).

This language would provide support funding for a Regional Development Corporation in San Bernardino. Support costs for the Small Business Development Corporations are normally funded from interest that accrues on the individual trust funds used to guarantee loans to businesses. There are insufficient funds available from this source to sustain another office on an ongoing basis, and any redirection of these funds would have the effect of reducing the number of loans that could be guaranteed in the future.

Item 2920-101-001—For local assistance, Trade and Commerce Agency. I reduce this item from $9,947,000 to $7,947,000 by deleting:

(e) For the Northern California Supercomputer Center ($2,000,000),

and by deleting Provision 7.

I am reducing this item by $2,000,000 to delete the augmentation to provide funding for a Northern California Supercomputer Center. This redirection of Strategic Technology Program funds prevents their use as a match for federal funds allocated to the state for defense conversion projects, potentially resulting in a loss of federal funds. The need for a second Supercomputer center has not been demonstrated.

I am deleting Provision 7, which would specify that $100,000 of Strategic Technology Program funds be used for a planning grant for a Bay Area Regional Technology Conversion Coordinating Center. This action is premature. The Bay Area Regional Technology Conversion Coordinating Center has not yet been established. Once established, this center could compete for available funds through the normal application process. Additionally, this would reduce the Administration's flexibility to administer the Strategic Technology Program and would reduce funding available for other high-priority projects.

Item 3540-001-001—For support of Department of Forestry and Fire Protection (CDF). I revise this item by reducing:

(a) 100000-Personal services from $268,944,833 to $268,844,833, and

(e) Amount payable from the California Environmental License Plate Fund (Item 3540-001-140) from −$4,296,000 to −$4,196,000,

and by deleting Provision 5.

This language redirects $1,283,000 saved by a CDF reorganization and intended to be used for critical seasonal fire fighter training, helitak staffing and fire prevention, in order to permanently hire additional seasonal fire fighters. Each year, CDF analyzes conditions regarding the severity of the upcoming fire season. If conditions warrant, one-time-only augmentations of varying amounts are made to CDF's budget. For 1994–95, as in seven of the last eight years, CDF's budget is augmented. The 1994–95 augmentation of $5,008,000 is being made in anticipation of a severe fire season. This will provide approximately 500 additional seasonal fire fighters during the peak 1994 Fire Season.

Consequently, the legislative language provides for duplicate funding, permanently adds additional seasonal fire fighters instead of those staff deemed more critical to fire protection by CDF management, and prevents CDF from implementing its reorganization and most effectively managing its resources. Therefore, I am vetoing this language which infringes upon the Administration's ability to manage fire protection programs in a manner which is in the best interest of the public's safety.

I am revising this item to conform to the actions taken in Item 3540-001-140.

Item 3540-001-140—For support of California Department of Forestry and Fire Protection. I reduce this item from $4,296,000 to $4,196,000.

I am deleting the $100,000 legislative augmentation and one position from the California Environmental License Plate Fund for the Ben Lomond Nursery. The department is preparing to close this state nursery because it is neither cost effective, nor self-supporting, as required by law. Further, other state nurseries have the ability to produce the same coastal forest species as the Ben Lomond Nursery would have produced.

Item 3600-001-200—For support of Department of Fish and Game. I revise this item by deleting Provisions 4, 5, 7 and 8.

I am deleting Provision 4, which requires that funds appropriated in this item be redirected if necessary to operate the Mad River Hatchery at full capacity. The Department of Fish and Game intends to continue to operate the hatchery but at a level which is lower than full capacity. This will provide sufficient returning steelhead to continue an acceptable quality fishery in the Mad River. This provision interferes with the Administration's ability to manage its programs, and restricts my authority to administer a budget which reflects my spending priorities within available resources.

I am deleting Provision 5, which requires that of the funds appropriated by this item, $240,000 for the operation of the "Broadbill" Patrol Boat, should be redirected to other marine enforcement activities on the North Coast. This provision interferes with the ability of the department to manage its programs.

I am deleting Provision 7, which restricts expenditures for legal services to the amount scheduled in the Legal Services Program. This provision constitutes an infringement on the separation of powers provision concerning Executive Branch

authority and interferes with the ability of the department to manage its programs.

I am deleting Provision 8, which requires that of the appropriation to the Department of Fish and Game for external consultant and professional services, $45,000 shall be for the development of a strategic plan. This provision interferes with the ability of the department to manage its programs.

Item 3640-301-262—For capital outlay, Wildlife Conservation Board. I revise this item by deleting Provisions 14 and 15.

I am deleting Provision 14, which requires that $1,600,000 of the funds appropriated in this item be used for the acquisition of wetlands and adjacent uplands in the Grasslands area of Merced County, and Provision 15, which requires that $800,000 of the funds appropriated in this item be used for acquisition of the Tonner and Sandstone Canyons, riparian and wetlands habitat in Napa and Sonoma Counties, and for marsh restoration in Lomita Park. These projects have not been reviewed or evaluated in the context of competing demands for these funds.

Item 3680-301-516—For capital outlay, Department of Boating and Waterways. I reduce this item from $5,087,000 to $2,828,000.

I am reducing this item by $2,259,000, to conform with Legislative intent to provide an overall local assistance and capital outlay program of $22,459,000 and a transfer of $18,260,000 from the Harbors and Watercraft Revolving Fund to the General Fund at the end of the 1994–95 fiscal year.

Item 3680-401—For local assistance, Department of Boating and Waterways. I delete this item.

I am deleting this item, which would waive the existing requirements of the loan agreements between the Department of Boating & Waterways and Sonoma County relating to loans totaling $6,000,000 from the Harbors and Watercraft Revolving Fund for the development of Spud Point Marina. These agreements have been the subject of ongoing, good-faith negotiations between the County and the Department. This legislative proposal would abandon this process and dictate the terms of the agreement, potentially costing the State an estimated $440,000 per year in foregone loan repayments. Approving this item would not only be fiscally irresponsible, but more importantly would establish bad precedent regarding other public marina loans.

Item 3760-001-140—For support of the State Coastal Conservancy. I delete this item.

I am deleting the $65,000 legislative augmentation for a public health study of Lake Earl in Del Norte County. This project has not been reviewed or evaluated in the context of competing needs for Environmental License Plate Funds. In addition, the fund has only a small reserve, and further appropriations would reduce the balance below the level which is prudent.

Item 3760-001-235—For support of the State Coastal Conservancy. I delete this item.

I am deleting the $50,000 legislative augmentation for a study for the restoration, environmental enhancement, and public access alternatives along the Napa River. This project has not been reviewed or evaluated in the context of competing needs for Public Resources Account funds.

Item 3790-101-140—For Local Assistance, Department of Parks and Recreation. I delete this item.

I am deleting the $35,000 legislative augmentation for a local assistance grant to the City of Riverbank. It is necessary to delete this item to ensure the financing of other high-priority appropriations from the Environmental License Plate Fund, while still maintaining a prudent reserve in the fund. In addition, projects should be submitted for consideration during the normal budget development process, so they may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-101-235—For local assistance, Department of Parks and Recreation. I delete this item.

I am deleting the $603,000 legislative augmentation for several local assistance grants. It is necessary to delete this item to ensure the financing of other high-priority

appropriations from the Public Resources Account, Cigarette and Tobacco Products Surtax Fund while still maintaining a prudent reserve in the fund. In addition, these projects should be submitted for consideration during the normal budget development process, so they may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-101-262—For local assistance, Department of Parks and Recreation. I revise this item by deleting Provisions 3 and 4.

Schedule (1) provides $2,000,000 for local grants payable from the Habitat Conservation Fund. Provision 3 specifies that $286,000 shall be granted to the County of Monterey to acquire property adjacent to Pfeiffer-Big Sur State Historic Park. This acquisition would be the sole property of Monterey County. Provision 4 specifies that $150,000 shall be spent for the acquisition of properties at Mt. Baldy, adjacent to the County of Marin, Municipal Water District. I am deleting both provisions, as these projects should be submitted for consideration during the normal budget development process so they may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-101-721—For local assistance, Department of Parks and Recreation. I delete this item.

I am deleting the $422,000 legislative augmentation for several local assistance grants. These projects should be submitted for consideration during the normal budget development process, so they may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-101-722—For local assistance, Department of Parks and Recreation. I delete this item.

I am deleting the $21,000 legislative augmentation for a local assistance grant to the City of Riverbank. This project should be submitted for consideration during the normal budget development process, so it may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-101-733—For local assistance, Department of Parks and Recreation. I reduce this item from $986,000 to $985,000.

I am deleting the $1,000 legislative augmentation for a local assistance grant to the City of Riverbank. This project should be submitted for consideration during the normal budget development process, so it may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-301-140—For Capital Outlay, Department of Parks and Recreation. I reduce this item from $346,000 to $246,000 by deleting:

(3) 90.JH.400-Anderson Marsh SHP: Acquisition ($100,000).

I am deleting the $100,000 legislative augmentation for the acquisition of additional property for Anderson Marsh State Historic Park. This deletion is necessary to ensure the financing of other high-priority appropriations from the Environmental License Plate Fund, while still maintaining a prudent reserve in the fund. In addition, projects should be submitted for consideration during the normal budget development process, so they may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-301-235—For capital outlay, Department of Parks and Recreation. I delete this item.

I am deleting the $295,000 legislative augmentation for this project. This deletion is necessary to ensure the financing of other high-priority appropriations from the Public Resources Account, Cigarette and Tobacco Products Surtax Fund, while still maintaining a prudent reserve in the fund. In addition, this project should be submitted for consideration during the normal budget development process, so it may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-301-262—For capital outlay, Department of Parks and Recreation. I delete Provision 4.

Schedule (a) provides $1,000,000 from the Habitat Conservation Fund. Provision 4 specifies that $100,000 shall spent for acquisition of properties adjacent to and to be added to Anderson Marsh State Historic Park. I am deleting Provision 4. This project should be submitted for consideration during the normal budget development process, so it may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-301-786—For capital outlay, Department of Parks and Recreation. I reduce this item from $6,402,000 to $6,354,000 by deleting:

(15) 90.AN.610-Empire Mine SHP: Mine Shaft Adit—Working Drawings ($96,000), and

(16) Reimbursements (−$48,000).

This project should be submitted for consideration during the normal budget development process, so it may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3790-492-—For reappropriation, Department of Parks and Recreation. I delete this item.

I am deleting this legislative augmentation, which reappropriates $10,000 from Item 3790-101-722(a) (42), Budget Act of 1986, County of Sierra, RV Disposal Station, to be used for the development of a community park in Downieville. This project should be submitted for consideration during the normal budget development process, so it may be reviewed and evaluated in the context of competing needs for available fund sources.

Item 3810-301-262—For capital outlay and grants, Santa Monica Mountains Conservancy. I am revising this item by deleting Provisions 1, 2, 3 and 4.

I am deleting Provision 1, which dedicates $3,700,000 in grants for two projects: $1,700,000 for a University of California Natural Reserve System project and $2,000,000 for a Whittier/Puente Hills Conservation Authority project, and specifies that if any reduction is made to the former project, an identical reduction must be made to the latter project.

I am deleting Provision 3, which specifies that $1,700,000 be used by the Conservancy for the acquisition and minor improvements of a site suitable for conservation and research on valley-blue oak savanna and coastal sage habitat by the University of California Natural Reserve System.

I am deleting Provision 4, which specifies that $2,000,000 be granted by the conservancy to the Whittier/Puente Hills Conservation Authority for acquisition of oak savanna and riparian habitat near the Chino Hills State Park.

The Conservancy was established to acquire open space in the Santa Monica Mountains for conservation and public access purposes. The limitation in Provision 1 is an infringement upon my constitutional authority as a violation of the separation of powers. Provisions 1, 3, and 4 collectively constitute a change in existing law by requiring purchases of land outside of the Santa Monica Mountains Zone as defined by Public Resources Code Section 33105. Furthermore, these provisions would unduly restrict the Conservancy's ability to administer its land acquisition program in a manner which reflects its spending priorities within available resources, and its ability to manage those resources effectively because these provisions would require the purchase of specifically identified properties.

I am deleting Provision 2, which requires the Director of the Conservancy to transfer the Stunt Ranch property to the Regents of the University of California. In addition, this provision requires the Executive Director to offer the Red Rock Canyon property to the Regents for use by the University of California Natural Reserve System for conservation, scientific, and educational purposes in exchange for a mutually agreed upon portion of the Stunt Ranch to include the Kay Spensely Nature Center.

This provision constitutes a change in existing law through the Budget Bill. Public Resources Code Section 33205.5 gives specific direction for the Conservancy's acquisition and disposition of the Stunt Ranch property. This provision would constitute a

substantive change to this statute by revising its specific intent and direction. Any changes to this statute should be pursued through the normal legislative process.

Item 3930-001-001—For support of Department of Pesticide Regulation. I revise this item by reducing:

(b) 17-Enforcement, Environmental Monitoring and Data Management from $23,549,000 to $23,249,000, and

(g) Amount payable from the Environmental License Plate Fund (Item 3930-001-140) from −$839,000 to −$539,000.

I am revising this item to conform to the action taken on Item 3930-001-140.

Item 3930-001-140—For support of Department of Pesticide Regulation. I reduce this item from $839,000 to $539,000.

I am deleting the $300,000 legislative augmentation for a sustainable agricultural research contract with the University of California. I question the appropriateness of using the Environmental License Plate Fund for the contract, as this augmentation would reduce the Fund's small reserve to less than a prudent level.

Item 3960-001-014—For support of Department of Toxic Substances Control. I delete Provisions 4, 5, 6, 7, and 8.

Provisions 4, 5, 6, and 7 earmark funds for the conversion of interim status hazardous waste treatment or disposal facilities to permitted facilities, and specify completion and reporting dates for permit determinations. These provisions would put the department in a position of having to redirect funds from other high-priority workload to interim status workload, which would reduce the department's ability to manage resources effectively.

I am also deleting Provision 8, which restricts the use of State funds appropriated to the Hazardous Waste Management Program unless the department establishes a CEQA function. The department has established a CEQA unit in the legal office; therefore, the purpose of the CEQA language has already been accomplished.

Item 4260-001-001—For support of the Department of Health Services. I reduce this item from $155,545,000 to $155,393,000 by reducing:

(1) 10-Public and Environmental Health from $169,107,000 to $168,955,000.

I am deleting the $152,000 legislative augmentation intended to reinstate a dental consultant position. This position was reduced under the Department of Health Services' 1993–94 General Fund reduction plan, and the services provided by the consultant have been absorbed within remaining resources. Therefore, additional General Fund resources are not necessary.

Item 4260-101-001—For local assistance, Department of Health Services. I reduce this item from $5,959,747,000 to $5,959,201,000 by reducing:

(a) 20.10.030-Benefits (Medical Care and Services) from $14,155,521,000 to $14,153,589,000, and

(f) Amount payable from the Federal Trust Fund (Item 4260-101-890) −$9,390,896,000 to −$9,389,510,000,

and by deleting Provision 16.

I am deleting the $105,000 legislative augmentation to increase the Medi-Cal reimbursement rate for Norplant insertions and taking a corresponding action in Item 4260-101-890. I believe that this augmentation is unnecessary. Use of Norplant by Medi-Cal beneficiaries is a matter of choice, and there is no evidence that the current reimbursement rate is a barrier to its use.

I am deleting the $441,000 legislative augmentation for health benefits for Department of Developmental Services contracted janitorial employees. This action conforms to my actions in Item 4260-101-890 and Item 4300-003-001.

I am deleting Provision 16, which would require the California Medical Assistance Commission (CMAC) to monitor the Geographic Managed Care (GMC) program for adequacy of quality of care and access to providers, and to report its conclusions. It further would require the Department of Health Services to permit "free choice of provider" to beneficiaries enrolled in the GMC program if CMAC found quality and access were not adequate.

I am taking this action because this language is unnecessary. The California Medical Assistance Commission and the Department of Health Services have been and will continue to be collaborators and partners in the implementation of the Geographic Managed Care Project in Sacramento County.

DHS and CMAC share GMC's goal of improved quality of care and access. Assessment of quality of care and access are two of the most important aspects of DHS's oversight responsibilities. DHS will continue to have full authority to take action to resolve any contractor deficiencies in these and other areas, including contract cancellation if warranted. It is also important to note that Medi-Cal enrollees are not prohibited from changing health plans if they so desire.

Item 4260-101-890—For local assistance, Department of Health Services. I reduce this item from $9,390,896,000 to $9,389,510,000.

I am reducing this item by $1,386,000 to conform to the action I have taken in Item 4260-101-001.

Item 4260-111-001—For local assistance, Department of Health Services. I revise this item by reducing:

(g) 20.40-Primary Care and Family Health from $789,841,000 to $789,791,000, and

(m) Amount payable from the Federal Trust Fund (Item 426-111-890) from −$526,988,000 to −$526,938,000.

I am deleting the $50,000 legislative augmentation of federal Maternal and Child Health (MCH) funds to establish a new Pediatric Resident Training Project in Mendocino County. While there is a need for more primary care providers, the University of California has primary responsibility for physician training and residency programs and funding for this purpose should be considered through the University. Also, the accompanying language is for a specific county and it is inappropriate to set aside funds for this purpose without assessing the pediatric residency needs of other rural communities.

I am deleting Provision 2 in Item 4260-111-890 to conform to this action.

Item 4260-111-890—For local assistance, Department of Health Services. I reduce this item from $526,988,000 to $526,938,000 and delete Provision 2.

I am reducing this item by $50,000 and deleting Provision 2 to conform to action taken in Item 4260-111-001.

Item 4300-003-001—For support of Department of Developmental Services, for Developmental Centers. I reduce this item from $17,245,000 to $17,177,000 by reducing:

(a) 20-Developmental Centers Program from $563,162,000 to $562,212,000, and

(b) Reimbursements from -$544,349,000 to -$543,467,000.

I am deleting the $950,000 legislative augmentation ($68,000 General Fund and $882,000 reimbursements) which was intended to fund health benefits for janitorial staff at the Developmental Centers. The Developmental Centers have contracted for janitorial staff since January 1987. The contracts for these services have been awarded in accordance with existing State contract guidelines and policies which place responsibility for the provision of health benefits with the contractor. In view of these facts, and the ongoing fiscal crisis facing the State, I cannot approve this augmentation.

I also have taken conforming action in Items 4260-101-001 and 4260-101-890.

Item 5160-101-001—For local assistance, Department of Rehabilitation. I delete Provision 4.

I am deleting Provision 4, which would require the Department to use funds appropriated in this item to explore options to provide relief to work activity program providers from the rate reductions imposed by the Budget Act of 1992. I am aware of the financial pressures which providers in many programs are facing. Under such circumstances, I expect both state departments and the providers to investigate all possible options for achieving program efficiencies. In light of this, specific language requiring the Department of Rehabilitation to spend local assistance funds for this purpose is unnecessary.

Item 5180-001-001—For support of the Department of Social Services (DSS). I delete Provision 6.

I am deleting Provision 6 because it requires the department to obtain legislative approval to implement the Greater Avenues for Independence (GAIN) performance demonstration project.

This provision conflicts with existing law, which authorizes the department to conduct and administer experimental projects and to waive the enforcement of specific statutory requirements, regulations, and standards in one or more counties, or statewide in order to test methods and procedures of administering assistance and services to recipients and applicants for public social services.

Adding this provision represents an infringement of the department's existing statutory authority, and would limit the authority necessary to test a more efficient program model.

I am deleting Provision 10 of Item 5180-151-001 to conform to this action.

Item 5180-002-001—For support of the Department of Social Services (DSS). I delete Provision 3.

I am deleting Provision 3, which would prohibit the Department of Social Services from creating a specialized unit within the Administrative Adjudications Division to conduct hearings on intentional program violations. This prohibition interferes with the Administration's ability to manage its programs, and would delay implementation of this program resulting in lost savings to the General Fund.

A specialized unit would have the expertise to conduct hearings on intentional program violations expeditiously and with the expertise that will assure fairness to both taxpayers and recipients, thereby minimizing the cost of unnecessary appeals. Precluding an organization based on specialization would require all personnel in the Administrative Adjudications Division to be trained at additional cost, as well as requiring more time to complete the training. This would delay the implementation of sanctions for intentional program violations, thereby reducing the savings to the General Fund.

Item 5180-151-001—For local assistance, Department of Social Services. I delete Provision 10.

I am deleting Provision 10 to conform to my action in Item 5180-001-001.

Item 5430-001-001—For support of Board of Corrections. I reduce this item from $784,000 to $409,000 by reducing:

(a) 11-Corrections Standards and Services from $2,416,000 to $2,041,000.

The Legislature augmented this item to provide funding for the Board of Corrections to (1) develop a system for data collection and information exchange and for the dissemination of statewide data on probation workloads, programs, and outcomes, and (2) inspect local juvenile detention facilities and review, assess, and adopt standards for local juvenile detention facilities.

While the proposed probation data system may have merit, the system's success and effectiveness would be dependent upon the level of county participation and resources available for the development of innovative programs identified by the system. With respect to the inspections of the local juvenile detention facilities, we have not received any information which indicates that the existing self-certification is not working or causing the counties to lose any federal funds.

I am reducing this item by $375,000 due to limited State resources in the General Fund.

Item 5460-001-001—For support of the Department of Youth Authority. I am revising this item by deleting Provisions 2 and 3.

In order to correct a technical error in the Budget Bill, I am deleting Provisions 2 and 3, which would specify how savings attributable to the transfer of "M" cases to the Department of Corrections are to expended, and specify that funding appropriated to any department for delinquency prevention and intervention programs shall be expended through a memorandum of understanding with the Department of Youth Authority, respectively. These provisions were inadvertently left in the final

version of the Budget Bill. A transfer of "M" cases from the Youth Authority was considered by the Legislature and rejected. Therefore, Provision 2 is not needed. Provision 3 was also considered by the Legislature and rejected. This technical veto will conform the Budget Act to the action taken by the Legislature.

Item 5460-101-890—For local assistance, Department of the Youth Authority. I am deleting this item to make a technical correction to the Budget Bill. This technical veto will conform with the Legislature's intent, and is consistent with the legislative action taken in Item 5460-101-001, which removed federal funds payable to that item as part of the restoration of the funding for the Office of Criminal Justice Planning.

Item 6110-001-001—For support of Department of Education. I reduce this item from $28,895,000 to $26,695,000 by reducing:

(b) 20-Instructional Support from $34,466,366 to $32,266,366,

and by revising Provisions 1 and 13.

I am revising Provision 1 to delete the specification that no funds shall be made available to the State Board of Education if any Department of Education positions are transferred to the Board, other than those positions that were assigned to the Board in 1992-93. This language could prevent such position transfers which may be mutually desired by the Board and the Department and, in addition, could inappropriately prevent the Board from performing its constitutionally mandated activities.

"1. Of the funds appropriated in this item, an amount of not less than $94,000 shall be available only for reimbursement of in-state travel expenses of the State Board of Education. ~~No positions assigned to the State Department of Education, other than those positions that were assigned to the State Board of Education for the 1992-93 fiscal year, shall be administratively transferred, redirected, or otherwise assigned to the State Board of Education.~~"

In addition, I am reducing support for the pupil testing program by $2,200,000 and 14.5 personnel years with the intention that these funds be set aside for legislation. While I am supportive of a statewide testing program, it is imperative that the current program be reformed through legislation before any further commitment of the State's limited resources.

I am revising Provision 13 to conform to this action:

"13. Of the funds appropriated in this item ~~$3,193,000~~ *$993,000* is for the purposes of a pupil testing program."

Item 6110-113-001—For local assistance, Department of Education (Proposition 98), Program 20.70—for purposes of a pupil testing program. I reduce this item from $30,504,000 to $6,304,000.

I am reducing this item by $24,200,000 with the intention that these funds be set aside for legislation. The funds remaining in the item are for testing programs other than the California Learning Assessments System (CLAS), renamed in the Budget Bill to California Comprehensive Testing Program (CCTP). While I am supportive of a statewide testing program, I intend to work with the Legislature during the balance of the legislative session to develop the appropriate reforms. It is imperative that the current program be reformed.

I am revising Provision 2 to conform to this reduction.

"2. The superintendent of Public Instruction shall allocate the 1994-95 budget increase of ~~$8,000,000~~ $2,142,000 to augment pupil testing programs in accordance with the allocation plan shown below. To revise any allocations, the Superintendent of Public Instruction shall first receive the approval of the Department of Finance. Approval of the Department of Finance may not be effective sooner than 30 days after notification to the Chair of the Joint Legislative Budget Committee.

a. $1,142,000 for the Golden State Examination Program pursuant to Section 60701.

b. $500,000 for development of end-of-course examinations in vocational education pursuant to Sections 60602.5 (a) (4) and 60604.8.

c. $500,000 for review and approval of other pupil tests pursuant to Section 60602.5(d).

~~d. $5,458,000 for expansion in the 1994-95 fiscal year of the statewide California Comprehensive Testing Program (CCTP), pursuant to the 1994-95 expenditure plan in the document "CCTP—Long-term Implementation," to include valid, reliable individual pupil scores in reading, writing, and mathematics in grades 4 and 8; valid reliable school-level scores in history/social sciences and science in grade 5, and in reading, writing, and mathematics in grade 10; and field testing in history/social sciences and science in grades 8 and 10.~~

~~e. $400,000 for continued development of CCTP Spanish language exams.~~

Item 6110-123-001—For local assistance, Department of Education (Proposition 98). I delete this item and Provision 1.

I am deleting the legislative augmentation for the Focus Schools Program of $500,000, which would have provided local assistance grants to schools having been identified as "low performing". While I am supportive of this program, it is my understanding that the criteria for identifying low-performing schools has not yet been perfected. This augmentation, therefore, is premature.

It is my understanding that the Department of Education would still be able to continue piloting procedures through the federal Chapter I Program Improvement Initiative, which provides intensive coaching and support to over 40 low-performing Chapter 1 schools.

I am deleting Provision 1 to conform to this action.

Item 6110-196-890—For local assistance, Department of Education. I delete Provision 4.

Provision 4 of this item would require that a particular child care center be awarded a specified amount of funds by the Department of Education. This provision constitutes an item of appropriation which I cannot support. State law and regulations and the State Plan for Administration of the Federal Child Care and Development Block Grant create a process for child care agencies to apply for and receive contracts from the Department of Education to provide child care services to low-income families. Circumventing this process by appropriating funds for a specific child care provider is not consistent with current law.

Item 6110-230-001—For local assistance, Department of Education (Proposition 98). I delete Provision 17.

Provision 17 would require the Department of Education to renew the contract of a particular child care agency, the Foundation Center for Phenomenological Research, for the provision of child care services during the 1994-95 fiscal year.

Current state law authorizes the Department of Education to grant or renew contracts and Title V of the California Code of Regulations specifies procedures for the department to decline renewal of a contract. This provision would circumvent current law and regulations by requiring funding for a particular child care provider.

The circumstances surrounding the non-renewal of this contract are currently being disputed in court, which is the remedy provided in the Constitution for disagreements regarding the administration of laws. Therefore, the courts should decide this matter based on an objective analysis of the facts and the law.

Until such time as the court resolves this issue, the Department of Education has the authority and obligation to administer the Child Care and Development program in a manner which insures the fiscal integrity of that program. The language contained in Provision 17 could preclude the department from achieving this purpose, and may result in additional costs to the State.

For all the above reasons, I am deleting Provision 17.

Item 6110-490—Reappropriation, Department of Education. I delete Provision 2.

I am deleting this provision, which would reappropriate funds for the California Learning Assessments System (CLAS), renamed in the Budget Bill to California Comprehensive Testing Program (CCTP), with the intention that these funds be set

aside for legislation. While I am supportive of a statewide testing system, it is imperative that the current program be reformed. I intend to work with the Legislature during the remainder of the session to develop the appropriate reforms.

Item 6420-001-001—For support of the California Postsecondary Education Commission. I reduce this item from $3,512,000 to $2,412,000 by reducing:

(a) 100000-Personal Services from $2,609,000 to $2,362,000, and

(b) 300000-Operating Expenses and Equipment from $1,648,000 to $795,000,

and by deleting Provision 1.

I am deleting the $1,100,000 legislative augmentation and 4.6 personnel years for a Comprehensive Student Information System. The benefits of this system have not been demonstrated to justify its cost, and unresolved technical matters make its success problematic. This project is not of sufficiently high priority to justify the use of limited state resources.

I am deleting Provision 1, which would make this augmentation contingent upon enactment of Assembly Bill 3696, to conform to this action.

Item 6440-001-001—For support of the University of California. I delete Provision 9.

I am deleting Provision 9, which would allow the upward adjustment of budgeted amounts if actual enrollments exceed the targeted enrollment level by more than 2 percent, and would require the downward adjustment of budgeted amounts if actual enrollments fall short of the targeted enrollment level by more than 2 percent. Any adjustment to the funding level for the University of California should be addressed through additional legislative action when compared to other essential financial needs.

Item 6600-001-001—For support of Hastings College of the Law. I reduce this item from $11,854,000 to $11,804,000 and delete Provision 3.

I am deleting the $50,000 legislative augmentation for the Public Interest Career Assistance Program. Given the current fiscal situation, I am unable to support this augmentation.

I am deleting Provision 3 to conform to this action.

Item 6610-001-001—For support of the California State University. I reduce this item from $1,508,902,000 to $1,508,652,000 by reducing:

(a) Support from $2,139,222,000 to $2,138,972,000,

and by deleting Provision 10.

I am deleting the $250,000 legislative augmentation and 3.0 personnel years for the Edward R. Roybal Institute for Applied Gerontology. This project is not of sufficiently high priority to justify the use of limited State resources.

I am deleting Provision 10, which would allow the upward adjustment of budgeted amounts if actual enrollments exceed the targeted enrollment level by more than 2 percent, and would require the downward adjustment of budgeted amounts if actual enrollments fall short of the targeted enrollment level by more than 2 percent. Any adjustment to the funding level for the California State University should be addressed through additional legislative action when compared to other essential financial needs.

Item 6870-001-001—For support of Board of Governors of the California Community Colleges. I reduce this item from $8,252,000 to $8,251,000 by reducing:

(b) 20-Special Services and Operations from $11,289,000 to $11,288,000,

and by deleting Provision 2.

I am reducing this item by $1,000 and deleting Provision 2, which authorizes the redirection of up to $125,000 from the Board of Governors of California Community Colleges' support budget to fund planning for participation by the State under the Federal Reemployment Act, including planning for the development of one-stop career centers. While one-stop career centers may ultimately have merit in the context of the state's workforce training and employment service programs, it would be premature to budget funds for this new program because neither State nor Federal legislation has yet been enacted and, in its current form, the Federal legis-

lation contains provisions detrimental to the State of California.

I am reducing $1,000 from this item to reflect savings that will be achieved based on deletion of Provision 2.

Item 6870-002-001—For support of Board of Governors of the California Community Colleges. I delete Provision 1.

I am deleting this provision because it restricts the Executive Branch's ability to administer and oversee a multitude of programs within available resources, and potentially restricts expenditures toward those purposes on the basis of subjective determinations by a third party. While I am also concerned with adequate oversight of categorical program expenditures, I am concerned that the Chancellor should retain flexibility to determine how to best manage programs and conduct oversight activities in the most cost-effective manner.

Item 6870-101-001—For local assistance, Board of Governors of the California Community Colleges (Proposition 98). I am reducing this item from $1,085,300,000 to $1,085,299,000 by reducing:

(b) 10.10.020-Basic Skills, GAIN, Apprenticeship from $33,999,000 to $33,998,000, and by deleting Provision 18.

I am reducing this item by $1,000 and deleting Provision 18, which authorizes the redirection of up to $125,000 from the Board of Governors of California Community Colleges' local assistance budget to fund planning for participation by the State under the Federal Reemployment Act, including planning for the development of one-stop career centers. While one-stop career centers may ultimately have merit in context of the state's workforce training and employment service programs, it would be premature to budget funds for this new program because neither State nor Federal legislation has yet been enacted and, in its current form, the Federal legislation contains provisions detrimental to the State of California.

I am reducing $1,000 from this item to reflect savings that will be achieved based on deletion of Provision 18.

I am revising Provision 2.5 to conform to this action.

"2.5 Notwithstanding any other provision of law, ~~$22,000,000~~ *$21,999,000* of the funds appropriated in Schedule (b) shall be for allocation to community college districts in the 1994–95 fiscal year for the purposes of funding FTES in courses in basic skills, including English-as-a-second-language courses and workforce preparation courses for newly legalized immigrants, to the extent the total FTES claimed by a district for the 1994–95 fiscal year exceeds the level of total FTES funded for that district in the 1994–95 fiscal year. The Chancellor of the California Community Colleges shall develop criteria for allocating these funds."

Item 6870-301-660—For capital outlay, Board of Governors of the California Community Colleges. I reduce this item from $14,921,000 to $14,324,000 by reducing:

Los Angeles Community College District

East Los Angeles College

(3) 40.26.101-Vocational Building—Equipment from $910,000 to $313,000.

I am reducing this legislative augmentation of $597,000 because it represents funding for equipment above established cost standards. The state policy is to fund equipment only up to the established standards.

Item 6870-301-842—For capital outlay, Board of Governors of the California Community Colleges. I reduce this item from $186,878,000 to $180,322,000 by reducing:

Chabot-Las Positas Community College District

Chabot College

(10) 40.62.104-Humanities Building Remodel—Equipment from $2,351,000 to $351,000,

(11) 40.62.107-Engineering Remodel/Addition—Equipment from $1,904,000 to $331,000,

(13) 40.62.110-Music Skills Center—Equipment from $318,000 to $163,000,

Las Positas College
(16) 40.62.205-Science Center, Phase I—Equipment from $1,632,000 to $938,000,
El Camino Community College District
El Camino College
(22) 40.14.106-Library Renovation, Phase II—Preliminary plans, working drawings, and construction from $2,528,000 to $1,978,000, and
Sierra Joint Community College District
Sierra College
(89) 40.58.103-Home Economics Remodel/Addition—Equipment from $128,000 to $50,000,
and by deleting:
Palomar Community College District
Palomar College
(57.1) 40.38.108-Communications Facility Remodel—Equipment ($916,000), and West Valley-Mission Community College District
Mission College
(102.1) 40.69.205-Learning Resource Center—Preliminary plans and working drawings ($590,000).

I am deleting these nine legislative augmentations in the amount of $6,556,000 because they circumvent the established procedures for prioritizing the California Community College's capital outlay projects and the standard level of funding for projects.

In order to develop and maintain a rational approach to a capital outlay program, all projects should be considered in relationship to competing needs for available resources. The circumvention of the established prioritization process undermines this approach. In addition, it is the state's policy to fund equipment only up to the established standards. It is also the state's policy, as stated in my message in the 1993 Budget Act, that costs for replacement equipment are a support cost rather than a capital outlay cost. Further, the state's policy continues to be that funding for replacement equipment for space remodeled for the same program should be provided by the support budgets of the institution, rather than through the capital outlay budget.

Item 7980-001-001—For support of the Student Aid Commission. I reduce this item from $3,343,000 to $3,218,000 by reducing:

(a) 15-Financial Aid Grants Program from $3,404,000 to $3,279,000.

I am deleting the $125,000 legislative augmentation for the Student Expenses and Resources Survey. I believe that the higher education segments, which all benefit from this survey, should agree to contribute the necessary funding.

Item 8300-001-001—For support of Agricultural Labor Relations Board. I reduce this item from $4,301,000 to $4,300,000 by reducting:

(b) 20-General Counsel Administration from $2,609,000 to $2,608,000,

and by deleting Provisions 1, 2 and 3.

I am deleting Provision 1, which would have redirected $879,000 appropriated in this item to address the existing and new workload anticipated in the General Counsel's Administration. This provision would restrict the flexibility of the Board to effectively and most efficiently administer the funding appropriated to the Agricultural Labor Relations Board. This proposal would require the redirection of two existing positions and $179,000 from the Board Administration to the General Counsel Administration, as well as significant restructuring of the General Counsel's resources to establish additional new positions, including a new field office (location unspecified), and a new field office unit that is able to be deployed to existing and new workload on a priority basis. Information has not been provided to substantiate the anticipated workload increase.

With respect to this issue, however, it is my intention to propose pursuant to the provisions of Section 6.50 of the Budget Act of 1994, the reestablishment of the Board Administration's two positions and the $179,000 which were redirected to the General Counsel's Administration.

I am also deleting Provisions 2 and 3 because the language is unnecessary. Provision 2 requires the Agricultural Labor Relations Board to advertise and conduct examinations to establish a qualified pool of candidates to fill its field examiner and field counsel positions, which the Board would do during the normal course of business. Provision 3 prohibits the Agricultural Labor Relations Board from approving regulations which are contrary to statutory policy, as set forth in Section 1140.2 of the Labor Code, with regard to agricultural workers and their rights. The Agricultural Labor Relations Board already complies with existing statutes to approve, amend and rescind rules and regulations in order to carry out the state's policy. Therefore, this language is unnecessary.

I am reducing this item by $1,000 to reflect savings that will be achieved based on vetoing language contained in Provisions 1, 2 and 3 of this item.

Item 8940-001-001—For support of Military Department. I reduce this item from $18,961,000 to $18,609,000 by deleting:

(j) 71-California Innovative Military Projects and Career Training ($352,000),

and by deleting Provision 3.

I am deleting the $352,000 General Fund and 2.7 personnel years which was redirected from existing funds by the Legislature to fund the existing Innovative Military Projects and Career Training (IMPACT) Program in Oakland. Federal funds have become available to the California National Guard to operate a number of youth-oriented programs, one of which will be conducted in the Oakland area.

I am deleting Provision 3 to conform to this action.

Item 9800-001-001—For Augmentation for Employee Compensation. I revise this item by making technical revisions to Provision 2.

I am revising Provision 2 to delete erroneous language references, and to clarify that this item provides funds for compensation increases for 14 specified public safety, twenty-four-hour care, and revenue-producing agencies only.

2. The funds appropriated in this item are for compensation increases and increases in benefits related thereto, to be allocated by executive order by the Department of Finance to specified public safety, twenty-four hour care and revenue producing agencies as determined by the Department of Finance, in augmentation of their respective appropriations or allocations for support or for other purposes, in such amounts as will make sufficient money available for each state officer or employee in the state service, whose compensation, or portion thereof, is chargeable to the General Fund, ~~and each officer or employee of either house of the Legislature or joint committee thereof,~~ to receive any such increases provided on or after July 1, 1994, by the Department of Personnel Administration~~, or any committee of the Legislature responsible for establishing salaries for officers and employees of the Legislature, as the case may be~~.

SEC. 8.50—Related to the reporting of reduction of federal funds. I delete provisions (b) and (c) of this Control Section.

I am deleting these provisions because it is unreasonable to expect State agencies to increase their reporting requirements when budget reductions severely impact their ability to meet their statutory requirements. Section 28.00 of the Budget Act already requires the reporting of federal fund shortfalls to the Legislature. Further, the Governor's Budget, May Revision, Section 27.00 Letters, and Finance Letters can provide the Legislature with updates on significant changes to federal funding.

SEC. 9.10—Supplemental Report of the Committee on Conference on the Budget Bill. I delete this Control Section.

I am deleting this section because to do otherwise would imply that I concur with the contents of this report. It is unreasonable to expect State agencies to respond to special requests during a year when budget reductions severely impact their ability to perform required statutory duties.

SEC. 11.50—Transfers pursuant to Section 6217 of the Public Resources Code. I am revising Section 11.50 by reducing the amount of Tidelands Oil Revenue to be allocated to the General Fund from $61,154,000 to $58,414,000, as follows:

"(d) Notwithstanding any other provision of law, the sum of up to ~~thirty-nine million dollars ($39,000,000)~~ *thirty-seven million five hundred fifty-nine thousand dollars ($37,559,000)* shall be allocated to the General Fund for the 1994–95 fiscal year from tidelands oil revenue otherwise subject to Section 6217 of the Public Resources Code."

"(e) Section 11.50(d), Budget Act of 1993, is amended to read as follows: "(d) Notwithstanding any other provision of law, the sum of ~~twenty-two million one hundred fifty four thousand dollars ($22,154,000)~~ *Twenty million eight hundred fifty-five thousand dollars ($20,855,000)* shall be allocated to the General Fund for the 1993–94 fiscal year from tidelands oil revenue otherwise subject to Section 6217 of the Public Resources Code."

This reduction will provide for a prudent reserve to meet any unanticipated cost increases for capital outlay projects funded from this fund source, and will eliminate the need to provide General Fund monies for this purpose.

SEC. 12.32—Proposition 98 Guarantee. I am revising subsection (b) of Section 12.32 to correspond to the calculated Proposition 98 guarantee level.

(b) Pursuant to the Proposition 98 funding requirements established in Chapter 2 (commencing with Section 41200) of Part 24 of the Education Code, the total appropriations for Proposition 98 for the 1994–95 fiscal year are ~~$14,383,369,000~~ *fourteen billion three hundred sixty-five million five hundred seven thousand dollars ($14,365,507,000)*, or ~~35.630~~ *35.587* percent of total General Fund revenues and transfers subject to the state appropriations limit. General Fund revenues set aside for school districts are ~~$13,176,915,000~~ *thirteen billion one hundred seventy-seven million five hundred sixty-five thousand dollars ($13,177,565,000)*, or ~~32.641~~ *32.645* percent of total General Fund revenues and transfers subject to the state appropriations limit. General Fund revenues set aside for California Community Colleges are ~~$1,124,314,000~~ *one billion one hundred four million one hundred thirty-two thousand dollars ($1,104,132,000)*, or ~~2.785~~ *2.735* percent of total General Fund revenues and transfers subject to the state appropriations limit. General Fund revenues set aside for other state agencies which provide direct elementary and secondary level education, as defined in Section 41302.5 of the Education Code, are ~~$82,140,000~~ *eighty-three million eight hundred ten thousand dollars ($83,810,000)*, or ~~0.204~~ *.208* percent of total General Fund revenues and transfers subject to the state appropriations limit.

SEC. 31.50—Related to the elimination of General Fund positions vacant from July 1, 1993 to March 15, 1994. I delete this Control Section.

I am deleting this section, as there could be legal consequences if a department made a hiring commitment or filled one of the vacant positions subsequent to March 15, 1994. Further, existing statute already provides for elimination of positions which are continuously vacant for the last nine months of a fiscal year.

With the above deletions, revisions and reductions, I hereby approve Senate Bill 2120.

PETE WILSON, Governor

3 I am deleting the $50,000 appropriation from the General Fund contained in Senate Bill 1993.

This bill requires the State Librarian to establish and administer the Reading Initiative Program. As part of the program the State Librarian must compile a list of recommended books for pupils in K–12 and develop a program of rewards and related recognition activities for pupils who participate and succeed in the program. The program's purpose is to promote recreational reading by children.

Because of the fiscal condition of the State and limited state resources, funding for the program should be limited to the use of private donations and to the extent possible, accommodated within existing resources. For these reasons, I am deleting the proposed $50,000 appropriation from the General Fund.

PETE WILSON, Governor
